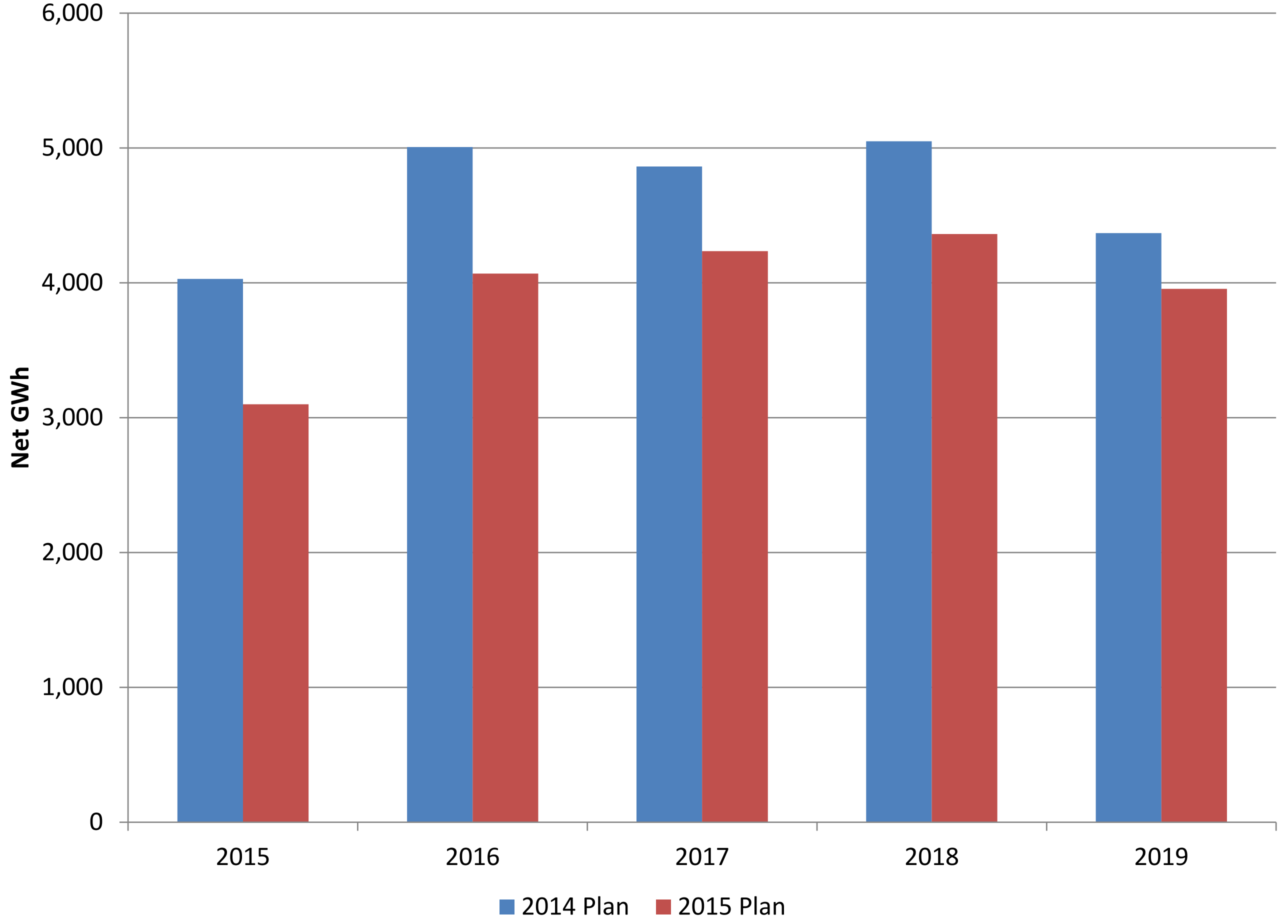
Generation shifts from Cane Run 7 to coal units due to lower coal variable O&M, additional maintenance weeks for Cane Run 7, and the Green River 3-4 extension



2014: 6 + 6

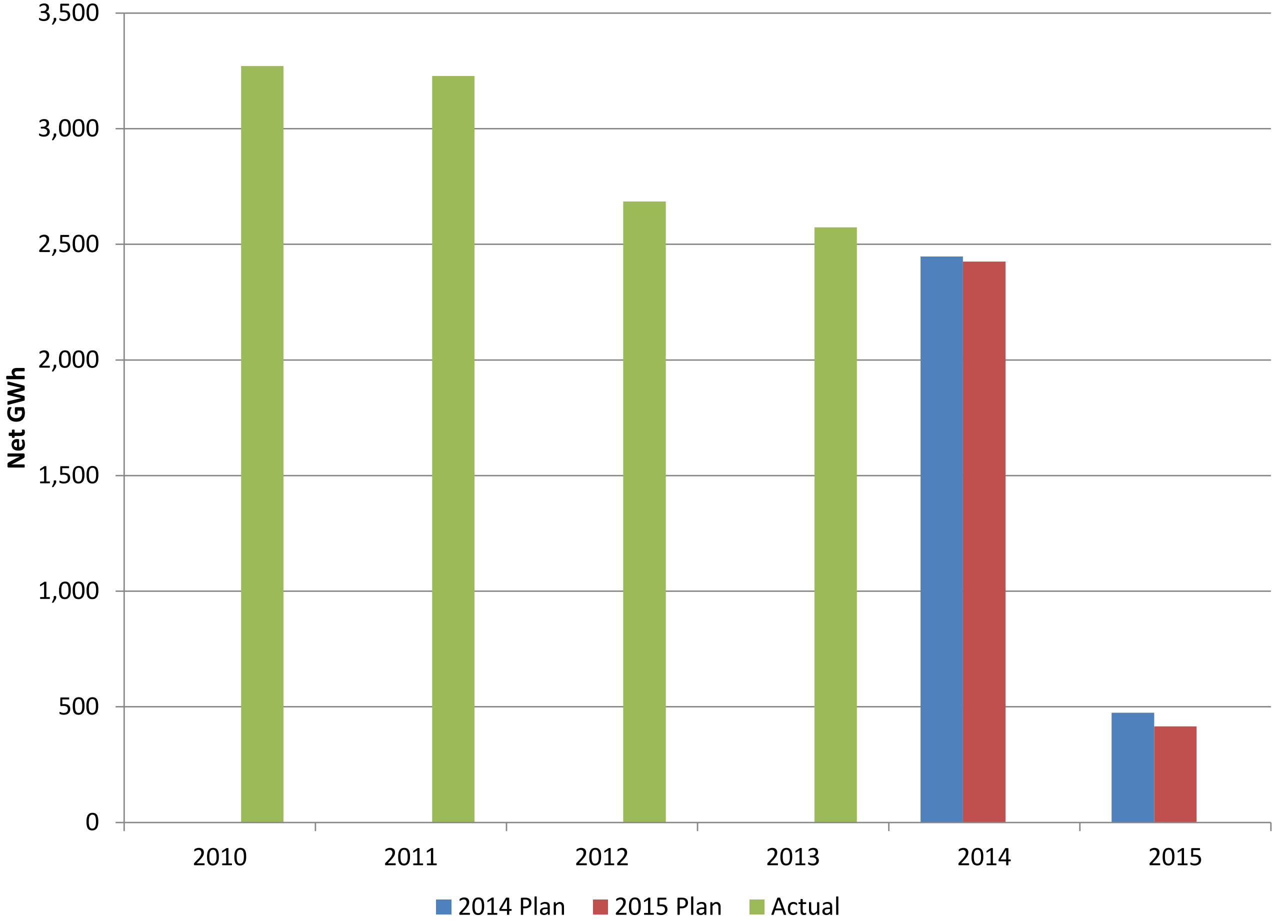
In the 2015 Plan, generation shifts from Cane Run 7 to coal

Cane Run 7 Capacity Factor Changes (%)

	2015	2016
2014 Plan	**88**	**86**
Key Changes:		
SCR Operation	-6	-3
Coal Variable O&M	-4	-3
Cane Run 7 Heat Rate	-4	-4
Electricity and Gas Prices	-3	7
Coal Prices	-1	-9
Planned Maintenance	-3	-3
Green River Extension	-3	-1
2015 Plan	**63**	**71**

LG&E KU
PPL companies

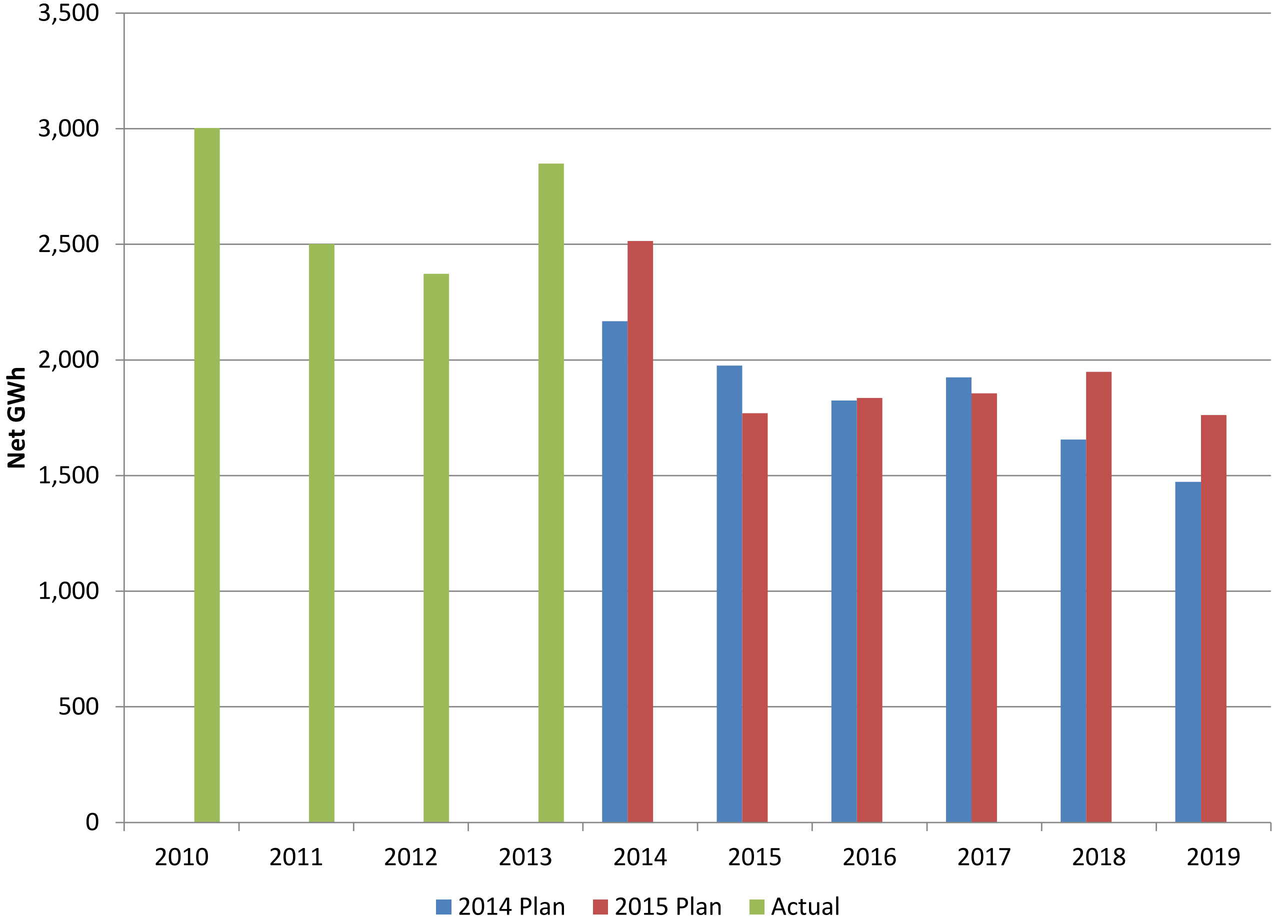
Cane Run coal generation is mostly unchanged



2013: 7 + 5

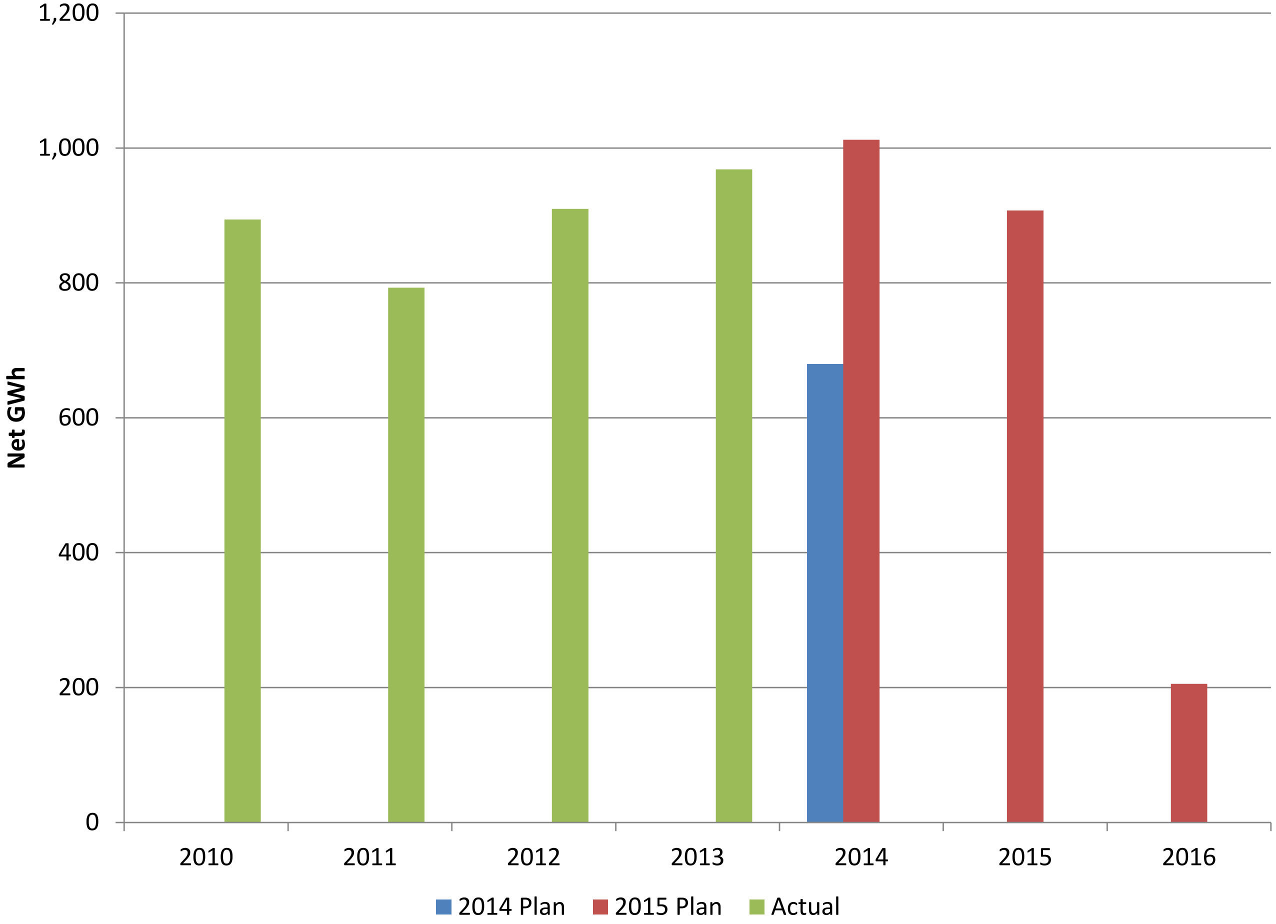
LG&E KU
PPL companies

Brown coal generation increases beyond 2017 due to the deferral of Green River 5



2013: 6 + 6

Green River generation increases in 2015 Plan due to its extended operation



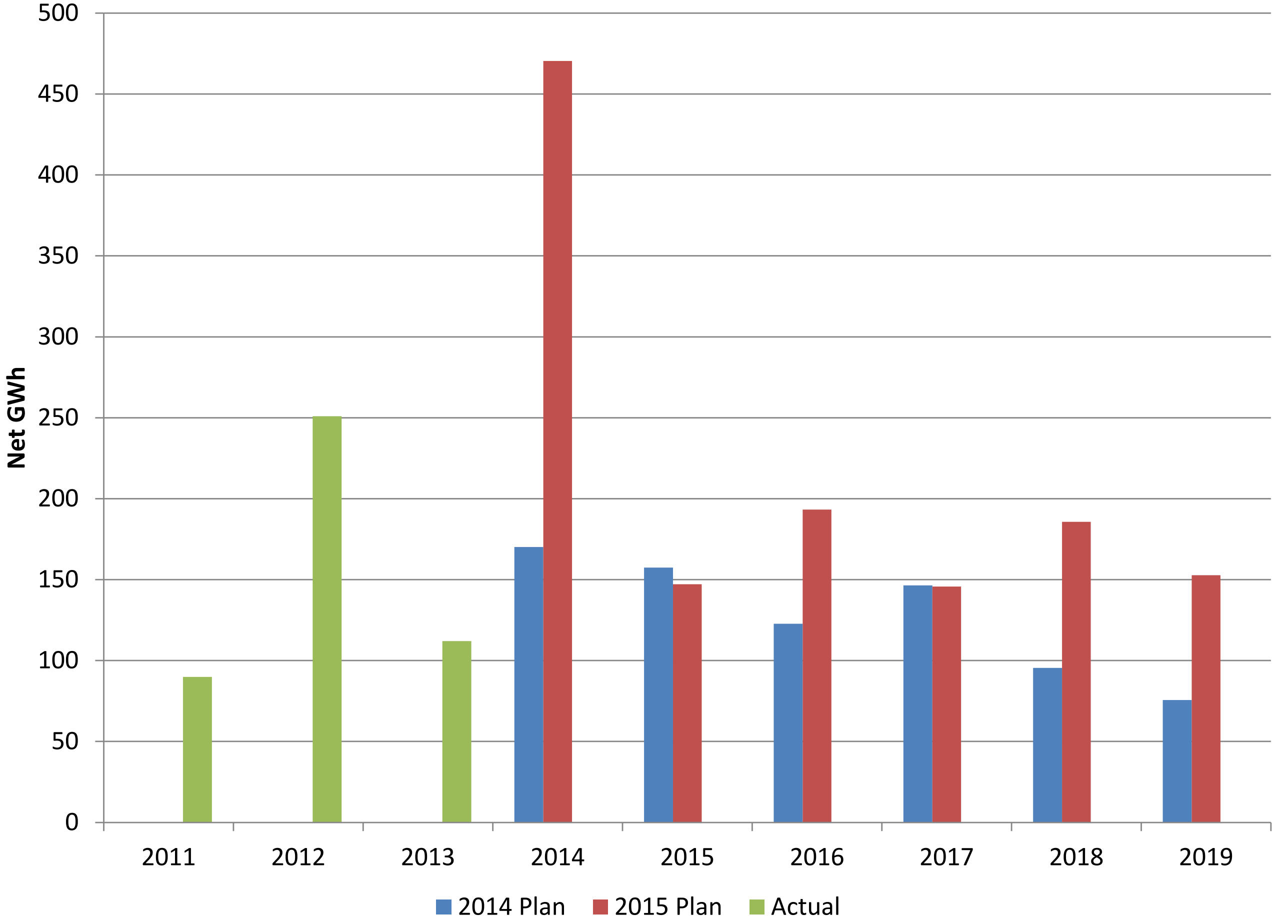
2014: 6 + 6

Trimble CT generation increases beyond 2017 due to the deferral of Green River 5

2014: 6 + 6

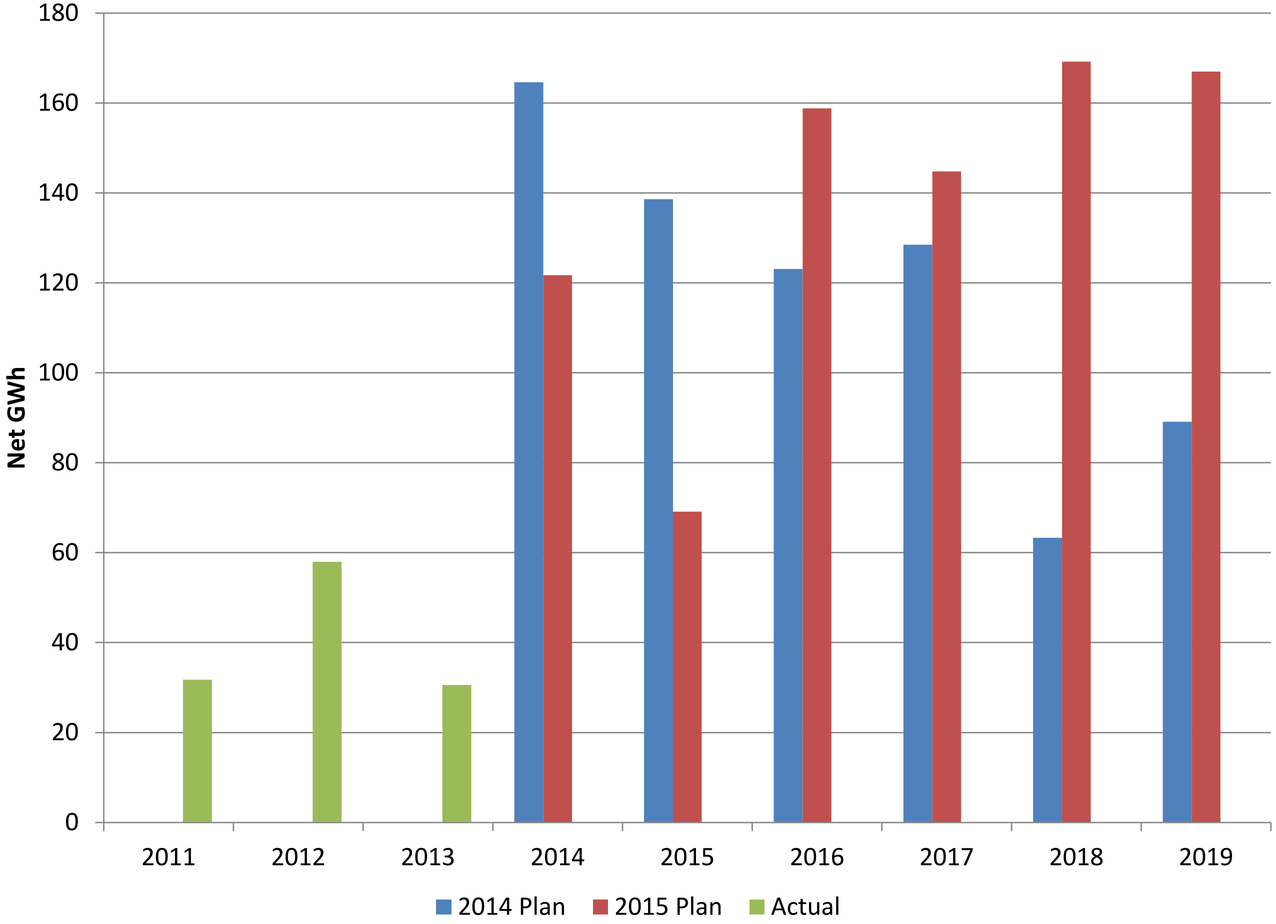
LG&E KU
PPL companies

Brown CT generation increases beyond 2015 due primarily to lower gas prices and the deferral of Green River 5



2014: 6 + 6

2015 Plan assumes Paddy's Run units available year-round beginning 1/1/2016 (pending completion of gas pipeline project)



2014: 6 + 6

PPL companies

Variable O&M costs drive generation differences between 2014 and 2015 Plans

Notes:
Values shown represent summer heat rates at maximum load.
Baghouse derate projections for Ghent units decreased from 6, 9, 6, and 6 MW to 2, 2, 4, and 4 MW respectively. These changes led to an improved heat rate for all Ghent units (roughly 0.2% per MW).

2015 Business Plan

September 17, 2014

Table of Contents

LG&E KU
PPL companies

Major Assumptions

- *Pension based on actuarial calculations and assumptions:*
  - *Increases from previous plan driven by change from BB mortality scale to RP-2014/MP-2014 mortality scale, change in the discount rate and the change in LGE bargaining plan multipliers ($13M impact included $3M increase to capital and $10M increase in O&M)*
  - *Increases above partially offset by demographic gains, change in asset returns and favorable impact of 2014 higher funding level*
- *Medical expense adjusted for headcount and 2014 actuals with increases of 6% annually for 2015-2019*
  - *Premium costs increase effectively managed to only 4% increase*
  - *Additional funding included for employee wellness and health programs to continue and expand the promotion of healthy lifestyle maintenance*
- *Property insurance increases driven by Capital investments and growth of assets in plan years; insurance expense growth is lower than previously budgeted*

Major Assumptions

- *Assumed amortization of regulatory assets will continue through plan periods based on KPSC orders*
- *Assumed a 2% annual increase on the minimum base rent and a 2.5% annual increase for operating expense (per contract) for the LGE Center Lease*
- *Allocation of indirect PPL expenses based on most current amounts provided that may be revised as further planning processes continue*
- *Incentive expenses currently based on most recent calculations provided this year*

Energy Supply and Analysis

2015 Business Plan

September 17, 2014

Table of Contents

Plan Highlights

Key Objectives

- Optimize the utilization of existing assets to provide reliable, low cost energy.
- Procure coal and gas necessary to cost-effectively operate generating plants.
- Provide high quality analysis to enhance decision-making.
- Implement processes required to meet reliability standards.
- Improve analysis capability and knowledge related to retail customer energy usage to support energy efficiency and resource planning efforts.

LG&E KU
PPL companies

Major Assumptions

- Analysis needed to support major company initiatives (KPSC filings) and strategic planning can be met by existing staff levels.
- Potential for Municipal rate case litigation and proposed CO_2 regulations will require significant support in 2015.
- Retirement risk in Fuels department is growing over the planning period so a new position is temporarily planned for that area in early-2015 to allow adequate time for training and development.
- Integrating CR7 into normal fleet dispatch will be accomplished with no major issues.

Plan Risks

- OSS margin impacts of native load variation due to weather, unit availability, and transmission system capacity
- Approval of Green River extension to April 16, 2016
- Trimble County 2 performance post burner replacement
- Cane Run 7 testing, commissioning date, and performance
- Coal unit performance in 2015 post installation of environmental retrofits

[redacted]

- Summer 2016 availability of Mill Creek 3 following baghouse/FGD installation
- Transition of system to fewer, larger units
- Workforce transition due to retirements

CFO Organization

2015 Business Plan

September 17, 2014

Table of Contents

Plan Highlights

- CFO budget is primarily labor costs (~71% of total annual budget).
  - *Employee Opinion Survey suggests resources are sufficient.*
  - *No headcount increases in Plan.*
  - *Reduction of 2 in 2017 for Operations Forecast & Budgeting as construction moderates.*
- Audit, bank and insurance fees comprise approximately 22% of total annual costs.
  - *Cost estimates based on contractual rates and projected activity.*
- The remaining O&M budget is approximately $1.3 Million.
- Capital to support planned upgrades for CFO systems is budgeted as part of the Information Technology centralized five year plan.

Major Assumptions

- Workforce maintained at 142 full-time, 2 part-time, and 11 interns.
- Labor escalations for plan years based on market guidance of 3% per year.
- Non-labor costs based on contractual or expected increases or escalated at 2% increase per year.

PPL companies

PPL companies

Plan Risks

- Integration of primary system changes within planning window and their impact on existing processes (PeopleSoft Time and Labor, PowerPlant, Oracle, etc.).
- Maintaining flat staffing levels allow for limited resources available for special projects (i.e. new initiatives, future rate cases).
- Planned employee retirements in next few years place greater emphasis on knowledge transfer and effective timing of staffing changes.

PPL companies

Chief Administrative Officer

2015 Business Plan

September 17, 2014

Table of Contents

PPL companies

Plan Highlights

- The 2015 Chief Administrative Officer O&M budget submitted for the 2015 Business Plan is $107.2 million. The current business plan for 2015 is flat to the Business Plan expectation due to overall CAO budget cuts.
  - *Headcount remained flat to forecast through 2017 and growth was reduced in other areas to meet expectation.*

- The 2015 CAO Capital budget is $39.3 million and is $6.8 million lower than the adjusted 2014 Business Plan. The decrease is due primarily to the CCS upgrade.

PPL companies

Major Assumptions

Information Technology

- Major Initiatives
  - *Roughly one third of the 5 year capital plan (approximately $70M) represents 10 business initiatives (including $23M for CCS and $14M for GIS).*
  - *A significant number of IT resources are tied to these capital projects. Approximately 47 employees at risk to capital which is consistent with the current trend.*
- Safety & Regulatory
  - *Increased regulatory scrutiny at FERC, NERC and SERC as it relates to Critical Infrastructure Protection (CIP) and cyber security will drive the need for increased spending for both labor and information technology solutions to meet compliance requirements. Resource requirements for impact of CIP version 5 are still being assessed and are not included in the plan.*

PPL companies

Major Assumptions

Information Technology

- Business Reliance on Technology
  - *Business reliance on information technology services to conduct day to day operations continues to expand. Due to increased regulatory requirements, more business processes are moving towards automation.*
  - *This trend means that the reliability and availability of information technology services is critically important to the business. There is little tolerance for almost any kind of system outage.*
  - *Increased reliance on technology is leading to increased storage, maintenance and support costs which are reflected in the plan.*

Major Assumptions

Information Technology

- Cyber Security Threats
  - *IT Security threats and data protection issues continue to increase. These threats are becoming even more sophisticated and difficult to overcome. Continued investment in protective and preventive measures to reduce these threats are required and included in the plan.*

- Customer Experience
  - *As our primary interface with our customers, the CCS system will require additional upgrades and enhancements to continue to meet customer and business expectations. This will include release upgrades to the SAP applications and hardware refresh and expansion.*
  - *Continued efforts to support the customer experience initiative with related capital projects such as call center technology improvements, bill presentation and customer communication preferences.*
  - *Rate Case submissions will continue to occur on a regular basis requiring updates to the CCS system and customer billing.*

PPL companies

Major Assumptions

Information Technology

- Advances in New Technologies
  - *Technology continues to advance at an ever increasing pace. New technologies first introduced in the consumer space are making their way into the enterprise. This includes everything from smart phones to tablet PCs (iPads) to social media.*
  - *Leveraging these new technologies will be a major differentiator for productivity and customer satisfaction.*
  - *The current plans include the deployment of many of these new technologies such as Mobility, Virtual Desktop technology, Unified Communications and Collaboration tools, Business Intelligence and others.*
  - *Plans include working closely with the business to determine which of these technologies can deliver the greatest benefit.*

Major Assumptions

General Counsel

- Legal
  - *The Outside Counsel budget is consistent with current forecast levels.*
  - *Hourly rates of outside providers will not materially increase.*
  - *No significant unexpected developments in pending regulatory or litigation matters and no new material regulatory or litigation claims are assumed in plan.*
  - *Environmental and regulatory litigation will continue to put pressure on budget.*
- Corporate Communications
  - *Maintaining positive brand image in light of increased activities by national and local environmental activists will require additional education and communication measures with key stakeholders.*
  - *Increased Energy Education efforts will require support through targeted communications, advertising and increased sponsorship activation.*
  - *The large number of construction projects and rate pressures will continue to require increased communications.*

PPL companies

Major Assumptions

General Counsel

- Corporate Responsibility
  - *Nonprofit organizations will continue to experience financial challenges.*
  - *Elected officials and general public expectations of corporate community involvement will increase.*
  - *Several key fundraising initiatives are on the horizon:*
    - *K-12 and higher education initiatives*
    - *Public parks and green space initiatives*
    - *Performing arts fundraising initiatives*
  - *Rate case filing and aftermath will require community visibility, enhancement of current community partnerships and development of new partnerships.*
  - *Criticism and scrutiny from environmental groups will require strategic community relations plans.*
  - *Focused community relations strategy needed to address anticipated customer concerns regarding new Louisville Metro franchise agreement implementation.*
  - *Innovative strategies will be needed to address the level of low income customer dissatisfaction.*

Major Assumptions

General Counsel

- Compliance
  - *No material change in current role.*
  - *No new significant enforcement issues.*
  - *Increased emphasis on cyber security.*
  - *Implementation of CIP version 5.*
  - *NERC Reliability Assurance Initiative is still being finalized and could impact resources.*

Major Assumptions

General Counsel

- External Affairs
  - *Increased legislative and regulatory activity by local, state and federal governmental entities affecting the company's activities in the operational, regulatory and environmental areas.*
  - *Pressure by local, state and federal governmental entities upon the company to use its monopolistic status to increase governmental revenues.*
  - *Public comparison of:*
    - Levels of engagement and contributions with and to advocacy groups
    - PPL and LG&E/KU legislative and regulatory positions on various issues

Major Assumptions

General Counsel

- Federal Regulation & Policy
  - *Uncertain implementation path of Order 1000 regional/interregional transmission planning and cost allocation rules.*
  - *Uncertain policy direction arising from the transient nature of the FERC chair over the next several months, the increasing lack of consensus among commissioners and the appointment of a new commissioner.*
  - *Increased pressure on the company to disclose more information regarding how rates are calculated.*
  - *Increased pressure to impose an RTO type model on transmission services.*
  - *Heightened enforcement focus upon the ascendancy to the chair of the new chairman in 2015.*

PPL companies

Major Assumptions

General Counsel

- State Regulation & Rates
  - *Filing of two base rate cases for LG&E and KU in Kentucky.*
  - *Filing of three base rate cases for KU in Virginia.*
  - *Revise the formula rates for FERC wholesale municipal and OATT customers.*
  - *One or more CPCN proceedings for generation facilities.*
  - *Filing of new and enhanced DSM/EE programs.*
  - *Filing of new ECR plans to comply with air regulations.*
  - *Filing of Integrated Resource Plan.*

LG&E® KU®
PPL companies

Major Assumptions

General Counsel

- Environmental
  - *Coal combustion residuals regulations will likely require closure of all generating station ash ponds.*
  - *Permitting activity will increase significantly and more time required to obtain environmental permits.*
  - *Most all environmental permits associated with coal will be challenged by environmental groups.*
  - *New Ozone NAAQS expected for proposal this year will likely result in significant portion of KY becoming non-attainment.*
  - *Greenhouse Gas regulations for existing units will likely require additional gas-fired generation and less coal.*

LG&E KU
PPL companies

Major Assumptions

Human Resources

- Current and potential Federal legislative initiatives could significantly affect the existing landscape and costs associated with virtually every aspect of the workforce (benefits, compensation, union relations, safety, etc.).
- Wellness must continue to evolve as a means of containing healthcare costs.
- The pace and complexity of regulatory compliance will continue to escalate.
- Competition for talent will require more non-traditional sourcing.
- Capital spend within the plan is based on the need to automate certain HR systems.
- Retirement-based attrition will continue to put demands on staffing and development.
- We must continue to find balance between the regular workforce and contractors on certain key functions.

