

**COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION**

In the Matter of:

APPLICATION OF LOUISVILLE GAS AND ELECTRIC)	CASE NO.
COMPANY FOR AN ADJUSTMENT OF ITS)	2014-00372
ELECTRIC AND GAS RATES)	

**MOTION OF METROPOLITAN HOUSING COALITION
FOR FULL INTERVENTION**

Comes the Metropolitan Housing Coalition (MHC), by and through counsel, on behalf of members who are directly affected and may be adversely affected by this matter, and respectfully moves to intervene into the above-captioned proceeding as a full party. Pursuant to 807 Kentucky Administrative Regulation ("KAR") 5:001 Section 4(11), MHC respectfully requests that it be accorded the rights and privileges of a full intervenor in these proceedings, and in support thereof, states as follows:

1. Intervention in formal proceedings before the Kentucky Public Service Commission ("Commission") is governed by 807 KAR 5:001 Section 4(11), which provides in relevant part that:

A person who wishes to become a party to a case before the Commission may, by timely motion, request leave to intervene. [] The motion shall include the movant's name and address and shall state his or her interest in the case and how intervention is likely to present issues or develop facts that will assist the commission in fully considering the matter without unduly complicating or disrupting the proceedings.

807 KAR 5:001 Section 4(11).

2. MHC is a nonprofit, nonpartisan membership organization incorporated under the laws of the Commonwealth of Kentucky in 1989 and comprised of over 190 individual members and 200 member organizations. MHC members include representatives of low-income households, private and non-profit housing developers, service providers, financial institutions, labor unions, faith-based and neighborhood groups, as well as other advocacy groups, advocating in a united voice for fair, safe, and affordable housing in the Metro Louisville area. For over two decades, the MHC has utilized the public and private resources of the Metro Louisville community to provide equitable, accessible housing choices for all persons through advocacy, public education, and through support for affordable housing providers.

3. In accordance with the Order entered on December 12, 2014, MHC will accept and abide by the existing procedural schedule, including the filing of any Intervenor testimony and response to any data requests from any party, and thus there is no prejudice to the applicant or other parties from the grant of full intervenor status to MHC at this time.

4. The grant of intervention to a person pursuant to 807 KAR 5:001 Section 4(11) is within the sound discretion of the Commission. The request for intervention is within the time period in the Appendix to the December 12, 2014 Order, being filed on December 29, 2014.

5. As part of its mission, MHC has focused on electric and gas utility costs as part of fair and affordable housing for many years. The MHC 2008 *State of Metropolitan Housing Report* focused on utility costs and affordable housing, as did the follow-up MHC 2013 report on *How to Lower Utility Costs*. Utility costs are a significant component of affordable shelter and on these issues MHC has done research, effectively advocated for policy changes, represented non-profit affordable housing developers, and worked with local and statewide organizations. MHC's Director, Cathy Hinko, was an original board member of the Affordable Energy Corporation and continues to serve on that board. MHC brings a perspective on the impact of rate adjustments for electric and gas service and the particular and disproportionate impacts that such rate increases have on access to affordable housing for fixed- and low-income individuals and families, and has been an active member of the LG&E Customer Care Advisory Group since the program's inception. MHC is also on the Community Winter Help Board.

6. MHC has a \$1.3 million dollar loan pool for non-profit developers to create affordable housing, whether rental or owner-occupied, new or rehabilitated. MHC mandates energy efficiency measures and encourages alternative energy provision. A non-profit developer that has used solar power in multi-family housing construction has expressed

concern about the increased disincentive to use solar power due to the proposed rate structure changes.

7. MHC is particularly concerned with the structure of the proposed rate increases, since by increasing the flat monthly service charge, the rate increases fall heaviest on the poor and elderly utility customers, for whom utility costs are already disproportionately higher than the average LG&E customer. The impact of increased electric and gas rates on the provision of affordable housing is to raise the utility costs for ratepayers that can least afford such increases.

8. MHC's interest in this matter relates to the potential effects of the modification of the rate structure and increases in flat and volumetric costs on the affordability of housing for those on fixed and low-incomes.

9. MHC's interest is different than the general public interest, and this Commission has, in Case No. 2011-00134 and 2014-00003 recognized that MHC's intervention is "likely to present issues and develop facts that will assist the Commission in fully considering the matter without unduly complicating or disrupting the proceedings."

10. Existing parties to the proceeding do not adequately represent the interests of MHC and its members. While there is some overlapping of the population represented by low-income utility ratepayer advocates and service providers and the MHC, no current party represents the

specific perspective and interests of those needing **and** those providing affordable housing.

11. 907 KAR 5:001 Section 4(11)(b) provides that the Commission shall grant full intervention status if the person “has special interests in the case that is not otherwise adequately represented” or “that his or her intervention is likely to present issues or to develop facts that assist the commission in fully considering the matter without unduly complicating or disrupting the proceedings.” The special interests of MHC and its members in the nexus between utility costs and safe and affordable housing are squarely within the ambit of the Commission's jurisdiction and this proceeding and are not adequately represented, as discussed above.

12. Alternatively, full intervention should be granted since the participation of MHC would assist the Commission in fully considering the matter without unduly complicating or disrupting the proceeding. The participation of MHC will hopefully assist the Commissioners in determining whether the amount and structure of the requested rate increase are fair, just, and reasonable, and on what terms the current rates and rate structure should be modified.

WHEREFORE, for the reasons stated above and in the interests of assuring that those constituencies most directly affected by the electric and gas utility policies, programs, rates and service in the Louisville area

are heard during this deliberative process, because the special interests of MHC and its member ratepayers are not adequately represented by existing parties or parties that have filed for intervenor status, and in order to provide information that will assist the Commission in fully considering the matter, Movant MHC requests, on behalf of its member ratepayers, that it be accorded the status of full Intervenor, and that each party to the case be directed to serve upon MHC and the undersigned counsel, all future pleadings and documents that are filed in this case.

Respectfully submitted,

Tom FitzGerald
