With respect to PPL Energy Supply's Pennsylvania plants, PPL Energy Supply believes that installation of chemical additive systems may be necessary at certain coal-fired plants, the capital cost of which is not expected to be significant. PPL Energy Supply continues to analyze the potential impact on operating costs. With respect to PPL Energy Supply's Montana plants, modifications to the air pollution controls installed on Colstrip may be required, the cost of which is not expected to be significant. For the Corette plant, PPL Energy Supply announced in September 2012 its intention, beginning in April 2015, to place the plant in long-term reserve status, suspending the plant's operation, due to expected market conditions and the costs to comply with the MATS requirements. The Corette plant asset group's carrying amount at June 30, 2013 was \$68 million. Although the Corette plant asset group was not determined to be impaired at June 30, 2013, it is reasonably possible that an impairment could occur in future periods, as higher priced sales contracts settle, adversely impacting projected cash

flows. PPL Energy Supply, LG&E and KU are continuing to conduct in-depth reviews of the MATS, including the potential implications to scrubber wastewater discharges. See the discussion of effluent limitations guidelines and standards below. Upon reconsideration of the MATS rule, in March 2013 the EPA revised certain emission limits and related requirements for new power plants. The revised limits are somewhat less onerous than the original proposal, and thereby pose less of an impediment to the construction of new coal-fired power plants.

Regional Haze and Visibility

The EPA's regional haze programs were developed under the Clean Air Act to eliminate man-made visibility degradation by 2064. Under the programs, states are required to take action via state plans to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977.

The primary power plant emissions affecting visibility are sulfur dioxide, nitrogen oxide and particulates. To date, the focus of regional haze activity has been the western U.S. because, until recently, BART requirements for sulfur dioxide and nitrogen oxide reductions in the eastern U.S. were largely addressed through compliance with other regulatory programs, such as CSAPR or CAIR. More specifically, before CAIR was temporarily invalidated in 2008, the EPA had determined, and the Circuit Court had affirmed, that a state could accept region-wide reductions under the CAIR trading program to satisfy BART requirements. After CAIR was temporarily invalidated, the EPA adopted a final rule providing that states subject to CSAPR (which replaced CAIR) may rely on participation in the CSAPR trading program as an alternative to BART. However, the Circuit Court's August 2012 decision to vacate and remand CSAPR and to implement CAIR in its place on an interim basis leaves power plants located in the eastern U.S., including PPL's plants in Pennsylvania and Kentucky, exposed to reductions in sulfur dioxide and nitrogen oxides as required by BART, unless the Circuit Court's decision, now pending before the U.S. Supreme Court, is overturned.

In addition to this exposure stemming from the remand of CSAPR, LG&E's Mill Creek Units 3 and 4 are required to reduce sulfuric acid mist emissions because they were determined to have a significant regional haze impact. These reductions are in the Kentucky Division of Air Quality's regional haze state implementation plan that was submitted to the EPA. LG&E is currently installing sorbent injection technology to comply with these reductions, the costs of which are not expected to be significant.

In Montana, the EPA Region 8 developed the regional haze plan as the Montana Department of Environmental Quality declined to develop a BART state implementation plan. In September 2012, the EPA issued its final Federal Implementation Plan (FIP) for the Montana regional haze rule. The final FIP indicated that no additional controls were assumed for Corette or Colstrip Units 3 and 4, but proposed tighter limits for Corette and Colstrip Units 1 and 2. PPL Energy Supply expects to meet these tighter permit limits at Corette without any significant changes to operations, although other requirements have led to the planned suspension of operations at Corette beginning in April 2015 (see "MATS" above). See "Mercury and Other Hazardous Air Pollutants" discussion above. Under the final FIP, Colstrip Units 1 and 2 may require additional controls, including the possible installation of an SNCR and other technology, to meet more stringent nitrogen oxide and sulfur dioxide limits. The cost of these potential additional controls, if required, could be significant. In November 2012, PPL filed a petition for review of the Montana Regional Haze FIP with the U.S. Court of Appeals for the Ninth Circuit. Environmental groups have also filed a petition for review. The two matters have been consolidated, and litigation is on-going.

New Source Review (NSR)

The EPA has continued its NSR enforcement efforts targeting coal-fired generating plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act. In April 2009, PPL received EPA information requests for its Montour and Brunner Island plants. PPL and the EPA have exchanged certain information regarding this matter. In January 2009, PPL, PPL Energy Supply and other companies that own or operate the Keystone plant in Pennsylvania received a notice of violation from the EPA alleging that certain projects were undertaken without proper NSR compliance. In May and November 2012, PPL Montana received information requests from the EPA regarding projects undertaken during a Spring 2012 maintenance outage at Colstrip Unit 1. In September 2012, PPL Montana received an information request from the Montana Department of Environmental Quality regarding Colstrip Unit 1 and other projects. PPL and PPL Energy Supply cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In March 2009, KU received an EPA notice alleging that KU violated certain provisions of the Clean Air Act's rules governing NSR and prevention of significant deterioration by installing sulfur dioxide scrubbers and SCR controls at its Ghent plant without assessing potential increased sulfuric acid mist emissions. KU contends that the projects in question were pollution control projects, and therefore exempt from the requirements cited by the EPA. In December 2009, the EPA

issued an information request on this matter. In September 2012, the parties reached a tentative settlement addressing the Ghent NSR matter that seeks to resolve a September 2007 notice of violation alleging opacity violations at the plant. A proposed consent decree was filed in the U.S. District Court for the Eastern District of Kentucky in December 2012. PPL, LKE and KU cannot predict the outcome of this matter until the consent decree is entered by the Court, but currently do not expect such outcome to result in costs in excess of amounts already accrued, which amounts are not material.

In August 2007, LG&E received information requests for the Mill Creek and Trimble County plants, and KU received requests for the Ghent plant, but they have received no further communications from the EPA since providing their responses. PPL, LKE, LG&E and KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

States and environmental groups also have commenced litigation alleging violations of the NSR regulations by coal-fired generating plants across the nation. See "Legal Matters" above for information on a lawsuit filed by environmental groups in March 2013 against PPL Montana and other owners of Colstrip.

If PPL subsidiaries are found to have violated NSR regulations, PPL, PPL Energy Supply, LKE, LG&E and KU would, among other things, be required to meet permit limits reflecting Best Available Control Technology (BACT) for the emissions of any pollutant found to have significantly increased due to a major plant modification. The costs to meet such limits, including installation of technology at certain units, could be significant.

TC2 Air Permit (PPL, LKE, LG&E and KU)

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which in January 2010 were incorporated into a final revised permit issued by the KDAQ. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, PPL, LKE, LG&E and KU cannot predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

GHG Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has authority under the Clean Air Act to regulate GHG emissions from new motor vehicles, in April 2010, the EPA and the U.S. Department of Transportation issued new light-duty vehicle emissions standards that applied beginning with 2012 model year vehicles. The EPA also clarified that this standard, beginning in 2011, authorized regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act. As a result, any new sources or major modifications to existing GHG sources causing a net significant emissions increase now require adherence to the BACT permit limits for GHGs. The rules were challenged, and in June 2012 the Circuit Court upheld the EPA's regulations. In December 2012, the Circuit Court denied petitions for rehearing pertaining to its June 2012 opinion, and the U.S. Supreme Court has been petitioned by industry groups and sources to hear the case.

In addition, in April 2012, the EPA proposed New Source Performance Standards (NSPS) for carbon dioxide emissions from new coal-fired generating units, combined-cycle natural gas units, and integrated gasification combined-cycle units. The proposal would require new coal plants to achieve the same stringent limitations on carbon dioxide emissions as the best performing new gas plants. There presently is no commercially available technology to allow new coal plants to meet these limitations and, as a result, the EPA's proposal would effectively preclude new construction of coal-fired generation. Compliance could even be difficult for certain new gas-fired plants. In December 2012, the Circuit Court dismissed consolidated challenges to the NSPS holding that the proposed rule is not a final agency action.

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a new proposal for new power plants by September 20, 2013, with a final rule in a timely fashion thereafter, and to issue proposed standards for existing plants by June 1, 2014 with a final rule to be issued by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and the state implementation plans. The Administration's

recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may also lead to more costly regulatory requirements. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect PPL and others in the industry as transmission system modifications to improve the ability to withstand major storms may be needed in order to meet those requirements.

At the regional level, ten northeastern states signed a Memorandum of Understanding (MOU) agreeing to establish a GHG emission cap-and-trade program, called the Regional Greenhouse Gas Initiative (RGGI). The program commenced in January 2009 and calls for stabilizing carbon dioxide emissions, at base levels established in 2005, from electric power plants with capacity greater than 25 MW. The MOU also provides for a 10% reduction, by 2019, in carbon dioxide emissions from base levels.

Pennsylvania has not stated an intention to join the RGGI, but enacted the Pennsylvania Climate Change Act of 2008 (PCCA). The PCCA established a Climate Change Advisory Committee to advise the PADEP on the development of a Climate Change Action Plan. In December 2009, the Advisory Committee finalized its Climate Change Action Report and identified specific actions that could result in reducing GHG emissions by 30% by 2020. Some of the proposed actions, such as a mandatory 5% efficiency improvement at power plants, could be unachievable. To date, there have been no regulatory or legislative actions taken to implement the recommendations of the report.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. To date, the state has not issued a final plan. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting plants and, although the decided cases to date have not sustained claims brought on the basis of these theories of liability, the law remains unsettled on these claims. In September 2009, the U.S. Court of Appeals for the Second Circuit in the case of *AEP v. Connecticut* reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the Second Circuit and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In addition, in *Comer v. Murphy Oil* (*Comer case*), the U.S. Court of Appeals for the Fifth Circuit (Fifth Circuit) declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the *Comer case* named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a petition to reverse the Fifth Circuit's ruling. In May 2011, the plaintiffs in the *Comer case* filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including KU and three other indirect subsidiaries of LKE, under a Mississippi statute that allows the re-filing of an action in certain circumstances. In March 2012, the Mississippi federal district court granted defendants' motions to dismiss the state common law claims. Plaintiffs appealed to the U.S. Court of Appeals for the Fifth Circuit and in May 2013 the Fifth Circuit affirmed the district court's dismissal of the case. Additional litigation in federal and state courts over such issues is continuing. PPL, LKE and KU cannot predict the outcome of these lawsuits or estimate a range of reasonably possible losses, if any.

Renewable Energy Legislation (PPL, PPL Energy Supply, LKE, LG&E and KU)

There has been interest in renewable energy legislation at both the state and federal levels. Federal legislation on renewable energy is not expected to be enacted this year. In Pennsylvania, bills were recently introduced calling for an increase in AEPS Tier 1 obligations and to create a \$25 million permanent funding program for solar generation. A bill adding new hydropower to Montana's renewable portfolio standard was enacted with an effective date of October 1, 2013.

PPL, PPL Energy Supply, LKE, LG&E and KU believe there are financial, regulatory and logistical uncertainties related to the implementation of renewable energy mandates that will need to be resolved before the impact of such requirements on them can be estimated. Such uncertainties, among others, include the need to provide back-up supply to augment intermittent renewable generation, potential generation over-supply that could result from such renewable generation and back-up, impacts to PJM's capacity market and the need for substantial changes to transmission and distribution systems to accommodate renewable energy sources. These uncertainties are not directly addressed by proposed legislation. PPL and PPL Energy Supply cannot predict at this time the effect on their competitive plants' future competitive position, results of

operation, cash flows and financial position of renewable energy mandates that may be adopted, although the costs to implement and comply with any such requirements could be significant.

Water/Waste

Coal Combustion Residuals (CCRs) (PPL, PPL Energy Supply, LKE, LG&E and KU)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous) under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. Regulating CCRs as a hazardous waste under Subtitle C of the RCRA would materially increase costs and result in early retirements of many coal-fired plants, as it would require plants to retrofit their operations to comply with full hazardous waste requirements for the generation of CCRs and associated waste waters through generation, transportation and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. The EPA's proposed approach to regulate CCRs as non-hazardous waste under Subtitle D of the RCRA would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, PPL expects that several of its plants in Kentucky and Montana could be significantly impacted by the EPA's proposed non-hazardous waste regulations, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. PPL has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several PPL plants and PPL has implemented or is implementing certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) requesting comments on selected documents it received during the comment period for the proposed regulations, and on July 29, 2013, the EPA released a pre-publication version of a second NODA seeking comment on additional information related to its proposal. On July 25, 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from regulating CCRs under RCRA and sets rules governing state programs; however, prospects remain uncertain for similar legislation to pass in the Senate.

A coalition of environmental groups and two CCR recycling companies have filed lawsuits against the EPA for failure to perform nondiscretionary duties under RCRA, which could require a deadline for the EPA to issue strict CCR regulations. The two CCR recycling companies are asserting that the EPA should regulate CCRs as a non-hazardous waste that would allow for continued recycling of CCRs.

A final rulemaking is currently expected before the end of 2015. However, the timing of the final regulations could be accelerated by the outcome of the above litigation, which could require the EPA to issue its regulations sooner.

PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on their facilities, but the financial impact could be material if CCRs are regulated as hazardous waste and significant if regulated as non-hazardous.

Trimble County Landfill Permit (PPL, LKE, LG&E and KU)

In May 2011, LG&E submitted an application for a special waste landfill permit to handle coal combustion residuals generated at the Trimble County plant. After extensive review of the permit application in May 2013, the Kentucky Division of Waste Management denied the permit application on the grounds that the proposed facility would violate the Kentucky Cave Protection Act because it would eliminate an on-site karst feature considered to be a cave. LG&E and KU are assessing additional options for managing coal combustion residuals including construction of a landfill at an alternate site adjacent to the plant. Submittal of a new permit application for an alternative site may result in additional environmental considerations in the course of the permitting process and substantial additional costs. LG&E and KU are unable to determine the precise impact of this matter until they select an alternate management option and complete a detailed engineering design.

Martins Creek Fly Ash Release (PPL and PPL Energy Supply)

In 2005, approximately 100 million gallons of water containing fly ash was released from a disposal basin at the Martins Creek plant used in connection with the operation of the plant's two 150 MW coal-fired generating units. This resulted in ash

being deposited onto adjacent roadways and fields, and into a nearby creek and the Delaware River. PPL Energy Supply determined that the release was caused by a failure in the disposal basin's discharge structure. PPL Energy Supply conducted extensive clean-up and completed studies, in conjunction with a group of natural resource trustees and the Delaware River Basin Commission, evaluating the effects of the release on the river's sediment, water quality and ecosystem.

The PADEP filed a complaint in Pennsylvania Commonwealth Court against PPL Martins Creek and PPL Generation, alleging violations of various state laws and regulations and seeking penalties and injunctive relief. PPL Energy Supply and the PADEP have settled this matter. The settlement required PPL Energy Supply to submit a report on the completed studies of possible natural resource damages. PPL Energy Supply subsequently submitted the assessment report to the Pennsylvania and New Jersey regulatory agencies and has continued discussing potential natural resource damages and mitigation options with the agencies. Subsequently, in August 2011 the PADEP submitted its National Resource Damage (NRD) Assessment report to the court and interveners. In December 2011, the interveners commented on the PADEP report and in February 2012 the PADEP and PPL Energy Supply filed separate responses with the court. In March 2012, the court dismissed the interveners' case, and the interveners appealed the dismissal to the Pennsylvania Supreme Court. In June 2013 the Supreme Court dismissed the appeal. Following this ruling, PPL Energy Supply is proceeding to finalize the NRD settlement with the PADEP and other NRD trustees.

Through June 30, 2013, PPL Energy Supply has spent \$28 million for remediation and related costs and an insignificant remediation liability remains on the balance sheet. PPL and PPL Energy Supply cannot be certain of the outcome of the NRD settlement or the associated costs, the outcome of any new lawsuit that may be brought by citizens or businesses or the nature of any other regulatory or legal actions that may be initiated against PPL, PPL Energy Supply or their subsidiaries as a result of the disposal basin release. However, PPL and PPL Energy Supply currently do not expect such outcomes to result in significant losses above the amounts currently recorded.

Seepages and Groundwater Infiltration - Pennsylvania, Montana and Kentucky

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Seepages or groundwater infiltration have been detected at active and retired wastewater basins and landfills at various PPL, PPL Energy Supply, LKE, LG&E and KU plants. PPL, PPL Energy Supply, LKE, LG&E and KU have completed or are completing assessments of seepages or groundwater infiltration at various facilities and have completed or are working with agencies to implement assessment or abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

(PPL and PPL Energy Supply)

In 2007, six plaintiffs filed a lawsuit in the Montana Sixteenth Judicial District Court against the Colstrip plant owners asserting property damage due to seepage from plant wastewater ponds. A settlement agreement was reached in July 2010, which would have resulted in a payment by PPL Montana, but certain of the plaintiffs later argued the settlement was not final. The Colstrip plant owners filed a motion to enforce the settlement and in October 2011 the court granted the motion and ordered the settlement to be completed in 60 days. The plaintiffs appealed the October 2011 order to the Montana Supreme Court, which affirmed the district court's order enforcing the settlement in December 2012 and denied plaintiff's motion for rehearing in February 2013. The parties are still in negotiations regarding the final settlement documents. PPL Montana's share of the settlement is not expected to be significant.

In August 2012, PPL Montana entered into an Administrative Order on Consent (AOC) with the MDEQ which establishes a comprehensive process to investigate and remediate groundwater seepage impacts related to the wastewater facilities at the Colstrip power plant. The AOC requires that within five years, PPL Montana provide financial assurance to the MDEQ for the costs associated with closure and future monitoring of the waste-water treatment facilities. PPL Montana cannot predict at this time if the actions required under the AOC will create the need to adjust the existing ARO related to these facilities.

In September 2012, Earthjustice filed an affidavit pursuant to Montana's Major Facility Siting Act (MFSA) that sought review of the AOC by Montana's Board of Environmental Review (BER) on behalf of the Sierra Club, the MEIC, and the National Wildlife Federation (NWF). In September 2012, PPL Montana filed an election with the BER to have this proceeding conducted in Montana state district court as contemplated by the MFSA. In October 2012, Earthjustice filed a petition for review of the AOC in the Montana state district court in Rosebud County.

In late October 2012, Earthjustice filed a second complaint against the MDEQ and PPL Montana in state district court in Lewis and Clark County on behalf of the Sierra Club, the MEIC and the NWF. This complaint alleges that the defendants have failed to take action under the MFSA and the Montana Water Quality Act to effectively monitor and correct issues of

coal ash disposal and wastewater ponds at the Colstrip plant. The complaint seeks a declaration that the operations of the impoundments violate the statutes referred to above, requests a writ of mandamus directing the MDEQ to enforce the same and seeks recovery of attorneys' fees and costs. In May 2013, the court granted MDEQ's and PPL Montana's motion to dismiss. It is unknown at this time whether the complainants will appeal this decision.

Clean Water Act 316(b) (PPL, PPL Energy Supply, LKE, LG&E and KU)

The EPA published proposed rule 316(b) for existing facilities in April 2011. The EPA has been evaluating the comments it received to the proposed rule and meeting with industry groups to discuss options. The proposed rule contains two requirements to reduce impact to aquatic organisms at cooling water intake structures. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens (impingement) regardless of the levels of mortality actually occurring or the cost to achieve the standards. The second requirement is to determine and install the best technology available to reduce mortality of aquatic organisms pulled through a plant's cooling water system (entrainment). A form of cost-benefit analysis is allowed for this second requirement involving a site-specific evaluation based on nine factors, including impacts to energy delivery reliability and the remaining useful life of the plant. The final rule is expected to be issued in November 2013. Until the final rule is issued, PPL, PPL Energy Supply, LKE, LG&E and KU cannot reasonably estimate a range of reasonably possible costs, if any, that would be required to comply with such a regulation.

Effluent Limitations Guidelines (ELGs) and Standards (PPL, PPL Energy Supply, LKE, LG&E and KU)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations contain requirements that would affect the inspection and operation of CCR facilities, if finalized. The EPA has indicated that it will coordinate these regulations with the regulation of CCRs discussed above. The proposal contains alternative approaches, some of which could significantly impact PPL's coal-fired plants. PPL is working with industry groups to comment on the proposed regulation. The final regulation is expected to be issued in May 2014. At the present time, PPL, PPL Energy Supply, LKE, LG&E and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

Other Issues (PPL, PPL Energy Supply, LKE, LG&E and KU)

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxic Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all PCB-containing equipment. The EPA is planning to propose the revised regulations in 2014. PCBs are found, in varying degrees, in all of the Registrants' operations. The Registrants cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on their facilities, but the costs could be significant.

A PPL Energy Supply subsidiary has investigated alternatives to exclude fish from the discharge channel at its Brunner Island plant, but the subsidiary and the PADEP have concluded that a barrier method to exclude fish is not workable. In June 2012, a Consent Order and Agreement (COA) was signed that allows the subsidiary to study a change in a cooling tower operational method that may keep fish from entering the channel. Should this approach fail, the COA requires a retrofit of impingement control technology at the intakes to the cooling towers, the cost of which could be significant.

In May 2010, the subsidiary received a draft NPDES permit (renewed) for the Brunner Island plant from the PADEP. This permit includes new technology-based limits for the scrubber wastewater plant. Some of these limits may not be achievable with the existing treatment system. Several agencies and environmental groups commented on the draft permit, raising issues that must be resolved to obtain a final permit for the plant. PPL Energy Supply cannot predict the outcome of the final resolution of the permit issues at this time, or what impact, if any, they would have on this facility, but the costs could be significant.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to the Trimble Circuit Court, but the case was subsequently transferred to the Franklin Circuit Court. PPL, LKE, LG&E and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

The EPA and the Army Corps of Engineers are working on a guidance document that will expand the federal government's interpretation of what constitutes "waters of the U.S." subject to regulation under the Clean Water Act. This change has the potential to affect generation and delivery operations, with the most significant effect being the potential elimination of the existing regulatory exemption for plant waste water treatment systems. The costs that may be imposed on the Registrants as a result of any eventual expansion of this interpretation cannot reliably be estimated at this time but could be significant.

Superfund and Other Remediation (PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL Electric is potentially responsible for costs at several sites listed by the EPA under the federal Superfund program, including the Columbia Gas Plant site, the Metal Bank site and the Ward Transformer site. Clean-up actions have been or are being undertaken at all of these sites, the costs of which have not been significant to PPL Electric. However, should the EPA require different or additional measures in the future, or should PPL Electric's share of costs at multi-party sites increase substantially more than currently expected, the costs could be significant.

PPL Electric, LG&E and KU are remediating or have completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which PPL Electric, LG&E and KU may be liable for remediation. These include a number of former coal gas manufacturing plants in Pennsylvania and Kentucky previously owned or operated or currently owned by predecessors or affiliates of PPL Electric, LG&E and KU. There are additional sites, formerly owned or operated by PPL Electric, LG&E and KU predecessors or affiliates, for which PPL Electric, LG&E and KU lack information on current site conditions and are therefore unable to predict what, if any, potential liability they may have.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which PPL Electric, LG&E and KU currently lack information, the costs of remediation and other liabilities could be material. PPL, PPL Electric, LKE, LG&E and KU cannot estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require several PPL subsidiaries to take more extensive assessment and remedial actions at former coal gas manufacturing plants. PPL, PPL Electric, LKE, LG&E and KU cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, PPL Energy Supply, PPL Electric, LG&E and KU undertake remedial action in response to spills or other releases at various on-site and off-site locations, negotiate with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiate with property owners and other third parties alleging impacts from PPL's operations and undertake similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on their operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in significant additional costs for the Registrants.

Environmental Matters - WPD (PPL)

WPD's distribution businesses are subject to environmental regulatory and statutory requirements. PPL believes that WPD has taken and continues to take measures to comply with the applicable laws and governmental regulations for the protection of the environment.

Other

Nuclear Insurance (PPL and PPL Energy Supply)

PPL Susquehanna is a member of certain insurance programs that provide coverage for property damage to members' nuclear generating plants. Effective April 1, 2013, facilities at the Susquehanna plant are insured against property damage losses up to \$2.50 billion under these programs. PPL Susquehanna is also a member of an insurance program that provides insurance coverage for the cost of replacement power during prolonged outages of nuclear units caused by certain specified conditions.

Under the property and replacement power insurance programs, PPL Susquehanna could be assessed retroactive premiums in the event of the insurers' adverse loss experience. Effective April 1, 2013, this maximum assessment was \$46 million.

In the event of a nuclear incident at the Susquehanna plant, PPL Susquehanna's public liability for claims resulting from such incident would be limited to \$12.6 billion under provisions of The Price-Anderson Act as amended. PPL Susquehanna is protected against this liability by a combination of commercial insurance and an industry assessment program.

In the event of a nuclear incident at any of the reactors covered by The Price-Anderson Act as amended, PPL Susquehanna could be assessed up to \$235 million per incident, payable at \$35 million per year.

Guarantees and Other Assurances

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

In the normal course of business, the Registrants enter into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

(PPL)

PPL fully and unconditionally guarantees all of the debt securities of PPL Capital Funding.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The table below details guarantees provided at June 30, 2013. The total recorded liability at June 30, 2013 and December 31, 2012, was \$23 million and \$24 million for PPL and \$20 million for both periods for LKE. The probability of expected payment/performance under each of these guarantees is remote except for "WPD guarantee of pension and other obligations of unconsolidated entities" and "Indemnification of lease termination and other divestitures." For reporting purposes, on a consolidated basis, all guarantees of PPL Energy Supply (other than the letters of credit), PPL Electric, LKE, LG&E and KU also apply to PPL, and all guarantees of LG&E and KU also apply to LKE.

	<u>Exposure at June 30, 2013 (a)</u>	<u>Expiration Date</u>
<u>PPL</u>		
Indemnifications related to the WPD Midlands acquisition	(b)	
WPD indemnifications for entities in liquidation and sales of assets	\$ 10 (c)	2018
WPD guarantee of pension and other obligations of unconsolidated entities	87 (d)	2015
<u>PPL Energy Supply</u>		
Letters of credit issued on behalf of affiliates	23 (e)	2013 - 2014
Retrospective premiums under nuclear insurance programs	46 (f)	
Nuclear claims assessment under The Price-Anderson Act as amended	235 (g)	
Indemnifications for sales of assets	250 (h)	2025
Indemnification to operators of jointly owned facilities	6 (i)	
Guarantee of a portion of a divested unconsolidated entity's debt	22 (j)	2018
<u>PPL Electric</u>		
Guarantee of inventory value	29 (k)	2017
<u>LKE</u>		
Indemnification of lease termination and other divestitures	301 (l)	2021 - 2023
<u>LG&E and KU</u>		
LG&E and KU guarantee of shortfall related to OVEC	(m)	

(a) Represents the estimated maximum potential amount of future payments that could be required to be made under the guarantee.

(b) Prior to PPL's acquisition, WPD Midlands Holdings Limited had agreed to indemnify certain former directors of a Turkish entity, in which WPD Midlands Holdings Limited previously owned an interest, for any liabilities that may arise as a result of an investigation by Turkish tax authorities, and PPL WEM has received a cross-indemnity from E.ON AG with respect to these indemnification obligations. Additionally, PPL subsidiaries agreed to provide indemnifications to subsidiaries of E.ON AG for certain liabilities relating to properties and assets owned by affiliates of E.ON AG that were transferred to WPD Midlands in connection with the acquisition. The maximum exposure and expiration of these indemnifications cannot be estimated because the maximum potential liability is not capped and the expiration date is not specified in the transaction documents.

- (c) In connection with the liquidation of wholly owned subsidiaries that have been deconsolidated upon turning the entities over to the liquidators, certain affiliates of PPL Global have agreed to indemnify the liquidators, directors and/or the entities themselves for any liabilities or expenses arising during the liquidation process, including liabilities and expenses of the entities placed into liquidation. In some cases, the indemnifications are limited to a maximum amount that is based on distributions made from the subsidiary to its parent either prior or subsequent to being placed into liquidation. In other cases, the maximum amount of the indemnifications is not explicitly stated in the agreements. The indemnifications generally expire two to seven years subsequent to the date of dissolution of the entities. The exposure noted only includes those cases in which the agreements provide for a specific limit on the amount of the indemnification, and the expiration date was based on an estimate of the dissolution date of the entities.

In connection with their sales of various businesses, WPD and its affiliates have provided the purchasers with indemnifications that are standard for such transactions, including indemnifications for certain pre-existing liabilities and environmental and tax matters. In addition, in connection with certain of these sales, WPD and its affiliates have agreed to continue their obligations under existing third-party guarantees, either for a set period of time following the transactions or upon the condition that the purchasers make reasonable efforts to terminate the guarantees. Finally, WPD and its affiliates remain secondarily responsible for lease payments under certain leases that they have assigned to third parties.

- (d) As a result of the privatization of the utility industry in the U.K., certain electric associations' roles and responsibilities were discontinued or modified. As a result, certain obligations, primarily pension-related, associated with these organizations have been guaranteed by the participating members. Costs are allocated to the members based on predetermined percentages as outlined in specific agreements. However, if a member becomes insolvent, costs can be reallocated to and are guaranteed by the remaining members. At June 30, 2013, WPD has recorded an estimated discounted liability based on its current allocated percentage of the total expected costs for which the expected payment/performance is probable. Neither the expiration date nor the maximum amount of potential payments for certain obligations is explicitly stated in the related agreements. Therefore, they have been estimated based on the types of obligations.
- (e) Standby letter of credit arrangements under PPL Energy Supply's credit facilities for the purposes of protecting various third parties against nonperformance by PPL. This is not a guarantee by PPL on a consolidated basis.
- (f) PPL Susquehanna is contingently obligated to pay this amount related to potential retrospective premiums that could be assessed under its nuclear insurance programs. See "Nuclear Insurance" above for additional information.
- (g) This is the maximum amount PPL Susquehanna could be assessed for each incident at any of the nuclear reactors covered by this Act. See "Nuclear Insurance" above for additional information.
- (h) PPL Energy Supply's maximum exposure with respect to certain indemnifications and the expiration of the indemnifications cannot be estimated because, in the case of certain indemnification provisions, the maximum potential liability is not capped by the transaction documents and the expiration date is based on the applicable statute of limitations. The exposure and expiration dates noted are only for those cases in which the agreements provide for specific limits. The indemnification provisions described below are in each case subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of most representations and warranties.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchaser of the Long Island generation business for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including liabilities relating to certain renewable energy facilities which were previously owned by one of the PPL subsidiaries sold in the transaction but which were unrelated to the Long Island generation business. The indemnification provisions for most representations and warranties expired in the third quarter of 2011.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchasers of the Maine hydroelectric facilities for damages arising out of any breach of the representations, warranties and covenants under the respective transaction agreements and for damages arising out of certain other matters, including liabilities of the PPL Energy Supply subsidiary relating to the pre-closing ownership or operation of those hydroelectric facilities. The indemnification provisions for most representations and warranties expired in the fourth quarter of 2012.

Subsidiaries of PPL Energy Supply have agreed to provide indemnification to the purchasers of certain non-core generation facilities sold in March 2011 for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreements and for damages arising out of certain other matters relating to the facilities that were the subject of the transaction, including certain reduced capacity payments (if any) at one of the facilities in the event specified PJM rule changes are proposed and become effective. The indemnification provisions for most representations and warranties expired in the first quarter of 2012.

- (i) In December 2007, a subsidiary of PPL Energy Supply executed revised owners agreements for two jointly owned facilities, the Keystone and Conemaugh generating plants. The agreements require that in the event of any default by an owner, the other owners fund contributions for the operation of the generating plants, based upon their ownership percentages. The non-defaulting owners, who make up the defaulting owner's obligations, are entitled to the generation entitlement of the defaulting owner, based upon their ownership percentage. The exposure shown reflects the PPL Energy Supply subsidiary's share of the maximum obligation. The agreements do not have an expiration date.
- (j) A PPL Energy Supply subsidiary owned a one-third equity interest in Safe Harbor Water Power Corporation (Safe Harbor) that was sold in March 2011. Beginning in 2008, PPL Energy Supply guaranteed one-third of any amounts payable with respect to certain senior notes issued by Safe Harbor. Under the terms of the sale agreement, PPL Energy Supply continues to guarantee the portion of Safe Harbor's debt, but received a cross-indemnity from the purchaser, secured by a lien on the purchaser's stock of Safe Harbor, in the event PPL Energy Supply is required to make a payment under the guarantee. The exposure noted reflects principal only.
- (k) PPL Electric entered into contracts with a third party logistics firm that provides inventory procurement and fulfillment services. Under the contracts, the logistics firm has title to the inventory purchased for PPL Electric's use. Upon termination of the contracts, PPL Electric has guaranteed to purchase any remaining inventory that has not been used or sold by the logistics firm at the weighted-average cost at which the logistics firm purchased the inventory.
- (l) LKE provides certain indemnifications, the most significant of which relate to the termination of the WKE lease in July 2009. These guarantees cover the due and punctual payment, performance and discharge by each party of its respective present and future obligations. The most comprehensive of these guarantees is the LKE guarantee covering operational, regulatory and environmental commitments and indemnifications made by WKE under the WKE Transaction Termination Agreement. This guarantee has a term of 12 years ending July 2021, and a cumulative maximum exposure of \$200 million. Certain items such as government fines and penalties fall outside the cumulative cap. LKE has contested the applicability of the indemnification requirement relating to one matter presented by a counterparty under this guarantee. Another guarantee with a maximum exposure of \$100 million covering other indemnifications expires in 2023. In May 2012, LKE's indemnitee received an arbitration panel's decision affecting this matter, which granted LKE's indemnitee certain rights of first refusal to purchase excess power at a market-based price rather than at an absolute fixed price. In January 2013, LKE's indemnitee commenced a proceeding in the Kentucky Court of Appeals appealing the December 2012 order of the Henderson Circuit Court, confirming the arbitration award. LKE believes its indemnification obligations in this matter remain subject to various uncertainties, including potential for additional legal challenges regarding the arbitration decision as well as future prices, availability and demand for the subject excess power. LKE continues to evaluate various legal and commercial options with respect to this indemnification matter. The ultimate outcomes of the WKE termination-related indemnifications cannot be predicted at this time. Additionally, LKE has indemnified various third parties

related to historical obligations for other divested subsidiaries and affiliates. The indemnifications vary by entity and the maximum exposures range from being capped at the sale price to no specified maximum; however, LKE is not aware of formal claims under such indemnities made by any party at this time. LKE could be required to perform on these indemnifications in the event of covered losses or liabilities being claimed by an indemnified party. In the second quarter of 2012, LKE adjusted its estimated liability for certain of these indemnifications by \$9 million (\$5 million after-tax), which is reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statement of Income. The adjustment was recorded in the Kentucky Regulated segment for PPL. LKE cannot predict the ultimate outcomes of such indemnification circumstances, but does not currently expect such outcomes to result in significant losses above the amounts recorded.

- (m) Pursuant to the OVEC power purchase contract, expiring in June 2040, LG&E and KU are obligated to pay a demand charge which includes, among other charges, debt service and amortization toward principal retirement, decommissioning costs, post-retirement and post-employment benefits costs (other than pensions), and reimbursement of plant operating, maintenance and other expenses. The demand charge is expected to cover LG&E's and KU's shares of the cost of the listed items over the term of the contract. However, in the event there is a shortfall in covering these costs, LG&E and KU are obligated to pay their share of the excess debt service, post-retirement and decommissioning costs. The maximum exposure and the expiration date of these potential obligations are not presently determinable.

The Registrants provide other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage requires a maximum \$4 million deductible for PPL, PPL Energy Supply and PPL Electric and \$2 million for LKE, LG&E and KU, per occurrence and provides maximum aggregate coverage of \$225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

PLR Contracts/Purchase of Accounts Receivable (PPL Energy Supply and PPL Electric)

PPL Electric holds competitive solicitations for PLR generation supply. PPL EnergyPlus has been awarded a portion of the PLR generation supply through these competitive solicitations. The sales and purchases between PPL EnergyPlus and PPL Electric are included in the Statements of Income as "Wholesale energy marketing to affiliate" by PPL Energy Supply and as "Energy purchases from affiliate" by PPL Electric.

Under the standard Default Service Supply Master Agreement for the solicitation process, PPL Electric requires all suppliers to post collateral once credit exposures exceed defined credit limits. PPL EnergyPlus is required to post collateral with PPL Electric: (a) when the market price of electricity to be delivered by PPL EnergyPlus exceeds the contract price for the forecasted quantity of electricity to be delivered; and (b) this market price exposure exceeds a contractual credit limit. Based on the current credit rating of PPL Energy Supply, as guarantor, PPL EnergyPlus' credit limit was \$35 million at June 30, 2013. In no instance is PPL Electric required to post collateral to suppliers under these supply contracts.

PPL Electric's customers may choose an alternative supplier for their generation supply. See Note 2 for additional information regarding PPL Electric's purchases of accounts receivable from alternative suppliers, including PPL EnergyPlus.

At June 30, 2013, PPL Energy Supply had a net credit exposure of \$26 million from PPL Electric from its commitment as a PLR supplier and from the sale of its accounts receivable to PPL Electric.

Allocations of PPL Services Costs (PPL Energy Supply, PPL Electric and LKE)

PPL Services provides corporate functions such as financial, legal, human resources and information technology services. PPL Services charges the respective PPL subsidiaries for the cost of such services when they can be specifically identified. The cost of the services that is not directly charged to PPL subsidiaries is allocated to applicable subsidiaries based on an average of the subsidiaries' relative invested capital, operation and maintenance expenses and number of employees. PPL Services charged the following amounts for the periods ended June 30, which PPL management believes are reasonable, including amounts applied to accounts that are further distributed between capital and expense:

	Three Months		Six Months	
	2013	2012	2013	2012
PPL Energy Supply	\$ 52	\$ 53	\$ 109	\$ 110
PPL Electric	34	39	72	81
LKE	4	3	8	8

Intercompany Billings by LKS (LG&E and KU)

LKS provides LG&E and KU with a variety of centralized administrative, management and support services. The cost of these services is directly charged to the company or, for general costs that cannot be directly attributed, charged based on predetermined allocation factors, including the following measures: number of customers, total assets, revenues, number of employees and/or other statistical information. LKS charged the amounts in the table below for the periods ended June 30, which LKE management believes are reasonable, including amounts that are further distributed between capital and expense:

	Three Months		Six Months	
	2013	2012	2013	2012
LG&E	\$ 67	\$ 40	\$ 106	\$ 81
KU	44	35	110	81

In addition, LG&E and KU provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E and LKE and KU are reimbursed through LKS.

Intercompany Borrowings (LKE)

LKE maintains a \$300 million revolving demand note with a PPL Energy Funding subsidiary whereby LKE can borrow funds on a short-term basis at market-based rates. The interest rates on borrowings are equal to one-month LIBOR plus a spread. At June 30, 2013 and December 31, 2012, \$72 million and \$25 million was outstanding and was reflected in "Notes payable with affiliates" on the Balance Sheet. The interest rate on the outstanding borrowing at June 30, 2013 was 1.69%. Interest on the demand note was not significant for the three and six months ended June 30, 2013 and 2012.

Intercompany Derivatives (LKE, LG&E and KU)

Periodically, LG&E and KU enter into forward-starting interest rate swaps with PPL. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties. See Note 14 for additional information on intercompany derivatives.

Intercompany Insurance (PPL Electric)

In May 2013, PPL Electric received \$18.25 million from the settlement of its 2012 storm insurance claims with PPL Power Insurance Ltd. (PPL Power Insurance), a subsidiary of PPL that provides certain insurance coverage to PPL and its subsidiaries.

Effective January 1, 2013, PPL Electric no longer has storm insurance coverage with PPL Power Insurance. See Note 6 for discussion regarding the proposed Storm Damage Expense Rider filed with the PUC by PPL Electric.

Other (PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

See Note 7 for a discussion regarding capital transactions by PPL Energy Supply, PPL Electric, LKE, LG&E and KU. For PPL Energy Supply, PPL Electric, LG&E and KU, refer to Note 9 for discussions regarding intercompany allocations associated with defined benefits.

12. Other Income (Expense) - net

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The breakdown of "Other Income (Expense) - net" for the periods ended June 30 was:

	Three Months		Six Months	
	2013	2012	2013	2012
PPL				
Other Income				
Earnings on securities in NDT funds	\$ 5	\$ 4	\$ 10	\$ 12
Interest income		2	1	3
AFUDC - equity component	2	3	5	5
Earnings (losses) from equity method investments		(4)		(6)
Miscellaneous - Domestic	7	3	9	5
Miscellaneous - U.K.		2	1	2
Total Other Income	14	10	26	21
Other Expense				
Economic foreign currency exchange contracts (Note 14)	(4)	(25)	(123)	(7)
Charitable contributions	4	2	8	6
Miscellaneous - Domestic	1	4	5	8
Miscellaneous - U.K.		(1)	1	1
Total Other Expense	1	(20)	(109)	8
Other Income (Expense) - net	\$ 13	\$ 30	\$ 135	\$ 13
PPL Energy Supply				
Other Income				
Earnings on securities in NDT funds	\$ 5	\$ 4	\$ 10	\$ 12
Interest income	2	1	2	1
Miscellaneous	6	2	7	3
Total Other Income	13	7	19	16
Other Expense				
Charitable contributions	1		2	1
Miscellaneous		1	1	4
Total Other Expense	1	1	3	5
Other Income (Expense) - net	\$ 12	\$ 6	\$ 16	\$ 11

"Other Income (Expense) - net" for the three and six months ended June 30, 2013 and 2012 for PPL Electric is primarily the equity component of AFUDC. The components of "Other Income (Expense) - net" for the three and six months ended June 30, 2013 for LKE, LG&E and KU are not significant. "Other Income (Expense) - net" for the three and six months ended June 30, 2012 for LKE and KU is primarily losses from an equity method investment. The components of "Other Income (Expense) - net" for the three and six months ended June 30, 2012 for LG&E are not significant.

13. Fair Value Measurements and Credit Concentration

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. During the three and six months ended June 30, 2013 and 2012, there were no transfers between Level 1 and Level 2. See Note 1 in each Registrant's 2012 Form 10-K for information on the levels in the fair value hierarchy.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	June 30, 2013				December 31, 2012

The significant unobservable inputs used in and quantitative information about the fair value measurement of assets and liabilities classified as Level 3 are as follows:

June 30, 2013

	Fair Value, net Asset (Liability)	Valuation Technique	Unobservable Input(s)	Range (Weighted Average) (a)
PPL				
Energy commodities				
Retail natural gas sales contracts (b)	\$ 36	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	17% - 100% (82%)
Power sales contracts (c)	(5)	Discounted cash flow	Proprietary model used to calculate forward basis prices	11% - 100% (39%)
Heat rate call option (d)	9	Discounted cash flow	Proprietary model used to calculate forward prices	18% (18%)
Auction rate securities (e)	19	Discounted cash flow	Modeled from SIFMA Index	11% - 78% (63%)
Cross-currency swaps (f)	3	Discounted cash flow	Credit valuation adjustment	11% (11%)

PPL Energy Supply

Energy commodities

Retail natural gas sales contracts (b)	\$ 36	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	17% - 100% (82%)
Power sales contracts (c)	(5)	Discounted cash flow	Proprietary model used to calculate forward basis prices	11% - 100% (39%)
Heat rate call option (d)	9	Discounted cash flow	Proprietary model used to calculate forward prices	18% (18%)
Auction rate securities (e)	16	Discounted cash flow	Modeled from SIFMA Index	11% - 78% (62%)

December 31, 2012

	Fair Value, net Asset (Liability)	Valuation Technique	Unobservable Input(s)	Range (Weighted Average) (a)
PPL				
Energy commodities				
Retail natural gas sales contracts (b)	\$ 24	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	21% - 100% (75%)
Power sales contracts (c)	(4)	Discounted cash flow	Proprietary model used to calculate forward basis prices	24% (24%)
FTR purchase contracts (g)	2	Discounted cash flow	Historical settled prices used to model forward prices	100% (100%)
Auction rate securities (e)	16	Discounted cash flow	Modeled from SIFMA Index	54% - 74% (64%)
Cross-currency swaps (f)	1	Discounted cash flow	Credit valuation adjustment	22% (22%)

PPL Energy Supply

Energy commodities

Retail natural gas sales contracts (b)	\$ 24	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	21% - 100% (75%)
Power sales contracts (c)	(4)	Discounted cash flow	Proprietary model used to calculate forward basis prices	24% (24%)
FTR purchase contracts (g)	2	Discounted cash flow	Historical settled prices used to model forward prices	100% (100%)
Auction rate securities (e)	13	Discounted cash flow	Modeled from SIFMA Index	57% - 74% (65%)

- (a) For energy commodities and auction rate securities, the range and weighted average represent the percentage of fair value derived from the unobservable inputs. For cross-currency swaps, the range and weighted average represent the percentage decrease in fair value due to the unobservable inputs used in the model to calculate the credit valuation adjustment.
- (b) At June 30, 2013, retail natural gas sales contracts extend through 2018, and \$16 million of the fair value is scheduled to deliver within the next 12 months. As the forward price of natural gas increases/(decreases), the fair value of the contracts (decreases)/increases.
- (c) At June 30, 2013, power sales contracts extend into 2018, and \$(5) million of the fair value is scheduled to deliver within the next 12 months. As the forward price of basis increases/(decreases), the fair value of the contracts (decreases)/increases.
- (d) At June 30, 2013, the heat rate call option extends through 2014, and \$6 million of the fair value is scheduled to deliver within the next 12 months. As the market implied heat rate increases/(decreases), the fair value of the contracts increases/(decreases).
- (e) At June 30, 2013, auction rate securities have a weighted average contractual maturity of 23 years. The model used to calculate fair value incorporates an assumption that the auctions will continue to fail. As the modeled forward rates of the SIFMA Index increase/(decrease), the fair value of the securities increases/(decreases).
- (f) At June 30, 2013, cross-currency swaps extend into 2021. The credit valuation adjustment incorporates projected probabilities of default and estimated recovery rates. As the credit valuation adjustment increases/(decreases), the fair value of the swaps (decreases)/increases.

(g) As the forward implied spread increases/(decreases), the fair value of the contracts increases/(decreases).

Net gains and losses on assets and liabilities classified as Level 3 and included in earnings for the periods ended June 30 are reported in the Statements of Income as follows:

	Three Months									
	Energy Commodities, net								Cross-Currency Swaps	
	Unregulated Retail Electric and Gas		Wholesale Energy Marketing		Net Energy Trading Margins		Energy Purchases		Interest Expense

Price Risk Management Assets/Liabilities - Energy Commodities (PPL and PPL Energy Supply)

Energy commodity contracts for electricity, gas, oil and/or emission allowances are generally valued using the income approach, except for exchange-traded derivative gas and oil contracts, which are valued using the market approach and are classified as Level 1. When the lowest level inputs that are significant to the fair value measurement of a contract are observable, the contract is classified as Level 2. Level 2 contracts are valued using inputs which may include quotes obtained from an exchange (where there is insufficient market liquidity to warrant inclusion in Level 1), binding and non-binding broker quotes, prices posted by ISOs or published tariff rates. Furthermore, independent quotes are obtained from the market to validate the forward price curves. Energy commodity contracts include forwards, futures, swaps, options and structured transactions and may be offset with similar positions in exchange-traded markets. To the extent possible, fair value measurements utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these contracts may be valued using models, including standard option valuation models and standard industry models. For example, the fair value of a full-requirement sales contract that delivers power to an illiquid delivery point may be measured by valuing the nearest liquid trading point plus the value of the basis between the two points. The basis input may be from market quotes or historical prices.

When unobservable inputs are significant to the fair value measurement, a contract is classified as Level 3. Level 3 contracts are valued using PPL proprietary models which include significant unobservable inputs such as delivery at a location where pricing is unobservable, assumptions for customer migration or delivery dates that are beyond the dates for which independent quotes are available. Forward transactions, including forward transactions classified as Level 3, are analyzed by PPL's Risk Management department, which reports to the Chief Financial Officer (CFO). Accounting personnel, who also report to the CFO, interpret the analysis quarterly to appropriately classify the forward transactions in the fair value hierarchy. Valuation techniques are evaluated periodically. Additionally, Level 2 and Level 3 fair value measurements include adjustments for credit risk based on PPL's own creditworthiness (for net liabilities) and its counterparties' creditworthiness (for net assets). PPL's credit department assesses all reasonably available market information which is used by accounting personnel to calculate the credit valuation adjustment.

In certain instances, energy commodity contracts are transferred between Level 2 and Level 3. The primary reasons for the transfers during 2013 and 2012 were changes in the availability of market information and changes in the significance of the unobservable inputs utilized in the valuation of the contract. As the delivery period of a contract becomes closer, market information may become available. When this occurs, the model's unobservable inputs are replaced with observable market information.

Price Risk Management Assets/Liabilities - Interest Rate Swaps/Foreign Currency Contracts/Cross-Currency Swaps (PPL, LKE, LG&E and KU)

To manage interest rate risk, PPL, LKE, LG&E and KU use interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. To manage foreign currency exchange risk, PPL uses foreign currency contracts such as forwards, options and cross-currency swaps that contain characteristics of both interest rate and foreign currency contracts. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates) and forward foreign currency exchange rates (e.g., GBP and Euro), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3. For PPL, the primary reason for the transfers during 2013 and 2012 was the change in the significance of the credit valuation adjustment. Cross-currency swaps classified as Level 3 are valued by PPL's Corporate Finance department, which reports to the CFO. Accounting personnel, who also report to the CFO, interpret analysis quarterly to appropriately classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

(PPL and PPL Energy Supply)

NDT Funds

The market approach is used to measure the fair value of equity securities held in the NDT funds.

- The fair value measurements of equity securities classified as Level 1 are based on quoted prices in active markets and are comprised of securities that are representative of the Wilshire 5000 Total Market Index.
- Investments in commingled equity funds are classified as Level 2 and represent securities that track the S&P 500 Index, Dow Jones U.S. Total Stock Market Index and the Dow Jones U.S. Completion Total Stock Market Index. These fair value measurements are based on firm quotes of net asset values per share, which are not obtained from a quoted price in an active market.

Debt securities are generally measured using a market approach, including the use of matrix pricing. Common inputs include reported trades, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as benchmark yields, credit valuation adjustments, reference data from market research publications, monthly payment data, collateral performance and new issue data.

The debt securities held in the NDT funds at June 30, 2013 have a weighted-average coupon of 3.99% and a weighted-average maturity of 7.8 years.

Auction Rate Securities

Auction rate securities include Federal Family Education Loan Program guaranteed student loan revenue bonds, as well as various municipal bond issues. The exposure to realize losses on these securities is not significant.

The fair value of auction rate securities is estimated using an income approach that includes readily observable inputs, such as principal payments and discount curves for bonds with credit ratings and maturities similar to the securities, and unobservable inputs, such as future interest rates that are estimated based on the SIFMA Index, creditworthiness, and liquidity assumptions driven by the impact of auction failures. When the present value of future interest payments is significant to the overall valuation, the auction rate securities are classified as Level 3. The primary reason for the transfers in and out of Level 3 in 2013 and 2012 was the change in discount rates and SIFMA Index.

Auction rate securities are valued by PPL's Treasury department, which reports to the CFO. Accounting personnel, who also report to the CFO, interpret the analysis quarterly to appropriately classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

Financial Instruments Not Recorded at Fair Value (*PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU*)

The carrying amounts of contract adjustment payments related to the Purchase Contract component of the Equity Units and long-term debt on the Balance Sheets and their estimated fair values are set forth below. The fair values of these instruments were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates, which incorporate the credit risk of the Registrants. These instruments are classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	June 30, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
PPL				
Contract adjustment payments (a)	\$ 56	\$ 57	\$ 105	\$ 106
Long-term debt	19,626	21,413	19,476	21,671
PPL Energy Supply				
Long-term debt	3,263	3,462	3,272	3,556
PPL Electric				
Long-term debt	1,967	2,168	1,967	2,333
LKE				
Long-term debt	4,075	4,231	4,075	4,423
LG&E				
Long-term debt	1,112	1,136	1,112	1,178
KU				
Long-term debt	1,842	1,938	1,842	2,056

(a) Reflected in "Other current liabilities" and "Other deferred credits and noncurrent liabilities" on the Balance Sheets.

The carrying value of short-term debt (including notes between affiliates), when outstanding, approximates fair value due to the variable interest rates associated with the financial instruments and is classified as Level 2.

Credit Concentration Associated with Financial Instruments

(*PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU*)

Contracts are entered into with many entities for the purchase and sale of energy. Many of these contracts qualify for NPNS and, as such, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 14 for information on credit policies used to manage credit risk, including master netting arrangements and collateral requirements.

(*PPL*)

At June 30, 2013, PPL had credit exposure of \$1.3 billion from energy trading partners, excluding the effects of netting arrangements, reserves and collateral. As a result of netting arrangements, reserves and collateral, PPL's credit exposure was reduced to \$669 million. The top ten counterparties accounted for \$339 million, or 51%, of this exposure and all had investment grade credit ratings from S&P or Moody's.

(*PPL Energy Supply*)

At June 30, 2013, PPL Energy Supply had credit exposure of \$1.3 billion from energy trading partners, excluding exposure from related parties and the effects of netting arrangements, reserves and collateral. As a result of netting arrangements, reserves and collateral, this credit exposure was reduced to \$667 million. The top ten counterparties accounted for \$339 million, or 51%, of this exposure and all had investment grade credit ratings from S&P or Moody's. See Note 11 for information regarding the related party credit exposure.

(*PPL Electric*)

PPL Electric is exposed to credit risk under energy supply contracts (including its supply contracts with PPL EnergyPlus); however, its PUC-approved cost recovery mechanism is anticipated to substantially eliminate this exposure.

(LKE, LG&E and KU)

At June 30, 2013, LKE's, LG&E's and KU's credit exposure was not significant.

14. Derivative Instruments and Hedging Activities

Risk Management Objectives

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL has a risk management policy approved by the Board of Directors to manage market risk (including price, liquidity and volumetric risk) and credit risk (including non-performance risk and payment default risk). The RMC, comprised of senior management and chaired by the Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, verification of risk and transaction limits, VaR analyses, portfolio stress tests, gross margin at risk analyses, sensitivity analyses, and daily portfolio reporting, including open positions, determinations of fair value, and other risk management metrics.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as liquidity and volumetric risks. Forward contracts, futures contracts, options, swaps and structured transactions, such as tolling agreements, are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices, volumes of full-requirement sales contracts, basis exposure, interest rates and/or foreign currency exchange rates. Many of the contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless they qualify for NPNS.

The table below summarizes the market risks that affect PPL and its subsidiaries.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Commodity price risk (including basis and volumetric risk)	X	X	M	M	M	M
Interest rate risk:						
Debt issuances	X	X	M	M	M	M
Defined benefit plans	X	X	M	M	M	M
NDT securities	X	X				
Equity securities price risk:						
Defined benefit plans	X	X	M	M	M	M
NDT securities	X	X				
Future stock transactions	X					
Foreign currency risk - WPD investment	X					

X = PPL and PPL Energy Supply actively mitigate market risks through their risk management programs described above.

M = The regulatory environments for PPL's regulated entities, by definition, significantly mitigate market risk.

Commodity price and volumetric risks

- PPL is exposed to market and commodity price, basis and volumetric risk through its domestic subsidiaries as described below. Volumetric risk is significantly mitigated at WPD as a result of the method of regulation in the U.K.
- PPL Energy Supply is exposed to commodity price, basis and volumetric risks for energy and energy-related products associated with the sale of electricity from its generating assets and other electricity and gas marketing activities and the purchase of fuel and fuel-related commodities for generating assets, as well as for proprietary trading activities.
- PPL Electric is exposed to commodity price and volumetric risks from its obligation as PLR; however, its PUC-approved cost recovery mechanism substantially eliminates its exposure to market risk. PPL Electric also mitigates its exposure to volumetric risk by entering into full-requirement supply agreements to serve its PLR customers. These supply agreements transfer the volumetric risk associated with the PLR obligation to the energy suppliers.
- LG&E's and KU's rates include certain mechanisms for fuel, gas supply and environmental expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses.

Interest rate risk

- PPL and its subsidiaries are exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. WPD holds over-the-counter cross currency swaps to limit exposure to market fluctuations on interest and principal payments from changes in foreign currency exchange rates and interest rates. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt and LG&E and KU utilize forward starting interest rate swaps to hedge changes in benchmark interest rates.
- PPL and its subsidiaries are exposed to interest rate risk associated with debt securities held by defined benefit plans. This risk is significantly mitigated to the extent that the plans are sponsored at, or sponsored on behalf of, the regulated domestic utilities and for certain plans at WPD due to the recovery mechanisms in place. Additionally, PPL Energy Supply is exposed to interest rate risk associated with debt securities held by the NDT.

Equity securities price risk

- PPL and its subsidiaries are exposed to equity securities price risk associated with defined benefit plans. This risk is significantly mitigated at the regulated domestic utilities and for certain plans at WPD due to the recovery mechanisms in place. Additionally, PPL Energy Supply is exposed to equity securities price risk in the NDT funds.
- PPL is exposed to equity securities price risk from future stock sales and/or purchases.

Foreign currency risk

- PPL is exposed to foreign currency exchange risk primarily associated with its investments in U.K. affiliates.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

PPL is exposed to credit risk from "in-the-money" interest rate and foreign currency derivatives with financial institutions, as well as additional credit risk through certain of its subsidiaries, as discussed below.

PPL Energy Supply is exposed to credit risk from "in-the-money" commodity derivatives with its energy trading partners, which include other energy companies, fuel suppliers and financial institutions.

LKE, LG&E and KU are exposed to credit risk from "in-the-money" interest rate derivatives with PPL.

The majority of PPL and PPL Energy Supply's credit risk stems from commodity derivatives for multi-year contracts for energy sales and purchases. If PPL Energy Supply's counterparties fail to perform their obligations under such contracts and PPL Energy Supply could not replace the sales or purchases at the same or better prices as those under the defaulted contracts, PPL Energy Supply would incur financial losses. Those losses would be recognized immediately or through lower revenues or higher costs in future years, depending on the accounting treatment for the defaulted contracts. In the event a supplier of LKE (through its subsidiaries LG&E and KU) or PPL Electric defaults on its obligation, those entities would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by these entities would be recoverable from customers in future rates, thus mitigating the financial risk for these entities.

PPL and its subsidiaries have credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit. See Note 13 for credit concentration associated with energy trading partners.

Master Netting Arrangements

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL's and PPL Energy Supply's obligation to return counterparty cash collateral under master netting arrangements was \$31 million and \$112 million at June 30, 2013 and December 31, 2012.

PPL Electric, LKE and LG&E had no obligation to return cash collateral under master netting arrangements at June 30, 2013 and December 31, 2012.

PPL, LKE and LG&E had posted cash collateral under master netting arrangements of \$22 million and \$32 million at June 30, 2013 and December 31, 2012.

PPL Energy Supply, PPL Electric and KU had not posted any cash collateral under master netting arrangements at June 30, 2013 and December 31, 2012.

(PPL and PPL Energy Supply)

Commodity Price Risk (Non-trading)

Commodity price risk, including basis and volumetric risk, is among PPL's and PPL Energy Supply's most significant risks due to the level of investment that PPL and PPL Energy Supply maintain in their competitive generation assets, as well as the extent of their marketing activities. Several factors influence price levels and volatilities. These factors include, but are not limited to, seasonal changes in demand, weather conditions, available generating assets within regions, transportation/transmission availability and reliability within and between regions, market liquidity, and the nature and extent of current and potential federal and state regulations.

PPL Energy Supply maximizes the value of its wholesale and retail energy portfolios through the use of non-trading strategies that include sales of competitive baseload generation, optimization of competitive intermediate and peaking generation and marketing activities.

PPL Energy Supply has a formal hedging program to economically hedge the forecasted purchase and sale of electricity and related fuels for its competitive baseload generation fleet, which includes 7,298 MW (summer rating) of nuclear, coal and hydroelectric generating capacity. PPL Energy Supply attempts to optimize the overall value of its competitive intermediate and peaking fleet, which includes 3,316 MW (summer rating) of natural gas and oil-fired generation. PPL Energy Supply's marketing portfolio is comprised of full-requirement sales contracts and related supply contracts, retail natural gas and electricity sales contracts and other marketing activities. The strategies that PPL Energy Supply uses to hedge its full-requirement sales contracts include purchasing energy (at a liquid trading hub or directly at the load delivery zone), capacity and RECs in the market and/or supplying the energy, capacity and RECs from its generation assets.

PPL and PPL Energy Supply enter into financial and physical derivative contracts, including forwards, futures, swaps and options, to hedge the price risk associated with electricity, natural gas, oil and other commodities. Certain contracts qualify for NPNS or are non-derivatives and are therefore not reflected in the financial statements until delivery. PPL and PPL Energy Supply segregate their non-trading activities into two categories: cash flow hedges and economic activity, as discussed below.

Cash Flow Hedges

Certain derivative contracts have qualified for hedge accounting so that the effective portion of a derivative's gain or loss is deferred in AOCI and reclassified into earnings when the forecasted transaction occurs. Certain cash flow hedge positions were redesignated during the six months ended June 30, 2013 and 2012 and the unamortized portion remained in AOCI because the original forecasted transaction is still expected to occur. There were no active cash flow hedges at June 30, 2013. At June 30, 2013, the accumulated net unrecognized after-tax gains (losses) that are expected to be reclassified into earnings during the next 12 months were \$71 million for PPL and PPL Energy Supply. Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedge transaction is probable of not occurring. For the three and six months ended June 30, 2013 and 2012, such reclassifications were insignificant.

For the three and six months ended June 30, 2013 and 2012, hedge ineffectiveness associated with energy derivatives was insignificant.

Economic Activity

Many derivative contracts economically hedge the commodity price risk associated with electricity, natural gas, oil and other commodities but do not receive hedge accounting treatment because they were not eligible for hedge accounting or because

hedge accounting was not elected. These derivatives hedge a portion of the economic value of PPL Energy Supply's competitive generation assets and unregulated full-requirement and retail contracts, which are subject to changes in fair value due to market price volatility and volume expectations. Additionally, economic activity would also include the ineffective portion of qualifying cash flow hedges (see "Cash Flow Hedges" above). The derivative contracts in this category that existed at June 30, 2013 range in maturity through 2019.

Examples of economic activity may include hedges on sales of baseload generation, certain purchase contracts used to supply full-requirement sales contracts, FTRs or basis swaps used to hedge basis risk associated with the sale of competitive generation or supplying full-requirement sales contracts, Spark Spread hedging contracts, retail electric and natural gas activities, and fuel oil swaps used to hedge price escalation clauses in coal transportation and other fuel-related contracts. PPL Energy Supply also uses options, which include the sale of call options and the purchase of put options tied to a particular generating unit. Since the physical generating capacity is owned, price exposure is generally capped at the price at which the generating unit would be dispatched and therefore does not expose PPL Energy Supply to uncovered market price risk.

Commodity Price Risk (Trading)

PPL Energy Supply has a proprietary trading strategy which is utilized to take advantage of market opportunities. As a result, PPL Energy Supply may at times create a net open position in its portfolio that could result in losses if prices do not move in the manner or direction anticipated. The proprietary trading portfolio shown in "Net energy trading margins" on the Statements of Income is not a significant part of PPL Energy Supply's business.

Commodity Volumes

At June 30, 2013, the net volumes of derivative (sales)/purchase contracts used in support of the various strategies discussed above were as follows.

Commodity	Unit of Measure	Volume (a)			
		2013 (b)	2014	2015	Thereafter
Power	MWh	(20,132,552)	(28,846,530)	(4,693,573)	1,575,123
Capacity	MW-Month	(10,339)	(9,075)	(1,453)	490
Gas	MMBtu	27,768,152	(2,395,839)	(4,919,285)	(8,210,551)
FTRs	MW-Month	8,807	8,519	1,465	
Oil	Barrels	(148,614)	300,000	392,331	378,315

(a) Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.

(b) Represents balance of the current year.

Interest Rate Risk

(PPL, LKE, LG&E and KU)

PPL and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. Various financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in their debt portfolio, adjust the duration of the debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under PPL's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges

(PPL)

Interest rate risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financings. Financial interest rate swap contracts that qualify as cash flow hedges may be entered into to hedge floating interest rate risk associated with both existing and anticipated debt issuances. At June 30, 2013, outstanding interest rate swap contracts range in maturity through 2024 for WPD and through 2044 for PPL's domestic interest rate swaps. These swaps had an aggregate notional value of \$1.9 billion at June 30, 2013 of which £300 million (approximately \$455 million based on spot rates) was related to WPD. Also included in this total are forward-starting interest rate swaps entered into by PPL on behalf of LG&E and KU. Realized gains and losses from these swaps are probable of recovery through regulated rates; as such, the fair value of these derivatives have been reclassified from AOCI to regulatory assets or liabilities. The gains and losses will be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt when the hedged transaction occurs.

At June 30, 2013, PPL held a notional position in cross-currency interest rate swaps totaling \$1.3 billion that range in maturity through 2028 to hedge the interest payments and principal of WPD's U.S. dollar-denominated senior notes.

For the three and six months ended June 30, 2013 and 2012, hedge ineffectiveness associated with interest rate derivatives was insignificant.

Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time period and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedged transaction is probable of not occurring. PPL had no such reclassifications for the three and six months ended June 30, 2013 and 2012.

At June 30, 2013, the accumulated net unrecognized after-tax gains (losses) on qualifying derivatives that are expected to be reclassified into earnings during the next 12 months were \$(12) million. Amounts are reclassified as the hedged interest payments are made.

(LKE, LG&E and KU)

In November 2012 and April 2013, LG&E and KU entered into forward-starting interest rate swaps with PPL that hedge the interest payments on new debt that is expected to be issued in 2013. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties. Realized gains and losses from the swaps are probable of recovery through regulated rates; as such, the fair value of these derivatives were reclassified from AOCI to regulatory assets or liabilities. The gains and losses will be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt when the hedged transaction occurs. For the three and six months ended June 30, 2013, there was no hedge ineffectiveness associated with the interest rate derivatives. At June 30, 2013, LG&E and KU each held contracts with aggregate notional amounts of \$250 million that range in maturity through 2043.

Economic Activity *(PPL, LKE and LG&E)*

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income when the hedged transaction occurs. At June 30, 2013, LG&E held contracts with a notional amount of \$179 million that range in maturity through 2033.

Foreign Currency Risk *(PPL)*

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

Net Investment Hedges

PPL enters into foreign currency contracts on behalf of a subsidiary to protect the value of a portion of its net investment in WPD. The contracts outstanding at June 30, 2013 had a notional amount of £166 million (approximately \$263 million based on contracted rates). The settlement dates of these contracts range from November 2013 through June 2014.

Additionally, a PPL Global subsidiary that has a U.S. dollar functional currency entered into GBP intercompany loans payable with PPL WEM subsidiaries that have GBP functional currency. The loans qualify as a net investment hedge for the PPL Global subsidiary. As such, the foreign currency gains and losses on the intercompany loans for the PPL Global subsidiary are recorded to the foreign currency translation adjustment component of OCI. At June 30, 2013, the outstanding balances of the intercompany loans were £94 million (approximately \$142 million based on spot rates). For the three and six months ended June 30, 2013, PPL recognized after-tax net investment hedge gains (losses) on the intercompany loans of \$2 million and \$6 million in the foreign currency translation adjustment component of OCI. Such amounts for the three and six months ended June 30, 2012 were not significant.

At June 30, 2013, PPL had \$29 million of accumulated net investment hedge gains (losses), after-tax, in the foreign currency translation adjustment component of AOCI, compared to \$14 million of gains (losses), after-tax at December 31, 2012.

Economic Activity

PPL enters into foreign currency contracts on behalf of a subsidiary to economically hedge GBP-denominated anticipated earnings. At June 30, 2013, the total exposure hedged by PPL was approximately £1.2 billion (approximately \$1.9 billion based on contracted rates). These contracts had termination dates ranging from July 2013 through June 2015.

Accounting and Reporting

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

All derivative instruments are recorded at fair value on the Balance Sheet as an asset or liability unless they qualify for NPNS. NPNS contracts for PPL and PPL Energy Supply include certain full-requirement sales contracts, other physical purchase and sales contracts and certain retail energy and physical capacity contracts, and for PPL Electric include certain full-requirement purchase contracts and other physical purchase contracts. Changes in the fair value of derivatives not designated as NPNS are recognized currently in earnings unless specific hedge accounting criteria are met and designated as such, except for the change in fair value of LG&E's and KU's interest rate swaps that are recognized as regulatory assets or regulatory liabilities. See Note 6 for amounts recorded in regulatory assets and regulatory liabilities at June 30, 2013 and December 31, 2012.

See Notes 1 and 19 in each Registrant's 2012 Form 10-K for additional information on accounting policies related to derivative instruments.

(PPL)

The following table presents the fair value and location of derivative instruments recorded on the Balance Sheets.

Offsetting Derivative Instruments (PPL, PPL Energy Supply, LKE, LG&E and KU)

PPL, PPL Energy Supply, LKE, LG&E, KU or certain of their subsidiaries have master netting arrangements or similar agreements in place including derivative clearing agreements with futures commission merchants (FCMs) to permit the trading of cleared derivative products on one or more futures exchanges. The clearing arrangements permit an FCM to use and apply any property in its possession as a set off to pay amounts or discharge obligations owed by a customer upon default of the customer and typically do not place any restrictions on the FCM's use of collateral posted by the customer. These registrants and their subsidiaries also enter into agreements pursuant to which they trade certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to setoff amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

PPL, PPL Energy Supply, LKE, LG&E and KU have elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The table below summarizes the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

	Assets				Liabilities

Credit Risk-Related Contingent Features (PPL, PPL Energy Supply, LKE, LG&E and KU)

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of PPL, PPL Energy Supply, LKE, LG&E, KU or certain of their subsidiaries. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each decrease in the credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade (i.e., below BBB- for S&P or Fitch, or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding the performance of PPL's obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

At June 30, 2013, the effect of a decrease in credit ratings below investment grade on derivative contracts that contain credit risk-related contingent features and were in a net liability position is summarized as follows:

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>LKE</u>	<u>LG&E</u>
Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent features	\$ 148	\$ 118	\$ 30	\$ 30
Aggregate fair value of collateral posted on these derivative instruments	22		22	22
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)	144	136	8	8

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

15. Goodwill

(PPL)

The change in the carrying amount of goodwill for the six months ended June 30, 2013 was due to the effect of foreign currency exchange rates on the U.K. Regulated segment.

16. Asset Retirement Obligations

(PPL, PPL Energy Supply, LKE, LG&E and KU)

The changes in the carrying amounts of AROs were as follows.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Balance at December 31, 2012	\$ 552	\$ 375	\$ 131	\$ 62	\$ 69
Accretion expense	18	14	3	1	2
Changes in estimated cash flow or settlement date		(1)	1	1	
Effect of foreign currency exchange rates	(3)				
Obligations settled	(6)	(3)	(3)	(3)	
Balance at June 30, 2013	<u>\$ 561</u>	<u>\$ 385</u>	<u>\$ 132</u>	<u>\$ 61</u>	<u>\$ 71</u>

Substantially all of the ARO balances are classified as noncurrent at June 30, 2013 and December 31, 2012.

(PPL, LKE, LG&E and KU)

Accretion and depreciation expense recorded by LG&E and KU is offset with a regulatory credit on the income statement, such that there is no net earnings impact.

(PPL and PPL Energy Supply)

The most significant ARO recorded by PPL and PPL Energy Supply relates to the decommissioning of the Susquehanna nuclear plant. The accrued nuclear decommissioning obligation was \$329 million and \$316 million at June 30, 2013 and December 31, 2012.

Assets in the NDT funds are legally restricted for purposes of settling PPL's and PPL Energy Supply's ARO related to the decommissioning of the PPL Susquehanna nuclear plant. The aggregate fair value of these assets was \$771 million and \$712 million at June 30, 2013 and December 31, 2012, and is included in "Nuclear plant decommissioning trust funds" on the Balance Sheets. See Notes 13 and 17 for additional information on these assets.

17. Available-for-Sale Securities

(PPL and PPL Energy Supply)

Securities held by the NDT funds and auction rate securities are classified as available-for-sale. Available-for-sale securities are carried on the Balance Sheets at fair value. Unrealized gains and losses on these securities are reported, net of tax, in OCI or are recognized currently in earnings when a decline in fair value is determined to be other-than-temporary. The specific identification method is used to calculate realized gains and losses.

The following table shows the amortized cost, the gross unrealized gains and losses recorded in AOCI, and the fair value of available-for-sale securities.

	June 30, 2013				December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

There were no securities with credit losses at June 30, 2013 and December 31, 2012.

The following table shows the scheduled maturity dates of debt securities held at June 30, 2013.

	Maturity Less Than 1 Year	Maturity 1-5 Years	Maturity 6-10 Years	Maturity in Excess of 10 Years	Total
PPL					
Amortized cost	\$ 12	\$ 81	\$ 61	\$ 77	\$ 231
Fair value	12	84	63	80	239
PPL Energy Supply					
Amortized cost	\$ 12	\$ 81	\$ 61	\$ 74	\$ 228
Fair value	12	84	63	77	236

The following table shows proceeds from and realized gains and losses on sales of available-for-sale securities for the periods ended June 30.

	Three Months		Six Months	
	2013	2012	2013	2012
PPL				
Proceeds from sales of NDT securities (a)	\$ 35	\$ 45	\$ 59	\$ 79
Other proceeds from sales		5		5
Gross realized gains (b)	3	8	7	13
Gross realized losses (b)	2	5	4	6

PPL Energy Supply

Proceeds from sales of NDT securities (a)	\$ 35	\$ 45	\$ 59	\$ 79
Other proceeds from sales		3		3
Gross realized gains (b)	3	8	7	13
Gross realized losses (b)	2	5	4	6

- (a) These proceeds are used to pay income taxes and fees related to managing the trust. Remaining proceeds are reinvested in the trust.
(b) Excludes the impact of other-than-temporary impairment charges recognized on the Statements of Income.

18. Accumulated Other Comprehensive Income (Loss)

(PPL, PPL Energy Supply, LKE and KU)

The after-tax changes in AOCI by component for the three and six months ended June 30, 2013 were as follows.

	Foreign currency translation adjustments	Unrealized gains (losses)		Equity investees' AOCI	Defined benefit plans			Total
		Available- for-sale securities	Qualifying derivatives		Prior service costs	Actuarial gain (loss)	Transition asset (obligation)	
PPL

Net OCI during the period		23	(67)		2	8		(34)
June 30, 2013		\$ 135	\$ 144		\$ (8)	\$ (257)		\$ 14

The following table presents the gains (losses) and related income taxes for reclassifications from AOCI for the periods ended June 30, 2013. The defined benefit plan components of AOCI are not reflected in their entirety in the statement of income during the periods; rather, they are included in the computation of net periodic defined benefit costs (credits). See Note 9 for additional information.

Three Months

Interest rate swaps					\$ (9)	(9)	4	(5)
Cross-currency swaps				70	1	71	(17)	54
Energy commodities	\$ 140	\$ (30)	\$ 1			111	(44)	67
Total	\$ 140	\$ (30)	\$ 1	\$ 70	\$ (8)	173	(57)	116
Defined benefit plans								
Prior service costs						(5)	2	(3)
Net actuarial loss						(93)	25	(68)
Total						\$ (98)	\$ 27	(71)
Total reclassifications during the period								\$ 47
PPL Energy Supply								
Available-for-sale securities				\$ 3		\$ 3	\$ (1)	\$ 2
Qualifying derivatives								
Energy commodities	\$ 140	\$ (30)	\$ 1			111	(44)	67
Total	\$ 140	\$ (30)	\$ 1			111	(44)	67
Defined benefit plans								
Prior service costs						(3)	1	(2)
Net actuarial loss						(13)	5	(8)
Total						\$ (16)	\$ 6	(10)
Total reclassifications during the period								\$ 59

For the three and six months ended June 30, 2013, the changes in AOCI and the effect of reclassifications from AOCI on the statement of income for LKE and KU were insignificant.

19. New Accounting Guidance Pending Adoption

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Accounting for Obligations Resulting from Joint and Several Liability Arrangements

Effective January 1, 2014, the Registrants will retrospectively adopt accounting guidance for the recognition, measurement and disclosure of certain obligations resulting from joint and several liability arrangements when the amount of the obligation is fixed at the reporting date. If the obligation is determined to be in the scope of this guidance, it will be measured as the sum of the amount the reporting entity agreed to pay on the basis of its arrangements among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. This guidance also requires additional disclosures for these obligations.

The Registrants are assessing the potential impact of adoption, which is not expected to be material.

Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity

Effective January 1, 2014, PPL will prospectively adopt accounting guidance that requires a cumulative translation adjustment to be released into earnings when an entity ceases to have a controlling financial interest in a subsidiary or group of assets within a consolidated foreign entity and the sale or transfer results in the complete or substantially complete liquidation of the foreign entity. For the step acquisition of previously held equity method investments that are foreign entities, this guidance clarifies that the amount of accumulated other comprehensive income that is reclassified and included in the calculation of a gain or loss shall include any foreign currency translation adjustment related to that previously held investment.

The initial adoption of this guidance is not expected to have a significant impact on PPL; however, the impact in future periods could be material.

Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes

Effective July 17, 2013, the Registrants adopted accounting guidance that permits the Fed Funds Swap Rate (or Overnight Index Swap Rate) to be used as a U.S. benchmark interest rate for hedge accounting purposes, in addition to interest rates on direct U.S. Treasury obligations and the London Interbank Offer Rate. This guidance also removed the restrictions on using different benchmark interest rates for similar hedges.

This guidance is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. The adoption of this guidance is not expected to have a significant impact on the Registrants.

Presentation of Unrecognized Tax Benefits When Net Operating Loss Carryforwards, Similar Tax Losses, or Tax Credit Carryforwards Exist

Effective January 1, 2014, the Registrants will prospectively adopt accounting guidance that requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets.

The adoption of this guidance is not expected to have a significant impact on the Registrants.

PPL CORPORATION AND SUBSIDIARIES

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with PPL's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL's 2012 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

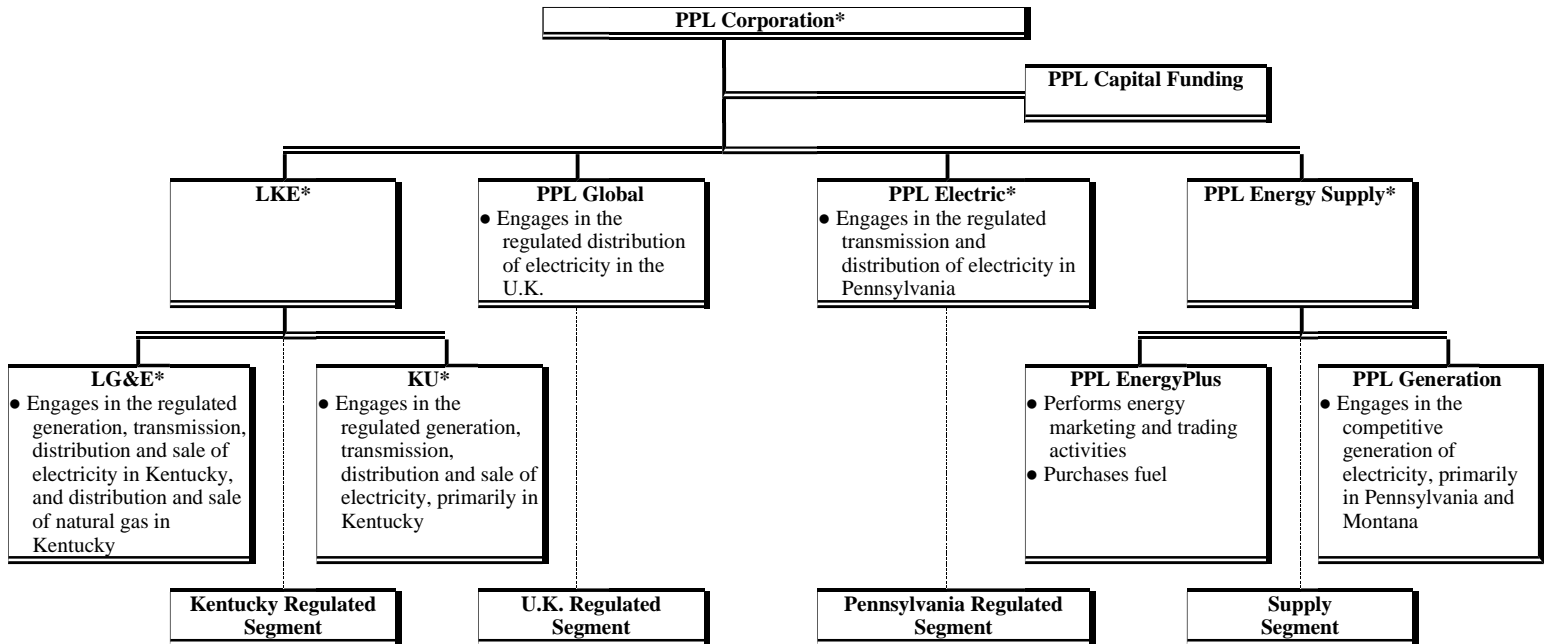

- "Overview" provides a description of PPL and its business strategy, a summary of Net Income Attributable to PPL Shareowners and a discussion of certain events related to PPL's results of operations and financial condition.
- "Results of Operations" provides a summary of PPL's earnings, a review of results by reportable segment and a description of key factors by segment expected to impact future earnings. This section ends with explanations of significant changes in principal line items on PPL's Statements of Income, comparing the three and six months ended June 30, 2013 with the same periods in 2012.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL's liquidity position and credit profile. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of PPL's risk management programs relating to market and credit risk.

Overview

Introduction

PPL is an energy and utility holding company with headquarters in Allentown, Pennsylvania. Through subsidiaries, PPL generates electricity from power plants in the northeastern, northwestern and southeastern U.S., markets wholesale and retail energy primarily in the northeastern and northwestern portions of the U.S., delivers electricity to customers in Pennsylvania, Kentucky, Virginia, Tennessee and the U.K. and delivers natural gas to customers in Kentucky.

PPL's principal subsidiaries are shown below (* denotes an SEC registrant):

The capacity (summer rating) of PPL's regulated and competitive electricity generation facilities at June 30, 2013 was:

Primary Fuel	Ownership or Lease Interest in MW (a)
Regulated	
Coal (c)	5,940
Natural Gas/Oil (b)	2,098
Hydro	78
Total Regulated	8,116
Competitive	
Coal (b) (c)	4,146
Natural Gas/Oil	3,316
Nuclear (c)	2,275
Hydro	807
Other (d)	70
Total Competitive	10,614
Total	18,730

- (a) The capacity of generation units is based on a number of factors, including the operating experience and physical conditions of the units, and may be revised periodically to reflect changed circumstances. See "Item 2. Properties" in PPL's 2012 Form 10-K for additional information on ownership percentages.
- (b) Includes leasehold interests. See Note 11 to the Financial Statements in PPL's 2012 Form 10-K for additional information.
- (c) Includes units that are jointly owned or subject to a power purchase agreement. Each owner is entitled to its proportionate share of the unit's total output and funds its proportionate share of fuel and other operating costs. See Notes 14 and 15 to the Financial Statements in PPL's 2012 Form 10-K for additional information.
- (d) Includes facilities owned, controlled or for which PPL Energy Supply has the rights to the output.

Business Strategy

PPL's strategy for its regulated electricity and gas delivery businesses is to achieve stable, long-term growth in earnings and rate base. Rate base is expected to grow as a result of significant capital expenditure programs aimed at maintaining existing assets and improving system reliability at each of the regulated subsidiaries. These regulated businesses focus on timely recovery of costs, efficient operations, strong customer service and constructive regulatory relationships.

PPL's strategy for its energy supply business is to achieve disciplined optimization of energy supply margins while mitigating near-term volatility in both cash flows and earnings. More specifically, PPL's strategy is to optimize the value from its competitive generation and marketing portfolios. PPL endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk. PPL is focused on managing profitability for its energy supply business during the current and projected period of low commodity prices. See "Financial and Operational Developments - Economic and Market Conditions" below.

To manage financing costs and access to credit markets and to fund capital expenditure programs, a key objective for PPL is to maintain strong credit profiles and liquidity positions. In addition, PPL has financial and operational risk management programs that, among other things, are designed to monitor and manage exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, foreign currency exchange rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Developments

Net Income Attributable to PPL Shareowners

Net Income Attributable to PPL Shareowners for the periods ended June 30 by segment, and reconciled to PPL's consolidated results, was:

	Three Months		Six Months	
	2013	2012	2013	2012
Kentucky Regulated	\$ 49	\$ 34	\$ 134	\$ 76
U.K. Regulated	245	196	558	361
Pennsylvania Regulated	45	29	109	62
Supply	77	12	31	313
Corporate and Other (a)	(11)		(14)	
Net Income Attributable to PPL Shareowners	\$ 405	\$ 271	\$ 818	\$ 812
EPS - basic	\$ 0.68	\$ 0.46	\$ 1.39	\$ 1.39
EPS - diluted (b)	\$ 0.63	\$ 0.46	\$ 1.28	\$ 1.39

- (a) Primarily represents financing and certain other costs incurred at the corporate level that have not been allocated or assigned to the segments, which are presented to reconcile segment information to PPL's consolidated results. For 2012, there were no significant amounts in this category.
- (b) See "Equity Units" below for information on the Equity Units' impact on the calculation of 2013 diluted EPS.

Earnings for the three and six months ended June 30, 2013 increased 49% and 1% compared with the same periods in 2012. See "Results of Operations" below for further discussion of PPL's business segments, details of special items and analysis of the consolidated results of operations.

Economic and Market Conditions

Current depressed wholesale market prices for electricity and natural gas have resulted from general weak economic conditions and other factors, including the impact of expanded domestic shale gas development and additional renewable energy sources, primarily wind in the western U.S. Unregulated Gross Energy Margins associated with PPL Energy Supply's competitive generation and marketing business are impacted by changes in energy and capacity market prices and demand for electricity and natural gas, power plant availability, competition in the markets for retail customers, fuel costs and availability, transmission constraints that impact the locational pricing of electricity at PPL's power plants, fuel transportation costs and the level and price of hedging activities. As a result of these factors, lower future energy margins are expected when compared to the 2012 energy margins. As has been PPL Energy Supply's practice in periods of changing business conditions, PPL Energy Supply continues to review its future business and operational plans, including capital and operation and maintenance expenditures, its hedging strategies and potential plant modifications to burn lower cost fuels.

As previously disclosed, PPL's businesses are subject to extensive federal, state and local environmental laws, rules and regulations, including those surrounding coal combustion residuals, GHG, effluent limitation guidelines and MATS. See "Financial Condition - Environmental Matters" below for additional information on these requirements. These more stringent environmental requirements, combined with low energy margins for competitive generation, have led several energy companies, including PPL, to announce plans to either temporarily or permanently close, or place in long-term reserve status, certain of their coal-fired generating plants.

In 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette plant in long-term reserve status, suspending the plant's operation due to expected market conditions and the costs to comply with MATS. PPL Energy Supply continues to monitor its Corette plant for potential impairment. The Corette plant asset group's carrying value at June 30, 2013 was \$68 million. See Note 10 to the Financial Statements for additional information. PPL Energy Supply believes its remaining competitive generation assets are well positioned to meet the additional environmental requirements based on prior and planned investments and does not currently anticipate the need to temporarily or permanently shut down additional coal-fired plants.

The additional environmental requirements discussed above have also resulted in LKE's projected \$2.1 billion in capital investment over the next five years and the anticipated retirement by 2015 of five coal-fired units with a combined summer capacity rating of 726 MW. KU retired the 71 MW unit at the Tyrone plant in February 2013. The retirement of the five coal-fired units is not expected to have a material impact on the financial condition or results of operations of PPL. See Note 8 to the Financial Statements in PPL's 2012 Form 10-K for additional information regarding the anticipated retirement of these units as well as plans to build a combined-cycle natural gas facility in Kentucky.

The KPSC has adopted a series of regulatory mechanisms (ECR, DSM, GLT, fuel adjustment clause, gas supply clause and recovery on certain construction work-in-progress) that provide for recovery of prudently incurred costs. The Kentucky utility businesses are impacted by changes in customer usage levels which can be driven by a number of factors including weather conditions and economic factors that impact the load utilized by industrial and commercial customers.

PPL cannot predict the future impact that economic and market conditions and changes in regulatory requirements may have on its financial condition or results of operations.

Susquehanna Turbine Blade Inspection

In the spring of 2013, PPL Susquehanna made modifications to address the causes of turbine blade cracking at the PPL Susquehanna nuclear plant that was first identified in 2011. The modifications were made during the Unit 2 refueling outage and an additional planned outage for Unit 1. Additional modifications will be made during planned outages in 2014 and 2015. Following completion of these modifications, PPL Susquehanna will continue monitoring the turbine blades using enhanced diagnostic equipment.

Rate Case Proceedings

Pennsylvania

In December 2012, the PUC approved a total distribution revenue increase of about \$71 million, using a 10.4% return on equity. The approved rates became effective January 1, 2013.

Kentucky

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of \$34 million for LG&E and \$51 million for KU and an increase in annual base gas rates of \$15 million for LG&E using a 10.25% return on equity. The approved rates became effective January 1, 2013.

Ofgem Review of Line Loss Calculation

Ofgem is currently consulting on the methodology to be used by all network operators to calculate the final line loss incentive/penalty for the DPCR4. In April 2013, Ofgem stated that their expectation was to issue a decision in the second half of 2013. In July 2013, Ofgem issued a decision paper on the process to follow for closing out the line loss incentive/penalty. Based on one element of the decision paper, WPD has concluded that certain data, which had previously served to reduce the liability calculation, could not be included. Additional information in the decision paper has increased the level of uncertainty regarding the ultimate settlement of this liability.

WPD currently estimates the potential loss exposure to be in the range of \$97 million to \$251 million. As a result, during the three and six months ended June 30, 2013, WPD increased the liability by \$24 million, to a total of \$97 million. PPL cannot predict the outcome of this matter. See Note 6 to the Financial Statements for additional information.

RIIO-ED1

In October 2010, Ofgem announced changes to the regulatory framework that will be effective for the U.K. electricity distribution sector, including WPD, beginning April 2015. The framework, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to encourage investment in regulated infrastructure. The next electricity distribution price control review is referred to as RIIO-ED1. Key components of the RIIO-ED1 are: an extension of the price review period to eight years, increased emphasis on outputs and incentives, enhanced stakeholder engagement including network customers, a stronger incentive framework to encourage more efficient investment and innovation, and continued use of a single weighted average cost of capital. Ofgem has also indicated that the depreciation of the RAV, for RAV additions after April 1, 2015, will change from 20 years to 45 years, but that they will consider transition arrangements.

As previously reported, on July 1, 2013, WPD filed its business plan with Ofgem for the RIIO-ED1 period and gave a webcast presentation to highlight the contents of the plan as well as provide potential earnings ranges of the U.K. Regulated segment for the first two years of the RIIO-ED1 period. The ranges provided are subject to certain assumptions including foreign currency exchange rates, interest rates, inflation rates and WPD being "fast-tracked" through the price control review process and therefore earning the fast-track bonus revenue. These assumptions and other future events affecting the potential earnings ranges are subject to significant uncertainties. Although management believes that the business plan submitted by WPD meets the criteria to be fast-tracked, management cannot predict the outcome of the price control review process or the future financial effect on WPD's businesses of the RIIO-ED1 regulatory framework. See "Item 1. Business - Background - U.K. Regulated Segment - Revenue and Regulation" in the 2012 Form 10-K for additional information.

Distribution System Improvement Charge

Act 11 authorizes the PUC to approve two specific ratemaking mechanisms - the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, the use of a DSIC. Such alternative ratemaking procedures and

mechanisms provide opportunity for accelerated cost-recovery. In May 2013, the PUC approved PPL Electric's proposed DSIC, with an initial rate effective July 1, 2013, subject to refund after hearings. See Note 6 to the Financial Statements for additional information.

FERC Formula Rates

PPL Electric must follow FERC's Uniform System of Accounts, which requires subsidiaries to be presented, for FERC reporting purposes, using the equity method of accounting unless a waiver has been granted. The FERC has granted waivers of this requirement to other utilities when alternative accounting would more accurately present the integrated operations of a utility and its subsidiaries. In March 2013, as part of a routine FERC audit of PPL and its subsidiaries, PPL Electric determined that it never obtained a required waiver of the equity method accounting requirement for its subsidiary, PPL Receivables Corporation (PPL Receivables) for FERC Form No. 1 reporting. In March 2013, PPL Electric filed a request for waiver with the FERC that, if approved, would allow it to continue to consolidate the results of PPL Receivables with the results of PPL Electric, as it has done since 2004. If PPL Electric is not successful in obtaining the waiver, its revenue requirement calculated under the formula rate could be negatively impacted. The impact, if any, is not known at this time but could range between \$0 and \$40 million, pre-tax. PPL Electric cannot predict the outcome of the waiver or audit proceedings, which remain pending before the FERC. See Note 6 to the Financial Statements for additional information.

Equity Forward Agreements

In the second quarter of 2013, PPL settled forward sale agreements for 10.5 million shares of PPL common stock by issuing 8.4 million shares and cash settling the remaining 2.1 million shares. PPL received net cash proceeds of \$201 million, which was used to repay short-term debt obligations and for other general corporate purposes. See Note 7 to the Financial Statements for additional information. Prior to settlement, incremental shares were included within the calculation of diluted EPS using the treasury stock method. See Note 4 to the Financial Statements for the impact on the calculation of diluted EPS.

Equity Units

During 2013, several events occurred related to the components of the 2010 Equity Units. During the first quarter of 2013, financing plans were finalized to remarket the Junior Subordinated Notes component of the 2010 Equity Units and in the second quarter, PPL Capital Funding completed the remarketing of the Junior Subordinated Notes and the simultaneous exchange into Senior Notes. The transaction resulted in a \$10 million loss on extinguishment of the Junior Subordinated Notes. Additionally, in July 2013, PPL issued 40 million shares of common stock at \$28.73 per share to settle the 2010 Purchase Contracts. PPL received net cash proceeds of \$1.150 billion, which will be used to repay short-term and long-term debt obligations and for other general corporate purposes. See Note 7 to the Financial Statements for additional information.

The If-Converted Method of calculating diluted EPS was applied to the Equity Units beginning in the first quarter of 2013. This resulted in \$15 million and \$30 million of interest charges (after-tax) being added back to income available to PPL common shareowners, and 73 million shares of PPL common stock being treated as outstanding for the three and six months ended June 30, 2013. See Note 4 to the Financial Statements for the impact on the calculation of diluted EPS.

Tax Litigation

In May 2013, the U.S. Supreme Court reversed the December 2011 ruling of the U. S. Court of Appeals for the Third Circuit, on the creditability for U.S. income tax purposes of the U.K. Windfall Profits Tax. As a result of this decision, PPL recorded an income tax benefit of \$44 million for the three and six months ended June 30, 2013. See Note 5 to the Financial Statements for additional information.

U.K. Tax Rate Change

In July 2013, the U.K. Finance Act 2013 was enacted, which reduces the U.K.'s statutory income tax rate from 23% to 21%, effective April 1, 2014 and from 21% to 20%, effective April 1, 2015. As a result of these changes, PPL expects to reduce its net deferred tax liabilities and recognize a deferred tax benefit in the range of \$90 million to \$100 million in the third quarter of 2013.

Results of Operations

The following discussion provides a review of results by reportable segment and a description of key factors by segment expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of

Kentucky Gross Margins, Pennsylvania Gross Delivery Margins and Unregulated Gross Energy Margins and significant changes in principal line items on PPL's Statements of Income, comparing the three and six months ended June 30, 2013 with the same periods in 2012.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Tables analyzing changes in amounts between periods within "Segment Results" and "Statement of Income Analysis" are presented on a constant U.K. foreign currency exchange rate basis, where applicable, in order to isolate the impact of the change in the exchange rate on the item being explained. Results computed on a constant U.K. foreign currency exchange rate basis are calculated by translating current year results at the prior year weighted-average U.K. foreign currency exchange rate.

Segment Results

Kentucky Regulated Segment

The Kentucky Regulated segment consists primarily of LKE's regulated electricity generation, transmission and distribution operations. This segment also includes LKE's regulated distribution and sale of natural gas. In addition, the Kentucky Regulated segment is allocated certain financing costs.

Net Income Attributable to PPL Shareowners for the periods ended June 30 includes the following results:

	Three Months			Six Months		
	2013	2012	% Change	2013	2012	% Change
Utility revenues	\$ 682	\$ 658	4	\$ 1,482	\$ 1,363	9
Fuel	216	215		447	428	4
Energy purchases	37	34	9	123	108	14
Other operation and maintenance	197	197		394	403	(2)
Depreciation	83	86	(3)	165	172	(4)
Taxes, other than income	12	12		24	23	4
Total operating expenses	545	544		1,153	1,134	2
Other Income (Expense) - net		(7)	(100)	(2)	(10)	(80)
Interest Expense	61	54	13	116	109	6
Income Taxes	28	13	115	78	28	179
Income (Loss) from Discontinued Operations	1	(6)	(117)	1	(6)	(117)
Net Income Attributable to PPL Shareowners	\$ 49	\$ 34	44	\$ 134	\$ 76	76

The changes in the components of the Kentucky Regulated segment's results between these periods were due to the following factors, which reflect reclassifications for items included in Kentucky Gross Margins and certain items that management considers special. See additional detail of these special items in the table below.

	Three Months	Six Months
Kentucky Gross Margins	\$ 32	\$ 107
Other operation and maintenance		10
Depreciation	(8)	(17)
Taxes, other than income		(1)
Other Income (Expense) - net	7	7
Interest Expense	(7)	(7)
Income Taxes	(15)	(44)
Special items, after-tax	6	3
Total	\$ 15	\$ 58

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Kentucky Gross Margins.
- Lower other operation and maintenance for the six-month period primarily due to \$17 million of lower costs due to the timing and scope of scheduled coal plant maintenance outages. This decrease was partially offset by \$4 million of adjustments to regulatory assets and liabilities and increased coal plant operation costs of \$3 million.
- Higher depreciation for the three and six-month periods primarily due to environmental costs related to the elimination of the 2005 and 2006 ECR plans now being included in base rates, which added \$13 million and \$26 million to depreciation

that is excluded from Kentucky Gross Margins. This increase was partially offset by lower depreciation of \$6 million and \$11 million due to revised rates that were effective January 1, 2013. Both events are the result of the 2012 rate case proceedings.

- Higher other income (expense) - net for the three and six-month periods primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.
- Higher interest expense for the three and six-month periods primarily due to the remarketing of the PPL Capital Funding Junior Subordinated Notes component of the 2010 Equity Units and simultaneous exchange into Senior Notes. Interest expense associated with the 2010 Equity Units is allocated to the Kentucky Regulated segment.
- Higher income taxes for the three and six-month periods primarily due to higher pre-tax income.

The following after-tax gains (losses), which management considers special items, also impacted the Kentucky Regulated segment's results during the periods ended June 30.

	Income Statement Line Item	Three Months		Six Months	
		2013	2012	2013	2012
LKE acquisition-related adjustments:					
Net operating loss carryforward and other tax-related adjustments	Income Taxes and Other Operation and Maintenance				\$ 4
Other:					
LKE discontinued operations, net of tax of (\$1), \$4, (\$1), \$4 (a)	Discontinued Operations	\$ 1	\$ (5)	\$ 1	(5)
EEI adjustments, net of tax of \$0, \$0, \$0, \$0	Other Income (Expense)-net			1	
Total		\$ 1	\$ (5)	\$ 2	\$ (1)

(a) 2012 includes an adjustment to an indemnification liability.

2013 Outlook

Excluding special items, PPL projects higher segment earnings in 2013 compared with 2012, primarily driven by electric and gas base rate increases, returns on additional environmental capital investments and load growth, partially offset by higher operation and maintenance expense.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

U.K. Regulated Segment

The U.K. Regulated segment consists of PPL Global which primarily includes WPD's regulated electricity distribution operations and certain costs, such as U.S. income taxes, administrative costs and allocated financing costs.

Net Income Attributable to PPL Shareowners for the periods ended June 30 includes the following results:

	Three Months			Six Months		
	2013	2012	% Change	2013	2012	% Change
Utility revenues	\$ 559	\$ 543	3	\$ 1,197	\$ 1,095	9
Energy-related businesses	13	14	(7)	23	24	(4)
Total operating revenues	572	557	3	1,220	1,119	9
Other operation and maintenance	112	112		229	225	2
Depreciation	72	70	3	146	137	7
Taxes, other than income	36	36		73	72	1
Energy-related businesses	7	11	(36)	14	16	(13)
Total operating expenses	227	229	(1)	462	450	3
Other Income (Expense) - net	4	31	(87)	124	11	1,027
Interest Expense	104	105	(1)	211	208	1
Income Taxes		58	(100)	113	111	2
Net Income Attributable to PPL Shareowners	\$ 245	\$ 196	25	\$ 558	\$ 361	55

The changes in the components of the U.K. Regulated segment's results between these periods were due to the following factors, which reflect reclassifications for certain items that management considers special. See additional detail of these special items in the table below.

	<u>Three Months</u>	<u>Six Months</u>
U.K.		
Utility revenues	\$ 68	\$ 143
Other operation and maintenance	(4)	(10)
Depreciation	(6)	(11)
Interest expense	(3)	(7)
Other	(2)	
Income taxes	(11)	(21)
U.S.		
Interest expense and other	(1)	1
Income taxes	9	9
Foreign currency exchange rates, after-tax (a)	(4)	(3)
Special items, after-tax	3	96
Total	\$ 49	\$ 197

(a) Includes the effect of realized gains (losses) on foreign currency economic hedges.

U.K.

- Higher utility revenues for the three-month period primarily due to the April 1, 2013 and 2012 price increases which resulted in \$50 million of higher utility revenues and \$23 million of higher volume due primarily to weather, partially offset by \$6 million of lower third-party engineering work.

Higher utility revenues for the six-month period primarily due to the April 1, 2013 and 2012 price increases, which resulted in \$113 million of higher utility revenues and \$28 million of higher volume due primarily to weather.

- Higher other operation and maintenance for the three-month period primarily due to \$6 million of higher network maintenance expense, partially offset by \$3 million of lower third-party engineering costs.
Higher other operation and maintenance for the six-month period primarily due to \$13 million of higher network maintenance expense.
- Higher depreciation for the three and six-month periods primarily due to PP&E additions.
- Higher interest expense for the six-month period primarily due to \$4 million of higher interest expense on index-linked notes and \$3 million on other long-term debt arising from an April 2012 debt issuance.
- Higher income taxes for the three-month period primarily due to higher pre-tax income, which increased income taxes by \$14 million, and \$9 million from a benefit recorded in 2012 due to the tax deductibility of interest on the acquisition financing for WPD Midlands, partially offset by \$5 million of lower effective income tax rates and \$5 million of prior year adjustments.
Higher income taxes for the six-month period primarily due to higher pre-tax income, which increased income taxes by \$30 million, and \$9 million from a benefit recorded in 2012 due to the tax deductibility of interest on the acquisition financing for WPD Midlands, partially offset by \$11 million of lower effective income tax rates and \$6 million of prior year adjustments.

U.S.

- Lower income taxes for the three-month period primarily due to a \$19 million 2013 adjustment related to a ruling obtained from the IRS regarding 2010 U.K. earnings and profits calculations and \$4 million of lower income taxes on intercompany loans, partially offset by a \$12 million increase to income tax expense attributable to a revision in the expected taxable amount of cash repatriation in 2013.
Lower income taxes for the six-month period primarily due to a \$19 million 2013 adjustment related to a ruling obtained from the IRS regarding 2010 U.K. earnings and profits calculations and \$8 million of lower income taxes on intercompany loans, partially offset by a \$15 million increase to income tax expense attributable to a revision in the expected taxable amount of cash repatriation in 2013.

The following after-tax gains (losses), which management considers special items, also impacted the U.K. Regulated segment's results during the periods ended June 30.

	Income Statement Line Item	Three Months		Six Months	
		2013	2012	2013	2012
Foreign currency-related economic hedges, net of tax of \$3, (\$8), (\$39), (\$1) (a)	Other Income (Expense)-net	\$ (5)	\$ 16	\$ 73	\$ 2
WPD Midlands acquisition-related adjustments:					
Separation benefits, net of tax of \$0, \$0, \$1, \$2	Other Operation and Maintenance		(4)	(1)	(8)
Other acquisition-related adjustments, net of tax of \$0, (\$1), \$0, (\$1)	Other Operation and Maintenance		4	(2)	4
Other:					
Windfall Profits Tax litigation (b)	Income Taxes	43		43	
Change in WPD line loss accrual, net of tax of \$5, \$0, \$5, \$0 (c)	Utility	(19)		(19)	
Total		<u>\$ 19</u>	<u>\$ 16</u>	<u>\$ 94</u>	<u>\$ (2)</u>

- (a) Represents unrealized gains (losses) on contracts that economically hedge anticipated earnings denominated in GBP.
- (b) In May 2013, the U.S. Supreme Court reversed the December 2011 ruling, by the U.S. Court of Appeals for the Third Circuit, on the creditability for income tax purposes of the U.K. Windfall Profits Tax. As a result of the U.S. Supreme Court ruling, PPL recorded an income tax benefit during the three and six months ended June 30, 2013. See Note 5 to the Financial Statements for additional information.
- (c) WPD Midlands recorded an adjustment to its line loss accrual in June 2013 based on information provided by Ofgem regarding the calculation of line loss incentive/penalty for all network operators related to DPCR4, a price control period that ended prior to PPL's acquisition of WPD Midlands. See Note 6 to the Financial Statements for additional information.

2013 Outlook

Excluding special items, PPL projects higher segment earnings in 2013 compared with 2012, primarily driven by higher electricity delivery revenue and lower income taxes, partially offset by higher operation and maintenance expense, higher depreciation and higher interest expense.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 5, 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Pennsylvania Regulated Segment

The Pennsylvania Regulated segment includes PPL Electric's regulated electricity transmission and distribution operations. In addition, the Pennsylvania Regulated segment is allocated certain financing costs.

Net Income Attributable to PPL Shareowners for the periods ended June 30 includes the following results:

	Three Months			Six Months		
	2013	2012	% Change	2013	2012	% Change
Utility revenues						
External	\$ 413	\$ 403	2	\$ 925	\$ 860	8
Intersegment	1	1		2	2	
Total utility revenues	<u>414</u>	<u>404</u>	<u>2</u>	<u>927</u>	<u>862</u>	<u>8</u>
Energy purchases						
External	120	120		292	273	7
Intersegment	12	17	(29)	26	38	(32)
Other operation and maintenance	124	143	(13)	257	283	(9)
Depreciation	44	39	13	87	78	12
Taxes, other than income	22	22		52	48	8
Total operating expenses	<u>322</u>	<u>341</u>	<u>(6)</u>	<u>714</u>	<u>720</u>	<u>(1)</u>
Other Income (Expense) - net	2	1	100	3	3	
Interest Expense	25	24	4	50	48	4
Income Taxes	24	11	118	57	31	84
Net Income	45	29	55	109	66	65
Net Income Attributable to Noncontrolling Interests			n/a		4	(100)
Net Income Attributable to PPL Shareowners	<u>\$ 45</u>	<u>\$ 29</u>	<u>55</u>	<u>\$ 109</u>	<u>\$ 62</u>	<u>76</u>

The changes in the components of the Pennsylvania Regulated segment's results between these periods were due to the following factors, which reflect reclassifications for items included in Pennsylvania Gross Delivery Margins.

	<u>Three Months</u>	<u>Six Months</u>
Pennsylvania Gross Delivery Margins	\$ 21	\$ 61
Other operation and maintenance	13	20
Depreciation	(5)	(9)
Interest Expense	(1)	(2)
Other	1	(1)
Income Taxes	(13)	(26)
Noncontrolling Interests		4
Total	<u>\$ 16</u>	<u>\$ 47</u>

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.
- Lower other operation and maintenance for the three-month period primarily due to lower corporate service costs of \$6 million and lower vegetation management of \$2 million.

Lower other operation and maintenance for the six-month period primarily due to lower corporate service costs of \$11 million and lower vegetation management of \$3 million.
- Higher depreciation for the three and six-month periods primarily due to the impact of PP&E additions related to the ongoing efforts to ensure the reliability of the delivery system and replace aging infrastructure.
- Higher income taxes for the three and six-month periods primarily due to higher pre-tax income.

2013 Outlook

Excluding special items, PPL projects higher segment earnings in 2013 compared with 2012, primarily driven by higher distribution revenues from a distribution base rate increase and higher transmission margins, partially offset by higher depreciation and higher operation and maintenance expense.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Supply Segment

The Supply segment primarily consists of PPL Energy Supply's energy marketing and trading activities, as well as its competitive generation operations. In addition, the Supply segment is allocated certain financing costs.

Net Income Attributable to PPL Shareowners for the periods ended June 30 includes the following results:

	<u>Three Months</u>			<u>Six Months</u>		
	<u>2013</u>	<u>2012</u>	<u>% Change</u>	<u>2013</u>	<u>2012</u>	<u>% Change</u>

Net Income Attributable to PPL Shareowners	<u>\$ 77</u>	<u>\$ 12</u>	<u>542</u>	<u>\$ 31</u>	<u>\$ 313</u>	<u>(90)</u>

- (a) Includes the impact from energy-related economic activity. See "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements for additional information.

The changes in the components of the Supply segment's results between these periods were due to the following factors, which reflect reclassifications for items included in Unregulated Gross Energy Margins and certain items that management considers special. See additional detail of these special items in the table below.

	<u>Three Months</u>	<u>Six Months</u>
Unregulated Gross Energy Margins	\$ (88)	\$ (195)
Other operation and maintenance	16	29
Depreciation	(9)	(22)
Taxes, other than income	3	4
Other Income (Expense) - net	9	10
Interest expense	(7)	(19)
Other	2	2
Income Taxes	27	60
Special items, after-tax	112	(151)
Total	<u>\$ 65</u>	<u>\$ (282)</u>

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Unregulated Gross Energy Margins.
- Lower other operation and maintenance for the three-month period primarily due to \$11 million of lower 2013 project and refueling outage costs at PPL Susquehanna and \$4 million of Brunner Island Unit 3 outage costs in 2012 with no comparable outage in 2013.

Lower other operation and maintenance for the six-month period primarily due to \$19 million of Brunner Island Unit 3 outage costs in 2012 with no comparable outage in 2013 and \$17 million of lower 2013 project and refueling outage costs at PPL Susquehanna, partially offset by \$5 million of Conemaugh Unit 2 outage costs in 2013 with no comparable outage in 2012.
- Higher depreciation for the three and six-month periods primarily due to PP&E additions. The six-month period also includes \$6 million attributable to the Ironwood Acquisition.
- Higher other income (expense) - net for the three and six-month periods partially due to the impact of a worker's compensation adjustment of \$4 million.
- Higher interest expense for the six-month period due to \$7 million from PPL Capital Funding's June 2012 \$400 million debt issuance, \$6 million due to lower capitalized interest in 2013 and \$4 million due to financing associated with PPL Ironwood. Interest expense associated with certain PPL Capital Funding debt issuances is allocated to the Supply segment.
- Lower income taxes for the three and six-month periods due to lower pre-tax income in 2013, which reduced income taxes by \$30 million and \$77 million, partially offset for the six-month period by an \$11 million benefit from a state tax rate change recorded in 2012.

The following after-tax gains (losses), which management considers special items, also impacted the Supply segment's results during the periods ended June 30.

	Income Statement Line Item	<u>Three Months</u>		<u>Six Months</u>	
		<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Adjusted energy-related economic activity, net, net of tax of (\$51), \$23, \$28, (\$79)	(a)	\$ 76	\$ (32)	\$ (41)	\$ 118
Impairments:					
Adjustments - nuclear decommissioning trust investments, net of tax of \$0, (\$1), \$0, (\$2)	Other Income-net				1
Other:					
Change in tax accounting method related to repairs	Income Taxes	(3)		(3)	
Counterparty bankruptcy, net of tax of (\$1), \$0, (\$1), \$5 (b)	Other Operation and Maintenance	1		1	(6)
Wholesale supply cost reimbursement, net of tax of \$0, \$0, \$0, \$0	(c)		1		1
Ash basin leak remediation adjustment, net of tax of \$0, \$0, \$0, (\$1)	Other Operation and Maintenance				1
Coal contract modification payments, net of tax of \$0, \$5, \$0, \$5 (d)	Fuel		(7)		(7)
Total		<u>\$ 74</u>	<u>\$ (38)</u>	<u>\$ (43)</u>	<u>\$ 108</u>

- (a) See "Reconciliation of Economic Activity" below.

- (b) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. In 2012, PPL EnergyPlus recorded an additional allowance for unpaid amounts under the long-term power contract. In March 2012, the U.S. Bankruptcy Court for the District of Montana approved the request to terminate the contract, effective April 1, 2012. In June 2013, PPL EnergyPlus received an approval for an administrative claim in the amount of \$2 million.
- (c) Recorded in "Wholesale energy marketing - Realized" on the Statement of Income.
- (d) As a result of lower electricity and natural gas prices, coal-fired generation output decreased during 2012. Contract modification payments were incurred to reduce 2012 and 2013 contracted coal deliveries.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) for the periods ended June 30, to the special item identified as "Adjusted energy-related economic activity, net."

	Three Months		Six Months	
	2013	2012	2013	2012
Operating Revenues				
Unregulated retail electric and gas	\$ 20	\$ (12)	\$ 12	\$ (2)
Wholesale energy marketing	590	(458)	(232)	394
Operating Expenses				
Fuel	(4)	(16)	(5)	(14)
Energy Purchases	(479)	442	155	(149)
Energy-related economic activity (a)	127	(44)	(70)	229
Option premiums		1	1	1
Adjusted energy-related economic activity	127	(43)	(69)	230
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010		12		33
Adjusted energy-related economic activity, net, pre-tax	\$ 127	\$ (55)	\$ (69)	\$ 197
Adjusted energy-related economic activity, net, after-tax	\$ 76	\$ (32)	\$ (41)	\$ 118

(a) See Note 14 to the Financial Statements for additional information.

2013 Outlook

Excluding special items, PPL projects lower segment earnings in 2013 compared with 2012, primarily driven by lower energy prices, higher fuel costs, higher depreciation and higher financing costs, partially offset by lower operation and maintenance expense, higher capacity prices and higher nuclear generation output.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measures

The following discussion includes financial information prepared in accordance with GAAP, as well as three non-GAAP financial measures: "Kentucky Gross Margins," "Pennsylvania Gross Delivery Margins" and "Unregulated Gross Energy Margins." These measures are not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL believes that these measures provide additional criteria to make investment decisions. These performance measures are used, in conjunction with other information, internally by senior management and the Board of Directors to manage the Kentucky Regulated, Pennsylvania Regulated and Supply segment operations, analyze each respective segment's actual results compared with budget and, in certain cases, to measure certain corporate financial goals used in determining variable compensation.

PPL's three non-GAAP financial measures include:

- "Kentucky Gross Margins" is a single financial performance measure of the Kentucky Regulated segment's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, fuel and energy purchases are deducted from revenues. In addition, utility revenues and expenses associated with approved cost recovery mechanisms are offset. These mechanisms allow for recovery of certain expenses, return on capital investments and performance incentives. Certain costs associated with these mechanisms, primarily ECR, DSM and GLT, are recorded as "Other operation and maintenance" and "Depreciation." As a result, this measure represents the net revenues from the Kentucky Regulated segment's operations.
- "Pennsylvania Gross Delivery Margins" is a single financial performance measure of the Pennsylvania Regulated segment's electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Other operation and maintenance," which is primarily Act 129 costs, and "Taxes, other than income," which is primarily gross receipts tax. This performance measure includes PLR energy purchases by PPL Electric from PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)" in the table below. As a result, this measure represents the net revenues from the Pennsylvania Regulated segment's electric delivery operations.
- "Unregulated Gross Energy Margins" is a single financial performance measure of the Supply segment's competitive energy non-trading and trading activities. In calculating this measure, the Supply segment's energy revenues are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges and gross receipts tax, which is recorded in "Taxes, other than income". This performance measure is relevant to PPL due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant fluctuations in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are recorded in "PLR intersegment utility revenue (expense)" in the table below. PPL excludes from "Unregulated Gross Energy Margins" the Supply segment's adjusted energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in adjusted energy-related economic activity is the premium amortization associated with options and for 2012 the ineffective portion of qualifying cash flow hedges and realized economic activity associated with the monetization of certain full-requirement sales contracts in 2010. This economic activity was deferred, with the exception of the full-requirement sales contracts that were monetized, and included in Unregulated Gross Energy Margins over the delivery period that was hedged or upon realization.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile PPL's three non-GAAP financial measures to "Operating Income" for the periods ended June 30.

	2013 Three Months				2012 Three Months					
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues										
Utility	\$ 682	\$ 413		\$ 560 (c)	\$ 1,655	\$ 658	\$ 403		\$ 544 (c)	\$ 1,605
PLR intersegment utility revenue (expense) (d)		(12)	\$ 12				(17)	\$ 17		
Unregulated retail electric and gas			237	20 (f)	257			192	(13)(f)	179
Wholesale energy marketing										
Realized			812	(1)	811			1,075	8 (e)	1,083

Total Operating Expenses	278	159	656	1,599	2,692	286	165	801	725	1,977
Total	\$ 404	\$ 242	\$ 405	\$ (293)	\$ 758	\$ 372	\$ 221	\$ 493	\$ (514)	\$ 572

	2013 Six Months				2012 Six Months					
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues										
Utility	\$ 1,482	\$ 925		\$ 1,198 (c)	\$ 3,605	\$ 1,363	\$ 860		\$ 1,096 (c)	\$ 3,319
PLR intersegment utility revenue (expense) (d)		(26)	\$ 26				(38)	\$ 38		
Unregulated retail electric and gas			483	11 (f)	494			406	(4)(f)	402
Wholesale energy marketing										
Realized			1,789	(2)	1,787			2,279	12 (e)	2,291
Unrealized economic activity				(232)(f)	(232)				394 (f)	394
Net energy trading margins			(11)		(11)			18		18
Energy-related businesses				264	264				237	237
Total Operating Revenues	1,482	899	2,287	1,239	5,907	1,363	822	2,741	1,735	6,661

Operating Expenses										
Fuel	447		522	1	970	428		385	22 (g)	835
Energy purchases										
Realized	123	292	855	(7)	1,263	108	273	1,251	38 (e)	1,670
Unrealized economic activity				(155)(f)	(155)				149 (f)	149
Other operation and maintenance	48	43	8	1,275	1,374	46	49	11	1,339	1,445
Depreciation	2			568	570	26			509	535
Taxes, other than income		47	18	117	182		44	16	118	178
Energy-related businesses				252	252				226	226
Intercompany eliminations		(2)	2				(2)	1	1	
Total Operating Expenses	620	380	1,405	2,051	4,456	608	364	1,664	2,402	5,038
Total	\$ 862	\$ 519	\$ 882	\$ (812)	\$ 1,451	\$ 755	\$ 458	\$ 1,077	\$ (667)	\$ 1,623

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

(c) Primarily represents WPD's utility revenue.

(d) Primarily related to PLR supply sold by PPL EnergyPlus to PPL Electric.

(e) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. For the three and six months ended June 30, 2012, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include net pre-tax losses of \$12 million and \$33 million related to the monetization of certain full-requirement sales contracts.

(f) Represents energy-related economic activity, which is subject to fluctuations in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.

(g) Includes economic activity related to fuel as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. The three and six months ended June 30, 2012 include a pre-tax loss of \$12 million related to coal contract modification payments.

Changes in Non-GAAP Financial Measures

The following table shows PPL's three non-GAAP financial measures for the periods ended June 30 as well as the change between periods. The factors that gave rise to the changes are described below the table.

	Three Months			Six Months		
	2013	2012	Change	2013	2012	Change
Kentucky Gross Margins	\$ 404	\$ 372	\$ 32	\$ 862	\$ 755	\$ 107
PA Gross Delivery Margins by Component						
Distribution	\$ 183	\$ 170	\$ 13	\$ 407	\$ 359	\$ 48
Transmission	59	51	8	112	99	13
Total	\$ 242	\$ 221	\$ 21	\$ 519	\$ 458	\$ 61
Unregulated Gross Energy Margins by Region						
Non-trading						
Eastern U.S.	\$ 349	\$ 407	\$ (58)	\$ 779	\$ 896	\$ (117)
Western U.S.	56	76	(20)	114	163	(49)
Net energy trading		10	(10)	(11)	18	(29)
Total	\$ 405	\$ 493	\$ (88)	\$ 882	\$ 1,077	\$ (195)

Kentucky Gross Margins

Margins increased for the three months ended June 30, 2013 compared with 2012, primarily due to higher base rates of \$25 million, environmental cost recoveries added to base rates of \$14 million and increased environmental investments of \$3 million, partially offset by lower volumes of \$9 million. The change in volumes was partially attributable to weather, as cooling degree days decreased 14% compared to the same period in 2012.

Margins increased for the six months ended June 30, 2013 compared with 2012, primarily due to higher base rates of \$56 million, environmental cost recoveries added to base rates of \$32 million, increased environmental investments of \$10 million and higher volumes of \$10 million. The change in volumes was attributable to weather, as heating degree days increased 40% compared to the same period in 2012, offsetting the lower cooling degree days for the three-month period.

The increase in base rates was the result of new KPSC rates effective January 1, 2013. The environmental cost recoveries added to base rates were due to the elimination of the 2005 and 2006 ECR plans as a result of the 2012 Kentucky rate cases. This elimination results in depreciation and other operation and maintenance expenses associated with the 2005 and 2006 ECR plans being excluded from Margins in 2013, while the recovery of such costs remain in Margins through base rates.

Pennsylvania Gross Delivery Margins

Distribution

Margins increased for the three months ended June 30, 2013 compared with 2012, primarily due to an \$11 million favorable effect of price as a result of higher base rates, effective January 1, 2013.

Margins increased for the six months ended June 30, 2013 compared with 2012, primarily due to a \$13 million adverse effect of mild weather in 2012 and a \$32 million favorable effect of price, largely comprised of higher base rates, effective January 1, 2013, and higher volumes of \$4 million.

Transmission

Margins increased for the three and six months ended June 30, 2013 compared with 2012, primarily due to increased investment in plant and the recovery of additional costs through the FERC formula-based rates.

Unregulated Gross Energy Margins

Eastern U.S.

The increase (decrease) in non-trading margins for the periods ended June 30, 2013 compared with 2012 were due to:

	<u>Three Months</u>	<u>Six Months</u>
Baseload energy prices	\$ (121)	\$ (246)
Nuclear fuel prices	(4)	(10)
Coal prices	1	(9)
Intermediate and peaking Spark Spreads	(7)	7
Nuclear generation volume	9	9
Full-requirement sales contracts	5	10
Gas optimization and storage	10	11
Ironwood Acquisition which eliminated tolling expense	2	17
Net economic availability of coal and hydroelectric plants	7	39
Capacity prices	36	47
Other	4	8
Total	<u>\$ (58)</u>	<u>\$ (117)</u>

Western U.S.

Non-trading margins for the three and six months ended June 30, 2013 compared with the same periods in 2012 were lower due to \$20 million and \$59 million of lower wholesale prices. The six-month period was partially offset by \$7 million of higher wholesale volumes.

Net Energy Trading Margins

Net energy trading margins for the three months ended June 30, 2013 compared with the same period in 2012 decreased as a result of lower margins of \$5 million on power positions and \$3 million on FTRs.

Net energy trading margins for the six months ended June 30, 2013 compared with the same period in 2012 decreased as a result of lower margins of \$15 million on gas positions and \$7 million on power positions.

Utility Revenues

The increase (decrease) in utility revenues for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Domestic:		
PPL Electric (a)	\$ 10	\$ 65
LKE (b)	24	119
Total Domestic	<u>34</u>	<u>184</u>
U.K.:		
Price (c)	50	113
Volume (d)	23	28
DPCR4 accrual adjustments (e)	(24)	(24)
Foreign currency exchange rates	(26)	(16)
Other (f)	(7)	1
Total U.K.	<u>16</u>	<u>102</u>
Total	<u>\$ 50</u>	<u>\$ 286</u>

(a) See "Pennsylvania Gross Delivery Margins" for further information.

(b) See "Kentucky Gross Margins" for further information.

(c) The increase for the three and six-month periods is primarily due to price increases effective April 1, 2013 and April 1, 2012.

(d) The increase for the three and six-month periods is primarily due to the favorable effect of weather.

(e) The decrease for the three and six-month periods is due to a \$24 million reduction in revenue based on information provided by Ofgem regarding the calculation of line loss incentive/penalty for all network operators related to DPCR4. See Note 6 to the Financial Statements for additional information.

(f) The decrease for the three month period is primarily related to a \$6 million reduction in third-party engineering revenue, which is partially offset by a reduction in costs in "Other operation and maintenance" on the Statements of Income.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Domestic:		
Uncollectible accounts (a)	\$ (4)	\$ (20)
LKE coal plant outages (b)	(4)	(17)
Brunner Island Unit 3 outage in 2012	(4)	(19)
PPL Susquehanna projects	(6)	(9)
PPL Susquehanna refueling outage	(5)	(8)
Act 129 (c)	(7)	(7)
Conemaugh Unit 2 outage in 2013	3	5
Other generation plant costs	(7)	(1)
Other	(7)	1
U.K.:		
Third-party engineering (d)	(3)	2
Network maintenance (e)	6	13
Insurance claim provision release	6	6
Severance compensation (f)	(4)	(8)
Pension	(2)	(4)
Foreign currency exchange rates	(5)	(3)
Other	2	(2)
Total	<u>\$ (41)</u>	<u>\$ (71)</u>

- (a) The decrease for the six-month period is primarily due to SMGT filing for protection under Chapter 11 of the U.S. Bankruptcy Code in 2011. \$11 million of damages billed to SMGT were fully reserved in 2012.
- (b) The decrease for the three and six month periods is due to the timing and scope of scheduled outages.
- (c) The decrease for the three and six month periods is due to a reduction in Act 129 energy efficiency and conservation plan costs for Phase 1 programs. Phase 1 ended May 31, 2013.
- (d) These costs are offset by revenues reflected in "Utility" on the Statement of Income.
- (e) The increase for the three and six month periods is primarily due to higher vegetation management costs.
- (f) The decrease for the three and six month periods is primarily due to costs incurred in 2012 related to the WPD Midlands reorganization.

Depreciation

The increase (decrease) in depreciation for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Additions to PP&E	\$ 23	\$ 44
LKE lower depreciation rates effective January 1, 2013	(6)	(11)
Ironwood Acquisition		6
Other	(2)	(4)
Total	<u>\$ 15</u>	<u>\$ 35</u>

Other Income (Expense) - net

The \$17 million decrease in other income (expense) - net for the three months ended June 30, 2013 compared with 2012 was primarily due to a decrease of \$21 million from realized and unrealized gains on foreign currency contracts.

The \$122 million increase in other income (expense) - net for the six months ended June 30, 2013 compared with 2012 was primarily due to an increase of \$116 million from realized and unrealized gains on foreign currency contracts.

See Note 12 to the Financial Statements for additional information on other income (expense) - net.

Interest Expense

The increase (decrease) in interest expense for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Long-term debt interest expense (a)	\$ 8	\$ 22
Loss on extinguishment of debt (b)	10	10
Ironwood Acquisition financing		4
Capitalized interest	3	4
Other	1	3
Total	<u>\$ 22</u>	<u>\$ 43</u>

- (a) The increase for the three-month period was primarily due to PPL Capital Funding's debt issuances in March 2013, June 2012 and October 2012. See Note 7 to the Financial Statements in this Form 10-Q and in PPL's 2012 Form 10-K for additional information.

The increase for the six-month period was primarily due to PPL Capital Funding's debt issuances as discussed above as well as higher accretion expense on WPD index linked notes and interest on WPD (East Midlands') April 2012 issuance of £100 million, 5.25% Senior Notes due 2023.

- (b) In May 2013, PPL Capital Funding remarketed and exchanged junior subordinated notes that were originally issued in June 2010 as a component of PPL's 2010 Equity Units. See Note 7 to the Financial Statements for additional information.

Income Taxes

The increase (decrease) in income taxes for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Higher (lower) pre-tax income	\$ 52	\$ (67)
Federal and state tax reserve adjustments (a)	(35)	(35)
U.S. income tax on foreign earnings net of foreign tax credit (b)	(6)	(6)
Foreign tax reserve adjustments (c)	8	5
Foreign tax return adjustments	(4)	(4)
Net operating loss carryforward adjustments (d)	3	9
State deferred tax rate change (e)		11
Other	3	
Total	<u>\$ 21</u>	<u>\$ (87)</u>

- (a) In May 2013, the U.S. Supreme Court reversed the December 2011 ruling of the U.S. Court of Appeals for the Third Circuit on the creditability of U.K. Windfall Profits Tax for tax purposes. As a result of this decision, PPL recorded a tax benefit of \$44 million during the three and six months ended June 30, 2013. See Note 5 to the Financial Statements for additional information.
- (b) During the three and six months ended June 30, 2013, PPL recorded a \$14 million increase to income tax expense primarily attributable to a revision in the expected taxable amount of cash repatriation in 2013 and recorded a tax benefit of \$19 million associated with a ruling obtained from the IRS impacting the recalculation of 2010 U.K. earnings and profits that will be reflected on an amended 2010 U.S. tax return.
- (c) During the three and six months ended June 30, 2012, PPL recorded a tax benefit following resolution of a U.K. tax issue related to the tax deductibility of interest expense.
- (d) During the three and six months ended June 30, 2012, PPL recorded adjustments to deferred taxes related to net operating loss carryforwards of LKE based on income tax return adjustments.
- (e) During the six months ended June 30, 2012, PPL recorded adjustments related to state deferred tax liabilities.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

PPL had the following at:

	<u>June 30, 2013</u>	<u>December 31, 2012</u>
Cash and cash equivalents	\$ 711	\$ 901
Short-term debt	\$ 1,206	\$ 652

At June 30, 2013, \$178 million of cash and cash equivalents were denominated in GBP. If these amounts would be remitted as dividends, PPL may be subject to additional U.S. income taxes, net of allowable foreign income tax credits. Historically, dividends paid by foreign subsidiaries have been distributions of the current year's earnings. See Note 5 to the Financial Statements in PPL's 2012 Form 10-K for additional information on undistributed earnings of WPD.

The \$190 million decrease in PPL's cash and cash equivalents position was primarily the net result of:

- capital expenditures of \$1.8 billion;
- the payment of \$426 million of common stock dividends;
- net cash provided by operating activities of \$947 million;
- net increase in short-term debt of \$563 million; and
- proceeds of \$450 million from the issuance of long-term debt.

PPL's cash provided by operating activities had no net change for the six months ended June 30, 2013 compared with 2012. The result was the net effect of:

- a \$219 million increase in net income, when adjusted for non-cash components; and
- a \$25 million decrease in defined benefit plan funding, offset by
- a \$245 million increase in cash used by components of working capital (primarily due to changes in accounts receivable of \$210 million and in counterparty collateral of \$118 million, partially offset by a \$95 million change in fuel, materials and supplies).

Capital expenditures increased by \$488 million for the six months ended June 30, 2013 compared with 2012, primarily due to PPL Electric's Susquehanna-Roseland transmission project and projects to enhance system reliability, and LKE's environmental projects at Mill Creek and Ghent and construction of Cane Run Unit 7.

Credit Facilities

PPL maintains credit facilities to provide liquidity and to backstop commercial paper issuances. At June 30, 2013, PPL's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Letters of Credit Issued and Commercial Paper Backup</u>	<u>Unused Capacity</u>
PPL Energy Supply Credit Facilities	\$ 3,150		\$ 785	\$ 2,365
PPL Electric Credit Facilities	400		86	314
LG&E Syndicated Credit Facility	500		80	420
KU Credit Facilities	598		370	228
Total Domestic Credit Facilities (a)	<u>\$ 4,648</u>		<u>\$ 1,321</u>	<u>\$ 3,327</u>
Total WPD Credit Facilities (b)	<u>£ 1,055</u>	<u>£ 193</u>		<u>£ 862</u>

- (a) The commitments under PPL's domestic credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 8% of the total committed capacity.
- (b) At June 30, 2013, the USD equivalent of unused capacity under WPD's committed credit facilities was \$1.3 billion. The commitments under WPD's credit facilities are provided by a diverse bank group with no one bank providing more than 13% of the total committed capacity.

See Note 7 to the Financial Statements for further discussion of PPL's credit facilities.

Commercial Paper

PPL Energy Supply maintains a commercial paper program for up to \$750 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At June 30, 2013 and December 31, 2012, PPL Energy Supply had \$575 million and \$356 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheets, at weighted-average interest rates of 0.29% and 0.50%.

PPL Electric maintains a commercial paper program for up to \$300 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. At June 30, 2013, PPL Electric had \$85 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheet, at a weighted-average interest rate of 0.34%. PPL Electric had no commercial paper outstanding at December 31, 2012.

In April 2013, LG&E and KU each increased the capacity of their commercial paper programs from \$250 million to \$350 million to provide an additional financing source to fund their short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by LG&E's and KU's Syndicated Credit Facilities. At June 30, 2013 and December 31, 2012, LG&E had \$80 million and \$55 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheets, at weighted-average interest rates of 0.32% and 0.42%. At June 30, 2013 and December 31, 2012, KU had \$172 million and \$70 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheets, at weighted-average interest rates of 0.33% and 0.42%.

Long-term Debt and Equity Securities

See "Overview - Financial and Operational Developments" above for information regarding equity forward agreements and the 2010 Equity Units. PPL has no plans to issue new shares of common stock for the remainder of 2013.

In March 2013, PPL Capital Funding issued \$450 million of its 5.90% Junior Subordinated Notes due 2073. PPL Capital Funding received proceeds of \$436 million, net of underwriting fees, which was loaned to or invested in affiliates of PPL Capital Funding and used to fund their capital expenditures and other general corporate purposes.

In July 2013, PPL Electric issued \$350 million of 4.75% First Mortgage Bonds due 2043. PPL Electric received proceeds of \$345 million, net of a discount and underwriting fees, which will be used for capital expenditures, to fund pension obligations and for other general corporate purposes.

See Note 7 to the Financial Statements for further discussion of Long-term Debt and Equity Securities.

Common Stock Dividends

In May 2013, PPL declared its quarterly common stock dividend, payable July 1, 2013, at 36.75 cents per share (equivalent to \$1.47 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Rating Agency Actions

Fitch, Moody's and S&P periodically review the credit ratings on the debt securities of PPL and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL and its subsidiaries are based on information provided by PPL and other sources. The ratings of Fitch, Moody's and S&P are not a recommendation to buy, sell or hold any securities of PPL or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities.

A downgrade in PPL's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets. PPL and its subsidiaries have no credit rating triggers that would result in the reduction of access to capital markets or the acceleration of maturity dates of outstanding debt.

The rating agencies took the following actions related to PPL and its subsidiaries during 2013:

In February 2013, Moody's upgraded its rating, from B2 to Ba1, and revised the outlook from under review to stable for PPL Ironwood.

In March 2013, Fitch, Moody's and S&P assigned ratings of BB+, Ba1 and BB+ to PPL Capital Funding's \$450 million 5.90% Junior Subordinated Notes due 2073. Fitch also assigned a stable outlook to these notes.

In April 2013, Fitch affirmed the BBB- rating and stable outlook on PPL Montana's pass-through trust certificates due 2020.

In May 2013, Fitch, Moody's and S&P assigned ratings of BBB, Baa3 and BBB- to PPL Capital Funding's \$250 million 1.90% Senior Notes due 2018, \$600 million 3.40% Senior Notes due 2023 and \$300 million 4.70% Senior Notes due 2043. Fitch also assigned a stable outlook to these notes.

In July 2013, Fitch, Moody's and S&P assigned ratings of A-, A3 and A- to PPL Electric's \$350 million 4.75% First Mortgage Bonds due 2043. Fitch also assigned a stable outlook to these notes and S&P assigned a recovery rating of 1+.

In July 2013, S&P confirmed the AA+ ratings for KU's 2000 Series A Solid Waste Disposal Facility Revenue Bonds and KU's 2004 Series A, 2006 Series B and 2008 Series A Environmental Facilities Revenue Bonds. S&P also confirmed the A-1+ short term rating on these Bonds.

In July 2013, Moody's withdrew its rating and outlook for PPL Ironwood.

In July 2013, S&P lowered its rating, from BBB- to BB+, and retained the negative outlook for PPL Montana's pass-through trust certificates due 2020.

Ratings Triggers

PPL and PPL Energy Supply have various contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements and interest rate and foreign currency instruments, which contain provisions that require PPL and PPL Energy Supply to post additional collateral or permit the counterparty to terminate the contract, if PPL's or PPL Energy Supply's credit rating were to fall below investment grade. See Note 14 to the Financial

Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at June 30, 2013.

For additional information on PPL's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL's 2012 Form 10-K.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about PPL's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

PPL segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL's competitive generation assets and full-requirement sales and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. See Note 14 to the Financial Statements for additional information.

To hedge the impact of market price volatility on PPL's energy-related assets, liabilities and other contractual arrangements, PPL both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL's non-trading commodity derivative contracts range in maturity through 2019.

The following table sets forth the changes in the net fair value of non-trading commodity derivative contracts for the periods ended June 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Six Months	
	2013	2012	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 229	\$ 1,215	\$ 473	\$ 1,082
Contracts realized or otherwise settled during the period	(100)	(261)	(237)	(540)
Fair value of new contracts entered into during the period (a)	37	13	46	12
Other changes in fair value	119	(6)	3	407
Fair value of contracts outstanding at the end of the period	<u>\$ 285</u>	<u>\$ 961</u>	<u>\$ 285</u>	<u>\$ 961</u>

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of non-trading commodity derivative contracts at June 30, 2013, based on the observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				Total Fair Value
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	
Prices based on significant observable inputs (Level 2)	\$ 226	\$ 32	\$ (10)	\$ 5	\$ 253
Prices based on significant unobservable inputs (Level 3)	10	18	4		32
Fair value of contracts outstanding at the end of the period	<u>\$ 236</u>	<u>\$ 50</u>	<u>\$ (6)</u>	<u>\$ 5</u>	<u>\$ 285</u>

PPL sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties (or their counterparties) with which it has energy contracts and other factors could affect PPL's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

Commodity Price Risk (Trading)

PPL's trading commodity derivative contracts range in maturity through 2018. The following table sets forth changes in the net fair value of trading commodity derivative contracts for the periods ended June 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Six Months	
	2013	2012	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 15	\$ 2	\$ 29	\$ (4)
Contracts realized or otherwise settled during the period		(1)	(2)	(1)
Fair value of new contracts entered into during the period (a)	(4)	(1)	(16)	5
Other changes in fair value	7	17	7	17
Fair value of contracts outstanding at the end of the period	\$ 18	\$ 17	\$ 18	\$ 17

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of trading commodity derivative contracts at June 30, 2013, based on the observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				Total Fair Value
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	
Prices based on significant observable inputs (Level 2)	\$ 4	\$ 6			\$ 10
Prices based on significant unobservable inputs (Level 3)	6	2			8
Fair value of contracts outstanding at the end of the period	\$ 10	\$ 8			\$ 18

VaR Models

A VaR model is utilized to measure commodity price risk in unregulated gross energy margins for the non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's disciplined hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for the six months ended June 30, 2013 was as follows.

	Trading VaR	Non-Trading VaR
95% Confidence Level, Five-Day Holding Period		
Period End	\$ 2	\$ 8
Average for the Period	4	9
High	6	10
Low	2	8

The trading portfolio includes all proprietary trading positions, regardless of the delivery period. All positions not considered proprietary trading are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at June 30, 2013.

Interest Rate Risk

PPL and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. PPL utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL's debt portfolio due to changes in the absolute level of interest rates.

At June 30, 2013, PPL's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL is also exposed to changes in the fair value of its domestic and international debt portfolios. PPL estimated that a 10% decrease in interest rates at June 30, 2013 would increase the fair value of its debt portfolio by \$631 million.

At June 30, 2013, PPL had the following interest rate hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)
Cash flow hedges			
Interest rate swaps (c)	\$ 1,930	\$ 129	\$ (74)
Cross-currency swaps (d)	1,262	61	(171)
Economic activity			
Interest rate swaps (e)	179	(44)	(4)

(a) Includes accrued interest, if applicable.

(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability. Sensitivities represent a 10% adverse movement in interest rates, except for cross-currency swaps which also includes foreign currency exchange rates.

(c) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any changes in the fair value of such cash flow hedges are recorded in equity or as regulatory assets or liabilities, if recoverable through rates. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings. The positions outstanding at June 30, 2013 mature through 2044.

(d) PPL utilizes cross-currency swaps to hedge the interest payments and principal of WPD's U.S. dollar-denominated senior notes. While PPL is exposed to changes in the fair value of these instruments, any change in the fair value of these instruments is recorded in equity and reclassified into earnings in the same period during which the item being hedged affects earnings. The positions outstanding at June 30, 2013 mature through 2028.

(e) PPL utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While PPL is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic positions are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. The positions outstanding at June 30, 2013 mature through 2033.

Foreign Currency Risk

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL's domestic operations may make purchases of equipment in currencies other than U.S. dollars.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

At June 30, 2013, PPL had the following foreign currency hedges outstanding:

	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)
Net investment hedges (b)	£ 166	\$ 11	\$ (25)
Economic activity (c)	1,185	71	(171)

- (a) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
- (b) To protect the value of a portion of its net investment in WPD, PPL executes forward contracts to sell GBP. The positions outstanding at June 30, 2013 mature through 2014. Excludes the amount of intercompany loans classified as net investment hedges. See Note 14 to the Financial Statements for additional information.
- (c) To economically hedge the translation of expected income denominated in GBP to U.S. dollars, PPL enters into a combination of average rate forwards and average rate options to sell GBP. The forwards and options outstanding at June 30, 2013 mature through 2015.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the PPL Susquehanna nuclear plant (Susquehanna). At June 30, 2013, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on the Balance Sheet. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are primarily exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its nuclear decommissioning trust policy statement. At June 30, 2013, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated \$57 million reduction in the fair value of the trust assets. See Notes 13 and 17 to the Financial Statements for additional information regarding the NDT funds.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL's 2012 Form 10-K for additional information.

Foreign Currency Translation

The value of the British pound sterling fluctuates in relation to the U.S. dollar. Changes in this exchange rate resulted in a foreign currency translation loss of \$269 million for the six months ended June 30, 2013, which primarily reflected a \$714 million reduction to PP&E and goodwill offset by a reduction of \$445 million to net liabilities. Changes in this exchange rate resulted in a foreign currency translation loss of \$104 million for the six months ended June 30, 2012, which primarily reflected a \$259 million reduction to PP&E and goodwill offset by a reduction of \$155 million to net liabilities. The impact of foreign currency translation is recorded in AOCI.

Related Party Transactions

PPL is not aware of any material ownership interests or operating responsibility by senior management of PPL, PPL Energy Supply, PPL Electric, LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with PPL.

Acquisitions, Development and Divestitures

PPL from time to time evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for information on the more significant activities.

Environmental Matters

Extensive federal, state and local environmental laws and regulations are applicable to PPL's air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of PPL's business. The cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed by the relevant agencies. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the costs for their products or their demand for PPL's services.

Physical effects associated with possible climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage to PPL's generation assets, electricity transmission and distribution systems, as well as impacts on customers. In addition, changed weather patterns could potentially reduce annual rainfall in areas where PPL has hydroelectric generating facilities or where river water is used to cool its fossil and nuclear powered generators. PPL cannot currently predict whether its businesses will experience these potential climate change-related risks or estimate the potential cost of their related consequences.

The following is a discussion of the more significant environmental matters.

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous waste) under existing solid waste regulations. A final rulemaking is currently expected before the end of 2015. However, the timing of the final regulations could be accelerated by certain litigation that could require the EPA to issue its regulations sooner. Regulations could impact handling, disposal and/or beneficial use of CCRs. The financial impact could be material if CCRs are regulated as hazardous waste, and significant if regulated as non-hazardous, in accordance with the proposed rule. On July 25, 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from regulating CCRs under RCRA and sets rules governing state programs. Prospects remain uncertain for similar legislation to pass in the U.S. Senate.

Effluent Limitation Guidelines (ELGs)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations also contain some requirements that would affect the inspection and operation of CCR facilities, if finalized. The proposal contains several alternative approaches, some of which could significantly impact PPL's coal-fired plants. PPL will work with industry groups to comment on the proposed regulation. The final regulation is expected in May 2014. At the present time, PPL is unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

316(b) Cooling Water Intake Structure Rule

In April 2011, the EPA published a draft regulation under Section 316(b) of the Clean Water Act, which regulates cooling water intakes for power plants. The draft rule has two provisions: requiring installation of Best Technology Available (BTA) to reduce mortality of aquatic organisms that are pulled into the plant cooling water system (entrainment); and imposing standards for reduction of mortality of aquatic organisms trapped on water intake screens (impingement). A final rule is expected to be issued in November 2013. The proposed regulation would apply to nearly all PPL-owned steam electric plants in Pennsylvania, Kentucky, and Montana, potentially even including those equipped with closed-cycle cooling systems. PPL's compliance costs could be significant, especially if the final rule requires closed-cycle systems at plants that do not currently have them or conversions of once-through systems to closed-cycle.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a new proposal for new power plants by September 20, 2013, with a final rule to be issued in a timely fashion thereafter, and to issue proposed standards for existing power plants by June 1, 2014 with a final rule by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may lead to more costly regulatory requirements. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect PPL and others in the industry as transmission system modifications to improve the ability to withstand major storms may be needed in order to meet those requirements.

MATS

The EPA finalized MATS requiring fossil-fuel fired plants to reduce emissions of mercury and other hazardous air pollutants by April 16, 2015. The rule is being challenged by industry groups and states. The EPA has subsequently proposed changes to the rule with respect to new sources to address the concern that the rule effectively precludes construction of any new coal-fired plants. PPL is generally well-positioned to comply with MATS, primarily due to recent investments in environmental

controls and approved ECR plans to install additional controls at some of its Kentucky plants. Additionally, PPL is evaluating chemical additive systems for mercury control at Brunner Island, and modifications to existing controls at Colstrip for improved particulate matter reductions. In September 2012, PPL announced its intention to place its Corette plant in long-term reserve status beginning in April 2015 due to expected market conditions and costs to comply with MATS. The anticipated retirements of certain coal-fired electric generating units are in response to this and other environmental regulations.

Regional Haze

Under the EPA's regional haze programs (developed to eliminate man-made visibility degradation by 2064), states are required to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977. For the eastern U.S., the EPA had determined that region-wide reductions under the CAIR or CSAPR trading program could be utilized by state programs to satisfy BART requirements. However, the August 2012 decision by the U.S. Court of Appeals for the District of Columbia Circuit (Circuit Court) to vacate and remand CSAPR exposes power plants located in the eastern U.S., including PPL's plants in Pennsylvania and Kentucky, to reductions in sulfur dioxide and nitrogen oxides as required by BART.

The EPA signed its final Federal Implementation Plan of the Regional Haze Rules for Montana in September 2012, with tighter emissions limits for Colstrip Units 1 & 2 based on the installation of new controls (no limits or additional controls were specified for Colstrip Units 3 & 4), and tighter emission limits for Corette (which are not based on additional controls). The cost of the potential additional controls for Colstrip Units 1 & 2, if required, could be significant. PPL expects to meet the tighter permit limits at Corette without any significant changes to operations, although other requirements have led to the planned suspension of operations at Corette beginning in April 2015 (see "MATS" discussion above).

CSAPR and CAIR

In 2011, the EPA finalized its CSAPR regulating emissions of nitrogen oxide and sulfur dioxide through new allowance trading programs which were to be implemented in two phases (2012 and 2014). Like its predecessor, the CAIR, CSAPR targeted sources in the eastern U.S. In December 2011, the Circuit Court stayed implementation of CSAPR, leaving CAIR in place. Subsequently, in August 2012, the Circuit Court vacated and remanded CSAPR back to the EPA for further rulemaking, again leaving CAIR in place in the interim, and on June 24, 2013 the U.S. Supreme Court granted the EPA's petition for review of the Circuit Court's decision.

PPL plants in Pennsylvania and Kentucky will continue to comply with CAIR through optimization of existing controls, balanced with emission allowance purchases. The Circuit Court's August 2012 decision leaves plants in CSAPR-affected states potentially exposed to more stringent emission reductions due to regional haze implementation (it was previously determined that CSAPR or CAIR participation satisfies regional haze requirements), and/or petitions to the EPA by downwind states under Section 126 of the Clean Air Act requesting the EPA to require plants that allegedly contribute to downwind non-attainment to take action to reduce emissions.

See Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in PPL's 2012 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Notes 2 and 19 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: price risk management, defined benefits, asset impairment (excluding investments), loss accruals, AROs, income taxes, and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in PPL's 2012 Form 10-K for a discussion of each critical accounting policy.

PPL ENERGY SUPPLY, LLC AND SUBSIDIARIES

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with PPL Energy Supply's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL Energy Supply's 2012 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL Energy Supply and its business strategy, a summary of Net Income Attributable to PPL Energy Supply Member and a discussion of certain events related to PPL Energy Supply's results of operations and financial condition.
- "Results of Operations" provides a summary of PPL Energy Supply's earnings and a description of key factors expected to impact future earnings. This section ends with explanations of significant changes in principal line items on PPL Energy Supply's Statements of Income, comparing the three and six months ended June 30, 2013 with the same periods in 2012.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Energy Supply's liquidity position and credit profile. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of PPL Energy Supply's risk management programs relating to market and credit risk.

Overview

Introduction

PPL Energy Supply is an energy company with headquarters in Allentown, Pennsylvania. Through its subsidiaries, PPL Energy Supply is primarily engaged in the competitive generation and marketing of electricity in two key markets - the northeastern and northwestern U.S.

The capacity (summer rating) of PPL Energy Supply's competitive electricity generation facilities at June 30, 2013 was:

<u>Primary Fuel</u>	<u>Ownership or Lease Interest in MW (a)</u>
Coal (b) (c)	4,146
Natural Gas/Oil	3,316
Nuclear (c)	2,275
Hydro	807
Other (d)	70
Total	<u>10,614</u>

- (a) The capacity of generation units is based on a number of factors, including the operating experience and physical conditions of the units, and may be revised periodically to reflect changed circumstances. See "Item 2. Properties" in PPL Energy Supply's 2012 Form 10-K for additional information on ownership percentages.
- (b) Includes a leasehold interest held by PPL Montana. See Note 11 to the Financial Statements in PPL Energy Supply's 2012 Form 10-K for additional information.
- (c) Includes units that are jointly owned. Each owner is entitled to its proportionate share of the unit's total output and funds its proportionate share of fuel and other operating costs. See Note 14 to the Financial Statements in PPL Energy Supply's 2012 Form 10-K for additional information.
- (d) Includes facilities owned, controlled or for which PPL Energy Supply has the rights to the output.

Business Strategy

PPL Energy Supply's strategy is to achieve disciplined optimization of energy supply margins while mitigating near-term volatility in both cash flows and earnings. More specifically, PPL Energy Supply's strategy is to optimize the value from its competitive generation and marketing portfolios. PPL Energy Supply endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk. PPL Energy

Supply is focused on managing profitability during the current and projected period of low commodity prices. See "Financial and Operational Developments - Economic and Market Conditions" below.

To manage financing costs and access to credit markets, a key objective for PPL Energy Supply is to maintain a strong credit profile and liquidity position. In addition, PPL Energy Supply has financial and operational risk management programs that, among other things, are designed to monitor and manage exposure to earnings and cash flow volatility related to changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of its generating units.

Financial and Operational Developments

Net Income Attributable to PPL Energy Supply Member

Net Income Attributable to PPL Energy Supply Member for the three and six months ended June 30, 2013 was \$86 million and \$48 million compared to \$19 million and \$328 million for the same periods in 2012.

See "Results of Operations" below for further discussion and analysis of the consolidated results of operations.