Major Assumptions

Supply Chain

- Detailed long range procurement plans are in place.
- Proactive engagement with the PPL Supply Chain is planned in the T&D and Corporate areas, but the nature and magnitude of the engagement is unknown at this point due to the change in leadership and go-forward leadership philosophy.
- Known retirements occurring in early 2016 will be filled by a combination of current internal resources and internal hiring.
- Several initiatives have been identified and/or being implemented that will result in efficiency improvements to the way paper invoices are being received and processed through AP.
- Active engagement with the UK and UL Schools of Business will continue.

PPL companies

Plan Risks

Information Technology

- Resource requirements for impact of CIP version 5 are still being assessed and not included in the plan.
- Available resources have been allocated to required or high risk capital projects. A significant number of projects identified through strategic planning were unfunded.
- Acquiring skilled IT resources will continue to be a challenge for us and the rest of the industry.
- Approximately 47 employees at risk to capital labor; $6.8m each year of the plan. Any subsequent changes to the capital plan may adversely impact O&M.
- Project assessments and software maintenance contract renewals for significant systems costs may be materially higher than planned (e.g. Oracle).
- Increased capital and O&M costs due to industry regulatory requirements.
- Planned levels of spend do not include unplanned business initiatives that may have an IT O&M impact.

Plan Risks

General Counsel

- Legal
  - *New environmental regulations and third-party challenges will continue to require extraordinary legal review and input.*
  - *The Company becomes involved in a significant unanticipated legal dispute.*
  - *Intensity of litigation with respect to a pending matter may significantly increase.*

- Corporate Communications
  - *Given increased ECR spending, planned rate cases and cost associated with the new EPA regulations, customer bills will continue to increase, potentially resulting in lower customer satisfaction levels.*
  - *National and local environmental groups will continue to threaten the company's brand.*

PPL companies

Plan Risks

General Counsel

- Corporate Responsibility
  - *Weather uncertainties and/or natural disasters may necessitate new levels of assistance to agencies addressing the needs of challenged customers.*
  - *Unfavorable legal or regulatory result may require focused community relations strategy.*
- Compliance
  - *NERC Reliability Standards, including Cyber Security Standards, are likely to be revised and affect resources.*
  - *Extraordinary workload anticipated due to efforts to implement new CIP version 5 requirements and revise or expand certain compliance programs.*

Plan Risks

General Counsel

- Federal Regulation & Policy
  - *Unreasonable requirements for acceptance of FERC 1000 compliance filings.*
  - *Greater socialization of transmission costs across the entire region.*
  - *Increased tension between state and federal regulators with respect to cost recovery.*
  - *New rules and regulations promulgated by EPA and FERC.*
  - *Imposition of new efficiency and demand response pricing rules that would modify existing commercial and regulatory arrangements.*
  - *Increased regulatory and economic pressure to join an RTO.*

PPL companies

Plan Risks

General Counsel

- External Affairs
  - *Upward pressure on customer's electric rates due to increased capital expenditures for pollution control and base load generation construction. Environmental, energy efficiency and renewable portfolio standards legislation and Federal EPA regulations place substantial compliance costs on the company and its customers.*
  - *Local, State and Federal budget shortfalls result in increased efforts to raise revenue through surcharges on the customer electric bill and increased corporate fees and taxes.*
  - *Political environment at the federal and state level becomes increasingly more challenging.*
  - *Push by industrials for limited wheeling.*
  - *Increased efforts to maintain or increase subsidies for solar customers.*

Plan Risks

General Counsel

- State Regulation & Rates
  - *Commission and intervenor sensitivity to rising costs.*
  - *Failure to get timely regulatory approvals for generation and transmission investment could put customer service and utility economics at risk.*
  - *Legislation that changes the regulatory structure (e.g. limited wheeling for industrials).*
  - *Increased scope and diversity of intervenors in proceedings.*
  - *Increased efforts to maintain or increase subsidies for distributed generation customers.*

Plan Risks

General Counsel

- Environmental
  - *Water discharge permits limits could be lower than expected.*
  - *The requirements for closure of existing ash ponds could be greater than predicted.*
  - *Potential for need of addition of SCRs on coal-fired units (Ghent 2, Mill Creek 1 and 2).*
  - *Additional permitting activities associated with new gas-fired generation.*

PPL companies

Plan Risks

Human Resources

- Economic pressures and impact on Human Resource management.
- Effects of possible Federal legislation relating to benefits, compensation, labor, safety and taxation.
- Staffing expenses and resources could increase due to the need to expand the potential hiring base due to attrition and the increase in planned retirements.

Plan Risks

Supply Chain

- Workforce demographics will continue to challenge both our short and long term staffing strategies.
- While all major work is covered by consolidated multi-year agreements, non-routine (project) work not yet known nor included in the existing Procurement Plans could require the need for temporary sourcing resources.

Electric Distribution

2015 Business Plan

September 17, 2014

Table of Contents

Plan Highlights

Electric Distribution's Business Plan provides for continued emphasis on the Company's core values of safety and customer satisfaction. Plan funding will continue to provide for safe, reliable and low cost electric service for customers, with priority given to the following:

- Employee, business partner and public safety
- Electric system hardening and protection to improve service reliability
- Technology advancements to enhance business processes, improve operational efficiencies and increase customers' communications options
- Asset replacements to address aging infrastructure
- System enhancements to meet existing and future customer loads and to improve contingency in critical areas of the system
- Construction projects to serve new customers and satisfy customer requested projects
- Maintenance, inspections and operations programs which assure regulatory compliance and operational performance

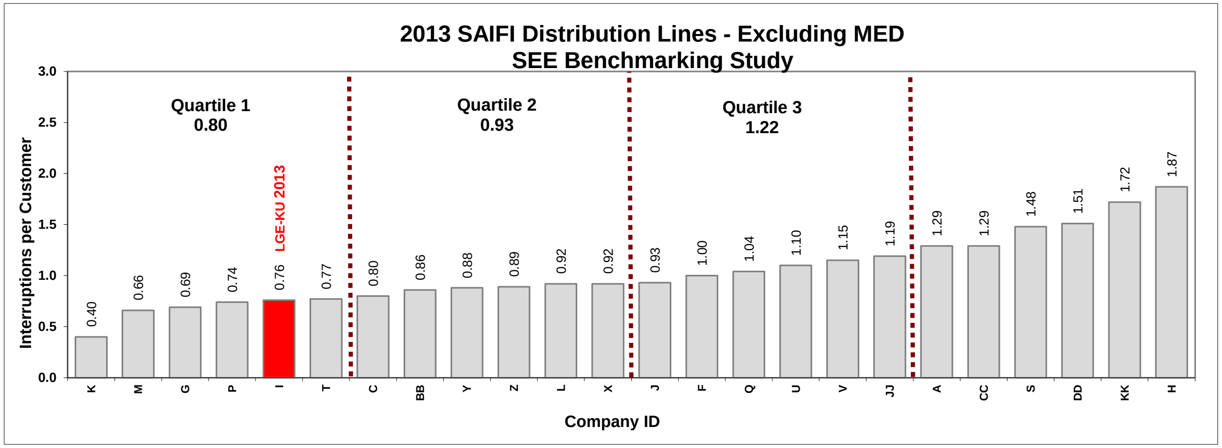
SEE Benchmarking Study



2013 SAIFI Distribution Lines - Excluding MED
SEE Benchmarking Study

PPL companies

Plan Highlights

- Safety and Wellness
  - *Continue commitment to employees, business partners and public safety*
  - *Maintain industry leading performance*
  - *Enhance operational effectiveness within the COO organization*
  - *Support the transfer of safety knowledge from seasoned to new employees*
  - *Ensure a comprehensive safety/technical training plan is in place for all employees*
  - *Focus on incident prevention plans and critical danger zones*
  - *Continue to improve motor vehicle safety*
  - *Identify, share and capitalize on industry best practices*
  - *Promote wellness as an aspect of safety*

Plan Highlights

- Customer Experience
  - *Continue to respond to all outage events in an efficient and effective manner, and continue to improve on the accuracy and timeliness of restoration times*
  - *Continue to identify and respond to opportunities to improve reliability performance*
  - *Continue to build on technology which enhances business processes, reduces cycle times, and enhances communications with customers*
  - *Invest in aging infrastructure replacement to continue long term service reliability*
  - *Continue to be responsive to customer requests for new service or infrastructure relocations*
  - *Continue focus on portraying a professional and positive customer image*
  - *Satisfy customer capacity needs*

Plan Highlights

- OPEX
  - *On target in 2014 to achieve 7&5 approved forecast.*
  - *Compounded Annual Growth Rate (CAGR) from 2014-2019 is flat.*
  - *Major Initiatives:*
    - Line Clearance, Hazard Tree Program and Emerald Ash Borer removal
    - Regulatory Inspection and Maintenance Programs
    - Storm and Trouble Response
  - *Major Financial Risks:*
    - Storm Restoration that Exceeds the 10 Year Average
    - New OSHA 1910.269 Regulation Changes Involving the Protection of Workers from ARC Flash and General Requirement for Flame Retardant Clothing

LG&E KU
PPL companies

Plan Highlights

- Capital
  - *On target in 2014 to achieve 7&5 approved forecast.*
  - *Compounded Annual Growth Rate (CAGR) from 2014-2019 is 6.1%.*
  - *Continued focus on critical capital investments related to reliability and operational performance, replacement of aging infrastructure, storm and system repair, meeting customer demand and native load, and connecting new customers.*
  - *Major Initiatives:*
    - System Reliability Programs
    - System Enhancements to Improve Switching Capability at Critical Substations
    - LG&E Downtown Network Enhancements
    - Aging Infrastructure Replacement including the Pole Inspection & Treatment Program
    - Major Substation and Circuit Projects to Meet Demand
    - System Enhancements to Serve New Customers

PPL companies

Major Assumptions

- Customer expectations regarding levels of service and availability of information continue to increase.
- Reliability investments continue to target improvement in overall SAIDI/SAIFI metrics and specific circuits with customers experiencing multiple interruptions.
- New investments to further reinforce customer reliability include building in redundancy on select critical substations and purchase of an additional portable substation.
- Aging infrastructure investments include:
  - *Louisville Downtown Network accelerated PILC program and manhole lid replacement*
  - *Substation legacy equipment replacement*
  - *Replacement of LG&E substation underground exit cables*
  - *Rear easement hardening*
- Focus will continue to be placed on enhancing system reliability and making necessary repairs, meeting customer demand and native load, and replacing aging infrastructure.

PPL companies

Major Assumptions

- New Business:
  - *Moderate volume and inflationary increases are forecasted through the planning period.*
  - *Funding included for known major customer expansions/additions.*
- The Pole Inspection and Treatment Program will continue through the plan period.
- O&M storm budgets are based on 10 year average.
- Continue hazard tree removal program.
- Incremental headcount proposed to:
  - *Return some critical technical skills in –house and reduce the dependency on contractors*
  - *Address critical technical positions forecasted to be impacted by retirements.*

PPL companies

Plan Risks

- Increased maintenance, inspection and operating costs associated with changing regulations
- Increased severe weather events
- Accelerating economy and customer growth
- Increased hazard trees and reliability impacts associated with the emerald ash borer
- Market driven cost increases in materials, supplies and services

PPL companies

Plan Highlights

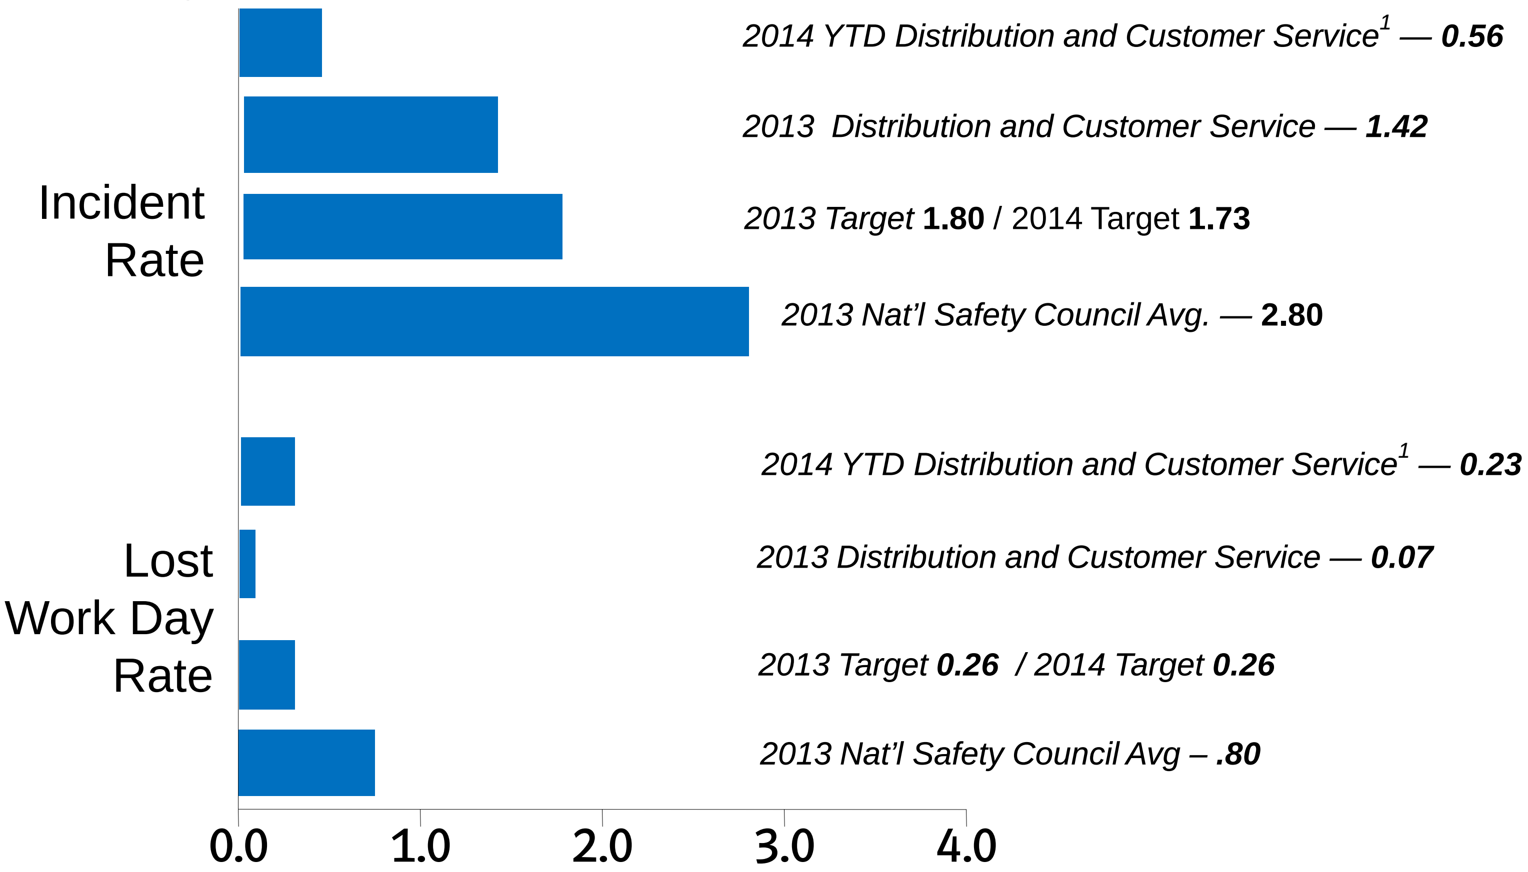
Customer satisfaction is a core value at LG&E and KU. Gas Distribution strives to provide safe, reliable, and low cost service to our customers, enhancing the quality of life in the areas we serve. We are committed to enhancing our relationship with our customers by delivering positive experiences that create value and build trust.

- Funding levels within the proposed plan are established with the following priorities in mind:
  - Employee and public safety including compliance with industry regulatory requirements
  - Performance in customer facing areas
  - Gas system service reliability
  - Asset replacement to address aging infrastructure
  - System enhancement and regulator station work to help meet system capacity
  - Technology to enhance customer experience
  - Continued capital investments for gas riser and service line ownership

PPL companies

Plan Highlights

Safety Performance



[1] As of July YTD 2014

Plan Highlights

- Safety and Wellness
  - *Maintain industry leading performance*
  - *Enhance operational effectiveness within the COO organization*
  - *Distribution Integrity Management, Transmission Integrity Management, Public Awareness and Gas Control Room Management*
  - *Continue to improve employee, business partners, and public safety*
  - *Continue to improve motor vehicle safety*
  - *Identify, share and capitalize on industry best practices*
  - *Continue mock drills, leak detection training, and large scale outage restoration preparedness*
  - *Continuous improvements for gas emergency response*
  - *Promote wellness as an aspect of safety*

Plan Highlights

- Customer Experience
  - *Continue to be responsive to customer requests for new service or infrastructure relocations*
  - *Continue to promptly address issues raised and utilize internal resources to aid in response*
  - *Continue to identify and respond to opportunities to improve reliability performance*
  - *Invest in aging infrastructure replacement to continue long term service reliability*
  - *Continue focus on portraying a professional and positive customer image*
  - *Continue to respond to all outage events in an efficient and effective manner*
  - *Satisfy customer capacity needs*
  - *Continue to build on technology which enhances business processes, reduces cycle times, and enhances communications with customers*
  - *Continue communications process for major projects and large scale inspection activities*

PPL companies

Plan Highlights

- Reliability and Infrastructure
  - *Continue investments in gas system infrastructure to meet projected demand and regulatory requirements*
  - *Invest in gas infrastructure replacement to address the aging system and improve system performance and reliability*
  - *Invest in gas compression, gas processing equipment upgrades, pipeline replacements and gas storage wells to improve overall reliability, mitigate risk and maintain storage system deliverability*
  - *Manage gas transmission pipeline construction related to electric generation plants*

Plan Highlights

- OPEX
  - — *On target in 2014 to achieve 7&5 approved forecast.*
  - — *Compounded Annual Growth Rate (CAGR) from 2014-2019 is 2.8%.*
  - — *Major Initiatives:*
    - Regulatory Compliance
    - Implement key WFP additions
  - — *Major Financial Risks:*
    - Regulatory Uncertainty
- Cost of Sales
  - — *On target in 2014 to achieve 7&5 approved forecast.*
  - — *Compounded Annual Growth Rate (CAGR) from 2014-2019 is 1.5% without maximum allowable operating pressures (MAOPs) testing.*
  - — *Major Initiatives:*
    - Gas Main & Riser Replacement Programs
    - Pressure Testing for MAOPs (ranges between $5M and $16.5M in 2016-2019)
  - — *Major Financial Risks:*
    - MAOP

PPL companies

Plan Highlights

- Capital
  - *On target in 2014 to achieve 7&5 approved forecast.*
  - *Compounded Annual Growth Rate (CAGR) from 2014-2019 is a decrease of 10.5% in total or positive 1.8% without Gas Tracker capital.*
  - *Major Capital Initiatives:*
    - Reliability / Asset Replacement
    - Gas Leak Mitigation
    - Customer Gas Service Ownership and Service Riser Replacement Programs
    - Gas Compressor Station and System Enhancements
    - Gas Transmission/Distribution Integrity Management Programs

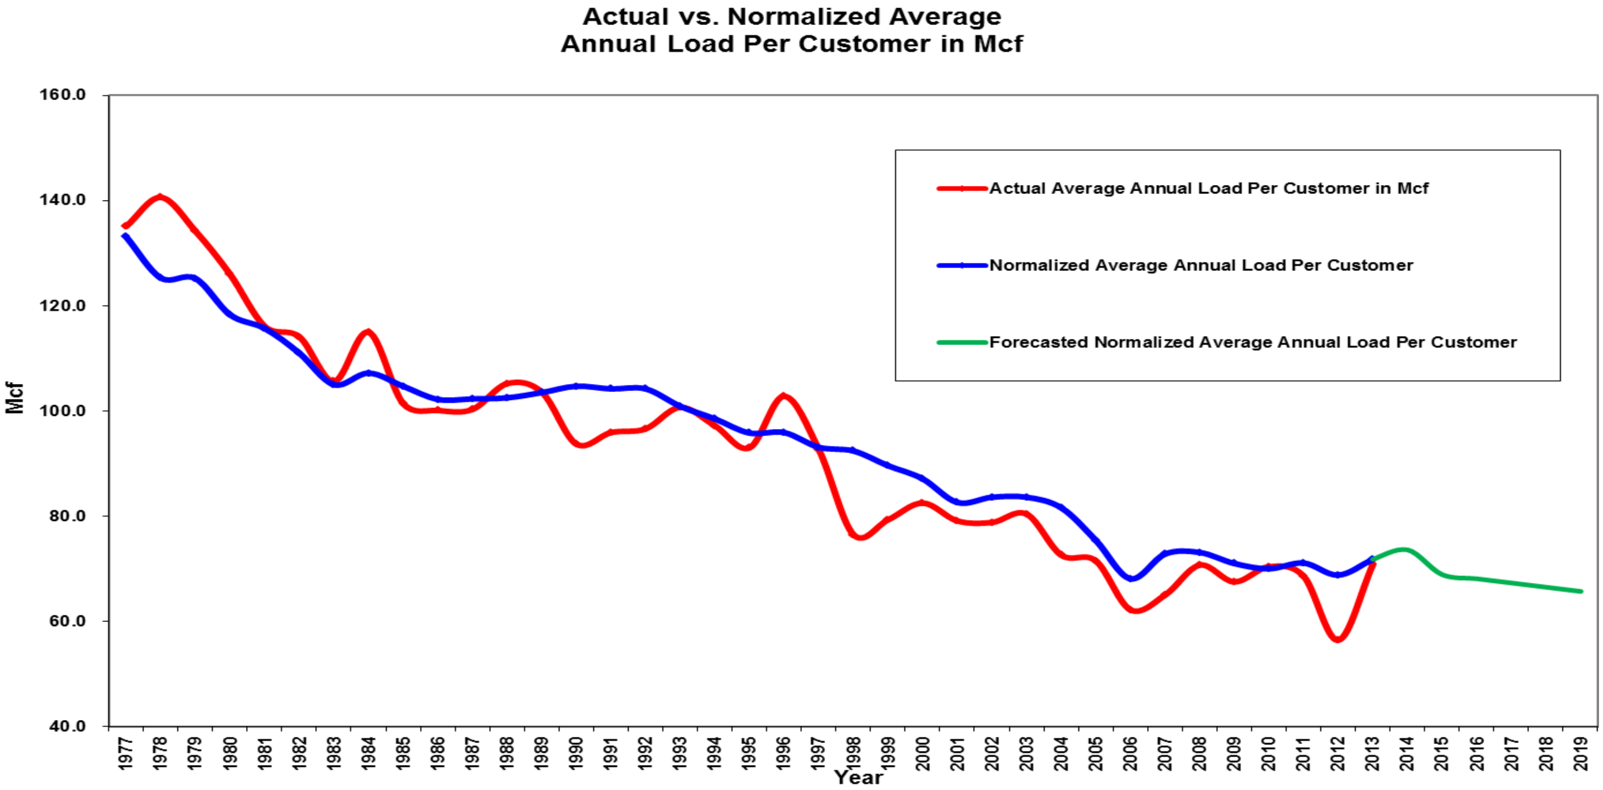
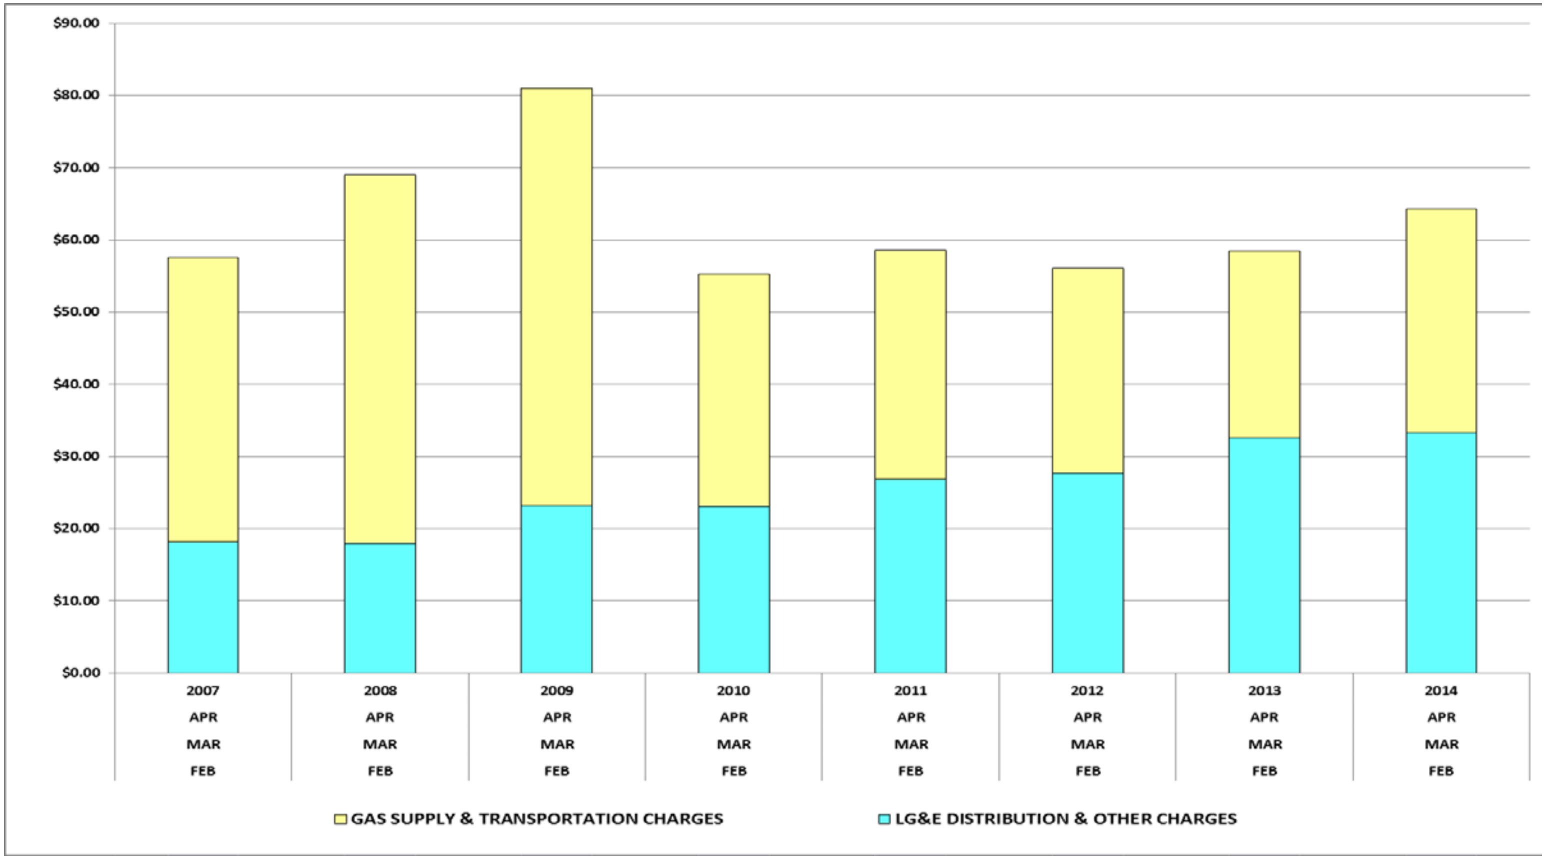
Residential Gas Use per Customer



LG&E KU
PPL companies

Plan Highlights

Typical Monthly Residential Gas Bill by Component (6 Mcf/month)



PPL companies

Plan Highlights

Gas Delivered by Class in Bcf

Class	2014	2015	2016	2017	2018	2019
Residential	*21.649*	*20.266*	*20.078*	*19.880*	*19.678*	*19.487*
Commercial	*11.172*	*10.570*	*10.533*	*10.468*	*10.404*	*10.368*
Industrial	*2.201*	*2.371*	*2.515*	*2.640*	*2.751*	*2.848*
Transportation	*11.725*	*12.003*	*12.099*	*12.104*	*12.040*	*12.067*
Total	*46.747*	*45.210*	*45.225*	*45.092*	*44.873*	*44.770*

Major Assumptions

- Customer expectations regarding levels of service and availability of information will continue to increase.
- Incremental headcount is needed to meet increased regulatory and compliance demands, transfer critical knowledge in preparation for retirements, and offset of contractors.
- New Business assumes moderate customer growth and inflationary increases through the planning period.
- Continuation of the Gas Line Tracker mechanism, KPSC approved in 2012.
- Gas Supply Clause remains fundamentally unchanged.
- Continued focus on reliability initiatives.

Major Assumptions

- New gas safety regulatory requirements will likely:
  - *Require operators to validate MAOPs of gas transmission pipelines. Pre-1970 and Post-1970 costs are modeled as Gas Tracker cost of sales.*
  - *Expand pipeline integrity requirements beyond high consequence areas.*
  - *Expand operator qualification requirements to construction activities.*
  - *Nominal capital is included to address MAOP validation of gas transmission pipelines.*
- Based upon 2013/2014 Winter operating experience:
  - *Forecasted Design Day for 2015 has increased to 665,000 Mcf/day from 629,000 Mcf/day estimated in the prior BP. During the current 5-year planning period, the forecasted Design Day gradually decreases to 656,000 Mcf/day.*
  - *Gas storage operating risk is addressed through staffing and project funding.*
  - *Main replacement and gas riser projects will address infrastructure vulnerable to cold weather issues.*

2015 Business Plan

September 17, 2014

Table of Contents

- Plan Highlights
- Major Assumptions
- Financial Performance
  - *Operating Expense – O&M and OIE*
  - *Cost of Sales / Gross Margin (if applicable)*
  - *Capital*
  - *Headcount*
  - *Key Performance Indicators*
- Plan Risks
- Appendix

PPL companies

Plan Highlights

- *The 2015-2019 Transmission Business Plan will continue a culture of strong safety performance and regulatory compliance, maintain position as a low cost provider and improve system reliability and performance.*
- *Focus on reliability performance improvement through analysis and capital improvements to reduce customer exposure and reduce outages.*
  - *Outage analysis and cause determination*
  - *Installation of sectionalizing circuit breakers and switches to reduce line exposure*
  - *Assess and improve line sections based on performance*
  - *Targeted replacement of assets including wood poles, insulators, static lines, relays, control houses, circuit breakers based on age, condition and performance criteria*
- *Continue to improve balance between contractors and employees focusing on core skillsets*
- *Transmission line and substation projects driven by generation expansion plans, interconnection agreements and through the ITO approved Transmission Expansion Plan process driven by NERC planning standards and LKE system planning guidelines to reliably serve firm load*
- *Compliance initiatives including ongoing facility rating verification and CIP v5 implementation*
- *Transmission line extensions to serve new native distribution substations in EDO business plan*
- *Emergency maintenance and asset replacement due to in service failure based on historical trends*

Major Assumptions

Reliability and Asset Management:

- *The strategy to improve reliability is based on historical performance and addressing line segments on a prioritized basis:*
  - *Segmenting circuits to reduce customer exposure from sustained outages.*
  - *Rebuilding/restoring line segments based on performance for both sustained and momentary outages.*
- *Targeted asset replacement based on risk criteria will maintain system performance over time:*
  - *Control house and protection and control replacements based on performance and age.*
  - *Circuit breaker replacements based on age/condition/maintainability.*
  - *Static wire replacements based on age and lightning performance.*
  - *Structure replacements based on condition.*
    - *Wood poles inspected every 6 years.*
    - *Steel structures every 12 years.*
- *Storm damage costs are based on a 5 year average. It is assumed there will be one transformer failure per year at a cost of $1.5m.*
- *O&M expenses for maintenance costs will be consistent with historical trends.*

Major Assumptions

Expansion Plan and Native Load:

- *Projects in the Business Plan are based on the 2014 annual Transmission Expansion Plan (TEP). It is assumed that the ITO will approve the TEP without significant revisions.*
- *The TEP includes funding for rating increases to certain transmission lines based on high level estimates. Detailed costs will be developed after surveying and subsequent analyses are completed.*
- *The plan assumes there will be no funding needed to accommodate new long term, firm service requests.*
  - *There are no funds in the plan for future project work that may result from transmission requests from the municipal customers who recently terminated their wholesale agreements.*
  - *Recent transmission requests for the E.W. Brown solar facility and a Bluegrass combustion turbine are not expected to require significant project work prior to approval.*
- *The Plan does not include new projects to mitigate potential reliability constraints in Western Kentucky.*
  - *Given announcements from neighboring utilities, additional studies are underway to determine if reliability constraints will occur for various external scenarios with Green River 3 & 4 retired.*
  - *If constraints and mitigating projects are recommended, extension of the operations of Green River units 3 & 4 may be required to allow time to implement.*
- *A new combined cycle gas turbine (807MW summer/898MW winter) will be in-service at Green River by May 1, 2021. Construction will start in 2018 and it is estimated that $58m is needed during the plan period and a total of $78m needed through 2021 to construct necessary transmission improvements.*
- *Connection costs for native load are coordinated with Distribution planning requirements and are estimated at $20m over the 5 year plan.*

Major Assumptions

Regulatory and Compliance:

- *FERC issued a NOPR proposing to skip CIP V4 and implement CIP V5 on an accelerated schedule. It is assumed that the implementation timeframe will require compliance by April 2016.*
  - *The plan assumes CIP V5 will change electronic logging of access requirements which will require installation of equipment for medium impact cyber systems. It is assumed that low impact systems will not require material expenditures to address.*
  - *Additional CIP versions beyond 5 will occur outside this 5 year plan.*

[redacted]

- *Expected revisions to other NERC Reliability standards will not result in material incremental expenditures.*
- *Bulk Electric System Line Ratings:*
  - *All lines 100kV and above will be surveyed every 5 years to confirm line ratings. Ongoing surveying and analysis of the lines is projected to cost $300k in 2015 and 2016 and cost $700k annually thereafter.*
  - *Ongoing surveys will not result in material expenditures.*
- *It is assumed FERC will approve compliance filings related to Order 1000 and resulting processes, once implemented, will not result in material capital or O&M expenditures.*

PPL companies

Major Assumptions

Operational and other:

- *Transerv will be retained as the ITO service provider to LGE/KU at escalated costs based on the existing contract*
- *TVA will be retained as the Reliability Coordinator (RC) with a new five year contract beginning September 1, 2014. The plan is funded to match the costs of the new agreement.*
- *Gross margin expenses related to the MISO Exit Agreement (de-pancaking) will continue and increase in 2019.*
- *Annual internal labor escalation rates: 3.0%*
- *Capital project contingency is 5-10%*

Operational Performance

Key Performance Indicators

KPI	2013 Year End	2014 Forecast	2015 Budget	2016 Plan	2017 Plan	2018 Plan	2019 Plan
Recordable Injury Incident Rate - Employees	0.00	0.00	1.70	1.70	1.70	1.70	1.70
Recordable Injury Incident Rate - Contractors	2.18	1.42	1.85	1.85	1.85	1.85	1.85
SAIDI (minutes)	13.5	11.7	11.6	11.6	11.6	10.6	10.6

Notes:

The forecasted Recordable Injury Incident Rate is calculated using the actual number of injuries through September 9, 2014 and the actual hours worked (year-to-date average hours per month assumed for 12 months).

The forecasted SAIDI is based on actual through July and budget for August through December.

PPL companies

Plan Risks

- *Estimated costs for regulatory and compliance requirements could be materially higher.*
  - *Final CIP-14 assessments for substation physical security may result in substations coming into scope.*
  - *Requirements for low and medium rated assets under CIP V5 may be significantly greater than anticipated.*
- *Final transmission expansion plan costs may be materially different from the 2015 Business Plan.*
- *Actual costs for work related to equipment failures and storm restoration may exceed projections.*
- *Future third party requests for long term, firm transmission service may result in the need for significant additional infrastructure upgrades.*

Power Generation

2015 Business Plan

September 17, 2014

Table of Contents

- Plan Highlights
- Major Assumptions
- Financial Performance
  - *Operating Expense – O&M and OIE*
  - *Cost of Sales / Gross Margin (if applicable)*
  - *Capital*
  - *Headcount*
  - *Key Performance Indicators*
- Plan Risks
- Appendix

PPL companies

Plan Highlights

- Additional generation capacity - Cane Run Unit 7 CCGT scheduled for commercial operation May 1, 2015 and a second CCGT planned for May 1, 2021 at Green River
- Planned retirements of coal generating units at Cane Run (April 2015) and Green River (April 2016)
- Major investment and integration of environmental compliance control equipment
- Generation forecast for the planning period assumes continued trend of more gas fired production based on current projections for gas prices
- Required landfill expansion at Ghent, Brown and Trimble stations
- Increased resource needs to meet and maintain compliance with incremental regulatory requirements
- Trimble County Unit 2 resolution of existing issues and warranty claims
- Brown 1 and 2 remain in the generation mix without baghouses (Nalco additive included)

PPL companies

Major Assumptions

1. Regulatory

1.1 The State of Kentucky remains regulated throughout the plan period and the Environmental Cost Recovery (ECR) and Fuel Adjustment Clause (FAC) remain in place.

1.2 Target Reserve Margin of 16%, within a range of 16% - 21%.

- Given experiences of early 2014 for the industry, the high end of the range is preferred.

1.3 Reserve sharing under the TVA Reserve Sharing Agreement is 258 MW's.

1.4 LG&E and KU remain committed to burning higher sulfur fuels.

1.5 The next ECR Filing is targeted for October 1, 2015.

1.6 Of the twelve municipal utilities served by KU, nine provided termination notices. Combined with the departure of Benham, this will be a reduction of 325 MW by May, 2019.

2. Proposed or Expected New Environmental Regulations for Air and Water

2.1 Final Cross State Air Pollution Rules (CSAPR) were issued in July 2011, with the order being stayed on December 30, 2011, and completely struck down on August 21, 2012.

- Supreme Court agreed to re-hear EPA's defense of CSAPR
- Rehearing occurred 12/10/2013.
- On April 29, 2014 the Supreme Court reversed and remanded the case back to the D.C. Circuit Court's for further proceedings
- Possibilities of future proceedings by the D.C. Circuit Court include:
  - Overturn CSAPR on other grounds not addressed by Supreme Court
  - Uphold CSAPR, but considering the original CSAPR was based on the 1997 NAAQS for Ozone, EPA may decrease the allocations to reflect the latest NAAQS for Ozone (2008)
  - CAIR allocations will remain in place until CSAPR is fully resolved (likely at least through 2015).

PPL companies

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.2 Mercury and Air Toxics Standards (MATS) final rules take effect on April 16, 2015.

- In most cases a delay of up to one year can be applied for, moving the compliance date to April 16, 2016.
- A second, additional, year of delay can be obtained in certain hardship cases, including retirements that could adversely impact transmission reliability. None of the LKE projects are currently counting on that second year of delay, though it is possible that a request will be made for Green River 3-4.

2.3 The final National Ambient Air Quality Standards (NAAQS) rules have been issued, with one hour standards in place for NO_x and SO_2. The final attainment designations for the short term NO_x standard have been delayed for up to three years due to inadequate monitoring. Based on the new short term SO_2 standards, compliance requirements must be in place by October 2018.

- The Mill Creek Wet (WFGD) FGD project is expected to mitigate the area in Jefferson County that has been proposed as non-attainment.

2.4 The EPA issued its revised rule on PM NAAQS on December 14, 2012.

- The current annual Particular Matter standard for $(PM)_{2.5}$ of 15 ug/M^3 was lowered to 12ug/M^3.
  - This puts Jefferson and Bullitt as non-attainment.
  - The recent modifications at Gallagher Station, the shutting down of Cane Run 4, 5, and 6, and the baghouses, scrubbers, and dry sorbent injection systems at Mill Creek should mitigate concerns in Jefferson County.
  - The KyDAQ has recommended to EPA to classify Jefferson and Bullitt Counties “attainment / unclassifiable”
  - In general, on units adding baghouses, LKE should have no trouble with compliance.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.5 The EPA is scheduled for a 2014 re-evaluation of the 8-hour ozone standard. Due to litigation, they were prepared to issue an early revision that would have been much lower with large impacts industry wide; however, they instead decided to re-instate the 2008 NAAQS Ozone 8-hour standard.

- Non Quality Assured 2012 monitor data indicates Jefferson County as non-attainment with the 1997 and the 2008 standard.
  - Likely Case: Shutdown of Cane Run 4, 5, and 6 mitigates the issue.
  - Worst Case: SCRs are needed at Mill Creek 1 and 2 to mitigate the issue.
  - All of Kentucky except the far eastern side and Warren County currently show non-attainment with the levels of Ozone NAAQS that EPA is planning to propose in 2014.
  - The SIP revision process will target attainment by 2021.

2.6 Cane Run Coal will be retired May 1, 2015.

- Combined cycle replacement available on that date.
- Cane Run 6 will be on lay-up starting October, 2014.
- There are 23 employees expected to retire or take the severance, and 46 will be placed elsewhere.
  - 40 at Mill Creek, 2 at Trimble County, and 4 to be determined.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.7 Green River Coal will be retired April 16, 2016.

- This is based on a one-year extension granted by the State, that as of August, 2014 has not yet been applied for.
- A Transmission Capital Project (Matanzas) has been completed.
  - However, the impact from Big Rivers shutting down the Wilson and Coleman Units has created other issues that need to be addressed from a transmission perspective.
- There are 15 employees expected to retire or take the severance. Of those remaining, eleven will go to meter reading, one to the turbine shop, five will stay at the plant, and nine will be placed elsewhere.
  - Of the five remaining at the plant, two will provide lab support and three will be tied to Green River 5, starting July 1, 2016, on charges to the capital project.

2.8 On March 21, 2011 EPA published a final rule that identified non-hazardous secondary materials that are considered solid wastes when combusted.

- Boiler cleaning disposal by evaporation in the boiler will be prohibited unless we are permitted as a “commercial and industrial solid waste incinerator”.

- State of Kentucky has determined they need a SIP revision and have provided an opinion that it will not be in effect until 2018. This has O&M implications.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.9 GHG New Source Performance Standards (NSPS) for new sources.

- EPA announced proposed rule on 09/20/2013 and published the proposal in the Federal Register on 01/08/2014.
  - Clean Air Act requires EPA to take final action on proposed rule within one year of publication, by January 8, 2015.
- Only addresses CO2:
  - Limit of 1,100 lbs/MWh (gross) for new coal-fired generation.
  - Limit of 1,000 lbs/MWh (gross) for new gas-fired generation.
- Affects new units only [Coal-Fired Units, Integrated Gas Combined Cycle (IGCC)].
    - Natural Gas Fired Cane Run 7 and the future Green River 5 are the only units in the LKE fleet currently impacted.
    - Cane Run 7 NGCC emission rate estimated at 800 lbs/MWh (gross) during full load operation.
  - New simple cycle turbines only affected if at least 1/3 of maximum capacity utilized for electric generation provided to grid.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.10 On June 2, 2014, EPA released their proposed regulations for greenhouse gas (carbon) reductions from existing fossil-fueled electric generating units (EGUs).

- Upon publication of the proposed rule in the Federal Register (FR), the EPA will have one year to issue a final rule.
- At that point, the States will have one year to develop and submit their State Implementation Plans for EPA's approval (June 2016). They can seek a one year extension for a single State Plan or a two year extension for a multiple State Plan. The EPA will then have up to one year to approve the plans.
- Interim limits on emissions from units that are in existence or began construction prior to January 8, 2014 will be based on average emissions from 2020 – 2029 with a final limit beginning 2030.
- The limit is rate-based in units of lbs CO2/MW net, however, may be converted to mass-based (tons/year).
- The proposal is unclear on treatment of shutdown generation and new NGCC generation that begins construction after January 8, 2014.
- Absent further information to the contrary, Brown 1 and 2 remain active through the 10-year planning period.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.11 The 2011 ECR compliance plan settlement and CPCN were approved December 16, 2011, and will include the following air quality controls:

- A new Mill Creek 4 WFGD (December 2014).
- A new Mill Creek 3 WFGD (June 2016).
- A new Mill Creek 1 and 2 (combined) WFGD (May 2015).
- Fabric Filters on Ghent 1-4, Mill Creek 1-4, Brown 3, and Trimble County 1.
  - 2014 in-service: GH3 (June), GH4 (December), MC4 (December).
  - 2015 in-service: BR3 (April), GH1 (May), GH2 (December), MC1 (May), MC2 (May), TC1 (October).
    - The existing precipitators on Brown 3 and Ghent 1 and 2 will be removed.
  - 2016 in-service: MC3 (June).

- A PAC system for Mill Creek Unit 3 and Sorbent Injection system for Mill Creek Units 3 and 4.
  - In-service October 2016.
- The Brown 1-2 Fabric Filters were removed from the 2011 ECR plan as part of the settlement. The fabric filters are not included in the 2014 BP. Brown 1 and 2 do remain in the generation mix through the planning period, however.
  - With Nalco additive included. Injection system scheduled for September 30, 2014 completion.
  - Run times may be limited.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.12 Significant O&M and cost of sales (~$25M - $30M per year) will be incurred as remaining units become operational for MATS Compliance.

- Costs will begin ramping up in 2014 as units are completed.
  - Additional limestone usage at Mill Creek 1 and 2 WFGD.
  - Additional hydrated lime injection to protect bags at all baghouse installations.
- Prior to 180 days after the compliance date of April 16, 2015 (or April 16, 2016 for units that have been granted an extension), all units must have completed a boiler tune-up with specific documentation of improvements and procedures and effects on CO and NO_x.
  - EPA has intent to allow for the boiler tune-up to occur prior to the compliance date.

2.13 EPA issued the Final 316(b) rule by May 19, 2014.

- Only Mill Creek 1 will be impacted.
  - Two years of entrainment monitoring in 2015/2016.
  - State will negotiate with LG&E in 2017, with a 3-5 year implementation.
  - A cooling tower for Unit 1 is a sensitivity.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.14 Effluent water guideline draft proposal was issued April 19, 2013, with the final rule targeted to be issued September, 2015.

- **Timing expected to coincide with final rules on coal combustion residuals (CCR's).**
- **A Five-Year implementation period is expected, however, a mercury discharge limit of 51 ppt for all four remaining coal-fired stations as part of new KPDEs permit requirements will likely require LKE to be ahead of the EPA timeline.**
  - **Mill Creek will likely be the first plant impacted.**
- **A four-year compliance period is expected to meet the state requirements.**
- **The estimated cost is 3X higher than the 2014 BP, largely driven by the inclusion of a limit on selenium.**
  - **The estimate currently used is the mid-point of a level 1 engineering high and low range of eight different options that includes selenium.**

2.15 Ghent negotiated SO_3 (H_2SO_4) permitted emission limits with EPA in 2012.

- **The Consent Decree was "Entered" by the Court on 8/21/2013 initiating the start**

Major Assumptions

3. Expansion/Capacity

3.1 A combined cycle unit (Cane Run 7) will be added May 1, 2015 at the Cane Run location.

- 2 x 1, 640 MW Summer Net (Ownership is 78% KU, 22% LG&E).
- Replacing Cane Run Coal retired on that date.
- CPCN approval date of September, 2012.
- Expense profile based on a Long-Term Services Agreement being in place.

3.2 A second combined cycle unit (Green River 5) will be added May 1, 2021 at the Green River location.

- Ownership percentage will be 60% KU, and 40% LG&E.
- 2 x 1, 640 MW Summer Net, with other options for a comparable number of MW's being considered (i.e. two 1 X 1's).
- Expense profile based on a Long-Term Services Agreement being in place.
- Timing could move up if the municipal utilities do not end up leaving the KU system.

3.3 A 10 MW Solar Facility will be installed at the Brown Generating Station by December 31, 2016.

- Ownership percentage will be 61% KU and 39% LG&E.
- There is incremental OPEX associated with the facility.

Major Assumptions

3. Expansion/Capacity (Cont,)

3.4 Reserve margin purchases are 165 MW between May 1, 2015 and April 30, 2019.

3.5 Brown 1 and 2 are included through the planning period, but without fabric filters.

- The Nalco product, to keep mercury emissions lower, will be utilized.

3.6 The third combined cycle will not be needed until 2031, as long as Brown 1 and 2 are still active.

3.7 The five Ohio Falls units still to be rehabilitated (the other three are complete) have the following scheduled mechanical completion dates.

- Unit 1 (June 2014).
- Unit 5 with turbine coupling repair (October, 2014).
- Unit 2 (July, 2015).
- Unit 4 (February, 2017).
- Unit 8 (May, 2016).

3.8 Black start additions (for system restoration purposes) will take place in 2017 and 2018.

- Trimble County Site 2017 in-service. Engineering takes place in 2015.
- Cane Run Site 2018 in-service. Engineering takes place in 2016.

3.9 Group 3 retirements will be considered based on a Retire vs. Repair cost analysis if there is a failure.

- Group 3 consists of the older, smaller CT's.
- No Group 3 units are being retired in the plan.
  - Haefling 3 was retired in 2013.

Major Assumptions

4. Coal Combustion Residuals (CCR's)

4.1 EPA issued two proposals for public input for coal combustion residuals (CCR's) in June 2010.

- Final rules are expected on December 19, 2014 and once final rules are issued there will be a five-year implementation period with an additional two years to close existing ponds. Unlined ponds (and possibly even lined ponds) are expected to be eliminated for ash storage.
- EPA is looking to tie the timing of CCR's and effluent water (see 2.14) together.
  - Congress is working on a bi-partisan effort.
  - Expected timeframe of 2018 - 2020 on pond closures and 2017-2018 on construction of new process ponds.
  - CCR materials are used for closing ponds on all active coal facilities.
  - A designation of "Hazardous" vs. "Non-Hazardous" appears to be strongly trending toward "Non-Hazardous".
  - The designation will not change the capital plan but would reduce beneficial re-use opportunities for structural fill and gypsum for wallboard if declared "hazardous".

4.2 Trimble County Landfill and Transport.

- The projected in-service date for the transport and treatment system is September, 2017.
- The projected in-service date for the landfill is April, 2018.
  - Approval of DWM permit is in January, 2015.
  - One year litigation of permits (1/15 – 1/16)
  - Construction period of 2.75 years.

4.3 Brown Ash Pond is being converted to a landfill, with an expected in-service date of second quarter, 2016 for Phase 1.

- KYDWM permit expected third quarter, 2014.
- Construction schedule is approximately 18 months.
- All three phases will be staged concurrently.

Major Assumptions

4. Coal Combustion Residuals (CCR) (Cont.)

4.4 Ghent Landfill Phase 1 construction went in service in June, 2014.

- Transport portion of the project is trending toward an August or September, 2014 in-service date.

4.5 A new Mill Creek landfill will be in-service by December 31, 2019.

- Landfill location is 1.5 miles from Mill Creek with a 1.5 mile transport pipe conveyor.

4.6 The Cane Run MSE Wall will be completed in 4th Quarter 2014.

4.7 The Cane Run Landfill will be closed in 2016.

4.8 The Cane Run Ash pond Cap & Closure project will be completed in 2017.

4.9 All CCR Capital Projects use an annual escalation rate of 4.0%.

4.10 The pond closure projects assume that existing CCR materials from each plant can be used to fill in each pond, similar to Cane Run. If that is not allowed by rule, the estimated cost of having to instead procure top soil and clay is an additional $450M.

4.11 If CCR materials are allowed for Pond Closure, Phases II and III of the landfill projects will move further out in time relative to what is in the 10-year projections.

LG&E KU
PPL companies

Major Assumptions

5. Operational and Other

5.1 Annual escalation rates for internal labor and non-labor are as follows:

- Internal labor: 3.0%.
- Non-labor 2.0%.

5.2 The next turbine overhauls by unit are as follows:

- 2014 : Mill Creek 4, Ghent 4.
- 2015 : Ghent 1, Brown 1.
- 2016 : None scheduled.
- 2017: Brown 2, Trimble 1.
- 2018: Ghent 3, Trimble 2.
- 2019: Ghent 2, Brown 3, Mill Creek 3.

5.3 Significant generator rewind/stator rewind dollars are included in the 2014-2017 timeframe.

- Brown 2 generator (stator and rotor) rewind in 2017 (some dollars also in 2016).
- Spare stator bars ordered and received for Ghent 2-4, Mill Creek 1-4, and TC 1 between 2010 – 2016.
    - The spare sets will be installed on MC4 in 2014, MC3 in 2019, MC2 in 2020, and MC1 in 2021.

Major Assumptions

5. Operational and Other (Cont.)

5.4 The corrosion fatigue inspection schedule is as follows:

- 2014: Ghent 4.
- 2015: Ghent 1, Mill Creek 1.
- 2016: Brown 1, Mill Creek 2, Mill Creek 4.
- 2017: Brown 2, Mill Creek 1, TC1.
- 2018: Brown 3, Ghent 1, Ghent 3, Mill Creek 4, TC2.
- 2019: Ghent 2, Mill Creek 3.

5.5 The High Energy Piping (HEP) inspection schedule is as follows:

- 2014: Ghent 3, Ghent 4, Mill Creek 4, TC2.
- 2015: Brown 1, Ghent 1, Ghent 2, Mill Creek 3.
- 2016: Brown 3, Mill Creek 2, TC2.
- 2017: Brown 2, Mill Creek 1, TC1.
- 2018: Brown 1, Ghent 1, Ghent 3, Ghent 4, Mill Creek 2, Mill Creek 3.
- 2019: Brown 2, Brown 3, Ghent 2, Mill Creek 1, Mill Creek 2, TC1.

5.6 The fuel procurement plan is pushing toward higher chlorine ILL. Basin fuels, which will drive burner modifications on at least two Mill Creek units and two Ghent units.

- Permit changes may also be needed.

Major Assumptions

5. Operational and Other (Cont.)

5.7 Targets for percentage of coal hedged in the 2015 Business Plan (in the year 2015) are as follows:

	Coal
2015	95%-100%.
2016	80%-90%.
2017	40%-90%.
2018	30%-70%.
2019	10%-50%.
2020	0%-30%.

- Targets for natural gas will follow a similar progression, but will build up slowly over time and will be comparable by the year 2018.

5.8 Based on a range of $4.00 to $6.00 per MMBTU, Can Run 7 natural gas usage can range from usage of 34 million MCF at $4.00 gas, to 16 million MCF at $6.00 gas. This can change coal burn by 1.7 million tons per year.

Major Assumptions

5. Operational and Other (Cont.)

5.9 Combustion turbine outages in the plan:

- **Dollars are split between O&M and capital based on the estimated scope of work that is reconditioning (expense – approximately 10%) vs. new parts (capital – approximately 90%).**
- **The first set of hot gas path inspections for Trimble CT's are complete as of the Spring, 2013. The cycle starts again with one unit in 2016, two units in 2017, two units in 2018, and one unit in 2019.**
- **Brown C inspections by unit are as follows:**
  - **Unit 10 in 2015.**
  - **Unit 6 in 2017.**
  - **Unit 7 in 2018.**
  - **Unit 11 in 2020.**
  - **Unit 5 in 2021.**
  - **Unit 8 in 2024.**
  - **Unit 9 in 2030.**
- **The expiration date for the Brown 6 and 7 Long-Term Services Agreements (LTSA) is October 1, 2016 based on the 13-year criteria.**
- **The CT component outages for Cane Run 7 are a Combustion Inspection late 2016, Hot Gas Path Inspection (HGPI) 2019, Combustion Inspection 2021, and a major in 2022 (HGPI and turbine overhaul).**
  - **Cane Run 7 CT's are covered under a signed LTPC.**
  - **The turbine/generator overhaul will be every seven years, with the first one in 2022.**

5.10 CIP Version 5 will have an effective date of April 1, 2016.

Major Assumptions

5. Operational and Other (Cont.)

5.11 Complete demolition of Paddy's Run Coal Plant will take place 2015-2016, and complete demolition of Canal Station 2016-2017. Paddy's stacks were removed in 2013.

5.12 Complete demolition of Pineville and Tyrone Power Plants will take place between 2020-2022.

5.13 Expected write-offs to expense include:

- Cane Run M&S $8M (2015).
- Green River M&S $2M (2015).
- Ghent Ash Handling M&S $1M (2014).
- Mill Creek FGD M&S $1.5M (2016).

5.14 The proysm run dated August 22, 2014 is the official generation forecast for the 2015 Business Plan.

[1] Steam Generation includes 75% of Trimble County 1 and 2.

[2] Controllable Costs include Utility O&M, Other Cost of Sales, and Below-the-Line expenses.

[3] The 2014 forecast for RIIR is the July YTD value (includes hearing loss)

[4] The 2014 forecast for Lost Workday Case Rate is the July YTD value.

**2014 Forecast is from the 7&5 forecast.

PPL companies

Plan Risks

- *Any subsequent changes to approved or proposed environmental regulations will impact the investment, construction and implementation of new systems in this plan*
- *Generation dispatch for the plan years is based on current view of regulations and assumptions on pricing for gas supply and allowances which is subject to significant changes to unit cost profiles and maintenance schedules if changes occur*
- *Integration of the major investment in new environmental compliance systems is tied to an extremely aggressive schedule that may impact normal operations of existing plants and could require changes to the outage planning schedule for tie in processes*
- *Availability of equipment and construction resources for major environmental compliance investment across the industry could lead to higher prices and impacts to planned schedule of completion*
- *Expansion of generating capacity and other generation changes consistent with approved integrated resource plan must be balanced with efforts to address transmission system load requirements. Additionally, the timing of retired coal and new CCGT availability will be critical*

2015 Business Plan

September 17, 2014

Table of Contents

PPL companies

Plan Highlights

- **Project Engineering's plan contains a net increase of $383M for 2015-2019, plan over plan.**
- **Reductions include:**
  - **The delay of GR5 from 2018 to 2021 resulted in a $83M reduction.**
  - **CCR Ruling (pond closures) reduced by $127M due to shift to 2020.**
  - **Net decrease of $15M to Environmental Air Compliance projects.**
- **Increases include:**
  - **Effluent Water increased $486M due to new estimates from C2HMHill.**
  - **Trimble County CCR increased $42M due to refining of estimates due to permitting delays and layout changes.**
  - **Addition of Brown Solar $35M.**
  - **Brown CCR, $25M, due to Main Ash Pond Closure addition and Ghent CCR, $15M, due to maintenance costs of Phase IA and delay of Phase IB.**

LG&E KU
PPL companies

Major Assumptions

1. Regulatory

1.1 The State of Kentucky remains regulated throughout the plan period and the Environmental Cost Recovery (ECR) and Fuel Adjustment Clause (FAC) remain in place.

1.2 Target Reserve Margin of 16%, within a range of 16%-21%.

- Given experiences of early 2014 for the industry, the high end of the range is preferred.

1.3 Reserve sharing under the TVA Reserve Sharing Agreement is 258 MW's.

1.4 LG&E and KU remain committed to burning higher sulfur fuels.

1.5 The next ECR Filing is targeted for October 1, 2015.

1.6 Of the twelve municipal utilities served by KU, nine provided termination notices. Combined with the departure of Benham, this will be a reduction of 325 MW by May, 2019.

Major Assumptions

2. <u>Proposed or Expected New Environmental Regulations for Air and Water</u>

2.1 Final Cross State Air Pollution Rules (CSAPR) were issued in July 2011, with the order being stayed on December 30, 2011, and completely struck down on August 21, 2012.

- **Supreme Court agreed to re-hear EPA's defense of CSAPR**
- **Rehearing occurred 12/10/2013.**
- **On April 29, 2014 the Supreme Court reversed and remanded the case back to the D.C. Circuit Court's for further proceedings**
- **Possibilities of future proceedings by the D.C. Circuit Court include:**
  - **Overturn CSAPR on other grounds not addressed by Supreme Court**
  - **Uphold CSAPR, but considering the original CSAPR was based on the 1997 NAAQS for Ozone, EPA may decrease the allocations to reflect the latest NAAQS for Ozone (2008)**
  - **CAIR allocations will remain in place until CSAPR is fully resolved (likely at least through 2015).**

PPL companies

Major Assumptions

2. <u>Proposed or Expected New Environmental Regulations for Air and Water (Cont.)</u>

2.2 **<u>M</u>ercury and <u>A</u>ir <u>T</u>oxics <u>S</u>tandards (MATS) final rules take effect on April 16, 2015.**

- **In most cases a delay of up to one year can be applied for, moving the compliance date to April 16, 2016.**
- **A second, additional, year of delay can be obtained in certain hardship cases, including retirements that could adversely impact transmission reliability. None of the LKE projects are currently counting on that second year of delay, though it is possible that a request will be made for Green River 3-4.**

2.3 **The final National Ambient Air Quality Standards (NAAQS) rules have been issued, with one hour standards <u>in place</u> for NO_x and SO_2. The final attainment designations for the short term NO_x standard have been delayed for up to three years due to inadequate monitoring. Based on the new short term SO_2 standards, compliance requirements must be in place by October 2018.**

- **The Mill Creek Wet (WFGD) FGD project is expected to mitigate the area in Jefferson County that has been proposed as non-attainment.**

LG&E® KU®
PPL companies

Major Assumptions

2. <u>Proposed or Expected New Environmental Regulations for Air and Water (Cont.)</u>

2.4 The EPA issued its revised rule on PM NAAQS on December 14, 2012.

- The current annual Particular Matter standard for (PM) $_{2.5}$ of 15 ug/M^3 was lowered to 12ug/M^3.
  - This puts Jefferson and Bullitt as non-attainment.
  - The recent modifications at Gallagher Station, the shutting down of Cane Run 4, 5, and 6, and the baghouses, scrubbers, and dry sorbent injection systems at Mill Creek should mitigate concerns in Jefferson County.
  - The KyDAQ has recommended to EPA to classify Jefferson and Bullitt Counties "attainment / unclassifiable"
  - In general, on units adding baghouses, LKE should have no trouble with compliance.

2.5 The EPA is scheduled for a 2014 re-evaluation of the 8-hour ozone standard. Due to litigation, they were prepared to issue an early revision that would have been much lower with large impacts industry wide; however, they instead decided to re-instate the 2008 NAAQS Ozone 8-hour standard.

- Non Quality Assured 2012 monitor data indicates Jefferson County as non-attainment with the 1997 and the 2008 standard.

PPL companies

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

- **Likely Case: Shutdown of Cane Run 4, 5, and 6 mitigates the issue.**
- **Worst Case: SCRs are needed at Mill Creek 1 and 2 to mitigate the issue.**
- **All of Kentucky except the far eastern side and Warren County currently show non-attainment with the levels of Ozone NAAQS that EPA is planning to propose in 2014.**
- **The SIP revision process will target attainment by 2021.**

2.6 Cane Run Coal will be retired May 1, 2015.

- **Combined cycle replacement available on that date.**
- **Cane Run 6 will be on lay-up starting October, 2014.**
- **There are 23 employees expected to retire or take the severance, and 46 will be placed elsewhere.**
    - **40 at Mill Creek, 2 at Trimble County, and 4 to be determined.**

LG&E® KU®
PPL companies

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.7 Green River Coal will be retired April 16, 2016.

- **This is based on a one-year extension granted by the State, that as of August, 2014 has not yet been applied for.**
- **A Transmission Capital Project (Matanzas) has been completed.**
    - **However, the impact from Big Rivers shutting down the Wilson and Coleman Units has created other issues that need to be addressed from a transmission perspective.**
- **There are 15 employees expected to retire or take the severance. Of those remaining, eleven will go to meter reading, one to the turbine shop, five will stay at the plant, and nine will be placed elsewhere.**
    - **Of the five remaining at the plant, two will provide lab support and three will be tied to Green River 5, starting July 1, 2016, on charges to the capital project.**

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.8 On March 21, 2011 EPA published a final rule that identified non-hazardous secondary materials that are considered solid wastes when combusted.

- Boiler cleaning wastewater disposal by evaporation in the boiler will be prohibited unless we are permitted as a "commercial and industrial solid waste incinerator".
- State of Kentucky has determined they need a SIP revision and have provided an opinion that it will not be in effect until 2018.
  - This has O&M implications.