Economic and Market Conditions

Current depressed wholesale market prices for electricity and natural gas have resulted from general weak economic conditions and other factors, including the impact of expanded domestic shale gas development and additional renewable energy sources, primarily wind in the western U.S. Unregulated Gross Energy Margins associated with PPL Energy Supply's competitive generation and marketing business are impacted by changes in energy and capacity market prices and demand for electricity and natural gas, power plant availability, competition in the markets for retail customers, fuel costs and availability, transmission constraints that impact the locational pricing of electricity at PPL Energy Supply's power plants, fuel transportation costs and the level and price of hedging activities. As a result of these factors, lower energy margins are expected when compared to the 2012 energy margins. As has been PPL Energy Supply's practice in periods of changing business conditions, PPL Energy Supply continues to review its future business and operational plans, including capital and operation and maintenance expenditures, its hedging strategies, and potential plant modifications to burn lower cost fuels.

As previously disclosed, PPL Energy Supply's businesses are subject to extensive federal, state and local environmental laws, rules and regulations, including those surrounding coal combustion residuals, GHG, effluent limitation guidelines and MATS. See "Financial Condition - Environmental Matters" below for additional information on these requirements. These more stringent environmental requirements, combined with low energy margins for competitive generation, have led several energy companies, including PPL Energy Supply, to announce plans to either temporarily or permanently close, or place in long-term reserve status, certain of their coal-fired generating plants.

In 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette plant in long-term reserve status, suspending the plant's operation due to expected market conditions and the costs to comply with MATS. PPL Energy Supply continues to monitor its Corette plant for potential impairment. The Corette plant asset group's carrying value at June 30, 2013 was \$68 million. See Note 10 to the Financial Statements for additional information. PPL Energy Supply believes its remaining competitive generation assets are well positioned to meet the additional environmental requirements based on prior and planned investments and does not currently anticipate the need to temporarily or permanently shut down additional coal-fired plants.

PPL Energy Supply cannot predict the future impact that economic and market conditions and changes in regulatory requirements may have on its financial condition or results of operations.

Susquehanna Turbine Blade Inspection

In the spring of 2013, PPL Susquehanna made modifications to address the causes of turbine blade cracking at the PPL Susquehanna nuclear plant that was first identified in 2011. The modifications were made during the Unit 2 refueling outage and an additional planned outage for Unit 1. Additional modifications will be made during the planned outages in 2014 and 2015. Following completion of these modifications, PPL Susquehanna will continue monitoring the turbine blades using enhanced diagnostic equipment.

Colstrip Unit 4 Outage

On July 1, 2013, Colstrip Unit 4 tripped off line as a result of damage that occurred in the unit's generator. The cost to repair Unit 4 is estimated to be between \$30 million to \$40 million and is expected to take at least six months to complete. Property damage insurance for Unit 4 is subject to a \$2.5 million self-insured retention. PPL Montana operates Unit 4 pursuant to an agreement with the owners and, pursuant to a separate agreement with NorthWestern, is entitled to receive 15% of Unit 4's

electricity output and is responsible for 15% of the capital, operating, maintenance and repair costs associated with Unit 4. PPL Montana's estimated pre-tax loss of earnings attributable to the Unit 4 outage is between \$5 million and \$10 million.

Results of Operations

The following discussion provides a summary of PPL Energy Supply's earnings and a description of key factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in Unregulated Gross Energy Margins by region and principal line items on PPL Energy Supply's Statements of Income, comparing the three and six months ended June 30, 2013 with the same periods in 2012.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Earnings

Net Income Attributable to PPL Energy Supply Member for the periods ended June 30 was:

	Three Months		Six Months	
	2013	2012	2013	2012
Net Income Attributable to PPL Energy Supply Member	\$ 86	\$ 19	\$ 48	\$ 328

The changes in the components of Net Income Attributable to PPL Energy Supply Member between these periods were due to the following factors, which reflect reclassifications for items included in Unregulated Gross Energy Margins and certain items that management considers special. See additional detail of these special items in the tables below.

	Three Months	Six Months
Unregulated Gross Energy Margins	\$ (88)	\$ (195)
Other operation and maintenance	17	30
Depreciation	(10)	(24)
Taxes, other than income	3	4
Other Income (Expense) - net	7	8
Interest Expense	(3)	(12)
Other	4	2
Income Taxes	25	58
Special items, after-tax	112	(151)
Total	\$ 67	\$ (280)

- See "Statement of Income Analysis - Unregulated Gross Energy Margins - Changes in Non-GAAP Financial Measures" for an explanation of Unregulated Gross Energy Margins.
- Lower other operation and maintenance for the three-month period primarily due to \$11 million of lower 2013 project and refueling outage costs at PPL Susquehanna and \$4 million of Brunner Island Unit 3 outage costs in 2012 with no comparable outage in 2013.

Lower other operation and maintenance for the six-month period primarily due to \$19 million of Brunner Island Unit 3 outage costs in 2012 with no comparable outage in 2013 and \$17 million of lower 2013 project and refueling outage costs at PPL Susquehanna, partially offset by \$5 million of Conemaugh Unit 2 outage costs in 2013 with no comparable outage in 2012.

- Higher depreciation for the three and six-month periods primarily due to PP&E additions. The six-month period also includes \$6 million attributable to the Ironwood Acquisition.
- Higher other income (expense) - net for the three and six-month periods partially due to the impact of a worker's compensation adjustment of \$4 million.
- Higher interest expense for the six-month period primarily due to \$6 million of lower capitalized interest in 2013 and \$4 million due to financings associated with PPL Ironwood.
- Lower income taxes for the three and six-month periods due to lower pre-tax income in 2013, which reduced income taxes by \$30 million and \$77 million, partially offset for the six-month period by an \$11 million benefit from a state tax rate change recorded in 2012.

The following after-tax gains (losses), which management considers special items, also impacted the results during the periods ended June 30.

	Income Statement Line Item	Three Months		Six Months	
		2013	2012	2013	2012
Adjusted energy-related economic activity, net, net of tax of (\$51), \$23, \$28, (\$79)	(a)	\$ 76	\$ (32)	\$ (41)	\$ 118
Impairments:					
Adjustments - nuclear decommissioning trust investments, net of tax of \$0, (\$1), \$0, (\$2)	Other Income-net				1
Other:					
Change in tax accounting method related to repairs	Income Taxes	(3)		(3)	
Counterparty bankruptcy, net of tax of (\$1), \$0, (\$1), \$5 (b)	Other Operation and Maintenance	1		1	(6)
Wholesale supply cost reimbursement, net of tax of \$0, \$0, \$0, \$0	(c)		1		1
Ash basin leak remediation adjustment, net of tax of \$0, \$0, \$0, (\$1)	Other Operation and Maintenance				1
Coal contract modification payments, net of tax of \$0, \$5, \$0, \$5 (d)	Fuel		(7)		(7)
Total		<u>\$ 74</u>	<u>\$ (38)</u>	<u>\$ (43)</u>	<u>\$ 108</u>

(a) See "Reconciliation of Economic Activity" below.

(b) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. In 2012, PPL EnergyPlus recorded an additional allowance for unpaid amounts under the long-term power contract. In March 2012, the U.S. Bankruptcy Court for the District of Montana approved the request to terminate the contract, effective April 1, 2012. In June 2013, PPL EnergyPlus received an approval for an administrative claim in the amount of \$2 million.

(c) Recorded in "Wholesale energy marketing - Realized" on the Statement of Income.

(d) As a result of lower electricity and natural gas prices, coal-fired generation output decreased during 2012. Contract modification payments were incurred to reduce 2012 and 2013 contracted coal deliveries.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) for the periods ended June 30, to the special item identified as "Adjusted energy-related economic activity, net."

	Three Months		Six Months	
	2013	2012	2013	2012
Operating Revenues				
Unregulated retail electric and gas	\$ 20	\$ (12)	\$ 12	\$ (2)
Wholesale energy marketing	590	(458)	(232)	394
Operating Expenses				
Fuel	(4)	(16)	(5)	(14)
Energy Purchases	(479)	442	155	(149)
Energy-related economic activity (a)	127	(44)	(70)	229
Option premiums		1	1	1
Adjusted energy-related economic activity	127	(43)	(69)	230
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010		12		33
Adjusted energy-related economic activity, net, pre-tax	<u>\$ 127</u>	<u>\$ (55)</u>	<u>\$ (69)</u>	<u>\$ 197</u>
Adjusted energy-related economic activity, net, after-tax	<u>\$ 76</u>	<u>\$ (32)</u>	<u>\$ (41)</u>	<u>\$ 118</u>

(a) See Note 14 to the Financial Statements for additional information.

2013 Outlook

Excluding special items, PPL Energy Supply projects lower earnings in 2013 compared with 2012, primarily driven by lower energy prices, higher fuel costs, higher depreciation and higher financing costs, partially offset by lower operation and maintenance expense, higher capacity prices and higher nuclear generation output.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL Energy Supply's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Unregulated Gross Energy Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Unregulated Gross Energy Margins." "Unregulated Gross Energy Margins" is a single financial performance measure of PPL Energy Supply's competitive energy non-trading and trading activities. In calculating this measure, PPL Energy Supply's energy revenues are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges and gross receipts tax, which is recorded in "Taxes, other than income". This performance measure is relevant to PPL Energy Supply due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant fluctuations in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are recorded in "Wholesale energy marketing to affiliate" revenue. PPL Energy Supply excludes from "Unregulated Gross Energy Margins" adjusted energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of PPL Energy Supply's competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Also included in adjusted energy-related economic activity is the premium amortization associated with options and for 2012 the ineffective portion of qualifying cash flow hedges and realized economic activity associated with the monetization of certain full-requirement sales contracts in 2010. This economic activity was deferred, with the exception of the full-requirement sales contracts that were monetized, and included in "Unregulated Gross Energy Margins" over the delivery period that was hedged or upon realization. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Energy Supply believes that "Unregulated Gross Energy Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management to manage PPL Energy Supply's operations, analyze actual results compared with budget and measure certain corporate financial goals used in determining variable compensation.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Unregulated Gross Energy Margins" as defined by PPL Energy Supply to "Operating Income" for the periods ended June 30.

	2013 Three Months			2012 Three Months		
	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)

Other operation and maintenance	8	497	505	11	538	549
Depreciation		157	157		133	133
Taxes, other than income	18	15	33	16	19	35
Energy-related businesses		228	228		201	201
Total Operating Expenses	1,405	739	2,144	1,664	1,105	2,769
Total	\$ 882	\$ (726)	\$ 156	\$ 1,077	\$ (493)	\$ 584

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

(c) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. For the three and six months ended June 30, 2012, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include net pre-tax losses of \$12 million and \$33 million related to the monetization of certain full-requirement sales contracts.

(d) Represents energy-related economic activity, which is subject to fluctuations in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.

(e) Includes economic activity related to fuel as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. The three and six months ended June 30, 2012 include a pre-tax loss of \$12 million related to coal contract modification payments.

Changes in Non-GAAP Financial Measures

Unregulated Gross Energy Margins are generated through PPL Energy Supply's competitive non-trading and trading activities. PPL Energy Supply's non-trading energy business is managed on a geographic basis that is aligned with its generation fleet. The following table shows PPL Energy Supply's non-GAAP financial measure, Unregulated Gross Energy Margins, for the periods ended June 30, as well as the change between periods. The factors that gave rise to the changes are described below the table.

	Three Months			Six Months		
	2013	2012	Change	2013	2012	Change
Non-trading						
Eastern U.S.	\$ 349	\$ 407	\$ (58)	\$ 779	\$ 896	\$ (117)
Western U.S.	56	76	(20)	114	163	(49)
Net energy trading		10	(10)	(11)	18	(29)
Total	\$ 405	\$ 493	\$ (88)	\$ 882	\$ 1,077	\$ (195)

Unregulated Gross Energy Margins

Eastern U.S.

The increase (decrease) in non-trading margins for the periods ended June 30, 2013 compared with 2012 were due to:

	<u>Three Months</u>	<u>Six Months</u>
Baseload energy prices	\$ (121)	\$ (246)
Nuclear fuel prices	(4)	(10)
Coal prices	1	(9)
Intermediate and peaking Spark Spreads	(7)	7
Nuclear generation volume	9	9
Full-requirement sales contracts	5	10
Gas optimization and storage	10	11
Ironwood Acquisition which eliminated tolling expense	2	17
Net economic availability of coal and hydroelectric plants	7	39
Capacity prices	36	47
Other	4	8
Total	<u>\$ (58)</u>	<u>\$ (117)</u>

Western U.S.

Non-trading margins for the three and six months ended June 30, 2013 compared with the same periods in 2012 were lower due to \$20 million and \$59 million of lower wholesale prices. The six-month period was partially offset by \$7 million of higher wholesale volumes.

Net Energy Trading Margins

Net energy trading margins for the three months ended June 30, 2013 compared with the same period in 2012 decreased as a result of lower margins of \$5 million on power positions and \$3 million on FTRs.

Net energy trading margins for the six months ended June 30, 2013 compared with the same period in 2012 decreased as a result of lower margins of \$15 million on gas positions and \$7 million on power positions.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Brunner Island Unit 3 outage in 2012	\$ (4)	\$ (19)
Uncollectible accounts (a)	(4)	(15)
PPL Susquehanna projects	(6)	(9)
PPL Susquehanna refueling outage	(5)	(8)
Conemaugh Unit 2 outage in 2013	3	5
Other generation plant costs	(7)	(1)
Other	(1)	3
Total	<u>\$ (24)</u>	<u>\$ (44)</u>

(a) The decrease for the six-month period is primarily due to SMGT filing for protection under Chapter 11 of the U.S. Bankruptcy Code in 2011. \$11 million of damages billed to SMGT were fully reserved in 2012.

Depreciation

Depreciation increased by \$10 million and \$24 million for the three and six months ended June 30, 2013 compared with 2012, primarily due to \$10 million and \$20 million related to PP&E additions, and \$6 million attributable to the Ironwood Acquisition for the six-month period.

Other Income (Expense) - net

For the three and six months ended June 30, 2013 compared with 2012, other income (expense) - net increased by \$6 million and \$5 million, primarily due to the impact of a \$4 million worker's compensation adjustment.

See Note 12 to the Financial Statements for additional information on other income (expense) - net.

Interest Expense

The increase (decrease) in interest expense for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Ironwood Acquisition financing		\$ 4
Capitalized interest	\$ 3	6
Other		2
Total	<u>\$ 3</u>	<u>\$ 12</u>

Income Taxes

The increase (decrease) in income taxes for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Higher (lower) pre-tax income	\$ 53	\$ (172)
Federal and state tax reserve adjustments (a)	7	6
State deferred tax rate change (b)		11
Other	(2)	1
Total	<u>\$ 58</u>	<u>\$ (154)</u>

- (a) During the three and six months ended June 30, 2013, PPL Energy Supply reversed \$3 million tax benefit related to a 2008 change in method of accounting for certain expenditures for tax purposes and recorded \$4 million in federal tax reserves related to differences in over (under) payment interest rates applied to audit claims as a result of the U.S. Supreme Court decision related to the Windfall Profits tax.
- (b) During the six months ended June 30, 2012, PPL Energy Supply recorded adjustments related to state deferred tax liabilities.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

PPL Energy Supply had the following at:

	<u>June 30, 2013</u>	<u>December 31, 2012</u>
Cash and cash equivalents	\$ 265	\$ 413
Short-term debt	<u>\$ 575</u>	<u>\$ 356</u>

The \$148 million decrease in PPL Energy Supply's cash and cash equivalents position was primarily the net result of:

- distributions to Member of \$408 million;
- capital expenditures of \$241 million;
- net cash provided by operating activities of \$227 million;
- contributions from Member of \$105 million; and
- an increase in short-term debt of \$219 million.

PPL Energy Supply's cash provided by operating activities decreased by \$81 million for the six months ended June 30, 2013, compared with 2012. This was partially due to a \$37 million increase in defined benefit plans funding and an \$11 million increase in cash used by components of working capital (primarily due to changes in counterparty collateral of \$118 million, partially offset by changes in fuel, materials and supplies of \$79 million). In addition, a change of \$31 million in other operating activities contributed to the decrease, partially due to changes in certain tax-related accounts.

Credit Facilities

PPL Energy Supply maintains credit facilities to provide liquidity and to backstop commercial paper issuances. At June 30, 2013, PPL Energy Supply's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Letters of Credit Issued and Commercial Paper Backup</u>	<u>Unused Capacity</u>
PPL Energy Supply Credit Facilities (a)	<u>\$ 3,150</u>	<u>\$</u>	<u>\$ 785</u>	<u>\$ 2,365</u>

- (a) The commitments under PPL Energy Supply's credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 9% of the total committed capacity.

See Note 7 to the Financial Statements for further discussion of PPL Energy Supply's credit facilities.

Commercial Paper

PPL Energy Supply maintains a commercial paper program for up to \$750 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Energy Supply's Syndicated Credit Facility. At June 30, 2013 and December 31, 2012, PPL Energy Supply had \$575 million and \$356 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheets, at weighted-average interest rates of 0.29% and 0.50%.

Rating Agency Actions

Fitch, Moody's and S&P periodically review the credit ratings on the debt securities of PPL Energy Supply and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Energy Supply and its subsidiaries are based on information provided by PPL Energy Supply and other sources. The ratings of Fitch, Moody's and S&P are not a recommendation to buy, sell or hold any securities of PPL Energy Supply or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities.

A downgrade in PPL Energy Supply's or its subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets. PPL Energy Supply and its subsidiaries have no credit rating triggers that would result in the reduction of access to capital markets or the acceleration of maturity dates of outstanding debt.

The rating agencies took the following actions related to PPL Energy Supply and its subsidiaries in 2013:

In February 2013, Moody's upgraded its rating, from B2 to Ba1, and revised the outlook from under review to stable for PPL Ironwood.

In April 2013, Fitch affirmed the BBB- rating and stable outlook on PPL Montana's pass-through trust certificates due 2020.

In July 2013, Moody's withdrew its rating and outlook for PPL Ironwood.

In July 2013, S&P lowered its rating, from BBB- to BB+, and retained the negative outlook for PPL Montana's pass-through trust certificates due 2020.

Ratings Triggers

PPL Energy Supply has various contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements and interest rate instruments, which contain provisions that require PPL Energy Supply to post additional collateral or permit the counterparty to terminate the contract, if PPL Energy Supply's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at June 30, 2013.

For additional information on PPL Energy Supply's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL Energy Supply's 2012 Form 10-K.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about PPL Energy Supply's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

PPL Energy Supply segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL Energy Supply's competitive generation assets and full-requirement sales and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. See Note 14 to the Financial Statements for additional information.

To hedge the impact of market price volatility on PPL Energy Supply's energy-related assets, liabilities and other contractual arrangements, PPL Energy Supply both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL Energy Supply's non-trading commodity derivative contracts range in maturity through 2019.

The following table sets forth the changes in the net fair value of non-trading commodity derivative contracts for the periods ended June 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Six Months	
	2013	2012	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 229	\$ 1,215	\$ 473	\$ 1,082
Contracts realized or otherwise settled during the period	(100)	(261)	(237)	(540)
Fair value of new contracts entered into during the period (a)	37	13	46	12
Other changes in fair value	119	(6)	3	407
Fair value of contracts outstanding at the end of the period	\$ 285	\$ 961	\$ 285	\$ 961

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of non-trading commodity derivative contracts at June 30, 2013, based on the observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	Total Fair Value
Prices based on significant observable inputs (Level 2)	\$ 226	\$ 32	\$ (10)	\$ 5	\$ 253
Prices based on significant unobservable inputs (Level 3)	10	18	4		32
Fair value of contracts outstanding at the end of the period	\$ 236	\$ 50	\$ (6)	\$ 5	\$ 285

PPL Energy Supply sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL Energy Supply were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties (or their counterparties) with which it has energy contracts and other factors could affect PPL Energy Supply's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL Energy Supply attempts to mitigate these risks, there can

be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

Commodity Price Risk (Trading)

PPL Energy Supply's trading commodity derivative contracts range in maturity through 2018. The following table sets forth changes in the net fair value of trading commodity derivative contracts for the periods ended June 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Six Months	
	2013	2012	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 15	\$ 2	\$ 29	\$ (4)
Contracts realized or otherwise settled during the period		(1)	(2)	(1)
Fair value of new contracts entered into during the period (a)	(4)	(1)	(16)	5
Other changes in fair value	7	17	7	17
Fair value of contracts outstanding at the end of the period	<u>\$ 18</u>	<u>\$ 17</u>	<u>\$ 18</u>	<u>\$ 17</u>

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of trading commodity derivative contracts at June 30, 2013, based on the observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				Total Fair Value
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	
Prices based on significant observable inputs (Level 2)	\$ 4	\$ 6			\$ 10
Prices based on significant unobservable inputs (Level 3)	6	2			8
Fair value of contracts outstanding at the end of the period	<u>\$ 10</u>	<u>\$ 8</u>			<u>\$ 18</u>

VaR Models

A VaR model is utilized to measure commodity price risk in unregulated gross energy margins for the non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's disciplined hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for the six months ended June 30, 2013 was as follows.

	Trading VaR	Non-Trading VaR
95% Confidence Level, Five-Day Holding Period		
Period End	\$ 2	\$ 8
Average for the Period	4	9
High	6	10
Low	2	8

The trading portfolio includes all proprietary trading positions, regardless of the delivery period. All positions not considered proprietary trading are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at June 30, 2013.

Interest Rate Risk

PPL Energy Supply and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. PPL and PPL Energy Supply utilize various financial derivative instruments to adjust the mix of fixed and floating interest rates in PPL Energy Supply's debt portfolio, adjust the duration of its debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL Energy Supply's debt portfolio due to changes in the absolute level of interest rates. PPL Energy Supply had no interest rate hedges outstanding at June 30, 2013.

At June 30, 2013, PPL Energy Supply's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL Energy Supply is also exposed to changes in the fair value of its debt portfolio. PPL Energy Supply estimated that a 10% decrease in interest rates at June 30, 2013 would increase the fair value of its debt portfolio by \$50 million.

NDT Funds - Securities Price Risk

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the PPL Susquehanna nuclear plant (Susquehanna). At June 30, 2013, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on the Balance Sheet. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are primarily exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its nuclear decommissioning trust policy statement. At June 30, 2013, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated \$57 million reduction in the fair value of the trust assets. See Notes 13 and 17 to the Financial Statements for additional information regarding the NDT funds.

Credit Risk

See Notes 11, 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL Energy Supply's 2012 Form 10-K for additional information.

Related Party Transactions

PPL Energy Supply is not aware of any material ownership interests or operating responsibility by senior management of PPL Energy Supply in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with PPL Energy Supply. See Note 11 to the Financial Statements for additional information on related party transactions.

Acquisitions, Development and Divestitures

PPL Energy Supply from time to time evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for information on the more significant activities.

Environmental Matters

Extensive federal, state and local environmental laws and regulations are applicable to PPL Energy Supply's air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of PPL Energy Supply's business. The costs of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, cost may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed by the relevant agencies. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the costs for their products or their demand for PPL Energy Supply's services.

Physical effects associated with possible climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage to PPL Energy Supply's generation assets as well as impacts on customers. In addition, changed weather patterns could potentially reduce annual rainfall in areas where PPL Energy Supply has hydroelectric generating facilities or where river water is used to cool its fossil and nuclear powered generators. PPL Energy Supply cannot currently predict whether its businesses will experience these potential climate change-related risks or estimate the potential cost of their related consequences.

The following is a discussion of the more significant environmental matters.

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous waste) under existing solid waste regulations. A final rulemaking is currently expected before the end of 2015. However, the timing of the final regulations could be accelerated by certain litigation that could require the EPA to issue its regulations sooner. Regulations could impact handling, disposal and/or beneficial use of CCRs. The financial impact could be material if CCRs are regulated as hazardous waste, and significant if regulated as non-hazardous, in accordance with the proposed rule. On July 25, 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from regulating CCRs under RCRA and sets rules governing state programs. Prospects remain uncertain for similar legislation to pass in the U.S. Senate.

Effluent Limitation Guidelines (ELGs)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations also contain some requirements that would affect the inspection and operation of CCR facilities, if finalized. The proposal contains several alternative approaches, some of which could significantly impact PPL Energy Supply's coal-fired plants. PPL Energy Supply will work with industry groups to comment on the proposed regulation. A final regulation is expected in May 2014. At the present time, PPL Energy Supply is unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

316(b) Cooling Water Intake Structures Rule

In April 2011, the EPA published a draft regulation under Section 316(b) of the Clean Water Act, which regulates cooling water intakes for power plants. The draft rule has two provisions: requiring installation of Best Technology Available (BTA) to reduce mortality of aquatic organisms that are pulled into the plants cooling water system (entrainment); and imposing standards for reduction of mortality of aquatic organisms trapped on water intake screens (impingement). A final rule is expected to be issued in November 2013. The proposed regulation would apply to nearly all PPL Energy Supply-owned steam electric plants in Pennsylvania and Montana, potentially even including those equipped with closed-cycle cooling systems. PPL Energy Supply's compliance costs could be significant, especially if the final rule requires closed-cycle systems at plants that do not currently have them or conversions of once-through systems to closed-cycle.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a new proposal for new power plants by September 20, 2013, with a final rule to be issued in a timely fashion thereafter, and to issue proposed standards for existing power plants by June 1, 2014 with a final rule by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and the state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may lead to more costly regulatory requirements.

MATS

The EPA finalized MATS requiring fossil-fuel fired plants to reduce emissions of mercury and other hazardous air pollutants by April 16, 2015. The rule is being challenged by industry groups and states. The EPA has subsequently proposed changes to the rule with respect to new sources to address the concern that the rule effectively precludes construction of any new coal-fired plants. PPL Energy Supply is generally well-positioned to comply with MATS due to its recent investment in, and installation of, environmental controls such as wet flue gas desulfurization systems. PPL Energy Supply is evaluating chemical additive systems for mercury control at Brunner Island, and modifications to existing controls at Colstrip for improved particulate matter reductions. In September 2012, PPL Energy Supply announced its intention to place its Corette plant in long-term reserve status beginning in April 2015 due to expected market conditions and costs to comply with MATS.

Regional Haze

Under the EPA's regional haze programs (developed to eliminate man-made visibility degradation by 2064), states are required to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977. For the eastern U.S. the EPA had determined that region-wide reductions under the CAIR or CSAPR trading program could be utilized by states programs to satisfy BART requirements. However, the August 2012 decision by the U.S. Court of Appeals for the District of Columbia Circuit (Circuit Court) to

vacate and remand CSAPR will likely expose power plants located in the eastern U.S., including PPL Energy Supply's plants in Pennsylvania, to reductions in sulfur dioxide and nitrogen oxides as required by BART.

The EPA signed its final Federal Implementation Plan of the Regional Haze Rules for Montana in September 2012, with tighter emissions limits for Colstrip Units 1 & 2 based on the installation of new controls (no limits or additional controls were specified for Colstrip Units 3 & 4), and tighter emission limits for Corette (which are not based on additional controls). The cost of the potential additional controls for Colstrip Units 1 & 2, if required, could be significant. PPL Energy Supply expects to meet the tighter permit limits at Corette without any significant changes to operations, although other requirements have led to the planned suspension of operations at Corette beginning in April 2015 (see "MATS" discussion above).

CSAPR and CAIR

In 2011, the EPA finalized its CSAPR regulating emissions of nitrogen oxide and sulfur dioxide through new allowance trading programs which were to be implemented in two phases (2012 and 2014). Like its predecessor, the CAIR, CSAPR targeted sources in the eastern U.S. In December 2011, the Circuit Court stayed implementation of CSAPR, leaving CAIR in place. Subsequently, in August 2012, the Circuit Court vacated and remanded CSAPR back to the EPA for further rulemaking, again leaving CAIR in place in the interim, and on June 24, 2013 the U.S. Supreme Court granted the EPA's petition for review of the Circuit Court's decision.

PPL Energy Supply plants in Pennsylvania will continue to comply with CAIR through optimization of existing controls, balanced with emission allowance purchases. The Circuit Court's August 2012 decision leaves plants in CSAPR-affected states potentially exposed to more stringent emission reductions due to regional haze implementation (it was previously determined that CSAPR or CAIR participation satisfies regional haze requirements), and/or petitions to the EPA by downwind states under Section 126 of the Clean Air Act requesting the EPA to require plants that allegedly contribute to downwind non-attainment to take action to reduce emissions.

See Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in PPL Energy Supply's 2012 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Notes 2 and 19 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: price risk management, defined benefits, asset impairment (excluding investments), loss accruals, AROs and income taxes. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in PPL Energy Supply's 2012 Form 10-K for a discussion of each critical accounting policy.

PPL ELECTRIC UTILITIES CORPORATION AND SUBSIDIARIES

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with PPL Electric's Condensed Consolidated Financial Statements and the accompanying Notes and with PPL Electric's 2012 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of PPL Electric and its business strategy, a summary of Net Income Available to PPL and a discussion of certain events related to PPL Electric's results of operations and financial condition.
- "Results of Operations" provides a summary of PPL Electric's earnings and a description of key factors expected to impact future earnings. This section ends with explanations of significant changes in principal line items on PPL Electric's Statements of Income, comparing the three and six months ended June 30, 2013 with the same periods in 2012.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of PPL Electric's liquidity position and credit profile. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of PPL Electric's risk management programs relating to market and credit risk.

Overview

Introduction

PPL Electric is an electricity transmission and distribution service provider in eastern and central Pennsylvania with headquarters in Allentown, Pennsylvania. PPL Electric is subject to regulation as a public utility by the PUC, and certain of its transmission activities are subject to the jurisdiction of FERC under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that area as a PLR under the Customer Choice Act.

Business Strategy

PPL Electric's strategy for its regulated electricity delivery business is to provide safe, reliable service to its customers and achieve stable, long-term growth in earnings and rate base. Rate base is expected to grow as a result of significant capital expenditure programs aimed at maintaining existing assets and improving system reliability. PPL Electric is focused on timely recovery of costs, efficient operations, strong customer service and constructive regulatory relationships.

To manage financing costs and access to credit markets and to fund capital expenditure programs, a key objective for PPL Electric is to maintain a strong credit profile and strong liquidity position.

Timely recovery of costs to maintain and enhance the reliability of its delivery system, including the replacement of aging distribution assets, is required in order to maintain strong cash flows and a strong credit profile. Traditionally, such cost recovery would be pursued through periodic base rate case proceedings with the PUC. As such costs continue to increase, more frequent rate case proceedings may be required in order to achieve more timely recovery. The recently approved DSIC mechanism will help reduce regulatory lag on distribution reliability-related capital investment. See "Financial and Operational Developments - Distribution System Improvement Charge" below for information on Pennsylvania's new alternative rate-making mechanism.

Transmission costs are recovered through a FERC Formula Rate mechanism, which is updated annually for costs incurred and assets placed in service. Accordingly, increased costs, including those related to the replacement of aging transmission assets and the PJM-approved Regional Transmission Line Expansion Plan, are recovered on a timely basis.

Financial and Operational Developments

Net Income Available to PPL

Net Income Available to PPL for the three and six months ended June 30, 2013 was \$45 million and \$109 million compared to \$29 million and \$62 million for the same periods in 2012, representing a 55% and 76% increase over the same periods in 2012.

See "Results of Operations" below for further discussion and analysis of PPL Electric's earnings.

Rate Case Proceeding

In December 2012, the PUC approved a total distribution revenue increase of about \$71 million, using a 10.4% return on equity. The approved rates became effective January 1, 2013.

Distribution System Improvement Charge

Act 11 authorizes the PUC to approve two specific ratemaking mechanisms - the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, the use of a DSIC. Such alternative ratemaking procedures and mechanisms provide opportunity for accelerated cost-recovery. In May 2013, the PUC approved PPL Electric's proposal to establish a DSIC, with an initial rate effective July 1, 2013, subject to refund after hearings. See Note 6 to the Financial Statements for additional information.

FERC Formula Rates

PPL Electric must follow FERC's Uniform System of Accounts, which requires subsidiaries to be presented, for FERC reporting purposes, using the equity method of accounting unless a waiver has been granted. The FERC has granted waivers of this requirement to other utilities when alternative accounting would more accurately present the integrated operations of a utility and its subsidiaries. In March 2013, as part of a routine FERC audit of PPL and its subsidiaries, PPL Electric determined that it never obtained a required waiver of the equity method accounting requirement for its subsidiary, PPL Receivables Corporation (PPL Receivables) for FERC Form No. 1 reporting. In March 2013, PPL Electric filed a request for waiver with the FERC that, if approved, would allow it to continue to consolidate the results of PPL Receivables, as it has done since 2004. If PPL Electric is not successful in obtaining the waiver, its revenue requirement calculated under the formula rate could be negatively impacted. The impact, if any, is not known at this time but could range between \$0 and \$40 million, pre-tax. PPL Electric cannot predict the outcome of the waiver or audit proceedings, which remain pending before the FERC. See Note 6 to the Financial Statements for additional information.

Results of Operations

The following discussion provides a summary of PPL Electric's earnings and a description of key factors that are expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in Pennsylvania Gross Delivery Margins by component and principal line items on PPL Electric's Statements of Income, comparing the three and six months ended June 30, 2013 with the same periods in 2012.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

Earnings

Net Income Available to PPL for the periods ended June 30 was:

	<u>Three Months</u>		<u>Six Months</u>	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Net Income Available to PPL	\$ 45	\$ 29	\$ 109	\$ 62

The changes in the components of Net Income Available to PPL between these periods were due to the following factors which reflect reclassifications for items included in Pennsylvania Gross Delivery Margins.

	<u>Three Months</u>	<u>Six Months</u>
Pennsylvania Gross Delivery Margins	\$ 21	\$ 61
Other operation and maintenance	13	20
Depreciation	(5)	(9)
Interest Expense	(1)	(2)
Other	1	(1)
Income Taxes	(13)	(26)
Distributions on preference stock		4
Total	<u>\$ 16</u>	<u>\$ 47</u>

- See "Statement of Income Analysis - Pennsylvania Gross Delivery Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.
- Lower other operation and maintenance for the three-month period primarily due to lower corporate service costs of \$6 million and lower vegetation management of \$2 million.

Lower other operation and maintenance for the six-month period primarily due to lower corporate service costs of \$11 million and lower vegetation management of \$3 million.
- Higher depreciation for the three and six-month periods primarily due to the impact of PP&E additions related to the ongoing efforts to ensure the reliability of the delivery system and replace aging infrastructure.
- Higher income taxes for the three and six-month periods primarily due to higher pre-tax income.

2013 Outlook

Excluding special items, PPL Electric projects higher earnings in 2013 compared with 2012, primarily driven by higher distribution revenues from a distribution base rate increase and higher transmission margins, partially offset by higher depreciation and higher operation and maintenance expense.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in PPL Electric's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Pennsylvania Gross Delivery Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Pennsylvania Gross Delivery Margins." "Pennsylvania Gross Delivery Margins" is a single financial performance measure of PPL Electric's Pennsylvania regulated electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Energy purchases from affiliate," "Other operation and maintenance," which is primarily Act 129 costs, and "Taxes, other than income" which is primarily gross receipts tax. As a result, this measure represents the net revenues from PPL Electric's Pennsylvania regulated electric delivery operations. This measure is not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. PPL Electric believes that "Pennsylvania Gross Delivery Margins" provides another criterion to make investment decisions. This performance measure is used, in conjunction with other information, internally by senior management to manage PPL Electric's operations and analyze actual results to budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Pennsylvania Gross Delivery Margins" to "Operating Income" as defined by PPL Electric for the periods ended June 30.

	2013 Three Months			2012 Three Months		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues						
Retail electric	\$ 413		\$ 413	\$ 403		\$ 403
Electric revenue from affiliate	1		1	1		1
Total Operating Revenues	414		414	404		404
Operating Expenses						
Energy purchases	120		120	120		120
Energy purchases from affiliate	12		12	17		17
Other operation and maintenance	21	\$ 103	124	26	\$ 117	143
Depreciation		44	44		39	39
Taxes, other than income	19	3	22	20	2	22
Total Operating Expenses	172	150	322	183	158	341
Total	\$ 242	\$ (150)	\$ 92	\$ 221	\$ (158)	\$ 63

	2013 Six Months			2012 Six Months		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues						
Retail electric	\$ 925		\$ 925	\$ 860		\$ 860
Electric revenue from affiliate	2		2	2		2
Total Operating Revenues	927		927	862		862
Operating Expenses						
Energy purchases	292		292	273		273
Energy purchases from affiliate	26		26	38		38
Other operation and maintenance	43	\$ 214	257	49	\$ 234	283
Depreciation		87	87		78	78
Taxes, other than income	47	5	52	44	4	48
Total Operating Expenses	408	306	714	404	316	720
Total	\$ 519	\$ (306)	\$ 213	\$ 458	\$ (316)	\$ 142

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

The following table shows PPL Electric's non-GAAP financial measure, "Pennsylvania Gross Delivery Margins" for the periods ended June 30, as well as the change between periods. The factors that gave rise to the change are described below the table.

	Three Months			Six Months		
	2013	2012	Change	2013	2012	Change
PA Gross Delivery Margins by Component						
Distribution	\$ 183	\$ 170	\$ 13	\$ 407	\$ 359	\$ 48
Transmission	59	51	8	112	99	13
Total	\$ 242	\$ 221	\$ 21	\$ 519	\$ 458	\$ 61

Distribution

Margins increased for the three months ended June 30, 2013 compared with 2012, primarily due to an \$11 million favorable effect of price as a result of higher base rates, effective January 1, 2013.

Margins increased for the six months ended June 30, 2013 compared with 2012, primarily due to a \$13 million adverse effect of mild weather in 2012 and a \$32 million favorable effect of price, largely comprised of higher base rates, effective January 1, 2013, and higher volumes of \$4 million.

Transmission

Margins increased for the three and six months ended June 30, 2013 compared with 2012, primarily due to increased investment in plant and the recovery of additional costs through the FERC formula-based rates.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Vegetation management	\$ (2)	\$ (3)
Act 129 costs (a)	(7)	(7)
Uncollectible accounts	(1)	(3)
Corporate service costs (b)	(6)	(11)
Other	(3)	(2)
Total	<u>\$ (19)</u>	<u>\$ (26)</u>

(a) The decrease is due to a reduction in Act 129 energy efficiency and conservation plan costs for Phase 1 programs. Phase 1 ended May 31, 2013.

(b) The decrease is partially due to storm insurance policy premiums for coverage that was in place in 2012 but was not renewed in 2013.

Depreciation

Depreciation increased by \$5 million and \$9 million for the three and six months ended June 30, 2013 compared with 2012, primarily due to PP&E additions as part of ongoing investments to enhance system reliability.

Taxes, Other Than Income

Taxes, other than income increased by \$4 million for the six months ended June 30, 2013 compared with 2012, primarily due to higher Pennsylvania gross receipts tax expense due to higher retail electricity revenue. This tax is included in "Pennsylvania Gross Delivery Margins."

Income Taxes

The increase (decrease) in income taxes for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Higher (lower) pre-tax income	\$ 11	\$ 27
Depreciation not normalized	2	
Other		(1)
Total	<u>\$ 13</u>	<u>\$ 26</u>

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

PPL Electric had the following at:

	<u>June 30, 2013</u>	<u>December 31, 2012</u>
Cash and cash equivalents	\$ 24	\$ 140
Short-term debt	<u>\$ 85</u>	<u>\$</u>

The \$116 million decrease in PPL Electric's cash and cash equivalents position was primarily the net result of:

- capital expenditures of \$451 million;
- the payment of \$66 million of common stock dividends to parent;
- contributions from parent of \$205 million;
- net cash provided by operating activities of \$115 million; and
- a net increase in short-term debt of \$85 million.

PPL Electric's cash provided by operating activities increased by \$14 million for the six months ended June 30, 2013 compared with 2012. The increase was primarily the net effect of a \$72 million increase in net income when adjusted for non-cash components, partially offset by an increase of \$55 million in cash used by components of working capital.

Capital expenditures increased by \$195 million for the six months ended June 30, 2013 compared with 2012, primarily due to the Susquehanna-Roseland transmission project and projects to enhance system reliability.

Credit Facilities

PPL Electric maintains credit facilities to provide liquidity and to backstop commercial paper issuances. At June 30, 2013, PPL Electric's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Letters of Credit Issued and Commercial Paper Backup</u>	<u>Unused Capacity</u>
PPL Electric Credit Facilities (a)	\$ 400		\$ 86	\$ 314

(a) The commitments under the \$300 million syndicated credit facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 5% of the total committed capacity.

See Note 7 to the Financial Statements for further discussion of PPL Electric's credit facilities.

Commercial Paper

PPL Electric maintains a commercial paper program for up to \$300 million to provide an additional financing source to fund its short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by PPL Electric's Syndicated Credit Facility. At June 30, 2013, PPL Electric had \$85 million of commercial paper outstanding, included in "Short-term debt" on the Balance Sheet, at a weighted-average interest rate of 0.34%. PPL Electric had no commercial paper outstanding at December 31, 2012.

Long-term Debt

In July 2013, PPL Electric issued \$350 million of 4.75% First Mortgage Bonds due 2043. PPL Electric received proceeds of \$345 million, net of a discount and underwriting fees, which will be used for capital expenditures, to fund pension obligations and for other general corporate purposes.

Rating Agency Actions

Fitch, Moody's and S&P periodically review the credit ratings on the debt securities of PPL Electric. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of PPL Electric are based on information provided by PPL Electric and other sources. The ratings of Fitch, Moody's and S&P are not a recommendation to buy, sell or hold any securities of PPL Electric. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities.

A downgrade in PPL Electric's credit ratings could result in higher borrowing costs and reduced access to capital markets. PPL Electric does not have credit rating triggers that would result in the reduction of access to capital markets or the acceleration of maturity dates of outstanding debt.

The rating agencies took the following actions related to PPL Electric in 2013:

In July 2013, Fitch, Moody's and S&P assigned ratings of A-, A3 and A- to PPL Electric's \$350 million 4.75% First Mortgage Bonds due 2043. Fitch also assigned a stable outlook to these notes and S&P assigned a recovery rating of 1+.

For additional information on PPL Electric's liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in PPL Electric's 2012 Form 10-K.

Risk Management

Market Risk and Credit Risk

PPL Electric issues debt to finance its operations, which exposes it to interest rate risk. At June 30, 2013, PPL Electric's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

PPL Electric is also exposed to changes in the fair value of its debt portfolio. PPL Electric estimated that a 10% decrease in interest rates at June 30, 2013 would increase the fair value of its debt portfolio by \$95 million.

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management" in PPL Electric's 2012 Form 10-K for additional information on market and credit risk.

Related Party Transactions

PPL Electric is not aware of any material ownership interests or operating responsibility by senior management of PPL Electric in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with PPL Electric. See Note 11 to the Financial Statements for additional information on related party transactions.

Environmental Matters

Physical effects associated with possible climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage to PPL Electric's electricity transmission and distribution systems, as well as impacts on customers. PPL Electric cannot currently predict whether its businesses will experience these potential climate change-related risks or estimate the potential cost of their related consequences.

The following is a discussion of the more significant environmental matters.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan which, among other things, calls for actions to be taken to prepare the U.S. for the impacts of climate change. PPL Electric and others in the industry could be affected by resulting guidelines and standards which may require transmission system modifications to improve the ability of critical infrastructure to withstand major storms.

See Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in PPL Electric's 2012 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Notes 2 and 19 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain: defined benefits, loss accruals, income taxes, regulatory assets and liabilities and revenue recognition - unbilled revenue. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in PPL Electric's 2012 Form 10-K for a discussion of each critical accounting policy.

LG&E AND KU ENERGY LLC AND SUBSIDIARIES

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with LKE's Condensed Consolidated Financial Statements and the accompanying Notes and with LKE's 2012 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of LKE and its business strategy, a summary of Net Income and a discussion of certain events related to LKE's results of operations and financial condition.
- "Results of Operations" provides a summary of LKE's earnings and a description of key factors expected to impact future earnings. This section ends with explanations of significant changes in principal line items on LKE's Statements of Income, comparing the three and six months ended June 30, 2013 with 2012.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LKE's liquidity position and credit profile. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of LKE's risk management programs relating to market and credit risk.

Overview

Introduction

LKE, headquartered in Louisville, Kentucky, is a holding company and a wholly owned subsidiary of PPL. LKE has regulated utility operations through its subsidiaries, LG&E and KU, which constitute substantially all of LKE's assets. LG&E and KU are engaged in the generation, transmission, distribution and sale of electric energy. LG&E also engages in the distribution and sale of natural gas. LG&E and KU maintain their separate identities and serve customers in Kentucky under their respective names. KU also serves customers in Virginia under the Old Dominion Power name and in Tennessee under the KU name.

Business Strategy

LKE's overall strategy is to provide reliable, safe, competitively priced energy to its customers and reasonable returns on regulated investments to its member. Rate base is expected to grow as a result of significant capital expenditure programs to maintain reliable service and comply with federal and state regulations. LKE is focused on efficient operations, strong customer service, timely recovery of costs and constructive regulatory relationships.

A key objective for LKE is to maintain a strong credit profile through managing financing costs and access to credit markets. LKE continually focuses on maintaining an appropriate capital structure and liquidity position.

Financial and Operational Developments

Net Income

Net Income for the three and six months ended June 30, 2013 was \$64 million and \$160 million compared to \$44 million and \$97 million for the same periods in 2012 representing increases of 45% and 65% over 2012.

See "Results of Operations" for a discussion and analysis of LKE's earnings.

Economic and Market Conditions

The KPSC has adopted a series of regulatory mechanisms (ECR, DSM, GLT, a fuel adjustment clause, a gas supply clause and recovery on certain construction work-in-progress) that provide for recovery of prudently incurred costs. The utility

businesses are impacted by changes in customer usage levels which can be driven by a number of factors including weather conditions and economic factors that impact the load utilized by industrial and commercial customers.

LKE's businesses are subject to extensive federal, state and local environmental laws, rules and regulations. Certain regulated generation assets at LG&E and KU will require substantial capital investment. LG&E and KU project \$2.1 billion of capital investment over the next five years to satisfy certain of these requirements. See Note 10 to the Financial Statements for additional information on these requirements. These requirements have resulted in LKE's anticipated retirement by 2015 of five coal-fired units with a combined summer capacity rating of 726 MW. KU retired the 71 MW unit at the Tyrone plant in February 2013. The retirement of the five coal-fired units is not expected to have a material impact on the financial condition or results of operations of LKE. See Note 8 to the Financial Statements in LKE's 2012 Form 10-K for additional information regarding the anticipated retirement of these units as well as plans to build a combined-cycle natural gas facility in Kentucky.

LKE cannot predict the future impact that these economic and market conditions and changes in regulatory requirements may have on its financial condition or results of operations.

Rate Case Proceedings

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of \$34 million for LG&E and \$51 million for KU and an increase in annual base gas rates of \$15 million for LG&E using a 10.25% return on equity. The approved rates became effective January 1, 2013.

Results of Operations

The following discussion provides a summary of LKE's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in Margins and principal line items on LKE's Statements of Income, comparing the three and six months ended June 30, 2013 with 2012.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods.

Earnings

Net Income for the periods ended June 30 was:

	<u>Three Months</u>		<u>Six Months</u>	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Net Income	\$ 64	\$ 44	\$ 160	\$ 97

The changes in the components of Net Income between these periods were due to the following factors, which reflect reclassifications for items included in Margins and certain items that management considers special. See additional detail of these special items in the table below.

	<u>Three Months</u>	<u>Six Months</u>
Margins	\$ 32	\$ 107
Other operation and maintenance		10
Depreciation	(8)	(17)
Taxes, other than income		(1)
Other Income (Expense) - net	7	7
Interest Expense		1
Income Taxes	(17)	(47)
Special items, after-tax	6	3
Total	<u>\$ 20</u>	<u>\$ 63</u>

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Margins.

- Lower other operation and maintenance for the six-month period primarily due to \$17 million of lower costs due to the timing and scope of scheduled coal plant maintenance outages. This decrease was partially offset by \$4 million of adjustments to regulatory assets and liabilities and increased coal plant operation costs of \$3 million.
- Higher depreciation for the three and six-month periods primarily due to environmental costs related to the elimination of the 2005 and 2006 ECR plans now being included in base rates, which added \$13 million and \$26 million to depreciation that is excluded from Margins. This increase was partially offset by lower depreciation of \$6 million and \$11 million due to revised rates that were effective January 1, 2013. Both events are the result of the 2012 rate case proceedings.
- Higher other income (expense) - net for the three and six-month periods primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.
- Higher income taxes for the three and six-month periods primarily due to higher pre-tax income.

The following after-tax gains (losses), which management considers special items, also impacted earnings during the periods ended June 30.

	Income Statement Line Item	Three Months		Six Months	
		2013	2012	2013	2012
EEI adjustments	Other Income (Expense) - net			\$	1
	Income Taxes and Other				
Net operating loss carryforward and other tax-related adjustments	Operation and Maintenance				\$
					4
Discontinued Operations, net of tax of (\$1), \$4, (\$1), \$4	Discontinued Operations	\$	1	\$	(5)
			(5)		1
Total		\$	1	\$	2
			(5)		(1)

2013 Outlook

LKE projects higher earnings in 2013 compared with 2012, primarily driven by electric and gas base rate increases, returns on additional environmental capital investments and load growth, partially offset by higher operation and maintenance expense.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in LKE's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margins." Margins is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margins is a single financial performance measure of LKE's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, fuel and energy purchases are deducted from revenues. In addition, utility revenues and expenses associated with approved cost recovery mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments and performance incentives. Certain costs associated with these mechanisms, primarily ECR, DSM and GLT, are recorded as "Other operation and maintenance" and "Depreciation." As a result, this measure represents the net revenues from LKE's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared with budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Margins" to "Operating Income" as defined by LKE for the periods ended June 30.

	2013 Three Months			2012 Three Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 682		\$ 682	\$ 658		\$ 658
Operating Expenses						
Fuel	216		216	215		215
Energy purchases	37		37	34		34
Other operation and maintenance	23	\$ 174	197	24	\$ 173	197
Depreciation	2	81	83	13	73	86
Taxes, other than income		12	12		12	12
Total Operating Expenses	278	267	545	286	258	544
Total	\$ 404	\$ (267)	\$ 137	\$ 372	\$ (258)	\$ 114
	2013 Six Months			2012 Six Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 1,482		\$ 1,482	\$ 1,363		\$ 1,363
Operating Expenses						
Fuel	447		447	428		428
Energy purchases	123		123	108		108
Other operation and maintenance	48	\$ 346	394	46	\$ 357	403
Depreciation	2	163	165	26	146	172
Taxes, other than income		24	24		23	23
Total Operating Expenses	620	533	1,153	608	526	1,134
Total	\$ 862	\$ (533)	\$ 329	\$ 755	\$ (526)	\$ 229

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins increased by \$32 million for the three-month period primarily due to higher base rates of \$25 million, environmental cost recoveries added to base rates of \$14 million and increased environmental investments of \$3 million, partially offset by lower volumes of \$9 million. The change in volumes was partially attributable to weather, as cooling degree days decreased 14% compared to the same period in 2012.

Margins increased by \$107 million for the six-month period primarily due to higher base rates of \$56 million, environmental cost recoveries added to base rates of \$32 million, increased environmental investments of \$10 million and higher volumes of \$10 million. The change in volumes was attributable to weather, as heating degree days increased 40% compared to the same period in 2012, offsetting the lower cooling degree days for the three-month period.

The increase in base rates was the result of new KPSC rates effective January 1, 2013. The environmental cost recoveries added to base rates were due to the elimination of the 2005 and 2006 ECR plans as a result of the 2012 Kentucky rate cases. This elimination results in depreciation and other operation and maintenance expenses associated with the 2005 and 2006 ECR plans being excluded from Margins in 2013, while the recovery of such costs remain in Margins through base rates.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense for the periods ended June 30, 2013 compared with 2012 was due to:

	Three Months	Six Months
Coal plant outages (a)	\$ (4)	\$ (17)
Adjustments to regulatory assets and liabilities		4
Coal plant operations		3
Other	4	1
Total	\$ 4	\$ (9)

(a) Decrease is due to the timing and scope of scheduled outages.

Depreciation

The increase (decrease) in depreciation for the periods ended June 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Six Months</u>
Lower depreciation rates effective January 1, 2013	\$ (6)	\$ (11)
Additions to PP&E	2	4
Other	1	
Total	<u>\$ (3)</u>	<u>\$ (7)</u>

Other Income (Expense) - net

Other income (expense) - net increased by \$7 million and \$8 million for the three and six months ended June 30, 2013 compared with 2012 primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.

Income Taxes

Income taxes increased by \$17 million and \$53 million for the three and six months ended June 30, 2013 compared with 2012 primarily due to higher pre-tax income.

See Note 5 to the Financial Statements for additional information on income taxes.

Income (Loss) from Discontinued Operations (net of income taxes)

Income (loss) from discontinued operations increased by \$7 million for the three and six months ended June 30, 2013 compared with 2012. The increase was primarily related to an adjustment to the estimated liability for indemnifications related to the 2009 termination of the WKE lease recorded in 2012.

Financial Condition

Liquidity and Capital Resources

LKE had the following at:

	<u>June 30, 2013</u>	<u>December 31, 2012</u>
Cash and cash equivalents	\$ 23	\$ 43
Short-term debt (a)	\$ 252	\$ 125
Notes payable with affiliates	\$ 72	\$ 25

(a) Represents borrowings under LG&E's and KU's commercial paper programs. See Note 7 to the Financial Statements for additional information.

The \$20 million decrease in LKE's cash and cash equivalents position was primarily the net result of:

- capital expenditures of \$579 million; and
- distributions to member of \$69 million; partially offset by
- cash provided by operating activities of \$297 million;
- capital contributions from member of \$146 million;
- an increase in short term debt of \$127 million; and
- an increase in notes payable with affiliates of \$47 million.

LKE's cash provided by operating activities decreased by \$57 million for the six months ended June 30, 2013, compared with 2012, primarily due to:

- an increase in cash outflows from other operating activities of \$119 million driven by a \$94 million increase in discretionary defined benefit plan contributions; and
- a decline in working capital cash flow changes of \$36 million driven primarily by increases in accounts receivable and unbilled revenues due to extended payment terms and higher rates and a lower federal income tax accrual in 2013 as a result of a federal settlement payment, offset by an increase in accounts payable primarily due to timing of fuel purchase commitments and payments, and lower inventory levels in 2013 compared with 2012 driven by increased generation at the plants and higher gas consumption from storage; partially offset by

- an increase in net income adjusted for non-cash items of \$98 million (deferred income taxes and investment tax credits of \$39 million, defined benefit plans - expense of \$7 million, partially offset by depreciation of \$7 million and other non-cash items of \$4 million).

Capital expenditures increased by \$255 million during the six months ended June 30, 2013 compared with 2012 primarily due to environmental air projects at the Mill Creek and Ghent plants, coal consumption residual projects at the Ghent plant and construction of Cane Run Unit 7.

Credit Facilities

At June 30, 2013, LKE's total committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	Committed Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backup	Unused Capacity
LKE Credit Facility with a subsidiary of PPL Energy Funding Corporation	\$ 300	\$ 72		\$ 228
LG&E Credit Facility (a)	500		\$ 80	420
KU Credit Facilities (a) (b)	598		370	228
Total LG&E and KU Credit Facilities (c)	<u>\$ 1,398</u>	<u>\$ 72</u>	<u>\$ 450</u>	<u>\$ 876</u>

- (a) Each company pays customary fees under their respective syndicated credit facilities, as well as KU's letter of credit facility, and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.
- (b) In May 2013, KU extended its \$198 million letter of credit facility to May 2016.
- (c) The \$1.098 billion of commitments under LG&E's and KU's domestic credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 13% of the total committed capacity; however, the PPL affiliate provided a commitment of approximately 21% of the total facilities listed above. The syndicated credit facilities, as well as KU's letter of credit facility, each contain a financial covenant requiring debt to total capitalization not to exceed 70% for LG&E or KU, as calculated in accordance with the facility, and other customary covenants.

See Note 7 to the Financial Statements for further discussion of LKE's credit facilities.

Long-term Debt Securities

During 2012, LG&E and KU received KPSC and other state approvals to issue, up to \$350 million for LG&E and \$300 million for KU, of first mortgage bond indebtedness in 2013, the proceeds of which will be used to fund capital expenditures and for other general corporate purposes.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LKE and its subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LKE and its subsidiaries are based on information provided by LKE and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LKE or its subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. The credit ratings of LKE and its subsidiaries affect its liquidity, access to capital markets and cost of borrowing under its credit facilities.

The rating agencies took the following action related to LKE and its subsidiaries during 2013:

In July 2013, S&P confirmed the long-term AA+ ratings for KU's 2000 Series A Solid Waste Disposal Facility Revenue Bonds and KU's 2004 Series A, 2006 Series B and 2008 Series A Environmental Facilities Revenue Bonds. S&P also confirmed the A-1+ short-term rating on these Bonds.

Ratings Triggers

LKE and its subsidiaries have various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring

LKE and its subsidiaries to post additional collateral, or permitting the counterparty to terminate the contract, if LKE's or its subsidiaries' credit ratings were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at June 30, 2013.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about LKE's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

LG&E's and KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E and KU are subject to commodity price risk for only a small portion of on-going business operations. LKE sells excess economic generation to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. See Note 14 to the Financial Statements for additional disclosures.

Interest Rate Risk

LKE and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. LKE utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under LKE's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LKE's debt portfolio due to changes in the absolute level of interest rates.

At June 30, 2013, LKE's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LKE is also exposed to changes in the fair value of its debt portfolio. LKE estimated that a 10% decrease in interest rates at June 30, 2013, would increase the fair value of its debt portfolio by \$112 million.

At June 30, 2013, LKE had the following interest rate hedges outstanding:

	<u>Exposure Hedged</u>	<u>Fair Value, Net - Asset (Liability) (a)</u>	<u>Effect of a 10% Adverse Movement In Interest Rates</u>
Economic activity			
Interest rate swaps (b)	\$ 179	\$ (44)	\$ (4)
Cash flow hedges			
Interest rate swaps (b)	500	72	(32)

(a) Includes accrued interest.

(b) LKE utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LKE is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic and cash flow hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. The positions outstanding at June 30, 2013 mature through 2043.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in LKE's 2012 Form 10-K for additional information.

Related Party Transactions

LKE is not aware of any material ownership interest or operating responsibility by senior management of LKE, LG&E or KU in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with LKE. See Note 11 to the Financial Statements for additional information on related party transactions.

Environmental Matters

Extensive federal, state and local environmental laws and regulations are applicable to LG&E's and KU's air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of LKE's business. The cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed by the relevant agencies. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the cost for their products or their demand for LG&E's and KU's services.

Physical effects associated with possible climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage to LG&E's and KU's generation assets, electricity transmission and distribution systems, as well as impacts on customers. In addition, changed weather patterns could potentially reduce annual rainfall in areas where LG&E and KU have hydroelectric generating facilities or where river water is used to cool its fossil-powered generators. LKE cannot currently predict whether its businesses will experience these potential climate change-related risks or estimate the potential costs of their related consequences.

The following is a discussion of the more significant environmental matters.

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous waste) under existing solid waste regulations. A final rulemaking is currently expected before the end of 2015. However, the timing of the final regulations could be accelerated by certain litigation that could require the EPA to issue its regulations sooner. Regulations could impact handling, disposal and/or beneficial use of CCRs. The financial impact could be material if CCRs are regulated as hazardous waste, and significant if regulated as non-hazardous, in accordance with the proposed rule. On July 25, 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from regulating CCRs under RCRA and sets rules governing state programs. Prospects remain uncertain for similar legislation to pass in the U.S. Senate.

Effluent Limitation Guidelines (ELGs)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations also contain some requirements that would affect the inspection and operation of CCR facilities, if finalized. The proposal contains several alternative approaches, some of which could significantly impact LG&E's and KU's coal-fired plants. LG&E and KU will comment on the proposed regulation. The final regulation is expected in May 2014. At the present time, LKE is unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

316(b) Cooling Water Intake Structure Rule

In April 2011, the EPA published a draft regulation under Section 316(b) of the Clean Water Act, which regulates cooling water intakes for power plants. The draft rule has two provisions: requiring installation of Best Technology Available (BTA) to reduce mortality of aquatic organisms that are pulled into the plant cooling water system (entrainment); and imposing standards for reduction of mortality of aquatic organisms trapped on water intake screens (impingement). A final rule is expected to be issued in November 2013. The proposed regulation would apply to nearly all LG&E and KU-owned steam electric plants in Kentucky, potentially even including those equipped with closed-cycle cooling systems.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan, which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum, the EPA was directed to issue a new proposal for new power plants by

September 20, 2013, with a final rule to be issued in a timely fashion thereafter, and to issue proposed standards for existing power plants by June 1, 2014 with a final rule by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may lead to more costly regulatory requirements. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect LKE and others in the industry as transmission system modifications to improve the ability to withstand major storms may be needed in order to meet those requirements.

MATS

The EPA finalized MATS requiring fossil-fuel fired plants to reduce emissions of mercury and other hazardous air pollutants by April 16, 2015. The rule is being challenged by industry groups and states. The EPA has subsequently proposed changes to the rule with respect to new sources to address the concern that the rule effectively precludes construction of any new coal-fired plants. LG&E and KU are generally well-positioned to comply with MATS, primarily due to recent investments in environmental controls and approved ECR plans to install additional controls at some of their Kentucky plants. In connection with a unanimous settlement agreement filed with the KPSC in November 2011, KU agreed to defer the requested approval for certain environmental upgrades to Units 1 and 2 at its E.W. Brown generating plant which represented approximately \$200 million in capital costs. LG&E and KU are evaluating, among other measures, chemical additive systems for mercury control at Trimble County and Brown plants. These measures, combined with the completion of recent feasibility studies conducted based on current market conditions, provide alternative compliance options for KU on Units 1 and 2 at the E.W. Brown station. The anticipated retirements of certain coal-fired electric generating units is in response to this and other environmental regulations.

CSAPR and CAIR

In 2011, the EPA finalized its CSAPR regulating emissions of nitrogen oxide and sulfur dioxide through new allowance trading programs which were to be implemented in two phases (2012 and 2014). Like its predecessor, the CAIR, CSAPR targeted sources in the eastern U.S. In December 2011, the Circuit Court stayed implementation of CSAPR, leaving CAIR in place. Subsequently, in August 2012, the Circuit Court vacated and remanded CSAPR back to the EPA for further rulemaking, again leaving CAIR in place in the interim, and on June 24, 2013, the U.S. Supreme Court granted the EPA's petition for review of the Circuit Court's decision.

LG&E and KU plants in Kentucky will continue to comply with CAIR through optimization of existing controls, balanced with emission allowance purchases. The Circuit Court's August 2012 decision leaves plants in CSAPR-affected states potentially exposed to more stringent emission reductions due to regional haze implementation (it was previously determined that CSAPR or CAIR participation satisfies regional haze requirements), and/or petitions to the EPA by downwind states under Section 126 of the Clean Air Act requesting the EPA to require plants that allegedly contribute to downwind non-attainment to take action to reduce emissions.

National Ambient Air Quality Standards

During 2010 and 2012, the EPA issued new ambient air standards for sulfur dioxide and particulates, respectively. In 2013, the EPA preliminarily designated Jefferson County, Kentucky, as a partial non-attainment area for sulfur dioxide. Final designations of non-attainment areas may occur in 2013 and 2014, respectively. Existing environmental plans for LG&E's and KU's Kentucky plants, including announced retirements of certain plants and ECR-approved new or upgraded scrubbers or baghouses at other plants, may aid in achievement of eventual ambient air requirements. However, depending upon the specifics of final non-attainment designations and consequent compliance plans, additional controls may be required, the financial impact of which could be significant.

See Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in LKE's 2012 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Notes 2 and 19 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: revenue recognition - unbilled revenue, defined benefits, asset impairment, loss accruals, AROs, income taxes, and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in LKE's 2012 Form 10-K for a discussion of each critical accounting policy.

LOUISVILLE GAS AND ELECTRIC COMPANY

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with LG&E's Condensed Financial Statements and the accompanying Notes and with LG&E's 2012 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of LG&E and its business strategy, a summary of Net Income and a discussion of certain events related to LG&E's results of operations and financial condition.
- "Results of Operations" provides a summary of LG&E's earnings and a description of key factors expected to impact future earnings. This section ends with explanations of significant changes in principal line items on LG&E's Statements of Income, comparing the three and six months ended June 30, 2013 with 2012.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of LG&E's liquidity position and credit profile. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of LG&E's risk management programs relating to market and credit risk.

Overview

Introduction

LG&E, headquartered in Louisville, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electric energy and distribution and sale of natural gas in Kentucky. LG&E and its affiliate, KU, are wholly owned subsidiaries of LKE. LKE is an intermediary holding company in PPL's group of companies.

Business Strategy

LG&E's overall strategy is to provide reliable, safe, competitively priced energy to its customers and reasonable returns on regulated investments to its shareowner. Rate base is expected to grow as a result of significant capital expenditure programs to maintain reliable service and comply with federal and state regulations. LG&E is focused on efficient operations, strong customer service, timely recovery of costs and constructive regulatory relationships.

A key objective for LG&E is to maintain a strong credit profile through managing financing costs and access to credit markets. LG&E continually focuses on maintaining an appropriate capital structure and liquidity position.

Financial and Operational Developments

Net Income

Net Income for the three and six months ended June 30, 2013 was \$29 million and \$73 million compared to \$26 million and \$51 million for the same periods in 2012 representing increases of 12% and 43% over 2012.

See "Results of Operations" for a discussion and analysis of LG&E's earnings.

Economic and Market Conditions

The KPSC has adopted a series of regulatory mechanisms (ECR, DSM, GLT, a fuel adjustment clause, a gas supply clause and recovery on certain construction work-in-progress) that provide for recovery of prudently incurred costs. LG&E is impacted by changes in customer usage levels which can be driven by a number of factors including weather conditions and economic factors that impact the load utilized by industrial and commercial customers.

LG&E is subject to extensive federal, state and local environmental laws, rules and regulations. Certain regulated generation assets will require substantial capital investment. LG&E projects \$1.1 billion of capital investment over the next five years to satisfy certain of these requirements. See Note 10 to the Financial Statements for additional information on these requirements. These requirements have resulted in LG&E's anticipated retirement by 2015 of three coal-fired units with a combined summer capacity rating of 563 MW. The retirement of the three coal-fired units is not expected to have a material impact on the financial condition or results of operations of LG&E. See Note 8 to the Financial Statements in LG&E's 2012 Form 10-K for additional information regarding the anticipated retirement of these units as well as plans to build a combined-cycle natural gas facility in Kentucky.

LG&E cannot predict the future impact that these economic and market conditions and changes in regulatory requirements may have on its financial condition or results of operations.

Rate Case Proceedings

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of \$34 million and an increase in annual base gas rates of \$15 million using a 10.25% return on equity. The approved rates became effective January 1, 2013.

Results of Operations

The following discussion provides a summary of LG&E's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in Margins and principal line items on LG&E's Statements of Income, comparing the three and six months ended June 30, 2013 with 2012.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods.

Earnings

Net Income for the periods ended June 30 was:

	<u>Three Months</u>		<u>Six Months</u>	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Net Income	\$ 29	\$ 26	\$ 73	\$ 51

The changes in the components of Net Income between these periods were due to the following factors, which reflect reclassifications for items included in Margins.

	<u>Three Months</u>	<u>Six Months</u>
Margins	\$ 8	\$ 29
Other operation and maintenance	(3)	5
Depreciation	1	3
Taxes, other than income		(1)
Other Income (Expense) - net		(2)
Interest Expense		1
Income Taxes	(3)	(13)
Total	<u>\$ 3</u>	<u>\$ 22</u>

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Margins.
- Lower other operation and maintenance for the six-month period primarily due to the timing and scope of scheduled coal plant maintenance outages.
- Higher income taxes for the six-month period primarily due to higher pre-tax income.

2013 Outlook

LG&E projects higher earnings in 2013 compared with 2012, primarily driven by electric and gas base rate increases, returns

on additional environmental capital investments and load growth, partially offset by higher operation and maintenance expense.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in LG&E's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margins." Margins is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margins is a single financial performance measure of LG&E's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, fuel and energy purchases are deducted from revenues. In addition, utility revenues and expenses associated with approved cost recovery mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments and performance incentives. Certain costs associated with these mechanisms, primarily ECR, DSM and GLT, are recorded as "Other operation and maintenance" and "Depreciation." As a result, this measure represents the net revenues from LG&E's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared with budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Margins" to "Operating Income" as defined by LG&E for the periods ended June 30.

	2013 Three Months			2012 Three Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 316		\$ 316	\$ 304		\$ 304
Operating Expenses						
Fuel	88		88	92		92
Energy purchases	34		34	25		25
Other operation and maintenance	10	\$ 84	94	11	\$ 81	92
Depreciation	1	36	37	1	37	38
Taxes, other than income		6	6		6	6
Total Operating Expenses	133	126	259	129	124	253
Total	\$ 183	\$ (126)	\$ 57	\$ 175	\$ (124)	\$ 51

	2013 Six Months			2012 Six Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 706		\$ 706	\$ 657		\$ 657
Operating Expenses						
Fuel	184		184	181		181
Energy purchases	115		115	98		98
Other operation and maintenance	21	\$ 164	185	21	\$ 169	190
Depreciation	1	72	73	1	75	76
Taxes, other than income		12	12		11	11
Total Operating Expenses	321	248	569	301	255	556
Total	\$ 385	\$ (248)	\$ 137	\$ 356	\$ (255)	\$ 101

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins increased by \$8 million for the three-month period primarily due to higher base rates of \$10 million and increased environmental investments of \$3 million, partially offset by lower volumes of \$5 million. The change in volumes was partially attributable to weather, as cooling degree days decreased 25% compared to the same period in 2012.

Margins increased by \$29 million for the six-month period due to higher base rates of \$22 million and increased environmental investments of \$5 million.

The increase in base rates was the result of new KPSC rates effective January 1, 2013.

Other Operation and Maintenance

Other operation and maintenance decreased by \$5 million for the six months ended June 30, 2013 compared with 2012 primarily due to \$7 million of lower costs due to the timing and scope of scheduled coal plant maintenance outages.

Income Taxes

Income taxes increased by \$13 million for the six months ended June 30, 2013 compared with 2012 primarily due to higher pre-tax income.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

LG&E had the following at:

	<u>June 30, 2013</u>	<u>December 31, 2012</u>
Cash and cash equivalents	\$ 13	\$ 22
Short-term debt (a)	\$ 80	\$ 55

(a) Represents borrowings under LG&E's commercial paper program. See Note 7 to the Financial Statements for additional information.

The \$9 million decrease in LG&E's cash and cash equivalents position was primarily the net result of:

- capital expenditures of \$236 million; and
- the payment of common stock dividends to parent of \$48 million; partially offset by
- cash provided by operating activities of \$186 million,
- capital contributions from parent of \$54 million; and
- an increase in short term debt of \$25 million.

LG&E's cash provided by operating activities increased by \$26 million for the six months ended June 30, 2013, compared with 2012, primarily due to:

- an increase in working capital cash flow changes of \$26 million driven primarily by lower fuel levels in 2013 compared with 2012 due to increased generation at the plants and higher gas consumption from storage compared to 2012 due to the unseasonably milder weather in December 2011; and
- an increase in net income adjusted for non-cash items of \$18 million (other non-cash items of \$6 million; partially offset by deferred income taxes and investment tax credits of \$7 million and depreciation of \$3 million); partially offset by
- an increase in cash outflows from other operating activities of \$18 million driven by a \$19 million increase in discretionary defined benefit plan contributions.

Capital expenditures increased by \$116 million during the six months ended June 30, 2013 compared with 2012 primarily due to environmental air projects at Mill Creek plant and construction of Cane Run Unit 7.

Credit Facilities

At June 30, 2013, LG&E's committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Letters of Credit Issued and Commercial Paper Backup</u>	<u>Unused Capacity</u>
Syndicated Credit Facility (a) (b)	\$ 500		\$ 80	\$ 420

- (a) The commitments under LG&E's Syndicated Credit Facility are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 6% of the total committed capacity available to LG&E.
- (b) LG&E pays customary fees under its syndicated credit facility, and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to \$500 million at an interest rate based on a market index of commercial paper issues. At June 30, 2013 and December 31, 2012, there was no balance outstanding.

See Note 7 to the Financial Statements for further discussion of LG&E's credit facilities.

Long-term Debt Securities

During 2012, LG&E received KPSC and other state approvals to issue, up to \$350 million of first mortgage bond indebtedness in 2013, the proceeds of which will be used to fund capital expenditures and for other general corporate purposes.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of LG&E. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of LG&E are based on information provided by LG&E and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of LG&E. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. The credit ratings of LG&E affect its liquidity, access to capital markets and cost of borrowing under its credit facilities.

The rating agencies did not take any actions related to LG&E during the second quarter of 2013.

Ratings Triggers

LG&E has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, commodity transportation and storage and interest rate instruments, which contain provisions requiring LG&E to post additional collateral, or permitting the counterparty to terminate the contract, if LG&E's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at June 30, 2013.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about LG&E's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

LG&E's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E is subject to commodity price risk for only a small portion of on-going business operations. LG&E sells excess economic generation to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. See Note 14 to the Financial Statements for additional disclosures.

Interest Rate Risk

LG&E issues debt to finance its operations, which exposes it to interest rate risk. LG&E utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under LG&E's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of LG&E's debt portfolio due to changes in the absolute level of interest rates.

At June 30, 2013, LG&E's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

LG&E is also exposed to changes in the fair value of its debt portfolio. LG&E estimated that a 10% decrease in interest rates at June 30, 2013, would increase the fair value of its debt portfolio by \$27 million.

At June 30, 2013, LG&E had the following interest rate hedges outstanding:

	<u>Exposure Hedged</u>	<u>Fair Value, Net - Asset (Liability) (a)</u>	<u>Effect of a 10% Adverse Movement in Interest Rates</u>
Economic activity			
Interest rate swaps (b)	\$ 179	\$ (44)	\$ (4)
Cash flow hedges			
Interest rate swaps (b)	250	36	(16)

(a) Includes accrued interest.

(b) LG&E utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While LG&E is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such economic and cash flow hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. The positions outstanding at June 30, 2013 mature through 2043.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in LG&E's 2012 Form 10-K for additional information.

Related Party Transactions

LG&E is not aware of any material ownership interest or operating responsibility by senior management of LG&E in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with LG&E. See Note 11 to the Financial Statements for additional information on related party transactions.

Environmental Matters

Extensive federal, state and local environmental laws and regulations are applicable to LG&E's air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of LG&E's business. The cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed by the relevant agencies. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the cost for their products or their demand for LG&E's services.

Physical effects associated with possible climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage to LG&E's generation assets, electricity transmission and

distribution systems, as well as impacts on customers. In addition, changed weather patterns could potentially reduce annual rainfall in areas where LG&E has hydroelectric generating facilities or where river water is used to cool its fossil-powered generators. LG&E cannot currently predict whether its business will experience these potential climate change-related risks or estimate the potential costs of their related consequences.

The following is a discussion of the more significant environmental matters.

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous waste) under existing solid waste regulations. A final rulemaking is currently expected before the end of 2015. However, the timing of the final regulations could be accelerated by certain litigation that could require the EPA to issue its regulations sooner. Regulations could impact handling, disposal and/or beneficial use of CCRs. The financial impact could be material if CCRs are regulated as hazardous waste, and significant if regulated as non-hazardous, in accordance with the proposed rule. On July 25, 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from regulating CCRs under RCRA and sets rules governing state programs. Prospects remain uncertain for similar legislation to pass in the U.S. Senate.

Effluent Limitation Guidelines (ELGs)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations also contain some requirements that would affect the inspection and operation of CCR facilities, if finalized. The proposal contains several alternative approaches, some of which could significantly impact LG&E's coal-fired plants. LG&E will comment on the proposed regulation. The final regulation is expected in May 2014. At the present time, LG&E is unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

316(b) Cooling Water Intake Structure Rule

In April 2011, the EPA published a draft regulation under Section 316(b) of the Clean Water Act, which regulates cooling water intakes for power plants. The draft rule has two provisions: requiring installation of Best Technology Available (BTA) to reduce mortality of aquatic organisms that are pulled into the plant cooling water system (entrainment); and imposing standards for reduction of mortality of aquatic organisms trapped on water intake screens (impingement). A final rule is expected to be issued in November 2013. The proposed regulation would apply to nearly all LG&E-owned steam electric plants in Kentucky, potentially even including those equipped with closed-cycle cooling systems.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan, which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum, the EPA was directed to issue a new proposal for new power plants by September 20, 2013, with a final rule to be issued in a timely fashion thereafter, and to issue proposed standards for existing power plants by June 1, 2014 with a final rule by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may lead to more costly regulatory requirements. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect LG&E and others in the industry as transmission system modifications to improve the ability to withstand major storms may be needed in order to meet those requirements.

MATS

The EPA finalized MATS requiring fossil-fuel fired plants to reduce emissions of mercury and other hazardous air pollutants by April 16, 2015. The rule is being challenged by industry groups and states. The EPA has subsequently proposed changes to the rule with respect to new sources to address the concern that the rule effectively precludes construction of any new coal-fired plants. LG&E is generally well-positioned to comply with MATS, primarily due to recent investments in environmental controls and approved ECR plans to install additional controls at some of its Kentucky plants. LG&E is evaluating, among other measures, chemical additive systems for mercury control at Trimble County plant. The anticipated retirements of certain coal-fired electric generating units is in response to this and other environmental regulations.

CSAPR and CAIR

In 2011, the EPA finalized its CSAPR regulating emissions of nitrogen oxide and sulfur dioxide through new allowance trading programs which were to be implemented in two phases (2012 and 2014). Like its predecessor, the CAIR, CSAPR targeted sources in the eastern U.S. In December 2011, Circuit Court stayed implementation of CSAPR, leaving CAIR in place. Subsequently, in August 2012, the Circuit Court vacated and remanded CSAPR back to the EPA for further rulemaking, again leaving CAIR in place in the interim, and on June 24, 2013, the U.S. Supreme Court granted the EPA's petition for review of the Circuit Court's decision.

LG&E plants in Kentucky will continue to comply with CAIR through optimization of existing controls, balanced with emission allowance purchases. The Circuit Court's August 2012 decision leaves plants in CSAPR-affected states potentially exposed to more stringent emission reductions due to regional haze implementation (it was previously determined that CSAPR or CAIR participation satisfies regional haze requirements), and/or petitions to the EPA by downwind states under Section 126 of the Clean Air Act requesting the EPA to require plants that allegedly contribute to downwind non-attainment to take action to reduce emissions.

National Ambient Air Quality Standards

During 2010 and 2012, the EPA issued new ambient air standards for sulfur dioxide and particulates, respectively. In 2013, the EPA preliminarily designated Jefferson County, Kentucky, as a partial non-attainment area for sulfur dioxide. Final designations of non-attainment areas may occur in 2013 and 2014, respectively. Existing environmental plans for LG&E's Kentucky plants, including announced retirements of certain plants and ECR-approved new or upgraded scrubbers or baghouses at other plants, may aid in achievement of eventual ambient air requirements. However, depending upon the specifics of final non-attainment designations and consequent compliance plans, additional controls may be required, the financial impact of which could be significant.

See Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in LG&E's 2012 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Notes 2 and 19 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: revenue recognition - unbilled revenue, defined benefits, asset impairment, loss accruals, AROs, income taxes, and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in LG&E's 2012 Form 10-K for a discussion of each critical accounting policy.

KENTUCKY UTILITIES COMPANY

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following should be read in conjunction with KU's Condensed Financial Statements and the accompanying Notes and with KU's 2012 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of KU and its business strategy, a summary of Net Income and a discussion of certain events related to KU's results of operations and financial condition.
- "Results of Operations" provides a summary of KU's earnings and a description of key factors expected to impact future earnings. This section ends with explanations of significant changes in principal line items on KU's Statements of Income, comparing the three and six months ended June 30, 2013 with 2012.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of KU's liquidity position and credit profile. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of KU's risk management programs relating to market and credit risk.

Overview

Introduction

KU, headquartered in Lexington, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. KU and its affiliate, LG&E, are wholly owned subsidiaries of LKE. LKE is an intermediary holding company in PPL's group of companies.

Business Strategy

KU's overall strategy is to provide reliable, safe, competitively priced energy to its customers and reasonable returns on regulated investments to its shareowner. Rate base is expected to grow as a result of significant capital expenditure programs to maintain reliable service and comply with federal and state regulations. KU is focused on efficient operations, strong customer service, timely recovery of costs and constructive regulatory relationships.

A key objective for KU is to maintain a strong credit profile through managing financing costs and access to credit markets. KU continually focuses on maintaining an appropriate capital structure and liquidity position.

Financial and Operational Developments

Net Income

Net Income for the three and six months ended June 30, 2013 was \$44 million and \$108 million compared to \$30 million and \$68 million for the same periods in 2012 representing increases of 47% and 59% over 2012.

See "Results of Operations" for a discussion and analysis of KU's earnings.

Economic and Market Conditions

The KPSC has adopted a series of regulatory mechanisms (ECR, DSM, a fuel adjustment clause and recovery on certain construction work-in-progress) that provide for recovery of prudently incurred costs. KU is impacted by changes in customer usage levels which can be driven by a number of factors including weather conditions and economic factors that impact the load utilized by industrial and commercial customers.

KU is subject to extensive federal, state and local environmental laws, rules and regulations. Certain regulated generation assets will require substantial capital investment. KU projects \$1 billion of capital investment over the next five years to satisfy certain of these requirements. See Note 10 to the Financial Statements for additional information on these requirements. These requirements have resulted in KU's anticipated retirement by 2015 of two coal-fired units with a combined summer capacity rating of 163 MW. KU retired the 71 MW unit at the Tyrone plant in February 2013. The retirement of the two coal-fired units is not expected to have a material impact on the financial condition or results of operations of KU. See Note 8 to the Financial Statements in KU's 2012 Form 10-K for additional information regarding the anticipated retirement of these units as well as plans to build a combined-cycle natural gas facility in Kentucky.

KU cannot predict the future impact that these economic and market conditions and changes in regulatory requirements may have on its financial condition or results of operations.

Rate Case Proceedings

Virginia

During April 2013, KU filed an application with the VSCC to increase annual Virginia base electric revenue by approximately \$7 million, representing an increase of 9.6%. KU proposed an authorized 10.8% return on equity. Subject to regulatory approval, new rates would become effective January 1, 2014.

Kentucky

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of \$51 million using a 10.25% return on equity. The approved rates became effective January 1, 2013.

Results of Operations

The following discussion provides a summary of KU's earnings and a description of key factors expected to impact future earnings. This section ends with "Statement of Income Analysis," which includes explanations of significant changes in Margins and principal line items on KU's Statements of Income, comparing the three and six months ended June 30, 2013 with 2012.

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or for future periods.

Earnings

Net Income for the periods ended June 30 was:

	<u>Three Months</u>		<u>Six Months</u>	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Net Income	\$ 44	\$ 30	\$ 108	\$ 68

The changes in the components of Net Income between these periods were due to the following factors, which reflect reclassifications for items included in Margins.

	<u>Three Months</u>	<u>Six Months</u>
Margins	\$ 23	\$ 77
Other operation and maintenance	1	
Depreciation	(9)	(19)
Other Income (Expense) - net	7	6
Income Taxes	(8)	(25)
Special item - EEI adjustments, after-tax		1
Total	<u>\$ 14</u>	<u>\$ 40</u>

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Margins.
- Higher depreciation for the three and six-month periods primarily due to environmental costs related to the elimination of the 2005 and 2006 ECR plans now being included in base rates, which added \$12 million and \$24 million to depreciation

that is excluded from Margins. This increase was partially offset by lower depreciation of \$3 million and \$7 million due to revised rates that were effective January 1, 2013. Both events are the result of the 2012 rate case proceedings.

- Higher other income (expense) - net for the three and six-month periods primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.
- Higher income taxes for the three and six-month periods primarily due to higher pre-tax income.

2013 Outlook

KU projects higher earnings in 2013 compared with 2012, primarily driven by electric base rate increases, returns on additional environmental capital investments and load growth, partially offset by higher operation and maintenance expense.

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, Notes 6 and 10 to the Financial Statements in this Form 10-Q and "Item 1. Business" and "Item 1A. Risk Factors" in KU's 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measure

The following discussion includes financial information prepared in accordance with GAAP, as well as a non-GAAP financial measure, "Margins." Margins is not intended to replace "Operating Income," which is determined in accordance with GAAP as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Margins is a single financial performance measure of KU's electricity generation, transmission and distribution operations. In calculating this measure, fuel and energy purchases are deducted from revenues. In addition, utility revenues and expenses associated with approved cost recovery mechanisms are offset. These mechanisms allow for recovery of certain expenses, returns on capital investments and performance incentives. Certain costs associated with these mechanisms, primarily ECR and DSM, are recorded as "Other operation and maintenance" and "Depreciation." As a result, this measure represents the net revenues from KU's operations. This performance measure is used, in conjunction with other information, internally by senior management to manage operations and analyze actual results compared with budget.

Reconciliation of Non-GAAP Financial Measures

The following tables reconcile "Margins" to "Operating Income" as defined by KU for the periods ended June 30.

	2013 Three Months			2012 Three Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 383		\$ 383	\$ 374		\$ 374
Operating Expenses						
Fuel	128		128	123		123
Energy purchases	20		20	29		29
Other operation and maintenance	13	\$ 85	98	12	\$ 86	98
Depreciation	1	45	46	12	36	48
Taxes, other than income		6	6		6	6
Total Operating Expenses	162	136	298	176	128	304
Total	\$ 221	\$ (136)	\$ 85	\$ 198	\$ (128)	\$ 70

	2013 Six Months			2012 Six Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 815		\$ 815	\$ 754		\$ 754
Operating Expenses						
Fuel	263		263	247		247
Energy purchases	47		47	58		58
Other operation and maintenance	27	\$ 168	195	25	\$ 168	193
Depreciation	1	91	92	24	72	96
Taxes, other than income		12	12		12	12
Total Operating Expenses	338	271	609	354	252	606
Total	\$ 477	\$ (271)	\$ 206	\$ 400	\$ (252)	\$ 148

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Changes in Non-GAAP Financial Measures

Margins increased by \$23 million for the three-month period primarily due to higher base rates of \$15 million and environmental cost recoveries added to base rates of \$13 million, partially offset by lower volumes of \$4 million.

Margins increased by \$77 million for the six-month period due to higher base rates of \$33 million, environmental cost recoveries added to base rates of \$30 million, higher volumes of \$9 million and increased environmental investments of \$5 million. The change in volumes was attributable to weather, as heating degree days increased 31% compared to the same period in 2012.

The increase in base rates was the result of new KPSC rates effective January 1, 2013. The environmental cost recoveries added to base rates were due to the elimination of the 2005 and 2006 ECR plans as a result of the 2012 Kentucky rate case. This elimination results in depreciation and other operation and maintenance expenses associated with the 2005 and 2006 ECR plans being excluded from Margins in 2013, while the recovery of such costs remain in Margins through base rates.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense for the periods ended June 30, 2013 compared with 2012 was due to:

	Three Months	Six Months
Coal plant outages (a)	\$ (5)	\$ (10)
Coal plant operations	2	4
Adjustments to regulatory assets and liabilities		4
Other	3	4
Total	\$ 0	\$ 2

(a) Decrease is due to the timing and scope of scheduled outages.

Depreciation

The increase (decrease) in depreciation for the periods ended June 30, 2013 compared with 2012 was due to:

	Three Months	Six Months
Lower depreciation rates effective January 1, 2013	\$ (3)	\$ (7)
Additions to PP&E	1	3
Total	\$ (2)	\$ (4)

Other Income (Expense) - net

Other income (expense) - net increased by \$7 million for the three and six months ended June 30, 2013 compared with 2012 primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.

Income Taxes

Income taxes increased by \$8 million and \$25 million for the three and six months ended June 30, 2013 compared with 2012 primarily due to higher pre-tax income.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Liquidity and Capital Resources

KU had the following at:

	<u>June 30, 2013</u>	<u>December 31, 2012</u>
Cash and cash equivalents	\$ 10	\$ 21
Short-term debt (a)	\$ 172	\$ 70

(a) Represents borrowings made under KU's commercial paper program. See Note 7 to the Financial Statements for additional information.

The \$11 million decrease in KU's cash and cash equivalents position was the net result of:

- capital expenditures of \$341 million; and
- the payment of common stock dividends to parent of \$55 million; partially offset by
- cash provided by operating activities of \$190 million;
- an increase in short term debt of \$102 million; and
- capital contributions from parent of \$92 million.

KU's cash provided by operating activities decreased by \$27 million for the six months ended June 30, 2013, compared with 2012, primarily due to:

- an increase in cash outflows from other operating activities of \$69 million driven by a \$43 million increase in discretionary defined benefit plan contributions; and
- a decline in working capital cash flow of \$18 million driven primarily by increases in accounts receivable due to higher sales volumes, higher rates and extended payment terms and a lower tax accrual due to timing of settlements, partially offset by an increase in accounts payable primarily due to timing of fuel purchase commitments and payments; partially offset by
- an increase in net income adjusted for non-cash items of \$60 million (deferred income taxes and investment tax credits of \$19 million and defined benefit plans - expense of \$7 million, partially offset by depreciation of \$4 million and other non-cash items of \$2 million).

Capital expenditures increased by \$138 million during the six months ended June 30, 2013 compared with 2012 primarily due to environmental air projects and coal consumption residual projects at the Ghent plant and construction of Cane Run Unit 7.

Credit Facilities

At June 30, 2013, KU's committed borrowing capacity under its credit facilities and the use of this borrowing capacity were:

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Letters of Credit Issued and Commercial Paper Backup</u>	<u>Unused Capacity</u>
Total KU Credit Facilities (a) (b)	\$ 598		\$ 370	\$ 228

(a) The commitments under KU's credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than 22% of the total committed capacity available to KU.

(b) KU pays customary fees under its syndicated credit facility, and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to \$500 million at an interest rate based on a market index of commercial paper issues. At June 30, 2013 and December 31, 2012, there was no balance outstanding.

See Notes 7 to the Financial Statements for further discussion of KU's credit facilities.

Long-term Debt Securities

During 2012, KU received KPSC and other state approvals to issue, up to \$300 million of first mortgage bond indebtedness in 2013, the proceeds of which will be used to fund capital expenditures and for other general corporate purposes.

See Note 7 to the Financial Statements for additional information about long-term debt securities.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings on the debt securities of KU. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of KU are based on information provided by KU and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of KU. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. The credit ratings of KU affect its liquidity, access to capital markets and cost of borrowing under its credit facilities.

The rating agencies took the following action related to KU during 2013:

In July 2013, S&P confirmed the long-term AA+ ratings for KU's 2000 Series A Solid Waste Disposal Facility Revenue Bonds and KU's 2004 Series A, 2006 Series B and 2008 Series A Environmental Facilities Revenue Bonds. S&P also confirmed the A-1+ short-term rating on these Bonds.

Ratings Triggers

KU has various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity, fuel, and commodity transportation and storage, which contain provisions requiring KU to post additional collateral, or permitting the counterparty to terminate the contract, if KU's credit rating were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at June 30, 2013.

Risk Management

Market Risk

See Notes 13 and 14 to the Financial Statements for information about KU's risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, KU is subject to commodity price risk for only a small portion of on-going business operations. KU sells excess economic generation to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. See Note 14 to the Financial Statements for additional disclosures.

Interest Rate Risk

KU issues debt to finance its operations, which exposes it to interest rate risk. KU utilizes various financial derivative instruments to adjust the mix of fixed and floating interest rates in its debt portfolio when appropriate. Risk limits under KU's risk management program are designed to balance risk, exposure to volatility in interest expense and changes in the fair value of KU's debt portfolio due to changes in the absolute level of interest rates.

At June 30, 2013, KU's potential annual exposure to increased interest expense, based on a 10% increase in interest rates, was not significant.

KU is also exposed to changes in the fair value of its debt portfolio. KU estimated that a 10% decrease in interest rates at June 30, 2013, would increase the fair value of its debt portfolio by \$68 million.

At June 30, 2013, KU had the following interest rate hedges outstanding:

	<u>Exposure Hedged</u>	<u>Fair Value, Net - Asset (Liability)</u>	<u>Effect of a 10% Adverse Movement in Interest Rates</u>
Cash flow hedges			
Interest rate swaps (a)	\$ 250	\$ 36	\$ (16)

(a) KU utilizes various risk management instruments to reduce its exposure to the expected future cash flow variability of its debt instruments. These risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financing. While KU is exposed to changes in the fair value of these instruments, any realized changes in the fair value of such cash flow hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities. The positions outstanding at June 30, 2013 mature through 2043.

Credit Risk

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in KU's 2012 Form 10-K for additional information.

Related Party Transactions

KU is not aware of any material ownership interest or operating responsibility by senior management of KU in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with KU. See Note 11 to the Financial Statements for additional information on related party transactions.

Environmental Matters

Extensive federal, state and local environmental laws and regulations are applicable to KU's air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of KU's business. The cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed by the relevant agencies. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the cost for their products or their demand for KU's services.

Physical effects associated with possible climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage to KU's generation assets, electricity transmission and distribution systems, as well as impacts on customers. In addition, changed weather patterns could potentially reduce annual rainfall in areas where KU has hydroelectric generating facilities or where river water is used to cool its fossil-powered generators. KU cannot currently predict whether its business will experience these potential climate change-related risks or estimate the potential costs of their related consequences.

The following is a discussion of the more significant environmental matters.

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous waste) under existing solid waste regulations. A final rulemaking is currently expected before the end of

2015. However, the timing of the final regulations could be accelerated by certain litigation that could require the EPA to issue its regulations sooner. Regulations could impact handling, disposal and/or beneficial use of CCRs. The financial impact could be material if CCRs are regulated as hazardous waste, and significant if regulated as non-hazardous, in accordance with the proposed rule. On July 25, 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from regulating CCRs under RCRA and sets rules governing state programs. Prospects remain uncertain for similar legislation to pass in the U.S. Senate.

Effluent Limitation Guidelines (ELGs)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations also contain some requirements that would affect the inspection and operation of CCR facilities, if finalized. The proposal contains several alternative approaches, some of which could significantly impact KU's coal-fired plants. KU will comment on the proposed regulation. The final regulation is expected in May 2014. At the present time, KU is unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

316(b) Cooling Water Intake Structure Rule

In April 2011, the EPA published a draft regulation under Section 316(b) of the Clean Water Act, which regulates cooling water intakes for power plants. The draft rule has two provisions: requiring installation of Best Technology Available (BTA) to reduce mortality of aquatic organisms that are pulled into the plant cooling water system (entrainment); and imposing standards for reduction of mortality of aquatic organisms trapped on water intake screens (impingement). A final rule is expected to be issued in November of 2013. The proposed regulation would apply to nearly all KU-owned steam electric plants in Kentucky, potentially even including those equipped with closed-cycle cooling systems.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan, which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum, the EPA was directed to issue a new proposal for new power plants by September 20, 2013, with a final rule to be issued in a timely fashion thereafter, and to issue proposed standards for existing power plants by June 1, 2014 with a final rule by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may lead to more costly regulatory requirements. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect KU and others in the industry as transmission system modifications to improve the ability to withstand major storms may be needed in order to meet those requirements.

MATS

The EPA finalized MATS requiring fossil-fuel fired plants to reduce emissions of mercury and other hazardous air pollutants by April 16, 2015. The rule is being challenged by industry groups and states. The EPA has subsequently proposed changes to the rule with respect to new sources to address the concern that the rule effectively precludes construction of any new coal-fired plants. KU is generally well-positioned to comply with MATS, primarily due to recent investments in environmental controls and approved ECR plans to install additional controls at some of its Kentucky plants. In connection with a unanimous settlement agreement filed with the KPSC in November 2011, KU agreed to defer the requested approval for certain environmental upgrades to Units 1 and 2 at its E.W. Brown generating plant which represented approximately \$200 million in capital costs. KU is evaluating, among other measures, chemical additive systems for mercury control at Trimble County and Brown plants. These measures, combined with the completion of recent feasibility studies conducted based on current market conditions, provide alternative compliance options for KU on Units 1 and 2 at the E.W. Brown station. The anticipated retirements of certain coal-fired electric generating units is in response to this and other environmental regulations.

CSAPR and CAIR

In 2011, the EPA finalized its CSAPR regulating emissions of nitrogen oxide and sulfur dioxide through new allowance trading programs which were to be implemented in two phases (2012 and 2014). Like its predecessor, the CAIR, CSAPR targeted sources in the eastern U.S. In December 2011, the Circuit Court stayed implementation of CSAPR, leaving CAIR in place. Subsequently, in August 2012, the Circuit Court vacated and remanded CSAPR back to the EPA for further

rulemaking, again leaving CAIR in place in the interim, and on June 24, 2013, the U.S. Supreme Court granted the EPA's petition for review of the Circuit Court's decision.

KU plants in Kentucky will continue to comply with CAIR through optimization of existing controls, balanced with emission allowance purchases. The Circuit Court's August 2012 decision leaves plants in CSAPR-affected states potentially exposed to more stringent emission reductions due to regional haze implementation (it was previously determined that CSAPR or CAIR participation satisfies regional haze requirements), and/or petitions to the EPA by downwind states under Section 126 of the Clean Air Act requesting the EPA to require plants that allegedly contribute to downwind non-attainment to take action to reduce emissions.

National Ambient Air Quality Standards

During 2010 and 2012, the EPA issued new ambient air standards for sulfur dioxide and particulates, respectively. In 2013, the EPA preliminarily designated Jefferson County, Kentucky, as a partial non-attainment area for sulfur dioxide. Final designations of non-attainment areas may occur in 2013 and 2014, respectively. Existing environmental plans for KU's Kentucky plants, including announced retirements of certain plants and ECR-approved new or upgraded scrubbers or baghouses at other plants, may aid in achievement of eventual ambient air requirements. However, depending upon the specifics of final non-attainment designations and consequent compliance plans, additional controls may be required, the financial impact of which could be significant.

See Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in KU's 2012 Form 10-K for additional information on environmental matters.

New Accounting Guidance

See Notes 2 and 19 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to the financial condition or results of operations and require estimates or other judgments of matters inherently uncertain: revenue recognition - unbilled revenue, defined benefits, asset impairment, loss accruals, AROs, income taxes, and regulatory assets and liabilities. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in KU's 2012 Form 10-K for a discussion of each critical accounting policy.

PPL Corporation
PPL Energy Supply, LLC
PPL Electric Utilities Corporation
LG&E and KU Energy LLC
Louisville Gas and Electric Company
Kentucky Utilities Company

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to "Risk Management" in each Registrant's "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Controls and Procedures

- (a) Evaluation of disclosure controls and procedures.

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company, and Kentucky Utilities Company

The registrants' principal executive officers and principal financial officers, based on their evaluation of the registrants' disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934) have concluded that, as of June 30, 2013, the registrants' disclosure controls and procedures are effective to ensure that material information relating to the registrants and their consolidated subsidiaries is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, particularly during the period for which this quarterly report has been prepared. The aforementioned principal officers have concluded that the disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive and principal financial officers, to allow for timely decisions regarding required disclosure.

- (b) Change in internal controls over financial reporting.

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company, and Kentucky Utilities Company

The principal executive officers and principal financial officers of the above listed registrants have concluded that the implementation of a financial consolidation and reporting system for PPL and its primary U.S. subsidiaries during the quarter ended June 30, 2013 resulted in a material change to the registrants' internal control over financial reporting. The new system enhances the consolidation of subsidiary accounts, provides reporting tools for analysis and automates certain aspects of financial statement preparation for each of the registrants. Processes and controls over the consolidation and reporting processes that were previously considered to be effective were replaced with new or modified controls that were also determined to be effective.

The new consolidation and reporting system was subject to extensive testing and data reconciliation during implementation. Post-implementation reviews have been and will continue to be conducted to enable us to determine the effectiveness of the internal controls relating to the system implementation processes and to key business processes.

PPL Corporation

PPL's principal executive officer and principal financial officer have concluded that the implementation of a new general ledger system and a financial reporting system at WPD during the quarter ended June 30, 2013 resulted in a material change to its internal control over financial reporting. The general ledger system that was implemented at WPD replaced the existing mainframe system and resulted in more automation and enhanced controls over general ledger processing and consolidation. The reporting system that was implemented at WPD improves and automates controls over data transfer included in PPL's consolidation process and improves controls over GAAP and foreign currency adjustments. In each of the WPD system implementations, controls that were previously determined to be effective were replaced with new or modified controls that were also determined to be effective.

The general ledger and reporting systems were subject to extensive testing and data reconciliation during their implementation. Post-implementation reviews have been and will continue to be conducted to enable us to determine the effectiveness of the internal controls relating to the system implementation processes and to key business processes remain effective. Risks related to the system implementations at WPD were also partially mitigated by PPL's existing policy of consolidating foreign subsidiaries on a one-month lag, which provided management additional time for review and analysis of WPD results and their incorporation into PPL's consolidated financial statements.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For additional information regarding pending administrative and judicial proceedings involving regulatory, environmental and other matters, which information is incorporated by reference into this Part II, see:

- "Item 3. Legal Proceedings" in each Registrant's 2012 Form 10-K; and
- Notes 5, 6 and 10 to the Financial Statements.

Item 1A. Risk Factors

There have been no material changes in the Registrant's risk factors from those disclosed in "Item 1A. Risk Factors" of the 2012 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchase of Equity Securities during the Second Quarter of 2013:

	(a)	(b)	(c)	(d)
Period	Total Number of Shares (or Units) Purchased (1)	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans of Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
April 1 to April 30, 2013				
May 1 to May 31, 2013				
June 1 to June 30, 2013	930,000	\$29.92		
Total	930,000	\$29.92		

(1) Represents shares of common stock repurchased in the open market to offset a portion of shares issued under stock based compensation plans.

Item 4. Mine Safety Disclosures

Not applicable.

Item 6. Exhibits

The following Exhibits indicated by an asterisk preceding the Exhibit number are filed herewith. The balance of the Exhibits have heretofore been filed with the Commission and pursuant to Rule 12(b)-32 are incorporated herein by reference. Exhibits indicated by a [] are filed or listed pursuant to Item 601(b)(10)(iii) of Regulation S-K.

- 3(a) - Amended and Restated Articles of Incorporation of PPL Corporation, effective as of May 15, 2013 (Exhibit 3(i) to PPL Corporation Form 8-K Report (File No. 1-11459) dated May 20, 2013)
- 3(b) - Amended and Restated Bylaws of PPL Corporation, effective as of May 15, 2013 (Exhibit 3(ii) to PPL Corporation Form 8-K Report (File No. 1-11459) dated May 20, 2013)
- 4(a) - Supplemental Indenture No. 10, dated as of May 24, 2013, among PPL Capital Funding, Inc., PPL Corporation and The Bank of New York Mellon (formerly known as The Bank of New York), as Trustee (Exhibit 4.2 to PPL Corporation Form 8-K Report (File No. 1-11459) dated May 24, 2013)

(b) Interest on unrecognized tax benefits is not included in fixed charges.

(c) In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. As a result, PPL Global's operating results were reclassified as Discontinued Operations. Upon reflecting this reclassification, earnings were less than fixed charges for 2009. See Note 9 in PPL Energy Supply's 2011 Form 10-K for additional information. The total amount of fixed charges for this period was approximately \$364 million and the total amount of earnings was approximately \$206 million. The amount of the deficiency, or the amount of fixed charges in excess of earnings, was approximately \$158 million.

CERTIFICATION

I, WILLIAM H. SPENCE, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PPL Corporation (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, KENT W. BLAKE, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Louisville Gas and Electric Company (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

FORM 10-Q
FOR THE QUARTER ENDED SEPTEMBER 30, 2013

Table of Contents

This combined Form 10-Q is separately filed by the following Registrants in their individual capacity: PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf, and no Registrant makes any representation as to information relating to any other Registrant, except that information under "Forward-Looking Information" relating to subsidiaries of PPL Corporation is also attributed to PPL Corporation and information relating to the subsidiaries of LG&E and KU Energy LLC is also attributed to LG&E and KU Energy LLC.

Unless otherwise specified, references in this Report, individually, to PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company are references to such entities directly or to one or more of their subsidiaries, as the case may be, the financial results of which subsidiaries are consolidated into such Registrants' financial statements in accordance with GAAP. This presentation has been applied where identification of particular subsidiaries is not material to the matter being disclosed, and to conform narrative disclosures to the presentation of financial information on a consolidated basis.

(THIS PAGE LEFT BLANK INTENTIONALLY.)

GLOSSARY OF TERMS AND ABBREVIATIONS
PPL Corporation and its subsidiaries

Central Networks - collectively, Central Networks East plc, Central Networks Limited and certain other related assets and liabilities. On April 1, 2011, PPL WEM Holdings plc (formerly WPD Investment Holdings Limited) purchased all of the outstanding ordinary share capital of these companies from E.ON AG subsidiaries. Central Networks West plc (subsequently renamed Western Power Distribution (West Midlands) plc), wholly owned by Central Networks Limited (subsequently renamed WPD Midlands Holdings Limited), and Central Networks East plc (subsequently renamed Western Power Distribution (East Midlands) plc) are British regional electricity distribution utility companies.

Kentucky Registrants - LKE, LG&E and KU, collectively, SEC Registrants that directly or through subsidiaries own or control operations primarily in Kentucky.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE - LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides services to LKE and its subsidiaries.

PPL - PPL Corporation, the parent holding company of PPL Electric, PPL Energy Funding, PPL Capital Funding, LKE and other subsidiaries.

PPL Brunner Island - PPL Brunner Island, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Capital Funding - PPL Capital Funding, Inc., a financing subsidiary of PPL that provides financing for the operations of PPL and certain subsidiaries.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL engaged in the regulated transmission and distribution of electricity in its Pennsylvania service area and that provides electric supply to its retail customers as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Energy Supply, PPL Global and other subsidiaries.

PPL EnergyPlus - PPL EnergyPlus, LLC, a subsidiary of PPL Energy Supply that markets and trades wholesale and retail electricity and gas, and supplies energy and energy services in competitive markets.

PPL Energy Supply - PPL Energy Supply, LLC, a subsidiary of PPL Energy Funding and the parent company of PPL Generation, PPL EnergyPlus and other subsidiaries.

PPL Generation - PPL Generation, LLC, a subsidiary of PPL Energy Supply that owns and operates U.S. generating facilities through various subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that primarily, through its subsidiaries, owns and operates WPD, PPL's regulated electricity distribution businesses in the U.K.

PPL Ironwood - PPL Ironwood, LLC, an indirect subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Montana - PPL Montana, LLC, an indirect subsidiary of PPL Generation that generates electricity for wholesale sales in Montana and the Pacific Northwest.

PPL Montour - PPL Montour, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides services to PPL and its subsidiaries.

PPL Susquehanna - PPL Susquehanna, LLC, a subsidiary of PPL Generation that owns a nuclear-powered generating station.

PPL WEM - PPL WEM Holdings plc (formerly WPD Investment Holdings Limited), an indirect, U.K. subsidiary of PPL Global. PPL WEM indirectly owns both WPD (East Midlands) and WPD (West Midlands).

PPL WW - PPL WW Holdings Limited (formerly Western Power Distribution Holdings Limited), an indirect, U.K. subsidiary of PPL Global. PPL WW Holdings indirectly owns WPD (South Wales) and WPD (South West).

Registrant(s) - refers to the Registrants named on the cover of this Report (each a "Registrant" and collectively, the "Registrants").

Subsidiary Registrant(s) - the Registrants that are subsidiaries of PPL. PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

WPD - refers to PPL WW and PPL WEM and their subsidiaries.

WPD (East Midlands) - Western Power Distribution (East Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks East plc) was acquired and renamed in April 2011.

WPD Midlands - refers to WPD (East Midlands) and WPD (West Midlands), collectively.

WPD (South Wales) - Western Power Distribution (South Wales) plc, a British regional electricity distribution utility company.

WPD (South West) - Western Power Distribution (South West) plc, a British regional electricity distribution utility company.

WPD (West Midlands) - Western Power Distribution (West Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks West plc) was acquired and renamed in April 2011.

WKE - Western Kentucky Energy Corp., a subsidiary of LKE that leased certain non-utility generating plants in western Kentucky until July 2009.

Other terms and abbreviations

£ - British pound sterling.

2010 Equity Unit(s) - a PPL equity unit, issued in June 2010, consisting of a 2010 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in \$1,000 principal amount of PPL Capital Funding 4.625% Junior Subordinated Notes due 2018.

2010 Purchase Contract(s) - a contract that is a component of a 2010 Equity Unit requiring holders to purchase shares of PPL common stock on or prior to July 1, 2013.

2011 Equity Unit(s) - a PPL equity unit, issued in April 2011, consisting of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in \$1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019.

2011 Purchase Contract(s) - a contract that is a component of a 2011 Equity Unit requiring holders to purchase shares of PPL common stock on or prior to May 1, 2014.

2012 Form 10-K - Annual Report to the SEC on Form 10-K for the year ended December 31, 2012.

Act 11 - Act 11 of 2012 that became effective on April 16, 2012. The Pennsylvania legislation authorizes the PUC to approve two specific ratemaking mechanisms: the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, a DSIC.

Act 129 - Act 129 of 2008 that became effective in October 2008. The law amends the Pennsylvania Public Utility Code and creates an energy efficiency and conservation program and smart metering technology requirements, adopts new PLR electricity supply procurement rules, provides remedies for market misconduct and changes the existing Alternative Energy Portfolio Standard.

AEPS - Alternative Energy Portfolio Standard.

AFUDC - Allowance for Funds Used During Construction, the cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

Baseload generation - includes the output provided by PPL's nuclear, coal, hydroelectric and qualifying facilities.

Basis - when used in the context of derivatives and commodity trading, the commodity price differential between two locations, products or time periods.

CAIR - Clean Air Interstate Rule.

Cane Run Unit 7 - a combined-cycle natural gas unit under construction in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional electric generating capacity of 141 MW and 499 MW to LG&E and KU by 2015.

CCR - Coal Combustion Residuals. CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

COLA - license application for a combined construction permit and operating license from the NRC for a nuclear plant.

CSAPR - Cross-State Air Pollution Rule.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

Depreciation not normalized - the flow-through income tax impact related to the state regulatory treatment of depreciation-related timing differences.

DPCR4 - Distribution Price Control Review 4, the U.K. 5-year rate review period applicable to WPD that commenced April 1, 2005.

DRIP - Dividend Reinvestment and Direct Stock Purchase Plan.

DSIC - Distribution System Improvement Charge authorized under Act 11, which is an alternative ratemaking mechanism providing more-timely cost recovery of qualifying distribution system capital expenditures.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of DSM programs and revenues lost by implementing those programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which apply to coal combustion and by-products from the production of energy from coal.

EEl - Electric Energy, Inc., owns and operates a coal-fired plant and a natural gas facility in southern Illinois. KU's 20% ownership interest in EEI is accounted for as an equity method investment.

EPA - Environmental Protection Agency, a U.S. government agency.

EPS - earnings per share.

Equity Units - refers collectively to the 2011 and 2010 Equity Units.

ESOP - Employee Stock Ownership Plan.

FERC - Federal Energy Regulatory Commission, the federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch - Fitch, Inc., a credit rating agency.

FTRs - financial transmission rights, which are financial instruments established to manage price risk related to electricity transmission congestion that entitle the holder to receive compensation or require the holder to remit payment for certain congestion-related transmission charges based on the level of congestion between two pricing locations (source and sink).

GAAP - Generally Accepted Accounting Principles in the U.S.

GBP - British pound sterling.

GHG - greenhouse gas(es).

GLT - Gas Line Tracker. The KPSC approved LG&E's recovery of costs associated with gas service lines, gas risers, leak mitigation, and gas main replacements. Rate recovery became effective on January 1, 2013.

If-Converted Method - A method applicable for calculating diluted EPS for a company with convertible debt outstanding. The method is applied as follows: Interest charges (after-tax) applicable to the convertible debt are added back to net income and the convertible debt is assumed to have been converted to equity at the beginning of the period and the resulting common shares are treated as outstanding shares. Both adjustments are made only for purposes of calculating diluted EPS. This method was applied to PPL's Equity Units prior to settlement beginning in the first quarter of 2013.

Intermediate and peaking generation - includes the output provided by PPL's competitive oil- and natural gas-fired units.

Ironwood Acquisition - In April 2012, PPL Ironwood Holdings, LLC, an indirect, wholly owned subsidiary of PPL Energy Supply, completed the acquisition from a subsidiary of The AES Corporation of all of the equity interests of AES Ironwood, L.L.C. (subsequently renamed PPL Ironwood, LLC) and AES Prescott, L.L.C. (subsequently renamed PPL Prescott, LLC), which together own and operate, a natural gas-fired power plant in Lebanon, Pennsylvania.

IRS - Internal Revenue Service, a U.S. government agency.

ISO - Independent System Operator.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

kV - Kilovolt

LIBOR - London Interbank Offered Rate.

LTIIP - Long Term Infrastructure Improvement Plan.

MATS - Mercury and Air Toxics Standards.

MDEQ - Montana Department of Environmental Quality.

MEIC - Montana Environmental Information Center.

MMBtu - One million British Thermal Units.

Montana Power - The Montana Power Company, a Montana-based company that sold its generating assets to PPL Montana in December 1999. Through a series of transactions consummated during the first quarter of 2002, Montana Power sold its electricity delivery business to NorthWestern.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

MWh - megawatt-hour, one thousand kilowatt-hours.

NDT - PPL Susquehanna's nuclear plant decommissioning trust.

NERC - North American Electric Reliability Corporation.

NorthWestern - NorthWestern Corporation, a Delaware corporation, and successor in interest to Montana Power's electricity delivery business, including Montana Power's rights and obligations under contracts with PPL Montana.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception receive accrual accounting treatment.

NRC - Nuclear Regulatory Commission, the U.S. federal agency that regulates nuclear power facilities.

OCI - other comprehensive income or loss.

Ofgem - Office of Gas and Electricity Markets, the British agency that regulates transmission, distribution and wholesale sales of electricity and related matters.

Opacity - the degree to which emissions reduce the transmission of light and obscure the view of an object in the background. There are emission regulations that limit the opacity of power plant stack gas emissions.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined nameplate capacities of 2,390 MW.

PADEP - the Pennsylvania Department of Environmental Protection, a state government agency.

PJM - PJM Interconnection, L.L.C., operator of the electric transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply within its delivery area to retail customers who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

PUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

Purchase Contract(s) - refers collectively to the 2010 and 2011 Purchase Contracts (which are components of the 2010 and 2011 Equity Units.)

RAV - regulatory asset value. This term, used within the U.K. regulatory environment, is also commonly known as RAB or regulatory asset base.

RECs - renewable energy credits.

Regional Transmission Line Expansion Plan - PJM conducts a long-range Regional Transmission Expansion Planning process that identifies what changes and additions to the grid are needed to ensure future needs are met for both the reliability and the economic performance of the grid. Under PJM agreements, transmission owners are obligated to build transmission projects assigned to them by the PJM Board that are needed to maintain reliability standards.

Regulation S-X - SEC regulation governing the form and content of and requirements for financial statements required to be filed pursuant to the federal securities laws.

RFC - Reliability First Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

RMC - Risk Management Committee.

S&P - Standard & Poor's Ratings Services, a credit rating agency.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting and requires an independent auditor to make its own assessment.

SCR - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Scrubber - an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SERC - SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

SIFMA Index - the Securities Industry and Financial Markets Association Municipal Swap Index.

Smart meter - an electric meter that utilizes smart metering technology.

Smart metering technology - technology that can measure, among other things, time of electricity consumption to permit offering rate incentives for usage during lower cost or demand intervals. The use of this technology also has the potential to strengthen network reliability.

SMGT - Southern Montana Electric Generation & Transmission Cooperative, Inc., a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus that was terminated effective April 1, 2012.

SNCR - selective non-catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases using ammonia.

Spark Spread - a measure of gross margin representing the price of power on a per MWh basis less the equivalent measure of the natural gas cost to produce that power. This measure is used to describe the gross margin of PPL and its subsidiaries' competitive natural gas-fired generating fleet. This term is also used to describe a derivative contract in which PPL and its subsidiaries sell power and buy natural gas on a forward basis in the same contract.

Superfund - federal environmental legislation that addresses remediation of contaminated sites; states also have similar statutes.

TC2 - Trimble County Unit 2, a coal-fired plant located in Kentucky with a net summer capacity of 732 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2 or 549 MW of the capacity.

Tolling agreement - agreement whereby the owner of an electric generating facility agrees to use that facility to convert fuel provided by a third party into electricity for delivery back to the third party.

VaR - value-at-risk, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level.

VIE - variable interest entity.

Volumetric risk - the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

VSCC - Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

FORWARD-LOOKING INFORMATION

Statements contained in this Form 10-Q concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although the Registrants believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in each Registrant's 2012 Form 10-K and in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Form 10-Q, the following are among the important factors that could cause actual results to differ materially from the forward-looking statements.

- fuel supply cost and availability;
- continuing ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU, and natural gas supply costs at LG&E;
- weather conditions affecting generation, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- the duration of and cost, including lost revenue, associated with scheduled and unscheduled outages at our generating facilities;
- transmission and distribution system conditions and operating costs;
- expansion of alternative sources of electricity generation;
- laws or regulations to reduce emissions of "greenhouse" gases or the physical effects of climate change;
- collective labor bargaining negotiations;
- the outcome of litigation against the Registrants and their subsidiaries;
- potential effects of threatened or actual terrorism, war or other hostilities, cyber-based intrusions or natural disasters;
- the commitments and liabilities of the Registrants and their subsidiaries;
- volatility in market demand and prices for energy, capacity, transmission services, emission allowances and RECs;
- competition in retail and wholesale power and natural gas markets;
- liquidity of wholesale power markets;
- defaults by counterparties under energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- stock price performance of PPL;
- volatility in the fair value of debt and equity securities and its impact on the value of assets in the NDT funds and in defined benefit plans, and the potential cash funding requirements if fair value declines;
- interest rates and their effect on pension, retiree medical, nuclear decommissioning liabilities and interest payable on certain debt securities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- new accounting requirements or new interpretations or applications of existing requirements;
- changes in securities and credit ratings;
- changes in foreign currency exchange rates for British pound sterling;
- current and future environmental conditions, regulations and other requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- legal, regulatory, political, market or other reactions to the 2011 incident at the nuclear generating facility at Fukushima, Japan, including additional NRC requirements;
- changes in political, regulatory or economic conditions in states, regions or countries where the Registrants or their subsidiaries conduct business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state, federal or foreign legislation or regulatory developments;
- the outcome of any rate cases or other cost recovery filings by PPL Electric, LG&E, KU or WPD;
- the impact of any state, federal or foreign investigations applicable to the Registrants and their subsidiaries and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;
- performance of new ventures; and
- business dispositions or acquisitions and our ability to successfully operate acquired businesses and realize expected benefits from business acquisitions.

Any such forward-looking statements should be considered in light of such important factors and in conjunction with other documents of the Registrants on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for the Registrants to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and the Registrants undertake no obligation to update the information contained in such statement to reflect subsequent developments or information.

(a) Shares in thousands. Each share entitles the holder to one vote on any question presented at any shareowners' meeting.

(b) See Note 18 for disclosure of balances of each component of AOCI.

(c) Each period includes shares of common stock issued through various stock and incentive compensation plans. The 2013 periods include the April and July issuances of shares of common stock. See Note 7 for additional information.

(d) See Note 7 for additional information.

(e) The three and nine months ended September 30, 2013 include \$8 million and \$44 million and the three and nine months ended September 30, 2012 include \$7 million and \$42 million of stock-based compensation expense related to new and existing unvested equity awards. The three and nine months ended September 30, 2013 include \$(3) million and \$(21) million and the three and nine months ended September 30, 2012 include \$(2) million and \$(14) million related primarily to the reclassification from "Stock-based compensation" to "Common stock issued" for the issuance of common stock after applicable equity award vesting periods and tax adjustments related to stock-based compensation.

(f) "Earnings reinvested" includes dividends and dividend equivalents on PPL common stock and restricted stock units. "Noncontrolling interests" includes dividends, redemptions and distributions to noncontrolling interests. In June 2012, PPL Electric redeemed all of its outstanding preference stock at par value, which was classified as noncontrolling interest.

(a) Shares in thousands. All common shares of KU stock are owned by LKE.

The accompanying Notes to Condensed Financial Statements are an integral part of the financial statements.

Combined Notes to Condensed Financial Statements (Unaudited)

1. Interim Financial Statements

(All Registrants)

Capitalized terms and abbreviations appearing in the unaudited combined notes to condensed financial statements are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted. The specific Registrant to which disclosures are applicable is identified in parenthetical headings in italics above the applicable disclosure or within the applicable disclosure for their related activities and disclosures. Within combined disclosures, amounts are disclosed for any Registrant when significant.

The accompanying unaudited condensed financial statements have been prepared in accordance with GAAP for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X and, therefore, do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation in accordance with GAAP are reflected in the condensed financial statements. All adjustments are of a normal recurring nature, except as otherwise disclosed. Each Registrant's Balance Sheet at December 31, 2012 is derived from that Registrant's 2012 audited Balance Sheet. The financial statements and notes thereto should be read in conjunction with the financial statements and notes contained in each Registrant's 2012 Form 10-K. The results of operations for the three and nine months ended September 30, 2013, are not necessarily indicative of the results to be expected for the full year ending December 31, 2013, or other future periods, because results for interim periods can be disproportionately influenced by various factors, developments and seasonal variations.

The classification of certain prior period amounts has been changed to conform to the presentation in the September 30, 2013 financial statements.

2. Summary of Significant Accounting Policies

(All Registrants)

The following accounting policy disclosures represent updates to Note 1 in each Registrant's 2012 Form 10-K and should be read in conjunction with those disclosures.

Accounts Receivable *(PPL, PPL Energy Supply and PPL Electric)*

In accordance with a PUC-approved purchase of accounts receivable program, PPL Electric purchases certain accounts receivable from alternative suppliers (including PPL EnergyPlus) at a discount, which reflects a provision for uncollectible accounts. The alternative suppliers have no continuing involvement or interest in the purchased accounts receivable. The purchased accounts receivable are initially recorded at fair value using a market approach based on the purchase price paid and are classified as Level 2 in the fair value hierarchy. During the three and nine months ended September 30, 2013, PPL Electric purchased \$259 million and \$738 million of accounts receivable from unaffiliated third parties and \$75 million and \$222 million from PPL EnergyPlus. During the three and nine months ended September 30, 2012, PPL Electric purchased \$225 million and \$647 million of accounts receivable from unaffiliated third parties and \$81 million and \$237 million from PPL EnergyPlus.

Depreciation *(PPL and Kentucky Registrants)*

The KPSC approved new lower depreciation rates for LG&E and KU as part of the rate-case settlement agreement reached in 2012. The new rates became effective January 1, 2013 and will result in lower depreciation of approximately \$19 million (\$9 million for LG&E and \$10 million for KU) in 2013, exclusive of net additions to PP&E since the rate case.

New Accounting Guidance Adopted *(All Registrants)*

Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, the Registrants retrospectively adopted accounting guidance issued to enhance disclosures about derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

The adoption of this guidance resulted in enhanced disclosures but did not have a significant impact on the Registrants. See Note 14 for the new disclosures.

Testing Indefinite-Lived Intangible Assets for Impairment

Effective January 1, 2013, the Registrants prospectively adopted accounting guidance that allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of an indefinite-lived intangible asset. If, based on this assessment, the entity determines that it is more likely than not that the fair value of the indefinite-lived intangible asset exceeds the carrying amount, a quantitative impairment test does not need to be performed. If the entity concludes otherwise, a quantitative impairment test must be performed by determining the fair value of the asset and comparing it with the carrying value. The entity would record an impairment charge, if necessary.

The adoption of this guidance did not have a significant impact on the Registrants.

Reporting Amounts Reclassified Out of AOCI

Effective January 1, 2013, the Registrants prospectively adopted accounting guidance issued to improve the reporting of reclassifications out of AOCI. The Registrants are required to provide information about the effects on net income of significant amounts reclassified out of AOCI by their respective statement of income line item, if the item is required to be reclassified to net income in its entirety. For items not reclassified to net income in their entirety, the Registrants are required to reference other disclosures that provide greater detail about these reclassifications.

The adoption of this guidance resulted in enhanced disclosures but did not have a significant impact on the Registrants. See Note 18 for the new disclosures.

3. Segment and Related Information

(PPL)

See Note 2 in PPL's 2012 Form 10-K for a discussion of reportable segments. "Corporate and Other" primarily includes financing and certain other costs incurred at the corporate level that have not been allocated or assigned to the segments, as well as certain unallocated assets, which is presented to reconcile segment information to PPL's consolidated results. For 2012, there were no significant costs or assets in this category.

In 2013, costs included in the Corporate and Other category increased, as anticipated, primarily due to an increase in financing at PPL Capital Funding not directly attributable to a particular segment. PPL's growth in rate-regulated businesses provides the organization an enhanced corporate-level financing alternative, through PPL Capital Funding, that further enables PPL to cost-effectively support targeted credit profiles across all of PPL's rated companies. As a result, PPL plans to further utilize PPL Capital Funding in addition to continued direct financing by the operating companies. The financing costs associated primarily with PPL Capital Funding's new securities issuances, with certain exceptions including the remarketing of the debt component of the Equity Units, have not been directly assigned or allocated to any segment and generally have been reflected in Corporate and Other in 2013.

For the periods ended September 30, financial data for the segments are:

	Three Months		Nine Months	
	2013	2012	2013	2012
Income Statement Data				
Revenues from external customers				
U.K. Regulated	\$ 543	\$ 528	\$ 1,763	\$ 1,647

Supply			12,198	12,868
Corporate and Other (b)			364	
Total assets			<u>\$ 44,988</u>	<u>\$ 43,634</u>

- (a) Includes unrealized gains and losses from economic activity. See Note 14 for additional information.
(b) Primarily consists of unallocated assets, including cash, PP&E and the elimination of inter-segment transactions.

4. Earnings Per Share

(PPL)

Basic EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding during the applicable period. Diluted EPS is computed by dividing income available to PPL common shareowners by the weighted-average number of common shares outstanding, increased by incremental shares that would be outstanding if potentially dilutive non-participating securities were converted to common shares as calculated using the treasury stock method or If-Converted Method, as applicable. The If-Converted Method was applied to the Equity Units prior to settlement beginning in the first quarter of 2013. Incremental non-participating securities that have a dilutive impact are detailed in the table below.

See Note 7 for information on the April and May 2013 settlements of forward sale agreements and the July 2013 issuance of PPL common stock to settle the 2010 Purchase Contracts.

Reconciliations of the amounts of income and shares of PPL common stock (in thousands) for the periods ended September 30 used in the EPS calculation are:

	Three Months		Nine Months	
	2013	2012	2013	2012
Income (Numerator)				
Income from continuing operations after income taxes attributable to PPL shareowners	\$ 409	\$ 355	\$ 1,226	\$ 1,173
Less amounts allocated to participating securities	2	2	6	7
Income from continuing operations after income taxes available to PPL common shareowners - Basic	407	353	1,220	1,166
Plus interest charges (net of tax) related to Equity Units	7		37	
Income from continuing operations after income taxes available to PPL common shareowners - Diluted	<u>\$ 414</u>	<u>\$ 353</u>	<u>\$ 1,257</u>	<u>\$ 1,166</u>
Income (loss) from discontinued operations (net of income taxes) available to PPL common shareowners - Basic and Diluted	<u>\$ 1</u>	<u>\$</u>	<u>\$ 2</u>	<u>\$ (6)</u>
Net income attributable to PPL shareowners	\$ 410	\$ 355	\$ 1,228	\$ 1,167
Less amounts allocated to participating securities	2	2	6	7
Net income available to PPL common shareowners - Basic	408	353	1,222	1,160
Plus interest charges (net of tax) related to Equity Units	7		37	
Net income available to PPL common shareowners - Diluted	<u>\$ 415</u>	<u>\$ 353</u>	<u>\$ 1,259</u>	<u>\$ 1,160</u>

	Three Months		Nine Months	
	2013	2012	2013	2012
Shares of Common Stock (Denominator)				
Weighted-average shares - Basic EPS	631,046	580,585	601,275	579,847
Add incremental non-participating securities:				
Share-based payment awards	1,163	635	1,035	522
Equity Units	32,134	439	59,171	146
Forward sale agreements		977	613	415
Weighted-average shares - Diluted EPS	<u>664,343</u>	<u>582,636</u>	<u>662,094</u>	<u>580,930</u>

Basic EPS

Available to PPL common shareowners:				
Income from continuing operations after income taxes	\$ 0.65	\$ 0.61	\$ 2.03	\$ 2.01
Income (loss) from discontinued operations (net of income taxes)				(0.01)
Net Income	<u>\$ 0.65</u>	<u>\$ 0.61</u>	<u>\$ 2.03</u>	<u>\$ 2.00</u>

Diluted EPS

Available to PPL common shareowners:				
Income from continuing operations after income taxes	\$ 0.62	\$ 0.61	\$ 1.90	\$ 2.01
Income (loss) from discontinued operations (net of income taxes)				(0.01)
Net Income	<u>\$ 0.62</u>	<u>\$ 0.61</u>	<u>\$ 1.90</u>	<u>\$ 2.00</u>

For the periods ended September 30, PPL issued common stock related to stock-based compensation plans, ESOP and DRIP as follows:

(Shares in thousands)

	Three Months		Nine Months	
	2013	2012	2013	2012
Stock-based compensation plans (a)	85	159	1,469	512
ESOP			275	280
DRIP		598	549	1,773

(a) Includes stock options exercised, vesting of restricted stock and restricted stock units and conversion of stock units granted to directors.

See Note 7 for information on the repurchase of shares of PPL common stock that offset the 2013 issuances of common stock under stock-based compensation plans, ESOP and DRIP.

For the periods ended September 30, the following were excluded from the computations of diluted EPS because the effect would have been antidilutive.

	Three Months		Nine Months	
	2013	2012	2013	2012
(Shares in thousands)				
Stock options	1,136	4,935	4,793	5,622
Performance units	1		73	76
Restricted stock units			39	

5. Income Taxes

Reconciliations of income taxes for the periods ended September 30 are:

(PPL)

	Three Months		Nine Months	
	2013	2012	2013	2012
Federal income tax on Income from Continuing Operations Before				
Income Taxes at statutory tax rate - 35%	<u>\$ 173</u>	<u>\$ 130</u>	<u>\$ 550</u>	<u>\$ 539</u>

	Three Months		Nine Months	
	2013	2012	2013	2012
Increase (decrease) due to:				
State income taxes, net of federal income tax benefit	12	6	29	38
State valuation allowance adjustments (a)	38	2	38	2
Impact of lower U.K. income tax rates (b)	(38)	(30)	(101)	(75)

Federal and state tax reserve adjustments (d)	(1)	(2)	(41)	(7)
Foreign tax reserve adjustments	(2)		(2)	(5)
Federal and state income tax return adjustments	(4)		(4)	
Enactment of the U.K.'s Finance Acts 2013 and 2012 (b)	(93)	(74)	(93)	(74)
Federal income tax credits	(4)	(5)	(9)	(12)
Amortization of investment tax credit	(1)	(2)	(6)	(7)
Depreciation not normalized	(2)	(2)	(6)	(6)
State deferred tax rate change (e)		(6)		(17)
Net operating loss carryforward adjustments (f)				(9)
Intercompany interest on U.K. financing entities (g)	(2)	(3)	(7)	(8)
Other	(2)	2	(9)	3
Total increase (decrease)	(89)	(113)	(206)	(175)
Total income taxes from continuing operations	\$ 84	\$ 17	\$ 344	\$ 364

- (a) During the three and nine months ended September 30, 2013, PPL recorded an increase in state deferred income tax expense related to a deferred tax valuation allowance primarily due to a decrease in projected future taxable income over the remaining carryforward period of Pennsylvania net operating losses.
- (b) The U.K. Finance Act 2013, enacted in July 2013, reduced the U.K. statutory income tax rate from 23% to 21% effective April 1, 2014 and from 21% to 20% effective April 1, 2015. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit in the third quarter of 2013 related to both rate decreases.

The U.K. Finance Act 2012, enacted in July 2012, reduced the U.K. statutory income tax rate from 25% to 24% retroactive to April 1, 2012 and from 24% to 23% effective April 1, 2013. As a result, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit in the third quarter of 2012 related to both rate decreases.

- (c) During the three and nine months ended September 30, 2013, PPL recorded a \$10 million and \$24 million increase to income tax expense primarily attributable to a revision in the expected taxable amount of cash repatriation in 2013.

During the nine months ended September 30, 2013, PPL recorded a tax benefit of \$19 million associated with a ruling obtained from the IRS impacting the recalculation of 2010 U.K. earnings and profits that was reflected on an amended 2010 U.S. tax return.

- (d) In 1997, the U.K. imposed a Windfall Profits Tax (WPT) on privatized utilities, including WPD. PPL filed its tax returns for years subsequent to its 1997 and 1998 claims for refund on the basis that the U.K. WPT was creditable. In September 2010, the U.S. Tax Court (Tax Court) ruled in PPL's favor in a dispute with the IRS, concluding that the U.K. WPT is a creditable tax for U.S. tax purposes. In January 2011, the IRS appealed the Tax Court's decision to the U.S. Court of Appeals for the Third Circuit (Third Circuit). In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision, holding that the U.K. WPT is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a \$39 million expense in the fourth quarter of 2011. In June 2012, the U.S. Court of Appeals for the Fifth Circuit issued a contrary opinion in an identical case involving another company. In July 2012, PPL filed a petition for a writ of certiorari seeking U.S. Supreme Court review of the Third Circuit's opinion. The Supreme Court granted PPL's petition and oral argument was held in February 2013. On May 20, 2013, the Supreme Court reversed the Third Circuit's opinion and ruled that the WPT is a creditable tax. As a result of the Supreme Court ruling, PPL recorded a tax benefit of \$44 million during the nine months ended September 30, 2013, of which \$19 million relates to interest.
- (e) During the three and nine months ended September 30, 2012, PPL recorded adjustments related to state deferred tax liabilities.
- (f) During the nine months ended September 30, 2012, PPL recorded adjustments to deferred taxes related to net operating loss carryforwards of LKE based on income tax return adjustments.
- (g) PPL recorded foreign income tax benefits related to interest expense on intercompany loans for which there was no domestic income tax expense.

(PPL Energy Supply)

	Three Months		Nine Months	
	2013	2012	2013	2012
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	\$ 70	\$ 25	\$ 98	\$ 205
Increase (decrease) due to:				
State income taxes, net of federal income tax benefit	7	1	10	25

LKE's, LG&E's and KU's unrecognized tax benefits and changes in those unrecognized tax benefits were insignificant for the three and nine months ended September 30, 2013 and 2012.

At September 30, 2013, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase or decrease by the following amounts.

	Increase	Decrease
PPL	\$ 16	\$ 30
PPL Energy Supply		15
PPL Electric	16	8

These potential changes could result from subsequent recognition, derecognition and/or changes in the measurement of uncertain tax positions related to the creditability of foreign taxes, the timing and utilization of foreign tax credits and the related impact on alternative minimum tax and other credits, the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation.

For LKE, LG&E and KU, no significant changes in unrecognized tax benefits are projected over the next 12 months.

At September 30, the total unrecognized tax benefits and related indirect effects that, if recognized, would decrease the effective income tax rate were as follows.

	2013	2012
PPL	\$ 21	\$ 34
PPL Energy Supply	14	14

The amounts for PPL Electric, LKE, LG&E and KU were insignificant.

Other (PPL, PPL Energy Supply and PPL Electric)

PPL changed its method of accounting for repair expenditures for tax purposes effective for its 2008 tax year for Pennsylvania operations. PPL made the same change for its Montana operations for the 2009 tax year. In 2011, the IRS issued guidance on repair expenditures related to network assets providing a safe harbor method of determining whether the repair expenditures can be currently deducted for tax purposes. On April 30, 2013, the IRS issued Revenue Procedure 2013-24 providing guidance to taxpayers to determine whether expenditures to maintain, replace or improve steam or electric generation property must be capitalized for tax purposes. The IRS may assert, and ultimately conclude, that PPL's deduction

for generation-related expenditures should be less than the amount determined by PPL. PPL believes that it has established adequate reserves for this contingency.

6. Utility Rate Regulation

(All Registrants except PPL Energy Supply)

The following table provides information about the regulatory assets and liabilities of cost-based rate-regulated utility operations.

	PPL		PPL Electric

(a) These liabilities were recorded as offsets to certain intangible assets that were recorded at fair value upon the acquisition of LKE by PPL.

Regulatory Matters

Kentucky Activities (PPL and Kentucky Registrants)

Rate Case Proceedings

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of \$34 million for LG&E and \$51 million for KU and an increase in annual base gas rates of \$15 million for LG&E using a 10.25% return on equity. The approved rates became effective January 1, 2013.

Pennsylvania Activities (PPL and PPL Electric)

Rate Case Proceeding

In December 2012, the PUC approved a total distribution revenue increase of about \$71 million for PPL Electric, using a 10.40% return on equity. The approved rates became effective January 1, 2013.

Storm Damage Expense Rider

In its December 28, 2012 final rate case order, the PUC directed PPL Electric to file a proposed Storm Damage Expense Rider (SDER). PPL Electric filed its proposed SDER on March 28, 2013, including requested recovery of the 2012 qualifying storm costs related to Hurricane Sandy, which the PUC previously approved for deferral. PPL Electric proposed that the SDER become effective January 1, 2013 for storm costs incurred in 2013, with those costs and the 2012 Hurricane Sandy costs included in rates effective January 1, 2014. Several parties filed comments opposing the SDER. PPL Electric and several other parties filed reply comments in May 2013. In October 2013, the PUC adopted an Order requesting submission of additional comments and reply comments on PPL Electric's proposal. This matter remains pending before the PUC.

Act 129 requires Pennsylvania Electric Distribution Companies (EDCs) to meet specified goals for reduction in customer electricity usage and peak demand by specified dates. EDCs not meeting the requirements of Act 129 are subject to significant penalties.

Under Act 129, EDCs must file an energy efficiency and conservation plan (EE&C Plan) with the PUC and contract with conservation service providers to implement all or a portion of the EE&C Plan. EDCs are able to recover the costs (capped at 2.0% of the EDC's 2006 revenue) of implementing their EE&C Plans. In October 2009, the PUC approved PPL Electric's Phase I EE&C Plan ending May 31, 2013.

Act 129 requires EDCs to reduce overall electricity consumption by 1.0% by May 2011 and by 3.0% by May 2013, and reduce peak demand by 4.5%. The overall consumption reduction is measured against PUC-forecasted consumption for the twelve months ended May 31, 2010. The peak demand reduction must occur for the 100 hours of highest demand, which is determined by actual demand reduction during the June 2012 through September 2012 period. PPL Electric believes it has met the May 2011 requirement and will determine if it met the May 2013 peak demand reduction and energy reduction targets after it completes the final program evaluation in the fourth quarter of 2013. PPL Electric does not expect the PUC to formally determine compliance for either the 2011 or 2013 requirements before the first quarter of 2014.

Act 129 requires the PUC to evaluate the costs and benefits of the EE&C program by November 30, 2013 and adopt additional reductions if the benefits of the program exceed the costs. In August 2012, after receiving input from stakeholders, the PUC issued a Final Implementation Order establishing a three-year Phase II program, ending May 31, 2016, with individual consumption reduction targets for each EDC. PPL Electric's Phase II reduction target is 2.1% of the total energy consumption forecasted by the PUC for the twelve months ended May 31, 2010. The PUC did not establish demand reduction targets for the Phase II program. PPL Electric filed its Phase II EE&C Plan with the PUC on November 15, 2012 and, in March 2013, the PUC approved PPL Electric's Phase II EE&C Plan with minor modifications. PPL Electric filed a Revised Phase II EE&C Plan on May 13, 2013 pursuant to the PUC's March Order. On July 11, 2013, the PUC issued an Order approving PPL Electric's Revised Phase II EE&C Plan. PPL Electric began its Phase II Plan implementation on June 1, 2013.

Act 129 also requires Default Service Providers (DSP) to provide electric generation supply service to customers pursuant to a PUC-approved default service procurement plan through auctions, requests for proposal and bilateral contracts at the sole discretion of the DSP. Act 129 requires a mix of spot market purchases, short-term contracts and long-term contracts (4 to 20 years), with long-term contracts limited to 25% of load unless otherwise approved by the PUC. A DSP is able to recover the costs associated with its default service procurement plan.

The PUC has approved PPL Electric's DSP procurement plan for the period January 1, 2011 through May 31, 2013, and PPL Electric has concluded all competitive solicitations to procure power for its PLR obligations under that plan.

The PUC has directed all EDCs to file default service procurement plans for the period June 1, 2013 through May 31, 2015. PPL Electric filed its plan in May 2012. In that plan, PPL Electric proposed a process to obtain supply for its default service customers and a number of initiatives designed to encourage more customers to purchase electricity from the competitive retail market. In January 2013, the PUC approved PPL Electric's plan with modifications and directed PPL Electric to establish collaborative processes to address several retail competition issues. In February 2013, PPL Electric filed a revised Default Service Supply Master Agreement and a revised Request for Proposals Process and Rules which the PUC approved. PPL Electric filed revised retail competition initiatives and a revised plan consistent with the PUC's January order, and in May 2013, the PUC approved PPL Electric's most recent filing with minor changes. PPL Electric began implementing its revised plan on June 1, 2013. See Note 10 for additional information.

Smart Meter Rider

Act 129 also requires installation of smart meters for new construction, upon the request of consumers and at their cost, or on a depreciation schedule not exceeding 15 years. Under Act 129, EDCs are able to recover the costs of providing smart metering technology. All of PPL Electric's metered customers currently have advanced meters installed at their service locations capable of many of the functions required under Act 129. PPL Electric continues to conduct pilot projects to evaluate additional applications of its current advanced metering technology pursuant to the requirements of Act 129. PPL Electric recovers the cost of its pilot projects through a cost recovery mechanism, the Smart Meter Rider (SMR). In August 2013, PPL Electric filed with the PUC an annual report describing the actions it was taking under its Smart Meter Plan during 2013 and its planned actions for 2014. PPL Electric also submitted revised SMR charges that will become effective January 1, 2014. PPL Electric will submit its final Smart Meter Plan by June 30, 2014.

PUC Investigation of Retail Electricity Market

In April 2011, the PUC opened an investigation of Pennsylvania's retail electricity market to be conducted in two phases. Phase one addressed the status of the existing retail market and explored potential changes. Questions issued by the PUC for phase one of the investigation focused primarily on default service issues. Phase two was initiated in July 2011 to develop specific proposals for changes to the retail market and default service model. From December 2011 through the end of 2012, the PUC issued several orders and other pronouncements related to the investigation. A final implementation order was issued in February 2013, and the PUC created several working groups to address continuing competitive issues. Although the final implementation order contains provisions that will require numerous modifications to PPL Electric's current default service model for retail customers, those modifications are not expected to have a material adverse effect on PPL Electric's results of operations.

Distribution System Improvement Charge

Act 11 authorizes the PUC to approve two specific ratemaking mechanisms: the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, the use of a DSIC. Such alternative ratemaking procedures and mechanisms provide opportunity for accelerated cost-recovery and, therefore, are important to PPL Electric as it begins a period of significant capital investment to maintain and enhance the reliability of its delivery system, including the replacement of aging distribution assets. In August 2012, the PUC issued a Final Implementation Order adopting procedures, guidelines and a model tariff for the implementation of Act 11. Act 11 requires utilities to file an LTIP as a prerequisite to filing for recovery through the DSIC. The LTIP is mandated to be a five- to ten-year plan describing projects eligible for inclusion in the DSIC.

In September 2012, PPL Electric filed its LTIP describing projects eligible for inclusion in the DSIC. The PUC approved the LTIP on January 10, 2013 and, on January 15, 2013, PPL Electric filed a petition requesting permission to establish a DSIC. Several parties filed responses to PPL Electric's petition. In an order entered on May 23, 2013, the PUC approved PPL Electric's proposed DSIC with an initial rate effective July 1, 2013, subject to refund after hearings. The PUC also assigned four specific issues to the Office of Administrative Law Judge for hearing and preparation of a recommended decision. The Judge's recommended decision is expected in early 2014. The case remains pending before the PUC.

Federal Matters

FERC Audit Proceedings (All Registrants except PPL Energy Supply)

In November 2011, the FERC commenced an audit of PPL and its subsidiaries, including an audit of the FERC transmission formula rate mechanisms at PPL Electric, LG&E and KU beginning in April 2012. The audit identified several matters related to separate aspects of formula rate mechanics at PPL Electric, LG&E and KU. As previously reported, among the audit matters related to PPL Electric was the determination that PPL Electric had not obtained a waiver of the equity method accounting requirement with respect to its wholly owned subsidiary, PPL Receivables Corporation, which was formed in 2004 to purchase eligible accounts receivable and unbilled revenue from PPL Electric to collateralize commercial paper issuances and reduce borrowing costs. PPL, PPL Electric, LKE, LG&E and KU currently believe that the total amount of refunds, if any, that may be required with respect to the formula rate and all other issues identified during the course of the audit will not be material to any of these Registrants. PPL, PPL Electric, LKE, LG&E and KU, however, cannot predict the ultimate outcome of these matters.

Transmission rates are regulated by the FERC. PPL Electric's transmission revenues are billed in accordance with a FERC-approved PJM open access transmission tariff that utilizes a formula-based rate recovery mechanism. The formula rate is calculated, in part, based on financial results as reported in PPL Electric's annual FERC Form No. 1, filed under the FERC's Uniform System of Accounts. PPL Electric has initiated separate formula rate Annual Updates for each of the years 2010-2013. The 2010, 2011, and 2012 updates were subsequently challenged by a group of municipal customers, which challenges PPL Electric has opposed. In August 2011, the FERC issued an order substantially rejecting the 2010 formal challenge and the municipal customers filed a request for rehearing of that order. In September 2012, the FERC issued an order setting for evidentiary hearings and settlement judge procedures a number of issues raised in the 2010 and 2011 formal challenges. Settlement conferences were held in late 2012 and early 2013. In February 2013, the FERC set for evidentiary hearings and settlement judge procedures a number of issues in the 2012 formal challenge and consolidated that challenge with the 2010 and 2011 challenges. PPL Electric filed a request for rehearing of the February Order which remains pending before the FERC. PPL Electric and the group of municipal customers have exchanged confidential settlement proposals and PPL Electric anticipates that there will be additional settlement conferences held in 2013. PPL and PPL Electric cannot predict the outcome of the foregoing proceedings, which remain pending before the FERC.

U. K. Activities (PPL)

Ofgem Review of Line Loss Calculation

Ofgem is currently consulting on the methodology to be used by all network operators to calculate the final line loss incentive/penalty for the DPCR4. On July 12, 2013, Ofgem issued a decision paper on the process to follow for closing out the line loss incentive/penalty. Subsequent to the July 2013 decision paper, WPD received additional information from Ofgem and as a result revised the estimated potential loss exposure to be in the range of \$93 million to \$226 million as of September 30, 2013. On October 21, 2013, Ofgem issued a further consultation paper requesting additional information. During the three and nine months ended September 30, 2013, WPD recorded \$21 million and \$45 million increases to the liability with reductions to "Utility" revenue on the Statement of Income. At September 30, 2013, the liability was \$93 million compared with \$94 million at December 31, 2012. Other changes to this line loss liability included reductions of \$41 million resulting from refunds being included in tariffs and foreign exchange movements during the nine months ended September 30, 2013. PPL cannot predict the outcome of this matter.

7. Financing Activities

Credit Arrangements and Short-term Debt

(All Registrants)

The Registrants maintain credit facilities to enhance liquidity, provide credit support, and provide a backstop to commercial paper programs. For reporting purposes, on a consolidated basis, the credit facilities and commercial paper programs of PPL Energy Supply, PPL Electric, LG&E and KU also apply to PPL and the credit facilities and commercial paper programs of LG&E and KU also apply to LKE. The amounts borrowed below are recorded as "Short-term debt" on the Balance Sheets. The following credit facilities were in place at:

	Expiration Date	September 30, 2013				December 31, 2012	
		Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backup	Unused Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backup

Syndicated Credit Facility	Oct. 2017	\$ 300		\$ 1	\$ 299		\$ 1
LG&E							
Syndicated Credit Facility	Nov. 2017	\$ 500		\$ 72	\$ 428		\$ 55
KU							
Syndicated Credit Facility	Nov. 2017	\$ 400		\$ 140	\$ 260		\$ 70
Letter of Credit Facility (f)	May 2016	198		198			198
Total KU Credit Facilities		\$ 598		\$ 338	\$ 260		\$ 268

(a) In December 2012, the PPL WW syndicated credit facility that was set to expire in January 2013 was replaced and the capacity was increased from £150 million.

- (b) PPL WW's amounts borrowed at September 30, 2013 and December 31, 2012 were USD-denominated borrowings of \$166 million and \$171 million, which equated to £106 million at the time of borrowings and bore interest at 1.89% and 0.85%. WPD (East Midlands) amount borrowed at September 30, 2013 was a GBP-denominated borrowing of £44 million, which equated to \$68 million and bore interest at 1.30%. WPD (West Midlands) amount borrowed at September 30, 2013 was a GBP-denominated borrowing of £34 million, which equated to \$53 million and bore interest at 1.30%.
- (c) At September 30, 2013, the USD equivalent of unused capacity under WPD's credit facilities was \$1.5 billion.
- (d) In February 2013, PPL Energy Supply extended the expiration date from March 2013 and, effective April 2013, the capacity was reduced from \$200 million.
- (e) In August 2013, the capacity was reduced from \$200 million.
- (f) In May 2013, KU extended the letter of credit facility from April 2014.

In September 2013, PPL Electric terminated its asset-backed commercial paper program sponsored by a financial institution. See Note 7 in PPL's and PPL Electric's 2012 Form 10-K for more information regarding the asset-backed commercial paper program.

In October 2013, LKE entered into a \$75 million syndicated credit facility that expires in October 2018.

PPL Energy Supply, PPL Electric, LG&E and KU maintain commercial paper programs to provide an additional financing source to fund their short-term liquidity needs, if and when necessary. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by the respective Registrant's Syndicated Credit Facility. The following commercial paper programs were in place at:

	September 30, 2013			December 31, 2012		
	Weighted - Average Interest Rate	Capacity	Commercial Paper Issuances	Unused Capacity	Weighted - Average Interest Rate	Commercial Paper Issuances
PPL Energy Supply		\$ 750		\$ 750	0.50%	\$ 356
PPL Electric		300		300		
LG&E (a)	0.28%	350	\$ 72	278	0.42%	55
KU (a)	0.28%	350	140	210	0.42%	70
Total		\$ 1,750	\$ 212	\$ 1,538		\$ 481

- (a) In April 2013, the capacity was increased from \$250 million.

(PPL and PPL Energy Supply)

PPL Energy Supply maintains a \$500 million Facility Agreement expiring June 2017, whereby PPL Energy Supply has the ability to request up to \$500 million of committed letter of credit capacity at fees to be agreed upon at the time of each request, based on certain market conditions. At September 30, 2013, PPL Energy Supply had not requested any capacity for the issuance of letters of credit under this arrangement.

PPL Energy Supply, PPL EnergyPlus, PPL Montour and PPL Brunner Island maintain an \$800 million secured energy marketing and trading facility, whereby PPL EnergyPlus will receive credit to be applied to satisfy collateral posting obligations related to its energy marketing and trading activities with counterparties participating in the facility. The credit amount is guaranteed by PPL Energy Supply, PPL Montour and PPL Brunner Island. PPL Montour and PPL Brunner Island have granted liens on their respective generating facilities to secure any amount they may owe under their guarantees. The facility expires in November 2017, but is subject to automatic one-year renewals under certain conditions. There were no secured obligations outstanding under this facility at September 30, 2013.

(LKE)

See Note 11 for discussion of intercompany borrowings.

Long-term Debt and Equity Securities

(PPL)

In connection with an April 2012 registered public offering of 9.9 million shares of PPL common stock, PPL entered into forward sale agreements with two counterparties. In conjunction with that offering, the underwriters exercised an overallotment option and PPL entered into additional forward sale agreements covering 591 thousand shares of PPL common stock.

In April 2013, PPL settled the initial forward sale agreements by issuing 8.4 million shares of PPL common stock and cash settling the remaining 1.5 million shares. PPL received net cash proceeds of \$205 million, which was calculated based on an initial forward price of \$27.02 per share, reduced during the period the contracts were outstanding as specified in the forward sale agreements. PPL used the net proceeds to repay short-term debt obligations and for other general corporate purposes. In May 2013, PPL cash settled the forward sale agreements covering the 591 thousand remaining shares for \$4 million.

The forward sale agreements were classified as equity transactions. As a result, no amounts were recorded in the consolidated financial statements until the April 2013 settlement of the initial forward sale agreements. However, prior to settlement, incremental shares were included within the calculation of diluted EPS using the treasury stock method. See Note 4 for the impact on the calculation of diluted EPS.

In March 2013, PPL Capital Funding issued \$450 million of 5.90% Junior Subordinated Notes due 2073. PPL Capital Funding received proceeds of \$436 million, net of underwriting fees, which was loaned to or invested in affiliates of PPL Capital Funding and used to fund their capital expenditures and for other general corporate purposes.

In May 2013, PPL Capital Funding remarketed \$1.150 billion of 4.625% Junior Subordinated Notes due 2018 that were originally issued in June 2010 as a component of PPL's 2010 Equity Units. In connection with the remarketing, PPL Capital Funding issued \$300 million of 2.04% Junior Subordinated Notes due 2016 and \$850 million of 2.77% Junior Subordinated Notes due 2018, which were simultaneously exchanged into three tranches of Senior Notes. As a result of the exchange, the new Senior Notes include \$250 million of 1.90% Senior Notes due 2018, \$600 million of 3.40% Senior Notes due 2023 and \$300 million of 4.70% Senior Notes due 2043. The transaction was accounted for as a debt extinguishment, resulting in a \$10 million loss on extinguishment of the Junior Subordinated Notes, which was recorded to "Interest Expense" on the Statement of Income. The transaction was considered non-cash activity that was excluded from the 2013 Statement of Cash Flows.

In July 2013, PPL issued 40 million shares of common stock at \$28.73 per share to settle the 2010 Purchase Contracts. PPL received net cash proceeds of \$1.150 billion, which will be used to repay short-term and long-term debt obligations and for other general corporate purposes.

During the nine months ended September 30, 2013, PPL repurchased 2.4 million shares of its common stock for \$74 million to offset the 2013 issuances of common stock under stock-based compensation plans, ESOP and DRIP. These repurchases were recorded as a reduction to "Additional paid-in capital" on the Balance Sheet.

In September 2013, WPD (East Midlands) issued £40 million aggregate principal amount of 1.676% Index-linked Senior Notes due 2052. WPD (East Midlands) received proceeds of £40 million, which equated to \$64 million at the time of issuance. The proceeds will be used for general corporate purposes. Although WPD's results are generally recorded on a one-month lag, this transaction was recognized in the current period financial statements.

In October 2013, WPD (East Midlands) issued £25 million aggregate principal amount of 1.676% Index-linked Senior Notes due 2052. WPD (East Midlands) received proceeds of £25 million, which equated to \$40 million at the time of issuance. The proceeds will be used for general corporate purposes.

In October 2013, WPD (West Midlands) issued £400 million aggregate principal amount of 3.875% Senior Notes due 2024. WPD (West Midlands) received proceeds of £394 million, which equated to \$637 million at the time of issuance, net of a discount and underwriting fees. The net proceeds will be used for general corporate purposes.

See Note 7 in PPL's 2012 Form 10-K for information on the 2011 Equity Units (with respect to which the related \$978 million of Notes are expected to be remarketed as early as the first quarter of 2014).

(PPL and PPL Energy Supply)

In February 2013, PPL Energy Supply completed an offer to exchange up to all, but not less than a majority, of PPL Ironwood's 8.857% Senior Secured Bonds due 2025, (Ironwood Bonds), for newly issued PPL Energy Supply Senior Notes, Series 4.60% due 2021. A total of \$167 million aggregate principal amount of outstanding Ironwood Bonds was exchanged for \$212 million aggregate principal amount of Senior Notes, Series 4.60% due 2021. This transaction was accounted for as a modification of the existing debt; therefore, the amount of debt on the Balance Sheet remained at \$167 million and will be accreted to \$212 million over the life of the new Senior Notes. No gain or loss was recorded and the exchange was considered non-cash activity that was excluded from the 2013 Statement of Cash Flows.

In July 2013, PPL Energy Supply repaid the entire \$300 million principal amount of its 6.30% Senior Notes upon maturity.

(PPL and PPL Electric)

In July 2013, PPL Electric issued \$350 million of 4.75% First Mortgage Bonds due 2043. PPL Electric received proceeds of \$345 million, net of a discount and underwriting fees, which will be used for capital expenditures, to fund pension obligations and for other general corporate purposes.

Legal Separateness

(All Registrants)

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay such creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of PPL Energy Supply, PPL Electric and LKE are each separate legal entities. These subsidiaries are not liable for the debts of PPL Energy Supply, PPL Electric and LKE. Accordingly, creditors of PPL Energy Supply, PPL Electric and LKE may not satisfy their debts from the assets of their subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, absent a specific contractual undertaking or as required by applicable law or regulation, PPL Energy Supply, PPL Electric and LKE are not liable for the debts of their subsidiaries, nor are their subsidiaries liable for the debts of one another. Accordingly, creditors of these subsidiaries may not satisfy their debts from the assets of PPL Energy Supply, PPL Electric and LKE (or their other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions and Capital Contributions

(PPL)

In August 2013, PPL declared its quarterly common stock dividend, payable October 1, 2013, at 36.75 cents per share (equivalent to \$1.47 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

(All Registrants except PPL)

During the nine months ended September 30, 2013, the following distributions and capital contributions occurred:

	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Dividends/distributions paid to parent/member	\$ 408	\$ 94	\$ 116	\$ 67	\$ 83
Capital contributions received from parent/member	980	205	146	54	92

8. Acquisitions, Development and Divestitures

(All Registrants)

The Registrants from time to time evaluate opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. Any resulting transactions may impact future financial results.

Acquisitions

Ironwood Acquisition *(PPL and PPL Energy Supply)*

See Note 10 in PPL's and PPL Energy Supply's 2012 Form 10-K for information on the April 13, 2012 Ironwood Acquisition. See Note 7 for information on the February 2013 exchange of a portion of long-term debt assumed through consolidation as a result of the acquisition.

Development

Future Capacity Needs (*PPL and Kentucky Registrants*)

Construction activity continues on the previously announced natural gas combined-cycle generating unit at the Cane Run station, scheduled to be operational in May 2015. In October 2013, LG&E and KU announced plans to build a second natural gas combined-cycle generating unit at KU's Green River generating site. Subject to finalizing details, regulatory applications, permitting and construction schedules, the facility is expected to have approximately 700 MW of capacity at an estimated cost of \$700 million and is planned to be operational in 2018. At the same time, LG&E and KU also announced plans for a potential 10 MW solar generation facility to be operational in 2016 at an estimated cost of \$25 million.

(*PPL and PPL Energy Supply*)

Bell Bend COLA

The NRC continues to review the COLA submitted by a PPL Energy Supply subsidiary, PPL Bell Bend, LLC (PPL Bell Bend) for the proposed construction of the Bell Bend nuclear generating unit (Bell Bend) adjacent to PPL's Susquehanna nuclear generating plant. PPL Bell Bend does not expect to complete the COLA review process with the NRC prior to 2016. PPL Bell Bend has made no decision to proceed with construction of Bell Bend and expects that such decision will not be made for several years given the anticipated lengthy NRC license approval process. Additionally, PPL Bell Bend does not expect to proceed with construction absent favorable economics, a joint arrangement with other interested parties and a federal loan guarantee or other acceptable financing. PPL Bell Bend is currently authorized to spend up to \$205 million on the COLA and other permitting costs necessary for construction, which is expected to be sufficient to fund the project through receipt of the license. At September 30, 2013 and December 31, 2012, \$169 million and \$154 million of costs, which includes capitalized interest, associated with the licensing application were capitalized and are included on the Balance Sheets in noncurrent "Other intangibles." PPL Bell Bend believes that the estimated fair value of the COLA currently exceeds the costs expected to be capitalized associated with the licensing application. See Note 8 in PPL's and PPL Energy Supply's 2012 Form 10-K for additional information.

Hydroelectric Expansion Project

In the first quarter of 2013, the 63 MW Rainbow hydroelectric redevelopment project in Great Falls, Montana was placed in service.

Regional Transmission Line Expansion Plan (*PPL and PPL Electric*)

Susquehanna-Roseland

On October 1, 2012, the National Park Service (NPS) issued its Record of Decision (ROD) on the proposed Susquehanna-Roseland transmission line affirming the route chosen by PPL Electric and Public Service Electric & Gas Company (PSE&G) as the preferred alternative under the NPS's National Environmental Policy Act review. In October 2012, a complaint was filed in the U.S. District Court for the District of Columbia by various environmental groups, including the Sierra Club, challenging the ROD and seeking to prohibit its implementation. PPL Electric and PSE&G intervened in the lawsuit. In December 2012, PPL Electric received federal construction and right of way permits to build on National Park Service lands.

On August 19, 2013, the environmental groups filed a petition for injunctive relief seeking to prohibit all construction activities until the court issued a final decision on the complaint. On August 30, 2013, the District Court ruled in favor of PPL Electric, PSE&G and the U.S. Government and dismissed the lawsuit filed by the environmental groups. The environmental groups have publicly stated that they do not intend to appeal the District Court decision. PPL Electric began construction on the National Park Service lands in Pennsylvania on October 1, 2013.

Construction activities have been underway on other portions of the 101-mile route in Pennsylvania since 2012. The line is expected to be completed before the peak summer demand period of 2015. At September 30, 2013, PPL Electric's estimated share of the project cost was \$630 million.

PPL and PPL Electric cannot predict any future legal challenges to the project or what additional actions, if any, PJM might take in the event of a further delay to the scheduled in-service date for the new line.

Northeast/Pocono

In October 2012, the FERC issued an order in response to PPL Electric's December 2011 request for ratemaking incentives for the Northeast/Pocono Reliability project (a new 58-mile 230 kV transmission line that includes three new substations and upgrades to adjacent facilities). The FERC granted the incentive for inclusion in rate base of all prudently incurred construction work in progress (CWIP) costs but denied the incentive for a 100 basis point adder to the return on equity. The order required a follow-up compliance filing from PPL Electric to ensure proper accounting treatment of AFUDC and CWIP for the project, which PPL Electric submitted to the FERC in March 2013 and the FERC subsequently approved in April 2013.

In December 2012, PPL Electric submitted an application to the PUC requesting permission to site and construct the project. A number of parties have protested the application, which has been assigned to an Administrative Law Judge (ALJ). Evidentiary hearings were held in July 2013. In October 2013, the ALJ concluded that PPL met its burden on all issues, and recommended that the PUC approve the siting application, two zoning petitions, and the remaining eminent domain applications. A final PUC order is expected in the first quarter of 2014. PPL Electric expects the project to be completed in 2017. At September 30, 2013, PPL Electric's estimated cost of the project was \$335 million, an increase from its original estimate of \$200 million at December 31, 2012. The increased cost is primarily related to higher material and labor costs and additional scope due to revised construction standards. Of the total estimated cost, \$308 million qualifies for the CWIP treatment.

See Note 8 in PPL's and PPL Electric's 2012 Form 10-K for additional information.

Other (PPL and PPL Energy Supply)

Montana Transactions

In September 2013, PPL Montana executed a definitive agreement to sell 633 MW of hydroelectric facilities to NorthWestern for \$900 million in cash, subject to certain adjustments. The sale, which is not expected to close before the second half of 2014, includes 11 hydroelectric power facilities and related assets. The sale is subject to closing conditions, including receipt of regulatory approvals by the FERC and Montana Public Service Commission and certain third-party consents. Due to the uncertainties related to certain of these conditions as of September 30, 2013, the sale did not meet the applicable accounting criteria for the assets and liabilities included in the transaction to be classified as held for sale on the Balance Sheet.

In a related transaction, in September 2013, PPL Montana negotiated and entered into an agreement to pay \$271 million to terminate a sale-leaseback arrangement and reacquire its interests in the Colstrip coal-fired facilities. See Note 11 in PPL's and PPL Energy Supply's 2012 Form 10-K for additional information on the sale-leaseback. This transaction is anticipated to occur by the end of the first quarter of 2014, subject to approval by the FERC. At lease termination, in addition to recording a charge for the cash payment, a non-cash charge is expected to be recorded related to the existing lease-related assets on PPL's and PPL Energy Supply's Balance Sheets. The book value of these assets was approximately \$450 million at September 30, 2013. These lease-related assets will be written-off and the reacquired Colstrip assets will be recorded at fair value as of the acquisition date. The total loss is currently estimated at between \$310 million and \$430 million, after-tax, which is dependent on the fair value assigned to the reacquired Colstrip assets.

Lower Mt. Bethel Plant Transaction

In December 2001, a subsidiary of PPL Energy Supply entered into an operating lease arrangement, as lessee, for the development, construction and operation of the Lower Mt. Bethel plant. The owner/lessor of the Lower Mt. Bethel plant was determined to be a VIE and has been consolidated in PPL's and PPL Energy Supply's financial statements since December 31, 2003. See Note 22 in PPL's and PPL Energy Supply's 2012 Form 10-K for additional information on the VIE. A subsidiary of PPL Energy Supply now intends to purchase the Lower Mt. Bethel plant for \$455 million at the lease termination date in December 2013, subject to approval by the FERC. The proceeds are expected to be used by the VIE to repay outstanding debt and make a distribution to its equity investors (currently presented as noncontrolling interests in PPL's and PPL Energy Supply's financial statements). The transaction will not result in any gain or loss as it will be treated as a

transfer of assets between entities under common control and will not result in any change to the presentation of the Lower Mt. Bethel plant assets as they are currently included in PPL's and PPL Energy Supply's consolidated financial statements.

9. Defined Benefits

(All Registrants except PPL Electric and KU)

Certain net periodic defined benefit costs are applied to accounts that are further distributed between capital and expense, including certain costs allocated to applicable subsidiaries for plans sponsored by PPL Services and LKE. Following are the net periodic defined benefit costs (credits) of the plans sponsored by PPL, PPL Energy Supply, LKE and LG&E for the periods ended September 30:

	Pension Benefits

(All Registrants except PPL)

In addition to the specific defined benefit plans they sponsor, PPL Energy Supply subsidiaries are also allocated costs of defined benefit plans sponsored by PPL Services and LG&E is allocated costs of defined benefit plans sponsored by LKE based on their participation in those plans, which management believes are reasonable. PPL Electric and KU do not independently sponsor any defined benefit plans. PPL Electric is allocated costs of defined benefit plans sponsored by PPL Services and KU is allocated costs of defined benefit plans sponsored by LKE based on their participation in those plans, which management believes are reasonable. For the periods ended September 30, PPL Services allocated the following net periodic defined benefit costs to PPL Energy Supply subsidiaries and PPL Electric, and LKE allocated the following net periodic defined benefit costs to LG&E and KU.

	Three Months		Nine Months	
	2013	2012	2013	2012
PPL Energy Supply	\$ 11	\$ 10	\$ 34	\$ 29
PPL Electric	9	8	27	23
LG&E	3	3	9	9
KU	4	4	13	13

10. Commitments and Contingencies

Energy Purchase Commitments

(PPL and PPL Energy Supply)

PPL Energy Supply enters into long-term purchase contracts to supply the coal requirements for its coal-fired generating facilities. These contracts include commitments to purchase coal through 2019. In 2012, as a result of lower electricity and natural gas prices, coal unit utilization began to decrease. To mitigate the risk of exceeding available coal storage, PPL Energy Supply incurred pre-tax charges of \$17 million and \$29 million during the three and nine months ended September 30, 2012 to reduce its 2012 and 2013 contracted coal deliveries. These charges were recorded to "Fuel" on the Statement of Income.

(PPL and PPL Electric)

In May 2012, PPL Electric filed a plan with the PUC to purchase its electricity supply for default customers for the period June 2013 through May 2015. The PUC approved the plan in January 2013. The approved plan provides that PPL Electric procure this electricity through competitive solicitations twice each plan year beginning in April 2013. The solicitations will include layered short-term full-requirement products ranging from three months to 12 months for residential and small commercial and industrial PLR customers as well as a recurring 12 month spot market product for large commercial and industrial PLR customers. Through October 2013, two of four solicitations have been completed.

(PPL Electric)

See Note 11 for information on the power supply agreements between PPL EnergyPlus and PPL Electric.

Legal Matters

(All Registrants)

PPL and its subsidiaries are involved in legal proceedings, claims and litigation in the ordinary course of business. PPL and its subsidiaries cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

WKE Indemnification (PPL and LKE)

See footnote (1) to the table in "Guarantees and Other Assurances" below for information on an LKE indemnity relating to its former WKE lease, including related legal proceedings.

(PPL and PPL Energy Supply)

Sierra Club Litigation

In July 2012, PPL Montana received a Notice of Intent to Sue (Notice) for violations of the Clean Air Act at Colstrip Steam Electric Station (Colstrip) from counsel on behalf of the Sierra Club and the Montana Environmental Information Center (MEIC). An Amended Notice was received on September 4, 2012, and a Second Amended Notice was received in October 2012. A Supplemental Notice was received in December 2012. The Notice, Amended Notice, Second Amended Notice and Supplemental Notice (the Notices) were all addressed to the Owner or Managing Agent of Colstrip, and to the other Colstrip co-owners: Avista Corporation, Puget Sound Energy, Portland General Electric Company, Northwestern Energy and PacificCorp. The Notices allege certain violations of the Clean Air Act, including New Source Review, Title V and opacity requirements.

On March 6, 2013, the Sierra Club and MEIC filed a complaint against PPL Montana and the other Colstrip co-owners in the U.S. District Court, District of Montana, Billings Division. PPL Montana operates Colstrip on behalf of the co-owners. The complaint is generally consistent with the prior Notices and lists 39 separate claims for relief. All but three of the claims allege Prevention of Significant Deterioration (PSD) related violations under the federal Clean Air Act for various plant maintenance projects completed since 1992. For each such project or set of projects, there are separate claims for failure to obtain a PSD permit, for failure to obtain a Montana Air Quality Permit to operate after the project(s) were completed and for operating after completion of such project(s) without "Best Available Control Technology". The remaining three claims relate to the alleged failure to update the Title V operating permit for Colstrip to reflect the alleged major modifications described in the other claims, allege that the previous Title V compliance certifications were incomplete because they did not address the major plant modifications, and that numerous opacity violations have occurred at the plant since 2007. The complaint requests injunctive relief and civil penalties on average of \$36,000 per day per violation, including a request that the owners remediate environmental damage and that \$100,000 of the civil penalties be used for beneficial mitigation projects. Trial in this matter as to liability has been scheduled for October 2014. Trial as to remedies, if there is a finding of liability, is scheduled for August 2015.

On July 27, 2013, the Sierra Club and MEIC filed an additional Notice, identifying additional plant projects that are alleged not to be in compliance with the Clean Air Act. On September 27, 2013, the plaintiffs filed an amended complaint. This amended complaint drops all claims regarding pre-2001 plant projects, as well as the plaintiffs' Title V and opacity claims. It does, however, add claims with respect to a number of post-2000 plant projects, which effectively increased the number of projects subject to the litigation by about 40. PPL Montana and the other Colstrip Owners filed a motion to dismiss the amended complaint on October 11, 2013. Although PPL Montana believes it and the other co-owners have numerous defenses to the allegations set forth in this complaint and will vigorously assert the same, PPL Montana cannot predict the ultimate outcome of this matter at this time.

Regulatory Issues

(All Registrants)

See Note 6 for information on regulatory matters related to utility rate regulation. See Note 15 to the Registrants' 2012 Form 10-K for a discussion of Enactment of Financial Reform Legislation.

(PPL, PPL Energy Supply and PPL Electric)

New Jersey Capacity Legislation

In January 2011, New Jersey enacted a law that intervenes in the wholesale capacity market exclusively regulated by the FERC: S. No. 2381, 214th Leg. (N.J. 2011) (the Act). To create incentives for the development of new, in-state electric generation facilities, the Act implements a "long-term capacity agreement pilot program (LCAPP)." The Act requires New Jersey utilities to pay a guaranteed fixed price for wholesale capacity, imposed by the New Jersey Board of Public Utilities (BPU), to certain new generators participating in PJM, with the ultimate costs of that guarantee to be borne by New Jersey ratepayers. PPL believes the intent and effect of the LCAPP is to encourage the construction of new generation in New Jersey even when, under the FERC-approved PJM economic model, such new generation would not be economic. The Act could depress capacity prices in PJM in the short term, impacting PPL Energy Supply's revenues, and harm the long-term ability of the PJM capacity market to incent necessary generation investment throughout PJM. In February 2011, the PJM Power Providers Group (P3), an organization in which PPL is a member, filed a complaint before the FERC seeking changes in PJM's capacity market rules designed to ensure that subsidized generation, such as the generation that may result from the implementation of the LCAPP, will not be able to set capacity prices artificially low as a result of their exercise of buyer market power. In April 2011, the FERC issued an order granting in part and denying in part P3's complaint and ordering changes in PJM's capacity rules consistent with a significant portion of P3's requested changes. Several parties have filed appeals of the FERC's order. PPL, PPL Energy Supply and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

In addition, in February 2011, PPL and several other generating companies and utilities filed a complaint in U.S. District Court in New Jersey challenging the Act on the grounds that it violates well-established principles under the Supremacy Clause and the Commerce Clause of the U.S. Constitution and requesting declaratory and injunctive relief barring implementation of the Act by the BPU Commissioners. In October 2011, the court denied the BPU's motion to dismiss the proceeding and in September 2012 the U.S. District Court denied all summary judgment motions. Trial of this matter was completed in June 2013. In October 2013, the U.S. District Court in New Jersey issued a decision finding the Act unconstitutional under the Supremacy Clause on the grounds that it infringes upon the FERC's exclusive authority to regulate the wholesale sale of electricity in interstate commerce. The decision has been appealed to the U.S. Court of Appeals for the Third Circuit by CPV Power Development, Inc. and is expected to be appealed by the State of New Jersey. PPL, PPL Energy Supply and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

Maryland Capacity Order

In April 2012, the Maryland Public Service Commission (MD PSC) ordered three electric utilities in Maryland to enter into long-term contracts to support the construction of new electric generating facilities in Maryland, specifically a 661 MW natural gas-fired combined-cycle generating facility to be owned by CPV Maryland, LLC. PPL believes the intent and effect of the action by the MD PSC is to encourage the construction of new generation in Maryland even when, under the FERC-approved PJM economic model, such new generation would not be economic. The MD PSC action could depress capacity prices in PJM in the short term, impacting PPL Energy Supply's revenues, and harm the long-term ability of the PJM capacity market to encourage necessary generation investment throughout PJM.

In April 2012, PPL and several other generating companies filed a complaint in U.S. District Court in Maryland challenging the MD PSC order on the grounds that it violates well-established principles under the Supremacy and Commerce clauses of the U.S. Constitution and requested declaratory and injunctive relief barring implementation of the order by the MD PSC Commissioners. In August 2012, the court denied the MD PSC and CPV Maryland, LLC motions to dismiss the proceeding. Trial of this matter was completed in March 2013. In September 2013, the U.S. District Court in Maryland issued a decision finding the MD PSC order unconstitutional under the Supremacy Clause on the grounds that it infringes upon the FERC's exclusive authority to regulate the wholesale sale of electricity in interstate commerce. The decision is expected to be appealed to the U.S. Court of Appeals for the Fourth Circuit. PPL, PPL Energy Supply, and PPL Electric cannot predict the outcome of this proceeding or the economic impact on their businesses or operations, or the markets in which they transact business.

Pacific Northwest Markets (PPL and PPL Energy Supply)

Through its subsidiaries, PPL Energy Supply made spot market bilateral sales of power in the Pacific Northwest during the period from December 2000 through June 2001. Several parties subsequently claimed refunds at FERC as a result of these sales. In June 2003, the FERC terminated proceedings to consider whether to order refunds for spot market bilateral sales made in the Pacific Northwest, including sales made by PPL Montana, during the period December 2000 through June 2001. In August 2007, the U.S. Court of Appeals for the Ninth Circuit reversed the FERC's decision and ordered the FERC to

consider additional evidence. In October 2011, FERC initiated proceedings to consider additional evidence. In July 2012, PPL Montana and the City of Tacoma, one of the two parties claiming refunds at FERC, reached a settlement whereby PPL Montana paid \$75 thousand to resolve the City of Tacoma's \$23 million claim. The settlement does not resolve the remaining claim outstanding at September 30, 2013 by the City of Seattle for approximately \$50 million. In April 2013, the FERC issued an order on reconsideration allowing the parties to seek refunds for the period January 2000 through December 2000. As a result, the City of Seattle may be able to seek refunds from PPL Montana for such period. Hearings before a FERC Administrative Law Judge regarding the City of Seattle's refund claims were completed in October 2013. A briefing schedule has been set and an initial decision is expected in mid-March 2014.

Although PPL and its subsidiaries believe they have not engaged in any improper trading or marketing practices affecting the Pacific Northwest markets, PPL and PPL Energy Supply cannot predict the outcome of the above-described proceedings or whether any subsidiaries will be the subject of any additional governmental investigations or named in other lawsuits or refund proceedings. Consequently, PPL and PPL Energy Supply cannot estimate a range of reasonably possible losses, if any, related to this matter.

Electric - Reliability Standards (All Registrants)

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards. The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties of up to \$1 million per day, per violation, for certain violations.

LG&E, KU, PPL Electric and certain subsidiaries of PPL Energy Supply monitor their compliance with the Reliability Standards and continue to self-report potential violations of certain applicable reliability requirements and submit accompanying mitigation plans, as required. The resolution of a number of potential violations is pending. Any Regional Reliability Entity (including RFC or SERC) determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing their programs to ensure compliance with the Reliability Standards by those PPL affiliates subject to the standards, certain other instances of potential non-compliance may be identified from time to time. The Registrants cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any, other than the amounts currently recorded.

In October 2012, the FERC issued a Notice of Proposed Rulemaking (NOPR) concerning Reliability Standards for geomagnetic disturbances (GMDs). The FERC proposed to direct the NERC to submit for approval Reliability Standards that address the impact of GMDs on the reliable operation of the bulk-power system. In May 2013, the FERC issued its Final Rule, Order No. 779, which directs the NERC to submit GMD Reliability Standards to the FERC for approval in two stages. In the first stage, the NERC must submit one or more Reliability Standards by January 22, 2014 that require owners and operators of the bulk-power system to develop and implement operational procedures to mitigate the effects of GMDs on the bulk-power system. In the second stage, the NERC must submit one or more Reliability Standards by January 22, 2015 that require owners and operators of bulk-power system facilities to assess yet to be determined "benchmark GMD events" and develop and implement plans to protect the bulk-power system from such GMD events. The Registrants are unable to predict the specific requirements that will be contained in the Reliability Standards that the NERC has been directed to submit or the amount of any expenditures that may be required as a result of the approval of any such Reliability Standards.

Environmental Matters - Domestic

(All Registrants)

Due to the environmental issues discussed below or other environmental matters, it may be necessary for the Registrants to modify, curtail, replace or cease operation of certain facilities or performance of certain operations to comply with statutes, regulations and other requirements of regulatory bodies or courts. In addition, legal challenges to new environmental permits or rules add to the uncertainty of estimating the future cost impact of these permits and rules.

LG&E and KU are entitled to recover, through the ECR mechanism, certain costs of complying with the Clean Air Act as amended and those federal, state or local environmental requirements applicable to coal combustion wastes and by-products from facilities that generate electricity from coal in accordance with approved compliance plans. Costs not covered by the ECR mechanism for LG&E and KU and all such costs for PPL Electric are subject to rate recovery before the companies' respective state regulatory authorities, or the FERC, if applicable. Because PPL Electric does not own any generating plants,

its exposure to related environmental compliance costs is reduced. As PPL Energy Supply is not a rate regulated entity, it cannot seek to recover environmental compliance costs through the mechanism of rate recovery. PPL, PPL Electric, LKE, LG&E and KU can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

(All Registrants except PPL Electric)

Air

CSAPR (formerly Clean Air Transport Rule) and CAIR

In July 2011, the EPA adopted the CSAPR. The CSAPR replaced the EPA's previous CAIR which was invalidated in July 2008 by the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit Court). CAIR subsequently was effectively reinstated by the D.C. Circuit Court in December 2008, pending finalization of the CSAPR. Like CAIR, CSAPR targeted sources in the eastern U.S. and required reductions in sulfur dioxide and nitrogen oxides in two phases (2012 and 2014).

In December 2011, the D.C. Circuit Court stayed implementation of the CSAPR and left CAIR in effect pending a final decision on the validity of the rule. In August 2012, the D.C. Circuit Court issued a ruling invalidating CSAPR, remanding the rule to the EPA for further action, and leaving CAIR in place during the interim. In June 2013, the U.S. Supreme Court granted the EPA's petition for review of the D.C. Circuit Court's August 2012 decision. Oral argument before the U.S. Supreme Court has been scheduled for December 2013. Prior to a revised rule from the EPA, coal-fired generating plants could face tighter nitrous oxide emission limitations through state action.

The Kentucky fossil-fueled generating plants can meet the CAIR sulfur dioxide emission requirements by utilizing sulfur dioxide allowances (including banked allowances and optimizing existing controls). To meet nitrogen oxide standards under the CAIR, the Kentucky companies will need to buy allowances and/or make operational changes. LG&E and KU do not currently anticipate that the costs of meeting these reinstated CAIR requirements or standards will be significant.

PPL Energy Supply's Pennsylvania fossil-fueled generating plants can meet the CAIR sulfur dioxide emission requirements with the existing scrubbers that were placed in service in 2008 and 2009. To meet the CAIR nitrogen oxide standards, PPL Energy Supply will need to buy allowances and/or make operational changes, the costs of which are not anticipated to be significant.

National Ambient Air Quality Standards

PPL fossil-fueled generating plants may face further reductions in emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxide, sulfur dioxide and/or fine particulates.

In 2010, the EPA finalized a new one-hour standard for sulfur dioxide, and states are required to identify areas that meet those standards and areas that are in non-attainment. In July 2013, the EPA finalized non-attainment designations for parts of the country, including part of Yellowstone County in Montana (Billings area), including the Corette plant and its immediate vicinity, and part of Jefferson County in Kentucky. Attainment must be achieved by 2018. States are working on designations for other areas.

In December 2012, the EPA issued final rules that strengthen the fine particulate standards. Under the final rules, states and the EPA have until 2015 to identify non-attainment areas, and states have until 2020 to achieve attainment status for those areas.

PPL, PPL Energy Supply, LKE, LG&E and KU anticipate that some of the measures required for compliance with the CAIR, or the MATS, or the Regional Haze requirements (as discussed below), such as upgraded or new sulfur dioxide scrubbers at certain plants and, in the case of LG&E and KU, the previously announced retirement of coal-fired generating units at the Cane Run, Green River and Tyrone plants, will help to achieve compliance with the new one-hour sulfur dioxide standard. If additional reductions were to be required, the financial impact could be significant. The short-term impact on the Corette plant from the EPA's final designation of part of Yellowstone County in Montana as non-attainment as noted above is not expected to be significant, as PPL Energy Supply previously announced its intent to place the plant in long-term reserve status beginning in April 2015 (see "MATS" below). The longer-term impact will depend on the status of plant operations at that time and what the MDEQ requires in its State Implementation Plan for reestablishing attainment, due in January 2015.

Until particulate matter and sulfur dioxide maintenance and compliance plans are developed by the EPA and state or local agencies, including identification and finalization of attainment designations for particulate matter, PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict the impact of the new standards.

MATS

In May 2011, the EPA published a proposed regulation requiring stringent reductions of mercury and other hazardous air pollutants from power plants. In February 2012, the EPA published the final rule, known as the MATS, with an effective date of April 2012. The rule is being challenged by industry groups and states in the D.C. Circuit Court, where oral argument is scheduled for December 2013. The rule provides for a three-year compliance deadline with the potential for a one-year extension as provided under the statute. PPL has received two extensions in Kentucky and has requested an extension for one plant in Pennsylvania. Other extension requests are under consideration.

At the time the MATS rule was proposed, LG&E and KU filed requests with the KPSC for environmental cost recovery based on their expected need to install environmental controls, including chemical additive and fabric-filter baghouses to remove certain air pollutants. Recovery of the cost of certain controls was granted by the KPSC in December 2011. LG&E's and KU's anticipated retirement of certain coal-fired electricity generating units is in response to this and other environmental regulations. LG&E and KU are continuing to assess whether any revisions of their approved compliance plans will be necessary.

With respect to PPL Energy Supply's Pennsylvania plants, PPL Energy Supply believes that installation of chemical additive systems may be necessary at certain coal-fired plants, the capital cost of which is not expected to be significant. PPL Energy Supply continues to analyze the potential impact of MATS on operating costs. With respect to PPL Energy Supply's Montana plants, modifications to the air pollution controls installed on Colstrip may be required, the cost of which is not expected to be significant. For the Corette plant, PPL Energy Supply announced in September 2012 its intention, beginning in April 2015, to place the plant in long-term reserve status, suspending the plant's operation, due to expected market conditions and the costs to comply with the MATS requirements. The Corette plant asset group's carrying amount at September 30, 2013 was \$67 million. Although the Corette plant asset group was not determined to be impaired at September 30, 2013, it is reasonably possible that an impairment could occur in future periods, as the Company continues to assess its plans for Corette and as higher priced sales contracts settle, adversely impacting projected cash flows. PPL Energy Supply, LG&E and KU are continuing to conduct in-depth reviews of the MATS, including the potential implications to scrubber wastewater discharges. See the discussion of effluent limitations guidelines and standards below.

Upon reconsideration of the MATS rule, in March 2013 the EPA revised certain emission limits and related requirements for new power plants. The revised limits are somewhat less onerous than the original proposal, and thereby pose less of an impediment to the construction of new coal-fired power plants.

Regional Haze and Visibility

The EPA's regional haze programs were developed under the Clean Air Act to eliminate man-made visibility degradation by 2064. Under the programs, states are required to take action via state plans to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977.

The primary power plant emissions affecting visibility are sulfur dioxide, nitrogen oxide and particulates. To date, the focus of regional haze activity has been the western U.S. because, until recently, BART requirements for sulfur dioxide and nitrogen oxide reductions in the eastern U.S. were largely addressed through compliance with other regulatory programs, such as CSAPR or CAIR. More specifically, before CAIR was temporarily invalidated in 2008, the EPA had determined, and the D.C. Circuit Court had affirmed, that a state could accept region-wide reductions under the CAIR trading program to satisfy BART requirements. After CAIR was temporarily invalidated, the EPA adopted a final rule providing that states subject to CSAPR (which replaced CAIR) may rely on participation in the CSAPR trading program as an alternative to BART. However, the D.C. Circuit Court's August 2012 decision to vacate and remand CSAPR and to implement CAIR in its place on an interim basis leaves power plants located in the eastern U.S., including PPL's plants in Pennsylvania and Kentucky, exposed to reductions in sulfur dioxide and nitrogen oxides as required by BART, unless the D.C. Circuit Court's decision, now pending before the U.S. Supreme Court, is overturned.

In addition to this exposure stemming from the remand of CSAPR, LG&E's Mill Creek Units 3 and 4 are required to reduce sulfuric acid mist emissions because they were determined to have a significant regional haze impact. These reductions are in the Kentucky Division of Air Quality's regional haze state implementation plan that was submitted to the EPA. LG&E is

currently installing sorbent injection technology to comply with these reductions, the costs of which are not expected to be significant.

In Montana, the EPA Region 8 developed the regional haze plan as the MDEQ declined to develop a BART state implementation plan. In September 2012, the EPA issued its final Federal Implementation Plan (FIP) for the Montana regional haze rule. The final FIP assumed no additional controls for Corette or Colstrip Units 3 and 4, but proposed tighter limits for Corette and Colstrip Units 1 and 2. PPL Energy Supply expects to meet these tighter permit limits at Corette without any significant changes to operations, although other requirements have led to the planned suspension of operations at Corette beginning in April 2015 (see "MATS" above). Under the final FIP, Colstrip Units 1 and 2 may require additional controls, including the possible installation of an SNCR and other technology, to meet more stringent nitrogen oxide and sulfur dioxide limits. The cost of these potential additional controls, if required, could be significant. In November 2012, PPL filed a petition for review of the Montana Regional Haze FIP with the U.S. Court of Appeals for the Ninth Circuit. Environmental groups have also filed a petition for review. The two matters have been consolidated, and litigation is on-going.

New Source Review (NSR)

The EPA has continued its NSR enforcement efforts targeting coal-fired generating plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act. In April 2009, PPL received EPA information requests for its Montour and Brunner Island plants. PPL and the EPA have exchanged certain information regarding this matter. In January 2009, PPL, PPL Energy Supply and other companies that own or operate the Keystone plant in Pennsylvania received a notice of violation from the EPA alleging that certain projects were undertaken without proper NSR compliance. In May and November 2012, PPL Montana received information requests from the EPA regarding projects undertaken during a Spring 2012 maintenance outage at Colstrip Unit 1. In September 2012, PPL Montana received an information request from the Montana Department of Environmental Quality regarding Colstrip Unit 1 and other projects. PPL and PPL Energy Supply cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In March 2009, KU received an EPA notice alleging that KU violated certain provisions of the Clean Air Act's rules governing NSR and prevention of significant deterioration by installing sulfur dioxide scrubbers and SCR controls at its Ghent plant without assessing potential increased sulfuric acid mist emissions. KU contends that the projects in question were pollution control projects, and therefore exempt from the requirements cited by the EPA. In December 2009, the EPA issued an information request on this matter. In September 2012, the parties reached a tentative settlement addressing the Ghent NSR matter that seeks to resolve a September 2007 notice of violation alleging opacity violations at the plant. The parties subsequently entered into a consent decree which was approved by the court on September 11, 2013. The consent decree requires the incurrence of non-material costs that have already been accrued.

In August 2007, LG&E received information requests for the Mill Creek and Trimble County plants, and KU received requests for the Ghent plant, but they have received no further communications from the EPA since providing their responses. PPL, LKE, LG&E and KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

States and environmental groups also have commenced litigation alleging violations of the NSR regulations by coal-fired generating plants across the nation. See "Legal Matters" above for information on a lawsuit filed by environmental groups in March 2013 against PPL Montana and other owners of Colstrip.

If PPL subsidiaries are found to have violated NSR regulations, PPL, PPL Energy Supply, LKE, LG&E and KU would, among other things, be required to meet permit limits reflecting Best Available Control Technology (BACT) for the emissions of any pollutant found to have significantly increased due to a major plant modification. The costs to meet such limits, including installation of technology at certain units, could be significant.

TC2 Air Permit (PPL and Kentucky Registrants)

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which in January 2010 were incorporated into a final revised permit issued by the KDAQ. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, PPL, LKE, LG&E and KU cannot predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

Cane Run Environmental Claims (PPL, LKE and LG&E)

On September 6, 2013, PPL, LKE and LG&E received a letter on behalf of two residents adjacent to the Cane Run plant notifying various federal, state, and local agencies of their intent to file a citizen suit for alleged violations of the Clean Air Act and Resource Conservation and Recovery Act. The claimants allege various environmental harms including an imminent and substantial endangerment to health or the environment and state that they will seek civil penalties, injunctive relief and attorneys' fees. PPL, LKE and LG&E cannot predict the outcome of this matter or the potential impact on operations of the Cane Run plant. In the 2011 to 2013 time period, the Louisville Metro Air Pollution Control District issued several notices of violation alleging violations of local air quality rules at the Cane Run plant. The agency is seeking civil penalties and remedial measures which are not expected to result in the incurrence of material costs. LG&E is currently in settlement negotiations with the agency. LG&E has previously announced that it anticipates retiring the coal-fired units at Cane Run before the end of 2015.

(All Registrants)

GHG Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has authority under the Clean Air Act to regulate GHG emissions from new motor vehicles, in April 2010, the EPA and the U.S. Department of Transportation issued new light-duty vehicle emissions standards that applied beginning with 2012 model year vehicles. The EPA also clarified that this standard, beginning in 2011, authorized regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act. As a result, any new sources or major modifications to existing GHG sources causing a net significant emissions increase now require adherence to the BACT permit limits for GHGs. The rules were challenged, and in June 2012 the D.C. Circuit Court upheld the EPA's regulations. In December 2012, the D.C. Circuit Court denied petitions for rehearing pertaining to its June 2012 opinion. On October 15, 2013, the U.S. Supreme Court granted certiorari for several petitions to decide whether the NSR provisions of the Clean Air Act require the EPA to regulate GHG emissions from stationary sources, such as power plants.

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a new proposal for new power plants by September 20, 2013, with a final rule in a timely fashion thereafter, and to issue proposed standards for existing plants by June 1, 2014 with a final rule to be issued by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and the state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may also lead to more costly regulatory requirements. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect PPL and others in the industry as transmission system modifications to improve the ability to withstand major storms may be needed in order to meet those requirements.

The EPA issued its revised proposal (re-proposal) for new sources on September 20, 2013 as directed by the White House. Unlike the EPA's April 2012 Carbon Dioxide (CO₂) New Source Performance Standards (NSPS) for new plants, the re-proposal established separate emission standards for coal and gas units based on the application of different technologies. The coal standard is based on the application of partial carbon capture and sequestration technology, but because there is no commercially viable CO₂ reduction technology available presently to allow new coal plants to meet the proposed standards, this proposal effectively precludes the construction of new coal plants. The EPA proposed the same standard for natural gas combined-cycle power plants as it had proposed in April 2012. A slightly less stringent standard, however, was offered in the re-proposal for smaller gas plants. Simple cycle natural gas plants are no longer explicitly exempt from the standard under the EPA's re-proposal.

At the regional level, ten northeastern states signed a Memorandum of Understanding (MOU) agreeing to establish a GHG emission cap-and-trade program, called the Regional Greenhouse Gas Initiative (RGGI). The program commenced in January 2009 and calls for stabilizing carbon dioxide emissions, at base levels established in 2005, from electric power plants with capacity greater than 25 MW. The MOU also provides for a 10% reduction, by 2019, in carbon dioxide emissions from base levels.

Pennsylvania has not stated an intention to join the RGGI, but enacted the Pennsylvania Climate Change Act of 2008 (PCCA). The PCCA established a Climate Change Advisory Committee to advise the PADEP on the development of a Climate Change Action Plan. In December 2009, the Advisory Committee finalized its Climate Change Action Report and identified specific actions that could result in reducing GHG emissions by 30% by 2020. Some of the proposed actions, such as a mandatory 5% efficiency improvement at power plants, could be unachievable. To date, there have been no regulatory or legislative actions taken to implement the recommendations of the report.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. To date, the state has not issued a final plan. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting plants and, although the decided cases to date have not sustained claims brought on the basis of these theories of liability, the law remains unsettled on these claims. In September 2009, the U.S. Court of Appeals for the Second Circuit in the case of *AEP v. Connecticut* reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the Second Circuit and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In addition, in *Comer v. Murphy Oil* (Comer case), the U.S. Court of Appeals for the Fifth Circuit (Fifth Circuit) declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the Comer case named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a petition to reverse the Fifth Circuit's ruling. In May 2011, the plaintiffs in the Comer case filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including KU and three other indirect subsidiaries of LKE, under a Mississippi statute that allows the re-filing of an action in certain circumstances. In March 2012, the Mississippi federal district court granted defendants' motions to dismiss the state common law claims. Plaintiffs appealed to the U.S. Court of Appeals for the Fifth Circuit and in May 2013 the Fifth Circuit affirmed the district court's dismissal of the case. Additional litigation in federal and state courts over such issues is continuing. PPL, LKE and KU cannot predict the outcome of these lawsuits or estimate a range of reasonably possible losses, if any.

Renewable Energy Legislation (All Registrants)

There has been interest in renewable energy legislation at both the state and federal levels. Federal legislation on renewable energy is not expected to be enacted this year. In Pennsylvania, bills were recently introduced calling for an increase in AEPS Tier 1 obligations and to create a \$25 million permanent funding program for solar generation. A bill adding new hydropower to Montana's renewable portfolio standard was enacted with an effective date of October 1, 2013. An interim legislative committee in Montana is reviewing the state's RPS. PPL and PPL Energy Supply cannot predict at this time whether the committee will recommend any changes to existing laws.

The Registrants believe there are financial, regulatory and logistical uncertainties related to the implementation of renewable energy mandates that will need to be resolved before the impact of such requirements on them can be estimated. Such uncertainties, among others, include the need to provide back-up supply to augment intermittent renewable generation, potential generation over-supply that could result from such renewable generation and back-up, impacts to PJM's capacity market and the need for substantial changes to transmission and distribution systems to accommodate renewable energy sources. These uncertainties are not directly addressed by proposed legislation. PPL and PPL Energy Supply cannot predict at this time the effect on their competitive plants' future competitive position, results of operation, cash flows and financial position of renewable energy mandates that may be adopted, although the costs to implement and comply with any such requirements could be significant.

Water/Waste

Coal Combustion Residuals (CCRs) (All Registrants except PPL Electric)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous) under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. Regulating CCRs as a hazardous waste under Subtitle C of the RCRA would materially increase costs and result in early retirements of many coal-fired plants, as it would require plants to retrofit their operations to comply

with full hazardous waste requirements for the generation of CCRs and associated waste waters through generation, transportation and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. The EPA's proposed approach to regulate CCRs as non-hazardous waste under Subtitle D of the RCRA would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, PPL expects that several of its plants in Kentucky and Montana could be significantly impacted by the EPA's proposed non-hazardous waste regulations, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. PPL has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several PPL plants and PPL has implemented or is implementing certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) requesting comments on selected documents it received during the comment period for the proposed regulations. On September 20, 2013, in response to the proposed Effluent Limitation Guidelines, PPL submitted comments on the proposed CCR regulations. Also, on September 3, 2013, PPL commented on a second CCR NODA seeking comment on additional information related to the EPA's proposal. In July 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from issuing final CCR regulations and would set non-hazardous CCR standards under RCRA and authorize state permit programs. It remains uncertain whether similar legislation will likely be passed by the U.S. Senate.

A coalition of environmental groups and two CCR recycling companies have filed lawsuits against the EPA for failure to perform nondiscretionary duties under RCRA, which could require a deadline for the EPA to issue strict CCR regulations. The two CCR recycling companies are asserting that the EPA should regulate CCRs as a non-hazardous waste that would allow for continued recycling.

As a result of litigation by environmental groups, final rulemaking could be issued as early as the end of 2014.

PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on their facilities, but the financial and operational impact is expected to be material if CCRs are regulated as hazardous waste and significant if regulated as non-hazardous.

Trimble County Landfill Permit (PPL and Kentucky Registrants)

In May 2011, LG&E submitted an application for a special waste landfill permit to handle coal combustion residuals generated at the Trimble County plant. After extensive review of the permit application in May 2013, the Kentucky Division of Waste Management denied the permit application on the grounds that the proposed facility would violate the Kentucky Cave Protection Act because it would eliminate an on-site karst feature considered to be a cave. LG&E and KU are assessing additional options for managing coal combustion residuals including construction of a landfill at an alternate site adjacent to the plant. Submittal of a new permit application for an alternative site may result in additional environmental considerations in the course of the permitting process and substantial additional costs. PPL, LKE, LG&E and KU are unable to determine the precise impact of this matter until they select an alternate management option and complete a detailed engineering design.

Seepages and Groundwater Infiltration - Pennsylvania, Montana and Kentucky

(All Registrants except PPL Electric)

Seepages or groundwater infiltration have been detected at active and retired wastewater basins and landfills at various PPL, PPL Energy Supply, LKE, LG&E and KU plants. PPL, PPL Energy Supply, LKE, LG&E and KU have completed or are completing assessments of seepages or groundwater infiltration at various facilities and have completed or are working with agencies to implement assessment or abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

(PPL and PPL Energy Supply)

In 2007, six plaintiffs filed a lawsuit in the Montana Sixteenth Judicial District Court against the Colstrip plant owners asserting property damage due to seepage from plant wastewater ponds. A settlement agreement was reached in July 2010 which would have resulted in a payment by PPL Montana, but certain of the plaintiffs later argued the settlement was not final. The Colstrip plant owners filed a motion to enforce the settlement and in October 2011 the court granted the motion and ordered the settlement to be completed in 60 days. The plaintiffs appealed the October 2011 order to the Montana Supreme Court, which affirmed the district court's order enforcing the settlement in December 2012 and denied plaintiff's motion for rehearing in February 2013. Final settlement documents were executed and the settlement was effective on October 28, 2013. PPL Montana's share of the settlement payment was not significant.

In August 2012, PPL Montana entered into an Administrative Order on Consent (AOC) with the MDEQ which establishes a comprehensive process to investigate and remediate groundwater seepage impacts related to the wastewater facilities at the Colstrip power plant. The AOC requires that within five years, PPL Montana provide financial assurance to the MDEQ for the costs associated with closure and future monitoring of the waste-water treatment facilities. PPL Montana cannot predict at this time if the actions required under the AOC will create the need to adjust the existing ARO related to these facilities.

In September 2012, Earthjustice filed an affidavit pursuant to Montana's Major Facility Siting Act (MFSA) that sought review of the AOC by Montana's Board of Environmental Review (BER) on behalf of the Sierra Club, the MEIC, and the National Wildlife Federation (NWF). In September 2012, PPL Montana filed an election with the BER to have this proceeding conducted in Montana state district court as contemplated by the MFSA. In October 2012, Earthjustice filed a petition for review of the AOC in the Montana state district court in Rosebud County.

In late October 2012, Earthjustice filed a second complaint against the MDEQ and PPL Montana in state district court in Lewis and Clark County on behalf of the Sierra Club, the MEIC and the NWF. This complaint alleges that the defendants have failed to take action under the MFSA and the Montana Water Quality Act to effectively monitor and correct issues of coal ash disposal and wastewater ponds at the Colstrip plant. The complaint seeks a declaration that the operations of the impoundments violate the statutes referred to above, requests a writ of mandamus directing the MDEQ to enforce the same and seeks recovery of attorneys' fees and costs. In May 2013, the court granted MDEQ's and PPL Montana's motion to dismiss. It is unknown at this time whether the complainants will appeal this decision.

(All Registrants except PPL Electric)

Clean Water Act 316(b)

The EPA published proposed rule 316(b) for existing facilities in April 2011. The EPA has been evaluating the comments it received to the proposed rule and meeting with industry groups to discuss options. The proposed rule contains two requirements to reduce impact to aquatic organisms at cooling water intake structures. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens (impingement) regardless of the levels of mortality actually occurring or the cost to achieve the standards. The second requirement is to determine and install the best technology available to reduce mortality of aquatic organisms pulled through a plant's cooling water system (entrainment). A form of cost-benefit analysis is allowed for this second requirement involving a site-specific evaluation based on nine factors, including impacts to energy delivery reliability and the remaining useful life of the plant. The final rule is expected to be issued in November 2013. Until the final rule is issued, PPL, PPL Energy Supply, LKE, LG&E and KU cannot reasonably estimate a range of reasonably possible costs, if any, that would be required to comply with such a regulation.

Effluent Limitations Guidelines (ELGs) and Standards

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations contain requirements that would affect the inspection and operation of CCR facilities, if finalized. The EPA has indicated that it will coordinate these regulations with the regulation of CCRs discussed above. The proposal contains alternative approaches, some of which could significantly impact PPL's coal-fired plants. PPL, PPL Energy Supply, LKE, LG&E and KU worked with industry groups to comment on the proposed regulation on September 20, 2013. The final regulation is expected to be issued in May 2014. At the present time, PPL, PPL Energy Supply, LKE, LG&E and KU are currently unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant. Pending finalization of the ELGs, states, including Pennsylvania and Kentucky, are proposing more stringent

technology-based limits in permit renewals. Depending on the final limits imposed, the costs of compliance could be significant and costs could be imposed ahead of federal timelines.

Other Issues

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxic Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all PCB-containing equipment. The EPA is planning to propose the revised regulations in 2014. PCBs are found, in varying degrees, in all of the Registrants' operations. The Registrants cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on their facilities, but the costs could be significant.

PPL Energy Supply has investigated alternatives to exclude fish from the discharge channel at its Brunner Island plant, but the subsidiary and the PADEP have concluded that a barrier method to exclude fish is not workable. In June 2012, a Consent Order and Agreement (COA) was signed that allows the subsidiary to study a change in a cooling tower operational method that may keep fish from entering the channel. Should this approach fail, the COA requires a retrofit of impingement control technology at the intakes to the cooling towers, the cost of which could be significant.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to the Trimble Circuit Court, but the case was subsequently transferred to the Franklin Circuit Court. In September 2013, the court reversed the Cabinet order upholding the permit and remanded the permit to the agency for further proceedings. In October 2013, LG&E filed a notice of appeal with the Kentucky Court of Appeals. PPL, LKE, LG&E and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

The EPA and the Army Corps of Engineers are working on a guidance document that will expand the federal government's interpretation of what constitutes "waters of the U.S." subject to regulation under the Clean Water Act. This change has the potential to affect generation and delivery operations, with the most significant effect being the potential elimination of the existing regulatory exemption for plant waste water treatment systems. The costs that may be imposed on the Registrants as a result of any eventual expansion of this interpretation cannot reliably be estimated at this time but could be significant.

Superfund and Other Remediation (All Registrants)

PPL Electric is potentially responsible for costs at several sites listed by the EPA under the federal Superfund program, including the Columbia Gas Plant site, the Metal Bank site and the Ward Transformer site. Clean-up actions have been or are being undertaken at all of these sites, the costs of which have not been significant to PPL Electric. However, should the EPA require different or additional measures in the future, or should PPL Electric's share of costs at multi-party sites increase substantially more than currently expected, the costs could be significant.

PPL Electric, LG&E and KU are remediating or have completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which PPL Electric, LG&E and KU may be liable for remediation. These include a number of former coal gas manufacturing plants in Pennsylvania and Kentucky previously owned or operated or currently owned by predecessors or affiliates of PPL Electric, LG&E and KU. There are additional sites, formerly owned or operated by PPL Electric, LG&E and KU predecessors or affiliates, for which PPL Electric, LG&E and KU lack information on current site conditions and are therefore unable to predict what, if any, potential liability they may have.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which PPL Electric, LG&E and KU currently lack information, the costs of remediation and other liabilities could be material. PPL, PPL Electric, LKE, LG&E and KU cannot estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require several PPL subsidiaries to take more extensive assessment and remedial actions at former coal gas manufacturing plants. PPL, PPL Electric, LKE, LG&E and KU cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, PPL Energy Supply, PPL Electric, LG&E and KU undertake remedial action in response to spills or other releases at various on-site and off-site locations, negotiate with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiate with property owners and other third parties alleging impacts from PPL's operations and undertake similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on their operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in significant additional costs for the Registrants.

Environmental Matters - WPD (PPL)

WPD's distribution businesses are subject to environmental regulatory and statutory requirements. PPL believes that WPD has taken and continues to take measures to comply with the applicable laws and governmental regulations for the protection of the environment.

Other

Nuclear Insurance (PPL and PPL Energy Supply)

PPL Susquehanna is a member of certain insurance programs that provide coverage for property damage to members' nuclear generating plants. Effective April 1, 2013, facilities at the Susquehanna plant are insured against property damage losses up to \$2.50 billion under these programs. PPL Susquehanna is also a member of an insurance program that provides insurance coverage for the cost of replacement power during prolonged outages of nuclear units caused by certain specified conditions.

Under the property and replacement power insurance programs, PPL Susquehanna could be assessed retroactive premiums in the event of the insurers' adverse loss experience. Effective April 1, 2013, this maximum assessment was \$46 million.

In the event of a nuclear incident at the Susquehanna plant, PPL Susquehanna's public liability for claims resulting from such incident would be limited to \$12.6 billion under provisions of The Price-Anderson Act as amended. PPL Susquehanna is protected against this liability by a combination of commercial insurance and an industry assessment program.

In the event of a nuclear incident at any of the reactors covered by The Price-Anderson Act, as amended, PPL Susquehanna could be assessed up to \$235 million per incident, payable at \$35 million per year.

Guarantees and Other Assurances

(All Registrants)

In the normal course of business, the Registrants enter into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

(PPL)

PPL fully and unconditionally guarantees all of the debt securities of PPL Capital Funding.

(All Registrants)

The table below details guarantees provided at September 30, 2013. The total recorded liability at September 30, 2013 and December 31, 2012, was \$23 million and \$24 million for PPL and \$20 million for both periods for LKE. The probability of expected payment/performance under each of these guarantees is remote except for "WPD guarantee of pension and other obligations of unconsolidated entities" and "Indemnification of lease termination and other divestitures." For reporting purposes, on a consolidated basis, all guarantees of PPL Energy Supply (other than the letters of credit), PPL Electric, LKE, LG&E and KU also apply to PPL, and all guarantees of LG&E and KU also apply to LKE.

	Exposure at September 30, 2013 (a)	Expiration Date
<u>PPL</u>		
Indemnifications related to the WPD Midlands acquisition	(b)	
WPD indemnifications for entities in liquidation and sales of assets	\$ 11 (c)	2018
WPD guarantee of pension and other obligations of unconsolidated entities	125 (d)	2015
<u>PPL Energy Supply</u>		
Letters of credit issued on behalf of affiliates	23 (e)	2013 - 2014
Retrospective premiums under nuclear insurance programs	46 (f)	
Nuclear claims assessment under The Price-Anderson Act as amended	235 (g)	
Indemnifications for sales of assets	250 (h)	2025
Indemnification to operators of jointly owned facilities	6 (i)	
Guarantee of a portion of a divested unconsolidated entity's debt	22 (j)	2018
<u>PPL Electric</u>		
Guarantee of inventory value	32 (k)	2017
<u>LKE</u>		
Indemnification of lease termination and other divestitures	301 (l)	2021 - 2023
<u>LG&E and KU</u>		
LG&E and KU guarantee of shortfall related to OVEC	(m)	

- (a) Represents the estimated maximum potential amount of future payments that could be required to be made under the guarantee.
- (b) Prior to PPL's acquisition, WPD Midlands Holdings Limited had agreed to indemnify certain former directors of a Turkish entity, in which WPD Midlands Holdings Limited previously owned an interest, for any liabilities that may arise as a result of an investigation by Turkish tax authorities, and PPL WEM has received a cross-indemnity from E.ON AG with respect to these indemnification obligations. Additionally, PPL subsidiaries agreed to provide indemnifications to subsidiaries of E.ON AG for certain liabilities relating to properties and assets owned by affiliates of E.ON AG that were transferred to WPD Midlands in connection with the acquisition. The maximum exposure and expiration of these indemnifications cannot be estimated because the maximum potential liability is not capped and the expiration date is not specified in the transaction documents.
- (c) In connection with the liquidation of wholly owned subsidiaries that have been deconsolidated upon turning the entities over to the liquidators, certain affiliates of PPL Global have agreed to indemnify the liquidators, directors and/or the entities themselves for any liabilities or expenses arising during the liquidation process, including liabilities and expenses of the entities placed into liquidation. In some cases, the indemnifications are limited to a maximum amount that is based on distributions made from the subsidiary to its parent either prior or subsequent to being placed into liquidation. In other cases, the maximum amount of the indemnifications is not explicitly stated in the agreements. The indemnifications generally expire two to seven years subsequent to the date of dissolution of the entities. The exposure noted only includes those cases in which the agreements provide for a specific limit on the amount of the indemnification, and the expiration date was based on an estimate of the dissolution date of the entities.

In connection with their sales of various businesses, WPD and its affiliates have provided the purchasers with indemnifications that are standard for such transactions, including indemnifications for certain pre-existing liabilities and environmental and tax matters. In addition, in connection with certain of these sales, WPD and its affiliates have agreed to continue their obligations under existing third-party guarantees, either for a set period of time following the transactions or upon the condition that the purchasers make reasonable efforts to terminate the guarantees. Finally, WPD and its affiliates remain secondarily responsible for lease payments under certain leases that they have assigned to third parties.

- (d) As a result of the privatization of the utility industry in the U.K., certain electric associations' roles and responsibilities were discontinued or modified. As a result, certain obligations, primarily pension-related, associated with these organizations have been guaranteed by the participating members. Costs are allocated to the members based on predetermined percentages as outlined in specific agreements. However, if a member becomes insolvent, costs can be reallocated to and are guaranteed by the remaining members. At September 30, 2013, WPD has recorded an estimated discounted liability based on its current allocated percentage of the total expected costs for which the expected payment/performance is probable. Neither the expiration date nor the maximum amount of potential payments for certain obligations is explicitly stated in the related agreements. Therefore, they have been estimated based on the types of obligations.
- (e) Standby letter of credit arrangements under PPL Energy Supply's credit facilities for the purposes of protecting various third parties against nonperformance by PPL. This is not a guarantee by PPL on a consolidated basis.
- (f) PPL Susquehanna is contingently obligated to pay this amount related to potential retrospective premiums that could be assessed under its nuclear insurance programs. See "Nuclear Insurance" above for additional information.
- (g) This is the maximum amount PPL Susquehanna could be assessed for each incident at any of the nuclear reactors covered by this Act. See "Nuclear Insurance" above for additional information.
- (h) PPL Energy Supply's maximum exposure with respect to certain indemnifications and the expiration of the indemnifications cannot be estimated because, in the case of certain indemnification provisions, the maximum potential liability is not capped by the transaction documents and the expiration date is based on the applicable statute of limitations. The exposure and expiration dates noted are only for those cases in which the agreements provide for specific limits. The indemnification provisions described below are in each case subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of most representations and warranties.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchaser of the Long Island generation business for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including liabilities relating to certain renewable energy facilities which were previously owned by one of the PPL subsidiaries sold in the transaction but which were unrelated to the Long Island generation business. The indemnification provisions for most representations and warranties expired in the third quarter of 2011.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchasers of the Maine hydroelectric facilities for damages arising out of any breach of the representations, warranties and covenants under the respective transaction agreements and for damages arising out of certain other matters, including liabilities of the PPL Energy Supply subsidiary relating to the pre-closing ownership or operation of those hydroelectric facilities. The indemnification provisions for most representations and warranties expired in the fourth quarter of 2012.

Subsidiaries of PPL Energy Supply have agreed to provide indemnification to the purchasers of certain non-core generation facilities sold in March 2011 for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreements and for damages arising out of certain other matters relating to the facilities that were the subject of the transaction, including certain reduced capacity payments (if any) at one of the facilities in the event specified PJM rule changes are proposed and become effective. The indemnification provisions for most representations and warranties expired in the first quarter of 2012.

- (i) In December 2007, a subsidiary of PPL Energy Supply executed revised owners agreements for two jointly owned facilities, the Keystone and Conemaugh generating plants. The agreements require that in the event of any default by an owner, the other owners fund contributions for the operation of the generating plants, based upon their ownership percentages. The non-defaulting owners, who make up the defaulting owner's obligations, are entitled to the generation entitlement of the defaulting owner, based upon their ownership percentage. The exposure shown reflects the PPL Energy Supply subsidiary's share of the maximum obligation. The agreements do not have an expiration date.
- (j) A PPL Energy Supply subsidiary owned a one-third equity interest in Safe Harbor Water Power Corporation (Safe Harbor) that was sold in March 2011. Beginning in 2008, PPL Energy Supply guaranteed one-third of any amounts payable with respect to certain senior notes issued by Safe Harbor. Under the terms of the sale agreement, PPL Energy Supply continues to guarantee the portion of Safe Harbor's debt, but received a cross-indemnity from the purchaser, secured by a lien on the purchaser's stock of Safe Harbor, in the event PPL Energy Supply is required to make a payment under the guarantee. The exposure noted reflects principal only.
- (k) PPL Electric entered into contracts with a third party logistics firm that provides inventory procurement and fulfillment services. Under the contracts, the logistics firm has title to the inventory purchased for PPL Electric's use. Upon termination of the contracts, PPL Electric has guaranteed to purchase any remaining inventory that has not been used or sold by the logistics firm at the weighted-average cost at which the logistics firm purchased the inventory.
- (l) LKE provides certain indemnifications, the most significant of which relate to the termination of the WKE lease in July 2009. These guarantees cover the due and punctual payment, performance and discharge by each party of its respective present and future obligations. The most comprehensive of these guarantees is the LKE guarantee covering operational, regulatory and environmental commitments and indemnifications made by WKE under the WKE Transaction Termination Agreement. This guarantee has a term of 12 years ending July 2021, and a cumulative maximum exposure of \$200 million. Certain items such as government fines and penalties fall outside the cumulative cap. LKE has contested the applicability of the indemnification requirement relating to one matter presented by a counterparty under this guarantee. Another guarantee with a maximum exposure of \$100 million covering other indemnifications expires in 2023. In May 2012, LKE's indemnitee received an arbitration panel's decision affecting this matter, which granted LKE's indemnitee certain rights of first refusal to purchase excess power at a market-based price rather than at an absolute fixed price. In January 2013, LKE's indemnitee commenced a proceeding in the Kentucky Court of Appeals appealing the December 2012 order of the Henderson Circuit Court, confirming the arbitration award. A decision in the appellate matter may occur during late 2013 or early 2014. LKE believes its indemnification obligations in this matter remain subject to various uncertainties, including potential for additional legal challenges regarding the arbitration decision as well as future prices, availability and demand for the subject excess power. LKE continues to evaluate various legal and commercial options with respect to this indemnification matter. The ultimate outcomes of the WKE termination-related indemnifications cannot be predicted at this time. Additionally, LKE has indemnified various third parties related to historical obligations for other divested subsidiaries and affiliates. The indemnifications vary by entity and the maximum exposures range from being capped at the sale price to no specified maximum; however, LKE is not aware of formal claims under such indemnities made by any party at this time. LKE could be required to perform on these indemnifications in the event of covered losses or liabilities being claimed by an indemnified party. In the second quarter of 2012, LKE adjusted its estimated liability for certain of these indemnifications by \$9 million (\$5 million after-tax), which is reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statement of Income. The adjustment was recorded in the Kentucky Regulated segment for PPL. LKE cannot predict the ultimate outcomes of such indemnification circumstances, but does not currently expect such outcomes to result in significant losses above the amounts recorded.
- (m) Pursuant to the OVEC power purchase contract, expiring in June 2040, LG&E and KU are obligated to pay a demand charge which includes, among other charges, debt service and amortization toward principal retirement, decommissioning costs, post-retirement and post-employment benefits costs (other than pensions), and reimbursement of plant operating, maintenance and other expenses. The demand charge is expected to cover LG&E's and KU's shares of the cost of the listed items over the term of the contract. However, in the event there is a shortfall in covering these costs, LG&E and KU are obligated to pay their share of the excess debt service, post-retirement and decommissioning costs. The maximum exposure and the expiration date of these potential obligations are not presently determinable.

The Registrants provide other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of \$225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

PLR Contracts/Purchase of Accounts Receivable (*PPL Energy Supply and PPL Electric*)

PPL Electric holds competitive solicitations for PLR generation supply. PPL EnergyPlus has been awarded a portion of the PLR generation supply through these competitive solicitations. The sales and purchases between PPL EnergyPlus and PPL Electric are included in the Statements of Income as "Wholesale energy marketing to affiliate" by PPL Energy Supply and as "Energy purchases from affiliate" by PPL Electric.

Under the standard Default Service Supply Master Agreement for the solicitation process, PPL Electric requires all suppliers to post collateral once credit exposures exceed defined credit limits. PPL EnergyPlus is required to post collateral with PPL Electric: (a) when the market price of electricity to be delivered by PPL EnergyPlus exceeds the contract price for the forecasted quantity of electricity to be delivered; and (b) this market price exposure exceeds a contractual credit limit. Based on the current credit rating of PPL Energy Supply, as guarantor, PPL EnergyPlus' credit limit was \$35 million at September 30, 2013. In no instance is PPL Electric required to post collateral to suppliers under these supply contracts.

PPL Electric's customers may choose an alternative supplier for their generation supply. See Note 2 for additional information regarding PPL Electric's purchases of accounts receivable from alternative suppliers, including PPL EnergyPlus.

At September 30, 2013, PPL Energy Supply had a net credit exposure of \$25 million from PPL Electric from its commitment as a PLR supplier and from the sale of its accounts receivable to PPL Electric.

Allocations of PPL Services Costs (PPL Energy Supply, PPL Electric and LKE)

PPL Services provides corporate functions such as financial, legal, human resources and information technology services. PPL Services charges the respective PPL subsidiaries for the cost of such services when they can be specifically identified. The cost of the services that is not directly charged to PPL subsidiaries is allocated to applicable subsidiaries based on an average of the subsidiaries' relative invested capital, operation and maintenance expenses and number of employees. PPL Services charged the following amounts for the periods ended September 30, which PPL management believes are reasonable, including amounts applied to accounts that are further distributed between capital and expense:

	Three Months		Nine Months	
	2013	2012	2013	2012
PPL Energy Supply	\$ 52	\$ 49	\$ 161	\$ 159
PPL Electric	37	35	109	116
LKE	3	3	11	11

Intercompany Billings by LKS (LG&E and KU)

LKS provides LG&E and KU with a variety of centralized administrative, management and support services. The cost of these services is directly charged to the company or, for general costs that cannot be directly attributed, charged based on predetermined allocation factors, including the following measures: number of customers, total assets, revenues, number of employees and/or other statistical information. LKS charged the amounts in the table below for the periods ended September 30, which LKE management believes are reasonable, including amounts that are further distributed between capital and expense:

	Three Months		Nine Months	
	2013	2012	2013	2012
LG&E	\$ 53	\$ 51	\$ 159	\$ 132
KU	36	33	146	114

In addition, LG&E and KU provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E and LKE and KU are reimbursed through LKS.

Intercompany Borrowings (LKE)

LKE maintains a \$300 million revolving demand note with a PPL Energy Funding subsidiary whereby LKE can borrow funds on a short-term basis at market-based rates. The interest rates on borrowings are equal to one-month LIBOR plus a spread. At September 30, 2013 and December 31, 2012, \$52 million and \$25 million were outstanding and were reflected in "Notes payable with affiliates" on the Balance Sheet. The interest rate on the outstanding borrowing at September 30, 2013 was 1.68%. Interest on the demand note was not significant for the three and nine months ended September 30, 2013 and 2012. In October 2013, the capacity of the revolving demand note was reduced by \$75 million.

Intercompany Derivatives (Kentucky Registrants)

Periodically, LG&E and KU enter into forward-starting interest rate swaps with PPL. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties. See Note 14 for additional information on intercompany derivatives.

Intercompany Insurance (PPL Electric)

In May 2013, PPL Electric received \$18.25 million from the settlement of its 2012 storm insurance claims with PPL Power Insurance Ltd., a subsidiary of PPL that provides certain insurance coverage to PPL and its subsidiaries.

Effective January 1, 2013, PPL Electric no longer has storm insurance coverage with PPL Power Insurance Ltd. See Note 6 for discussion regarding the proposed Storm Damage Expense Rider filed with the PUC by PPL Electric.

Other (All Registrants except PPL)

See Note 7 for a discussion regarding capital transactions by PPL Energy Supply, PPL Electric, LKE, LG&E and KU. For PPL Energy Supply, PPL Electric, LG&E and KU, refer to Note 9 for discussions regarding intercompany allocations associated with defined benefits.

12. Other Income (Expense) - net

(All Registrants)

The breakdown of "Other Income (Expense) - net" for the periods ended September 30 was:

	Three Months		Nine Months	
	2013	2012	2013	2012
PPL				
Other Income				
Earnings on securities in NDT funds	\$ 4	\$ 5	\$ 14	\$ 17
Interest income	1	1	2	4
AFUDC - equity component	3	2	8	7
Earnings (losses) from equity method investments		(1)		(7)
Miscellaneous - Domestic		3	9	8
Miscellaneous - U.K.		(1)	1	1
Total Other Income	8	9	34	30
Other Expense				
Economic foreign currency exchange contracts (Note 14)	117	47	(6)	40
Charitable contributions	5	1	13	7
Miscellaneous - Domestic	2	4	7	12
Miscellaneous - U.K.		1	1	2
Total Other Expense	124	53	15	61
Other Income (Expense) - net	\$ (116)	\$ (44)	\$ 19	\$ (31)
PPL Energy Supply				
Other Income				
Earnings on securities in NDT funds	\$ 4	\$ 5	\$ 14	\$ 17
Interest income	1		3	1
Miscellaneous		2	7	5
Total Other Income	5	7	24	23
Other Expense				
Charitable contributions	1	1	3	2
Miscellaneous	2	1	3	5
Total Other Expense	3	2	6	7
Other Income (Expense) - net	\$ 2	\$ 5	\$ 18	\$ 16

"Other Income (Expense) - net" for the three and nine months ended September 30, 2013 and 2012 for PPL Electric is primarily the equity component of AFUDC. The components of "Other Income (Expense) - net" for the three and nine months ended September 30, 2013 for LKE, LG&E and KU are not significant. The components of "Other Income (Expense) - net" for the three months ended September 30, 2012 for LKE, LG&E and KU are not significant. "Other Income (Expense) - net" for the nine months ended September 30, 2012 for LKE and KU is primarily losses from an equity method investment. The components of "Other Income (Expense) - net" for the nine months ended September 30, 2012 for LG&E are not significant.

13. Fair Value Measurements and Credit Concentration

(All Registrants)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. During the three and nine months ended September 30, 2013 and 2012, there were no transfers between Level 1 and Level 2. See Note 1 in each Registrant's 2012 Form 10-K for information on the levels in the fair value hierarchy.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	September 30, 2013				December 31, 2012

The significant unobservable inputs used in and quantitative information about the fair value measurement of assets and liabilities classified as Level 3 are as follows:

	September 30, 2013			
	Fair Value, net Asset (Liability)	Valuation Technique	Unobservable Input(s)	Range (Weighted Average) (a)
PPL				
Energy commodities				
Retail natural gas sales contracts (b)	\$ 35	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	13% - 100% (80%)
Heat rate call options (d)	9	Discounted cash flow	Implied correlation, implied volatility, and market implied heat rate	33% - 60% (58%)
FTR purchase contracts (g)	3	Discounted cash flow	Historical settled prices used to model forward prices	100% (100%)
Auction rate securities (e)	19	Discounted cash flow	Modeled from SIFMA Index	12% - 80% (64%)
PPL Energy Supply				
Energy commodities				
Retail natural gas sales contracts (b)	\$ 35	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	13% - 100% (80%)
Heat rate call options (d)	9	Discounted cash flow	Implied correlation, implied volatility, and market implied heat rate	33% - 60% (58%)
FTR purchase contracts (g)	3	Discounted cash flow	Historical settled prices used to model forward prices	100% (100%)
Auction rate securities (e)	16	Discounted cash flow	Modeled from SIFMA Index	12% - 80% (63%)

December 31, 2012

	Fair Value, net Asset (Liability)	Valuation Technique	Unobservable Input(s)	Range (Weighted Average) (a)
PPL				
Energy commodities				
Retail natural gas sales contracts (b)	\$ 24	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	21% - 100% (75%)
Power sales contracts (c)	(4)	Discounted cash flow	Proprietary model used to calculate forward basis prices	24% (24%)
FTR purchase contracts (g)	2	Discounted cash flow	Historical settled prices used to model forward prices	100% (100%)
Auction rate securities (e)	16	Discounted cash flow	Modeled from SIFMA Index	54% - 74% (64%)
Cross-currency swaps (f)	1	Discounted cash flow	Credit valuation adjustment	22% (22%)

PPL Energy Supply

Energy commodities

Retail natural gas sales contracts (b)	\$ 24	Discounted cash flow	Observable wholesale prices used as proxy for retail delivery points	21% - 100% (75%)
Power sales contracts (c)	(4)	Discounted cash flow	Proprietary model used to calculate forward basis prices	24% (24%)
FTR purchase contracts (g)	2	Discounted cash flow	Historical settled prices used to model forward prices	100% (100%)
Auction rate securities (e)	13	Discounted cash flow	Modeled from SIFMA Index	57% - 74% (65%)

- (a) For energy commodities and auction rate securities, the range and weighted average represent the percentage of fair value derived from the unobservable inputs. For cross-currency swaps, the range and weighted average represent the percentage decrease in fair value due to the unobservable inputs used in the model to calculate the credit valuation adjustment.
- (b) At September 30, 2013, retail natural gas sales contracts extend through 2019, and \$14 million of the fair value is scheduled to deliver within the next 12 months. As the forward price of natural gas increases/(decreases), the fair value of the contracts (decreases)/increases.
- (c) As the forward price of basis increases/(decreases), the fair value of the contracts (decreases)/increases.
- (d) At September 30, 2013, heat rate call options extend through 2020, and \$1 million of the fair value is scheduled to deliver within the next 12 months. As the implied correlation in heat rate call options increases/(decreases), the fair value of the heat rate call options (decreases)/increases, as all implied volatilities in heat rate call options increase/(decrease), the fair value of the heat rate call options increases/(decreases), and as the market implied heat rate increases/(decreases), the fair value of the heat rate call options increases/(decreases).
- (e) At September 30, 2013, auction rate securities have a weighted average contractual maturity of 22 years. The model used to calculate fair value incorporates an assumption that the auctions will continue to fail. As the modeled forward rates of the SIFMA Index increase/(decrease), the fair value of the securities increases/(decreases).
- (f) The credit valuation adjustment incorporates projected probabilities of default and estimated recovery rates. As the credit valuation adjustment increases/(decreases), the fair value of the swaps (decreases)/increases.
- (g) At September 30, 2013, FTR purchase contracts extend through 2015, and \$1 million of the fair value is scheduled to deliver within the next 12 months. As the forward implied spread increases/(decreases), the fair value of the contracts increases/(decreases).

Net gains and losses on assets and liabilities classified as Level 3 and included in earnings for the periods ended September 30 are reported in the Statements of Income as follows:

	Three Months									
	Energy Commodities, net									
	Unregulated Retail Electric and Gas		Wholesale Energy Marketing		Net Energy Trading Margins		Fuel		Energy Purchases	
	2013	2012	2013	2012	2013	2012	2013	2012	2013	2012
PPL and PPL Energy Supply

PPL Energy Supply												
Total gains (losses) included in earnings	\$ 18	\$ 16	\$ (15)	\$ (7)	\$ 8	\$ (9)	\$ 3		\$ 9	\$ (1)		
Change in unrealized gains (losses) relating to positions still held at the reporting date	18	29	(1)		8	2			5	1		

Price Risk Management Assets/Liabilities - Energy Commodities (PPL and PPL Energy Supply)

Energy commodity contracts for electricity, gas, oil and/or emission allowances are generally valued using the income approach, except for exchange-traded derivative gas and oil contracts, which are valued using the market approach and are classified as Level 1. When the lowest level inputs that are significant to the fair value measurement of a contract are observable, the contract is classified as Level 2. Level 2 contracts are valued using inputs which may include quotes obtained from an exchange (where there is insufficient market liquidity to warrant inclusion in Level 1), binding and non-binding broker quotes, prices posted by ISOs or published tariff rates. Furthermore, independent quotes are obtained from the market to validate the forward price curves. Energy commodity contracts include forwards, futures, swaps, options and structured transactions and may be offset with similar positions in exchange-traded markets. To the extent possible, fair value measurements utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these contracts may be valued using models, including standard option valuation models and standard industry models. For example, the fair value of a full-requirement sales contract that delivers power to an illiquid delivery point may be measured by valuing the nearest liquid trading point plus the value of the basis between the two points. The basis input may be from market quotes or historical prices.

When unobservable inputs are significant to the fair value measurement, a contract is classified as Level 3. Level 3 contracts are valued using PPL proprietary models which include significant unobservable inputs such as delivery at a location where pricing is unobservable, assumptions for customer migration, delivery dates that are beyond the dates for which independent quotes are available, implied volatilities, implied correlations, and market implied heat rates. Forward transactions, including forward transactions classified as Level 3, are analyzed by PPL's Risk Management department, which reports to the Chief Financial Officer (CFO). Accounting personnel, who also report to the CFO, interpret the analysis quarterly to appropriately classify the forward transactions in the fair value hierarchy. Valuation techniques are evaluated periodically. Additionally, Level 2 and Level 3 fair value measurements include adjustments for credit risk based on PPL's own creditworthiness (for net liabilities) and its counterparties' creditworthiness (for net assets). PPL's credit department assesses all reasonably available market information which is used by accounting personnel to calculate the credit valuation adjustment.

In certain instances, energy commodity contracts are transferred between Level 2 and Level 3. The primary reasons for the transfers during 2013 and 2012 were changes in the availability of market information and changes in the significance of the unobservable inputs utilized in the valuation of the contract. As the delivery period of a contract becomes closer, market information may become available. When this occurs, the model's unobservable inputs are replaced with observable market information.

Price Risk Management Assets/Liabilities - Interest Rate Swaps/Foreign Currency Contracts/Cross-Currency Swaps (PPL and Kentucky Registrants)

To manage interest rate risk, PPL, LKE, LG&E and KU use interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. To manage foreign currency exchange risk, PPL uses foreign currency contracts such as forwards, options and cross-currency swaps that contain characteristics of both interest rate and foreign currency contracts. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates) and forward foreign currency exchange rates (e.g.,

GBP), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3. For PPL, the primary reason for the transfers during 2013 and 2012 was the change in the significance of the credit valuation adjustment. Cross-currency swaps classified as Level 3 are valued by PPL's Treasury department, which reports to the CFO. Accounting personnel, who also report to the CFO, interpret analysis quarterly to classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

(PPL and PPL Energy Supply)

NDT Funds

The market approach is used to measure the fair value of equity securities held in the NDT funds.

- The fair value measurements of equity securities classified as Level 1 are based on quoted prices in active markets and are comprised of securities that are representative of the Wilshire 5000 Total Market Index.
- Investments in commingled equity funds are classified as Level 2 and represent securities that track the S&P 500 Index, Dow Jones U.S. Total Stock Market Index and the Dow Jones U.S. Completion Total Stock Market Index. These fair value measurements are based on firm quotes of net asset values per share, which are not obtained from a quoted price in an active market.

Debt securities are generally measured using a market approach, including the use of matrix pricing. Common inputs include reported trades, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as benchmark yields, credit valuation adjustments, reference data from market research publications, monthly payment data, collateral performance and new issue data.

The debt securities held in the NDT funds at September 30, 2013 have a weighted-average coupon of 3.94% and a weighted-average maturity of 7.8 years.

Auction Rate Securities

Auction rate securities include Federal Family Education Loan Program guaranteed student loan revenue bonds, as well as various municipal bond issues. The probability of realizing losses on these securities is not significant.

The fair value of auction rate securities is estimated using an income approach that includes readily observable inputs, such as principal payments and discount curves for bonds with credit ratings and maturities similar to the securities, and unobservable inputs, such as future interest rates that are estimated based on the SIFMA Index, creditworthiness, and liquidity assumptions driven by the impact of auction failures. When the present value of future interest payments is significant to the overall valuation, the auction rate securities are classified as Level 3. The primary reason for the transfers in and out of Level 3 in 2013 and 2012 was the change in discount rates and SIFMA Index.

Auction rate securities are valued by PPL's Treasury department, which reports to the CFO. Accounting personnel, who also report to the CFO, interpret the analysis quarterly to classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

Financial Instruments Not Recorded at Fair Value *(All Registrants)*

The carrying amounts of contract adjustment payments related to the Purchase Contract component of the Equity Units and long-term debt on the Balance Sheets and their estimated fair values are set forth below. The fair values of these instruments were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates, which incorporate the credit risk of the Registrants. These instruments are classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	September 30, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
PPL				
Contract adjustment payments (a)	\$ 32	\$ 32	\$ 105	\$ 106
Long-term debt	19,843	21,537	19,476	21,671
PPL Energy Supply				
Long-term debt	2,962	3,127	3,272	3,556
PPL Electric				
Long-term debt	2,315	2,505	1,967	2,333
LKE				
Long-term debt	4,076	4,222	4,075	4,423
LG&E				
Long-term debt	1,112	1,137	1,112	1,178
KU				
Long-term debt	1,843	1,940	1,842	2,056

(a) Reflected in "Other current liabilities" and "Other deferred credits and noncurrent liabilities" on the Balance Sheets.

The carrying value of short-term debt (including notes between affiliates), when outstanding, approximates fair value due to the variable interest rates associated with the short-term debt and is classified as Level 2.

Credit Concentration Associated with Financial Instruments

(All Registrants)

Contracts are entered into with many entities for the purchase and sale of energy. Many of these contracts qualify for NPNS and, as such, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 14 for information on credit policies used to manage credit risk, including master netting arrangements and collateral requirements.

(PPL)

At September 30, 2013, PPL had credit exposure of \$1.1 billion from energy trading partners, excluding the effects of netting arrangements, reserves and collateral. As a result of netting arrangements, reserves and collateral, PPL's credit exposure was reduced to \$541 million. The top ten counterparties including their affiliates accounted for \$292 million, or 54%, of this exposure. Nine of these counterparties had an investment grade credit rating from S&P or Moody's and accounted for 95% of the top ten exposure. The remaining counterparty has not been rated by S&P or Moody's, but is current on its obligations.

(PPL Energy Supply)

At September 30, 2013, PPL Energy Supply had credit exposure of \$1.1 billion from energy trading partners, excluding exposure from related parties and the effects of netting arrangements, reserves and collateral. As a result of netting arrangements, reserves and collateral, this credit exposure was reduced to \$540 million. The top ten counterparties including their affiliates accounted for \$292 million, or 54%, of this exposure. Nine of these counterparties had an investment grade credit rating from S&P or Moody's and accounted for 95% of the top ten exposure. The remaining counterparty has not been rated by S&P or Moody's, but is current on its obligations. See Note 11 for information regarding the related party credit exposure.

(PPL Electric)

PPL Electric is exposed to credit risk under energy supply contracts (including its supply contracts with PPL EnergyPlus); however, its PUC-approved cost recovery mechanism is anticipated to substantially eliminate this exposure.

(Kentucky Registrants)

At September 30, 2013, LKE's, LG&E's and KU's credit exposure was not significant.

14. Derivative Instruments and Hedging Activities

Risk Management Objectives

(All Registrants)

PPL has a risk management policy approved by the Board of Directors to manage market risk (including price, liquidity and volumetric risk) and credit risk (including non-performance risk and payment default risk). The RMC, comprised of senior management and chaired by the Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, verification of risk and transaction limits, VaR analyses, portfolio stress tests, gross margin at risk analyses, sensitivity analyses, and daily portfolio reporting, including open positions, determinations of fair value, and other risk management metrics.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as liquidity and volumetric risks. Forward contracts, futures contracts, options, swaps and structured transactions, such as tolling agreements, are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices, volumes of full-requirement sales contracts, basis exposure, interest rates and/or foreign currency exchange rates. Many of the contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless they qualify for NPNS.

The table below summarizes the market risks that affect PPL and its Subsidiary Registrants.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Commodity price risk (including basis and volumetric risk)	X	X	M	M	M	M
Interest rate risk:						
Debt issuances	X	X	M	M	M	M
Defined benefit plans	X	X	M	M	M	M
NDT securities	X	X				
Equity securities price risk:						
Defined benefit plans	X	X	M	M	M	M
NDT securities	X	X				
Future stock transactions	X					
Foreign currency risk - WPD investment and earnings	X					

X = PPL and PPL Energy Supply actively mitigate market risks through their risk management programs described above.

M = The regulatory environments for PPL's regulated entities, by definition, significantly mitigate market risk.

Commodity price and volumetric risks

- PPL is exposed to market and commodity price, basis and volumetric risk through its domestic subsidiaries as described below. Volumetric risk is significantly mitigated at WPD as a result of the method of regulation in the U.K.
- PPL Energy Supply is exposed to commodity price, basis and volumetric risks for energy and energy-related products associated with the sale of electricity from its generating assets and other electricity and gas marketing activities and the purchase of fuel and fuel-related commodities for generating assets, as well as for proprietary trading activities.
- PPL Electric is exposed to commodity price and volumetric risks from its obligation as PLR; however, its PUC-approved cost recovery mechanism substantially eliminates its exposure to these risks. PPL Electric also mitigates its exposure to volumetric risk by entering into full-requirement supply agreements to serve its PLR customers. These supply agreements transfer the volumetric risk associated with the PLR obligation to the energy suppliers.
- LG&E's and KU's rates include certain mechanisms for fuel, gas supply and environmental expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses.

Interest rate risk

- PPL and its subsidiaries are exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. WPD holds over-the-counter cross currency swaps to limit exposure to market fluctuations on interest and principal payments from changes in foreign currency exchange rates and interest rates. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt and LG&E and KU utilize forward starting interest rate swaps to hedge changes in benchmark interest rates.
- PPL and its subsidiaries are exposed to interest rate risk associated with debt securities held by defined benefit plans. This risk is significantly mitigated to the extent that the plans are sponsored at, or sponsored on behalf of, the regulated domestic utilities and for certain plans at WPD due to the recovery mechanisms in place. Additionally, PPL Energy Supply is exposed to interest rate risk associated with debt securities held by the NDT.

Equity securities price risk

- PPL and its subsidiaries are exposed to equity securities price risk associated with defined benefit plans. This risk is significantly mitigated at the regulated domestic utilities and for certain plans at WPD due to the recovery mechanisms in place. Additionally, PPL Energy Supply is exposed to equity securities price risk in the NDT funds.
- PPL is exposed to equity securities price risk from future stock sales and/or purchases.

Foreign currency risk

- PPL is exposed to foreign currency exchange risk primarily associated with its investments in U.K. affiliates.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

PPL is exposed to credit risk from "in-the-money" interest rate and foreign currency derivatives with financial institutions, as well as additional credit risk through certain of its subsidiaries, as discussed below.

PPL Energy Supply is exposed to credit risk from "in-the-money" commodity derivatives with its energy trading partners, which include other energy companies, fuel suppliers and financial institutions.

LKE, LG&E and KU are exposed to credit risk from interest rate derivatives with PPL. LKE and LG&E are also exposed to credit risk from interest rate derivatives with third-party financial institutions.

The majority of PPL and PPL Energy Supply's credit risk stems from commodity derivatives for multi-year contracts for energy sales and purchases. If PPL Energy Supply's counterparties fail to perform their obligations under such contracts and PPL Energy Supply could not replace the sales or purchases at the same or better prices as those under the defaulted contracts, PPL Energy Supply would incur financial losses. Those losses would be recognized immediately or through lower revenues or higher costs in future years, depending on the accounting treatment for the defaulted contracts. In the event a supplier of LKE (through its subsidiaries LG&E and KU) or PPL Electric defaults on its obligation, those entities would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by these entities would be recoverable from customers in future rates, thus mitigating the financial risk for these entities.

PPL and its subsidiaries have credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit. See Note 13 for credit concentration associated with energy trading partners.

Master Netting Arrangements

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL's and PPL Energy Supply's obligation to return counterparty cash collateral under master netting arrangements was \$14 million and \$112 million at September 30, 2013 and December 31, 2012.

PPL Electric, LKE and LG&E had no obligation to return cash collateral under master netting arrangements at September 30, 2013 and December 31, 2012.

PPL, LKE and LG&E had posted cash collateral under master netting arrangements of \$22 million and \$32 million at September 30, 2013 and December 31, 2012.

PPL Energy Supply, PPL Electric and KU had not posted any cash collateral under master netting arrangements at September 30, 2013 and December 31, 2012.

(PPL and PPL Energy Supply)

Commodity Price Risk (Non-trading)

Commodity price risk, including basis and volumetric risk, is among PPL's and PPL Energy Supply's most significant risks due to the level of investment that PPL and PPL Energy Supply maintain in their competitive generation assets, as well as the extent of their marketing activities. Several factors influence price levels and volatilities. These factors include, but are not limited to, seasonal changes in demand, weather conditions, available generating assets within regions, transportation/transmission availability and reliability within and between regions, market liquidity, and the nature and extent of current and potential federal and state regulations.

PPL Energy Supply maximizes the value of its wholesale and retail energy portfolios through the use of non-trading strategies that include sales of competitive baseload generation, optimization of competitive intermediate and peaking generation and marketing activities.

PPL Energy Supply has a formal hedging program to economically hedge the forecasted purchase and sale of electricity and related fuels for its competitive baseload generation fleet, which includes 7,298 MW (summer rating) of nuclear, coal and hydroelectric generating capacity. PPL Energy Supply attempts to optimize the overall value of its competitive intermediate and peaking fleet, which includes 3,316 MW (summer rating) of natural gas and oil-fired generation. PPL Energy Supply's marketing portfolio is comprised of full-requirement sales contracts and related supply contracts, retail natural gas and electricity sales contracts and other marketing activities. The strategies that PPL Energy Supply uses to hedge its full-requirement sales contracts include purchasing energy (at a liquid trading hub or directly at the load delivery zone), capacity and RECs in the market and/or supplying the energy, capacity and RECs from its generation assets.

PPL and PPL Energy Supply enter into financial and physical derivative contracts, including forwards, futures, swaps and options, to hedge the price risk associated with electricity, natural gas, oil and other commodities. Certain contracts qualify for NPNS or are non-derivatives and are therefore not reflected in the financial statements until delivery. PPL and PPL Energy Supply segregate their non-trading activities into two categories: cash flow hedges and economic activity, as discussed below.

Cash Flow Hedges

Certain derivative contracts have qualified for hedge accounting so that the effective portion of a derivative's gain or loss is deferred in AOCI and reclassified into earnings when the forecasted transaction occurs. Certain cash flow hedge positions were dedesignated during the nine months ended September 30, 2013 and 2012 and the unamortized portion remained in AOCI because the original forecasted transaction is still expected to occur. There were no active cash flow hedges at September 30, 2013. At September 30, 2013, the accumulated net unrecognized after-tax gains (losses) that are expected to be reclassified into earnings during the next 12 months were \$47 million for PPL and PPL Energy Supply. Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedge transaction is probable of not occurring. For the three and nine months ended September 30, 2013 and 2012, such reclassifications were insignificant.

For the three and nine months ended September 30, 2013 and 2012, hedge ineffectiveness associated with energy derivatives was insignificant.

Economic Activity

Many derivative contracts economically hedge the commodity price risk associated with electricity, natural gas, oil and other commodities but do not receive hedge accounting treatment because they were not eligible for hedge accounting or because hedge accounting was not elected. These derivatives hedge a portion of the economic value of PPL Energy Supply's competitive generation assets and unregulated full-requirement and retail contracts, which are subject to changes in fair value due to market price volatility and volume expectations. Additionally, economic activity would also include the ineffective portion of qualifying cash flow hedges (see "Cash Flow Hedges" above). The derivative contracts in this category that existed at September 30, 2013 range in maturity through 2019.

Examples of economic activity may include hedges on sales of baseload generation, certain purchase contracts used to supply full-requirement sales contracts, FTRs or basis swaps used to hedge basis risk associated with the sale of competitive generation or supplying full-requirement sales contracts, Spark Spread hedging contracts, retail electric and natural gas activities, and fuel oil swaps used to hedge price escalation clauses in coal transportation and other fuel-related contracts. PPL Energy Supply also uses options, which include the sale of call options and the purchase of put options tied to a particular generating unit. Since the physical generating capacity is owned, price exposure is generally capped at the price at which the generating unit would be dispatched and therefore does not expose PPL Energy Supply to uncovered market price risk.

Commodity Price Risk (Trading)

PPL Energy Supply has a proprietary trading strategy which is utilized to take advantage of market opportunities. As a result, PPL Energy Supply may at times create a net open position in its portfolio that could result in losses if prices do not move in the manner or direction anticipated. The proprietary trading portfolio shown in "Net energy trading margins" on the Statements of Income is not a significant part of PPL Energy Supply's business.

Commodity Volumes

At September 30, 2013, the net volumes of derivative (sales)/purchase contracts used in support of the various strategies discussed above were as follows.

Commodity	Unit of Measure	Volume (a)			
		2013 (b)	2014	2015	Thereafter
Power	MWh	(9,950,950)	(28,280,182)	(4,110,530)	10,991,752
Capacity	MW-Month	(5,114)	(14,418)	(309)	1,990
Gas	MMBtu	12,653,279	18,794,545	(3,852,725)	5,320,453
Coal	Tons		(30,000)		
FTRs	MW-Month	5,056	8,724	1,465	
Oil	Barrels	(15,335)	300,000	384,334	371,466

(a) Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.

(b) Represents balance of the current year.

Interest Rate Risk

(PPL and Kentucky Registrants)

PPL and its subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. Various financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in their debt portfolio, adjust the duration of the debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under PPL's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges

(PPL)

Interest rate risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financings. Financial interest rate swap contracts that qualify as cash flow hedges may be entered into to hedge floating interest rate risk associated with both existing and anticipated debt issuances. At September 30, 2013, outstanding interest rate swap contracts range in maturity through 2024 for WPD and through 2044 for PPL's domestic interest rate swaps. These swaps had an aggregate notional value of \$2.3 billion at September 30, 2013 of which £300 million

(approximately \$464 million based on spot rates) was related to WPD. Also included in this total are forward-starting interest rate swaps entered into by PPL on behalf of LG&E and KU. Realized gains and losses from these swaps are probable of recovery through regulated rates; as such, the fair value of these derivatives have been reclassified from AOCI to regulatory assets or liabilities. The gains and losses will be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt when the hedged transaction occurs.

At September 30, 2013, PPL held a notional position in cross-currency interest rate swaps totaling \$1.3 billion that range in maturity through 2028 to hedge the interest payments and principal of WPD's U.S. dollar-denominated senior notes.

For the three and nine months ended September 30, 2013 and 2012, hedge ineffectiveness associated with interest rate derivatives was insignificant.

Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time period and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedged transaction is probable of not occurring. PPL had no such reclassifications for the three and nine months ended September 30, 2013 and 2012.

At September 30, 2013, the accumulated net unrecognized after-tax gains (losses) on qualifying derivatives that are expected to be reclassified into earnings during the next 12 months were \$(11) million. Amounts are reclassified as the hedged interest payments are made.

(Kentucky Registrants)

In November 2012 and April 2013, LG&E and KU entered into forward-starting interest rate swaps with PPL that hedge the interest payments on new debt that is expected to be issued in 2013. In September 2013, these hedges were terminated and LG&E and KU entered into new forward-starting interest rate swaps with PPL, effectively extending the start date of the prior hedges from September 2013 to December 2013. Both the terminated swaps and the swaps entered into in September have terms identical to forward-starting swaps entered into by PPL with third parties. A cash settlement of \$98 million (LG&E and KU each received \$49 million) was received on the terminated swaps, which is included in "Cash Flows from Operating Activities" on the Statements of Cash Flows. Realized gains and losses on all of these swaps are probable of recovery through regulated rates; as such, the September settlements and the fair value of the new derivatives were reclassified from AOCI to regulatory assets or liabilities and are expected to be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt when the hedged transaction occurs. For the three and nine months ended September 30, 2013, there was no hedge ineffectiveness recorded for the interest rate derivatives. At September 30, 2013, the total notional amount outstanding was \$500 million (LG&E and KU each held contracts of \$250 million) that matures in 2043.

Economic Activity *(PPL, LKE and LG&E)*

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income when the hedged transaction occurs. At September 30, 2013, LG&E held contracts with a notional amount of \$179 million that range in maturity through 2033.

Foreign Currency Risk *(PPL)*

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

Net Investment Hedges

PPL enters into foreign currency contracts on behalf of a subsidiary to protect the value of a portion of its net investment in WPD. The contracts outstanding at September 30, 2013 had a notional amount of £320 million (approximately \$505 million based on contracted rates). The settlement dates of these contracts range from November 2013 through June 2015.

Additionally, a PPL Global subsidiary that has a U.S. dollar functional currency entered into GBP intercompany loans payable with PPL WEM subsidiaries that have GBP functional currency. The loans qualify as a net investment hedge for the PPL Global subsidiary. As such, the foreign currency gains and losses on the intercompany loans for the PPL Global subsidiary are recorded to the foreign currency translation adjustment component of OCI. At September 30, 2013, the outstanding balances of the intercompany loans were £77 million (approximately \$119 million based on spot rates). For the three and nine months ended September 30, 2013, PPL recognized net investment hedge gains (losses) on the intercompany loans of \$(9) million and \$(3) million in the foreign currency translation adjustment component of OCI. Such amounts for the three and nine months ended September 30, 2012 were not significant.

At September 30, 2013, PPL had \$5 million of accumulated net investment hedge gains (losses), after-tax, in the foreign currency translation adjustment component of AOCI, compared to \$14 million of gains (losses), after-tax at December 31, 2012.

Economic Activity

PPL enters into foreign currency contracts on behalf of a subsidiary to economically hedge GBP-denominated anticipated earnings. At September 30, 2013, the total exposure hedged by PPL was approximately £1.3 billion (approximately \$2.1 billion based on contracted rates). These contracts had termination dates ranging from October 2013 through October 2015.

Accounting and Reporting

(All Registrants)

All derivative instruments are recorded at fair value on the Balance Sheet as an asset or liability unless they qualify for NPNS. NPNS contracts for PPL and PPL Energy Supply include certain full-requirement sales contracts, other physical purchase and sales contracts and certain retail energy and physical capacity contracts, and for PPL Electric include certain full-requirement purchase contracts and other physical purchase contracts. Changes in the fair value of derivatives not designated as NPNS are recognized currently in earnings unless specific hedge accounting criteria are met and designated as such, except for the change in fair value of LG&E's and KU's interest rate swaps that are recognized as regulatory assets or regulatory liabilities. See Note 6 for amounts recorded in regulatory assets and regulatory liabilities at September 30, 2013 and December 31, 2012.

See Notes 1 and 19 in each Registrant's 2012 Form 10-K for additional information on accounting policies related to derivative instruments.

(PPL)

The following table presents the fair value and location of derivative instruments recorded on the Balance Sheets.

	September 30, 2013				December 31, 2012

Interest rate swaps	Regulatory assets - noncurrent (a)	\$ 1	\$ (2)

(a) Includes both realized and unrealized gains (losses).

(All Registrants except PPL Electric)

Offsetting Derivative Instruments

PPL, PPL Energy Supply, LKE, LG&E and KU or certain of their subsidiaries have master netting arrangements or similar agreements in place including derivative clearing agreements with futures commission merchants (FCMs) to permit the trading of cleared derivative products on one or more futures exchanges. The clearing arrangements permit an FCM to use and apply any property in its possession as a set off to pay amounts or discharge obligations owed by a customer upon default of the customer and typically do not place any restrictions on the FCM's use of collateral posted by the customer. PPL, PPL Energy Supply, LKE, LG&E and KU and their subsidiaries also enter into agreements pursuant to which they trade certain

energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to setoff amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

PPL, PPL Energy Supply, LKE, LG&E and KU have elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The table below summarizes the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of PPL, PPL Energy Supply, LKE, LG&E and KU or certain of their subsidiaries. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each decrease in the credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade (i.e., below BBB- for S&P or Fitch, or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding the performance of PPL's obligation under the

contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

At September 30, 2013, the effect of a decrease in credit ratings below investment grade on derivative contracts that contain credit risk-related contingent features and were in a net liability position is summarized as follows:

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>LKE</u>	<u>LG&E</u>
Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent features	\$ 178	\$ 115	\$ 29	\$ 29
Aggregate fair value of collateral posted on these derivative instruments	39	17	22	22
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)	167	127	7	7

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

15. Goodwill

(PPL)

The change in the carrying amount of goodwill for the nine months ended September 30, 2013 was due to the effect of foreign currency exchange rates on the U.K. Regulated segment.

16. Asset Retirement Obligations

(All Registrants except PPL Electric)

The changes in the carrying amounts of AROs were as follows.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Balance at December 31, 2012	\$ 552	\$ 375	\$ 131	\$ 62	\$ 69
Accretion expense	27	22	4	2	2
Obligations incurred	6	6			
Changes in estimated cash flow or settlement date	123	1	122	17	105
Effect of foreign currency exchange rates	(2)				
Obligations settled	(12)	(6)	(6)	(6)	
Balance at September 30, 2013	<u>\$ 694</u>	<u>\$ 398</u>	<u>\$ 251</u>	<u>\$ 75</u>	<u>\$ 176</u>

Substantially all of the ARO balances are classified as noncurrent at September 30, 2013 and December 31, 2012.

(PPL and PPL Energy Supply)

The most significant ARO recorded by PPL and PPL Energy Supply relates to the decommissioning of the Susquehanna nuclear plant. The accrued nuclear decommissioning obligation was \$335 million and \$316 million at September 30, 2013 and December 31, 2012.

Assets in the NDT funds are legally restricted for purposes of settling PPL's and PPL Energy Supply's ARO related to the decommissioning of the PPL Susquehanna nuclear plant. The aggregate fair value of these assets was \$804 million and \$712 million at September 30, 2013 and December 31, 2012, and is included in "Nuclear plant decommissioning trust funds" on the Balance Sheets. See Notes 13 and 17 for additional information on these assets.

(PPL and Kentucky Registrants)

Accretion and depreciation expense recorded by LG&E and KU is reversed on the income statement and recorded as a regulatory asset, such that there is no net earnings impact. AROs were revalued primarily due to updates in the estimated cash flows for ash ponds and CCR surface impoundments based on updated cost estimates.

17. Available-for-Sale Securities

(PPL and PPL Energy Supply)

Securities held by the NDT funds and auction rate securities are classified as available-for-sale. Available-for-sale securities are carried on the Balance Sheets at fair value. Unrealized gains and losses on these securities are reported, net of tax, in OCI or are recognized currently in earnings when a decline in fair value is determined to be other-than-temporary. The specific identification method is used to calculate realized gains and losses.

The following table shows the amortized cost, the gross unrealized gains and losses recorded in AOCI, and the fair value of available-for-sale securities.

	September 30, 2013				December 31, 2012			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total	\$ 505	\$ 318	\$ 3	\$ 820	\$ 491	\$ 239	\$ 2	\$ 728

There were no securities with credit losses at September 30, 2013 and December 31, 2012.

The following table shows the scheduled maturity dates of debt securities held at September 30, 2013.

	Maturity Less Than 1 Year	Maturity 1-5 Years	Maturity 6-10 Years	Maturity in Excess of 10 Years	Total
PPL					
Amortized cost	\$ 6	\$ 92	\$ 56	\$ 77	\$ 231
Fair value	6	96	58	79	239
PPL Energy Supply					
Amortized cost	\$ 6	\$ 92	\$ 56	\$ 74	\$ 228
Fair value	6	96	58	76	236

The following table shows proceeds from and realized gains and losses on sales of available-for-sale securities for the periods ended September 30.

	Three Months		Nine Months	
	2013	2012	2013	2012
PPL				
Proceeds from sales of NDT securities (a)	\$ 33	\$ 23	\$ 92	\$ 102
Other proceeds from sales				5
Gross realized gains (b)	3	2	10	15
Gross realized losses (b)	2	2	6	8
PPL Energy Supply				
Proceeds from sales of NDT securities (a)	\$ 33	\$ 23	\$ 92	\$ 102
Other proceeds from sales				3
Gross realized gains (b)	3	2	10	15
Gross realized losses (b)	2	2	6	8

- (a) These proceeds are used to pay income taxes and fees related to managing the trust. Remaining proceeds are reinvested in the trust.
(b) Excludes the impact of other-than-temporary impairment charges recognized on the Statements of Income.

18. Accumulated Other Comprehensive Income (Loss)

(PPL and PPL Energy Supply)

The after-tax changes in AOCI by component for the three and nine months ended September 30, 2013 were as follows.

	Foreign currency translation adjustments	Unrealized gains (losses)		Equity investees' AOCI	Defined benefit plans			Total
		Available- for-sale securities	Qualifying derivatives		Prior service costs	Actuarial gain (loss)	Transition asset (obligation)

September 30, 2013		\$ 150	\$ 115		\$ (7)	\$ (254)		\$ 4

The following table presents the gains (losses) and related income taxes for reclassifications from AOCI for the periods ended September 30, 2013. The defined benefit plan components of AOCI are not reflected in their entirety in the statement of income during the periods; rather, they are included in the computation of net periodic defined benefit costs (credits). See Note 9 for additional information.

(LKE and KU)

For the three and nine months ended September 30, 2013, the changes in AOCI and the effect of reclassifications from AOCI on the statement of income for LKE and KU were insignificant.

19. New Accounting Guidance Pending Adoption

(All Registrants)

Accounting for Obligations Resulting from Joint and Several Liability Arrangements

Effective January 1, 2014, the Registrants will retrospectively adopt accounting guidance for the recognition, measurement and disclosure of certain obligations resulting from joint and several liability arrangements when the amount of the obligation is fixed at the reporting date. If the obligation is determined to be in the scope of this guidance, it will be measured as the sum of the amount the reporting entity agreed to pay on the basis of its arrangements among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. This guidance also requires additional disclosures for these obligations.

The Registrants are assessing the potential impact of adoption, which is not expected to be material.

Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity

Effective January 1, 2014, PPL will prospectively adopt accounting guidance that requires a cumulative translation adjustment to be released into earnings when an entity ceases to have a controlling financial interest in a subsidiary or group of assets within a consolidated foreign entity and the sale or transfer results in the complete or substantially complete liquidation of the foreign entity. For the step acquisition of previously held equity method investments that are foreign entities, this guidance clarifies that the amount of accumulated other comprehensive income that is reclassified and included in the calculation of a gain or loss shall include any foreign currency translation adjustment related to that previously held investment.

The initial adoption of this guidance is not expected to have a significant impact on PPL; however, the impact in future periods could be material.

Presentation of Unrecognized Tax Benefits When Net Operating Loss Carryforwards, Similar Tax Losses, or Tax Credit Carryforwards Exist

Effective January 1, 2014, the Registrants will prospectively adopt accounting guidance that requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets.

The adoption of this guidance is not expected to have a significant impact on the Registrants.

Item 2. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations

(All Registrants)

This combined Item 2. "Management's Discussion and Analysis of Financial Condition and Results of Operations" is separately filed by PPL Corporation and its Subsidiary Registrants: PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf, and no Registrant makes any representation as to information relating to any other Registrant. The specific Registrant to which disclosures are applicable is identified in parenthetical headings in italics above the applicable disclosure or within the applicable disclosure for each Registrant's related activities and disclosures. Within combined disclosures, amounts are disclosed for any Registrant when significant.

The following should be read in conjunction with the Registrants' Condensed Financial Statements and the accompanying Notes and with the Registrants' 2012 Form 10-K. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of each Registrant and its business strategy, selected information on PPL's segment earnings, a description of key factors expected to impact future earnings and a discussion of important financial and operational developments.
- "Results of Operations" provides a summary of earnings and ends with "Statement of Income Analysis," which includes explanations of non-GAAP financial measures and significant changes in principal line items on the Statements of Income, comparing the three and nine months ended September 30, 2013 with the same periods in 2012.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of the Registrants' liquidity position and credit profiles. This section also includes a discussion of rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of the Registrants' risk management programs relating to market and credit risk.

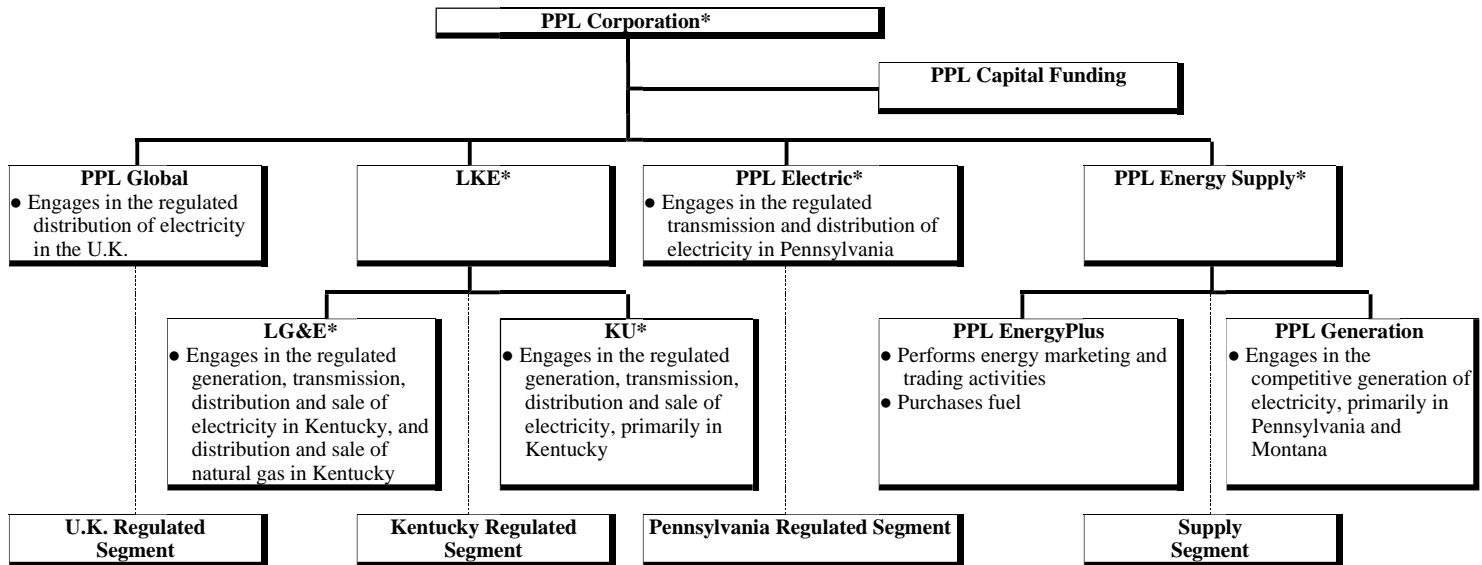

Overview

Introduction

(PPL)

PPL, headquartered in Allentown, Pennsylvania, is an energy and utility holding company that through subsidiaries generates electricity from power plants in the northeastern, northwestern and southeastern U.S., markets wholesale and retail energy primarily in the northeastern and northwestern portions of the U.S., delivers electricity to customers in the U.K., Pennsylvania, Kentucky, Virginia and Tennessee and delivers natural gas to customers in Kentucky.

PPL's principal subsidiaries are shown below (* denotes an SEC registrant):

PPL's reportable segments' results primarily represent the results of its related Subsidiary Registrant(s), except that the reportable segments are also allocated certain corporate level financing and other costs that are not included in the results of the applicable Subsidiary Registrant. The U.K. Regulated segment does not have a related Subsidiary Registrant.

(PPL Energy Supply)

PPL Energy Supply, headquartered in Allentown, Pennsylvania is an energy company that through its principal subsidiaries is primarily engaged in the competitive generation and marketing of electricity in two key markets - the northeastern and northwestern U.S. PPL Energy Supply's principal subsidiaries are PPL EnergyPlus, its marketing and trading subsidiary, and PPL Generation, the owner of its generating facilities in Pennsylvania and Montana.

(PPL Electric)

PPL Electric, headquartered in Allentown, Pennsylvania, is an electricity transmission and distribution service provider in eastern and central Pennsylvania. PPL Electric is subject to regulation as a public utility by the PUC, and certain of its transmission activities are subject to the jurisdiction of FERC under the Federal Power Act. PPL Electric delivers electricity in its Pennsylvania service area and provides electricity supply to retail customers in that area as a PLR under the Customer Choice Act.

(LKE)

LKE, headquartered in Louisville, Kentucky, is a holding company and a wholly owned subsidiary of PPL. LKE owns regulated utility operations through its subsidiaries, LG&E and KU, which constitute substantially all of LKE's assets. LG&E and KU are engaged in the generation, transmission, distribution and sale of electricity. LG&E also engages in the distribution and sale of natural gas. LG&E and KU maintain their separate identities and serve customers in Kentucky under their respective names. KU also serves customers in Virginia under the Old Dominion Power name and in Tennessee under the KU name.

(LG&E)

LG&E, headquartered in Louisville, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity and distribution and sale of natural gas in Kentucky. LG&E is subject to regulation as a public utility by the KPSC, and certain of its transmission activities are subject to the jurisdiction of FERC under the Federal Power Act. LG&E is a wholly owned subsidiary of LKE.

(KU)

KU, headquartered in Lexington, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity in Kentucky, Virginia and Tennessee. KU is subject to regulation as a public utility by the KPSC, the VSCC and the TRA, and certain of its transmission and wholesale power activities are subject to the jurisdiction of FERC under the Federal Power Act. KU is a wholly owned subsidiary of LKE.

(All Registrants except PPL Electric)

The capacity (summer rating) of regulated and competitive electricity generation facilities at September 30, 2013 was:

Primary Fuel	Ownership or Lease Interest in MW (a)				
	PPL	PPL Energy Supply	LKE	LG&E	KU
Regulated					
Coal (c)	5,940		5,940	2,656	3,284
Natural Gas/Oil (b)	2,098		2,098	644	1,454
Hydro	78		78	54	24
Total Regulated	8,116		8,116	3,354	4,762
Competitive					
Coal (b) (c)	4,146	4,146			
Natural Gas/Oil	3,316	3,316			
Nuclear (c)	2,275	2,275			
Hydro (d)	807	807			
Other (e)	70	70			
Total Competitive	10,614	10,614			
Total	18,730	10,614	8,116	3,354	4,762

- (a) The capacity of generation units is based on a number of factors, including the operating experience and physical conditions of the units, and may be revised periodically to reflect changed circumstances. See "Item 2. Properties" in the 2012 Form 10-K for additional information on ownership percentages.
- (b) Includes leasehold interests. See Note 11 to the Financial Statements in the 2012 Form 10-K for additional information.
- (c) Includes units that are jointly owned or subject to a power purchase agreement. Each owner is entitled to its proportionate share of the unit's total output and funds its proportionate share of fuel and other operating costs. See Notes 14 and 15 to the Financial Statements in the 2012 Form 10-K for additional information.
- (d) In September 2013, PPL Montana executed a definitive agreement to sell its 11 hydroelectric facilities, which have a combined generating capacity of 633 MW, to NorthWestern for \$900 million in cash, subject to certain adjustments. The sale is not expected to close before the second half of 2014 and is subject to closing conditions, including receipt of regulatory approvals by the FERC and Montana Public Service Commission and certain third party consents. See Note 8 to the Financial Statements for additional information.
- (e) Includes facilities owned, controlled or for which PPL Energy Supply has the rights to the output.

Business Strategy

(PPL and PPL Energy Supply)

The strategy for PPL Energy Supply is to achieve disciplined optimization of energy supply margins while mitigating near-term volatility in both cash flows and earnings. More specifically, the strategy is to optimize the value from its competitive generation and marketing portfolios. PPL Energy Supply endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk. PPL Energy Supply is focused on maintaining profitability during the current and projected period of low commodity prices. See "Financial and Operational Developments - Economic and Market Conditions" below for additional information.

(All Registrants except PPL Energy Supply)

The strategy for the regulated businesses of WPD, PPL Electric, LKE, LG&E and KU is to achieve stable, long-term growth in earnings and rate base, or RAV, as applicable. Both rate base and RAV are expected to grow as a result of significant capital expenditure programs to maintain existing assets and improving system reliability and, for LKE, LG&E and KU, to comply with federal and state environmental regulations related to electric generation facilities. These regulated businesses

focus on timely recovery of costs, efficient, reliable and safe operations, strong customer service and constructive regulatory relationships.

Recovery of capital project costs is attained through various rate-making mechanisms, including periodic base rate case proceedings, FERC formula rate mechanisms, and other regulatory agency-approved recovery mechanisms. In Kentucky, the KPSC has adopted a series of regulatory mechanisms (ECR, DSM, GLT, fuel adjustment clause, gas supply clause and recovery on certain construction work-in-progress) that reduce regulatory lag and provide for timely recovery of prudently incurred costs. In Pennsylvania, the recently approved DSIC mechanism will help PPL Electric reduce regulatory lag and provide for timely recovery of distribution reliability-related capital investment. See "Distribution System Improvement Charge" below for additional information on the implementation of the DSIC mechanism in 2013 and "RIIO-ED1" below for changes to the regulatory framework intended to encourage investment in regulated infrastructure applicable to WPD in 2015.

(All Registrants)

To manage financing costs and access to credit markets and to fund capital expenditure programs, a key objective for the Registrants is to maintain strong credit profiles and liquidity positions. In addition, the Registrants have financial and operational risk management programs that, among other things, are designed to monitor and manage exposure to earnings and cash flow volatility related to, as applicable, changes in energy and fuel prices, interest rates, foreign currency exchange rates, counterparty credit quality and the operating performance of their generating units.

Financial and Operational Developments

Earnings (PPL)

Earnings by component of PPL's reportable segments for the periods ended September 30 were as follows.

	Three Months			Nine Months		
	2013	2012	% Change	2013	2012	% Change
U.K. Regulated	\$ 183	\$ 202	(9)	\$ 741	\$ 563	32
Kentucky Regulated	93	72	29	227	148	53
Pennsylvania Regulated	51	33	55	160	95	68
Supply	91	48	90	122	361	(66)
Corporate and Other (a)	(8)		n/a	(22)		n/a
Net Income Attributable to PPL Shareowners	\$ 410	\$ 355	15	\$ 1,228	\$ 1,167	5
EPS - basic	\$ 0.65	\$ 0.61	7	\$ 2.03	\$ 2.00	2
EPS - diluted (b)	\$ 0.62	\$ 0.61	2	\$ 1.90	\$ 2.00	(5)

- (a) Primarily represents financing and certain other costs incurred at the corporate level that have not been allocated or assigned to the segments, which are presented to reconcile segment information to PPL's consolidated results. For 2012, there were no significant amounts in this category.
- (b) See "Equity Units" below for information on the Equity Units' impact on the calculation of 2013 diluted EPS.

The following after-tax gains (losses), in total, which management considers special items, impacted PPL's reportable segments results during the periods ended September 30. See PPL's "Results of Operations - Segment Earnings" for details of these special items.

	Three Months			Nine Months		
	2013	2012	Change	2013	2012	Change
U.K. Regulated	\$ (16)	\$ 41	\$ (57)	\$ 78	\$ 39	\$ 39
Kentucky Regulated				2	(1)	3
Supply	(6)	(105)	99	(49)	3	(52)
Total PPL	\$ (22)	\$ (64)	\$ 42	\$ 31	\$ 41	\$ (10)

The changes in PPL's reportable segments results for the three and nine-month periods, excluding the impact of special items, were due to the following factors (on an after-tax basis):

- Increase at the U.K. Regulated segment for the three-month period primarily due to higher electricity delivery prices and lower U.K. income taxes, partially offset by an accrual for over-recovery of current-year revenues, lower sales volume due to weather and higher operation and maintenance expense. Increase at the U.K. Regulated segment for the nine-month period primarily due to higher electricity delivery prices, increased sales volume due to weather, and lower U.K.

income taxes, partially offset by an accrual for over-recovery of current-year revenues, higher operation and maintenance expense and higher depreciation.

- Increases at the Kentucky Regulated segment for both periods primarily due to higher base rates that became effective January 1, 2013 and returns from additional environmental capital investments. The three-month period was also partially offset by lower sales volume due to weather.
- Increases at the Pennsylvania Regulated segment for both periods primarily due to higher electricity base rates that became effective January 1, 2013 and higher transmission margins from additional capital investments. The increase for the nine-month period was also due to lower operation and maintenance expense, partially offset by higher depreciation.
- Decrease at the Supply segment for the three-month period primarily due to lower baseload energy prices, lower baseload generation, higher operation and maintenance expense and higher income taxes. The decline in segment earnings was partially offset by higher capacity prices. Decrease at the Supply segment for the nine-month period primarily due to lower baseload energy prices, higher fuel costs, higher income taxes and higher depreciation. The decline in segment earnings was partially offset by higher capacity prices, higher intermediate and peaking margins and higher baseload generation. The higher income taxes for both periods resulted primarily from a non-cash adjustment of deferred tax assets.

See "Results of Operations" below for further discussion of PPL's reportable segments and analysis of results of operations.

2013 Outlook

(PPL)

Excluding special items, higher earnings are expected in 2013 compared with 2012. However, 2013 earnings are expected to decline on a diluted EPS basis due to higher average shares treated as outstanding. The factors underlying these projections by segment and Subsidiary Registrant are reflected below (on an after-tax basis).

(PPL's U.K. Regulated Segment)

Excluding special items, higher earnings are projected in 2013 compared with 2012, primarily driven by higher electricity delivery prices and lower income taxes, partially offset by higher operation and maintenance expense, higher depreciation and higher interest expense.

(PPL's Kentucky Regulated Segment and Kentucky Registrants)

Excluding special items, higher earnings are projected in 2013 compared with 2012, primarily driven by base rate increases and returns on additional environmental capital investments.

(PPL's Pennsylvania Regulated Segment and PPL Electric)

Excluding special items, higher earnings are projected in 2013 compared with 2012, primarily driven by higher distribution revenues from the January 1, 2013 base rate increase and higher transmission margins due to additional capital investment, partially offset by higher depreciation and higher interest expense.

(PPL's Supply Segment and PPL Energy Supply)

Excluding special items, lower earnings are projected in 2013 compared with 2012, primarily driven by lower energy prices, higher fuel costs, higher depreciation, higher taxes and higher financing costs, partially offset by lower operation and maintenance expense, higher capacity prices and higher baseload generation output.

(All Registrants)

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," the rest of this Item 2, and Notes 6 and 10 to the Financial Statements in this Form 10-Q (as applicable) and "Item 1. Business" and "Item 1A. Risk Factors" in the Registrants' 2012 Form 10-K for a discussion of the risks, uncertainties and factors that may impact future earnings.

Other Financial and Operational Developments

Economic and Market Conditions

(PPL and PPL Energy Supply)

Current depressed wholesale market prices for electricity and natural gas have resulted from general weak economic conditions and other factors, including the impact of expanded domestic shale gas development and additional renewable energy sources, primarily wind in the western U.S. Unregulated Gross Energy Margins associated with PPL Energy Supply's competitive generation and marketing business are impacted by changes in energy and capacity market prices and demand for electricity and natural gas, power plant availability, competition in the markets for retail customers, fuel costs and availability, transmission constraints that impact the locational pricing of electricity at PPL Energy Supply's power plants, fuel transportation costs and the level and price of hedging activities. As a result of these factors, lower future energy margins are expected when compared to the 2012 energy margins. See "Changes in Non-GAAP Financial Measures - Unregulated Gross Energy Margins in Statement of Income Analysis" below for additional information on energy margins. As has been PPL Energy Supply's practice in periods of changing business conditions, PPL Energy Supply continues to review its future business and operational plans, including capital and operation and maintenance expenditures, its hedging strategies and potential plant modifications to burn lower cost fuels.

(All Registrants except PPL Electric)

As previously disclosed, the businesses of PPL Energy Supply, LKE, LG&E and KU are subject to extensive federal, state and local environmental laws, rules and regulations, including those pertaining to coal combustion residuals, GHG, effluent limitation guidelines and MATS. See "Financial Condition - Environmental Matters" below for additional information on these requirements. These and other stringent environmental requirements, combined with low energy margins for competitive generation, have led several energy companies, including PPL, PPL Energy Supply, LKE, LG&E and KU, to announce plans to either temporarily or permanently close, or place in long-term reserve status, certain of their coal-fired generating plants.

(PPL and PPL Energy Supply)

In 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette plant in long-term reserve status, suspending the plant's operation due to expected market conditions and the costs to comply with MATS. PPL Energy Supply continues to monitor its Corette plant for potential impairment. The Corette plant asset group's carrying value at September 30, 2013 was \$67 million. See "Environmental Matters - Domestic - Air - MATS" in Note 10 to the Financial Statements for additional information.

PPL Energy Supply believes its remaining competitive coal-fired generation assets are well positioned to meet the environmental requirements described above based on prior and planned investments. Management continues to monitor energy and PJM capacity prices. A further decline in energy and/or capacity prices could negatively impact PPL Energy Supply's operations and potentially result in future asset impairment charges for coal-fired plants or goodwill.

(PPL and Kentucky Registrants)

The environmental requirements discussed above have also resulted in LKE's projected \$2.2 billion (\$1.1 billion each at LG&E and KU) in capital investment over the next five years and the anticipated retirement by 2015 of five coal-fired units (three at LG&E and two at KU) with a combined summer capacity rating of 726 MW (563 MW at LG&E and 163 MW at KU). KU retired the 71 MW unit at the Tyrone plant in February 2013. The retirement of these coal-fired units is not expected to have a material impact on the financial condition or results of operations of PPL, LKE, LG&E and KU. See Note 8 to the Financial Statements in the 2012 Form 10-K for PPL, LKE, LG&E and KU for additional information regarding the anticipated retirement of these units as well as plans to build a combined-cycle natural gas facility in Kentucky.

The KPSC has adopted a series of regulatory mechanisms (ECR, DSM, GLT, fuel adjustment clause, gas supply clause and recovery on certain construction work-in-progress) that provide for recovery of prudently incurred costs. The Kentucky utility businesses are impacted by changes in customer usage levels which can be driven by a number of factors including weather conditions and economic factors that impact the load utilized by industrial and commercial customers.

(All Registrants)

The Registrants cannot predict the future impact that economic and market conditions and changes in regulatory requirements may have on their financial condition or results of operations.

(PPL)

Ofgem Review of Line Loss Calculation

Ofgem is currently consulting on the methodology to be used by all network operators to calculate the final line loss incentive/penalty for the DPCR4. Based on information received from Ofgem in 2013, WPD currently estimates the potential loss exposure for this matter to be in the range of \$93 million to \$226 million as of September 30, 2013. During the three and nine months ended September 30, 2013, WPD recorded \$21 million and \$45 million of increases to the liability with reductions to "Utility" revenue on the Statement of Income. PPL cannot predict the outcome of this matter. See Note 6 to the Financial Statements for additional information.

RIIO-ED1

In October 2010, Ofgem announced changes to the regulatory framework that will be effective for the U.K. electricity distribution sector, including WPD, beginning April 2015. The framework, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to encourage investment in regulated infrastructure. The next electricity distribution price control review is referred to as RIIO-ED1. Key components of the RIIO-ED1 are: an extension of the price review period to eight years, increased emphasis on outputs and incentives, enhanced stakeholder engagement including network customers, a stronger incentive framework to encourage more efficient investment and innovation, and continued use of a single weighted average cost of capital. Ofgem has also indicated that the depreciation of the RAV, for RAV additions after April 1, 2015, will change from 20 years to 45 years, but that it will consider transition arrangements.

As previously reported, on July 1, 2013, WPD filed its business plans with Ofgem for the RIIO-ED1 period and gave a webcast presentation to highlight the contents of the plans as well as provide potential earnings ranges of the U.K. Regulated segment for the first two years of the RIIO-ED1 period. The ranges provided are subject to certain assumptions including foreign currency exchange rates, interest rates, inflation rates and WPD being "fast-tracked" through the price control review process and therefore earning the fast-track bonus revenue. These assumptions and other future events affecting the potential earnings ranges are subject to significant uncertainties. Although management believes that the business plans submitted by WPD meet the criteria to be fast-tracked, management cannot predict the outcome of the price control review process or the future financial effect on WPD's businesses of the RIIO-ED1 regulatory framework. Ofgem has notified WPD that it intends to announce preliminary fast-track determinations on November 22, 2013 with a final determination to be announced in February 2014. See "Item 1. Business - Background - U.K. Regulated Segment - Revenue and Regulation" in the 2012 Form 10-K for additional information.

Equity Forward Agreements

In the second quarter of 2013, PPL settled forward sale agreements for 10.5 million shares of PPL common stock by issuing 8.4 million shares and cash settling the remaining 2.1 million shares. PPL received net cash proceeds of \$201 million, which was used to repay short-term debt obligations and for other general corporate purposes. See Note 7 to the Financial Statements for additional information. Prior to settlement, incremental shares were included within the calculation of diluted EPS using the treasury stock method. See Note 4 to the Financial Statements for the impact on the calculation of diluted EPS.

Equity Units

During 2013, several events occurred related to the components of the 2010 Equity Units. During the first quarter of 2013, financing plans were finalized to remarket the Junior Subordinated Notes component of the 2010 Equity Units and in the second quarter, PPL Capital Funding completed the remarketing of the Junior Subordinated Notes and simultaneously exchanged the remarketed notes for three tranches of Senior Notes. The transaction resulted in a \$10 million loss on extinguishment of the Junior Subordinated Notes. Additionally, in July 2013, PPL issued 40 million shares of common stock at \$28.73 per share to settle the 2010 Purchase Contracts. PPL received net cash proceeds of \$1.150 billion, which will be used to repay short-term and long-term debt obligations and for other general corporate purposes. See Note 7 to the Financial Statements for additional information.

The If-Converted Method of calculating diluted EPS was applied to the Equity Units prior to settlement beginning in the first quarter of 2013. This resulted in \$7 million and \$37 million of interest charges (after-tax) being added back to income

available to PPL common shareowners, and 32 million and 59 million weighted-average incremental shares of PPL common stock being treated as outstanding for purposes of the diluted EPS calculation for the three and nine months ended September 30, 2013. See Note 4 to the Financial Statements for the impact on the calculation of diluted EPS.

Tax Litigation

In May 2013, the U.S. Supreme Court reversed the December 2011 ruling of the U. S. Court of Appeals for the Third Circuit, on the creditability for U.S. income tax purposes of the U.K. Windfall Profits Tax paid by a U.K. subsidiary of PPL. As a result of this decision, PPL recorded an income tax benefit of \$44 million for the nine months ended September 30, 2013. See Note 5 to the Financial Statements for additional information.

U.K. Tax Rate Change

In July 2013, the U.K. Finance Act 2013 was enacted, which reduces the U.K.'s statutory income tax rate from 23% to 21%, effective April 1, 2014 and from 21% to 20%, effective April 1, 2015. As a result of these changes, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit of \$93 million in the third quarter of 2013.

Pennsylvania Net Operating Loss Valuation Allowance

PPL assesses the realizability of its deferred tax assets for Pennsylvania's net operating loss carryforwards based on, among other things, projections of future taxable income for the net operating loss carryforward periods. In the third quarter of 2013, PPL determined that its projected future taxable income would likely decrease, resulting in an increase to the valuation allowance related to Pennsylvania net operating loss carryforwards. As a result, PPL recorded a \$38 million increase in state deferred income tax expense.

FERC Audit Proceedings (All Registrants except PPL Energy Supply)

In November 2011, the FERC commenced an audit of PPL and its subsidiaries, including an audit of the FERC transmission formula rate mechanisms at PPL Electric, LG&E and KU beginning in April 2012. The audit identified several matters related to separate aspects of formula rate mechanics at PPL Electric, LG&E and KU. As previously reported, among the audit matters related to PPL Electric was the determination that PPL Electric had not obtained a waiver of the equity method accounting requirement with respect to its wholly owned subsidiary, PPL Receivables Corporation, which was formed in 2004 to purchase eligible accounts receivable and unbilled revenue from PPL Electric to collateralize commercial paper issuances and reduce borrowing costs. PPL, PPL Electric, LKE, LG&E and KU currently believe that the total amount of refunds, if any, that may be required with respect to the formula rate and all other issues identified during the course of the audit will not be material to any of these Registrants. PPL, PPL Electric, LKE, LG&E and KU, however, cannot predict the ultimate outcome of these matters.

(PPL and PPL Energy Supply)

Montana Transactions

In September 2013, PPL Montana executed a definitive agreement to sell 633MW of hydroelectric facilities to NorthWestern for \$900 million in cash, subject to certain adjustments. The sale is not expected to close before the second half of 2014. The sale is subject to closing conditions, including receipt of regulatory approvals by the FERC and Montana Public Service Commission and certain third-party consents. In a related transaction, in September 2013, PPL Montana negotiated and entered into an agreement to pay \$271 million to terminate a sale-leaseback arrangement and reacquire its interests in the Colstrip coal-fired facilities. This transaction is anticipated to occur by the end of the first quarter of 2014, subject to approval by the FERC. At lease termination, in addition to recording a charge for the cash payment, a non-cash charge is expected to be recorded related to the existing lease-related assets on PPL's and PPL Energy Supply's Balance Sheets. The book value of these assets was approximately \$450 million at September 30, 2013. These lease-related assets will be written-off and the reacquired Colstrip assets will be recorded at fair value as of the acquisition date. The total loss is currently estimated at between \$310 million and \$430 million, after-tax, which is dependent on the fair value assigned to the reacquired Colstrip assets. See Note 8 to the Financial Statements for additional information.

Susquehanna Turbine Blade Inspection

In the spring of 2013, PPL Susquehanna made modifications to address the causes of turbine blade cracking at the PPL Susquehanna nuclear plant that was first identified in 2011. The modifications were made during the Unit 2 refueling outage and an additional planned outage for Unit 1. In September 2013, data from the extensive vibration monitoring equipment installed on the turbine blades identified cracks in a small number of the blades on both units. Unit 2 completed a blade

inspection and replacement outage on September 23, 2013. Based upon the evaluation of the conditions on Unit 1 and the latest inspection of previously removed blades, PPL Susquehanna will continue to operate Unit 1 and monitor the blades through the vibration monitoring equipment. The financial impact of the Unit 2 outage is not material. PPL Susquehanna continues to work with the turbine manufacturer to identify and resolve the issues causing the blade cracking.

Colstrip Unit 4 Outage (PPL Energy Supply)

On July 1, 2013, Colstrip Unit 4 automatically shut down as a result of damage that occurred in the unit's generator. The repair to Unit 4 is estimated to cost between \$30 million and \$40 million and is expected to take at least six months to complete. Property damage insurance for Unit 4 is subject to a \$2.5 million self-insured retention. PPL Montana operates Unit 4 pursuant to an agreement with the owners and, pursuant to a separate agreement with NorthWestern, is entitled to receive 15% of Unit 4's electricity output and is responsible for 15% of the capital, operating, maintenance and repair costs associated with Unit 4. PPL Montana's estimated pre-tax loss of earnings attributable to the Unit 4 outage is between \$5 million and \$10 million.

(PPL and PPL Electric)

Distribution System Improvement Charge

Act 11 authorizes the PUC to approve two specific ratemaking mechanisms - the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, the use of a DSIC. Such alternative ratemaking procedures and mechanisms provide opportunity for accelerated cost-recovery. In May 2013, the PUC approved PPL Electric's proposed DSIC, with an initial rate effective July 1, 2013, subject to refund after hearings. See Note 6 to the Financial Statements for additional information.

Rate Case Proceedings

(PPL and PPL Electric)

In December 2012, the PUC approved a total distribution revenue increase of about \$71 million for PPL Electric, using a 10.4% return on equity. The approved rates became effective January 1, 2013.

(PPL and Kentucky Registrants)

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of \$34 million for LG&E and \$51 million for KU and an increase in annual base gas rates of \$15 million for LG&E using a 10.25% return on equity. The approved rates became effective January 1, 2013.

(KU)

In September 2013, KU filed an application with the FERC to adjust the formula rate under which KU provides wholesale requirements power sales to 12 municipal customers. Among other changes, the application requests an amended formula whereby KU would recover costs based on forward-looking estimates with a subsequent true-up, replacing the current formula which uses prior-year cost amounts. KU's application proposed an authorized 10.7% return on equity. Subject to regulatory approval, the new formula rate may become effective during mid-2014.

In April 2013, KU filed an application with the VSCC to increase annual Virginia base electricity revenue by approximately \$7 million, representing an increase of 9.6%. KU proposed an authorized 10.8% return on equity. In October 2013, KU filed a stipulation reached with VSCC staff proposing a revenue increase of \$4.7 million, representing an increase of 6.9%. If approved by the VSCC, new base rates would go into effect on December 1, 2013.

Results of Operations

(PPL)

The discussion for PPL provides a review of results by reportable segment and concludes with a "Statement of Income Analysis," which includes explanations of Kentucky Gross Margins, Pennsylvania Gross Delivery Margins and Unregulated Gross Energy Margins. The "Statement of Income Analysis" also addresses significant changes in principal line items on PPL's Statements of Income, comparing the three and nine months ended September 30, 2013 with the same periods in 2012. "Segment Earnings and Statement of Income Analysis" is presented separately for PPL.

Tables analyzing changes in amounts between periods within "Segment Earnings" and "Statement of Income Analysis" are presented on a constant U.K. foreign currency exchange rate basis, where applicable, in order to isolate the impact of the change in the exchange rate on the item being explained. Results computed on a constant U.K. foreign currency exchange rate basis are calculated by translating current year results at the prior year weighted-average U.K. foreign currency exchange rate.

(Subsidiary Registrants)

The discussion for each of PPL Energy Supply, PPL Electric, LKE, LG&E and KU provides a summary of earnings and concludes with a "Statement of Income Analysis," which includes a reconciliation of a non-GAAP financial measure to "Operating Income" and significant changes in principal line items on the Statements of Income, comparing the three and nine months ended September 30, 2013 with the same periods in 2012. "Earnings and Statement of Income Analysis" is presented separately for PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

(All Registrants)

The results for interim periods can be disproportionately influenced by numerous factors and developments and by seasonal variations. As such, the results of operations for interim periods do not necessarily indicate results or trends for the year or future periods.

PPL: Segment Earnings and Statement of Income Analysis

Segment Earnings

U.K. Regulated Segment

The U.K. Regulated segment consists of PPL Global which primarily includes WPD's regulated electricity distribution operations and certain costs, such as U.S. income taxes, administrative costs and allocated financing costs. The U.K. Regulated segment represents 60% of Net Income Attributable to PPL Shareowners for nine months ended September 30, 2013 and 32% of PPL's assets at September 30, 2013.

Net Income Attributable to PPL Shareowners for the periods ended September 30 includes the following results:

	<u>Three Months</u>			<u>Nine Months</u>		
	<u>2013</u>	<u>2012</u>	<u>% Change</u>	<u>2013</u>	<u>2012</u>	<u>% Change</u>
Utility revenues	\$ 534	\$ 518	3	\$ 1,731	\$ 1,613	7
Energy-related businesses	9	10	(10)	32	34	(6)
Total operating revenues	<u>543</u>	<u>528</u>	<u>3</u>	<u>1,763</u>	<u>1,647</u>	<u>7</u>
Other operation and maintenance	111	101	10	340	326	4
Depreciation	73	69	6	219	206	6
Taxes, other than income	36	36		109	108	1
Energy-related businesses	7	8	(13)	21	24	(13)
Total operating expenses	<u>227</u>	<u>214</u>	<u>6</u>	<u>689</u>	<u>664</u>	<u>4</u>
Other Income (Expense) - net	(117)	(50)	134	7	(39)	(118)
Interest Expense	102	106	(4)	313	314	
Income Taxes	(86)	(44)	95	27	67	(60)
Net Income Attributable to PPL Shareowners	<u>\$ 183</u>	<u>\$ 202</u>	<u>(9)</u>	<u>\$ 741</u>	<u>\$ 563</u>	<u>32</u>

The changes in the components of the U.K. Regulated segment's results between these periods were due to the factors set forth below, which reflect reclassifications for certain items that management considers special. See below for additional detail of these special items.

	<u>Three Months</u>	<u>Nine Months</u>
U.K.		
Utility revenues	\$ 44	\$ 187
Other operation and maintenance	(9)	(19)
Depreciation	(6)	(17)
Interest expense	3	(4)
Other	2	2
Income taxes	8	(13)
U.S.		
Interest expense and other		1
Income taxes	(5)	4

	<u>Three Months</u>	<u>Nine Months</u>
Foreign currency exchange rates, after-tax (a)	1	(2)
Special items, after-tax	(57)	39
Total	\$ (19)	\$ 178

(a) Includes the effect of realized gains (losses) on foreign currency economic hedges.

U.K.

- Higher utility revenues for the three-month period primarily due to \$74 million from the April 1, 2013 price increase, partially offset by a \$22 million accrual for over-recovered revenue and \$10 million of lower volume due primarily to weather.

Higher utility revenues for the nine-month period primarily due to \$187 million from the April 1, 2013 and 2012 price increases and \$18 million of higher volume due primarily to weather, partially offset by a \$22 million accrual for over-recovered revenue.

- Higher other operation and maintenance for the three- and nine-month periods primarily due to higher network maintenance expense.
- Higher depreciation for the three- and nine-month periods primarily due to PP&E additions.
- Lower income taxes for the three-month period due to \$16 million from U.K. tax rate changes, partially offset by higher pre-tax income, which increased income taxes by \$8 million.

Higher income taxes for the nine-month period primarily due to higher pre-tax income, which increased income taxes by \$38 million, and \$13 million from a benefit recorded in 2012 due to the tax deductibility of interest on the acquisition financing for WPD Midlands, partially offset by \$27 million from U.K. tax rate changes and \$6 million of prior year adjustments.

U.S.

- Higher income taxes for the three-month period due to an \$8 million increase to income tax expense attributable to a revision in the expected taxable amount of cash repatriation in 2013.

Lower income taxes for the nine-month period due to a \$19 million 2013 adjustment primarily related to an IRS ruling regarding 2010 U.K. earnings and profits calculations and \$11 million of lower income taxes on intercompany loans, partially offset by a \$23 million increase to income tax expense attributable to a revision in the expected taxable amount of cash repatriation in 2013.

The following after-tax gains (losses), which management considers special items, also impacted the U.K. Regulated segment's results during the periods ended September 30.

	Income Statement Line Item	<u>Three Months</u>		<u>Nine Months</u>	
		<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Foreign currency-related economic hedges, net of tax of \$44, \$18, \$5, \$17 (a)	Other Income (Expense)-net	\$ (82)	\$ (30)	\$ (8)	\$ (28)
WPD Midlands acquisition-related adjustments:					
Separation benefits, net of tax of \$1, \$1, \$1, \$3	Other Operation and Maintenance	(2)	(1)	(4)	(9)
Other acquisition-related adjustments, net of tax of \$0, \$0, \$0, (\$1)	Other Operation and Maintenance		(2)	(2)	2
Other:					
Windfall Profits Tax litigation (b)	Income Taxes			43	
Change in WPD line loss accrual, net of tax of \$5, \$0, \$10, \$0 (c)	Utility	(16)		(35)	
Change in U.K. tax rate (d)	Income Taxes	84	74	84	74
Total		\$ (16)	\$ 41	\$ 78	\$ 39

(a) Represents unrealized gains (losses) on contracts that economically hedge anticipated earnings denominated in GBP.

(b) In May 2013, the U.S. Supreme Court reversed the December 2011 ruling, by the U.S. Court of Appeals for the Third Circuit, on the creditability for income tax purposes of the U.K. Windfall Profits Tax. As a result of the U.S. Supreme Court ruling, PPL recorded an income tax benefit during the nine-month 2013 period. See Note 5 to the Financial Statements for additional information.

- (c) WPD Midlands recorded adjustments to its line loss accrual based on information provided by Ofgem regarding the calculation of line loss incentive/penalty for all network operators related to DPCR4, a price control period that ended prior to PPL's acquisition of WPD Midlands. See Note 6 to the Financial Statements for additional information.
- (d) The U.K. Finance Act of 2013, enacted in July 2013, reduced the U.K.'s statutory income tax rate from 23% to 21%, effective April 1, 2014 and from 21% to 20%, effective April 1, 2015. The U.K. Finance Act of 2012, enacted in July 2012, reduced the U.K. statutory income tax rate from 25% to 24% retroactive to April 1, 2012 and from 24% to 23% effective April 1, 2013. As a result, PPL reduced its net deferred tax liability and recognized a deferred tax benefit in the three and nine-month periods of 2013 and 2012.

Kentucky Regulated Segment

The Kentucky Regulated segment consists primarily of LKE's regulated electricity generation, transmission and distribution operations. This segment also includes LKE's regulated distribution and sale of natural gas. In addition, certain financing costs are allocated to the Kentucky Regulated segment. The Kentucky Regulated segment represents 19% of Net Income Attributable to PPL Shareowners for the nine months ended September 30, 2013 and 25% of PPL's assets at September 30, 2013.

Net Income Attributable to PPL Shareowners for the periods ended September 30 includes the following results:

	Three Months			Nine Months		
	2013	2012	% Change	2013	2012	% Change
Utility revenues	\$ 744	\$ 732	2	\$ 2,226	\$ 2,095	6
Fuel	237	249	(5)	684	677	1
Energy purchases	23	27	(15)	146	135	8
Other operation and maintenance	188	186	1	582	589	(1)
Depreciation	84	87	(3)	249	259	(4)
Taxes, other than income	12	11	9	36	34	6
Total operating expenses	544	560	(3)	1,697	1,694	
Other Income (Expense) - net	(4)	(4)		(6)	(14)	(57)
Interest Expense	49	54	(9)	165	163	1
Income Taxes	54	42	29	132	70	89
Income (Loss) from Discontinued Operations			n/a	1	(6)	(117)
Net Income Attributable to PPL Shareowners	\$ 93	\$ 72	29	\$ 227	\$ 148	53

The changes in the components of the Kentucky Regulated segment's results between these periods were due to the factors set forth below, which reflect reclassifications for items included in Kentucky Gross Margins and certain items that management considers special. See below for additional detail of these special items.

	Three Months	Nine Months
Kentucky Gross Margins	\$ 42	\$ 151
Other operation and maintenance	(4)	4
Depreciation	(9)	(26)
Taxes, other than income	(1)	(2)
Other Income (Expense) - net		7
Interest Expense	5	(2)
Income Taxes	(12)	(56)
Special items, after-tax		3
Total	\$ 21	\$ 79

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Kentucky Gross Margins.
- Lower other operation and maintenance for the nine-month period primarily due to \$18 million of lower costs due to the timing and scope of scheduled coal plant maintenance outages. This decrease was partially offset by \$8 million of higher administrative and general expenses and \$4 million of adjustments to regulatory assets and liabilities.
- Higher depreciation for the three and nine-month periods primarily due to environmental costs related to the 2005 and 2006 ECR plans now being included in base rates, which added \$13 million and \$39 million to depreciation that is excluded from Kentucky Gross Margins. This increase was partially offset by lower depreciation of \$5 and \$16 million due to revised rates that were effective January 1, 2013. Both events are the result of the 2012 rate case proceedings.
- Higher other income (expense) - net for the nine-month period primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.

- Higher income taxes for the three and nine-month periods primarily due to the change in pre-tax income at current period tax rates.

The following after-tax gains (losses), which management considers special items, also impacted the Kentucky Regulated segment's results during the periods ended September 30.

	Income Statement Line Item	Three Months		Nine Months	
		2013	2012	2013	2012
LKE acquisition-related adjustments:					
Net operating loss carryforward and other tax-related adjustments	Income Taxes and Other Operation and Maintenance				\$ 4
Other:					
LKE discontinued operations (a)	Discontinued Operations			\$ 1	(5)
EEl adjustments, net of tax of \$0, \$0, \$0, \$0 (b)	Other Income (Expense)-net			1	
Total				\$ 2	\$ (1)

- (a) 2012 period includes an adjustment to an indemnification liability.
(b) Impact recorded at KU.

Pennsylvania Regulated Segment

The Pennsylvania Regulated segment includes PPL Electric's regulated electricity transmission and distribution operations. In addition, certain financing costs are allocated to the Pennsylvania Regulated segment. The Pennsylvania Regulated segment represents 13% of Net Income Attributable to PPL Shareowners for the nine months ended September 30, 2013 and 15% of PPL's assets at September 30, 2013.

Net Income Attributable to PPL Shareowners for the periods ended September 30 includes the following results:

	Three Months			Nine Months		
	2013	2012	% Change	2013	2012	% Change
Utility revenues						
External	\$ 463	\$ 443	5	\$ 1,388	\$ 1,303	7
Intersegment	1	1		3	3	
Total utility revenues	464	444	5	1,391	1,306	7
Energy purchases						
External	144	137	5	436	410	6
Intersegment	11	23	(52)	37	61	(39)
Other operation and maintenance	134	148	(9)	391	431	(9)
Depreciation	45	41	10	132	119	11
Taxes, other than income	25	24	4	77	72	7
Total operating expenses	359	373	(4)	1,073	1,093	(2)
Other Income (Expense) - net	2	3	(33)	5	6	(17)
Interest Expense	30	25	20	80	73	10
Income Taxes	26	16	63	83	47	77
Net Income	51	33	55	160	99	62
Net Income Attributable to Noncontrolling Interests			n/a		4	(100)
Net Income Attributable to PPL Shareowners	<u>\$ 51</u>	<u>\$ 33</u>	<u>55</u>	<u>\$ 160</u>	<u>\$ 95</u>	<u>68</u>

The changes in the components of the Pennsylvania Regulated segment's results between these periods were due to the factors set forth below, which reflect reclassifications for items included in Pennsylvania Gross Delivery Margins.