2.9 GHG New Source Performance Standards (NSPS) for new sources.

- **EPA announced <u>proposed</u> rule on 09/20/2013 and published the proposal in the Federal Register on 01/08/2014.**
  - **Clean Air Act requires EPA to take final action on proposed rule within one year of publication, by January 8, 2015.**
- **Only addresses CO2:**
  - **Limit of 1,100 lbs/MWh (gross) for new coal-fired generation.**
  - **Limit of 1,000 lbs/MWh (gross) for new gas-fired generation.**

PPL companies

Major Assumptions

2. <u>Proposed or Expected New Environmental Regulations for Air and Water (Cont.)</u>

- Affects <u>new</u> units only [Coal-Fired Units, Integrated Gas Combined Cycle (IGCC)].
    - Natural Gas Fired Cane Run 7 and the future Green River 5 are the only units in the LKE fleet currently impacted.
    - Cane Run 7 NGCC emission rate estimated at 800 lbs/MWh (gross) during full load operation.
    - New simple cycle turbines only affected if at least 1/3 of maximum capacity utilized for electric generation provided to grid.

2.10 On June 2, 2014, EPA released their proposed regulations for greenhouse gas (carbon) reductions from existing fossil-fueled electric generating units (EGUs).

- Upon publication of the proposed rule in the Federal Register (FR), the EPA will have one year to issue a final rule.
- At that point, the States will have one year to develop and submit their State Implementation Plans for EPA's approval (June 2016). They can seek a one year extension for a single State Plan or a two year extension for a multiple State Plan. The EPA will then have up to one year to approve the plans.
- Interim limits on emissions from units that are in existence or began construction prior to January 8, 2014 will be based on average emissions from 2020 – 2029 with a final limit beginning 2030.

PPL companies

Major Assumptions

2. <u>Proposed or Expected New Environmental Regulations for Air and Water (Cont.)</u>

- The limit is rate-based in units of lbs CO2/MW net, however, may be converted to mass-based (tons/year).
- The proposal is unclear on treatment of shutdown generation and new NGCC generation that begins construction after January 8, 2014.
- Absent further information to the contrary, Brown 1 and 2 remain active through the 10-year planning period.

2.11 The 2011 ECR compliance plan settlement and CPCN were approved December 16, 2011, and will include the following air quality controls:

- A new Mill Creek 4 WFGD (December 2014).
- A new Mill Creek 3 WFGD (June 2016).
- A new Mill Creek 1 and 2 (combined) WFGD (May 2015).
- Fabric Filters on Ghent 1-4, Mill Creek 1-4, Brown 3, and Trimble County 1.
  - o 2014 in-service: GH3 (June), GH4 (December), MC4 (December).
  - o 2015 in-service: BR3 (April), GH1 (May), GH2 (December), MC1 (May), MC2 (May), TC1 (October).
    - ✓ The existing precipitators on Brown 3 and Ghent 1 and 2 will be removed.
  - o 2016 in-service: MC3 (June).

PPL companies

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.11 Continued:

- A PAC system for Mill Creek Unit 3 and Sorbent Injection system for Mill Creek Units 3 and 4.
  - In-service October 2016.
- The Brown 1-2 Fabric Filters were removed from the 2011 ECR plan as part of the settlement. The fabric filters are not included in the 2014 BP. Brown 1 and 2 do remain in the generation mix through the planning period, however.
  - With Nalco additive included. Injection system scheduled for September 30, 2014 completion.
  - Run times may be limited.

2.12 Significant O&M and cost of sales (~$25M - $30M per year) will be incurred as remaining units become operational for MATS Compliance.

- Costs will begin ramping up in 2014 as units are completed.
  - Additional limestone usage at Mill Creek 1 and 2 WFGD.
  - Additional hydrated lime injection to protect bags at all baghouse installations.

PPL companies

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

- Prior to 180 days after the compliance date of April 16, 2015 (or April 16, 2016 for units that have been granted an extension), all units must have completed a boiler tune-up with specific documentation of improvements and procedures and effects on CO and NO_x.
  - EPA has intent to allow for the boiler tune-up to occur prior to the compliance date.

2.13 EPA issued the Final 316(b) rule by May 19, 2014.

- **Only Mill Creek 1 will be impacted.**
  - **Two years of entrainment monitoring in 2015/2016.**
  - **State will negotiate with LG&E in 2017, with a 3-5 year implementation.**
  - **A cooling tower for Unit 1 is a sensitivity.**

LG&E KU
PPL companies

Major Assumptions

2. <u>Proposed or Expected New Environmental Regulations for Air and Water (Cont.)</u>

2.14 Effluent water guideline draft proposal was issued April 19, 2013, with the final rule targeted to be issued September, 2015.

- **Timing expected to coincide with final rules on coal combustion residuals (CCR's).**
- **A Five-Year implementation period is expected, however, a mercury discharge limit of 51 ppt for our remaining coal-fired stations as part of new KPDEs permit requirements will likely require LKE to be ahead of the EPA timeline.**
  - o **Mill Creek will likely by the first plant impacted.**
- **A four-year compliance period is expected to meet the state requirements.**
- **The estimated cost is 3X higher than the 2014 BP, largely driven by the inclusion of a limit on selenium.**
  - o **The estimate currently used is the mid-point of a level 1 engineering high and low range of eight different options that includes selenium.**

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.15 Ghent negotiated SO_3 (H_2SO_4) permitted emission limits with EPA in 2012.

- The Consent Decree was "Entered" by the Court on 8/21/2013 initiating the start of requirements accordingly.
- The Compliance Assurance Monitoring Plan was approved by the KyDAQ effective 2/4/2014.
- Additional testing will be necessary and engineering studies may be required for material changes.
- Permit will include operational monitoring of SO_3 control equipment.
- SIC Monitors will be required for each unit.
- Additional emissions testing for correlation per the Compliance Assurance Monitoring (CAM) Plan.

Major Assumptions

3. Expansion/Capacity

3.1 A combined cycle unit (Cane Run 7) will be added May 1, 2015 at the Cane Run location.

- 2 x 1, 640 MW Summer Net (Ownership is 78% KU, 22% LG&E).
- Replacing Cane Run Coal retired on that date.
- CPCN approval date of September, 2012.
- Expense profile based on a Long-Term Services Agreement being in place.

3.2 A second combined cycle unit (Green River 5) will be added May 1, 2021 at the Green River location.

- Ownership percentage will be 60% KU, and 40% LG&E.
- 2 x 1, 640 MW Summer Net, with other options for a comparable number of MW’s being considered (i.e. two 1 X 1’s).
- Expense profile based on a Long-Term Services Agreement being in place.
- Timing could move up if the municipal utilities do not end up leaving the KU system.

Major Assumptions

3. <u>Expansion/Capacity (Cont.)</u>

3.3 A 10 MW Solar Facility will be installed at the Brown Generating Station by December 31, 2016.

- Ownership percentage will be 61% KU and 39% LG&E.
- There is incremental OPEX associated with the facility.

3.4 Reserve margin purchases needed are 165 MW between May 1, 2015 and April 30, 2019.

3.5 Brown 1 and 2 are included through the planning period, but without fabric filters.

- The Nalco product, to keep mercury emissions lower, will be utilized.

3.6 The third combined cycle will not be needed until 2031, as long as Brown 1 and 2 are still active.

Major Assumptions

3. <u>Expansion/Capacity (Cont.)</u>

3.7 The five Ohio Falls units still to be rehabilitated (the other three are complete) have the following scheduled mechanical completion dates.

- Unit 1 (June, 2014).
- Unit 5 with turbine coupling repair (October, 2014).
- Unit 2 (July, 2015).
- Unit 4 (February, 2017).
- Unit 8 (May, 2016).

3.8 Black start additions (for system restoration purposes) will take place in 2017 and 2018.

- Trimble County Site 2017 in-service. Engineering takes place in 2015.
- Can Run Site 2018 in-service. Engineering takes place in 2016.

Major Assumptions

3. Expansion/Capacity (Cont.)

3.9 Group 3 retirements will be considered based on a Retire vs. Repair cost analysis if there is a failure.

- **Group 3 consists of the older, smaller CT's.**
- **No Group 3 units are being retired in the plan.**
  - **Haefling 3 was retired in 2013.**

Major Assumptions

4. <u>Coal Combustion Residuals (CCR's)</u>

4.1 EPA issued two proposals for public input for coal combustion residuals (CCR's) in June 2010.

- Final rules are expected on December 19, 2014 and once final rules are issued there will be a five-year implementation period with an additional two years to close existing ponds. Unlined ponds (and possibly even lined ponds) are expected to be eliminated for ash storage.

- EPA is looking to tie the timing of CCR's and effluent water (see 2.14) together.
    - Congress is working on a bi-partisan effort.
    - Expected timeframe of 2018 - 2020 on pond closures and 2017-2018 on construction of new process ponds.
    - CCR materials are used for closing ponds on all active coal facilities.
    - A designation of "Hazardous" vs. "Non-Hazardous" appears to be strongly trending toward "Non-Hazardous".
    - The designation will not change the capital plan but would reduce beneficial re-use opportunities for structural fill and gypsum for wallboard if declared "hazardous".

Major Assumptions

4. Coal Combustion Residuals (CCR's)

4.2 Trimble County Landfill and Transport.

- **The projected in-service date for the transport and treatment system is September, 2017.**
- **The projected in-service date for the landfill is April, 2018.**
  - **Approval of DWM permit is in January, 2015.**
  - **One year litigation of permits (1/15 – 1/16)**
  - **Construction period of 2.75 years.**

Major Assumptions

4. Coal Combustion Residuals (CCR's) (cont)

4.3 Brown Ash Pond is being converted to a landfill, with an expected in-service date of second quarter, 2016 for Phase

- **KYDWM permit expected third quarter, 2014.**
- **Construction schedule is approximately 18 months.**
- **All three phases will be staged concurrently.**

4.4 Ghent Landfill Phase 1 construction went in service in June, 2014.

- **Transport portion of the project is trending toward a September, 2014 in-service date.**

4.5 A new Mill Creek landfill will be in-service by December 31, 2019.

- **Landfill location is 1.5 miles from Mill Creek with a 1.5 mile transport pipe conveyor.**

4.6 The Cane Run MSE Wall will be completed in 4th Quarter 2014.

4.7 The Cane Run Landfill will be closed in 2016.

4.8 The Cane Run Ash pond Cap & Closure project will be completed in 2017.

4.9 All CCR Capital Projects use an annual escalation rate of 4.0%.

Major Assumptions

4. Coal Combustion Residuals (CCR's) (cont)

4.10 The pond closure projects assume that existing CCR materials from each plant can be used to fill in each pond, similar to Cane Run. If that is not allowed by rule, the estimated cost of having to instead procure top soil and clay is an additional $450M.

4.11 If CCR materials are allowed for Pond Closure, Phases II and III of the landfill projects will move further out in time relative to what is in the 10-year projections.

Major Assumptions

5. Operational and Other

5.1 Annual escalation rates for internal labor and non-labor are as follows:

- Internal labor: 3.0%.
- Non-labor 2.0%.

5.2 The next turbine overhauls by unit are as follows:

- 2014 : Mill Creek 4, Ghent 4.
- 2015 : Ghent 1, Brown 1.
- 2016 : None scheduled.
- 2017: Brown 2, Trimble 1.
- 2018: Ghent 3, Trimble 2.
- 2019: Ghent 2, Brown 3, Mill Creek 3.

Major Assumptions

5. **Operational and Other**

5.3 **Significant generator rewind/stator rewind dollars are included in the 2014-2017 timeframe.**

- **Brown 2 generator (stator and rotor) rewind in 2017 (some dollars also in 2016).**
- **Spare stator bars ordered and received for Ghent 2-4, Mill Creek 1-4, and TC 1 between 2010 – 2016.**
  - **The spare sets will be installed on MC4 in 2014, MC3 in 2019, MC2 in 2020, and MC1 in 2021.**

5.4 **The corrosion fatigue inspection schedule is as follows:**

- **2014: Ghent 4.**
- **2015: Ghent 1, Mill Creek 1.**
- **2016: Brown 1, Mill Creek 2, Mill Creek 4.**
- **2017: Brown 2, Mill Creek 1, TC1.**
- **2018: Brown 3, Ghent 1, Ghent 3, Mill Creek 4, TC2.**
- **2019: Ghent 2, Mill Creek 3.**

Major Assumptions

5. Operational and Other (cont.)

5.5 The High Energy Piping (HEP) inspection schedule is as follows:

- 2014: Ghent 3, Ghent 4, Mill Creek 4, TC2.
- 2015: Brown 1, Ghent 1, Ghent 2, Mill Creek 3.
- 2016: Brown 3, Mill Creek 2, TC2.
- 2017: Brown 2, Mill Creek 1, TC1.
- 2018: Brown 1, Ghent 1, Ghent 3, Ghent 4, Mill Creek 2, Mill Creek 3.
- 2019: Brown 2, Brown 3, Ghent 2, Mill Creek 1, Mill Creek 2, TC1.

5.6 The fuel procurement plan is pushing toward higher chlorine ILL. Basin fuels, which will drive burner modifications on at least two Mill Creek units and two Ghent units.

- Permit changes may also be needed.

Major Assumptions

5. Operational and Other (cont.)

5.7 Targets for percentage of coal hedged in the 2015 Business Plan (in the year 2015) are as follows:

Coal

- 2015 95%-100%.
- 2016 80%-90%.
- 2017 40%-90%.
- 2018 30%-70%.
- 2019 10%-50%.
- 2020 0%-30%.

  - Targets for natural gas will follow a similar progression, but will build up slowly over time and will be comparable by the year 2018.

5.8 Based on a range of $4.00 to $6.00 per MMBTU, Can Run 7 natural gas usage can range from usage of 34 million MCF at $4.00 gas, to 16 million MCF at $6.00 gas. This can change coal burn by 1.7 million tons per year.

Major Assumptions

5. Operational and Other (cont.)

5.9 Combustion turbine outages in the plan:

- Dollars are split between O&M and capital based on the estimated scope of work that is reconditioning (expense – approximately 10%) vs. new parts (capital – approximately 90%).
- The first set of hot gas path inspections for Trimble CT's are complete as of the Spring, 2013. The cycle starts again with one unit in 2016, two units in 2017, two units in 2018, and one unit in 2019.
  - Brown C inspections by unit are as follows:
    - ✓ Unit 10 in 2015.
    - ✓ Unit 6 in 2017.
    - ✓ Unit 7 in 2018.
    - ✓ Unit 11 in 2020.
    - ✓ Unit 5 in 2021.
    - ✓ Unit 8 in 2024.
    - ✓ Unit 9 in 2030.
- The expiration date for the Brown 6 and 7 Long-Term Services Agreements (LTSA) is October 1, 2016 based on the 13-year criteria.

Major Assumptions

5. Operational and Other (cont.)

- The CT component outages for Cane Run 7 are a Combustion Inspection late 2016, Hot Gas Path Inspection (HGPI) 2019, Combustion Inspection 2021, and a major in 2022 (HGPI and turbine overhaul).
  - Cane Run 7 CT's are covered under a signed LTPC.
  - The turbine/generator overhaul will be every seven years, with the first one in 2022.

5.10 CIP Version 5 will have an effective date of April 1, 2016.

5.12 Complete demolition of Paddy's Run Coal Plant will take place 2015-2016, and complete demolition of Canal Station 2016-2017. Paddy's stacks were removed in 2013.

5.13 Complete demolition of Pineville and Tyrone Power Plants will take place between 2020-2022.

Major Assumptions

5. Operational and Other (Cont.)

5.14 Expected write-offs to expense include:

- Cane Run M&S $8M (2015).
- Green River M&S $2M (2015).
- Ghent Ash Handling M&S $1M (2014).
- Mill Creek FGD M&S $1.5M (2016).

5.15 The proysm run dated August 22, 2014 is the official generation forecast for the 2015 Business Plan.

Key Messages

- The ECR Filing for Phase I of the Landfill and the Transport system was made in June 2011.
- Phase II has been accelerated 3 years and will start contruction upon completion of Phase I.

Phase II and Phase III will be constructed consecutively as Phase II which was necessary to obtain KYDWM permit.

Total 2014 BP	$314	$248	$223	$117	$3	$0	$0	$0	$905
2015 BP									
Mill Creek 1	$66	$61	$34	$5	$0	$0	$0	$0	$167
Mill Creek 2	$47	$91	$32	$7	$0	$0	$0	$0	$177
Mill Creek 3	$48	$27	$165	$49	$1	$0	$0	$0	$291
Mill Creek 4	$141	$142	$21	$7	$1	$0	$0	$0	$314
Total 2015 BP	$302	$322	$252	$69	$3	$0	$0	$0	$948
Variance to 2014 BP									
Mill Creek 1	$3	($1)	($2)	$8	($0)	$0	$0	$0	$8
Mill Creek 2	$18	($37)	$4	$7	($0)	$0	$0	$0	($9)
Mill Creek 3	($1)	$8	($36)	$24	$2	$0	$0	$0	($4)
Mill Creek 4	($8)	($44)	$4	$10	($1)	$0	$0	$0	($39)
Total Variance to 2014 BP	$12	($74)	($30)	$48	($0)	$0	$0	$0	($44)

Key Messages

- $13M related to the MC 3 and 4 SAM are not included in the ECR filing as it was part of an earlier filing

The ECR filing does not include removal costs of $8M.

- Variance is due to actual Target Price based EPC, FGD,Equipment, and Fabric Filter EPA contracts being less than the Level I Engineering Study performed by Black & Veatch. The ECR Filing was based on that Level I Study.
- Distribution Drive included in Unit 1

Plan Highlights

Customer focus is a core value at LG&E and KU. Customer Services strives to provide safe, reliable, and reasonable cost service to our customers, improving the quality of life in the areas we serve. Additionally, we are committed to enhancing our relationship with our customers by delivering positive experiences that create value and build trust.

- Funding levels within the proposed plan are established with the following priorities in mind:
  - Employee and public safety including compliance with industry regulatory requirements
  - Continuing Energy Efficiency programs and services for our customers
  - Maintaining operational performance levels
  - Investing in technology to enhance customer experience
  - Facility improvements based on Master Facility Plan
  - Managing "best in class" bad debt expense

Enhance the Customer Experience — Make a connection

- Who is the customer that will be impacted?
- How will this impact the customer?
- How do I want our customer to feel when the work is done?
- What can I do to make this a positive experience for the customer?
- How does my decision fit into the rest of the customer service process?

Safety First. No Compromise!

Plan Highlights

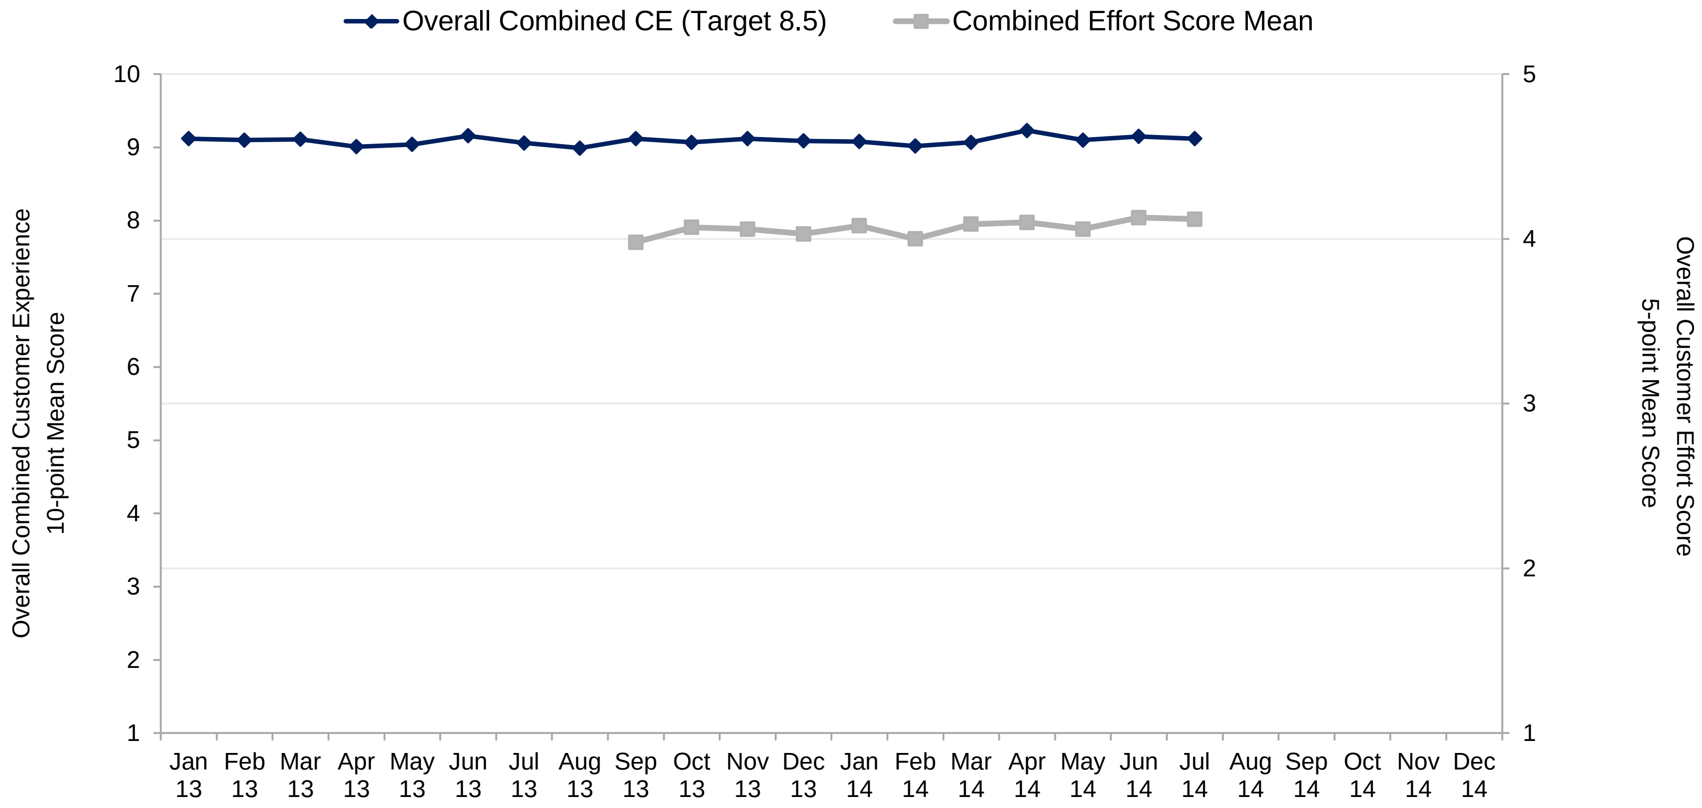
All Customer Contact Channels

Combined "Customer Experience" vs "Combined Effort" Score



PPL companies

Plan Highlights

- Safety and Wellness
  - *Maintain industry leading performance*
  - *Enhance operational effectiveness within the COO organization*
  - *Support the transfer of safety knowledge from seasoned to new employees*
  - *Ensure a comprehensive safety/technical training plan is in place for all employees*
  - *Continue to improve workforce, business partners and public safety*
  - *Continue to improve motor vehicle safety*
  - *Identify, share and capitalize on industry best practices*
  - *Promote wellness as an aspect of safety*

Plan Highlights

- Customer Experience
  - *Advance corporate-wide "Customer Experience" strategy/initiative*
  - *Continue tracking new Customer Satisfaction Index in parallel to Top Two Box score on Company's residential satisfaction study*
  - *Continue investments in enhanced customer contact channels and the migration to a Corporate "Unified Communications" platform*
  - *Enhance our "Customer Advocacy" role through partnerships with customer focus groups*
  - *Continue commitment to corporate citizenship and community involvement*
  - *Continue to deliver the current portfolio of customer energy efficiency programs, including customer education on the need for energy efficiency*
  - *Advance our understanding of customer behavior while gaining insight into customer needs*

LG&E KU
PPL companies

Plan Highlights

- OPEX
  - — *On target in 2014 to achieve 7&5 approved forecast.*
  - — *Compounded Annual Growth Rate (CAGR) from 2014-2019 is 2.2% in total and 2.5% without bad debt.*
  - — *Major Initiatives:*
    - Customer Experience Strategy
    - Rate Case Filings
    - Right of Way Document Preservation Program
    - SAP CRM7.X Upgrade
  - — *Major Financial Risks:*
    - Customer Hardship and Uncollectible Accounts
    - Industry Regulatory Uncertainty

PPL companies

Plan Highlights

- Cost of Sales
  - *On target in 2014 to achieve 7&5 approved forecast.*
  - *Compounded Annual Growth Rate (CAGR) from 2014-2019 is (5.7%).*
  - *Major Initiatives:*
    - Energy Efficiency Continuance
- Capital
  - *On target in 2014 to achieve 7&5 approved forecast.*
  - *Compounded Annual Growth Rate (CAGR) from 2014-2019 is (6.0%) in total and (12.1%) without DSM.*
  - *Major Capital Initiatives:*
    - Energy Efficiency Programs and Services
    - Master Facility Plan Implementation
    - Gas and Electric Meters

PPL companies

Major Assumptions

- The “Customer Experience” will continue to be a significant focus across the Company.
- Customer expectations regarding levels of service and availability of information will continue to increase.
- Rate case filings during the planning period will impact customers and internal workloads.
- Bad debt expense is based on .32% of projected revenues through the planning period.
- Incremental capital costs are included for facility improvements based on the Master Facility Plan.
- With the CCS SAP CRM7.x system replacement, 25 additional positions will be needed for approximately 2-3 years. The $2.8m estimate of incremental OPEX is included in the Business Plan.

PPL companies

Major Assumptions

- Energy Efficiency projects and education will continue to be an area of focus.
- 2014 Energy Efficiency Filing for program changes starting in 2015 is successful.
- Energy Efficiency contains dollars in 2019 associated with the continuation of WeCare, DLC, Customer Education, and Admin. KPSC approval for these expenditures will be sought in 2018.
- No regulatory and legislative action to mandate smart meter / smart grid occurs during the planning period.

Louisville Gas and Electric Company
Case No. 2014-00372
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/16; Base Period 12ME 2/28/15)

Filing Requirement
807 KAR 5:001 Section 16(7)(e)
Sponsoring Witness: Victor S. Staffieri

Description of Filing Requirement:

A statement of attestation signed by the utility's chief officer in charge of Kentucky operations, which shall provide:

1. *That the forecast is reasonable, reliable, made in good faith, and that all basic assumptions used in the forecast have been identified and justified;*
2. *That the forecast contains the same assumptions and methodologies as used in the forecast prepared for use by management, or an identification and explanation for differences that exist, if applicable; and*
3. *That productivity and efficiency gains are included in the forecast.*

Response:

See attached.

STATEMENT OF ATTESTATION SIGNED BY THE UTILITY'S CHIEF OFFICER IN CHARGE OF KENTUCKY OPERATIONS

1. The forecast presented in this rate application is reasonable, reliable, made in good faith, and all basic assumptions used in the forecast have been identified and justified;

2. The forecast contains the same assumptions and methodologies as used in the forecast prepared for use by management, except for the differences that have been identified and explained in the filing requirements and schedules thereto; and

3. Productivity and efficiency gains are included in the forecast.

Victor A. Staffieri

VICTOR A. STAFFIERI
Chairman of the Board, Chief Executive Officer and
President of Louisville Gas and Electric Company
and Kentucky Utilities Company

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 20th day of November 2014.

(SEAL)
Notary Public

My Commission Expires:
March 29, 2018

Louisville Gas and Electric Company
Case No. 2014-00372
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/16; Base Period 12ME 2/28/15)

Filing Requirement
807 KAR 5:001 Section 16(7)(f)
Sponsoring Witness: Russel A. Hudson

Description of Filing Requirement:

For each major construction project that constitutes five (5) percent or more of the annual construction budget within the three (3) year forecast, the following information shall be filed:

1. *The date the project was started or estimated starting date;*
2. *The estimated completion date;*
3. *The total estimated cost of construction by year exclusive and inclusive of allowance for funds used during construction ("AFUDC") or interest during construction credit; and*
4. *The most recent available total costs incurred exclusive and inclusive of AFUDC or interest during construction credit.*

Response:

See attached.

Louisville Gas and Electric Company
Case No. 2014-00372
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/16; Base Period 12ME 2/28/15)

Filing Requirement
807 KAR 5:001 Section 16(7)(g)
Sponsoring Witness: Russel A. Hudson

Description of Filing Requirement:

For all construction projects that constitute less than five (5) percent of the annual construction budget within the three (3) year forecast, the utility shall file an aggregate of the information requested in paragraph (f)3 and 4 of this subsection.

Response:

See LG&E's response to Filing Requirement 807 KAR 5:001 Section 16(7)(f) [Tab No. 19].

Louisville Gas and Electric Company
Case No. 2014-00372
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/16; Base Period 12ME 2/28/15)

Filing Requirement
807 KAR 5:001 Section 16(7)(h)
Sponsoring Witnesses: Kent W. Blake

Description of Filing Requirement:

A financial forecast corresponding to each of the three (3) forecasted years included in the capital construction budget. The financial forecast shall be supported by the underlying assumptions made in projecting the results of operations and shall include the following information:

Response:

See LG&E's responses to Tab Nos. 22-38.

Louisville Gas and Electric Company

The most recent Federal Energy Regulatory Commission (“FERC”) audit report relating to LG&E is attached. The Federal Communications Commission has not conducted an audit of LG&E, and, therefore, no such audit reports exist.

FEDERAL ENERGY REGULATORY COMMISSION
WASHINGTON, D.C. 20426

In Reply Refer To:
Office of Enforcement
Docket No. FA12-12-000
October 9, 2014

PPL Corporation
Attention: Robert J. Grey
Executive Vice President, General Counsel and Secretary
Two North Ninth St.
Allentown, PA 18101

Dear Mr. Grey:

1. The Division of Audits and Accounting within the Office of Enforcement (OE) has completed an audit of PPL Corporation (PPL), including its service companies and associated companies. The purpose of the audit was to evaluate the companies' compliance with Federal Energy Regulatory Commission (Commission): (1) cross-subsidization restrictions on affiliate transactions under 18 C.F.R. pt. 35; (2) accounting, recordkeeping, and reporting requirements under 18 C.F.R. pt. 366; (3) Uniform System of Accounts (USofA) for centralized service companies under 18 C.F.R. pt. 367; (4) preservation of records requirements for holding and service companies under 18 C.F.R. pt. 368; and (5) FERC Form No. 60 annual report requirements under 18 C.F.R. pt. 369.

The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies under 18 C.F.R. pt. 101 and the applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorization in Docket No. EC10-77-000.

Moreover, the audit evaluated Kentucky Utilities Company (KU) and Louisville Gas and Electric Company's (LG&E) compliance with their transmission cost-of-service formula rate schedule included as Attachment O of KU and LG&E's Open Access Transmission Tariff (OATT) and PPL Electric Utilities Corporation's compliance with its transmission cost of service formula rate schedule included as Attachment H-8-G of PJM Interconnection, L.L.C.'s OATT. The audit covered the period from January 1, 2010 through December 31, 2011. The enclosed audit report explains our audit findings and recommendations.

2. On September 26, 2014, PPL agreed with the findings and accepted the recommendations contained in the audit report. PPL stated it has already undertaken some corrective actions, as observed in the audit report.

3. In addition, PPL also provided descriptions of the planned corrective actions it will take to comply with the audit report recommendations and provided target completion dates. The appendix to the audit report includes a copy of PPL's response. I hereby approve the audit report.

4. PPL should submit its implementation plan within 30 days of this letter and make quarterly submissions to DAA describing the progress made to comply with the recommendations. As indicated in the audit report, these submissions should be made no later than 30 days after the end of each calendar quarter, beginning with the first quarter after this audit report is issued, and continuing until all corrective actions are completed.

5. The Commission delegated the authority to act on this matter to the Director of OE under 18 C.F.R. section 375.311 (2013). This letter order constitutes final agency action. PPL may file a request for rehearing with the Commission within 30 days of the date of this order under 18 C.F.R. section 385.713 (2013).

6. This letter order is without prejudice to the Commission's right to require hereafter any adjustments it may consider proper from additional information that may come to its attention. In addition, any instance of non-compliance not addressed herein or that may occur in the future may also be subject to investigation and appropriate remedies.

7. I appreciate the courtesies extended to the auditors. If you have any questions, please contact Mr. Bryan K. Craig, Director and Chief Accountant, Division of Audits and Accounting at (202) 502-8741.