	Three Months	Nine Months
Pennsylvania Gross Delivery Margins	\$ 31	\$ 92
Other operation and maintenance	8	28
Depreciation	(4)	(13)
Interest Expense	(5)	(7)
Other	(2)	(3)
Income Taxes	(10)	(36)
Noncontrolling Interests		4
Total	\$ 18	\$ 65

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.

- Lower other operation and maintenance for the three-month period primarily due to lower storm costs of \$8 million, lower corporate service costs of \$3 million and lower rent expense of \$3 million, partially offset by higher vegetation management expense of \$6 million.

Lower other operation and maintenance for the nine-month period primarily due to lower storm costs of \$9 million, lower corporate service costs of \$13 million and lower rent expense of \$4 million.

- Higher depreciation for the three and nine-month periods primarily due to the impact of PP&E additions related to the ongoing efforts to ensure the reliability of the delivery system and replace aging infrastructure.
- Higher interest expense for the three and nine-month periods primarily due to the issuance of first mortgage bonds in August 2012 and July 2013.
- Higher income taxes for the three and nine-month periods primarily due to higher pre-tax income.

Supply Segment

The Supply segment primarily consists of PPL Energy Supply's energy marketing and trading activities, as well as its competitive generation operations. In addition, certain financing costs are allocated to the Supply segment. The Supply segment represents 10% of Net Income Attributable to PPL Shareowners for the nine months ended September 30, 2013 and 27% of PPL's assets at September 30, 2013.

Net Income Attributable to PPL Shareowners for the periods ended September 30 includes the following results:

	Three Months			Nine Months		
	2013	2012	% Change	2013	2012	% Change
Energy revenues

Net Income Attributable to PPL Shareowners	\$ 91	\$ 48	90	\$ 122	\$ 361	(66)

(a) Includes the impact from energy-related economic activity. See "Commodity Price Risk (Non-trading) - Economic Activity" in Note 14 to the Financial Statements for additional information.

The changes in the components of the Supply segment's results between these periods were due to the factors set forth below, which reflect reclassifications for items included in Unregulated Gross Energy Margins and certain items that management considers special. See below for additional detail of these special items.

	Three Months	Nine Months
Unregulated Gross Energy Margins	\$ (9)	\$ (204)
Other operation and maintenance	(18)	11
Depreciation	(5)	(27)
Taxes, other than income	(1)	3
Other Income (Expense) - net	(4)	6
Interest expense	8	(11)
Other	(4)	(2)
Income Taxes	(23)	37
Special items, after-tax	99	(52)
Total	\$ 43	\$ (239)

- See "Statement of Income Analysis - Margins - Changes in Non-GAAP Financial Measures" for an explanation of Unregulated Gross Energy Margins.
- Higher other operation and maintenance for the three-month period primarily due to Montour outage costs in 2013 with no comparable outage in 2012.

Lower other operation and maintenance for the nine-month period primarily due to \$23 million of outage costs at Brunner Island mainly due to timing and \$9 million due to lower project costs at PPL Susquehanna, partially offset by \$13 million of Montour outage costs in 2013 with no comparable outage in 2012 and \$6 million of Ironwood outage costs in 2013 with no comparable outage in 2012.

- Higher depreciation for the three and nine-month periods primarily due to PP&E additions. The nine-month period also includes \$6 million attributable to the Ironwood Acquisition.
- Higher interest expense for the nine-month period primarily due to lower capitalized interest in 2013.
- Higher income taxes for the three-month period primarily due to \$26 million of higher adjustments to valuation allowances in 2013 on Pennsylvania net operating loss carryforwards and a \$6 million benefit from a state tax rate change recorded in 2012, partially offset by lower pre-tax income in 2013, which reduced income taxes by \$10 million.

Lower income taxes for the nine-month period primarily due to lower pre-tax income in 2013, which reduced income taxes by \$87 million, partially offset by \$26 million of higher adjustments to valuation allowances in 2013 on Pennsylvania net operating loss carryforwards and a \$17 million benefit from a state tax rate change recorded in 2012.

The following after-tax gains (losses), which management considers special items, also impacted the Supply segment's results during the periods ended September 30.

Income Statement Line Item	Three Months		Nine Months		
	2013	2012	2013	2012	
Adjusted energy-related economic activity - net, net of tax of \$4, \$63, \$32, (\$16)	(a)	\$ (6)	\$ (95)	\$ (47)	\$ 23
Impairments:					
Adjustments - nuclear decommissioning trust investments, net of tax of \$0, \$0, \$0, (\$2)	Other Income-net				1
Other:					
Change in tax accounting method related to repairs	Income Taxes			(3)	
Counterparty bankruptcy, net of tax of \$0, \$0, (\$1), \$5 (b)	Other Operation and Maintenance			1	(6)
Wholesale supply cost reimbursement, net of tax of \$0, \$0, \$0, \$0	(c)				1
Ash basin leak remediation adjustment, net of tax of \$0, \$0, \$0, (\$1)	Other Operation and Maintenance				1
Coal contract modification payments, net of tax of \$0, \$7, \$0, \$12 (d)	Fuel		(10)		(17)
Total		\$ (6)	\$ (105)	\$ (49)	\$ 3

(a) See "Reconciliation of Economic Activity" below.

(b) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. In 2012, PPL EnergyPlus recorded an additional allowance for unpaid amounts under the long-term power contract. In March 2012, the U.S. Bankruptcy Court for the District of Montana approved the request to terminate the contract, effective April 1, 2012. In June 2013, PPL EnergyPlus received an approval for an administrative claim in the amount of \$2 million.

(c) Recorded in "Wholesale energy marketing - Realized" on the Statement of Income.

(d) As a result of lower electricity and natural gas prices, coal-fired generation output decreased during 2012. Contract modification payments were incurred to reduce 2012 and 2013 contracted coal deliveries.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) for the periods ended September 30, to the special item identified as "Adjusted energy-related economic activity - net."

	Three Months		Nine Months	
	2013	2012	2013	2012

Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010		1		34
Adjusted energy-related economic activity - net, pre-tax	\$ (10)	\$ (158)	\$ (79)	\$ 39
Adjusted energy-related economic activity - net, after-tax	\$ (6)	\$ (95)	\$ (47)	\$ 23

(a) See Note 14 to the Financial Statements for additional information.

Statement of Income Analysis --

Margins

Non-GAAP Financial Measures

Management utilizes the following non-GAAP financial measures as indicators of performance for its businesses.

- "Kentucky Gross Margins" is a single financial performance measure of LKE's, LG&E's and KU's electricity generation, transmission and distribution operations as well as its distribution and sale of natural gas. In calculating this measure, fuel and energy purchases are deducted from revenues. In addition, utility revenues and expenses associated with approved cost recovery mechanisms are offset. These mechanisms allow for recovery of certain expenses, return on capital investments and performance incentives. Certain costs associated with these mechanisms, primarily ECR, DSM and GLT, are recorded as "Other operation and maintenance" and "Depreciation." As a result, this measure represents the net revenues from the electric and gas operations.
- "Pennsylvania Gross Delivery Margins" is a single financial performance measure of PPL Electric's electric delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Other operation and maintenance," which is primarily Act 129 costs, and "Taxes, other than income," which is primarily gross receipts tax. This performance measure includes PLR energy purchases by PPL Electric from PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)" in the reconciliation table below (in "Energy purchases from affiliate" in PPL Electric's reconciliation table). As a result, this measure represents the net revenues from PPL Electric's electric delivery operations.
- "Unregulated Gross Energy Margins" is a single financial performance measure of PPL Energy Supply's competitive energy non-trading and trading activities. Non-trading activities are managed on a geographic basis that is aligned with the generation fleet. In calculating this measure, energy revenues are offset by the cost of fuel, energy purchases and certain other operation and maintenance expenses, primarily ancillary charges and gross receipts tax, which is recorded in "Taxes, other than income." This performance measure is relevant to PPL due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant fluctuations in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Wholesale energy marketing" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are recorded in "PLR intersegment utility revenue (expense)" in the reconciliation table below (in "Wholesale energy marketing to affiliate" in PPL Energy Supply's reconciliation table). "Unregulated Gross Energy Margins" excludes adjusted energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of the competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the delivery period that was hedged. Adjusted energy-related economic activity also includes the premium amortization associated with options and for 2012 the ineffective portion of qualifying cash flow hedges and realized economic activity associated with the monetization of certain full-requirement sales contracts in 2010. This economic activity was deferred, with the exception of the full-requirement sales contracts that were monetized, and included in "Unregulated Gross Energy Margins" over the delivery period that was hedged or upon realization.

These measures are not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and to report on the results of their operations. Management believes that these measures provide additional criteria to make investment decisions. These performance measures are used, in conjunction with other information, internally by senior management and PPL's Board of Directors to manage the operations, analyze actual results compared with budget and, in certain cases, to measure certain corporate financial goals used in determining variable compensation.

Reconciliation of Non-GAAP Financial Measures

The following tables contain the components from the Statement of Income that are included in the non-GAAP financial measures and a reconciliation to PPL's "Operating Income" for the periods ended September 30.

	2013 Three Months				2012 Three Months

- (a) Represents amounts excluded from Margins.
(b) As reported on the Statements of Income.
(c) Primarily represents WPD's utility revenue.
(d) Primarily related to PLR supply sold by PPL EnergyPlus to PPL Electric.
(e) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. For the three and nine months ended September 30, 2012, "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include net pre-tax losses of \$1 million and \$34 million related to the monetization of certain full-requirement sales contracts.
(f) Represents energy-related economic activity, which is subject to fluctuations in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.
(g) Includes economic activity related to fuel as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. The three and nine months ended September 30, 2012 include a pre-tax loss of \$17 million and \$29 million related to coal contract modification payments.

Changes in Non-GAAP Financial Measures

The following table shows the non-GAAP financial measures by PPL's reportable segment and by component, as applicable, for the periods ended September 30 as well as the change between periods. The factors that gave rise to the changes are described below the table.

	Three Months			Nine Months		
	2013	2012	Change	2013	2012	Change
Kentucky Regulated						
Kentucky Gross Margins						
LKE	\$ 457	\$ 415	\$ 42	\$ 1,319	\$ 1,168	\$ 151
LG&E	210	198	12	595	552	43
KU	247	216	31	724	616	108
Pennsylvania Regulated						
PA Gross Delivery Margins						
Distribution	\$ 201	\$ 185	\$ 16	\$ 607	\$ 544	\$ 63
Transmission	66	51	15	179	150	29
Total	\$ 267	\$ 236	\$ 31	\$ 786	\$ 694	\$ 92
Supply						
Unregulated Gross Energy Margins						
Non-trading						
Eastern U.S.	\$ 504	\$ 521	\$ (17)	\$ 1,283	\$ 1,417	\$ (134)
Western U.S.	52	67	(15)	166	230	(64)
Net energy trading	12	(11)	23	1	7	(6)
Total	\$ 568	\$ 577	\$ (9)	\$ 1,450	\$ 1,654	\$ (204)

Kentucky Gross Margins

Kentucky Gross Margins increased \$42 million for the three months ended September 30, 2013 compared with 2012, primarily due to higher base rates of \$23 million (\$10 million at LG&E and \$13 million at KU), environmental cost recoveries added to base rates of \$13 million (at KU), returns from additional environmental capital investments of \$8 million (\$3 million at LG&E and \$5 million at KU) and higher fuel recoveries of \$6 million (\$3 million at LG&E and \$3 million at KU), partially offset by lower volumes of \$13 million (\$7 million at LG&E and \$6 million at KU). The change in volumes was primarily attributable to weather, as cooling degree days decreased 16% compared to the same period in 2012.

Kentucky Gross Margins increased \$151 million for the nine months ended September 30, 2013 compared with 2012, primarily due to higher base rates of \$72 million (\$31 million at LG&E and \$41 million at KU), environmental cost recoveries added to base rates of \$45 million (\$3 million at LG&E and \$42 million at KU), returns from additional environmental capital investments of \$18 million (\$9 million at LG&E and \$9 million at KU) and higher fuel recoveries of \$11 million (\$3 million at LG&E and \$8 million at KU).

The increase in base rates was the result of new KPSC rates effective January 1, 2013 at LG&E and KU. The environmental cost recoveries added to base rates were due to the transfer of the 2005 and 2006 ECR plans into base rates as a result of the 2012 Kentucky rate cases for LG&E and KU. This transfer results in depreciation and other operation and maintenance expenses associated with the 2005 and 2006 ECR plans being excluded from Kentucky Gross Margins in 2013, while the recovery of such costs remain in Kentucky Gross Margins through base rates.

Pennsylvania Gross Delivery Margins

Distribution

Distribution margins increased for the three months ended September 30, 2013 compared with 2012, primarily due to an \$18 million favorable effect of price as a result of higher base rates, effective January 1, 2013, partially offset by unfavorable weather of \$4 million.

Distribution margins increased for the nine months ended September 30, 2013 compared with 2012 due to a \$50 million favorable effect of price, largely comprised of higher base rates, effective January 1, 2013, a favorable weather effect of \$9 million and higher volumes of \$4 million.

Transmission

Transmission margins increased for the three and nine months ended September 30, 2013 compared with 2012, primarily due to increased capital investments and the recovery of additional costs through the FERC formula-based rates.

Unregulated Gross Energy Margins

The increase (decrease) in unregulated gross energy margins for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
<u>Eastern U.S.</u>		
Baseload energy prices	\$ (64)	\$ (310)
Coal prices	(5)	(14)
Nuclear fuel prices	(4)	(14)
Retail electric	(10)	(10)
Nuclear generation volume	(12)	(3)
Full-requirement sales contracts	(6)	4
Gas optimization and storage	5	16
Ironwood acquisition which eliminated tolling expense		17
Intermediate and peaking Spark Spreads and availability	11	18
Net economic availability of coal and hydroelectric plants	(10)	29
Capacity prices	77	124
Other	1	9
Total	<u>\$ (17)</u>	<u>\$ (134)</u>
<u>Western U.S.</u>		
Wholesale energy prices	\$ (10)	\$ (67)
Net economic availability of coal and hydroelectric plants	(8)	(1)
Other	3	4
Total	<u>\$ (15)</u>	<u>\$ (64)</u>
<u>Net Energy Trading Margins</u>		
Gas positions	\$ (3)	\$ (17)
Power positions	15	5
FTRs	9	7
Other	2	(1)
Total	<u>\$ 23</u>	<u>\$ (6)</u>

Utility Revenues

The increase (decrease) in utility revenues for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Domestic:		
PPL Electric (a)	\$ 20	\$ 85
LKE (b)	12	131
Total Domestic	<u>32</u>	<u>216</u>
U.K.:		
Price (c)	74	187
Volume (d)	(10)	18
DPCR4 accrual adjustments (e)	(21)	(45)
Recovery of allowed revenues (f)	(22)	(22)
Foreign currency exchange rates	(9)	(25)
Other	2	3
Total U.K.	<u>14</u>	<u>116</u>
Total	<u>\$ 46</u>	<u>\$ 332</u>

(a) See "Pennsylvania Gross Delivery Margins" for further information.

(b) See "Kentucky Gross Margins" for further information.

(c) The three and nine-month periods were impacted by a price increase effective April 1, 2013. The nine-month period was also impacted by a price increase effective April 1, 2012.

(d) The increase for the nine-month period was primarily due to the favorable effect of weather.

(e) The decrease for the three and nine-month periods was due to a reduction in revenue based on information provided by Ofgem regarding the calculation of line loss incentive/penalty for all network operators related to DPCR4. See Note 6 to the Financial Statements for additional information.

(f) The decrease for the three and nine-month period was due to an accrual for over-recovered revenues as a result of price and weather related volume effects that is not expected to reverse within the regulatory year ending March 31, 2014. Therefore, a liability was recorded and utility revenue was reduced for the amount of the over-recovery in September 2013. These amounts are expected to be refunded within the regulatory year beginning April 1, 2014.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Domestic:		
Brunner Island outage timing	\$ (4)	\$ (23)
Uncollectible accounts (a)		(23)
LKE coal plant outages (b)	(1)	(18)
Montour outage in 2013	15	13
Act 129 costs (c)	(7)	(13)
PUC-reportable storm costs, net of insurance recovery	(8)	(9)
PPL Susquehanna projects		(9)
PPL Susquehanna outages	1	(6)
Ironwood outage in 2013	3	6
LKE adjustments to regulatory assets and liabilities		4
Other generation plants	4	4
Other	8	9
U.K.:		
Third-party engineering (d)	3	5
Network maintenance (e)	10	23
Insurance claim provision release		6
Severance compensation (f)		(8)
Employee related expenses	(1)	(6)
Foreign currency exchange rates	(2)	(4)
Other	(2)	(3)
Total	<u>\$ 19</u>	<u>\$ (52)</u>

(a) The decrease for the nine-month period is primarily due to SMGT filing for protection under Chapter 11 of the U.S. Bankruptcy Code in 2011. \$11 million of damages billed to SMGT were fully reserved in 2012.

(b) The decrease for the three and nine month periods is due to the timing and scope of scheduled outages.

(c) The decrease for the three and nine month periods is due to a reduction in Act 129 energy efficiency and conservation plan costs for Phase 1 programs. Phase 1 ended May 31, 2013.

(d) These costs are offset by revenues reflected in "Utility" on the Statement of Income.

(e) The increase for the three and nine month periods is primarily due to higher vegetation management costs.

(f) The decrease for the nine month period is primarily due to costs incurred in 2012 related to the WPD Midlands reorganization.

Depreciation

The increase (decrease) in depreciation for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Additions to PP&E	\$ 20	\$ 64
LKE lower depreciation rates effective January 1, 2013	(5)	(16)
Ironwood Acquisition		6
Other	(4)	(8)
Total	<u>\$ 11</u>	<u>\$ 46</u>

Other Income (Expense) - net

The \$72 million decrease in other income (expense) - net for the three months ended September 30, 2013 compared with 2012 was primarily due to a decrease of \$70 million from realized and unrealized gains on foreign currency contracts to economically hedge GBP denominated earnings from WPD.

The \$50 million increase in other income (expense) - net for the nine months ended September 30, 2013 compared with 2012 was primarily due to an increase of \$46 million from realized and unrealized gains on foreign currency contracts to economically hedge GBP denominated earnings from WPD.

See Note 12 to the Financial Statements for additional information on other income (expense) - net.

Interest Expense

The increase (decrease) in interest expense for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Long-term debt interest expense (a)	\$ 5	\$ 32
Loss on extinguishment of debt (b)		10
Net amortization of debt discounts, premiums and issuance costs	(4)	(4)
Other	(3)	3
Total	<u>\$ (2)</u>	<u>\$ 41</u>

(a) The increase for the three and nine-month periods was due to debt issuances by PPL Capital Funding in March 2013 and October 2012, and by PPL Electric in July 2013 and August 2012, partially offset by the impact of lower interest rates resulting from the remarketing of the 2010 Equity Units.

The nine-month period also increased due to debt issuances by PPL Capital Funding in June 2012 and by WPD (East Midlands) in April 2012, as well as higher accretion expense on WPD index linked notes and three additional months of interest on debt assumed as part of the Ironwood Acquisition. Partially offsetting these increases was PPL Energy Supply's debt maturity in July 2013.

(b) In May 2013, PPL Capital Funding remarketed and exchanged junior subordinate notes that were originally issued in June 2010 as a component of PPL's 2010 Equity Units.

See Note 7 to the Financial Statements in this Form 10-Q for information on 2013 long-term debt activity and PPL's 2012 Form 10-K for information on 2012 activity.

Income Taxes

The increase (decrease) in income taxes for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Change in pre-tax income at current period tax rates	\$ 36	\$ (31)
State valuation allowance adjustments (a)	36	36
Federal and state tax reserve adjustments (b)	1	(34)
Federal and state tax return adjustments	(4)	(4)
U.S. income tax on foreign earnings net of foreign tax credit (c)	9	3
U.K. Finance Act adjustments (d)	(19)	(19)
Foreign tax reserve adjustments	(2)	3
Net operating loss carryforward adjustments (e)		9
Intercompany Interest on WPD Financing Entities	2	2
State deferred tax rate change (f)	6	17
Other	2	(2)
Total	<u>\$ 67</u>	<u>\$ (20)</u>

- (a) During the three and nine months ended September 30, 2013, PPL recorded a \$38 million increase in state deferred income tax expense related to a deferred tax valuation allowance primarily due to a decrease in projected future taxable income over the remaining carryforward period of Pennsylvania net operating losses.
- (b) In May 2013, the U.S. Supreme Court reversed the December 2011 ruling of the U.S. Court of Appeals for the Third Circuit on the creditability of U.K. Windfall Profits Tax for tax purposes. As a result of this decision, PPL recorded a tax benefit of \$44 million during the nine months ended September 30, 2013. See Note 5 to the Financial Statements for additional information.
- (c) During the three and nine months ended September 30, 2013, PPL recorded a \$10 million and \$24 million increase to income tax expense primarily attributable to a revision in the expected taxable amount of cash repatriation in 2013.

During the nine months ended September 30, 2013, PPL recorded a tax benefit of \$19 million associated with a ruling obtained from the IRS impacting the recalculation of 2010 U.K. earnings and profits that will be reflected on an amended 2010 U.S. tax return.

- (d) The U.K.'s Finance Act 2013, enacted in July 2013, reduced the U.K. statutory income tax rate from 23% to 21%, effective April 1, 2014 and from 21% to 20% effective April 1, 2015. As a result, PPL reduced its net deferred tax liabilities and recognized a \$93 million deferred tax benefit in the third quarter of 2013 related to both rate decreases.

The U.K.'s Finance Act 2012, enacted in July 2012, reduced the U.K. statutory income tax rate from 25% to 24% retroactive to April 1, 2012 and from 24% to 23% effective April 1, 2013. As a result, PPL reduced its net deferred tax liabilities and recognized a \$74 million deferred tax benefit in the third quarter of 2012 related to both rate decreases.

- (e) During the nine months ended September 30, 2012, PPL recorded adjustments to deferred taxes related to net operating loss carryforwards of LKE based on income tax return adjustments.
- (f) During the three and nine months ended September 30, 2012, PPL recorded adjustments related to state deferred tax liabilities.

See Note 5 to the Financial Statements for additional information on income taxes.

PPL Energy Supply: Earnings and Statement of Income Analysis

Earnings

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2013	2012	2013	2012
Net Income Attributable to PPL Energy Supply Member	\$ 124	\$ 54	\$ 172	\$ 382
Special items, after-tax	(6)	(105)	(49)	3

Excluding special items, the decrease in earnings for the three-month period was primarily due to lower baseload energy prices, lower baseload generation and higher operation and maintenance expense, partially offset by higher capacity prices. The decrease for the nine-month period was primarily due to lower baseload energy prices, higher fuel costs and higher depreciation, partially offset by higher capacity prices, higher intermediate and peaking margins, higher baseload generation and lower income taxes.

The table below quantifies the changes in the components of Net Income Attributable to PPL Energy Supply Member between these periods, which reflect reclassifications for items included in Unregulated Gross Energy Margins and certain items that management considers special. See PPL's "Results of Operations - Segment Earnings - Supply Segment" for the details of special items.

	Three Months	Nine Months
Unregulated Gross Energy Margins	\$ (9)	\$ (204)

Interest Expense	4	(8)
Other	(1)	1
Income Taxes	8	66
Special items, after-tax	99	(52)
Total	<u>\$ 70</u>	<u>\$ (210)</u>

Statement of Income Analysis --

Unregulated Gross Energy Margins

"Unregulated Gross Energy Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Income Statement Analysis - Margins" for information on why management believes this measure is useful and for explanations of the underlying drivers of the changes between periods.

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income" for the periods ended September 30.

	2013 Three Months			2012 Three Months		
	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)

Total	\$ 1,450	\$ (1,057)	\$ 393	\$ 1,654	\$ (961)	\$ 693

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

(c) Represents energy-related economic activity as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. For the three and nine months ended September 30, 2012 "Wholesale energy marketing - Realized" and "Energy purchases - Realized" include net pre-tax losses of \$1 million and \$34 million related to the monetization of certain full-requirement sales contracts.

(d) Represents energy-related economic activity, which is subject to fluctuations in value due to market price volatility, as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements.

(e) Includes economic activity related to fuel as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 14 to the Financial Statements. The three and nine months ended September 30, 2012 include pre-tax losses of \$17 million and \$29 million related to coal contract modification payments.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Brunner Island outage timing	\$ (4)	\$ (23)
Uncollectible accounts (a)		(15)
PPL Susquehanna projects		(9)
PPL Susquehanna outages	1	(6)
Ironwood outage in 2013	3	6
Montour outage in 2013	15	13
Other generation plants	4	4
Other	4	9
Total	\$ 23	\$ (21)

- (a) The decrease for the nine-month period is primarily due to SMGT filing for protection under Chapter 11 of the U.S. Bankruptcy Code in 2011. \$11 million of damages billed to SMGT were fully reserved in 2012.

Depreciation

Depreciation increased by \$7 million and \$31 million for the three and nine months ended September 30, 2013 compared with 2012, primarily due to \$8 million and \$28 million related to PP&E additions, and \$6 million attributable to the Ironwood Acquisition for the nine-month period.

Interest Expense

For the nine months ended September 30, 2013 compared with 2012, interest expense increased by \$8 million, primarily due to \$6 million of lower capitalized interest related to the Rainbow hydroelectric redevelopment project.

Income Taxes

The increase (decrease) in income taxes for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Change in pre-tax income at current period tax rates	\$ 50	\$ (122)
State valuation allowance adjustments	2	2
Federal and state tax reserve adjustments (a)		6
Federal and state tax return adjustments	(1)	(1)
State deferred tax rate change (b)	6	17
Other	1	2
Total	\$ 58	\$ (96)

- (a) During the nine months ended September 30, 2013, PPL Energy Supply reversed \$3 million in tax benefits related to a 2008 change in method of accounting for certain expenditures for tax purposes and recorded \$4 million in federal tax reserves related to differences in over (under) payment interest rates applied to audit claims as a result of the U.S. Supreme Court decision related to the Windfall Profits tax.
- (b) During the three and nine months ended September 30, 2012, PPL Energy Supply recorded adjustments related to state deferred tax liabilities.

See Note 5 to the Financial Statements for additional information on income taxes.

PPL Electric: Earnings and Statement of Income Analysis

Earnings

	<u>Three Months Ended</u>		<u>Nine Months Ended</u>	
	<u>September 30,</u>	<u>September 30,</u>	<u>September 30,</u>	<u>September 30,</u>
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Net Income Available to PPL	\$ 51	\$ 33	\$ 160	\$ 95

The increase in earnings for both periods was primarily due to higher electricity base rates that became effective January 1, 2013 and higher transmission margins from additional capital investments, partially offset by higher income taxes. The increase for the nine-month period was also due to lower operation and maintenance expense, partially offset by higher depreciation.

The table below quantifies the changes in the components of Net Income Available to PPL between these periods, which reflect reclassifications for items included in Pennsylvania Gross Delivery Margins.

	<u>Three Months</u>	<u>Nine Months</u>
Pennsylvania Gross Delivery Margins	\$ 31	\$ 92
Other operation and maintenance	8	28
Depreciation	(4)	(13)
Interest Expense	(5)	(7)
Other	(2)	(3)
Income Taxes	(10)	(36)
Distributions on preference stock		4
Total	<u>\$ 18</u>	<u>\$ 65</u>

Statement of Income Analysis --

Pennsylvania Gross Delivery Margins

"Pennsylvania Gross Delivery Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Income Statement Analysis - Margins" for information on why management believes this measure is useful and for explanations of the underlying drivers of the changes between periods.

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income" for the periods ended September 30.

	<u>2013 Three Months</u>			<u>2012 Three Months</u>		
	<u>PA Gross Delivery Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>	<u>PA Gross Delivery Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>

Taxes, other than income	70	7	77	67	5	72
Total Operating Expenses	<u>605</u>	<u>468</u>	<u>1,073</u>	<u>612</u>	<u>481</u>	<u>1,093</u>
Total	<u>\$ 786</u>	<u>\$ (468)</u>	<u>\$ 318</u>	<u>\$ 694</u>	<u>\$ (481)</u>	<u>\$ 213</u>

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Vegetation management	\$ 6	\$ 3
PUC-reportable storm costs, net of insurance recovery	(8)	(9)
Act 129 costs (a)	(7)	(13)
Uncollectible accounts		(3)
Corporate service (b)	(2)	(13)
Rent	(3)	(4)
Other		(1)
Total	\$ (14)	\$ (40)

(a) The decrease was due to a reduction in Act 129 energy efficiency and conservation plan costs for Phase 1 programs. Phase 1 ended May 31, 2013.

(b) The decrease was partially due to storm insurance policy premiums for coverage that was in place in 2012 but was not renewed in 2013.

Depreciation

Depreciation increased by \$4 million and \$13 million for the three and nine months ended September 30, 2013 compared with 2012, primarily due to PP&E additions as part of ongoing investments to enhance system reliability.

Taxes, Other Than Income

Taxes, other than income increased by \$5 million for the nine months ended September 30, 2013 compared with 2012, primarily due to higher Pennsylvania gross receipts tax expense due to higher retail electricity revenue. This tax is included in "Pennsylvania Gross Delivery Margins."

Financing Costs

The increase (decrease) in financing costs for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Long-term debt interest expense (a)	\$ 5	\$ 8
Distributions on Preference Stock (b)		(4)
Other		(1)
Total	\$ 5	\$ 3

(a) The increase was due to debt issuances in August 2012 and July 2013.

(b) The decrease was due to the June 2012 redemption of all 2.5 million shares of preference stock.

Income Taxes

The increase (decrease) in income taxes for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Change in pre-tax income at current period tax rates	\$ 12	\$ 39
Other	(2)	(3)
Total	\$ 10	\$ 36

See Note 5 to the Financial Statements for additional information on income taxes.

LKE: Earnings and Statement of Income Analysis

Earnings

	<u>Three Months Ended</u> <u>September 30,</u>		<u>Nine Months Ended</u> <u>September 30,</u>	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Net Income	\$ 100	\$ 83	\$ 260	\$ 180
Special items, after-tax			2	(1)

Excluding special items, the increases in earnings for both periods were primarily due to higher electricity and gas base rates that went into effect January 1, 2013, returns from additional environmental capital investments and higher fuel recovery, partially offset by higher depreciation (due to environmental costs related to the 2005 and 2006 ECR plans now being included in base rates and excluded from Margins) and higher income taxes. The increase for the three-month period was partially offset by lower sales volumes.

The table below quantifies the components of Net Income between these periods, which reflect reclassifications for items included in Margins and certain items that management considers special. See PPL's "Results of Operations - Segment Earnings - Kentucky Regulated Segment" for details of special items.

	<u>Three Months</u>	<u>Nine Months</u>
Margins	\$ 42	\$ 151

Taxes, other than income	(1)	(2)
Other Income (Expense) - net		7
Interest Expense		1
Income Taxes	(11)	(58)
Special items, after-tax		3
Total	\$ 17	\$ 80

Statement of Income Analysis --

Margins

"Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Income Statement Analysis - Margins" for information on why management believes this measure is useful and explanations of the underlying drivers of the changes between periods. Within PPL's discussion, LKE's Margins are referred to as "Kentucky Gross Margins."

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income" for the periods ended September 30.

	<u>2013 Three Months</u>			<u>2012 Three Months</u>		
	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>
Operating Revenues	\$ 744		\$ 744	\$ 732		\$ 732
Operating Expenses						
Fuel	237		237	249		249
Energy purchases	23		23	27		27
Other operation and maintenance	26	\$ 162	188	28	\$ 158	186
Depreciation	1	83	84	13	74	87
Taxes, other than income		12	12		11	11
Total Operating Expenses	287	257	544	317	243	560
Total	\$ 457	\$ (257)	\$ 200	\$ 415	\$ (243)	\$ 172

	<u>2013 Nine Months</u>			<u>2012 Nine Months</u>		
	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>
Operating Revenues	\$ 2,226		\$ 2,226	\$ 2,095		\$ 2,095
Operating Expenses						
Fuel	684		684	677		677
Energy purchases	146		146	135		135
Other operation and maintenance	74	\$ 508	582	76	\$ 513	589
Depreciation	3	246	249	39	220	259
Taxes, other than income		36	36		34	34
Total Operating Expenses	907	790	1,697	927	767	1,694
Total	\$ 1,319	\$ (790)	\$ 529	\$ 1,168	\$ (767)	\$ 401

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Coal plant outages (a)	\$ (1)	\$ (18)
Administrative and general (b)	3	8
Adjustments to regulatory assets and liabilities		4
Coal plant operations		3
Other		(4)
Total	<u>\$ 2</u>	<u>\$ (7)</u>

(a) Decrease is due to the timing and scope of scheduled outages.

(b) Increase for the nine-month period is primarily due to an increase in outside services of \$8 million.

Depreciation

The increase (decrease) in depreciation for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Lower depreciation rates effective January 1, 2013	\$ (5)	\$ (16)
Additions to PP&E	2	6
Total	<u>\$ (3)</u>	<u>\$ (10)</u>

Other Income (Expense) - net

Other income (expense) - net increased by \$8 million for the nine months ended September 30, 2013 compared with 2012 primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.

Income Taxes

Income taxes increased by \$11 million and \$64 million for the three and nine months ended September 30, 2013 compared with 2012 primarily due to the change in pre-tax income at current period tax rates.

See Note 5 to the Financial Statements for additional information on income taxes.

Income (Loss) from Discontinued Operations (net of income taxes)

Income (loss) from discontinued operations increased by \$7 million for the nine months ended September 30, 2013 compared with 2012. The increase was primarily related to an adjustment to the estimated liability for indemnifications related to the 2009 termination of the WKE lease recorded in 2012.

LG&E: Earnings and Statement of Income Analysis

Earnings

	<u>Three Months Ended</u> <u>September 30,</u>		<u>Nine Months Ended</u> <u>September 30,</u>	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Net Income	\$ 49	\$ 43	\$ 122	\$ 94

The increases in earnings for both periods were primarily due to higher electricity and gas base rates that went into effect January 1, 2013, returns from additional environmental capital investments and higher fuel recovery. The increase for the three-month period was partially offset by lower sales volumes. The increase for the nine-month period was partially offset by higher income taxes.

The table below quantifies the changes in the components of Net Income between these periods, which reflect reclassifications for items included in Margins.

Statement of Income Analysis --

Margins

"Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Income Statement Analysis - Margins" for information on why management believes this measure is useful and explanations of the underlying drivers of the changes between periods. Within PPL's discussion, LG&E's Margins are included in "Kentucky Gross Margins."

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income" for the periods ended September 30.

	<u>2013 Three Months</u>			<u>2012 Three Months</u>		
	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>
Operating Revenues	\$ 343		\$ 343	\$ 333		\$ 333
Operating Expenses						
Fuel	100		100	100		100
Energy purchases	20		20	21		21
Other operation and maintenance	13	\$ 80	93	13	\$ 74	87
Depreciation		37	37	1	37	38
Taxes, other than income		6	6		6	6
Total Operating Expenses	<u>133</u>	<u>123</u>	<u>256</u>	<u>135</u>	<u>117</u>	<u>252</u>
Total	<u>\$ 210</u>	<u>\$ (123)</u>	<u>\$ 87</u>	<u>\$ 198</u>	<u>\$ (117)</u>	<u>\$ 81</u>

	<u>2013 Nine Months</u>			<u>2012 Nine Months</u>		
	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>	<u>Margins</u>	<u>Other (a)</u>	<u>Operating Income (b)</u>
Operating Revenues	\$ 1,049		\$ 1,049	\$ 990		\$ 990
Operating Expenses						
Fuel	284		284	281		281
Energy purchases	135		135	119		119
Other operation and maintenance	34	\$ 244	278	36	\$ 241	277

Taxes, other than income		18	18		17	17
Total Operating Expenses	<u>454</u>	<u>371</u>	<u>825</u>	<u>438</u>	<u>370</u>	<u>808</u>
Total	<u>\$ 595</u>	<u>\$ (371)</u>	<u>\$ 224</u>	<u>\$ 552</u>	<u>\$ (370)</u>	<u>\$ 182</u>

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Coal plant outages (a)	\$ 1	\$ (6)
Administrative and general (b)	1	6
Distribution maintenance	2	2
Other	2	(1)
Total	<u>\$ 6</u>	<u>\$ 1</u>

(a) Increase (decrease) is due to the timing and scope of scheduled outages.

(b) Increase for the nine-month period is primarily due to an increase in outside services of \$5 million.

Depreciation

The increase (decrease) in depreciation for the periods ended September 30, 2013 compared with 2012 was due to:

	<u>Three Months</u>	<u>Nine Months</u>
Lower depreciation rates effective January 1, 2013	\$ (2)	\$ (6)
Additions to PP&E	1	2
Total	<u>\$ (1)</u>	<u>\$ (4)</u>

Income Taxes

Income taxes increased by \$15 million for the nine months ended September 30, 2013 compared with 2012 primarily due to the change in pre-tax income at current period tax rates.

See Note 5 to the Financial Statements for additional information on income taxes.

KU: Earnings and Statement of Income Analysis

Statement of Income Analysis --

Margins

"Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Income Statement Analysis - Margins" for information on why management believes this measure is useful and explanations of the underlying drivers of the changes between periods. Within PPL's discussion, KU's Margins are included in "Kentucky Gross Margins."

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income" for the periods ended September 30.

	2013 Three Months			2012 Three Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 414		\$ 414	\$ 411		\$ 411
Operating Expenses						
Fuel	137		137	149		149
Energy purchases	16		16	18		18
Other operation and maintenance	13	\$ 78	91	16	\$ 77	93
Depreciation	1	45	46	12	37	49
Taxes, other than income		6	6		5	5
Total Operating Expenses	167	129	296	195	119	314
Total	\$ 247	\$ (129)	\$ 118	\$ 216	\$ (119)	\$ 97

	2013 Nine Months			2012 Nine Months		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 1,229		\$ 1,229	\$ 1,165		\$ 1,165
Operating Expenses						
Fuel	400		400	396		396
Energy purchases	63		63	76		76
Other operation and maintenance	40	\$ 246	286	41	\$ 245	286
Depreciation	2	136	138	36	109	145
Taxes, other than income		18	18		17	17
Total Operating Expenses	505	400	905	549	371	920
Total	\$ 724	\$ (400)	\$ 324	\$ 616	\$ (371)	\$ 245

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance expense for the periods ended September 30, 2013 compared with 2012 was due to:

	Three Months	Nine Months
Coal plant outages (a)	\$ (2)	\$ (12)
Administrative and general (b)	2	6
Coal plant operations		4
Adjustments to regulatory assets and liabilities		4
Other	(2)	(2)
Total	\$ (2)	\$ (7)

(a) Decrease is due to the timing and scope of scheduled outages.

(b) Increase for the nine-month period is primarily due to an increase in outside services of \$5 million.

Depreciation

The increase (decrease) in depreciation for the periods ended September 30, 2013 compared with 2012 was due to:

	Three Months	Nine Months
Lower depreciation rates effective January 1, 2013	\$ (4)	\$ (10)
Additions to PP&E	1	4
Other		(1)
Total	\$ (3)	\$ (7)

Other Income (Expense) - net

Other income (expense) - net increased by \$4 million for the nine months ended September 30, 2013 compared with 2012 primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.

Income Taxes

Income taxes increased by \$6 million and \$31 million for the three and nine months ended September 30, 2013 compared with 2012 primarily due to the change in pre-tax income at current period tax rates.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

Financial Condition and the remainder of this Item 2 are presented on a combined basis, providing information, as applicable, for all Registrants.

Liquidity and Capital Resources

(All Registrants)

The Registrants had the following at:

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
<u>September 30, 2013</u>

Operating Activities

The components of the change in cash provided by (used in) operating activities for the nine months ended September 30, 2013 compared with 2012 were as follows.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Change - Cash Provided (Used)						
Net income	\$ 58	\$ (210)	\$ 61	\$ 80	\$ 28	\$ 53
Non-cash components	244	169	42	15	(1)	(9)
Net income, adjusted for non-cash components	302	(41)	103	95	27	44
Working capital	(284)	42	(45)	(21)	24	(26)
Defined benefit funding	21	(37)	(34)	(93)	(19)	(42)
Other operating activities	90	(55)	42	86	53	33
Total	<u>\$ 129</u>	<u>\$ (91)</u>	<u>\$ 66</u>	<u>\$ 67</u>	<u>\$ 85</u>	<u>\$ 9</u>

For PPL, non-cash components of net income primarily consisted of \$105 million related to non-cash hedging activities, \$46 million related to increased depreciation and \$45 million related to 2013 charges to adjust WPD's line loss accrual. The decrease in cash from changes in components of working capital was primarily due to increases in accounts receivable (primarily due to extended payment terms at LG&E and KU and base rate increases effective in 2013 at PPL Electric, LG&E and KU), returns of counterparty collateral and changes to certain tax-related accounts. The increase in cash from other operating activities was primarily due to \$98 million in proceeds from the settlement of forward-starting interest rate swaps.

For PPL Energy Supply, non-cash components of net income primarily consisted of \$135 million related to non-cash hedging activities and \$31 million related to increased depreciation. The increase in cash from changes in components of working capital was primarily due to decreases in accounts receivable (primarily affiliate receivables), and lower unbilled revenue (primarily due to decreases in power swap sales), partially offset by returns of counterparty collateral. The decrease in cash from other operating activities was partially due to changes to certain tax-related accounts.

For PPL Electric, non-cash components of net income primarily consisted of \$31 million related to an increase in deferred tax expense and \$13 million related to increased depreciation. The decrease in cash from changes in components of working capital was primarily due to increases in accounts receivable (primarily due to the base rate increase effective January 1, 2013, partially offset by a decrease in affiliate receivables). The increase in cash from other operating activities was partially due to changes to certain tax-related accounts.

LKE's decrease in working capital was driven primarily by increases in accounts receivable and unbilled revenues due to extended payment terms and higher rates, offset by an increase in accounts payable due to timing of fuel purchase commitments and payments. The increase in cash from LKE's other operating activities was driven primarily by \$98 million in proceeds from the settlement of interest rate swaps.

LG&E's increase in working capital was driven primarily by lower fuel inventory purchases in 2013 and an increase in accounts payable due to timing of fuel purchase commitments and payments, offset by increases in accounts receivable and unbilled revenues due to extended payment terms and higher rates. The increase in cash from LG&E's other operating activities was driven primarily by \$49 million in proceeds from the settlement of interest rate swaps.

KU's decrease in working capital was driven primarily by higher fuel inventory purchases in 2013 and increases in accounts receivable and unbilled revenues due to extended payment terms and higher rates, offset by an increase in accounts payable due to timing of fuel purchase commitments and payments. The increase in cash from KU's other operating activities was driven primarily by \$49 million in proceeds from the settlement of interest rate swaps.

Investing Activities

The primary use of cash within investing activities is expenditures for PP&E. The change in these expenditures for the nine months ended September 30, 2013 compared with 2012 was as follows.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
(Increase) Decrease	\$ (690)	\$ 119	\$ (281)	\$ (366)	\$ (183)	\$ (181)

The increase in expenditures for PP&E was primarily due to projects to enhance system reliability at WPD and PPL Electric, the Susquehanna-Roseland transmission project at PPL Electric, environmental projects at LG&E's Mill Creek and KU's Ghent plants and construction of Cane Run Unit 7 for LG&E and KU.

Expenditures for PP&E decreased at PPL Energy Supply primarily related to the Rainbow hydroelectric redevelopment and Holtwood expansion projects and timing of nuclear fuel purchases.

For PPL Energy Supply and PPL Electric, the change in cash provided by (used in) investing activities was also impacted primarily by the change in notes receivable from affiliates of (\$198) million and \$210 million.

Financing Activities

The components of the change in cash provided by (used in) financing activities for the nine months ended September 30, 2013 compared with 2012 was as follows.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Change - Cash Provided (Used)						
Debt issuances/retirements, net	\$ (166)	\$ (303)	\$ 99			
Stock issuances/redemptions, net	1,531		250			
Dividends	(22)		(19)		\$ (20)	\$ (15)
Capital contributions/distributions, net		833	55	\$ 125	54	92
Change in short-term debt, net	(97)	(311)		87	17	70
Other financing activities	(40)		6	28	1	
Total	\$ 1,206	\$ 219	\$ 391	\$ 240	\$ 52	\$ 147

See Note 7 to the Financial Statements in this Form 10-Q for information on 2013 short and long-term debt activity, equity transactions and dividends. See the Registrant's 2012 Form 10-K for information on 2012 activity.

Credit Facilities

The Registrants maintain credit facilities to provide liquidity and to backstop commercial paper issuances. The total committed borrowing capacity and the use of the borrowings under these facilities at September 30, 2013 was as follows.

External (All Registrants)

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Letters of Credit Issued and Commercial Paper Backup</u>	<u>Unused Capacity</u>
PPL Energy Supply Credit Facilities (a)	\$ 3,150		\$ 170	\$ 2,980
PPL Electric Credit Facilities (a)	300		1	299
LG&E Syndicated Credit Facility (a)	500		72	428
KU Credit Facilities (a)	598		338	260
Total LKE (a) (b)	1,098		410	688
Total PPL Domestic Credit Facilities (a)	<u>\$ 4,548</u>		<u>\$ 581</u>	<u>\$ 3,967</u>
Total WPD Credit Facilities (c)	£ 1,055	£ 184		£ 871

(a) The commitments under credit facilities are provided by a diverse bank group with no one bank and its affiliates providing an aggregate commitment of more than the following percentages of the total committed capacity: 8% for PPL's domestic credit facilities, 9% for PPL Energy Supply, 5% for PPL Electric, 13% for LKE, 6% for LG&E and 22% for KU.

(b) In October 2013, LKE entered into a \$75 million syndicated credit facility that expires in October 2018.

(c) At September 30, 2013, the USD equivalent of unused capacity under WPD's committed credit facilities was \$1.3 billion. The commitments under WPD's credit facilities are provided by a diverse bank group with no one bank providing more than 13% of the total committed capacity.

In September 2013, PPL Electric terminated its asset-backed commercial paper program sponsored by a financial institution. See Note 7 in PPL's and PPL Electric's 2012 Form 10-K for more information regarding the asset-backed commercial paper program.

See Note 7 to the Financial Statements for further discussion of the Registrants' credit facilities.

Intercompany (All Registrants except PPL)

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Unused Capacity</u>
PPL Energy Supply Credit Facility	\$ 200		\$ 200
PPL Electric Credit Facility	100		100
LKE Credit Facility (a)	300	\$ 52	248
LG&E Money Pool (b)	500		500
KU Money Pool (b)	500		500

(a) In October 2013, LKE reduced the size of the intercompany credit facility by \$75 million.

(b) LG&E and KU participate in an intercompany money pool agreement whereby LKE, LG&E and/or KU make available funds up to \$500 million at an interest rate based on a market index of commercial paper issues.

See Note 11 to the Financial Statements for further discussion of intercompany credit facilities.

Commercial Paper (All Registrants)

PPL Energy Supply, PPL Electric, LG&E and KU maintain commercial paper programs to provide an additional financing source to fund their short-term liquidity needs, if and when necessary. Commercial paper issuances are supported by the respective Registrant's Syndicated Credit Facility.

When outstanding, the amounts are reflected in "Short-term debt" on the Balance Sheets. The following amounts were outstanding at:

	<u>September 30, 2013</u>			<u>December 31, 2012</u>	
	<u>Capacity</u>	<u>Commercial Paper Issuances</u>	<u>Unused Capacity</u>	<u>Commercial Paper Issuances</u>	
PPL Energy Supply	\$ 750		\$ 750	\$	356
PPL Electric	300		300		
LG&E (a)	350	\$ 72	278		55
KU (a)	350	140	210		70
Total LKE	<u>700</u>	<u>212</u>	<u>488</u>		<u>125</u>
Total PPL	<u>\$ 1,750</u>	<u>\$ 212</u>	<u>\$ 1,538</u>	<u>\$</u>	<u>481</u>

(a) In April 2013, the capacity was increased from \$250 million.

Long-term Debt and Equity Securities

(PPL and Kentucky Registrants)

During 2012, LG&E and KU received KPSC and other state approvals to issue up to \$350 million for LG&E and \$300 million for KU of first mortgage bond indebtedness in 2013. The proceeds will be used to fund capital expenditures and for other general corporate purposes.

(PPL, PPL Energy Supply and PPL Electric)

The long-term debt and equity securities activity through September 30, 2013 was:

	<u>Debt</u>		<u>Net Stock</u>
	<u>Issuances (a)</u>	<u>Retirements</u>	<u>Issuances (b)</u>
Cash Flow Impact:			
PPL	\$ 862	\$ (309)	\$ 1,335
PPL Energy Supply		(309)	
PPL Electric	348		
Non-cash Transactions:			
PPL (c)	\$ 1,317		

(a) Issuances are net of pricing discounts, where applicable and exclude the impact of debt issuance costs.

(b) Net stock issuances include activity related to various stock and incentive compensation plans and other equity transactions. See Overview - "Financial and Operational Developments" for information regarding equity forward agreements and the 2010 Equity Units. PPL has no plans to issue new shares of common stock for the remainder of 2013. The activity is net of the 2013 repurchase of PPL common stock.

- (c) The debt issuances primarily include \$1.150 billion relating to the remarketing of Junior Subordinated Notes that were issued as a component of PPL's 2010 Equity Units and simultaneously exchanged into Senior Notes.

See Note 7 to the Financial Statements for further discussion of Long-term Debt and Equity Securities.

Common Stock Dividends (PPL)

In August 2013, PPL declared its quarterly common stock dividend, payable October 1, 2013, at 36.75 cents per share (equivalent to \$1.47 per annum). Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Rating Agency Actions

(All Registrants)

Fitch, Moody's and S&P periodically review the credit ratings on the debt securities of the Registrants and their subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of the Registrants and their subsidiaries are based on information provided by the Registrants and other sources. The ratings of Fitch, Moody's and S&P are not a recommendation to buy, sell or hold any securities of the Registrants or their subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities.

A downgrade in the Registrants' or their subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets. The Registrants and their subsidiaries have no credit rating triggers that would result in the reduction of access to capital markets or the acceleration of maturity dates of outstanding debt.

The rating agencies took the following actions related to the Registrants and their subsidiaries during 2013:

(PPL)

In March 2013, Fitch, Moody's and S&P assigned ratings of BB+, Ba1 and BB+ to PPL Capital Funding's \$450 million 5.90% Junior Subordinated Notes due 2073. Fitch also assigned a stable outlook to these notes.

In May 2013, Fitch, Moody's and S&P assigned ratings of BBB, Baa3 and BBB- to PPL Capital Funding's \$250 million 1.90% Senior Notes due 2018, \$600 million 3.40% Senior Notes due 2023 and \$300 million 4.70% Senior Notes due 2043. Fitch also assigned a stable outlook to these notes.

In September 2013, Fitch affirmed the BBB-, issuer default rating, BBB, senior unsecured rating and stable outlook at PPL WW.

In September 2013, Fitch affirmed the BBB+, issuer default rating, A-, senior unsecured rating, F2 short-term issuer default rating and stable outlook at WPD (South Wales) WPD (South West).

In September 2013, Moody's and S&P assigned ratings of Baa1 and BBB to WPD (East Midlands') £65 million 1.676% Index-Linked Senior Notes due 2052.

In October 2013, Moody's and S&P assigned ratings of Baa1 and BBB to WPD (West Midlands') £400 million 3.875% Senior Notes due 2024.

(PPL and PPL Energy Supply)

In February 2013, Moody's upgraded its rating, from B2 to Ba1, and revised the outlook from under review to stable for PPL Ironwood.

In April 2013, Fitch affirmed the BBB- rating and stable outlook on PPL Montana's pass-through trust certificates due 2020.

In July 2013, Moody's withdrew its rating and outlook for PPL Ironwood.

In July 2013, S&P lowered its rating, from BBB- to BB+ and retained the negative outlook for PPL Montana's pass-through trust certificates due 2020.

In August 2013, Moody's affirmed the Baa3 rating and revised the outlook from stable to negative for PPL Montana's pass through trust certificates due 2020.

In September 2013, S&P affirmed the BB+ rating and revised the outlook from negative to stable for PPL Montana's pass through trust certificates due 2020.

(PPL and PPL Electric)

In July 2013, Fitch, Moody's and S&P assigned ratings of A-, A3 and A- to PPL Electric's \$350 million 4.75% First Mortgage Bonds due 2043. Fitch also assigned a stable outlook to these notes and S&P assigned a recovery rating of 1+.

(PPL, LKE and KU)

In July 2013, S&P confirmed the AA+ ratings for KU's 2000 Series A Solid Waste Disposal Facility Revenue Bonds and KU's 2004 Series A, 2006 Series B and 2008 Series A Environmental Facilities Revenue Bonds. S&P also confirmed the A-1+ short term rating on these Bonds.

Ratings Triggers

(All Registrants except PPL Electric)

Various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, tolling agreements (for PPL and PPL Energy Supply) and interest rate and foreign currency (for PPL) instruments, contain provisions that require the posting of additional collateral or permit the counterparty to terminate the contract, if PPL's, PPL Energy Supply's, LKE's, LG&E's or KU's or their subsidiaries' credit rating, as applicable, were to fall below investment grade. See Note 14 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at September 30, 2013.

(All Registrants)

For additional information on the Registrants' liquidity and capital resources, see "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," in the Registrants' 2012 Form 10-K.

Risk Management

Market Risk

(All Registrants)

See Notes 13 and 14 to the Financial Statements for information about the Registrants' risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

(PPL and PPL Energy Supply)

PPL Energy Supply segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL Energy Supply's competitive generation assets and full-requirement sales and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power).

Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. See Note 14 to the Financial Statements for additional information.

To hedge the impact of market price volatility on PPL Energy Supply's energy-related assets, liabilities and other contractual arrangements, PPL Energy Supply both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL Energy Supply's non-trading commodity derivative contracts range in maturity through 2019.

The following table sets forth the changes in the net fair value of non-trading commodity derivative contracts for the periods ended September 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Nine Months	
	2013	2012	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 285	\$ 961	\$ 473	\$ 1,082
Contracts realized or otherwise settled during the period	(95)	(224)	(332)	(764)
Fair value of new contracts entered into during the period (a)	2	(11)	48	1
Other changes in fair value	25	(101)	28	306
Fair value of contracts outstanding at the end of the period	<u>\$ 217</u>	<u>\$ 625</u>	<u>\$ 217</u>	<u>\$ 625</u>

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of non-trading commodity derivative contracts at September 30, 2013, based on the observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				Total Fair Value
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	
Prices based on significant observable inputs (Level 2)	\$ 166	\$ 11	\$ (2)	\$ 5	\$ 180
Prices based on significant unobservable inputs (Level 3)	12	21	4		37
Fair value of contracts outstanding at the end of the period	<u>\$ 178</u>	<u>\$ 32</u>	<u>\$ 2</u>	<u>\$ 5</u>	<u>\$ 217</u>

PPL Energy Supply sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL Energy Supply were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties (or their counterparties) with which it has energy contracts and other factors could affect PPL Energy Supply's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL Energy Supply attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

(PPL and Kentucky Registrants)

LG&E's and KU's rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E and KU are subject to commodity price risk for only a small portion of on-going business operations. LG&E and KU sell excess economic generation to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. See Note 14 to the Financial Statements for additional disclosures.

(PPL and PPL Energy Supply)

Commodity Price Risk (Trading)

PPL Energy Supply's trading commodity derivative contracts range in maturity through 2020. The following table sets forth changes in the net fair value of trading commodity derivative contracts for the periods ended September 30. See Notes 13 and 14 to the Financial Statements for additional information.

	Gains (Losses)			
	Three Months		Nine Months	
	2013	2012	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 18	\$ 17	\$ 29	\$ (4)
Contracts realized or otherwise settled during the period	(3)	17	(5)	16
Fair value of new contracts entered into during the period (a)	12	13	(4)	18
Other changes in fair value	1	(15)	8	2
Fair value of contracts outstanding at the end of the period	<u>\$ 28</u>	<u>\$ 32</u>	<u>\$ 28</u>	<u>\$ 32</u>

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of trading commodity derivative contracts at September 30, 2013, based on the observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				Total Fair Value
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	
Prices quoted in active markets for identical instruments (Level 1)	\$ 3				\$ 3
Prices based on significant observable inputs (Level 2)	5	\$ 8	\$ 2		15
Prices based on significant unobservable inputs (Level 3)	2	4	1	\$ 3	10
Fair value of contracts outstanding at the end of the period	<u>\$ 10</u>	<u>\$ 12</u>	<u>\$ 3</u>	<u>\$ 3</u>	<u>\$ 28</u>

VaR Models

A VaR model is utilized to measure commodity price risk in unregulated gross energy margins for the non-trading and trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's disciplined hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for the nine months ended September 30, 2013 was as follows.

	Trading VaR	Non-Trading VaR
95% Confidence Level, Five-Day Holding Period		
Period End	\$ 6	\$ 6
Average for the Period	4	8
High	7	10
Low	2	5

The trading portfolio includes all proprietary trading positions, regardless of the delivery period. All positions not considered proprietary trading are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the non-trading and trading FTR positions was insignificant at September 30, 2013.

Interest Rate Risk (All Registrants)

The Registrants and their subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. The Registrants and their subsidiaries utilize various financial derivative instruments to adjust the mix of fixed and floating interest rates in their debt portfolios, adjust the duration of their debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in the absolute level of interest rates.

The following interest rate hedges were outstanding at September 30, 2013.

	<u>Exposure Hedged</u>	<u>Fair Value, Net - Asset (Liability) (a)</u>	<u>Effect of a 10% Adverse Movement in Rates (b)</u>	<u>Maturities Ranging Through</u>
PPL				
Cash flow hedges				
Interest rate swaps (c)	\$ 2,264	\$ 68	\$ (92)	2044
Cross-currency swaps (d)	1,262	26	(171)	2028
Economic activity				
Interest rate swaps (e)	179	(41)	(3)	2033
LKE				
Cash flow hedges				
Interest rate swaps (c)	500	(14)	(36)	2043
Economic activity				
Interest rate swaps (e)	179	(41)	(3)	2033
LG&E				
Cash flow hedges				
Interest rate swaps (c)	250	(7)	(18)	2043
Economic activity				
Interest rate swaps (e)	179	(41)	(3)	2033
KU				
Cash flow hedges				
Interest rate swaps (c)	250	(7)	(18)	2043

(a) Includes accrued interest, if applicable.

(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability. Sensitivities represent a 10% adverse movement in interest rates, except for cross-currency swaps which also includes foreign currency exchange rates.

(c) Changes in the fair value of such cash flow hedges are recorded in equity or as regulatory assets or liabilities, if recoverable through rates. The changes in fair value of these instruments are then reclassified into earnings in the same period during which the item being hedged affects earnings.

(d) Cross-currency swaps are utilized to hedge the interest payments and principal of WPD's U.S. dollar-denominated senior notes. Changes in the fair value of these instruments are recorded in equity and reclassified into earnings in the same period during which the item being hedged affects earnings.

(e) Realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities.

The Registrants are exposed to a potential increase in interest expense and to changes in the fair value of their debt portfolios. The estimated impact of a 10% adverse movement in interest rates at September 30, 2013 is shown below.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
Increase to interest expense of 10% increase in interest rates	Not Significant	Not Significant	Not Significant	Not Significant	Not Significant	Not Significant
Increase in fair value of 10% decrease in interest rates	\$ 682	\$ 50	\$ 120	\$ 111	\$ 26	\$ 67

Foreign Currency Risk (PPL)

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL's domestic operations may make purchases of equipment in currencies other than U.S. dollars.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

The following foreign currency hedges were outstanding at September 30, 2013.

	<u>Exposure Hedged</u>	<u>Fair Value, Net - Asset (Liability)</u>	<u>Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)</u>	<u>Maturities Ranging Through</u>
Net investment hedges (b)	£ 320	\$ (11)	\$ (51)	2015
Economic activity (c)	1,350	(55)	(208)	2015

(a) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.

- (b) To protect the value of a portion of its net investment in WPD, PPL executes forward contracts to sell GBP. The positions outstanding exclude the amount of intercompany loans classified as net investment hedges. See Note 14 to the Financial Statements for additional information.
- (c) To economically hedge the translation of expected income denominated in GBP to U.S. dollars, PPL enters into a combination of average rate forwards and average rate options to sell GBP.

NDT Funds - Securities Price Risk (PPL and PPL Energy Supply)

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the PPL Susquehanna nuclear plant (Susquehanna). At September 30, 2013, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on the Balance Sheet. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are primarily exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its nuclear decommissioning trust policy statement. At September 30, 2013, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated \$60 million reduction in the fair value of the trust assets. See Notes 13 and 17 to the Financial Statements for additional information regarding the NDT funds.

Credit Risk *(All Registrants)*

See Notes 13 and 14 to the Financial Statements in this Form 10-Q and "Risk Management - Energy Marketing & Trading and Other - Credit Risk" in PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's 2012 Form 10-K and "Risk Management" in PPL Electric's 2012 Form 10-K for additional information.

Foreign Currency Translation *(PPL)*

The value of the British pound sterling fluctuates in relation to the U.S. dollar. Changes in this exchange rate resulted in a foreign currency translation loss of \$159 million for the nine months ended September 30, 2013, which primarily reflected a \$454 million reduction to PP&E and goodwill offset by a reduction of \$295 million to net liabilities. Changes in this exchange rate resulted in a foreign currency translation gain of \$53 million for the nine months ended September 30, 2012, which primarily reflected a \$123 million increase to PP&E and goodwill offset by an increase of \$70 million to net liabilities. The impact of foreign currency translation is recorded in AOCI.

Related Party Transactions *(All Registrants)*

The Registrants are not aware of any material ownership interests or operating responsibility by senior management of the Registrants in outside partnerships, including leasing transactions with variable interest entities or other entities doing business with the Registrants.

See Note 11 to the Financial Statements for additional information on related party transactions for PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

Acquisitions, Development and Divestitures *(All Registrants)*

The Registrants from time to time evaluate opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. See Note 8 to the Financial Statements for information on the more significant activities.

Environmental Matters

(All Registrants)

Extensive federal, state and local environmental laws and regulations are applicable to PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of the Registrants' businesses. The cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed by the relevant agencies. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the costs for their products or their demand for the Registrants' services.

The following is a discussion of the more significant environmental matters. See Note 10 to the Financial Statements in this Form 10-Q and "Item 1. Business - Environmental Matters" in the Registrants' 2012 Form 10-K for additional information on environmental matters.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a new proposal for new power plants by September 20, 2013, with a final rule to be issued in a timely fashion thereafter, and to issue proposed standards for existing power plants by June 1, 2014 with a final rule by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016.

The EPA's re-proposal for new power plants was released on September 20, 2013. The EPA's dependence on carbon capture and sequestration, a technology which is not presently commercially viable, effectively precludes the construction of new coal plants. The proposal is further problematic as the proposed standards for new gas plants may not be achievable at all times. PPL will comment on the rule to this effect. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and state implementation plans.

Additionally, the Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may lead to more costly regulatory requirements. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect PPL, PPL Electric, LKE, LG&E and KU and others in the industry as transmission system modifications to improve the ability to withstand major storms may be needed in order to meet those requirements.

Climate Change

Physical effects associated with possible climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage, as applicable, to the Registrants' generation assets, electricity transmission and distribution systems, as well as impacts on the Registrants' customers. In addition, changed weather patterns could potentially reduce annual rainfall in areas where PPL, PPL Energy Supply, LKE, LG&E and KU have hydroelectric generating facilities or where river water is used to cool their fossil and nuclear (as applicable) powered generators. The Registrants cannot currently predict whether their businesses will experience these potential climate change-related risks or estimate the potential cost of their related consequences.

(All Registrants except PPL Electric)

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous waste) under existing solid waste regulations. A final rulemaking is currently expected by the end of 2014, as a result of litigation by environmental groups. Regulations could impact handling, disposal and/or beneficial use of CCRs. The financial and operational impact is expected to be material if CCRs are regulated as hazardous waste, and significant if regulated as non-hazardous, in accordance with the proposed rule.

In July 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from issuing final CCR regulations and would set non-hazardous CCR standards under RCRA and authorize state permit programs. It remains uncertain whether similar legislation will likely be passed by the U.S. Senate.

Effluent Limitation Guidelines (ELGs)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations also contain some requirements that would affect the inspection and operation of CCR facilities, if finalized. The proposal contains several alternative approaches, some of which could significantly impact PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's coal-fired plants. PPL, PPL Energy Supply, LKE, LG&E and KU worked with industry groups to comment on the proposed regulation on September 20, 2013. The final regulation is expected in May 2014. At the present time, PPL, PPL Energy Supply, LKE, LG&E and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

316(b) Cooling Water Intake Structure Rule

In April 2011, the EPA published a draft regulation under Section 316(b) of the Clean Water Act, which regulates cooling water intakes for power plants. The draft rule has two provisions: requiring installation of Best Technology Available (BTA) to reduce mortality of aquatic organisms that are pulled into the plant cooling water system (entrainment), and imposing standards for reduction of mortality of aquatic organisms trapped on water intake screens (impingement). A final rule is expected to be issued in November 2013. The proposed regulation would apply to nearly all PPL-owned steam electric generation plants in Pennsylvania, Kentucky, and Montana, potentially even including those equipped with closed-cycle cooling systems. PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's compliance costs could be significant, especially if the final rule requires closed-cycle systems at plants that do not currently have them or conversions of once-through systems to closed-cycle.

MATS

The EPA finalized MATS requiring fossil-fuel fired plants to reduce emissions of mercury and other hazardous air pollutants by April 16, 2015. The rule is being challenged by industry groups and states. The EPA has subsequently proposed changes to the rule with respect to new sources to address the concern that the rule effectively precludes construction of any new coal-fired plants. PPL, PPL Energy Supply, LKE, LG&E and KU are generally well-positioned to comply with MATS, primarily due to recent investments in environmental controls at PPL Energy Supply and approved ECR plans to install additional controls at some of LG&E's and KU's Kentucky plants. Additionally, PPL Energy Supply is evaluating chemical additive systems for mercury control at Brunner Island, and modifications to existing controls at Colstrip for improved particulate matter reductions. In September 2012, PPL Energy Supply announced its intention to place its Corette plant in long-term reserve status beginning in April 2015 due to expected market conditions and costs to comply with MATS. Also, PPL has received approval for two compliance extensions in Kentucky, and has requested an extension for one of its plants in Pennsylvania. Other extension requests are under consideration.

In connection with a unanimous settlement agreement filed with the KPSC in November 2011, KU agreed to defer the requested approval for certain environmental upgrades to Units 1 and 2 at its E.W. Brown generating plant which represented approximately \$200 million in capital costs. LG&E and KU are evaluating, among other measures, chemical additive systems for mercury control at Trimble County and Brown plants. These measures, combined with the completion of recent feasibility studies conducted based on current market conditions, provide alternative compliance options for KU on Units 1 and 2 at the E.W. Brown station.

The anticipated retirements of certain coal-fired electricity generating units are in response to this and other environmental regulations.

CSAPR and CAIR

In 2011, the EPA finalized its CSAPR regulating emissions of nitrogen oxide and sulfur dioxide through new allowance trading programs which were to be implemented in two phases (2012 and 2014). Like its predecessor, the CAIR, CSAPR targeted sources in the eastern U.S. In December 2011, the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit Court) stayed implementation of CSAPR, leaving CAIR in place. Subsequently, in August 2012, the D.C. Circuit Court vacated and remanded CSAPR back to the EPA for further rulemaking, again leaving CAIR in place in the interim, and in June 2013 the U.S. Supreme Court granted the EPA's petition for review of the D.C. Circuit Court's decision. Oral argument before the U.S. Supreme Court has been scheduled for December 2013. Prior to a revised rule from the EPA, coal-fired generating plants could face tighter nitrous oxide emission limitations through state action.

The PPL, PPL Energy Supply, LKE, LG&E and KU plants in Pennsylvania and Kentucky will continue to comply with CAIR through optimization of existing controls, balanced with emission allowance purchases. The D.C. Circuit Court's August 2012 decision leaves plants in CSAPR-affected states potentially exposed to more stringent emission reductions due to regional haze implementation (it was previously determined that CSAPR or CAIR participation satisfies regional haze requirements), and/or petitions to the EPA by downwind states under Section 126 of the Clean Air Act requesting the EPA to require plants that allegedly contribute to downwind non-attainment to take action to reduce emissions.

Regional Haze

Under the EPA's regional haze programs (developed to eliminate man-made visibility degradation by 2064), states are required to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977. For the eastern U.S., the EPA had determined that region-wide reductions under the CAIR or CSAPR trading program could be utilized by state programs to satisfy BART requirements. However, the August 2012 decision by the D.C. Circuit Court to vacate and remand CSAPR exposes power plants located in the eastern U.S., including PPL Energy Supply's plants in Pennsylvania and PPL's plants in Kentucky, to reductions in sulfur dioxide and nitrogen oxides as required by BART.

The EPA signed its final Federal Implementation Plan of the Regional Haze Rules for Montana in September 2012, with tighter emissions limits for PPL Energy Supply's Colstrip Units 1 & 2 based on the installation of new controls (no limits or additional controls were specified for Colstrip Units 3 & 4), and tighter emission limits for PPL Energy Supply's Corette plant (which are not based on additional controls). The cost of the potential additional controls for Colstrip Units 1 & 2, if required, could be significant. PPL Energy Supply expects to meet the tighter permit limits at Corette without any significant changes to operations, although other requirements have led to the planned suspension of operations at Corette beginning in April 2015 (see "MATS" discussion above). PPL is participating in litigation regarding this matter before the U.S. Court of Appeals for the Ninth Circuit.

National Ambient Air Quality Standards *(Kentucky Registrants)*

During 2010 and 2012, the EPA issued new ambient air standards for sulfur dioxide and particulates, respectively. In 2013, the EPA preliminarily designated Jefferson County, Kentucky, as a partial non-attainment area for sulfur dioxide. Final designations of non-attainment areas may occur in 2013 and 2014, respectively. Existing environmental plans for LG&E's and KU's Kentucky plants, including announced retirements of certain plants and ECR-approved new or upgraded scrubbers or baghouses at other plants, may aid in achievement of eventual ambient air requirements. However, depending upon the specifics of final non-attainment designations and consequent compliance plans, additional controls may be required, the financial impact of which could be significant.

New Accounting Guidance *(All Registrants)*

See Notes 2 and 19 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies *(All Registrants)*

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following table summarizes the accounting policies by Registrant that are particularly important to the financial condition or results of operations, and require estimates or other judgments of matters inherently uncertain. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in each Registrant's 2012 Form 10-K for a discussion of each critical accounting policy.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Reference is made to "Risk Management" in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations."

Item 4. Controls and Procedures

- (a) Evaluation of disclosure controls and procedures.

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company, and Kentucky Utilities Company

The Registrants' principal executive officers and principal financial officers, based on their evaluation of the Registrants' disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934) have concluded that, as of September 30, 2013, the Registrants' disclosure controls and procedures are effective to ensure that material information relating to the Registrants and their consolidated subsidiaries is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, particularly during the period for which this quarterly report has been prepared. The aforementioned principal officers have concluded that the disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive and principal financial officers, to allow for timely decisions regarding required disclosure.

- (b) Change in internal controls over financial reporting.

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company, and Kentucky Utilities Company

As reported in the June 30, 2013 Form 10-Q, the principal executive officers and principal financial officers of the Registrants concluded that the implementation of a financial consolidation and reporting system for PPL and its primary U.S. subsidiaries resulted in a material change to the Registrants' internal control over financial reporting. The new system enhances the consolidation of subsidiary accounts, provides reporting tools for analysis and automates certain aspects of financial statement preparation for each of the Registrants. Processes and controls over the consolidation and reporting processes that were previously considered to be effective were replaced with new or modified controls that were also determined to be effective.

The new consolidation and reporting system was subject to extensive testing and data reconciliation during implementation. Post-implementation reviews have been and will continue to be conducted to enable us to determine the effectiveness of the internal controls relating to the system implementation processes and to key business processes.

The Registrants' principal executive officers and principal financial officers have concluded that there were no other changes in the Registrants' internal control over financial reporting during the Registrants' third fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrants' internal control over financial reporting.

PPL Corporation

As reported in the June 30, 2013 Form 10-Q, PPL's principal executive officer and principal financial officer concluded that the implementation of a new general ledger system and a financial reporting system at WPD resulted in a material change to its internal control over financial reporting. The general ledger system that was implemented at WPD replaced the existing mainframe system and resulted in more automation and enhanced controls over

general ledger processing and consolidation. The reporting system that was implemented at WPD improves and automates controls over data transfer included in PPL's consolidation process and improves controls over GAAP and foreign currency adjustments. In each of the WPD system implementations, controls that were previously determined to be effective were replaced with new or modified controls that were also determined to be effective.

The general ledger and reporting systems were subject to extensive testing and data reconciliation during their implementation. Post-implementation reviews have been and will continue to be conducted to enable us to determine the effectiveness of the internal controls relating to the system implementation processes and to key business processes remain effective. Risks related to the system implementations at WPD were also partially mitigated by PPL's existing policy of consolidating foreign subsidiaries on a one-month lag, which provided management additional time for review and analysis of WPD results and their incorporation into PPL's consolidated financial statements.

The Registrant's principal executive officer and principal financial officer have concluded that there were no other changes in the Registrant's internal control over financial reporting during the Registrant's third fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For additional information regarding pending administrative and judicial proceedings involving regulatory, environmental and other matters, which information is incorporated by reference into this Part II, see:

- "Item 3. Legal Proceedings" in each Registrant's 2012 Form 10-K; and
- Notes 5, 6 and 10 to the Financial Statements.

Item 1A. Risk Factors

There have been no material changes in the Registrants' risk factors from those disclosed in "Item 1A. Risk Factors" of the 2012 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchase of Equity Securities during the Third Quarter of 2013:

Period	(a) Total Number of Shares (or Units) Purchased (1)	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans of Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
July 1 to July 31, 2013				
August 1 to August 31, 2013	750,000	\$30.81		
September 1 to September 30, 2013	750,000	\$31.00		
Total	1,500,000	\$30.91		

(1) Represents shares of common stock repurchased in the open market to offset a portion of shares issued under stock based compensation plans.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

PPL Electric Utilities Corporation

Effective October 31, 2013, PPL Electric amended and restated its Articles of Incorporation and Bylaws, copies of which are filed as exhibits 3 (a) and 3(b), respectively, to this report.

Item 6. Exhibits

The following Exhibits indicated by an asterisk preceding the Exhibit number are filed herewith. The balance of the Exhibits have heretofore been filed with the Commission and pursuant to Rule 12(b)-32 are incorporated herein by reference. Exhibits indicated by a [] are filed or listed pursuant to Item 601(b)(10)(iii) of Regulation S-K.

- 1(a) - Final Terms of the WPD West Midlands £400 million 3.875% Senior Unsecured Notes due October 17, 2024 (Exhibit 1.1 to PPL Corporation Form 8-K Report (File No. 1-11459) dated October 18, 2013)
- 1(b) - Final Terms of WPD East Midlands £40 million 1.676% Notes due 2052 (Exhibit 1.2 to PPL Corporation Form 8-K Report (File No. 1-11459) dated October 18, 2013)
- 1(c) - Final Terms of WPD East Midlands £25 million 1.676% Notes due 2052 (Exhibit 1.3 to PPL Corporation Form 8-K Report (File No. 1-11459) dated October 18, 2013)
- 2(a) - Purchase and Sale Agreement by and between PPL Montana, LLC and NorthWestern Corporation, dated as of September 26, 2013 (Exhibit 2.1 to PPL Corporation Form 8-K Report (File No. 1-11459) dated September 27, 2013)
- 2(b) - Lease Termination Agreement by and between PPL Montana, LLC, Montana OL3 LLC and Montana OP3 LLC, dated as of September 26, 2013 (Exhibit 2.2 to PPL Corporation Form 8-K Report (File No. 1-11459) dated September 27, 2013)
- 2(c) - Lease Termination Agreement by and between PPL Montana, LLC, Montana OL4 LLC and Montana OP4 LLC, dated as of September 26, 2013 (Exhibit 2.3 to PPL Corporation Form 8-K Report (File No. 1-11459) dated September 27, 2013)
- 2(d) - Lease Termination Agreement by and between PPL Montana, LLC, Montana OL1 LLC and Montana OP1 LLC, dated as of September 26, 2013 (Exhibit 2.4 to PPL Corporation Form 8-K Report (File No. 1-11459) dated September 27, 2013)
- 2(e) - Lease Termination Agreement by and between PPL Montana, LLC, Montana OL1 LLC and Montana OP1 LLC, dated as of September 26, 2013 (Exhibit 2.5 to PPL Corporation Form 8-K Report (File No. 1-11459) dated September 27, 2013)
- *3(a) - Amended and Restated Articles of Incorporation of PPL Electric Utilities Corporation, effective as of October 31, 2013

AMENDED AND RESTATED ARTICLES OF INCORPORATION
OF
PPL ELECTRIC UTILITIES CORPORATION

ARTICLE I.

The name of the Corporation is

PPL ELECTRIC UTILITIES CORPORATION

ARTICLE II.

The location and post office address of the registered office of the Corporation in this Commonwealth is

Two North Ninth Street
Allentown, Pennsylvania 18101

ARTICLE III.

The purpose or purposes for which the Corporation is incorporated under the Business Corporation Law of the Commonwealth of Pennsylvania are to engage in, and do any lawful act concerning, any or all lawful business for which a corporation may be incorporated under said Business Corporation Law, including but not limited to:

1. The supply of light, heat or power to the public by means of electricity or by any other means.
2. The production, generation, manufacture, transmission, storage, distribution or furnishing of artificial or natural gas, electricity or steam or air conditioning or refrigerating services, or any combination thereof to or for the public.
3. The diverting, pumping or impounding of water for the development or furnishing of hydroelectric power to or for the public.
4. The transportation of artificial or natural gas, electricity, petroleum or petroleum products or water or any combination of such substances for the public.
5. The diverting, developing, pumping, impounding, distributing or furnishing of water from either surface or subsurface sources to or for the public.
6. Manufacturing, processing, owning, using and dealing in personal property of every class and description, engaging in research and development, the furnishing of services, and acquiring, owning, using and disposing of real property of every nature whatsoever.

ARTICLE IV.

The term for which the Corporation is to exist is perpetual.

ARTICLE V.

The aggregate number of shares which the Corporation shall have authority to issue is 190,629,936 shares, of which 170,000,000 are shares of Common Stock, without nominal or par value.

ARTICLE VI.

The designations, preferences, qualifications, limitations, restrictions, and the special or relative rights in respect of the shares of each class shall be as follows:

Division A - PREFERRED STOCK

The Board of Directors shall have the full authority permitted by law to divide the authorized and unissued shares into classes or series, or both, and to determine for any such class or series its designation and the number of shares of the class or series and the voting rights, preferences, limitations and special rights, if any, of the shares of the class or series.

Division B - COMMON STOCK

SECTION 1. Dividends and Shares in Distribution on Common Stock.

(A) Subject to the rights of the holders of any Preferred Stock, the Common Stock alone shall receive all further dividends and shares upon liquidation, dissolution, winding up or distribution.

(B) A consolidation or merger of the Corporation with or into any other corporation or corporations shall not be deemed a distribution of assets of the Corporation within the meaning of any provision of this Article VI.

SECTION 2. Voting Rights. Except as otherwise provided in these Amended and Restated Articles of Incorporation, each share of the Preferred Stock and the Common Stock shall be equal in voting power and shall entitle the holder thereof to one vote upon any question presented to any shareholders' meeting, it being hereby agreed and declared that a majority in number of shares, regardless of the class to which such shares may belong, is a majority in value or in interest within the meaning of any statute or law requiring the consent of shareholders holding a majority in interest or a greater amount in value of stock of the Corporation.

Division C - GENERAL

SECTION 1. Pre-emptive Rights. The Corporation may issue or sell shares, option rights, or securities having conversion or option rights for money or otherwise without first offering them to shareholders of any class or classes.

SECTION 2. Redemption. Any shares of Preferred Stock and the Common Stock which are redeemed, repurchased or otherwise reacquired by the Corporation shall, until further action by the Board of Directors or the Executive Committee of the Board of Directors, have the status of authorized and unissued shares, without designation as to series.

SECTION 3. Convertibility. Unless otherwise provided in the terms of a series of Series Preferred Stock or Preference Stock or otherwise in these Amended and Restated Articles of Incorporation, the shares of each of Preferred Stock and the Common Stock, respectively, shall not be convertible into shares of any other class or classes or into any other securities of the Corporation.

ARTICLE VII.

A majority of the directors may amend, alter or repeal the Bylaws, subject to the power of the shareholders to change such action; *provided, however*, that any amendment, alteration or repeal of, or the adoption of any provision inconsistent with, Sections 3.01, 3.01.1, 3.04, 3.05, or 3.13 of the Bylaws, if by action of the shareholders, shall be only upon the affirmative vote of the shareholders entitled to cast at least two-thirds of the votes which all shareholders are entitled to cast, and if by action of the directors, shall be only upon the approval of two-thirds of the directors.

ARTICLE VIII.

These Amended and Restated Articles of Incorporation may be amended in the manner from time to time prescribed by statute and all rights conferred upon shareholders herein are granted subject to this reservation; *provided, however*, that, notwithstanding the foregoing (and in addition to any vote that may be required by law, these Amended and Restated Articles of Incorporation or the Bylaws), the affirmative vote of the shareholders entitled to cast at least two-thirds of the votes which all shareholders are entitled to cast shall be required to amend, alter or repeal, or to adopt any provision inconsistent with, Articles VII or VIII of these Amended and Restated Articles of Incorporation.

ARTICLE IX.

The following provisions of the Business Corporation Law of 1988 shall not be applicable to the Corporation: 15 Pa.C.S. § 2538 (relating to approval of transactions with interested shareholders) and 15 Pa.C.S. Subchapter E (relating to control transactions).

ARTICLE X.

[Reserved]

ARTICLE XI.

Uncertificated Shares . Any or all classes and series of shares of the Corporation, or any part thereof, may be represented by uncertificated shares to the extent determined by the Board of Directors, except as required by applicable law, including that shares represented by a certificate that is issued and outstanding shall continue to be represented thereby until the certificate is surrendered to the Corporation. Within a reasonable time after the issuance or transfer of uncertificated shares, the Corporation shall send to the registered owner thereof a written notice containing the information required by applicable law to be set forth or stated on certificates. Except as otherwise expressly

provided by law, the rights and obligations of the holders of shares represented by certificates and the rights and obligations of the holders of uncertificated shares of the same class and series shall be identical.

ARTICLE XII.

No shareholder of the Corporation and no creditor of any shareholder of the Corporation shall have any claim on the assets of the Corporation except to the extent of any dividends or other distributions declared by the Board of Directors or otherwise expressly provided for by these Articles of Incorporation or the Business Corporation Law of the Commonwealth of Pennsylvania.

**BYLAWS
OF
PPL ELECTRIC UTILITIES CORPORATION
(a Pennsylvania Corporation)**

**ARTICLE I
Offices and Fiscal Year**

Section 1.01. Registered Office. The registered office of the corporation in the Commonwealth of Pennsylvania shall be at Two North Ninth Street, Allentown, Pennsylvania 18101.

Section 1.02. Fiscal Year. The fiscal year of the corporation shall begin on the first day of January in each year.

Section 1.03. Corporate Seal. The corporation shall have a corporate seal in the form of a circle containing the name of the corporation, the year of incorporation and such other details, if any, as approved by the board of directors.

**ARTICLE II
Meetings of Shareholders**

Section 2.01. Place of Meeting. All meetings of the shareholders of the corporation shall be held at the registered office of the corporation unless another place is designated by the board of directors in the notice of such meeting.

Section 2.02. Annual Meeting. The board of directors may fix the date and time of the annual meeting of the shareholders, but if no such date and time is fixed by the board the meeting for any calendar year shall be held on the third Thursday in May in such year, at 2 o'clock P.M., and at said meeting the shareholders then entitled to vote shall elect directors and shall transact such other business as may properly be brought before the meeting.

Section 2.03. Special Meetings. Special meetings of the shareholders of the corporation for any purpose or purposes may be called at any time by the Chairman of the Board, if there be one, or, in the case of a vacancy in the office, the President; or by the board of directors.

Section 2.04. Notice of Meetings. Written notice of every meeting of the shareholders, whether annual or special, shall be given to each shareholder of record entitled to vote at the meeting, at least five days prior to the day named for the meeting; provided, however, that at least ten days written notice prior to the day of the meeting shall be given in the case of any annual or special meeting at which there is to be considered any amendment to the Articles of Incorporation of the corporation, the sale of all or substantially all of its assets, or its merger with or consolidation into any other corporation. Such notice shall specify the place, day and hour of the meeting and, in the case of a special meeting of shareholders, the general nature of the business to be transacted.

Section 2.05. Quorum, Manner of Acting, and Adjournment.

(a) Quorum. The presence in person or by proxy of shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast on the particular matter shall constitute a quorum for the purposes of consideration and action on the matter. Shares of the corporation owned, directly or indirectly, by it and controlled, directly or indirectly, by the board of directors, as such, shall not be counted in determining the total number of outstanding shares for quorum purposes at any given time. The shareholders present at a duly organized meeting can continue to do business until adjournment notwithstanding the withdrawal of enough shareholders to leave less than a quorum.

(b) Adjournments. Any regular or special meeting of the shareholders, including one at which directors are to be elected and one which cannot be organized because a quorum has not attended, may be adjourned for such period and to such place as the shareholders present and entitled to vote shall direct.

Except as otherwise provided in the Articles of Incorporation, those shareholders entitled to vote who attend a meeting called for the election of directors that has been previously adjourned for lack of a quorum, although less than a quorum as fixed in this section, shall nevertheless constitute a quorum for the purpose of electing directors. Also, except as otherwise provided in the Articles of Incorporation, those shareholders entitled to vote who attend a meeting of shareholders that has been previously adjourned for one or more periods aggregating at least 15 days because of an absence of a quorum, although less than a quorum, shall nevertheless constitute a quorum for the purpose of acting upon any matter set forth in the notice of the meeting if the notice states that those shareholders who attend the adjourned meeting shall nevertheless constitute a quorum for the purpose of acting upon the matter.

(c) Action by Shareholders. Except as otherwise provided in the Articles of Incorporation, a section of these bylaws adopted by the shareholders or the Business Corporation Law, whenever any corporate action is to be taken by vote of the shareholders, it shall be authorized upon receiving the affirmative vote of a majority of the votes cast by all shareholders entitled to vote thereon and, if any shareholders are entitled to vote thereon as a class, upon receiving the affirmative vote of a majority of the votes cast by the shareholders entitled to vote as a class.

Section 2.06. Organization. At every meeting of the shareholders, the Chairman of the Board, or, in the case of vacancy in the office or absence of the Chairman of the Board, one of the following directors or officers: a director designated by the Chairman, the president, an executive vice president, a senior vice president, any vice president, or a Chairman chosen by the shareholders entitled to cast a majority of the votes which all shareholders present in person or by proxy are entitled to cast, shall act as Chairman; and the secretary or a person appointed by

the Chairman shall act as secretary.

Section 2.07 Voting and Proxies. Except as otherwise provided by statute or in the Articles of Incorporation, every shareholder of record shall have the right to one vote for every share standing in his name on the books of the corporation.

In all elections for directors, every shareholder entitled to vote shall have the right to multiply the number of votes to which he may be entitled by the total number of directors to be elected in the same election by the holders of the class of shares of which his shares are a part, and he may cast the whole number of such votes for one candidate or he may distribute them among any two or more candidates. The candidates receiving the highest number of votes from each class or group of classes entitled to elect directors separately up to the number of directors to be elected in the same election by such class or group of classes shall be elected.

Every shareholder entitled to vote at a meeting of shareholders or to express consent or dissent to corporate action in writing without a meeting may authorize another person or persons to act for him by proxy. Every proxy shall be executed in writing by the shareholder or by his duly authorized attorney in fact and filed with the secretary of the corporation. A proxy, unless coupled with an interest, shall be revocable at will, notwithstanding any other agreement or any provision in the proxy to the contrary, but the revocation of a proxy shall not be effective until notice thereof has been given to the secretary of the corporation. No unrevoked proxy shall be valid after eleven months from the date of its execution, unless a longer time is expressly provided therein, but in no event shall any proxy, unless coupled with an interest, be voted on after three years from the date of its execution. A proxy shall not be revoked by the death or incapacity of the maker unless, before the vote is counted or the authority is exercised, written notice of such death or incapacity is given to the secretary of the corporation. A proxy coupled with an interest shall include an unrevoked proxy in favor of a creditor of a shareholder and such a proxy shall be valid as long as the debt owed by him to the creditor remains unpaid.

Section 2.08. Voting Lists. The officer or agent of the corporation having charge of the transfer books for shares of the corporation shall make a complete list of the shareholders entitled to vote at any meeting of shareholders, arranged in alphabetical order, with the address of and the number of shares held by each. The list shall be produced and kept open at the time and place of the meeting, and shall be subject to the inspection of any shareholder during the whole time of the meeting for the purposes thereof. In lieu of the making of such list, the corporation may make the information therein available at the meeting by any other means. The original share register or transfer book or a duplicate thereof, kept in Pennsylvania, shall be prima facie evidence as to who are the shareholders entitled to examine such list or share register or transfer book, or to vote, in person or by proxy, at any meeting of shareholders.

Section 2.09. Judges of Election. In advance of any meeting of shareholders, the board of directors may appoint one or three judges of election, who need not be shareholders. If judges of election be not so appointed, the chairman of the meeting may, and on the request of any shareholder or his proxy shall, appoint judges of election at the meeting. The judges of election shall determine the number of shares outstanding and the voting power of each, the shares represented at the meeting, the existence of a quorum and the authenticity, validity and effect of proxies, receive votes or ballots, hear and determine all challenges and questions in any way arising in connection with nominations by shareholders or the right to vote, count and tabulate all votes, determine the result and do such acts as may be proper to conduct the election or vote with fairness to all shareholders. If there are three judges of election, the decision, act or certificate of a majority shall be effective in all respects as the decision, act or certificate of all.

On request of the chairman of the meeting or of any shareholder, the judges shall make a report in writing of any challenge or question or matter determined by them, and execute a certificate of any fact found by them. Any report or certificate made by them shall be prima facie evidence of the facts stated therein.

Section 2.10. Determination of Shareholders of Record. The board of directors may fix a date as a record date for the determination of the shareholders entitled to notice of, or to vote at, any meeting of shareholders, which date, except in the case of an adjourned meeting, shall be not more than 90 days prior to the date of the meeting. Only shareholders of record on the date so fixed, and no others, shall be entitled to notice of, or to vote at, such meeting, notwithstanding any transfer of any shares on the books of the corporation after any such record date so fixed. When a determination of shareholders of record has been made for purposes of a meeting, the determination shall apply to any adjournment thereof unless the board of directors fixes a new record date for the adjourned meeting. The board of directors may similarly fix a record date for the determination of shareholders of record for any other purpose. If a record date is not fixed by the board of directors, the record date shall be as determined in the Business Corporation Law.

ARTICLE III Board of Directors

Section 3.01. Authority, Number and Qualifications. The business and affairs of the corporation shall be managed under the direction of a board of directors. The board of directors shall consist of not less than six and not more than twenty directors, as shall be fixed from time to time by resolution of the board of directors. In addition, the board of directors may designate from among its number a Chairman of the Board. All directors of the corporation shall be natural persons of full age, but need not be residents of Pennsylvania. A director may also be an officer or employee of the corporation.

Section 3.01.1 Term of Office. Each director shall hold office until the expiration of the term for which he or she was selected and until a successor shall have been elected and qualified or until his or her earlier death, resignation or removal.

Section 3.02. Organization. At every meeting of the Board of Directors, the Chairman of the Board, if there be one, or, in the case of a vacancy in the office or absence of the Chairman of the Board, the Vice Chairman, or a Chairman chosen by a majority of the directors present, shall preside, and the secretary, or any person appointed by the Chairman of the meeting, shall act as secretary.

Section 3.03. Resignations. Any director of the corporation may resign at any time by giving written notice to the Chairman of the Board, if there be one, or the President, or the secretary of the corporation. Such resignation shall take effect at the date of the receipt of such notice or at any later time specified therein and, unless otherwise specified therein, the acceptance of such resignation shall not be necessary to make it effective.

Section 3.04. Vacancies. The board of directors may declare vacant the office of a director if he be declared of unsound mind by an order of court, or convicted of felony, or for any other proper cause.

Except as otherwise provided in the Articles of Incorporation, newly created directorships resulting from any increase in the authorized number of directors or any vacancies in the board of directors resulting from death, resignation, retirement, disqualification, removal from office or other cause shall be filled solely by the majority vote of the directors then in office, although less than a quorum. Each director so chosen shall hold office until the next election of the class for which such director has been chosen, and until his or her successor has been selected and qualified or until his or her earlier death, resignation or removal.

If one or more directors shall resign from the board effective as of a future date, the directors then in office, including those who have so resigned, shall have power by the applicable vote to fill the vacancies, the vote thereon to take effect when the resignations become effective.

Section 3.05. Removal by Shareholders. Any director may be removed from office by vote of shareholders only upon the affirmative vote of the shareholders entitled to cast at least two-thirds of the votes which all shareholders would be entitled to cast at any annual election of directors and upon any additional vote of shareholders that may be required by law.

Section 3.06. Place of Meeting. The board of directors may hold its meetings at such place or places within Pennsylvania, or elsewhere, as the board of directors may from time to time appoint, or as may be designated in the notice calling the meeting.

Section 3.07. Organization Meeting. Immediately after each annual election of directors or other meeting at which the entire board of directors is elected, the newly elected board of directors shall meet for the purpose of organization, election of officers, and the transaction of other business, at the place where said election of directors was held. Notice of such meeting need not be given. Such organization meeting may be held at any other time or place which shall be specified in a notice given as hereinafter provided for special meetings of the board of directors.

Section 3.08. Regular Meetings. Regular meetings of the board of directors shall be held at such time as shall be designated from time to time by the board of directors. At such meetings, the directors shall transact such business as may properly be brought before the meeting. Notice need not be given of regular meetings held at the registered office of the corporation. If held elsewhere, the notice requirements of Section 3.06 shall apply.

Section 3.09. Special Meetings. Special meetings of the board of directors shall be held whenever called by two or more of the directors or by the Chairman of the Board, if there be one, or, in the case of vacancy in the office or absence of the Chairman of the Board, the president. Notice of every special meeting of the board of directors shall be given to each director by telephone or in writing at least 24 hours (in the case of notice by telephone, telex, TWX or facsimile transmission) or 48 hours (in the case of notice by telegraph, courier service or express mail) or five days (in the case of notice by United States mail) before the time at which the meeting is to be held. Every such notice shall state the time and place of the meeting. Neither the business to be transacted at nor the purpose of any special meeting need be specified in a notice of the meeting.

Section 3.10. Quorum, Manner of Acting, and Adjournment. A majority of the directors in office shall be present at each meeting in order to constitute a quorum for the transaction of business. Except as otherwise provided in the Articles of Incorporation or by statute, the acts of a majority of the directors present at a meeting at which a quorum is present shall be the acts of the board of directors. In the absence of a quorum, a majority of the directors present may adjourn the meeting from time to time until a quorum be present, provided that the notice, if any, required by Sections 3.08 or 3.09 of this Article has been given. The directors shall act only as a board and the individual directors shall have no power as such, *provided, however,* that any action which may be taken at a meeting of the board may be taken without a meeting if a consent or consents in writing setting forth the action so taken shall be signed by all of the directors and shall be filed with the secretary of the corporation.

Section 3.11. Executive and Other Committees. The board of directors may, by resolution adopted by a majority of the directors in office, establish an Executive Committee and one or more other committees. Any committee, to the extent provided in such resolution, shall have and may exercise all of the powers and authority of the board of directors, except that no committee shall have any power or authority as to the following:

- (1) The submission to shareholders of any action requiring approval of shareholders under the Business Corporation Law.
- (2) The creation or filling of vacancies in the board of directors.
- (3) The adoption, amendment or repeal of these bylaws.
- (4) The amendment or repeal of any resolution of the board of directors that by its terms is amendable or repealable only by the board.
- (5) Action on matters committed by a resolution of the board of directors exclusively to another committee of the board.

A majority of the directors in office designated to a committee shall be present at each meeting in order to constitute a quorum for the transaction of business. The acts of a majority of the committee members present at a meeting at which a quorum is present shall be the acts of

the committee. Any action which may be taken at a meeting of a committee may be taken without a meeting if a consent or consents in writing setting forth the action so taken shall be signed by all of the committee members and shall be filed with the secretary of the corporation.

Each committee shall keep records of its proceedings.

Section 3.12. Compensation. The board of directors shall have the authority to fix the compensation of directors for their services as directors. A director may be a salaried officer of the corporation, but no employee shall receive a salary for serving as a director.

Section 3.13. Nominations for Election of Directors and Proposed Business to be Transacted.

(a) *Director Nominations*. Except as otherwise provided in or fixed by or pursuant to the provisions of Article VI of the Articles of Incorporation, nominations for the election of directors may be made by the board of directors or a committee appointed by the board of directors or by any shareholder entitled to vote in the election of directors generally. However, any shareholder entitled to vote in the election of directors generally may nominate one or more persons for election as directors at a meeting only if written notice (meeting the requirements hereinafter set forth) of such shareholder's intent to make such nomination or nominations has been given by the shareholder and received by the secretary of the corporation in the manner and within the time specified by this Subsection. The notice shall be delivered to the secretary of the corporation not later than (i) with respect to an election to be held at an annual meeting of shareholders, 75 days in advance of the date of such meeting; *provided, however,* that in the event that less than 85 days' notice or prior public disclosure of the date of the annual meeting is given, notice from the shareholders to be timely must be received not later than the tenth day following the date on which such notice of the date of the annual meeting was mailed or such public disclosure was made, whichever first occurs, and (ii) with respect to an election to be held at a special meeting of shareholders for the election of directors, the close of business on the earlier of (A) the seventh day following the date on which notice of such meeting is first given to shareholders or (B) the fourth day prior to the meeting. In lieu of delivery to the secretary, the notice may be mailed to the secretary by certified mail, return receipt requested, but shall be deemed to have been given only upon actual receipt by the secretary. Each such notice shall set forth: (a) the name and address of the shareholder who intends to make the nomination and of the person or persons to be nominated; (b) a representation that the shareholder is a holder of record of stock of the corporation entitled to vote at such meeting and intends to appear in person or by proxy at the meeting to nominate the person or persons specified in the notice; (c) a description of all arrangements or understandings between the shareholder and each nominee and any other person or persons (naming such person or persons) pursuant to which the nomination or nominations are to be made by the shareholder; (d) such other information regarding each nominee proposed by such shareholder as would be required to be included in a proxy statement filed pursuant to the proxy rules of the Securities and Exchange Commission had proxies been solicited with respect to such nominee by the management or board of directors of the corporation; and (e) the consent of each nominee to serve as a director of the corporation if so elected. If a judge or judges of election shall not have been appointed pursuant to these bylaws, the presiding officer of the meeting may, if the facts warrant, determine and declare to the meeting that any nomination made at the meeting was not made in accordance with the procedures of this Subsection and, in such event, the nomination shall be disregarded. Any decision by the presiding officer of the meeting made in good faith shall be conclusive and binding upon all shareholders of the corporation for any purpose.

(b) *Proposed Business to be Transacted*. Except as otherwise provided in Section 3.13(a) of these bylaws, at any annual meeting or special meeting of shareholders, only such business as is properly brought before the meeting in accordance with this Subsection may be transacted. To be properly brought before any meeting, any proposed business that is to be brought pursuant to this Subsection must be either (i) specified in the notice of the meeting (or any supplement thereto) given by or at the direction of the board of directors, (ii) otherwise properly brought before the meeting by or at the direction of the board of directors, or (iii) in the case of an annual meeting of shareholders, otherwise properly brought before the meeting by a shareholder (x) who is a shareholder of record on the date of giving notice provided for in these bylaws and on the record date for the determination of shareholders entitled to vote at such annual meeting, and (y) who complies with the notice provisions set forth in this Subsection. For business to be properly brought before an annual meeting by a shareholder, the shareholder must have given timely notice thereof in writing to the secretary of the corporation. To be timely, a shareholder's notice must be delivered to the secretary of the corporation not later than 75 days in advance of the date of such meeting; *provided, however,* that in the event that less than 85 days' notice or prior public disclosure of the date of the annual meeting is given, notice from the shareholders to be timely must be received not later than the tenth day following the date on which such notice of the date of the annual meeting was mailed or such public disclosure was made, whichever first occurs. In lieu of delivery to the secretary, the notice may be mailed to the secretary by certified mail, return receipt requested, but shall be deemed to have been given only upon actual receipt by the secretary. A shareholder's notice to the secretary of the corporation, as required by this Subsection, shall set forth as to each matter the shareholder proposes to bring before the annual meeting (i) a brief description of the business desired to be brought before the annual meeting and the reasons for conducting such business at the annual meeting, (ii) the name and record address of the shareholder proposing such business, (iii) the class, series and number of shares of the corporation's stock which are beneficially owned by the shareholder, (iv) a description of all arrangements or understandings between such shareholder and any other person or persons (including their names) in connection with the proposal of such business by such shareholder in such business, (v) all other information which would be required to be included in a proxy statement or other filing required to be filed with the Securities and Exchange Commission if, with respect to any such item of business, such shareholder were a participant in a solicitation subject to Regulation 14A under the Securities Exchange Act of 1934, as amended, and (vi) a representation that such shareholder intends to appear in person or by proxy at the annual meeting of shareholders to bring such business before the meeting. Except as provided in Section 3.13(a) of these bylaws, notwithstanding anything in the bylaws to the contrary, no business shall be conducted at any meeting of shareholders except in accordance with the procedures set forth in this Subsection, *provided, however,* that nothing in this Subsection shall be deemed to preclude discussion by any shareholders of any business properly brought before any such meeting. The presiding officer of a meeting may, if the facts warrant, determine and declare to the meeting that business was not properly brought before the meeting in accordance with the provisions of this Subsection, and if he should so determine, he shall so declare to the meeting and any such business not properly brought before the meeting shall not be transacted. Any decision by the presiding officer of the meeting made in good faith shall be conclusive and binding upon all shareholders of the corporation for any purpose.

ARTICLE IV
Notice—Waivers—Meetings

Section 4.01 Manner of Giving Notice.

(a) General Rule. Whenever written notice is required to be given to any person under the provisions of the Articles of Incorporation, these bylaws, or the Business Corporation Law, it may be given to the person, either personally or by sending a copy thereof by first-class or express mail, postage prepaid, or by telegram (with messenger service specified), telex or TWX (with answerback received) or courier service, charges prepaid, or by facsimile transmission, to the address (or to the telex, TWX or facsimile transmission telephone number) of the person appearing on the books of the corporation or, in the case of directors, supplied by the director to the corporation for the purpose of notice. Notice of any regular or special meeting of the shareholders (or any other notice required by the Articles of Incorporation, these bylaws, or the Business Corporation Law to be given to all shareholders or to all holders of a class or series of shares) may be given by any class of mail, postage prepaid, if the notice is deposited in the United States mail at least 20 days prior to the day named for the meeting or any corporate or shareholder action specified in the notice.

If the notice is sent by mail, telegraph or courier service, it shall be deemed to have been given to the person entitled thereto when deposited in the United States mail or with a telegraph office or courier service for delivery to that person or, in the case of telex or TWX, when dispatched or, in the case of facsimile transmission, when received. A notice of meeting shall specify the place, day and hour of the meeting and any other information required by any other provision of the Articles of Incorporation, these bylaws, or the Business Corporation Law.

(b) Adjourned Shareholder Meetings. When a meeting of shareholders is adjourned, it shall not be necessary to give any notice of the adjourned meeting or of the business to be transacted at an adjourned meeting, other than by announcement at the meeting at which the adjournment is taken, unless the board fixes a new record date for the adjourned meeting or the Business Corporation Law requires notice of the business to be transacted and such notice has not previously been given.

Section 4.02. Waivers of Notice. Whenever any written notice is required to be given under the provisions of the Articles of Incorporation, these bylaws, or the Business Corporation Law, a waiver thereof in writing, signed by the person or persons entitled to such notice, whether before or after the time stated therein, shall be deemed equivalent to the giving of such notice. Except in the case of a special meeting of shareholders, neither the business to be transacted at, nor the purpose of, the meeting need be specified in the waiver of notice of such meeting.

Attendance of a person, either in person or by proxy, at any meeting, shall constitute a waiver of notice of such meeting, except where a person attends a meeting for the express purpose of objecting to the transaction of any business because the meeting was not lawfully called or convened.

Section 4.03. Conference Telephone Meetings. One or more directors may participate in a meeting of the board, or of a committee of the board, by means of conference telephone or similar communications equipment by means of which all persons participating in the meeting can hear each other. Participation in a meeting pursuant to this section shall constitute presence in person at such meeting.

ARTICLE V
Officers

Section 5.01. Number, Qualifications and Designation. The officers of the corporation shall be a president, a secretary, a treasurer, one or more vice presidents (including executive vice presidents and senior vice presidents) and such other officers as the business of the corporation may require, including one or more assistant officers. One person may hold more than one office. Officers may but need not be directors or shareholders of the corporation.

Section 5.02. Election and Term of Office. The officers of the corporation shall be elected by the board of directors, and each such officer shall hold his office until the next annual organization meeting of the directors (which is held immediately following the annual meeting of shareholders), or until his death, resignation, or removal.

Section 5.03. Resignations. Any officer may resign at any time by giving written notice to the board of directors, or to the Chairman of the Board, if there be one, or the President, or the secretary of the corporation. Any such resignation shall take effect at the date of the receipt of such notice or at any later time specified therein and, unless otherwise specified therein, the acceptance of such resignation shall not be necessary to make it effective.

Section 5.04. Removal. Any officer may be removed, either for or without cause, by the board of directors whenever in the judgment of the board of directors the best interests of the corporation will be served thereby.

Section 5.05. Vacancies. A vacancy in any office because of death, resignation, removal, disqualification, or any other cause, may be filled by the board of directors.

Section 5.06. General Powers. All officers of the corporation as between themselves and the corporation, shall, respectively have such authority and perform such duties in the management of the property and affairs of the corporation as may be determined by resolution of the board of directors.

Section 5.07. Compensation. The salaries or other compensation of the officers elected by the board of directors shall be fixed from time to time by the board of directors or in such manner as the board of directors shall from time to time provide.

Section 5.08. Standard of Care. In lieu of the standards of conduct otherwise provided by law, officers of the corporation shall be subject to the same standards of conduct, including standards of care and loyalty and rights of justifiable reliance, as shall at the time be applicable to directors of the corporation.

ARTICLE VI Capital Stock

Section 6.01. Share Certificates.

(a) Form of Certificates. To the extent that certificates for shares of the corporation are issued, such certificates shall be in such form as approved by the board of directors, and shall state that the corporation is incorporated under the laws of the Commonwealth of Pennsylvania, the name of the person to whom issued, and the number and class of shares and the designation of the series (if any) that the certificate represents. If the corporation is authorized to issue shares of more than one class or series, certificates for shares of the corporation shall set forth upon the face or back of the certificate (or shall state on the face or back of the certificate that the corporation will furnish to any shareholder upon request and without charge), a full or summary statement of the designations, voting rights, preferences, limitations and special rights of the shares of each class or series authorized to be issued so far as they have been fixed and determined and the authority of the board of directors to fix and determine the designations, voting rights, preferences, limitations and special rights of the classes and series of shares of the corporation.

(b) Share Register. The share register or transfer books and blank share certificates shall be kept by the secretary or by any transfer agent or registrar designated by the board of directors for that purpose.

(c) Issuance. The share certificates of the corporation shall be numbered and registered in the share register or transfer books of the corporation as they are issued. They shall be executed in such manner as the board of directors shall determine.

Section 6.02. Transfer. Transfers of shares shall be made on the share register or transfer books of the corporation only by the record holder of such shares, or by attorney lawfully constituted in writing, and, in the case of shares represented by a certificate, upon surrender of the certificate therefor, endorsed by the person named in the certificate or by an attorney lawfully constituted in writing.

Section 6.03. Record Holder of Shares. The corporation shall be entitled to treat the person in whose name any share or shares of the corporation stand on the books of the corporation as the absolute owner thereof, and shall not be bound to recognize any equitable or other claim to, or interest in, such share or shares on the part of any other person.

Section 6.04. Lost, Destroyed or Mutilated Certificates. The holder of any shares of the corporation shall immediately notify the corporation of any loss, destruction or mutilation of the certificate therefor, and the board of directors may, in its discretion, cause a new certificate or certificates to be issued to such holder, in case of mutilation of the certificate, upon the surrender of the mutilated certificate or, in case of loss or destruction of the certificate, upon satisfactory proof of such loss or destruction and, if the board of directors shall so determine, the deposit of a bond in such form and in such sum, and with such surety or sureties, as it may direct.

ARTICLE VII Indemnification of Directors, Officers, Etc.

Section 7.01. Personal Liability of Directors.

(a) To the fullest extent that the laws of the Commonwealth of Pennsylvania, as now in effect or as hereafter amended, permit elimination or limitation of the liability of directors, no director of the corporation shall be personally liable for monetary damages as such for any action taken, or any failure to take any action, as a director.

(b) Any amendment or repeal of this Section 7.01 which has the effect of increasing directors' liability shall operate prospectively only, and shall not affect any action taken, or any failure to act, prior to its adoption.

Section 7.02. Indemnification of Directors and Officers.

(a) Right to Indemnification. Except as prohibited by law, every director and officer of the corporation shall be entitled as of right to be indemnified by the corporation against reasonable expense and any liability paid or incurred by such person in connection with any actual or threatened claim, action, suit or proceeding, civil, criminal, administrative, investigative or other, whether brought by or in the right of the corporation or otherwise, in which he or she may be involved, as a party or otherwise, by reason of such person being or having been a director or officer of the corporation or by reason of the fact that such person is or was serving at the request of the corporation as a director, officer, employee, fiduciary or other representative of another corporation, partnership, joint venture, trust, employee benefit plan or other entity (such claim, action, suit or proceeding hereinafter being referred to as "action"). Such indemnification shall include the right to have expenses incurred by such person in connection with an action paid in advance by the corporation prior to final disposition of such action, subject to such conditions as may be prescribed by law. Persons who are not directors or officers of the corporation may be similarly indemnified in respect of service to the corporation or to another such entity at the request of the corporation to the extent the Board of Directors at any time denominates

such person as entitled to the benefits of this Section 7.02. As used herein, “expense” shall include fees and expenses of counsel selected by such person; and “liability” shall include amounts of judgments, excise taxes, fines and penalties, and amounts paid in settlement.

(b) Right of Claimant to Bring Suit. If a claim under paragraph (a) of this Section 7.02 is not paid in full by the corporation within thirty days after a written claim has been received by the corporation, the claimant may at any time thereafter bring suit against the corporation to recover the unpaid amount of the claim, and, if successful in whole or in part, the claimant shall also be entitled to be paid the expense of prosecuting such claim. It shall be a defense to any such action that the conduct of the claimant was such that under Pennsylvania law the corporation would be prohibited from indemnifying the claimant for the amount claimed, but the burden of proving such defense shall be on the corporation. Neither the failure of the corporation (including its Board of Directors, independent legal counsel and its shareholders) to have made a determination prior to the commencement of such action that indemnification of the claimant is proper in the circumstances because the conduct of the claimant was not such that indemnification would be prohibited by law, nor an actual determination by the corporation (including its Board of Directors, independent legal counsel or its shareholders) that the conduct of the claimant was such that indemnification would be prohibited by law, shall be a defense to the action or create a presumption that the conduct of the claimant was such that indemnification would be prohibited by law.

(c) Insurance and Funding. The corporation may purchase and maintain insurance to protect itself and any person eligible to be indemnified hereunder against any liability or expense asserted or incurred by such person in connection with any action, whether or not the corporation would have the power to indemnify such person against such liability or expense by law or under the provisions of this Section 7.02. The corporation may create a trust fund, grant a security interest, cause a letter of credit to be issued or use other means (whether or not similar to the foregoing) to ensure the payment of such sums as may become necessary to effect indemnification as provided herein.

(d) Non-Exclusivity; Nature and Extent of Rights. The right of indemnification provided for herein (1) shall not be deemed exclusive of any other rights, whether now existing or hereafter created, to which those seeking indemnification hereunder may be entitled under any agreement, bylaw or charter provision, vote of shareholders or directors or otherwise, (2) shall be deemed to create contractual rights in favor of persons entitled to indemnification hereunder, (3) shall continue as to persons who have ceased to have the status pursuant to which they were entitled or were denominated as entitled to indemnification hereunder and shall inure to the benefit of the heirs and legal representatives of persons entitled to indemnification hereunder and (4) shall be applicable to actions, suits or proceedings commenced after the adoption hereof, whether arising from acts or omissions occurring before or after the adoption hereof. The right of indemnification provided for herein may not be amended, modified or repealed so as to limit in any way the indemnification provided for herein with respect to any acts or omissions occurring prior to the effective date of any such amendment, modification or repeal.

Section 7.03. Indemnification of Persons Not Indemnified under Section 7.02.

(a) Scope. The provisions of this Section 7.03 are applicable only to employees and other authorized representatives of the corporation who are not entitled to the benefits of Section 7.02 pursuant to either the terms of Section 7.02 or a resolution of the Board of Directors of this corporation.

(b) Employees; Third Party Actions. The corporation shall indemnify any employee of the corporation who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the corporation) by reason of the fact that such person is or was an authorized representative of the corporation (which, for the purposes of this Section 7.03, shall mean an employee or agent of the corporation, or a person who is or was serving at the request of the corporation as a director, officer, employee, fiduciary or agent of another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise) against expenses (including attorneys’ fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner such person reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe his or her conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which that person reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his or her conduct was unlawful.

(c) Employees; Derivative Actions. The corporation shall indemnify any employee of the corporation who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation to procure a judgment in its favor by reason of the fact that such person is or was an authorized representative of the corporation, against expenses (including attorneys’ fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner such person reasonably believed to be in, or not opposed to, the best interests of the corporation and except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his or her duty to the corporation unless and only to the extent that the court of common pleas of the county in which the registered office of the corporation is located or the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability but in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which the court of common pleas or such other court shall deem proper.

(d) Other Authorized Representatives. To the extent that an authorized representative of the corporation who is not an employee of the corporation has been successful on the merits or otherwise in defense of any action, suit or proceeding referred to in subsections (b) and (c) of this Section 7.03 or in defense of any claim, issue or matter therein, such person shall be indemnified by the corporation against expenses (including attorneys’ fees) actually and reasonably incurred by such person in connection therewith. Such an authorized representative may, at the discretion of the corporation, be indemnified by the corporation in any other circumstances and to any extent if the corporation would be required by subsections (b) and (c) of this Section 7.03 to indemnify such person in such circumstances and to such extent if such person were or

had been an employee of the corporation.

(e) Procedure for Effecting Indemnification. Indemnification under subsections (b), (c) or (d) of this Section 7.03 shall be made when ordered by a court (in which case the expenses, including attorneys' fees, of the authorized representative in enforcing such right of indemnification shall be added to and be included in the final judgment against the corporation) or shall be made upon a determination that indemnification of the authorized representative is required or proper in the circumstances because such person has met the applicable standard of conduct set forth in subsections (b) and (c) of this Section 7.03. Such determination shall be made:

(1) By the board of directors by a majority vote of a quorum consisting of directors who were not parties to such action, suit or proceeding, or

(2) If such a quorum is not obtainable, or, even if obtainable, a majority vote of a quorum of disinterested directors so direct, by independent legal counsel in a written opinion, or

(3) By the shareholders.

(f) Advancing Expenses. Expenses (including attorneys' fees) incurred in defending a civil or criminal action, suit or proceeding shall be paid by the corporation in advance of the final disposition of such action, suit or proceeding, upon receipt of an undertaking by or on behalf of an employee to repay such amount unless it shall ultimately be determined that such person is entitled to be indemnified by the corporation as required in this Section 7.03 or as authorized by law and may be paid by the corporation in advance on behalf of any other authorized representative when authorized by the board of directors upon receipt of a similar undertaking.

(g) Non-Exclusivity; Nature and Extent of Rights. Each person who shall act as an authorized representative of the corporation and who is not entitled to the benefits of Section 7.02, shall be deemed to be doing so in reliance upon such rights of indemnification as are provided in this Section 7.03.

The indemnification provided by this Section 7.03 shall not be deemed exclusive of any other rights to which those seeking indemnification may be entitled under any agreement, vote of shareholders or disinterested directors, statute or otherwise, both as to action in his or her official capacity and as to action in another capacity while holding such office or position, and shall continue as to a person who has ceased to be an authorized representative of the corporation and shall inure to the benefit of the heirs, executors and administrators of such a person.

ARTICLE VIII Amendments

Section 8.01. Amendment of Bylaws. The directors may make, amend, alter or repeal these bylaws by a vote of the majority of the members of the board of directors at any regular or special meeting duly convened after notice of that purpose; subject, however, to the power of the shareholders to make, amend, and repeal these bylaws at any annual or special meeting duly convened after notice of that purpose.

ARTICLE IX [RESERVED]

AMENDMENT NO. 10
TO
PPL EMPLOYEE STOCK OWNERSHIP PLAN

WHEREAS, PPL Services Corporation (“PPL”) has adopted the PPL Employee Stock Ownership Plan (“Plan”) effective January 1, 2000; and

WHEREAS, the Plan was amended and restated effective January 1, 2002, and subsequently amended by Amendment No. 1, 2, 3, 4, 5, 6, 7, 8 and 9; and

NOW, THEREFORE, the Plan is hereby amended as follows:

I. Effective January 1, 2012, Article V Allocation is amended to read as follows:

Article V
Allocation

5.6 **Supplemental 2012 Allocation.** There shall be a supplemental contribution for the 2012 Plan Year that shall be allocated according to the following formula, notwithstanding any other provision in this Plan:

(a) For all Participants that are not covered by a collective bargaining agreement, are not a Highly Compensated Eligible Employee, and have compensation less than \$70,000, there shall be an allocation of Stock with a value of \$800.

(b) For all Participants that are not covered by a collective bargaining agreement, are not a Highly Compensated Eligible Employee, and have compensation of \$70,000 or more, there shall be an allocation of Stock with a value of \$250.

(c) This supplement allocation shall be in addition to any other allocation for the 2012 Plan Year under this Article V.

II. Except as provided in this Amendment No. 10, all other provisions of the Plan shall remain in full force and effect.

IN WITNESS WHEREOF, this Amendment No. 10 is executed this _____ day of _____, 2013.

(a) Includes interest on long-term and short-term debt, as well as amortization of debt discount, expense and premium - net.

(b) Interest on unrecognized tax benefits is not included in fixed charges.

(c) In January 2011, PPL Energy Supply distributed its 100% membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. As a result, PPL Global's operating results were reclassified as Discontinued Operations. Upon reflecting this reclassification, earnings were less than fixed charges for 2009. See Note 9 in PPL Energy Supply's 2011 Form 10-K for additional information. The total amount of fixed charges for this period was approximately \$364 million and the total amount of earnings was approximately \$206 million. The amount of the deficiency, or the amount of fixed charges in excess of earnings, was approximately \$158 million.

CERTIFICATION

I, WILLIAM H. SPENCE, certify that:

1. I have reviewed this quarterly report on Form 10-Q of PPL Corporation (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, VICTOR A. STAFFIERI, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Kentucky Utilities Company (the "registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

Section 8 - Other Events

Item 8.01 Other Events

On October 3, 2013, Louisville Gas and Electric Company (“LG&E”) and Kentucky Utilities Company (“KU”) and, together with LG&E, the “Companies”) issued a press release announcing that they plan to build an approximately 700 megawatt (“MW”) natural gas combined-cycle generating unit at KU’s Green River generating site in western Kentucky. Subject to regulatory applications, permitting and construction schedules, the facility is planned to be operational in 2018. The project’s anticipated cost is approximately \$700 million. The Companies also announced plans for a potential 10 MW solar generation facility to be operational in 2016 costing approximately \$25 million.

A copy of the Companies’ press release is filed herewith as Exhibit 99.1 and incorporated herein by reference.

Section 9 - Financial Statements and Exhibits

Item 9.01 Financial Statements and Exhibits

(a) Exhibits

99.1 - Press Release dated October 3, 2013 of Louisville Gas and Electric Company and Kentucky Utilities Company.

Statements in this report and the accompanying press release, including statements with respect to future events and their timing, including the Companies’ potential regulatory outcomes, as well as other statements as to future costs or expenses, regulation, corporate strategy and performance, are “forward-looking statements” within the meaning of the federal securities laws. Although the Companies believe that the expectations and assumptions reflected in these forward-looking statements are reasonable, these expectations, assumptions and statements are subject to a number of risks and uncertainties, and actual results may differ materially from the results discussed in the statements. The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: regulatory and construction approvals and permitting; market demand and prices for electricity; political, regulatory or economic conditions in states, regions or countries where the Companies conduct business; and the progress of actual construction or purchase of the relevant assets or facilities. Any such forward-looking statements should be considered in light of such important factors and in conjunction with PPL Corporation’s, LG&E and KU Energy LLC’s and the Companies’ Form 10-K and other reports on file with the Securities and Exchange Commission.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrants have duly caused this report to be signed on their behalf by the undersigned hereunto duly authorized.

**LG&E and KU Announce Plans to Build Second Natural Gas
Combined-Cycle Generating Station and a Solar Generation Facility**

*Both plants to be located on existing properties;
NGCC to create about 40 full-time, 250 construction jobs*

(LOUISVILLE, Ky.) – Louisville Gas and Electric and Kentucky Utilities companies announced today that they plan to file for a certificate of public convenience and necessity with the Kentucky Public Service Commission for permission to construct a second natural gas combined-cycle generating station (NGCC) and a solar generating facility. The NGCC plant, to be located in Muhlenberg County, is expected to create about 40 permanent full-time jobs and several hundred construction jobs in western Kentucky.

Due to increased federal environmental regulations, LG&E and KU previously announced they are retiring 800 megawatts of older coal-fired generation — at Cane Run, Green River and Tyrone stations — and building a 640-megawatt NGCC unit at Cane Run. A request for proposals was issued in September 2012 to address the remaining lost generation and long-term load growth.

LG&E and KU evaluated competitive bids which included renewable energy, existing energy within Kentucky and building new generation. The utilities also considered short-term proposals (from one to five years) and long-term proposals (from 10 to 20 years). After careful analysis, building a second NGCC at the existing Green River site proved to be the best long-term solution for baseload generation. While the details are being finalized, the plant is expected to have about 700 megawatts of capacity and cost approximately \$700 million to construct. Additionally, the companies will be seeking to construct about a 10-megawatt solar facility costing approximately \$25 million at one of its existing generating stations. Several sites are still being evaluated in order to determine the optimal location.

“ In order to continue to meet our customers ’ energy needs and considering ever-increasing federal environmental regulations, this has been a lengthy and complicated bid process. We ’ re pleased that the outcome creates economic development in western Kentucky and provides LG&E and KU customers with reliable, low-cost energy that will meet the latest set of federal EPA regulations, ” said Paul W. Thompson, LG&E and KU chief operating officer.

LG&E and KU plan to file the certificate of public convenience and necessity for the new NGCC plant and solar facility with the KPSC before the end of the year. The utilities intend to have the NGCC plant online in 2018 and the solar facility online in 2016. If approved, LG&E and KU ’ s generation capacity will be 59 percent coal-fired, 40 percent natural gas-fired and 1 percent renewable.

###

Louisville Gas and Electric Company and Kentucky Utilities Company, part of the PPL Corporation (NYSE: PPL) family of companies, are regulated utilities that serve a total of 1.2 million customers and have consistently ranked among the best companies for customer service in the United States. LG&E serves 321,000 natural gas and 397,000 electric customers in Louisville and 16 surrounding counties. Kentucky Utilities serves 546,000 customers in 77 Kentucky counties and five counties in Virginia. More information is available at www.lge-ku.com and www.pplweb.com.

Section 8 - Other Events

Item 8.01 Other Events

Louisville Gas and Electric Company

On November 6, 2013, Louisville Gas and Electric Company (“LG&E”) entered into an underwriting agreement (the “LG&E Underwriting Agreement”) with Citigroup Global Markets Inc., RBS Securities Inc., Sun Trust Robinson Humphrey, Inc. and U. S. Bancorp Investments, Inc., as representatives of the several underwriters, relating to the offering and sale by LG&E of \$250 million of 4.65% First Mortgage Bonds due 2043 (the “LG&E Bonds”).

The Bonds were issued on November 14, 2013, under LG&E’s Indenture (the “LG&E Indenture”), dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as previously supplemented and as supplemented by Supplemental Indenture No. 3 thereto (the “LG&E Supplemental Indenture”), dated as of November 1, 2013 (collectively, the “LG&E Indenture”). The Bonds will be secured by the lien of the LG&E Indenture, which creates, subject to certain exceptions and exclusions, a lien on substantially all of LG&E’s real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage, transportation and distribution of natural gas, as described therein.

The Bonds are due November 15, 2043, subject to early redemption. LG&E will use the net proceeds from the sale of the Bonds for repayment of short term debt, including commercial paper, for capital expenditures and for other general corporate purposes.

The Bonds were offered and sold under LG&E’s Registration Statement on Form S-3 on file with the Securities and Exchange Commission (Registration No. 333-180410-01).

A copy of the LG&E Underwriting Agreement is attached as Exhibit 1(a) to this report and incorporated herein by reference. The LG&E Supplemental Indenture and LG&E Officer’s Certificate are filed with this report as Exhibits 4(a) and 4(c), respectively.

Kentucky Utilities Company

On November 6, 2013, Kentucky Utilities Company (“KU”) entered into an underwriting agreement (the “KU Underwriting Agreement”) with BNP Paribas Securities Corp., Citigroup Global Markets Inc., Goldman, Sachs & Co., and Mitsubishi UFJ Securities (USA), Inc., as representatives of the several underwriters, relating to the offering and sale by KU of \$250 million of 4.65% First Mortgage Bonds due 2043 (the “KU Bonds”).

The KU Bonds were issued on November 14, 2013, under KU’s Indenture (the “KU Indenture”), dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as previously supplemented and as supplemented by Supplemental Indenture No. 3 thereto (the “KU Supplemental Indenture”), dated as of November 1, 2013

(collectively, the “KU Indenture”). The KU Bonds will be secured by the lien of the KU Indenture, which creates, subject to certain exceptions and exclusions, a lien on substantially all of KU’s real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity, as described therein.

The KU Bonds are due November 15, 2043, subject to early redemption. KU will use the net proceeds from the sale of the KU Bonds for repayment of short term debt, including commercial paper, for capital expenditures and for other general corporate purposes.

The KU Bonds were offered and sold under KU’s Registration Statement on Form S-3 on file with the Securities and Exchange Commission (Registration No. 333-180410-02).

A copy of the KU Underwriting Agreement is attached as Exhibit 1(b) to this report and incorporated herein by reference. The KU Supplemental Indenture and KU Officer’s Certificate are filed with this report as Exhibits 4(b) and 4(d), respectively.

\$250,000,000
First Mortgage Bonds, 4.65% Series due 2043

UNDERWRITING AGREEMENT

November 6, 2013

Citigroup Global Markets Inc.
RBS Securities Inc.
SunTrust Robinson Humphrey, Inc.
U.S. Bancorp Investments, Inc.

As Representatives of the Several Underwriters
c/o Citigroup Global Markets Inc.
388 Greenwich Street
New York, NY 10013

Ladies and Gentlemen:

1. Introductory.

Louisville Gas and Electric Company, a corporation organized under the laws of the Commonwealth of Kentucky (the “Company”), proposes to issue and sell, and the several Underwriters named in Section 3 hereof (the “Underwriters”), for whom you are acting as representatives (the “Representatives”), propose, severally and not jointly, to purchase, upon the terms and conditions set forth herein, \$250,000,000 aggregate principal amount of the Company’s First Mortgage Bonds, 4.65% Series due 2043 (the “Bonds”) to be issued under an Indenture, dated as of October 1, 2010 (the “Base Indenture”), as heretofore amended and supplemented by Supplemental Indenture No. 1, dated as of October 15, 2010, and Supplemental Indenture No. 2 thereto, dated as of November 1, 2010, and as to be further supplemented by Supplemental Indenture No. 3 thereto relating to the Bonds, to be dated as of November 1, 2013 (the “Supplemental Indenture”, and the Base Indenture as so amended and supplemented, the “Indenture”), between the Company and The Bank of New York Mellon, as trustee thereunder (the “Trustee”).

The Company has filed with the Securities and Exchange Commission (the “Commission”) an automatic shelf registration statement (No. 333-180410-01) on Form S-3, including the related preliminary prospectus or prospectus, which registration statement became effective upon filing under Rule 462(e) (“Rule 462(e)”) of the rules and regulations of the Commission (the “Securities Act Regulations”) under the

Securities Act of 1933, as amended (the “Securities Act”). Such registration statement covers the registration of the Bonds under the Securities Act. Promptly after the date of this Agreement, the Company will prepare and file a prospectus in accordance with the provisions of Rule 430B (“Rule 430B”) of the Securities Act Regulations and paragraph (b) of Rule 424 (“Rule 424(b)”) of the Securities Act Regulations. Any information included in such prospectus that was omitted from such registration statement at the time it became effective but that is deemed to be part of and included in such registration statement pursuant to Rule 430B is referred to as “Rule 430B Information.” Each prospectus used in connection with the offering of the Bonds that omitted Rule 430B Information (other than a “free writing prospectus” as defined in Rule 405 of the Securities Act Regulations that has not been approved in writing by the Company and the Representatives), including any related prospectus supplement and the documents incorporated by reference therein pursuant to Item 12 of Form S-3, is herein called a “preliminary prospectus.” Such registration statement, at any given time, including the amendments or supplements thereto to such time, the exhibits and any schedules thereto at such time, the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the Securities Act at such time and the documents otherwise deemed to be a part thereof or included therein by the Securities Act Regulations, is herein called the “Registration Statement.” The Registration Statement at the time it originally became effective is herein called the “Original Registration Statement.” The final prospectus in the form first furnished to the Underwriters for use in connection with the offering of the Bonds, including the related prospectus supplement and the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the Securities Act as of the date hereof, is herein called the “Prospectus.” For purposes of this Agreement, all references to the Registration Statement, any preliminary prospectus, the Prospectus or any amendment or supplement to any of the foregoing shall be deemed to include the copy filed with the Commission pursuant to its Electronic Data Gathering, Analysis and Retrieval (“EDGAR”) system.

All references in this Agreement to financial statements and schedules and other information which is “contained,” “included” or “stated” in the Registration Statement, any preliminary prospectus or the Prospectus (or other references of like import) shall be deemed to mean and include all such financial statements and schedules and other information which is incorporated by reference in or otherwise deemed by the Securities Act Regulations to be a part of or included in the Registration Statement, any preliminary prospectus or the Prospectus, as the case may be; and all references in this Agreement to amendments or supplements to the Registration Statement, any preliminary prospectus or the Prospectus shall be deemed to mean and include the filing of any document under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) which is incorporated by reference in or otherwise deemed by the Securities Act Regulations to be a part of or included in the Registration Statement, such preliminary prospectus or the Prospectus, as the case may be.

2. Representations and Warranties.

The Company represents and warrants to each Underwriter as of the date hereof, as of the Applicable Time referred to in Section 2(b) hereof and as of the Closing Date referred to in Section 5 hereof, and agrees with each Underwriter as follows:

(a) (A) At the time of filing the Original Registration Statement, (B) at the time of the most recent amendment thereto for the purposes of complying with Section 10(a)(3) of the Securities Act (whether such amendment was by post-effective amendment, incorporated report filed pursuant to Section 13 or 15(d) of the Exchange Act or form of prospectus), (C) at the time the Company or any person acting on its behalf (within the meaning, for this clause only, of Rule 163(c) of the Securities Act Regulations) made any offer relating to the Bonds in reliance on the exemption of Rule 163 of the Securities Act Regulations (“Rule 163”) or made a bona fide offer (within the meaning of Rule 164(h)(2) of the Securities Act Regulations) and (D) at the date hereof, the Company was and is eligible to register and issue the Bonds as a “well-known seasoned issuer” as defined in Rule 405 of the Securities Act Regulations (“Rule 405”), including not having been and not being an “ineligible issuer” as defined in Rule 405. The Registration Statement is an “automatic shelf registration statement,” as defined in Rule 405, and the Bonds, since their registration on the Registration Statement, have been and remain eligible for registration by the Company on a Rule 405 “automatic shelf registration statement.” The Company has not received from the Commission any notice pursuant to Rule 401(g)(2) of the Securities Act Regulations objecting to the use of the automatic shelf registration statement form;

(b) The Original Registration Statement became effective upon filing under Rule 462(e) of the Securities Act Regulations on March 28, 2012, and any post-effective amendment thereto also became effective upon filing under Rule 462(e). No stop order suspending the effectiveness of the Registration Statement or any notice objecting to its use has been issued under the Securities Act and no proceedings for that purpose have been instituted or are pending or, to the knowledge of the Company, are contemplated by the Commission, and any request on the part of the Commission for additional information has been complied with.

Any offer that is a written communication relating to the Bonds made prior to the filing of the Original Registration Statement by the Company or any person acting on its behalf (within the meaning, for this paragraph only, of Rule 163(c) of the Securities Act Regulations) has been filed with the Commission in accordance with the exemption provided by Rule 163 and otherwise complied with the requirements of Rule 163, including without limitation the legending requirement, to qualify such offer for the exemption from Section 5(c) of the Securities Act provided by Rule 163.

At the respective times the Original Registration Statement and each amendment thereto became effective, at each deemed effective date with respect to the Underwriters pursuant to Rule 430B(f)(2) of the Securities Act Regulations and at the Closing Date, the Registration Statement complied and will comply in all material respects with the requirements of the Securities Act and the Securities Act Regulations and the Trust Indenture Act of 1939, as amended (the "Trust Indenture Act"), and the rules and regulations thereunder, and did not and will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading.

Neither the Prospectus nor any amendments or supplements thereto, at the time the Prospectus or any such amendment or supplement was issued and at the Closing Date, included or will include an untrue statement of a material fact or omitted or will omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

Each preliminary prospectus (including the prospectus or prospectuses filed as part of the Original Registration Statement or any amendment thereto) complied when so filed and each Prospectus will comply when so filed in all material respects with the Securities Act Regulations and each preliminary prospectus and the Prospectus delivered to the Underwriters for use in connection with this offering was identical to the electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

As of the Applicable Time (as defined below), neither (x) the Issuer General Use Free Writing Prospectus(es) (as defined below) issued at or prior to the Applicable Time, the Statutory Prospectus (as defined below) and the Issuer Free Writing Prospectus, including the Final Term Sheet prepared and filed pursuant to Section 6(b) identified on Schedule A hereto, all considered together (collectively, the "General Disclosure Package"), nor (y) any individual Issuer Limited Use Free Writing Prospectus (as defined below), when considered together with the General Disclosure Package, included any untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

As of the time of the filing of the Final Term Sheet, the General Disclosure Package, when considered together with the Final Term Sheet (as defined in Section 6(b)), will not include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

As used in this subsection and elsewhere in this Agreement:

“Applicable Time” means 2:40 p.m., New York City time, on November 6, 2013 or such other time as agreed by the Company and the Representatives.

“Issuer Free Writing Prospectus” means any “issuer free writing prospectus,” as defined in Rule 433 of the Securities Act Regulations (“Rule 433”), relating to the Bonds that (i) is required to be filed with the Commission by the Company, (ii) is a “road show that is a written communication” within the meaning of Rule 433(d)(8)(i), whether or not required to be filed with the Commission or (iii) is exempt from filing pursuant to Rule 433(d)(5)(i) because it contains a description of the Bonds or of the offering that does not reflect the final terms, in each case in the form filed or required to be filed with the Commission or, if not required to be filed, in the form retained in the Company’s records pursuant to Rule 433(g).

“Issuer General Use Free Writing Prospectus” means any Issuer Free Writing Prospectus that is intended for general distribution to prospective investors, as evidenced by its being specified in Schedule A hereto.

“Issuer Limited Use Free Writing Prospectus” means any Issuer Free Writing Prospectus that is not an Issuer General Use Free Writing Prospectus.

“Permitted Free Writing Prospectus” means any free writing prospectus consented to in writing by the Company and the Representatives. For the avoidance of doubt, any free writing prospectus that is not consented to in writing by the Company does not constitute a Permitted Free Writing Prospectus and will not be an Issuer Free Writing Prospectus.

“Statutory Prospectus” as of any time means the prospectus relating to the Bonds that is included in the Registration Statement immediately prior to that time, including any document incorporated by reference therein and any preliminary or other prospectus deemed to be a part thereof.

Each Issuer Free Writing Prospectus, as of its issue date and at all subsequent times through the completion of the public offer and sale of the Bonds or until any earlier date that the Company notified or notifies the Representatives as described in Section 6(g), did not, does not and will not include any information that conflicted, conflicts or will conflict with the information contained in the Registration Statement or the Prospectus, including any document incorporated by reference therein and any preliminary or other prospectus deemed to be a part thereof that has not been superseded or modified.

The representations and warranties in this subsection shall not apply to statements in or omissions from the Registration Statement, the Prospectus or any Issuer Free Writing Prospectus made in reliance upon and in conformity with written information furnished to the Company as set forth in Schedule B hereto by any Underwriter through the Representatives expressly for use therein or to any statements in or omissions from the Statement of Eligibility of the Trustee under the Indenture. At the effective date of the Registration Statement, the Indenture conformed in all material respects to the Trust Indenture Act and the rules and regulations thereunder;

(c) The Company has been duly organized, is validly existing as a corporation in good standing under the laws of the Commonwealth of Kentucky, has the power and authority to own its property and to conduct its business as described in the General Disclosure Package and the Prospectus and to enter into and perform its obligations under this Agreement, the Indenture and the Bonds, and is duly qualified to transact business and is in good standing in each jurisdiction in which the conduct of its business or its ownership or leasing of property requires such qualification, except to the extent that the failure to be so qualified or be in good standing would not have a material adverse effect on the Company;

(d) The Bonds have been duly authorized by the Company and, when issued, authenticated and delivered in the manner provided for in the Indenture and delivered against payment of the consideration therefor, will constitute valid and binding obligations of the Company enforceable in accordance with their terms, except to the extent limited by bankruptcy, insolvency, fraudulent conveyance, reorganization or moratorium laws or by other laws now or hereafter in effect relating to or affecting the enforcement of mortgagee's and other creditors' rights and by general equitable principles (regardless of whether considered in a proceeding in equity or at law), an implied covenant of good faith and fair dealing and consideration of public policy, and federal or state securities law limitations on indemnification and contribution (the "Enforceability Exceptions"); the Bonds will be in the forms established pursuant to, and entitled to the benefits of, the Indenture; and the Bonds will conform in all material respects to the statements relating thereto contained in the General Disclosure Package and the Prospectus;

(e) The Indenture has been duly authorized by the Company; at the Closing Date, the Supplemental Indenture will have been duly executed and delivered by the Company, and assuming due authorization, execution and delivery of the Indenture by the Trustee, the Indenture will constitute a valid and legally binding obligation of the Company enforceable in accordance with its terms (except to the extent limited by the Enforceability Exceptions); the Indenture conforms and will conform in all material respects to the statements relating thereto contained in the General Disclosure Package and the Prospectus; and at the

effective date of the Registration Statement, the Indenture was duly qualified under the Trust Indenture Act;

(f) The Company is in compliance in all material respects with its amended and restated articles of incorporation and bylaws;

(g) The Order of the Kentucky Public Service Commission, dated August 3, 2012, has been obtained and is in full force and effect and is sufficient to authorize the issuance and sale by the Company of the Bonds as contemplated by this Agreement, and no further consent, approval, authorization, order, registration or qualification of or with any federal, state or local governmental agency or body or any federal, state or local court is required to be obtained by the Company for the consummation of the transactions contemplated by this Agreement and the Indenture in connection with the offering, issuance and sale of the Bonds by the Company, or the performance by the Company of its obligations hereunder or thereunder, except (i) such as have been obtained or (ii) such as may be required under the blue sky laws of any jurisdiction in connection with the purchase and distribution of the Bonds by the Underwriters in the manner contemplated herein and in the General Disclosure Package and the Prospectus;

(h) None of the execution and delivery of this Agreement, the Supplemental Indenture, the issue and sale of the Bonds, or the consummation of any of the transactions herein or therein contemplated, will (i) violate any law or any regulation, order, writ, injunction or decree of any court or governmental instrumentality applicable to the Company, (ii) breach or violate, or constitute a default under, the Company's amended and restated articles of incorporation or bylaws, or (iii) breach or violate, or constitute a default under, any material agreement or instrument to which the Company is a party or by which it is bound, except in the case of clauses (i) and (iii), for such violations, breaches or defaults that would not in the aggregate have a material adverse effect on the Company's ability to perform its obligations hereunder or thereunder;

(i) The consolidated financial statements of the Company, together with the related notes and schedules, each set forth or incorporated by reference in the Registration Statement comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act and the related published rules and regulations thereunder; such audited financial statements have been prepared in all material respects in accordance with generally accepted accounting principles consistently applied throughout the periods involved, except as disclosed therein; and no material modifications are required to be made to the unaudited interim financial statements for them to be in conformity with generally accepted accounting principles;

(j) This Agreement has been duly and validly authorized, executed and delivered by the Company;

(k) Since the respective dates as of which information is given in the General Disclosure Package and the Prospectus, except as otherwise stated therein or contemplated thereby, there has been no material adverse change, or event or occurrence that would result in a material adverse change in the financial position or results of operations of the Company;

(l) The Company is not, and after giving effect to the offering and sale of the Bonds and the application of the proceeds thereof as described in the General Disclosure Package and the Prospectus, will not be, an “investment company” as such term is defined in the Investment Company Act of 1940, as amended;

(m) Ernst & Young LLP and PricewaterhouseCoopers LLP, who have each audited certain financial statements of the Company and issued their respective reports with respect to the audited consolidated financial statements and schedules included and incorporated by reference in the General Disclosure Package and the Prospectus, are independent registered public accounting firms with respect to the Company during the periods covered by their reports within the meaning of the Securities Act and the Securities Act Regulations and the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”);

(n) The Company maintains systems of internal accounting controls sufficient to provide reasonable assurance that transactions are executed in accordance with management’s authorizations and transactions are recorded as necessary to permit preparation of financial statements. The Company maintains effective “disclosure controls and procedures” as such term is defined in Rule 13a-15(e) under the Exchange Act;

(o) (i) The Company has good and sufficient title to the interest and estate of the Company in all real property, and good title to all other property, which is or is to be specifically or generally described or referred to in the Indenture as being subject to the lien thereof, subject only to (A) the lien of the Indenture, (B) Permitted Liens (as defined in the Indenture), and (C) defects and irregularities in title and other Liens (as defined in the Indenture) that in each case are not prohibited by the Indenture and that, in the Company’s judgment, do not, individually or in the aggregate, impair the operation of the Company’s business in any material respect; (ii) the descriptions of all such property contained or referred to in the Indenture are adequate for purposes of the lien purported to be created by the Indenture; (iii) the Indenture (excluding the Supplemental Indenture) constitutes, and, on the Closing Date, the Indenture will constitute, a valid mortgage lien on and security interest in all property which is specifically or generally described or referred to therein as being subject to the lien thereof (other than such property as has been released from the lien of the Indenture in accordance with the terms thereof), subject only to the Liens, defects and irregularities referred to in subparagraph (i) above; and (iv) on and after the

Closing Date, the Indenture by its terms will effectively subject to the lien thereof all property located in the Commonwealth of Kentucky acquired by the Company after the Closing Date of the character generally described or referred to in the Indenture as being subject to the lien thereof, subject to (A) defects and irregularities in title existing at the time of such acquisition, (B) Purchase Money Liens (as defined in the Indenture) and any other Liens placed or otherwise existing or placed on such property at the time of such acquisition, (C) with respect to real property, Liens placed thereon following the acquisition thereof by the Company and prior to the recording and filing of a supplemental indenture or other instrument specifically describing such real property and (D) possible limitations arising out of laws relating to preferential transfers of property during certain periods prior to commencement of bankruptcy, insolvency or similar proceedings and to limitations on liens on property acquired by a debtor after the commencement of any such proceedings, and possible claims and taxes of the federal government, and except as otherwise provided in Article Thirteen of the Indenture; it being understood that, if any property were to become subject to the lien of the Indenture by virtue of the "springing lien provisions" contained in the proviso at the end of the definition of "Excepted Property" in the granting clauses of the Indenture, the lien of the Indenture as to such property would be subject to any Liens existing on such property at the time such property became subject to the lien of the Indenture;

(p) On the Closing Date, the Indenture will have been duly recorded or lodged for record as a mortgage of real estate, and any required filings with respect to personal property and fixtures subject to the lien of the Indenture will have been duly made, in each place in which such recording and filing is required to protect, preserve and perfect the lien of the Indenture, and all taxes and recording and filing fees required to be paid with respect to the execution, recording or filing of the Indenture, the filing of financing statements and similar documents and the issuance of the Bonds will have been paid;

(q) The interactive data in eXtensible Business Reporting Language included or incorporated by reference in the Registration Statement fairly presents the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto;

(r) None of the Company or, to the knowledge of the Company, any director, officer, agent, employee or affiliate of the Company is aware of or has taken any action, directly or indirectly, that would result in a violation by such persons of the Foreign Corrupt Practices Act of 1977, as amended, and the rules and regulations thereunder (collectively, the "FCPA"), including, without limitation, making use of the mails or any means or instrumentality of interstate commerce corruptly in furtherance of an offer, payment, promise to pay or authorization of the payment of any money, or other property, gift, promise to give, or authorization of the giving of anything of value to any "foreign official"

(as such term is defined in the FCPA) or any foreign political party or official thereof or any candidate for foreign political office, in contravention of the FCPA, and the Company and, to the knowledge of the Company, its affiliates have conducted their businesses in compliance with the FCPA and have instituted and maintain policies and procedures designed to ensure, and which are reasonably expected to continue to ensure, continued compliance therewith;

(s) The operations of the Company are and have been conducted at all times in compliance in all material respects with applicable financial recordkeeping and reporting requirements of the Currency and Foreign Transactions Reporting Act of 1970, as amended, the money laundering statutes of all applicable jurisdictions, the rules and regulations thereunder and any related or similar rules, regulations or guidelines issued, administered or enforced by any governmental agency (collectively, the “Money Laundering Laws”) and no action, suit or proceeding by or before any court or governmental agency, authority or body or any arbitrator involving the Company with respect to the Money Laundering Laws is pending or, to the best knowledge of the Company, threatened; and

(t) None of the Company or, to the knowledge of the Company, any director, officer, agent, employee or affiliate of the Company is currently subject to any U.S. sanctions administered by the Office of Foreign Assets Control of the U.S. Treasury Department (“OFAC”); and the Company will not directly or indirectly use the proceeds of the offering, or lend, contribute or otherwise make available such proceeds, to any joint venture partner or other person or entity, for the purpose of financing the activities of any person currently subject to any U.S. sanctions administered by OFAC.

Each of you, as one of the several Underwriters, represents and warrants to, and agrees with, the Company, its directors and such of its officers as shall have signed the Registration Statement, and to each other Underwriter, that the information set forth in Schedule B hereto furnished to the Company by or through you or on your behalf expressly for use in the Registration Statement or the Prospectus does not contain an untrue statement of a material fact and does not omit to state a material fact in connection with such information required to be stated therein or necessary to make such information not misleading.

3. Purchase and Sale of Bonds.

On the basis of the representations, warranties and agreements herein contained, but subject to the terms and conditions herein contained, the Company agrees to sell to the Underwriters, and the Underwriters agree, severally and not jointly, to purchase from the Company, at a purchase price of 98.405% of the principal amount thereof, plus accrued interest, if any, from the date of the first authentication of the Bonds

to the Closing Date (as hereinafter defined), the respective principal amounts of the Bonds set forth below opposite the names of such Underwriters.

Underwriters	Principal Amount of Bonds
Citigroup Global Markets Inc.	\$ 50,000,000
RBS Securities Inc.	\$ 50,000,000
SunTrust Robinson Humphrey, Inc.	\$ 50,000,000
U.S. Bancorp Investments, Inc.	\$ 50,000,000
Banco Bilbao Vizcaya Argentaria, S.A.	\$ 12,500,000
BNY Mellon Capital Markets, LLC	\$ 12,500,000
Mizuho Securities USA Inc.	\$ 12,500,000
PNC Capital Markets LLC	\$ 12,500,000
Total	\$ 250,000,000

4. Public Offering.

The several Underwriters agree that as soon as practicable, in their judgment, they will make a public offering of their respective portions of the Bonds in accordance with the terms set forth in the General Disclosure Package and the Prospectus.

5. Delivery and Payment.

The Bonds will be represented by one or more definitive global securities in book-entry form which will be deposited by or on behalf of the Company with The Depository Trust Company (“DTC”) or its designated custodian. The Company will deliver the Bonds to you against payment by you of the purchase price therefor (such delivery and payment herein referred to as the “Closing”) by wire transfer of immediately available funds to the Company’s account (No. 3752099133) at Bank of America (ABA Routing Number 026-0095-93) by 10:00 a.m., New York City time, on the Closing Date. Such payment shall be made upon delivery of the Bonds for the account of Citigroup Global Markets Inc. at DTC. The Bonds so to be delivered will be in fully registered form in such authorized denominations as established pursuant to the Indenture. The Company will make the Bonds available for inspection by you at the office of The Bank of New York Mellon, 101 Barclay Street, 8th Floor, New York, New York 10286, Attention: Corporate Trust, not later than 10:00 a.m., New York City time, on the Business Day next preceding the Closing Date (“Business Day” shall mean any day other than a Saturday, a Sunday or a legal holiday or a day on which banking institutions or trust companies are authorized or obligated by law to close in The City of New York).

Each Underwriter represents and agrees that, unless it obtains the prior written consent of the Company and the Representatives, it has not and will not make any

offer relating to the Bonds that would constitute or would use an “issuer free writing prospectus” as defined in Rule 433 or that would otherwise constitute a “free writing prospectus” as defined in Rule 405 of the Securities Act Regulations that would be required to be filed with the Commission, other than information contained in the Final Term Sheet prepared in accordance with Section 6(b).

The term “Closing Date” wherever used in this Agreement shall mean November 14, 2013, or such other date (i) not later than the seventh full Business Day thereafter as may be agreed upon in writing by the Company and you, or (ii) as shall be determined by postponement pursuant to the provisions of Section 10 hereof.

6. Certain Covenants of the Company.

The Company covenants and agrees with the several Underwriters:

(a) Subject to Section 6(b), to comply with the requirements of Rule 430B and to notify the Representatives immediately, and confirm the notice in writing, (i) when any post-effective amendment to the Registration Statement or new registration statement relating to the Bonds shall become effective, or any supplement to the Prospectus or any amended Prospectus shall have been filed, (ii) of the receipt of any comments from the Commission, (iii) of any request by the Commission for any amendment to the Registration Statement or the filing of a new registration statement or any amendment or supplement to the Prospectus or any document incorporated by reference therein or otherwise deemed to be a part thereof or for additional information, (iv) of the issuance by the Commission of any stop order suspending the effectiveness of the Registration Statement or such new registration statement or any notice objecting to its use or of any order preventing or suspending the use of any preliminary prospectus, or of the suspension of the qualification of the Bonds for offering or sale in any jurisdiction, or of the initiation or threatening of any proceedings for any of such purposes or of any examination pursuant to Section 8(e) of the Securities Act concerning the Registration Statement and (v) if the Company becomes the subject of a proceeding under Section 8A of the Securities Act in connection with the offering of the Bonds. The Company will effect the filings required under Rule 424(b), in the manner and within the time period required by Rule 424(b) (without reliance on Rule 424(b)(8)). The Company will make every reasonable effort to prevent the issuance of any stop order and, if any stop order is issued, to obtain the lifting thereof at the earliest possible moment. The Company shall pay the required Commission filing fees relating to the Bonds within the time required by Rule 456(b)(1)(i) of the Securities Act Regulations without regard to the proviso therein and otherwise in accordance with Rules 456(b) and 457(r) of the Securities Act Regulations (including, if applicable, by updating the “Calculation of Registration Fee” table in accordance with Rule 456(b)(1)(ii) either in a post-effective amendment to the Registration Statement or on the cover page of a prospectus filed pursuant to Rule 424(b)).

(b) To give the Representatives notice of its intention to file or prepare any amendment to the Registration Statement or new registration statement relating to the Bonds or any amendment, supplement or revision to either any preliminary prospectus (including any prospectus included in the Original Registration Statement or amendment thereto at the time it became effective) or to the Prospectus, whether pursuant to the Securities Act, the Exchange Act or otherwise, and the Company will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing or use, as the case may be, and will not file or use any such document to which the Representatives shall reasonably object in writing. The Company will give the Representatives notice of its intention to make any such filing pursuant to the Exchange Act, Securities Act or Securities Act Regulations from the Applicable Time to the Closing Date and will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing and will not file or use any such document to which the Representatives shall reasonably object in writing. The Company will prepare a final term sheet (the “Final Term Sheet”) substantially in the form attached as Annex I hereto reflecting the final terms of the Bonds, and shall file such Final Term Sheet as an “Issuer Free Writing Prospectus” in accordance with Rule 433; provided that the Company shall furnish the Representatives with copies of any such Final Term Sheet a reasonable amount of time prior to such proposed filing and will not use or file any such document to which the Representatives shall reasonably object in writing.

(c) To furnish to each Underwriter, without charge, during the period when the Prospectus is required to be delivered under the Securities Act, as many copies of the Prospectus and any amendments and supplements thereto as each Underwriter may reasonably request.

(d) That before amending and supplementing the preliminary prospectus or the Prospectus, it will furnish to the Representatives a copy of each such proposed amendment or supplement and that it will not use any such proposed amendment or supplement to which the Representatives reasonably object in writing.

(e) To use its best efforts to qualify the Bonds and to assist in the qualification of the Bonds by you or on your behalf for offer and sale under the securities or “blue sky” laws of such jurisdictions as you may designate, to continue such qualification in effect so long as required for the distribution of the Bonds and to reimburse you for any expenses (including filing fees and fees and disbursements of counsel) paid by you or on your behalf to qualify the Bonds for offer and sale, to continue such qualification, to determine its eligibility for investment and to print any preliminary or supplemental “blue sky” survey or legal investment memorandum relating thereto; provided that the Company shall not be required to qualify as a foreign corporation in any State, to consent to service of process in any State other than with respect to claims arising out of the offering or

sale of the Bonds, or to meet any other requirement in connection with this paragraph (e) deemed by the Company to be unduly burdensome;

(f) Promptly to deliver to you one signed copy of the Registration Statement as originally filed and of all amendments thereto heretofore or hereafter filed, including conformed copies of all exhibits except those incorporated by reference, and such number of conformed copies of the Registration Statement (but excluding the exhibits), each related preliminary prospectus, the Prospectus, and any amendments and supplements thereto, as you may reasonably request;

(g) If at any time prior to the completion of the sale of the Bonds by the Underwriters (as determined by the Representatives), any event occurs as a result of which the Prospectus, as then amended or supplemented, would include any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading, or if it should be necessary to amend or supplement the Prospectus to comply with applicable law, the Company promptly (i) will notify the Representatives of any such event; (ii) subject to the requirements of paragraph (b) of this Section 6, will prepare an amendment or supplement that will correct such statement or omission or effect such compliance; and (iii) will supply any supplemented or amended Prospectus to the several Underwriters without charge in such quantities as they may reasonably request; provided that the expense of preparing and filing any such amendment or supplement to the Prospectus (x) that is necessary in connection with such a delivery of a supplemented or amended Prospectus more than nine months after the date of this Agreement or (y) that relates solely to the activities of any Underwriter shall be borne by the Underwriter or Underwriters or the dealer or dealers requiring the same; and provided further that you shall, upon inquiry by the Company, advise the Company whether or not any Underwriter or dealer which shall have been selected by you retains any unsold Bonds and, for the purposes of this subsection (g), the Company shall be entitled to assume that the distribution of the Bonds has been completed when they are advised by you that no such Underwriter or dealer retains any Bonds. If at any time following issuance of an Issuer Free Writing Prospectus, there occurs an event or development as a result of which such Issuer Free Writing Prospectus would conflict with the information contained in the Registration Statement (or any other registration statement related to the Bonds) or the Statutory Prospectus or any preliminary prospectus would include an untrue statement of a material fact or would omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances prevailing at that subsequent time, not misleading, the Company will promptly notify the Representatives and will promptly amend or supplement, at its own expense, such Issuer Free Writing Prospectus to eliminate or correct such conflict, untrue statement or omission.

(h) As soon as practicable, to make generally available to its security holders an earnings statement covering a period of at least twelve months beginning after the “effective date of the registration statement” within the meaning of Rule 158 under the Securities Act which will satisfy the provisions of Section 11(a) of the Securities Act;

(i) To pay or bear (i) all expenses in connection with the matters herein required to be performed by the Company, including all expenses (except as provided in Section 6(g) above) in connection with the preparation and filing of the Registration Statement, the General Disclosure Package and the Prospectus, and any amendment or supplement thereto, and the furnishing of copies thereof to the Underwriters, and all audits, statements or reports in connection therewith, and all expenses in connection with the issue and delivery of the Bonds to the Underwriters at the place designated in Section 5 hereof, any fees and expenses relating to the eligibility and issuance of the Bonds in book-entry form and the cost of obtaining CUSIP or other identification numbers for the Bonds, all federal and state taxes (if any) payable (not including any transfer taxes) upon the original issue of the Bonds; (ii) all expenses in connection with the printing, reproduction and delivery of this Agreement and the printing, reproduction and delivery of any preliminary prospectus and each Prospectus, and (except as provided in Section 6(g) above) any amendment or supplement thereto, to the Underwriters; (iii) any and all fees payable in connection with the rating of the Bonds; (iv) the Company’s costs and expenses relating to investor presentations on any “road show” undertaken in connection with the marketing of the offering of the Bonds, including, without limitation, expenses associated with the production of road show slides and graphics, fees and expenses of any consultants engaged in connection with the road show presentations with the prior approval of the Company, travel and lodging expenses of the representatives and officers of the Company and any such consultants, and the Company’s portion of the costs of any aircraft chartered in connection with the road show; (v) all costs and expenses relating to the creation, filing or perfection of the security interests under the Indenture; and (vi) the reasonable fees and expenses of the Trustee, including the fees and disbursements of counsel for the Trustee, in connection with the Indenture and the Bonds;

(j) During the period from the date of this Agreement through the Closing Date, the Company shall not, without the Representatives’ prior written consent, directly or indirectly, sell, offer to sell, grant any option for the sale of, or otherwise dispose of, any Bonds, any security convertible into or exchangeable into or exercisable for Bonds or any debt securities substantially similar to the Bonds (except for the Bonds issued pursuant to this Agreement); and

(k) The Company represents and agrees that, unless it obtains the prior consent of the Representatives (such consent not to be unreasonably withheld), it has not made and will not make any offer relating to the Bonds that would

constitute an Issuer Free Writing Prospectus or that would otherwise constitute a “free writing prospectus,” as defined in Rule 405 of the Securities Act Regulations, required to be filed with the Commission. The Company represents that it has treated or agrees that it will treat each Permitted Free Writing Prospectus as an “issuer free writing prospectus,” as defined in Rule 433, and has complied and will comply with the requirements of Rule 433 applicable to any Permitted Free Writing Prospectus, including timely filing with the Commission where required, legending and record keeping in accordance with the Securities Act Regulations.

7. Conditions of Underwriters’ Obligations.

The obligations of the several Underwriters to purchase and pay for the Bonds on the Closing Date shall be subject to the accuracy of the representations and warranties on the part of the Company contained herein at the date of this Agreement and the Closing Date, to the accuracy of the statements of the Company made in any certificates pursuant to the provisions hereof, to the performance by the Company of its obligations hereunder and to the following additional conditions:

(a) You shall have received a certificate, dated the Closing Date, of (1) an executive officer of the Company and (2) a principal financial or accounting officer or the controller of the Company, in which such officers, to the best of their knowledge after reasonable investigation, shall state that (i) the representations and warranties of the Company in this Agreement are true and correct in all material respects as of the Closing Date, (ii) the Company has complied in all material respects with all agreements and satisfied all conditions on its part to be performed or satisfied at or prior to the Closing Date, (iii) no stop order suspending the effectiveness of the Registration Statement has been issued, and no proceedings for that purpose have been instituted or are pending by the Commission, and (iv) subsequent to the date of the latest financial statements in the General Disclosure Package and the Prospectus, there has been no material adverse change in the financial position or results of operations of the Company except as set forth or contemplated in the General Disclosure Package and the Prospectus.

(b) You shall have received from PricewaterhouseCoopers LLP a letter, dated the Closing Date, (i) confirming that PricewaterhouseCoopers LLP was an independent registered public accounting firm with respect to the Company within the meaning of the Securities Act and the Securities Act Regulations, (ii) stating that in their opinion, the consolidated financial statements of the Company audited by them and included or incorporated by reference in the Registration Statement comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act, and the related published rules and regulations thereunder, and (iii) stating that they have read certain financial and statistical amounts included or incorporated by reference in the Registration Statement and the Prospectus, which amounts are set forth in such letter and agreed such amounts to the Company’s accounting records which are

subject to controls over financial reporting or which have been derived directly from such accounting records by analysis or computation and have found such amounts to be in agreement with such results, except as otherwise specified in such letter. You shall have also received from Ernst & Young LLP letters, dated the date of this Agreement and the Closing Date, confirming that Ernst & Young LLP is an independent registered public accounting firm with respect to the Company within the meaning of the Securities Act and the Securities Act Regulations, and that:

(i) in their opinion, the consolidated financial statements of the Company audited by them and included or incorporated by reference in the Registration Statement comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act, and the related published rules and regulations thereunder;

(ii) they have read the minutes of the meetings of the Company's Board of Directors and committees thereof as set forth in the minute books at a specified date not more than five Business Days prior to the date of delivery of such letter;

(iii) they have, if applicable, performed the procedures specified by the Public Company Accounting Oversight Board (United States) for a review of interim financial information as described in Statement on Auditing Standards No. 100, Interim Financial Information, on the unaudited condensed interim financial statements of the Company included or incorporated by reference in the Registration Statement and have read the unaudited interim financial data for the period from the date of the latest balance sheet included or incorporated by reference in the Registration Statement to the date of the latest available interim financial data; and

(iv) on the basis of the review referred to in clauses (ii) and (iii) above, a reading of the latest available interim financial statements of the Company, inquiries performed by them of certain officials of the Company who have responsibility for financial and accounting matters regarding the specific items for which representations are requested below and other specified procedures, nothing came to their attention that caused them to believe that:

(A) any material modifications should be made to the unaudited interim financial statements included or incorporated by reference in the Registration Statement for them to be in conformity with generally accepted accounting principles;

(B) the unaudited interim financial statements included or incorporated by reference in the Registration Statement do not

comply as to form in all material respects with the applicable accounting requirements of the Securities Act, the Exchange Act and the related published rules and regulations thereunder;

(C) at the date of the latest available balance sheet of the Company read by such accountants, there was any change in the stockholders equity, common stock, treasury stock or preferred securities (with or without sinking fund requirements), or any increase in long-term debt, as compared with amounts shown on the latest consolidated balance sheet included or incorporated by reference in the Registration Statement, or, at the date of the latest available income statement of the Company read by such accountants, there was any change in the consolidated operating revenue, consolidated operating income or consolidated net income, as compared with amounts shown on the latest consolidated income statement included or incorporated by reference in the Registration Statement; or

(D) at a date not more than five Business Days prior to the date of this Agreement, there was any change in (i) the stockholders equity, common stock, treasury stock or preferred securities (with or without sinking fund requirements), or any increase in long-term debt, as compared with amounts shown on the latest consolidated balance sheet included or incorporated by reference in the Registration Statement or (ii) the consolidated operating revenue, consolidated operating income or consolidated net income, as compared with amounts shown on the latest consolidated income statement included or incorporated by reference in the Registration Statement; except in all cases for changes, increases or decreases that the Prospectus discloses have occurred or may occur or that are described in such letter; and

(v) they have read certain financial and statistical amounts included or incorporated by reference in the Registration Statement and the Prospectus, which amounts are set forth in such letter and agreed such amounts to the Company's accounting records which are subject to controls over financial reporting or which have been derived directly from such accounting records by analysis or computation and have found such amounts to be in agreement with such results, except as otherwise specified in such letter, and such other procedures as the Underwriters may request and Ernst & Young LLP is willing to perform and report upon.

(c) The Registration Statement shall have become effective and, on the Closing Date, no stop order suspending the effectiveness of the Registration

Statement and/or any notice objecting to its use shall have been issued under the Securities Act or proceedings therefor initiated or threatened by the Commission, and any request on the part of the Commission for additional information shall have been complied with to the reasonable satisfaction of counsel to the Underwriters. A prospectus containing the Rule 430B Information shall have been filed with the Commission in the manner and within the time period required by Rule 424(b) without reliance on Rule 424(b)(8) (or a post-effective amendment providing such information shall have been filed and become effective in accordance with the requirements of Rule 430B). The Company shall have paid the required Commission filing fees relating to the Bonds within the time period required by Rule 456(b)(1)(i) of the Securities Act Regulations without regard to the proviso therein and otherwise in accordance with Rules 456(b) and 457(r) of the Securities Act Regulations and, if applicable, shall have updated the "Calculation of Registration Fee" table in accordance with Rule 456(b)(1)(ii) either in a post-effective amendment to the Registration Statement or on the cover page of a prospectus filed pursuant to Rule 424(b).

(d) Subsequent to the execution of this Agreement, there shall not have occurred (i) any material adverse change not contemplated by the General Disclosure Package or the Prospectus (as it exists on the date hereof) in or affecting particularly the business or properties of the Company which, in your judgment, materially impairs the investment quality of the Bonds; (ii) any suspension or limitation of trading in securities generally on the New York Stock Exchange, or any setting of minimum prices for trading on such exchange, or any suspension of trading of any securities of the Company on any exchange or in the over-the-counter market; (iii) a general banking moratorium declared by federal or New York authorities or a material disruption in securities settlement, payment or clearance services in the United States; (iv) any outbreak or escalation of major hostilities in which the United States is involved, any declaration of war by Congress or any other substantial national or international calamity or emergency if, in your reasonable judgment, the effect of any such outbreak, escalation, declaration, calamity or emergency makes it impractical and inadvisable to proceed with completion of the sale of and payment for the Bonds and you shall have made a similar determination with respect to all other underwritings of debt securities of utility or energy companies in which you are participating and have a contractual right to make such a determination; or (v) any decrease in the ratings of the Bonds by Standard & Poor's Ratings Services, a Standard and Poor's Financial Services LLC business, Moody's Investors Service, Inc. or Fitch Ratings, or any such organization shall have publicly announced that it has under surveillance or review, with possible negative implications, its rating of the Bonds.

(e) At or before the Closing Date, the Kentucky Public Service Commission and any other regulatory authority whose consent or approval shall be required for the issue and sale of the Bonds by the Company shall have taken all requisite action, or all such requisite action shall be deemed in fact and law to have

been taken, to authorize such issue and sale on the terms set forth in the Prospectus.

(f) You shall have received from Dorothy E. O'Brien, Vice President and Deputy General Counsel, Legal and Environmental Affairs, of the Company, or such other counsel for the Company as may be acceptable to you, an opinion in form and substance satisfactory to you, dated the Closing Date and addressed to you, as Representatives of the Underwriters, substantially to the effect that:

(i) The Company has been duly organized and is validly existing as a corporation in good standing under the laws of the Commonwealth of Kentucky, with power and authority to own its properties and conduct its business as described in the General Disclosure Package and the Prospectus;

(ii) The Bonds have been duly authorized, executed and delivered by the Company and, assuming due authentication and delivery by the Trustee in the manner provided for in the Indenture and delivery against payment therefor, are valid and legally binding obligations of the Company entitled to the benefits and security of the Indenture, enforceable against the Company in accordance with their terms (except to the extent limited by the Enforceability Exceptions);

(iii) The Indenture has been duly authorized, executed and delivered by the Company and, assuming due authorization, execution and delivery by the Trustee, constitutes a valid and legally binding obligation of the Company, enforceable against the Company in accordance with its terms (except to the extent limited by the Enforceability Exceptions);

(iv) The Company has good and sufficient title to the interest and estate of the Company in all real property which is or is to be specifically or generally described or referred to in the Indenture as being subject to the lien thereof, subject only to (A) the lien of the Indenture, (B) Permitted Liens (as defined in the Indenture), and (C) defects and irregularities in title and other Liens (as defined in the Indenture) that in each case are not prohibited by the Indenture and that, in the judgment of such counsel, do not individually or in the aggregate, impair the operation of the Company's business in any material respect;

(v) The descriptions of all such property contained or referred to in the Indenture are adequate for purposes of the lien purported to be created by the Indenture;

(vi) The Indenture constitutes a valid mortgage lien on and security interest in all property which is specifically or generally described or referred to therein as being subject to the lien thereof (other than such

property as has been released from the Lien of the Indenture in accordance with the terms thereof), subject only to the Liens, defects and irregularities referred to in subparagraph (iv) above;

(vii) The Indenture by its terms will effectively subject to the lien thereof all property located in the Commonwealth of Kentucky acquired by the Company after the Closing Date of the character generally described or referred to in the Indenture as being subject to the lien thereof, subject to (A) defects and irregularities in title existing at the time of such acquisition, (B) Purchase Money Liens (as defined in the Indenture) and any other Liens placed or otherwise existing on such property at the time of such acquisition, (C) with respect to real property, Liens placed thereon following the acquisition thereof by the Company and prior to the recording and filing of a supplemental indenture or other instrument specifically describing such real property and (D) possible limitations arising out of laws relating to preferential transfers of property during certain periods prior to commencement of bankruptcy, insolvency or similar proceedings and to limitations on liens on property acquired by a debtor after the commencement of any such proceedings, and possible claims and taxes of the federal government, and except as otherwise provided in Article Thirteen of the Indenture; it being understood that, if any property were to become subject to the lien of the Indenture by virtue of the "springing lien" provisions contained in the proviso at the end of the definition of "Excepted Property" in the granting clauses of the Indenture, the lien of the Indenture as to such property would be subject to any Liens existing on such property at the time such property became subject to the Lien of the Indenture;

(viii) The Indenture has been duly recorded or lodged for record as a mortgage of real estate, and any required filings with respect to personal property and fixtures subject to the lien of the Indenture have been duly made, in each place in which such recording and filing is required to protect, preserve and perfect the lien of the Indenture, and all taxes and recording and filing fees required to be paid with respect to the execution, recording or filing of the Indenture, the filing of financing statements and similar documents and the issuance of the Bonds have been paid.

(ix) The descriptions in the Registration Statement, the General Disclosure Package and the Prospectus of statutes, legal and governmental proceedings and contracts and other documents are accurate and fairly present the information required to be shown; and (1) such counsel does not know of any legal or governmental proceedings required to be described in the Registration Statement, the General Disclosure Package or the Prospectus which are not described, or of any contracts or

documents of a character required to be described in the Registration Statement, the General Disclosure Package or the Prospectus or to be filed as exhibits to the Registration Statement which are not described and filed as required and (2) nothing has come to the attention of such counsel that would lead such counsel to believe either that the Registration Statement, at its effective date, contained any untrue statement of a material fact or omitted or omits to state any material fact required to be stated therein or necessary to make the statements therein not misleading, or that the General Disclosure Package, as of the Applicable Time, or that the Prospectus, as supplemented, as of the date of this Agreement and as of the Closing Date, contained or contains any untrue statement of a material fact or omits or omitted to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; it being understood that such counsel need express no opinion as to the financial statements and other financial data contained in the Registration Statement, the General Disclosure Package or the Prospectus;

(x) None of the execution and delivery of this Agreement, the Supplemental Indenture, the issue and sale of the Bonds, or the consummation of any of the transactions herein or therein contemplated, will (i) violate any law or any regulation, order, writ, injunction or decree of any court or governmental instrumentality known to such counsel to be applicable to the Company, (ii) breach or violate, or constitute a default under, the Company's amended and restated articles of incorporation or bylaws, or (iii) breach or violate, or constitute a default under, any material agreement or instrument known to such counsel to which the Company is a party or by which it is bound, except in the case of clauses (i) and (iii), for such violations, breaches or defaults that would not in the aggregate have a material adverse effect on the Company's ability to perform its obligations hereunder or thereunder;

(xi) This Agreement has been duly authorized, executed and delivered by the Company;

(xii) The Order of the Kentucky Public Service Commission, dated August 3, 2012, has been obtained and is in full force and effect and is sufficient to authorize the issuance and sale by the Company of the Bonds as contemplated by this Agreement, and no further consent, approval, authorization, order, registration or qualification of or with any federal, state or local governmental agency or body or any federal, state or local court is required to be obtained by the Company for the consummation of the transactions contemplated by this Agreement and the Indenture in connection with the offering, issuance and sale by the Company of the Bonds, or the performance by the Company of its

obligations hereunder or thereunder, except (i) such as have been obtained or (ii) such as may be required under the blue sky laws of any jurisdiction; and

(xiii) Except as described in the Registration Statement, the General Disclosure Package and the Prospectus, and except where the failure to hold such is not reasonably expected to have a material adverse effect on the Company's operations, the Company holds all franchises, certificates of public convenience, licenses and permits (some of which expire at various dates and some of which are without time limit) necessary to carry on the utility business in which it is engaged.

In expressing any of the foregoing opinions (other than the opinions in paragraph (ix) above), the Deputy General Counsel of the Company (or such other counsel for the Company) may rely on opinions, dated the Closing Date, of Pillsbury Winthrop Shaw Pittman LLP, Frost Brown Todd LLC, Kentucky counsel to the Company, and/or Stoll Keenon Ogden PLLC, special Kentucky counsel to the Company, and in the case of the opinions in paragraphs (iv) to (viii) above, the Deputy General Counsel (or such other counsel as the case may be) shall rely, in part, on such opinions of Frost Brown Todd LLC and/or Stoll Keenon Ogden PLLC. Copies of the opinions of Frost Brown Todd LLC and Stoll Keenon Ogden PLLC shall be delivered to the Underwriters and the Underwriters and Counsel for the Underwriters shall be entitled to rely on such opinions.

(g) You shall have received from Pillsbury Winthrop Shaw Pittman LLP, special counsel to the Company, an opinion in form and substance satisfactory to you, dated the Closing Date and addressed to you, as Representatives of the Underwriters, substantially to the effect that:

(i) The Bonds have been duly authorized, executed and delivered by the Company and, assuming due authentication and delivery by the Trustee in the manner provided for in the Indenture and delivery against payment therefor, are valid and legally binding obligations of the Company, enforceable against the Company in accordance with their terms (except to the extent limited by the Enforceability Exceptions) and are entitled to the benefits and security of the Indenture;

(ii) The Indenture has been duly authorized, executed and delivered by the Company, has been qualified under the Trust Indenture Act and, assuming due authorization, execution and delivery by the Trustee, constitutes a valid and legally binding obligation of the Company, enforceable against the Company in accordance with its terms (except to the extent limited by the Enforceability Exceptions);

(iii) This Agreement has been duly authorized, executed and delivered by the Company;

(iv) (1) The Registration Statement has become effective under the Securities Act, and any preliminary prospectus included in the General Disclosure Package at the Applicable Time and the Prospectus were filed with the Commission pursuant to the subparagraph of Rule 424(b) specified in such opinion on the date or dates specified therein, and the Issuer General Use Free Writing Prospectus described in Schedule A attached hereto was filed with the Commission pursuant to Rule 433 on the date specified in such opinion; (2) to the best of the knowledge of such counsel after inquiry of the Company, no stop order suspending the effectiveness of the Registration Statement or any part thereof has been issued and no proceedings for that purpose have been instituted under the Securities Act; (3) the Registration Statement, as of its effective date, the Prospectus, as of the date of this Agreement, and any amendment or supplement thereto, as of its date, appeared on their face to be appropriately responsive in all material respects to the requirements of the Securities Act and the Trust Indenture Act and the rules and regulations of the Commission thereunder; and (4) no facts have come to the attention of such counsel that cause such counsel to believe either that the Registration Statement, as of its effective date, contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary to make the statements therein not misleading; the General Disclosure Package, as of the Applicable Time, contained any untrue statement of a material fact or omitted to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading; or that the Prospectus, as supplemented, as of the date of this Agreement and as it shall have been amended or supplemented, as of the Closing Date, contained or contains any untrue statement of a material fact or omits or omitted to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; it being understood that such counsel need express no opinion as to the financial statements and other financial or statistical data, or management's assessment of the effectiveness of the Company's internal controls, contained or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus;

(v) No consent, approval, authorization or other order of any public board or body of the United States or the State of New York (except for the registration of the Bonds under the Securities Act and the qualification of the Indenture under the Trust Indenture Act and other than in connection or compliance with the provisions of the securities or "blue sky" laws of any jurisdiction, as to which such counsel need express no opinion) is legally required for the authorization of the issuance of the Bonds in the manner contemplated herein and in the General Disclosure Package and the Prospectus;

(vi) The statements in the General Disclosure Package and the Prospectus under the caption “Description of the Bonds”, insofar as they purport to constitute summaries of certain terms of the Indenture and the Bonds, constitute accurate summaries of such terms of such document and securities in all material respects; and

(vii) The Company is not an “investment company” as such term is defined in the Investment Company Act of 1940, as amended.

In rendering such opinion, Pillsbury Winthrop Shaw Pittman LLP may rely as to matters governed by Kentucky law upon the opinion of the Deputy General Counsel of the Company or such other counsel referred to in Section 7(f).

(h) You shall have received from Davis Polk & Wardwell LLP, counsel for the Underwriters, such opinion or opinions in form and substance satisfactory to you, dated the Closing Date, with respect to matters as you may require, and the Company shall have furnished to such counsel such documents as they request for the purpose of enabling them to pass upon such matters. In rendering such opinion or opinions, Davis Polk & Wardwell LLP may rely, as to matters governed by Kentucky law, upon the opinion of the Deputy General Counsel of the Company referred to above or the opinion of any special counsel referred to above; and

(i) You shall have received from the Company a copy of the rating letters from Standard & Poor’s Ratings Services, a Standard & Poor’s Financial Services LLC business, Moody’s Investors Service, Inc. and Fitch Ratings assigning ratings on the Bonds or other evidence reasonably satisfactory to the Representatives of such ratings.

The Company will furnish you as promptly as practicable after the Closing Date with such conformed copies of such opinions, certificates, letters and documents as you may reasonably request.

In case any such condition shall not have been satisfied, this Agreement may be terminated by you upon notice in writing or by telegram to the Company without liability or obligation on the part of the Company or any Underwriter, except as provided in Sections 6(e), 6(i), 9, 11 and 14 hereof.

8. Conditions of Company’s Obligations.

The obligations of the Company to sell and deliver the Bonds on the Closing Date are subject to the following conditions:

(a) At the Closing Date, no stop order suspending the effectiveness of the Registration Statement shall be in effect or proceeding therefor shall have been instituted or, to the knowledge of the Company, shall be contemplated.

(b) At or before the Closing Date, the Kentucky Public Service Commission and any other regulatory authority whose consent or approval shall be required for the issue and sale of the Bonds by the Company shall have taken all requisite action, or all such requisite action shall be deemed in fact and law to have been taken, to authorize such issue and sale on the terms set forth in the Prospectus.

If any such conditions shall not have been satisfied, then the Company shall be entitled, by notice in writing or by telegram to you, to terminate this Agreement without any liability or obligation on the part of the Company or any Underwriter, except as provided in Sections 6(e), 6(i), 9, 11 and 14 hereof.

9. Indemnification and Contribution.

(a) The Company agrees that it will indemnify and hold harmless each Underwriter and the officers, directors, partners, members, employees, agents and affiliates of each Underwriter and each person, if any, who controls any Underwriter within the meaning of Section 15 of the Securities Act (each "an indemnified party"), against any loss, expense, claim, damage or liability to which, jointly or severally, such Underwriter or such controlling person may become subject, under the Securities Act or otherwise, insofar as such loss, expense, claim, damage or liability (or actions in respect thereof) arises out of or is based upon any untrue statement or alleged untrue statement of any material fact contained in the Registration Statement, any Statutory Prospectus, any Issuer Free Writing Prospectus or the Prospectus, or any amendment or supplement to any thereof, or arises out of or is based upon the omission or alleged omission to state therein any material fact required to be stated therein or necessary to make the statements therein not misleading and, except as hereinafter in this Section 9 provided, the Company agrees to reimburse each indemnified party for any reasonable legal or other expenses as incurred by such indemnified party in connection with investigating or defending any such loss, expense, claim, damage or liability; provided, however, that the Company shall not be liable in any such case to the extent that any such loss, expense, claim, damage or liability arises out of or is based on an untrue statement or alleged untrue statement or omission or alleged omission made in any such document in reliance upon, and in conformity with, written information furnished to the Company as set forth in Schedule B hereto by or through you on behalf of any Underwriter expressly for use in any such document or arises out of, or is based on, statements or omissions from the part of the Registration Statement which shall constitute the Statement of Eligibility under the Trust Indenture Act of the Trustee under the Indenture.

(b) Each Underwriter, severally and not jointly, agrees that it will indemnify and hold harmless the Company and its officers and directors, and each of them, and each person, if any, who controls the Company within the meaning of Section 15 of the Securities Act, against any loss, expense, claim, damage or

liability to which it or they may become subject, under the Securities Act or otherwise, insofar as such loss, expense, claim, damage or liability (or actions in respect thereof) arises out of or is based on any untrue statement or alleged untrue statement of any material fact contained in the Statutory Prospectus, any Issuer Free Writing Prospectus or the Prospectus, or any amendment or supplement to any thereof, or arises out of or is based upon the omission or alleged omission to state therein any material fact required to be stated therein or necessary to make the statements therein not misleading, in each case to the extent, and only to the extent, that such untrue statement or alleged untrue statement or omission or alleged omission was made in any such documents in reliance upon, and in conformity with, written information furnished to the Company as set forth in Schedule B hereto by or through you on behalf of such Underwriter expressly for use in any such document; and, except as hereinafter in this Section 9 provided, each Underwriter, severally and not jointly, agrees to reimburse the Company and its officers and directors, and each of them, and each person, if any, who controls the Company within the meaning of Section 15 of the Securities Act, for any reasonable legal or other expenses incurred by it or them in connection with investigating or defending any such loss, expense, claim, damage or liability.

(c) Upon receipt of notice of the commencement of any action against an indemnified party, the indemnified party shall, with reasonable promptness, if a claim in respect thereof is to be made against an indemnifying party under its agreement contained in this Section 9, notify such indemnifying party in writing of the commencement thereof; but the omission so to notify an indemnifying party shall not relieve it from any liability which it may have to the indemnified party otherwise than under subsection (a) or (b) of this Section 9. In the case of any such notice to an indemnifying party, the indemnifying party shall be entitled to participate at its own expense in the defense, or if it so elects, to assume the defense, of any such action, but, if it elects to assume the defense, such defense shall be conducted by counsel chosen by it and satisfactory to the indemnified party and to any other indemnifying party that is a defendant in the suit. In the event that any indemnifying party elects to assume the defense of any such action and retain such counsel, the indemnified party shall bear the fees and expenses of any additional counsel retained by it unless (i) the indemnifying party and the indemnified party shall have mutually agreed to the contrary; (ii) the indemnifying party has failed within a reasonable time to retain counsel reasonably satisfactory to the indemnified party; (iii) the indemnified party shall have reasonably concluded that there may be legal defenses available to it that are different from or in addition to those available to the indemnifying party; or (iv) the named parties in any such proceeding (including any impleaded parties) include both the indemnifying party and the indemnified party and the representation of both parties by the same counsel would be inappropriate due to actual or potential differing interests between them; provided, however, that in no event shall the indemnifying party be liable for fees and expenses of more than one counsel (in addition to any local counsel) separate from its own counsel for all indemnified parties in

connection with any one action or separate but similar or related actions in the same jurisdiction arising out of the same general allegations or circumstances. No indemnifying party shall be liable in the event of any settlement of any such action effected without its consent. Each indemnified party agrees promptly to notify each indemnifying party of the commencement of any litigation or proceedings against it in connection with the issue and sale of the Bonds.

(d) If any Underwriter or person entitled to indemnification by the terms of subsection (a) of this Section 9 shall have given notice to the Company of a claim in respect thereof pursuant to subsection (c) of this Section 9, and if such claim for indemnification is thereafter held by a court to be unavailable for any reason other than by reason of the terms of this Section 9 or if such claim is unavailable under controlling precedent, such Underwriter or person shall be entitled to contribution from the Company for liabilities and expenses, except to the extent that contribution is not permitted under Section 11(f) of the Securities Act. In determining the amount of contribution to which such Underwriter or person is entitled, there shall be considered the relative benefits received by such Underwriter or person and the Company from the offering of the Bonds that were the subject of the claim for indemnification (taking into account the portion of the proceeds of the offering realized by each), the Underwriter or person's relative knowledge and access to information concerning the matter with respect to which the claim was asserted, the opportunity to correct and prevent any statement or omission, and any other equitable considerations appropriate under the circumstances. The Company and the Underwriters agree that it would not be equitable if the amount of such contribution were determined by pro rata or per capita allocation (even if the Underwriters were treated as one entity for such purpose).

(e) No indemnifying party shall, without the prior written consent of the indemnified parties, settle or compromise or consent to the entry of any judgment with respect to any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or any claim whatsoever in respect of which indemnification or contribution could be sought under this Section 9 (whether or not the indemnified parties are actual or potential parties thereto), unless such settlement, compromise or consent (i) includes an unconditional release of each indemnified party and all liability arising out of such litigation, investigation, proceeding or claim, and (ii) does not include a statement as to or an admission of fault, culpability or the failure to act by or on behalf of any indemnified party.

(f) The indemnity and contribution provided for in this Section 9 and the representations and warranties of the Company and the several Underwriters set forth in this Agreement shall remain operative and in full force and effect regardless of (i) any investigation made by or on behalf of any Underwriter or any person controlling any Underwriter or the Company or their respective directors or

officers, (ii) the acceptance of any Bonds and payment therefor under this Agreement, and (iii) any termination of this Agreement.

10. Default of Underwriters.

If any Underwriter or Underwriters default in their obligations to purchase Bonds hereunder, the non-defaulting Underwriters may make arrangements satisfactory to the Company for the purchase of such Bonds by other persons, including any of the non-defaulting Underwriters, but if no such arrangements are made by the Closing Date, the other Underwriters shall be obligated, severally in the proportion which their respective commitments hereunder bear to the total commitment of the non-defaulting Underwriters, to purchase the Bonds which such defaulting Underwriter or Underwriters agreed but failed to purchase. In the event that any Underwriter or Underwriters default in their obligations to purchase Bonds hereunder, the Company may by prompt written notice to non-defaulting Underwriters postpone the Closing Date for a period of not more than seven full Business Days in order to effect whatever changes may thereby be made necessary in the Registration Statement or the Prospectus or in any other documents, and the Company will promptly file any amendments to the Registration Statement or supplements to the Prospectus which may thereby be made necessary. As used in this Agreement, the term "Underwriter" includes any person substituted for an Underwriter under this Section. Nothing herein will relieve an Underwriter from liability for its default.

11. Survival of Certain Representations and Obligations.

The respective indemnities, agreements, representations and warranties of the Company and of or on behalf of the several Underwriters set forth in or made pursuant to this Agreement will remain in full force and effect, regardless of any investigation, or statement as to the results thereof, made by or on behalf of any Underwriter or the Company or any of its officers or directors or any controlling person, and will survive delivery of and payment for the Bonds. If for any reason the purchase of the Bonds by the Underwriters is not consummated, the Company shall remain responsible for the expenses to be paid or reimbursed by it pursuant to Section 6, and the respective obligations of the Company and the Underwriters pursuant to Section 9 hereof shall remain in effect.

12. Notices.

The Company shall be entitled to act and rely upon any statement, request, notice or agreement on behalf of each of the Underwriters if the same shall have been made or given by you jointly or by Citigroup Global Markets Inc. All statements, requests, notices, consents and agreements hereunder shall be in writing, or by telegraph subsequently confirmed in writing, and, if to the Company, shall be sufficient in all respects if delivered or mailed to the Company at 220 West Main Street, Louisville, Kentucky 40202, Attention: Treasurer, and, if to you, shall be sufficient in all respects if delivered or mailed to you at the address set forth on the first page hereof (a copy of

which shall be sent to Citigroup Global Markets Inc., 388 Greenwich Street, New York, NY 10013, Attention: General Counsel , RBS Securities Inc., 3600 Washington Blvd, Stamford, CT 06901, Attention: Debt Capital Markets/Syndicate, SunTrust Robinson Humphrey, Inc., 3333 Peachtree Road, 11th Floor, Mail Code: GA-ATLANTA-3947, Atlanta, GA 30326, Attention: Investment Grade Debt Capital Markets, and U.S. Bancorp Investments, Inc., 214 N. Tryon St., Charlotte, NC 28202, Attention: High Grade Syndicate); provided, however, that any notice to an Underwriter pursuant to Section 9 hereof will also be delivered or mailed to such Underwriter at the address, if any, of such Underwriter furnished to the Company in writing for the purpose of communications hereunder.

13. Parties in Interest.

This Agreement shall inure solely to the benefit of the Company and the Underwriters and, to the extent provided in Section 9 hereof, to any person who controls any Underwriter, to the officers and directors of the Company, and to any person who controls the Company, and their respective successors. No other person, partnership, association or corporation shall acquire or have any right under or by virtue of this Agreement. The term “successor” shall not include any assignee of an Underwriter (other than one who shall acquire all or substantially all of such Underwriter’s business and properties), nor shall it include any purchaser of Bonds from any Underwriter merely because of such purchase.

14. No Advisory or Fiduciary Relationship.

The Company acknowledges and agrees that (a) the purchase and sale of the Bonds pursuant to this Agreement, including the determination of the public offering price of the Bonds and any related discounts and commissions, is an arm’s-length commercial transaction between the Company, on the one hand, and the several Underwriters, on the other hand, (b) in connection with the offering contemplated hereby and the process leading to such transaction, each Underwriter is and has been acting solely as a principal and is not the agent or fiduciary of the Company, or its stockholders, creditors, employees or any other party, (c) no Underwriter has assumed or will assume an advisory or fiduciary responsibility in favor of the Company with respect to the offering contemplated hereby or the process leading thereto (irrespective of whether such Underwriter has advised or is currently advising the Company on other matters) and no Underwriter has any obligation to the Company with respect to the offering contemplated hereby except the obligations expressly set forth in this Agreement, (d) the Underwriters and their respective affiliates may be engaged in a broad range of transactions that involve interests that differ from those of the Company, (e) the Underwriters have not provided any legal, accounting, regulatory or tax advice with respect to the offering contemplated hereby and the Company has consulted its own legal, accounting, regulatory and tax advisors to the extent it deemed appropriate and (f) the Company waives, to the fullest extent permitted by law, any claims it may have against the Underwriters for breach of fiduciary duty or alleged breach of fiduciary duty and agrees

that the Underwriters shall have no liability (whether direct or indirect) to the Company in respect of such a fiduciary duty claim or to any person asserting a fiduciary duty claim on behalf of or in right of the Company, including its respective stockholders, creditors or employees.

15. Representation of Underwriters.

Any action under this Agreement taken by the Representatives will be binding upon all the Underwriters.

16. Counterparts.

This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such counterparts shall together constitute one and the same Agreement.

17. Effectiveness.

This Agreement shall become effective upon the execution and delivery hereof by the parties hereto.

18. Waiver of Jury Trial.

The Company and each of the Underwriters hereby irrevocably waives, to the fullest extent permitted by applicable law, any and all right to trial by jury in any legal proceeding arising out of or relating to this Agreement or the transactions contemplated hereby.

19. Headings.

The headings of the sections of this Agreement have been inserted for convenience of reference only and shall not be deemed a part of this Agreement.

20. Applicable Law.

This Agreement shall be governed by, and construed in accordance with, the laws of the State of New York.

Please confirm that the foregoing correctly sets forth the agreement between us by signing in the space provided below for that purpose, whereupon this letter shall constitute a binding agreement between the Company and the several Underwriters in accordance with its terms.

Yours very truly,

LOUISVILLE GAS AND ELECTRIC COMPANY

Under Rule 15c6-1 under the Exchange Act, trades in the secondary market are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade Bonds prior to the settlement date will be required, by virtue of the fact that the Bonds initially will settle in T+5, to specify an alternate settlement arrangement at the time of any such trade to prevent a failed settlement. Purchasers of the Bonds who wish to trade the Bonds prior to the settlement date should consult their advisors.

The issuer has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents the issuer has filed with the SEC for more complete information about the issuer and this offering. You may get these documents for free by visiting EDGAR on the SEC Web site at www.sec.gov. Alternatively, the issuer, any underwriter or any dealer participating in the offering will arrange to send you the prospectus if you request it by calling Citigroup Global Markets Inc. at (800) 831-9146; RBS Securities Inc. at (866) 884-2071; SunTrust Robinson Humphrey, Inc. at (800) 685-4786; and U.S. Bancorp Investments, Inc. at (877) 558-2607.

KENTUCKY UTILITIES COMPANY

\$250,000,000
First Mortgage Bonds, 4.65% Series due 2043

UNDERWRITING AGREEMENT

November 6, 2013

BNP Paribas Securities Corp.
Citigroup Global Markets Inc.
Goldman, Sachs & Co.
Mitsubishi UFJ Securities (USA), Inc.

As Representatives of the Several Underwriters

c/o Goldman, Sachs & Co.
200 West Street
New York, NY 10282

Ladies and Gentlemen:

1. Introductory.

Kentucky Utilities Company, a corporation organized under the laws of the Commonwealth of Kentucky and the Commonwealth of Virginia (the "Company"), proposes to issue and sell, and the several Underwriters named in Section 3 hereof (the "Underwriters"), for whom you are acting as representatives (the "Representatives"), propose, severally and not jointly, to purchase, upon the terms and conditions set forth herein, \$250,000,000 aggregate principal amount of the Company's First Mortgage Bonds, 4.65% Series due 2043 (the "Bonds") to be issued under an Indenture, dated as of October 1, 2010 (the "Base Indenture"), as heretofore amended and supplemented by Supplemental Indenture No. 1, dated as of October 15, 2010, and Supplemental Indenture No. 2 thereto, dated as of November 1, 2010, and as to be further supplemented by Supplemental Indenture No. 3 thereto relating to the Bonds, to be dated as of November 1, 2013 (the "Supplemental Indenture", and the Base Indenture as so amended and supplemented, the "Indenture"), between the Company and The Bank of New York Mellon, as trustee thereunder (the "Trustee").

The Company has filed with the Securities and Exchange Commission (the "Commission") an automatic shelf registration statement (No. 333-180410-02) on Form S-3, including the related preliminary prospectus or prospectus, which registration statement became effective upon filing under Rule 462(e) ("Rule 462(e)") of the rules and regulations of the Commission (the "Securities Act Regulations") under the

Securities Act of 1933, as amended (the “Securities Act”). Such registration statement covers the registration of the Bonds under the Securities Act. Promptly after the date of this Agreement, the Company will prepare and file a prospectus in accordance with the provisions of Rule 430B (“Rule 430B”) of the Securities Act Regulations and paragraph (b) of Rule 424 (“Rule 424(b)”) of the Securities Act Regulations. Any information included in such prospectus that was omitted from such registration statement at the time it became effective but that is deemed to be part of and included in such registration statement pursuant to Rule 430B is referred to as “Rule 430B Information.” Each prospectus used in connection with the offering of the Bonds that omitted Rule 430B Information (other than a “free writing prospectus” as defined in Rule 405 of the Securities Act Regulations that has not been approved in writing by the Company and the Representatives), including any related prospectus supplement and the documents incorporated by reference therein pursuant to Item 12 of Form S-3, is herein called a “preliminary prospectus.” Such registration statement, at any given time, including the amendments or supplements thereto to such time, the exhibits and any schedules thereto at such time, the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the Securities Act at such time and the documents otherwise deemed to be a part thereof or included therein by the Securities Act Regulations, is herein called the “Registration Statement.” The Registration Statement at the time it originally became effective is herein called the “Original Registration Statement.” The final prospectus in the form first furnished to the Underwriters for use in connection with the offering of the Bonds, including the related prospectus supplement and the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the Securities Act as of the date hereof, is herein called the “Prospectus.” For purposes of this Agreement, all references to the Registration Statement, any preliminary prospectus, the Prospectus or any amendment or supplement to any of the foregoing shall be deemed to include the copy filed with the Commission pursuant to its Electronic Data Gathering, Analysis and Retrieval (“EDGAR”) system.

All references in this Agreement to financial statements and schedules and other information which is “contained,” “included” or “stated” in the Registration Statement, any preliminary prospectus or the Prospectus (or other references of like import) shall be deemed to mean and include all such financial statements and schedules and other information which is incorporated by reference in or otherwise deemed by the Securities Act Regulations to be a part of or included in the Registration Statement, any preliminary prospectus or the Prospectus, as the case may be; and all references in this Agreement to amendments or supplements to the Registration Statement, any preliminary prospectus or the Prospectus shall be deemed to mean and include the filing of any document under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) which is incorporated by reference in or otherwise deemed by the Securities Act Regulations to be a part of or included in the Registration Statement, such preliminary prospectus or the Prospectus, as the case may be.

2. Representations and Warranties.

The Company represents and warrants to each Underwriter as of the date hereof, as of the Applicable Time referred to in Section 2(b) hereof and as of the Closing Date referred to in Section 5 hereof, and agrees with each Underwriter as follows:

(a) (A) At the time of filing the Original Registration Statement, (B) at the time of the most recent amendment thereto for the purposes of complying with Section 10(a)(3) of the Securities Act (whether such amendment was by post-effective amendment, incorporated report filed pursuant to Section 13 or 15(d) of the Exchange Act or form of prospectus), (C) at the time the Company or any person acting on its behalf (within the meaning, for this clause only, of Rule 163(c) of the Securities Act Regulations) made any offer relating to the Bonds in reliance on the exemption of Rule 163 of the Securities Act Regulations ("Rule 163") or made a bona fide offer (within the meaning of Rule 164(h)(2) of the Securities Act Regulations) and (D) at the date hereof, the Company was and is eligible to register and issue the Bonds as a "well-known seasoned issuer" as defined in Rule 405 of the Securities Act Regulations ("Rule 405"), including not having been and not being an "ineligible issuer" as defined in Rule 405. The Registration Statement is an "automatic shelf registration statement," as defined in Rule 405, and the Bonds, since their registration on the Registration Statement, have been and remain eligible for registration by the Company on a Rule 405 "automatic shelf registration statement." The Company has not received from the Commission any notice pursuant to Rule 401(g)(2) of the Securities Act Regulations objecting to the use of the automatic shelf registration statement form;

(b) The Original Registration Statement became effective upon filing under Rule 462(e) of the Securities Act Regulations on March 28, 2012, and any post-effective amendment thereto also became effective upon filing under Rule 462(e). No stop order suspending the effectiveness of the Registration Statement or any notice objecting to its use has been issued under the Securities Act and no proceedings for that purpose have been instituted or are pending or, to the knowledge of the Company, are contemplated by the Commission, and any request on the part of the Commission for additional information has been complied with.

Any offer that is a written communication relating to the Bonds made prior to the filing of the Original Registration Statement by the Company or any person acting on its behalf (within the meaning, for this paragraph only, of Rule 163(c) of the Securities Act Regulations) has been filed with the Commission in accordance with the exemption provided by Rule 163 and otherwise complied with the requirements of Rule 163, including without limitation the legending requirement, to qualify such offer for the exemption from Section 5(c) of the Securities Act provided by Rule 163.

At the respective times the Original Registration Statement and each amendment thereto became effective, at each deemed effective date with respect to the Underwriters pursuant to Rule 430B(f)(2) of the Securities Act Regulations and at the Closing Date, the Registration Statement complied and will comply in all material respects with the requirements of the Securities Act and the Securities Act Regulations and the Trust Indenture Act of 1939, as amended (the "Trust Indenture Act"), and the rules and regulations thereunder, and did not and will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading.

Neither the Prospectus nor any amendments or supplements thereto, at the time the Prospectus or any such amendment or supplement was issued and at the Closing Date, included or will include an untrue statement of a material fact or omitted or will omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

Each preliminary prospectus (including the prospectus or prospectuses filed as part of the Original Registration Statement or any amendment thereto) complied when so filed and each Prospectus will comply when so filed in all material respects with the Securities Act Regulations and each preliminary prospectus and the Prospectus delivered to the Underwriters for use in connection with this offering was identical to the electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

As of the Applicable Time (as defined below), neither (x) the Issuer General Use Free Writing Prospectus(es) (as defined below) issued at or prior to the Applicable Time, the Statutory Prospectus (as defined below) and the Issuer Free Writing Prospectus, including the Final Term Sheet prepared and filed pursuant to Section 6(b) identified on Schedule A hereto, all considered together (collectively, the "General Disclosure Package"), nor (y) any individual Issuer Limited Use Free Writing Prospectus (as defined below), when considered together with the General Disclosure Package, included any untrue statement of a material fact or omitted to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

As of the time of the filing of the Final Term Sheet, the General Disclosure Package, when considered together with the Final Term Sheet (as defined in Section 6(b)), will not include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

As used in this subsection and elsewhere in this Agreement:

“Applicable Time” means 2:40 p.m., New York City time, on November 6, 2013 or such other time as agreed by the Company and the Representatives.

“Issuer Free Writing Prospectus” means any “issuer free writing prospectus,” as defined in Rule 433 of the Securities Act Regulations (“Rule 433”), relating to the Bonds that (i) is required to be filed with the Commission by the Company, (ii) is a “road show that is a written communication” within the meaning of Rule 433(d)(8)(i), whether or not required to be filed with the Commission or (iii) is exempt from filing pursuant to Rule 433(d)(5)(i) because it contains a description of the Bonds or of the offering that does not reflect the final terms, in each case in the form filed or required to be filed with the Commission or, if not required to be filed, in the form retained in the Company’s records pursuant to Rule 433(g).

“Issuer General Use Free Writing Prospectus” means any Issuer Free Writing Prospectus that is intended for general distribution to prospective investors, as evidenced by its being specified in Schedule A hereto.

“Issuer Limited Use Free Writing Prospectus” means any Issuer Free Writing Prospectus that is not an Issuer General Use Free Writing Prospectus.

“Permitted Free Writing Prospectus” means any free writing prospectus consented to in writing by the Company and the Representatives. For the avoidance of doubt, any free writing prospectus that is not consented to in writing by the Company does not constitute a Permitted Free Writing Prospectus and will not be an Issuer Free Writing Prospectus.

“Statutory Prospectus” as of any time means the prospectus relating to the Bonds that is included in the Registration Statement immediately prior to that time, including any document incorporated by reference therein and any preliminary or other prospectus deemed to be a part thereof.

Each Issuer Free Writing Prospectus, as of its issue date and at all subsequent times through the completion of the public offer and sale of the Bonds or until any earlier date that the Company notified or notifies the Representatives as described in Section 6(g), did not, does not and will not include any information that conflicted, conflicts or will conflict with the information contained in the Registration Statement or the Prospectus, including any document incorporated by reference therein and any preliminary or other prospectus deemed to be a part thereof that has not been superseded or modified.

The representations and warranties in this subsection shall not apply to statements in or omissions from the Registration Statement, the Prospectus or any Issuer Free Writing Prospectus made in reliance upon and in conformity with written information furnished to the Company as set forth in Schedule B hereto by any Underwriter through the Representatives expressly for use therein or to any statements in or omissions from the Statement of Eligibility of the Trustee under the Indenture. At the effective date of the Registration Statement, the Indenture conformed in all material respects to the Trust Indenture Act and the rules and regulations thereunder;

(c) The Company has been duly organized, is validly existing as a corporation in good standing under the laws of the Commonwealths of Kentucky and Virginia, has the power and authority to own its property and to conduct its business as described in the General Disclosure Package and the Prospectus and to enter into and perform its obligations under this Agreement, the Indenture and the Bonds, and is duly qualified to transact business and is in good standing in each jurisdiction in which the conduct of its business or its ownership or leasing of property requires such qualification, except to the extent that the failure to be so qualified or be in good standing would not have a material adverse effect on the Company;

(d) The Bonds have been duly authorized by the Company and, when issued, authenticated and delivered in the manner provided for in the Indenture and delivered against payment of the consideration therefor, will constitute valid and binding obligations of the Company enforceable in accordance with their terms, except to the extent limited by bankruptcy, insolvency, fraudulent conveyance, reorganization or moratorium laws or by other laws now or hereafter in effect relating to or affecting the enforcement of mortgagee's and other creditors' rights and by general equitable principles (regardless of whether considered in a proceeding in equity or at law), an implied covenant of good faith and fair dealing and consideration of public policy, and federal or state securities law limitations on indemnification and contribution (the "Enforceability Exceptions"); the Bonds will be in the forms established pursuant to, and entitled to the benefits of, the Indenture; and the Bonds will conform in all material respects to the statements relating thereto contained in the General Disclosure Package and the Prospectus;

(e) The Indenture has been duly authorized by the Company; at the Closing Date, the Supplemental Indenture will have been duly executed and delivered by the Company, and assuming due authorization, execution and delivery of the Indenture by the Trustee, the Indenture will constitute a valid and legally binding obligation of the Company enforceable in accordance with its terms (except to the extent limited by the Enforceability Exceptions); the Indenture conforms and will conform in all material respects to the statements relating thereto contained in the General Disclosure Package and the Prospectus; and at the

effective date of the Registration Statement, the Indenture was duly qualified under the Trust Indenture Act;

(f) The Company is in compliance in all material respects with its amended and restated articles of incorporation and bylaws;

(g) The Order of the Kentucky Public Service Commission, dated August 3, 2012, the Order of the State Corporation Commission of the Commonwealth of Virginia, dated July 27, 2012, and the Order of the Tennessee Regulatory Authority, dated September 27, 2012, have been obtained and are in full force and effect and are sufficient to authorize the issuance and sale by the Company of the Bonds as contemplated by this Agreement, and no further consent, approval, authorization, order, registration or qualification of or with any federal, state or local governmental agency or body or any federal, state or local court is required to be obtained by the Company for the consummation of the transactions contemplated by this Agreement and the Indenture in connection with the offering, issuance and sale of the Bonds by the Company, or the performance by the Company of its obligations hereunder or thereunder, except (i) such as have been obtained or (ii) such as may be required under the blue sky laws of any jurisdiction in connection with the purchase and distribution of the Bonds by the Underwriters in the manner contemplated herein and in the General Disclosure Package and the Prospectus;

(h) None of the execution and delivery of this Agreement, the Supplemental Indenture, the issue and sale of the Bonds, or the consummation of any of the transactions herein or therein contemplated, will (i) violate any law or any regulation, order, writ, injunction or decree of any court or governmental instrumentality applicable to the Company, (ii) breach or violate, or constitute a default under, the Company's amended and restated articles of incorporation or bylaws, or (iii) breach or violate, or constitute a default under, any material agreement or instrument to which the Company is a party or by which it is bound, except in the case of clauses (i) and (iii), for such violations, breaches or defaults that would not in the aggregate have a material adverse effect on the Company's ability to perform its obligations hereunder or thereunder;

(i) The consolidated financial statements of the Company, together with the related notes and schedules, each set forth or incorporated by reference in the Registration Statement comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act and the related published rules and regulations thereunder; such audited financial statements have been prepared in all material respects in accordance with generally accepted accounting principles consistently applied throughout the periods involved, except as disclosed therein; and no material modifications are required to be made to the unaudited interim financial statements for them to be in conformity with generally accepted accounting principles;

(j) This Agreement has been duly and validly authorized, executed and delivered by the Company;

(k) Since the respective dates as of which information is given in the General Disclosure Package and the Prospectus, except as otherwise stated therein or contemplated thereby, there has been no material adverse change, or event or occurrence that would result in a material adverse change in the financial position or results of operations of the Company;

(l) The Company is not, and after giving effect to the offering and sale of the Bonds and the application of the proceeds thereof as described in the General Disclosure Package and the Prospectus, will not be, an “investment company” as such term is defined in the Investment Company Act of 1940, as amended;

(m) Ernst & Young LLP and PricewaterhouseCoopers LLP, who have each audited certain financial statements of the Company and issued their respective reports with respect to the audited consolidated financial statements and schedules included and incorporated by reference in the General Disclosure Package and the Prospectus, are independent registered public accounting firms with respect to the Company during the periods covered by their reports within the meaning of the Securities Act and the Securities Act Regulations and the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”);

(n) The Company maintains systems of internal accounting controls sufficient to provide reasonable assurance that transactions are executed in accordance with management’s authorizations and transactions are recorded as necessary to permit preparation of financial statements. The Company maintains effective “disclosure controls and procedures” as such term is defined in Rule 13a-15(e) under the Exchange Act;

(o) (i) The Company has good and sufficient title to the interest and estate of the Company in all real property, and good title to all other property, which is or is to be specifically or generally described or referred to in the Indenture as being subject to the lien thereof, subject only to (A) the lien of the Indenture, (B) Permitted Liens (as defined in the Indenture), and (C) defects and irregularities in title and other Liens (as defined in the Indenture) that in each case are not prohibited by the Indenture and that, in the Company’s judgment, do not, individually or in the aggregate, impair the operation of the Company’s business in any material respect; (ii) the descriptions of all such property contained or referred to in the Indenture are adequate for purposes of the lien purported to be created by the Indenture; (iii) the Indenture (excluding the Supplemental Indenture) constitutes, and, on the Closing Date, the Indenture will constitute, a valid mortgage lien on and security interest in all property which is specifically or generally described or referred to therein as being subject to the lien thereof (other

than such property as has been released from the lien of the Indenture in accordance with the terms thereof), subject only to the Liens, defects and irregularities referred to in subparagraph (i) above; and (iv) on and after the Closing Date, the Indenture by its terms will effectively subject to the lien thereof all property located in the Commonwealth of Kentucky acquired by the Company after the Closing Date of the character generally described or referred to in the Indenture as being subject to the lien thereof, subject to (A) defects and irregularities in title existing at the time of such acquisition, (B) Purchase Money Liens (as defined in the Indenture) and any other Liens placed or otherwise existing or placed on such property at the time of such acquisition, (C) with respect to real property, Liens placed thereon following the acquisition thereof by the Company and prior to the recording and filing of a supplemental indenture or other instrument specifically describing such real property and (D) possible limitations arising out of laws relating to preferential transfers of property during certain periods prior to commencement of bankruptcy, insolvency or similar proceedings and to limitations on liens on property acquired by a debtor after the commencement of any such proceedings, and possible claims and taxes of the federal government, and except as otherwise provided in Article Thirteen of the Indenture; it being understood that, if any property were to become subject to the lien of the Indenture by virtue of the "springing lien provisions" contained in the proviso at the end of the definition of "Excepted Property" in the granting clauses of the Indenture, the lien of the Indenture as to such property would be subject to any Liens existing on such property at the time such property became subject to the lien of the Indenture;

(p) On the Closing Date, the Indenture will have been duly recorded or lodged for record as a mortgage of real estate, and any required filings with respect to personal property and fixtures subject to the lien of the Indenture will have been duly made, in each place in which such recording and filing is required to protect, preserve and perfect the lien of the Indenture, and all taxes and recording and filing fees required to be paid with respect to the execution, recording or filing of the Indenture, the filing of financing statements and similar documents and the issuance of the Bonds will have been paid;

(q) The interactive data in eXtensible Business Reporting Language included or incorporated by reference in the Registration Statement fairly presents the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto;

(r) None of the Company or, to the knowledge of the Company, any director, officer, agent, employee or affiliate of the Company is aware of or has taken any action, directly or indirectly, that would result in a violation by such persons of the Foreign Corrupt Practices Act of 1977, as amended, and the rules and regulations thereunder (collectively, the "FCPA"), including, without limitation, making use of the mails or any means or instrumentality of interstate

commerce corruptly in furtherance of an offer, payment, promise to pay or authorization of the payment of any money, or other property, gift, promise to give, or authorization of the giving of anything of value to any "foreign official" (as such term is defined in the FCPA) or any foreign political party or official thereof or any candidate for foreign political office, in contravention of the FCPA, and the Company and, to the knowledge of the Company, its affiliates have conducted their businesses in compliance with the FCPA and have instituted and maintain policies and procedures designed to ensure, and which are reasonably expected to continue to ensure, continued compliance therewith;

(s) The operations of the Company are and have been conducted at all times in compliance in all material respects with applicable financial recordkeeping and reporting requirements of the Currency and Foreign Transactions Reporting Act of 1970, as amended, the money laundering statutes of all applicable jurisdictions, the rules and regulations thereunder and any related or similar rules, regulations or guidelines issued, administered or enforced by any governmental agency (collectively, the "Money Laundering Laws") and no action, suit or proceeding by or before any court or governmental agency, authority or body or any arbitrator involving the Company with respect to the Money Laundering Laws is pending or, to the best knowledge of the Company, threatened; and

(t) None of the Company or, to the knowledge of the Company, any director, officer, agent, employee or affiliate of the Company is currently subject to any U.S. sanctions administered by the Office of Foreign Assets Control of the U.S. Treasury Department ("OFAC"); and the Company will not directly or indirectly use the proceeds of the offering, or lend, contribute or otherwise make available such proceeds, to any joint venture partner or other person or entity, for the purpose of financing the activities of any person currently subject to any U.S. sanctions administered by OFAC.

Each of you, as one of the several Underwriters, represents and warrants to, and agrees with, the Company, its directors and such of its officers as shall have signed the Registration Statement, and to each other Underwriter, that the information set forth in Schedule B hereto furnished to the Company by or through you or on your behalf expressly for use in the Registration Statement or the Prospectus does not contain an untrue statement of a material fact and does not omit to state a material fact in connection with such information required to be stated therein or necessary to make such information not misleading.

3. Purchase and Sale of Bonds.

On the basis of the representations, warranties and agreements herein contained, but subject to the terms and conditions herein contained, the Company agrees to sell to the Underwriters, and the Underwriters agree, severally and not jointly, to

purchase from the Company, at a purchase price of 98.405% of the principal amount thereof, plus accrued interest, if any, from the date of the first authentication of the Bonds to the Closing Date (as hereinafter defined), the respective principal amounts of the Bonds set forth below opposite the names of such Underwriters.

Underwriters	Principal Amount of Bonds
BNP Paribas Securities Corp.	\$ 50,000,000
Citigroup Global Markets Inc.	\$ 50,000,000
Goldman, Sachs & Co.	\$ 50,000,000
Mitsubishi UFJ Securities (USA), Inc.	\$ 50,000,000
BNY Mellon Capital Markets, LLC	\$ 12,500,000
CIBC World Markets Corp.	\$ 12,500,000
Mizuho Securities USA Inc.	\$ 12,500,000
SMBC Nikko Securities America, Inc.	\$ 12,500,000
Total	<u>\$ 250,000,000</u>

4. Public Offering.

The several Underwriters agree that as soon as practicable, in their judgment, they will make a public offering of their respective portions of the Bonds in accordance with the terms set forth in the General Disclosure Package and the Prospectus.

5. Delivery and Payment.

The Bonds will be represented by one or more definitive global securities in book-entry form which will be deposited by or on behalf of the Company with The Depository Trust Company (“DTC”) or its designated custodian. The Company will deliver the Bonds to you against payment by you of the purchase price therefor (such delivery and payment herein referred to as the “Closing”) by wire transfer of immediately available funds to the Company’s account (No. 3752099120) at Bank of America (ABA Routing Number 026-0095-93) by 10:00 a.m., New York City time, on the Closing Date. Such payment shall be made upon delivery of the Bonds for the account of Goldman, Sachs & Co. at DTC. The Bonds so to be delivered will be in fully registered form in such authorized denominations as established pursuant to the Indenture. The Company will make the Bonds available for inspection by you at the office of The Bank of New York Mellon, 101 Barclay Street, 8th Floor, New York, New York 10286, Attention: Corporate Trust, not later than 10:00 a.m., New York City time, on the Business Day next preceding the Closing Date (“Business Day” shall mean any day other than a Saturday, a Sunday or a legal holiday or a day on which banking institutions or trust companies are authorized or obligated by law to close in The City of New York).

Each Underwriter represents and agrees that, unless it obtains the prior written consent of the Company and the Representatives, it has not and will not make any offer relating to the Bonds that would constitute or would use an “issuer free writing prospectus” as defined in Rule 433 or that would otherwise constitute a “free writing prospectus” as defined in Rule 405 of the Securities Act Regulations that would be required to be filed with the Commission, other than information contained in the Final Term Sheet prepared in accordance with Section 6(b).

The term “Closing Date” wherever used in this Agreement shall mean November 14, 2013, or such other date (i) not later than the seventh full Business Day thereafter as may be agreed upon in writing by the Company and you, or (ii) as shall be determined by postponement pursuant to the provisions of Section 10 hereof.

6. Certain Covenants of the Company.

The Company covenants and agrees with the several Underwriters:

(a) Subject to Section 6(b), to comply with the requirements of Rule 430B and to notify the Representatives immediately, and confirm the notice in writing, (i) when any post-effective amendment to the Registration Statement or new registration statement relating to the Bonds shall become effective, or any supplement to the Prospectus or any amended Prospectus shall have been filed, (ii) of the receipt of any comments from the Commission, (iii) of any request by the Commission for any amendment to the Registration Statement or the filing of a new registration statement or any amendment or supplement to the Prospectus or any document incorporated by reference therein or otherwise deemed to be a part thereof or for additional information, (iv) of the issuance by the Commission of any stop order suspending the effectiveness of the Registration Statement or such new registration statement or any notice objecting to its use or of any order preventing or suspending the use of any preliminary prospectus, or of the suspension of the qualification of the Bonds for offering or sale in any jurisdiction, or of the initiation or threatening of any proceedings for any of such purposes or of any examination pursuant to Section 8(e) of the Securities Act concerning the Registration Statement and (v) if the Company becomes the subject of a proceeding under Section 8A of the Securities Act in connection with the offering of the Bonds. The Company will effect the filings required under Rule 424(b), in the manner and within the time period required by Rule 424(b) (without reliance on Rule 424(b)(8)). The Company will make every reasonable effort to prevent the issuance of any stop order and, if any stop order is issued, to obtain the lifting thereof at the earliest possible moment. The Company shall pay the required Commission filing fees relating to the Bonds within the time required by Rule 456(b)(1)(i) of the Securities Act Regulations without regard to the proviso therein and otherwise in accordance with Rules 456(b) and 457(r) of the Securities Act Regulations (including, if applicable, by updating the “Calculation of Registration Fee” table in accordance with Rule 456(b)(1)(ii) either in a post-effective

amendment to the Registration Statement or on the cover page of a prospectus filed pursuant to Rule 424(b)).

(b) To give the Representatives notice of its intention to file or prepare any amendment to the Registration Statement or new registration statement relating to the Bonds or any amendment, supplement or revision to either any preliminary prospectus (including any prospectus included in the Original Registration Statement or amendment thereto at the time it became effective) or to the Prospectus, whether pursuant to the Securities Act, the Exchange Act or otherwise, and the Company will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing or use, as the case may be, and will not file or use any such document to which the Representatives shall reasonably object in writing. The Company will give the Representatives notice of its intention to make any such filing pursuant to the Exchange Act, Securities Act or Securities Act Regulations from the Applicable Time to the Closing Date and will furnish the Representatives with copies of any such documents a reasonable amount of time prior to such proposed filing and will not file or use any such document to which the Representatives shall reasonably object in writing. The Company will prepare a final term sheet (the “Final Term Sheet”) substantially in the form attached as Annex I hereto reflecting the final terms of the Bonds, and shall file such Final Term Sheet as an “Issuer Free Writing Prospectus” in accordance with Rule 433; provided that the Company shall furnish the Representatives with copies of any such Final Term Sheet a reasonable amount of time prior to such proposed filing and will not use or file any such document to which the Representatives shall reasonably object in writing.

(c) To furnish to each Underwriter, without charge, during the period when the Prospectus is required to be delivered under the Securities Act, as many copies of the Prospectus and any amendments and supplements thereto as each Underwriter may reasonably request.

(d) That before amending and supplementing the preliminary prospectus or the Prospectus, it will furnish to the Representatives a copy of each such proposed amendment or supplement and that it will not use any such proposed amendment or supplement to which the Representatives reasonably object in writing.

(e) To use its best efforts to qualify the Bonds and to assist in the qualification of the Bonds by you or on your behalf for offer and sale under the securities or “blue sky” laws of such jurisdictions as you may designate, to continue such qualification in effect so long as required for the distribution of the Bonds and to reimburse you for any expenses (including filing fees and fees and disbursements of counsel) paid by you or on your behalf to qualify the Bonds for offer and sale, to continue such qualification, to determine its eligibility for investment and to print any preliminary or supplemental “blue sky” survey or legal

investment memorandum relating thereto; provided that the Company shall not be required to qualify as a foreign corporation in any State, to consent to service of process in any State other than with respect to claims arising out of the offering or sale of the Bonds, or to meet any other requirement in connection with this paragraph (e) deemed by the Company to be unduly burdensome;

(f) Promptly to deliver to you one signed copy of the Registration Statement as originally filed and of all amendments thereto heretofore or hereafter filed, including conformed copies of all exhibits except those incorporated by reference, and such number of conformed copies of the Registration Statement (but excluding the exhibits), each related preliminary prospectus, the Prospectus, and any amendments and supplements thereto, as you may reasonably request;

(g) If at any time prior to the completion of the sale of the Bonds by the Underwriters (as determined by the Representatives), any event occurs as a result of which the Prospectus, as then amended or supplemented, would include any untrue statement of a material fact or omit to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading, or if it should be necessary to amend or supplement the Prospectus to comply with applicable law, the Company promptly (i) will notify the Representatives of any such event; (ii) subject to the requirements of paragraph (b) of this Section 6, will prepare an amendment or supplement that will correct such statement or omission or effect such compliance; and (iii) will supply any supplemented or amended Prospectus to the several Underwriters without charge in such quantities as they may reasonably request; provided that the expense of preparing and filing any such amendment or supplement to the Prospectus (x) that is necessary in connection with such a delivery of a supplemented or amended Prospectus more than nine months after the date of this Agreement or (y) that relates solely to the activities of any Underwriter shall be borne by the Underwriter or Underwriters or the dealer or dealers requiring the same; and provided further that you shall, upon inquiry by the Company, advise the Company whether or not any Underwriter or dealer which shall have been selected by you retains any unsold Bonds and, for the purposes of this subsection (g), the Company shall be entitled to assume that the distribution of the Bonds has been completed when they are advised by you that no such Underwriter or dealer retains any Bonds. If at any time following issuance of an Issuer Free Writing Prospectus, there occurs an event or development as a result of which such Issuer Free Writing Prospectus would conflict with the information contained in the Registration Statement (or any other registration statement related to the Bonds) or the Statutory Prospectus or any preliminary prospectus would include an untrue statement of a material fact or would omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances prevailing at that subsequent time, not misleading, the Company will promptly notify the Representatives and will promptly amend or supplement, at its own expense, such

Issuer Free Writing Prospectus to eliminate or correct such conflict, untrue statement or omission.

(h) As soon as practicable, to make generally available to its security holders an earnings statement covering a period of at least twelve months beginning after the “effective date of the registration statement” within the meaning of Rule 158 under the Securities Act which will satisfy the provisions of Section 11(a) of the Securities Act;

(i) To pay or bear (i) all expenses in connection with the matters herein required to be performed by the Company, including all expenses (except as provided in Section 6(g) above) in connection with the preparation and filing of the Registration Statement, the General Disclosure Package and the Prospectus, and any amendment or supplement thereto, and the furnishing of copies thereof to the Underwriters, and all audits, statements or reports in connection therewith, and all expenses in connection with the issue and delivery of the Bonds to the Underwriters at the place designated in Section 5 hereof, any fees and expenses relating to the eligibility and issuance of the Bonds in book-entry form and the cost of obtaining CUSIP or other identification numbers for the Bonds, all federal and state taxes (if any) payable (not including any transfer taxes) upon the original issue of the Bonds; (ii) all expenses in connection with the printing, reproduction and delivery of this Agreement and the printing, reproduction and delivery of any preliminary prospectus and each Prospectus, and (except as provided in Section 6(g) above) any amendment or supplement thereto, to the Underwriters; (iii) any and all fees payable in connection with the rating of the Bonds; (iv) the Company’s costs and expenses relating to investor presentations on any “road show” undertaken in connection with the marketing of the offering of the Bonds, including, without limitation, expenses associated with the production of road show slides and graphics, fees and expenses of any consultants engaged in connection with the road show presentations with the prior approval of the Company, travel and lodging expenses of the representatives and officers of the Company and any such consultants, and the Company’s portion of the costs of any aircraft chartered in connection with the road show; (v) all costs and expenses relating to the creation, filing or perfection of the security interests under the Indenture; and (vi) the reasonable fees and expenses of the Trustee, including the fees and disbursements of counsel for the Trustee, in connection with the Indenture and the Bonds;

(j) During the period from the date of this Agreement through the Closing Date, the Company shall not, without the Representatives’ prior written consent, directly or indirectly, sell, offer to sell, grant any option for the sale of, or otherwise dispose of, any Bonds, any security convertible into or exchangeable into or exercisable for Bonds or any debt securities substantially similar to the Bonds (except for the Bonds issued pursuant to this Agreement); and

(k) The Company represents and agrees that, unless it obtains the prior consent of the Representatives (such consent not to be unreasonably withheld), it has not made and will not make any offer relating to the Bonds that would constitute an Issuer Free Writing Prospectus or that would otherwise constitute a “free writing prospectus,” as defined in Rule 405 of the Securities Act Regulations, required to be filed with the Commission. The Company represents that it has treated or agrees that it will treat each Permitted Free Writing Prospectus as an “issuer free writing prospectus,” as defined in Rule 433, and has complied and will comply with the requirements of Rule 433 applicable to any Permitted Free Writing Prospectus, including timely filing with the Commission where required, legending and record keeping in accordance with the Securities Act Regulations.

7. Conditions of Underwriters’ Obligations.

The obligations of the several Underwriters to purchase and pay for the Bonds on the Closing Date shall be subject to the accuracy of the representations and warranties on the part of the Company contained herein at the date of this Agreement and the Closing Date, to the accuracy of the statements of the Company made in any certificates pursuant to the provisions hereof, to the performance by the Company of its obligations hereunder and to the following additional conditions:

(a) You shall have received a certificate, dated the Closing Date, of (1) an executive officer of the Company and (2) a principal financial or accounting officer or the controller of the Company, in which such officers, to the best of their knowledge after reasonable investigation, shall state that (i) the representations and warranties of the Company in this Agreement are true and correct in all material respects as of the Closing Date, (ii) the Company has complied in all material respects with all agreements and satisfied all conditions on its part to be performed or satisfied at or prior to the Closing Date, (iii) no stop order suspending the effectiveness of the Registration Statement has been issued, and no proceedings for that purpose have been instituted or are pending by the Commission, and (iv) subsequent to the date of the latest financial statements in the General Disclosure Package and the Prospectus, there has been no material adverse change in the financial position or results of operations of the Company except as set forth or contemplated in the General Disclosure Package and the Prospectus.

(b) You shall have received from PricewaterhouseCoopers LLP a letter, dated the Closing Date, (i) confirming that PricewaterhouseCoopers LLP was an independent registered public accounting firm with respect to the Company within the meaning of the Securities Act and the Securities Act Regulations, (ii) stating that in their opinion, the consolidated financial statements of the Company audited by them and included or incorporated by reference in the Registration Statement comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act, and the related published rules and regulations thereunder, and (iii) stating that they have read certain

financial and statistical amounts included or incorporated by reference in the Registration Statement and the Prospectus, which amounts are set forth in such letter and agreed such amounts to the Company's accounting records which are subject to controls over financial reporting or which have been derived directly from such accounting records by analysis or computation and have found such amounts to be in agreement with such results, except as otherwise specified in such letter. You shall have also received from Ernst & Young LLP letters, dated the date of this Agreement and the Closing Date, confirming that Ernst & Young LLP is an independent registered public accounting firm with respect to the Company within the meaning of the Securities Act and the Securities Act Regulations, and that:

(i) in their opinion, the consolidated financial statements of the Company audited by them and included or incorporated by reference in the Registration Statement comply as to form in all material respects with the applicable accounting requirements of the Securities Act and the Exchange Act, and the related published rules and regulations thereunder;

(ii) they have read the minutes of the meetings of the Company's Board of Directors and committees thereof as set forth in the minute books at a specified date not more than five Business Days prior to the date of delivery of such letter;

(iii) they have, if applicable, performed the procedures specified by the Public Company Accounting Oversight Board (United States) for a review of interim financial information as described in Statement on Auditing Standards No. 100, Interim Financial Information, on the unaudited condensed interim financial statements of the Company included or incorporated by reference in the Registration Statement and have read the unaudited interim financial data for the period from the date of the latest balance sheet included or incorporated by reference in the Registration Statement to the date of the latest available interim financial data; and

(iv) on the basis of the review referred to in clauses (ii) and (iii) above, a reading of the latest available interim financial statements of the Company, inquiries performed by them of certain officials of the Company who have responsibility for financial and accounting matters regarding the specific items for which representations are requested below and other specified procedures, nothing came to their attention that caused them to believe that:

(A) any material modifications should be made to the unaudited interim financial statements included or incorporated by

reference in the Registration Statement for them to be in conformity with generally accepted accounting principles;

(B) the unaudited interim financial statements included or incorporated by reference in the Registration Statement do not comply as to form in all material respects with the applicable accounting requirements of the Securities Act, the Exchange Act and the related published rules and regulations thereunder;

(C) at the date of the latest available balance sheet of the Company read by such accountants, there was any change in the stockholders equity, common stock, treasury stock or preferred securities (with or without sinking fund requirements), or any increase in long-term debt, as compared with amounts shown on the latest consolidated balance sheet included or incorporated by reference in the Registration Statement, or, at the date of the latest available income statement of the Company read by such accountants, there was any change in the consolidated operating revenue, consolidated operating income or consolidated net income, as compared with amounts shown on the latest consolidated income statement included or incorporated by reference in the Registration Statement; or

(D) at a date not more than five Business Days prior to the date of this Agreement, there was any change in (i) the stockholders equity, common stock, treasury stock or preferred securities (with or without sinking fund requirements), or any increase in long-term debt, as compared with amounts shown on the latest consolidated balance sheet included or incorporated by reference in the Registration Statement or (ii) the consolidated operating revenue, consolidated operating income or consolidated net income, as compared with amounts shown on the latest consolidated income statement included or incorporated by reference in the Registration Statement; except in all cases for changes, increases or decreases that the Prospectus discloses have occurred or may occur or that are described in such letter; and

(v) they have read certain financial and statistical amounts included or incorporated by reference in the Registration Statement and the Prospectus, which amounts are set forth in such letter and agreed such amounts to the Company's accounting records which are subject to controls over financial reporting or which have been derived directly from such accounting records by analysis or computation and have found such amounts to be in agreement with such results, except as otherwise specified in such letter, and such other procedures as the Underwriters

may request and Ernst & Young LLP is willing to perform and report upon.

(c) The Registration Statement shall have become effective and, on the Closing Date, no stop order suspending the effectiveness of the Registration Statement and/or any notice objecting to its use shall have been issued under the Securities Act or proceedings therefor initiated or threatened by the Commission, and any request on the part of the Commission for additional information shall have been complied with to the reasonable satisfaction of counsel to the Underwriters. A prospectus containing the Rule 430B Information shall have been filed with the Commission in the manner and within the time period required by Rule 424(b) without reliance on Rule 424(b)(8) (or a post-effective amendment providing such information shall have been filed and become effective in accordance with the requirements of Rule 430B). The Company shall have paid the required Commission filing fees relating to the Bonds within the time period required by Rule 456(b)(1)(i) of the Securities Act Regulations without regard to the proviso therein and otherwise in accordance with Rules 456(b) and 457(r) of the Securities Act Regulations and, if applicable, shall have updated the "Calculation of Registration Fee" table in accordance with Rule 456(b)(1)(ii) either in a post-effective amendment to the Registration Statement or on the cover page of a prospectus filed pursuant to Rule 424(b).

(d) Subsequent to the execution of this Agreement, there shall not have occurred (i) any material adverse change not contemplated by the General Disclosure Package or the Prospectus (as it exists on the date hereof) in or affecting particularly the business or properties of the Company which, in your judgment, materially impairs the investment quality of the Bonds; (ii) any suspension or limitation of trading in securities generally on the New York Stock Exchange, or any setting of minimum prices for trading on such exchange, or any suspension of trading of any securities of the Company on any exchange or in the over-the-counter market; (iii) a general banking moratorium declared by federal or New York authorities or a material disruption in securities settlement, payment or clearance services in the United States; (iv) any outbreak or escalation of major hostilities in which the United States is involved, any declaration of war by Congress or any other substantial national or international calamity or emergency if, in your reasonable judgment, the effect of any such outbreak, escalation, declaration, calamity or emergency makes it impractical and inadvisable to proceed with completion of the sale of and payment for the Bonds and you shall have made a similar determination with respect to all other underwritings of debt securities of utility or energy companies in which you are participating and have a contractual right to make such a determination; or (v) any decrease in the ratings of the Bonds by Standard & Poor's Ratings Services, a Standard and Poor's Financial Services LLC business, Moody's Investors Service, Inc. or Fitch Ratings, or any such organization shall have publicly announced that it has under surveillance or review, with possible negative implications, its rating of the Bonds.

(e) At or before the Closing Date, the Kentucky Public Service Commission, the State Corporation Commission of the Commonwealth of Virginia, and the Tennessee Regulatory Authority and any other regulatory authority whose consent or approval shall be required for the issue and sale of the Bonds by the Company shall have taken all requisite action, or all such requisite action shall be deemed in fact and law to have been taken, to authorize such issue and sale on the terms set forth in the Prospectus.

(f) You shall have received from Dorothy E. O'Brien, Vice President and Deputy General Counsel, Legal and Environmental Affairs, of the Company, or such other counsel for the Company as may be acceptable to you, an opinion in form and substance satisfactory to you, dated the Closing Date and addressed to you, as Representatives of the Underwriters, substantially to the effect that:

(i) The Company has been duly organized and is validly existing as a corporation in good standing under the laws of the Commonwealth of Kentucky and the Commonwealth of Virginia, with power and authority to own its properties and conduct its business as described in the General Disclosure Package and the Prospectus;

(ii) The Bonds have been duly authorized, executed and delivered by the Company and, assuming due authentication and delivery by the Trustee in the manner provided for in the Indenture and delivery against payment therefor, are valid and legally binding obligations of the Company entitled to the benefits and security of the Indenture, enforceable against the Company in accordance with their terms (except to the extent limited by the Enforceability Exceptions);

(iii) The Indenture has been duly authorized, executed and delivered by the Company and, assuming due authorization, execution and delivery by the Trustee, constitutes a valid and legally binding obligation of the Company, enforceable against the Company in accordance with its terms (except to the extent limited by the Enforceability Exceptions);

(iv) The Company has good and sufficient title to the interest and estate of the Company in all real property which is or is to be specifically or generally described or referred to in the Indenture as being subject to the lien thereof, subject only to (A) the lien of the Indenture, (B) Permitted Liens (as defined in the Indenture), and (C) defects and irregularities in title and other Liens (as defined in the Indenture) that in each case are not prohibited by the Indenture and that, in the judgment of such counsel, do not individually or in the aggregate, impair the operation of the Company's business in any material respect;

(v) The descriptions of all such property contained or referred to in the Indenture are adequate for purposes of the lien purported to be created by the Indenture;

(vi) The Indenture constitutes a valid mortgage lien on and security interest in all property which is specifically or generally described or referred to therein as being subject to the lien thereof (other than such property as has been released from the Lien of the Indenture in accordance with the terms thereof), subject only to the Liens, defects and irregularities referred to in subparagraph (iv) above;

(vii) The Indenture by its terms will effectively subject to the lien thereof all property located in the Commonwealth of Kentucky acquired by the Company after the Closing Date of the character generally described or referred to in the Indenture as being subject to the lien thereof, subject to (A) defects and irregularities in title existing at the time of such acquisition, (B) Purchase Money Liens (as defined in the Indenture) and any other Liens placed or otherwise existing on such property at the time of such acquisition, (C) with respect to real property, Liens placed thereon following the acquisition thereof by the Company and prior to the recording and filing of a supplemental indenture or other instrument specifically describing such real property and (D) possible limitations arising out of laws relating to preferential transfers of property during certain periods prior to commencement of bankruptcy, insolvency or similar proceedings and to limitations on liens on property acquired by a debtor after the commencement of any such proceedings, and possible claims and taxes of the federal government, and except as otherwise provided in Article Thirteen of the Indenture; it being understood that, if any property were to become subject to the lien of the Indenture by virtue of the "springing lien" provisions contained in the proviso at the end of the definition of "Excepted Property" in the granting clauses of the Indenture, the lien of the Indenture as to such property would be subject to any Liens existing on such property at the time such property became subject to the Lien of the Indenture;

(viii) The Indenture has been duly recorded or lodged for record as a mortgage of real estate, and any required filings with respect to personal property and fixtures subject to the lien of the Indenture have been duly made, in each place in which such recording and filing is required to protect, preserve and perfect the lien of the Indenture, and all taxes and recording and filing fees required to be paid with respect to the execution, recording or filing of the Indenture, the filing of financing statements and similar documents and the issuance of the Bonds have been paid.

(ix) The descriptions in the Registration Statement, the General Disclosure Package and the Prospectus of statutes, legal and governmental proceedings and contracts and other documents are accurate and fairly present the information required to be shown; and (1) such counsel does not know of any legal or governmental proceedings required to be described in the Registration Statement, the General Disclosure Package or the Prospectus which are not described, or of any contracts or documents of a character required to be described in the Registration Statement, the General Disclosure Package or the Prospectus or to be filed as exhibits to the Registration Statement which are not described and filed as required and (2) nothing has come to the attention of such counsel that would lead such counsel to believe either that the Registration Statement, at its effective date, contained any untrue statement of a material fact or omitted or omits to state any material fact required to be stated therein or necessary to make the statements therein not misleading, or that the General Disclosure Package, as of the Applicable Time, or that the Prospectus, as supplemented, as of the date of this Agreement and as of the Closing Date, contained or contains any untrue statement of a material fact or omits or omitted to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; it being understood that such counsel need express no opinion as to the financial statements and other financial data contained in the Registration Statement, the General Disclosure Package or the Prospectus;

(x) None of the execution and delivery of this Agreement, the Supplemental Indenture, the issue and sale of the Bonds, or the consummation of any of the transactions herein or therein contemplated, will (i) violate any law or any regulation, order, writ, injunction or decree of any court or governmental instrumentality known to such counsel to be applicable to the Company, (ii) breach or violate, or constitute a default under, the Company's amended and restated articles of incorporation or bylaws, or (iii) breach or violate, or constitute a default under, any material agreement or instrument known to such counsel to which the Company is a party or by which it is bound, except in the case of clauses (i) and (iii), for such violations, breaches or defaults that would not in the aggregate have a material adverse effect on the Company's ability to perform its obligations hereunder or thereunder;

(xi) This Agreement has been duly authorized, executed and delivered by the Company;

(xii) The Order of the Kentucky Public Service Commission, dated August 3, 2012, the Order of the State Corporation Commission of the Commonwealth of Virginia, dated July 27, 2012, and the Order of the

Tennessee Regulatory Authority, dated September 27, 2012, have been obtained and are in full force and effect and are sufficient to authorize the issuance and sale by the Company of the Bonds as contemplated by this Agreement, and no further consent, approval, authorization, order, registration or qualification of or with any federal, state or local governmental agency or body or any federal, state or local court is required to be obtained by the Company for the consummation of the transactions contemplated by this Agreement and the Indenture in connection with the offering, issuance and sale by the Company of the Bonds, or the performance by the Company of its obligations hereunder or thereunder, except (i) such as have been obtained or (ii) such as may be required under the blue sky laws of any jurisdiction; and

(xiii) Except as described in the Registration Statement, the General Disclosure Package and the Prospectus, and except where the failure to hold such is not reasonably expected to have a material adverse effect on the Company's operations, the Company holds all franchises, certificates of public convenience, licenses and permits (some of which expire at various dates and some of which are without time limit) necessary to carry on the utility business in which it is engaged.

In expressing any of the foregoing opinions (other than the opinions in paragraph (ix) above), the Deputy General Counsel of the Company (or such other counsel for the Company) may rely on opinions, dated the Closing Date, of Pillsbury Winthrop Shaw Pittman LLP, Stoll Keenon Ogden PLLC, special counsel to the Company, and in the case of the opinions in paragraphs (iv) to (viii) above, the Deputy General Counsel (or such other counsel as the case may be) shall rely, in part, on such opinion of Stoll Keenon Ogden PLLC. Copies of the opinion of Stoll Keenon Ogden PLLC shall be delivered to the Underwriters and the Underwriters and Counsel for the Underwriters shall be entitled to rely on such opinions.

(g) You shall have received from Pillsbury Winthrop Shaw Pittman LLP, special counsel to the Company, an opinion in form and substance satisfactory to you, dated the Closing Date and addressed to you, as Representatives of the Underwriters, substantially to the effect that:

(i) The Bonds have been duly authorized, executed and delivered by the Company and, assuming due authentication and delivery by the Trustee in the manner provided for in the Indenture and delivery against payment therefor, are valid and legally binding obligations of the Company, enforceable against the Company in accordance with their terms (except to the extent limited by the Enforceability Exceptions) and are entitled to the benefits and security of the Indenture;

(ii) The Indenture has been duly authorized, executed and delivered by the Company, has been qualified under the Trust Indenture Act and, assuming due authorization, execution and delivery by the Trustee, constitutes a valid and legally binding obligation of the Company, enforceable against the Company in accordance with its terms (except to the extent limited by the Enforceability Exceptions);

(iii) This Agreement has been duly authorized, executed and delivered by the Company;

(iv) (1) The Registration Statement has become effective under the Securities Act, and any preliminary prospectus included in the General Disclosure Package at the Applicable Time and the Prospectus were filed with the Commission pursuant to the subparagraph of Rule 424(b) specified in such opinion on the date or dates specified therein, and the Issuer General Use Free Writing Prospectus described in Schedule A attached hereto was filed with the Commission pursuant to Rule 433 on the date specified in such opinion; (2) to the best of the knowledge of such counsel after inquiry of the Company, no stop order suspending the effectiveness of the Registration Statement or any part thereof has been issued and no proceedings for that purpose have been instituted under the Securities Act; (3) the Registration Statement, as of its effective date, the Prospectus, as of the date of this Agreement, and any amendment or supplement thereto, as of its date, appeared on their face to be appropriately responsive in all material respects to the requirements of the Securities Act and the Trust Indenture Act and the rules and regulations of the Commission thereunder; and (4) no facts have come to the attention of such counsel that cause such counsel to believe either that the Registration Statement, as of its effective date, contained any untrue statement of a material fact or omitted to state any material fact required to be stated therein or necessary to make the statements therein not misleading; the General Disclosure Package, as of the Applicable Time, contained any untrue statement of a material fact or omitted to state any material fact necessary to make the statements therein, in light of the circumstances under which they were made, not misleading; or that the Prospectus, as supplemented, as of the date of this Agreement and as it shall have been amended or supplemented, as of the Closing Date, contained or contains any untrue statement of a material fact or omits or omitted to state any material fact necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; it being understood that such counsel need express no opinion as to the financial statements and other financial or statistical data, or management's assessment of the effectiveness of the Company's internal controls, contained or incorporated by reference in the Registration Statement, the General Disclosure Package or the Prospectus;

(v) No consent, approval, authorization or other order of any public board or body of the United States or the State of New York (except for the registration of the Bonds under the Securities Act and the qualification of the Indenture under the Trust Indenture Act and other than in connection or compliance with the provisions of the securities or “blue sky” laws of any jurisdiction, as to which such counsel need express no opinion) is legally required for the authorization of the issuance of the Bonds in the manner contemplated herein and in the General Disclosure Package and the Prospectus;

(vi) The statements in the General Disclosure Package and the Prospectus under the caption “Description of the Bonds”, insofar as they purport to constitute summaries of certain terms of the Indenture and the Bonds, constitute accurate summaries of such terms of such document and securities in all material respects; and

(vii) The Company is not an “investment company” as such term is defined in the Investment Company Act of 1940, as amended.

In rendering such opinion, Pillsbury Winthrop Shaw Pittman LLP may rely as to matters governed by Kentucky, Virginia or Tennessee law upon the opinion of the Deputy General Counsel of the Company or such other counsel referred to in Section 7(f).

(h) You shall have received from Davis Polk & Wardwell LLP, counsel for the Underwriters, such opinion or opinions in form and substance satisfactory to you, dated the Closing Date, with respect to matters as you may require, and the Company shall have furnished to such counsel such documents as they request for the purpose of enabling them to pass upon such matters. In rendering such opinion or opinions, Davis Polk & Wardwell LLP may rely, as to matters governed by Kentucky, Virginia or Tennessee law, upon the opinion of the Deputy General Counsel of the Company referred to above or the opinion of any special counsel referred to above; and

(i) You shall have received from the Company a copy of the rating letters from Standard & Poor’s Ratings Services, a Standard & Poor’s Financial Services LLC business, Moody’s Investors Service, Inc. and Fitch Ratings assigning ratings on the Bonds or other evidence reasonably satisfactory to the Representatives of such ratings.

The Company will furnish you as promptly as practicable after the Closing Date with such conformed copies of such opinions, certificates, letters and documents as you may reasonably request.

In case any such condition shall not have been satisfied, this Agreement may be terminated by you upon notice in writing or by telegram to the Company without

liability or obligation on the part of the Company or any Underwriter, except as provided in Sections 6(e), 6(i), 9, 11 and 14 hereof.

8. Conditions of Company's Obligations.

The obligations of the Company to sell and deliver the Bonds on the Closing Date are subject to the following conditions:

- (a) At the Closing Date, no stop order suspending the effectiveness of the Registration Statement shall be in effect or proceeding therefor shall have been instituted or, to the knowledge of the Company, shall be contemplated.
- (b) At or before the Closing Date, the Kentucky Public Service Commission, the State Corporation Commission of the Commonwealth of Virginia, and the Tennessee Regulatory Authority and any other regulatory authority whose consent or approval shall be required for the issue and sale of the Bonds by the Company shall have taken all requisite action, or all such requisite action shall be deemed in fact and law to have been taken, to authorize such issue and sale on the terms set forth in the Prospectus.

If any such conditions shall not have been satisfied, then the Company shall be entitled, by notice in writing or by telegram to you, to terminate this Agreement without any liability or obligation on the part of the Company or any Underwriter, except as provided in Sections 6(e), 6(i), 9, 11 and 14 hereof.

9. Indemnification and Contribution.

- (a) The Company agrees that it will indemnify and hold harmless each Underwriter and the officers, directors, partners, members, employees, agents and affiliates of each Underwriter and each person, if any, who controls any Underwriter within the meaning of Section 15 of the Securities Act (each "an indemnified party"), against any loss, expense, claim, damage or liability to which, jointly or severally, such Underwriter or such controlling person may become subject, under the Securities Act or otherwise, insofar as such loss, expense, claim, damage or liability (or actions in respect thereof) arises out of or is based upon any untrue statement or alleged untrue statement of any material fact contained in the Registration Statement, any Statutory Prospectus, any Issuer Free Writing Prospectus or the Prospectus, or any amendment or supplement to any thereof, or arises out of or is based upon the omission or alleged omission to state therein any material fact required to be stated therein or necessary to make the statements therein not misleading and, except as hereinafter in this Section 9 provided, the Company agrees to reimburse each indemnified party for any reasonable legal or other expenses as incurred by such indemnified party in connection with investigating or defending any such loss, expense, claim, damage or liability; provided, however, that the Company shall not be liable in any such case to the extent that any such loss, expense, claim, damage or liability arises out of or is

based on an untrue statement or alleged untrue statement or omission or alleged omission made in any such document in reliance upon, and in conformity with, written information furnished to the Company as set forth in Schedule B hereto by or through you on behalf of any Underwriter expressly for use in any such document or arises out of, or is based on, statements or omissions from the part of the Registration Statement which shall constitute the Statement of Eligibility under the Trust Indenture Act of the Trustee under the Indenture.

(b) Each Underwriter, severally and not jointly, agrees that it will indemnify and hold harmless the Company and its officers and directors, and each of them, and each person, if any, who controls the Company within the meaning of Section 15 of the Securities Act, against any loss, expense, claim, damage or liability to which it or they may become subject, under the Securities Act or otherwise, insofar as such loss, expense, claim, damage or liability (or actions in respect thereof) arises out of or is based on any untrue statement or alleged untrue statement of any material fact contained in the Statutory Prospectus, any Issuer Free Writing Prospectus or the Prospectus, or any amendment or supplement to any thereof, or arises out of or is based upon the omission or alleged omission to state therein any material fact required to be stated therein or necessary to make the statements therein not misleading, in each case to the extent, and only to the extent, that such untrue statement or alleged untrue statement or omission or alleged omission was made in any such documents in reliance upon, and in conformity with, written information furnished to the Company as set forth in Schedule B hereto by or through you on behalf of such Underwriter expressly for use in any such document; and, except as hereinafter in this Section 9 provided, each Underwriter, severally and not jointly, agrees to reimburse the Company and its officers and directors, and each of them, and each person, if any, who controls the Company within the meaning of Section 15 of the Securities Act, for any reasonable legal or other expenses incurred by it or them in connection with investigating or defending any such loss, expense, claim, damage or liability.

(c) Upon receipt of notice of the commencement of any action against an indemnified party, the indemnified party shall, with reasonable promptness, if a claim in respect thereof is to be made against an indemnifying party under its agreement contained in this Section 9, notify such indemnifying party in writing of the commencement thereof; but the omission so to notify an indemnifying party shall not relieve it from any liability which it may have to the indemnified party otherwise than under subsection (a) or (b) of this Section 9. In the case of any such notice to an indemnifying party, the indemnifying party shall be entitled to participate at its own expense in the defense, or if it so elects, to assume the defense, of any such action, but, if it elects to assume the defense, such defense shall be conducted by counsel chosen by it and satisfactory to the indemnified party and to any other indemnifying party that is a defendant in the suit. In the event that any indemnifying party elects to assume the defense of any such action and retain such counsel, the indemnified party shall bear the fees and expenses of

any additional counsel retained by it unless (i) the indemnifying party and the indemnified party shall have mutually agreed to the contrary; (ii) the indemnifying party has failed within a reasonable time to retain counsel reasonably satisfactory to the indemnified party; (iii) the indemnified party shall have reasonably concluded that there may be legal defenses available to it that are different from or in addition to those available to the indemnifying party; or (iv) the named parties in any such proceeding (including any impleaded parties) include both the indemnifying party and the indemnified party and the representation of both parties by the same counsel would be inappropriate due to actual or potential differing interests between them; provided, however, that in no event shall the indemnifying party be liable for fees and expenses of more than one counsel (in addition to any local counsel) separate from its own counsel for all indemnified parties in connection with any one action or separate but similar or related actions in the same jurisdiction arising out of the same general allegations or circumstances. No indemnifying party shall be liable in the event of any settlement of any such action effected without its consent. Each indemnified party agrees promptly to notify each indemnifying party of the commencement of any litigation or proceedings against it in connection with the issue and sale of the Bonds.

(d) If any Underwriter or person entitled to indemnification by the terms of subsection (a) of this Section 9 shall have given notice to the Company of a claim in respect thereof pursuant to subsection (c) of this Section 9, and if such claim for indemnification is thereafter held by a court to be unavailable for any reason other than by reason of the terms of this Section 9 or if such claim is unavailable under controlling precedent, such Underwriter or person shall be entitled to contribution from the Company for liabilities and expenses, except to the extent that contribution is not permitted under Section 11(f) of the Securities Act. In determining the amount of contribution to which such Underwriter or person is entitled, there shall be considered the relative benefits received by such Underwriter or person and the Company from the offering of the Bonds that were the subject of the claim for indemnification (taking into account the portion of the proceeds of the offering realized by each), the Underwriter or person's relative knowledge and access to information concerning the matter with respect to which the claim was asserted, the opportunity to correct and prevent any statement or omission, and any other equitable considerations appropriate under the circumstances. The Company and the Underwriters agree that it would not be equitable if the amount of such contribution were determined by pro rata or per capita allocation (even if the Underwriters were treated as one entity for such purpose).

(e) No indemnifying party shall, without the prior written consent of the indemnified parties, settle or compromise or consent to the entry of any judgment with respect to any litigation, or any investigation or proceeding by any governmental agency or body, commenced or threatened, or any claim whatsoever in respect of which indemnification or contribution could be sought under this

Section 9 (whether or not the indemnified parties are actual or potential parties thereto), unless such settlement, compromise or consent (i) includes an unconditional release of each indemnified party and all liability arising out of such litigation, investigation, proceeding or claim, and (ii) does not include a statement as to or an admission of fault, culpability or the failure to act by or on behalf of any indemnified party.

(f) The indemnity and contribution provided for in this Section 9 and the representations and warranties of the Company and the several Underwriters set forth in this Agreement shall remain operative and in full force and effect regardless of (i) any investigation made by or on behalf of any Underwriter or any person controlling any Underwriter or the Company or their respective directors or officers, (ii) the acceptance of any Bonds and payment therefor under this Agreement, and (iii) any termination of this Agreement.

10. Default of Underwriters.

If any Underwriter or Underwriters default in their obligations to purchase Bonds hereunder, the non-defaulting Underwriters may make arrangements satisfactory to the Company for the purchase of such Bonds by other persons, including any of the non-defaulting Underwriters, but if no such arrangements are made by the Closing Date, the other Underwriters shall be obligated, severally in the proportion which their respective commitments hereunder bear to the total commitment of the non-defaulting Underwriters, to purchase the Bonds which such defaulting Underwriter or Underwriters agreed but failed to purchase. In the event that any Underwriter or Underwriters default in their obligations to purchase Bonds hereunder, the Company may by prompt written notice to non-defaulting Underwriters postpone the Closing Date for a period of not more than seven full Business Days in order to effect whatever changes may thereby be made necessary in the Registration Statement or the Prospectus or in any other documents, and the Company will promptly file any amendments to the Registration Statement or supplements to the Prospectus which may thereby be made necessary. As used in this Agreement, the term "Underwriter" includes any person substituted for an Underwriter under this Section. Nothing herein will relieve an Underwriter from liability for its default.

11. Survival of Certain Representations and Obligations.

The respective indemnities, agreements, representations and warranties of the Company and of or on behalf of the several Underwriters set forth in or made pursuant to this Agreement will remain in full force and effect, regardless of any investigation, or statement as to the results thereof, made by or on behalf of any Underwriter or the Company or any of its officers or directors or any controlling person, and will survive delivery of and payment for the Bonds. If for any reason the purchase of the Bonds by the Underwriters is not consummated, the Company shall remain responsible for the expenses to be paid or reimbursed by it pursuant to Section 6, and the

respective obligations of the Company and the Underwriters pursuant to Section 9 hereof shall remain in effect.

12. Notices.

The Company shall be entitled to act and rely upon any statement, request, notice or agreement on behalf of each of the Underwriters if the same shall have been made or given by you jointly or by Goldman, Sachs & Co.. All statements, requests, notices, consents and agreements hereunder shall be in writing, or by telegraph subsequently confirmed in writing, and, if to the Company, shall be sufficient in all respects if delivered or mailed to the Company at One Quality Street, Lexington, Kentucky 40507, Attention: Treasurer, and, if to you, shall be sufficient in all respects if delivered or mailed to you at the address set forth on the first page hereof (a copy of which shall be sent to BNP Paribas Securities Corp., 787 Seventh Avenue, New York, NY 10019, Attention: Syndicate Desk, Citigroup Global Markets Inc., 388 Greenwich Street, New York, NY 10013, Attention: General Counsel, Goldman, Sachs & Co., 200 West Street, New York, NY 10282, Attention: Registration Department, and Mitsubishi UFJ Securities (USA), Inc., 1633 Broadway, 29th Floor, New York, NY 10019, Attention: Capital Markets Group); provided, however, that any notice to an Underwriter pursuant to Section 9 hereof will also be delivered or mailed to such Underwriter at the address, if any, of such Underwriter furnished to the Company in writing for the purpose of communications hereunder.

13. Parties in Interest.

This Agreement shall inure solely to the benefit of the Company and the Underwriters and, to the extent provided in Section 9 hereof, to any person who controls any Underwriter, to the officers and directors of the Company, and to any person who controls the Company, and their respective successors. No other person, partnership, association or corporation shall acquire or have any right under or by virtue of this Agreement. The term "successor" shall not include any assignee of an Underwriter (other than one who shall acquire all or substantially all of such Underwriter's business and properties), nor shall it include any purchaser of Bonds from any Underwriter merely because of such purchase.

14. No Advisory or Fiduciary Relationship.

The Company acknowledges and agrees that (a) the purchase and sale of the Bonds pursuant to this Agreement, including the determination of the public offering price of the Bonds and any related discounts and commissions, is an arm's-length commercial transaction between the Company, on the one hand, and the several Underwriters, on the other hand, (b) in connection with the offering contemplated hereby and the process leading to such transaction, each Underwriter is and has been acting solely as a principal and is not the agent or fiduciary of the Company, or its stockholders, creditors, employees or any other party, (c) no Underwriter has assumed or will assume an advisory or fiduciary responsibility in favor of the Company with respect to the

offering contemplated hereby or the process leading thereto (irrespective of whether such Underwriter has advised or is currently advising the Company on other matters) and no Underwriter has any obligation to the Company with respect to the offering contemplated hereby except the obligations expressly set forth in this Agreement, (d) the Underwriters and their respective affiliates may be engaged in a broad range of transactions that involve interests that differ from those of the Company, (e) the Underwriters have not provided any legal, accounting, regulatory or tax advice with respect to the offering contemplated hereby and the Company has consulted its own legal, accounting, regulatory and tax advisors to the extent it deemed appropriate and (f) the Company waives, to the fullest extent permitted by law, any claims it may have against the Underwriters for breach of fiduciary duty or alleged breach of fiduciary duty and agrees that the Underwriters shall have no liability (whether direct or indirect) to the Company in respect of such a fiduciary duty claim or to any person asserting a fiduciary duty claim on behalf of or in right of the Company, including its respective stockholders, creditors or employees.

15. Representation of Underwriters.

Any action under this Agreement taken by the Representatives will be binding upon all the Underwriters.

16. Counterparts.

This Agreement may be executed in any number of counterparts, each of which shall be deemed to be an original, but all such counterparts shall together constitute one and the same Agreement.

17. Effectiveness.

This Agreement shall become effective upon the execution and delivery hereof by the parties hereto.

18. Waiver of Jury Trial.

The Company and each of the Underwriters hereby irrevocably waives, to the fullest extent permitted by applicable law, any and all right to trial by jury in any legal proceeding arising out of or relating to this Agreement or the transactions contemplated hereby.

19. Headings.

The headings of the sections of this Agreement have been inserted for convenience of reference only and shall not be deemed a part of this Agreement.

20. Applicable Law.

This Agreement shall be governed by, and construed in accordance with, the laws of the State of New York.

Please confirm that the foregoing correctly sets forth the agreement between us by signing in the space provided below for that purpose, whereupon this letter shall constitute a binding agreement between the Company and the several Underwriters in accordance with its terms.

Yours very truly,

KENTUCKY UTILITIES COMPANY

Under Rule 15c6-1 under the Exchange Act, trades in the secondary market are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade Bonds prior to the settlement date will be required, by virtue of the fact that the Bonds initially will settle in T+5, to specify an alternate settlement arrangement at the time of any such trade to prevent a failed settlement. Purchasers of the Bonds who wish to trade the Bonds prior to the settlement date should consult their advisors.

The issuer has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents the issuer has filed with the SEC for more complete information about the issuer and this offering. You may get these documents for free by visiting EDGAR on the SEC Web site at www.sec.gov. LOUISVILLE GAS AND ELECTRIC COMPANY

TO

THE BANK OF NEW YORK MELLON,

Trustee

**Supplemental Indenture No. 3
dated as of November 1, 2013**

**Supplemental to the Indenture
dated as of October 1, 2010**

Establishing

First Mortgage Bonds, 4.65% Series due 2043

SUPPLEMENTAL INDENTURE NO. 3

SUPPLEMENTAL INDENTURE No. 3, dated as of the 1st day of November, 2013, made and entered into by and between LOUISVILLE GAS AND ELECTRIC COMPANY, a corporation duly organized and existing under the laws of the Commonwealth of Kentucky, having its principal corporate offices at 220 West Main Street, Louisville, Kentucky 40202 (hereinafter sometimes called the “Company”), and THE BANK OF NEW YORK MELLON, a New York banking corporation, having its corporate trust office at 101 Barclay Street, 7th Floor, New York, New York 10286 and having its principal place of business at One Wall Street, New York, New York 10286 (hereinafter sometimes called the “Trustee”), as Trustee under the Indenture, dated as of October 1, 2010 (hereinafter called the “Original Indenture”), between the Company and said Trustee, as heretofore supplemented, this Supplemental Indenture No. 3 being supplemental thereto. The Original Indenture, as heretofore supplemented, and this Supplemental Indenture No. 3 are hereinafter sometimes, collectively, called the “Indenture.”

Recitals of the Company

The Original Indenture was authorized, executed and delivered by the Company to provide for the issuance from time to time of its Securities (such term and all other capitalized terms used herein without definition having the meanings assigned to them in the Original Indenture), to be issued in one or more series as contemplated therein, and to provide security for the payment of the principal of and premium, if any, and interest, if any, on such Securities.

The Company has heretofore executed and delivered supplemental indentures for the purpose of creating series of Securities as set forth in Exhibit A hereto.

The Original Indenture and Supplemental Indentures No. 1 and No. 2, and financing statements in respect thereof, have been duly recorded and filed in the various official records in the Commonwealth of Kentucky as set forth in Exhibit B hereto.

Pursuant to Article Three of the Original Indenture, the Company wishes to establish a series of Securities, such series of Securities to be hereinafter sometimes called “Securities of Series No. 4”, and, pursuant to Section 1401 of the Original Indenture, the Company wishes to correct an error in each of Section 805 and Section 807 of the Original Indenture.

As contemplated in Section 301 of the Original Indenture, the Company further wishes to establish the designation and certain terms of the Securities of Series No. 4. The Company has duly authorized the execution and delivery of this Supplemental Indenture No. 3 to establish the designation and certain terms of such series of Securities and has duly authorized the issuance of such Securities; and all acts necessary to make this Supplemental Indenture No. 3 a valid agreement of the Company, and to make the Securities of Series No. 4 valid obligations of the Company, have been performed.

NOW, THEREFORE, THIS SUPPLEMENTAL INDENTURE NO. 3 WITNESSETH, that, for and in consideration of the premises and of the purchase of the Securities by the Holders thereof and in order to secure the payment of the principal of and premium, if any, and interest, if any, on all Securities from time to time Outstanding and the performance of the covenants therein and in the Indenture contained, the Company hereby grants, bargains, sells, conveys, assigns, transfers, mortgages, pledges, sets over and confirms to the Trustee, and grants to the Trustee a security interest in and lien on, the real property specifically referred to in Exhibit C attached hereto and incorporated herein by reference and all right, title and interest of the Company in and to all property personal and mixed located thereon (other than Excepted Property), as and to the extent, and subject to the terms and conditions, set forth in the Original Indenture; and it is further mutually covenanted and agreed as follows:

ARTICLE ONE

SECURITIES OF SERIES NO. 4

SECTION 101. Creation of Series No. 4.

There is hereby created a series of Securities designated "First Mortgage Bonds, 4.65% Series due 2043", and the Securities of such series shall:

(a) be issued initially in the aggregate principal amount of \$250,000,000 and shall be limited to such aggregate principal amount (except as contemplated in Section 301(b) of the Original Indenture); provided, however, that, as contemplated in the last paragraph of Section 301 of the Original Indenture, additional Securities of such series may be subsequently issued from time to time, without any consent of Holders of the Securities of such series, if and to the extent that, prior to each such subsequent issuance, the aggregate principal amount of the additional Securities then to be issued shall have been set forth in a Supplemental Indenture, and, thereupon, the Securities of such series shall be limited to such aggregate principal amount as so increased (except as aforesaid and subject to further such increases);

(b) be dated November 14, 2013;

(c) have a Stated Maturity of November 15, 2043, subject to prior redemption or purchase by the Company;

(d) have such additional terms as are established in an Officer's Certificate as contemplated in Section 301 of the Original Indenture;
and

(e) be in substantially the form or forms established therefor in an Officer's Certificate, as contemplated by Section 201 of the Original Indenture.

ARTICLE TWO

COVENANT

SECTION 201. Satisfaction and Discharge.

The Company hereby agrees that, if the Company shall make any deposit of money and/or Eligible Obligations with respect to any Securities of Series No. 4, or any portion of the principal amount thereof, as contemplated by Section 901 of the Indenture, the Company shall not deliver an Officer's Certificate described in clause (z) in the first paragraph of said Section 901 unless the Company shall also deliver to the Trustee, together with such Officer's Certificate, either:

(a) an instrument wherein the Company, notwithstanding the satisfaction and discharge of its indebtedness in respect of such Securities, or portions of the principal amount thereof, shall retain the obligation (which shall be absolute and unconditional) to irrevocably deposit with the Trustee or Paying Agent such additional sums of money, if any, or additional Eligible Obligations (meeting the requirements of Section 901), if any, or any combination thereof, at such time or times, as shall be necessary, together with the money and/or Eligible Obligations theretofore so deposited, to pay when due the principal of and premium, if any, and interest due and to become due on such Securities or portions thereof, all in accordance with and subject to the provisions of said Section 901; provided, however, that such instrument may state that the obligation of the Company to make additional deposits as aforesaid shall be subject to the

delivery to the Company by the Trustee of a notice asserting the deficiency accompanied by an opinion of an independent public accountant of nationally recognized standing, selected by the Trustee, showing the calculation thereof (which opinion shall be obtained at the expense of the Company); or

(b) an Opinion of Counsel to the effect that the beneficial owners of such Securities, or portions of the principal amount thereof, will not recognize income, gain or loss for United States federal income tax purposes as a result of the satisfaction and discharge of the Company's indebtedness in respect thereof and will be subject to United States federal income tax on the same amounts, at the same times and in the same manner as if such satisfaction and discharge had not been effected.

ARTICLE THREE

CORRECTIONS

SECTION 301. Correction of Section 805.

In accordance with Section 1401(l) of the Original Indenture, Section 805 of the Original Indenture is hereby corrected by inserting the phrase "sixty-six and two-thirds percentum (66-2/3%) of" immediately following the words "equal to" in the penultimate sentence thereof.

SECTION 302. Correction of Section 807.

In accordance with Section 1401(l) of the Original Indenture, Section 807 of the Original Indenture is hereby corrected by inserting the phrase "sixty-six and two-thirds percentum (66-2/3%) of" immediately following the words "equal to" in clause (d) in the first sentence thereof.

ARTICLE FOUR

MISCELLANEOUS PROVISIONS

SECTION 401. Single Instrument.

This Supplemental Indenture No. 3 is an amendment and supplement to the Original Indenture as heretofore amended and supplemented. As amended and supplemented by this Supplemental Indenture No. 3, the Original Indenture, as heretofore supplemented, is in all respects ratified, approved and confirmed, and the Original Indenture, as heretofore supplemented, and this Supplemental Indenture No. 3 shall together constitute the Indenture.

SECTION 402. Effect of Headings.

The Article and Section headings in this Supplemental Indenture No. 3 are for convenience only and shall not affect the construction hereof.

This instrument may be executed in any number of counterparts, each of which so executed shall be deemed to be an original, but all such counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF, the parties hereto have caused this Supplemental Indenture No. 3 to be duly executed as of the day and year first written above.

LOUISVILLE GAS AND ELECTRIC COMPANY

Real Property

Schedule of real property owned in fee located in the Commonwealth of Kentucky

DISTRIBUTION DRIVE:

Beginning at an iron pipe in the north right-of-way line of Distribution Drive and the west right-of-way line of Greenbelt Highway, said point being south 49 degrees 06 minutes 18 seconds west 41.21 feet from an iron pipe in the westerly right-of-way line of Greenbelt Highway; thence north 87 degrees 31 minutes 07 seconds west 1,107.83 feet along the north right-of-way line of Distribution Drive to an iron pipe at the southeasterly corner of Tract No. 47, as recorded in Plat and Subdivision Book 34, Page 50, in the office of the Clerk of Jefferson County, Kentucky; thence, continuing along said north right-of-way line of Distribution Drive, north 87 degrees 31 minutes 07 seconds west 270 feet to an iron pipe at the true point of beginning; thence along said north right-of-way line, north 87 degrees 31 minutes 07 seconds west 630.00 feet to an iron pipe at the southwesterly corner of Tract No. 46, as recorded in Plat and Subdivision Book 34 Page 50, in the Office aforesaid; thence north 02 degrees 28 minutes 53 seconds east 1,191.45 feet to an iron pipe at the northwesterly corner of Tract No. 46, as recorded in said Plat and Subdivision Book; thence south 87 degrees 31 minutes 07 seconds east 630.00 feet to an iron pipe; thence south 02 degrees 28 minutes 53 seconds west 1,191.45 feet to the true point of beginning and containing 17.231 acres more or less.

Also known as Tract A as shown on minor subdivision plat attached to and made a part of Deed Book 5728, Page 808, Docket #328-87, in the Office of the Clerk of Jefferson County, Kentucky.

The above legal description was revised pursuant to a physical survey conducted by David L. King II, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 31ST day of August, 2012, as follows:

BEGINNING at a ¾" Iron Pipe found on the north edge of right-of-way of Distribution Drive, said Distribution Drive having a 100' wide right-of-way per Plat Book 34, Pg. 50, said pipe being approximately 1378 feet west of the intersection of the western edge of right-of-way of the Greenbelt Highway and Distribution Drive, said pipe having the Kentucky State Plane North Zone (NAD83) coordinates of N=241240.60 E=1168457.43, said pipe being 61.26 feet north of the as-built centerline of Distribution Drive, said pipe being the southwest corner of Quartz Products Corp (D.B. 5736, Pg. 982) and being the POINT OF BEGINNING for this description; Thence leaving the line of Quartz Products Corp and with the northern edge of right-of-way of Distribution Drive, N87°30'20"W — 629.94 feet to a ¾" Iron Pipe Found, said pipe being 60.15 feet north of the as-built centerline of Distribution Drive, and said pin being the Southeast Corner of the County of Jefferson (D.B. 5521, Pg. 478); Thence leaving the northern edge of right-of-way of Distribution Drive and with the line of the County of Jefferson, N02°29'38"E — 1191.19 feet to a ¼" rebar with cap stamped LS 1828 found, said pin being on the southern line of D&M Trust (D.B. 8843, Pg. 819 — Tract 2) and being the Northeast corner of the County of Jefferson; Thence leaving the line of the County of Jefferson with the southern line of first D&M Trust and second Hollingsworth Capital Partners — Intermodal, LLC (D.B. 9238, PG. 704), S87°32'34"E — 629.76 feet to ½" rebar found @ the base of Chain Link Fence Corner Post, said pin being on the southern line of Hollingsworth Capital Partners — Intermodal, LLC (D.B. 9238, PG. 704), and being the Northwest corner of Ann Taylor Distribution Services, Inc. (D.B. 8756, Pg. 39); Thence leaving the southern line Hollingsworth Capital Partners — Intermodal, LLC (D.B. 9238, PG. 704), and with the western line of first Ann Taylor Distribution Services, Inc. and second the line of Quartz Products Corp (D.B. 5736, Pg. 982), S02°29'06"W — passing a ¼" rebar with Cap Stamped LS 1828 at 465.53 feet, said rebar being the common corner of Ann Taylor Distribution Services, Inc. and Quartz Products Corp, and continuing at the same bearing for an additional 726.07 feet for an overall total distance of 1191.60 feet to the Point of Beginning and containing 17.227 acres by survey.

BEING the same Property conveyed to Louisville Gas and Electric Company, a Kentucky corporation, by Deed dated November 15, 2012, of record in Deed Book 9977, Page 550, in the Office of the Clerk of Jefferson County, Kentucky.

HOSTS DEVELOPMENT:

BEING Lot 13, as shown on Minor Subdivision Plat approved by Louisville Metro Planning Commission, Docket No. 14965, on November 4, 2010, the original of which plat is attached to Deed of Record in Deed Book 9660, Page 236, in the Office aforesaid.

BEING the same property conveyed to Louisville Gas and Electric Company, a Kentucky corporation, by Deed dated December 20, 2010, of record in Deed Book 9660, Page 236, in the office of the Clerk of Jefferson County, Kentucky.

TRIMBLE COUNTY

MAHONEY PROPERTY — PARCEL 1:

Located and being on the waters of Barebone Creek in Trimble County, Kentucky and bounded and described as follows.

Beginning at a point in the branch, a corner of the property hereby conveyed and line of Pete Simpson, thence in a northerly direction with the branch as it now runs a distance of 105 yards, thence a new line in a westernly direction with the land of Mahoney a distance of 35 yards to a point, corner this land and that of Mahoney, thence in a southernly direction with the fence as it now runs to a point, corner to land of Pete Simpson, thence in an easternly direction with the line of said Pete Simpson to the point of beginning, containing One acre more or less.

The above legal description was revised pursuant to a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 31st day of August, 2012, as follows:

COMMENCING at an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments), said pin being on the southern edge of right-of-way Ogden Ridge Road and being 30 feet south of centerline of Ogden Ridge Road and being the northeast corner of Gary Callis (D.B. 72, Pg. 283), said pin having Kentucky State Plane — North Zone (NAD83) coordinates of N=400617.61 E=1311019.42, lying near the Community of Mount Pleasant, said pin being approximately 1.91 miles, as measured along Ogden Ridge Road from the intersection of centerline of Ogden Ridge Road and KY Hwy 625, lying in Trimble County, Kentucky; Thence leaving the corner of Callis and with the southern edge of right-of-way of Ogden Ridge Road, being 30' south of and parallel to the centerline of Ogden Ridge Road, N64°14'59"E - 34.53 feet to a point, N63°34'40"E - 96.34 feet to a point, N63°01'13"E - 97.37 feet to a point, N61°35'37"E - 94.92 feet to a point, N61°06'05"E - 92.13 feet to a point, and N64°57'32"E - 18.42 feet to an iron pin set, said pin being on the southern edge of right-of-way of Ogden Ridge Road and being 30' south of centerline, said pin being the Northwest Corner of Steve Boldery (D.B. 320, Pg. 91); Thence leaving the south edge of right-of-way of Ogden Ridge Road and generally with the fence and with the western boundary line of Boldery,

S20°14'57"E - 422.98 feet to an iron pin set at a fence post; Thence generally with the fence and first with the line of Boldery, second the line of Donna Hale (D.B. 130, Pg. 560) and thirdly the line of Donald Hale (D.B. 126, Pg. 385), N67°51'10"E - 905.07 feet to an iron pin set, said pin being on western boundary line of Anna Catherine Leach (D.B. 37, Pg. 282 & D.B. 38, Pg. 489); Thence leaving the line of Donald Hale and generally with the fence and with the western boundary line of Leach, S20°43'38"E — 2614.93 feet to an iron pin set, said pin being the Southwest corner of Leach and being on the northern boundary line of Troy Barnes (D.B. 127, Pg. 298); Thence leaving the boundary line of Leach and generally with the fence and with northern boundary line of Barnes, S60°40'53"W - 1311.16 feet to an iron pin found (PLS# 3868), said pin being a corner of Troy Barnes and also being a corner to a Life Estate of James L. Atkinson (being an exception to the deed of Troy Barnes D.B. 127, Pg. 298) and also being a corner of Walter Staples (D.B. 50, Pg. 797); Thence leaving the line of Barnes and the Life Estate of James L. Atkinson and with the line of Staples, N18°49'24"W - 142.80 feet to an iron pin set a tree fence corner; Thence continuing with the line of Staples, S64°07'37"W - 171.50 feet to a point in the centerline of creek and being the Point of Beginning for this description; Thence leaving the line of Staples and with the line of Jarrod & Jill Mahoney et. al. (D.B. 42, Pg. 26, D.B. 85, Pg. 733 and D.B. 72, Pg. 224) following the creek, N01°30'36"E - 354.65 feet to a point in the centerline of the creek; Thence continuing with Mahoney, N87°16'35"W — passing an iron witness pin set at 4.67 feet and continuing 100.33 feet for a total distance of 105.00 feet to an iron pin set and S02°43'25"W - 415.91 feet to an iron pin set on the northern line of Walter Staples (D.B. 50, Pg. 797); Thence leaving the line of Jarrod & Jill Mahoney et. al. (D.B. 42, Pg. 26, D.B. 85, Pg. 733 and D.B. 72, Pg. 224) and with the line of Staples, N64°07'37"E — 115.41 feet to a point and N64°07'37"E — 12.74 feet to the Point of Beginning and containing 0.965 acres by survey.

It is fully understood and agreed that any party in accepting this Deed hereby agrees to put a fence around said lot and to keep the same in repair at all times, same to be a general purpose fence against all livestock, this provision shall be binding on the owner, his heirs and assigns forever.

BEING the same Property conveyed to Louisville Gas and Electric Company, a Kentucky corporation, by Deed dated December 18, 2012, of record in Deed Book 132, Page 402, in the Office of the Clerk of Trimble County, Kentucky.

MAHONEY PROPERTY — PARCEL 2

TRACT #1: Located in Trimble County, Kentucky, bounded and described as follows:

BEGINNING at a stone in Browning's line; thence with same N 22-3/4 W 63 poles and 8 links to a stone, corner to Mahoney; thence with same S 67-1/2 W 50 poles to a stone corner to same; thence N 22-01/2 W... poles and 13 links to a stone corner to same and on the south side of Hopwood Road; S. 61 W 26 poles and 7 links to an Oak Tree on the top of the hill; thence S. 87 E 46 poles and 11 links to a stone corner to Andrew's line and Garriott's; thence N 58 E 15 poles and 7 links to the BEGINNING, containing THIRTY-FOUR ACRES < 109 poles, more or less.

TRACT #2: Located and being in Trimble County, Kentucky and bounded as follows:

BEGINNING at a stone in W.L. Garriott's line and A Browning's line S 23-3/4 E 94 poles and 21 links to a stone in Joe Garriott's line; thence with his line S 59 W 82 poles and 1 link to a

stone at the foot of the hill; thence N 20 W 8 poles and 8 feet to a stone; thence S 62-1/4 W 32 poles and 20 links to a stone; thence N 18-1/4 W 32 poles; thence N 20 poles to a stone; thence 18 W 68 poles to a stone on a hillside close to an oak tree; thence 18 W 36 poles and 7 links to a stone, corner oak tree; thence E 46 poles and 11 links to a stone in old fence; thence N 48-1/2 E 14 poles and 17 links to the BEGINNING, containing 59 acres and 70-4 poles.

The above legal description was revised pursuant to a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 31st day of August, 2012, as follows:

BEGINNING at an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments), said pin being on the southern edge of right-of-way Ogden Ridge Road and being 30 feet south of centerline of Ogden Ridge Road and being the northeast corner of Gary Callis (D.B. 72, Pg. 283), said pin having Kentucky State Plane — North Zone (NAD83) coordinates of N=400617.61 E=1311019.42, lying near the Community of Mount Pleasant, said pin being approximately 1.91 miles, as measured along Ogden Ridge Road from the intersection of centerline of Ogden Ridge Road and KY Hwy 625, lying in Trimble County, Kentucky **and being the Point of Beginning for this description**; Thence leaving the corner of Callis and with the southern edge of right-of-way of Ogden Ridge Road, being 30' south of and parallel to the centerline of Ogden Ridge Road, N64°14'59"E - 34.53 feet to a point, N63°34'40"E - 96.34 feet to a point, N63°01'13"E - 97.37 feet to a point, N61°35'37"E - 94.92 feet to a point, N61°06'05"E - 92.13 feet to a point, and N64°57'32"E - 18.42 feet to an iron pin set, said pin being on the southern edge of right-of-way of Ogden Ridge Road and being 30' south of centerline, said pin being the Northwest Corner of Steve Boldery (D.B. 320, Pg. 91); Thence leaving the south edge of right-of-way of Ogden Ridge Road and generally with the fence and with the western boundary line of Boldery, S20°14'57"E - 422.98 feet to an iron pin set at a fence post; Thence generally with the fence and first with the line of Boldery, second the line of Donna Hale (D.B. 130, Pg. 560) and thirdly the line of Donald Hale (D.B. 126, Pg. 385), N67°51'10"E - 905.07 feet to an iron pin set, said pin being on western boundary line of Anna Catherine Leach (D.B. 37, Pg. 282 & D.B. 38, Pg. 489); Thence leaving the line of Donald Hale and generally with the fence and with the western boundary line of Leach, S20°43'38"E — 2614.93 feet to an iron pin set, said pin being the Southwest corner of Leach and being on the northern boundary line of Troy Barnes (D.B. 127, Pg. 298); Thence leaving the boundary line of Leach and generally with the fence and with northern boundary line of Barnes, S60°40'53"W - 1311.16 feet to an iron pin found (PLS# 3868), said pin being a corner of Troy Barnes and also being a corner to a Life Estate of James L. Atkinson (being an exception to the deed of Troy Barnes D.B. 127, Pg. 298) and also being a corner of Walter Staples (D.B. 50, Pg. 797); Thence leaving the line of Barnes and the Life Estate of James L. Atkinson and with the line of Staples, N18°49'24"W - 142.80 feet to an iron pin set a tree fence corner; Thence continuing with the line of Staples, S64°07'37"W - 171.50 feet to a point in the centerline of creek, said point being a corner of Melvin Thomas Mahoney (D.B. 109, Pg. 288) and being on the northern boundary line of Staples; Thence leaving the line of Staples and with the line of Melvin Thomas Mahoney following the creek, N01°30'36"E - 354.65 feet to a point in the centerline of the creek; Thence continuing with Mahoney, N87°16'35"W — passing an iron witness pin set at 4.67 feet and continuing 100.33 feet for a total distance of 105.00 feet to an iron pin set and S02°43'25"W - 415.91 feet to an iron pin set on the northern line of Walter Staples (D.B. 50, Pg. 797); Thence leaving the line of Melvin Thomas Mahoney (D.B. 109, Pg. 288) and generally with existing

fence and with the line of Walter Staples, S64°07'37"W - 205.46 feet to an iron pin set, said pin being on the northern line of Staples and being a corner of Charlie Simpson (D.B. 38, Pg. 175 — now or formerly); Thence leaving the line of Staples and generally with the fence and the line of Simpson, N13°14'22"W — 472.35 feet to an iron pin set a base of a 48" Forked Sugar Maple Tree, said pin being the corner of Simpson and Les Ball & Amy Ball (D.B 123, Pg. 457); Thence leaving the line of Simpson and with the line of Ball, N04°38'29"W - 238.26 feet to an iron pin set at the base of a forked 30" Ash Tree with fence, N08°58'57"W - 124.95 feet to an iron pin set at the base of a 30" Oak Tree with fence, N04°20'04"W - 119.94 feet to an iron pin set at a 30" Maple Tree with fence, N29°35'33"W - 148.54 feet to an iron pin set at the base of 18" Maple Tree with fence, N10°51'03"W - 175.49 feet to an iron pin set at the base of 12" Chinkapin Oak Tree with fence, N16°38'01"W - 324.88 feet to an iron pin set at 36" Downed Tree, N10°55'44"W - 225.73 feet to an iron pin set at the base of a wood fence post, and N04° 07'13"E - 585.08 feet to an iron pin set at a fence corner; Thence first continuing with the line of Les Ball and second the line of Gary Callis (D.B. 72, Pg. 283), N23°45'17"W - 732.87 feet to the Point of Beginning and containing **99.294 acres** by survey.

BEING the same Property conveyed to Louisville Gas and Electric Company, a Kentucky corporation, by Deed dated December 18, 2012, of record in Deed Book 132, Page 407, in the Office of the Clerk of Trimble County, Kentucky.

NACKE PROPERTY:

Being a certain tract of land located on the East side of CR-1205 (Ogden Ridge Road), approximately 0.7 miles south of the intersection of KY 625 (Bedford and Mt. Pleasant Road), lying in Trimble County, Kentucky, and being more particularly described as follows:

BEGINNING at a ½ inch rebar (found) with cap marked "C.T. SMITH 3757" in the center of Tingle Lane and in the right-of-way of Ogden Ridge Road; thence with the east right-of-way of Ogden Ridge Road with a curve to the left having a cord of North 04 degrees, 45 minutes, 59 seconds East, 236.73 feet and a radius of 613 feet to a ½ inch rebar (found) with a cap marked "C.T. SMITH 3757"; thence with said right-of-way North 06 degrees, 22 minutes 01 seconds West, 180.00 feet to a ½ inch rebar (set) corner with Larry & P.J. Nacke (D.B. 117, page 55); thence leaving the right-of-way of Ogden Ridge Road and forming new division lines the following three calls: North 83 degrees, 37 minutes, 59 seconds East, 290.00 feet to a ½ inch rebar (set) South 10 degrees, 06 minutes, 05 seconds East, 396.23 feet to a ½ inch rebar (set), South 76 degrees 06 minutes, 15 seconds West 346.63 feet to a ½ inch rebar (found) with a cap marked "C.T. SMITH 3757" in the center line of Tingle Lane; thence with Tingle Lane, North 38 degrees, 26 minutes, 00 seconds West, 33.66 feet to the point of beginning Containing 3.004 Acres per survey by Christopher T. Smith on June 12 2008.

This survey is subject to all rights of way, easements, conveyances and restrictions that a title examination would reveal. No title report was provided to Surveyor.

All monuments referenced as ½ inch rebar (set) this survey are capped with a plastic cap stamped "C.T. SMITH 3757".

BEING the same Property conveyed to Louisville Gas and Electric Company, a Kentucky corporation, by Deed dated November 27, 2012, of record in Deed Book 132, Page 185, in the Office of the Clerk of Trimble County, Kentucky.

BALL PROPERTY:

A tract of land in Trimble County, Kentucky, on the Southeast side of the Mt. Pleasant Road, about 7 miles West of Bedford, bounded as follows:

BEGINNING at a small sugar tree marked as the Northwest corner of the 5 acre tract conveyed by Earl Mahoney and Margaret Mahoney to Charles Simpson by deed dated January 27, 1952, and recorded in Deed Book 38, Page 175, in the Trimble County Court Clerk's Office; thence to exclude said 5 acre tract as follows:

South 65 degrees West 1.98 chains to a locust; North 87 degrees West 2.70 chains to an ash, North 80 degrees West 2.49 chains to a hackberry South 58-1/2 West 1.07 chains to a hackberry, South 17 degrees West 1.66 chains to a hackberry South 24-1/4 West 1.21 chains to a lynn, South 68 degrees East 2.49 chains to a chinquapin; South 45-1/2 degrees East 3.12 chains to a chinquapin South 4-3/4 degrees East 1.25 chains to an elm, and South 3-1/2 degrees East 3.24 chains to a stake in fence line at the Southwest corner of said 5 acres tract in line of Richardson heirs; thence with Richardson as fenced, South 64 degrees West 16.72 chains to a stone; thence

North 20 degrees West (Passing a stone 9.39 chains corner to Richardson and Davis) whole distance 47.62 chains to a stone in Eugene David line corner to Nolas Mahoney; thence with Nolas Mahoney and the Mt. Pleasant Road as fenced North 62 degrees East 28.63 chains to a large walnut in the South line of the Mt. Pleasant Road corner Edward Mahoney; thence with Edward Mahoney as fenced as follows:

South 24 degrees East 11.35 chains to a stone, South 4-1/2 degrees East 9.21 chains to a post, South 11-1/2 East 3.35 chains to an ash, South 17 degrees East 4.94 chains to an ash, South 12 degrees East 2.79 chains to a hackberry; South 32 degrees East 2.11 chains to a spigut, South 3-3/4 degrees East 1.88 chains to a red elm; South 14-1/2 degrees East 1.87 chains to a locust and South 3 degrees East 4.03 chains to the point of beginning, containing 112.44 acres, Subject to Shelby REA easement and road right of way and waterline easements to L. G. & E. and Trimble County Water District No. 1.

THERE IS EXCEPTED FROM the above described real estate the following:

Being a certain lot or parcel of land lying on the Southern side of Ogden Ridge Road and located in Trimble County, Kentucky, more particularly described as follows:

Beginning at an existing iron pin in the Southern right of way of Ogden Ridge Road and corner to Edward and Mary Mahoney (Deed Book 36, Page 70; Deed Book 36, Page 89), and at the Northeastern corner of Theodore and Wadenna Bachmann (Deed Book 59, Page 89), said pin witnessed by an existing iron pin bearing North 38 degrees 06 minutes 00 seconds East, 120.50 feet, in the Northern right of way of said road and corner to Louisville Gas and Electric Company (Deed Book 63, Page 615); and by the Azimuth marker for triangulation stations Wises Bearing South 50 degrees 44 minutes 00 seconds East, 7.30 feet; thence South 23 degrees 40 minutes 00 seconds East, 478.31 feet, in line with Mahoney to an iron pin corner to Mahoney; thence South 62 degrees 02 minutes 20 seconds West, 181.86 feet, in line with Bachmann to an existing fence corner post; thence North 20 degrees 54 minutes 43 seconds West, 489.29 feet, with an existing fence line, to an existing corner post at the Southern right of way of said road; thence North 65 degrees 10 minutes 15 seconds East, 157.87 feet, with the said right of way, to the POINT OF BEGINNING. Containing 1.88 Acres of land. Subject to any utility easements, passways or other easements that may be over or thru the premises.

There is excepted from the above described real estate a Non-Exclusive 20 foot easement of ingress and egress along the East and South sides of the above described real estate, for the benefit of the remainder of the farm, of which the 1.88 acres was originally a part of.

BEING the same Property conveyed to Louisville Gas and Electric Company, a Kentucky corporation, by Deed dated October 11, 2012, of record in Deed Book 131, Page 720 in the Office of the Clerk of Trimble County, Kentucky.

KENTUCKY UTILITIES COMPANY

TO

THE BANK OF NEW YORK MELLON,

Trustee

**Supplemental Indenture No. 3
dated as of November 1, 2013**

**Supplemental to the Indenture
dated as of October 1, 2010**

Establishing

First Mortgage Bonds, 4.65% Series due 2043

SUPPLEMENTAL INDENTURE NO. 3

SUPPLEMENTAL INDENTURE No. 3, dated as of the 1st day of November, 2013, made and entered into by and between KENTUCKY UTILITIES COMPANY, a corporation duly organized and existing under the laws of the Commonwealths of Kentucky and Virginia, having its principal corporate offices at One Quality Street, Lexington, Kentucky 40507 (hereinafter sometimes called the "Company"), and THE BANK OF NEW YORK MELLON, a New York banking corporation, having its corporate trust office at 101 Barclay Street, 7th Floor, New York, New York 10286 and having its principal place of business at One Wall Street, New York, New York 10286 (hereinafter sometimes called the "Trustee"), as Trustee under the Indenture, dated as of October 1, 2010 (hereinafter called the "Original Indenture"), between the Company and said Trustee, as heretofore supplemented, this Supplemental Indenture No. 3 being supplemental thereto. The Original Indenture, as heretofore supplemented, and this Supplemental Indenture No. 3 are hereinafter sometimes, collectively, called the "Indenture."

Recitals of the Company

The Original Indenture was authorized, executed and delivered by the Company to provide for the issuance from time to time of its Securities (such term and all other capitalized terms used herein without definition having the meanings assigned to them in the Original Indenture), to be issued in one or more series as contemplated therein, and to provide security for the payment of the principal of and premium, if any, and interest, if any, on such Securities.

The Company has heretofore executed and delivered supplemental indentures for the purpose of creating series of Securities as set forth in Exhibit A hereto.

The Original Indenture and Supplemental Indentures No. 1 and No. 2, and financing statements in respect thereof, have been duly recorded and filed in the various official records in the Commonwealth of Kentucky as set forth in Exhibit B hereto.

Pursuant to Article Three of the Original Indenture, the Company wishes to establish a series of Securities, such series of Securities to be hereinafter sometimes called "Securities of Series No. 5", and, pursuant to Section 1401 of the Original Indenture, the Company wishes to correct an error in each of Section 805 and Section 807 of the Original Indenture.

As contemplated in Section 301 of the Original Indenture, the Company further wishes to establish the designation and certain terms of the Securities of Series No. 5. The Company has duly authorized the execution and delivery of this Supplemental Indenture No. 3 to establish the designation and certain terms of such series of Securities and has duly authorized the issuance of such Securities; and all acts necessary to make this Supplemental Indenture No. 3 a valid agreement of the Company, and to make the Securities of Series No. 5 valid obligations of the Company, have been performed.

NOW, THEREFORE, THIS SUPPLEMENTAL INDENTURE NO. 3 WITNESSETH, that, for and in consideration of the premises and of the purchase of the Securities by the Holders thereof and in order to secure the payment of the principal of and premium, if any, and interest, if any, on all Securities from time to time Outstanding and the performance of the covenants therein and in the Indenture contained, the Company hereby grants, bargains, sells, conveys, assigns, transfers, mortgages, pledges, sets over and confirms to the Trustee, and grants to the Trustee a security interest in and lien on, the real property specifically referred to in Exhibit C attached hereto and incorporated herein by reference and all right, title and interest of the Company in and to all property personal and mixed located thereon (other than Excepted Property), as and to the extent, and subject to the terms and conditions, set forth in the Original Indenture; and it is further mutually covenanted and agreed as follows:

ARTICLE ONE

SECURITIES OF SERIES NO. 5

SECTION 101. Creation of Series No. 5.

There is hereby created a series of Securities designated "First Mortgage Bonds, 4.65% Series due 2043", and the Securities of such series shall:

(a) be issued initially in the aggregate principal amount of \$250,000,000 and shall be limited to such aggregate principal amount (except as contemplated in Section 301(b) of the Original Indenture); provided, however, that, as contemplated in the last paragraph of Section 301 of the Original Indenture, additional Securities of such series may be subsequently issued from time to time, without any consent of Holders of the Securities of such series, if and to the extent that, prior to each such subsequent issuance, the aggregate principal amount of the additional Securities then to be issued shall have been set forth in a Supplemental Indenture, and, thereupon, the Securities of such series shall be limited to such aggregate principal amount as so increased (except as aforesaid and subject to further such increases);

(b) be dated November 14, 2013;

(c) have a Stated Maturity of November 15, 2043, subject to prior redemption or purchase by the Company;

(d) have such additional terms as are established in an Officer's Certificate as contemplated in Section 301 of the Original Indenture;
and

(e) be in substantially the form or forms established therefor in an Officer's Certificate, as contemplated by Section 201 of the Original Indenture.

ARTICLE TWO

COVENANT

SECTION 201. Satisfaction and Discharge.

The Company hereby agrees that, if the Company shall make any deposit of money and/or Eligible Obligations with respect to any Securities of Series No. 5, or any portion of the principal amount thereof, as contemplated by Section 901 of the Indenture, the Company shall not deliver an Officer's Certificate described in clause (z) in the first paragraph of said Section 901 unless the Company shall also deliver to the Trustee, together with such Officer's Certificate, either:

(a) an instrument wherein the Company, notwithstanding the satisfaction and discharge of its indebtedness in respect of such Securities, or portions of the principal amount thereof, shall retain the obligation (which shall be absolute and unconditional) to irrevocably deposit with the Trustee or Paying Agent such additional sums of money, if any, or additional Eligible Obligations (meeting the requirements of Section 901), if any, or any combination thereof, at such time or times, as shall be necessary, together with the money and/or Eligible Obligations theretofore so deposited, to pay when due the principal of and premium, if any, and interest due and to become due on such Securities or portions thereof, all in accordance with and subject to the provisions of said Section 901; provided, however, that such instrument may state

that the obligation of the Company to make additional deposits as aforesaid shall be subject to the delivery to the Company by the Trustee of a notice asserting the deficiency accompanied by an opinion of an independent public accountant of nationally recognized standing, selected by the Trustee, showing the calculation thereof (which opinion shall be obtained at the expense of the Company); or

(b) an Opinion of Counsel to the effect that the beneficial owners of such Securities, or portions of the principal amount thereof, will not recognize income, gain or loss for United States federal income tax purposes as a result of the satisfaction and discharge of the Company's indebtedness in respect thereof and will be subject to United States federal income tax on the same amounts, at the same times and in the same manner as if such satisfaction and discharge had not been effected.

ARTICLE THREE

CORRECTIONS

SECTION 301. Correction of Section 805.

In accordance with Section 1401(l) of the Original Indenture, Section 805 of the Original Indenture is hereby corrected by inserting the phrase "sixty-six and two-thirds percentum (66-2/3%) of" immediately following the words "equal to" in the penultimate sentence thereof.

SECTION 302. Correction of Section 807.

In accordance with Section 1401(l) of the Original Indenture, Section 807 of the Original Indenture is hereby corrected by inserting the phrase "sixty-six and two-thirds percentum (66-2/3%) of" immediately following the words "equal to" in clause (d) in the first sentence thereof.

ARTICLE FOUR

MISCELLANEOUS PROVISIONS

SECTION 401. Single Instrument.

This Supplemental Indenture No. 3 is an amendment and supplement to the Original Indenture as heretofore supplemented. As amended and supplemented by this Supplemental Indenture No. 3, the Original Indenture, as heretofore supplemented, is in all respects ratified, approved and confirmed, and the Original Indenture, as heretofore supplemented, and this Supplemental Indenture No. 3 shall together constitute the Indenture.

SECTION 402. Effect of Headings.

The Article and Section headings in this Supplemental Indenture No. 3 are for convenience only and shall not affect the construction hereof.

This instrument may be executed in any number of counterparts, each of which so executed shall be deemed to be an original, but all such counterparts shall together constitute but one and the same instrument.

IN WITNESS WHEREOF, the parties hereto have caused this Supplemental Indenture No. 3 to be duly executed as of the day and year first written above.

S. Rogers; thence with the line of Rogers N 71° 12' E 793 feet to the line of Dr. Adam Miller; thence with Miller for four calls S 01° 45' W. 117.65 feet, S 01° 53' W 207.6 feet, N 84° 24' E 109.6 feet and S 01° 04' E 628.4 feet to the aforesaid north property line of the Winchester Pike; thence along the north property line of the Winchester Pike N 84° 21' W 647.2 feet to the beginning, and containing 13.19 acres. (*Italicized items* were omitted from legal in source deed of record in Deed Book 1437, Page 677, but included in deed of record in Deed Book 600, Page 474, both references to the Fayette County Clerk's office).

There is EXCEPTED from the foregoing conveyance a certain parcel thereof conveyed to McLean Construction Company, Inc., by deed of record in Deed Book 612, Page 236, in the Fayette County Clerk's Office; there is further excepted from the conveyance herein that certain right-of-way conveyed to the Commonwealth of Kentucky, Department of Highways, by deed dated July 6, 1962, and of record in Deed Book 748, Page 380, in the aforementioned Clerk's Office; there is further excepted certain easements and right-of-way agreements with the Southern Bell Telephone and Telegraph Company and the General Telephone Company of Kentucky, dated July 11, 1962 and June 4, 1962, recorded in Deed Book 763, Page 354, in Deed Book 742, Page 463, in the aforementioned Clerk's Office.

NOTE: The above legal description of the Property was revised pursuant to a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 12th day of July, 2012, as follows:

BEGINNING at an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments), said pin being located at the Southwest corner of the property being surveyed and being located on the North edge of Right-of-Way of US Hwy 60 (a.k.a Winchester Road) and being on the eastern edge of right-of-way of Hume Road, said right-of-way conveyed to the Commonwealth of Kentucky (D.B. 748, Pg. 380), said pin being 100' north of the centerline of US Hwy 60 and having Kentucky State Plane — North Zone Coordinates (NAD83) N=197050.07 E=1592508.00 and also being N01°07'25"W — 0.50' from the center of a damaged right-of-way marker found, said pin being located in Fayette County, Kentucky and being the POINT OF BEGINNING for this description; Thence leaving the northern edge of right-of-way of US Hwy 60 and with the eastern edge of right-of-way of Hume Road, N26°30'39"W — 161.46 feet to an iron pin set on said right-of-way, said pin being 19 feet east of centerline of Hume Road; Thence continuing with the eastern edge of right-of-way of Hume Road, and being 19 feet east of centerline, N18°39'14"W — 479.84 feet to an iron pin set on the eastern edge of said right-of-way, said pin being a three-way corner of the subject property, James Chester McLean (D.B. 637, Pg. 403) and McLean Construction Company (D.B. 612, Pg. 236); Thence leaving the corner of James Chester McLean and with the line of McLean Construction Company (D.B. 612, Pg. 236), N80°16'46"E — passing a 1" Iron Pipe Found at 0.43 feet and passing an iron witness pin set at 758.11 feet and continuing at the same bearing an additional 0.04' feet to a 3/4" Iron Pipe Found, (the total length of this line being 758.15 feet), said pipe being the Southeast corner of McLean Construction Company (D.B. 612, Pg. 236) and being on the western boundary line of Adam Miller (D.B. 589, Pg. 271); Thence leaving the line of McLean Construction Company and with the line of Miller, S02°01'24"W — passing an iron witness pin set at 193.80 feet and continuing at the same bearing an additional 3.02 feet for a total distance being 196.82 feet to an 10" Wood Post Found, N84°34'49"E — passing an iron witness pin set at 3.02 feet and at 107.97 feet and continuing an additional 0.53 feet to a 12" Wood Post Found (the overall total distance of this line is 108.50 feet), S01°07'25"E — passing an iron witness pin set at 0.50 feet and at 628.09 feet and continuing an additional 0.11 feet to a 3/4" Iron Pipe Found (the overall total distance of this line is 628.20 feet), said pipe being on the north edge of right-of-

way of US Hwy 60 and being 75 feet north of centerline of US Hwy 60 and being the Southwest corner of Adam Miller (D.B. 589, Pg. 271); Thence leaving the line of Miller and with the Northern edge of right-of-way of US Hwy 60, N84°23'58"W — 140.59 feet to an iron pin set, said pin being 75' North of centerline of US Hwy 60, N78°41'19"W — 251.25 feet to an iron pin set, said pin being 100 feet north of centerline of US Hwy 60 and N84°23'58"W — 250.00 feet to the Point of Beginning and containing 11.844 acres by survey.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, pursuant to deed dated September 21, 2012, of record in Deed Book 3101, Page 213, in the Fayette County Clerk's office.

Lyon County, Kentucky:

Lot Number Twenty-five (#25), in Sara Lane Subdivision as shown by Plat of said subdivision record in Plat Cabinet 1, Slide 88, Lyon County Clerk's Office.

BEING the same property conveyed Kentucky Utilities Company, a Kentucky corporation, by Deed dated October 16, 2013, of record in Deed Book 159, Page 260, in the Office of the County Clerk of Lyon County, Kentucky.