Sincerely,

Larry D. Gasteiger
Acting Director
Office of Enforcement

Enclosure

Federal Energy Regulatory Commission

Audit of
PPL Corporation’s Affiliate Transactions, and Compliance with:

- Cross-subsidization Restrictions on Affiliated Transactions;

- Regulations under the Public Utility Holding Company Act of 2005;

- Uniform System of Accounts for Public Utilities and Accounting for Service Company Billings;

- Merger Conditions under Docket No. EC10-77-000; and

- Transmission Formula Rates

Docket No. FA12-12-000
October 9, 2014

Office of Enforcement
Division of Audits and Accounting

TABLE OF CONTENTS

I. Executive Summary

A. Overview

The Division of Audits and Accounting (DAA) within the Office of Enforcement has completed an audit of PPL Corporation (PPL), including its service and associated companies. The audit was commenced to evaluate compliance with the Federal Energy Regulatory Commission's (FERC or the Commission): (1) cross-subsidization restrictions on affiliate transactions;[1] (2) accounting, recordkeeping, and reporting requirements;[2] (3) Uniform System of Accounts (USofA) for centralized service companies;[3] (4) preservation of records requirements for holding and service companies;[4] and (5) FERC Form No. 60 annual report requirements.[5]

The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies under 18 C.F.R. pt. 101 and applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorization in Docket No. EC10-77-000. Lastly, the audit evaluated Kentucky Utilities Company (KU) and Louisville Gas and Electric Company's (LG&E) compliance with their transmission cost-of-service formula rate schedule included as Attachment O of KU and LG&E's Open Access Transmission Tariff (OATT) and PPL Electric Utilities Corporation's (PPL Electric) compliance with its transmission cost-of-service formula rate schedule included as Attachment H-8-G of PJM Interconnection, L.L.C.'s (PJM) OATT. The audit covered the period from January 1, 2010 through December 31, 2011.

Based on audit staff examination of KU, LG&E, and PPL Electric's accounting and formula rate calculations, audit staff identified numerous areas of substantial non-compliance with various Commission requirements. The level of non-compliance and the seriousness of these matters uncovered during the audit resulted in excessive formula rate billings to wholesale transmission customers. Audit staff is very concerned that the lack of sufficient oversight of PPL's accounting and formula rate policies that impact rate recovery have contributed to erroneous and excessive formula rate billings to wholesale

[5] *Id.* pt. 369.

transmission customers. Audit staff is also concerned that wholesale transmission customers would have continued to pay excessive amounts through formula rate billings had these areas of non-compliance gone undetected by audit staff. However, audit staff is encouraged by PPL's: (1) cooperation throughout the entire audit process and (2) swift and comprehensive implementation plan to correct these serious breaches of compliance with Commission requirements during and after the audit fieldwork. These areas of non-compliance are reflected in the compliance findings summarized in section C below and in full in section IV.

B. Transmission Formula Rate

KU and LG&E

KU and LG&E operate their system as a single, integrated, and coordinated transmission system and provide transmission service under the terms of their shared joint OATT. KU and LG&E adopted a formula rate for transmission service under schedule 7 (covering long-term firm and short-term firm point-to-point transmission service), schedule 8 (covering non-firm point-to-point transmission service), and schedule 9 (covering network integration service). The formula rate also provides for recovery of their Independent Transmission Organization and Reliability Coordinator costs.

The formula rate is in Attachment O to KU and LG&E's OATT. KU and LG&E are not required to file an annual informational or compliance filing for their wholesale transmission cost-of-service formula rate. Rather, KU and LG&E post the formula rate on OASIS by May 1, effective June 1, each year. All amounts in the formula rate are based on actual amounts. There are no over/under-collections, refunds, additional billings, projections, or estimates in the formula rate.

The transmission formula rate calculation is prepared in an Excel spreadsheet that primarily uses FERC Form No. 1 data. Each input item is identified within the spreadsheet, KU and LG&E's FERC Form No. 1 data are entered in the input section of the spreadsheet, and they are combined to calculate the final combined OATT rates. Sources of the data used to prepare the transmission formula rate are the KU and LG&E FERC Form No. 1s for the calendar year. Specific pages and line numbers are in the data entry section of the formula spreadsheet to help identify correct data points. After initial data entry is completed, separate teams in the accounting and transmission groups review the formula inputs and results to ensure data accuracy. The Rates and Regulatory (Rates) group maintains the spreadsheet where the formula rate is calculated. The Rates group enters data from the FERC Form No. 1, which allows formula rates to be calculated in the spreadsheet.

PPL Electric

PPL Electric is a member of PJM. PJM directs the operation of PPL Electric's transmission facilities, and transmission service over these facilities is provided under the PJM OATT. PPL Electric's annual transmission revenue requirement (ATRR) and annual transmission rates are set forth in Attachment H-8G to PJM's OATT, and the formula rate implementation protocols (Protocols) for the ATRR and rates are set forth in Attachment H-8H to PJM's OATT. The Protocols describe the process in which PPL Electric will account for certain inputs, updates to the formula, annual review procedures, and formal challenge procedures.

PPL Electric's ATRR established point-to-point transmission rates to the PPL Group Zone and Network Integration Transmission Service (NITS) rates in the PPL Group Zone. PPL Electric's ATRR is based on actual costs for transmission service for the preceding calendar year and based on associated FERC Form No. 1 data. PPL Electric is allowed to include the cost of weighted, capital additions projected for the current year, as well as projected CWIP for its transmission incentive project, Susquehanna-Roseland. PPL Electric also has a true-up mechanism through which deviations from actual costs will be addressed.

The ATRR produced by PPL Electric's approved formula rate is the sum of return on rate base, operation and maintenance expense, administrative and general expense, depreciation expense, taxes other than income tax, and income taxes, less any applicable revenue credits. PPL Electric's formula rate components are based on FERC Form No. 1 data and/or supporting documentation for data not otherwise available in the FERC Form No. 1. PPL Electric's Regulatory Compliance group manages the formula rate filing process, while other groups such as Transmission Expansion, Office of General Counsel, and Taxes provide data and various exhibits supporting some components. PPL Electric's formula rate filing is submitted to the Commission as an informational filing, due annually on or before May 15 of each year.

C. Summary of Compliance Findings

Audit staff's compliance findings are summarized below. Details are in section IV of this report. Audit staff identified the following areas of noncompliance:

- PPL Electric improperly accounted for its investment in PPL Receivables Corporation under the consolidated method of accounting instead of using the equity method of accounting, as required by the Commission. As a result of using the consolidated method instead of the equity method of accounting, PPL Electric erroneously included certain amounts in its formula rate billings to wholesale transmission customers.

- PPL Electric improperly accounted for overpayments of its current year's estimated Federal and state income taxes in Account 165, Prepayments.

- PPL Electric improperly accounted for manufactured gas plant remediation expenses in Account 930.2, Miscellaneous General Expenses. These expenses should have been accounted for so that no amounts would be recovered from wholesale transmission customers since these costs were not associated with obligations related to wholesale transmission customers. As a result of the incorrect accounting, these expenses were improperly included in the formula rate computation.

- KU and LG&E neither sought nor received Commission approval to recover asset retirement obligation costs in their transmission formula rate.

- KU did not remove all amounts from its formula rate calculations associated with its Virginia distribution utility plant facilities, as required by the Commission.

- KU and LG&E improperly accounted for cost of removal on physical assets related to asset retirement obligations.

- PPL's three franchised public utilities (KU, LG&E, and PPL Electric) incorrectly included some transaction-related costs related to PPL's merger with E.ON U.S. in formula rate billings to wholesale power and transmission customers.

- KU's method of computing Allowance for Funds Used During Construction (AFUDC) on Construction Work In Progress (CWIP) was deficient by compounding AFUDC monthly instead of semi-annually, including unrealized losses in its common equity balance used to calculate AFUDC, and using an incorrect balance for the common equity component.

- KU and LG&E's formula rate Attachment O included multiple inaccurate line references.

- FERC Form No. 60 filings that PPL Services Corporation (PPL Services) and LG&E and KU Services Company (LKS) made contained several reporting errors relating to account misclassifications, supporting schedule discrepancies, and the reporting of convenience payments.

D. Summary of Recommendations

Audit staff's recommendations to remedy the findings are summarized below. Detailed recommendations are in section IV. To address the areas of noncompliance, audit staff recommends the following:

1. PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

2. PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

3. PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.

4. PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

5. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

6. PPL Electric should reclassify Federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account 146, Accounts Receivable from Associated Companies, or Account 143, Other Accounts Receivable, as appropriate.

7. PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

8. PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

9. PPL Electric should revise procedures to appropriately determine its tax accrual amount.

10. PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

11. For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

12. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric’s wholesale transmission customers.

13. PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission’s accounting regulations.

14. PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

15. PPL Electric should determine the amount of manufactured gas plant remediation costs recovered through its formula rate.

16. For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

17. PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

18. LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

19. LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

20. For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under section 35.19a of the Commission's regulations.

21. LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

22. For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under section 35.19a of the Commission's regulations.

23. LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

24. For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

25. LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

26. PPL Electric, LG&E, and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

27. PPL Electric, LG&E, and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

28. PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under section 35.19a of the Commission's regulations for LG&E and KU.

29. KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

30. LG&E and KU should develop and implement controls to ensure accurate and complete line references.

31. LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

32. LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

33. LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

E. Compliance and Implementation of Recommendations

Audit staff further recommends that PPL:

- Submit its plans for implementing audit staff’s recommendations for audit staff’s review. PPL should submit these plans to audit staff within 30 days after this final audit report is issued.

- Submit all correcting entries to the Division of Audits and Accounting within 30 days after this final audit report is issued, including all correcting entries affecting the books for its associated franchised public utilities.

- Submit quarterly reports to the Division of Audits and Accounting describing PPL’s progress in completing each corrective action recommended in this final audit report. PPL should make quarterly filings no later than 30 days after the end of each calendar quarter, beginning with the first quarter after the final audit report in this docket is issued, and continuing until PPL completes all recommended corrective actions.

- Submit copies of any written policies and procedures developed in response to recommendations in the final audit report. These policies and procedures should be submitted for audit staff review in the first quarterly filing after PPL completes these products.

II. Background Information

A. Description of PPL Corporation System

Headquartered in Allentown, PA, PPL is a public utility holding company with public utility and nonutility subsidiaries in the United States. PPL controls or owns approximately 19,000 megawatts of generating capacity in the United States, sells energy in U.S. markets, and delivers electricity and natural gas to about 10 million customers in the United States. PPL also owns a regulated distribution company in the United Kingdom that serves 7.8 million customers in Wales, and southwest and central England. During the audit period, PPL was the parent of three Commission-jurisdictional franchised public utilities (FPUs): PPL Electric, LG&E, and KU.[6]

PPL Electric delivers electricity to 1.4 million customers in eastern and central Pennsylvania, and owns transmission facilities within PJM's balancing authority area. PPL Electric does not have captive wholesale or retail customers, but is the default supplier for retail customers within its service area. LG&E is a public utility that owns and operates electric generation, transmission, and distribution facilities, as well as natural gas distribution, transmission, and storage facilities, in Kentucky and Indiana. LG&E serves 397,000 electric customers. KU is a public utility that owns and operates electric generation, transmission, and distribution facilities in Kentucky, with limited operations in Tennessee and Virginia. KU serves 516,000 electric customers in Kentucky and 30,000 electric customers in Virginia.

PPL's two centralized service company subsidiaries (LKS and PPL Services) provide a variety of services to PPL, affiliated FPUs, and other affiliates.

LKS provides a variety of administrative, management, engineering, construction, environmental, and support services to affiliated entities, including KU and LG&E, at cost. LKS was formed as a Kentucky corporation on June 2, 2000 and commenced operations as a service company on January 1, 2001. Following the repeal of the Public Utility Holding Company Act (PUHCA) of 1935 and the enactment of PUHCA 2005, LKS transitioned, effective January 1, 2008, to the Commission's USofA for centralized service companies under part 367. LKS is a wholly owned subsidiary of LG&E and KU Energy LLC (LKE), which in turn is a wholly owned subsidiary of PPL. LKS became an indirect, wholly owned subsidiary of PPL when PPL acquired all of the limited liability company's interest of LKE from E.ON U.S. LLC (E.ON U.S.) on November 1, 2010.

---

[6] The term franchised public utility means a public utility with a franchised service obligation under state law.

PPL Services, a Delaware corporation, is a wholly owned subsidiary of PPL. PPL Services also provides various administrative services at cost to affiliated entities, including LKS and PPL Electric. PPL Services was formed as a corporate entity on February 14, 2000 as a PPL subsidiary. When PPL Services was formed, PPL was a single state exempt holding company under PUHCA 1935, so PPL Services was not subject to regulation as a centralized service company. PPL remained a single state exempt holding company after PUHCA 2005 was passed. On October 26, 2010, the Commission issued an order under section 203 of the Federal Power Act (FPA), authorizing PPL's acquisition of E.ON U.S. As a result of the acquisition of E.ON U.S., PPL derived more than 13 percent of its public utility company revenues from outside of a single state. After the acquisition, PPL notified the Commission that it no longer qualified for the waiver from applicable accounting, record retention, and reporting requirements under part 366 of the Commission's regulations as a single state holding company and notified the Commission it no longer sought to maintain its waiver as a single state holding company. Due to the acquisition of E.ON U.S. and PPL's change in status under PUHCA 2005, PPL Services fell under regulation as a centralized service company under PUHCA 2005 on November 1, 2010. The basic organizational structure of PPL Services has not changed significantly since it was formed in 2000.

B. Non-Power Goods and Services

LKS and PPL Services are the centralized service companies within PPL's holding company system that provide business support services to PPL, affiliated FPUs, and other subsidiaries. During the audit period, the service companies had service agreements between themselves and the FPUs. Under these agreements, the service companies provided administrative and professional services to PPL, its associated public utilities, and other PPL nonregulated operating companies "at-cost." Specifically, these administrative and professional services included, among others, corporate audit services, environmental management services, facilities management, financial accounting and reporting services, human resources, IT support, tax services, and legal services. Also, affiliated companies provided PPL's FPUs with other non-power goods and services. Such services were provided under agreements for mutual assistance, gas transportation services, insurance services, third-party services, data hosting, and intercompany billing support.

C. Service Company Accounting Systems

Cost accumulation and tracking at PPL Services is accomplished using two systems: PeopleSoft Project Costing (Project Costing) and PowerPlant. Project Costing is the system where projects are created and serves as the repository for amounts from various subsystems, such as payroll, accounts payable, and inventory. PPL Services tracks expenses by project. These can either be expense or capital projects. The Commission account for applicable costs is assigned as part of this Project Costing. PowerPlant contains plant records for PPL Services and serves as the database for its property records. PowerPlant data fields are updated by a nightly interface with PeopleSoft. Any capital projects established in PowerPlant are reviewed for proper accounting set up by the Asset Management group, which is part of the Controller's department. PowerPlant calculates depreciation expense as well as any capitalized interest. At month end, PowerPlant creates journal entries that are interfaced back to the PeopleSoft general ledger. PowerPlant is used exclusively for accumulating costs for capital projects.

Classification of accounts is maintained by the Corporate Accounting department in the Shared Accounting Services group and conforms to the requirements of the USofA. The classification also establishes accounting requirements as applicable to transactions occurring under normal circumstances in the ordinary course of business. The general ledger records and maintains activity and balances for direct and indirect costs. The general ledger also runs a monthly process to allocate indirect service company costs recorded, by category, from the service company to various PPL business lines as defined by the Financial Planning group. Also, the Financial Planning group created manual journal entries, and reviewed and approved direct cost allocations from the service company to the various business lines.

LKS cost accumulation and tracking is accomplished using Oracle products. Transactions affecting LKS post to the Oracle general ledger and originate from spreadsheet journal entries and mass allocations generated within the Oracle general ledger module, and from the subsidiary systems' Oracle Project Accounting, Oracle Payables, Oracle Purchasing, PowerPlant, the VOLTS timekeeping system, and the Transportation Resource Management System.

LKS uses the Oracle Project Accounting (Project Accounting) module to capture and accumulate direct and indirect costs. Projects have been created for each associated company, which receives charges with tasks designated to record income statement charges for direct and indirect labor, and for direct and indirect nonlabor. Charges from LKS to projects with tasks set up to balance sheet accounts on associated companies are designated as direct. Labor burdens are designated as indirect, consistent with the treatment on the FERC Form No. 1. LKS employees record their time through the timekeeping system to the appropriate direct or indirect labor tasks, and the labor is interfaced to Project Accounting and the general ledger. Nonlabor charges are recorded to appropriate direct or indirect nonlabor tasks via coding on purchase orders, disbursement requests, purchasing cards, or expense reports. After employees' labor charged to associated companies is interfaced from Project Accounting and posted to the general ledger, an Oracle process calculates burden components on this labor. This process debits direct burden accounts for all labor, including indirect labor. Another Oracle process then moves burden amounts from direct burden accounts to indirect burden accounts.

D. Cost Allocation Methods

The service companies directly and indirectly charge costs to affiliates. Directly charged costs are identifiable and charged entirely to the appropriate affiliate, while indirectly charged costs require application of different cost allocation methodologies to determine charges. These methodologies are based on several factors such as number of employees, number of transactions, number of customers, or occupied square footage. In general, the service companies charge costs to affiliates in one of three ways:

- Costs for services performed for an affiliate are directly charged to the affiliate.
- Costs for services performed for two or more affiliates are distributed among and charged to the affiliates, using methods determined on a cost-causation basis consistent with the type of work performed and based on an allocation method.
- Costs for general services, which are applicable to all affiliates or a class or classes of affiliates, are allocated among or charged to such affiliates by application of one or more cost allocation methods.

LKS reported approximately $296 million in service costs for 2011. Moreover, LKS directly charged some 47 percent and allocated 53 percent of costs to affiliates with respect to non-power goods and services it provided. KU and LG&E received about 88 percent of the service company's charges during 2011. LKS neither directly charged nor allocated any costs to PPL Electric during 2011. LKS directly charged or allocated costs to affiliates using 18 different allocation methods.

PPL Services reported approximately $400 million in service costs for 2011. Moreover, it directly charged some 59 percent and allocated 41 percent of costs to affiliates with respect to non-power goods and services it provided. PPL Electric received about 36 percent of the service company's charges during 2011. PPL Services neither directly charged nor allocated any costs to KU or LG&E during 2011. PPL Services directly charged or allocated costs to affiliates using 11 different allocation methods.

E. Internal Audit Role and Reporting

PPL's Internal Audit department is divided into three branches: PPL Audit Services, Special Projects, and LKE Audit Services. The executive director of the Internal Audit department reports functionally to the Audit Committee of the Board of Directors and reports administratively to the Chairman/President/CEO. Most of these staffers have Certified Public Accountant and/or Certified Internal Auditor professional certifications.

The Internal Audit department uses and complies with the Institute of Internal Auditors' International Standards for the Professional Practice of Internal Auditing. Each quarter, the Internal Audit department prepares a report for the PPL Audit Committee that addresses key risk areas assessed during the quarter, a summary of audit results, a summary of significant or material control deficiencies, audit performance measures, and a summary of select in-progress audits. Each year, the Internal Audit department also reports to the PPL Audit Committee on overall control environment, Sarbanes-Oxley section 404 compliance, audit organization and qualifications, budget and expenditures, annual audit plans, and the Internal Audit department's charter. The Internal Audit department did not perform any work that directly related to the scope areas in this audit.

F. Acquisition of E.ON U.S.

On November 1, 2010, PPL purchased E.ON U.S., the parent company of Kentucky's two major utilities, KU and LG&E, for $7.625 billion from German utility firm E.ON AG. On October 25, 2010, the Commission issued an order approving this acquisition of all issued and outstanding limited liability company interests of E.ON U.S.[7] As a result of the transaction, E.ON U.S. became a direct, wholly owned subsidiary of PPL, and E.ON U.S.'s subsidiaries, including KU and LG&E, became indirect, wholly owned subsidiaries of PPL. In its Merger Order approving the transaction, the Commission required that transmission and wholesale customers be held harmless from costs related to the transaction for five years to the extent that such costs would exceed savings related to the transaction.

---

[7] *PPL Corporation,* 133 FERC ¶ 61,083 (2010) (Merger Order).

III. Introduction

A. Objectives

The audit's objectives were to determine whether PPL and its associated companies complied with: (1) Commission cross-subsidization restrictions on affiliate transactions; (2) accounting, recordkeeping, and reporting requirements; (3) the USofA for centralized service companies; (4) Commission preservation of records requirements for holding companies and service companies; and (5) FERC Form No. 60 Annual Report requirements. The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies and applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorizations in Docket No. EC10-77-000. Lastly, audit staff examined KU, LG&E, and PPL Electric's compliance with their transmission cost-of-service formula rate schedules within the respective OATTs. The audit covered January 1, 2010 through December 31, 2011.

B. Scope and Methodology

To address overall audit objectives, audit staff:

- Identified standards and criteria used to evaluate compliance with each audit scope area. They included Commission rules, regulations, letter orders, and other requirements for holding and service companies, and Commission accounting regulations for jurisdictional public utilities.

- Reviewed FERC-65, Notification of Holding Company Status, and FERC Form No. 60 Annual Reports to ensure filed information was reliable, accurate, and complete.

- Reviewed publicly available materials to understand PPL's operations, including select filings to the SEC (Forms 10-K and 10-Q), FERC Form Nos. 1 and 60 filings, prior audits, and other filings with the Commission.

- Conferred with officials from the Pennsylvania, Kentucky, Virginia, and Tennessee public utility commissions, which have jurisdiction over PPL's FPUs.

- Conducted site visits to corporate headquarters in Allentown, PA, and Louisville, KY. The visits enabled audit staff to understand PPL's structure, activities, functions, systems, and the processes used in its operations. While on site, audit staff reviewed and tested supporting details for PPL's allocation methods; interviewed PPL staff responsible for accounting, financial reporting, record retention, cost allocations, and PPL's compliance program; sampled select supporting documents to ensure the service companies' accounting complied with Commission accounting regulations; sampled select supporting documents to ensure that billings and associated public utilities' accounting for these billings complied with Commission accounting regulations; and tested compliance with preservation of records requirements.

- Conducted interviews, teleconferences, and met with PPL employees to discuss processes, procedures, operations, and observations.

- Discussed data responses with PPL employees, and clarified and supplemented data responses with more information on areas of specific concern.

- Reviewed relevant audit reports and working papers of the Internal Audit department and external audit firm Ernst & Young LLP.

- Conferred with other Commission staff on various compliance issues to ensure audit findings would be consistent with Commission precedent and policy. For example, audit staff spoke with staff from other divisions within the Office of Enforcement, and with technical and legal staff from other Commission offices, including the Office of Energy Market Regulation and the Office of General Counsel.

Audit staff performed several specific actions to evaluate compliance with all relevant requirements relating to audit objectives. A summary of these actions includes:

Cross-subsidization Restrictions

To evaluate compliance with Commission cross-subsidization restrictions on affiliate transactions, audit staff:

- Reviewed policies, procedures, and practices related to the sale of non-power goods and services.

- Interviewed PPL employees, particularly those who account and report transfers of non-power goods and services.

- Reviewed and tested pricing mechanisms for non-power goods and services the FPUs provided to and received from each other, service companies, and other nonutility affiliates.

- Sampled charges and payments to determine accurate pricing for the sale of goods and services.

Accounting, Recordkeeping, and Financial Reporting

To evaluate compliance with Commission accounting, recordkeeping, and financial reporting regulations, audit staff:

- Reviewed FERC Form No. 60 Annual Report filings, Notification of Holding Company Status – FERC-65 filings, and the public utilities' FERC Form No. 1 reports. Audit staff also verified select, electronically filed information reported on the FERC Form No. 60 filings with supporting books and records to ensure reported information was accurate and complete.

- Compared select information in the FERC Form No. 1s with the FERC Form No. 60s to ensure information was reported accurately and consistently. Also, audit staff reviewed page 429 of the FERC Form No. 1s, which included non-power goods and services transactions for each FPU.

- Reviewed, sampled, analyzed, and tested select centralized service company accounting data.

- Sampled FPUs' accounting for select costs received from the centralized service companies.

Cost Allocation and Billings

To evaluate service company cost allocation methodologies and billings, audit staff:

- Identified cost allocation methods used, and identified and reviewed new allocation methods to facilitate our review of the service companies' cost allocation methods and costs the service companies billed to PPL's FPUs. Also, audit staff reviewed and tested billings and supporting details behind select allocation methods.

Preservation of Records

To evaluate compliance with Commission preservation of records requirements, audit staff:

- Interviewed PPL employees responsible for retaining records for the service companies.

- Requested and tested select records to ensure their retention.

Merger and Acquisition Authorizations Compliance Review

To evaluate compliance with conditions of the Commission's Merger Order, audit staff:

- Reviewed PPL's applications and related Commission filings and orders to understand the terms, conditions, and context of the merger and acquisition request, and identify commitments made in applicable orders.

- Examined procedures and controls for compliance with "hold harmless" provisions the Commission established in its merger and acquisition order. This included a review of accounting filings for recovery of transaction-related costs, controls for compliance oversight, and rates to ensure cost recoveries were appropriate.

- Discussed the merger with state public utility commissions that regulate PPL to understand their merger oversight and any concerns related to the post-merger company.

- Evaluated PPL's implementation process to ensure compliance with the merger's hold harmless provisions, requiring PPL to hold wholesale power and transmission customers harmless for five years from merger costs that may exceed merger-related savings.

- Interviewed employees involved in merger costs and synergy savings tracking.

- Tested certain amounts recorded as merger costs and synergy savings to determine appropriate classification and the level of support maintained.

Transmission Formula Rate

To evaluate each FPU's compliance with its respective formula rates, audit staff:

- Evaluated PPL Electric's compliance with its transmission cost-of-service formula rate in Attachment H-8G and the related Protocols set forth in Attachment H-8H to PJM's OATT, and KU and LG&E's compliance with their transmission cost-of-service formula rate in Attachment O to their joint OATT, including filings containing inputs to the formula rate.

- Reviewed initial and all subsequent Commission orders accepting the formula rate, including orders approving related settlements and PPL filings. Determined the level of functionalization, derivation of allocation factors, return on equity, rate base, accumulated depreciation, and other expenses. Reviewed background information about specific cost treatment, deferrals, cost caps, disallowances, and other matters disclosed as part of approving the derivation of the formula rate.

- Evaluated processes, procedures, and controls used to prepare and review the formula rate and annual updates, true-ups, or informational filings associated with the formula rate.

- Reviewed formula rate mechanics (forward-looking, historical, true-up, and informational filings), including a comprehensive overview of the formula rate mechanism the company provided.

- Evaluated the FERC Form No. 1 reporting processes and procedures to ensure accurate and complete reporting. As part of this evaluation, audit staff reconciled FERC Form No. 1 data with formula rate calculations and reviewed all discrepancies.

- Reviewed the FERC Form Nos. 1 and 3-Q, including related notes to financial statements to identify major accounting matters. Audit staff highlighted significant notes to understand financial statement and formula rate implications, and identified underlying accounting entries for these significant accounting matters.

- Determined whether the FPUs' accounting for significant matters impacted the formula rate calculation.

- Evaluated whether PPL's FPUs applied formula rate inputs in compliance with rate approval orders.

- Reconciled formula rate inputs derived from the FERC Form No. 1 to FPU books and records. Evaluated compliance with the USofA for the inputs under review, including all related guidance and accounting releases and accounting treatment of input items.

- Evaluated various accounts incorporated into cost-of-service formula rates and compliance with relevant accounting regulations in the UsofA.

Besides these actions, audit staff reviewed PPL's regulatory compliance program. Audit staff assessed the program for audit scope areas consistent with prior Commission orders and policy statements. Specifically, audit staff:

- Reviewed PPL's regulatory compliance program structure, including its authority and responsibilities for overseeing corporate compliance and the delegation of compliance responsibilities.

- Reviewed the Internal Audit department structure, including its chain-of-command and access to the Board of Directors through its Audit Committee to assess the effectiveness and independence of the audit function.

- Interviewed PPL executives, managers, and operational employees to evaluate their knowledge and application of the compliance program.

IV. Findings and Recommendations

1. Long-Term Investment in Subsidiary

PPL Electric improperly accounted for its investment in PPL Receivables under the consolidated method of accounting instead of using the equity method of accounting, as required by the Commission. As a result of using the consolidated method instead of the equity method of accounting, PPL Electric erroneously included certain amounts in its formula rate billings to wholesale transmission customers.

Pertinent Guidance

On February 1, 1973, the Commission issued Order No. 469 to amend the requirements of the Uniform System of Accounts to adopt the equity method of accounting for long-term investments in subsidiaries.[8]

18 C.F.R. pt. 101, Account 123.1, Investment in Subsidiary Companies, states:

> A. This account shall include the cost of investments in securities issued or assumed by subsidiary companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement plus the equity in undistributed earnings or losses of such subsidiary companies since acquisition. This account shall be credited with any dividends declared by such subsidiaries.

18 C.F.R. pt. 101, Account 418.1, Equity in Earnings of Subsidiary Companies, states:

> This account shall include the utility's equity in the earnings or losses of subsidiary companies for the year.

Instructions to the schedule on page 224 of the FERC Form No. 1, Investments in Subsidiary Companies (Account 123.1), require in part:

> 1. Report below investments in Accounts 123.1, Investments in Subsidiary Companies.

---

[8] *Revisions in the Uniform System of Accounts, and Annual Report Forms No. 1 and No. 2 to Adopt the Equity Method of Accounting for Long-Term Investments in Subsidiaries,* Order No. 469, 49 FPC 326 (1973), *rehearing denied,* 49 FPC 1028 (1973).

> 3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.

PJM Interconnection L.L.C., FERC Electric Tariff, Attachment H-8H, sections I, III.B states, in part:

> I.H "Material Accounting Change" means any (i) change in PPL Electric's accounting policies and practices, or (ii) change in PPL Electric's inter-corporate cost allocation policies or practices from those policies and/or practices in effect for the Rate Year upon which the immediately preceding Annual Update was based, which change causes a result under the Formula Rate difference than the result under the Formula Rate as calculated without such change.
>
> III.B. (2) The Annual Transmission Revenue Requirement shall be based on PPL Electric's books and records which reflect data properly recorded in: PPL Electric's FERC Form No. 1 to the extent the Formula Rate specifies the FERC Form No. 1 data as the input source; and The Commission's Uniform System of Accounts, as each exists as of the last day of the preceding calendar year.
>
> III.B. (3)(b) The Annual Update shall provide notice of Material Accounting Changes, which may incorporate by reference applicable disclosure statements filed with the SEC.

Background

Since 1973, the Commission has adopted the equity method of accounting for long-term investments in subsidiaries. Under the equity method of accounting, the investment in subsidiaries is recorded in Account 123.1, Investment in Subsidiary Companies (Major Only).[9] This account is increased or decreased based on a utility's proportionate share of subsidiary earnings regardless of whether such earnings were paid out as dividends to that utility. Although the Commission adopted the equity method of accounting for long-term investment in subsidiaries, it maintained its policy for ratemaking purposes that undistributed earnings of the subsidiary are to be excluded from the equity portion of the jurisdictional company capital structure in determining the rate of return.

---

[9] *Id.*

PPL Electric has three investments in the following subsidiary companies: CEP Commerce, LLC (CEP Commerce), CEP Lending, Inc. (CEP Lending), and PPL Receivables Corporation (PPL Receivables). PPL Electric has full control of these entities through 100 percent ownership of direct voting rights. CEP Commerce is the parent of CEP Lending, a company formed to make intercompany loans to all of PPL affiliates. PPL informed audit staff that PPL Receivables was formed to serve only the financing needs of PPL Electric. PPL Receivables is a special purpose entity whose sole purpose is to buy eligible accounts receivable and unbilled revenue from PPL Electric to secure asset-backed commercial paper from a third party.

Audit staff examined PPL Electric's accounting for its long-term investment in subsidiaries and found that it used the equity method of accounting to account for its long-term investment in CEP Commerce and CEP Lending. Conversely, it used the consolidated method of accounting to account for its long-term investment in PPL Receivables since its inception in 2004.

PPL Electric used various income statement and balance sheet accounts to record its long-term investment in PPL Receivables under the consolidated method of accounting. During the course of the audit fieldwork, PPL Electric filed its 2012 FERC Form No. 1 as required by Commission regulations.[10] On page 450.1 of the refiled 2012 FERC Form No. 1, PPL Electric disclosed the accounting impact if it had followed the Commission's approved method of accounting for subsidiary investments, which was the equity method of accounting. In addition, audit staff noted that some of these accounts and associated amounts flowed through the formula rate billings to transmission customers.

Audit staff determined that PPL Electric appropriately accounted for its long-term investment in CEP Commerce and CEP Lending using the equity method of accounting. However, PPL Electric did not properly account for its long-term investment in PPL Receivables based on the equity method of accounting, as required by Commission accounting regulations. The Commission's accounting regulations require that long-term investments in subsidiaries be recorded in Accounts 123.1 and 418.1, Equity in Earnings of Subsidiary Companies. Also, PPL Electric should not have included certain amounts in formula rate billings to wholesale transmission customers associated with using the consolidated method of accounting for PPL Receivables. Lastly, audit staff did not find sufficient evidence demonstrating that PPL Electric provided notification to its customers that it was using an accounting method not prescribed by the Commission to account for its long-term investment in PPL Receivables using the consolidated versus the equity method of accounting.

---

[10] 18 C.F.R. section 141.1.

Since PPL Electric neither sought nor received retroactive relief to use the consolidated method of accounting for its subsidiary investment in PPL Receivables, it must refund amounts erroneously included in formula rate billings to transmission customers since 2004.

Recommendations

We recommend that:

1. PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

2. PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

3. PPL Electric should adopt controls that will ensure all costs related to PPL Receivables’ operating activities are excluded from all components in PPL Electric’s formula rate calculation.

4. PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

5. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric’s wholesale transmission customers.

2. Tax Overpayments

PPL Electric improperly accounted for overpayments of its 2010 and 2011 estimated Federal and state income tax liability in Account 165, Prepayments.

Pertinent Guidance

18 C.F.R. pt. 101, Account 236(A) (B), Taxes Accrued, states:

> A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under account 165, Prepayments.
>
> B. If accruals for taxes are found to be insufficient or excessive, correction therefore shall be made through current tax accruals.

Background

Audit staff reviewed PPL Electric’s taxes and related procedures to understand why PPL Electric characterized taxes as prepaid. Specifically, audit staff asked PPL Electric to explain: (1) the calculation of its estimated Federal and state income tax liability each year; (2) the procedures for determining its estimated and actual Federal and state income tax liability; and (3) the documentation supporting its estimated and actual Federal and state income tax liability and Federal and state income tax prepayment determinations for 2010 and 2011.

PPL Electric determined its estimated Federal and state income tax liability each month by applying the applicable Federal and state income tax rates to its estimated taxable income. When quarterly income tax payments exceeded the estimated income tax liability, PPL Electric considered the income tax overpayment as a prepayment and then recorded this amount in Account 165. PPL Electric paid estimated Federal and state income taxes in four quarterly installments based on its estimated annualized taxable income.

Based on the examination of tax information, audit staff found that PPL Electric recorded Federal and state income tax overpayment amounts in Account 165 that were refunded to PPL Electric for tax years ending 2010 and 2011. Specifically, PPL Electric received refunds amounting to $59,843,908 and $17,272,745 for tax years 2010 and 2011, respectively. Thus, PPL Electric did not reduce any future year's tax liability by the 2010 and 2011 income tax overpayments.

While Account 165 of the Commission's accounting regulations allows the prepayment of income taxes to be recorded therein, Account 236 requires that such prepayments must be applicable to periods subsequent to the date of the balance sheet. Further, the Commission has defined prepayments included in Account 165 as expenses for a service or a supply paid in advance that will be consumed or used in future accounting periods, such as rent and insurance.[11] Audit staff believes PPL Electric's treatment of income tax overpayments as a prepayment is not consistent with the requirements of Account 165 or other Commission requirements because these monies were refunded and not used to pay PPL Electric's income tax obligations in advance.

PPL Electric included the income tax overpayments recorded in Account 165 in its formula rate as a component of rate base. Under the PJM OATT, PPL Electric is allowed to include prepaid amounts recorded to Account 165, Prepayments, as an item in the derivation of its rate base calculated in its formula rates. Prepayments, which represent amounts paid in advance for a good or service, are included as an adjustment to rate base and serve as an added benefit to transmission owners for costs essential to their operations but are prepaid, like insurance premiums. PPL Electric's prepayment input was the product of its applicable prepayment balance and its wages and salaries allocation factor. In conformance with notes to PPL Electric's formula rate, it can only include prepayments for its electric operations.

Because PPL Electric elected not to apply the income tax overpayments to future tax obligations, it should not have been reclassifying excess tax payments in Account 236 to Account 165. Audit staff is aware that PPL Electric engaged in this accounting practice during and prior to the audit period. Also, PPL Electric should not have recovered amounts for its overpayment of income taxes through its formula rate. For amounts determined to be potential refunds and not used to pay PPL Electric's tax obligations in advance, PPL Electric should reclassify state income tax prepayments to Account 143, Other Accounts Receivable, and Federal income tax prepayments to Account 146, Accounts Receivable from Associated Companies.

---

[11] *Entergy Services, Inc.*, Opinion No. 505, 130 FERC ¶ 61,023, at P 190 (2010).

Recommendations

We recommend that:

6. PPL Electric should reclassify Federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account146, Accounts Receivable from Associated Companies or Account 143, Other Accounts Receivable, as appropriate.

7. PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

8. PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

9. PPL Electric should revise procedures to appropriately determine its tax accrual amount.

10. PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

11. For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

12. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric’s wholesale transmission customers.

3. Manufactured Gas Plant Obligations

PPL Electric improperly accounted for manufactured gas plant remediation expenses in Account 930.2, Miscellaneous General Expenses. As a result of the incorrect accounting, these expenses were improperly included in the formula rate computation. These expenses should have been treated such that no amounts would be recovered from wholesale transmission customers since these costs were not associated with providing service to wholesale transmission customers.

Pertinent Guidance

18 C.F.R. pt. 101, Account 242, Miscellaneous Current and Accrued Liabilities, states:

> This account shall include the amount of all other current and accrued liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

18 C.F.R. pt. 101, Account 253, Other Deferred Credits, states:

> This account shall include advance billings and receipts and other deferred credit items, not provided for elsewhere, including amounts which cannot be entirely cleared or disposed of until additional information has been received.

18 C.F.R. pt. 101, Account 426.5, Other Deductions, states:

> This account shall include other miscellaneous expenses which are nonoperating in nature, but which are properly deductible before determining total income before interest charges.

18 C.F.R. pt. 101, Account 930.2, Miscellaneous General Expense, states:

> This account shall include the cost of labor and expenses incurred in connection with the general management of the utility not provided for elsewhere.

Background

PPL Electric incurred manufactured gas plant (MGP) environmental obligations to clean up contaminated sites in conjunction with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. This act imposed joint and several liability for cleaning up contamination caused by hazardous substances. PPL Electric estimated its liability for MGP environmental remediation to be $3,874,758 and $696,010 in 2010 and 2011, respectively. PPL Electric accounted for the MGP environmental remediation contingencies by debiting Account 930.2, and crediting Account 242 or Account 253, as appropriate.

PPL Electric represented that it included the environmental remediation obligations related to the MGPs in Account 930.2 because the environmental costs could not be identified with a specific business line. Consistent with PPL Electric's accounting policy, when a specific business line cannot be identified, either due to contamination that related to the purchase of property or related to former operation of facilities no longer in service, the costs are recorded in Account 930.2.

Audit staff believes that PPL Electric's accounting for its MGP environmental obligations was not consistent with the Commission's accounting regulations because such obligations should not have been included in Accounts 930.2. Audit staff also noted that these costs were not related to providing service to wholesale transmission customers. Therefore, under the Commission's accounting regulations, PPL Electric should have accounted for the MGP environmental obligations by debiting the appropriate nonutility expense account, not a transmission or administrative and general expense account tied to the transmission formula rate, and crediting Account 242 or Account 253, as appropriate.

For ratemaking purposes, PPL Electric included amounts in Account 930.2 in formula rate determinations. The formula rate template permits PPL Electric to recover costs recorded in this account through the application of the transmission wages and salaries allocator. The transmission wages and salaries allocator is the ratio of transmission wages expense to total wages expense less administrative and general wages expense. The application of this allocation factor allowed PPL Electric to recover transmission-related costs recorded in Account 930.2.

As part of the examination of Account 930.2, audit staff determined that in 2010 and 2011 PPL Electric recorded $3,874,758 and $696,010, respectively, of MGP environmental remediation costs in this account and subsequently included these amounts in formula rate determinations. In addition, audit staff noted that PPL Electric recorded these MGP environmental obligations in Account 930.2 for years prior to the audit period. PPL Electric represented to audit staff that these amounts were related to its former MGPs, which include Brodhead Creek, Columbia Gas Plant, Milton Gas Plant, Mt. Joy Gas Plant, and Shamokin Gas Plant. These MGPs were owned by Pennsylvania Power and Light Company, to which PPL Electric is the successor. However, these MGPs are no longer reflected on PPL Electric's books. The MGPs were not used in PPL Electric's wholesale transmission operations. Rather, they were historically used to produce a low Btu gas that was distributed to the Pennsylvania Power and Light Company's retail gas utility customers during the earlier years of the company's operations, when it was both a natural gas and electric utility.

PPL Electric should amend its accounting policy for MGP environmental obligations to record such contingencies by debiting the appropriate nonoperating expense account and crediting Account 242 or Account 253, as appropriate. PPL Electric should also refrain from including these costs in formula rate determinations, since these costs were not associated with providing service to wholesale transmission customers.

Recommendations

We recommend that:

13. PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.

14. PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

15. PPL Electric should determine the amount of manufactured gas plant remediation expenses recovered through its formula rate.

16. For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

17. PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

4. Asset Retirement Obligation

KU and LG&E neither sought nor received Commission approval to recover asset retirement obligation costs in their transmission formula rate.

Pertinent Guidance

Order No. 631 states:

> However, public utilities, licensees, and natural gas companies with formula rate tariffs must not include any cost components related to asset retirement obligations in their formula rate billing tariffs for automatic recovery in their billing determinations without obtaining Commission approval. [12]

Order No. 631 goes on to say:

> The Commission finds that the issue of whether, and to what extent, a particular asset retirement cost must be recovered through jurisdictional rates should be addressed on a case-by-case basis in the individual rate change filed by public utilities, licensees, and natural gas companies. To ensure that all rate base amounts related to asset retirement obligations can be identified and excluded from the rate base calculation in a rate change filing, the Commission adds sections 35.18 and 154.315 to its rate change filing requirements. These new regulations require that public utilities, licensees, and natural gas companies who have recorded an asset retirement obligation on their books in accordance with this rule must, as part of any initial rate filing or general rate change filing, provide a schedule identifying all cost components related to the asset retirement obligation that are included in the book balances of all accounts reflected in the cost of service computation supporting the proposed rates. In addition, the regulations require that all asset retirement obligations related rate base items be removed from the rate base computation through an adjustment. If the public utility, licensee, or natural gas company is seeking recovery of an asset retirement obligation in rates, it must also provide a detailed study supporting the amounts proposed to be collected in rates. If the public utility, licensee, or natural gas company is not seeking

---

[12] *Accounting, Financial Reporting, and Rate Filing Requirements for Asset Retirement Obligations,* Order No. 631, 103 FERC ¶ 61,021, at P 60 (2003).

> recovery of the asset retirement obligation in rates, then it must remove all asset retirement obligation related cost components from its cost of service.[13]

Section 35.18 of the Commission's regulations specifically states:

> (a) A public utility that files a rate schedule, tariff or service agreement under section 35.12 or section 35.13 and has recorded an asset retirement obligation on its books must provide a schedule, as part of the supporting work papers, identifying all cost components related to the asset retirement obligations that are included in the book balances of all accounts reflected in the cost of service computation supporting the proposed rates. However, all cost components related to asset retirement obligations that would impact the calculation of rate base, such as electric plant and related accumulated depreciation and accumulated deferred income taxes, may not be reflected in rates and must be removed from the rate base calculation through a single adjustment.
>
> (b) A public utility seeking to recover nonrate base costs related to asset retirement costs in rates must provide, with its filing under section 35.12 or section 35.13, a detailed study supporting the amounts proposed to be collected in rates.
>
> (c) A public utility that has recorded asset retirement obligations on its books, but is not seeking recovery of the asset retirement costs in rates, must remove all asset-retirement-obligations-related cost components from the cost of service supporting its proposed rates.[14]

18 C.F.R. pt. 101, Account 182.3, Other Regulatory Assets, states, in part:

> When specific identification of the particular source of a regulatory asset cannot be made, such as in plant phase-ins, rate moderation plans, or rate levelization plans, account 407.4, Regulatory credits, shall be credited.

---

[13] *Id.* P 62.

[14] 18 C.F.R. section 35.18 (2012).

Background

KU and LG&E recorded liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with a separate asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased to reflect changes in the obligation due to the passage of time through the recognition of accretion expense.

General Instruction 25 of part 101 of the USofA defines an asset retirement obligation (ARO) as:

> A liability for the legal obligation associated with the retirement of a tangible long-lived asset that a company is required to settle as a result of an existing or enacted law, statute, ordinance, or written or oral contract or by legal construction of a contract under the doctrine of promissory estoppel.[15]

KU and LG&E initially recorded the ARO by debiting Account 101, Electric Plant in Service, and crediting Account 230, Asset Retirement Obligation. These AROs were for obligations associated with ash ponds, chemical storage, asbestos, coal storage, environmental ponds, and other operational matters.

To record the depreciation on the ARO assets, KU and LG&E debited Account 403.1, Depreciation Expense for Asset Retirement Costs, and credited Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. This depreciation is calculated on a straight line basis over a life dictated by the settlement date of the ARO liability.

For accretion expense, KU and LG&E debited Account 411.10, Accretion Expense, and credited Account 230. The accretion expense recognizes the increase in the cost of removing an asset over its useful life.

Lastly, to defer the total depreciation on ARO costs and accretion on ARO liabilities, KU and LG&E debited Account 182.3, Other Regulatory Assets, and credited Account 407.4, Regulatory Credits. Account instructions to Account 182.3 would require KU and LG&E to credit Account 407.4, Regulatory Credits, when "specific identification of the particular source of a regulatory asset cannot be made." However, in this case, the particular source of the regulatory asset can be specifically identified as the depreciation initially recorded in Account 403.1 and the accretion initially recorded in Account 411.10. Therefore, KU and LG&E should have credited Accounts 403.1 and

---

[15] 18 C.F.R. pt. 101, General Instruction 25.

411.10 rather than Account 407.4. Audit staff understands that amounts deferred in Account 182.3 may have been included in depreciation expense recorded in Account 403.1 and previously collected from wholesale power and transmission customers. Due to these being previously collected, KU and LG&E overstated the regulatory asset recorded in Account 182.3. However, audit staff will not require KU and LG&E to reduce the regulatory asset to the extent KU and LG&E make refunds for the amounts previously collected.

Although KU and LG&E recorded the ARO assets and liability in Accounts 101 and 230, respectively, it included in rate base only the amounts recorded in Account 101 resulting in an increase in rate base. By not decreasing rate base by the amount recorded in Account 230, KU and LG&E overstated amounts included in rate base. Also, KU and LG&E flowed through the effects of the depreciation of the ARO assets recorded in Accounts 403.1 and 108 in the formula rate.

It is audit staff’s understanding that ARO costs were included in LG&E and KU’s formula rate calculation since inception of the formula rate. Based on Commission requirements, audit staff believes no aspect of the ARO should have been included in formula rate billings to wholesale power and transmission customers, absent KU and LG&E seeking approval from the Commission to include ARO amounts in formula rate determinations. This would have afforded the Commission the opportunity to request further information regarding KU and LG&E’s accounting and the impacts of including ARO amounts to determine the annual revenue requirement. KU and LG&E should refund amounts previously collected from wholesale power and transmission customers related to their ARO obligations.

Recommendation

We recommend that:

18. LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

19. LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

20. For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under section 35.19a of the Commission’s regulations.

5. Virginia Distribution Utility Plant Costs

KU did not remove all amounts from its formula rate calculations associated with its Virginia distribution utility plant facilities, as required by the Commission.

Pertinent Guidance

The March 17, 2006 Commission order accepting KU and LG&E's attachment O formula rate stated:

> We accept the attachment O rate formula for use in Applicants' stand-alone OATT, subject to revision. We agree with Applicants that the proposed rate formula represents an appropriate rate methodology for inclusion in Applicants' stand-alone OATT. However, Applicants must exclude the cost of certain facilities in Virginia that the Commission has found to serve a distribution function and not a transmission function. [16]

Note M of Attachment O requires KU to remove transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until FERC Form No. 1 balances are adjusted to reflect application of seven-factor test).[17]

---

[16] *Louisville Gas and Electric Company, et al.,* 114 FERC ¶ 61,282 at P198, (2006) (Citing *Louisville Gas & Electric Co*., 109 FERC ¶ 61,330 at P 8-9 (2004) (order affirming Presiding Judge's finding that certain facilities in Virginia that perform a distribution function must be excluded from the formula rates used in an interconnection agreement and transmission service agreement between Applicants and East Kentucky Coop.), *order denying reh'g*, 111 FERC ¶ 61,323 at P 50 (2005)).

[17] FERC uses a seven-factor test to determine whether an electric facility is distribution or transmission. FERC will give deference to state commission determinations, but that is limited by the expectation that the state follows the seven-factor test: (1) Local distribution facilities are normally in close proximity to retail customers; (2) local distribution facilities are primarily radial in character; (3) power flows into local distribution systems; it rarely, if ever, flows out; (4) when power enters a local distribution system, it is not reconsigned or transported onto some other market; (5) power entering a local distribution system is consumed in a comparatively restricted geographic area; (6) meters are based at the transmission/local distribution interface to measure flows into the local distribution system; and (7) local distribution systems will be of reduced voltage. Order No. 888, FERC Stats. & Regs. ¶ 31,036 at 31,771, 31,981 (1996).

Background

KU's transmission facilities in southwestern Virginia consist of 22 miles of 500-kV lines, 44 miles of 161-kV lines, 8 miles of 138-kV lines, 114 miles of 69-kV lines, and 5 transmission substations.

In a March 2004 initial decision, an administrative law judge determined that these Virginia transmission facilities serve a distribution function and not a transmission function, and, therefore, KU must eliminate the cost of these facilities from the transmission rates it charges.[18] In December 2004, the Commission affirmed the administrative law judge's finding that these Virginia transmission facilities serve a distribution function and not a transmission function and stated that the costs of these facilities must be eliminated from the rates charged.[19] In the March 2006 order that conditionally approved KU's withdrawal from Midwest Independent Transmission System Operator, Inc. (MISO), the Commission again required KU to "exclude the cost of certain facilities in Virginia that the Commission has found to serve a distribution function and not a transmission function."[20]

During a review of the transmission formula rate calculation, audit staff determined that KU did not comply with Note M of Attachment O, which requires KU to remove transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test. KU acknowledged that its Virginia transmission facilities were state-jurisdictional, and KU should have removed the Gross Plant in Service cost of its Virginia transmission facilities and associated depreciation in the calculation of the Transmission Plant Allocator of Attachment O, in conformity with Note M of Attachment O.

Audit staff determined that, by not complying with Note M, KU did not remove certain expenses related to these Virginia distribution plant facilities from formula rate determinations. This includes not only amounts included in the calculation of rate base, return, depreciation, and income taxes that are allocated directly using the transmission plant allocator, but also amounts or expenses, such as accumulated deferred income taxes, operation and maintenance expenses, administrative and general expenses, or taxes other than income taxes that are allocated using other allocators (based on net or gross plant balances, wages and salaries, transmission operation and maintenance expenses,

[19] *Louisville Gas & Electric Co.*, 109 FERC ¶ 61,330 (2004).

[20] *Louisville Gas & Electric Co.*, 114 FERC ¶ 61,282, at P 197 (2006).

etc.) that indirectly incorporate the transmission plant allocator. This resulted in KU erroneously collecting amounts from wholesale power and transmission customers since it did not remove all costs associated with the Virginia distribution plant facilities from formula rate determinations.

Recommendations

We recommend that:

21. LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

22. For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under section 35.19a of the Commission's regulations.

6. Accounting for Cost of Removal

KU and LG&E improperly accounted for cost of removal on physical assets with legal asset retirement obligations.

Pertinent Guidance

18 C.F.R. pt. 101, Account 108, Accumulated Provision for Depreciation of Electric Utility plant (Major Only), states, in part:

> A. This account shall be credited with the following:
>
> (1) Amounts charged to account 403, Depreciation expense, or to clearing accounts for current depreciation expense for electric plant in service.
>
> (2) Amounts charged to account 403.1, Depreciation expense for asset retirement costs, for current depreciation expense related to asset retirement costs in electric plant in service in a separate subaccount.

E. The utility is restricted in its use of the accumulated provision of depreciation to the purposes set forth above. It shall not transfer any portion of this account … or make any other use thereof without authorization by the Commission.

Background

Audit staff examined KU and LG&E's cost of removal accounting for physical assets with legal asset retirement obligations, such as ash ponds, landfills, and coal storage facilities. KU and LG&E booked the cost of removal related to these assets by debiting Account 403, Depreciation Expense, and crediting Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. KU and LG&E then reclassified these amounts to a regulatory liability account by debiting Account 108 and crediting Account 254, Other Regulatory Liabilities. Once KU and LG&E retired the asset and settled the ARO, KU and LG&E debited Account 254 and credited Account 108.

While KU and LG&E received state commission guidance from the Kentucky Public Service Commission that approved this accounting treatment, such approval does not dictate how this transaction should be accounted for under the Commission's accounting regulations. Under the Commission's accounting regulations, cost of removal is typically factored in the depreciation rate, and depreciation expense is accounted for in Accounts 403 and 108. According to the instructions to Account 108, amounts recorded herein must not be transferred to any other account absent of approval from the Commission. KU and LG&E did not seek nor receive approval from the Commission to transfer any amounts from Account 108. By transferring amounts initially recorded in Account 108 to Account 254, KU and LG&E did not follow the instructions for Account 108. For rate purposes, Account 108 is typically used to reduce rate base while amounts recorded in Account 254 are typically not used in the formula rate calculations. Since KU and LG&E removed these amounts from Account 108, it erroneously overstated rate base used to determine formula rate billings to transmission customers. Audit staff is aware that this accounting practice was used for years prior to the audit period.

Recommendations

We recommend that:

23. LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

24. For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

25. LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

7. Merger Costs

PPL’s three franchised public utilities (KU, LG&E, and PPL Electric) incorrectly included some transaction-related costs related to PPL’s merger with E.ON U.S. in formula rate billings to wholesale power and transmission customers.[21]

Pertinent Guidance

The October 25, 2010 Commission order approving the merger of PPL and E.ON U.S., LLC stated:

> With respect to transaction-related costs, we accept Applicants’ commitment to hold transmission and wholesale customers harmless from costs related to the transaction for a period of five years to the extent that such costs exceed savings related to the transaction, which we interpret to include all transaction-related costs, not only costs related to consummating the transaction.
>
> If Applicants seek to recover transaction-related costs through their wholesale power or transmission rates they must submit a compliance filing that details how they are satisfying the hold harmless requirement. If Applicants seek to recover transaction-related costs in an existing formula rate that allows for such recovery, then that compliance filing must be filed in the section 205 docket in which the formula rate was approved by the Commission, as well as in the instant section 203 docket. We also note that, if Applicants seek to recover transaction-related costs in a filing whereby they are proposing a new rate (either a new formula rate or a new stated rate), then that filing must be made in a new section 205 docket as well as in the instant section 203 docket. The Commission will notice such filings for public comment. In such filings, Applicants must: specifically identify the transaction-related costs they are seeking to recover, and (2) demonstrate that those costs are exceeded by the savings produced by the transaction, in addition to any requirements associated with filings made under section 205. Such a hold

---

[21] KU sells wholesale power to certain municipal utilities under long-term agreements that established cost-based wholesale power rates based on a formula rate. Moreover, PPL Electric, LG&E, and KU provide transmission service at formula rates.

> harmless commitment will protect customers' wholesale power and transmission rates from being adversely affected by the proposed transaction. [22]

Background

On June 28, 2010, PPL filed an application seeking authorization under sections 203(a)(1)(A), 203(a)(1)(B), and 203(a)(2) of the FPA for a proposed transaction in which PPL would acquire all of the issued and outstanding limited liability company interests of E.ON U.S. from E.ON AG's indirect, wholly owned subsidiary, E.ON U.S. Investments Corp. PPL sought to acquire E.ON U.S. for a purchase price of $7.625 billion, comprised of $2.062 billion in cash (subject to adjustment), the repayment of outstanding debt of E.ON U.S., LG&E, and KU estimated at $4.638 billion, and the assumption of $925 million in tax-exempt bonds of LG&E and KU. On October 25, 2010, the Commission issued an order approving the transaction under Docket No. EC10-77-000. [23] Audit staff evaluated PPL and its FPU subsidiaries for compliance with the conditions of this order. Besides reviewing Commission orders and company filings, understanding processes and procedures, and interviewing company staff, audit staff reviewed and tested compliance with the order's various provisions, such as verifying that the transaction did not result in any: (1) transfer of jurisdictional facilities between affiliated entities; (2) any securities issued for the benefit of any affiliated entity or in any new pledge or encumbrance of assets of an affiliated entity; or (3) any new affiliate contracts between affiliated entities. Audit staff also verified that all purchase accounting adjustment amounts were removed from account balances reported in the FERC Form No. 1.

Audit staff also evaluated compliance with the order's hold harmless provision, which required PPL to "hold transmission and wholesale customers harmless from costs related to the transaction for a period of five years to the extent that such costs exceed savings related to the transaction, which we interpret to include all transaction-related costs, not only costs related to consummating the transaction."

PPL properly excluded most of its transaction-related costs from formula rate billings to wholesale power and transmission customers, which included legal fees, consulting expenses, third-party costs, and internal labor costs. PPL had controls and procedures in place to hold harmless wholesale power and transmission customers, such as: payroll and time-reporting controls, communications from appropriate groups on how to charge certain costs, and supervisory review and approval of nonpayroll charges.

---

[22] *PPL Corporation*, 133 FERC ¶ 61,083, at PP 26-27 (2010).

[23] *Id.* P 1.

However, audit staff identified a small amount of transaction-related costs that flowed through to the formula rate billings.

In our review of transaction-related costs, audit staff determined that PPL's two service companies (PPL Services and LKS) allocated the most transaction-related costs to PPL ($113 million), LG&E & KU Capital ($32 million), and PPL Strategic Development ($1 million). These three entities held $146 million of the approximately $150 million in total transaction-related costs incurred during the audit period. The remaining $4 million of transaction-related costs were allocated to 12 other PPL entities, including PPL's 3 franchised public utilities, KU, LG&E, and PPL Electric, which are in bold in the table below. This table shows transaction costs allocated to each entity:

PPL Entity	Total Transaction Costs
1. PPL Corporation	$113,164,077
2. LG&E and KU Capital	$32,133,630
3. PPL Strategic Development	$1,262,186
4. PPL Global, LLC	$734,575
5. PPL Susquehanna LLC	$573,396
6. PPL Energy Services Holdings, LLC	$301,957
7. PPL Energy Plus, LLC	$298,902
8. PPL Generation LLC	$257,975
9. PPL Brunner Island, LLC	$222,337
10. PPL Montour LLC	$194,040
11. PPL Electric	**$163,329**
12. Louisville Gas & Electric	**$108,981**
13. Kentucky Utilities	**$95,060**
14. PPL Martins Creek, LLC	$58,814
15. PPL University Park, LLC	$24,408
Total	**$149,593,668**

In summary, PPL's three FPUs, KU, LG&E, and PPL Electric, were allocated approximately $367,000 in transaction-related costs, and they included approximately $329,229 of these costs in their wholesale power and transmission formula rate calculations. These costs consisted primarily of legal fees, consulting fees, wages of PPL staff in different departments, office supplies, and general and administrative expenses. These transaction-related costs included costs that were incurred before PPL filed its merger application with the Commission, during the transaction, and after the transaction was consummated. The Merger Order defines costs related to the transaction as "all transaction-related costs, not only costs related to consummating the transaction." The Merger Order also states, "If Applicants seek to recover transaction-related costs through their wholesale power or transmission rates they must submit a compliance filing that details how they are satisfying the hold harmless requirement. If Applicants seek to recover transaction-related costs in an existing formula rate that allows for such recovery, then that compliance filing must be filed in the section 205 docket in which the formula rate was approved by the Commission, as well as in the instant section 203 docket." PPL made no such filing to seek recovery for these costs.

Recommendations

We recommend that:

26. PPL Electric, LG&E, and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

27. PPL Electric, LG&E, and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

28. PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under section 35.19a of the Commission's regulations for LG&E and KU.

8. Allowance for Funds Used During Construction

KU's method of computing AFUDC on CWIP was deficient by compounding AFUDC monthly instead of semi-annually, including unrealized losses in its common equity balance used to calculate AFUDC, and using an incorrect balance for the common equity component.

Pertinent Guidance

AFUDC allows a company to recover its debt and equity costs used for funding construction. In Federal Power Commission's (FPC) Order No. 561, the Commission's predecessor agency, the FPC established a uniform formula for determining maximum rates to use for computing AFUDC.[24] The order states:

> The balances of long-term debt, preferred stock, and common equity for use in the formula for the current year will be the balances in such accounts at the end of the prior year; the cost rates for long-term debt and preferred stock will be the effective weighted average cost of such capital. The average short-term debt balances and related cost and the average construction work in progress balance will be estimated for the current year. We shall require, however, that public utilities and natural gas companies monitor their actual experience and adjust to actual at year-end if a significant deviation from the estimate should occur. For this purpose we shall consider a significant deviation to exist if the gross AFUDC rate exceeds by more than one-quarter of a percentage point (25 basis points) the rate that is derived from the formula by use of actual 13 monthly balances of construction work in progress and the actual weighted average cost and balances for short-term debt outstanding during the year.

On frequency of compounding of the AFUDC base, Order No. 561 states:

> We believe that a monthly compounding of AFUDC may result in excessive amounts capitalized since cash outlays for interest and dividends are not normally made on a monthly basis. We shall

---

> therefore permit compounding but no more frequently than semiannually.

18 C.F.R. pt. 101, Electric Plant Instruction 3 (17), Allowance for Funds Used During Construction, states in part:

> (a) Includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds.
>
> (b) The rates shall be determined annually. The balances for long-term debt, preferred stock and common equity shall be the actual book balances as of the end of the prior year … the short-term debt balances and related cost and the average balance for construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment, and fabrication shall be estimated for the current year with appropriate adjustments as actual data becomes available.

18 C.F.R. pt. 101, General Instruction 23 (C), Accounting for Other Comprehensive Income, states:

> (c) When it is probable that an item of other comprehensive income will be included in the development of cost-of-service rates in subsequent periods, that amount of unrealized losses or gains will be recorded in Accounts 182.3 or 254 as appropriate.

Background

AFUDC includes the net cost for the period borrowed funds were used for construction and a reasonable rate on other funds. KU recorded the balances below in Account 419.1, Allowance for Other Funds Used During Construction, and Account 432, Allowance for Borrowed Funds Used During Construction – Credit, during the audit period:

Year	Account 419.1	Account 432
2010	$521,152	$968,597
2011	$42,662	$12,955

Audit staff evaluated KU's AFUDC base and rate calculations, and the application of these calculations, to determine the accrual of AFUDC on CWIP for select construction projects. This evaluation identified several deficiencies with KU's AFUDC calculation methodology.

1. *AFUDC Compounded Monthly* – KU improperly compounded its AFUDC on a monthly basis. The Commission allows for compounding of AFUDC no more frequently than semi-annually.

2. *Unrealized Losses* – KU incorrectly included unrealized losses from Account 219, Accumulated Other Comprehensive Income (AOCI), in the common equity component of the AFUDC rate calculation. Specifically, KU recorded unrealized losses for its 20 percent ownership of Electric Energy, Inc.'s AOCI, which consisted of the unfunded portion of its pension and postretirement obligations. KU recorded Account 219 balances of ($2,854) and ($467,077) in 2010 and 2011, respectively. Accounting treatment for these unrealized losses was a debit to Account 219 and a credit to Account 123, Investment in Associated Companies (Major Only). Since these losses are unrealized and not used in determining KU's retained earnings, these amounts should not impact the amount of retained earnings used to calculate the AFUDC rate. Therefore, Account 219 should not be in the common equity component of the AFUDC calculation. However, it is appropriate for KU to include losses in determining the AFUDC rate once these amounts are realized, and enter retained earnings.

3. *Common Equity Balance* – KU input the wrong balance as the common equity component to its AFUDC calculation. For its 2010 AFUDC calculation, KU input the long-term debt amount of $1,648,779,405, instead of the common equity amount of $1,951,966,344, as found in the 2009 KU FERC Form No. 1 on line 16(c).

During the 2010 and 2011 years, KU accrued an aggregate amount of $1,545,366 in total AFUDC. Due to the above errors, this amount understated the correct actual amount, which was $1,550,647. The errors included overstatement effects of $290 and $305, due to the monthly compounding and inclusion of AOCI balance errors, respectively, offset by an understatement effect of $5,876 due to the common equity input error.

Recommendations

We recommend that:

29. KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

9. Formula Rate Line References

KU and LG&E’s formula rate Attachment O included multiple inaccurate line references.

Pertinent Guidance

Attachment O (Transmission Formula Rate) of KU and LG&E’s OATT required formula rate inputs derived from FERC Form No. 1 amounts.

Background

During our review, audit staff determined that KU and LG&E’s formula rate Attachment O included multiple inaccurate line references. Specifically, audit staff identified these incorrect line references:

Formula Rate Component	Att. O Reference	FERC Form No. 1 Line Item
Gross Plant in Service - Production	206.46g	205.46g
Gross Plant in Service - Transmission	206.58g	207.58g
Gross Plant in Service - Distribution	206.75g	207.75g
Gross Plant in Service - General & Intangible	206.5g and 206.90g	205.5g and 207.99g
Accumulated Depreciation - General & Intangible	219.27c	219.28c and 200.21c
Land Held For Future Use	214xd	Must specify line number
Materials & Supplies	227.8c and 227.15c	227.8c and 227.16c
O&M - Transmission	321.100b	321.112
O&M - Account 565	321.88b	321.96b
Depreciation Expense - General	336.10f	336.1f and 336.10f
Payroll Taxes	263i	Must specify line number
Highway and Vehicle Taxes	263i	Must specify line number
Property Taxes	263i	Must specify line number
Gross Receipts Taxes	263i	Must specify line number
Other Taxes	263i	Must specify line number
Wages & Salaries - Production	354.18b	354.20b
Wages & Salaries - Transmission	354.19b	354.21b
Wages & Salaries - Distribution	354.20b	354.23b
Wages & Salaries - Other	354.21, 22, 23b	354.24, 25, 27b
Proprietary Capital	112.15d	112.16d
Long term debt	112.18c-21c	112.18c-23c
Preferred Stock	112.3d	112.3c
Sales for Resale	311xh	Must specify page/line/column

Also, audit staff determined that KU and LG&E can improve the transparency of their formula rate calculations by better presenting all manual adjustments and purchase accounting adjustments that impact balances reported within Attachment O.