Carroll County, Kentucky:

BEGINNING at a ¼" x 2" Mag Nail with washer stamped "Gooch PLS# 3118" set in the centerline of Black Rock Road, said nail being a corner of the property being surveyed and being the Northwest corner of Charles Beckham (D.B. 152, Pg. 654), said nail being S81°55'30"W — 10.21 feet from the center of a Walnut tree stump, said nail also being approx. 0.61 miles east of the intersection of centerlines of Black Rock Road and Sharon Road and lying in Carroll County, Kentucky and being the Point of Beginning for this description; Thence leaving the corner of Beckham and with the centerline of Black Rock Road, N17°30'50"W — 36.11 feet to a point, N29°05'05"W — 45.18 feet to a point, N38°18'35"W — 15.87 feet to a point, and N64°19'53"W — 8.61 feet to a ¼" x 2" Mag Nail with washer stamped "Gooch PLS#3118" set in the centerline of Black Rock Road, said nail being the South east corner of Jack Schirmer (D.B. 104, Pg. 731); Thence leaving the centerline of Black Rock Road and with the line of Schirmer, N25°40'07"E — passing an iron witness pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments) at 18.71 feet and continuing at the same bearing for a total distance of 30.20 feet to the center of a Walnut Tree Stump; Thence continuing with the line Schirmer, N15°30'31"W — passing an iron witness pin set at 1.45 feet and continuing at the same bearing for a total distance of 274.15 feet to an iron pin set, N82°45'32"E — 64.79 feet to an iron pin set, N22°49'08"W — 240.66 feet to an iron pin set, and N75°47'28"E — 573.52 feet to an iron pin set, said pin being a corner of Jack Schirmer and being on the west line of Kentucky Utilities Company (D.B. 180, Pg. 253); Thence leaving the line of Schirmer (sic) and with the west line of Kentucky Utilities Company, S00°22'25"W — 470.50 feet to an iron pin found (PLS# 2251), S12°11'26"E — 524.36 feet to an iron pin found (PLS# 2251), S11°16'39"E — 324.35 feet to an iron pin found (PLS# 2251) and S11°16'39"E — 19.41 feet to a P.K. nail found in the centerline of Black Rock Road, said nail being the Southwest corner of Kentucky Utilities Company; Thence leaving the line of Kentucky Utilities Company and with the centerline of Black Rock Road, S87°43'08"W — 67.45 feet to a point, N84°56'24"W — 36.73 feet to a point, N71°19'51"W — 68.04 feet to a point, and N63°07'56"W — 58.48 feet to a ¼" x 2" Mag Nail with washer stamped "Gooch PLS# 3118" set in the centerline of Black Rock Road, said nail being the Southeast corner of Charles Beckham (D.B. 152, Pg. 654); Thence leaving the centerline of Black Rock Road and with the line of Beckham, N23°44'00"W — passing an iron witness pin set at 31.50 feet and continuing at

the same bearing for a total distance of 587.85 feet to an iron pin set at the base of fence corner post and $S81^{\circ}55'30''W$ — passing an iron witness pin set at 115.32 feet and passing the centerline of a walnut tree stump (mentioned above) at 125.07 feet and continuing at the same bearing for a total distance of 135.28 feet to the Point of Beginning for this description and containing 11.306 acres by survey.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated January 14, 2010, of record in Deed Book 181, Page 276, in the Office of the Clerk of Carroll County, Kentucky.

Gallatin County, Kentucky:

Parcel 1:

BEGINNING at a mag nail set (1/4" x 2" Mag Nail with washer Stamped "Gooch P.L.S. #3118", as will be typical for all Mag Nails set), said nail being a common corner of the parent tract of Scott & Brooks and being a corner of Robert Maddox and Mary L. Seiler Scott (D.B. 92, Pg. 53, Gallatin Co.; D.B. 157, Pg. 97, Carroll Co.; D.B. 45, Pg. 601, Carroll Co.; D.B. 24, Pg. 308, Gallatin Co.; hereinafter referred to as the Maddox & Seiler property), said point being approx. 0.79 miles north of the intersection of centerlines of Montgomery Road and Black Rock Road, said nail lying in the centerline of Montgomery Road, Gallatin County, Kentucky and being the Point of Beginning for this description; Thence with the centerline of Montgomery Road and the line of the Maddox & Seiler property, $N33^{\circ}08'48''W$ — 124.58 feet to a Mag nail set in the centerline of said road; Thence leaving the centerline of the road but continuing with the line Maddox & Seiler property, $N20^{\circ}03'34''W$ — 826.58 feet to an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments), said pin being 46.98 feet east of the centerline of Montgomery Road, $N53^{\circ}24'33''W$ — 483.25 feet to an iron pin set, said pin being 14.32 feet east of the centerline of Montgomery Road and $N17^{\circ}06'39''W$ — 179.61 feet to a point in Montgomery Road, said point being 1.51 feet east of the centerline of Montgomery Road, said point being on the eastern line of the Maddox & Seiler property and being a corner of Mark Kearns (D.B. 106, Pg. 418, Gallatin Co.); Thence leaving the line of the Maddox & Seiler property and with the line of Kearns, $S89^{\circ}59'53''E$ — passing an iron witness pin found (PLS# 3423) at 11.48 feet and continuing at the same bearing for a total distance of 1448.41 feet to an iron pin found with no ID cap, $S00^{\circ}21'02''W$ — 151.50 feet to an iron pin found, (PLS# 3423), $S29^{\circ}54'30''W$ — 86.01 feet to an iron pin found (PLS# 3423), and $N89^{\circ}21'44''E$ — 1062.54 feet to an iron pin found (PLS# 1961), said pin being a four way corner of the parent tract, Mark Kearns, Buell and Virginia Shields (D.B. 34, Pg. 440, D.B. 33, Pg. 303), and Kevin Deaton (D.B. 47, Pg. 202, Gallatin Co.); Thence leaving the line of Kearns and Shields and with the line of Deaton, $S01^{\circ}41'53''W$ — passing pins found online at 90.99 feet, 190.02 feet, 390.04 feet, 490.02 feet, 689.92 feet and 789.87 feet all with an identification cap bearing PLS# 1961, and continuing 100.04 feet to an iron pin found (PLS# 1961) a total distance of 889.91 feet, said pin being a common corner of the parent tract and Deaton; Thence continuing with the line of Deaton $S88^{\circ}19'41''W$ — passing pins found online at 128.77 feet, 228.80 feet, 428.72 feet and 928.70 feet to an iron pin set, said pin being a total distance of 928.70 feet, said pin being a common corner of the parent tract, Deaton, and the Maddox & Seiler property (D.B. 92, Pg. 53, Gallatin Co.; D.B. 157, Pg. 97, Carroll Co.; D.B. 45, Pg. 601, Carroll Co.; D.B. 24, Pg. 308, Gallatin Co.); Thence leaving the line of Deaton and with the line of Maddox & Seiler property, $S73^{\circ}46'07''W$ — 749.80 feet to the Point of Beginning and containing 49.898 acres by survey.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated January 8, 2010, of record in Deed Book 108, Page 334, in the Office of the Clerk of Gallatin County, Kentucky.

Parcel 2:

COMMENCING at a ¼" x 2" Mag Nail Set in the Centerline of Montgomery Road, said Mag nail being approximately 0.46 mile north of the intersection of centerlines of Montgomery Road and Black Rock Road, and being the Southeast Corner of Kentucky Utilities Company (D.B. 108, Pg. 324 - Gallatin County and D.B. 181, Pg. 210 - Carroll County); Thence leaving the centerline of Montgomery Road and with the line of Kentucky Utilities Company, S79°59'44"W — 18.95 feet to an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments) at a fence corner post, on the west edge of right-of-way of Montgomery Road, said pin being on the southern line of said Kentucky Utilities Company property and being the Northeast Corner of the property being surveyed and being the POINT OF BEGINNING for this description; Thence leaving the line of Kentucky Utilities Company and with the west edge of right-of-way of Montgomery Road, S09°33'39"E — 55.88 feet to a point, S06°15'14"E — 32.48 feet to a point, S03°50'09"E — 45.71 feet to a point, S01°44'45"W — 31.70 feet to a point, S07°35'02"W — 29.65 feet to a point, S15°45'54"W — 28.98 feet to a point, S24°01'52"W — 24.03 feet to a point, S31°53'46"W — 24.34 feet to a point, S37°29'11"W — 44.36 feet to a point, and S37°52'36"W — 51.82 feet to an iron pin found (PLS# 2119), said iron pin found being 20.74 feet west of centerline of Montgomery Road and being a corner of Kentucky Utilities Company (Parcel No. 1, D.B. 180, PG. 253 — Carroll County, D.B. 107, PG. 584 — Gallatin County); Thence leaving the west edge of right-of-way of Montgomery Rod and with the line of Kentucky Utilities Company, S66°00'56"W — 229.63 feet to an iron pin found (PLS# 2119) and N05°15'30"E — 362.43 feet to an iron pin found (PLS# 2119), said pin being the Northeastern corner of Kentucky Utilities Company (Parcel No. 1, D.B. 180, PG. 253 — Carroll County, D.B. 107, PG. 584 — Gallatin County) and being on the southern line of Kentucky Utilities Company (D.B. 108, Pg. 324 - Gallatin County and D.B. 181, Pg. 210 - Carroll County); Thence leaving the line of Kentucky Utilities Company (Parcel No. 1, D.B. 180, PG. 253 — Carroll County, D.B. 107, PG. 584 — Gallatin County) and with the line of Kentucky Utilities Company (D.B. 108, Pg. 324 - Gallatin County and D.B. 181, Pg. 210 - Carroll County), N73°59'44"E — 265.20 feet to the Point of Beginning and containing 2.032 acres by survey.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated March 18, 2011, of record in Deed Book 110, Page 776, and by Quitclaim Deed dated March 18, 2011, of record in Deed Book 111, Page 9, both in the Office of the Clerk of Gallatin County, Kentucky.

Parcel 3:

Tract 1:

BEING Tract No. 1 as shown on the Boundary Survey Plat of the Kevin Deaton Property prepared from a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 29th day of March, 2011 and approved by Warsaw, Glencoe and Gallatin County Planning Commission, Docket No. PS-11-21, on June 23, 2011, of record in Plat Cabinet B, Slide 194 in the aforesaid Office.

Tract 2:

BEING Tract No. 2 as shown on the Boundary Survey Plat of the Kevin Deaton Property prepared from a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 29th day of March, 2011 and approved by Warsaw, Glencoe and Gallatin County Planning Commission, Docket No. PS-11-21, on June 23, 2011, of record in Plat Cabinet B, Slide 194 in the aforesaid Office.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated and recorded on June 30, 2011, in Deed Book 111, Page 575, and by Deed dated and recorded on June 30, 2011, of record in Deed Book 111, Page 579, both in the Office of the Clerk of Gallatin County, Kentucky.

Gallatin and Carroll Counties, Kentucky:

Parcel 1:

BEGINNING at a mag nail set (1/4" x 2" Mag Nail with washer Stamped "Gooch P.L.S. #3118", as will be typical for all Mag Nails set), said nail being in the centerline of Montgomery Road and being a corner of Sandra McDole (D.B. 56, Pg. 12, Gallatin Co.) and being on the line of Kevin Deaton (D.B. 47, Pg. 202, 4th tract), said pin being approximately 0.46 miles north of the intersection of centerlines of Montgomery Road and Black Rock Road, said nail lying in Gallatin County, Kentucky being the Point of Beginning for this description; Thence leaving the centerline of Montgomery Road and leaving the line of Kevin Deaton and with the line of Sandra McDole, S73°59'44"W — passing an iron witness pin set at wood fence post at 18.95 feet and continuing for a total distance of 284.15 feet to an iron pin found (PLS# 2119), said pin being a corner of Sandra McDole and Kentucky Utilities Company (D.B. 180, Pg. 253, Carroll County); Thence leaving the line of McDole and with the line of Kentucky Utilities Company, S74°23'18"W — 796.56 feet to an iron pin found (PLS# 2119), S74°30'26"W — 354.68 feet to an iron pin found (PLS# 2251), and S74°48'55"W — 353.47 feet to an iron pin found (PLS# 2251), said pin being a corner of Jack Schirmer (D.B. 104, Pg. 731) and Kentucky Utilities Company; Thence leaving the line of Kentucky Utilities Company and with the line of Schirmer, N18°41'13"W — passing an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments), online at 896.97 feet and continuing for a total distance of 1857.57 feet to an iron pin set adjacent to a wood post found adjacent to a 48" Oak Tree as called for in Kentucky Utilities Company (D.B. 122, Pg. 516) and being a corner of Kentucky Utilities Company (D.B. 122, Pg. 516, Carroll Co.); Thence leaving the line of Schirmer and with the line of Kentucky Utilities Company, N35°57'22"W — 508.19 feet to an iron pin found (PLS# 3423 and PLS# 3729), N32°39'34"W — 646.80 feet to an iron pin set adjacent to a fence corner post as called for in D.B. 122, Pg. 516, and N14°33'07"W — 297.00 feet to an iron pin set, said pin being a corner of David C. White and Lorenda White (D.B. 72, Pg. 199, Gallatin Co. and D.B. 129, Pg. 319, Carroll Co.); Thence leaving the line of Kentucky Utilities Company and with the line of White, N73°10'03"E — 396.34 feet to an iron pin set (PLS# 3423), said pin being a corner of White and being a corner of the property being claimed by Mark Kearns (No Deed Found); Thence leaving the corner of White and with property being claimed by Kearns, N75°50'04"E — 270.70 feet to an iron pin found (PLS# 3423), said pin being a corner of the property being claimed by Kearns and being corner of the Mark Kearns property (D.B. 106, Pg. 418, Gallatin Co.); Thence leaving the property being claimed by Mark Kearns (No Deed Found) and with the line of Mark Kearns (D.B. 106, Pg. 418), N75°50'04"E — 832.33 feet to an iron pin found (PLS# 3423), said pin being a corner of the property of Mark Kearns and Kentucky Utilities Company (D.B. 107, Pg. 590, Gallatin Co.); Thence leaving the line of Kearns and with the Kentucky Utilities Company Line, N75°50'04"E — passing an iron witness pin found (PLS# 3423) at 142.51 feet continuing for a total distance of 147.51 feet to an Ash Tree Found, said Ash Tree being a corner of Kentucky Utilities Company and Mark Kearns; thence leaving the line of Kentucky Utilities Company and with the line of Mark Kearns, N75°50'04"E — passing a found P.K. nail in the Montgomery Road at 15.29 feet and continuing for a total distance of 16.90 feet to a mag nail set in the centerline of Montgomery Road; Thence continuing with the first the line of Kearns and second the line of David Brooks (D.B. 47, Pg. 342 Gallatin Co. and D.B. 47, Pg. 304, Gallatin Co.), S17°06'39"E — 187.53 feet to an iron pin set, said pin being 14.32 feet east of the centerline of Montgomery Road and being a corner of David Brooks; Thence continuing with the line of Brooks, S53°24'33"E — 483.25 feet to an iron pin set, said pin being 46.98 feet east of the centerline of Montgomery Road, S20°03'34"E —

826.58 feet to a mag nail set in the centerline of Montgomery Road and $S33^{\circ}08'48''E$ — 124.58 feet to a mag nail set in the centerline of Montgomery Road; Thence leaving the centerline of Montgomery Road and continuing with the line of David Brooks $N73^{\circ}46'07''E$ — 749.80 feet to an iron pin set a fence corner post, said pin being a corner of Kevin Deaton (D.B. 47, Pg. 202, 2nd tract); Thence leaving the line of Brooks and with the line of Deaton, $S11^{\circ}38'19''E$ — 1690.61 feet to an iron pin found (PLS# 3423), said pin being in the northwestern edge of an existing gravel driveway, said pin also being the southeast corner of the parent tract and being a corner of Kevin Deaton (D.B. 47, Pg. 202, 4th tract) and being on the line of Kevin Deaton (D.B. 47, Pg. 202, 2nd tract); Thence leaving the line of Kevin Deaton (D.B. 47, Pg. 202, 2nd tract) and with the line of Kevin Deaton (D.B. 47, Pg. 202, 4th tract), the following thirteen courses: $S72^{\circ}52'10''W$ — 25.17 feet an iron pin found (PLS# 1961), $S12^{\circ}01'39''E$ — 4.82 feet to an iron pin found (PLS# 1961), $S74^{\circ}47'21''W$ — 156.29 feet to an iron pin found (PLS# 1961), $N83^{\circ}18'42''W$ — 45.40 feet to an iron pin found (PLS# 1961), $N58^{\circ}15'22''W$ — 29.75 feet to an iron pin set a fence post, $N59^{\circ}33'40''W$ — 144.87 feet to an iron pin set a fence post, $N70^{\circ}53'50''W$ — 71.88 feet to an iron pin set at a fence post, $N78^{\circ}52'05''W$ — 81.07 feet to a Mag Nail found in the centerline of Montgomery Road and continuing with the line of Deaton and with the centerline of Montgomery Road, $S36^{\circ}30'15''E$ — 34.78 feet to a point, $S30^{\circ}01'34''E$ — 26.82 feet to a point, $S22^{\circ}21'46''E$ — 47.61 feet to a point, $S18^{\circ}00'12''E$ — 94.61 feet to a point and $S13^{\circ}18'49''E$ — 50.14 feet to the Point of Beginning and containing 152.898 acres by survey.

This description prepared from a physical survey conducted by AGE Engineering, Douglas Gooch Ky. R.L.S. #3118, dated the 12th day of November, 2009.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed recorded on January 7, 2010, in Deed Book 181, Page 210, in the Office of the Clerk of Carroll County, Kentucky, and by Deed recorded on January 8, 2010, in Deed Book 108, Page 324, in the Office of the Clerk of Gallatin County, Kentucky.

Parcel 2:

Situated in the Commonwealth of Kentucky, Gallatin and Carroll County, east of the City of Ghent, being all of the remaining land heretofore conveyed to Mark E. and Ruth R. Kearns, by deed, recorded in Deed Book 106, Page 418 of the Gallatin County deed records, and being more particularly described as follows:

Beginning at an existing Ash tree on the northerly line of a tract of land heretofore conveyed to Kentucky Utilities Company by deed, recorded in Deed Book 108 Page 324 (Gallatin Co.) and Deed Book 181, Page 210 (Carroll Co.) and the southeasterly most corner of a tract of land heretofore conveyed to Kentucky Utilities Company, by deed, recorded in Deed Book 107 Page 590 of said Gallatin County deed records, and a point on the westerly right-of-way line of Montgomery Road being fifteen (15) feet from the center of said road, said tree witnessed by a found $5/8''$ iron pin stamped One Eleven #3423, $N76^{\circ}34'28''W$, 5.00 feet;

Thence along said Kentucky Utilities Company tract of land on the following three (3) courses: (1) along said westerly right-of-way line of Montgomery Road, $N24^{\circ}45'49''E$, 147.50 feet to a found iron pin and cap stamped One Eleven 3423; (2) leaving said westerly right-of-way line, $N76^{\circ}34'28''W$, 147.50 feet to a found iron pin and cap stamped One Eleven 3423; (3) $S24^{\circ}45'49''W$, 147.50 feet to a found iron pin and cap stamped One Eleven 3423 on the northerly line of said Kentucky Utilities Company tract of land;

Thence along said northerly line, $N76^{\circ}34'28''W$, passing a set iron pin and cap, at a distance of 832.50 feet, a total distance of 1103.10 feet to a set iron pin and cap at a southeasterly most corner of a tract of land heretofore conveyed to Kentucky Utilities, by deed, recorded in Deed Book 108 Page 247 and 108

Page 443 (Gallatin County) as well as Deed Book 181 Page 104 and Deed Book 181 Page 109 (Carroll County);

Thence along the lines of said Kentucky Utilities Company tract of land, on the following three (3) courses: (1) N49°25'56"E, 393.22 feet to a set iron pin and cap; (2) N06°21'30"E, 1647.79 feet to a set iron pin and cap; (3) S80°41'18"E, 1225.11 feet to a set iron pin and cap on a westerly line of a tract of land heretofore conveyed to Buell and Virginia Shields, by deeds, recorded in Deed Book 34 Page 440 and Deed Book 33 Page 303;

Thence along the lines of said Shields' tract of land on the following four (4) courses: (1) S02°40'22"E, 282.87 feet to a set iron pin and cap; (2) S06°36'57"E, 610.38 feet to a set iron pin and cap; (3) S25°24'47"W, passing a set iron pin and cap at a distance of 263.30 feet, a total distance of 268.30 feet to a found fence post; (4) S72°21'10"E, passing a set iron pin and cap at a distance of 5.00 feet, and a distance of 239.70 feet on the westerly right-of-way line of Montgomery Road, a total distance of 298.06 feet to a set mag nail in the center of Montgomery Road and a southwesterly most corner of a tract of land heretofore conveyed to Barry and Alma Shields, by deed, recorded in Deed Book 83 Page 369, of the Gallatin County Deed Records;

Thence along the southerly line of said Barry and Alma Shields' tract of land, on the following four (4) courses; (1) S70°39'09"E, 54.35 feet to a found ½" iron pin; (2) S70°39'09"E, passing a set iron pin and cap on the easterly right-of-way line of Montgomery Road, at a distance of 21.59 feet, a total distance of 1119.53 feet to a found fence post; (3) S68°41'56"E, 141.63 feet to a found fence post; (4) S66°40'41"E, passing a found iron pin and cap stamped Mylor #1961, at a southerly corner of said Buell and Virginia Shields' tract of land, a total distance of 127.44 feet to a set iron pin and cap;

Thence along said line of Buell and Virginia Shields' tract on the following two (2) courses: (1) S62°05'58"E, 811.82 feet to a fence post; (2) S29°25'17"W, 1420.15 feet to a found iron pin and cap stamped Mylor #1961 at the northwesterly most corner of a tract of land heretofore conveyed to Kevin and Lucy Deaton, by deed, recorded in Deed Book 47 page 202, and the northeasterly most corner of a tract of land heretofore conveyed to Kentucky Utilities Company by deed, recorded in Deed Book 108 Page 334 of the Gallatin County Deed Records;

Thence along the northerly line of said Kentucky Utilities Company tract of land on the following four (4) courses: (1) N63°04'43"W, 1062.48 feet to a set iron pin and cap; (2) N57°26'21"E, 86.04 feet to a set iron pin and cap; (3) N27°55'46"E, 151.59 feet to a found ½" iron pin; (4) N62°24'44"W, passing a set iron pin and cap on the westerly right-of-way line of Montgomery Road, a distance of 1436.90 feet a total distance of 1451.92 feet to a set mag nail in the center of Montgomery Road and on the easterly line of said Kentucky Utilities Company tract of land;

Thence along the lines of Kentucky Utilities Company tract of land, on the following two (2) courses: (1) along the center of Montgomery Road, N24°45'49"E, 7.15 feet to a set mag nail; (2) N76°34'28"W, 15.30 feet to the beginning. Containing 128.3422 acres of land more or less, subject to easements, conditions, covenants, restrictions, and rights-of-way of record.

Further being subject to an existing 30 feet wide right-of-way for Montgomery Road, being 15 feet on either side of the following described centerline:

Beginning at set mag nail at the northeasterly most corner of a tract of land heretofore conveyed to Kentucky Utilities Company, by deed, recorded in Deed Book 108 Page 324 of the Gallatin County Deed Records and Deed Book 181, Page 210 of the Carroll County Deed Records and being more particularly described as follows: Thence N24°45'49"E, 192.38 feet to a set mag nail; Thence N25°54'22"E, 113.79

feet to a set mag nail; Thence N25°15'06"E, 342.76 feet to a set mag nail; Thence N31°24'50"E, 87.96 feet to a set mag nail; Thence N46°04'17"E, 36.28 feet to a set mag nail; Thence N64°33'00"E, 38.84 feet to a set mag nail; Thence N73°18'02"E, 114.19 feet to a set mag nail; Thence N74°54'35"E, 64.49 feet to a set mag nail; Thence N77°56'39"E, 53.65 feet to a set mag nail; Thence N83°40'42"E, 53.30 feet to a set mag nail; Thence S86°25'53"E, 50.70 feet to a set mag nail at the southeasterly most corner of a tract of land heretofore conveyed to Barry and Alma Shields, by deed, recorded in Deed Book 83 Page 369 of the Gallatin County Deed Records; records and the terminus of the centerline description. Containing 0.7971 of an acre of land more or less, subject to easements, conditions, covenants, restrictions, and rights-of-way of record.

Iron pins called to be set are 5/8" iron pins, twenty-four inches in length, with an orange cap stamped One Eleven #3423.

The above description and bearing system is based on the Kentucky Utilities Plant Grid System. It is further based on a field survey made by One Eleven Engineering and Surveying PLLC dated October 21, 2009.

This survey prepared by One Eleven Engineering and Surveying PLLC, James J. Bertram Jr. PLS, #3423 in the Commonwealth of Kentucky, October 21, 2009 and Revised March 16, 2010.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed recorded on March 18, 2010, in Deed Book 181, Page 684, in the Office of the Clerk of Carroll County, Kentucky, and by Deed recorded on March 18, 2010, in Deed Book 108, Page 668, in the Office of the Clerk of Gallatin County, Kentucky.

Parcel 3:

Tract 1:

The following is a description of a parcel of land lying on the east side of Montgomery Ridge Road, 3.0 miles, south of US 42, in Carroll & Gallatin Counties, Kentucky, and more particularly described as follows:

Beginning at Point in the center of Montgomery Road, from which a point in the center of Montgomery Road at the Northwest corner in parent tract bears N18°50'50"E 70.76 feet; thence leaving Montgomery Road and with a new made line over the land of Adrian Owens, Deed Book 57, Page 162, S80°50'47"E 22.24 feet to an Iron Pin (set); thence S80°50'47"E 363.82 feet to an Iron Pin (set); thence S01°09'13"W 532.94 feet to an Iron Pin (set); thence N84°24'15"W 171.52 feet to an Iron Pin (set); (a small family cemetery, marked by two 36" walnut and a 36" oak, is located two feet to the north and east of this Iron Pin); thence N84°38'44"W 214.39 feet to an Iron Pin (set); thence N84°38'44"W 21.13 feet to a Point in the center of Montgomery Road; thence with the center of Montgomery Road N01°15'09"W 48.85 feet; thence N00°19'26"E 46.30 feet; thence N02°31'36"E 69.20 feet; thence N03°51'27"E 109.71 feet; thence N05°06'05"E 282.94 feet to the Point of Beginning, containing 5.000 Acres, and subject to all rights-of-ways and easements of record or in existence.

The above description is in accordance with a survey made by Joe H. Justice, Jr. R.L.S. No. 1989 on June 15, 2001.

Tract 2:

Being Tract 1 as shown on that certain Plat of Adrian Owen Property approved by Warsaw, Glencoe and

Gallatin County Planning Commission, Docket No. PS-11-06, on March 17, 2011, of record in Plat Cabinet B, Slide 188 in the aforesaid Office.

Such property also being described as follows:

This property lies partially in Carroll and Gallatin County.

BEGINNING at a Mag Nail set (1/4" x 2" Mag Nail as will be common for all Mag Nails Set) at the intersection of centerline of Black Rock Road and Montgomery Road, having Kentucky State Plane Coordinate System — North Zone Coordinates of N=445025.67 E=1427841.89 and lying in Carroll County, Kentucky, and being the POINT OF BEGINNING for this description; Thence leaving the centerline of Black Rock Road and with the centerline of Montgomery Road, N04°11'12"E — 104.87 feet to a point, N03°17'24"W — 274.82 to a mag nail found in the centerline of Montgomery Road, and N02°22'52"W — 357.79 feet to a Mag Nail set in the centerline of Montgomery road; Thence leaving the centerline of Montgomery Road and across the parent tract with three (3) new courses: S83°49'20"E — passing an iron witness pin set at 20.23 feet and continuing 388.36 for a total distance of 408.59 feet to an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments), N06°30'01"W — 559.60 feet to an iron pin set and N82°59'31"W — passing an iron witness pin set at 360.81 feet and continuing 20.18 feet for a total distance of 380.99 feet to a Mag Nail set in the centerline of Montgomery Road; Thence with the centerline of Montgomery Road, N00°30'48"E — 143.72 feet to a point, N00°02'12"E — 82.74 feet to a point, N03°11'41"W — 58.58 feet to a point, N03°29'38"W — 32.42 feet to a point, N01°46'27"E — 39.12 feet to a point, N02°39'14"E — 36.02 feet to a point, N05°36'11"E — 35.32 feet to a point, N09°11'41"E — 39.18 feet to a point, N14°47'54"E — 37.80 feet to a point, N18°04'18"E — 55.15 feet to a point, N17°18'12"E — 37.94 feet to a point, N18°29'15"E — 25.69 feet to a point, N22°49'09"E — 26.39 feet to a point, N30°27'44"E — 80.46 feet to a point, N34°23'35"E — 32.71 feet to a point, N38°04'53"E — 36.86 feet to a point, N37°29'11"E — 45.44 feet to a point, N31°53'46"E — 26.69 feet to a point, N24°01'52"E — 26.85 feet to a point, N15°45'54"E — 31.86 feet to a Mag Nail Set, N07°35'02"E — 32.10 feet to a point, N01°44'45"E — 33.70 feet to a point, N03°50'09"W — 47.11 feet to a point, N06°15'14"W — 37.49 feet to a point, N09°19'37"W — 26.18 feet to a point, and N12°25'13"W — 23.01 feet to a Mag Nail Set in the centerline of Montgomery Road, said nail being the Southwest Corner of Kevin Deaton (4th Tract, D.B. 47, PG. 202 (GALLATIN CO.)); Thence leaving the centerline of Montgomery Road and with the southern line of Tract 4 of Deaton, N72°44'07"E — 25.17 feet to an iron pin found (PLS# 1961), N72°33'07"E — 422.86 feet to an iron pin set sad pin lying in the gravel roadway, and being the southwest corner of Kevin Deaton (Tract 3, D.B. 47, PG. 202) and being the Northwest corner of Kevin Deaton (D.B. 49, Pg. 215); Thence leaving the corner of Deaton (D.B. 47, Pg. 202) and with first the line of Deaton (D.B. 49, Pg. 215) following the remnants of an old fence and second with the line of Robert Furnish (D.B. 21, Pg. 419), S16°02'19"E — passing the centerline of Stephen Branch at 2211.77 feet and continuing 236.39 feet to an iron witness pin set (pin set 20' north of the centerline of Black Rock Road) and continuing 24.37 feet for an overall total distance of 2472.53 feet to a Mag Nail set in the centerline of Black Rock Road; Thence leaving the line of Furnish and with the centerline of Black Rock Road, S39°06'14"W — 60.72 feet to a point, S45°34'37"W — 31.36 feet to a point, S49°33'38"W — 83.60 feet to a point, S43°11'49"W — 50.44 feet to a point, S37°59'26"W — 70.43 feet to a point, S34°32'08"W — 108.74 feet to a point, S38°17'35"W — 39.35 feet to a point, S43°27'25"W — 68.58 feet to a point, S54°02'11"W — 57.58 feet to a point, S70°25'47"W — 42.24 feet to a point, and S87°55'24"W — 12.22 feet to a point on the centerline of Black Rock Road; Thence leaving the centerline of Black Rock Road and with (4) four new lines to the parent tract, N17°50'06"E — passing an iron witness pin set at 22.00 feet and continuing 405.08 feet for a total distance of 427.08 feet to an iron pin set, N00°37'49"E — 212.41 feet to an iron pin set, S84°53'45"W — 410.00 feet to an iron pin set, and S11°43'25"W — passing an iron pin set 503.01 feet and continuing 19.62 feet for a total distance of 522.63 feet to point on the centerline of Black Rock Road; Thence with the centerline of Black Rock Road, N83°01'17"W — 39.61 feet to a point, N79°20'25"W — 86.70 feet to a

point, N72°29'44"W — 45.02 feet to a point, N66°16'01"W — 45.39 feet to a point, N59°31'43"W — 76.64 feet to a point, N53°49'50"W — 101.04 feet to a point, N47°00'32"W — 27.42 feet to a point, and N42°15'56"W — 85.47 feet to the Point of Beginning containing 46.926 acres by survey.

This description prepared from a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 23rd day of February, 2011.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated and recorded on March 18, 2011, in Deed Book 184, Page 507, and by Deed dated and recorded on March 18, 2011, of record in Deed Book 184, Page 511, both in the Office of the Clerk of Carroll County, Kentucky, and by Deed dated and recorded on March 18, 2011, in Deed Book 110, Page 770, and by Deed dated and recorded on March 18, 2011, in Deed Book 110, Page 774, both in the Office of the Clerk of Gallatin County, Kentucky.

Hart County, Kentucky:

BEGINNING at an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments) on the eastern edge of right-of-way of the Norfolk Southern Railway Company (D.B. 104, PG. 271, D.B. 104, PG. 280, D.B. 104, PG. 323) and being the Northwest Corner of Frederick Dempsey (D.B. 160, Pg. 273), said pin having Kentucky State Plane Coordinate System — South Zone Coordinates of N=2166662.24, E=1936109.81 lying in Mercer County, Kentucky, said point also being S05°28'37"W — 3162.76 feet from the Southeast Corner of the Curdsville Bridge Abutment over the Norfolk Southern Railway Company and being the Point of Beginning for this description; Thence leaving the corner of Dempsey and with the eastern edge of right-of-way of the Norfolk Southern Railway Company, along a curve to the left, having a radius of 2010.10 feet, having a chord direction of N28°05'03"E and a chord length of 384.86 feet to a point, N21°36'34"E — 32.90 feet to an iron pin set, N21°36'34"E — 268.84 feet to a point N20°36'32"E — 662.38 feet to an iron pin set, N20°13'14"E — 103.35 feet to a point, N20°04'10"E — 88.92 feet to a point, N18°49'41"E — 110.75 feet to an iron pin set, along a curve to the left having a radius of 2010.10 feet having a chord direction of N01°07'03"E and a chord length of 1208.47 feet to an iron pin set, N17°06'41"W — 86.50 feet to a point, N19°02'37"W — 88.87 feet to a point, N20°01'53"W — 131.46 feet to a point and N21°11'24"W — 238.36 feet to an iron pin set, said pin being on the eastern edge of right-of-way of the Norfolk Southern Railway; Thence leaving said railroad and with a new line to the parent tract, N36°27'44"E — 39.74 — feet to an iron pin set, said pin being the Southwest Corner of Kentucky Utilities Company (D.B. 230, Pg. 201); Thence with the line of Kentucky Utilities Company (D.B. 230, Pg. 201), S52°10'06"E — crossing Hardin Heights Drive 226.73 feet to an iron pin set, S48°39'56"E — 32.12 feet to an iron pin found (KYTC), S53°10'45"E — 111.22 feet to an iron pin set, S49°16'35"E — 730.79 feet to an iron pin set, S25°44'27"E — 90.27 feet to an iron pin set, S15°06'22"E — 386.08 feet to an iron pin set S20°30'30"E — 260.47 feet to an iron pin set, S03°24'21"E — 211.52 feet to an iron pin set, S34°16'49"E — 109.16 feet to an iron pin set, S46°46'12"E — 70.01 feet to an iron pin set, S70°49'20"E — 59.42 feet to an iron pin set, N85°27'56"E — 480.51 feet to an iron pin found with no ID Cap, N84°13'12"E — 468.44 feet to an iron pin set, N02°44'33"W — 5.00 feet to an iron pin set, N84°56'26"E — 361.18 feet to an iron pin set, S67°45'29"E — 47.32 feet to an iron pin set, S52°26'28"E — 527.44 feet to an iron pin set, said pin being on the southern line of Kentucky Utilities Company and being a corner of Hardin Heights, Inc. said pin being on the western line of Hardin Heights, Inc. (D.B. 130, Pg. 147, see also Plat of Hardin Heights Camp Sites Plat Slide A-69); Thence leaving the line of Kentucky Utilities Company and crossing Hardin Heights Drive with the line of Hardin Heights, Inc., S36°08'14"W — 12.01 feet to a mag nail set (1/4" x 2" Mag Nail set as will be typical for all Mag Nails set), said nail being a new corner of the parent tract, S51°06'46"E — 35.00 feet to a Mag Nail Set, S47°51'46"E — 50.00 feet to a Mag Nail Set, S42°51'46"E — 50.00 feet to an iron pin set, S37°51'46"E — 50.00 feet to an iron pin set, S32°51'46"E — 50.00 feet to an iron pin set, S27°51'46"E —

50.00 feet to a Mag Nail Set, S22°51'46"E — 50.00 feet to a Mag Nail Set, S17°51'46"E — 50.00 feet to an iron pin set, S12°51'46"E — 50.00 feet to an iron pin set, S07°51'46"E — 50.00 feet to an iron pin set, S02°51'46"E — 50.00 feet to an iron pin set, S02°08'14"W — 50.00 feet to an iron pin set, S04°36'20"W — 338.90 feet to an iron pin found (PLS# 3816), S26°28'46"W — 98.98 feet to an iron pin found (PLS# 3816), S47°50'27"W — 170.00 feet to an iron pin found (PLS# 3816), S60°08'28"W — 172.18 feet to an iron pin found (PLS# 3816), and S23°53'27"E — 39.86 feet to a 1" Iron Pipe Found, said pipe being a corner of the Hardin Heights, Inc. (D.B. 130, Pg. 147) and the Southwest corner of Lot 1 of Hardin Heights Camp Estates; Thence leaving the line of Hardin Heights, Inc. (D.B. 130, Pg. 147) and with the line of Lot 1 of Hardin Heights Camp Estates, S23°38'19"E — 204.33 feet to an iron pin set at elevation 760, said pin being N23°38'19"W — 5.11 feet from a found 1" Pipe; Thence leaving Lot 1 of Hardin Heights Camp Estates and with the line of Kentucky Utilities Company (D.B. 104, Pg. 318) and 760 elevation line, S79°31'40"W — 457.41 feet to an iron pin found (PLS# 3816), S58°56'55"W — 83.56 feet to an iron pin found (PLS# 3816), S51°40'58"W — 58.42 feet to an iron pin found (PLS# 3816), S47°50'51"W — 22.05 feet to an iron pin found (PLS# 3816), S45°47'52"W — 138.57 feet to an iron pin found (PLS# 3816), S75°05'26"W — 95.47 feet to an iron pin found (PLS# 3816), S81°32'53"W — 488.43 feet to an iron pin found (PLS# 3816), S88°28'56"W — 209.89 feet to an iron pin found (PLS# 3816), S86°18'39"W — 122.17 feet to an iron pin found (PLS# 3816), and N83°26'18"W — 76.85 feet to an iron pin found (PLS# 3816), said pin being at the 760 Elevation and being a corner of Fredrick Dempsey (D.B. 160, Pg. 273); Thence leaving the 760 Elevation and with the line of Dempsey, N67°55'13"W — 61.50 feet to an iron pin found (PLS# 3816) in the centerline of the Creek, N30°57'02"W — 250.95 feet to an iron pin set, N16°11'02"W — 120.12 feet to an iron pin found (PLS# 3816), N48°20'38"W — 124.02 feet to an iron pin found (PLS# 3816), N38°06'58"W — 98.94 feet to an iron pin found (PLS# 3816) at the base of a fence corner post and S87°38'08"W — with said fence line passing an iron pin found (PLS# 3816) at 1449.80 feet and continuing 2.82 feet for a overall total distance of 1452.62 feet to the POINT OF BEGINNING and containing 152.976 acres by survey.

This description prepared from a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S. #3118, dated the 9th day of May, 2011.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated November 11, 2011, of record in Deed Book 311, Page 567, in the Office of the Clerk of Hart County, Kentucky.

Laurel County, Kentucky:

Begin at a stake in the controlled fence row right of way of Daniel Boone Parkway on the north side of the dead end of Lovelace Road; thence N 68.00 W. 170 feet to a stake; thence N. 22.00 E. 547 feet to a stake in the south right of way of Kentucky Utility right of way; thence S. 38.30 E 254.2 feet with the right of way to a post; thence N. 55.30 E. 343 feet to a post; thence S. 39.00 E. 190 feet to a stake; thence same course S. 39.00 E. 45 feet to a point; thence S. 82.31 E. 235 feet to a stake in the original outside line; thence S. 3.30 W. 240 feet along the original line to a brace post in the controlled fence row of Daniel Boone Parkway; thence with the fence row of Daniel Boone Parkway 893.5 feet as it meanders, to the point of beginning containing 8.15 acres the same to be more or less.

THERE IS EXCEPTED AND NOT CONVEYED HEREIN that certain tract of land and the easement conveyed to Gene Nicholson and Judith Nicholson, husband and wife by deed dated the 8th day of November, 1980 of record in Deed Book 293, at page 163, records of the Laurel County Court Clerk's Office, and being more particularly described as follows:

Beginning at a pull post in the R/W fence of the Daniel Boone Parkway, also a corner to the C.T. Massey property, thence leaving the fence and with the Massey line, N 06.02 E. 181.0 feet to a 36" black oak, thence leaving the Massey line, N. 73.54 W. 174.8 feet to a 3" hickory, thence N. 57.00 W. 68.0 feet to a twin white oak & chestnut oak, thence S 45.46 W. 89.0 feet to a stake 20 feet from the C/L of an old road, thence S. 43.54 W. 317.5 feet to a stake in the R/W fence, thence with the R/W fence N. 86.54 E. 490.8 feet to the beginning corner. Containing 2.0 acres more or less by survey of Green L. Keith, Registered Land Surveyor No. 1901.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated December 22, 2010, of record in Deed Book 667, Page 229, in the Office of the Clerk of Laurel County, Kentucky.

Franklin County, Kentucky:

Beginning at an Iron pin on the right-of-way of U.S. Highway #460, corner to the National Distillers and running with said right-of-way line south 71 degrees 50 minutes west, a distance of 486 feet to a point opposite utility pole number 9834; thence north 25 degrees 30 minutes east 527 feet to a point on Elkhorn Creek, corner to National Distillers; thence south 17 degrees 00 minutes east 480 feet to the point of beginning, containing approximately two acres.

There is excepted therefrom however that portion of said property conveyed by Joe Pat Gaines, et al to Commonwealth of Kentucky by deed dated April 17, 1987 and of record in Deed Book 346, page 471, in the office of the Clerk of Franklin County, Kentucky.

Said property is more recently and particularly described as follows:

BEGINNING at an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments), on the northern edge of right-of-way of US Hwy 460, said pin being 73.57 feet north of centerline and being the southwest corner of the James B. Beam Distilling Co. (D.B. 346, Pg. 350), having Kentucky State Plane Coordinate System — North Zone Coordinates of N=259632.36, E=1479432.22, said pin also being approximately 333 feet northeast of the intersection of centerlines of Raven Crest Apartments Road and US Hwy 460, said iron pin set also being S74°24'43"W — 631.91 feet from a Damaged Right of Way monument found, said iron pin set being the POINT OF BEGINNING for this description; Thence leaving the line of the James B. Beam Distilling Co., (D.B. 346, Pg. 350) and with the north edge of right-of-way of US Hwy 460, S72°00'25"W — 5.76 feet to an iron pin set, said pin being 73.80 feet north of the centerline, S72°00'59"W — 29.93 feet to an iron pin set, said pin being 75.00 feet north of centerline and S74°39'44"W — 408.57 feet to an iron pin set, said pin being 95.75 feet north of the centerline of US Hwy 460 and being a common corner of JAN, LLC (D.B. 479, Pg. 640); Thence leaving the right-of-way of US Hwy 460 and with the line of JAN, LLC, N36°07'11"E — 559.43 feet to an iron pin set on the bank of Elkhorn Creek, said point being a common corner of the James B. Beam Distilling Co. (D.B. 346, Pg. 350) and JAN, LLC and being the northern most corner of the property being surveyed; Thence leaving the line of JAN, LLC and with the line of the James B. Beam Distilling Co., S16°26'23"E — 346.99 feet to the Point of Beginning and containing 1.777 acres by survey.

This description prepared from a physical survey conducted by AGE Engineering, Douglas G. Gooch Ky. R.L.S.#3118, dated the 6th day of October, 2010.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated December 28, 2010, of record in Deed Book 524, Page 376, in the Office of the Clerk of Franklin County, Kentucky.

Mercer County, Kentucky:

BEGINNING at an iron pin set (5/8" x 18" rebar with aluminum cap bearing PLS-3118, as will be typical for all set corner monuments) on the eastern edge of right-of-way of the Norfolk Southern Railway Company (D.B. 104, PG. 271, D.B. 104, PG. 280, D.B. 104, PG. 323) and being the Northwest Corner of Frederick Dempsey (D.B. 160, Pg. 273), said pin having Kentucky State Plane Coordinate System — South Zone Coordinates of N=2166662.24, E=1936109.81 lying in Mercer County, Kentucky, said point also being S05°28'37"W — 3162.76 feet from the Southeast Corner of the Curdsville Bridge Abutment over the Norfolk Southern Railway Company and being the Point of Beginning for this description; Thence leaving the corner of Dempsey and with the eastern edge of right-of-way of the Norfolk Southern Railway Company, along a curve to the left, having a radius of 2010.10 feet, having a chord direction of N28°05'03"E and a chord length of 384.86 feet to a point, N21°36'34"E — 32.90 feet to an iron pin set, N21°36'34"E — 268.84 feet to a point N20°36'32"E - 662.38 feet to an iron pin set, N20°13'14"E — 103.35 feet to a point N20°04'10"E — 88.92 feet to a point, N18°49'41"E — 110.75 feet to an iron pin set, along a curve to the left having a radius of 2010.10 feet having a chord direction of N01°07'03"E and a chord length of 1208.47 feet to an iron pin set, N17°06'41"W — 86.50 feet to a point, N19°02'37"W — 88.87 feet to a point, N20°01'53"W — 131.46 feet to a point and N21°11'24"W — 238.36 feet to an iron pin set, said pin being on the eastern edge of right-of-way of the Norfolk Southern Railway; Thence leaving said railroad and with a new line to the parent tract, N36°27'44"E — 39.74 — feet to an iron pin set, said pin being the Southwest Corner of Kentucky Utilities Company (D.B. 230, Pg. 201); Thence with the line of Kentucky Utilities Company (D.B. 230, Pg. 201), S52°10'06"E — crossing Hardin Heights Drive 226.73 feet to an iron pin set, S48°39'56"E — 32.12 feet to an iron pin found (KYTC), S53°10'45"E — 111.22 feet to an iron pin set, S49°16'35"E — 730.79 feet to an iron pin set, S25°44'27"E — 90.27 feet to an iron pin set, S15°06'22"E — 386.08 feet to an iron pin set, S20°30'30"E — 260.47 feet to an iron pin set, S03°24'21"E — 211.52 feet to an iron pin set, S34°16'49"E — 109.16 feet to an iron pin set, S46°46'12"E — 70.01 feet to an iron pin set, S70°49'20"E — 59.42 feet to an iron pin set, N85°27'56"E — 480.51 feet to an iron pin found with no ID Cap, N84°13'12"E — 468.44 feet to an iron pin set, N02°44'33"W — 5.00 feet to an iron pin set, N84°56'26"E — 361.18 feet to an iron pin set, S67°45'29"E — 47.32 feet to an iron pin set, S52°26'28"E — 527.44 feet to an iron pin set, said pin being on the southern line of Kentucky Utilities Company and being a corner of Hardin Heights, Inc. said pin being on the western line of Hardin Heights, Inc. (D.B. 130, Pg. 147, see also Plat of Hardin Heights Camp Sites Plat Slide A-69); Thence leaving the line of Kentucky Utilities Company and crossing Hardin Heights Drive with the line of Hardin Heights, Inc., S36°08'14"W — 12.01 feet to a mag nail set (1/4" x 2" Mag Nail set as will be typical for all Mag Nails set), said nail being a new corner of the parent tract, S51°06'46"E — 35.00 feet to a Mag Nail Set, S47°51'46"E — 50.00 feet to a Mag Nail Set, S42°51'46"E — 50.00 feet to an iron pin set, S37°51'46"E — 50.00 feet to an iron pin set, S32°51'46"E — 50.00 feet to an iron pin set, S27°51'46"E — 50.00 feet to a Mag Nail Set, S22°51'46"E — 50.00 feet to a Mag Nail Set, S17°51'46"E — 50.00 feet to an iron pin set, S12°51'46"E — 50.00 feet to an iron pin set, S07°51'46"E — 50.00 feet to an iron pin set, S02°51'46"E — 50.00 feet to an iron pin set, S02°08'14"W — 50.00 feet to an iron pin set, S04°36'20"W — 338.90 feet to an iron pin found (PLS# 3816), S26°28'46"W — 98.98 feet to an iron pin found (PLS# 3816), S47°50'27"W — 170.00 feet to an iron pin found (PLS# 3816), S60°08'28"W — 172.18 feet to an iron pin found (PLS# 3816), and S23°53'27"E — 39.86 feet to a 1" Iron Pipe Found, said pipe being a corner of the Hardin Heights, Inc. (D.B. 130, Pg. 147) and the Southwest corner of Lot 1 of Hardin Heights Camp Estates; Thence leaving the line of Hardin Heights, Inc. (D.B. 130, Pg. 147) and with the line of Lot 1 of Hardin Heights Camp Estates, S23°38'19"E — 204.33 feet to an iron pin set at elevation 760, said pin being N23°38'19"W — 5.11 feet from a found 1" Pipe; Thence leaving Lot 1 of Hardin Heights Camp Estates and with the line of Kentucky Utilities Company (D.B. 104, Pg. 318) and 760 elevation line, S79°31'40"W — 457.41 feet to an iron pin found (PLS# 3816), S58°56'55"W — 83.56 feet to an iron pin found (PLS# 3816), S51°40'58"W — 58.42 feet to an iron pin found (PLS# 3816),

S47°50'51"W — 22.05 feet to an iron pin found (PLS# 3816), S45°47'52"W — 138.57 feet to an iron pin found (PLS# 3816), S75°05'26"W — 95.47 feet to an iron pin found (PLS# 3816), S81°32'53"W — 488.43 feet to an iron pin found (PLS# 3816), S88°28'56"W — 209.89 feet to an iron pin found (PLS# 3816), S86°18'39"W — 122.17 feet to an iron pin found (PLS# 3816), and N83°26'18"W — 76.85 feet to an iron pin found (PLS# 3816), said pin being at the 760 Elevation and being a corner of Fredrick Dempsey (D.B. 160, Pg. 273); Thence leaving the 760 Elevation and with the line of Dempsey, N67°55'13"W — 61.50 feet to an iron pin found (PLS# 3816) in the centerline of the Creek, N30°57'02"W — 250.95 feet to an iron pin set, N16°11'02"W — 120.12 feet to an iron pin found (PLS# 3816), N48°20'38"W — 124.02 feet to an iron pin found (PLS# 3816), N38°06'58"W — 98.94 feet to an iron pin found (PLS# 3816) at the base of a fence corner post and S87°38'08"W — with said fence line passing an iron pin found (PLS# 3816) at 1449.80 feet and continuing 2.82 feet for a overall total distance of 1452.62 feet to the POINT OF BEGINNING and containing 152.976 acres by survey.

This description prepared from a physical survey conducted by Douglas G. Gooch, AGE Engineering Services, Inc., Ky. R.L.S.#3118, dated the 9th day of May, 2011.

Being the same property conveyed to Kentucky Utilities Company, a Kentucky corporation, by Deed dated June 23, 2011, of record in Deed Book 328, Page 7, in the Office of the Clerk of Mercer County, Kentucky.

LOUISVILLE GAS AND ELECTRIC COMPANY

OFFICER'S CERTIFICATE

(under Sections 201 and 301 of the Indenture, dated as of October 1, 2010)

**Establishing the Form and Certain Terms of the
First Mortgage Bonds, 4.65% Series due 2043**

The undersigned Daniel K. Arbough, the Treasurer of LOUISVILLE GAS AND ELECTRIC COMPANY (the "Company"), in accordance with Sections 201 and 301 of the Indenture, dated as of October 1, 2010 (the "Original Indenture"), as amended and supplemented by various instruments including Supplemental Indenture No. 3, dated as of November 1, 2013 (as so amended and supplemented, the "Indenture"), of the Company to The Bank of New York Mellon, trustee (the "Trustee"), does hereby establish, for the Securities of Series No. 4, established in Supplemental Indenture No. 3, the terms and characteristics set forth in this Officer's Certificate (capitalized terms used herein and not defined herein having the meanings specified in the Original Indenture).

PART I

Set forth below in this Part I are the terms and characteristics of the aforesaid series of Securities referred to in clauses (a) through (u) in the third paragraph of Section 301 of the Indenture (the lettered clauses set forth herein corresponding to such clauses in said Section 301):

- (a) the title of the Securities of such series shall be "First Mortgage Bonds, 4.65% Series due 2043" (the "Bonds"), and the date of the Bonds shall be November 14, 2013;
 - (b) the aggregate principal amount of Bonds which may be authenticated and delivered under the Indenture shall be limited as and to the extent set forth in Supplemental Indenture No. 3 and any subsequent supplemental indenture relating thereto;
 - (c) interest on the Bonds shall be payable to the Person or Persons in whose names the Bonds are registered at the close of business on the Regular Record Date for such interest, except as otherwise expressly provided in the form of Bond attached hereto and hereby authorized and approved;
 - (d) the principal of the Bonds shall be due and payable on November 15, 2043; and the Company shall not have the right to extend the Maturity of the Bonds as contemplated in Section 301(d) of the Indenture;
 - (e) the Bonds shall bear interest at a fixed rate of 4.65% per annum; interest on the Bonds shall accrue from the date or dates specified in the form of Bond attached hereto as Exhibit A; the Interest Payment Dates for the Bonds shall be May 15 and November 15 of each year, commencing May 15, 2014; the Regular Record Date for the interest payable on any Interest Payment Date with respect to the Bonds shall be the May 1 or November 1 (whether or not a Business Day) immediately preceding such Interest Payment Date; and the Company shall not have any right to extend any interest payment periods for the Bonds as contemplated in Sections 301(e) and 312 of the Indenture;
 - (f) the Corporate Trust Office of the Trustee in New York, New York shall be the office or agency of the Company at which the principal of and any premium and interest on the
-

Bonds at Maturity shall be payable, at which registration of transfers and exchanges of the Bonds may be effected and at which notices and demands to or upon the Company in respect of the Bonds and the Indenture may be served; and the Trustee will initially be the Security Registrar and the Paying Agent for the Bonds; provided, however, that the Company reserves the right to change, by one or more Officer's Certificates, any such office or agency and such agent;

- (g) the Bonds shall be redeemable, in whole or in part, at the option of the Company as and to the extent provided, and at the price or prices set forth, in Exhibit A hereto;
- (h) inapplicable;
- (i) the Bonds shall be issuable in denominations of \$2,000 and integral multiples of \$1,000 in excess thereof;
- (j) inapplicable;
- (k) inapplicable;
- (l) inapplicable;
- (m) inapplicable;
- (n) inapplicable;
- (o) inapplicable;
- (p) the only obligations or instruments which shall be considered Eligible Obligations in respect of the Bonds shall be Government Obligations; and the provisions of Section 901 of the Original Indenture and Section 201 of Supplemental Indenture No. 3 shall apply to the Bonds;
- (q) reference is made to Part II of this Officer's Certificate;
- (r) reference is made to clause (q) above; no service charge shall be made for the registration of transfer or exchange of the Bonds; provided, however, that the Company may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection with the exchange or transfer;
- (s) inapplicable;
- (t) inapplicable; and
- (u) except as otherwise determined by the proper officers of the Company and established in one or more Officer's Certificates supplemental to this Officer's Certificate, the Bonds shall be substantially in the form of the form of Bond attached hereto as Exhibit A, which form is hereby authorized and approved, and shall have such further terms as are set forth in such form.

PART II

Section 1. Definitions.

For all purposes of this Officer's Certificate, the terms listed below shall have the meanings indicated, unless otherwise expressly provided or unless the context otherwise requires:

"*Certificated Bond*" means a certificated Bond registered in the name of the registered holder thereof, substantially in the form of Exhibit A hereto except that such Bond shall not bear the Global Bond Legend.

"*Custodian*" means the Trustee, in its capacity as custodian for the Depository with respect to the Bonds in global form, or any successor entity thereto.

"*Depository*" means the person designated or acting as a securities depository for the Bonds.

"*DTC*" means The Depository Trust Company.

"*Global Bond*" means a Bond substantially in the form of Exhibit A hereto and bearing the Global Bond Legend.

"*Global Bond Legend*" means the legend as to the global nature of a Bond as set forth in Exhibit B hereto, which is required to be placed on all Global Bonds.

Section 2. Global Bonds.

(a) *General.* The Bonds are initially to be issued and delivered in global, fully registered form, registered in the name of Cede & Co., as nominee for DTC, which is hereby designated as the Depository. Such Global Bonds shall not be transferable, nor shall any purported transfer be registered, except as follows:

(i) Global Bonds may be transferred in whole, and appropriate registration of transfer effected, by the Depository to a nominee thereof, or by any nominee of the Depository to any other nominee thereof, or by the Depository or any nominee thereof to any Depository or any nominee thereof; and

(ii) Global Bonds may be transferred in whole, with appropriate registration of transfer effected and Certificated Bonds issued and delivered, to the beneficial holders of the Global Bonds if:

(A) The Depository shall have notified the Company and the Trustee that (A) it is unwilling or unable to continue to act as securities depository with respect to such bonds or (B) it is no longer a clearing agency registered under the Securities Exchange Act of 1934, as amended, and, in either case, the Trustee shall not have been notified by the Company within one hundred twenty (120) days of the receipt of such notice from the Depository of the identity of a successor Depository; or

(B) the Company shall have delivered to the Trustee a written order to the effect that, on and after a date specified therein, the Bonds are no longer to be held in global form by a Depository (subject to the procedures of the Depository).

In the event of a transfer of Global Bonds as contemplated in clause (ii) above, the Company will execute, and the Trustee, upon receipt of a Company Order for the authentication and delivery of Certificated Bonds and upon surrender of such Global Bonds, will authenticate and deliver, Certificated Bonds in an aggregate principal amount equal to the principal amount of such Global Bonds, such Certificated Bonds to be registered in the names provided by the Depositary.

(b) *Principal Amount of Global Bonds.* Each Global Bond shall represent such of the outstanding Bonds as shall be specified therein, and the aggregate principal amount of outstanding Bonds represented thereby may from time to time be reduced to reflect redemptions thereof. Any notation on a Global Bond to reflect the amount of any decrease in the aggregate principal amount of outstanding Bonds represented thereby resulting from such redemption shall be made by the Trustee or the Custodian, at the direction of the Trustee, in accordance with instructions given by or on behalf of the registered holder thereof and with the applicable procedures of the Depositary.

(c) *Disclaimers.* Neither the Company nor the Trustee shall have any responsibility or obligation to any beneficial owner of a Global Bond, any participant in the Depositary or any other Person with respect to the accuracy of, or for maintaining, supervising or reviewing, the records of the Depositary or its nominee or of any participant therein or member thereof, with respect to any ownership interest in the Global Bonds or with respect to the delivery to any participant, member, beneficial owner or other Person (other than the Depositary) of any notice (including any notice of redemption) or the payment of any amount, on or with respect to such Global Bonds. All notices and communications required to be given to the Holders and all payments on Global Bonds required to be made to Holders shall be given or made only to or upon the order of the registered Holders (which shall be the Depositary or its nominee in the case of a Global Bond). The rights of beneficial owners in any Global Bond shall be exercised only through the Depositary subject to the applicable rules and procedures of the Depositary. The Company and the Trustee may rely conclusively and shall be fully protected in relying upon information furnished by the Depositary with respect to its members, participants and any beneficial owners. The Trustee shall have no obligation or duty to monitor, determine or inquire as to compliance with any restrictions on transfer imposed under the Indenture or under applicable law with respect to any transfer of any interest in any Global Bond (including any transfers between or among Depositary participants, members or beneficial owners in any Global Bond) other than to require delivery of such certificates and other documentation or evidence as are expressly required by, and to do so if and when expressly required by, the terms of the Indenture, and to examine the same to determine substantial compliance as to form with the express requirements hereof.

IN WITNESS WHEREOF, I have executed this Officer's Certificate this 14th day of November, 2013.

CUSIP No.

Principal Amount of \$

LOUISVILLE GAS AND ELECTRIC COMPANY
FIRST MORTGAGE BOND, 4.65% SERIES DUE 2043

LOUISVILLE GAS AND ELECTRIC COMPANY, a corporation duly organized and existing under the laws of the Commonwealth of Kentucky (herein referred to as the "Company", which term includes any Successor Corporation under the Indenture referred to below), for value received, hereby promises to pay to

or to its registered assigns, the principal sum of

MILLION (\$) Dollars

on November 15, 2043 (the "Stated Maturity Date"), and to pay interest on said principal sum semi-annually in arrears on May 15 and November 15 of each year (each, an "Interest Payment Date"), at the rate of 4.65% per annum until the principal hereof is paid or made available for payment. The first Interest Payment Date for the Securities of this series shall be May 15, 2014, and interest on the Securities of this series will accrue from and including November 14, 2013, to and excluding the first Interest Payment Date, and thereafter will accrue from and including the last Interest Payment Date to which interest on the Securities of this series has been paid or duly provided for. No interest will accrue on the Securities of this series with respect to the day on which the Securities are paid.

CERTIFICATE OF AUTHENTICATION

This is one of the Securities of the series designated therein referred to in the within-mentioned Indenture.

Date of Authentication:

, as Trustee

By: _____

Authorized Signatory

A-1

In the event that any Interest Payment Date is not a Business Day, then payment of interest payable on such date will be made on the next succeeding day which is a Business Day (and without any interest or other payment in respect of such delay) with the same force and effect as if made on the Interest Payment Date. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in such Indenture, be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on the May 1 or November 1, whether or not a Business Day (each such date, a "Regular Record Date"), immediately preceding such Interest Payment Date, except that interest payable at Maturity will be payable to the Person to whom principal shall be paid. Any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on a Special Record Date for the payment of such Defaulted Interest to be fixed by the Trustee, notice whereof shall be given to Holders of Securities of this series not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Securities of this series may be listed, and upon such notice as may be required by such exchange, all as more fully provided in the Indenture referred to herein. Interest on this Security will be computed on the basis of a 360-day year of twelve 30-day months.

Payment of the principal of and premium, if any, and interest at Maturity on this Security shall be made upon presentation of this Security at the corporate trust office of The Bank of New York Mellon in New York, New York, or at such other office or agency as may be designated for such purpose by the Company from time to time, in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts, and payment of interest, if any, on this Security (other than interest payable at Maturity) shall be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register, provided that if such Person is a securities depository, such payment may be made by such other means in lieu of check as shall be agreed upon by the Company, the Trustee and such Person.

This Security is one of a duly authorized issue of securities of the Company (herein called the "Securities"), issued and issuable in one or more series under an Indenture, dated as of October 1, 2010 (herein called the "Original Indenture" and, together with any amendments or supplements thereto and the Officer's Certificate establishing the terms of the Securities of this series, the "Indenture," which term shall have the meaning assigned to it in the Original Indenture), between the Company and The Bank of New York Mellon, as Trustee (herein called the "Trustee," which term includes any successor trustee under the Indenture), and reference is hereby made to the Indenture, including Supplemental Indenture No. 3 thereto, for a statement of the property mortgaged, pledged and held in trust, the nature and extent of the security, the conditions upon which the lien of the Indenture may be released and the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Securities and of the terms upon which the Securities are, and are to be, authenticated and delivered. The acceptance of this Security by the Holder hereof shall be deemed to constitute the consent and agreement by such Holder to all of the terms and provisions of the Indenture. This Security is one of the series designated on the face hereof.

Prior to May 15, 2043, this Security is subject to redemption at the option of the Company, in whole at any time or in part from time to time, at a redemption price equal to the greater of:

- (a) 100% of the principal amount of this Security to be so redeemed; and
- (b) as determined by the Quotation Agent, the sum of the present values of the remaining scheduled payments of principal and interest on the principal amount of this Security to be so redeemed (not including any portion of such payments of interest accrued to the

date of redemption) discounted to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Adjusted Treasury Rate, plus 15 basis points,

plus, in either of the above cases, accrued and unpaid interest to the date of redemption.

Promptly after the calculation thereof, the Company shall give the Trustee written notice of the redemption price for the foregoing redemption. The Trustee shall have no responsibility for any such calculation.

On or after May 15, 2043, this Security is subject to redemption at the option of the Company, in whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of this Security to be so redeemed, plus accrued and unpaid interest to the date of redemption.

As used herein:

“*Adjusted Treasury Rate*” means, with respect to any redemption date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for that redemption date.

“*Comparable Treasury Issue*” means the United States Treasury security selected by the Quotation Agent as having an actual or interpolated maturity comparable to the remaining term to the Stated Maturity Date of this Security that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of this Security.

“*Comparable Treasury Price*” means, with respect to any redemption date:

- a) the average of five Reference Treasury Dealer Quotations for that redemption date, after excluding the highest and lowest Reference Treasury Dealer Quotations, or
- b) if the Quotation Agent obtains fewer than five Reference Treasury Dealer Quotations, the average of all Reference Treasury Dealer Quotations so received.

“*Quotation Agent*” means one of the Reference Treasury Dealers appointed by the Company.

“*Reference Treasury Dealer*” means:

- a) each of Citigroup Global Markets Inc. and RBS Securities Inc. (or their respective affiliates that are Primary Treasury Dealers, as defined below), a Primary Treasury Dealer selected by SunTrust Robinson Humphrey, Inc. and a Primary Treasury Dealer selected by US Bancorp Investments, Inc., or their respective successors, unless any of them ceases to be a primary U.S. Government securities dealer in the United States (a “Primary Treasury Dealer”), in which case the Company shall substitute another Primary Treasury Dealer; and

b) any other Primary Treasury Dealer selected by the Company (after consultation with the Quotation Agent).

“*Reference Treasury Dealer Quotations*” means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Quotation Agent, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount), as provided to the Quotation Agent by that Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding such redemption date.

Notice of redemption shall be given by mail to Holders of Securities, not less than 30 days nor more than 60 days prior to the date fixed for redemption, all as provided in the Indenture. As provided in the Indenture, notice of redemption at the election of the Company as aforesaid may state that such redemption shall be conditional upon the receipt by the applicable Paying Agent or Agents of money sufficient to pay the principal of and premium, if any, and interest, on this Security on or prior to the date fixed for such redemption; a notice of redemption so conditioned shall be of no force or effect if such money is not so received and, in such event, the Company shall not be required to redeem this Security.

In the event of redemption of this Security in part only, a new Security or Securities of this series of like tenor representing the unredeemed portion hereof shall be issued in the name of the Holder hereof upon the cancellation hereof.

If an Event of Default with respect to the Securities of this series shall occur and be continuing, the principal of this Security may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture contains provisions for defeasance at any time of the entire indebtedness of this Security upon compliance with certain conditions set forth in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series to be affected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in principal amount of the Securities at the time Outstanding of all series to be affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Securities of all series affected at the time Outstanding, on behalf of the Holders of all Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by the Holder of this Security shall be conclusive and binding upon such Holder and upon all future Holders of this Security and of any Security issued upon the registration of transfer hereof or in exchange herefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Security.

As provided in and subject to the provisions of the Indenture, the Holder of this Security shall not have the right to institute any proceeding with respect to the Indenture or for the appointment of a receiver or trustee or for any other remedy thereunder, unless (a) such Holder shall have previously given the Trustee written notice of a continuing Event of Default; (b) the Holders of 25% in aggregate principal amount of the Outstanding Securities shall have made written request to the Trustee to institute proceedings in respect of such Event of Default as Trustee and offered the Trustee reasonable indemnity; (c) the Trustee shall not have received from the Holders of a majority in aggregate principal amount of the Outstanding Securities a direction inconsistent with such request; and (d) shall have failed to institute any such proceeding for 60 days after receipt of such notice, request and offer of indemnity. The foregoing

shall not apply to any suit instituted by the Holder of this Security for the enforcement of any payment of principal hereof or any premium or interest hereon on or after the respective due dates expressed herein.

No reference herein to the Indenture and no provision of this Security or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and any premium and interest on this Security at the times, place and rate, and in the coin or currency, herein prescribed.

The Securities of this series are issuable only in registered form without coupons, and in denominations of \$2,000 and integral multiples of \$1,000 in excess thereof.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Security is registrable in the Security Register, upon surrender of this Security for registration of transfer at the office or agency of the Company for such purpose, duly endorsed by, or accompanied by a written instrument or transfer in form satisfactory to the Company and the Trustee duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Securities of this series and Tranche, of authorized denominations and of like tenor and aggregate principal amount, shall be issued to the designated transferee or transferees.

As provided in the Indenture and subject to certain limitations therein set forth, Securities of this series and Tranche are exchangeable for a like aggregate principal amount of Securities of the same series and Tranche of any authorized denominations, as requested by the Holder surrendering the same, and of like tenor upon surrender of the Security or Securities to be exchanged at the office or agency of the Company for such purpose.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

The Company shall not be required to execute and the Security Registrar shall not be required to register the transfer of or exchange of (a) Securities of this series during a period of 15 days immediately preceding the date notice is given identifying the serial numbers of the Securities of this series called for redemption or (b) any Security so selected for redemption in whole or in part, except the unredeemed portion of any Security being redeemed in part.

Prior to due presentment of this Security for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Security is registered as the absolute owner hereof for all purposes (subject to Sections 305 and 307 of the Indenture), whether or not this Security be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

The Indenture and this Security shall be governed by and construed in accordance with the laws of the State of New York (including, without limitation, Section 5-1401 of the New York General Obligations Law or any successor to such statute), except to the extent that the Trust Indenture Act shall be applicable and except to the extent that the law of the any other jurisdiction shall mandatorily govern.

As used herein, "Business Day," means any day, other than a Saturday or Sunday, that is not a day on which banking institutions or trust companies in The City of New York, New York, or other city in which a paying agent for this Security is located, are generally authorized or required by law, regulation or executive order to remain closed. All other terms used in this Security that are defined in the Indenture shall have the meanings assigned to them in the Indenture.

As provided in the Indenture, no recourse shall be had for the payment of the principal of or premium, if any, or interest on any Securities, or any part thereof, or for any claim based thereon or otherwise in respect thereof, or of the indebtedness represented thereby, or upon any obligation, covenant or agreement under the Indenture, against, and no personal liability whatsoever shall attach to, or be incurred by, any incorporator, stockholder, member, officer or director, as such, past, present or future of the Company or of any predecessor or successor corporation (either directly or through the Company or a predecessor or successor corporation), whether by virtue of any constitutional provision, statute or rule of law, or by the enforcement of any assessment or penalty or otherwise; it being expressly agreed and understood that the Indenture and all the Securities are solely corporate obligations and that any such personal liability is hereby expressly waived and released as a condition of, and as part of the consideration for, the execution of the Indenture and the issuance of the Securities.

Unless the certificate of authentication hereon has been executed by the Trustee referred to herein by manual signature, this Security shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed.

[please print or typewrite name and address of assignee]

the within Security of LOUISVILLE GAS AND ELECTRIC COMPANY and does hereby irrevocably constitute and appoint _____, Attorney, to transfer said Security on the books of the within-mentioned Company, with full power of substitution in the premises.

Dated: _____

[signature of assignee]

Notice: The signature to this assignment must correspond with the name as written upon the face of the Security in every particular without alteration or enlargement or any change whatsoever.

SIGNATURE GUARANTEE

(Signatures must be guaranteed by an "eligible guarantor institution" meeting the requirements of the Security Registrar, which requirements include membership or participation in the Security Transfer Agent Medallion Program ("STAMP") or such other "signature guarantee program" as may be determined by the Security Registrar in addition to, or in substitution for, STAMP, all in accordance with the Securities Exchange Act of 1934, as amended.)

GLOBAL BOND LEGEND

“THIS IS A GLOBAL BOND HELD BY OR ON BEHALF OF THE DEPOSITARY (AS DEFINED IN THE INDENTURE GOVERNING THIS BOND) OR ITS NOMINEE IN CUSTODY FOR THE BENEFIT OF THE BENEFICIAL OWNERS HEREOF, AND IS NOT TRANSFERABLE TO ANY PERSON UNDER ANY CIRCUMSTANCES EXCEPT THAT (I) THE TRUSTEE MAY MAKE SUCH NOTATIONS HEREON AS MAY BE REQUIRED PURSUANT TO THE INDENTURE, (II) THIS GLOBAL BOND MAY BE TRANSFERRED IN WHOLE BUT NOT IN PART PURSUANT TO SECTION 2(a) OF PART II OF THE OFFICER’S CERTIFICATE ESTABLISHING THIS SERIES OF BONDS UNDER THE INDENTURE AND (III) THIS GLOBAL BOND MAY BE DELIVERED TO THE TRUSTEE FOR CANCELLATION PURSUANT TO SECTION 309 OF THE INDENTURE.”

In addition, if the Depository shall be DTC, each Global Bond shall bear the following legend:

“UNLESS THIS BOND IS PRESENTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY, A NEW YORK CORPORATION (“DTC”), TO THE ISSUER OR ITS AGENT FOR REGISTRATION OF TRANSFER, EXCHANGE, OR PAYMENT, AND ANY BOND ISSUED IS REGISTERED IN THE NAME OF CEDE & CO. OR IN SUCH OTHER NAME AS IS REQUESTED BY AN AUTHORIZED REPRESENTATIVE OF DTC (AND ANY PAYMENT IS MADE TO CEDE & CO. OR TO SUCH OTHER ENTITY AS IS REQUESTED BY AN AUTHORIZED REPRESENTATIVE OF DTC), ANY TRANSFER, PLEDGE OR OTHER USE HEREOF FOR VALUE OR OTHERWISE BY OR TO A PERSON IS WRONGFUL INASMUCH AS THE REGISTERED OWNER HEREOF, CEDE & CO., HAS AN INTEREST HEREIN.”

KENTUCKY UTILITIES COMPANY**OFFICER'S CERTIFICATE**

(under Sections 201 and 301 of the Indenture, dated as of October 1, 2010)

**Establishing the Form and Certain Terms of the
First Mortgage Bonds, 4.65% Series due 2043**

The undersigned Daniel K. Arbough, the Treasurer of KENTUCKY UTILITIES COMPANY (the "Company"), in accordance with Sections 201 and 301 of the Indenture, dated as of October 1, 2010 (the "Original Indenture"), as amended and supplemented by various instruments including Supplemental Indenture No. 3, dated as of November 1, 2013 (as so amended and supplemented, the "Indenture"), of the Company to The Bank of New York Mellon, trustee (the "Trustee"), does hereby establish, for the Securities of Series No. 5, established in Supplemental Indenture No. 3, the terms and characteristics set forth in this Officer's Certificate (capitalized terms used herein and not defined herein having the meanings specified in the Original Indenture).

PART I

Set forth below in this Part I are the terms and characteristics of the aforesaid series of Securities referred to in clauses (a) through (u) in the third paragraph of Section 301 of the Indenture (the lettered clauses set forth herein corresponding to such clauses in said Section 301):

- (a) the title of the Securities of such series shall be "First Mortgage Bonds, 4.65% Series due 2043" (the "Bonds"), and the date of the Bonds shall be November 14, 2013;
 - (b) the aggregate principal amount of Bonds which may be authenticated and delivered under the Indenture shall be limited as and to the extent set forth in Supplemental Indenture No. 3 and any subsequent supplemental indenture relating thereto;
 - (c) interest on the Bonds shall be payable to the Person or Persons in whose names the Bonds are registered at the close of business on the Regular Record Date for such interest, except as otherwise expressly provided in the form of Bond attached hereto and hereby authorized and approved;
 - (d) the principal of the Bonds shall be due and payable on November 15, 2043; and the Company shall not have the right to extend the Maturity of the Bonds as contemplated in Section 301(d) of the Indenture;
 - (e) the Bonds shall bear interest at a fixed rate of 4.65% per annum; interest on the Bonds shall accrue from the date or dates specified in the form of Bond attached hereto as Exhibit A; the Interest Payment Dates for the Bonds shall be May 15 and November 15 of each year, commencing May 15, 2014; the Regular Record Date for the interest payable on any Interest Payment Date with respect to the Bonds shall be the May 1 or November 1 (whether or not a Business Day) immediately preceding such Interest Payment Date; and the Company shall not have any right to extend any interest payment periods for the Bonds as contemplated in Sections 301(e) and 312 of the Indenture;
 - (f) the Corporate Trust Office of the Trustee in New York, New York shall be the office or agency of the Company at which the principal of and any premium and interest on the
-

Bonds at Maturity shall be payable, at which registration of transfers and exchanges of the Bonds may be effected and at which notices and demands to or upon the Company in respect of the Bonds and the Indenture may be served; and the Trustee will initially be the Security Registrar and the Paying Agent for the Bonds; provided, however, that the Company reserves the right to change, by one or more Officer's Certificates, any such office or agency and such agent;

- (g) the Bonds shall be redeemable, in whole or in part, at the option of the Company as and to the extent provided, and at the price or prices set forth, in Exhibit A hereto;
- (h) inapplicable;
- (i) the Bonds shall be issuable in denominations of \$2,000 and integral multiples of \$1,000 in excess thereof;
- (j) inapplicable;
- (k) inapplicable;
- (l) inapplicable;
- (m) inapplicable;
- (n) inapplicable;
- (o) inapplicable;
- (p) the only obligations or instruments which shall be considered Eligible Obligations in respect of the Bonds shall be Government Obligations; and the provisions of Section 901 of the Original Indenture and Section 201 of Supplemental Indenture No. 3 shall apply to the Bonds;
- (q) reference is made to Part II of this Officer's Certificate;
- (r) reference is made to clause (q) above; no service charge shall be made for the registration of transfer or exchange of the Bonds; provided, however, that the Company may require payment of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection with the exchange or transfer;
- (s) inapplicable;
- (t) inapplicable; and
- (u) except as otherwise determined by the proper officers of the Company and established in one or more Officer's Certificates supplemental to this Officer's Certificate, the Bonds shall be substantially in the form of the form of Bond attached hereto as Exhibit A, which form is hereby authorized and approved, and shall have such further terms as are set forth in such form.

PART II

Section 1. Definitions.

For all purposes of this Officer's Certificate, the terms listed below shall have the meanings indicated, unless otherwise expressly provided or unless the context otherwise requires:

"*Certificated Bond*" means a certificated Bond registered in the name of the registered holder thereof, substantially in the form of Exhibit A hereto except that such Bond shall not bear the Global Bond Legend.

"*Custodian*" means the Trustee, in its capacity as custodian for the Depository with respect to the Bonds in global form, or any successor entity thereto.

"*Depository*" means the person designated or acting as a securities depository for the Bonds.

"*DTC*" means The Depository Trust Company.

"*Global Bond*" means a Bond substantially in the form of Exhibit A hereto and bearing the Global Bond Legend.

"*Global Bond Legend*" means the legend as to the global nature of a Bond as set forth in Exhibit B hereto, which is required to be placed on all Global Bonds.

Section 2. Global Bonds.

(a) *General.* The Bonds are initially to be issued and delivered in global, fully registered form, registered in the name of Cede & Co., as nominee for DTC, which is hereby designated as the Depository. Such Global Bonds shall not be transferable, nor shall any purported transfer be registered, except as follows:

(i) Global Bonds may be transferred in whole, and appropriate registration of transfer effected, by the Depository to a nominee thereof, or by any nominee of the Depository to any other nominee thereof, or by the Depository or any nominee thereof to any Depository or any nominee thereof; and

(ii) Global Bonds may be transferred in whole, with appropriate registration of transfer effected and Certificated Bonds issued and delivered, to the beneficial holders of the Global Bonds if:

(A) The Depository shall have notified the Company and the Trustee that (A) it is unwilling or unable to continue to act as securities depository with respect to such bonds or (B) it is no longer a clearing agency registered under the Securities Exchange Act of 1934, as amended, and, in either case, the Trustee shall not have been notified by the Company within one hundred twenty (120) days of the receipt of such notice from the Depository of the identity of a successor Depository; or

(B) the Company shall have delivered to the Trustee a written order to the effect that, on and after a date specified therein, the Bonds are no longer to be held in global form by a Depository (subject to the procedures of the Depository).

In the event of a transfer of Global Bonds as contemplated in clause (ii) above, the Company will execute, and the Trustee, upon receipt of a Company Order for the authentication and delivery of Certificated Bonds and upon surrender of such Global Bonds, will authenticate and deliver, Certificated Bonds in an aggregate principal amount equal to the principal amount of such Global Bonds, such Certificated Bonds to be registered in the names provided by the Depositary.

(b) *Principal Amount of Global Bonds.* Each Global Bond shall represent such of the outstanding Bonds as shall be specified therein, and the aggregate principal amount of outstanding Bonds represented thereby may from time to time be reduced to reflect redemptions thereof. Any notation on a Global Bond to reflect the amount of any decrease in the aggregate principal amount of outstanding Bonds represented thereby resulting from such redemption shall be made by the Trustee or the Custodian, at the direction of the Trustee, in accordance with instructions given by or on behalf of the registered holder thereof and with the applicable procedures of the Depositary.

(c) *Disclaimers.* Neither the Company nor the Trustee shall have any responsibility or obligation to any beneficial owner of a Global Bond, any participant in the Depositary or any other Person with respect to the accuracy of, or for maintaining, supervising or reviewing, the records of the Depositary or its nominee or of any participant therein or member thereof, with respect to any ownership interest in the Global Bonds or with respect to the delivery to any participant, member, beneficial owner or other Person (other than the Depositary) of any notice (including any notice of redemption) or the payment of any amount, on or with respect to such Global Bonds. All notices and communications required to be given to the Holders and all payments on Global Bonds required to be made to Holders shall be given or made only to or upon the order of the registered Holders (which shall be the Depositary or its nominee in the case of a Global Bond). The rights of beneficial owners in any Global Bond shall be exercised only through the Depositary subject to the applicable rules and procedures of the Depositary. The Company and the Trustee may rely conclusively and shall be fully protected in relying upon information furnished by the Depositary with respect to its members, participants and any beneficial owners. The Trustee shall have no obligation or duty to monitor, determine or inquire as to compliance with any restrictions on transfer imposed under the Indenture or under applicable law with respect to any transfer of any interest in any Global Bond (including any transfers between or among Depositary participants, members or beneficial owners in any Global Bond) other than to require delivery of such certificates and other documentation or evidence as are expressly required by, and to do so if and when expressly required by, the terms of the Indenture, and to examine the same to determine substantial compliance as to form with the express requirements hereof.

IN WITNESS WHEREOF, I have executed this Officer's Certificate this 14th day of November, 2013.

[FORM OF BOND]

No.

CUSIP No.

Principal Amount of \$

KENTUCKY UTILITIES COMPANY

FIRST MORTGAGE BOND, 4.65% SERIES DUE 2043

KENTUCKY UTILITIES COMPANY, a corporation duly organized and existing under the laws of the Commonwealths of Kentucky and Virginia (herein referred to as the "Company", which term includes any Successor Corporation under the Indenture referred to below), for value received, hereby promises to pay to

or to its registered assigns, the principal sum of

MILLION (\$) Dollars

on November 15, 2043 (the "Stated Maturity Date"), and to pay interest on said principal sum semi-annually in arrears on May 15 and November 15 of each year (each, an "Interest Payment Date"), at the rate of 4.65% per annum until the principal hereof is paid or made available for payment. The first Interest Payment Date for the Securities of this series shall be May 15, 2014, and interest on the Securities of this series will accrue from and including November 14, 2013, to and excluding the first Interest Payment Date, and thereafter will accrue from and including the last Interest Payment Date to which interest on the Securities of this series has been paid or duly provided for. No interest will accrue on the Securities of this series with respect to the day on which the Securities are paid.

CERTIFICATE OF AUTHENTICATION

This is one of the Securities of the series designated therein referred to in the within-mentioned Indenture.

Date of Authentication:

, as Trustee

By:

Authorized Signatory

A-1

In the event that any Interest Payment Date is not a Business Day, then payment of interest payable on such date will be made on the next succeeding day which is a Business Day (and without any interest or other payment in respect of such delay) with the same force and effect as if made on the Interest Payment Date. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in such Indenture, be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on the May 1 or November 1, whether or not a Business Day (each such date, a "Regular Record Date"), immediately preceding such Interest Payment Date, except that interest payable at Maturity will be payable to the Person to whom principal shall be paid. Any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on a Special Record Date for the payment of such Defaulted Interest to be fixed by the Trustee, notice whereof shall be given to Holders of Securities of this series not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Securities of this series may be listed, and upon such notice as may be required by such exchange, all as more fully provided in the Indenture referred to herein. Interest on this Security will be computed on the basis of a 360-day year of twelve 30-day months.

Payment of the principal of and premium, if any, and interest at Maturity on this Security shall be made upon presentation of this Security at the corporate trust office of The Bank of New York Mellon in New York, New York, or at such other office or agency as may be designated for such purpose by the Company from time to time, in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts, and payment of interest, if any, on this Security (other than interest payable at Maturity) shall be made by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register, provided that if such Person is a securities depository, such payment may be made by such other means in lieu of check as shall be agreed upon by the Company, the Trustee and such Person.

This Security is one of a duly authorized issue of securities of the Company (herein called the "Securities"), issued and issuable in one or more series under an Indenture, dated as of October 1, 2010 (herein called the "Original Indenture" and, together with any amendments or supplements thereto and the Officer's Certificate establishing the terms of the Securities of this series, the "Indenture," which term shall have the meaning assigned to it in the Original Indenture), between the Company and The Bank of New York Mellon, as Trustee (herein called the "Trustee," which term includes any successor trustee under the Indenture), and reference is hereby made to the Indenture, including Supplemental Indenture No. 3 thereto, for a statement of the property mortgaged, pledged and held in trust, the nature and extent of the security, the conditions upon which the lien of the Indenture may be released and the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Securities and of the terms upon which the Securities are, and are to be, authenticated and delivered. The acceptance of this Security by the Holder hereof shall be deemed to constitute the consent and agreement by such Holder to all of the terms and provisions of the Indenture. This Security is one of the series designated on the face hereof.

Prior to May 15, 2043, this Security is subject to redemption at the option of the Company, in whole at any time or in part from time to time, at a redemption price equal to the greater of:

- (a) 100% of the principal amount of this Security to be so redeemed; and
- (b) as determined by the Quotation Agent, the sum of the present values of the remaining scheduled payments of principal and interest on the principal amount of this Security to be so redeemed (not including any portion of such payments of interest accrued to the

date of redemption) discounted to the redemption date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Adjusted Treasury Rate, plus 15 basis points,

plus, in either of the above cases, accrued and unpaid interest to the date of redemption.

Promptly after the calculation thereof, the Company shall give the Trustee written notice of the redemption price for the foregoing redemption. The Trustee shall have no responsibility for any such calculation.

On or after May 15, 2043, this Security is subject to redemption at the option of the Company, in whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of this Security to be so redeemed, plus accrued and unpaid interest to the date of redemption.

As used herein:

“*Adjusted Treasury Rate*” means, with respect to any redemption date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for that redemption date.

“*Comparable Treasury Issue*” means the United States Treasury security selected by the Quotation Agent as having an actual or interpolated maturity comparable to the remaining term to the Stated Maturity Date of this Security that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of this Security.

“*Comparable Treasury Price*” means, with respect to any redemption date:

- a) the average of five Reference Treasury Dealer Quotations for that redemption date, after excluding the highest and lowest Reference Treasury Dealer Quotations, or
- b) if the Quotation Agent obtains fewer than five Reference Treasury Dealer Quotations, the average of all Reference Treasury Dealer Quotations so received.

“*Quotation Agent*” means one of the Reference Treasury Dealers appointed by the Company.

“*Reference Treasury Dealer*” means:

- a) each of BNP Paribas Securities Corp., Citigroup Global Markets Inc. and Goldman Sachs & Co. (or their respective affiliates that are Primary Treasury Dealers, as defined below) and a Primary Treasury Dealer selected by Mitsubishi UFJ Securities (USA), Inc., or their respective successors, unless any of them ceases to be a primary U.S. Government securities dealer in the United States (a “Primary Treasury Dealer”), in which case the Company shall substitute another Primary Treasury Dealer; and

b) any other Primary Treasury Dealer selected by the Company (after consultation with the Quotation Agent).

“*Reference Treasury Dealer Quotations*” means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Quotation Agent, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount), as provided to the Quotation Agent by that Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding such redemption date.

Notice of redemption shall be given by mail to Holders of Securities, not less than 30 days nor more than 60 days prior to the date fixed for redemption, all as provided in the Indenture. As provided in the Indenture, notice of redemption at the election of the Company as aforesaid may state that such redemption shall be conditional upon the receipt by the applicable Paying Agent or Agents of money sufficient to pay the principal of and premium, if any, and interest, on this Security on or prior to the date fixed for such redemption; a notice of redemption so conditioned shall be of no force or effect if such money is not so received and, in such event, the Company shall not be required to redeem this Security.

In the event of redemption of this Security in part only, a new Security or Securities of this series of like tenor representing the unredeemed portion hereof shall be issued in the name of the Holder hereof upon the cancellation hereof.

If an Event of Default with respect to the Securities of this series shall occur and be continuing, the principal of this Security may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture contains provisions for defeasance at any time of the entire indebtedness of this Security upon compliance with certain conditions set forth in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series to be affected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in principal amount of the Securities at the time Outstanding of all series to be affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Securities of all series affected at the time Outstanding, on behalf of the Holders of all Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by the Holder of this Security shall be conclusive and binding upon such Holder and upon all future Holders of this Security and of any Security issued upon the registration of transfer hereof or in exchange hereof or in lieu hereof, whether or not notation of such consent or waiver is made upon this Security.

As provided in and subject to the provisions of the Indenture, the Holder of this Security shall not have the right to institute any proceeding with respect to the Indenture or for the appointment of a receiver or trustee or for any other remedy thereunder, unless (a) such Holder shall have previously given the Trustee written notice of a continuing Event of Default; (b) the Holders of 25% in aggregate principal amount of the Outstanding Securities shall have made written request to the Trustee to institute proceedings in respect of such Event of Default as Trustee and offered the Trustee reasonable indemnity; (c) the Trustee shall not have received from the Holders of a majority in aggregate principal amount of the Outstanding Securities a direction inconsistent with such request; and (d) shall have failed to institute any such proceeding for 60 days after receipt of such notice, request and offer of indemnity. The foregoing

shall not apply to any suit instituted by the Holder of this Security for the enforcement of any payment of principal hereof or any premium or interest hereon on or after the respective due dates expressed herein.

No reference herein to the Indenture and no provision of this Security or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and any premium and interest on this Security at the times, place and rate, and in the coin or currency, herein prescribed.

The Securities of this series are issuable only in registered form without coupons, and in denominations of \$2,000 and integral multiples of \$1,000 in excess thereof.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Security is registrable in the Security Register, upon surrender of this Security for registration of transfer at the office or agency of the Company for such purpose, duly endorsed by, or accompanied by a written instrument or transfer in form satisfactory to the Company and the Trustee duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Securities of this series and Tranche, of authorized denominations and of like tenor and aggregate principal amount, shall be issued to the designated transferee or transferees.

As provided in the Indenture and subject to certain limitations therein set forth, Securities of this series and Tranche are exchangeable for a like aggregate principal amount of Securities of the same series and Tranche of any authorized denominations, as requested by the Holder surrendering the same, and of like tenor upon surrender of the Security or Securities to be exchanged at the office or agency of the Company for such purpose.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

The Company shall not be required to execute and the Security Registrar shall not be required to register the transfer of or exchange of (a) Securities of this series during a period of 15 days immediately preceding the date notice is given identifying the serial numbers of the Securities of this series called for redemption or (b) any Security so selected for redemption in whole or in part, except the unredeemed portion of any Security being redeemed in part.

Prior to due presentment of this Security for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Security is registered as the absolute owner hereof for all purposes (subject to Sections 305 and 307 of the Indenture), whether or not this Security be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

The Indenture and this Security shall be governed by and construed in accordance with the laws of the State of New York (including, without limitation, Section 5-1401 of the New York General Obligations Law or any successor to such statute), except to the extent that the Trust Indenture Act shall be applicable and except to the extent that the law of the any other jurisdiction shall mandatorily govern.

As used herein, "Business Day," means any day, other than a Saturday or Sunday, that is not a day on which banking institutions or trust companies in The City of New York, New York, or other city in which a paying agent for this Security is located, are generally authorized or required by law, regulation or executive order to remain closed. All other terms used in this Security that are defined in the Indenture shall have the meanings assigned to them in the Indenture.

As provided in the Indenture, no recourse shall be had for the payment of the principal of or premium, if any, or interest on any Securities, or any part thereof, or for any claim based thereon or otherwise in respect thereof, or of the indebtedness represented thereby, or upon any obligation, covenant or agreement under the Indenture, against, and no personal liability whatsoever shall attach to, or be incurred by, any incorporator, stockholder, member, officer or director, as such, past, present or future of the Company or of any predecessor or successor corporation (either directly or through the Company or a predecessor or successor corporation), whether by virtue of any constitutional provision, statute or rule of law, or by the enforcement of any assessment or penalty or otherwise; it being expressly agreed and understood that the Indenture and all the Securities are solely corporate obligations and that any such personal liability is hereby expressly waived and released as a condition of, and as part of the consideration for, the execution of the Indenture and the issuance of the Securities.

Unless the certificate of authentication hereon has been executed by the Trustee referred to herein by manual signature, this Security shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed.

Louisville Gas and Electric Company
220 West Main Street
Louisville, Kentucky 40202

Ladies and Gentlemen:

I am Vice President and Deputy General Counsel, Legal and Environmental Affairs of Louisville Gas and Electric Company, a Kentucky corporation (the "Company"). In this capacity, I have acted as counsel to the Company in connection with the issuance and sale of \$250,000,000 in aggregate principal amount of the Company's First Mortgage Bonds, 4.65% Series due 2043 (the "Bonds"). The Bonds are covered by the Registration Statement on Form S-3 (Registration No. 333-180410-01, the "Registration Statement"), filed by the Company with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933 (the "Act"), and related prospectus, dated March 28, 2012, as supplemented by the prospectus supplement dated November 6, 2013, relating to the offer and sale of the Bonds (as so supplemented, the "Prospectus").

The Bonds are being issued under an Indenture, dated as of October 1, 2010, of the Company to The Bank of New York Mellon, as trustee (the "Trustee"), as heretofore amended and supplemented and as further supplemented by Supplemental Indenture No. 3 (the "Supplemental Indenture"), dated as of November 1, 2013, providing for the Bonds (such Indenture, as so supplemented, being referred to herein as the "Indenture"). The Bonds are being sold pursuant to the Underwriting Agreement, dated November 6, 2013 (the "Underwriting Agreement"), among the Company and Citigroup Global Markets Inc., RBS Securities Inc., SunTrust Robinson Humphrey, Inc. and U.S. Bancorp Investments, Inc., as representatives of the several underwriters named therein.

In connection with such issuance and sale, I, or Company attorneys under my supervision, have examined:

- (a) The Indenture, including the Supplemental Indenture and the Officer's Certificate pursuant to Section 301 of the Indenture, establishing certain terms of the Bonds;
 - (b) The Bonds;
-

- (c) The Amended and Restated Articles of Incorporation and the Bylaws of the Company, in each case as in effect on the date hereof;
- (d) The resolutions of the Board of Directors of the Company, adopted by unanimous written consent, dated March 28, 2012 and June 5, 2012;
- (e) The steps and proceedings in connection with the authorization of the Indenture, the Supplemental Indenture and the Bonds;
- (f) The Underwriting Agreement;
- (g) The Order of the Public Service Commission of Kentucky dated August 3, 2012, in connection with the issuance of the Bonds; and
- (h) The Registration Statement and the Prospectus.

In such examination, I have assumed the accuracy and completeness of all agreements, documents, records, certificates and other materials submitted to me, the conformity with the originals of all such materials submitted to me as copies (whether or not certified and including facsimiles), the authenticity of the originals of such materials and all materials submitted to me as originals, the genuineness of all signatures and the legal capacity of all natural persons.

Based upon such examination and representations made to me by Company attorneys under my supervision, upon my familiarity with the Company, and upon an examination of such other documents and questions of law as I have deemed appropriate for purposes of this opinion, I am of the opinion that the Bonds have been duly authorized by the Company and that, when the Bonds have been executed and delivered by the Company and authenticated and delivered by the Trustee in the manner provided for in the Indenture, and have been delivered against payment therefor as contemplated in the Underwriting Agreement, the Bonds will be valid and binding obligations of the Company, except to the extent limited by bankruptcy, insolvency, fraudulent conveyance, reorganization or moratorium laws or by other laws now or hereafter in effect relating to or affecting the enforcement of mortgagees' and other creditors' rights and by general equitable principles (regardless of whether considered in a proceeding in equity or at law), an implied covenant of good faith and fair dealing and consideration of public policy, and federal or state security law limitations on indemnification and contribution.

The opinions expressed herein are limited to the laws of the Commonwealth of Kentucky. Insofar as the opinions set forth in this letter relate to or are dependent upon matters governed by the laws of the State of New York, I have relied exclusively upon the opinion of even date herewith of Pillsbury Winthrop Shaw Pittman LLP, special counsel for the Company. In rendering its opinion to you of even date herewith, Pillsbury Winthrop Shaw Pittman LLP may rely as to matters of Kentucky law addressed or encompassed herein upon this letter as if it were addressed directly to it.

I express no opinion as to matters of compliance with the “blue sky” laws or similar laws relating to the sale or distribution of the Bonds by any underwriters or agents.

I hereby consent to the filing of this opinion letter as Exhibit 5(a) to the Company’s Current Report on Form 8-K to be filed by the Company with the Commission and the incorporation thereof by reference into the Registration Statement and to the use of my name under the caption “Validity of the Bonds” in the Prospectus. In giving this consent, I do not thereby admit that I am within the category of persons whose consent is required under Section 7 of the Act or the rules and regulations of the Commission promulgated thereunder.

Very truly yours,

/s/ Dorothy E. O’Brien

Kentucky Utilities Company
One Quality Street
Lexington, Kentucky 40507

Ladies and Gentlemen:

I am Vice President and Deputy General Counsel, Legal and Environmental Affairs of Kentucky Utilities Company, a Kentucky and Virginia corporation (the "Company"). In this capacity, I have acted as counsel to the Company in connection with the issuance and sale of \$250,000,000 in aggregate principal amount of the Company's First Mortgage Bonds, 4.65% Series due 2043 (the "Bonds"). The Bonds are covered by the Registration Statement on Form S-3 (Registration No. 333-180410-02, the "Registration Statement"), filed by the Company with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933 (the "Act"), and related prospectus, dated March 28, 2012, as supplemented by the prospectus supplement dated November 6, 2013, relating to the offer and sale of the Bonds (as so supplemented, the "Prospectus").

The Bonds are being issued under an Indenture, dated as of October 1, 2010, of the Company to The Bank of New York Mellon, as trustee (the "Trustee"), as heretofore amended and supplemented and as further supplemented by Supplemental Indenture No. 3 (the "Supplemental Indenture"), dated as of November 1, 2013, providing for the Bonds (such Indenture, as so supplemented, being referred to herein as the "Indenture"). The Bonds are being sold pursuant to the Underwriting Agreement, dated November 6, 2013 (the "Underwriting Agreement"), among the Company and BNP Paribas Securities Corp., Citigroup Global Markets Inc., Goldman, Sachs & Co., and Mitsubishi UFJ Securities (USA) Inc., as representatives of the several underwriters named therein.

In connection with such issuance and sale, I, or Company attorneys under my supervision, have examined:

- (a) The Indenture, including the Supplemental Indenture and the Officer's Certificate pursuant to Section 301 of the Indenture, establishing certain terms of the Bonds;
 - (b) The Bonds;
-

- (c) The Amended and Restated Articles of Incorporation and the Bylaws of the Company, in each case as in effect on the date hereof;
- (d) The resolutions of the Board of Directors of the Company, adopted by unanimous written consent, dated March 28, 2012 and June 5, 2012;
- (e) The steps and proceedings in connection with the authorization of the Indenture, the Supplemental Indenture and the Bonds;
- (f) The Underwriting Agreement;
- (g) The Orders of the Public Service Commission of Kentucky dated August 3, 2012, the State Corporation Commission of Virginia dated July 27, 2012 and the Amended Order of Tennessee Regulatory Authority dated September 27, 2012, in connection with the issuance of the Bonds; and
- (h) The Registration Statement and the Prospectus.

In such examination, I have assumed the accuracy and completeness of all agreements, documents, records, certificates and other materials submitted to me, the conformity with the originals of all such materials submitted to me as copies (whether or not certified and including facsimiles), the authenticity of the originals of such materials and all materials submitted to me as originals, the genuineness of all signatures and the legal capacity of all natural persons.

Based upon such examination and representations made to me by Company attorneys under my supervision, upon my familiarity with the Company, and upon an examination of such other documents and questions of law as I have deemed appropriate for purposes of this opinion, I am of the opinion that the Bonds have been duly authorized by the Company and that, when the Bonds have been executed and delivered by the Company and authenticated and delivered by the Trustee in the manner provided for in the Indenture, and have been delivered against payment therefor as contemplated in the Underwriting Agreement, the Bonds will be valid and binding obligations of the Company, except to the extent limited by bankruptcy, insolvency, fraudulent conveyance, reorganization or moratorium laws or by other laws now or hereafter in effect relating to or affecting the enforcement of mortgagees' and other creditors' rights and by general equitable principles (regardless of whether considered in a proceeding in equity or at law), an implied covenant of good faith and fair dealing and consideration of public policy, and federal or state security law limitations on indemnification and contribution.

The opinions expressed herein are limited to the laws of the Commonwealth of Kentucky. Insofar as the opinions set forth in this letter relate to or are dependent upon matters governed by the laws of the Commonwealth of Virginia and the State of Tennessee, I have relied exclusively on the opinion of even date herewith of Stoll Keenon Ogden PLLC, special Kentucky counsel of the Company. Insofar as the opinions set forth in this letter relate to or are dependent upon matters governed by the laws of the State of New York, I have relied exclusively

upon the opinion of even date herewith of Pillsbury Winthrop Shaw Pittman LLP, special counsel for the Company. In rendering their opinions to you of even date herewith, Pillsbury Winthrop Shaw Pittman LLP and Stoll Keenon Ogden PLLC may rely as to matters of Kentucky law addressed or encompassed herein upon this letter as if it were addressed directly to them.

I express no opinion as to matters of compliance with the “blue sky” laws or similar laws relating to the sale or distribution of the Bonds by any underwriters or agents.

I hereby consent to the filing of this opinion letter as Exhibit 5(b) to the Company’s Current Report on Form 8-K to be filed by the Company with the Commission and the incorporation thereof by reference into the Registration Statement and to the use of my name under the caption “Validity of the Bonds” in the Prospectus. In giving this consent, I do not thereby admit that I am within the category of persons whose consent is required under Section 7 of the Act or the rules and regulations of the Commission promulgated thereunder.

Very truly yours,

/s/ Dorothy E. O’Brien

November 14, 2012

Louisville Gas and Electric Company
220 West Main Street
Louisville, Kentucky 40202

Ladies and Gentlemen:

We have acted as special counsel to Louisville Gas and Electric Company (the "Company") in connection with the issuance and sale by the Company of \$250,000,000 in aggregate principal amount of its First Mortgage Bonds, 4.65% Series due 2043 (the "Bonds"). The Bonds are covered by the Registration Statement on Form S-3 (Registration No. 333-180410-01, the "Registration Statement"), filed by the Company with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933 (the "Act"), and related prospectus, dated March 28, 2012, as supplemented by the prospectus supplement dated November 6, 2013 relating to the offer and sale of the Bonds (as so supplemented, the "Prospectus").

The Bonds are being issued under an Indenture, dated as of October 1, 2010, of the Company to The Bank of New York Mellon, as trustee (the "Trustee"), as heretofore amended and supplemented and as further supplemented by Supplemental Indenture No. 3 thereto, (the "Supplemental Indenture"), dated as of November 1, 2013, providing for the Bonds (such Indenture, as so supplemented, being referred to herein as the "Indenture"). The Bonds are being sold pursuant to the Underwriting Agreement, dated November 6, 2013 (the "Underwriting Agreement"), among the Company and Citigroup Global Markets Inc., RBS Securities Inc., Inc., SunTrust Robinson Humphrey, Inc. and U.S. Bancorp Investments, Inc., as representatives of the several underwriters named therein.

We have reviewed and are familiar with the Registration Statement, the Prospectus, the Indenture (including the Supplemental Indenture and the Officer's Certificate pursuant to Section 301 of the Indenture, establishing certain terms of the Bonds, and the form of Bond), the Underwriting Agreement and such other documents, corporate proceedings and other matters as we have considered relevant or necessary as a basis for the opinions in this letter. In such review, we have assumed the accuracy and completeness of all agreements, documents, records, certificates and other materials submitted to us, the conformity with the originals of all such materials submitted to us as copies (whether or not certified and including facsimiles), the authenticity of the originals of such materials and all materials submitted to us as originals, the genuineness of all signatures and the legal capacity of all natural persons. We understand that the Registration Statement has become effective under the Act and we assume that such effectiveness has not been terminated or rescinded.

On the basis of the assumptions and subject to the qualifications and limitations set forth herein, we are of the opinion that, when the Bonds have been executed and delivered by the Company and authenticated and delivered by the Trustee in the manner provided for in the Indenture, and have been delivered against payment therefor as contemplated in the Underwriting Agreement, the Bonds will be valid and legally binding obligations of the Company, except as may be subject to and limited by the effect of (a) applicable bankruptcy, insolvency, fraudulent conveyance and transfer, receivership, conservatorship, arrangement, reorganization, moratorium and other similar laws affecting or relating to the rights of creditors and mortgagees generally, (b) general equitable principles (whether considered in a proceeding in equity or at law), and (c) requirements of reasonableness, good faith, materiality and fair dealing and the discretion of the court before which any matter may be brought.

We express no opinion herein as to titles to property, franchises, or the validity and priority of the lien purported to be created by the Indenture or the security provided thereby, or any recordation, filing or perfection of such lien, the Indenture or any related financing statements.

Our opinions set forth in this letter are limited to the law of the State of New York, as in effect on the date hereof. Insofar as the opinions set forth in this letter relate to or are dependent upon matters governed by the law of the Commonwealth of Kentucky, we have relied exclusively upon the opinions expressed or otherwise encompassed in the letter of even date herewith addressed to you by Dorothy E. O'Brien, Vice President and Deputy General Counsel, Legal and Environmental Affairs, of the Company, subject to the assumptions, limitations and qualifications set forth therein. In rendering her opinion to you, Ms. O'Brien may rely as to matters of New York law addressed herein upon this letter as if it were addressed directly to her.

We hereby consent to the filing of this opinion letter as Exhibit 5(c) to the Company's Current Report on Form 8-K to be filed by the Company with the Commission and the incorporation thereof by reference into the Registration Statement and to the use of our name under the caption "Validity of the Bonds" in the Prospectus. In giving this consent, we do not thereby admit that we are within the category of persons whose consent is required under Section 7 of the Act or the rules and regulations of the Commission promulgated thereunder.

Very truly yours,

/s/ Pillsbury Winthrop Shaw Pittman LLP

[LETTERHEAD OF STOLL KEENON OGDEN PLLC]

November 14, 2013

Kentucky Utilities Company
One Quality Street
Lexington, Kentucky 40507

Ladies and Gentlemen:

We are acting as special counsel to Kentucky Utilities Company (the “**Company**”) in connection with the issuance and sale by the Company of \$250,000,000 of the Company’s 4.65% First Mortgage Bonds due 2043 (the “**Bonds**”). The Bonds are covered by the Registration Statement on Form S-3 (Registration No. 333-18410-02)(the “**Registration Statement**”) filed by the Company with the Securities and Exchange Commission (the “**SEC**”) under the Securities Act of 1933, as amended (the “**Securities Act**”), the Bonds and related prospectus, dated March 28, 2012, as supplemented by the prospectus supplement dated November 6, 2013 relating to the offer and sale of the Bonds (as so supplemented, the “**Prospectus**”). The Bonds are being issued under the Company’s Indenture dated as of October 1, 2010, as supplemented (the “**Indenture**”), to The Bank of New York Mellon, as Trustee.

We have reviewed the Indenture, an Officer’s Certificate of the Company dated November 12, 2013, pursuant to Sections 201 and 301 of the Indenture, establishing the terms and characteristics of the Bonds, and the records of various corporate and other actions taken by the Company in connection with the issuance of the Bonds. As to various questions of fact relevant to the opinions set forth below, we have relied upon certificates and other oral and written assurances of public officials and officers or other employees of the Company, its subsidiaries and its affiliates. In addition, we have reviewed such other documents and satisfied ourselves as to such other matters as we have deemed appropriate in order to render this opinion. We understand the Registration Statement has become effective under the Securities Act and we assume that at the time of issuance of the Bonds, such effectiveness shall not have been terminated or rescinded and that there shall not have been any change in law or any authorization affecting the legality or validity of the Bonds.

Based on the foregoing and, to the extent indicated below, in reliance upon the opinion of other counsel hereinafter mentioned, we are of the opinion that the Bonds, when issued and delivered by the Company and authenticated by the Trustee in accordance with the Indenture and as contemplated in the Registration Statement, will be legally issued and binding obligations of the Company.

Our opinion as to the legal and binding nature of the Company’s obligations is subject to laws relating to or affecting generally the enforcement of creditors’ and mortgagees’ rights, including, without limitation, bankruptcy, insolvency or reorganization laws and general principles of

equity and by requirements of reasonableness, good faith and fair dealing. We express no opinion with respect to the lien of the Indenture.

This opinion is limited to the law of the Commonwealths of Kentucky and Virginia and the State of Tennessee. We express no opinion whatsoever as to the securities laws of any jurisdiction, including the federal securities laws. Insofar as the opinions set forth herein are dependent upon or affected by matters governed by the laws of the State of New York, we have relied upon the opinion of even date herewith of Pillsbury Winthrop Shaw, Pittman LLP. In rendering their opinions to you of even date herewith, Pillsbury Winthrop Shaw, Pittman LLP and Dorothy O'Brien may rely as to matters governed by the law of the Commonwealths of Kentucky and Virginia and the State of Tennessee upon this letter as if it were addressed directly to them.

We hereby authorize and consent to the use of this opinion as Exhibit 5(e) to the Company's Current Report on Form 8-K to be filed by the Company with the Commission and the incorporation thereof by reference into the Registration Statement and to the use of our name under the caption "Validity of the Bonds" in the Prospectus. In giving this consent, we do not hereby concede that we come within the category of persons whose consent is required under Section 7 of the Securities Act or the rules and regulations of the SEC thereunder.

Very truly yours,

STOLL KEENON OGDEN PLLC

/s/ Anthony Schnell

FORM 10-K ANNUAL REPORT TO
THE SECURITIES AND EXCHANGE COMMISSION
FOR THE YEAR ENDED DECEMBER 31, 2013

TABLE OF CONTENTS

This combined Form 10-K is separately filed by the following Registrants in their individual capacity: PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf and no Registrant makes any representation as to information relating to any other Registrant, except that information under "Forward-Looking Information" relating to subsidiaries of PPL Corporation is also attributed to PPL Corporation and information relating to the subsidiaries of LG&E and KU Energy LLC is also attributed to LG&E and KU Energy LLC.

Unless otherwise specified, references in this Report, individually, to PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company are references to such entities directly or to one or more of their subsidiaries, as the case may be, the financial results of which subsidiaries are consolidated into such Registrants' financial statements in accordance with GAAP. This presentation has been applied where identification of particular subsidiaries is not material to the matter being disclosed, and to conform narrative disclosures to the presentation of financial information on a consolidated basis.

GLOSSARY OF TERMS AND ABBREVIATIONS

PPL Corporation and its subsidiaries

Central Networks - collectively Central Networks East plc, Central Networks Limited and certain other related assets and liabilities. On April 1, 2011, PPL WEM Holdings plc purchased all of the outstanding ordinary share capital of these companies from E.ON AG subsidiaries. Central Networks West plc (subsequently renamed Western Power Distribution (West Midlands) plc), wholly owned by Central Networks Limited (subsequently renamed WPD Midlands Holdings Limited), and Central Networks East plc (subsequently renamed Western Power Distribution (East Midlands) plc) are British regional electricity distribution utility companies.

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE - LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides services to LKE and its subsidiaries.

PPL - PPL Corporation, the parent holding company of PPL Electric, PPL Energy Funding, PPL Capital Funding, LKE and other subsidiaries.

PPL Brunner Island - PPL Brunner Island, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Capital Funding - PPL Capital Funding, Inc., a financing subsidiary of PPL that provides financing for the operations of PPL and certain subsidiaries. Debt issued by PPL Capital Funding is guaranteed as to payment by PPL.

PPL Electric - PPL Electric Utilities Corporation, a public utility subsidiary of PPL engaged in the regulated transmission and distribution of electricity in its Pennsylvania service area and that provides electricity supply to its retail customers as a PLR.

PPL Energy Funding - PPL Energy Funding Corporation, a subsidiary of PPL and the parent holding company of PPL Energy Supply, PPL Global and other subsidiaries.

PPL EnergyPlus - PPL EnergyPlus, LLC, a subsidiary of PPL Energy Supply that markets and trades wholesale and retail electricity and gas, and supplies energy and energy services in competitive markets.

PPL Energy Supply - PPL Energy Supply, LLC, a subsidiary of PPL Energy Funding and the parent company of PPL Generation, PPL EnergyPlus and other subsidiaries. In January 2011, PPL Energy Supply distributed its membership interest in PPL Global, representing 100% of the outstanding membership interests of PPL Global, to PPL Energy Supply's parent, PPL Energy Funding.

PPL Generation - PPL Generation, LLC, a subsidiary of PPL Energy Supply that owns and operates U.S. generating facilities through various subsidiaries.

PPL Global - PPL Global, LLC, a subsidiary of PPL Energy Funding that primarily through its subsidiaries, owns and operates WPD, PPL's regulated electricity distribution businesses in the U.K. In January 2011, PPL Energy Supply, PPL Global's former parent, distributed its membership interest in PPL Global, representing 100% of the outstanding membership interest of PPL Global, to its parent, PPL Energy Funding.

PPL Holtwood - PPL Holtwood, LLC, a subsidiary of PPL Generation that owns hydroelectric generating operations in Pennsylvania.

PPL Ironwood - PPL Ironwood LLC, an indirect subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Montana - PPL Montana, LLC, an indirect subsidiary of PPL Generation that generates electricity for wholesale sales in Montana and the Pacific Northwest.

PPL Montour - PPL Montour, LLC, a subsidiary of PPL Generation that owns generating operations in Pennsylvania.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides services to PPL and its subsidiaries.

PPL Susquehanna - PPL Susquehanna, LLC, a subsidiary of PPL Generation that owns a nuclear-powered generating station.

PPL WEM - PPL WEM Holdings Limited (formerly PPL WEM Holdings plc), an indirect U.K. subsidiary of PPL Global. PPL WEM indirectly owns both WPD (East Midlands) and WPD (West Midlands).

PPL WW - PPL WW Holdings Limited, an indirect U.K. subsidiary of PPL Global. PPL WW Holdings indirectly owns WPD (South Wales) and WPD (South West).

Registrant(s) - refers to the Registrants named on the cover of this Report (each a "Registrant" and collectively, the "Registrants").

Subsidiary Registrant(s) - Registrants that are direct or indirect wholly owned subsidiaries of PPL: PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

WPD - refers to PPL WW and PPL WEM and their subsidiaries.

WPD (East Midlands) - Western Power Distribution (East Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks East plc) was acquired and renamed in April 2011.

WPD Midlands - refers to WPD (East Midlands) and WPD (West Midlands), collectively.

WPD (South Wales) - Western Power Distribution (South Wales) plc, a British regional electricity distribution utility company.

WPD (South West) - Western Power Distribution (South West) plc, a British regional electricity distribution utility company.

WPD (West Midlands) - Western Power Distribution (West Midlands) plc, a British regional electricity distribution utility company. The company (formerly Central Networks West plc) was acquired and renamed in April 2011.

WKE - Western Kentucky Energy Corp., a subsidiary of LKE that leased certain non-utility generating plants in western Kentucky until July 2009.

Other terms and abbreviations

£ - British pound sterling.

1945 First Mortgage Bond - PPL Electric's Mortgage and Deed of Trust, dated as of October 1, 1945, to Deutsche Bank Trust Company Americas, as trustee, as supplemented.

2001 Mortgage Indenture - PPL Electric's Indenture, dated as of August 1, 2001, to The Bank of New York Mellon (as successor to JPMorgan Chase Bank), as trustee, as supplemented.

2010 Equity Unit(s) - a PPL equity unit, issued in June 2010, consisting of a 2010 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in \$1,000 principal amount of PPL Capital Funding 4.625% Junior Subordinated Notes due 2018.

2010 Purchases Contract(s) - a contract that is a component of a 2010 Equity Unit requiring holders to purchase shares of PPL common stock on or prior to July 1, 2013.

2011 Bridge Facility - the £3.6 billion Senior Bridge Term Loan Credit Agreement between PPL Capital Funding and PPL WEM, as borrowers, and PPL, as guarantor, and lenders party thereto, used to fund the April 1, 2011 acquisition of Central Networks, as amended by Amendment No. 1 thereto dated April 15, 2011.

2011 Equity Unit(s) - a PPL equity unit, issued in April 2011, consisting of a 2011 Purchase Contract and, initially, a 5.0% undivided beneficial ownership interest in \$1,000 principal amount of PPL Capital Funding 4.32% Junior Subordinated Notes due 2019.

2011 Purchase Contract(s) - a contract that is a component of a 2011 Equity Unit that requires holders to purchase shares of PPL common stock on or prior to May 1, 2014.

401(h) account - A sub-account established within a qualified pension trust to provide for the payment of retiree medical costs.

Act 11 - Act 11 of 2012 that became effective on April 16, 2012. The Pennsylvania legislation authorizes the PUC to approve two specific ratemaking mechanisms: the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, a DSIC.

Act 129 - Act 129 of 2008 that became effective in October 2008. The law amends the Pennsylvania Public Utility Code and creates an energy efficiency and conservation program and smart metering technology requirements, adopts new PLR electricity supply procurement rules, provides remedies for market misconduct and changes to the AEPS.

AEPS - Alternative Energy Portfolio Standard.

AFUDC - Allowance for Funds Used During Construction, the cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

AOCI - accumulated other comprehensive income or loss.

ARO - asset retirement obligation.

Baseload generation - includes the output provided by PPL's nuclear, coal, hydroelectric and qualifying facilities.

Basis - when used in the context of derivatives and commodity trading, the commodity price differential between two locations, products or time periods.

Bcf - billion cubic feet.

Black Lung Trust - a trust account maintained under federal and state Black Lung legislation for the payment of claims related to disability or death due to pneumoconiosis.

BREC - Big Rivers Electric Corporation, a power-generating rural electric cooperative in western Kentucky.

Cane Run Unit 7 - a natural gas combined-cycle unit under construction in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional electric generating capacity of 640 MW (141 MW and 499 MW to LG&E and KU) in 2015.

CAIR - the EPA's Clean Air Interstate Rule.

CCR - Coal Combustion Residuals. CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

COLA - license application for a combined construction permit and operating license from the NRC for a nuclear plant.

CPCN - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facility for furnishing of utility service to the public.

CSAPR - Cross-State Air Pollution Rule.

Customer Choice Act - the Pennsylvania Electricity Generation Customer Choice and Competition Act, legislation enacted to restructure the state's electric utility industry to create retail access to a competitive market for generation of electricity.

DDCP - Directors Deferred Compensation Plan.

Depreciation not normalized - the flow-through income tax impact related to the state regulatory treatment of depreciation-related timing differences.

DNO - Distribution Network Operator.

Dodd-Frank Act - the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DOE - Department of Energy, a U.S. government agency.

DPCR4 - Distribution Price Control Review 4, the U.K. 5-year rate review period applicable to WPD that commenced April 1, 2005.

DPCR5 - Distribution Price Control Review 5, the U.K. 5-year rate review period applicable to WPD that commenced April 1, 2010.

DRIP - Dividend Reinvestment and Direct Stock Purchase Plan.

DSIC - the Distribution System Improvement Charge authorized under Act 11, which is an alternative ratemaking mechanism providing more-timely cost recovery of qualifying distribution system capital expenditures.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of costs and revenues lost by implementing DSM programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

DUoS - Distribution Use of System. This forms the majority of WPD's revenues and is the charge to electricity suppliers who are WPD's customers and use WPD's network to distribute electricity.

EBPB - Employee Benefit Plan Board. The administrator of PPL's U.S. qualified retirement plans, which is charged with the fiduciary responsibility to oversee and manage those plans and the investments associated with those plans.

Economic Stimulus Package - The American Recovery and Reinvestment Act of 2009, generally referred to as the federal economic stimulus package, which was signed into law in February 2009.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and by-products from the production of energy from coal.

EEL - Electric Energy, Inc., owns and operates a coal-fired plant and a natural gas facility in southern Illinois. KU's 20% ownership interest in EEL is accounted for as an equity method investment.

E.ON AG - a German corporation and the parent of E.ON UK plc, the former parent of Central Networks, and the indirect parent of E.ON US Investments Corp., the former parent of LKE.

EPA - Environmental Protection Agency, a U.S. government agency.

EPS - earnings per share.

Equity Units - refers collectively to the 2011 and 2010 Equity Units.

ESOP - Employee Stock Ownership Plan.

EWG - exempt wholesale generator.

E.W. Brown - a generating station in Kentucky with capacity of 1,594 MW.

FERC - Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch - Fitch, Inc., a credit rating agency.

FTR(s) - financial transmission rights, which are financial instruments established to manage price risk related to electricity transmission congestion that entitle the holder to receive compensation or require the holder to remit payment for certain congestion-related transmission charges based on the level of congestion between two pricing locations, known as source and sink.

Fundamental Change - as it relates to the terms of the 2011 and 2010 Equity Units, will be deemed to have occurred if any of the following occurs with respect to PPL, subject to certain exceptions: (i) a change of control; (ii) a consolidation with or merger into any other entity; (iii) the common stock ceases to be listed or quoted; or (iv) a liquidation, dissolution or termination.

GAAP - Generally Accepted Accounting Principles in the U.S.

GBP - British pound sterling.

GHG - greenhouse gas(es).

GLT - Gas Line Tracker. The KPSC approved LG&E's recovery of costs associated with gas service lines, gas risers, leak mitigation, and gas main replacements. Rate recovery became effective January 1, 2013.

Green River Unit 5 - a natural gas combined-cycle unit proposed to be built in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional electric generating capacity of 700MW (280 MW and 420 MW to LG&E and KU) in 2018.

GWh - gigawatt-hour, one million kilowatt-hours.

HMRC - Her Majesty's Revenue & Customs. The tax authority in the U.K., formerly known as Inland Revenue.

IBEW - International Brotherhood of Electrical Workers.

ICP - Incentive Compensation Plan.

ICPKE - Incentive Compensation Plan for Key Employees.

If-Converted Method - A method applied to calculate diluted EPS for a company with outstanding convertible debt. The method is applied as follows: Interest charges (after-tax) applicable to the convertible debt are added back to net income and the convertible debt is assumed to have been converted to equity at the beginning of the period, and the resulting common shares are treated as outstanding shares. Both adjustments are made only for purposes of calculating diluted EPS. This method was applied in 2013 to PPL's Equity Units prior to settlement.

Intermediate and peaking generation - includes the output provided by PPL's oil- and natural gas-fired units.

Ironwood Acquisition - In April 2012, PPL Ironwood Holdings, LLC, an indirect, wholly owned subsidiary of PPL Energy Supply, completed the acquisition from a subsidiary of The AES Corporation of all of the equity interests of AES Ironwood, L.L.C. (subsequently renamed PPL Ironwood, LLC) and AES Prescott, L.L.C. (subsequently renamed PPL Prescott, LLC), which together own and operate, a natural gas combined-cycle unit in Lebanon, Pennsylvania.

Ironwood Facility - a natural gas combined-cycle unit in Lebanon, Pennsylvania with a summer rating of 662 MW.

IRS - Internal Revenue Service, a U.S. government agency.

ISO - Independent System Operator.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

KU 2010 Mortgage Indenture - KU's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as supplemented.

kV - Kilovolt.

kVA - kilovolt ampere.

kWh - kilowatt-hour, basic unit of electrical energy.

LCIDA - Lehigh County Industrial Development Authority.

LG&E 2010 Mortgage Indenture - LG&E's indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as supplemented.

LIBOR - London Interbank Offered Rate.

LTIP - Long Term Infrastructure Improvement Plan.

MATS - Mercury and Air Toxics Standards.

MDEQ - Montana Department of Environmental Quality.

MEIC - Montana Environmental Information Center.

MMBtu - One million British Thermal Units.

Montana Power - The Montana Power Company, a Montana-based company that sold its generating assets to PPL Montana in December 1999. Through a series of transactions consummated during the first quarter of 2002, Montana Power sold its electricity delivery business to NorthWestern.

Moody's - Moody's Investors Service, Inc., a credit rating agency.

MW - megawatt, one thousand kilowatts.

MWh - megawatt-hour, one thousand kilowatt-hours.

NDT - PPL Susquehanna's nuclear plant decommissioning trust.

NERC - North American Electric Reliability Corporation.

NGCC - Natural gas-fired combined-cycle turbine.

NorthWestern - NorthWestern Corporation, a Delaware corporation, and successor in interest to Montana Power's electricity delivery business, including Montana Power's rights and obligations under contracts with PPL Montana.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

NRC - Nuclear Regulatory Commission, the U.S. federal agency that regulates nuclear power facilities.

NUGs - non-utility generators, generating plants not owned by public utilities, whose electrical output must be purchased by utilities under the PURPA if the plant meets certain criteria.

OCI - other comprehensive income or loss.

Ofgem - Office of Gas and Electricity Markets, the British agency that regulates transmission, distribution and wholesale sales of electricity and related matters.

Opacity - the degree to which emissions reduce the transmission of light and obscure the view of an object in the background. There are emission regulations that limit the opacity of power plant stack gas emissions.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined summer rating capacities of 2,120 MW.

PADEP - the Pennsylvania Department of Environmental Protection, a state government agency.

PEDFA - Pennsylvania Economic Development Financing Authority.

PJM - PJM Interconnection, L.L.C., operator of the electricity transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PLR - Provider of Last Resort, the role of PPL Electric in providing default electricity supply within its delivery area to retail customers who have not chosen to select an alternative electricity supplier under the Customer Choice Act.

PP&E - property, plant and equipment.

PUC - Pennsylvania Public Utility Commission, the state agency that regulates certain ratemaking, services, accounting and operations of Pennsylvania utilities.

Purchase Contract(s) - refers collectively to the 2010 and 2011 Purchase Contracts, which are components of the 2010 and 2011 Equity Units.

PURPA - Public Utility Regulatory Policies Act of 1978, legislation passed by the U.S. Congress to encourage energy conservation, efficient use of resources and equitable rates.

PURTA - The Pennsylvania Public Utility Realty Tax Act.

RAV - regulatory asset value. This term, used within the U.K. regulatory environment, is also commonly known as RAB or regulatory asset base. RAV is based on historical investment costs at time of privatization, plus subsequent allowed additions less annual regulatory depreciation, and represents the value on which DNOs earn a return in accordance with the regulatory cost of capital. RAV is indexed to Retail Price Index in order to allow for the effects of inflation. Since the beginning of DPCR5 in April 2010, RAV additions have been based on a percentage of annual total expenditures.

RECs - renewable energy credits.

Regional Transmission Line Expansion Plan - PJM conducts a long-range Regional Transmission Expansion Planning process that identifies changes and additions to the grid necessary to ensure future needs are met for both the reliability and the economic performance of the grid. Under PJM agreements, transmission owners are obligated to build transmission projects assigned to them by the PJM Board.

Regulation S-X - SEC regulation governing the form and content of and requirements for financial statements required to be filed pursuant to the federal securities laws.

RFC - ReliabilityFirst Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

RIIO-ED1 - RIIO represents "Revenues = Incentive + Innovation + Outputs - Electricity Distribution." RIIO-ED1 refers to the initial eight-year rate review period applicable to WPD commencing April 1, 2015.

RMC - Risk Management Committee.

RTO - Regional Transmission Organization.

S&P - Standard & Poor's Ratings Services, a credit rating agency.

Sarbanes-Oxley - Sarbanes-Oxley Act of 2002, which sets requirements for management's assessment of internal controls for financial reporting. It also requires an independent auditor to make its own assessment.

SCR - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases.

Scrubber - an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SERC - SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

SIFMA Index - the Securities Industry and Financial Markets Association Municipal Swap Index.

SIP - PPL Corporation's 2012 Stock Incentive Plan.

Smart meter - an electric meter that utilizes smart metering technology.

Smart metering technology - technology that can measure, among other things, time of electricity consumption to permit offering rate incentives for usage during lower cost or demand intervals. The use of this technology also has the potential to strengthen network reliability.

SMGT - Southern Montana Electric Generation & Transmission Cooperative, Inc., a Montana cooperative and purchaser of electricity under a long-term supply contract with PPL EnergyPlus that was terminated effective April 1, 2012.

SNCR - selective non-catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gases using ammonia.

Spark Spread - a measure of gross margin representing the price of power on a per MWh basis less the equivalent measure of the natural gas cost to produce that power. This measure is used to describe the gross margin of PPL and its subsidiaries' competitive natural gas-fired generating fleet. This term is also used to describe a derivative contract in which PPL and its subsidiaries sell power and buy natural gas on a forward basis in the same contract.

Superfund - federal environmental statute that addresses remediation of contaminated sites; states also have similar statutes.

TC2 - Trimble County Unit 2, a coal-fired plant located in Kentucky with a net summer capacity of 732 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2, or 549 MW of the capacity.

Tolling agreement - agreement whereby the owner of an electricity generating facility agrees to use that facility to convert fuel provided by a third party into electricity for delivery back to the third party.

Total shareowner return - change in market value of a share of the Company's common stock plus the value of all dividends paid on a share of the common stock during the applicable performance period, divided by the price of the common stock as of the beginning of the performance period.

TRA - Tennessee Regulatory Authority, the state agency that has jurisdiction over the regulation of rates and service of utilities in Tennessee.

Treasury Stock Method - A method applied to calculate diluted EPS that assumes any proceeds that could be obtained upon exercise of options and warrants (and their equivalents) would be used to purchase common stock at the average market price during the relevant period.

VaR - value-at-risk, a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level.

VEBA - Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

VIE - variable interest entity.

Volumetric risk - the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

VSCC - Virginia State Corporation Commission, the state agency that has jurisdiction over the regulation of Virginia corporations, including utilities.

VWAP - as it relates to the 2011 and 2010 Equity Units issued by PPL, the per share volume-weighted-average price as displayed under the heading Bloomberg VWAP on Bloomberg page "PPL <EQUITY> AQR" (or its equivalent successor if such page is not available) in respect of the period from the scheduled open of trading on the relevant trading day until the scheduled close of trading on the relevant trading day (or if such volume-weighted-average price is unavailable, the market price of one share of PPL common stock on such trading day determined, using a volume-weighted-average method, by a nationally recognized independent investment banking firm retained for this purpose by PPL).

(THIS PAGE LEFT BLANK INTENTIONALLY.)

x

FORWARD-LOOKING INFORMATION

Statements contained in this Annual Report concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although the Registrants believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in "Item 1A. Risk Factors" and in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Annual Report, the following are among the important factors that could cause actual results to differ materially from the forward-looking statements.

- fuel supply cost and availability;
- continuing ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU, and natural gas supply costs at LG&E;
- weather conditions affecting generation, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- the duration of and cost, including lost revenue, associated with scheduled and unscheduled outages at our generating facilities;
- transmission and distribution system conditions and operating costs;
- expansion of alternative sources of electricity generation;
- laws or regulations to reduce emissions of "greenhouse" gases or the physical effects of climate change;
- collective labor bargaining negotiations;
- the outcome of litigation against the Registrants and their subsidiaries;
- potential effects of threatened or actual terrorism, war or other hostilities, cyber-based intrusions or natural disasters;
- the commitments and liabilities of the Registrants and their subsidiaries;
- volatility in market demand and prices for energy, capacity, transmission services, emission allowances and RECs;
- competition in retail and wholesale power and natural gas markets;
- liquidity of wholesale power markets;
- defaults by counterparties under energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- stock price performance of PPL;
- volatility in the fair value of debt and equity securities and its impact on the value of assets in the NDT funds and in defined benefit plans, and the potential cash funding requirements if fair value declines;
- interest rates and their effect on pension, retiree medical, nuclear decommissioning liabilities and interest payable on certain debt securities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- new accounting requirements or new interpretations or applications of existing requirements;
- changes in securities and credit ratings;
- changes in foreign currency exchange rates for British pound sterling;
- current and future environmental conditions, regulations and other requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- legal, regulatory, political, market or other reactions to the 2011 incident at the nuclear generating facility at Fukushima, Japan, including additional NRC requirements;
- changes in political, regulatory or economic conditions in states, regions or countries where the Registrants or their subsidiaries conduct business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state, federal or foreign legislation or regulatory developments;
- the outcome of any rate cases or other cost recovery or revenue filings by PPL Electric, LG&E, KU or WPD;
- the impact of any state, federal or foreign investigations applicable to the Registrants and their subsidiaries and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;
- performance of new ventures; and
- business dispositions or acquisitions and our ability to successfully operate acquired businesses and realize expected benefits from business acquisitions.

Any such forward-looking statements should be considered in light of such important factors and in conjunction with other documents of the Registrants on file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for the Registrants to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and the Registrants undertake no obligation to update the information contained in such statement to reflect subsequent developments or information.

PART I

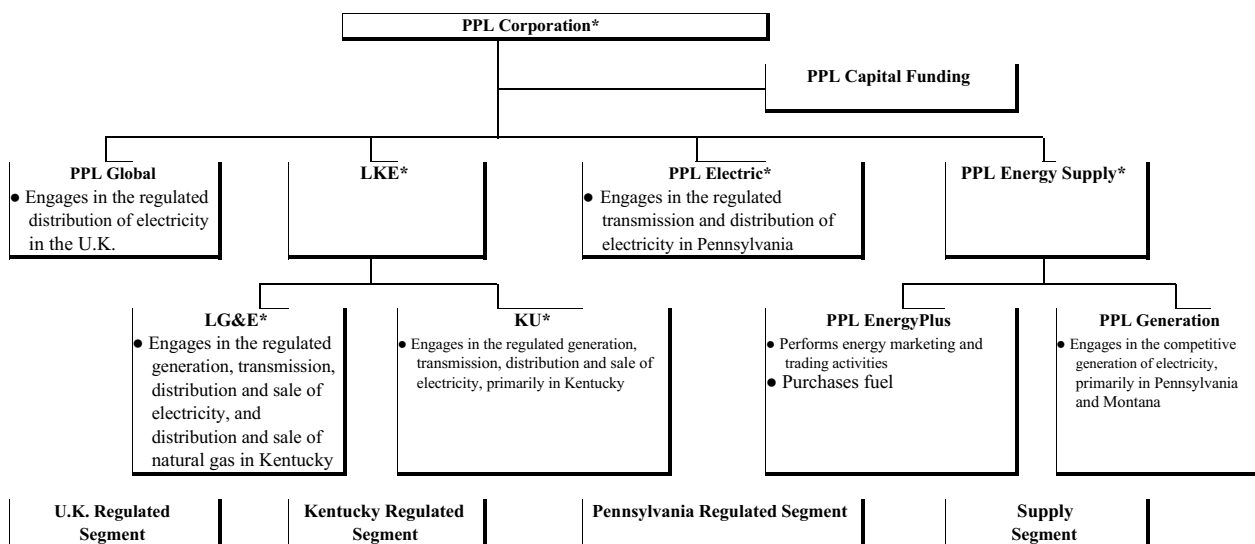

ITEM 1. BUSINESS

General

(All Registrants)

PPL Corporation, headquartered in Allentown, Pennsylvania, is an energy and utility holding company that was incorporated in 1994. Through subsidiaries, PPL delivers electricity to customers in the U.K., Pennsylvania, Kentucky, Virginia and Tennessee; delivers natural gas to customers in Kentucky; generates electricity from power plants in the northeastern, northwestern and southeastern U.S.; and markets wholesale or retail energy primarily in the northeastern and northwestern portions of the U.S. Beginning in 2010, PPL has expanded the rate regulated portion of its business, principally through the 2010 acquisition of LKE and the 2011 acquisition of WPD Midlands, such that it projects nearly all of its 2014 earnings will come from rate-regulated businesses. See "Acquisitions and Divestitures" below for more information on the acquisitions of regulated businesses.

PPL's principal subsidiaries at December 31, 2013 are shown below (* denotes a Registrant).

In addition to PPL Corporation, the other Registrants included in this filing are:

PPL Energy Supply, LLC, headquartered in Allentown, Pennsylvania, is an indirect wholly owned subsidiary of PPL formed in 2000 and is an energy company that through its principal subsidiaries is primarily engaged in the competitive generation and marketing of electricity in two key markets - the northeastern and northwestern U.S. PPL Energy Supply's principal subsidiaries are PPL EnergyPlus, its marketing and trading subsidiary, and PPL Generation, the owner of its generating facilities in Pennsylvania and Montana.

PPL Electric Utilities Corporation, headquartered in Allentown, Pennsylvania, is a direct wholly owned subsidiary of PPL incorporated in Pennsylvania in 1920 and a regulated public utility that is an electricity transmission and distribution service provider in eastern and central Pennsylvania.

LG&E and KU Energy LLC, headquartered in Louisville, Kentucky, is a holding company and a wholly owned subsidiary of PPL since 2010. LKE owns regulated utility operations through its subsidiaries, LG&E and KU, which constitute substantially all of LKE's assets. LG&E and KU are engaged in the generation, transmission, distribution and sale of electricity. LG&E also engages in the distribution and sale of natural gas. LG&E and KU maintain their separate corporate identities and serve customers in Kentucky under their respective names. KU also serves customers in Virginia under the Old Dominion Power name and in Tennessee under the KU name. LKE, formed in 2003, is the successor to a Kentucky entity incorporated in 1989.

Louisville Gas and Electric Company, headquartered in Louisville, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity and distribution and sale of natural gas in Kentucky. LG&E was incorporated in 1913. LG&E is a wholly owned subsidiary of LKE.

Kentucky Utilities Company, headquartered in Lexington, Kentucky, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity in Kentucky, Virginia and Tennessee. KU was incorporated in Kentucky in 1912 and in Virginia in 1991. KU serves its Virginia customers under the Old Dominion Power name while its Kentucky and Tennessee customers are served under the KU name. KU is a wholly owned subsidiary of LKE.

Acquisitions and Divestitures

(PPL, LKE, LG&E and KU)

In September, 2010, the KPSC approved a settlement agreement among PPL and all of the intervening parties to PPL's joint application to the KPSC for approval to acquire LKE. In October 2010, both the VSCC and the TRA also approved the transfer of control of LKE to PPL. The orders and the settlement agreement approved by the KPSC contained certain commitments by LG&E and KU with regard to operations, workforce, community involvement and other matters.

Also in October 2010, the FERC approved the application for the transfer of control of LG&E and KU to PPL. The approval included various conditional commitments, such as a continuation of certain existing undertakings with intervenors in prior cases, coordination with intervenors in certain pending matters and an exclusion of any transaction-related costs from wholesale energy and tariff customer rates to the extent that LG&E and KU have agreed to exclude such costs from retail customer rates.

On November 1, 2010, PPL acquired all of the limited liability company interests of E.ON U.S. LLC from a wholly owned subsidiary of E.ON AG. Upon completion of the acquisition, E.ON U.S. LLC was renamed LG&E and KU Energy LLC.

(PPL)

In April 2011, PPL, through an indirect, wholly owned subsidiary, PPL WEM, acquired all the outstanding ordinary share capital of Central Networks East plc and Central Networks Limited, the sole owner of Central Networks West plc, together with certain other related assets and liabilities (collectively referred to as Central Networks and subsequently renamed WPD Midlands), from subsidiaries of E.ON AG. WPD Midlands operates two regulated distribution networks in the Midlands area of England and is included in the U.K. Regulated segment. See Note 10 to the Financial Statements for additional information.

(PPL Energy Supply)

In January 2011, PPL Energy Supply distributed its entire membership interest in PPL Global to its parent, PPL Energy Funding (the parent holding company of PPL Energy Supply and PPL Global with no other material operations), to better align PPL's organizational structure with the manner in which it manages these businesses and reports segment information in its consolidated financial statements. The distribution separated the U.S.-based competitive energy marketing and supply business from the U.K.-based regulated electricity distribution business. See Note 9 to the Financial Statements for additional information.

(PPL and PPL Energy Supply)

In September 2013, PPL Montana executed a definitive agreement to sell 633 MW of hydroelectric facilities to NorthWestern for \$900 million in cash, subject to certain adjustments. The sale, which is subject to certain regulatory approvals and not expected to close before the second half of 2014, includes 11 hydroelectric power facilities and related assets. See Note 8 to the Financial Statements for additional information on the sale and the related Colstrip operating lease termination and subsequent purchase of the undivided interests in the Colstrip units.

Segment Information

(PPL)

PPL is organized into four reportable segments as depicted in the chart above: U.K. Regulated, Kentucky Regulated, Pennsylvania Regulated and Supply. PPL's reportable segments primarily reflect the activities of its related Subsidiary Registrant(s), except that the reportable segments are also allocated certain corporate level financing and other costs that are not included in the results of the applicable Subsidiary Registrant(s). The U.K. Regulated segment does not have a related Subsidiary Registrant.

A comparison of PPL's three regulated segments is shown below:

	<u>U.K. Regulated</u>	<u>KY Regulated</u>	<u>PA Regulated</u>
For the year ended December 31, 2013:			
Operating Revenues (in billions)	\$2.4	\$3.0	\$1.9
Net Income Attributable to PPL Shareowners (in millions)	\$922	\$307	\$209
Electric energy delivered (GWh)	78,219	31,088	36,760
At December 31, 2013:			
Regulatory Asset Base (in billions) (a)	\$9.5	\$7.6	\$4.2
Service area (in square miles)	21,400	9,400	10,000
End-users (in millions)	7.7	1.3	1.4

(a) Represents RAV for U.K. Regulated, capitalization for KY Regulated and rate base for PA Regulated.

See Note 2 to the Financial Statements for additional financial information about the segments.

(All Registrants except PPL)

PPL Energy Supply, PPL Electric, LKE, LG&E and KU each operate within a single reportable segment.

- **U.K. Regulated Segment** (PPL)

Consists of PPL Global which primarily includes WPD's regulated electricity distribution operations and certain costs, such as U.S. income taxes, administrative costs and allocated financing costs.

WPD, through indirect wholly owned subsidiaries, operates four of the 15 regulated distribution networks providing electricity service in the U.K. With the April 2011 acquisition of WPD Midlands, the number of end-users served by WPD has more than doubled, totaling 7.7 million across 21,400 square miles in Wales and southwest and central England. See Note 10 to the Financial Statements for additional information on the acquisition.

Details of revenue by category for the years ended December 31 are shown below.

	<u>2013</u>		<u>2012</u>		<u>2011</u>	
	<u>Revenue</u>	<u>% of Revenue</u>	<u>Revenue</u>	<u>% of Revenue</u>	<u>Revenue</u>	<u>% of Revenue</u>
Utility revenues (a)	\$ 2,359	98	\$ 2,289	98	\$ 1,618	98
Energy-related businesses	44	2	47	2	35	2
Total	<u>\$ 2,403</u>	<u>100</u>	<u>\$ 2,336</u>	<u>100</u>	<u>\$ 1,653</u>	<u>100</u>

(a) Amounts for 2011 are not comparable with 2012 or 2013 as WPD Midlands was acquired in April 2011. 2011 includes eight months of activity as WPD Midlands' results are recorded on a one-month lag. Amounts for 2013 and 2012 are comparable as each period includes a full year of WPD Midlands' results.

WPD's energy-related business revenues include ancillary activities that support the distribution business, including telecommunication revenues from the rental of fiber optic cables primarily attached to WPD's overhead electricity distribution network, real estate and meter services to businesses across the U.K.

Franchise and Licenses

WPD is authorized by Ofgem to provide electricity distribution services within its concession areas and service territories, subject to certain conditions and obligations. For instance, WPD is subject to Ofgem regulation with respect to the regulated revenue it can earn and the quality of service it must provide, and WPD can be fined or have its licenses revoked if it does not meet the mandated standard of service.

Ofgem has formal powers to propose modifications to each distribution license. In January 2014, Ofgem changed the licenses to include a reduction in customer bills to be recovered in subsequent periods. WPD is not currently aware of any further planned modification to any of its U.K. regulated businesses' distribution licenses that would result in a material adverse change to the U.K. regulated businesses. See "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview - Distribution Revenue Reduction" for additional information.

A failure by WPD to comply with the terms of a distribution license may lead to the issuance of an enforcement order by Ofgem. Ofgem has the power to levy fines of up to 10% of revenue for any breach of a distribution license or, in certain circumstances, such as insolvency, the distribution license itself may be revoked. Unless terminated in the circumstances mentioned above, a distribution license continues indefinitely until revoked by Ofgem following no less than 25 years' written notice.

Competition

Although WPD operates in non-exclusive concession areas in the U.K., it currently faces little competition with respect to end-users connected to its network. WPD's four distribution businesses, WPD (South West), WPD (South Wales), WPD (West Midlands) and WPD (East Midlands) are, therefore, regulated monopolies which operate under regulatory price controls.

Revenue and Regulation

The operations of WPD (South West), WPD (South Wales), WPD (East Midlands) and WPD (West Midlands) are regulated by Ofgem under the direction of the Gas and Electricity Markets Authority. The Electricity Act 1989 provides the fundamental framework of electricity companies and established licenses that required each of the DNOs to develop, maintain and operate efficient distribution networks. Ofgem has established a price control mechanism that provides the amount of revenue that a regulated business can earn and provides for an increase or reduction in revenues based on incentives or penalties for exceeding or underperforming relative to pre-established targets.

This regulatory structure is an incentive-based structure in contrast to the typical U.S. regulatory structure which operates on a cost-recovery based model. Under the UK regulatory structure, electricity distribution revenues are currently set every five years, but will be extended to eight years in the next price control period beginning in April 2015. The revenue that DNOs can earn in each price control period is the sum of: i) the regulator's determination of efficient operating costs, ii) a return on capital from RAV plus an annual adjustment for inflation as determined by Retail Price Index (RPI) for the prior year, iii) a return of capital from RAV (i.e. depreciation), and iv) certain pass-through costs over which the DNO has no control. Additionally, incentives are provided for a range of activities including exceeding certain reliability and customer service targets.

WPD is currently operating under DPCR5 which is effective for the period from April 1, 2010 through March 31, 2015. Ofgem allowed an average increase in total revenues, before inflationary adjustments in each of the five years of DPCR5 of 6.9% for WPD (South West) and WPD (South Wales) and 4.5% for WPD Midlands. The revenue increases include reimbursement for higher operating and capital costs that would be incurred from additional regulatory requirements. In DPCR5, Ofgem decoupled WPD's allowed revenue from volume delivered over the five-year price control period. However, in any fiscal period, WPD's revenue could be negatively affected if its tariffs and the volume delivered do not fully recover the allowed revenue for a particular period. Under-recovered amounts are recovered in the next regulatory year.

In addition to providing a base regulated revenue allowance, Ofgem has established incentive mechanisms to provide significant opportunities to enhance overall returns by improving network efficiency, reliability and customer service. Some of the more significant incentive mechanisms under DPCR5 include:

- Interruptions Incentive Scheme (IIS) - This incentive has two major components: 1) Customer interruptions and 2) Customer minutes lost, and both are designed to incentivize the DNOs to invest and operate their networks to manage and reduce both the frequency and duration of power outages. The target for each DNO is based on a benchmark of data from the last four years of the prior price control period.

Effective April 1, 2012, an additional customer satisfaction incentive mechanism was implemented that includes a customer satisfaction survey, a complaints metric and a measure of stakeholder engagement. This incentive replaced the customer response telephone performance incentive that was effective April 1, 2010.

- Information Quality Incentive (IQI) - The IQI is designed to incentivize the DNOs to provide good quality information in the business plans they submit to Ofgem during the price control review process and to execute the plan as submitted. The IQI eliminates the distinction between capital expenditure and operating expense and instead focuses on total expenditure. Total expenditure is allocated 85% to RAV and currently recovered over 20 years through the regulatory depreciation of RAV and 15% to certain expenses which is recovered during the current price control review period, and includes all corporate and non-network capital expenditures. The IQI provides for incentives or penalties at the end of DPCR5 based on the ratio of actual expenditures to the expenditures submitted to Ofgem that were the basis for the revenues allowed for the five-year price control period.

At the beginning of DPCR5, WPD was awarded \$301 million in IQI revenue of which \$222 million will be included in revenue throughout the current price control period with the balance recovered over subsequent price control periods. The following table shows the amount of further incentive revenue, primarily from IIS, that WPD has earned since the beginning of DPCR5:

Regulatory Year Ended	Incentive Earned (in millions)	Regulatory Year Ended Incentive Included in Revenue
March 2011	\$ 30	March 2013
March 2012	83	March 2014
March 2013	104	March 2015

In October 2010, Ofgem announced changes to the regulatory framework that will be effective for the U.K. electricity distribution sector, including WPD, beginning April 2015. The framework, known as RIIO (Revenues = Incentives + Innovation + Outputs), is intended to:

- encourage DNOs to deliver safe, reliable and sustainable network service at long-term value to customers;
- enable DNOs to finance the required investment in a timely and efficient way; and
- remunerate DNOs according to their delivery for customers.

Ofgem published a strategy decision document in March 2013 providing the policies that will apply in RIIO-ED1. Key components included:

- an extension of the price review period to eight years;
- increased emphasis on outputs and incentives;
- enhanced stakeholder engagement including network customers;
- a stronger incentive framework to encourage more efficient investment and innovation;
- replacement of the current Low Carbon Network Fund to continue to stimulate innovation;
- capital return comprised of a 10 year trailing average debt allowance and an equity allowance to be determined by Ofgem with a debt to equity ratio of 65:35; and
- depreciation of RAV for additions after April 1, 2015 will be extended from 20 years to 45 years, although transitional arrangements will be considered by Ofgem.

In July 2013, WPD filed its business plans with Ofgem for its four DNOs for RIIO-ED1. In November 2013, Ofgem determined that the 8-year business plans of all four of WPD's DNOs were suitable for accelerated consideration or "fast tracking" and as a result, subject to a final Ofgem determination, merit early settlement of their price controls for the 8-year period starting April 1, 2015. Fast tracking affords several benefits to the WPD DNOs, including the ability to collect additional revenue equivalent to 2.5% of total annual expenditures during the 8-year price control period (approximately \$35 million annually), greater revenue certainty and a higher level of cost savings retention.

In February 2014, Ofgem announced its decision on the consultation related to the cost of equity to be used during the RIIO-ED1 period. The resulting real cost of equity for WPD was 6.4%, compared to 6.7% proposed in WPD's business plan submittals. WPD elected to accept this change and remain in the fast-track process. The change in the cost of equity is not expected to have a significant impact on the results of operations for PPL. Ofgem expects to announce its fast track final determination in late February 2014.

See "Item 1A. Risk Factors - Risks Related to U.K. Regulated Segment" for additional information on the risks associated with RIIO-ED1.

Customers

The majority of WPD's revenue is known as DUoS and is derived from charging energy suppliers for the delivery of electricity to end-users. Therefore, WPD's customers are energy suppliers. Ofgem requires that all licensed electricity distributors and suppliers become parties to the Distribution Connection and Use of System Agreement. This agreement specifies how creditworthiness will be determined and, as a result, whether the supplier needs to collateralize for its payment obligations.

- **Kentucky Regulated Segment (PPL)**

Consists of the operations of LKE, which owns and operates regulated public utilities engaged in the generation, transmission, distribution and sale of electricity and distribution and sale of natural gas, representing primarily the activities of LG&E and KU. In addition, certain financing costs are allocated to the Kentucky Regulated segment.

(PPL, LKE, LG&E and KU)

LKE became a wholly owned subsidiary of PPL on November 1, 2010. LG&E and KU are engaged in the regulated generation, transmission, distribution and sale of electricity in Kentucky and, in KU's case, Virginia and Tennessee. LG&E also engages in the distribution and sale of natural gas in Kentucky. LG&E provides electric service to approximately 397,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in nine counties and provides natural gas service to approximately 321,000 customers in its electric service area and eight additional counties in Kentucky. KU provides electric service to approximately 514,000 customers in 77 counties in central, southeastern and western Kentucky, approximately 29,000 customers in five counties in southwestern Virginia, and fewer than ten customers in Tennessee, covering approximately 4,800 non-contiguous square miles. KU also sells wholesale electricity to 12 municipalities in Kentucky under load following contracts. In Virginia, KU operates under the name Old Dominion Power Company.

Details of operating revenues by customer class for the years ended December 31 are shown below.

	2013		2012		2011	
	Revenue	% of Revenue	Revenue	% of Revenue	Revenue	% of Revenue
<u>LKE</u>

Total	\$ 1,410	100	\$ 1,324	100	\$ 1,364	100
<u>KU</u>						
Commercial	\$ 365	22	\$ 349	23	\$ 347	22
Industrial	401	25	381	25	381	25
Residential	591	36	523	34	526	34
Retail - other	141	9	139	9	139	9
Wholesale - municipal	110	7	102	7	104	7
Wholesale - other (a) (b)	27	1	30	2	51	3
Total	\$ 1,635	100	\$ 1,524	100	\$ 1,548	100

(a) Includes wholesale power and transmission revenues.

(b) Includes intercompany power sales and transmission revenues, which are eliminated upon consolidation at LKE.

Franchises and Licenses

LG&E and KU provide electricity delivery service, and LG&E provides natural gas distribution service, in their respective service territories pursuant to certain franchises, licenses, statutory service areas, easements and other rights or permissions granted by state legislatures, cities or municipalities or other entities.

Competition

There are currently no other electric public utilities operating within the electric service areas of LKE. From time to time, bills are introduced into the Kentucky General Assembly which seek to authorize, promote or mandate increased distributed generation, customer choice or other developments. Neither the Kentucky General Assembly nor the KPSC has adopted or approved a plan or timetable for retail electric industry competition in Kentucky. The nature or timing of any legislative or regulatory actions regarding industry restructuring and their impact on LKE, which may be significant, cannot currently be predicted. Virginia, formerly a deregulated jurisdiction, has enacted legislation that implemented a hybrid model of cost-based regulation. KU's operations in Virginia have been and remain regulated.

Alternative energy sources such as electricity, oil, propane and other fuels provide indirect competition for natural gas revenues of LKE. Marketers may also compete to sell natural gas to certain large end-users. LG&E's natural gas tariffs include gas price pass-through mechanisms relating to its sale of natural gas as a commodity; therefore, customer natural gas purchases from alternative suppliers do not generally impact profitability. However, some large industrial and commercial customers may physically bypass LG&E's facilities and seek delivery service directly from interstate pipelines or other natural gas distribution systems.

Power Supply

At December 31, 2013, LKE owned, controlled or had a minority ownership interest in generating capacity (summer rating) of 8,079 MW, of which 3,340 MW related to LG&E and 4,739 MW related to KU, in Kentucky, Indiana, and Ohio. See "Item 2. Properties - Kentucky Regulated Segment" for a complete list of LKE's generating facilities.

The system capacity of LKE's owned or controlled generation is based upon a number of factors, including the operating experience and physical condition of the units, and may be revised periodically to reflect changes in circumstances.

During 2013, LKE's Kentucky power plants generated the following amounts of electricity.

Fuel Source	GWh		
	LKE	LG&E	KU
Coal (a)	34,336	14,568	19,768
Oil / Gas	503	176	327
Hydro	300	193	107
Total (b)	35,139	14,937	20,202

(a) Includes 854 GWh of power generated by and purchased from OVEC for LKE, 591 GWh for LG&E and 263 GWh for KU.

(b) This generation represents a 2.1% increase for LKE, a 5% decrease for LG&E and a 8.1% increase for KU from 2012 output.

A significant portion of LG&E's and KU's generated electricity was used to supply its retail and municipal customer base.

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail and municipal customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail and municipal customers and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU.

See "Item 2. Properties - Kentucky Regulated Segment" for additional information regarding LG&E's and KU's Cane Run Unit 7 which is currently under construction. In January 2014, LG&E and KU filed an application for a CPCN with the KPSC requesting approval to construct a NGCC generating unit at KU's Green River generating site (Green River Unit 5) and a solar generating facility at the E. W. Brown generating site. As a result of environmental requirements, LG&E and KU anticipate retiring five older coal-fired electric generating units at the Cane Run and Green River plants, which have a combined summer capacity rating of 724 MW. In addition, KU retired a 12 MW unit at the Haefling plant in December 2013 and the remaining 71 MW unit at the Tyrone plant in February 2013.

Fuel Supply

Coal is expected to be the predominant fuel used by LG&E and KU for baseload generation for the foreseeable future. However, natural gas will play a more significant role starting in 2015 when Cane Run Unit 7 is expected to be placed into operation, and in 2018 when the NGCC generating unit at Green River generating site is expected to be placed into operation. These units are expected to be used for baseload generation. The natural gas for these generating units will be contracted from suppliers separately from LG&E's natural gas customers. Natural gas and oil will continue to be used for intermediate and peaking capacity and flame stabilization in coal-fired boilers.

Fuel inventory is maintained at levels estimated to be necessary to avoid operational disruptions at coal-fired generating units. Reliability of coal deliveries can be affected from time to time by a number of factors including fluctuations in demand, coal mine production issues and other supplier or transporter operating difficulties. To enhance the reliability of natural gas supply, LG&E and KU have secured long-term pipeline capacity on the interstate pipeline serving the new NGCC unit at Cane Run and six simple cycle combustion turbine units.

LG&E and KU have entered into coal supply agreements with various suppliers for coal deliveries through 2017 and normally augment their coal supply agreements with spot market purchases, as needed.

For their existing units, LG&E and KU expect for the foreseeable future to purchase most of their coal from western Kentucky, southern Indiana and southern Illinois. In 2014 and beyond, LG&E and KU may purchase certain quantities of ultra-low sulfur content coal from Wyoming for blending at TC2. Coal is delivered to the generating plants by barge, truck and rail.

(PPL, LKE and LG&E)

Natural Gas Distribution Supply

Five underground natural gas storage fields, with a current working natural gas capacity of approximately 15 Bcf, are used in providing natural gas service to LG&E's firm sales customers. By using natural gas storage facilities, LG&E avoids the costs typically associated with more expensive pipeline transportation capacity to serve peak winter heating loads. Natural gas is stored during the summer season for withdrawal during the following winter heating season. Without this storage capacity, LG&E would be required to purchase additional natural gas and pipeline transportation services during winter months when customer demand increases and the prices for natural gas supply and transportation services are typically at their highest. Several suppliers under contracts of varying duration provide competitively priced natural gas. At December 31, 2013, LG&E had 12 Bcf of natural gas stored underground with a carrying value of \$48 million.

LG&E has a portfolio of supply arrangements of varying terms with a number of suppliers designed to meet its firm sales obligations. These natural gas supply arrangements include pricing provisions that are market-responsive. In tandem with pipeline transportation services, these natural gas supplies provide the reliability and flexibility necessary to serve LG&E's natural gas customers.

LG&E purchases natural gas supply transportation services from two pipelines. LG&E has contracts with one pipeline that are subject to termination by LG&E between 2015 and 2018. Total winter capacity under these contracts is 194,900 MMBtu/day and summer capacity is 88,000 MMBtu/day. LG&E has a contract with another pipeline that expires in October 2018. Total winter and summer capacity under this contract is 20,000 MMBtu/day during both seasons.

LG&E expects to purchase most of its natural gas distribution supplies from onshore producing regions in South Texas, East Texas, North Louisiana, and Arkansas, as well as gas delivered to its pipeline transporters in Ohio.

(PPL, LKE, LG&E and KU)

Rates and Regulation

LG&E is subject to the jurisdiction of the KPSC and the FERC, and KU is subject to the jurisdiction of the KPSC, the FERC, the VSCC and the TRA. LG&E and KU operate under a FERC-approved open access transmission tariff. LG&E and KU contract with the Tennessee Valley Authority to act as their transmission reliability coordinator. LG&E and KU contract with TransServ International, Inc. to act as their independent transmission operator.

In February 2013, LG&E and KU submitted a compliance filing to the FERC reflecting their participation with other utilities in the Southeastern Regional Transmission Planning relating to certain FERC Order 1000 requirements. FERC Order 1000, issued in July 2011, establishes certain procedural and substantive requirements relating to participation, cost allocation and non-incumbent developer aspects of regional and inter-regional electric transmission planning activities.

LG&E's and KU's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through other means. As such, LG&E and KU generally earn a return on regulatory assets.

KU's Virginia base rates are calculated based on a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities, except the levelized fuel factor, are excluded from the return on rate base utilized in the calculation of Virginia base rates; therefore, no return is earned on the related assets.

KU's rates to municipal customers for wholesale requirements are calculated based on annual updates to a rate formula that utilizes a return on rate base (net utility plant plus working capital less deferred taxes and miscellaneous deductions). All regulatory assets and liabilities are excluded from the return on rate base utilized in the development of municipal rates; therefore, no return is earned on the related assets.

See Note 6 to the Financial Statements for additional information on cost recovery mechanisms.

Rate Cases

See "Regulatory Matters - Kentucky Activities" in Note 6 to the Financial Statements for information on rate cases.

- **Pennsylvania Regulated Segment (PPL)**

Includes the regulated electricity delivery operations of PPL Electric. In addition, certain financing costs are allocated to the Pennsylvania Regulated segment.

(PPL and PPL Electric)

PPL Electric is subject to regulation as a public utility by the PUC, and certain of its transmission activities are subject to the jurisdiction of the FERC under the Federal Power Act. PPL Electric delivers electricity to approximately 1.4 million customers in a 10,000-square mile territory in 29 counties of eastern and central Pennsylvania. PPL Electric also provides electricity supply to retail customers in this area as a PLR under the Customer Choice Act.

Details of revenues by customer class for the years ended December 31 are shown below.

	2013		2012		2011	
	Revenue	% of Revenue	Revenue	% of Revenue	Revenue	% of Revenue
Distribution						
Residential	\$ 1,215	65	\$ 1,108	63	\$ 1,266	67
Industrial	52	3	53	3	62	3
Commercial	363	19	366	21	431	23
Other (a) (b)	(11)		26	1	(47)	(3)
Transmission	251	13	210	12	180	10
Total	\$ 1,870	100	\$ 1,763	100	\$ 1,892	100

(a) Includes regulatory over- or under-recovery reconciliation mechanisms, pole attachment revenues, and street lighting.

(b) Included in these amounts for 2013, 2012 and 2011 are \$4 million, \$3 million and \$11 million of retail and wholesale electric to affiliate revenue which is eliminated in consolidation for PPL.

Franchise, Licenses and Other Regulations

PPL Electric is authorized to provide electric public utility service throughout its service area as a result of grants by the Commonwealth of Pennsylvania in corporate charters to PPL Electric and companies which it has succeeded and as a result of certification by the PUC. PPL Electric is granted the right to enter the streets and highways by the Commonwealth subject to certain conditions. In general, such conditions have been met by ordinance, resolution, permit, acquiescence or other action by an appropriate local political subdivision or agency of the Commonwealth.

Competition

Pursuant to authorizations from the Commonwealth of Pennsylvania and the PUC, PPL Electric operates a regulated distribution monopoly in its service area. Accordingly, PPL Electric does not face competition in its electricity distribution business. Pursuant to the Customer Choice Act, generation of electricity is a competitive business in Pennsylvania.

The PPL Electric transmission business, operating under a FERC-approved PJM Open Access Transmission Tariff, is subject to competition pursuant to FERC Order 1000 from entities that are not incumbent PJM transmission owners with respect to the construction and ownership of transmission facilities within PJM.

Rates and Regulation

Transmission

PPL Electric's transmission facilities are within PJM, which operates the electricity transmission network and electric energy market in the Mid-Atlantic and Midwest regions of the U.S.

PJM serves as a FERC-approved RTO to promote greater participation and competition in the region it serves. In addition to operating the electricity transmission network, PJM also administers regional markets for energy, capacity and ancillary services. A primary objective of any RTO is to separate the operation of, and access to, the transmission grid from market participants that buy or sell electricity in the same markets. Electric utilities continue to own the transmission assets and to receive their share of transmission revenues, but the RTO directs the control and operation of the transmission facilities.

As a transmission owner, PPL Electric's transmission revenues are recovered through PJM in accordance with a FERC approved tariff that allows recovery of incurred transmission costs, a return on transmission-related plant and an automatic annual update based on a formula rate mechanism. As a PLR, PPL Electric also purchases transmission services from PJM. See "PLR" below.

In July 2011, FERC issued a Final Rule on Order 1000 directing that Transmission Providers such as PJM, remove from FERC approved tariffs, any provision that grants federal right of first refusal for facilities selected in a regional transmission plan and requiring subsequent compliance filings. PJM tariff changes are currently under review by the FERC.

See Note 6 to the Financial Statements for additional information on rate mechanisms.

Distribution

PPL Electric's distribution base rates are calculated based on a return on rate base (net utility plant plus a cash working capital allowance less plant-related deferred taxes and other miscellaneous additions and deductions). All regulatory assets and liabilities are excluded from the return on rate base; therefore, no return is earned on the related assets unless specifically provided for by the PUC. Currently, PPL Electric's Smart Meter rider is the only regulatory asset earning a return. Certain operating expenses are also included in PPL Electric's distribution base rates including wages and benefits, other operation and maintenance expenses, depreciation, and taxes.

Pennsylvania's AEPS requires electricity distribution companies and electricity generation suppliers to obtain a portion of the electricity sold to retail customers in Pennsylvania from alternative energy sources. Under the default service procurement plans approved by the PUC, PPL Electric purchases all of the alternative energy generation supply it needs to comply with the AEPS.

Act 129 created an energy efficiency and conservation program, a demand side management program, smart metering technology requirements, new PLR generation supply procurement rules, remedies for market misconduct, and changes to the existing AEPS.

Act 11 authorizes the PUC to approve two specific ratemaking mechanisms: the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, the use of a DSIC. Such alternative ratemaking procedures and mechanisms provide opportunity for accelerated cost-recovery and, therefore, are important to PPL Electric as it begins a period of significant capital investment to maintain and enhance the reliability of its delivery system. In January 2013, PPL Electric filed a petition requesting permission to establish a DSIC. In May 2013, the PUC approved PPL Electric's proposed DSIC with an initial rate effective July 1, 2013, subject to refund after hearings. The PUC also assigned four technical recovery calculation issues to the Office of Administrative Law Judge for hearing and preparation of a recommended decision. The case remains pending before the PUC.

See "Regulatory Matters - Pennsylvania Activities" in Note 6 to the Financial Statements for additional information regarding Act 129, Act 11 and other legislative and regulatory impacts.

PLR

The Customer Choice Act requires Electric Distribution Companies (EDCs), including PPL Electric, or an alternative supplier approved by the PUC to act as a PLR of electricity supply for customers who do not choose to shop for supply with a competitive supplier and provides that electricity supply costs will be recovered by the PLR pursuant to regulations established by the PUC. As of December 31, 2013, the following percentages of PPL Electric's customer load were provided by competitive suppliers: 51% of residential, 84% of small commercial and industrial and 99% of large commercial and industrial customers. The PUC continues to be interested in expanding the competitive market for electricity. See "Regulatory Matters - Pennsylvania Activities" in Note 6 to the Financial Statements for additional information.

PPL Electric's cost of electricity generation is based on a competitive solicitation process. The PUC approved PPL Electric's default service plan for the period June 2013 through May 2015, which includes 4 solicitations for electricity supply held in April and October, annually. Pursuant to this plan, PPL Electric contracts for all of the electricity supply for residential, small commercial and small industrial customers, large commercial and large industrial customers who elect to take that service from PPL Electric. These solicitations include a mix of 12- and 9-month fixed-price load-following contracts for residential, small commercial and small industrial customers, and 12-month real-time pricing contracts for large commercial and large industrial customers to fulfill PPL Electric's obligation to provide customer electricity supply as a PLR.

Numerous alternative suppliers have offered to provide generation supply in PPL Electric's service territory. Whether its customers purchase electricity supply from these alternative suppliers or from PPL Electric as a PLR, the purchase of such supply has no impact on the financial results of PPL Electric. The costs to purchase PLR supply, including charges paid to PJM for related transmission services, are passed directly by PPL Electric to its PLR customers without markup. See "Energy Purchase Commitments" in Note 15 to the Financial Statements for additional information regarding PPL Electric's solicitations.

Rate Cases

See "Regulatory Matters - Pennsylvania Activities" in Note 6 to the Financial Statements for additional information on rate cases and the proposed Storm Damage Expense Rider.

- **Supply Segment (PPL)**

Consists primarily of the activities of PPL Energy Supply's subsidiaries, PPL Generation and PPL EnergyPlus. PPL Generation owns and operates competitive domestic power plants to generate electricity and acquires and develops competitive domestic generation projects. PPL EnergyPlus markets and trades electricity, natural gas, and other energy-related products in competitive wholesale and retail markets. In addition, certain financing and other costs are allocated to the Supply segment.

(PPL and PPL Energy Supply)

PPL Energy Supply's generation assets are located in the northeastern and northwestern U.S. markets. The northeastern generating capacity is located primarily in Pennsylvania within PJM and northwestern generating capacity is located in Montana. PPL Energy Supply enters into energy and energy-related contracts to hedge the variability of expected cash flows associated with its generating units and marketing activities, as well as for trading purposes. PPL EnergyPlus sells the electricity produced by PPL Energy Supply's generation plants based on prevailing market rates. PPL Energy Supply's total expected generation in 2014 is anticipated to be used to meet its committed contractual sales. PPL Energy Supply has also entered into commitments of varying quantities and terms for 2015 and beyond.

Details of revenue by category for the years ended December 31, are shown below.

	2013		2012		2011	
	Revenue	% of Revenue	Revenue	% of Revenue	Revenue	% of Revenue
Energy						
Unregulated wholesale energy (a)	\$ 3,095	67	\$ 4,204	76	\$ 5,238	82
Unregulated retail energy	1,031	22	848	16	727	11
Total energy	4,126	89	5,052	92	5,965	93
Energy-related businesses (b)	527	11	448	8	464	7
Total	\$ 4,653	100	\$ 5,500	100	\$ 6,429	100

- (a) Included in these amounts for 2013, 2012, and 2011 are \$51 million, \$78 million and \$26 million of wholesale electricity sales to an affiliate, PPL Electric, which are eliminated in consolidation for PPL.
- (b) Energy-related businesses primarily support the generation, marketing and trading businesses of PPL Energy Supply. Their activities include developing renewable energy projects and providing energy-related products and services to commercial and industrial customers through their mechanical contracting and services subsidiaries. Energy-related businesses for PPL's Supply segment had additional revenues not related to PPL Energy Supply of \$13 million and \$8 million for 2012 and 2011, which are not included in this table.

Power Supply

PPL Energy Supply owned or controlled generating capacity (summer rating) of 10,678 MW at December 31, 2013. Generating capacity controlled by PPL Generation and other PPL Energy Supply subsidiaries includes power obtained through PPL EnergyPlus' power purchase agreements. See "Item 2. Properties - Supply Segment" for details of PPL Energy Supply's generating capacity.

During 2013, PPL Energy Supply owned or controlled power plants that generated the following amounts of electricity.

Fuel Source	GWh		
	Northeastern	Northwestern	Total
Nuclear	17,018		17,018
Oil / Gas	9,516		9,516
Coal	17,150	4,409	21,559
Hydro	662	3,252	3,914
Renewables (a)	348		348
Total	44,694	7,661	52,355

- (a) PPL Energy Supply subsidiaries own or control renewable energy projects located in Pennsylvania, New Jersey, Vermont and New Hampshire with a generating capacity (summer rating) of 42 MW. PPL EnergyPlus sells the energy, capacity and RECs produced by these plants into the wholesale market as well as to commercial and industrial customers.

PPL Energy Supply's generation subsidiaries are EWGs that sell electricity into wholesale markets. EWGs are subject to regulation by the FERC, which has authorized these EWGs to sell the electricity generated at market-based prices. This electricity is sold to PPL EnergyPlus under FERC-jurisdictional power purchase agreements. PPL Susquehanna is subject to the jurisdiction of the NRC in connection with the operation of the Susquehanna nuclear units. Certain of PPL Energy Supply's other subsidiaries are subject to the jurisdiction of the NRC in connection with the operation of their fossil plants with respect to certain level and density monitoring devices. Certain operations of PPL Generation's subsidiaries are also subject to OSHA and comparable state statutes.

See Note 9 to the Financial Statements for information on the 2011 sale of certain non-core generation facilities.

Fuel Supply

Coal

Pennsylvania

PPL EnergyPlus actively manages PPL Energy Supply's coal requirements by purchasing coal principally from mines located in northern Appalachia.

During 2013, PPL Generation purchased 5.7 million tons of coal required for its wholly owned Pennsylvania plants. Coal inventory is maintained at levels estimated to be necessary to avoid operational disruptions at coal-fired generating units. Reliability of coal deliveries can be affected from time to time by a number of factors including fluctuations in demand, coal mine production issues and other supplier or transporter operating difficulties. PPL Generation, by and through its agent PPL EnergyPlus, has agreements in place that will provide more than 17 million tons of PPL Generation's projected coal needs for the Pennsylvania power plants from 2014 through 2018 and augments its coal supply agreements with spot market purchases, as needed.

A PPL Generation subsidiary owns a 12.34% interest in the Keystone plant and a 16.25% interest in the Conemaugh plant. PPL Generation owns a 12.34% interest in Keystone Fuels, LLC and a 16.25% interest in Conemaugh Fuels, LLC. The Keystone plant contracts with Keystone Fuels, LLC for its coal requirements, which provided 4.2 million tons of coal to the Keystone plant in 2013. The Conemaugh plant requirements are purchased under contract from Conemaugh Fuels, LLC, which provided 4.3 million tons of coal to the Conemaugh plant in 2013.

All wholly owned PPL Generation coal plants within Pennsylvania are equipped with scrubbers, which use limestone in their operations. Acting as agent for PPL Generation, PPL EnergyPlus has entered into limestone contracts with suppliers that will provide for those plants' requirements through 2014. During 2013, 405,000 tons of limestone were delivered to Brunner Island and Montour under these contracts. Annual limestone requirements range from approximately 400,000-500,000 tons.

Montana

PPL Montana owns a 30% interest in Colstrip Unit 3 and NorthWestern owns a 30% interest in Colstrip Unit 4. PPL Montana and NorthWestern have a sharing agreement that governs each party's responsibilities and rights relating to the operation of Colstrip Units 3 and 4. Under the terms of that agreement, each party is responsible for 15% of the total non-coal operating and construction costs of Colstrip Units 3 and 4, regardless of whether a particular cost is specific to Colstrip Unit 3 or 4 and is entitled to take up to 15% of the available generation from Units 3 and 4. Each party is responsible for its own coal costs. PPL Montana, with the other Colstrip owners, is party to contracts to purchase 100% of its coal requirements with defined coal quality characteristics and specifications. PPL Montana, with the other Colstrip Units 1 and 2 owner, has a long-term purchase and supply agreement with the current supplier for Units 1 and 2, which provides these units 100% of their coal requirements through December 2014, and at least 85% of such requirements from January 2015 through December 2019. PPL Montana, with the other Colstrip Units 3 and 4 owners, has a long-term coal supply contract for Units 3 and 4, which provides these units 100% of their coal requirements through December 2019.

These units were originally built with scrubbers and PPL Montana has entered into a long-term contract to purchase the limestone requirements for these units. The contract extends through December 2030.

Coal supply contracts are in place to purchase low-sulfur coal with defined quality characteristics and specifications for PPL Montana's Corette plant. The contracts covered 100% of the plant's coal requirements in 2013 and similar contracts are in place to supply 100% of the expected coal requirements through 2014. In the third quarter of 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette plant in long-term reserve status, suspending the plant's operation due to expected market conditions and the costs to comply with MATS.

Oil and Natural Gas

Pennsylvania

PPL Generation's Martins Creek Units 3 and 4 burn both oil and natural gas. During 2013, 100% of the physical gas requirements for the Martins Creek units were purchased on the spot market and oil requirements were supplied from inventory. At December 31, 2013, there were no long-term agreements for oil or natural gas for these units.

Short-term and long-term gas transportation contracts are in place for approximately 38% of the maximum daily requirements of the Lower Mt. Bethel combined-cycle facility. During 2013, 100% of the physical gas requirements were purchased on the spot market.

For PPL's Ironwood facility, PPL EnergyPlus has long-term transportation contracts that can deliver up to approximately 25% of Ironwood's maximum daily gas requirements. Daily gas requirements can also be met through a combination of short-term transportation capacity release transactions coupled with upstream supply. PPL EnergyPlus currently has no long-term physical gas contracts for this facility. During 2013, 100% of the physical gas requirements were purchased on the spot market.

Nuclear

The nuclear fuel cycle consists of several material and service components: the mining and milling of uranium ore to produce uranium concentrates; the conversion of these concentrates into uranium hexafluoride, a gas component; the enrichment of the hexafluoride gas; the fabrication of fuel assemblies for insertion and use in the reactor core; and the temporary storage and final disposal of spent nuclear fuel.

PPL Susquehanna has a portfolio of supply contracts, with varying expiration dates, for nuclear fuel materials and services. These contracts are expected to provide sufficient fuel to permit Unit 1 to operate into the first quarter of 2018 and Unit 2 to operate into the first quarter of 2019. PPL Susquehanna anticipates entering into additional contracts to ensure continued operation of the nuclear units.

Federal law requires the U.S. government to provide for the permanent disposal of commercial spent nuclear fuel, but there is no definitive date by which a repository will be operational. As a result, it was necessary to expand Susquehanna's on-site spent fuel storage capacity. To support this expansion, PPL Susquehanna contracted for the design and construction of a spent fuel storage facility employing dry cask fuel storage technology. The facility is modular, so that additional storage capacity can be added as needed. The facility began receiving spent nuclear fuel in 1999. PPL Susquehanna estimates, under current operating conditions, that there is sufficient storage capacity in the spent nuclear fuel pools and the on-site spent fuel storage facility at Susquehanna to accommodate spent fuel discharged through approximately 2017. If necessary, the on-site spent fuel storage facility can be expanded, assuming appropriate regulatory approvals are obtained, such that, together, the spent fuel pools and the expanded dry fuel storage facility will accommodate all of the spent fuel expected to be discharged through the current licensed life of the plant.

In 1996, the U.S. Court of Appeals for the District of Columbia Circuit ruled that the Nuclear Waste Policy Act imposed on the DOE an unconditional obligation to begin accepting spent nuclear fuel on or before January 31, 1998. In January 2004, PPL Susquehanna filed suit in the U.S. Court of Federal Claims for unspecified damages suffered as a result of the DOE's breach of its contract to accept and dispose of spent nuclear fuel. In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. Government relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna plant. PPL Susquehanna recorded credits totaling \$56 million to "Fuel" on the Statement of Income in 2011 to recognize recovery, under the settlement agreement, of certain costs to store spent nuclear fuel at the Susquehanna plant. The amounts recorded through September 2011 cover costs incurred from 1998 through December 2010. PPL Susquehanna is eligible to receive payment of annual claims for allowed costs, as set forth in the settlement agreement, that are incurred through December 31, 2013. In exchange, PPL Susquehanna has waived any claims against the United States government for costs paid or injuries sustained related to storing spent nuclear fuel at the Susquehanna plant through December 31, 2013. In January 2014, PPL Susquehanna entered into a new agreement with the Department of Energy to extend the settlement agreement on the same terms as the prior agreement for an additional three years to the end of 2016.

Energy Marketing

PPL EnergyPlus sells the capacity and electricity produced by PPL Generation subsidiaries, and buys and sells purchased power, capacity, ancillary services, FTRs, natural gas, oil, uranium, emission allowances and RECs in competitive wholesale and competitive retail markets.

PPL EnergyPlus transacts in competitive retail energy markets, and buys and sells electricity and natural gas supply, to meet the diverse needs of business customers. PPL EnergyPlus sells retail electricity supply to business customers in Delaware, the District of Columbia, Maryland, Montana, New Jersey, Ohio and Pennsylvania and sells retail natural gas supply to business customers in Delaware, Maryland, New Jersey, and Pennsylvania. The company also offers electricity supply to select residential customers in Pennsylvania. An affiliate of PPL EnergyPlus sells petroleum products to wholesalers and distributors in Delaware, Maryland, New Jersey, Pennsylvania and Virginia. Although retail energy revenues continue to grow, the net margins related to these activities are not currently a significant component of PPL Energy Supply's margins.

Within the constraints of its hedging policy, PPL EnergyPlus actively manages its portfolios of energy and energy-related products to optimize their value and to limit exposure to price fluctuations. See Note 19 to the Financial Statements for more information.

Competition

Since the early 1990s, there has been increased competition in U.S. energy markets because of federal and state competitive market initiatives. Although some states, such as Pennsylvania and Montana, have created a competitive market for electricity generation, other states continue to consider different types of regulatory initiatives concerning competition in the

power and gas industries. Some states that were considering creating competitive markets have slowed their plans or postponed further consideration. In addition, states that have created competitive markets have, from time to time, considered new market rules and re-regulation measures that could result in more limited opportunities for competitive energy suppliers. Interest in re-regulation, however, has slowed due to recent declining power prices. As such, the markets in which PPL Energy Supply participates are highly competitive.

PPL Energy Supply faces competition in wholesale markets for available energy, capacity and ancillary services. Competition is impacted by electricity and fuel prices, congestion along the power grid, subsidies provided by state and federal governments for new generation facilities, new market entrants, construction of new generating assets, technological advances in power generation, the actions of environmental and other regulatory authorities and other factors. PPL Energy Supply primarily competes with other electricity suppliers based on its ability to aggregate generation supply at competitive prices from different sources and to efficiently utilize transportation from third-party pipelines and transmission from electric utilities and ISOs. Competitors in wholesale power markets include regulated utilities, industrial companies, NUGs, competitive subsidiaries of regulated utilities and other energy marketers. See "Item 1A. Risk Factors - Risks Related to Supply Segment", "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview" and Notes 15 and 19 to the Financial Statements for more information concerning the risks faced with respect to competitive energy markets.

Franchise and Licenses

See "Energy Marketing" above for a discussion of PPL EnergyPlus' licenses in various states. PPL EnergyPlus also has an export license from the DOE to sell capacity and/or energy to electric utilities in Canada.

PPL Susquehanna operates Units 1 and 2 pursuant to NRC operating licenses that expire in 2042 for Unit 1 and in 2044 for Unit 2.

In 2008, a PPL Energy Supply subsidiary, PPL Bell Bend, LLC, submitted a COLA to the NRC for a new nuclear generating unit (Bell Bend) to be built adjacent to the Susquehanna plant. Also in 2008, the COLA was formally docketed and accepted for review by the NRC. PPL Bell Bend, LLC does not expect to complete the COLA review process with the NRC prior to 2016. See Note 8 to Financial Statements for additional information.

PPL Holtwood operates the Holtwood hydroelectric generating plant pursuant to a FERC-granted license that expires in 2030. In 2013, a 125 MW expansion project was placed in service. See Note 8 to the Financial Statements for additional information. PPL Holtwood operates the Wallenpaupack hydroelectric generating plant pursuant to a FERC-granted license that expires in 2044.

PPL Montana's 11 hydroelectric facilities and one storage reservoir in Montana are licensed by the FERC. The Thompson Falls and Kerr licenses expire in 2025 and 2035, the licenses for the nine Missouri-Madison facilities expire in 2040, and the license for the Mystic facility expires in 2050. See Note 8 to the Financial Statements for additional information on the September 2013 agreement for the sale of the Montana hydroelectric facilities. Also see Note 11 for information on a pending arbitration related to the conveyance price for the Kerr Dam.

In connection with the relicensing of these generating facilities, applicable law permits the FERC to relicense the original licensee or license a new licensee or allow the U.S. government to take over the facility. If the original licensee is not relicensed, it is compensated for its net investment in the facility, not to exceed the fair value of the property taken, plus reasonable damages to other property affected by the lack of relicensing. See Note 15 to the Financial Statements for additional information on the Kerr Dam license.

- **Other Corporate Functions** (PPL)

PPL Services provides corporate functions such as financial, legal, supply chain, human resources and information technology services. Most of PPL Services' costs are charged directly to the respective PPL subsidiaries for the services provided or indirectly charged to applicable subsidiaries based on an average of the subsidiaries' relative invested capital, operation and maintenance expenses and number of employees.

PPL Capital Funding, PPL's financing subsidiary, provides financing for the operations of PPL and certain subsidiaries. PPL's growth in rate-regulated businesses provides the organization with an enhanced corporate level financing alternative, through PPL Capital Funding, that further enables PPL to cost effectively support targeted credit profiles across all of PPL's rated companies. As a result, PPL plans to further utilize PPL Capital Funding in future financings, in addition to continued direct financing by the operating companies.

Unlike PPL Services, PPL Capital Funding's costs are not generally charged to any PPL subsidiaries. Costs are charged directly to PPL. However, PPL Capital Funding participated significantly in the financing for the acquisitions of LKE and WPD Midlands and certain associated financing costs were charged directly to the Kentucky and U.K. Regulated segments. The associated financing costs, as well as the financing costs associated with prior issuances of certain other PPL Capital Funding securities, have been and will continue to be assigned to the appropriate segments for purposes of PPL management's assessment of segment performance. The financing costs associated primarily with PPL Capital Funding's securities issuances in 2013 and beyond, with certain exceptions including the remarketing of the debt component of the Equity Units, have not been directly assigned or allocated to any segment.

(All Registrants)

SEASONALITY

The demand for and market prices of electricity and natural gas are affected by weather. As a result, the Registrants' operating results in the future may fluctuate substantially on a seasonal basis, especially when more severe weather conditions such as heat waves or extreme winter weather make such fluctuations more pronounced. The pattern of this fluctuation may change depending on the type and location of the facilities owned, the retail load served and the terms of contracts to purchase or sell electricity. See "Financial Condition - Environmental Matters" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for additional information regarding climate change.

FINANCIAL CONDITION

See "Financial Condition" in Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for this information.

CAPITAL EXPENDITURE REQUIREMENTS

See "Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash - Capital Expenditures" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for information concerning projected capital expenditure requirements for 2014 through 2018. See Note 15 to the Financial Statements for additional information concerning the potential impact on capital expenditures from environmental matters.

ENVIRONMENTAL MATTERS

The Registrants are subject to certain existing and developing federal, regional, state and local laws and regulations with respect to air and water quality, land use and other environmental matters. The EPA is in the process of proposing and finalizing an unprecedented number of environmental regulations that will directly affect the electricity industry. These initiatives cover air, water and waste. See "Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash - Capital Expenditures" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" on projected environmental capital expenditures for the years 2014-2018. Also, see "Environmental Matters" in Note 15 to the Financial Statements for additional information. To comply with primarily air-related environmental requirements, PPL's forecast for environmental capital expenditures reflects a best estimate projection of expenditures that may be required within the next five years. Such projections are \$2.4 billion for PPL, including \$2.2 billion for LKE (\$1.1 billion each for LG&E and KU), and \$279 million for PPL Energy Supply. Actual costs (including capital, emission allowance purchases and operational modifications) may be significantly lower or higher depending on the final compliance requirements and market conditions. PPL's and LKE's subsidiaries may also incur capital expenditures and operating expenses, which are not now determinable, but could be significant. Most environmental compliance costs incurred by LG&E and KU are subject to recovery through a rate recovery mechanism. See Note 6 to the Financial Statements for additional information.

EMPLOYEE RELATIONS

At December 31, 2013, PPL and its subsidiaries had the following full-time employees.

PPL Energy Supply (a)	4,912
PPL Electric	2,239
LKE	
KU	945
LG&E	999
LKS	1,446
Total LKE	3,390
PPL Global (primarily WPD)	6,309
PPL Services and other	1,258
Total PPL	18,108

(a) Includes labor union employees of mechanical contracting subsidiaries, whose numbers tend to fluctuate due to the nature of this business.

At December 31, 2013, the breakdown of the total workforce that is represented by labor unions was:

	<u>Number of Employees</u>	<u>Percent of Total Workforce</u>
PPL	9,713	54%
PPL Energy Supply	3,063	62%
PPL Electric	1,419	63%
LKE	843	25%
LG&E	701	70%
KU	142	15%

There are 4,016 employees of WPD who are members of labor unions (or 64% of PPL's U.K. workforce). WPD recognizes four unions, the largest of which represents 40% of its union workforce. WPD's Electricity Business Agreement, which covers 3,941 union employees, may be amended by agreement between WPD and the unions and can be terminated with 12 months' notice by either side.

AVAILABLE INFORMATION

PPL's Internet website is www.pplweb.com. Under the Investor heading of that website, PPL provides access to all SEC filings of the Registrants (including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(d) or 15(d)) free of charge, as soon as reasonably practicable after filing with the SEC. Additionally, the Registrants' filings are available at the SEC's website (www.sec.gov) and at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549, or by calling 1-800-SEC-0330.

ITEM 1A. RISK FACTORS

The Registrants face various risks associated with their businesses. Our businesses, financial condition, cash flows or results of operations could be materially adversely affected by any of these risks. In addition, this report also contains forward-looking and other statements about our businesses that are subject to numerous risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 15 to the Financial Statements for more information concerning the risks described below and for other risks, uncertainties and factors that could impact our businesses and financial results.

As used in this Item 1A., the terms "we," "our" and "us" generally refer to PPL and its consolidated subsidiaries taken as a whole, or to PPL Energy Supply and its consolidated subsidiaries taken as a whole within the Supply segment discussions, or PPL Electric and its consolidated subsidiaries taken as a whole within the Pennsylvania Regulated segment discussion, or LKE and its consolidated subsidiaries taken as a whole within the Kentucky Regulated segment discussion.

Risks Related to All Segments

(All Registrants)

We plan to selectively pursue growth of transmission and distribution capacity, and to optimize our merchant and regulated generation operations, which involves a number of uncertainties and may not achieve the desired financial results.

We plan to pursue expansion of our transmission and distribution capacity over the next several years and to optimize our merchant and regulated generation operations. We plan to do this through the potential construction or acquisition of transmission and distribution projects and capital investments to upgrade transmission and distribution infrastructure, and power uprates at certain of our existing power plants, the construction of new power plants or modification of existing power plants, and the potential closure of certain existing plants. These types of projects involve numerous risks. Any planned power uprates could result in cost overruns, reduced plant efficiency and higher operating and other costs. With respect to the construction of new plants or modification of existing plants, or the construction or acquisition of transmission and distribution projects, we may be required to expend significant sums for preliminary engineering, permitting, resource exploration, legal and other expenses before it can be established whether a project is feasible, economically attractive or capable of being financed. Expansion in our regulated businesses is dependent on future load or service requirements and subject to applicable regulatory processes. The success of both a new or acquired project would likely be contingent, among other things, upon the negotiation of satisfactory operating contracts, obtaining acceptable financing and maintaining acceptable credit ratings, as well as receipt of required and appropriate governmental approvals. If we were unable to complete construction or expansion of a project, we may not be able to recover our investment in the project. Furthermore, we might be unable to operate any new or modified plants as efficiently as projected, which could result in higher than projected operating and other costs and reduced earnings.

Adverse economic conditions could adversely affect our financial condition and results of operations.

Declines in wholesale energy prices, partially resulting from adverse economic conditions, have significantly impacted our earnings. The breadth and depth of these negative economic conditions had a wide-ranging impact on the U.S. and U.K. business environment, including our businesses, and demand for energy commodities has declined significantly. This reduced demand continues to impact the key domestic wholesale energy markets we serve (such as PJM) and our Pennsylvania and Kentucky utility businesses. The combination of lower demand for power and increased supply of natural gas has put downward price pressure on wholesale energy markets in general, further impacting our energy marketing results. In general, economic and commodity market conditions will continue to challenge predictability regarding our unhedged future energy margins, utility profits, liquidity and overall financial condition.

Disruption in financial markets could adversely affect our financial condition and results of operations.

Our businesses are heavily dependent on credit and capital, among other things, for capital expenditures and providing collateral to support hedging in our energy marketing business. Regulations being implemented under the Dodd-Frank Act and Basel III in Europe may impose costly additional requirements on our businesses and the businesses of others with whom we contract, such as banks or other counterparties, or simply result in increased costs to conduct our business or access sources of capital and liquidity upon which the conduct of our businesses is dependent.

We could be negatively affected by rising interest rates, downgrades to our bond credit ratings, adverse credit market conditions or other negative developments in our ability to access capital markets.

In the ordinary course of business, we are reliant upon adequate long-term and short-term financing to fund our significant capital expenditures, debt service and operating needs. As a capital-intensive business, we are sensitive to developments in interest rates; credit rating considerations; insurance, security or collateral requirements; market liquidity and credit availability and refinancing opportunities necessary or advisable to respond to credit market changes. Changes in these conditions could result in increased costs and decreased availability of credit.

A downgrade in our credit ratings could negatively affect our ability to access capital and increase the cost of maintaining our credit facilities and any new debt.

Credit ratings assigned by Moody's, Fitch and S&P to our businesses and their financial obligations have a significant impact on the cost of capital incurred by our businesses. A ratings downgrade could increase our short-term borrowing costs and negatively affect our ability to fund liquidity needs and access new long-term debt at acceptable interest rates. See "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Liquidity and Capital Resources - Ratings Triggers" for additional information on the financial impact of a downgrade in our credit ratings.

Our operating revenues could fluctuate on a seasonal basis, especially as a result of extreme weather conditions.

Our businesses are subject to seasonal demand cycles. For example, in some markets demand for, and market prices of, electricity peak during hot summer months, while in other markets such peaks occur in cold winter months. As a result, our overall operating results in the future may fluctuate substantially on a seasonal basis if weather conditions such as heat waves, extreme cold, unseasonably mild weather or severe storms occur. The patterns of these fluctuations may change depending on the type and location of our facilities and the terms of our contracts to sell electricity.

Operating expenses could be affected by weather conditions, including storms, as well as by significant man-made or accidental disturbances, including terrorism or natural disasters.

Weather and these other factors can significantly affect our profitability or operations by causing outages, damaging infrastructure and requiring significant repair costs. Storm outages and damage often directly decrease revenues and increase expenses, due to reduced usage and restoration costs.

The operation of our businesses is subject to cyber-based security and integrity risk.

Numerous functions affecting the efficient operation of our businesses are dependent on the secure and reliable storage, processing and communication of electronic data and the use of sophisticated computer hardware and software systems. The operation of our generation plants, including the Susquehanna nuclear plant, and of our energy and fuel trading businesses, as well as our transmission and distribution operations are all reliant on cyber-based technologies and, therefore, subject to the risk that such systems could be the target of disruptive actions, principally by terrorists or vandals, or otherwise be compromised by unintentional events. As a result, operations could be interrupted, property could be damaged and customer information lost or stolen, causing us to incur significant losses of revenues, other substantial liabilities and damages and costs to replace or repair damaged equipment.

Our businesses are subject to physical, market and economic risks relating to potential effects of climate change.

Climate change may produce changes in weather or other environmental conditions, including temperature or precipitation levels, and thus may impact consumer demand for electricity. These or other meteorological changes could lead to increased operating costs, capital expenses or power purchase costs. Greenhouse gas regulation could increase the cost of electricity, particularly power generated by fossil fuels, and such increases could have a depressive effect on regional economies. Reduced economic and consumer activity in our service areas -- both generally and specific to certain industries and consumers accustomed to previously lower cost power -- could reduce demand for the power we generate, market and deliver. Also, demand for our energy-related services could be similarly lowered should consumers' preferences or market factors move toward favoring energy efficiency, low-carbon power sources or reduced electricity usage.

We cannot predict the outcome of the legal proceedings and investigations currently being conducted with respect to our current and past business activities. An adverse determination could have a material adverse effect on our financial condition, results of operations or cash flows.

We are involved in legal proceedings, claims and litigation and subject to ongoing state and federal investigations arising out of our business operations, the most significant of which are summarized in "Federal Matters" in Note 6 and "Legal Matters," "Regulatory Issues" and "Environmental Matters - Domestic" in Note 15 to the Financial Statements. We cannot predict the ultimate outcome of these matters, nor can we reasonably estimate the costs or liabilities that could potentially result from a negative outcome in each case.

Significant increases in our operation and maintenance expenses, including health care and pension costs, could adversely affect our future earnings and liquidity.

We continually focus on limiting and reducing our operation and maintenance expenses. However, we expect to continue to face increased cost pressures in our operations. Increased costs of materials and labor may result from general inflation, increased regulatory requirements (especially in respect of environmental regulations), the need for higher-cost expertise in the workforce or other factors. In addition, pursuant to collective bargaining agreements, we are contractually committed to provide specified levels of health care and pension benefits to certain current employees and retirees. We provide a similar level of benefits to our management employees. These benefits give rise to significant expenses. Due to general inflation with respect to such costs, the aging demographics of our workforce and other factors, we have experienced significant health care cost inflation in recent years, and we expect our health care costs, including prescription drug coverage, to continue to increase despite measures that we have taken and expect to take to require employees and retirees to bear a higher portion of the costs of their health care benefits. In addition, we expect to continue to incur significant costs with respect to the defined benefit pension plans for our employees and retirees. The measurement of our expected future health care and pension obligations, costs and liabilities is highly dependent on a variety of assumptions, most of which relate to factors beyond our control. These assumptions include investment returns, interest rates, health care cost trends, inflation rates, benefit improvements, salary increases and the demographics of plan participants. If our assumptions prove to be inaccurate, our future costs and cash contribution requirements to fund these benefits could increase significantly.

We may be required to record impairment charges in the future for certain of our investments, which could adversely affect our earnings.

Under GAAP, we are required to test our recorded goodwill for impairment on an annual basis, or more frequently if events or circumstances indicate that these assets may be impaired. Although no goodwill impairments were recorded based on our annual review in the fourth quarter of 2013, we are unable to predict whether future impairment charges may be necessary.

We also review our long-lived assets, including equity investments, for impairment when events or circumstances indicate that the carrying value of these assets may not be recoverable. See Notes 1, 9 and 18 to the Financial Statements for additional information on impairment charges taken and analysis performed during the reporting periods. We are unable to predict whether impairment charges, or other losses on sales of other assets or businesses, may occur in future years.

We may incur liabilities in connection with discontinued operations.

In connection with various divestitures, and certain other transactions, we have indemnified or guaranteed parties against certain liabilities. These indemnities and guarantees relate, among other things, to liabilities which may arise with respect to the period during which we or our subsidiaries operated a divested business, and to certain ongoing contractual relationships and entitlements with respect to which we or our subsidiaries made commitments in connection with the divestiture. See "Guarantees and Other Assurances" in Note 15 to the Financial Statements.

We are subject to liability risks relating to our generation, transmission and distribution operations.

The conduct of our physical and commercial operations subjects us to many risks, including risks of potential physical injury, property damage or other financial liability, caused to or by employees, customers, contractors, vendors, contractual or financial counterparties and other third parties.

Our facilities may not operate as planned, which may increase our expenses and decrease our revenues and have an adverse effect on our financial performance.

Operation of power plants, transmission and distribution facilities, information technology systems and other assets and activities subjects us to a variety of risks, including the breakdown or failure of equipment, accidents, security breaches, viruses or outages affecting information technology systems, labor disputes, obsolescence, delivery/transportation problems and disruptions of fuel supply and performance below expected levels. These events may impact our ability to conduct our businesses efficiently and lead to increased costs, expenses or losses. Operation of our delivery systems below our expectations may result in lost revenue and increased expense, including higher maintenance costs which may not be recoverable from customers. Planned and unplanned outages at our power plants may require us to purchase power at then-current market prices to satisfy our commitments or, in the alternative, pay penalties and damages for failure to satisfy them.

Although we maintain customary insurance coverage for certain of these risks, no assurance can be given that such insurance coverage will be sufficient to compensate us fully in the event losses occur.

We are subject to risks associated with federal and state tax laws and regulations.

Changes in tax law as well as the inherent difficulty in quantifying potential tax effects of business decisions could negatively impact our results of operations. We are required to make judgments in order to estimate our obligations to taxing authorities. These tax obligations include income, property, gross receipts and franchise, sales and use, employment-related and other taxes. We also estimate our ability to utilize tax benefits and tax credits. Due to the revenue needs of the jurisdictions in which our businesses operate, various tax and fee increases may be proposed or considered. We cannot predict whether such tax legislation or regulation will be introduced or enacted or the effect of any such changes on our businesses. If enacted, any changes could increase tax expense and could have a significant negative impact on our results of operations and cash flows.

We are subject to the risk that our workforce and its knowledge base may become depleted in coming years.

PPL is experiencing an increase in attrition due primarily to the number of retiring employees. Over the period from 2014 through 2018, 23.5% of PPL's total workforce is projected to leave the company, with the risk that critical knowledge will be lost and that it may be difficult to replace departed personnel due to a declining trend in the number of available skilled workers and an increase in competition for such workers.

(PPL, PPL Energy Supply and LKE)

Risk Related to Registrant Holding Companies

PPL's, PPL Energy Supply's and LKE's cash flows and ability to meet their obligations with respect to indebtedness and under guarantees, and PPL's ability to pay dividends, largely depends on the financial performance of their subsidiaries and, as a result, is effectively subordinated to all existing and future liabilities of those subsidiaries.

PPL, PPL Energy Supply and LKE are holding companies and conduct their operations primarily through subsidiaries. Substantially all of the consolidated assets of these Registrants are held by such subsidiaries. Accordingly, their cash flows and ability to meet debt and guaranty obligations, as well as PPL's ability to pay dividends, are largely dependent upon the earnings of those subsidiaries and the distribution or other payment of such earnings in the form of dividends, distributions, loans or advances or repayment of loans and advances. The subsidiaries are separate and distinct legal entities and have no obligation to pay dividends or distributions to their parents or to make funds available for such a payment. The ability of the Registrants' subsidiaries to pay dividends or distributions in the future will depend on the subsidiaries' future earnings and cash flows and the needs of their businesses, and may be restricted by their obligations to holders of their outstanding debt and other creditors, as well as any contractual or legal restrictions in effect at such time, including the requirements of state corporate law applicable to payment of dividends and distributions, and regulatory requirements, including restrictions on the ability of PPL Electric, LG&E and KU to pay dividends under Section 305(a) of the Federal Power Act.

Because PPL, PPL Energy Supply and LKE are holding companies, their debt and guaranty obligations are effectively subordinated to all existing and future liabilities of their subsidiaries. Although certain agreements to which certain subsidiaries are parties limit their ability to incur additional indebtedness, PPL, PPL Energy Supply and LKE and their subsidiaries retain the ability to incur substantial additional indebtedness and other liabilities. Therefore, PPL's, PPL Energy Supply's and LKE's rights and the rights of their creditors, including rights of any debt holders, to participate in the assets of any of their subsidiaries, in the event that such a subsidiary is liquidated or reorganized, will be subject to the prior claims of such subsidiary's creditors. In addition, if PPL elects to receive distributions of earnings from its foreign operations, PPL may incur U.S. income taxes, net of any available foreign tax credits, on such amounts.

(PPL)

Risks Related to U.K. Regulated Segment

Our U.K. delivery business is subject to risks with respect to rate regulation and operational performance.

Our U.K. delivery businesses are rate-regulated and operate under an incentive-based regulatory framework. Managing operational risk is critical to the U.K. Regulated Segment's financial performance. Disruption to these distribution networks could reduce profitability both directly by incurring costs for network restoration and also through the system of penalties and rewards that Ofgem administers relating to customer service levels.

A failure by any of our U.K. regulated businesses to comply with the terms of a distribution license may lead to the issuance of an enforcement order by Ofgem that could have an adverse impact on PPL.

Ofgem has powers to levy fines of up to ten percent of revenue for any breach of a distribution license or, in certain circumstances, such as insolvency, the distribution license itself may be revoked. Ofgem also has formal powers to propose modifications to each distribution license and there can be no assurance that a restrictive modification will not be introduced in the future, which could have an adverse effect on the operations and financial condition of the U.K. regulated businesses and PPL.

Various changes have been implemented by Ofgem to the current electricity distribution, gas transmission and gas distribution regulatory frameworks in the U.K. and there can be no assurance as to the effects such changes will have on our U.K. regulated businesses in the future.

Ofgem is implementing a new regulatory framework to become effective April 1, 2015 for the electricity distribution sector in the U.K. The framework, known as RIIO (Revenues = Incentives + Innovation + Outputs), focuses on sustainability, environmental-focused output measures, promotion of low carbon energy networks and financing of new investments. The new regulatory framework is expected to have a wide-ranging effect on electricity distribution companies operating in the U.K., including extending the price review periods from five to eight years. Our U.K. regulated businesses' compliance with this new regulatory framework may result in significant additional capital expenditures, increases in operating and compliance costs and adjustments to our pricing models. In addition, if we are unable for any reason to realize the goals of our business plans for these businesses, we may not earn sufficient incentive compensation to maintain prior revenue levels.

We are subject to increased foreign currency exchange rate risks because a majority of our cash flows and reported earnings are currently generated by our U.K. Business operations.

These risks relate primarily to changes in the relative value of the British pound sterling and the U.S. dollar between the time we initially invest U.S. dollars in our U.K. businesses and the time that cash is repatriated to the U.S. from the U.K., including cash flows from our U.K. businesses that may be distributed to PPL or used for repayments of intercompany loans or other general corporate purposes. In addition, PPL's consolidated reported earnings on a U.S. GAAP basis may be subject to increased earnings translation risk, which is the result of the conversion of earnings as reported in our U.K. businesses on a British pound sterling basis to a U.S. dollar basis in accordance with U.S. GAAP requirements.

Our U.K. distribution business contributes a significant portion of PPL's total annual revenues and exposes us to the following additional risks related to operating outside the U.S., including risks associated with changes in U.K. laws and regulations, taxes, economic conditions and political conditions and policies of the U.K. government and the European Union. These risks may reduce the results of operations from our U.K. distribution business or affect our ability to access U.K. revenues for payment of distributions or for other corporate purposes in the U.S.

- changes in laws or regulations relating to U.K. operations, including tax laws and regulations;
- changes in government policies, personnel or approval requirements;
- changes in general economic conditions affecting the U.K.;
- regulatory reviews of tariffs for distribution companies;
- changes in labor relations;
- limitations on foreign investment or ownership of projects and returns or distributions to foreign investors;
- limitations on the ability of foreign companies to borrow money from foreign lenders and lack of local capital or loans;
- changes in U.S. tax law applicable to taxation of foreign earnings; and
- compliance with U.S. foreign corrupt practices laws.

(All Registrants except PPL Energy Supply)

Risks Related to Domestic Regulated Utility Operations

Our domestic regulated utility businesses face many of the same risks, in addition to those risks that are unique to each of the Kentucky Regulated segment and the Pennsylvania Regulated segment. Set forth below are risk factors common to both domestic regulated segments, followed by sections identifying separately the risks specific to each of these segments.

Our profitability is highly dependent on our ability to recover the costs of providing energy and utility services to our customers and earn an adequate return on our capital investments. Regulators may not approve the rates we request.

The rates we charge our utility customers must be approved by one or more federal or state regulatory commissions, including the FERC, KPSC, VSCC, TRA and PUC. Although rate regulation is generally premised on the recovery of prudently incurred costs and a reasonable rate of return on invested capital, there can be no assurance that regulatory authorities will consider all of our costs to have been prudently incurred or that the regulatory process by which rates are determined will always result in rates that achieve full recovery of our costs or an adequate return on our capital investments. In any rate-setting proceedings, federal or state agencies, intervenors and other permitted parties may challenge our rate requests, and ultimately reduce, alter or limit the rates we seek. Although our rates are generally regulated based on an analysis of our costs incurred in a base year or based on future projected costs, the rates we are allowed to charge may or may not match our costs at any given time. Our domestic regulated utility businesses are subject to substantial capital expenditure requirements over the next several years, which will likely require rate increase requests to the regulators. If our costs are not adequately recovered through rates, it could have an adverse effect on our business, results of operations, cash flows and financial condition.

Our domestic utility businesses are subject to significant and complex governmental regulation.

In addition to regulating the rates we charge, various federal and state regulatory authorities regulate many aspects of our domestic utility operations, including:

- the terms and conditions of our service and operations;
- financial and capital structure matters;
- siting, construction and operation of facilities;
- mandatory reliability and safety standards under the Energy Policy Act of 2005 and other standards of conduct;
- accounting, depreciation and cost allocation methodologies;
- tax matters;
- affiliate transactions;
- acquisition and disposal of utility assets and issuance of securities; and
- various other matters, including energy efficiency.

Such regulations or changes thereto may subject us to higher operating costs or increased capital expenditures and failure to comply could result in sanctions or possible penalties which may not be recoverable from customers.

Changes in transmission and wholesale power market structures could increase costs or reduce revenues.

Wholesale revenues fluctuate with regional demand, fuel prices and contracted capacity. Changes to transmission and wholesale power market structures and prices may occur in the future, are not predictable and may result in unforeseen effects on energy purchases and sales, transmission and related costs or revenues. These can include commercial or regulatory changes affecting power pools, exchanges or markets in which our domestic utilities participate.

Our domestic regulated businesses undertake significant capital projects and these activities are subject to unforeseen costs, delays or failures, as well as risk of inadequate recovery of resulting costs.

The domestic regulated utility businesses are capital intensive and require significant investments in energy generation (in the case of LG&E and KU) and transmission, distribution and other infrastructure projects, such as projects for environmental compliance and system reliability. The completion of these projects without delays or cost overruns is subject to risks in many areas, including:

- approval, licensing and permitting;
- land acquisition and the availability of suitable land;
- skilled labor or equipment shortages;
- construction problems or delays, including disputes with third-party intervenors;
- increases in commodity prices or labor rates;
- contractor performance;
- environmental considerations and regulations;
- weather and geological issues; and
- political, labor and regulatory developments.

Failure to complete our capital projects on schedule or on budget, or at all, could adversely affect our financial performance, operations and future growth if such expenditures are not granted rate recovery by our regulators.

Risks Specific to Kentucky Regulated Segment

(PPL, LKE, LG&E and KU)

The costs of compliance with, and liabilities under, environmental laws are significant and are subject to continuing changes.

Extensive federal, state and local environmental laws and regulations are applicable to LG&E's and KU's generation business, including its air emissions, water discharges and the management of hazardous and solid waste, among other business-related activities, and the costs of compliance or alleged non-compliance cannot be predicted but could be material. In addition, our costs may increase significantly if the requirements or scope of environmental laws, regulations or similar rules are expanded or changed. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or forfeitures, operations changes, permit limitations or other restrictions. At some of our older generating facilities it may be uneconomic for us to install necessary pollution control equipment, which could cause us to retire those units. Market prices for energy and capacity also affect this cost-effectiveness analysis. Many of these environmental law considerations are also applicable to the operations of our key suppliers, or customers, such as coal producers and industrial power users, and may impact the costs of their products and demand for our services.

Ongoing changes in environmental regulations or their implementation requirements and our compliance strategies relating thereto entail a number of uncertainties.

The environmental standards governing LG&E's and KU's businesses, particularly as applicable to coal-fired generation and related activities, continue to be subject to uncertainties due to ongoing rulemakings and other regulatory developments, legislative activities and litigation. Revisions to applicable standards, changes in compliance deadlines and invalidation of rules on appeal may require major changes in compliance strategies, operations or assets and adjustments to prior plans. Depending on the extent, frequency and timing of such changes, the companies may be subject to inconsistent requirements under multiple regulatory programs, compressed windows for decision-making and short compliance deadlines that may require aggressive schedules for construction, permitting, and other regulatory approvals. Under such circumstances, the companies may face higher risks of unsuccessful implementation of environmental-related business plans, noncompliance with applicable environmental rules, delayed or incomplete rate recovery or increased costs of implementation.

Risks Specific to Pennsylvania Regulated Segment

(PPL and PPL Electric)

We may be subject to higher transmission costs and other risks as a result of PJM's regional transmission expansion plan (RTEP) process.

PJM and the FERC have authority to require upgrades or expansion of the regional transmission grid, which can result in substantial expenditures for transmission owners. As discussed in Note 8 to the Financial Statements, we expect to make substantial expenditures to construct the Susquehanna-Roseland and Northeast/Pocono transmission lines that PJM has determined are necessary for the reliability of the regional transmission grid. Although the FERC has granted our request for incentive rate treatment of such facilities, we cannot be certain that all costs that we may incur will be recoverable. In addition, the date when these facilities will be in service, which can be significantly impacted by delays related to public opposition or other factors, is subject to the outcome of future events that are not all within our control. As a result, we cannot predict the ultimate financial or operational impact of this project or other RTEP projects on PPL Electric.

We could be subject to higher costs and/or penalties related to Pennsylvania Conservation and Energy Efficiency Programs.

PPL Electric is subject to Act 129 which contains requirements for energy efficiency and conservation programs and for the use of smart metering technology, imposes PLR electricity supply procurement rules, provides remedies for market misconduct, and made changes to the existing AEPS. The law also requires electric utilities to meet specified goals for reduction in customer electricity usage and peak demand. Utilities not meeting these Act 129 requirements are subject to significant penalties that cannot be recovered in rates. Numerous factors outside of our control could prevent compliance with these requirements and result in penalties to us.

Risks Related to Supply Segment

(PPL and PPL Energy Supply)

Our costs to comply with existing and new environmental laws are expected to continue to be significant, and we plan to incur significant capital expenditures for pollution control improvements that could adversely affect our profitability and liquidity or cause the continued operation of certain generation facilities to be uneconomic.

Our business is subject to extensive federal, state and local statutes, rules and regulations relating to environmental protection. To comply with existing and future environmental requirements and as a result of voluntary pollution control measures we may take, we have spent and expect to spend substantial amounts in the future on environmental control and compliance.

Since 2005, we have spent more than \$1.6 billion to install scrubbers and other pollution control equipment in our competitive generation fleet in order to comply with existing and proposed federal and state environmental laws and regulations primarily governing air emissions from coal-fired plants. Many states and environmental groups, however, have challenged certain federal laws and regulations relating to air emissions as not being sufficiently strict. In addition, more recently, attention has also been refocused on effluent emissions and the handling of CCRs. As a result, state and federal regulations have been adopted that would impose more stringent restrictions than are currently in effect, which could require us significantly to increase capital expenditures for additional pollution control equipment. At some of our older generating facilities it may be uneconomic for us to install necessary pollution control equipment, which could cause us to retire those units.

We may not be able to obtain or maintain all environmental regulatory approvals necessary for our planned capital projects which are necessary to our business. If there is a delay in obtaining any required environmental regulatory approval or if we fail to obtain, maintain or comply with any such approval, operations at our affected facilities could be halted, reduced or subjected to additional costs.

We face intense competition in our energy supply business, which may adversely affect our ability to operate profitably.

Unlike our rate-regulated utility businesses, our energy supply business is dependent on our ability to operate in a competitive environment and is not assured of any rate of return on capital investments through a regulated rate structure. Competition is affected by electricity and fuel prices, new market entrants, construction by others of generating assets and transmission capacity, technological advances in power generation, the actions of environmental and other regulatory authorities and other factors. These competitive factors may negatively affect our ability to sell electricity and related products and services, as well as the prices that we may charge for such products and services, which could adversely affect our results of operations and our ability to grow our business.

We sell our available energy and capacity into the competitive wholesale markets through contracts of varying duration. Competition in the wholesale power markets occurs principally on the basis of the price of products and, to a lesser extent, on the basis of reliability and availability. We believe that the commencement of commercial operation of new electricity generating facilities in the regional markets where we own or control generation capacity and the evolution of demand side management resources will continue to increase competition in the wholesale electricity market in those regions, which could have an adverse effect on electricity and capacity prices.

We also face competition in the wholesale markets for generation capacity and ancillary services. We primarily compete with other electricity suppliers based on our ability to aggregate supplies at competitive prices from different sources and to efficiently utilize transportation from third-party pipelines and transmission from electric utilities and ISOs. We also compete against other energy marketers on the basis of relative financial condition and access to credit sources, and our competitors may have greater financial resources than we have.

Competitors in the wholesale power markets in which PPL Generation subsidiaries and PPL EnergyPlus operate include regulated utilities, industrial companies, non-utility generators, competitive subsidiaries of regulated utilities and financial institutions.

Adverse changes in commodity prices and related costs may decrease our future energy margins, which could adversely affect our earnings and cash flows.

Our energy margins, or the amount by which our revenues from the sale of power exceed our costs to supply power, are impacted by changes in market prices for electricity, fuel, fuel transportation, emission allowances, RECs, electricity capacity and related congestion charges and other costs. Unlike most commodities, the limited ability to store electricity requires that it must be consumed at the time of production. As a result, wholesale market prices for electricity may fluctuate substantially over relatively short time periods and can be unpredictable. Among the factors that influence such prices are:

- demand for electricity;
- supply for electricity available from current or new generation resources;
- variable production costs, primarily fuel (and associated transportation costs) and emission allowance expense for the generation resources used to meet the demand for electricity;
- transmission capacity and service into, or out of, markets served;
- changes in the regulatory framework for wholesale power markets;
- liquidity in the wholesale electricity market, as well as general creditworthiness of key participants in the market; and
- weather and economic conditions affecting demand for or the price of electricity or the facilities necessary to deliver electricity.

Our risk management policy and programs relating to electricity and fuel prices, interest rates and counterparty credit and non-performance risks may not work as planned, and we may suffer economic losses despite such programs.

We actively manage the market risk inherent in our generation and energy marketing activities, as well as our debt and counterparty credit positions. We have implemented procedures to monitor compliance with our risk management policy and programs, including independent validation of transaction and market prices, verification of risk and transaction limits, portfolio stress tests, sensitivity analyses and daily portfolio reporting of various risk management metrics. Nonetheless, our risk management programs may not work as planned. For example, actual electricity and fuel prices may be significantly different or more volatile than the historical trends and assumptions upon which we based our risk management calculations. Additionally, unforeseen market disruptions could decrease market depth and liquidity, negatively impacting our ability to enter into new transactions. We enter into financial contracts to hedge commodity basis risk, and as a result are exposed to the risk that the correlation between delivery points could change with actual physical delivery. Similarly, interest rates or foreign currency exchange rates could change in significant ways that our risk management procedures were not designed to address. As a result, we cannot always predict the impact that our risk management decisions may have on us if actual events result in greater losses or costs than our risk models predict or greater volatility in our earnings and financial position.

In addition, our trading, marketing and hedging activities are exposed to counterparty credit risk and market liquidity risk. We have adopted a credit risk management policy and program to evaluate counterparty credit risk. However, if counterparties fail to perform, we may be forced to enter into alternative arrangements at then-current market prices. In that event, our financial results could be adversely affected.

We do not always hedge against risks associated with electricity and fuel price volatility.

We attempt to mitigate risks associated with satisfying our contractual electricity sales obligations by either reserving generation capacity to deliver electricity or purchasing the necessary financial or physical products and services through competitive markets to satisfy our net firm sales contracts. We also routinely enter into contracts, such as fuel and electricity purchase and sale commitments, to hedge our exposure to fuel requirements and other electricity-related commodities. However, based on economic and other considerations, we may decide not to hedge the entire exposure of our operations from commodity price risk. To the extent we do not hedge against commodity price risk, our results of operations and financial position may be adversely affected.

We are exposed to operational, price and credit risks associated with selling and marketing products in the wholesale and retail electricity markets.

We purchase and sell electricity in wholesale markets under market-based tariffs authorized by FERC throughout the U.S. and also enter into short-term agreements to market available electricity and capacity from our generation assets with the expectation of profiting from market price fluctuations. If we are unable to deliver firm capacity and electricity under these agreements, we could be required to pay damages. These damages would generally be based on the difference between the market price to acquire replacement capacity or electricity and the contract price of any undelivered capacity or electricity. Depending on price volatility in the wholesale electricity markets, such damages could be significant. Extreme weather conditions, unplanned generation facility outages, environmental compliance costs, transmission disruptions, and other factors could affect our ability to meet our obligations, or cause significant increases in the market price of replacement capacity and electricity.

Our wholesale power agreements typically include provisions requiring us to post collateral for the benefit of our counterparties if the market price of energy varies from the contract prices in excess of certain pre-determined amounts. We currently believe that we have sufficient credit to fulfill our potential collateral obligations under these power contracts. However, our obligation to post collateral could exceed the amount of our facilities or our ability to increase our facilities could be limited by financial markets or other factors. See Note 7 to the Financial Statements for a discussion of PPL's credit facilities.

We also face credit risk that counterparties with whom we contract in both the wholesale and retail markets will default in their performance, in which case we may have to sell our electricity into a lower-priced market or make purchases in a higher-priced market than existed at the inception of the contract. Whenever feasible, we attempt to mitigate these risks using various means, including agreements that require our counterparties to post collateral for our benefit if the market price of energy varies from the contract price in excess of certain pre-determined amounts. However, there can be no assurance that we will avoid counterparty nonperformance risk, including bankruptcy, which could adversely impact our ability to meet our obligations to other parties, which could in turn subject us to claims for damages.

The full-requirements sales contracts that PPL EnergyPlus is awarded do not provide for specific levels of load and actual load significantly below or above our forecasts could adversely affect our energy margins.

We generally hedge our full-requirements sales contracts with energy purchases from third parties, and to a lesser extent with our own generation. If the actual load is significantly lower than the expected load, we may be required to resell power at a lower price than was contracted for to supply the load obligation, resulting in a financial loss. Alternatively, a significant increase in load could adversely affect our energy margins because we are required under the terms of the full-requirements sales contracts to provide the energy necessary to fulfill increased demand at the contract price, which could be lower than the cost to procure additional energy on the open market. Therefore, any significant decrease or increase in load compared with our forecasts could have a material adverse effect on our results of operations and financial position.

Unforeseen changes in the price of coal and natural gas could cause us to incur excess coal inventories and contract termination costs.

Extraordinarily low natural gas prices during 2012 and 2013 caused natural gas to be the more cost-competitive fuel compared to coal for generating electricity. Because we enter into guaranteed supply contracts to provide for the amount of coal needed to operate our base load coal-fired generating facilities, we may experience periods where we hold excess amounts of coal if fuel pricing results in our reducing or idling coal-fired generating facilities in favor of operating available alternative natural gas-fired generating facilities. In addition, we may incur costs to terminate supply contracts for coal in excess of our generating requirements as occurred in 2012.

We may experience disruptions in our fuel supply, which could adversely affect our ability to operate our generation facilities.

We purchase fuel from a number of suppliers. Disruption in the delivery of fuel and other products consumed during the production of electricity (such as coal, natural gas, oil, water, uranium, lime, limestone and other chemicals), including disruptions as a result of weather, transportation difficulties, global demand and supply dynamics, labor relations, environmental regulations or the financial viability of our fuel suppliers, could adversely affect our ability to operate our facilities, which could result in lower sales and/or higher costs and thereby adversely affect our results of operations.

We rely on transmission and distribution assets that we do not own or control to deliver our wholesale electricity. If transmission is disrupted, or not operated efficiently, or if capacity is inadequate, our ability to sell and deliver power may be hindered.

We depend on transmission and distribution facilities owned and operated by utilities and other energy companies to deliver the electricity and natural gas we sell in the wholesale market, as well as the natural gas we purchase for use in our electricity generation facilities. If transmission is disrupted (as a result of weather, natural disasters or other reasons) or not operated efficiently by ISOs and RTOs, in applicable markets, or if capacity is inadequate, our ability to sell and deliver products and satisfy our contractual obligations may be hindered, or we may be unable to sell products on the most favorable terms.

The FERC has issued regulations that require wholesale electric transmission services to be offered on an open-access, non-discriminatory basis. Although these regulations are designed to encourage competition in wholesale market transactions for electricity, there is the potential that fair and equal access to transmission systems will not be available or that transmission capacity will not be available in the amounts we require. We cannot predict the timing of industry changes as a result of these initiatives or the adequacy of transmission facilities in specific markets or whether ISOs and RTOs in applicable markets will efficiently operate transmission networks and provide related services.

Despite federal and state deregulation initiatives, our supply business is still subject to extensive regulation, which may increase our costs, reduce our revenues, or prevent or delay operation of our facilities.

Our generation subsidiaries sell electricity into the wholesale market. Generally, our generation subsidiaries and our marketing subsidiaries are subject to regulation by the FERC. The FERC has authorized us to sell generation from our facilities and power from our marketing subsidiaries at market-based prices. The FERC retains the authority to modify or withdraw our market-based rate authority and to impose "cost of service" rates if it determines that the market is not competitive, that we possess market power or that we are not charging just and reasonable rates. Any reduction by the FERC in the rates we may receive or any unfavorable regulation of our business by state regulators could materially adversely affect our results of operations. See "Regulatory Issues - FERC Market-Based Rate Authority" in Note 15 to the Financial Statements for information regarding recent court decisions that could impact the FERC's market-based rate authority program.

In addition, the acquisition, construction, ownership and operation of electricity generation facilities require numerous permits, approvals, licenses and certificates from federal, state and local governmental agencies. We may not be able to obtain or maintain all required regulatory approvals. If there is a delay in obtaining any required regulatory approvals or if we fail to obtain or maintain any required approval or fail to comply with any applicable law or regulation, the operation of our assets and our sales of electricity could be prevented or delayed or become subject to additional costs.

Changes in technology may negatively impact the value of our power plants.

A basic premise of our generation business is that generating electricity at central power plants achieves economies of scale and produces electricity at relatively low prices. There are alternate technologies to produce electricity, most notably fuel cells, micro turbines, windmills and photovoltaic (solar) cells, the development of which has been expanded due to global climate change concerns. Research and development activities are ongoing to seek improvements in alternate technologies. It is possible that advances will reduce the cost of alternative generation to a level that is equal to or below that of certain central station production. Also, as new technologies are developed and become available, the quantity and pattern of electricity usage (the "demand") by customers could decline, with a corresponding decline in revenues derived by generators. These alternative energy sources could result in a decline to the dispatch and capacity factors of our plants. As a result of all of these factors, the value of our generation facilities could be significantly reduced.

We are subject to certain risks associated with nuclear generation, including the risk that our Susquehanna nuclear plant could become subject to increased security or safety requirements that would increase capital and operating expenditures, uncertainties regarding spent nuclear fuel, and uncertainties associated with decommissioning our plant at the end of its licensed life.

Nuclear generation accounted for about 33% of our 2013 competitive generation output. The risks of nuclear generation generally include:

- the potential harmful effects on the environment and human health from the operation of nuclear facilities and the storage, handling and disposal of radioactive materials;
- limitations on the amounts and types of insurance commercially available to cover losses and liabilities that might arise in connection with nuclear operations; and

- uncertainties with respect to the technological and financial aspects of decommissioning nuclear plants at the end of their licensed lives. The licenses for our two nuclear units expire in 2042 and 2044. See Note 21 to the Financial Statements for additional information on the ARO related to the decommissioning.

The NRC has broad authority under federal law to impose licensing requirements, including security, safety and employee-related requirements for the operation of nuclear generation facilities. In the event of noncompliance, the NRC has authority to impose fines or shut down a unit, or both, depending upon its assessment of the severity of the situation, until compliance is achieved. In addition, revised security or safety requirements promulgated by the NRC, particularly in response to the 2011 incident in Fukushima, Japan, could necessitate substantial capital or operating expenditures at our Susquehanna nuclear plant. There also remains substantial uncertainty regarding the temporary storage and permanent disposal of spent nuclear fuel, which could result in substantial additional costs to PPL that cannot be predicted. In addition, although we have no reason to anticipate a serious nuclear incident at our Susquehanna plant, if an incident did occur, any resulting operational loss, damages and injuries could have a material adverse effect on our results of operations, cash flows and financial condition. See Note 15 to the Financial Statements for a discussion of nuclear insurance.

ITEM 1B. UNRESOLVED STAFF COMMENTS

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

None.

ITEM 2. PROPERTIES

U.K. Regulated Segment (PPL)

For a description of WPD's service territory, see "Item 1. Business - General - Segment Information - U.K. Regulated Segment." WPD has electric distribution lines in public streets and highways pursuant to legislation and rights-of-way secured from property owners. At December 31, 2013, WPD's distribution system in the U.K. includes 1,600 substations with a total capacity of 68 million kVA, 57,180 circuit miles of overhead lines and 83,890 underground cable miles.

Kentucky Regulated Segment (PPL, LKE, LG&E and KU)

LG&E's and KU's properties consist primarily of regulated generation facilities, electric transmission and distribution assets and natural gas transmission and distribution assets in Kentucky. The capacity of generation units is based on a number of factors, including the operating experience and physical condition of the units, and may be revised periodically to reflect changed circumstances. The electric generating capacity at December 31, 2013 was:

Primary Fuel/Plant	Total MW Capacity Summer	LKE		LG&E		KU	
		Ownership or Lease Interest in MW	% Ownership	Ownership or Lease Interest in MW	% Ownership	Ownership or Lease Interest in MW	% Ownership
Coal							
Ghent - Units 1- 4	1,932	1,932				100.00	1,932
Mill Creek - Units 1- 4	1,472	1,472	100.00	1,472			
E.W. Brown - Units 1-3	682	682			100.00		682

	78	78		54			24
Total	10,337	8,079		3,340			4,739

- (a) Trimble County Unit 1 and Trimble County Unit 2 are jointly owned with Illinois Municipal Electric Agency and Indiana Municipal Power Agency. Each owner is entitled to its proportionate share of the units' total output and funds its proportionate share of capital, fuel and other operating costs. See Note 14 to the Financial Statements for additional information.
- (b) This unit is owned by OVEC. LG&E and KU have a power purchase agreement that entitles LG&E and KU to their proportionate share of the unit's total output and LG&E and KU fund their proportionate share of fuel and other operating costs. Clifty Creek is located in Indiana and Kyger Creek is located in Ohio. See Note 15 to the Financial Statements for additional information.
- (c) Includes a sale-leaseback interest on two combustion turbines. LG&E and KU provided funds to fully defease the lease including the purchase price and have the right to exercise an early purchase option contained in the lease after 15.5 years, which will occur in 2015. The financial statement treatment of this transaction is the same as if LG&E and KU had retained their ownership interests.
- (d) There is an inlet air cooling system attributable to these units. This inlet air cooling system is not jointly owned; however, it is used to increase production on the units to which it relates, resulting in an additional 10 MW of capacity for LG&E and an additional 88 MW of capacity for KU.

For a description of LG&E's and KU's service areas, see "Item 1. Business - General - Segment Information - Kentucky Regulated Segment." At December 31, 2013, LG&E's transmission system included in the aggregate, 45 substations (32 of which are shared with the distribution system) with a total capacity of 7 million kVA and 675 pole miles of lines. LG&E's distribution system included 97 substations (32 of which are shared with the transmission system) with a total capacity of 5 million kVA, 3,886 circuit miles of overhead lines and 2,419 underground cable miles. KU's transmission system included 137 substations (57 of which are shared with the distribution system) with a total capacity of 14 million kVA and 4,079 pole miles of lines. KU's distribution system included 480 substations (57 of which are shared with the transmission system) with a total capacity of 7 million kVA, 14,116 circuit miles of overhead lines and 2,288 underground cable miles.

LG&E's natural gas transmission system includes 4,272 miles of gas distribution mains and 388 miles of gas transmission mains, consisting of 255 miles of gas transmission pipeline, 126 miles of gas transmission storage lines, six miles of gas combustion turbine lines and one mile of gas transmission pipeline in regulator facilities. Five underground natural gas storage fields, with a total working natural gas capacity of approximately 15 Bcf, are used in providing natural gas service to ultimate consumers. KU's service area includes an additional 11 miles of gas transmission pipeline providing gas supply to natural gas combustion turbine electricity generating units.

Substantially all of LG&E's and KU's respective real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and, in the case of LG&E, the storage and distribution of natural gas, is subject to the lien of either the LG&E 2010 Mortgage Indenture or the KU 2010 Mortgage Indenture. See Note 7 to the Financial Statements for additional information.

LG&E and KU continuously reexamine development projects based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them or pursue other options. LG&E and KU plan to implement the following capacity increases and decreases at the following plants located in Kentucky.

Primary Fuel/Plant	Total Net Summer MW Capacity Increase / (Decrease)	LG&E		KU		Year of Incremental Capacity Increase / Decrease
		% Ownership	Ownership or Lease Interest in MW	% Ownership	Ownership or Lease Interest in MW	
Coal						
Cane Run - Units 4-6 - (a)	(563)	100.00	(563)			2015
Green River - Units 3-4 - (a)	(161)			100.00	(161)	2015
Total Capacity Decreases	<u>(724)</u>		<u>(563)</u>		<u>(161)</u>	
Natural Gas						
Cane Run - Unit 7 (b)	640	22.00	141	78.00	499	2015
Green River - Unit 5 (c)	700	40.00	280	60.00	420	2018
Solar						
E.W. Brown (c)	10	36.00	4	64.00	6	2016
Total Capacity Increases	<u>1,350</u>		<u>425</u>		<u>925</u>	

- (a) LG&E and KU anticipate retiring these units by the end of 2015. See Notes 8 and 15 to the Financial Statements for additional information.
- (b) In May 2012, LG&E and KU received approval to build this unit at the existing Cane Run site. See Note 8 to the Financial Statements for additional information.
- (c) In January 2014, LG&E and KU filed an application for a CPCN requesting approval from the KPSC to build these units at the existing Green River and E.W. Brown sites. See Note 8 to the Financial Statements for additional information.

Pennsylvania Regulated Segment (PPL and PPL Electric)

For a description of PPL Electric's service territory, see "Item 1. Business - General - Segment Information - Pennsylvania Regulated Segment." PPL Electric had electric transmission and distribution lines in public streets and highways pursuant to franchises and rights-of-way secured from property owners. At December 31, 2013, PPL Electric's transmission system includes 62 substations with a total capacity of 18 million kVA and 3,986 pole miles in service. PPL Electric's distribution system includes 358 substations with a total capacity of 13 million kVA, 37,079 circuit miles of overhead lines and 8,193 underground cable miles. All of PPL Electric's facilities are located in Pennsylvania. Substantially all of PPL Electric's distribution properties and certain transmission properties are subject to the lien of the PPL Electric 2001 Mortgage Indenture. See Note 7 to the Financial Statements for additional information.

See Note 8 to the Financial Statements for information on the Regional Transmission Line Expansion Plan.

Supply Segment (PPL and PPL Energy Supply)

The capacity of generation units is based on a number of factors, including the operating experience and physical conditions of the units, and may be revised periodically to reflect changed circumstances. PPL Energy Supply's electric generating capacity (summer rating) at December 31, 2013 was as follows.

<u>Primary Fuel/Plant</u>	<u>Total MW Capacity</u>	<u>% Ownership</u>	<u>PPL Energy Supply's Ownership in MW</u>	<u>Location</u>
Natural Gas/Oil				
Martins Creek	1,729	100.00	1,729	Pennsylvania
Ironwood	662	100.00	662	Pennsylvania
Lower Mt. Bethel	555	100.00	555	Pennsylvania
Combustion turbines	363	100.00	363	Pennsylvania
	<u>3,309</u>		<u>3,309</u>	
Coal				
Montour	1,518	100.00	1,518	Pennsylvania
Brunner Island	1,439	100.00	1,439	Pennsylvania
Colstrip Units 1 & 2 (a)	614	50.00	307	Montana
Conemaugh (a)	1,742	16.25	283	Pennsylvania
Colstrip Unit 3 (a)	740	30.00	222	Montana
Keystone (a)	1,718	12.34	212	Pennsylvania
Corette (b)	148	100.00	148	Montana
	<u>7,919</u>		<u>4,129</u>

Susquehanna (a)	2,521	90.00	2,269	Pennsylvania
Hydro				
Various (c)	633	100.00	633	Montana
Various	296	100.00	296	Pennsylvania
	<u>929</u>		<u>929</u>	
Qualifying Facilities				
Renewables (d)	34	100.00	34	Pennsylvania
Renewables	8	100.00	8	Various
	<u>42</u>		<u>42</u>	
Total	<u>14,720</u>		<u>10,678</u>	

(a) This unit is jointly owned. Each owner is entitled to its proportionate share of the unit's total output and funds its proportionate share of fuel and other operating costs. See Note 14 to the Financial Statements for additional information.

(b) PPL Energy Supply intends to place this plant in long-term reserve status in April 2015.

(c) In 2013, PPL Montana executed a definitive agreement to sell these facilities. See Note 8 to the Financial Statements for additional information.

(d) Includes facilities owned, controlled or for which PPL Energy Supply has the rights to the output.

Amounts guaranteed by PPL Montour and PPL Brunner Island in connection with an \$800 million secured energy marketing and trading facility are secured by liens on the generating facilities owned by PPL Montour and PPL Brunner Island. See Note 7 to the Financial Statements for additional information.

ITEM 3. LEGAL PROCEEDINGS

See Notes 5, 6 and 15 to the Financial Statements for information regarding legal, tax litigation, regulatory and environmental proceedings and matters.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

See "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Liquidity and Capital Resources - Forecasted Uses of Cash" for information regarding certain restrictions on the ability to pay dividends for all Registrants.

PPL Corporation

Additional information for this item is set forth in the sections entitled "Quarterly Financial, Common Stock Price and Dividend Data," "Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters" and "Shareowner and Investor Information" of this report. At January 31, 2014, there were 64,515 common stock shareowners of record.

There were no purchases by PPL of its common stock during the fourth quarter of 2013.

PPL Energy Supply, LLC

There is no established public trading market for PPL Energy Supply's membership interests. PPL Energy Funding, a direct wholly owned subsidiary of PPL, owns all of PPL Energy Supply's outstanding membership interests. Distributions on the membership interests will be paid as determined by PPL Energy Supply's Board of Managers.

PPL Energy Supply made cash distributions to PPL Energy Funding of \$408 million in 2013 and \$787 million in 2012.

PPL Electric Utilities Corporation

There is no established public trading market for PPL Electric's common stock, as PPL owns 100% of the outstanding common shares. Dividends paid to PPL on those common shares are determined by PPL Electric's Board of Directors. PPL Electric paid common stock dividends to PPL of \$127 million in 2013 and \$95 million in 2012.

LG&E and KU Energy LLC

There is no established public trading market for LKE's membership interests. PPL owns all of LKE's outstanding membership interests. Distributions on the membership interests will be paid as determined by LKE's Board of Directors. LKE made cash distributions to PPL of \$254 million in 2013 and \$155 million in 2012.

Louisville Gas and Electric Company

There is no established public trading market for LG&E's common stock, as LKE owns 100% of the outstanding common shares. Dividends paid to LKE on those common shares are determined by LG&E's Board of Directors. LG&E paid common stock dividends to LKE of \$99 million in 2013 and \$75 million in 2012.

Kentucky Utilities Company

There is no established public trading market for KU's common stock, as LKE owns 100% of the outstanding common shares. Dividends paid to LKE on those common shares are determined by KU's Board of Directors. KU paid common stock dividends to LKE of \$124 million in 2013 and \$100 million in 2012.

ITEM 6. SELECTED FINANCIAL AND OPERATING DATA

PPL Corporation (a) (b)	2013	2012	2011 (c)	2010 (c)	2009
Income Items (in millions)					
Operating revenues	\$ 11,860	\$ 12,286	\$ 12,737	\$ 8,521	\$ 7,449
Operating income	2,339	3,109	3,101	1,866	896
Income from continuing operations after income taxes					
attributable to PPL shareowners	1,128	1,532	1,493	955	414
Net income attributable to PPL shareowners	1,130	1,526	1,495	938	407
Balance Sheet Items (in millions) (d)					
Total assets	46,259	43,634	42,648	32,837	22,165
Short-term debt	701	652	578	694	639
Long-term debt	20,907	19,476	17,993	12,663	7,143
Noncontrolling interests		18	268	268	319

Number of shares outstanding - Basic (in thousands)					
Year-end	630,321	581,944	578,405	483,391	377,183
Weighted-average	608,983	580,276	550,395	431,345	376,082
Income from continuing operations after income taxes					
available to PPL common shareowners - Basic EPS	\$ 1.85	\$ 2.62	\$ 2.70	\$ 2.21	\$ 1.10
Income from continuing operations after income taxes					
available to PPL common shareowners - Diluted EPS	\$ 1.76	\$ 2.61	\$ 2.70	\$ 2.20	\$ 1.10
Net income available to PPL common shareowners -					
Basic EPS	\$ 1.85	\$ 2.61	\$ 2.71	\$ 2.17	\$ 1.08
Net income available to PPL common shareowners -					
Diluted EPS	\$ 1.76	\$ 2.60	\$ 2.70	\$ 2.17	\$ 1.08
Dividends declared per share of common stock	\$ 1.47	\$ 1.44	\$ 1.40	\$ 1.40	\$ 1.38
Book value per share (d)	\$ 19.78	\$ 18.01	\$ 18.72	\$ 16.98	\$ 14.57
Market price per share (d)	\$ 30.09	\$ 28.63	\$ 29.42	\$ 26.32	\$ 32.31
Dividend payout ratio - % (f)	84	55	52	65	128
Dividend yield - % (g)	4.89	5.03	4.76	5.32	4.27
Price earnings ratio (f) (g)	17.10	11.01	10.89	12.13	29.92
Sales Data - GWh					
Domestic - Electric energy supplied - retail (h)	44,564	42,379	40,147	14,595	38,912
Domestic - Electric energy supplied - wholesale (h)(i)	61,124	54,958	63,701	74,105	37,772
Domestic - Electric energy delivered - retail	67,848	66,931	67,806	42,463	36,689
U.K. - Electric energy delivered	78,219	77,467	58,245	26,820	26,358

- (a) The earnings each year were affected by several items that management considers special. See "Results of Operations - Segment Results" in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations" for a description of special items in 2013, 2012 and 2011. The earnings were also affected by the sales of various businesses. See Note 9 to the Financial Statements for a discussion of discontinued operations in 2013, 2012 and 2011.
- (b) See "Item 1A. Risk Factors" and Notes 1, 6 and 15 to the Financial Statements for a discussion of uncertainties that could affect PPL's future financial condition.
- (c) 2011 includes eight months of WPD Midlands activity following the April 1, 2011 acquisition, as PPL consolidates WPD on a one-month lag. 2010 includes two months of LKE activity following the November 1, 2010 acquisition.
- (d) As of each respective year-end.
- (e) Computed using earnings and fixed charges of PPL and its subsidiaries. Fixed charges consist of interest on short- and long-term debt, amortization of debt discount, expense and premium - net, other interest charges, the estimated interest component of operating rentals and preferred securities distributions of subsidiaries. See Exhibit 12(a) for additional information.
- (f) Based on diluted EPS.
- (g) Based on year-end market prices.
- (h) The electric energy supplied changes in 2010 reflect the expiration of the PLR contract between PPL EnergyPlus and PPL Electric as of December 31, 2009.
- (i) GWh are included until the transaction closing for facilities that were sold.

ITEM 6. SELECTED FINANCIAL AND OPERATING DATA

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 6 is omitted as PPL Energy Supply, PPL Electric, LKE, LG&E and KU meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K.

Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations

(All Registrants)

This combined Item 7. "Management's Discussion and Analysis of Financial Condition and Results of Operations" is separately filed by PPL Corporation and each of its Subsidiary Registrants. Information contained herein relating to any individual Registrant is filed by such Registrant solely on its own behalf, and no Registrant makes any representation as to information relating to any other Registrant. The specific Registrant to which disclosures are applicable is identified in parenthetical headings in italics above the applicable disclosure or within the applicable disclosure for each Registrant's related activities and disclosures. Within combined disclosures, amounts are disclosed for any Registrant when significant.

The information provided in this Item 7. should be read in conjunction with the Registrants' Consolidated Financial Statements and the accompanying Notes. Capitalized terms and abbreviations are defined in the glossary. Dollars are in millions, except per share data, unless otherwise noted.

"Management's Discussion and Analysis of Financial Condition and Results of Operations" includes the following information:

- "Overview" provides a description of each Registrant's business strategy, a summary of PPL's earnings, a description of key factors expected to impact future earnings and a discussion of important financial and operational developments.
- "Results of Operations" for PPL provides a more detailed analysis of earnings by segment, and for the Subsidiary Registrants, includes a summary of earnings. For all Registrants, "Margins" provides explanations of non-GAAP financial measures and "Statement of Income Analysis" addresses significant changes in principal items on the Statements of Income, comparing 2013 with 2012 and 2012 with 2011.
- "Financial Condition - Liquidity and Capital Resources" provides an analysis of the Registrants' liquidity positions and credit profiles. This section also includes a discussion of forecasted sources and uses of cash and rating agency actions.
- "Financial Condition - Risk Management" provides an explanation of the Registrants' risk management programs relating to market and credit risk.
- "Application of Critical Accounting Policies" provides an overview of the accounting policies that are particularly important to the results of operations and financial condition of the Registrants and that require their management to make significant estimates, assumptions and other judgments of inherently uncertain matters.

Overview

For a description of the Registrants and their businesses, see "Item 1. Business."

Business Strategy

(All Registrants except PPL Energy Supply)

The strategy for the regulated businesses of WPD, PPL Electric, LKE, LG&E and KU is to provide efficient, reliable and safe operations and strong customer service, maintain constructive regulatory relationships and achieve timely recovery of costs. These regulated businesses also focus on providing competitively priced energy to customers and achieving stable, long-term growth in earnings and rate base, or RAV, as applicable. Both rate base and RAV are expected to grow for the foreseeable future as a result of significant capital expenditure programs to maintain existing assets and improving system reliability and, for LKE, LG&E and KU, to comply with federal and state environmental regulations related to electricity generation facilities. Future RAV for WPD will also be affected by RIIO-ED1, effective April 1, 2015, as the recovery period for assets placed in service after that date will be extended from 20 to 45 years.

Recovery of capital project costs is attained through various rate-making mechanisms, including periodic base rate case proceedings, FERC formula rate mechanisms, and other regulatory agency-approved recovery mechanisms. In Kentucky, the KPSC has adopted a series of regulatory mechanisms (ECR, DSM, GLT, fuel adjustment clause, gas supply clause and recovery on certain construction work-in-progress) that reduce regulatory lag and provide for timely recovery of prudently incurred costs. In Pennsylvania, the recently approved DSIC mechanism will help PPL Electric reduce regulatory lag and provide for timely recovery of distribution reliability-related capital investment. In addition, Pennsylvania has several other cost recovery mechanisms in place to reduce regulatory lag and provide for timely recovery of prudently incurred costs. See "Financial and Operational Developments - Distribution System Improvement Charge" below for additional information on the implementation of the DSIC mechanism in 2013 and "Item 1. Business - Segment Information - U.K. Regulated Segment - Revenues and Regulation" for changes to the regulatory framework in the U.K. applicable to WPD beginning in 2015.

(PPL and PPL Energy Supply)

The strategy for PPL Energy Supply is to optimize the value from its competitive generation asset and marketing portfolios while mitigating near-term volatility in both cash flows and earnings. PPL Energy Supply endeavors to do this by matching energy supply with load, or customer demand, under contracts of varying durations with creditworthy counterparties to capture profits while effectively managing exposure to energy and fuel price volatility, counterparty credit risk and operational risk. PPL Energy Supply is focused on maintaining profitability during the current and projected period of low energy and capacity prices. See "Financial and Operational Developments - Economic and Market Conditions" below for additional information.

(PPL)

As a result of the acquisition of WPD Midlands in April 2011, PPL increased the proportion of its overall earnings that is subject to foreign currency translation risk. The U.K. subsidiaries also have currency exposure to the U.S. dollar to the extent they have U.S. dollar denominated debt. To manage these risks, PPL generally uses contracts such as forwards, options and cross currency swaps that contain characteristics of both interest rate and foreign currency exchange contracts.

(All Registrants)

To manage financing costs and access to credit markets, and to fund capital expenditures, a key objective of the Registrants is to maintain targeted credit profiles and liquidity positions. In addition, the Registrants have financial and operational risk management programs that, among other things, are designed to monitor and manage exposure to earnings and cash flow volatility related to, as applicable, changes in energy and fuel prices, interest rates, counterparty credit quality and the operating performance of generating units. To manage these risks, PPL generally uses contracts such as forwards, options and swaps.

Financial and Operational Developments

Earnings *(PPL)*

PPL's earnings by reportable segment were as follows.

	2013	2012	2011	% Change	
				2013 vs. 2012	2012 vs. 2011
U.K. Regulated (a)	\$ 922	\$ 803	\$ 325	15	147
Kentucky Regulated	307	177	221	73	(20)
Pennsylvania Regulated	209	132	173	58	(24)
Supply (b)	(272)	414	776	(166)	(47)
Corporate and Other (c)	(36)			n/a	n/a
Net Income Attributable to PPL Shareowners	\$ 1,130	\$ 1,526	\$ 1,495	(26)	2
EPS - basic	\$ 1.85	\$ 2.61	\$ 2.71	(29)	(4)
EPS - diluted (d)	\$ 1.76	\$ 2.60	\$ 2.70	(32)	(4)

- (a) 2013 and 2012 include a full year of WPD Midlands' results, while 2011, the year WPD Midlands was acquired, includes eight months of its results and was also impacted by certain acquisition related costs. See Notes 7 and 10 to the Financial Statements for additional information on the acquisition and related financing.
- (b) 2013 includes a charge of \$697 million (\$413 million after-tax) for the termination of the operating lease of the Colstrip coal-fired electricity generating facility and an impairment charge of \$65 million (\$39 million after-tax) for the Corette coal-fired plant and related emission allowances. See Notes 8 and 18 to the Financial Statements for additional information.
- (c) Primarily represents financing and certain other costs incurred at the corporate level that have not been allocated or assigned to the segments, which are presented to reconcile segment information to PPL's consolidated results. For 2012 and 2011, there were no significant amounts in this category.
- (d) See "Equity Units" below for information on the Equity Units' impact on the calculation of 2013 diluted EPS.

The following after-tax gains (losses), in total, which management considers special items, impacted PPL's reportable segments' results. See PPL's "Results of Operations - Segment Earnings" for details of these special items.

	2013	2012	2011
U.K. Regulated	\$ 67	\$ 107	\$ (157)
Kentucky Regulated	3	(16)	
Supply	(531)	18	142
Total PPL	<u>\$ (461)</u>	<u>\$ 109</u>	<u>\$ (15)</u>

The changes in PPL's reportable segments results for 2013 compared with 2012, excluding the impact of special items, were due to the following factors (on an after-tax basis):

- Increase at the U.K. Regulated segment primarily due to higher electricity delivery revenues and lower U.K. income taxes, partially offset by higher operation and maintenance expense and higher depreciation.
- Increase at the Kentucky Regulated segment primarily due to higher base rates that became effective January 1, 2013 and returns from additional environmental capital investments.
- Increase at the Pennsylvania Regulated segment primarily due to higher distribution base rates that became effective January 1, 2013, higher transmission margins from additional capital investments, lower operation and maintenance expense and higher distribution sales volume due to weather, partially offset by higher depreciation.
- Decrease at the Supply segment primarily due to lower baseload energy prices, higher depreciation and higher income taxes, partially offset by higher capacity prices, higher nuclear generation volume and lower operation and maintenance expense.

The changes in PPL's reportable segments' results for 2012 compared with 2011, excluding the impact of special items, were due to the following factors (on an after-tax basis):

- Increase at the U.K. Regulated segment primarily due to four additional months of earnings from the WPD Midlands businesses, higher delivery revenue and lower U.K. income taxes, partially offset by higher U.S. income taxes, higher depreciation and a less favorable currency exchange rate.
- Decrease at the Kentucky Regulated segment primarily due to higher operation and maintenance expense, higher depreciation, higher property taxes and losses from an equity method investment, partially offset by lower income taxes.
- Decrease at the Pennsylvania Regulated segment primarily due to higher operation and maintenance expense, higher income and non-income taxes, lower distribution margins as a result of mild weather early in the year and higher depreciation, partially offset by higher transmission revenue and lower financing costs due to the redemption of \$250 million of preferred securities.
- Decrease at the Supply segment primarily due to lower Eastern energy margins resulting from lower baseload energy and capacity prices, lower Western energy margins resulting from an early 2012 contract termination related to the bankruptcy of a large customer, higher operation and maintenance expense, higher depreciation, higher income taxes and higher financing costs.

See "Results of Operations" below for further discussion of PPL's reportable segments and analysis of results of operations.

2014 Outlook

(PPL)

Excluding special items, lower earnings are expected in 2014 compared with 2013. The factors underlying these projections by segment and Subsidiary Registrant are discussed below (on an after-tax basis).

(PPL's U.K. Regulated Segment)

Excluding special items, earnings in 2014 are projected to be comparable with 2013. Higher electricity delivery revenue and lower pension expense are expected to be offset by higher income taxes, higher depreciation and higher financing costs.

(PPL's Kentucky Regulated Segment and LKE, LG&E and KU)

Excluding special items, lower earnings are projected in 2014 compared with 2013, primarily driven by higher operation and maintenance expense, higher depreciation and higher financing costs, partially offset by returns on additional environmental capital investments and modest retail load growth.

(PPL's Pennsylvania Regulated Segment and PPL Electric)

Excluding special items, higher earnings are projected in 2014 compared with 2013, primarily driven by higher transmission margins and returns on distribution improvement capital spending, partially offset by higher financing costs and higher income taxes.

(PPL's Supply Segment and PPL Energy Supply)

Excluding special items, lower earnings are projected in 2014 compared with 2013, primarily driven by lower energy and capacity prices, partially offset by lower financing costs and lower income taxes.

(All Registrants)

Earnings in future periods are subject to various risks and uncertainties. See "Forward-Looking Information," "Item 1. Business," "Item 1A. Risk Factors," the rest of this Item 7, and Notes 1, 6 and 15 to the Financial Statements (as applicable) for a discussion of the risks, uncertainties and factors that may impact future earnings.

Other Financial and Operational Developments

Economic and Market Conditions

(PPL and PPL Energy Supply)

Continued depressed wholesale market prices for electricity and natural gas have resulted from general weak economic conditions and other factors, including the impact of expanded domestic shale gas development and additional renewable energy sources, primarily wind in the western U.S. Unregulated Gross Energy Margins associated with PPL Energy Supply's competitive generation and marketing business are impacted by changes in energy and capacity market prices and demand for electricity and natural gas, power plant availability, competition in the markets for retail customers, fuel costs and availability, transmission constraints that impact the locational pricing of electricity at PPL Energy Supply's power plants, fuel transportation costs and the level and price of hedging activities. As a result of these factors, energy margins were lower in 2013 compared to 2012 and future energy margins are expected to be lower compared to 2013 energy margins. See "Changes in Non-GAAP Financial Measures - Unregulated Gross Energy Margins in Statement of Income Analysis" below for additional information on energy margins for 2011 through 2013. As has been PPL Energy Supply's practice in periods of changing business conditions, PPL Energy Supply continues to review its future business and operational plans, including capital and operation and maintenance expenditures, its hedging strategies and potential plant modifications to burn lower cost fuels.

(All Registrants except PPL Electric)

The businesses of PPL Energy Supply, LKE, LG&E and KU are subject to extensive federal, state and local environmental laws, rules and regulations, including those pertaining to coal combustion residuals, GHG, effluent limitation guidelines and MATS. See "Financial Condition - Environmental Matters" below for additional information on these requirements. These and other stringent environmental requirements, combined with low energy margins for competitive generation, have led several energy companies, including PPL, PPL Energy Supply, LKE, LG&E and KU, to announce plans to either temporarily or permanently close, or place in long-term reserve status, certain of their coal-fired generating plants.

(PPL and PPL Energy Supply)

In the third quarter of 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette plant in long-term reserve status, suspending the plant's operation due to expected market conditions and the costs to comply with MATS. During the fourth quarter of 2013, PPL Energy Supply determined its Corette plant was impaired and PPL Energy Supply recorded a charge of \$65 million, or \$39 million after-tax. See "Application of Critical Accounting Policies - Asset Impairment (Excluding Investments)" for additional information.

In September 2013, PPL Montana executed a definitive agreement to sell to NorthWestern 633 MW of hydroelectric generation facilities located in Montana for \$900 million in cash, subject to certain adjustments. The sale is subject to closing conditions, including receipt of regulatory approvals by the FERC and the Montana Public Service Commission and certain third-party consents. The sale is not expected to close before the second half of 2014. To facilitate the sale, on December 20, 2013, PPL Montana terminated its operating lease arrangement related to partial interests in Units 1, 2 and 3 of the Colstrip coal-fired electricity generating facility and acquired those interests, collectively, for \$271 million. As a result, PPL Energy Supply recorded a charge of \$697 million, or \$413 million after-tax, for the lease termination. See Note 8 to the Financial Statements for additional information.

PPL Energy Supply believes its remaining competitive coal-fired generation assets in Pennsylvania are well positioned to meet the current environmental requirements described above based on prior and planned investments. The current depressed levels of energy and capacity prices in PJM, as well as management's forward view of these prices using its fundamental pricing models recently updated in conjunction with the annual business planning process, continue to put pressure on the recoverability of PPL Energy Supply's investment in its Pennsylvania coal-fired generation assets. In the fourth quarter of 2013, management tested the Brunner Island and Montour plants for impairment and concluded neither plant was impaired as of December 31, 2013. The recoverability test is very sensitive to forward energy and capacity price assumptions, as well as forecasted operation and maintenance and capital spending. Therefore, a further decline in forecasted long-term energy or capacity prices or changes in environmental laws requiring additional capital or operation and maintenance expenditures, could negatively impact PPL Energy Supply's operations of these facilities and potentially result in future impairment charges for some or all of the carrying value of these plants. The carrying value of the Pennsylvania coal-fired generation assets tested was \$2.7 billion as of December 31, 2013 (\$1.4 billion for Brunner Island and \$1.3 billion for Montour).

(PPL, LKE, LG&E and KU)

As a result of the environmental requirements discussed above, LKE projects \$2.2 billion (\$1.1 billion each at LG&E and KU) in capital investment over the next five years and the anticipated retirement by 2015 of five coal-fired units (three at LG&E and two at KU) with a combined summer capacity rating of 724 MW (563 MW at LG&E and 161 MW at KU). KU retired the 71 MW unit at the Tyrone plant in February 2013 and a 12 MW unit at the Haefling plant in December 2013. The retirement of these coal-fired units is not expected to have a material impact on the financial condition or results of operations of PPL, LKE, LG&E and KU. See Note 8 to the Financial Statements for additional information regarding the anticipated retirement of these units as well as plans to build two combined-cycle natural gas facilities in Kentucky.

The KPSC has adopted a series of regulatory mechanisms (ECR, DSM, GLT, fuel adjustment clause, gas supply clause and recovery on certain construction work-in-progress) that provide for timely recovery of prudently incurred costs (including costs associated with environmental requirements). The Kentucky utility businesses are impacted by changes in customer usage levels, which can be driven by a number of factors including weather conditions and economic factors that impact the load utilized by customers.

(All Registrants)

The Registrants cannot predict the impact that future economic and market conditions and regulatory requirements may have on their financial condition or results of operations.

(PPL)

Ofgem Review of Line Loss Calculation

Ofgem is currently consulting on the methodology to be used by all network operators to calculate the final line loss incentives and penalties for the DPCR4, which ended in March 2010. During 2013, WPD recorded increases of \$45 million to the liability with reductions to "Utility" revenue on the Statement of Income. PPL cannot predict the outcome of this matter. Based on information received from Ofgem in 2013, WPD currently estimates the potential loss exposure for this matter to be between \$74 million and \$213 million. See Note 6 to the Financial Statements for additional information.

Distribution Revenue Reduction

In December 2013, WPD and other U.K. DNOs, announced agreements with the U.K. Department of Energy and Climate Change and Ofgem to a reduction of £5 per residential customer of electricity distribution revenues that otherwise would have been collected in the regulatory year beginning April 1, 2014. Full recovery of the revenue reduction, together with the associated carrying cost, will occur during the regulatory year beginning April 1, 2015 for three of the WPD DNOs, and will occur over the eight year RIIO-ED1 regulatory period for the fourth DNO. PPL projects that, as a result of this change, 2014 earnings for its U.K. Regulated segment will be adversely affected by \$29 million and earnings for 2015 and 2016 will be positively affected by \$7 million and \$12 million.

RIIO-ED1 - Fast Tracking

In July 2013, WPD filed with Ofgem its 8-year business plans for its four DNOs for RIIO-ED1. In November 2013, Ofgem determined that the business plans of all four of WPD's DNOs were suitable for accelerated consideration or "fast tracking". Fast tracking affords several benefits to the WPD DNOs including the ability to collect additional revenue equivalent to 2.5% of total annual expenditures during the 8-year price control period, or approximately \$35 million annually, greater revenue certainty and a higher level of cost savings retention.

In February 2014, Ofgem announced its decision on the consultation related to the cost of equity to be used during the RIIO-ED1 period. The resulting real cost of equity for WPD was 6.4%, compared to 6.7% proposed in WPD's business plan submittals. WPD elected to accept this change and remain in the fast-track process. The change in the cost of equity is not expected to have a significant impact on the results of operations for PPL. Ofgem expects to announce its fast track final determination in late February 2014.

See "Item 1. Business - Segment Information - U.K. Regulated Segment" for additional information.

Equity Forward Agreements

In the second quarter of 2013, PPL settled forward sale agreements for 10.5 million shares of PPL common stock by issuing 8.4 million shares and cash settling the remaining 2.1 million shares. PPL received net cash proceeds of \$201 million, which was used to repay short-term debt obligations and for other general corporate purposes. See Note 7 to the Financial Statements for additional information. Prior to settlement, incremental shares were included within the calculation of diluted EPS using the treasury stock method. See Note 4 to the Financial Statements for the impact on the calculation of diluted EPS.

Equity Units

During 2013, several events occurred related to the 2010 Equity Units. During the second quarter of 2013, PPL Capital Funding remarketed the Junior Subordinated Notes and simultaneously exchanged the remarketed notes for three tranches of Senior Notes. The transaction resulted in a \$10 million loss on extinguishment of the Junior Subordinated Notes. Additionally, in July 2013, PPL issued 40 million shares of common stock at \$28.73 per share to settle the 2010 Purchase Contracts. PPL received net cash proceeds of \$1.150 billion, which were used to repay short-term and long-term debt obligations and for other general corporate purposes.

In 2013, the If-Converted Method of calculating diluted EPS was applied to the Equity Units prior to settlement. This resulted in \$44 million of interest charges (after-tax) being added back to income available to PPL common shareowners, and 53 million weighted-average incremental shares of PPL common stock being treated as outstanding for purposes of the diluted EPS calculation. See Note 4 to the Financial Statements for the impact on the calculation of diluted EPS.

During 2014, two events are anticipated related to the 2011 Equity Units. PPL will receive proceeds of \$978 million through the issuance of PPL common stock to settle the 2011 Purchase Contracts and PPL Capital Funding expects to remarket the 4.32% Junior Subordinated Notes due 2019. See Note 7 to the Financial Statements for additional information.

Tax Litigation

In May 2013, the U.S. Supreme Court reversed the December 2011 ruling of the U.S. Court of Appeals for the Third Circuit, on the creditability for U.S. income tax purposes of the U.K. Windfall Profits Tax paid by a U.K. subsidiary of PPL. As a result of this decision, PPL recorded an income tax benefit of \$44 million in 2013. See Note 5 to the Financial Statements for additional information.

U.K. Tax Rate Change

In July 2013, the U.K. Finance Act 2013 was enacted, which reduces the U.K.'s statutory income tax rate from 23% to 21%, effective April 1, 2014 and from 21% to 20%, effective April 1, 2015. As a result of these changes, PPL reduced its net deferred tax liabilities and recognized a deferred tax benefit of \$97 million during 2013.

Susquehanna Turbine Blade Inspection (PPL and PPL Energy Supply)

In the spring of 2013, PPL Susquehanna made modifications to address the causes of turbine blade cracking at the PPL Susquehanna nuclear plant that was first identified in 2011. The modifications were made during the Unit 2 refueling outage and an additional planned outage for Unit 1. In September 2013, data from extensive vibration monitoring equipment installed on the turbine blades identified cracks in a small number of the blades on both units. Unit 2 completed a blade inspection and replacement outage on September 23, 2013. Based upon the evaluation of the conditions on Unit 1 and the latest inspection of previously removed blades, PPL Susquehanna will continue to operate Unit 1 and monitor the blades through the vibration monitoring equipment. The financial impact of the Unit 2 outage was not material. PPL Susquehanna continues to work with the turbine manufacturer to identify and resolve the issues causing the blade cracking.

Distribution System Improvement Charge (PPL and PPL Electric)

Act 11 authorizes the PUC to approve two specific ratemaking mechanisms - the use of a fully projected future test year in base rate proceedings and, subject to certain conditions, the use of a DSIC. Such alternative ratemaking procedures and mechanisms provide opportunity for accelerated cost-recovery. In May 2013, the PUC approved PPL Electric's proposed DSIC, with an initial rate effective July 1, 2013, subject to refund after hearings. See Note 6 to the Financial Statements for additional information.

Rate Case Proceedings

(PPL and PPL Electric)

In December 2012, the PUC approved a total distribution revenue increase of about \$71 million for PPL Electric, using a 10.4% return on equity. The approved rates became effective January 1, 2013.

(PPL, LKE, LG&E and KU)

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of \$34 million for LG&E and \$51 million for KU and an increase in annual base gas rates of \$15 million for LG&E and authorizes a 10.25% return on equity. The approved rates became effective January 1, 2013.

(KU)

In November 2013, the VSCC approved a stipulation providing for increases in annual base electricity rates of \$4.7 million. The approved rates became effective December 1, 2013. The order does not formally establish a return on equity, but authorizes use of a 10% return on equity for certain annual rate filing purposes.

FERC Formula Rates (KU)

In September 2013, KU filed an application with the FERC to adjust the formula rate under which KU provides wholesale requirements power sales to 12 municipal customers. Among other changes, the application requests an amended formula whereby KU would charge cost-based rates with a subsequent true-up to actual costs, replacing the current formula which does not include a true-up. KU's application proposed an authorized return on equity of 10.7%. Subject to regulatory approval, the new formula rate may become effective during the second quarter of 2014.

Results of Operations

(PPL)

The discussion for PPL provides a review of results by reportable segment. The "Margins" discussion provides explanations of non-GAAP financial measures (Kentucky Gross Margins, Pennsylvania Gross Delivery Margins and Unregulated Gross Energy Margins) and a reconciliation of non-GAAP financial measures to "Operating Income." The "Statement of Income Analysis" discussion addresses significant changes in principal line items on PPL's Statements of Income, comparing year-to-year changes. "Segment Earnings, Margins and Statement of Income Analysis" is presented separately for PPL.

On April 1, 2011, PPL completed its acquisition of WPD Midlands. WPD Midlands' results are included within "Segment Results - U.K. Regulated Segment." As PPL is consolidating WPD Midlands on a one-month lag, consistent with its accounting policy on consolidation of foreign subsidiaries, a full year of WPD Midlands' results of operations are included in PPL's results for 2013 and 2012, and eight months of WPD Midlands' results of operations are included in PPL's results for 2011. When discussing PPL's results of operations for 2013 compared with 2012, the results of WPD Midlands are comparable and have not been isolated for purposes of comparability. For 2012 compared with 2011, WPD Midlands results have been isolated for purposes of comparability. See Note 10 to the Financial Statements for additional information regarding the acquisition.

Tables analyzing changes in amounts between periods within "Segment Earnings" and "Statement of Income Analysis" are presented on a constant U.K. foreign currency exchange rate basis, where applicable, in order to isolate the impact of the change in the exchange rate on the item being explained. Results computed on a constant U.K. foreign currency exchange rate basis are calculated by translating current year results at the prior year weighted-average U.K. foreign currency exchange rate.

(Subsidiary Registrants)

The discussion for each of PPL Energy Supply, PPL Electric, LKE, LG&E and KU provides a summary of earnings. The "Margins" discussion includes a reconciliation of non-GAAP financial measures to "Operating Income" and "Statement of Income Analysis" addresses significant changes in principal line items on the Statements of Income comparing year-to-year changes. "Earnings, Margins and Statement of Income Analysis" are presented separately for PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

PPL Segment Earnings, Margins and Statement of Income Analysis

Segment Earnings

U.K. Regulated Segment

The U.K. Regulated segment consists of PPL Global which primarily includes WPD's regulated electricity distribution operations and certain costs, such as U.S. income taxes, administrative costs, WPD Midlands acquisition-related costs and allocated financing costs. The U.K. Regulated segment represents 82% of Net Income Attributable to PPL Shareowners for 2013 and 34% of PPL's assets at December 31, 2013.

Net Income Attributable to PPL Shareowners includes the following results (PPL WW and WPD Midlands on a consolidated basis, except for 2012 and 2011 acquisition-related adjustments, which are shown separately):

	2013	2012	2011	% Change	
				2013 vs. 2012	2012 vs. 2011
Utility revenues (a)	\$ 2,359	\$ 2,289	\$ 1,618	3	41
Energy-related businesses	44	47	35	(6)	34
Total operating revenues	2,403	2,336	1,653	3	41
Other operation and maintenance	470	439	374	7	17
Depreciation	300	279	211	8	32
Taxes, other than income	147	147	113		30
Energy-related businesses	29	34	17	(15)	100
Total operating expenses	946	899	715	5	26
Other Income (Expense) - net	(39)	(51)	13	(24)	(492)
Interest Expense	425	421	336	1	25
Income Taxes	71	153	98	(54)	56
WPD Midlands acquisition-related adjustments, net of tax		(9)	(192)	(100)	(95)
Net Income Attributable to PPL Shareowners (b)	\$ 922	\$ 803	\$ 325	15	147

(a) 2011 includes \$790 million for WPD Midlands.

(b) 2011 includes \$137 million for WPD Midlands, net of acquisition-related adjustments.

The changes in the results of the U.K. Regulated segment between these periods were due to the factors set forth below, which reflect certain items that management considers special. WPD Midlands' results for 2012 compared with 2011 and effects of movements in foreign currency exchange rates are on separate lines within the table and not in their respective Statement of Income line items. See below for additional detail of these special items.

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
U.K.		
Utility revenues	\$ 240	\$ 49
Other operation and maintenance	(40)	(26)
Depreciation	(25)	(8)
Interest expense	(10)	16
Other	1	(4)
Income taxes		17
WPD Midlands, after-tax		224
U.S.		
Interest expense and other	(1)	(15)
Income taxes	1	(25)
Foreign currency exchange, after-tax	(7)	(14)
Special items, after-tax	(40)	264
Total	<u>\$ 119</u>	<u>\$ 478</u>

U.K.

- The increase in utility revenues in 2013 compared with 2012 was primarily due to the impact of the April 1, 2013 and 2012 price increases.

The increase in utility revenues in 2012 compared with 2011 was primarily due to the impact of the April 1, 2012 and 2011 price increases which resulted in \$78 million of higher utility revenues, partially offset by \$13 million of lower volumes due primarily to a downturn in the economy and weather.

- The increase in other operation and maintenance for 2013 compared with 2012 was primarily due to higher network maintenance costs.

The increase in other operation and maintenance in 2012 compared with 2011 was primarily due to higher pension expense resulting from an increase in amortization of actuarial losses.

- The increase in depreciation expense for both periods was primarily due to PP&E additions.
- The increase in interest expense in 2013 compared with 2012 was primarily due to debt issuances in April 2012 and October 2013.

The decrease in interest expense in 2012 compared with 2011 was primarily due to lower interest expense on index-linked notes.

- Income taxes for 2013 compared with 2012 were flat despite higher pre-tax income primarily due to lower U.K. tax rates.

The decrease in income taxes in 2012 compared with 2011 was primarily due to the tax deductibility of interest on acquisition financing of \$12 million and a \$9 million benefit relating to customer contributions for capital expenditures.

WPD Midlands (2012 vs. 2011)

- Earnings in 2012 compared with 2011 were affected by an additional four months of results in 2012 totaling \$171 million, after-tax.
- The comparable eight-month period was affected by higher utility revenue of \$125 million resulting from the April 1, 2012 price increase and \$26 million of lower pension expense, partially offset by \$26 million of higher taxes due to higher pre-tax income, \$25 million of additional interest expense on debt issuances in 2011 and 2012 and \$25 million of higher taxes due to a U.K./U.S. intercompany tax transaction.

U.S.

- The increase in interest expense and other in 2012 compared with 2011 was primarily due to the 2011 Equity Units issued to finance the WPD Midlands acquisition.

- The decrease in income taxes for 2013 compared with 2012 was primarily due to a \$42 million adjustment related to a ruling obtained from the IRS regarding 2010 U.K. earnings and profits calculations, partially offset by a \$27 million increase attributable to a revision in the expected taxable amount of cash repatriation in 2013.

The increase in income taxes in 2012 compared with 2011 was primarily due to \$28 million of tax benefits recorded in 2011 as a result of U.K. pension plan contributions and a \$20 million adjustment primarily related to the recalculation of 2010 U.K. earnings and profits, partially offset by \$25 million from a U.K./U.S. intercompany tax transaction.

The following after-tax gains (losses), which management considers special items, also impacted the U.K. Regulated segment's results.

	Income Statement			
	Line Item	2013	2012	2011
Foreign currency-related economic hedges, net of tax of \$15, \$18, (\$2) (a)	Other Income (Expense) - net	\$ (29)	\$ (33)	\$ 5
WPD Midlands acquisition-related adjustments:				
2011 Bridge Facility costs, net of tax of \$0, \$0, \$14 (b)	Interest Expense			(30)
	Other Income			
Foreign currency loss on 2011 Bridge Facility, net of tax of \$0, \$0, \$19 (c)	(Expense) - net			(38)
	Other Income			
Net hedge gains, net of tax of \$0, \$0, (\$17) (c)	(Expense) - net			38
Hedge ineffectiveness, net of tax of \$0, \$0, \$3 (d)	Interest Expense			(9)
	Other Income			
U.K. stamp duty tax, net of tax of \$0, \$0, \$0 (e)	(Expense) - net			(21)
	Other operation			
Separation benefits, net of tax of \$1, \$4, \$26 (f)	and maintenance	(4)	(11)	(75)
Other acquisition-related adjustments, net of tax of (\$2), (\$1), \$20 (g)		8	2	(57)
Other:				
Change in U.K. tax rate (h)	Income Taxes	84	75	69
Windfall tax litigation (i)	Income Taxes	43		(39)
Change in WPD line loss accrual, net of tax of \$10, (\$23), \$0 (j)	Utility	(35)	74	
Total		\$ 67	\$ 107	\$ (157)

- (a) Represents unrealized gains (losses) on contracts that economically hedge anticipated GBP-denominated earnings.
- (b) Represents fees incurred to establish the 2011 Bridge Facility.
- (c) Represents the foreign currency loss on repayment of the 2011 Bridge Facility, including a pre-tax foreign currency loss of \$15 million associated with proceeds received on the U.S. dollar-denominated senior notes issued by PPL WEM in April 2011 that were used to repay a portion of PPL WEM's borrowing under the 2011 Bridge Facility. The foreign currency risk was economically hedged with forward contracts to purchase GBP, which resulted in pre-tax gains of \$55 million.
- (d) Represents a combination of ineffectiveness associated with terminated interest rate swaps and a charge recorded as a result of certain interest rate swaps failing hedge effectiveness testing.
- (e) Tax on the transfer of ownership of property in the U.K., which is not tax deductible for income tax purposes.
- (f) 2012 represents severance compensation and early retirement deficiency costs. 2011 primarily represents severance compensation, early retirement deficiency costs and outplacement services for employees separating from the WPD Midlands companies as a result of a reorganization to transition the WPD Midlands companies to the same operating structure as WPD (South West) and WPD (South Wales). 2011 also includes severance compensation and early retirement deficiency costs associated with certain employees who separated from the WPD Midlands companies, but were not part of the reorganization.
- (g) 2011 primarily includes \$34 million, pre-tax, of advisory, accounting and legal fees which are recorded in "Other Income (Expense) - net" on the Statement of Income; \$37 million, pre-tax, of costs, primarily related to the termination of certain contracts, rebranding and relocation costs that were recorded to "Other operation and maintenance" expense on the Statement of Income; and \$6 million, pre-tax, of costs associated with the integration of certain information technology assets, that were recorded in "Depreciation" on the Statement of Income.
- (h) The U.K. Finance Act of 2013, enacted in July 2013, reduced the U.K.'s statutory income tax rate from 23% to 21%, effective April 1, 2014 and from 21% to 20%, effective April 1, 2015. The U.K. Finance Act of 2012, enacted in July 2012, reduced the U.K. statutory income tax rate from 25% to 24% retroactive to April 1, 2012 and from 24% to 23% effective April 1, 2013. The U.K. Finance Act of 2011, enacted in July 2011, reduced the U.K. statutory income tax rate from 27% to 26% retroactive to April 1, 2011 and reduced the rate from 26% to 25% effective April 1, 2012. As a result, PPL reduced its net deferred tax liability and recognized a deferred tax benefit in 2013, 2012 and 2011.
- (i) In 2010, the U.S. Tax Court ruled in PPL's favor in a pending dispute with the IRS concluding that the 1997 U.K. Windfall Profits Tax (WPT) imposed on all U.K. privatized utilities, including PPL's U.K. subsidiary, is a creditable tax for U.S. Federal income tax purposes. In January 2011, the IRS appealed the U.S. Tax Court's decision to the U.S. Court of Appeals for the Third Circuit (Third Circuit). In December 2011, the Third Circuit issued its opinion reversing the Tax Court's decision and holding that the WPT is not a creditable tax. As a result of the Third Circuit's adverse determination, PPL recorded a \$39 million expense in 2011. In May 2013, the U.S. Supreme Court reversed the Third Circuit's December 2011 ruling. As a result, PPL recorded a \$43 million income tax benefit during 2013. See Note 5 to the Financial Statements for additional information.
- (j) In November 2012, Ofgem issued additional consultation on the final DPCR4 line loss close-out that published values for each DNO and further indicated the preferred methodology that would replace the methodology under WPD's licenses, and also indicated that the line loss incentive implemented at the last rate review will be withdrawn and no incentive will apply for the DPCR5 period. Based on this, WPD Midlands reduced its line loss liability by \$97 million, pre-tax in 2012. In 2013, WPD Midlands increased its line loss accrual by \$45 million pre-tax based on additional information provided by Ofgem regarding the calculation. See Note 6 to the Financial Statements for additional information.

Kentucky Regulated Segment

The Kentucky Regulated segment consists primarily of LKE's regulated electricity generation, transmission and distribution operations of LG&E and KU, as well as LG&E's regulated distribution and sale of natural gas in Kentucky. In addition, certain financing costs are allocated to the Kentucky Regulated segment. The Kentucky Regulated segment represents 27% of Net Income Attributable to PPL Shareowners for 2013 and 26% of PPL's assets at December 31, 2013.

Net Income Attributable to PPL Shareowners includes the following results:

	2013	2012	2011	% Change	
				2013 vs. 2012	2012 vs. 2011
Utility revenues	\$ 2,976	\$ 2,759	\$ 2,793	8	(1)
Fuel	896	872	866	3	1
Energy purchases	217	195	238	11	(18)
Other operation and maintenance	778	778	751		4
Depreciation	334	346	334	(3)	4
Taxes, other than income	48	46	37	4	24
Total operating expenses	2,273	2,237	2,226	2	
Other Income (Expense) - net	(7)	(15)	(1)	(53)	1,400
Other-Than-Temporary Impairments		25		(100)	n/a
Interest Expense	212	219	217	(3)	1
Income Taxes	179	80	127	124	(37)
Income (Loss) from Discontinued Operations (net of income taxes)	2	(6)	(1)	(133)	500
Net Income Attributable to PPL Shareowners	\$ 307	\$ 177	\$ 221	73	(20)

The changes in the results of the Kentucky Regulated segment between these periods were due to the factors set forth below, which reflect amounts classified as Kentucky Gross Margins and certain items that management considers special on separate lines within the table and not in their respective Statement of Income line items. See below for additional detail of the special items.

	2013 vs. 2012	2012 vs. 2011
Kentucky Gross Margins	\$ 220	\$ (8)
Other operation and maintenance	(5)	(16)
Depreciation	(34)	(10)
Taxes, other than income	(1)	(9)
Other Income (Expense) - net	7	(14)
Interest Expense	7	(2)
Income Taxes	(83)	31
Special items, after-tax	19	(16)
Total	\$ 130	\$ (44)

- See "Margins - Changes in Non-GAAP Financial Measures" for an explanation of Kentucky Gross Margins.
- Higher other operation and maintenance in 2012 compared with 2011 primarily due to \$11 million of expenses related to an increased scope of scheduled outages and a \$6 million credit to establish a regulatory asset recorded when approved in 2011 related to 2009 storm costs.
- Higher depreciation in 2013 compared with 2012 primarily due to environmental costs related to the 2005 and 2006 ECR plans now being included in base rates. As a result, \$51 million of depreciation associated with those environmental projects is shown as depreciation in 2013. Depreciation for these ECR plans was included in Kentucky Gross Margins in 2012 and 2011. This increase was partially offset by lower depreciation due to revised rates that were effective January 1, 2013. Both events are the result of the 2012 rate case proceedings.

Higher depreciation in 2012 compared with 2011 due to additions to PP&E.
- Lower other income (expense) - net in 2012 compared with 2013 and 2011 primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.
- Higher income taxes in 2013 compared with 2012 and lower income taxes in 2012 compared with 2011 are primarily due to the change in pre-tax income.

The following after-tax gains (losses), which management considers special items, also impacted the Kentucky Regulated segment's results.

	Income Statement Line Item	2013	2012	2011
Adjusted energy-related economic activity, net, net of tax of \$0, \$0, \$(1) (a)	Utility Revenues			\$ 1
Impairments:				
Other asset impairments, net of tax of \$0, \$10, \$0 (b)	Other-Than-Temporary-Impairments		\$ (15)	
LKE acquisition-related adjustments:				
Net operating loss carryforward and other tax-related adjustments	Income Taxes and Other operation and maintenance		4	
Other:				
LKE discontinued operations (c)	Discontinued Operations	\$ 2	(5)	(1)
EEI adjustments, net of tax of \$0, \$0, \$0 (d)	Other Income (Expense) - net	1		
Total		<u>\$ 3</u>	<u>\$ (16)</u>	<u>\$</u>

- (a) Recorded by LG&E and is reflected in "Operating Revenues" for LKE and in "Retail and wholesale" for LG&E on the Statements of Income.
(b) KU recorded an impairment of its equity method investment in EEI. See Note 18 to the Financial Statements for additional information.
(c) 2012 includes an adjustment recorded by LKE to an indemnification liability.
(d) Recorded by KU.

Pennsylvania Regulated Segment

The Pennsylvania Regulated segment includes the regulated electricity transmission and distribution operations of PPL Electric. In addition, certain financing costs are allocated to the Pennsylvania Regulated segment. The Pennsylvania Regulated segment represents 18% of Net Income Attributable to PPL Shareowners for 2013 and 15% of PPL's assets at December 31, 2013.

Net Income Attributable to PPL Shareowners includes the following results:

	2013	2012	2011	% Change	
				2013 vs. 2012	2012 vs. 2011
Operating revenues					
External	\$ 1,866	\$ 1,760	\$ 1,881	6	(6)
Intersegment	4	3	11	33	(73)
Total operating revenues	<u>1,870</u>	<u>1,763</u>	<u>1,892</u>	<u>6</u>	<u>(7)</u>
Energy purchases					
External	588	550	738	7	(25)
Intersegment	51	78	26	(35)	200
Other operation and maintenance	531	576	530	(8)	9
Depreciation	178	160	146	11	10
Taxes, other than income	103	105	104	(2)	1
Total operating expenses	<u>1,451</u>	<u>1,469</u>	<u>1,544</u>	<u>(1)</u>	<u>(5)</u>
Other Income (Expense) - net	6	9	7	(33)	29
Interest Expense	108	99	98	9	1
Income Taxes	108	68	68	59	-
Net Income	209	136	189	54	(28)
Net Income Attributable to Noncontrolling Interests (Note 3)		4	16	(100)	(75)
Net Income Attributable to PPL Shareowners	<u>\$ 209</u>	<u>\$ 132</u>	<u>\$ 173</u>	<u>58</u>	<u>(24)</u>

The changes in the components of the Pennsylvania Regulated segment's results between these periods were due to the factors set forth below, which reflect amounts classified as Pennsylvania Gross Delivery Margins on a separate line and not on their respective Statement of Income line items.

	2013 vs. 2012	2012 vs. 2011
Pennsylvania Gross Delivery Margins	\$ 114	\$ 19
Other operation and maintenance	23	(50)
Depreciation	(18)	(14)
Taxes, other than income	5	(9)
Other Income (Expense) - net	(3)	2
Interest Expense	(9)	(1)
Income Taxes	(39)	
Noncontrolling Interests	4	12
Total	<u>\$ 77</u>	<u>\$ (41)</u>

- See "Margins - Changes in Non-GAAP Financial Measures" for an explanation of Pennsylvania Gross Delivery Margins.
- Lower other operation and maintenance for 2013 compared with 2012, primarily due to lower storm costs of \$17 million and lower support group costs of \$19 million, partially offset by \$14 million increased vegetation management costs.

Higher other operation and maintenance for 2012 compared with 2011, primarily due to \$17 million in higher payroll-related costs due to less project costs being capitalized in 2012, higher support group costs of \$11 million and \$10 million for increased vegetation management costs.

- Higher depreciation for both periods primarily due to PP&E additions related to the ongoing efforts to ensure the reliability of the delivery system and replace aging infrastructure.
- Income taxes were higher in 2013 compared with 2012 primarily due to higher pre-tax income which increased income taxes by \$47 million, partially offset by \$8 million of income tax return adjustments primarily recorded in 2012, largely related to changes in flow-through regulated tax depreciation.

Income taxes were flat in 2012 compared with 2011 primarily due to lower pre-tax income which decreased income taxes by \$22 million, primarily offset by \$9 million of depreciation not normalized and \$11 million of income tax return adjustments, largely related to changes in flow-through regulated tax depreciation.

- Lower noncontrolling interests for both periods due to PPL Electric's redemption of preference securities in June 2012.

Supply Segment

The Supply segment consists primarily of PPL Energy Supply's wholesale, retail, marketing and trading activities, as well as the competitive generation operations. In addition, certain financing and other costs are allocated to the Supply segment. The Supply segment represents negative 24% of Net Income Attributable to PPL Shareowners for 2013 and 25% of PPL's assets at December 31, 2013. In 2011, PPL Energy Supply subsidiaries completed the sale of several businesses, which have been classified as Discontinued Operations. See Note 9 to the Financial Statements for additional information.

Net Income Attributable to PPL Shareowners includes the following results.

	2013	2012	2011	% Change	
				2013 vs. 2012	2012 vs. 2011
Energy revenues

Net Income Attributable to PPL Shareowners	\$ (272)	\$ 414	\$ 776	(166)	(47)

- (a) Includes the impact from energy-related economic activity. See "Commodity Price Risk (Non-trading) - Economic Activity" in Note 19 to the Financial Statements for additional information.
- (b) 2013 includes an impairment charge of \$65 million (\$39 million after-tax) for the Corette coal-fired plant and related emission allowances. See Note 18 to the Financial Statements for additional information.
- (c) See Note 8 to the Financial Statements for additional information.

The changes in the components of the Supply segment's results between these periods were due to the factors set forth below, which reflect amounts classified as Unregulated Gross Energy Margins and certain items that management considers special on separate lines within the table and not in their respective Statement of Income line items. See below for additional detail of the special items.

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Unregulated Gross Energy Margins	\$ (194)	\$ (197)
Other operation and maintenance	40	(100)
Depreciation	(29)	(44)
Taxes, other than income	5	8
Other Income (Expense) - net	19	(26)
Interest Expense	(6)	(20)
Other	(5)	5
Income Taxes	33	136
Special items, after-tax	(549)	(124)
Total	<u>\$ (686)</u>	<u>\$ (362)</u>

- See "Margins - Changes in Non-GAAP Financial Measures" for an explanation of Unregulated Gross Energy Margins.
- Lower other operation and maintenance in 2013 compared with 2012 primarily due to lower fossil and hydroelectric costs of \$17 million, largely driven by lower outage costs in 2013 and lower pension expense of \$11 million.

Higher other operation and maintenance in 2012 compared with 2011 primarily due to higher costs at PPL Susquehanna of \$33 million, \$20 million due to the Ironwood Acquisition, \$7 million of higher fossil and hydroelectric unit costs and \$11 million of higher pension expense.
- Higher depreciation in 2013 compared with 2012 primarily due to PP&E additions.

Higher depreciation in 2012 compared with 2011 primarily due to a \$24 million impact from PP&E additions and \$17 million due to the Ironwood Acquisition.
- Higher other income (expense) - net in 2013 compared with 2012, however no individual item was significant in comparison to the prior year.

Lower other income (expense) - net in 2012 compared with 2011 primarily due to a \$22 million gain on the July 2011 debt redemption.
- Higher interest expense in 2012 compared with 2011 primarily due to hedging activity, which increased interest expense by \$30 million, and \$12 million related to the debt assumed as a result of the Ironwood Acquisition, partially offset by \$11 million of lower interest on short-term borrowings.
- Lower income taxes in 2013 compared with 2012 due to lower pre-tax income, which reduced income taxes by \$62 million, and \$10 million related to the impact of prior period tax return adjustments, partially offset by \$38 million of higher taxes due to state tax rate changes.

Lower income taxes in 2012 compared with 2011 due to lower pre-tax income, which reduced income taxes by \$151 million, and \$23 million related to lower adjustments to valuation allowances on Pennsylvania net operating losses, partially offset by \$21 million related to the impact of prior period tax return adjustments.

The following after-tax gains (losses), which management considers special items, also impacted the Supply segment's results.

	Income Statement Line Item	2013	2012	2011
Adjusted energy-related economic activity - net, net of tax of \$54, (\$26), (\$52)	(a)	\$ (77)	\$ 38	\$ 72
Impairments:				
Emission allowances, net of tax of \$0, \$0, \$1	Other operation and maintenance			(1)
RECs, net of tax of \$0, \$0, \$2	Other operation and maintenance			(3)
Adjustments - nuclear decommissioning trust investments, net of tax of \$0, (\$2), \$0	Other Income		2	
Other asset impairments, net of tax of \$0, \$0, \$0	(Expense) - net			
Corette asset impairment, net of tax of \$26, \$0, \$0 (b)	Other operation and maintenance		(1)	
	Other operation and maintenance	(39)		
LKE acquisition-related adjustments:				
Sale of certain non-core generation facilities, net of tax of \$0, \$0, \$0	Discontinued Operations			(2)
Other:				
Montana hydroelectric litigation, net of tax of \$0, \$0, (\$30)	(c)			45
Litigation settlement - spent nuclear fuel storage, net of tax of \$0, \$0, (\$24) (d)	Fuel			33
Change in tax accounting method related to repairs	Income Taxes	(3)		
Counterparty bankruptcy, net of tax of (\$1), \$5, \$5 (e)	Other operation and maintenance	1	(6)	(6)
Wholesale supply cost reimbursement, net of tax of \$0, \$0, (\$3) (f)	Unregulated wholesale energy		1	4
Ash basin leak remediation adjustment, net of tax of \$0, (\$1), \$0	Other operation and maintenance		1	
Coal contract modification payments, net of tax of \$0, \$12, \$0 (g)	Fuel		(17)	
Loss on Colstrip operating lease termination, net of tax of \$284, \$0, \$0 (h)	Loss on lease termination	(413)		
Total		<u>\$ (531)</u>	<u>\$ 18</u>	<u>\$ 142</u>

- (a) See "Reconciliation of Economic Activity" below.
- (b) In 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette coal-fired plant in Montana in long-term reserve status, suspending the plant's operation due to expected market conditions and the costs to comply with MATS. During the fourth quarter of 2013, PPL Energy Supply determined its Corette plant was impaired and recorded a pre-tax charge of \$65 million for the plant and related emission allowances. See Note 18 to the Financial Statements for additional information.
- (c) In February 2012, the U.S. Supreme Court overturned the Montana state court decisions requiring PPL Montana to make lease payments for the use of certain Montana streambeds. As a result, in 2011, PPL Montana reversed its total loss accrual. The amount related to periods prior to 2011 was considered a special item, which consisted of a \$65 million net credit to "Other operation and maintenance" and a \$10 million net credit to "Interest Expense" on the Statement of Income in 2011.
- (d) In May 2011, PPL Susquehanna entered into a settlement agreement with the U.S. DOE relating to PPL Susquehanna's lawsuit, seeking damages for the Department of Energy's failure to accept spent nuclear fuel from the PPL Susquehanna plant. PPL Susquehanna recorded credits to fuel expense to recognize recovery, under the settlement agreement, of certain costs to store spent nuclear fuel at the Susquehanna plant. This special item represents amounts recorded in 2011 to cover the costs incurred from 1998 through December 2010.
- (e) In October 2011, a wholesale customer, SMGT, filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy code. In 2012, PPL EnergyPlus recorded an additional allowance for unpaid amounts under the long-term power contract. In March 2012, the U.S. Bankruptcy Court for the District of Montana approved the request to terminate the contract, effective April 1, 2012. In June 2013, PPL EnergyPlus received an approval for an administrative claim in the amount of \$2 million.
- (f) In January 2012, PPL received \$7 million pre-tax, related to electricity delivered to a wholesale customer in 2008 and 2009. The additional revenue results from several transmission projects approved at PJM for recovery that were not initially anticipated at the time of the electricity auctions and therefore were not included in the auction pricing. A FERC order was issued in 2011 approving the disbursement of these supply costs by the wholesale customer to the suppliers; therefore, PPL accrued its share of this additional revenue in 2011.
- (g) As a result of lower electricity and natural gas prices, coal-fired generation output decreased during 2012. Contract modification payments were incurred to reduce 2012 and 2013 coal deliveries.
- (h) In September 2013, PPL Montana executed a definitive agreement to sell to NorthWestern certain hydroelectric generating facilities located in Montana. To facilitate the sale of the hydroelectric facilities, on December 20, 2013, PPL Montana terminated its operating lease arrangement related to partial interests in Units 1, 2 and 3 of the Colstrip coal-fired electric generating facility and acquired those interests, collectively, for \$271 million. At lease termination, the existing lease-related assets on the balance sheet were written-off and the acquired Colstrip assets were recorded at fair value as of the acquisition date. PPL and PPL Energy Supply recorded a charge of \$697 million (\$413 million after-tax) for the termination of the lease. See Note 8 to the Financial Statements for additional information.

Reconciliation of Economic Activity

The following table reconciles unrealized pre-tax gains (losses) from the table within "Commodity Price Risk (Non-trading) - Economic Activity" in Note 19 to the Financial Statements to the special item identified as "Adjusted energy-related economic activity, net."

	2013	2012	2011
Operating Revenues			
Unregulated wholesale energy	\$ (721)	\$ (311)	\$ 1,407
Unregulated retail energy	12	(17)	31
Operating Expenses			
Fuel	(4)	(14)	6
Energy Purchases	586	442	(1,123)
Energy-related economic activity (a)	(127)	100	321
Option premiums (b)	(4)	(1)	19
Adjusted energy-related economic activity	(131)	99	340
Less: Economic activity realized, associated with the monetization of certain full-requirement sales contracts in 2010		35	216
Adjusted energy-related economic activity, net, pre-tax	\$ (131)	\$ 64	\$ 124
Adjusted energy-related economic activity, net, after-tax	\$ (77)	\$ 38	\$ 72

(a) See Note 19 to the Financial Statements for additional information.

(b) Adjustment for the net deferral and amortization of option premiums over the delivery period of the item that was hedged or upon realization. Option premiums are recorded in "Unregulated wholesale energy" and "Energy purchases" on the Statements of Income.

Margins

Non-GAAP Financial Measures

Management utilizes the following non-GAAP financial measures as indicators of performance for its businesses.

- "Kentucky Gross Margins" is a single financial performance measure of the Kentucky Regulated segment's, LKE's, LG&E's and KU's electricity generation, transmission and distribution operations as well as LKE's and LG&E's distribution and sale of natural gas. In calculating this measure, fuel, energy purchases and certain variable costs of production (recorded as "Other operation and maintenance" on the Statements of Income) are deducted from revenues. In addition, certain other expenses, recorded as "Other operation and maintenance" and "Depreciation" on the Statements of Income, associated with approved cost recovery mechanisms are offset against the recovery of those expenses, which are included in revenues. These mechanisms allow for direct recovery of these expenses and, in some cases, returns on capital investments and performance incentives. As a result, this measure represents the net revenues from the electricity and gas operations.
- "Pennsylvania Gross Delivery Margins" is a single financial performance measure of the Pennsylvania Regulated segment's and PPL Electric's electricity delivery operations, which includes transmission and distribution activities. In calculating this measure, utility revenues and expenses associated with approved recovery mechanisms, including energy provided as a PLR, are offset with minimal impact on earnings. Costs associated with these mechanisms are recorded in "Energy purchases," "Other operation and maintenance," which is primarily Act 129 costs, and "Taxes, other than income," which is primarily gross receipts tax. This performance measure includes PLR energy purchases by PPL Electric from PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)" in the reconciliation table below (in "Energy purchases from affiliate" in PPL Electric's reconciliation table). As a result, this measure represents the net revenues from the Pennsylvania Regulated segment's and PPL Electric's electricity delivery operations.
- "Unregulated Gross Energy Margins" is a single financial performance measure of the Supply segment's and PPL Energy Supply's competitive energy activities, which are managed on a geographic basis. In calculating this measure, energy revenues, including operating revenues associated with certain businesses classified as discontinued operations, are offset by the cost of fuel, energy purchases, certain other operation and maintenance expenses, primarily ancillary charges, gross receipts tax, recorded in "Taxes, other than income," and operating expenses associated with certain businesses classified as discontinued operations. This performance measure is relevant due to the volatility in the individual revenue and expense lines on the Statements of Income that comprise "Unregulated Gross Energy Margins." This volatility stems from a number of factors, including the required netting of certain transactions with ISOs and significant fluctuations in unrealized gains and losses. Such factors could result in gains or losses being recorded in either "Unregulated wholesale energy", "Unregulated retail energy" or "Energy purchases" on the Statements of Income. This performance measure includes PLR revenues from energy sales to PPL Electric by PPL EnergyPlus, which are reflected in "PLR intersegment utility revenue (expense)" in the reconciliation table below (in "Unregulated wholesale energy to affiliate" in PPL Energy Supply's reconciliation table). "Unregulated Gross Energy Margins" excludes adjusted energy-related economic activity, which includes the changes in fair value of positions used to economically hedge a portion of the economic value of the competitive generation assets, full-requirement sales contracts and retail activities. This economic value is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power) prior to the

delivery period that was hedged. Adjusted energy-related economic activity includes the ineffective portion of qualifying cash flow hedges, the monetization of certain full-requirement sales contracts and premium amortization associated with options. This economic activity is deferred, with the exception of the full-requirement sales contracts that were monetized, and included in "Unregulated Gross Energy Margins" over the delivery period that was hedged or upon realization.

These measures are not intended to replace "Operating Income," which is determined in accordance with GAAP, as an indicator of overall operating performance. Other companies may use different measures to analyze and report their results of their operations. Management believes these measures provide additional useful criteria to make investment decisions. These performance measures are used, in conjunction with other information, by senior management and PPL's Board of Directors to manage the operations, analyze actual results compared with budget and, in certain cases, to measure certain corporate financial goals used to determine variable compensation.

Reconciliation of Non-GAAP Financial Measures

The following tables contain the components from the Statement of Income that are included in the non-GAAP financial measures and a reconciliation to PPL's "Operating Income" for the years ended December 31.

	2013					2012				
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues										
Utility	\$ 2,976	\$ 1,866		\$ 2,359 (c)	\$ 7,201	\$ 2,759	\$ 1,760		\$ 2,289 (c)	\$ 6,808
PLR intersegment utility revenue (expense) (d)		(51)	\$ 51				(78)	\$ 78		
Unregulated wholesale energy			3,758	(714) (e)	3,044			4,416	(290)(e)	4,126

Intercompany eliminations		(4)	3	1			(3)	3		
Total Operating Expenses	1,216	761	2,854	4,690	9,521	1,219	742	3,191	4,025	9,177
Total	\$ 1,760	\$ 1,054	\$ 1,974	\$ (2,449)	\$ 2,339	\$ 1,540	\$ 940	\$ 2,168	\$ (1,539)	\$ 3,109

	2011				
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues					
Utility	\$ 2,791	\$ 1,881		\$ 1,620 (c)	\$ 6,292
PLR intersegment utility revenue (expense) (d)		(26)	\$ 26		
Unregulated wholesale energy			3,743	1,469 (e)	5,212
Unregulated retail energy (f)			696	30 (e)	726
Energy-related businesses				507	507
Total Operating Revenues	2,791	1,855	4,465	3,626	12,737

	2011				Operating Income (b)
	Kentucky Gross Margins	PA Gross Delivery Margins	Unregulated Gross Energy Margins	Other (a)	
Operating Expenses					
Fuel	866		1,151	(71) (g)	1,946
Energy purchases	238	738	912	1,365 (e)	3,253
Other operation and maintenance	90	108	16	2,453	2,667
Depreciation	49			911	960
Taxes, other than income		99	30	197	326
Energy-related businesses				484	484
Intercompany eliminations		(11)	3	8	
Total Operating Expenses	1,243	934	2,112	5,347	9,636
Discontinued operations			12	(12) (h)	
Total	\$ 1,548	\$ 921	\$ 2,365	\$ (1,733)	\$ 3,101

- (a) Represents amounts excluded from Margins.
(b) As reported on the Statements of Income.
(c) Primarily represents WPD's utility revenue.
(d) Primarily related to PLR supply sold by PPL EnergyPlus to PPL Electric.
(e) Includes energy-related economic activity, which is subject to fluctuations in value due to market price volatility. See "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements. For 2012, "Unregulated wholesale energy" and "Energy purchases" include a net pre-tax loss of \$35 million related to the monetization of certain full-requirement sales contracts. 2011 includes a net pre-tax loss of \$216 million related to the monetization of certain full-requirement sales contracts and a net pre-tax gain of \$19 million related to the amortization of option premiums.
(f) Although retail energy revenues continue to grow, the net margins related to these activities are not currently a significant component of Unregulated Gross Energy Margins.
(g) Includes economic activity related to fuel as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements. 2012 includes a net pre-tax loss of \$29 million related to coal contract modification payments. 2011 includes pre-tax credits of \$57 million for the spent nuclear fuel litigation settlement.
(h) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Changes in Non-GAAP Financial Measures

The following table shows the non-GAAP financial measures by PPL's reportable segment and by component, as applicable, for the year ended December 31 as well as the change between periods. The factors that gave rise to the changes are described following the table.

	2013	2012	2011	\$ Change	
				2013 vs. 2012	2012 vs. 2011
Kentucky Regulated					
Kentucky Gross Margins					
LKE	\$ 1,760	\$ 1,540	\$ 1,548	\$ 220	\$ (8)
LG&E	791	727	724	64	3
KU	969	813	823	156	(10)
Pennsylvania Regulated					
Pennsylvania Gross Delivery Margins					
Distribution	\$ 803	\$ 730	\$ 741	\$ 73	\$ (11)
Transmission	251	210	180	41	30
Total	\$ 1,054	\$ 940	\$ 921	\$ 114	\$ 19
Supply					
Unregulated Gross Energy Margins					
Eastern U.S.	\$ 1,756	\$ 1,867	\$ 2,015	\$ (111)	\$ (148)
Western U.S.	218	301	350	(83)	(49)
Total	\$ 1,974	\$ 2,168	\$ 2,365	\$ (194)	\$ (197)

Kentucky Gross Margins

Kentucky Gross Margins increased in 2013 compared with 2012, primarily due to higher base rates of \$102 million (\$44 million at LG&E and \$58 million at KU), environmental cost recoveries added to base rates of \$53 million (\$3 million at LG&E and \$50 million at KU), returns from additional environmental capital investments of \$34 million (\$16 million at LG&E and \$18 million at KU), higher fuel recoveries of \$18 million (\$7 million at LG&E and \$11 million at KU) and higher volumes of \$6 million (\$9 million higher at KU partially offset by \$3 million lower at LG&E).

The increase in base rates was the result of new KPSC rates effective January 1, 2013 at LG&E and KU. The environmental cost recoveries added to base rates were due to the transfer of the 2005 and 2006 ECR plans into base rates as a result of the 2012 Kentucky rate cases for LG&E and KU. This transfer results in depreciation and other operation and maintenance expenses associated with the 2005 and 2006 ECR plans being excluded from Kentucky Gross Margins in 2013, while the recovery of such costs remain in Kentucky Gross Margins through base rates.