Recommendations

We recommend that:

30. LG&E and KU should develop and implement controls to ensure accurate and complete line references.

31. LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

10. FERC Form No. 60 Reporting

FERC Form No. 60 filings that PPL Services and LKS made contained several reporting errors relating to account misclassifications, supporting schedule discrepancies, and the reporting of convenience payments.

Pertinent Guidance

In 2006, centralized service companies became subject to the requirements of PUHCA 2005, which are incorporated into the Commission regulations in 18 C.F.R. pts. 366-369. The FERC Form No. 60 has specific reporting instructions for preparation of individual schedules and pages of the report. Regulations applicable to FERC Form No. 60 reporting by centralized service companies are:

18 C.F.R. section 366.23(a)(1), FERC Form No. 60, annual reports of centralized service companies, states, in part, "Every report must be submitted on the FERC Form No. 60 then in effect and must be prepared in accordance with the instructions incorporated into that form."

18 C.F.R. section 369(2)(ii), FERC Form No. 60, annual report of centralized service company, states in part, "The annual report in effect must be filed with the Commission as prescribed in Section 385.2011 of this chapter and as indicated in the General Instructions set out in the form, and must be properly completed and verified."

Background

Audit staff analyzed the FERC Form No. 60 filings made by PPL's two service companies – PPL Services and LKS. This analysis identified these reporting errors:

<u>900 Series Account Misclassifications</u>

PPL Services misclassified amounts reported on its 2010 FERC Form No. 60 for Accounts 920, Administrative and General Salaries, 921, Office Supplies and Expenses, and 923, Outside Services Employed. Specifically, PPL Services over-reported Account 920 by approximately $7 million, over-reported Account 921 by approximately $5 million, and under-reported Account 923 by approximately $12 million.

<u>Accounts 457.1, Regional Transmission Service Revenues, and 457.2, Miscellaneous Revenues, Reporting</u>

In its 2010 FERC Form No. 60, which reported only November and December 2010, PPL Services reported total billings of $67,368,843 on Schedule XVII – Analysis of Billing-Associate Companies. PPL Services then provided supporting documentation for total billings for November and December 2010 that totaled $68,300,671. This resulted in a variance of $931,828.

LKS identified adjustments in February 2010 for $138,642.20 and September 2010 for $1,426,588.45 in Account 457.1. For both months, both revenue and expenses were understated.

These errors occurred for various reasons, including administrative oversight, limited review procedures, and the absence of appropriate verification procedures.

Convenience Payments

Service companies report convenience payments on Schedule V of its FERC Form No. 60. Specifically, instruction 2 of Schedule V states:

> *If the service company has provided accommodation or convenience payments for associate companies, provide in a separate footnote a listing of total payments for each associate company.*

Audit staff reviewed convenience payment data from LKS. During this review, audit staff learned that some convenience payments, amounting to $252,448, were reflected on the 2010 income statement. These payments were recorded in Account 923, and were identified as having convenience payment expenditure types in error. Also, additional expenses, amounting to $1,570, were reflected as 2010 convenience payments and should not have been. Convenience payments should be charged only to balance sheet accounts and not income statement accounts. Therefore, these amounts were recorded in error. These errors caused no financial impact as they were included in both revenue and expense on the service company’s income statement.

These errors were due to human error involving misclassification and improper recording of expenses. To address them, LKS developed and implemented a procedure to determine if convenience payments had been modified to use a more detailed review of transactions to be disclosed.

Recommendations

We recommend that:

32. LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

33. LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

V. Other Matters

Formula Rate Recovery of Intangible Plant

KU and LG&E's formula rate under Attachment O of its joint OATT included templates for calculating rate base and cost-of-service components used to determine transmission formula rate billings. As relevant here, the Attachment O formula rate included a FERC Form No. 1 line reference for gross intangible plant in service. However, the Attachment O formula rate did not include a FERC Form No. 1 line reference for accumulated amortization related to intangible plant. Also, the Attachment O formula rate did not include a FERC Form No. 1 line reference for amortization expense of intangible plant. When KU and LG&E withdrew from MISO and began recovering their transmission revenue requirement under their joint OATT in March 2006, they adopted a formula rate that is substantially the same formula rate template in Attachment O to the MISO OATT, and carried over the same omissions related to intangible plant.

In October 2011, MISO and its transmission owners filed revisions to portions of the Attachment O formula rate, under FPA section 205**,** to clarify inclusion of intangible plant in the calculation of Attachment O revenue requirements under Docket No. ER12-297-000. The filing parties proposed to clarify the inclusion of intangible plant by adding the appropriate FERC Form No. 1 reference to intangible plant for the line item that contains accumulated depreciation on general and intangible plant. The filing parties also proposed to add the language "and Amortization" to the column heading for "Depreciation Expense" and add the language "and Intangible" to the line item for "General" depreciation and amortization expense. Finally, the filing parties proposed to add the appropriate FERC Form No. 1 reference for amortization expense of intangible plant. On December 21, 2011, the Commission accepted MISO's submittal for filing.

During audit fieldwork, audit staff pointed out that KU and LG&E's formula rate under its joint OATT continues to have omissions related to intangible plant that were identified and corrected in Docket No. ER12-297-000. Since KU and LG&E now recover their cost of service based on a formula rate substantially the same as the MISO formula rate, they should have made a filing with the Commission under FPA section 205, similar to what MISO and its transmission owners did in ER12-297-000, to address the proper recovery of intangible plant.

Specifically, in calculating the revenue requirement for the transmission formula rate, KU and LG&E included intangible plant assets recorded in Accounts 301, Organization, 302, Franchise and Consents, and 303, Miscellaneous Intangible Plant, as components of its rate base. However, KU and LG&E did not reduce any of these amounts by any related corresponding amortization recorded in Account 111, Accumulated Provision for Amortization of Electric Plant.

Recommendation

We recommend that:

LG&E and KU submit a filing with the Commission under FPA section 205 to adopt the revisions for intangible plant MISO proposed in Docket No. ER12-297-000 and incorporate them into KU and LG&E’s formula rate template under their joint OATT.

Re: PPL Corporation, Docket No. FA12-12-000
Comments on Draft Audit Report

Dear Mr. Craig:

PPL Corporation ("PPL") appreciates this opportunity to comment on the September 11, 2014 Draft Audit Report provided to PPL by the Division of Audits and Accounting of the Office of Enforcement of the Federal Energy Regulatory Commission ("DAA") relating to an audit conducted in the above-referenced docket (the "Draft Audit Report"). PPL agrees with the findings and accepts the recommendations contained in the Draft Audit Report.

In many cases, PPL already has completed implementation or begun implementation of corrective measures related to the audit findings. Attachment A to this letter explains the corrective actions taken or planned, and provides actual or target completion dates for these actions.

PPL wishes to thank DAA personnel involved in the audit for their professionalism and courtesy.

Sincerely,

Vincent Sorgi

Vincent Sorgi

Attachment

Attachment A

I. Draft Audit Report Section IV. Findings and Recommendation

1. *Long-Term Investment in Subsidiary*

Recommendation 1 - PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

> Corrective Action: On May 15, 2014, PPL Electric filed its 2014 Annual Update with the Federal Energy Regulatory Commission ("Commission") in Docket No. ER09-1148 pursuant to the Formula Rate Implementation Protocols of its Open Access Transmission Tariff. The Commission publicly posted the filing on its eLibrary system the same day. Therein, PPL Electric explained that it changed its method of accounting for the activities of its subsidiary PPL Receivables Corporation from the consolidated method of accounting to the equity method of accounting in accordance with the Commission's regulations and that the changes affected PPL Electric's 2009 through 2013 Rate Years, given that the formula rate was first implemented on November 1, 2008. PPL Electric served the 2014 Annual Update on all parties to the docket on May 15, 2014, and provided a copy to its Regional Transmission Organization, PJM Interconnection, L.L.C. ("PJM") for posting on the PJM website. This action is completed.

Recommendation 2 - PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

> Corrective Action 1: By November 30, 2014, PPL Electric will finalize its policy related to the differences in FERC and Securities and Exchange Commission ("SEC") reporting. Included in this policy will be a discussion of the accounting for investments in subsidiaries using the equity method of accounting and recording those investments in Account 123.1, Investment in Subsidiary Companies, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

> Corrective Action 2: In December 2013, PPL Electric implemented a new methodology that involves reviewing and cataloging electric industry-wide FERC Audit Report findings to ensure that PPL Electric appropriately reflects the accounting for similar transactions identified in such audit findings. The associated database is updated quarterly.

Corrective Action 3: On November 8, 2013, PPL Corporation modified its Journal Entry policy and procedures to specifically state that the impact on rate making mechanisms be considered for all journal entries affecting the domestic regulated utilities within the PPL family of companies.

Corrective Action 4: PPL Electric, together with PPL Services, will establish enhanced senior management-level procedures for on-going communication and oversight of company analysis and implementation of FERC developments related to accounting procedures and transmission formula rate calculations. This is expected to be completed within 90 days of the issuance of a final audit report.

Recommendation 3 - PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.

Corrective Action 1: By November 30, 2014, PPL Electric will finalize its policy related to the differences in FERC and SEC reporting. Included in this policy will be a discussion of the accounting for investments in subsidiaries using the equity method of accounting and recording those investments in Account 123.1, Investment in Subsidiary Companies, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

Corrective Action 2: PPL Electric has modified its reporting of PPL Receivables in FERC Form 1 to use the equity method of accounting. PPL Electric utilizes the FERC Form 1 as the basis for its formula rate inputs. By reporting PPL Receivables using the equity method, PPL Electric will no longer include PPL Receivables' operating activities in the formula rate calculation.

Recommendation 4 - PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the costs to properly account for PPL Receivables Corporation using the equity versus consolidated method of accounting recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

Recommendation 5 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

2. Tax Overpayments

Recommendation 6 - PPL Electric should reclassify federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account 146, Accounts Receivable from Associated Companies or Account 143, Other Accounts Receivable, as appropriate.

Corrective Action: PPL Electric reclassified federal and state income tax overpayments to the appropriate receivable accounts for the 2011 and 2012 balance sheets and for supporting pages of the 2012 FERC Form I Restatement filed on October 29, 2013. PPL Electric also reclassified federal and state income tax overpayments to the appropriate receivable accounts for rate years 2009-2013 and refunded the reduction in the revenue requirement, with interest, that resulted from including overpayments as receivables rather than prepayments as explained in the 2014 Annual Update filed with the Commission in May 15, 2014.

Recommendation 7 - PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

Corrective Action: PPL Electric will submit correcting entries to DAA within 30 days of the date of the issuance of the final audit report.

Recommendation 8 - PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

Corrective Action 1: PPL Electric revised procedural documentation to explain the accounting of federal and state income tax overpayments on November 25, 2013. PPL Electric also implemented an automated process that will no longer reclassify federal and state income tax overpayments to Account 165, which began with the December 31, 2013 accounting close.

Corrective Action 2: In addition, as this is an area where FERC accounting differs from SEC accounting, the policy relating to differences in FERC and SEC reporting that is referenced in Corrective Action 1 of Recommendation 2 will make reference to this issue. That policy will be completed by November 30, 2014.

Recommendation 9 - PPL Electric should revise procedures to appropriately determine its tax accrual amount.

Corrective Action: PPL Electric has revised its procedures to properly reclassify income tax overpayments, determined through its accrual and payment process, recorded in Account 236 to either Account 143 or Account 146. See corrective action to Recommendation 8.

Recommendation 10 - PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

Corrective Action: PPL Electric has completed this as part of the corrective actions discussed in response to Recommendation 6 above.

Recommendation 11 - For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the costs incorrectly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

Recommendation 12 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

3. *Manufactured Gas Plant Obligations*

Recommendation 13 - PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.

Corrective Action: As referenced in Corrective Action 1 of Recommendation 2, PPL Electric will finalize its policy related to the differences in FERC and SEC reporting by November 30, 2014. Included in this policy is a discussion of the recording of manufactured gas site remediation expenses to Account 426.5, Other Deductions, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

Recommendation 14 - PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

Corrective Action: PPL Electric provided notice of its accounting change relating to Manufactured Gas Plant costs in its 2014 Annual Update filed with the Commission on May 15, 2014 and will refrain on an ongoing basis from including these costs in its formula rate determinations based on the Division of Audits and Accounting's view that such costs were not incurred in providing service to wholesale transmission customers.

Recommendation 15 - PPL Electric should determine the amount of manufactured gas plant remediation expenses recovered through its formula rate.

Corrective Action: In September 2014, PPL Electric provided to DAA as Attachment 19 the amount of MGP environmental remediation expenses recovered through PPL Electric's transmission formula rate.

Recommendation 16 - For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the manufactured gas plant remediation expenses improperly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

Recommendation 17 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

4. Asset Retirement Obligation

Recommendation 18 - LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing relating to the recovery of asset retirement obligations within 90 days of the issuance of a final audit report.

Recommendation 19 - LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including ARO costs, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations, including ARO costs, (through a then-current date) within 60 days following issuance of a final audit report. Thereafter, LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing rate impacts for any final or remaining period of ARO cost recovery within 60 days following effectiveness of new rates pursuant to the FPA section 205 proceeding.

Recommendation 20 - For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under § 35.19a of the Commission's regulations.

Corrective Action: LG&E and KU will refund or credit to ratepayers amounts inappropriately recovered through the transmission formula rate during such period due to recovering asset retirement obligation costs with interest, and anticipate that they will do so within 30 days of each applicable final Commission order accepting the respective refund reports filed in response to Recommendation 19.

5. *Virginia Distribution Utility Plant Costs*

Recommendation 21 - LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (with interest through June 2014) regarding the consolidated anticipated audit findings, including Virginia distribution plant costs, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations, including Virginia distribution plant costs, (through a then-current date) within 60 days following issuance of a final audit report.

Recommendation 22 - For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under § 35.19a of the Commission's regulations.

Corrective Action: In connection with LG&E and KU's 2012 Annual Update for rates effective in the 2012 rate year which began on June 1, 2013 and ended on May 31, 2014, LG&E and KU corrected the inputs for Virginia plant so that costs associated with Virginia distribution utility plant no longer would flow through the formula rate. LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate during such period associated with Virginia plant distribution costs with interest and anticipate that they will do so within 30 days of each applicable final Commission order accepting the refund report filed in response to Recommendation 21.

6. *Accounting for Cost of Removal*

Recommendation 23 - LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

Corrective Action: As part of the August 2013 accounting close, LG&E and KU corrected their accounting entries for cost of removal. Effective with

LG&E and KU's 2013 Annual Update for rates effective in the 2013 rate year which began on June 1, 2014 and ends on May 31, 2015, LG&E and KU's formula rate no longer included rate impacts from such cost of removal accounting. LG&E and KU will file such correcting entries showing the reversal of amounts from Account 254 within 30 days of the issuance of the final audit report.

Recommendation 24 - For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

Corrective Action: LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate during such period due to cost of removal with interest and anticipate that they will do so within 30 days of each applicable final Commission order accepting the refund report filed in response to Recommendation 25.

Recommendation 25 - LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including cost of removal, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations including cost of removal (through a then-current date) within 60 days following issuance of a final audit report.

7. Merger Costs

Recommendation 26 - PPL Electric, LG&E and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

Corrective Action 1: PPL Corporation made organizational changes in 2011 to create PPL Strategic Development, LLC for the Strategic Development group, the group that coordinates merger and acquisition ("M&A") activities and bears the costs of these activities. This organizational change has made it easier to direct M&A charges to the proper business unit and thereby exclude them from the regulated entities.

Corrective Action 2: PPL Services has improved communications among the Strategic Development group, Office of General Counsel, the Financial

Department and other appropriate groups within PPL Corporation in an effort to establish proper accounting for M&A projects at the onset of such projects by:

a) Reviewing the FERC audit with budget coordinators and reemphasizing the need for stronger controls and accurate accounting for costs associated with Strategic Development acquisition and divesture activities. (completed December 2012).
b) Drafting and reviewing with budget coordinators the proposed Accounting Policy and Procedures for Costs Associated with Acquisitions and Divestures. (completed April 2014).
c) Issuing an email communication to budget coordinators instructing them how to charge transaction and transition costs related to the spinoff of PPL Corporation Supply Segment. (completed June 2014).
d) Conducting meetings with key individuals for the purpose of discussing and reviewing issues related to proper charging of PPL Corporation Supply Segment spinoff costs. (completed July and August, 2014).
e) Issuing the Accounting Policy and Procedures for Costs Associated with Acquisitions and Divestures and communicating said issuance to all budget coordinators. (completed August 2014).
f) Developing and issuing a message to all PPL Corporation supervisors to emphasize the importance of properly capturing all costs related to the spinoff of PPL Corporation Supply Segment. (completed September 2014).

Corrective Action 3: As of August 2014, PPL Services' Financial and Accounting Departments developed an accounting policy/procedure related to M&A activities and included it with other accounting policies and procedures on the Controller's Department Accounting Policies and Procedures intranet web site.

Corrective Action 4: PPL Services will include a summary of the M&A accounting policy in the Cost Allocation Manual during the next update by December 31, 2014.

Corrective Action 5: Commencing with LG&E and KU's 2013 Annual Update for rates effective in the 2013 rate year which began on June 1, 2014 and ends on May 31, 2015, LG&E and KU no longer included rate impacts from such transaction-related costs.

Corrective Action 6: During September 2013, LG&E and KU modified their Regulatory Compliance accounting policy to provide additional guidance on merger costs. Examples of merger transaction and transition costs were included in this accounting policy.

Corrective Action 7: During September 2013, LG&E and KU updated its "Merger Transaction and Transition Cost" accounting treatment guidance on the Company's intranet site with information regarding how merger transaction and transition costs are to be handled.

Recommendation 27 - PPL Electric, LG&E and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

Corrective Action 1: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including transaction-related costs, and certain rate under-billings to DAA. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations regarding transaction-related costs (through a then-current date) within 60 days following issuance of a final audit report.

Corrective Action 2: In September 2014, PPL Electric provided DAA with Attachment 1 that identifies the rate impact of recovering transaction-related costs through PPL Electric's transmission formula rate.

Recommendation 28 - PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under § 35.19a of the Commission's regulations for LG&E and KU.

Corrective Action 1: LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate due to such transaction-related costs, with interest, and anticipate that they will do so within 30 days of each applicable final Commission order accepting the respective refund report filed in response to Recommendation 27.

Corrective Action 2: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the transaction-related costs improperly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

8. *Allowance for Funds Used During Construction*

Recommendation 29 - KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

Corrective Action 1: Beginning with the February 2012 accounting close, KU modified its PowerPlant fixed asset accounting system to properly account for AFUDC. The PowerPlant automated AFUDC calculation was updated to compound interest semiannually rather than monthly.

Corrective Action 2:
During August 2012, KU finalized modifications to its AFUDC accounting policy and procedures to record AFUDC in accordance with Electric Plant Instruction 3(17) and Federal Power Commission Order 561.

9. *Formula Rate Line References*

Recommendation 30 - LG&E and KU should develop and implement controls to ensure accurate and complete line references.

Corrective Action: During 2012 and 2013, LG&E and KU developed and implemented, enhanced controls and procedures for the transmission formula rate template to ensure appropriate references going forward, similar to Sarbanes-Oxley–level controls. LG&E and KU strengthened spreadsheet controls on the formula rate template, such as password protection, increased automation and protection for calculations, clearly labeled input data entry, and increased internal cross-check features. LG&E and KU implemented written process documentation and a narrative for the controls describing the specific procedures and responsibilities for calculating and reviewing the transmission formula rate relating to calculation performed by its Rates Department, reviews performed by its Rates, Accounting, and Transmission Departments and sign-off at the senior management level prior to posting.

Recommendation 31 - LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing(s) relating to incorrect formula rate line references within 90 days of the issuance of a final audit report.

10. FERC Form No. 60 Reporting

Recommendation 32 - LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

Corrective Action 1: In March 2012, during preparation for the 2012 Form 60 filing, LG&E and KU developed a query within its Oracle financial system to better identify and capture LKS intercompany transactions that should be distinguished as convenience payments. Further enhancements were made to this query throughout 2013 to improve the efficiency of the query and to reduce manual adjustments to identify the convenience payments. In January and February 2013 LG&E and KU set up additional expenditure types within Oracle to also aid in identifying convenience payments.

Corrective Action 2: In November 2012, LG&E and KU developed a document to further educate employees on the identification of convenience payments. This document, along with a decision tree, has been shared with all employees via their intranet site.

Corrective Action 3: PPL Services implemented an automated process in 2012, using delivered allocation functionality in its general ledger software. The automated process performs the reclassification among Accounts 920, 921 and 923 based on cost type. The automated process mirrors the manual reclassification journal entries reflected in the 2011 FERC Form 60. As an additional control for PPL Services, beginning in 2012, the cost types in accounts 920, 921, and 923 are reviewed on a monthly basis to ensure that amounts are appropriately classified in these accounts.

Corrective Action 4: PPL Services developed written procedures for the preparation of Form 60. Prior to the filing of the 2013 Form 60 which occurred on April 30, 2014, Corporate Audit Services reviewed the process for preparing PPL Services' Form 60, the procedures used to allocate cost in the 2013 Form 60, and the completeness and accuracy of the 2013 Form 60. Management has requested Corporate Audit Services to include a review of the Form 60 in its audit plan.

Recommendation 33 - LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

Corrective Action 1: LKS will refile the 2010 FERC Form No. 60 within 90 days of the date the final audit report is issued.

Corrective Action 2: PPL Services will refile the 2010 FERC Form No. 60 within 90 days of the date the final audit report is issued.

II. Draft Audit Report Section V. Other Matters

Formula Rate Recovery of Intangible Plant

Recommendation - LG&E and KU submit a filing with the Commission under FPA section 205 to adopt the revisions for intangible plant MISO proposed in Docket No. ER12-297-000 and incorporate them into KU and LG&E's formula rate template under their joint OATT.

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing(s) adopting revisions for intangible plant as proposed by MISO and incorporating those changes into the formula rate template under their joint OATT within 90 days of the issuance of a final audit report.

PROSPECTUS SUPPLEMENT
(To Prospectus dated March 28, 2012)

$250,000,000

LG&E
a PPL company

Louisville Gas and Electric Company

4.65% First Mortgage Bonds due 2043

Louisville Gas and Electric Company is offering its First Mortgage Bonds, 4.65% Series due 2043. Interest on the Bonds will be payable on May 15 and November 15 of each year, commencing May 15, 2014, and at maturity, as further described in this prospectus supplement. The Bonds will mature on November 15, 2043 unless redeemed on an earlier date. We may, at our option, redeem the Bonds, in whole at any time or in part from time to time, as described herein. See "Description of the Bonds—Redemption."

The Bonds will be our senior secured indebtedness and will rank equally with all of our other outstanding senior secured indebtedness from time to time outstanding under our 2010 mortgage indenture. See "Description of the Bonds—Security; Lien of the Mortgage" herein.

Investing in the Bonds involves certain risks. See "Risk Factors" on page S-5 of this prospectus supplement, on page 4 of the accompanying prospectus and beginning on page 22 of our Annual Report on Form 10-K for the year ended December 31, 2012.

These securities have not been approved or disapproved by the Securities and Exchange Commission or any state securities commission, nor has the Securities and Exchange Commission or any state securities commission determined that this prospectus supplement or the accompanying prospectus is accurate or complete. Any representation to the contrary is a criminal offense.

	Price to Public(1)	Underwriting Discount	Proceeds, Before Expenses, to Us(1)
Per Bond	99.280%	0.875%	98.405%
Total	$248,200,000	$2,187,500	$246,012,500

---

(1) Plus accrued interest, if any, from November 14, 2013.

The underwriters expect to deliver the Bonds to the purchasers in book-entry form through the facilities of The Depository Trust Company on or about November 14, 2013.

We have not, and the underwriters have not, authorized anyone to provide any information other than that contained in or incorporated by reference into this prospectus supplement, the accompanying prospectus or any free writing prospectus prepared by or on behalf of us or to which we have referred you. We and the underwriters take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. We are not making an offer of these securities in any jurisdiction where the offer is not permitted. You should assume that the information contained in or incorporated by reference into this prospectus supplement, the accompanying prospectus or any free writing prospectus prepared by or on behalf of us or to which we have referred you is accurate only as of the respective date of such document. Our business, financial condition, results of operations and prospects may have changed since those dates.

TABLE OF CONTENTS
Prospectus Supplement

Prospectus

As used in this prospectus supplement and the accompanying prospectus, the terms “we,” “our” and “us” refer to Louisville Gas and Electric Company.

ABOUT THIS PROSPECTUS SUPPLEMENT

This prospectus supplement is part of a registration statement that Louisville Gas and Electric Company ("LG&E" or the "Company") has filed with the Securities and Exchange Commission (the "SEC") utilizing a "shelf" registration process. Under this shelf process, we are offering to sell the Bonds using this prospectus supplement and the accompanying prospectus. This prospectus supplement describes the specific terms of this offering. The accompanying prospectus and the information incorporated by reference therein and herein describe our business and give more general information, some of which may not apply to this offering. Generally, when we refer only to the "prospectus," we are referring to both parts combined. You should read this prospectus supplement together with the accompanying prospectus before making a decision to invest in the Bonds. If the information in this prospectus supplement or the information incorporated by reference in this prospectus supplement is inconsistent with the accompanying prospectus, the information in this prospectus supplement or the information incorporated by reference in this prospectus supplement will apply and will supersede that information in the accompanying prospectus.

Certain affiliates of LG&E, including PPL Corporation, LG&E and KU Energy LLC, Kentucky Utilities Company and other subsidiaries of PPL Corporation, have also registered their securities on the "shelf" registration statement referred to above. However, the Bonds are solely obligations of LG&E, and not of PPL Corporation or any of PPL Corporation's other subsidiaries or of any other affiliate of LG&E. None of PPL Corporation or any of LG&E's other affiliates will guarantee or provide any credit support for the Bonds.

WHERE YOU CAN FIND MORE INFORMATION

Available Information

LG&E files reports and other information with the SEC. You may obtain copies of this information by mail from the Public Reference Room of the SEC, 100 F Street, N.E., Room 1580, Washington, D.C. 20549, at prescribed rates. Further information on the operation of the SEC's Public Reference Room in Washington, D.C. can be obtained by calling the SEC at 1-800-SEC-0330.

LG&E's Internet Web site is http://www.lge-ku.com/lge/. Our ultimate parent, PPL Corporation, maintains an Internet Web site at www.pplweb.com. On the Investor Center page of that Web site, PPL Corporation provides access to SEC filings of LG&E free of charge, as soon as reasonably practicable after filing with the SEC. Neither the information at LG&E's Web site nor the information at PPL Corporation's Web site is incorporated in this prospectus supplement by reference, and you should not consider it a part of this prospectus supplement. LG&E's filings are also available at the SEC's Web site (www.sec.gov).

In addition, reports and other information concerning LG&E can be inspected at its offices at 220 West Main Street, Louisville, Kentucky 40202.

Incorporation by Reference

LG&E will "incorporate by reference" information into this prospectus supplement by disclosing important information to you by referring you to other documents that it files separately with the SEC. The information incorporated by reference is deemed to be part of this prospectus supplement, and later information that we file with the SEC will automatically update and supersede that information.

This prospectus supplement incorporates by reference the documents set forth below that have been previously filed with the SEC. These documents contain important information about LG&E.

SEC Filings	Period/Date
Annual Report on Form 10-K	Year ended December 31, 2012
Quarterly Reports on Form 10-Q	Quarters ended March 31, 2013, June 30, 2013 and September 30, 2013
Current Report on Form 8-K	Filed on October 3, 2013

Additional documents that LG&E files with the SEC pursuant to Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), between the date of this prospectus supplement and the termination of the offering of the Bonds are also incorporated herein by reference.

LG&E will provide without charge to each person, including any beneficial owner, to whom a copy of this prospectus supplement has been delivered, a copy of any and all of its filings with the SEC. You may request a copy of these filings by writing or telephoning LG&E at:

Louisville Gas and Electric Company

Telephone: (502) 627-2000

SUMMARY

The following summary contains information about the offering by LG&E of its Bonds described below. It does not contain all of the information that may be important to you in making a decision to purchase the Bonds. For a more complete understanding of LG&E and the offering of the Bonds, we urge you to read this entire prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein carefully including the "Risk Factors" sections and our financial statements and the notes to those statements.

The Issuer	Louisville Gas and Electric Company
Securities Offered	$250,000,000 aggregate principal amount of LG&E's First Mortgage Bonds, 4.65% Series due 2043 ("Bonds")
Stated Maturity Date	November 15, 2043
Interest Payment Dates	Interest on the Bonds will be payable on May 15 and November 15 of each year, commencing on May 15, 2014 and at maturity, or upon earlier redemption.
Interest Rate	4.65% per annum
Redemption	The Bonds may be redeemed at our option, in whole at any time or in part from time to time, at the redemption prices set forth in this prospectus supplement. The Bonds will not be entitled to the benefit of any sinking fund or other mandatory redemption and will not be repayable at the option of the Holder of a Bond prior to the Stated Maturity Date. See "Description of the Bonds—Redemption."
Ranking	The Bonds will be our senior secured indebtedness and will rank equally in right of payment with our existing and future first mortgage bonds issued under our Mortgage. See "Description of the Bonds—General" and "Description of the Bonds—Security; Lien of the Mortgage."
Security	The Bonds will be secured, equally and ratably, by the lien of the Mortgage, which constitutes a first mortgage lien on substantially all of our real and tangible personal property located in Kentucky and used in the generation, transmission and distribution of electricity and the storage, transportation and distribution of natural gas, other than property duly released from the lien of the Mortgage in accordance with the provisions thereof and certain other excepted property, and subject to certain Permitted Liens, as described under "Description of the Bonds—Security; Lien of the Mortgage."
Listing	We do not intend to list the Bonds on any securities exchange.
Form and Denomination	The Bonds will be initially issued in the form of one or more global securities, without coupons, in denominations of $2,000 and integral multiples of $1,000 in excess thereof, and deposited with the Trustee (as hereinafter defined) on behalf of The Depository Trust Company ("DTC"), as depositary, and registered in the name of DTC or its nominee. See "Description of the Bonds—General" and "Description of the Bonds—Book-Entry Only Issuance—The Depository Trust Company."

Use of Proceeds	We intend to use the net proceeds of this offering for the repayment of short-term debt obligations, including commercial paper borrowings, which as of September 30, 2013 had an average interest rate of approximately 0.28% and maturities under 30 days, for capital expenditures and for other general corporate purposes. See "Use of Proceeds."
Reopening of the Series	We may, without the consent of the Holders of the Bonds, increase the principal amount of the series and issue additional bonds of such series having the same ranking, interest rate, maturity and other terms as the Bonds, other than the date of initial issuance, the price to public, and, in some circumstances, the initial interest accrual date and the initial interest payment date. Any such additional bonds may, together with the Bonds, constitute a single series of securities under the Mortgage. See "Description of the Bonds—General."
Governing Law	The Bonds and the Mortgage are governed by the laws of the State of New York, except to the extent the Trust Indenture Act of 1939, as amended (the "Trust Indenture Act") is applicable and except where otherwise required by law. The effectiveness of the lien of the Mortgage, and the perfection and priority thereof, will be governed by Kentucky law.

RISK FACTORS

Before making a decision to invest in the Bonds, you should carefully consider the risk factors described below, the risk factors described on page 4 of the accompanying prospectus, and the risk factors set forth in our Annual Report on Form 10-K for the year ended December 31, 2012, beginning on page 22, as well as the other information included in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus.

Risks Relating to the Bonds

An active trading market for the Bonds may not develop.

The Bonds are new securities and we do not intend to apply for listing of the Bonds on any securities exchange. We cannot assure that an active trading market for the Bonds will develop. There can be no assurances as to the liquidity of any market that may develop for the Bonds, the ability of Holders to sell their Bonds or the price at which the Holders will be able to sell their Bonds. Future trading prices of the Bonds will depend on many factors including, among other things, prevailing interest rates, our operating results and the market for similar securities.

USE OF PROCEEDS

We intend to use the net proceeds of this offering for the repayment of short-term debt, including commercial paper borrowings, which as of September 30, 2013 had an average interest rate of approximately 0.28% and maturities under 30 days, for capital expenditures and for other general corporate purposes.