Kentucky Gross Margins decreased in 2012 compared with 2011, primarily due to \$6 million of lower wholesale margins at LG&E, resulting from lower market prices. Retail margins were \$10 million lower at KU, as volumes were impacted by unseasonably mild weather during the first four months of 2012. Retail margins were \$8 million higher at LG&E due to incremental returns on environmental investments, with retail volumes consistent with the prior year.

Pennsylvania Gross Delivery Margins

Distribution

Distribution margins increased in 2013 compared with 2012, primarily due to a \$53 million favorable effect of price, largely comprised of higher base rates, effective January 1, 2013, a \$15 million impact of weather primarily due to the adverse effect of mild weather in 2012 and higher volumes of \$5 million.

Distribution margins decreased in 2012 compared with 2011, primarily due to a \$14 million impact of weather primarily due to the adverse effect of mild weather early in 2012 and lower revenue applicable to certain energy-related costs of \$3 million due to fewer PLR customers in 2012, partially offset by a \$7 million charge recorded in 2011 to reduce a portion of the transmission service charge regulatory asset associated with a 2005 undercollection that was not included in any subsequent rate reconciliations filed with the PUC.

Transmission

Transmission margins increased for both periods, primarily due to increased investment in plant and the recovery of additional costs through the FERC formula-based rates.

Unregulated Gross Energy Margins

Eastern U.S.

Eastern margins decreased in 2013 compared with 2012 primarily due to \$435 million of lower baseload energy prices, partially offset by \$198 million of higher capacity prices and \$100 million of increased nuclear generation volume.

Eastern margins decreased in 2012 compared with 2011 primarily due to \$121 million of lower baseload energy prices and \$54 million of lower capacity prices.

Western U.S.

Western margins decreased in 2013 compared with 2012 primarily due to \$69 million of lower wholesale energy prices and \$15 million of lower net economic availability of coal and hydroelectric units.

Western margins decreased in 2012 compared with 2011 primarily due to \$34 million of lower wholesale volumes, including \$31 million related to the bankruptcy of SMGT, \$9 million of higher average fuel prices and \$9 million of lower wholesale energy prices.

Statement of Income Analysis --

Utility Revenues

The increase (decrease) in utility revenues was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Domestic:		
PPL Electric (a)	\$ 106	\$ (121)
LKE (b)	217	(34)
Total Domestic	<u>323</u>	<u>(155)</u>
U.K.:		
Price (c)	264	78
Volume (d)	5	(13)
Recovery of allowed revenues (e)	(43)	(6)
WPD Midlands line loss accrual adjustments (f)	(142)	
Foreign currency exchange rates	(27)	(11)
Other	13	(10)
WPD Midlands (g)		633
Total U.K.	<u>70</u>	<u>671</u>
Total	<u>\$ 393</u>	<u>\$ 516</u>

(a) See "Pennsylvania Gross Delivery Margins" for further information.

(b) See "Kentucky Gross Margins" for further information.

(c) The increase in 2013 compared with 2012 was due to price increases effective April 1, 2013 and April 1, 2012. The increase in 2012 compared with 2011 was due to price increases effective April 1, 2012 and April 1, 2011.

(d) The increase in 2013 compared with 2012 was primarily due to the favorable effect of weather. The decrease in 2012 compared with 2011 was primarily due to the downturn in the economy and the unfavorable effect of weather.

(e) The decrease in 2013 compared with 2012 was primarily due to over-recovered revenues as a result of price and weather related volume effects that are not expected to reverse within the regulatory year ending March 31, 2014. Therefore, a liability was recorded and utility revenue reduced for the amount of the over-recovery in 2013. These amounts are expected to be refunded within the regulatory year beginning April 1, 2014.

(f) The decrease was due to a \$97 million increase in revenue in 2012 and a \$45 million reduction in revenue in 2013 from adjusting a loss accrual based on information provided by Ofgem regarding the calculation of line loss incentives and penalties for all network operators, primarily related to DPCR4. See Note 6 to the Financial Statements for additional information.

(g) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 were not comparable with 2011, as 2011 includes eight months of WPD Midlands' results. The increase in 2012 compared with 2011 was primarily due to four additional months of utility revenue in 2012 of \$446 million. The comparable eight month period was higher in 2012 compared to 2011 due to a \$125 million price increase effective April 1, 2012 and the \$97 million line loss accrual adjustment in 2012 discussed above.

Certain Operating Revenues and Expenses Included in "Margins"

The following Statement of Income line items are included above within "Margins" and are not discussed separately.

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Unregulated wholesale energy	\$ (1,082)	\$ (1,086)
Unregulated retail energy	183	118
Fuel	107	(109)
Energy purchases	(588)	(698)

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Domestic:		
LKE coal plant operations and maintenance (a)	\$ (15)	\$ 21
Act 129 costs incurred (b)	(24)	(6)
Vegetation management (c)	14	10
PPL Electric payroll-related costs (d)	4	17
Montana hydroelectric litigation (e)		65
PPL Susquehanna (f)	(3)	33
Fossil and hydroelectric plants (g)	43	1
Ironwood Acquisition (h)		20
PUC-reportable storm costs, net of insurance recoveries	(21)	14
PPL EnergyPlus (i)	(18)	17
Stock based compensation	2	17
Other	(10)	21

	2013 vs. 2012	2012 vs. 2011
U.K.:		
Network maintenance (j)	32	11
Third-party engineering (k)	12	(3)
Pension (l)	8	21
Separation benefits (m)	(11)	
Employee-related expenses	(7)	
Foreign currency exchange rates	(4)	(2)
Acquisition-related adjustments	(8)	
WPD Midlands (n)		(85)
Other	(4)	(4)
	<u>\$ (10)</u>	<u>\$ 168</u>

- (a) The decrease in 2013 compared with 2012 was primarily due to \$21 million of lower costs related to the timing and scope of scheduled outages, partially offset by increased generation costs. The increase in 2012 compared with 2011 was primarily due to \$11 million of expenses related to an increase scope of scheduled outages, as well as \$5 million of increased maintenance at the Ghent plant on the scrubber system and primary fuel combustion system.
- (b) Relates to costs associated with PPL Electric's PUC-approved energy efficiency and conservation plan with programs starting in 2010. These costs are recovered in customer rates. The decrease in both periods primarily results from the number of programs and timing of such programs. Phase 1 of Act 129 closed in May 2013. Phase 2 programs began in June 2013.
- (c) PPL Electric incurred higher vegetation management costs in both periods due to increased activities related to maintaining and increasing system reliability for both the transmission and distribution systems. The amount for 2012 compared to the 2011 period was also higher due to increased costs to comply with federal transmission reliability requirements.
- (d) PPL Electric Utilities incurred higher payroll costs of \$17 million in 2012 compared with 2011 due to less project costs being capitalized.
- (e) In February 2012, the U.S. Supreme Court overturned the Montana state court decisions requiring PPL Montana to make lease payments for the use of certain Montana streambeds. As a result, in 2011, PPL Montana reversed its total loss accrual. See Note 15 to the Financial Statements for additional information.
- (f) 2012 compared with 2011 was higher due to outage and project costs.
- (g) In 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette plant in long-term reserve status, suspending the plant's operations due to expected market conditions and the costs to comply with MATS. During the fourth quarter of 2013, PPL Energy Supply determined its Corette plant was impaired and recorded a charge of \$65 million for the plant and related emission allowances. See Note 18 to the Financial Statements for additional information.
- (h) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2012 includes nine months of expense and, therefore, have been isolated for purposes of comparability. See Note 10 to the Financial Statements for information on the acquisition.
- (i) 2013 compared with 2012 was lower primarily due to SMGT filing under Chapter 11 of the U.S. Bankruptcy Code. \$11 million of receivables billed to SMGT were fully reserved in 2012. For 2012 compared with 2011, no individual item was significant in comparison to the prior year.
- (j) The increases in both periods were primarily due to higher vegetation management costs.
- (k) These costs are offset by revenues reflected in "Utility" on the Statement of Income.
- (l) The increases in both periods were due to higher pension costs resulting from increased amortization of actuarial losses.
- (m) The decrease in 2013 compared with 2012 was primarily due to costs incurred in 2012 related to the WPD Midlands reorganization.
- (n) Amounts in 2012 compared with 2011 were not comparable as 2011 includes eight months of WPD Midlands' results and therefore, have been isolated for purposes of comparability. The increase in 2012 compared with 2011 was partially due to four additional months of expense in 2012 of \$86 million. The comparable eight month period was \$171 million lower in 2012 compared to 2011 primarily due to \$86 million of lower separation benefits, \$34 million of lower acquisition related costs, and \$26 million of lower pension expense.

Loss on Lease Termination

A \$697 million charge was recorded in 2013 for the termination of the Colstrip operating lease to facilitate the sale of the Montana hydroelectric generating facilities. See Note 8 to the Financial Statements for additional information.

Depreciation

The increase (decrease) in depreciation was due to:

	2013 vs. 2012	2012 vs. 2011
Additions to PP&E, net	\$ 89	\$ 65
LKE lower depreciation rates effective January 1, 2013 (a)	(22)	
WPD Midlands (b)		55
Ironwood Acquisition (c)		17
Other	(6)	3
Total	<u>\$ 61</u>	<u>\$ 140</u>

- (a) A result of the 2012 rate case.
- (b) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 were not comparable with 2011, which includes eight months of WPD Midlands' results and therefore, have been isolated for purposes of comparability. The increase in 2012 compared with 2011 is primarily due to four additional months of expense in 2012 of \$49 million.

(c) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2012 includes nine months of expenses and therefore, have been isolated for purposes of comparability. See Note 10 to the Financial Statements for information on the acquisition.

Taxes, Other Than Income

The increase (decrease) in taxes, other than income was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Domestic property tax expense (a)	\$ 3	\$ 14
State capital stock tax (b)	(5)	(11)
WPD Midlands (c)		33
Other		4
Total	<u>\$ (2)</u>	<u>\$ 40</u>

- (a) The increase in 2012 compared with 2011 is primarily due to the fully amortized PURTA refund to the customers in 2011 pursuant to PUC regulations. This tax is included in "Pennsylvania Gross Delivery Margins" above.
- (b) The decrease in 2012 compared with 2011 was due to changes in the statutory rate from the prior year.
- (c) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2011 includes eight months of WPD Midlands' results and therefore, have been isolated for purposes of comparability. The increase in 2012 compared with 2011 is primarily due to four additional months of expense in 2012 of \$30 million.

Other Income (Expense) - net

The increase (decrease) in other income (expense) - net was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Economic foreign currency exchange contracts (Note 19)	\$ 14	\$ (62)
Net hedge gains associated with the 2011 Bridge Facility (a)		(55)
Foreign currency loss on 2011 Bridge Facility		57
Gain on redemption of debt (b)		(22)
WPD Midlands acquisition-related adjustments in 2011 (Note 10)		55
Losses from equity method investments	8	(9)
Charitable contributions	(15)	(1)
Other	9	(6)
Total	<u>\$ 16</u>	<u>\$ (43)</u>

- (a) Represents a gain on foreign currency contracts in 2011 that hedged the repayment of the 2011 Bridge Facility borrowing.
- (b) In July 2011, as a result of PPL Electric's redemption of 7.125% Senior Secured Bonds due 2013, PPL recorded a gain on the accelerated amortization of the fair value adjustment to the debt recorded in connection with previously settled fair value hedges.

Other-Than-Temporary Impairments

Other-than-temporary impairments decreased by \$26 million in 2013 compared with 2012 and increased by \$21 million in 2012 compared with 2011 primarily due to a \$25 million pre-tax impairment of the EEI investment in 2012. See Notes 1 and 18 to the Financial Statements for additional information.

Interest Expense

The increase (decrease) in interest expense was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
2011 Bridge Facility costs related to the acquisition of WPD Midlands (Notes 7 and 10)		\$ (44)
2011 Equity Units (a)	\$ (2)	12
Long-term debt interest expense (b)	31	3
Short-term debt interest expense (c)	3	(12)
Inflation adjustment on U.K. Index-linked Senior Unsecured Notes	4	(12)
WPD Midlands (d)		80
Ironwood Acquisition (e)		12
Hedging activities and ineffectiveness	4	29
Capitalized interest (f)	6	(6)
Montana hydroelectric litigation (g)		10
Loss on extinguishment of debt (h)	10	
Other	(11)	(9)
Total	<u>\$ 45</u>	<u>\$ 63</u>

- (a) Interest related to the issuance in April 2011 to support the WPD Midlands acquisition.

- (b) 2013 increased due to debt issuances by PPL Capital Funding in March 2013, June 2012 and October 2012, by PPL Electric in July 2013 and August 2012, and WPD (East Midlands) in April 2012. Partially offsetting these increases was PPL Energy Supply's debt maturity in July 2013.
- (c) 2012 compared with 2011 was lower primarily due to lower interest rates on 2012 short-term borrowings coupled with lower fees on credit facilities.
- (d) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2011 includes eight months of WPD Midlands' results and therefore, have been isolated for purposes of comparability. The increase in 2012 compared with 2011 is primarily due to four additional months of expense in 2012 of \$74 million.
- (e) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2012 includes nine months of expense and therefore, have been isolated for purposes of comparability. See Note 10 to the Financial Statements for information on the acquisition.
- (f) Includes AFUDC.
- (g) In February 2012, the U.S. Supreme Court overturned the Montana state court decisions requiring PPL Montana to make lease payments for the use of certain Montana streambeds. As a result, in 2011, PPL Montana reversed its total loss accrual including accrued interest. See Note 15 to the Financial Statements for additional information.
- (h) In May 2013, PPL Capital Funding remarketed and exchanged junior subordinate notes that were originally issued in June 2010 as a component of PPL's 2010 Equity Units.

See Note 7 to the Financial Statements for information on 2013 long-term debt activity.

Income Taxes

The increase (decrease) in income taxes was due to:

	2013 vs. 2012	2012 vs. 2011
Change in pre-tax income	\$ (335)	\$ (296)
State valuation allowance adjustments (a)	11	(23)
State deferred tax rate change (b)	34	7
Federal and state tax reserve adjustments (c)	(42)	(40)
Federal and state tax return adjustments (d)	(21)	33
U.S. income tax on foreign earnings net of foreign tax credit (e)	(17)	57
U.K. Finance Act adjustments (f)	(22)	2
Foreign valuation allowance adjustments (g)		(147)
Foreign tax reserve adjustments (g)	3	134
Foreign tax return adjustments	2	(6)
Depreciation not normalized (a)	3	9
Net operating loss carryforward adjustments (h)	9	(9)
WPD Midlands (i)		146
Other	10	(13)
Total	<u>\$ (365)</u>	<u>\$ (146)</u>

- (a) The valuation allowances recorded on PPL's state deferred tax assets primarily relate to Pennsylvania net operating loss carryforwards. Pennsylvania requires that each corporation file a separate income tax return and has significant annual limitations on the deduction for net operating loss carryforwards. Currently, Pennsylvania allows an annual maximum deduction equal to the greater of \$3 million or 20% of taxable income. Recent legislation increased the annual maximum deduction to the greater of \$5 million or 30% of taxable income for tax years beginning in 2015.

During 2013, PPL recorded \$24 million state deferred income tax expense related to a deferred tax valuation allowance primarily due to a decrease in projected future taxable income over the remaining carryforward period of Pennsylvania net operating losses.

During 2012, PPL recorded \$9 million state deferred income tax expense related to a deferred tax valuation allowance primarily due to a decrease in projected future taxable income over the remaining carryforward period of Pennsylvania net operating losses.

During 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. The guidance allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal income tax purposes. Due to the decrease in projected taxable income related to bonus depreciation and a decrease in projected future taxable income, PPL recorded a \$43 million state deferred income tax expense related to deferred tax valuation allowances during 2011.

Additionally, the 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation. The federal provision for 100% bonus depreciation generally applies to property placed into service before January 1, 2012. The placed-in-service deadline was extended to January 1, 2013 for property that had a cost in excess of \$1 million, had a production period longer than one year and had a tax life of at least ten years. PPL's tax deduction for 100% bonus regulated tax depreciation was zero in 2013 and was significantly lower in 2012 than in 2011.

- (b) Changes in state apportionment resulted in an increase to the future estimated state tax rate at December 31, 2013 and reductions to the future estimated state tax rate at December 31, 2012 and 2011. PPL recorded a \$15 million deferred tax expense in 2013, a \$19 million deferred tax benefit in 2012 and a \$26 million deferred tax benefit in 2011 related to its state deferred tax liabilities.
- (c) In May 2013, the U.S. Supreme Court reversed the December 2011 ruling of the U.S. Court of Appeals for the Third Circuit on the creditability of U.K. Windfall Profits Tax for tax purposes. As a result of this decision, PPL recorded a tax benefit of \$44 million during 2013. PPL recorded \$39 million tax expense related to the U.S. Court of Appeals for the Third Circuit's ruling in 2011. See Note 5 to the Financial Statements for additional information.

PPL recorded a tax benefit of \$7 million during 2013 and \$6 million during 2012 and 2011 to federal and state income tax reserves related to stranded cost securitization. The reserve balance at December 31, 2013 related to stranded costs securitization is zero.

- (d) During 2012, PPL recorded \$16 million in federal and state income tax expense related to the filing of the 2011 federal and state income tax returns. Of this amount, \$5 million relates to the reversal of prior years' state income tax benefits related to regulated depreciation. PPL changed its method of accounting for repair expenditures for tax purposes effective for its 2008 tax year. In August 2011, the IRS issued guidance regarding the use and evaluation of statistical samples and sampling estimates for network assets. The IRS guidance provided a safe harbor method of determining whether the repair expenditures for electric transmission and distribution property can be currently deducted for tax purposes. PPL adopted the safe harbor method with the filing of its 2011 federal income tax return.

During 2011, PPL recorded \$17 million in federal and state tax benefits related to the filing of the 2010 federal and state income tax returns. Of this amount, \$7 million in tax benefits related to an additional domestic manufacturing deduction resulting from revised bonus depreciation amounts and \$3 million in tax benefits related to the flow-through impact of Pennsylvania regulated state tax depreciation.

- (e) During 2013, PPL recorded \$25 million income tax expense resulting from increased taxable dividends offset by a \$19 million income tax benefit associated with a ruling obtained from the IRS impacting the recalculation of 2010 U.K. earnings and profits that was reflected on an amended 2010 U.S. tax return.

During 2012, PPL recorded a \$23 million adjustment to federal income tax expense related to the recalculation of 2010 U.K. earnings and profits.

During 2011, PPL recorded a \$28 million federal income tax benefit related to U.K. pension contributions.

- (f) The U.K.'s Finance Act 2013, enacted in July 2013, reduced the U.K. statutory income tax rate from 23% to 21% effective April 1, 2014 and from 21% to 20% effective April 1, 2015. As a result, PPL reduced its net deferred tax liabilities and recognized a \$97 million deferred tax benefit in 2013 related to both rate decreases.

The U.K.'s Finance Act 2012, enacted in July 2012, reduced the U.K. statutory income tax rate from 25% to 24% retroactive to April 1, 2012 and from 24% to 23% effective April 1, 2013. As a result, PPL reduced its net deferred tax liabilities and recognized a \$75 million deferred tax benefit in 2012 related to both rate decreases. WPD Midlands' portion of the deferred tax benefit is \$43 million.

The U.K.'s Finance Act 2011, enacted in July 2011, reduced the U.K. statutory income tax rate from 27% to 26% retroactive to April 1, 2011 and from 26% to 25% effective April 1, 2012. As a result, PPL reduced its net deferred tax liabilities and recognized a \$69 million deferred tax benefit in 2011 related to both rate decreases. WPD Midlands' portion of the deferred tax benefit is \$35 million.

- (g) During 2011, WPD reached an agreement with the HMRC related to the amount of the capital losses that resulted from prior years' restructuring in the U.K. and recorded a \$147 million foreign tax benefit for the reversal of tax reserves related to the capital losses. Additionally, WPD recorded a \$147 million valuation allowance for the amount of capital losses that, more likely than not, will not be utilized.
- (h) During 2012, PPL recorded adjustments to deferred taxes related to net operating loss carryforwards of LKE based on income tax return adjustments.
- (i) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2011 includes eight months of WPD Midlands' results and therefore, have been isolated for purposes of comparability. The increase in 2012 compared with 2011 was primarily due to higher pre-tax income.

See Note 5 to the Financial Statements for additional information on income taxes.

Noncontrolling Interests

"Net Income Attributable to Noncontrolling Interests" decreased by \$4 million in 2013 compared with 2012 and \$12 million in 2012 compared with 2011 primarily due to PPL Electric's June 2012 redemption of all 2.5 million shares of its preference stock.

PPL Energy Supply: Earnings, Margins and Statement of Income Analysis

Earnings

	2013	2012	2011
Net Income (Loss) Attributable to PPL Energy Supply Member	\$ (230)	\$ 474	\$ 768
Special items, gains (losses), after-tax	(531)	18	142

Excluding special items, pre-tax earnings in 2013 compared with 2012 decreased primarily due to lower baseload energy prices and higher depreciation, partially offset by higher capacity prices, higher nuclear generation volume, lower operation and maintenance expense and lower income taxes.

Excluding special items, pre-tax earnings in 2012 compared with 2011 decreased primarily due to lower Eastern energy margins resulting from lower baseload energy and capacity prices, lower Western energy margins resulting from an early 2012 contract termination related to the bankruptcy of SMGT, higher operation and maintenance expense, higher depreciation, partially offset by lower financing costs and income taxes.

The table below quantifies the changes in the components of Net Income Attributable to PPL Energy Supply Member between these periods, which reflect amounts classified as Unregulated Gross Energy Margins and certain items that management considers special on separate lines within the table and not in their respective Statement of Income line items. See PPL's "Results of Operations - Segment Earnings - Supply Segment" for the details of special items.

	2013 vs. 2012	2012 vs. 2011
Unregulated Gross Energy Margins	\$ (194)	\$ (197)
Other operation and maintenance	23	(53)
Depreciation	(33)	(41)
Taxes, other than income	6	6
Other Income (Expense) - net	15	(5)
Interest Expense	(3)	16
Other	(3)	2
Income Taxes	34	102
Special items, after-tax	(549)	(124)
Total	<u>\$ (704)</u>	<u>\$ (294)</u>

Margins

"Unregulated Gross Energy Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Margins" for information on why management believes this measure is useful and for explanations of the underlying drivers of the changes between periods.

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income" for the years ended December 31.

	2013			2012		
	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)	Unregulated Gross Energy Margins	Other (a)	Operating Income (b)
Operating Revenues						
Unregulated wholesale energy	\$ 3,758	\$ (714) (c)	\$ 3,044	\$ 4,416	\$ (290) (c)	\$ 4,126
Unregulated wholesale energy to affiliate	51		51	78		78
Unregulated retail energy (d)	1,019	12 (c)	1,031	865	(17) (c)	848
Energy-related businesses		527	527		448	448
Total Operating Revenues	<u>4,828</u>	<u>(175)</u>	<u>4,653</u>	<u>5,359</u>	<u>141</u>	<u>5,500</u>
Operating Expenses						
Fuel	1,045	4 (e)	1,049	931	34 (e)	965
Energy purchases	1,742	(574) (c)	1,168	2,204	(386) (c)	1,818
Energy purchases from affiliate	3		3	3		3
Other operation and maintenance	20	1,052	1,072	19	1,022	1,041
Loss on lease termination (Note 8)		697	697

Energy purchases from affiliate	3		3
Other operation and maintenance	16	913	929
Depreciation		244	244
Taxes, other than income	30	41	71
Energy-related businesses		458	458
Total Operating Expenses	<u>2,112</u>	<u>2,956</u>	<u>5,068</u>
Discontinued Operations	12	(12) (f)	
Total	<u>\$ 2,365</u>	<u>\$ (1,004)</u>	<u>\$ 1,361</u>

- (a) Represents amounts excluded from Margins.
- (b) As reported on the Statements of Income.
- (c) Includes energy-related economic activity, which is subject to fluctuations in value due to market price volatility. See "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements. For 2012, "Unregulated wholesale energy" and "Energy purchases" include a net pre-tax loss of \$35 million related to the monetization of certain full-requirement sales contracts. 2011 includes a net pre-tax loss of \$216 million related to the monetization of certain full-requirement sales contracts and a net pre-tax gain of \$19 million related to the amortization of option premiums.
- (d) Although retail energy revenues continue to grow, the net margins related to these activities are not currently a significant component of Unregulated Gross Energy Margins.
- (e) Includes economic activity related to fuel as described in "Commodity Price Risk (Non-trading) - Economic Activity" within Note 19 to the Financial Statements. 2012 includes a net pre-tax loss of \$29 million related to coal contract modification payments. 2011 includes pre-tax credits of \$57 million for the spent nuclear fuel litigation settlement.
- (f) Represents the net of certain revenues and expenses associated with certain businesses that are classified as discontinued operations. These revenues and expenses are not reflected in "Operating Income" on the Statements of Income.

Statement of Income Analysis --

Certain Operating Revenues and Expenses Included in "Unregulated Gross Energy Margins"

The following Statement of Income line items are included above within "Unregulated Gross Energy Margins" and are not discussed separately.

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Unregulated wholesale energy	\$ (1,082)	\$ (1,086)
Unregulated wholesale energy to affiliate	(27)	52
Unregulated retail energy	183	121
Fuel	84	(115)
Energy purchases	(650)	(465)

Energy-Related Businesses

The \$10 million net increase in contributions from energy-related businesses in 2012 compared with 2011 primarily relates to the mechanical services businesses, due to improved margins on construction and energy service projects in 2012.

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Fossil and hydroelectric plants (a)	\$ 43	\$ 1
PPL EnergyPlus (b)	(18)	17
PPL Susquehanna (c)	(3)	33
Montana hydroelectric litigation (d)		65
Ironwood Acquisition (e)		20
Trademark royalties (f)		(34)
Other	9	10
Total	<u>\$ 31</u>	<u>\$ 112</u>

- (a) In 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place its Corette coal-fired plant in Montana in long-term reserve status, suspending the plant's operations due to expected market conditions and the costs to comply with MATS. During the fourth quarter of 2013, PPL Energy Supply determined its Corette plant was impaired and recorded a charge of \$65 million for the plant and related emission allowances. See Note 18 to the Financial Statements for additional information.
- (b) 2013 compared with 2012 was lower primarily due to SMGT filing under Chapter 11 of the U.S. Bankruptcy Code. \$11 million of receivables billed to SMGT were fully reserved in 2012. For 2012 compared with 2011, no individual item was significant in comparison to the prior year.
- (c) 2012 compared with 2011 was higher primarily due to outage and project costs.
- (d) In February 2012, the U.S. Supreme Court overturned the Montana state court decisions requiring PPL Montana to make lease payments for the use of certain Montana streambeds. As a result, in 2011, PPL Montana reversed its total loss accrual. See Note 15 to the Financial Statements for additional information.
- (e) Amounts in 2013 compared with 2012 are comparable and have not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2012 includes nine months of expense and therefore, have been isolated for purposes of comparability. See Note 10 to the Financial Statements for information on the acquisition.
- (f) In 2011, PPL Energy Supply was charged trademark royalties by an affiliate. The agreement was terminated in December 2011.

Loss on Lease Termination

A \$697 million charge was recorded in 2013 for the termination of the Colstrip operating lease to facilitate the sale of the Montana hydroelectric generating facilities. See Note 8 to the Financial Statements for additional information.

Depreciation

Depreciation increased by \$33 million in 2013 compared with 2012, primarily due to net PP&E additions.

Depreciation increased by \$41 million in 2012 compared with 2011, primarily due to \$16 million attributable to net PP&E additions and \$17 million attributable to the Ironwood Acquisition in April 2012.

Taxes, Other Than Income

Taxes, other than income decreased by \$2 million in 2012 compared with 2011, primarily due to a \$7 million decrease in state capital stock tax offset by a \$4 million increase in state gross receipts tax.

Other Income (Expense) - net

See Note 17 to the Financial Statements for details.

Interest Income from Affiliates

Interest income from affiliates decreased by \$6 million in 2012 compared with 2011, primarily due to lower average loan balances with PPL Energy Funding.

Interest Expense

The increase (decrease) in interest expense was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Long-term debt interest expense (a)	\$ (5)	\$ (11)
Short-term debt interest expense (b)	(2)	(10)
Ironwood Acquisition (c)		12
Capitalized interest (d)	10	
Net amortization of debt discounts, premiums and issuance costs (e)	(1)	(9)
Montana hydroelectric litigation (f)		10
Other	1	2
Total	<u>\$ 3</u>	<u>\$ (6)</u>

- (a) The decrease in 2013 compared with 2012 was primarily due to the July 2013 debt maturity. The decrease in 2012 compared with 2011 was primarily due to the debt redemption in July 2011, along with the repayment and subsequent issuance of debt in the fourth quarter of 2011.
- (b) The decrease in 2012 compared with 2011 was primarily due to lower interest rates on 2012 short-term borrowings coupled with lower fees on credit facilities.
- (c) The change in 2013 compared with 2012 is comparable and has not been isolated for purposes of comparability. Amounts in 2012 compared with 2011 were not comparable as 2012 includes nine months of expense and therefore, have been isolated for purposes of comparability.
- (d) The increase in 2013 compared with 2012 was primarily due to the Rainbow hydroelectric redevelopment project.
- (e) The decrease in 2012 compared with 2011 includes the impact of accelerating the amortization of deferred financing fees of \$7 million in 2011, due to the July 2011 redemption.
- (f) In February 2012, the U.S. Supreme Court overturned the Montana state court decisions requiring PPL Montana to make lease payments for the use of certain Montana streambeds. As a result, in 2011, PPL Montana reversed its total loss accrual including accrued interest. See Note 15 to the Financial Statements for additional information.

Income Taxes

The increase (decrease) in income taxes was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Change in pre-tax income	\$ (448)	\$ (191)
State valuation allowance adjustments (a)	2	(20)
State deferred tax rate change (b)	34	7
Federal income tax credits	4	
Federal and state tax reserve adjustments (c)	8	(4)
Federal and state tax return adjustments (d)	(5)	26
Total	<u>\$ (405)</u>	<u>\$ (182)</u>

- (a) The valuation allowances recorded on PPL Energy Supply's state deferred tax assets primarily relate to Pennsylvania net operating loss carryforwards. Pennsylvania requires that each corporation file a separate income tax return and has significant annual limitations on the deduction for net operating loss carryforwards. Currently, Pennsylvania allows an annual maximum deduction equal to the greater of \$3 million or 20% of taxable income. Recent legislation increased the annual maximum deduction to the greater of \$5 million or 30% of taxable income for tax years beginning in 2015.

During 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. The guidance allows 100% bonus for qualifying assets in the same year bonus depreciation is allowed for federal income tax purposes. Due to the decrease in projected taxable income related to bonus depreciation and a decrease in projected future taxable income, PPL Energy Supply recorded \$22 million in state deferred income tax expense related to deferred tax valuation allowances during 2011.

- (b) Changes in state apportionment resulted in an increase to the future estimated state tax rate at December 31, 2013 and reductions to the future estimated state tax rate at December 2012 and 2011. PPL Energy Supply recorded a \$15 million deferred tax expense in 2013, a \$19 million deferred tax benefit in 2012 and a \$26 million deferred tax benefit in 2011 related to its state deferred tax liabilities.
- (c) During 2013, PPL Energy Supply reversed \$3 million in tax benefits related to a 2008 change in method of accounting for certain expenditure for tax purposes and recorded \$4 million in federal tax expense related to differences in over (under) payment interest rates applied to audit claims as a result of the U.S. Supreme Court decision related to Windfall Profits Tax.
- (d) During 2011, PPL Energy Supply recorded \$22 million in federal and state tax benefits related to the filing of the 2010 federal and state income tax returns. Of that amount, \$7 million in tax benefits related to an additional domestic manufacturing deduction resulting from revised bonus depreciation amounts.

See Note 5 to the Financial Statements for additional information on income taxes.

PPL Electric: Earnings, Margins and Statement of Income Analysis

Earnings

	2013	2012	2011
Net Income Available to PPL	\$ 209	\$ 132	\$ 173

Excluding special items, pre-tax earnings in 2013 compared with 2012 increased primarily due to higher distribution base rates that became effective January 1, 2013, higher transmission margins from additional capital investments, lower operation and maintenance expense and higher distribution sales volume due to weather, partially offset by higher depreciation.

Excluding special items, pre-tax earnings in 2012 compared with 2011 decreased primarily due to higher operation and maintenance expense, higher income and non-income taxes, lower distribution margins as a result of mild weather early in the year, higher depreciation, partially offset by higher transmission revenue and lower financing costs due to the redemption of \$250 million of preferred securities.

The table below quantifies the changes in the components of Net Income Available to PPL between these periods, which reflect amounts classified as Pennsylvania Gross Delivery Margins on a separate line within the table and not in their respective Statement of Income line items.

	2013 vs. 2012	2012 vs. 2011
Pennsylvania Gross Delivery Margins	\$ 114	\$ 19
Other operation and maintenance	23	(50)
Depreciation	(18)	(14)
Taxes, other than income	5	(9)
Other Income (Expense) - net	(3)	2
Interest Expense	(9)	(1)
Income Taxes	(39)	
Distributions on preference stock	4	12
Total	<u>\$ 77</u>	<u>\$ (41)</u>

Margins

"Pennsylvania Gross Delivery Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Margins" for information on why management believes this measure is useful and for explanations of the underlying drivers of the changes between periods.

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income."

	2013			2012		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues						
Retail electric	\$ 1,866		\$ 1,866	\$ 1,760		\$ 1,760
Electric revenue from affiliate	4		4	3		3
Total Operating Revenues	1,870		1,870	1,763		1,763
Operating Expenses						
Energy purchases	588		588	550		550
Energy purchases from affiliate	51		51	78		78
Other operation and maintenance	82	\$ 449	531	104	\$ 472	576
Depreciation		178	178		160	160
Taxes, other than income	95	8	103	91	14	105
Total Operating Expenses	816	635	1,451	823	646	1,469
Total	\$ 1,054	\$ (635)	\$ 419	\$ 940	\$ (646)	\$ 294

	2011		
	PA Gross Delivery Margins	Other (a)	Operating Income (b)
Operating Revenues			
Retail electric	\$ 1,881		\$ 1,881
Electric revenue from affiliate	11		11
Total Operating Revenues	1,892		1,892
Operating Expenses			
Energy purchases	738		738
Energy purchases from affiliate	26		26
Other operation and maintenance	108	\$ 422	530
Depreciation		146	146
Taxes, other than income	99	5	104
Total Operating Expenses	971	573	1,544
Total	\$ 921	\$ (573)	\$ 348

- (a) Represents amounts excluded from Margins.
(b) As reported on the Statements of Income.

Statement of Income Analysis --

Certain Operating Revenues and Expenses Included in "Pennsylvania Gross Delivery Margins"

The following Statement of Income line items are included above within "Pennsylvania Gross Delivery Margins" and are not discussed separately.

	2013 vs. 2012	2012 vs. 2011
Retail electric	\$ 106	\$ (121)
Electric revenue from affiliate	1	(8)
Energy purchases	38	(188)
Energy purchases from affiliate	(27)	52

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Act 129 costs incurred (a)	\$ (24)	\$ (6)
Vegetation management (b)	14	10
Payroll-related costs (c)	4	17
Allocation of certain corporate support group costs	(19)	11
PUC-reportable storm costs, net of insurance recovery	(18)	7
Other	(2)	7
Total	<u>\$ (45)</u>	<u>\$ 46</u>

- (a) Relates to costs associated with PPL Electric's PUC-approved energy efficiency and conservation plan with programs starting in 2010. These costs are recovered in customer rates. The decrease in both periods primarily results from the number of programs and the timing of such programs. Phase 1 of Act 129 closed in May 2013. Phase 2 programs began in June 2013.
- (b) PPL Electric incurred higher vegetation management costs in both periods due to increased activities related to maintaining and increasing system reliability for both the transmission and distribution systems. The 2012 compared with 2011 period was also higher due to activities related to compliance with federal transmission reliability requirements.
- (c) Higher payroll costs of \$17 million in 2012 compared with 2011 due to less project costs being capitalized.

Depreciation

Depreciation increased by \$18 million in 2013 compared with 2012, and by \$14 million in 2012 compared with 2011, primarily due to net PP&E additions.

Taxes, Other Than Income

Taxes, other than income increased by \$1 million in 2012 compared with 2011. The increase was primarily a result of the net effect of the fully amortized PURTA refund to customers of \$10 million in 2011, partially offset by a decrease in gross receipts tax of \$7 million in 2012.

Financing Costs

The increase (decrease) in financing costs was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Long-term debt interest expense (a)	\$ 12	\$ 1
Distributions on Preference Stock (b)	(4)	(12)
Other	(3)	
Total	<u>\$ 5</u>	<u>\$ (11)</u>

- (a) The increase was due to debt issuances in August 2012 and July 2013.
- (b) The decrease was due to the June 2012 redemption of all 2.5 million shares of preference stock.

Income Taxes

The increase (decrease) in income taxes was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Change in pre-tax income	\$ 47	\$ (22)
Federal and state tax reserve adjustments (a)	(1)	1
Federal and state tax return adjustments (b)	(8)	11
Depreciation not normalized (c)	2	9
Other		1
Total	<u>\$ 40</u>	<u>\$ 8</u>

- (a) PPL Electric recorded a tax benefit of \$7 million during 2013 and \$6 million during 2012 and 2011 to federal and state income tax reserves related to stranded costs securitization. The reserve balance at December 31, 2013 related to stranded costs securitization is zero.
- (b) PPL Electric changed its method of accounting for repair expenditures for tax purposes effective for its 2008 tax year. In August, 2011, the IRS issued guidance regarding the use and evaluation of statistical samples and sampling estimates for network assets. The IRS guidance provided a safe harbor method of determining whether the repair expenditures for electric transmission and distribution property can be currently deducted for tax purposes. PPL Electric adopted the safe harbor method with the filing of its 2011 federal income tax return and recorded a \$5 million adjustment to federal and state income tax expense resulting from the reversal of prior years' state income tax benefits related to regulated depreciation.

During 2011, PPL Electric recorded a \$5 million federal and state income tax benefit as a result of filing its 2010 federal and state income tax returns. The tax benefit primarily related to the flow-through impact of Pennsylvania regulated 100% bonus tax depreciation.

- (c) During 2011, the Pennsylvania Department of Revenue issued interpretive guidance on the treatment of bonus depreciation for Pennsylvania income tax purposes. The guidance allows 100% bonus depreciation for qualifying assets in the same year bonus depreciation is allowed for federal income tax purposes. The 100% Pennsylvania bonus depreciation deduction created a current state income tax benefit for the flow-through impact of Pennsylvania regulated state tax depreciation. The federal provision for 100% bonus depreciation generally applies to property placed in service before January 1, 2012. The placed-in-service deadline was extended to January 1, 2013 for property that had a cost in excess of \$1 million, had a production period longer than one year and had a tax life of at least ten years. The PPL Electric's tax deduction for 100% bonus depreciation was zero in 2013 and was significantly lower in 2012 than in 2011.

See Note 5 to the Financial Statements for additional information on income taxes.

LKE: Earnings, Margins and Statement of Income Analysis

Earnings

	2013	2012	2011
Net Income	\$ 347	\$ 219	\$ 265
Special items, gains (losses), after-tax	3	(16)	

Excluding special items, earnings in 2013 compared with 2012 increased primarily due to higher electricity and gas base rates that went into effect January 1, 2013 and returns from additional environmental capital investments.

Excluding special items, earnings in 2012 compared with 2011 decreased primarily due to higher operation and maintenance expense, higher depreciation, higher property taxes and losses from an equity method investment, partially offset by lower income taxes.

The table below quantifies the changes in the components of Net Income between these periods, which reflect amounts classified as Margins and certain items that management considers special on separate lines within the table and not in their respective Statement of Income line items. See PPL's "Results of Operations - Segment Earnings - Kentucky Regulated segment" for details of the special items.

	2013 vs. 2012	2012 vs. 2011
Margins	\$ 220	\$ (8)

Depreciation	(34)	(10)
Taxes, other than income	(1)	(9)
Other Income (Expense) - net	7	(14)
Interest Expense	6	(4)
Income Taxes	(84)	31
Special items, after-tax	19	(16)
Total	<u>\$ 128</u>	<u>\$ (46)</u>

Margins

"Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Margins" for an explanation of why management believes this measure is useful and the underlying drivers of the changes between periods. Within PPL's discussion, LKE's Margins are referred to as "Kentucky Gross Margins."

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income."

	2013			2012		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 2,976		\$ 2,976	\$ 2,759		\$ 2,759
Operating Expenses						
Fuel	896		896	872		872
Energy purchases	217		217	195		195
Other operation and maintenance	97	\$ 681	778	101	\$ 677	778
Depreciation	5	329	334	51	295	346
Taxes, other than income	1	47	48		46	46
Total Operating Expenses	1,216	1,057	2,273	1,219	1,018	2,237
Total	\$ 1,760	\$ (1,057)	\$ 703	\$ 1,540	\$ (1,018)	\$ 522

	2011		
	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 2,791	\$ 2	\$ 2,793
Operating Expenses			
Fuel	866		866
Energy purchases	238		238
Other operation and maintenance	90	661	751
Depreciation	49	285	334
Taxes, other than income		37	37
Total Operating Expenses	1,243	983	2,226
Total	\$ 1,548	\$ (981)	\$ 567

(a) Represents amounts excluded from Margins.

(b) As reported on the Statements of Income.

Statement of Income Analysis --

Certain Operating Revenues and Expenses Included in "Margins"

The following Statement of Income line items are included above within "Margins" and are not discussed separately.

	2013 vs. 2012	2012 vs. 2011
Operating Revenues	\$ 217	\$ (34)
Fuel	24	6
Energy purchases	22	(43)

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	2013 vs. 2012	2012 vs. 2011
Coal plant operations and maintenance (a)	\$ (15)	\$ 21
Administrative and general (b)	9	(7)
Distribution maintenance (c)	3	7
Other	3	6
Total	\$ 3	\$ 27

(a) 2013 was lower than 2012 due to \$21 million of lower costs related to the timing and scope of scheduled plant outages, partially offset by increased generation costs.

2012 was higher than 2011 primarily due to \$11 million of expenses related to an increased scope of scheduled outages, as well as \$5 million of increased maintenance at the Ghent plant on the scrubber system and primary fuel combustion system.

(b) 2013 was higher than 2012 primarily due to increases in software maintenance and property and liability insurance expenses.

2012 was lower than 2011 primarily due to a decrease in pension expense resulting from pension funding and lower interest cost.

(c) 2012 was higher than 2011 primarily due to a \$6 million credit to establish a regulatory asset recorded when approved in 2011 related to 2009 storm costs.

Depreciation

The increase (decrease) in depreciation was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Lower depreciation rates effective January 1, 2013 (a)	\$ (22)	
Additions to PP&E	10	\$ 12
Total	<u>\$ (12)</u>	<u>\$ 12</u>

(a) A result of the 2012 rate case.

Taxes, Other Than Income

Taxes, other than income increased \$9 million in 2012 compared with 2011 due to an increase in property taxes resulting from property additions, higher assessed values and changes in property classifications to categories with higher tax rates.

Other Income (Expense) - net

Other income (expense) - net increased \$8 million in 2013 compared with 2012 and decreased \$14 million in 2012 compared with 2011 primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.

Other-Than-Temporary Impairments

Other-than-temporary impairments decreased \$25 million in 2013 compared with 2012 and increased \$25 million in 2012 compared with 2011 due to the \$25 million pre-tax impairment of the EEI investment in 2012. See Notes 1 and 18 to the Financial Statements for additional information.

Interest Expense

Interest expense decreased \$6 million in 2013 compared with 2012 primarily due to amortization of a fair market value adjustment of \$7 million.

Interest expense increased \$4 million in 2012 compared with 2011 primarily due to LKE's issuance of \$250 million of senior notes in September 2011, resulting in an \$8 million increase in interest expense. This increase was partially offset by lower interest rates.

Income Taxes

The increase (decrease) in income taxes was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Change in pre-tax income	\$ 86	\$ (34)
Net operating loss carryforward adjustments (a)	9	(9)
Other	5	(4)
Total	<u>\$ 100</u>	<u>\$ (47)</u>

(a) Adjustments recorded in 2012 to deferred taxes related to net operating loss carryforwards based on income tax return adjustments.

Income (Loss) from Discontinued Operations (net of income taxes)

Income (loss) from discontinued operations (net of income taxes) increased \$8 million in 2013 compared with 2012 and decreased \$5 million in 2012 compared with 2011 primarily due to an adjustment in 2012 to the estimated liability for indemnifications related to the termination of the WKE lease.

LG&E: Earnings, Margins and Statement of Income Analysis

Earnings

	2013	2012	2011
Net Income	\$ 163	\$ 123	\$ 124
Special items, gains (losses), after-tax			1

Earnings in 2013 compared with 2012 increased primarily due to higher electricity and gas base rates that went into effect January 1, 2013 and returns from additional environmental capital investments.

The table below quantifies the changes in the components of Net Income between these periods, which reflect amounts classified as Margins and certain items that management considers special on separate lines within the table and not in their respective Statement of Income line items. See PPL's "Results of Operations - Segment Earnings - Kentucky Regulated segment" for details of the special items.

	2013 vs. 2012	2012 vs. 2011

Other operation and maintenance	42	321	363
Depreciation	2	145	147
Taxes, other than income		18	18
Total Operating Expenses	639	484	1,123
Total	\$ 724	\$ (483)	\$ 241

- (a) Represents amounts excluded from Margins.
(b) As reported on the Statements of Income.

Statement of Income Analysis --

Certain Operating Revenues and Expenses Included in "Margins"

The following Statement of Income line items are included above within "Margins" and are not discussed separately.

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Retail and wholesale	\$ 104	\$ (34)
Electric revenue from affiliate	(18)	(6)
Fuel	(7)	24
Energy purchases	32	(46)
Energy purchases from affiliate	(2)	(24)

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Administrative and general (a)	\$ 6	\$ (5)
Distribution maintenance	3	(1)
Coal plant operations and maintenance	(1)	2
Other	2	4
Total	<u>\$ 10</u>	<u>\$</u>

- (a) 2013 was higher than 2012 primarily due to increases in software maintenance and property and liability insurance expenses.

2012 was lower than 2011 primarily due to a decrease in pension expense resulting from pension funding and lower interest cost.

Depreciation

The increase (decrease) in depreciation was due to:

	<u>2013 vs. 2012</u>	<u>2012 vs. 2011</u>
Lower depreciation rates effective January 1, 2013 (a)	\$ (8)	
Additions to PP&E	4	\$ 5
Total	<u>\$ (4)</u>	<u>\$ 5</u>

- (a) A result of the 2012 rate case.

Taxes, Other Than Income

Taxes, other than income increased \$5 million in 2012 compared with 2011 due to an increase in property taxes resulting from property additions, higher assessed values and changes in property classifications to categories with higher tax rates.

Interest Expense

Interest expense decreased \$8 million in 2013 compared with 2012 primarily due to amortization of a fair market value adjustment of \$7 million.

Income Taxes

Income taxes increased \$25 million in 2013 compared with 2012 due to the change in pre-tax income.

See Note 5 to the Financial Statements for additional information on income taxes.

KU: Earnings, Margins and Statement of Income Analysis

Earnings

	2013	2012	2011
Net Income	\$ 228	\$ 137	\$ 178
Special items, gains (losses), after tax	1	(15)	

Excluding special items, earnings in 2013 compared with 2012 increased primarily due to higher electricity base rates that went into effect January 1, 2013 and returns from additional environmental capital investments.

Excluding special items, earnings in 2012 compared with 2011 decreased primarily due to higher operation and maintenance expense, higher depreciation, higher property taxes and losses from an equity method investment.

The table below quantifies the changes in the components of Net Income between these periods, which reflect amounts classified as Margins and certain items that management considers special on separate lines within the table and not in their respective Statement of Income line items. See PPL's "Results of Operations - Segment Earnings - Kentucky Regulated segment" for details of these special items.

	2013 vs. 2012	2012 vs. 2011
Margins	\$ 156	\$ (10)
Other operation and maintenance	(1)	(16)
Depreciation	(39)	(6)
Taxes, other than income		(4)
Other Income (Expense) - net	4	(7)
Interest Expense	(1)	1
Income Taxes	(44)	16
Special items, after-tax	16	(15)
Total	\$ 91	\$ (41)

Margins

"Margins" is a non-GAAP financial performance measure that management utilizes as an indicator of the performance of its business. See PPL's "Results of Operations - Margins" for an explanation of why management believes this measure is useful and the underlying drivers of the changes between periods. Within PPL's discussion, KU's Margins are included in "Kentucky Gross Margins."

The following tables contain the components from the Statements of Income that are included in this non-GAAP financial measure and a reconciliation to "Operating Income."

	2013			2012		
	Margins	Other (a)	Operating Income (b)	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 1,635		\$ 1,635	\$ 1,524		\$ 1,524
Operating Expenses						
Fuel	529		529	498		498
Energy purchases	81		81	109		109
Other operation and maintenance	52	\$ 330	382	55	\$ 329	384
Depreciation	3	183	186	49	144	193
Taxes, other than income	1	23	24	23	23	23
Total Operating Expenses	666	536	1,202	711	496	1,207
Total	\$ 969	\$ (536)	\$ 433	\$ 813	\$ (496)	\$ 317

	2011		
	Margins	Other (a)	Operating Income (b)
Operating Revenues	\$ 1,548		\$ 1,548
Operating Expenses			
Fuel	516		516
Energy purchases	112		112
Other operation and maintenance	49	\$ 313	362
Depreciation	48	138	186
Taxes, other than income		19	19
Total Operating Expenses	725	470	1,195
Total	\$ 823	\$ (470)	\$ 353

- (a) Represents amounts excluded from Margins.
(b) As reported on the Statements of Income.

Statement of Income Analysis --

Certain Operating Revenues and Expenses Included in "Margins"

The following Statement of Income line items are included above within "Margins" and are not discussed separately.

	2013 vs. 2012	2012 vs. 2011
Retail and wholesale	\$ 113	
Electric revenue from affiliate	(2)	\$ (24)
Fuel	31	(18)
Energy purchases	(10)	3
Energy purchases from affiliate	(18)	(6)

Other Operation and Maintenance

The increase (decrease) in other operation and maintenance was due to:

	2013 vs. 2012	2012 vs. 2011
Coal plant operations and maintenance (a)	\$ (14)	\$ 17
Administrative and general (b)	7	(5)
Distribution maintenance (c)		8
Other	5	2
Total	\$ (2)	\$ 22

- (a) 2013 was lower than 2012 due to \$21 million of lower costs related to the timing and scope of scheduled plant outages, partially offset by increased generation costs.
2012 was higher than 2011 primarily due to \$8 million of expenses related to an increased scope of scheduled outages, as well as \$5 million of increased maintenance on the scrubber system and primary fuel combustion system at the Ghent plant.
(b) 2013 was higher than 2012 primarily due to increases in software maintenance and property and liability insurance expenses.
2012 was lower than 2011 primarily due to a decrease in pension expense resulting from pension funding and lower interest cost.
(c) 2012 was higher than 2011 primarily due to a \$6 million credit to establish a regulatory asset recorded when approved in 2011 related to 2009 storm costs.

Depreciation

The increase (decrease) in depreciation was due to:

	2013 vs. 2012	2012 vs. 2011
Lower depreciation rates effective January 1, 2013 (a)	\$ (13)	
Additions to PP&E	6	\$ 7
Total	\$ (7)	\$ 7

- (a) A result of the 2012 rate case.

Other Income (Expense) - net

Other income (expense) - net increased \$5 million in 2013 compared with 2012 and decreased \$7 million in 2012 compared with 2011 primarily due to losses from the EEI investment recorded in 2012. The EEI investment was fully impaired in the fourth quarter of 2012.

Other-Than-Temporary Impairments

Other-than-temporary impairments decreased \$25 million in 2013 compared with 2012 and increased \$25 million in 2012 compared with 2011 due to the \$25 million pre-tax impairment of the EEI investment in 2012. See Notes 1 and 18 to the Financial Statements for additional information.

Income Taxes

Income taxes increased \$54 million in 2013 compared with 2012 and decreased \$26 million in 2012 compared with 2011 primarily due to the change in pre-tax income.

See Note 5 to the Financial Statements for additional information on income taxes.

Financial Condition

The remainder of this Item 7 in this Form 10-K is presented on a combined basis, providing information, as applicable, for all Registrants.

Liquidity and Capital Resources

(All Registrants)

The Registrants expect to continue to have adequate liquidity available through operating cash flows, cash and cash equivalents, credit facilities and commercial paper issuances. Additionally, subject to market conditions, the Registrants and their subsidiaries may borrow in the capital markets, and PPL Energy Supply, PPL Electric, LKE, LG&E and KU anticipate receiving equity contributions from their parent or member in 2014.

The Registrants' cash flows from operations and access to cost-effective bank and capital markets are subject to risks and uncertainties including, but not limited to:

- any adverse outcome of legal proceedings and investigations with respect to the Registrants' current and past business activities;
- changes in the financial markets that could make obtaining new sources of bank and capital markets funding more difficult and more costly; and
- a downgrade in the Registrants' or their rated subsidiaries' credit ratings that could adversely affect their ability to access capital and increase the cost of credit facilities and any new debt.

(All Registrants except PPL Electric)

- costs of compliance with existing and new environmental laws focused on electricity generation facilities, and for PPL and PPL Energy Supply with new security and safety requirements for nuclear facilities;
- changes in electricity, fuel and other commodity prices;
- operational and credit risks associated with selling and marketing products in the wholesale power markets;
- potential ineffectiveness of the trading, marketing and risk management policy and programs used to mitigate PPL's risk exposure to adverse changes in electricity and fuel prices, interest rates, foreign currency exchange rates and counterparty credit;
- reliance on transmission and distribution facilities that PPL, PPL Energy Supply, LKE, LG&E and KU do not own or control to deliver electricity and natural gas; and
- unavailability of generating units (due to unscheduled or longer-than-anticipated generation outages, weather and natural disasters) and the resulting loss of revenues and additional costs of replacement electricity.

(All Registrants except PPL Energy Supply)

- unusual or extreme weather that may damage transmission and distribution facilities or affect energy sales to customers; and
- the ability to recover and the timeliness and adequacy of recovery of costs associated with regulated utility businesses.

(All Registrants)

See "Item 1A. Risk Factors" for further discussion of risks and uncertainties that could affect the Registrants' cash flows.

The Registrants had the following at:

	PPL (a)	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
December 31, 2013						
Cash and cash equivalents	\$ 1,102	\$ 239	\$ 25	\$ 35	\$ 8	\$ 21
Notes receivable from affiliates			150	70		
Short-term debt	701		20	245	20	150
December 31, 2012						
Cash and cash equivalents	901	413	140	43	22	21
Short-term debt	652	356		125	55	70
Notes payable with affiliates				25		
December 31, 2011						
Cash and cash equivalents	1,202	379	320	59	25	31
Notes receivable from affiliates		198		15		
Short-term investments	16					
Short-term debt	578	400				

- (a) At December 31, 2013, PPL's cash and cash equivalents included \$637 million denominated in GBP. If these amounts were remitted as dividends, PPL may be subject to additional U.S. taxes, net of allowable foreign tax credits. Historically, dividends paid by foreign subsidiaries have been limited to distributions of the current year's earnings. See Note 5 to the Financial Statements for additional information on undistributed earnings of WPD.

Net cash provided by (used in) operating, investing and financing activities for the years ended December 31 and the changes between periods were as follows.

	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
2013						
Operating activities	\$ 2,857	\$ 410	\$ 523	\$ 911	\$ 356	\$ 495
Investing activities	(4,295)	(631)	(1,080)	(1,493)	(567)	(853)
Financing activities	1,631	47	442	574	197	358
2012						
Operating activities	\$ 2,764	\$ 784	\$ 389	\$ 747	\$ 308	\$ 500
Investing activities	(3,123)	(469)	(613)	(756)	(289)	(480)
Financing activities	48	(281)	44	(7)	(22)	(30)
2011						
Operating activities	\$ 2,507	\$ 776	\$ 420	\$ 781	\$ 325	\$ 444
Investing activities	(7,952)	(668)	(477)	(277)	(42)	(279)

Investing activities	4,829	199	(136)	(479)	(247)	(201)
Financing activities	(5,719)	109	(129)	449	238	107

Operating Activities

The components of the change in cash provided by (used in) operating activities were as follows.

	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
2013 vs. 2012						
Change - Cash Provided (Used):						
Net income	\$ (400)	\$ (704)	\$ 73	\$ 128	\$ 40	\$ 91
Non-cash components	534	313	31	90	(30)	(68)
Working capital	(332)	65	12	(31)	12	(15)
Defined benefit plan funding	44	(38)	(34)	(98)	(21)	(44)
Other operating activities	247	(10)	52	75	47	31
Total	<u>\$ 93</u>	<u>\$ (374)</u>	<u>\$ 134</u>	<u>\$ 164</u>	<u>\$ 48</u>	<u>\$ (5)</u>
2012 vs. 2011						
Change - Cash Provided (Used):						
Net income	\$ 19	\$ (294)	\$ (53)	\$ (46)	\$ (1)	\$ (41)
Non-cash components	241	180	34	(48)	5	41
Working capital	(178)	30	(79)	(66)	(65)	11
Defined benefit plan funding	60	77	54	100	43	29
Other operating activities	115	15	13	26	1	16
Total	<u>\$ 257</u>	<u>\$ 8</u>	<u>\$ (31)</u>	<u>\$ (34)</u>	<u>\$ (17)</u>	<u>\$ 56</u>

(PPL and PPL Energy Supply)

A significant portion of PPL's Supply segment and PPL Energy Supply's operating cash flows is derived from its competitive baseload generation activities. PPL employs a formal hedging program for its baseload generation fleet, the objective of which is to provide a reasonable level of near-term cash flow and earnings certainty while preserving upside potential over the medium term to benefit from power price increases. See Note 19 to the Financial Statements for further discussion. Despite PPL's hedging practices, future cash flows from operating activities from its Supply segment are influenced by energy and capacity prices and, therefore, will fluctuate from period to period.

PPL's and PPL Energy Supply's contracts for the sale and purchase of electricity and fuel often require cash collateral or cash equivalents (e.g. letters of credit), or reductions or terminations of a portion of the entire contract through cash settlement, in the event of a downgrade of PPL's or its subsidiaries' or PPL Energy Supply's or its subsidiaries' credit ratings or adverse changes in market prices. For example, in addition to limiting its trading ability, if PPL's or its subsidiaries' or PPL Energy Supply's or its subsidiaries' ratings were lowered to below "investment grade" and there was a 10% adverse movement in energy prices, PPL and PPL Energy Supply estimate that, based on their December 31, 2013 positions, they would have been required to post additional collateral of approximately \$406 million for PPL and approximately \$318 million for PPL Energy Supply with respect to electricity and fuel contracts. PPL and PPL Energy Supply had adequate liquidity sources at December 31, 2013 if they would have been required to post this additional collateral. PPL and PPL Energy Supply have in place risk management programs that are designed to monitor and manage exposure to volatility of cash flows related to changes in energy and fuel prices, interest rates, foreign currency exchange rates, counterparty credit quality and the operating performance of generating units.

(PPL)

PPL's net income for 2013 includes a \$271 million payment made in December 2013 related to terminating the operating lease arrangement for interests in the Colstrip facility in Montana and acquiring the previously leased interests. A portion of this payment was used to satisfy the lessors' principal, interest and make whole premium for the redemption of their 8.903% Pass Through Certificates due 2020, which did not represent obligations of PPL or its subsidiaries and, therefore, were not included in PPL's financial statements. Net income for 2013 also includes a non-cash charge of \$426 million associated with the lease termination. See Note 8 to the Financial Statements for additional information on the transaction. Non-cash components of net income in 2013 compared with 2012 also included \$209 million for the impact of non-cash hedging activities (primarily unrealized losses in 2013), \$124 million for changes to the WPD line loss accrual and the \$65 million charge for the impairment of the Corette facility, offset by a \$352 million decline in deferred income taxes. In 2013 compared with 2012, the decrease in cash from changes in components of working capital was primarily due to increases in accounts receivable (primarily due to extended payment terms at LG&E and KU, higher rates and colder weather in 2013 at LG&E, KU and PPL Electric and increases at PPL Energy Supply's mechanical contracting business) and changes to certain tax-related accounts. The increase in cash provided by other operating activities was partially due to net proceeds of \$104 million for the settlement in 2013 of forward starting interest rate swaps.

For PPL, in 2012 compared with 2011, non-cash components of net income primarily consisted of \$341 million related to non-cash hedging activities (primarily unrealized gains recorded in 2011) and \$139 million related to increased depreciation, partially offset by a \$158 million decline in deferred income taxes. The decrease in cash from changes in components of working capital was primarily due to changes in prepayments (primarily due to the receipt in 2011 of a tax refund) and changes in net regulatory assets/liabilities (primarily due to higher collection on PPL Electric's Generation Supply Charge for its PLR customers in 2011), partially offset by a reduction of \$156 million in returns of counterparty collateral. Included in the change in cash from operating activities is the impact of having an additional four months of WPD Midlands operations in 2012. WPD Midlands' cash from operating activities increased by \$190 million in 2012 compared with 2011.

(PPL Energy Supply)

PPL Energy Supply's net income for 2013 includes a \$271 million payment made in December 2013 related to terminating the operating lease arrangement for interests in the Colstrip facility in Montana and acquiring the previously leased interests. A portion of this payment was used to satisfy the lessors' principal, interest and make whole premium for the redemption of their 8.903% Pass Through Certificates due 2020, which did not represent obligations of PPL Energy Supply or its subsidiaries and, therefore, were not included in PPL Energy Supply's financial statements. Net income for 2013 also includes a non-cash charge of \$426 million associated with the lease termination. See Note 8 to the Financial Statements for additional information on the transaction. Non-cash components of net income in 2013 compared with 2012 also included \$212 million for the impact of non-cash hedging activities (primarily unrealized losses in 2013) and the \$65 million charge for the impairment of the Corette facility, offset by a \$448 million decline in deferred income taxes.

For PPL Energy Supply, in 2012 compared with 2011, non-cash components of net income primarily consisted of \$242 million related to non-cash hedging activities (primarily unrealized gains in 2011) and the \$74 million reduction in the provision for the Montana hydroelectric litigation recorded in 2011, partially offset by a \$165 million decline in deferred income taxes. The increase in cash from changes in components of working capital was primarily due to a reduction of \$156 million in returns of counterparty collateral, partially offset by increases in accounts receivable (primarily affiliate receivables).

(PPL Electric)

For PPL Electric, in 2013 compared with 2012, the increase in net income resulted primarily due to higher distribution base rates that became effective January 1, 2013 and higher transmission margins from additional capital investments. The change in other operating activities was partially due to changes to certain tax-related accounts.

For PPL Electric, in 2012 compared with 2011, the decrease in cash from changes in components of working capital was primarily due to changes from regulatory assets and liabilities, net (primarily due to higher collection on the generation supply charge from its PLR customers in 2011) and from prepayments (due to the receipt in 2011 of a tax refund), partially offset by accounts payable changes in 2011 (due to lower PLR prices and lower energy purchases (due to warmer weather in 2011 compared with 2010).

(LKE)

In 2013, LKE's non-cash components of net income included a \$121 million increase in deferred income taxes primarily due to utilization of net operating losses. The decrease in cash from working capital was driven primarily by increases in accounts receivable and unbilled revenues due to extended payment terms, higher rates and colder December weather in 2013, offset by an increase in accounts payable due to timing of fuel purchase commitments and payments. The increase in cash from LKE's other operating activities was driven primarily by \$86 million in proceeds from the settlement of interest rate swaps.

In 2012, LKE's non-cash components of net income included an \$85 million reduction in deferred income taxes due primarily to the utilization of a capital loss carry forward in 2011. The decrease in cash from changes in components of working capital was driven primarily by changes in receivables and unbilled revenues due to milder December weather in 2011 than in 2012 and 2010 and more income tax receivables collected in 2011 than in 2012.

(LG&E)

In 2013, LG&E's increase in cash from changes in components of working capital was driven primarily by an increase in accounts payable due to timing of fuel purchase commitments and payments and an increase in accrued taxes due to decreased payments for property taxes in 2013, partially offset by increases in accounts receivable and unbilled revenues due to extended payment terms, higher rates and colder December weather in 2013, and higher fuel and underground gas storage inventory in 2013 attributable to an increase in fuel and natural gas prices. The increase in cash from LG&E's other operating activities was driven primarily by \$43 million in proceeds from the settlement of interest rate swaps.

In 2012, LG&E's decrease in cash from changes in components of working capital was driven primarily by changes in receivables and unbilled revenues due to milder December weather in 2011 than in 2012 and 2010, and lower inventory levels in 2011 as compared with 2010 driven by lower gas prices.

(KU)

In 2013, KU's decrease in cash from changes in components of working capital was driven primarily by increases in accounts receivable and unbilled revenues due to extended payment terms, higher rates and colder December weather in 2013, offset by an increase in accounts payable due to timing of fuel purchase commitments and payments. The increase in cash from KU's other operating activities was driven primarily by \$43 million in proceeds from the settlement of interest rate swaps.

In 2012, KU's increase in cash from changes in components of working capital was driven primarily by lower income tax payments as a result of lower taxable income in 2012, partially offset by changes in receivables and unbilled revenues due to milder December weather in 2011 than in 2012 and 2010.

Investing Activities

(All Registrants)

The components of the change in cash provided by (used in) investing activities were as follows.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
2013 vs. 2012						
Change - Cash Provided (Used):						
Expenditures for PP&E	\$ (1,107)	\$ 65	\$ (279)	\$ (666)	\$ (291)	\$ (375)
Acquisitions & divestitures, net	84	84				
Notes receivable with affiliates activity, net		(198)	(150)	(85)		
Restricted cash and cash equivalent activity	(116)	(126)		12	13	
Investment activity, net	(20)					
Other investing activities	(13)	13	(38)	2		2
Total	<u>\$ (1,172)</u>	<u>\$ (162)</u>	<u>\$ (467)</u>	<u>\$ (737)</u>	<u>\$ (278)</u>	<u>\$ (373)</u>
2012 vs. 2011						
Change - Cash Provided (Used):						
Expenditures for PP&E	\$ (618)	\$ 13	\$ (143)	\$ (291)	\$ (90)	\$ (201)
Acquisitions & divestitures, net	5,298	(465)				
Notes receivable with affiliates activity, net		396		(31)		
Restricted cash and cash equivalent activity	239	232		6	6	
Investment activity, net	(145)	(2)		(163)	(163)	
Other investing activities	55	25	7			
Total	<u>\$ 4,829</u>	<u>\$ 199</u>	<u>\$ (136)</u>	<u>\$ (479)</u>	<u>\$ (247)</u>	<u>\$ (201)</u>

(PPL)

For PPL, in 2013 compared with 2012, the change in "Expenditures for PP&E" was due to increases for projects to enhance system reliability at WPD and PPL Electric, the Susquehanna-Roseland transmission project at PPL Electric, environmental air projects at LG&E's Mill Creek and KU's Ghent plants, construction of Cane Run Unit 7 for both LG&E and KU and coal combustion residuals projects at KU's Ghent and E.W. Brown plants. The change in "Restricted cash and cash equivalent activity" was primarily related to margin deposit returns in 2012 at PPL Energy Supply.

For PPL, in 2012 compared with 2011, the change in "Expenditures for PP&E" was due to increases from having four additional months of WPD Midlands expenditures in 2012, the Susquehanna-Roseland transmission project and construction of a new data center at PPL Electric, coal combustion residuals projects at KU's Ghent and E.W. Brown plants, environmental air projects at LG&E's Mill Creek and KU's Ghent plants, and construction of Cane Run Unit 7 for both LG&E and KU. The change in "Restricted cash and cash equivalent activity" was primarily related to margin deposits posted in 2011 that were returned in 2012 at PPL Energy Supply. The change in "Investment activity, net" was primarily due to the sale in 2011 by LG&E of tax-exempt revenue bonds that were repurchased from the remarketing agent in 2008.

(PPL Energy Supply)

For PPL Energy Supply, in 2013 compared with 2012, the change in "Acquisitions & divestitures, net" related to the disbursement in 2012 for the Ironwood Acquisition. See Note 10 to the Financial Statement for additional information. The change in "Notes receivable with affiliates, net" resulted from proceeds received in 2012 from repayments. The change in "Restricted cash and cash equivalent activity" was primarily related to margin deposit returns in 2012.

For PPL Energy Supply, in 2012 compared with 2011, the change in "Restricted cash and cash equivalent activity" was primarily related to margin deposits posted in 2011 that were returned in 2012.

(PPL Electric)

For PPL Electric, in 2013 compared with 2012, the change in "Expenditures for PP&E" was due to increases for projects to enhance system reliability and the Susquehanna-Roseland transmission project.

For PPL Electric, in 2012 compared with 2011, the change in "Expenditures for PP&E" was due to increases for the Susquehanna-Roseland transmission project and a new data center.

(LKE, LG&E and KU)

For LKE, LG&E and KU, in 2013 compared with 2012, cash used in investing activities changed as a result of an increase in expenditures for PP&E, primarily due to environmental air projects at LG&E's Mill Creek and KU's Ghent plants, construction of Cane Run Unit 7 for both LG&E and KU and coal combustion residuals projects at KU's Ghent and E.W. Brown plants. See "Forecasted Uses of Cash" for detail regarding projected capital expenditures for the years 2014 through 2018.

For LKE, LG&E and KU, in 2012 compared with 2011, cash used in investing activities changed as a result of an increase in expenditures for PP&E, primarily due to coal combustion residuals projects at KU's Ghent and E.W. Brown plants, environmental air projects at LG&E's Mill Creek and KU's Ghent plants, and construction of Cane Run Unit 7 for both LG&E and KU. The change in investment activity was due to LG&E's sale of tax-exempt revenue bonds in 2011 that were repurchased from the remarketing agent in 2008.

Financing Activities

(All Registrants)

The components of the change in cash provided by (used in) financing activities were as follows.

	<u>PPL</u>	<u>PPL Energy Supply</u>	<u>PPL Electric</u>	<u>LKE</u>	<u>LG&E</u>	<u>KU</u>
2013 vs. 2012						
Change - Cash Provided (Used):						
Debt issuance/retirement, net	\$ 176	\$ (738)	\$ 99	\$ 496	\$ 248	\$ 248
Stock issuances/redemptions, net	1,515		250			
Dividends	(45)		(32)		(24)	(24)
Capital contributions/distributions, net		1,393	55	144	86	157
Changes in net short-term debt (a)	(25)	(312)	20	(55)	(90)	10
Other financing activities	(38)	(15)	6	(4)	(1)	(3)
Total	<u>\$ 1,583</u>	<u>\$ 328</u>	<u>\$ 398</u>	<u>\$ 581</u>	<u>\$ 219</u>	<u>\$ 388</u>

2012 vs. 2011	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
Change - Cash Provided (Used):						
Debt issuance/retirement, net	\$ (3,420)	\$ 241	\$ 62	\$ (248)		
Stock issuances/redemptions, net	(2,475)		(250)			
Dividends	(87)		(3)		\$ 8	\$ 24
Capital contributions/distributions, net		(44)	50	378		
Changes in net short-term debt (a)	199	(94)		313	230	80
Other financing activities	64	6	12	6		3
Total	<u>\$ (5,719)</u>	<u>\$ 109</u>	<u>\$ (129)</u>	<u>\$ 449</u>	<u>\$ 238</u>	<u>\$ 107</u>

(a) Includes net increase (decrease) in notes payable with affiliates.

(PPL)

For PPL, in 2013 compared with 2012, the change in "Stock issuances/redemptions, net" primarily resulted from the July 2013 settlement of the 2010 Equity Units and the April and May 2013 settlements of forward sale agreements. Also, the 2012 activity included the June 2012 redemption of the remaining PPL Electric preference stock. The 2013 net stock issuances/redemptions proceeds of \$1.3 billion were primarily contributed to PPL Energy Supply to fund a \$300 million debt maturity, to repay short-term debt, terminate the operating lease arrangement for interests in the Colstrip facility in Montana and acquire the previously leased interests for \$271 million and fund a \$437 million repayment of outstanding debt related to the acquisition of the previously leased Lower Mt. Bethel facility. In addition, an \$18 million distribution was made to the equity investors of LMB Funding, L.P., which was accounted for as a redemption of noncontrolling interests and reflected in "Other financing activities" in the table above. See Notes 7, 8 and 22 to the Financial Statements for additional information on these 2013 equity, debt and lease transactions.

For PPL, in 2012 compared with 2011, the changes in "Debt issuances/retirements, net" and "Stock issuances/redemptions, net" were primarily due to cash received in 2011 from securities issued to fund the WPD Midlands acquisition.

(PPL Energy Supply)

For PPL Energy Supply, in 2013 compared with 2012, the change in "Debt issuance/retirement, net" was due to the 2013 repayment of a \$300 million debt maturity and \$437 million repayment of outstanding debt related to the acquisition of the previously leased Lower Mt. Bethel facility. In addition, an \$18 million distribution was made to the equity investors of LMB Funding, L.P., which was accounted for as a redemption of noncontrolling interests and reflected in "Other financing activities" in the table above. See Notes 7 and 22 to the Financial Statements for additional information on these 2013 debt and lease transactions. The change in "Capital Contributions/distributions, net" included net proceeds from 2013 of \$1.1 billion that were contributed to PPL Energy Supply to fund the debt maturities discussed above, to repay short-term debt and terminate the operating lease arrangement for interests in the Colstrip facility in Montana and acquire the previously leased interests.

For PPL Energy Supply, in 2012 compared with 2011, the change in "Debt issuance/retirement, net" was due to 2011 including the early redemption at par of \$250 million 7.00% Senior Notes due 2046.

(PPL Electric)

For PPL Electric, in 2013 compared with 2012, and 2012 compared with 2011, the changes in "Stock issuances/redemptions, net" related to the June 2012 redemption of the remaining preference stock.

(LKE)

For LKE, in 2013 compared with 2012, the change in "Debt issuance/retirement, net" was due to the issuance of long-term debt by LG&E and KU in November 2013. The change in "Capital contributions/distributions, net" resulted from an increase in equity contributions received from PPL. The increase in cash provided by financing activities resulted from the long-term debt issuance noted above, the proceeds of which were used for capital expenditures related to environmental air projects, construction of Cane Run Unit 7 and for other general corporate purposes. See Note 7 to the Financial Statements for additional information on these transactions.

For LKE, in 2012 compared with 2011, the change in "Debt issuance/retirement, net" and "Capital contributions/distributions, net" was due to the issuance of long-term debt by LKE in 2011, the proceeds of which were used for distributions to PPL, whereas there were no debt issuances in 2012. The "Changes in net short-term debt" resulted from the issuance of short-term debt in 2012 and the repayment of short-term debt during 2011.

(LG&E)

For LG&E, in 2013 compared with 2012, the change in "Debt issuance/retirement, net" was due to the issuance of long-term debt in November 2013, the proceeds of which were used for the repayment of short-term debt, capital expenditures related to environmental air projects, construction of Cane Run Unit 7 and for other general corporate purposes. The change in "Capital contributions/distributions, net" resulted from an increase in equity contributions received from LKE. The "Changes in net short-term debt" resulted from the repayment of short-term debt in 2013 and the issuance of short-term debt in 2012. See Note 7 to the Financial Statements for additional information on these transactions.

For LG&E, in 2012 compared with 2011, the "Changes in net short-term debt" resulted from the issuance of short-term debt during 2012 and the repayment of short-term debt in 2011.

(KU)

For KU, in 2013 compared with 2012, the change in "Debt issuance/retirement, net" was due to the issuance of long-term debt in November 2013, the proceeds of which were used for capital expenditures related to environmental air projects, construction of Cane Run Unit 7 and for other general corporate purposes. The change in "Capital contributions/distributions, net" resulted from an increase in equity contributions received from LKE. See Note 7 to the Financial Statements for additional information on these transactions.

For KU, in 2012 compared with 2011, the "Changes in net short-term debt" resulted from the issuance of short-term debt during 2012. The change in "Dividends" resulted from higher common stock dividends paid to LKE in 2011.

(All Registrants)

See "Long-term Debt and Equity Securities" below for additional information on current year activity. See "Forecasted Sources of Cash" for a discussion of the Registrants' plans to issue debt and equity securities, as well as a discussion of credit facility capacity available to the Registrants. Also see "Forecasted Uses of Cash" for a discussion of PPL's plans to pay dividends on common securities in the future, as well as the Registrants' maturities of long-term debt.

Long-term Debt and Equity Securities (All Registrants)

Long-term debt and equity securities activity for 2013 included:

	Debt		Net Stock Issuances (b)
	Issuances (a)	Retirements	
PPL	\$ 2,038	\$ 747	\$ 1,337
PPL Energy Supply		747	
PPL Electric	348		
LKE	496		
LG&E	248		
KU	248		
Non-cash Transactions:			
PPL (c)	\$ 1,317	\$ 1,317	
PPL Energy Supply	167	167	

(a) Issuances are net of pricing discounts, where applicable and exclude the impact of debt issuance costs.

(b) Net stock issuances include activity related to various stock and incentive compensation plans and other equity transactions. See Overview - "Financial and Operational Developments" for information regarding issuances from the equity forward agreements and the 2010 Equity Units. The activity is net of \$74 million for the repurchase of PPL common stock.

(c) The transaction primarily includes \$1.150 billion relating to the remarketing of Junior Subordinated Notes that were issued as a component of PPL's 2010 Equity Units and simultaneously exchanged for Senior Notes.

See Note 7 to the Financial Statements for additional information about long-term debt and equity securities.

Auction Rate Securities (LKE, LG&E and KU)

At December 31, 2013, LG&E's and KU's tax-exempt revenue bonds in the form of auction rate securities total \$231 million (\$135 million at LG&E and \$96 million at KU). These bonds continue to experience failed auctions and the interest rate continues to be set by a formula pursuant to the relevant indentures. For the period ended December 31, 2013, the weighted-average rate on LG&E's and KU's auction rate bonds in total was 0.16% (0.15% at LG&E and 0.18% at KU).

Forecasted Sources of Cash

(All Registrants)

The Registrants expect to continue to have adequate liquidity available from operating cash flows, cash and cash equivalents, credit facilities and commercial paper issuances. Additionally, subject to market conditions, the Registrants and their subsidiaries may borrow in the capital markets, and PPL Energy Supply, PPL Electric, LKE, LG&E and KU anticipate receiving equity contributions from their parent or member in 2014.

Credit Facilities

At December 31, 2013, the total committed borrowing capacity under credit facilities and the use of this borrowing capacity were:

External

	<u>Committed Capacity</u>	<u>Borrowed</u>	<u>Letters of Credit Issued and Commercial Paper Backup</u>	<u>Unused Capacity</u>
PPL Capital Funding Credit Facility	\$ 300	\$ 270		\$ 30
PPL Energy Supply Credit Facilities	3,150		\$ 167	2,983
PPL Electric Credit Facility	300		21	279
LKE Credit Facility	75	75		
LG&E Credit Facility	500		20	480
KU Credit Facilities	598		348	250
Total LKE Consolidated	1,173	75	368	730
Total Domestic Credit Facilities (a) (b) (c)	<u>\$ 4,923</u>	<u>\$ 345</u>	<u>\$ 556</u>	<u>\$ 4,022</u>
Total WPD Credit Facilities (c) (d) (e) (f)	<u>£ 1,055</u>	<u>£ 103</u>		<u>£ 952</u>

- (a) The syndicated credit facilities, as well as KU's letter of credit facility, each contain a financial covenant requiring debt to total capitalization not to exceed 65% for PPL Energy Supply and 70% for PPL, PPL Electric, LKE, LG&E and KU, as calculated in accordance with the facility, and other customary covenants. See Note 7 to the Financial Statements for additional information regarding these credit facilities.
- (b) The commitments under the domestic credit facilities are provided by a diverse bank group, with no one bank and its affiliates providing an aggregate commitment of more than the following percentages of the total committed capacity: PPL - 8%, PPL Energy Supply - 10%, PPL Electric - 6%, LKE - 12%, LG&E - 6% and KU - 22%.
- (c) Each company pays customary fees under its respective syndicated credit facility, as does KU under its letter of credit facility, and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.
- (d) The facilities contain financial covenants to maintain an interest coverage ratio of not less than 3.0 times consolidated earnings before income taxes, depreciation and amortization and total net debt not in excess of 85% of its RAV, calculated in accordance with the credit facility.
- (e) Under the syndicated credit facilities, WPD (East Midlands) and WPD (West Midlands) each have the ability to request the lenders to issue up to £80 million of letters of credit in lieu of borrowing.
- (f) The total amount borrowed at December 31, 2013 was a USD-denominated borrowing of \$166 million, which equated to £103 million at the time of borrowing and bore interest at 1.87%. At December 31, 2013, the unused capacity of WPD's committed credit facilities was approximately \$1.6 billion.

The commitments under WPD's credit facilities are provided by a diverse bank group with no one bank providing more than 13% of the total committed capacity.

In addition to the financial covenants noted in the table above, the credit agreements governing the above credit facilities contain various other covenants. Failure to comply with the covenants after applicable grace periods could result in acceleration of repayment of borrowings and/or termination of the agreements. The Registrants monitor compliance with the covenants on a regular basis. At December 31, 2013, the Registrants were in compliance with these covenants. At this time, the Registrants believe that these covenants and other borrowing conditions will not limit access to these funding sources.

See Note 7 to the Financial Statements for further discussion of the Registrants' credit facilities.

Intercompany (All Registrants except PPL)

	Committed Capacity	Borrowed	Unused Capacity
PPL Energy Supply Credit Facility	\$ 200		\$ 200
PPL Electric Credit Facility	100		100
LKE Credit Facility	225		225
LG&E Money Pool (a)	500		500
KU Money Pool (a)	500		500

(a) LG&E and KU participate in an intercompany agreement whereby LKE, LG&E and/or KU make available funds up to \$500 million at an interest rate based on a market index of commercial paper issues.

Commercial Paper (All Registrants)

PPL Energy Supply, PPL Electric, LG&E and KU maintain commercial paper programs to provide an additional financing source to fund short-term liquidity needs, as necessary. Commercial paper issuances are supported by the respective Registrant's Syndicated Credit Facility.

When outstanding, the amounts are reflected in "Short-term debt" on the Balance Sheets. The following amounts were outstanding at:

	December 31, 2013			December 31, 2012	
	Capacity	Commercial Paper Issuances	Unused Capacity	Commercial Paper Issuances	
PPL Energy Supply	\$ 750		\$ 750	\$ 356	
PPL Electric	300	\$ 20	280		
LG&E	350	20	330	55	
KU	350	150	200	70	
Total LKE	700	170	530	125	
Total PPL	\$ 1,750	\$ 190	\$ 1,560	\$ 481	

Long-term Debt and Equity Securities

(PPL)

PPL and its subsidiaries currently plan to incur, subject to market conditions, up to approximately \$350 million of long-term indebtedness in 2014. In addition, PPL will receive proceeds of \$978 million through the issuance of PPL common stock to settle the 2011 Purchase Contracts, and PPL Capital Funding expects to remarket the 4.32% Junior Subordinated Notes due 2019 related to the 2011 Equity Units. The proceeds will be used to fund capital expenditures and for other general corporate purposes. In January 2014, PPL Capital Funding elected to conduct an optional remarketing of the 2019 Notes that will occur between January 30, 2014 and April 15, 2014. See Note 7 to the Financial Statements for additional information.

PPL currently does not plan to issue additional shares of common stock in 2014.

(PPL Energy Supply)

Subject to market conditions, PPL Energy Supply may issue long-term debt securities in 2014 to fund its current debt maturity obligations or for general corporate purposes, if necessary.

(PPL Electric)

PPL Electric currently plans to issue, subject to market conditions, up to approximately \$350 million of long-term indebtedness in 2014, the proceeds of which will be used to fund capital expenditures and for other general corporate purposes.

(LKE, LG&E and KU)

LKE, LG&E and KU currently do not plan to issue long-term debt securities in 2014.

Contributions from Parent/Member (All Registrants except PPL)

From time to time, PPL Energy Supply's and LKE's members or the parents of PPL Electric, LG&E and KU make capital contributions to subsidiaries. The proceeds from these contributions are used to fund capital expenditures and for other general corporate purposes and, in the case of LKE, to make contributions to its subsidiaries.

Forecasted Uses of Cash

(All Registrants)

In addition to expenditures required for normal operating activities, such as purchased power, payroll, fuel and taxes, the Registrants currently expect to incur future cash outflows for capital expenditures, various contractual obligations, payment of dividends on its common stock, distributions by PPL Energy Supply and LKE to their members, and possibly the purchase or redemption of a portion of debt securities.

Capital Expenditures

The table below shows the Registrants' current capital expenditure projections for the years 2014 through 2018. Expenditures for the domestic regulated utilities are expected to be recovered through rates, pending regulatory approval.

	Total	Projected				
		2014	2015	2016	2017	2018
PPL						
Construction expenditures (a) (b) (c)						
Generating facilities	\$ 2,751	\$ 528	\$ 511	\$ 754	\$ 517	\$ 441

	Total	Projected				
		2014	2015	2016	2017	2018
KU (c)						
Generating facilities	\$ 793	\$ 143	\$ 136	\$ 249	\$ 154	\$ 111
Distribution facilities	438	79	85	84	91	99
Transmission facilities	264	37	40	59	79	49
Environmental	1,093	314	206	125	214	234
Other	174	37	41	31	36	29
Total Capital Expenditures	\$ 2,762	\$ 610	\$ 508	\$ 548	\$ 574	\$ 522

- (a) Construction expenditures include capitalized interest and AFUDC, which are expected to total approximately \$174 million for PPL; \$73 million for PPL Energy Supply and \$57 million for PPL Electric.
- (b) Includes expenditures for certain intangible assets.
- (c) The 2014 total excludes amounts included in accounts payable as of December 31, 2013.

Capital expenditure plans are revised periodically to reflect changes in operational, market and regulatory conditions. For the years presented, this table includes projected costs related to the planned 1,340 MW of new capacity at LKE (421 MW at LG&E and 919 MW at KU) and PPL Electric's asset optimization program to replace aging transmission and distribution assets as well as the Susquehanna-Roseland and Northeast/Pocono projects. This table also includes LKE's environmental projects related to existing and proposed EPA compliance standards (actual costs may be significantly lower or higher depending on the final requirements and market conditions; most environmental compliance costs incurred by LG&E and KU in serving KPSC jurisdictional customers are generally eligible for recovery through the ECR mechanism). See Note 6 to the Financial Statements for information on LG&E's and KU's ECR mechanism and CPCN filing, and Note 8 to the Financial Statements for information on significant development plans. See "Item 2. Properties" for information on planned projects to expand capacity.

The Registrants plan to fund capital expenditures in 2014 with proceeds from the sources noted below.

Source	PPL	Energy Supply	PPL Electric	LKE	LG&E	KU
Cash on hand	X	X	X	X	X	X
Cash from operations	X	X	X	X	X	X
Issuance of common stock	X					
Issuance of long-term debt securities	X		X			
Equity contributions from parent/member		X	X	X	X	X
Short-term debt	X	X	X	X	X	X

X = Expected funding source.

Contractual Obligations

The Registrants have assumed various financial obligations and commitments in the ordinary course of conducting business. At December 31, 2013, estimated contractual cash obligations were as follows.

	Total	2014	2015 - 2016	2017 - 2018	After 2018
PPL					
Long-term Debt (a)	\$ 20,935	\$ 314	\$ 2,118	\$ 757	\$ 17,746
Interest on Long-term Debt (b)	17,550	960	1,838	1,736	13,016

Total Contractual Cash Obligations	\$ 5,771	\$ 813	\$ 1,088	\$ 326	\$ 3,544

- (a) Reflects principal maturities only based on stated maturity dates, except for PPL Energy Supply's 5.70% REset Put Securities (REPS). See Note 7 to the Financial Statements for a discussion of the remarketing feature related to the REPS, as well as discussion of variable-rate remarketable bonds issued on behalf of PPL Energy Supply, LG&E and KU. The Registrants do not have any significant capital lease obligations.
- (b) Assumes interest payments through stated maturity, except for PPL Energy Supply's REPS, for which interest is reflected to the put date. For PPL, PPL Energy Supply, LKE, LG&E and KU the payments herein are subject to change, as payments for debt that is or becomes variable-rate debt have been estimated and for PPL, payments denominated in British pounds sterling have been translated to U.S. dollars at a current foreign currency exchange rate.
- (c) See Note 11 to the Financial Statements for additional information.
- (d) The amounts include agreements to purchase goods or services that are enforceable and legally binding and specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Primarily includes as applicable, the purchase obligations of electricity, coal, nuclear fuel and limestone as well as certain construction expenditures, which are also included in the Capital Expenditures table presented above. Financial swaps (for PPL and PPL Energy Supply) and open purchase orders that are provided on demand with no firm commitment are excluded from the amounts presented.
- (e) The amounts for PPL include WPD's contractual deficit pension funding requirements arising from actuarial valuations performed in March 2013. The U.K. electricity regulator currently allows a recovery of a substantial portion of the contributions relating to the plan deficit. The amounts also include contributions made or committed to be made in 2014 for PPL's and LKE's U.S. pension plans (for PPL Energy Supply, PPL Electric, LG&E and KU includes their share of these amounts). Based on the current funded status of these plans, except for WPD's plans, no cash contributions are required. See Note 13 to the Financial Statements for a discussion of expected contributions.
- (f) At December 31, 2013, total unrecognized tax benefits of \$22 million for PPL and \$15 million for PPL Energy Supply were excluded from this table as management cannot reasonably estimate the amount and period of future payments. See Note 5 to the Financial Statements for additional information.
- (g) Represents contracts to purchase coal, natural gas and natural gas transportation. See Note 15 to the Financial Statements for additional information.
- (h) Represents future minimum payments under OVEC power purchase agreements through June 2040. See Note 15 to the Financial Statements for additional information.
- (i) Represents construction commitments, including commitments for the LG&E's Mill Creek and KU's Ghent and E.W. Brown environmental air projects, LG&E's and KU's Cane Run Unit 7, KU's E.W. Brown landfill and LG&E's Ohio Falls refurbishment which are also reflected in the Capital Expenditures table presented above.

Dividends/Distributions

(PPL)

PPL views dividends as an integral component of shareowner return and expects to continue to pay dividends in amounts that are within the context of maintaining a capitalization structure that supports investment grade credit ratings. In February 2014, PPL declared its quarterly common stock dividend, payable April 1, 2014, at 37.25 cents per share (equivalent to \$1.49 per annum). Future dividends will be declared at the discretion of the Board of Directors and will depend upon future earnings, cash flows, financial and legal requirements and other relevant factors at the time. As discussed in Note 7 to the Financial Statements, subject to certain exceptions, PPL may not declare or pay any cash dividend on its common stock during any period in which PPL Capital Funding defers interest payments on its 2007 Series A Junior Subordinated Notes due 2067 or its 4.32% Junior Subordinated Notes due 2019 or until deferred contract adjustment payments on PPL's Purchase Contracts have been paid. No such deferrals have occurred or are currently anticipated.

(All Registrant except PPL)

From time to time, as determined by their respective Board of Directors or Board of Managers, the Registrants other than PPL pay dividends or distributions, as applicable, to their respective shareholders or members. Certain of the credit facilities of PPL Energy Supply, PPL Electric, LKE, LG&E and KU include minimum debt covenant ratios that could effectively restrict the payment of dividends.

(All Registrants except PPL Energy Supply)

See Note 7 to the Financial Statements for these and other restrictions related to distributions on capital interests for the Registrants and their subsidiaries.

Purchase or Redemption of Debt Securities

The Registrants will continue to evaluate outstanding debt securities and may decide to purchase or redeem these securities depending upon prevailing market conditions and available cash.

Rating Agency Actions

Moody's, S&P and Fitch periodically review the credit ratings of the debt of the Registrants and their subsidiaries. Based on their respective independent reviews, the rating agencies may make certain ratings revisions or ratings affirmations.

A credit rating reflects an assessment by the rating agency of the creditworthiness associated with an issuer and particular securities that it issues. The credit ratings of the Registrants and their subsidiaries are based on information provided by the Registrants and other sources. The ratings of Moody's, S&P and Fitch are not a recommendation to buy, sell or hold any securities of the Registrants or their subsidiaries. Such ratings may be subject to revisions or withdrawal by the agencies at any time and should be evaluated independently of each other and any other rating that may be assigned to the securities. The credit ratings of the Registrants and their subsidiaries affect their liquidity, access to capital markets and cost of borrowing under their credit facilities.

The following table sets forth the Registrants' and their subsidiaries' credit ratings for outstanding debt securities or commercial paper programs as of December 31, 2013.

Issuer	Senior Unsecured			Senior Secured			Commercial Paper		
	Moody's	S&P	Fitch	Moody's	S&P	Fitch	Moody's	S&P	Fitch
PPL									
PPL WEM	Baa3	BBB-							
WPD (East Midlands)	Baa1	BBB							
WPD (West Midlands)	Baa1	BBB							
PPL WW	Baa3	BBB-	BBB						
WPD (South Wales)	Baa1	BBB	A-						
WPD (South West)	Baa1	BBB	A-				P-2		
PPL Capital Funding	Baa3	BBB-	BBB						

Issuer	Senior Unsecured			Senior Secured			Commercial Paper		
	Moody's	S&P	Fitch	Moody's	S&P	Fitch	Moody's	S&P	Fitch
PPL and PPL Energy Supply									
PPL Energy Supply	Baa2	BBB	BBB-				P-2	A-2	F3
PPL and PPL Electric									
PPL Electric				A3	A-	A-	P-2	A-2	F2
PPL and LKE									
LKE	Baa2	BBB-	BBB+						
LG&E				A2	A-	A+	P-2	A-2	F2
KU				A2	A-	A+	P-2	A-2	F2

A downgrade in the Registrants' or their subsidiaries' credit ratings could result in higher borrowing costs and reduced access to capital markets. The Registrants and their subsidiaries have no credit rating triggers that would result in the reduction of access to capital markets or the acceleration of maturity dates of outstanding debt.

In addition to the credit ratings noted above, the rating agencies have taken the following actions related to the Registrants and their subsidiaries.

(PPL)

In March 2013, Moody's, S&P and Fitch assigned ratings of Ba1, BB+ and BB+ to PPL Capital Funding's \$450 million 5.90% Junior Subordinated Notes due 2073. Fitch also assigned a stable outlook to these notes.

In May 2013, Moody's, S&P and Fitch assigned ratings of Baa3, BBB- and BBB to PPL Capital Funding's \$250 million 1.90% Senior Notes due 2018, \$600 million 3.40% Senior Notes due 2023 and \$300 million 4.70% Senior Notes due 2043. Fitch also assigned a stable outlook to these notes.

In September 2013, Fitch affirmed the following ratings with a stable outlook:

- the long-term issuer default and senior unsecured ratings for PPL WW, WPD (South Wales) and WPD (South West); and
- the short-term issuer default ratings for WPD (South Wales) and WPD (South West).

In September 2013, Moody's and S&P assigned ratings of Baa1 and BBB to WPD (East Midlands') £65 million 1.676% Index-Linked Senior Notes due 2052.

In October 2013, Moody's and S&P assigned ratings of Baa1 and BBB to WPD (West Midlands') £400 million 3.875% Senior Notes due 2024.

In November 2013, Moody's placed the ratings of PPL on review for upgrade.

In December 2013, Fitch affirmed the following ratings with a stable outlook:

- the long-term and short-term issuer default ratings for PPL and PPL Capital Funding; and
- the senior unsecured debt and junior subordinated notes ratings for PPL Capital Funding.

In January 2014, Moody's affirmed its ratings and revised its outlook to stable for PPL.

(PPL and PPL Energy Supply)

In February 2013, Moody's upgraded its rating, from B2 to Ba1, and revised its outlook from under review to stable for PPL Ironwood.

In April 2013, Fitch affirmed its rating and outlook on PPL Montana's pass-through certificates due 2020.

In July 2013, Moody's withdrew its rating and outlook for PPL Ironwood.

In July 2013, S&P lowered its rating, from BBB- to BB+, retained its negative outlook and assigned a recovery rating of 1 to PPL Montana's pass-through certificates due 2020.

In August 2013, Moody's affirmed its rating and revised its outlook from stable to negative on PPL Montana's pass-through certificates due 2020.

In September 2013, S&P affirmed its rating and revised its outlook from negative to stable on PPL Montana's pass-through certificates due 2020.

In December 2013, Fitch downgraded its long-term issuer default rating, from BBB to BBB-, short-term issuer default and commercial paper ratings, from F2 to F3, and retained its negative outlook for PPL Energy Supply.

In January 2014, S&P withdrew its rating, outlook and recovery rating on PPL Montana's pass-through certificates due 2020.

(PPL and PPL Electric)

In July 2013, Moody's, S&P and Fitch assigned ratings of A3, A- and A- to PPL Electric's \$350 million 4.75% First Mortgage Bonds due 2043. Fitch assigned a stable outlook and S&P assigned a recovery rating of 1+ to these notes.

In November 2013, Moody's placed the ratings of PPL Electric on review for upgrade.

In December 2013, Fitch affirmed its long-term issuer default rating, short-term issuer default rating, secured debt and commercial paper rating with a stable outlook for PPL Electric.

In January 2014, Moody's upgraded its issuer rating, from Baa2 to Baa1, and senior secured rating, from A3 to A2, affirmed its commercial paper rating and revised its outlook to stable for PPL Electric.

(PPL, LKE, LG&E and KU)

In July 2013, S&P confirmed its ratings for KU's 2000 Series A Solid Waste Disposal Facility Revenue Bonds and KU's 2004 Series A, 2006 Series B and 2008 Series A Environmental Facilities Revenue Bonds.

In November 2013, Moody's, S&P and Fitch assigned ratings of A2, A- and A+ to LG&E's \$250 million 4.65% First Mortgage Bonds due 2043 and KU's \$250 million 4.65% First Mortgage Bonds due 2043. Fitch assigned a stable outlook and S&P assigned a recovery rating of 1+ to both notes.

In November 2013, Moody's placed the ratings of LKE, LG&E and KU on review for upgrade.

In December 2013, Fitch affirmed the following ratings with a stable outlook:

- the long-term and short-term issuer default ratings for LKE, LG&E and KU;
- the senior unsecured debt rating for LKE; and
- the secured debt, secured pollution control bonds and commercial paper ratings for LG&E and KU.

In January 2014, Moody's affirmed its ratings and revised its outlook to stable for LKE.

In January 2014, Moody's upgraded its issuer ratings, from Baa1 to A3, and senior secured ratings, from A2 to A1, affirmed its commercial paper ratings and revised its outlook to stable for LG&E and KU.

In February 2014, Moody's affirmed its ratings for KU's 2000 Series A Solid Waste Disposal Facility Revenue Bonds , KU's 2004 Series A and 2008 Series A Environmental Facilities Revenue Bonds and KU's 2006 Series B Environmental Facilities Revenue Refunding Bonds .

Ratings Triggers

(PPL)

As discussed in Note 7 to the Financial Statements, certain of WPD's senior unsecured notes may be put by the holders to the issuer for redemption if the long-term credit ratings assigned to the notes are withdrawn by any of the rating agencies (Moody's, S&P, or Fitch) or reduced to a non-investment grade rating of Ba1 or BB+ in connection with a restructuring event. A restructuring event includes the loss of, or a material adverse change to, the distribution licenses under which WPD (East Midlands), WPD (South West), WPD (South Wales) and WPD (West Midlands) operate and would be a trigger event in that company. These notes totaled £3.8 billion (approximately \$6.2 billion) nominal value at December 31, 2013.

(All Registrants except PPL Electric)

Various derivative and non-derivative contracts, including contracts for the sale and purchase of electricity and fuel, commodity transportation and storage, interest rate and foreign currency instruments (for PPL), contain provisions that require the posting of additional collateral, or permit the counterparty to terminate the contract, if PPL's, PPL Energy Supply's, LKE's, LG&E's or KU's or their subsidiaries' credit rating, as applicable, were to fall below investment grade. See Note 19 to the Financial Statements for a discussion of "Credit Risk-Related Contingent Features," including a discussion of the potential additional collateral that would have been required for derivative contracts in a net liability position at December 31, 2013.

Guarantees for Subsidiaries *(PPL and PPL Energy Supply)*

PPL and PPL Energy Supply guarantee certain consolidated affiliate financing arrangements. Some of the guarantees contain financial and other covenants that, if not met, would limit or restrict the consolidated affiliates' access to funds under these financing arrangements, accelerate maturity of such arrangements or limit the consolidated affiliates' ability to enter into certain transactions. At this time, PPL and PPL Energy Supply believe that these covenants will not limit access to relevant funding sources. See Note 15 to the Financial Statements for additional information about guarantees.

Off-Balance Sheet Arrangements *(All Registrants)*

The Registrants have entered into certain agreements that may contingently require payment to a guaranteed or indemnified party. See Note 15 to the Financial Statements for a discussion of these agreements.

Risk Management

Market Risk

(All Registrants)

See Notes 1, 18, and 19 to the Financial Statements for information about the Registrants' risk management objectives, valuation techniques and accounting designations.

The forward-looking information presented below provides estimates of what may occur in the future, assuming certain adverse market conditions and model assumptions. Actual future results may differ materially from those presented. These disclosures are not precise indicators of expected future losses, but only indicators of possible losses under normal market conditions at a given confidence level.

Commodity Price Risk (Non-trading)

(PPL, LKE, LG&E, and KU)

LG&E's and KU's retail electric and natural gas rates and municipal wholesale electric rates are set by regulatory commissions and the fuel costs incurred are directly recoverable from customers. As a result, LG&E and KU are subject to commodity price risk for only a small portion of on-going business operations. LG&E and KU sell excess economic generation to maximize the value of the physical assets at times when the assets are not required to serve LG&E's or KU's customers. See Note 19 to the Financial Statements for additional information.

(PPL and PPL Electric)

PPL Electric is exposed to market price and volumetric risks from its obligation as PLR. The PUC has approved a cost recovery mechanism that allows PPL Electric to pass through to customers the cost associated with fulfilling its PLR obligation. This cost recovery mechanism substantially eliminates PPL Electric's exposure to market price risk. PPL Electric also mitigates its exposure to volumetric risk by entering into full-requirement energy supply contracts for the majority of its PLR obligations. These supply contracts transfer the volumetric risk associated with the PLR obligation to the energy suppliers.

(PPL and PPL Energy Supply)

PPL Energy Supply segregates its non-trading activities into two categories: hedge activity and economic activity. Transactions that are accounted for as hedge activity qualify for hedge accounting treatment. The economic activity category includes transactions that address a specific risk, but were not eligible for hedge accounting or for which hedge accounting was not elected. This activity includes the changes in fair value of positions used to hedge a portion of the economic value of PPL Energy Supply's competitive generation assets and full-requirement sales and retail contracts. This economic activity is subject to changes in fair value due to market price volatility of the input and output commodities (e.g., fuel and power). Although they do not receive hedge accounting treatment, these transactions are considered non-trading activity. See Note 19 to the Financial Statements for additional information.

To hedge the impact of market price volatility on PPL Energy Supply's energy-related assets, liabilities and other contractual arrangements, PPL Energy Supply both sells and purchases physical energy at the wholesale level under FERC market-based tariffs throughout the U.S. and enters into financial exchange-traded and over-the-counter contracts. PPL Energy Supply's non-trading commodity derivative contracts range in maturity through 2019.

The following tables sets forth the changes in the net fair value of non-trading commodity derivative contracts at December 31. See Notes 18 and 19 to the Financial Statements for additional information.

	Gains (Losses)	
	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 473	\$ 1,082
Contracts realized or otherwise settled during the period	(452)	(1,005)
Fair value of new contracts entered into during the period (a)	58	7
Other changes in fair value	28	389
Fair value of contracts outstanding at the end of the period	<u>\$ 107</u>	<u>\$ 473</u>

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of non-trading commodity derivative contracts at December 31, 2013 based on the level of observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				Total Fair Value
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	
Prices based on significant observable inputs (Level 2)	\$ 125	\$ (50)	\$ 7	\$ 4	\$ 86
Prices based on significant unobservable inputs (Level 3)	(13)	27	7		21
Fair value of contracts outstanding at the end of the period	<u>\$ 112</u>	<u>\$ (23)</u>	<u>\$ 14</u>	<u>\$ 4</u>	<u>\$ 107</u>

PPL Energy Supply sells electricity, capacity and related services and buys fuel on a forward basis to hedge the value of energy from its generation assets. If PPL Energy Supply were unable to deliver firm capacity and energy or to accept the delivery of fuel under its agreements, under certain circumstances it could be required to pay liquidating damages. These damages would be based on the difference between the market price and the contract price of the commodity. Depending on price changes in the wholesale energy markets, such damages could be significant. Extreme weather conditions, unplanned power plant outages, transmission disruptions, nonperformance by counterparties (or their counterparties) with which it has energy contracts and other factors could affect PPL Energy Supply's ability to meet its obligations, or cause significant increases in the market price of replacement energy. Although PPL Energy Supply attempts to mitigate these risks, there can be no assurance that it will be able to fully meet its firm obligations, that it will not be required to pay damages for failure to perform, or that it will not experience counterparty nonperformance in the future.

Commodity Price Risk (Trading)

PPL Energy Supply's trading commodity derivative contracts range in maturity through 2020. The following table sets forth changes in the net fair value of trading commodity derivative contracts at December 31. See Notes 18 and 19 to the Financial Statements for additional information.

	Gains (Losses)	
	2013	2012
Fair value of contracts outstanding at the beginning of the period	\$ 29	\$ (4)
Contracts realized or otherwise settled during the period	(13)	20
Fair value of new contracts entered into during the period (a)	3	17
Other changes in fair value	(8)	(4)
Fair value of contracts outstanding at the end of the period	<u>\$ 11</u>	<u>\$ 29</u>

(a) Represents the fair value of contracts at the end of the quarter of their inception.

The following table segregates the net fair value of trading commodity derivative contracts at December 31, 2013 based on the level of observability of the information used to determine the fair value.

Source of Fair Value	Net Asset (Liability)				Total Fair Value
	Maturity Less Than 1 Year	Maturity 1-3 Years	Maturity 4-5 Years	Maturity in Excess of 5 Years	
Prices quoted in active markets for identical instruments	\$ (1)				\$ (1)
Prices based on significant observable inputs (Level 2)	(3)	\$ 9	\$ 3		9
Prices based on significant unobservable inputs (Level 3)	2	(1)	(3)	\$ 5	3
Fair value of contracts outstanding at the end of the period	<u>\$ (2)</u>	<u>\$ 8</u>	<u></u>	<u>\$ 5</u>	<u>\$ 11</u>

VaR Models

A VaR model is utilized to measure commodity price risk in unregulated gross energy margins for the trading and non-trading portfolios. VaR is a statistical model that attempts to estimate the value of potential loss over a given holding period under normal market conditions at a given confidence level. VaR is calculated using a Monte Carlo simulation technique based on a five-day holding period at a 95% confidence level. Given the company's disciplined hedging program, the non-trading VaR exposure is expected to be limited in the short-term. The VaR for portfolios using end-of-month results for 2013 was as follows.

95% Confidence Level, Five-Day Holding Period	Trading	Non-Trading
Period End	\$ 11	\$ 5
Average for the Period	6	7
High	11	10
Low	2	4

The trading portfolio includes all proprietary trading positions, regardless of the delivery period. All positions not considered proprietary trading are considered non-trading. The non-trading portfolio includes the entire portfolio, including generation, with delivery periods through the next 12 months. Both the trading and non-trading VaR computations exclude FTRs due to the absence of reliable spot and forward markets. The fair value of the trading and non-trading FTR positions was insignificant at December 31, 2013.

Interest Rate Risk (All Registrants)

The Registrants and their subsidiaries issue debt to finance their operations, which exposes them to interest rate risk. The Registrants and their subsidiaries utilize various financial derivative instruments to adjust the mix of fixed and floating interest rates in their debt portfolios, adjust the duration of their debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolios due to changes in the absolute level of interest rates.

The following interest rate hedges were outstanding at December 31.

	2013				2012			
	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)	Maturities Ranging Through	Exposure Hedged	Fair Value, Net - Asset (Liability) (a)	Effect of a 10% Adverse Movement in Rates (b)	
PPL								
Cash flow hedges								
Interest rate swaps (c)	\$ 1,325	\$ 91	\$ (44)	2044	\$ 1,165	\$ (7)	\$ (34)	
Cross-currency swaps (d)	1,262	(31)	(177)	2028	1,262	10	(179)	
Economic hedges								
Interest rate swaps (e)	179	(37)	(4)	2033	179	(58)	(3)	
LKE								
Cash flow hedges								
Interest rate swaps (c)					300	14	(18)	
Economic hedges								
Interest rate swaps (e)	179	(37)	(4)	2033	179	(58)	(3)	
LG&E								
Cash flow hedges								
Interest rate swaps (c)					150	7	(9)	
Economic hedges								
Interest rate swaps (e)	179	(37)	(4)	2033	179	(58)	(3)	
KU								
Cash flow hedges								
Interest rate swaps (c)					150	7	(9)	

(a) Includes accrued interest, if applicable.

(b) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability. Sensitivities represent a 10% adverse movement in interest rates, except for cross-currency swaps which also includes foreign currency exchange rates.

(c) Changes in the fair value of such cash flow hedges are recorded in equity or as regulatory assets or liabilities, if recoverable through regulated rates, and reclassified into earnings in the same period during which the item being hedged affects earnings.

(d) Cross-currency swaps are utilized to hedge the principal and interest payments of WPD's U.S. dollar-denominated senior notes. Changes in the fair value of these instruments are recorded in equity and reclassified into earnings in the same period during which the item being hedged affects earnings.

(e) Realized changes in the fair value of such economic hedges are recoverable through regulated rates and any subsequent changes in the fair value of these derivatives are included in regulatory assets or liabilities.

The Registrants are exposed to a potential increase in interest expense and to changes in the fair value of their debt portfolios. The estimated impact of a 10% adverse movement in interest rates at December 31 is shown below.

	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
2013						
Increase to interest expense of 10% increase in interest rates	Not Significant	Not Significant	Not Significant	Not Significant	Not Significant	Not Significant
Increase in fair value of 10% decrease in interest rates	\$ 732	\$ 48	\$ 120	\$ 146	\$ 45	\$ 85
2012						
Increase to interest expense of 10% increase in interest rates	Not Significant	Not Significant	Not Significant	Not Significant	Not Significant	Not Significant
Increase in fair value of 10% decrease in interest rates	\$ 611	\$ 52	\$ 93	\$ 113	\$ 27	\$ 67

Foreign Currency Risk (PPL)

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL's domestic operations may make purchases of equipment in currencies other than U.S. dollars. See Note 1 to the Financial Statements for additional information regarding foreign currency translation.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

The following foreign currency hedges were outstanding at December 31.

	2013				2012			
	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)	Maturities Ranging Through	Exposure Hedged	Fair Value, Net - Asset (Liability)	Effect of a 10% Adverse Movement in Foreign Currency Exchange Rates (a)	
Net investment								
hedges (b)	£ 301	\$ (20)	\$ (49)	2015	£ 162	\$ (2)	\$ (26)	(26)
Economic								
hedges (c)	1,425	(86)	(222)	2015	1,265	(42)		(192)

- (a) Effects of adverse movements decrease assets or increase liabilities, as applicable, which could result in an asset becoming a liability.
- (b) To protect the value of a portion of its net investment in WPD, PPL executes forward contracts to sell GBP. The positions outstanding exclude the amount of intercompany loans classified as net investment hedges. See Note 19 to the Financial Statements for additional information.
- (c) To economically hedge the translation of expected earnings denominated in GBP to U.S. dollars, PPL enters into a combination of average rate forwards and average rate options to sell GBP.

NDT Funds - Securities Price Risk (PPL and PPL Energy Supply)

In connection with certain NRC requirements, PPL Susquehanna maintains trust funds to fund certain costs of decommissioning the PPL Susquehanna nuclear plant (Susquehanna). At December 31, 2013, these funds were invested primarily in domestic equity securities and fixed-rate, fixed-income securities and are reflected at fair value on the Balance Sheets. The mix of securities is designed to provide returns sufficient to fund Susquehanna's decommissioning and to compensate for inflationary increases in decommissioning costs. However, the equity securities included in the trusts are exposed to price fluctuation in equity markets, and the values of fixed-rate, fixed-income securities are primarily exposed to changes in interest rates. PPL actively monitors the investment performance and periodically reviews asset allocation in accordance with its nuclear decommissioning trust policy statement. At December 31, 2013, a hypothetical 10% increase in interest rates and a 10% decrease in equity prices would have resulted in an estimated \$66 million reduction in the fair value of the trust assets, compared with \$49 million at December 31, 2012. See Notes 18 and 23 to the Financial Statements for additional information regarding the NDT funds.

(All Registrants)

Defined Benefit Plans - Securities Price Risk

See "Application of Critical Accounting Policies - Defined Benefits" for additional information regarding the effect of securities price risk on plan assets.

Credit Risk

Credit risk is the risk that the Registrants would incur a loss as a result of nonperformance by counterparties of their contractual obligations. The Registrants maintain credit policies and procedures with respect to counterparty credit (including requirements that counterparties maintain specified credit ratings) and require other assurances in the form of credit support or collateral in certain circumstances in order to limit counterparty credit risk. However, the Registrants, as applicable, have concentrations of suppliers and customers among electric utilities, financial institutions and other energy marketing and trading companies. These concentrations may impact the Registrants' overall exposure to credit risk, positively or negatively, as counterparties may be similarly affected by changes in economic, regulatory or other conditions.

(PPL and PPL Energy Supply)

PPL Energy Supply includes the effect of credit risk on its fair value measurements to reflect the probability that a counterparty will default when contracts are out of the money (from the counterparty's standpoint). In this case, PPL Energy Supply would have to sell into a lower-priced market or purchase in a higher-priced market. When necessary, PPL Energy Supply records an allowance for doubtful accounts to reflect the probability that a counterparty will not pay for deliveries PPL Energy Supply has made but not yet billed, which are reflected in "Unbilled revenues" on the Balance Sheets. PPL Energy Supply has also established a reserve with respect to certain receivables from SMGT, which is reflected in accounts receivable on the Balance Sheets.

(PPL and PPL Electric)

In 2013, the PUC approved PPL Electric's PLR procurement plan for the period of June 2013 through May 2015. To date, PPL Electric has conducted two of its four planned competitive solicitations.

Under the standard Supply Master Agreement (the Agreement) for the competitive solicitation process, PPL Electric requires all suppliers to post collateral if their credit exposure exceeds an established credit limit. In the event a supplier defaults on its obligation, PPL Electric would be required to seek replacement power in the market. All incremental costs incurred by PPL Electric would be recoverable from customers in future rates. At December 31, 2013, most of the successful bidders under all of the solicitations had an investment grade credit rating from S&P, and were not required to post collateral under the Agreement. A small portion of bidders were required to post an insignificant amount of collateral under the Agreement. There is no instance under the Agreement in which PPL Electric is required to post collateral to its suppliers.

See Notes 15, 16, 18 and 19 to the Financial Statements for additional information on the competitive solicitation process, the Agreement, credit concentration and credit risk.

Foreign Currency Translation (PPL)

The value of the British pound sterling fluctuates in relation to the U.S. dollar. In 2013, changes in this exchange rate resulted in a foreign currency translation gain of \$150 million, which primarily reflected a \$330 million increase to PP&E and goodwill offset by an increase of \$180 million to net liabilities. In 2012, changes in this exchange rate resulted in a foreign currency translation gain of \$99 million, which primarily reflected a \$181 million increase to PP&E offset by an increase of \$82 million to net liabilities. In 2011, changes in this exchange rate resulted in a foreign currency translation loss of \$51 million, which primarily reflected a \$69 million reduction to PP&E offset by a reduction of \$18 million to net liabilities. The impact of foreign currency translation is recorded in AOCI.

(All Registrants)

Related Party Transactions

The Registrants are not aware of any material ownership interests or operating responsibility by senior management in outside partnerships, including leasing transactions with variable interest entities, or other entities doing business with the Registrants. See Note 16 to the Financial Statements for additional information on related party transactions for PPL Energy Supply, PPL Electric, LKE, LG&E and KU.

Acquisitions, Development and Divestitures

The Registrants from time to time evaluate opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options.

See Notes 8, 9 and 10 to the Financial Statements for additional information on the more significant activities.

Environmental Matters

Extensive federal, state and local environmental laws and regulations are applicable to PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's air emissions, water discharges and the management of hazardous and solid waste, as well as other aspects of the Registrants' businesses. The cost of compliance or alleged non-compliance cannot be predicted with certainty but could be material. In addition, costs may increase significantly if the requirements or scope of environmental laws or regulations, or similar rules, are expanded or changed. Costs may take the form of increased capital expenditures or operating and maintenance expenses, monetary fines, penalties or other restrictions. Many of these environmental law considerations are also applicable to the operations of key suppliers, or customers, such as coal producers and industrial power users, and may impact the cost for their products or their demand for the Registrants' services.

The following is a discussion of the more significant environmental matters. See Note 15 to the Financial Statements and "Item 1. Business - Environmental Matters" for additional information on environmental matters.

GHG Regulations

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a revised proposal for new power plants (a prior proposal was issued in 2012) by September 20, 2013, with a final rule to be issued in a timely fashion thereafter, and to issue proposed standards for existing power plants by June 1, 2014 with a final rule by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016.

The EPA's revised proposal for new power plants was published in the Federal Register on January 8, 2014, with comments due on March 10, 2014. The proposed limits for coal plants can only be achieved through capture and sequestration, a technology which is not presently commercially viable and, therefore, effectively preclude the construction of new coal plants. The proposed standards for new gas plants may also not be consistently achievable. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and state implementation plans.

The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from \$23.80 to \$38 per metric ton in 2015 may lead to more costly regulatory requirements. The White House Office of Management and Budget (OMB) has opened this issue for public comment.

Additionally, the Climate Action Plan goal to prepare the U.S. for the impacts of climate change could affect PPL, PPL Electric, LKE, LG&E and KU and others in the industry as it could result in requirements to modify electricity delivery systems to improve the ability to withstand major storms and substantial capital investment may be needed to meet those requirements.

Climate Change

Physical effects associated with climate change could include the impact of changes in weather patterns, such as storm frequency and intensity, and the resultant potential damage, as applicable, to the Registrants' generation assets, electricity delivery systems, as well as impacts on the Registrants' customers. In addition, changed weather patterns could potentially reduce annual rainfall in areas where PPL, PPL Energy Supply, LKE, LG&E and KU have hydroelectric generating facilities or where river water is used to cool their fossil and nuclear (as applicable) powered generators. The Registrants cannot currently predict whether their businesses will experience these potential risks or estimate the cost of their related consequences.

(All Registrants except PPL Electric)

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous waste) under existing federal law. Under a litigation settlement agreement involving certain environmental groups, the EPA has agreed to issue its final rulemaking by the end of 2014. Regulations could impact handling, disposal and/or beneficial use of CCRs. The financial and operational impact is expected to be material if CCRs are regulated as hazardous waste, and significant if regulated as non-hazardous.

In July 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from regulating CCRs under RCRA and set rules governing state programs. It remains uncertain whether similar legislation will be passed by the U.S. Senate. Recent ash spills that have occurred within the utility industry are adding increased pressure to regulate both active and legacy sites.

Effluent Limitation Guidelines (ELGs)

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations also contain some requirements that would affect the inspection and operation of CCR facilities, if finalized. The proposal contains several alternative approaches, some of which could significantly impact PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's coal-fired plants. The final regulation is expected to be issued in May 2014 but may be delayed. At the present time, PPL, PPL Energy Supply, LKE, LG&E and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant.

316(b) Cooling Water Intake Structure Rule

In April 2011, the EPA published a draft regulation under Section 316(b) of the Clean Water Act, which regulates cooling water intakes for power plants. The draft rule has two provisions: requiring installation of Best Technology Available (BTA) to reduce mortality of aquatic organisms that are pulled into the plant cooling water system (entrainment), and imposing standards for reduction of mortality of aquatic organisms trapped on water intake screens (impingement). The final rule is now expected by April 17, 2014. The proposed regulation would apply to nearly all PPL-owned steam electric generation plants in Pennsylvania, Kentucky, and Montana, potentially even including those equipped with closed-cycle cooling systems. PPL's, PPL Energy Supply's, LKE's, LG&E's and KU's compliance costs could be significant, especially if the final rule requires closed-cycle systems at plants that do not currently have them or conversions of once-through systems to closed-cycle.

MATS

In February 2013, the EPA finalized MATS requiring fossil-fuel fired plants to reduce emissions of mercury and other hazardous air pollutants by April 16, 2015. The rule is being challenged by industry groups and states. The EPA has subsequently proposed changes to the rule with respect to new sources to address the concern that the rule effectively precludes construction of any new coal-fired plants. PPL, PPL Energy Supply, LKE, LG&E and KU are generally well-positioned to comply with MATS, primarily due to recent investments in environmental controls at PPL Energy Supply and approved ECR plans to install additional controls at some of LG&E's and KU's Kentucky plants. Additionally, PPL Energy Supply is evaluating chemical additive systems for mercury control at Brunner Island, and modifications to existing controls at Colstrip for improved particulate matter reductions. In September 2012, PPL Energy Supply announced its intention to place its Corette plant in long-term reserve status beginning in April 2015 due to expected market conditions and costs to comply with MATS. The Corette plant asset group was determined to be impaired in December 2013. See "Application of Critical Accounting Policies - Asset Impairment (Excluding Investments)" for additional information. Also, PPL has received approval for one-year compliance extensions for certain plants in Kentucky and Pennsylvania. Other extension requests are under consideration from LG&E, KU and PPL Energy Supply.

LG&E's and KU's anticipated retirements of generating units at the Cane Run and Green River plants are in response to MATS and other environmental regulations.

CSAPR and CAIR

In 2011, the EPA finalized its CSAPR regulating emissions of nitrogen oxides and sulfur dioxide through new allowance trading programs which were to be implemented in two phases (2012 and 2014). Like its predecessor, the CAIR, CSAPR targeted sources in the eastern U.S. In December 2011, the U.S. District Court for the District of Columbia Circuit (D.C. Circuit Court) stayed implementation of CSAPR, leaving CAIR in place. Subsequently, in August 2012, the D. C. Circuit Court vacated CSAPR and remanded it back to the EPA for further rulemaking, again leaving CAIR in place in the interim. In June 2013 the U.S. Supreme Court granted the EPA's petition for review of the D.C. Circuit Court's decision to vacate CSAPR. Oral arguments before the U.S. Supreme Court were held in December 2013. Prior to a revised transport rule from the EPA, coal-fired generating plants could face tighter emission limitations on nitrogen oxides through state action.

PPL, PPL Energy Supply, LKE, LG&E and KU plants in Pennsylvania and Kentucky will continue to comply with CAIR through optimization of existing controls, balanced with emission allowance purchases. The D. C. Circuit Court's August 2012 decision leaves plants in CSAPR-affected states potentially exposed to more stringent emission reductions for nitrogen oxides and sulfur dioxide due to regional haze implementation (see Regional Haze discussion below), and/or petitions to the EPA by downwind states under Section 126 of the Clean Air Act requesting the EPA to require plants that allegedly contribute to downwind non-attainment to take action to reduce emissions.

Regional Haze

Under the EPA's regional haze programs (developed to eliminate man-made visibility degradation by 2064), states are required to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977. For the eastern U.S., the EPA had determined that region-wide reductions under the CSAPR trading program could be utilized by state programs to satisfy BART requirements for sulfur dioxide and nitrogen oxides. However, the August 2012 decision by the D.C. Circuit Court to vacate and remand CSAPR exposes power plants located in the eastern U.S., including PPL Energy Supply's plants in Pennsylvania and LG&E's and KU's plants in Kentucky, to further reductions in those pollutants in accordance with BART requirements.

The EPA signed its final Federal Implementation Plan (FIP) of the Regional Haze Rules for Montana in September 2012, with tighter emissions limits for PPL Energy Supply's Colstrip Units 1 & 2 based on the installation of new controls (no limits or additional controls were specified for PPL Energy Supply's Colstrip Units 3 & 4), and tighter emission limits for PPL Energy Supply's Corette plant (which are not based on additional controls). The cost of the potential additional controls for Colstrip Units 1 & 2, if required, could be significant. PPL Energy Supply expects to meet the tighter permit limits at Corette without any significant changes to operations, although other requirements have led to the planned suspension of operations at Corette beginning in April 2015 (see "MATS" discussion above). Both PPL and environmental groups have appealed the final FIP rules to the U.S. Court of Appeals for the Ninth Circuit.

National Ambient Air Quality Standards (LKE, LG&E and KU)

During 2010 and 2012, the EPA issued new ambient air standards for sulfur dioxide and particulates, respectively. In 2013, the EPA preliminarily designated Jefferson County, Kentucky, as a partial non-attainment area for sulfur dioxide. Final designations of non-attainment areas may occur in 2014. Existing environmental plans for LG&E's and KU's Kentucky plants, including announced retirements of certain plants and ECR-approved new or upgraded scrubbers or baghouses at other plants, may aid in achievement of eventual ambient air requirements. However, depending upon the specifics of final non-attainment designations and consequent compliance plans, additional controls may be required, the financial impact of which could be significant.

(All Registrants)

Competition

See "Competition" under each of PPL's reportable segments in "Item 1. Business - Segment Information" and "Item 1A. Risk Factors" for a discussion of competitive factors affecting the Registrants.

New Accounting Guidance

See Notes 1 and 25 to the Financial Statements for a discussion of new accounting guidance adopted and pending adoption.

Application of Critical Accounting Policies

Financial condition and results of operations are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. The following accounting policies are particularly important to an understanding of the reported financial condition or results of operations, and require management to make estimates or other judgments of matters that are inherently uncertain. Changes in the estimates or other judgments included within these accounting policies could result in a significant change to the information presented in the Financial Statements (these accounting policies are also discussed in Note 1 to the Financial Statements). Senior management has reviewed with PPL's Audit Committee these critical accounting policies, the following disclosures regarding their application and the estimates and assumptions regarding them.

Price Risk Management (All Registrants except PPL Electric)

See "Price Risk Management" in Note 1 to the Financial Statements, as well as "Risk Management" above.

Defined Benefits

(All Registrants)

Certain of the Registrants' subsidiaries sponsor or participate in, as applicable, various qualified funded and non-qualified unfunded defined benefit pension plans and both funded and unfunded other postretirement benefit plans. These plans are applicable to the majority of the Registrants' employees (based on eligibility for their applicable plans). The Registrants and certain of their subsidiaries record an asset or liability to recognize the funded status of all defined benefit plans with an offsetting entry to AOCI or in the case of PPL Electric, LG&E and KU, regulatory assets and liabilities for amounts that are expected to be recovered through regulated customer rates. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets. See Note 13 to the Financial Statements for additional information about the plans and the accounting for defined benefits.

A summary of plan sponsors by Registrant and whether a Registrant or its subsidiaries sponsor (S) or participate in and receives allocations (P) from those plans is shown in the table below.

Plan Sponsor	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
PPL Services	S	P	P			
WPD (a)	S					
PPL Montana		S				
LKE				S	P	P
LG&E					S	

(a) Does not sponsor or participate in other postretirement benefits plans.

Management makes certain assumptions regarding the valuation of benefit obligations and the performance of plan assets. When accounting for defined benefits, delayed recognition in earnings of differences between actual results and expected or estimated results is a guiding principle. Annual net periodic defined benefit costs are recorded in current earnings based on estimated results. Any differences between actual and estimated results are recorded in AOCI, or in the case of PPL Electric, LG&E and KU, regulatory assets and liabilities, for amounts that are expected to be recovered through regulated customer rates. These amounts in AOCI or regulatory assets and liabilities are amortized to income over future periods. The delayed recognition allows for a smoothed recognition of costs over the working lives of the employees who benefit under the plans. The primary assumptions are:

- **Discount Rate** - The discount rate is used in calculating the present value of benefits, which is based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due.
- **Expected Return on Plan Assets** - Management projects the long-term rates of return on plan assets using a best-estimate of expected returns, volatilities and correlations for each asset class. Each plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption. These projected returns reduce the net benefit costs the Registrants record currently.
- **Rate of Compensation Increase** - Management projects employees' annual pay increases, which are used to project employees' pension benefits at retirement.
- **Health Care Cost Trend Rate** - Management projects the expected increases in the cost of health care.

(PPL)

In selecting the discount rate for its U.K. pension plans, WPD starts with a cash flow analysis of the expected benefit payment stream for its plans. These plan-specific cash flows are matched against a spot-rate yield curve to determine the assumed discount rate, which uses an iBoxx British pounds sterling denominated corporate bond index as its base. From this base, those bonds with the lowest and highest yields are eliminated to develop an appropriate subset of bonds. An individual bond matching approach, which is used for the U.S. pension plans as discussed below, is not used for the U.K. pension plans because the universe of bonds in the U.K. is not deep enough to adequately support such an approach.

(All Registrants)

In selecting the discount rates for U.S. defined benefit plans, the plan sponsors start with a cash flow analysis of the expected benefit payment stream for their plans. The plan-specific cash flows are matched against the coupons and expected maturity values of individually selected bonds. This bond matching process begins with the full universe of Aa-rated non-callable (or callable with make-whole provisions) bonds, serving as the base from which those with the lowest and highest yields are eliminated to develop an appropriate subset of bonds. Individual bonds are then selected based on the timing of each plan's cash flows and parameters are established as to the percentage of each individual bond issue that could be hypothetically purchased and the surplus reinvestment rates to be assumed.

In selecting a rate of compensation increase, plan sponsors consider past experience in light of movements in inflation rates.

The following table provides the weighted-average assumptions used for discount rate, expected return on plan assets and rate of compensation increase at December 31.

Assumption / Registrant	2013	2012
<i>Discount rate</i>		
Pension - PPL (U.S.)	5.12%	4.22%
Pension - PPL (U.K.)	4.41%	4.27%
Pension - PPL Energy Supply	5.18%	4.25%
Pension - LKE	5.18%	4.24%
Pension - LG&E	5.13%	4.20%
Other Postretirement - PPL	4.91%	4.00%
Other Postretirement - PPL Energy Supply	4.51%	3.77%
Other Postretirement - LKE	4.91%	3.99%

Assumption / Registrant	2013	2012
<i>Expected return on plan assets</i>		
Pension - PPL (U.S.)	7.00%	7.03%
Pension - PPL (U.K.)	7.19%	7.16%
Pension - PPL Energy Supply	7.00%	7.00%
Pension - LKE	7.00%	7.10%
Pension - LG&E	7.00%	7.10%
Other Postretirement - PPL	5.96%	5.94%
Other Postretirement - LKE	6.75%	6.76%
<i>Rate of compensation increase</i>		
Pension - PPL (U.S.)	3.97%	3.98%
Pension - PPL (U.K.)	4.00%	4.00%
Pension - PPL Energy Supply	3.94%	3.95%
Pension - LKE	4.00%	4.00%
Other Postretirement - PPL	3.96%	3.97%
Other Postretirement - PPL Energy Supply	3.94%	3.95%
Other Postretirement - LKE	4.00%	4.00%

In selecting health care cost trend rates, plan sponsors consider past performance and forecasts of health care costs. At December 31, 2013, the health care cost trend rates for all plans were 7.6% for 2014, gradually declining to an ultimate trend rate of 5.0% in 2020.

A variance in the assumptions listed above could have a significant impact on accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and AOCI or regulatory assets and liabilities. At December 31, 2013, the defined benefit plans were recorded in the Registrants' financial statements as follows.

	PPL	PPL Energy Supply	PPL Electric	LKE	LG&E	KU
Balance Sheet:						
Regulatory assets/liabilities	\$ 483		\$ 257	\$ 226	\$ 164	\$ 62
Pension liabilities	1,294	\$ 112	96	155	19	11
Other postretirement benefit liabilities	216	47	41	119	73	42
AOCI (pre-tax)	(2,561)	(319)		19		
Statement of Income:						
Defined benefits costs	\$ 169	\$ 51	\$ 21	\$ 40	\$ 18	11
Increase (decrease) from prior year	3	8	(1)			

The following tables reflect changes in certain assumptions based on the Registrants' primary defined benefit plans. The tables reflect either an increase or decrease in each assumption. The inverse of this change would impact the accrued defined benefit liabilities or assets, reported annual net periodic defined benefit costs and AOCI or regulatory assets and liabilities by a similar amount in the opposite direction. The sensitivities below reflect an evaluation of the change based solely on a change in that assumption.

Actuarial assumption

Discount Rate	(0.25%)
Expected Return on Plan Assets	(0.25%)
Rate of Compensation Increase	0.25%
Health Care Cost Trend Rate (a)	1%

(a) Only impacts other postretirement benefits.

Actuarial assumption	Increase (Decrease)			
	Defined Benefit Liabilities	AOCI (pre-tax)	Regulatory Assets/Liabilities	Defined Benefit Costs

Expected return on plan assets	n/a	n/a	n/a	1
Rate of compensation increase	3	n/a	3	1
Health care cost trend rate (a)	3	n/a	3	

(a) Only impacts other postretirement benefits.

Asset Impairment (Excluding Investments)

(All Registrants except PPL Electric)

Impairment analyses are performed for long-lived assets that are subject to depreciation or amortization whenever events or changes in circumstances indicate that a long-lived asset's carrying amount may not be recoverable. For these long-lived assets classified as held and used, such events or changes in circumstances are:

- a significant decrease in the market price of an asset;
- a significant adverse change in the extent or manner in which an asset is being used or in its physical condition;
- a significant adverse change in legal factors or in the business climate;
- an accumulation of costs significantly in excess of the amount originally expected for the acquisition or construction of an asset;
- a current period operating or cash flow loss combined with a history of losses or a forecast that demonstrates continuing losses; or
- a current expectation that, more likely than not, an asset will be sold or otherwise disposed of significantly before the end of its previously estimated useful life.

For a long-lived asset classified as held and used, an impairment is recognized when the carrying amount of the asset is not recoverable and exceeds its fair value. The carrying amount is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the asset is impaired, an impairment loss is recorded to adjust the asset's carrying amount to its estimated fair value. Management must make significant judgments to estimate future cash flows, including the useful lives of the assets, the forward prices for revenue and fuel components in the markets where the assets are utilized, the amount of capital and operations and maintenance spending and management's intended use of the assets. Alternate courses of action are considered to recover the carrying amount of a long-lived asset, and estimated cash flows from the "most likely" alternative are used to assess impairment whenever one alternative is clearly the most likely outcome. If no alternative is clearly the most likely, then a probability-weighted approach is used taking into consideration estimated cash flows from the alternatives. For assets tested for impairment as of the balance sheet date, the estimates of future cash flows used in that test consider the likelihood of possible outcomes that existed at the balance sheet date, including an assessment of the likelihood of a future sale of the assets. That assessment is not revised based on events that occur after the balance sheet date. Changes in assumptions and estimates could result in materially different results than those identified and recorded in the financial statements.

(PPL and PPL Energy Supply)

In September 2012, PPL Energy Supply announced its intention, beginning in April 2015, to place the Corette coal-fired plant in Montana in long-term reserve status, suspending the plant's operation, due to expected market conditions and the costs to comply with MATS requirements. PPL Energy Supply has been monitoring the plant for potential impairment since this announcement and until the fourth quarter of 2013, no impairment was indicated as various price scenarios allowed for recovery of the asset. During the fourth quarter, in connection with the completion of its annual business planning process, management updated its fundamental view for long-term power and gas prices. Based upon this fundamental view, management has altered its expectations regarding the probability that the Corette plant will operate subsequent to initially placing it in long-term reserve status. It is now less likely that the plant will restart after operations are suspended no later than April 2015. As a result, based on an undiscounted cash flow analysis, the carrying amount for Corette was no longer recoverable. PPL Energy Supply performed an internal analysis using an income approach based on discounted cash flows to assess the fair value of the Corette asset group. Assumptions used in the fair value assessment were forward energy prices, expectations for demand for energy in Corette's market and expected operation and maintenance and capital expenditures that were consistent with assumptions used in the business planning process. Through this analysis, PPL Energy Supply determined the fair value of the asset group to be negligible. This resulted in PPL and PPL Energy Supply recording an impairment charge of \$65 million, or \$39 million after-tax for the Corette plant and related excess emission allowances.

The current depressed levels of energy and capacity prices in PJM, as well as management's forward view of these prices using its fundamental pricing models recently updated in conjunction with the annual business planning process, continue to put pressure on the recoverability of PPL Energy Supply's investment in its Pennsylvania coal-fired generation assets. In the fourth quarter of 2013, management tested the Brunner Island and Montour plants for impairment and concluded neither plant was impaired as of December 31, 2013. The recoverability test is very sensitive to forward energy and capacity price assumptions, as well as forecasted operation and maintenance and capital spending. Therefore, a further decline in forecasted long-term energy or capacity prices or changes in environmental laws requiring additional capital or operation and maintenance expenditures, could negatively impact PPL Energy Supply's operations of these facilities and potentially result in future impairment charges for some or all of the carrying value of these plants. The carrying value of the Pennsylvania coal-fired generation assets tested was \$2.7 billion as of December 31, 2013 (\$1.4 billion for Brunner Island and \$1.3 billion for Montour).

See Note 15 to the Financial Statements for additional information on MATS and other environmental requirements for coal-fired generation plants.

(All Registrants, except PPL Electric)

For a long-lived asset classified as held for sale, an impairment exists when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If the asset (disposal group) is impaired, an impairment loss is recorded to adjust the carrying amount to its fair value less cost to sell. A gain is recognized in future periods for any subsequent increase in fair value less cost to sell, but not in excess of the cumulative impairment previously recognized.

For determining fair value, quoted market prices in active markets are the best evidence. However, when market prices are unavailable, PPL, PPL Energy Supply, LKE, LG&E and KU consider all valuation techniques appropriate under the circumstances and for which market participant inputs can be obtained. Generally discounted cash flows are used to estimate fair value, which incorporates market participant inputs when available. Discounted cash flows are calculated by estimating future cash flow streams and determining the present value of the cash flow streams using risk adjusted discount rates.

Goodwill is tested for impairment at the reporting unit level. PPL has determined its reporting units to be at the same level as its reportable segments. PPL Energy Supply, LKE, LG&E and KU each operate within a single reportable segment and single reporting unit. A goodwill impairment test is performed annually or more frequently if events or changes in circumstances indicate that the carrying amount of the reporting unit may be greater than the reporting unit's fair value. Additionally, goodwill is tested for impairment after a portion of goodwill has been allocated to a business to be disposed of.

Beginning in 2012, PPL, PPL Energy Supply, LKE, LG&E and KU may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a two-step quantitative test. If the qualitative evaluation (referred to as "step zero") is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step quantitative impairment test is not necessary.

When the two-step quantitative impairment test is elected or required as a result of the step zero assessment, in step one, PPL, PPL Energy Supply, LKE, LG&E and KU determine whether a potential impairment exists by comparing the estimated fair value of a reporting unit with its carrying amount, including goodwill, on the measurement date. If the estimated fair value exceeds its carrying amount, goodwill is not considered impaired. If the carrying amount exceeds the estimated fair value, the second step is performed to measure the amount of impairment loss, if any.

The second step of the quantitative test requires a calculation of the implied fair value of goodwill, which is determined in the same manner as the amount of goodwill in a business combination. That is, the estimated fair value of a reporting unit is allocated to all of the assets and liabilities of that reporting unit as if the reporting unit had been acquired in a business combination and the estimated fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the estimated fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. The implied fair value of the reporting unit's goodwill is then compared with the carrying amount of that goodwill. If the carrying amount exceeds the implied fair value, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of the reporting unit's goodwill.

PPL (for its U.K. Regulated and Kentucky Regulated segments), and individually, LKE, LG&E and KU elected to perform the qualitative step zero evaluation of goodwill in the fourth quarter of 2013. These evaluations considered the excess of fair value over the carrying value of each reporting unit that was calculated during step one of the quantitative impairment tests performed in the fourth quarter of 2012, and the relevant events and circumstances that occurred since those tests were performed including:

- current year financial performance versus the prior year,
- changes in planned capital expenditures,
- the consistency of forecasted free cash flows,
- earnings quality and sustainability,
- changes in market participant discount rates,
- changes in long-term growth rates,
- changes in PPL's market capitalization, and
- the overall economic and regulatory environments in which these regulated entities operate.

Based on the overall favorable results of these evaluations, management did not conclude it was more likely than not that the fair value of these reporting units were less than their carrying values. As such, the two-step quantitative impairment test was not performed.

PPL (for its Supply segment) and PPL Energy Supply elected to bypass step zero as depressed wholesale market prices for electricity and natural gas have negatively impacted the fair value of these reporting units. Therefore, the goodwill for these reporting units was tested for impairment using the quantitative test in the fourth quarter of 2013, and no impairment was recognized. Management used both discounted cash flows and market multiples, which required significant assumptions, to estimate the fair value of the reporting units. A decrease in the forecasted cash flows of 10%, an increase in the discount rate by 0.25%, or a 10% decrease in the market multiples would not have resulted in an impairment of goodwill for these reporting units.

Loss Accruals *(All Registrants)*

Losses are accrued for the estimated impacts of various conditions, situations or circumstances involving uncertain or contingent future outcomes. For loss contingencies, the loss must be accrued if (1) information is available that indicates it is probable that a loss has been incurred, given the likelihood of the uncertain future events, and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." The accrual of contingencies that might result in gains is not recorded unless recovery is assured. Potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events are continuously assessed.

The accounting aspects of estimated loss accruals include (1) the initial identification and recording of the loss, (2) the determination of triggering events for reducing a recorded loss accrual, and (3) the ongoing assessment as to whether a recorded loss accrual is sufficient. All three of these aspects require significant judgment by management. Internal expertise and outside experts (such as lawyers and engineers) are consulted, as necessary, to help estimate the probability that a loss has been incurred and the amount (or range) of the loss.

For PPL, see Note 6 to the Financial Statements for a discussion of the Ofgem Review of Line Loss Calculation, including the increases of \$45 million to this liability recorded in 2013 by WPD.

Certain other events have been identified that could give rise to a loss, but that do not meet the conditions for accrual. Such events are disclosed, but not recorded, when it is "reasonably possible" that a loss has been incurred. Accounting guidance defines "reasonably possible" as cases in which "the future event or events occurring is more than remote, but less than likely to occur."

When an estimated loss is accrued, the triggering events for subsequently adjusting the loss accrual are identified, where applicable. The triggering events generally occur when new information becomes known, the contingency has been resolved and the actual loss is settled or written off, or when the risk of loss has diminished or been eliminated. The following are some of the triggering events that provide for the adjustment of certain recorded loss accruals:

- Allowances for uncollectible accounts are reduced when accounts are written off after prescribed collection procedures have been exhausted, a better estimate of the allowance is determined or underlying amounts are ultimately collected.
- Environmental and other litigation contingencies are reduced when the contingency is resolved and actual payments are made, a better estimate of the loss is determined or the loss is no longer considered probable.
- Actions or decisions by certain regulators could result in a better estimate of a previously recorded loss accrual.

Loss accruals are reviewed on a regular basis to assure that the recorded potential loss exposures are appropriate. This involves ongoing communication and analyses with internal and external legal counsel, engineers, business unit management and other parties.

See Notes 6 and 15 to the Financial Statements for disclosure of loss contingencies accrued and other potential loss contingencies that have not met the criteria for accrual.

Asset Retirement Obligations

(All Registrants, except PPL Electric)

ARO liabilities are required to be recognized for legal obligations associated with the retirement of long-lived assets. The initial obligation is measured at its estimated fair value. An ARO must be recognized when incurred if the fair value of the ARO can be reasonably estimated. An equivalent amount is recorded as an increase in the value of the capitalized asset and amortized to expense over the useful life of the asset. Until the obligation is settled, the liability is increased, through the recognition of accretion expense in the statement of income, for changes in the obligation due to the passage of time.

(PPL, LKE, LG&E and KU)

In the case of LG&E and KU, because costs of removal are collected in rates, the depreciation and accretion expenses related to an ARO are recorded as a regulatory asset, such that there is no earnings impact.

(All Registrants, except PPL Electric)

See Note 21 to the Financial Statements for additional information on AROs.

In determining AROs, management must make significant judgments and estimates to calculate fair value. Fair value is developed using an expected present value technique based on assumptions of market participants that considers estimated retirement costs in current period dollars that are inflated to the anticipated retirement date and then discounted back to the date the ARO was incurred. Changes in assumptions and estimates included within the calculations of the fair value of AROs could result in significantly different results than those identified and recorded in the financial statements. Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset.

At December 31, 2013, the total recorded balances and information on the most significant recorded AROs were as follows.

	Total ARO Recorded	Most Significant AROs		
		Amount Recorded	% of Total	Description
				Nuclear decommissioning, ash ponds, landfills and natural gas mains
PPL	\$ 705	\$ 533	76	
PPL Energy Supply	404	342	85	Nuclear decommissioning
LKE	252	191	76	Ash ponds, landfills and natural gas mains
LG&E	74	46	62	Ash ponds, landfills and natural gas mains
KU	178	145	81	Ash ponds and landfills

The most significant assumptions surrounding AROs are the forecasted retirement costs (including the settlement dates and the timing of cash flows), the discount rates and the inflation rates. At December 31, 2013, a 10% change to retirement cost, a 0.25% decrease in the discount rate or a 0.25% increase in the inflation rate would not have a significant impact on the ARO liabilities of the Registrants. For PPL and PPL Energy Supply, there would be no significant change to the annual depreciation expense of the ARO asset or the annual accretion expense of the ARO liability as a result of these changes in assumptions. As noted above, these factors do not impact the Statements of Income of LKE, LG&E and KU.

Income Taxes (All Registrants)

Significant management judgment is required in developing the provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and valuation allowances on deferred tax assets.

Significant management judgment is required to determine the amount of benefit recognized related to an uncertain tax position. Tax positions are evaluated following a two-step process. The first step requires an entity to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires an entity to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. Management considers a number of factors in assessing the benefit to be recognized, including negotiation of a settlement.

On a quarterly basis, uncertain tax positions are reassessed by considering information known as of the reporting date. Based on management's assessment of new information, a tax benefit may subsequently be recognized for a previously unrecognized tax position, a previously recognized tax position may be derecognized, or the benefit of a previously recognized tax position may be remeasured. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements in the future.

At December 31, 2013, it was reasonably possible that during the next 12 months the total amount of unrecognized tax benefits could increase or decrease by as much as the following.

	Increase	Decrease
PPL		\$ 22
PPL Energy Supply		15

These changes could result from subsequent recognition, derecognition and/or changes in the measurement of uncertain tax positions related to the timing and utilization of tax credits and the related impact on alternative minimum tax and other credits, the timing and/or valuation of certain deductions, intercompany transactions and unitary filing groups. The events that could cause these changes are direct settlements with taxing authorities, litigation, legal or administrative guidance by relevant taxing authorities and the lapse of an applicable statute of limitation. In addition, for PPL, this change could also relate to the creditability of foreign taxes and the timing and utilization of foreign tax credits. For PPL Electric, LKE, LG&E and KU, no significant changes in unrecognized tax benefits are projected over the next 12 months.

The balance sheet classification of unrecognized tax benefits and the need for valuation allowances to reduce deferred tax assets also require significant management judgment. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. Valuation allowances are initially recorded and reevaluated each reporting period by assessing the likelihood of the ultimate realization of a deferred tax asset. Management considers a number of factors in assessing the realization of a deferred tax asset, including the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies. Any tax planning strategy utilized in this assessment must meet the recognition and measurement criteria utilized to account for an uncertain tax position. Management also considers the uncertainty posed by political risk and the effect of this uncertainty on the various factors that management takes into account in evaluating the need for valuation allowances. The amount of deferred tax assets ultimately realized may differ materially from the estimates utilized in the computation of valuation allowances and may materially impact the financial statements in the future.

See Note 5 to the Financial Statements for income tax disclosures.

Regulatory Assets and Liabilities

(PPL)

WPD operates in an incentive-based regulatory structure under distribution licenses granted by Ofgem. WPD's electricity distribution revenues are set every five years (changing to every eight years beginning on April 1, 2015) through price controls that are not directly based on cost recovery. Therefore, WPD is not subject to accounting for the effects of certain types of regulation as prescribed by GAAP and does not record regulatory assets and liabilities.

(All Registrants except PPL Energy Supply)

PPL Electric, LG&E and KU, are subject to cost-based rate regulation. As a result, the effects of regulatory actions are required to be reflected in the financial statements. Assets and liabilities are recorded that result from the regulated ratemaking process that may not be recorded under GAAP for non-regulated entities. Regulatory assets generally represent incurred costs that have been deferred because such costs are probable of future recovery in regulated customer rates. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose.

Management continually assesses whether the regulatory assets are probable of future recovery by considering factors such as changes in the applicable regulatory and political environments, the ability to recover costs through regulated rates, recent rate orders to other regulated entities, and the status of any pending or potential deregulation legislation. Based on this continual assessment, management believes the existing regulatory assets are probable of recovery. This assessment reflects the current political and regulatory climate at the state and federal levels, and is subject to change in the future. If future recovery of costs ceases to be probable, the regulatory asset would be written-off. Additionally, the regulatory agencies can provide flexibility in the manner and timing of recovery of regulatory assets.

At December 31, 2013, regulatory assets and regulatory liabilities were recorded as reflected in the table below. All regulatory assets are either currently being recovered under specific rate orders, represent amounts that are expected to be recovered in future rates or benefit future periods based upon established regulatory practices.

	PPL	PPL Electric	LKE	LG&E	KU
Regulatory assets	\$ 1,279	\$ 778	\$ 501	\$ 320	\$ 181
Regulatory liabilities	1,138	91	1,047	491	556

See Note 6 to the Financial Statements for additional information on regulatory assets and liabilities.

Revenue Recognition - Unbilled Revenue (*PPL Electric, LKE, LG&E and KU*)

Revenues related to the sale of energy are recorded when service is rendered or when energy is delivered to customers. Because customers are billed on cycles which vary based on the timing of the actual meter reads taken throughout the month, estimates are recorded for unbilled revenues at the end of each reporting period. Such unbilled revenue amounts reflect estimates of the deliveries to customers since the date of the last reading of their meters. The unbilled revenue estimates reflect consideration of factors including daily load models, estimated usage for each customer class, the effect of current and different rate schedules, the meter read schedule, the billing schedule, actual weather data and where applicable, the impact of weather normalization or other regulatory provisions of rate structures. At December 31, unbilled revenues recorded on the Balance Sheets were as follows.

	<u>2013</u>	<u>2012</u>
PPL Electric	\$ 116	\$ 110
LKE	180	156
LG&E	85	72
KU	95	84

Other Information (*All Registrants*)

PPL's Audit Committee has approved the independent auditor to provide audit and audit-related services, tax services and other services permitted by Sarbanes-Oxley and SEC rules. The audit and audit-related services include services in connection with statutory and regulatory filings, reviews of offering documents and registration statements, and internal control reviews.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Reference is made to "Risk Management" for the Registrants in "Item 7. Combined Management's Discussion and Analysis of Financial Condition and Results of Operations."

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareowners of PPL Corporation

We have audited the accompanying consolidated balance sheets of PPL Corporation and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of PPL Corporation and subsidiaries at December 31, 2013 and 2012, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), PPL Corporation and subsidiaries' internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 24, 2014, expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Philadelphia, Pennsylvania
February 24, 2014

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareowners of PPL Corporation

We have audited PPL Corporation and subsidiaries' internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). PPL Corporation and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in Management's Report on Internal Control over Financial Reporting at Item 9A. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, PPL Corporation and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of PPL Corporation and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2013, and our report dated February 24, 2014, expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Managers and Sole Member of PPL Energy Supply, LLC

We have audited the accompanying consolidated balance sheets of PPL Energy Supply, LLC and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of PPL Energy Supply, LLC and subsidiaries at December 31, 2013 and 2012, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles.