CAPITALIZATION

The following table sets forth our consolidated capitalization as of September 30, 2013 on an actual basis, and on an as adjusted basis to give effect to the issuance of the Bonds in this offering and the use of proceeds of this offering for the repayment of short-term debt. This table should be read in conjunction with our consolidated financial statements, the notes related thereto and the financial and operating data incorporated by reference into this prospectus supplement and the accompanying prospectus.

	As of September 30, 2013	
	Actual	**As Adjusted**
	(In millions)	
Short-term debt	72	0
Capitalization		
Long-term debt	1,112	1,112
Bonds offered hereby	—	250
Total long-term debt	1,112	1,362
Total stockholder's equity	1,919	1,919
Total capitalization	$3,031	$3,281

DESCRIPTION OF THE BONDS

The following summary description sets forth certain terms and provisions of the Bonds that we are offering by this prospectus supplement. Because this description is a summary, it does not describe every aspect of the Bonds or the Mortgage (as defined below) under which the Bonds will be issued, as described below. The Mortgage is filed as an exhibit to the registration statement of which the accompanying prospectus is a part. The Mortgage and its associated documents contain the full legal text of the matters described in this section. This summary is subject to and qualified in its entirety by reference to all of the provisions of the Bonds and the Mortgage, including definitions of certain terms used in the Mortgage. We also include references in parentheses to certain sections of the Mortgage. Whenever we refer to particular sections or defined terms of the Mortgage in this prospectus supplement, such sections or defined terms are incorporated by reference herein. The Mortgage has been qualified under the Trust Indenture Act, and you should refer to the Trust Indenture Act for provisions that apply to the Bonds.

General

We will issue the Bonds as a series of debt securities under our indenture, dated as of October 1, 2010 (as such indenture has been and may be amended and supplemented from time to time, the "Mortgage"), with The Bank of New York Mellon, as trustee (the "Trustee"). The Mortgage does not effectively limit the aggregate principal amount of bonds or other debt securities that may be issued thereunder, subject to meeting certain conditions to issuance, including those described below under "Issuance of Additional Mortgage Securities." The Bonds and all other debt securities issued previously or hereafter issued under the Mortgage are collectively referred to herein as "Mortgage Securities." The Mortgage constitutes a first mortgage lien, subject to Permitted Liens and exceptions and exclusions as described below, on substantially all of our real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage, transportation and distribution of natural gas. (See "—Security; Lien of the Mortgage" below.) As of the date of this prospectus supplement, approximately $1.109 billion of first mortgage bonds are issued and outstanding under the Mortgage, including $574 million which have been pledged to secure pollution control revenue bonds issued by various counties in Kentucky on our behalf.

The Bonds will be issued in fully registered form only, without coupons. The Bonds will be initially represented by one or more fully registered global securities (the "Global Securities") deposited with the Trustee, as custodian for The Depository Trust Company ("DTC"), as depositary, and registered in the name of DTC or DTC's nominee. A beneficial interest in a Global Security will be shown on, and transfers or exchanges thereof will be effected only through, records maintained by DTC and its participants, as described below under "—Book-Entry Only Issuance—The Depository Trust Company." The authorized denominations of the Bonds will be $2,000 and integral multiples of $1,000 in excess thereof. Except in limited circumstances described below, the Bonds will not be exchangeable for Bonds in definitive certificated form.

The Bonds are initially being offered in one series in the principal amount of $250,000,000. We may, without the consent of the Holders of the Bonds, increase the principal amount of the series and issue additional bonds of such series having the same ranking, interest rate, maturity and other terms (other than the date of initial issuance, the price to public and, in some circumstances, the initial interest accrual date and initial interest payment date) as the Bonds, but we will not reopen a series unless the additional bonds are fungible with the previously issued bonds for U.S. federal income tax purposes or such additional bonds are issued with a separate CUSIP number. Any such additional bonds would, together with the Bonds, constitute a single series of securities under the Mortgage and may be treated as a single class for all purposes under the Mortgage, including, without limitation, voting waivers and amendments.

Maturity; Interest

The Bonds will mature on November 15, 2043 (the "Stated Maturity Date") and will bear interest from the date of issuance at a rate of 4.65% per annum. Interest will be payable on the Bonds on May 15 and November 15 of each year (each, an "Interest Payment Date"), commencing on May 15, 2014, and at maturity (whether at the Stated Maturity Date, upon redemption or acceleration, or otherwise, "Maturity"). Subject to certain exceptions, the Mortgage provides for the payment of interest on an Interest Payment Date only to persons in whose names the Bonds are registered at the close of business on the Regular Record Date, which will be the May 1 and November 1 (whether or not a Business Day), as the case may be, immediately preceding the applicable Interest Payment Date; except that interest payable at Maturity will be paid to the person to whom principal is paid.

Interest on the Bonds will be calculated on the basis of a 360-day year of twelve 30-day months, and with respect to any period less than a full calendar month, on the basis of the actual number of days elapsed during the period.

Payment

So long as the Bonds are registered in the name of DTC, as depositary for the Bonds as described herein under "—Book-Entry Only Issuance—The Depository Trust Company" or DTC's nominee, payments on the Bonds will be made as described therein.

If we default in paying interest on a Bond, we will pay such defaulted interest either

- to Holders as of a special record date between 10 and 15 days before the proposed payment; or
- in any other lawful manner of payment that is consistent with the requirements of any securities exchange on which the Bonds may be listed for trading. (See Section 307.)

We will pay principal of and interest and premium, if any, on the Bonds at Maturity upon presentation of the Bonds at the corporate trust office of The Bank of New York Mellon in New York, New York, as our Paying Agent. In our discretion, we may change the place of payment on the Bonds, and we may remove any Paying Agent and may appoint one or more additional Paying Agents (including us or any of our affiliates). (See Section 702.)

If any Interest Payment Date, Redemption Date or Maturity of a Bond falls on a day that is not a Business Day, the required payment of principal, premium, if any, and/or interest will be made on the next succeeding Business Day as if made on the date such payment was due, and no interest will accrue on such payment for the period from and after such Interest Payment Date, Redemption Date or Maturity, as the case may be, to the date of such payment on the next succeeding Business Day.

"Business Day" means any day, other than a Saturday or Sunday, that is not a day on which banking institutions or trust companies in The City of New York, New York, or other city in which a paying agent for such Bond is located, are generally authorized or required by law, regulation or executive order to remain closed. (See Section 116.)

Form; Transfers; Exchanges

So long as the Bonds are registered in the name of DTC, as depositary for the Bonds as described herein under "—Book-Entry Only Issuance—The Depository Trust Company" or DTC's nominee, transfers and exchanges of beneficial interest in the Bonds will be made as described therein. In the event that the book-entry only system is discontinued, and the Bonds are issued in certificated form, you may exchange or transfer Bonds at the corporate trust office of the Trustee.

You may have your Bonds divided into Bonds of smaller denominations (of at least $2,000 and any larger amount that is an integral multiple of $1,000) or combined into Bonds of larger denominations, as long as the total principal amount is not changed. (See Section 305.)

There will be no service charge for any transfer or exchange of the Bonds, but you may be required to pay a sum sufficient to cover any tax or other governmental charge payable in connection therewith. We may block the transfer or exchange of (1) Bonds during a period of 15 days prior to giving any notice of redemption or (2) any Bond selected for redemption in whole or in part, except the unredeemed portion of any Bond being redeemed in part. (See Section 305.)

The Trustee acts as our agent for registering Bonds in the names of Holders and transferring the Bonds. We may appoint another agent (including one of our affiliates) or act as our own agent for this purpose. The entity performing the role of maintaining the list of registered Holders is called the "Security Registrar." It will also perform transfers. In our discretion, we may change the place for registration of transfer of the Bonds and may designate a different entity as the Security Registrar, including us or one of our affiliates. (See Sections 305 and 702.)

Redemption

We may, at our option, redeem the Bonds, in whole at any time or in part from time to time. If we redeem the Bonds before May 15, 2043 (the date that is six months prior to the Stated Maturity Date), the Bonds will be redeemed by us at a redemption price equal to the greater of:

- 100% of the principal amount of the Bonds to be so redeemed; and
- as determined by the Quotation Agent, the sum of the present values of the remaining scheduled payments of principal and interest on the Bonds to be so redeemed (not including any portion of such payments of interest accrued to the date of redemption) discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Adjusted Treasury Rate, plus 15 basis points;

plus, in either case, accrued and unpaid interest on the principal amount of Bonds to be so redeemed to the Redemption Date.

If we redeem the Bonds on or after May 15, 2043, the Bonds will be redeemed by us at a redemption price equal to 100% of the principal amount of the Bonds to be so redeemed, plus accrued and unpaid interest on the principal amount of the Bonds to be so redeemed to the Redemption Date.

"Adjusted Treasury Rate" means, with respect to any Redemption Date, the rate per annum equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for that Redemption Date.

"Comparable Treasury Issue" means the United States Treasury security selected by the Quotation Agent as having an actual or interpolated maturity comparable to the remaining term of the Bonds to be redeemed to the Stated Maturity Date that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of the Bonds being redeemed.

"Comparable Treasury Price" means, with respect to any Redemption Date:

- the average of five Reference Treasury Dealer Quotations for that Redemption Date, after excluding the highest and lowest Reference Treasury Dealer Quotations; or
- if the Quotation Agent obtains fewer than five Reference Treasury Dealer Quotations, the average of all of those quotations received.

"Quotation Agent" means one of the Reference Treasury Dealers appointed by us.

"*Reference Treasury Dealer*" means:

- each of Citigroup Global Markets Inc. and RBS Securities Inc. (or their respective affiliates that are Primary Treasury Dealers, as defined below), a Primary Treasury Dealer selected by SunTrust Robinson Humphrey, Inc. and a Primary Treasury Dealer selected by U.S. Bancorp Investments, Inc., or their respective successors, unless any of them ceases to be a primary U.S. Government securities dealer in the United States (a "Primary Treasury Dealer"), in which case we will substitute another Primary Treasury Dealer; and
- any other Primary Treasury Dealer selected by us (after consultation with the Quotation Agent).

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any Redemption Date, the average, as determined by the Quotation Agent, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount), as provided to the Quotation Agent by that Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding that Redemption Date.

The Bonds will not be subject to a sinking fund or other mandatory redemption provisions and will not be repayable at the option of the Holder prior to the Stated Maturity Date.

The Bonds will be redeemable upon notice of redemption to each holder of Bonds to be redeemed by mail between 30 days and 60 days prior to the Redemption Date.

If less than all of the Bonds are to be redeemed, the Trustee will select the Bonds or portions thereof to be redeemed. In the absence of any provision for selection, the Trustee will choose a method of random selection that it deems fair and appropriate. (See Sections 503 and 504.)

We may make any redemption at our option conditional upon the receipt by the Paying Agent, on or prior to the date fixed for redemption, of money sufficient to pay the redemption price. If the Paying Agent has not received such money by the date fixed for redemption, we will not be required to redeem such Bonds. (See Section 504.)

Bonds called for redemption will cease to bear interest on the Redemption Date. We will pay the redemption price and any accrued interest once you surrender the Bond for redemption. (See Section 505.) If only part of a Bond is redeemed, the Trustee will deliver to you a new Bond of the same series for the remaining portion without charge. (See Section 506.)

Security; Lien of the Mortgage

General

Except as described below under this heading and under "—Issuance of Additional Mortgage Securities," and subject to the exceptions described under "—Satisfaction and Discharge," all Mortgage Securities, including the Bonds, will be secured, equally and ratably, by the lien of the Mortgage, which constitutes, subject to Permitted Liens as described below, a first mortgage lien on substantially all of our real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage, transportation and distribution of natural gas (other than property duly released from the lien of the Mortgage in accordance with the provisions thereof and other than Excepted Property, as described below). We sometimes refer to our property that is subject to the lien of the Mortgage as "Mortgaged Property."

We may obtain the release of property from the lien of the Mortgage from time to time, upon the bases provided for such release in the Mortgage. See "—Release of Property."

We may enter into supplemental indentures with the Trustee, without the consent of the Holders, in order to subject additional property (including property that would otherwise be excepted from such lien) to the lien of the Mortgage. (See Section 1401.) This property would constitute Property Additions and would be available as a basis for the issuance of Mortgage Securities. See "—Issuance of Additional Mortgage Securities."

The Mortgage provides that after-acquired property (other than Excepted Property) will be subject to the lien of the Mortgage. (See Granting Clause Second.) However, in the case of consolidation or merger (whether or not we are the surviving company) or transfer of the Mortgaged Property as or substantially as an entirety, the Mortgage will not be required to be a lien upon any of the properties either owned or subsequently acquired by the successor company except properties acquired from us in or as a result of such transfer, as well as improvements, extensions and additions (as defined in the Mortgage) to such properties and renewals, replacements and substitutions of or for any part or parts thereof. See Section 1303 and "—Consolidation, Merger and Conveyance of Assets as an Entirety."

Excepted Property. The lien of the Mortgage does not cover, among other things, the following types of property: property located outside of Kentucky and not specifically subjected or required to be subjected to the lien of the Mortgage; property not used by us in our electric generation, transmission and distribution business or our gas storage, transportation and distribution business; cash and securities not paid, deposited or held under the Mortgage or required so to be; contracts, leases and other agreements of all kinds, contract rights, bills, notes and other instruments, revenues, accounts receivable, claims, demands and judgments; governmental and other licenses, permits, franchises, consents and allowances; intellectual property rights and other general intangibles; vehicles, movable equipment, aircraft and vessels; all goods, stock in trade, wares, merchandise and inventory held for the purpose of sale or lease in the ordinary course of business; materials, supplies, inventory and other personal property consumable in the operation of our business; fuel; tools and equipment; furniture and furnishings; computers and data processing, telecommunications and other facilities used primarily for administrative or clerical purposes or otherwise not used in connection with the operation or maintenance of electric generation, transmission and distribution facilities or natural gas storage, transportation and distribution facilities; coal, ore, gas, oil and other minerals and timber rights; electric energy and capacity, gas, steam, water and other products generated, produced, manufactured, purchased or otherwise acquired; real property and facilities used primarily for the production or gathering of natural gas; property which has been released from the lien of the Mortgage; and leasehold interests. We sometimes refer to our property not covered by the lien of the Mortgage as "Excepted Property." (See Granting Clauses.) Properties held by any of our subsidiaries, as well as properties leased from others, would not be subject to the lien of the Mortgage.

Permitted Liens. The lien of the Mortgage is subject to Permitted Liens described in the Mortgage. Such Permitted Liens include liens existing at the execution date of the Mortgage, purchase money liens and other liens placed or otherwise existing on property acquired by us after the execution date of the Mortgage at the time we acquire it, tax liens and other governmental charges which are not delinquent or which are being contested in good faith, mechanics', construction and materialmen's liens, certain judgment liens, easements, reservations and rights of others (including governmental entities) in, and defects of title to, our property, certain leases and leasehold interests, liens to secure public obligations, rights of others to take minerals, timber, electric energy or capacity, gas, water, steam or other products produced by us or by others on our property, rights and interests of Persons other than us arising out of agreements relating to the common ownership or joint use of property, and liens on the interests of such Persons in such property and liens which have been bonded or for which other security arrangements have been made. (See Granting Clauses and Section 101.)

The Mortgage also provides that the Trustee will have a lien, prior to the lien on behalf of the Holders of the Mortgage Securities, upon the Mortgaged Property as security for our payment of its reasonable compensation and expenses and for indemnity against certain liabilities. (See Section 1107.) Any such lien would be a Permitted Lien under the Mortgage.

Issuance of Additional Mortgage Securities

The maximum principal amount of Mortgage Securities that may be authenticated and delivered under the Mortgage is subject to the issuance restrictions described below; provided, however, that the maximum principal amount of Mortgage Securities outstanding at any one time shall not exceed One Quintillion Dollars ($1,000,000,000,000,000,000), which amount may be changed by supplemental indenture. (See Section 301.) Mortgage Securities of any series may be issued from time to time on the basis of, and in an aggregate principal amount not exceeding:

- 66⅔% of the Cost or Fair Value to the Company (whichever is less) of Property Additions (as described below) which do not constitute Funded Property (generally, Property Additions which have been made the basis of the authentication and delivery of Mortgage Securities, the release of Mortgaged Property or the withdrawal of cash, which have been substituted for retired Funded Property or which have been used for other specified purposes) after certain deductions and additions, primarily including adjustments to offset property retirements;
- the aggregate principal amount of Retired Securities (as described below); or
- an amount of cash deposited with the Trustee. (See Article Four.)

Property Additions generally include any property which is owned by us and is subject to the lien of the Mortgage except (with certain exceptions) goodwill, going concern value rights or intangible property, or any property the acquisition or construction of which is properly chargeable to one of our operating expense accounts in accordance with U.S. generally accepted accounting principles. (See Section 104.)

Retired Securities means, generally, Mortgage Securities which are no longer outstanding under the Mortgage, which have not been retired by the application of Funded Cash and which have not been used as the basis for the authentication and delivery of Mortgage Securities, the release of property or the withdrawal of cash.

We intend to issue the Bonds on the basis of Property Additions. At August 31, 2013 approximately $1.28 billion of Property Additions were available to us to be used as the basis for the authentication and delivery of Mortgage Securities (including the Bonds offered hereby). (See Article Four)

Release of Property

Unless an Event of Default has occurred and is continuing, we may obtain the release from the lien of the Mortgage of any Mortgaged Property, except for cash held by the Trustee, upon delivery to the Trustee of an amount in cash equal to the amount, if any, by which sixty-six and two-thirds percent (66⅔%) of the Cost of the property to be released (or, if less, the Fair Value to us of such property at the time it became Funded Property) exceeds the aggregate of:

- an amount equal to 66⅔% of the aggregate principal amount of obligations secured by Purchase Money Liens upon the property to be released and delivered to the Trustee;
- an amount equal to 66⅔% of the Cost or Fair Value to us (whichever is less) of certified Property Additions not constituting Funded Property after certain deductions and additions, primarily including adjustments to offset property retirements (except that such adjustments need not be made if such Property Additions were acquired or made within the 90-day period preceding the release);

- the aggregate principal amount of Mortgage Securities we would be entitled to issue on the basis of Retired Securities (with such entitlement being waived by operation of such release);
- the aggregate principal amount of Mortgage Securities delivered to the Trustee (with such Mortgage Securities to be canceled by the Trustee);
- any amount of cash and/or an amount equal to 66⅔% of the aggregate principal amount of obligations secured by Purchase Money Liens upon the property released that is delivered to the trustee or other holder of a lien prior to the lien of the Mortgage, subject to certain limitations described in the Mortgage; and
- any taxes and expenses incidental to any sale, exchange, dedication or other disposition of the property to be released.

(See Section 803.)

As used in the Mortgage, the term "Purchase Money Lien" means, generally, a lien on the property being released which is retained by the transferor of such property or granted to one or more other Persons in connection with the transfer or release thereof, or granted to or held by a trustee or agent for any such Persons, and may include liens which cover property in addition to the property being released and/or which secure indebtedness in addition to indebtedness to the transferor of such property (See Section 101.).

Unless an Event of Default has occurred and is continuing, property which is not Funded Property may generally be released from the lien of the Mortgage without depositing any cash or property with the Trustee as long as (a) the aggregate amount of Cost or Fair Value to us (whichever is less) of all Property Additions which do not constitute Funded Property (excluding the property to be released) after certain deductions and additions, primarily including adjustments to offset property retirements, is not less than zero or (b) the Cost or Fair Value (whichever is less) of property to be released does not exceed the aggregate amount of the Cost or Fair Value to us (whichever is less) of Property Additions acquired or made within the 90-day period preceding the release. (See Section 804.)

The Mortgage provides simplified procedures for the release of minor properties and property taken by eminent domain, and provides for dispositions of certain obsolete property and grants or surrender of certain rights without any release or consent by the Trustee. (See Sections 805, 807 and 808.)

If we retain any interest in any property released from the lien of the Mortgage, the Mortgage will not become a lien on such property or such interest therein or any improvements, extensions or additions to such property or renewals, replacements or substitutions of or for such property or any part or parts thereof. (See Section 809.)

Withdrawal of Cash

Unless an Event of Default has occurred and is continuing, and subject to certain limitations, cash held by the Trustee may, generally, (1) be withdrawn by us (a) to the extent of sixty-six and two-thirds percent (66⅔%) of the Cost or Fair Value to us (whichever is less) of Property Additions not constituting Funded Property, after certain deductions and additions, primarily including adjustments to offset retirements (except that such adjustments need not be made if such Property Additions were acquired or made within the 90-day period preceding the withdrawal) or (b) in an amount equal to the aggregate principal amount of Mortgage Securities that we would be entitled to issue on the basis of Retired Securities (with the entitlement to such issuance being waived by operation of such withdrawal) or (c) in an amount equal to the aggregate principal amount of any outstanding Mortgage Securities delivered to the Trustee; or (2) upon our request, be applied to (a) the purchase of Mortgage Securities in a manner and at a price approved by us or (b) the payment (or provision for payment) at stated maturity of any Mortgage Securities or the redemption (or provision for payment) of any Mortgage Securities which are redeemable (see Section 806); provided, however, that cash deposited with the Trustee as the basis for the authentication and delivery of Mortgage Securities may, in addition, be withdrawn in an amount not exceeding the aggregate principal amount of cash delivered to the Trustee for such purpose. (See Section 404.)

Events of Default

An "Event of Default" occurs under the Mortgage if

- we do not pay any interest on any Mortgage Securities within 30 days of the due date;
- we do not pay principal or premium, if any, on any Mortgage Securities on the due date;
- we remain in breach of any other covenant (excluding covenants specifically dealt with elsewhere in this section) in respect of any Mortgage Securities for 90 days after we receive a written notice of default stating we are in breach and requiring remedy of the breach; the notice must be sent by either the Trustee or Holders of 25% of the principal amount of outstanding Mortgage Securities; the Trustee or such Holders can agree to extend the 90-day period and such an agreement to extend will be automatically deemed to occur if we initiate corrective action within such 90-day period and we are diligently pursuing such action to correct the default; or
- we file for bankruptcy or certain other events in bankruptcy, insolvency, receivership or reorganization occur.

(See Section 1001.)

Remedies

Acceleration of Maturity

If an Event of Default occurs and is continuing, then either the Trustee or the Holders of not less than 25% in principal amount of the outstanding Mortgage Securities may declare the principal amount of all of the Mortgage Securities to be due and payable immediately. (See Section 1002.)

Rescission of Acceleration

After the declaration of acceleration has been made and before the Trustee has obtained a judgment or decree for payment of the money due, such declaration and its consequences will be rescinded and annulled, if

(i) we pay or deposit with the Trustee a sum sufficient to pay:

  - all overdue interest;
  - the principal of and premium, if any, which have become due otherwise than by such declaration of acceleration and interest thereon;
  - interest on overdue interest to the extent lawful; and
  - all amounts due to the Trustee under the Mortgage; and

(ii) all Events of Default, other than the nonpayment of the principal which has become due solely by such declaration of acceleration, have been cured or waived as provided in the Mortgage.

(See Section 1002.)

For more information as to waiver of defaults, see "—Waiver of Default and of Compliance" below.

Appointment of Receiver and Other Remedies

Subject to the Mortgage, under certain circumstances and to the extent permitted by law, if an Event of Default occurs and is continuing, the Trustee has the power to appoint a receiver of the

Mortgaged Property, and is entitled to all other remedies available to mortgagees and secured parties under the Uniform Commercial Code or any other applicable law. (See Section 1016.)

Control by Holders; Limitations

Subject to the Mortgage, if an Event of Default occurs and is continuing, the Holders of a majority in principal amount of the outstanding Mortgage Securities will have the right to

- direct the time, method and place of conducting any proceeding for any remedy available to the Trustee, or
- exercise any trust or power conferred on the Trustee.

The rights of Holders to make direction are subject to the following limitations:

- the Holders' directions may not conflict with any law or the Mortgage; and
- the Holders' directions may not involve the Trustee in personal liability where the Trustee believes indemnity is not adequate.

The Trustee may also take any other action it deems proper which is not inconsistent with the Holders' direction. (See Sections 1012 and 1103.)

In addition, the Mortgage provides that no Holder of any Mortgage Security will have any right to institute any proceeding, judicial or otherwise, with respect to the Mortgage for the appointment of a receiver or for any other remedy thereunder unless

- that Holder has previously given the Trustee written notice of a continuing Event of Default;
- the Holders of 25% in aggregate principal amount of the outstanding Mortgage Securities have made written request to the Trustee to institute proceedings in respect of that Event of Default and have offered the Trustee reasonable indemnity against costs, expenses and liabilities incurred in complying with such request; and
- for 60 days after receipt of such notice, request and offer of indemnity, the Trustee has failed to institute any such proceeding and no direction inconsistent with such request has been given to the Trustee during such 60-day period by the Holders of a majority in aggregate principal amount of outstanding Mortgage Securities.

Furthermore, no Holder will be entitled to institute any such action if and to the extent that such action would disturb or prejudice the rights of other Holders. (See Sections 1007 and 1103.)

However, each Holder has an absolute and unconditional right to receive payment when due and to bring a suit to enforce that right. (See Section 1008.)

Notice of Default

The Trustee is required to give the Holders of the Mortgage Securities notice of any default under the Mortgage to the extent required by the Trust Indenture Act, unless such default has been cured or waived; except that in the case of an Event of Default of the character specified in the third bullet point under "—Events of Default" (regarding a breach of certain covenants continuing for 90 days after the receipt of a written notice of default), no such notice shall be given to such Holders until at least 60 days after the occurrence thereof. (See Section 1102.) The Trust Indenture Act currently permits the Trustee to withhold notices of default (except for certain payment defaults) if the Trustee in good faith determines the withholding of such notice to be in the interests of the Holders.

We will furnish the Trustee with an annual statement as to our compliance with the conditions and covenants in the Mortgage. (See Section 709.)

Waiver of Default and of Compliance

The Holders of a majority in aggregate principal amount of the outstanding Mortgage Securities may waive, on behalf of the Holders of all outstanding Mortgage Securities, any past default under the Mortgage, except a default in the payment of principal, premium or interest, or with respect to compliance with certain provisions of the Mortgage that cannot be amended without the consent of the Holder of each outstanding Mortgage Security affected. (See Section 1013.)

Compliance with certain covenants in the Mortgage or otherwise provided with respect to Mortgage Securities may be waived by the Holders of a majority in aggregate principal amount of the affected Mortgage Securities, considered as one class. (See Section 710.)

Consolidation, Merger and Conveyance of Assets as an Entirety

Subject to the provisions described below, we have agreed to preserve our corporate existence. (See Section 704.)

We have agreed not to consolidate with or merge with or into any other entity or convey, transfer or lease the Mortgaged Property as or substantially as an entirety to any entity unless

- the entity formed by such consolidation or into which we merge, or the entity which acquires or which leases the Mortgaged Property substantially as an entirety, is an entity organized and existing under the laws of the United States of America or any State or Territory thereof or the District of Columbia; and
- expressly assumes, by supplemental indenture, the due and punctual payment of the principal of, and premium and interest on, all the outstanding Mortgage Securities and the performance of all of our covenants under the Mortgage; and
- such entity confirms the lien of the Mortgage on the Mortgaged Property; and
- in the case of a lease, such lease is made expressly subject to termination by (i) us or by the Trustee and (ii) the purchaser of the property so leased at any sale thereof, at any time during the continuance of an Event of Default; and
- immediately after giving effect to such transaction, no Event of Default, and no event which after notice or lapse of time or both would become an Event of Default, will have occurred and be continuing.

(See Section 1301.)

In the case of the conveyance or other transfer of the Mortgaged Property as or substantially as an entirety to any other person, upon the satisfaction of all the conditions described above we would be released and discharged from all obligations under the Mortgage and on the Mortgage Securities then outstanding unless we elect to waive such release and discharge. (See Section 1304.)

The Mortgage does not prevent or restrict:

- any consolidation or merger after the consummation of which we would be the surviving or resulting entity; or
- any conveyance or other transfer, or lease, of any part of the Mortgaged Property which does not constitute the entirety or substantially the entirety thereof.

If following a conveyance or other transfer, or lease, of any part of the Mortgaged Property, the Fair Value of the Mortgaged Property retained by the Company exceeds an amount equal to three-halves (3/2) of the aggregate principal amount of all outstanding Mortgage Securities, then the part of the Mortgaged Property so conveyed, transferred or leased shall be deemed not to constitute the entirety or substantially the entirety of the Mortgaged Property. This Fair Value will be determined within 90 days of the conveyance or transfer by an independent expert that we select and that is approved by the Trustee.

(See Sections 1305 and 1306.)

Modification of Mortgage

Without Holder Consent. Without the consent of any Holders of Mortgage Securities, we and the Trustee may enter into one or more supplemental indentures for any of the following purposes:

- to evidence the succession of another entity to us;
- to add one or more covenants or other provisions for the benefit of the Holders of all or any series or tranche of Mortgage Securities, or to surrender any right or power conferred upon us;
- to correct or amplify the description of any property at any time subject to the lien of the Mortgage; or to better assure, convey and confirm unto the Trustee any property subject or required to be subjected to the lien of the Mortgage; or to subject to the lien of the Mortgage additional property (including property of others), to specify any additional Permitted Liens with respect to such additional property and to modify the provisions in the Mortgage for dispositions of certain types of property without release in order to specify any additional items with respect to such additional property;
- to add any additional Events of Default, which may be stated to remain in effect only so long as the Mortgage Securities of any one more particular series remains outstanding;
- to change or eliminate any provision of the Mortgage or to add any new provision to the Mortgage that does not adversely affect the interests of the Holders in any material respect;
- to establish the form or terms of any series or tranche of Mortgage Securities;
- to provide for the issuance of bearer securities;
- to evidence and provide for the acceptance of appointment of a successor Trustee or by a co-trustee or separate trustee;
- to provide for the procedures required to permit the utilization of a noncertificated system of registration for any series or tranche of Mortgage Securities;
- to change any place or places where
    - we may pay principal, premium and interest,
    - Mortgage Securities may be surrendered for transfer or exchange, and
    - notices and demands to or upon us may be served;
- to amend and restate the Mortgage as originally executed, and as amended from time to time, with such additions, deletions and other changes that do not adversely affect the interest of the Holders in any material respect;
- to cure any ambiguity, defect or inconsistency or to make any other changes that do not adversely affect the interests of the Holders in any material respect; or
- to increase or decrease the maximum principal amount of Mortgage Securities that may be outstanding at any time.

In addition, if the Trust Indenture Act is amended after the date of the Mortgage so as to require changes to the Mortgage or so as to permit changes to, or the elimination of, provisions which, at the date of the Mortgage or at any time thereafter, were required by the Trust Indenture Act to be contained in the Mortgage, the Mortgage will be deemed to have been amended so as to conform to such amendment or to effect such changes or elimination, and we and the Trustee may, without the consent of any Holders, enter into one or more supplemental indentures to effect or evidence such amendment.

(See Section 1401.)

With Holder Consent. Except as provided above, the consent of the Holders of at least a majority in aggregate principal amount of the Mortgage Securities of all outstanding series, considered as one class, is generally required for the purpose of adding to, or changing or eliminating any of the provisions of, the Mortgage pursuant to a supplemental indenture. However, if less than all of the series of outstanding Mortgage Securities are directly affected by a proposed supplemental indenture, then such proposal only requires the consent of the Holders of a majority in aggregate principal amount of the outstanding Mortgage Securities of all directly affected series, considered as one class. Moreover, if the Mortgage Securities of any series have been issued in more than one tranche and if the proposed supplemental indenture directly affects the rights of the Holders of Mortgage Securities of one or more, but less than all, of such tranches, then such proposal only requires the consent of the Holders of a majority in aggregate principal amount of the outstanding Mortgage Securities of all directly affected tranches, considered as one class.

However, no amendment or modification may, without the consent of the Holder of each outstanding Mortgage Security directly affected thereby,

- change the stated maturity of the principal or interest on any Mortgage Security (other than pursuant to the terms thereof), or reduce the principal amount, interest or premium payable (or the method of calculating such rates) or change the currency in which any Mortgage Security is payable, or impair the right to bring suit to enforce any payment;
- create any lien (not otherwise permitted by the Mortgage) ranking prior to the lien of the Mortgage with respect to all or substantially all of the Mortgaged Property, or terminate the lien of the Mortgage on all or substantially all of the Mortgaged Property (other than in accordance with the terms of the Mortgage), or deprive any Holder of the benefits of the security of the lien of the Mortgage;
- reduce the percentages of Holders whose consent is required for any supplemental indenture or waiver of compliance with any provision of the Mortgage or of any default thereunder and its consequences, or reduce the requirements for quorum and voting under the Mortgage; or
- modify certain of the provisions of the Mortgage relating to supplemental indentures, waivers of certain covenants and waivers of past defaults with respect to Mortgage Securities.

A supplemental indenture which changes, modifies or eliminates any provision of the Mortgage expressly included solely for the benefit of Holders of Mortgage Securities of one or more particular series or tranches will be deemed not to affect the rights under the Mortgage of the Holders of Mortgage Securities of any other series or tranche.

(See Section 1402.)

Satisfaction and Discharge

Any Mortgage Securities or any portion thereof will be deemed to have been paid and no longer outstanding for purposes of the Mortgage and, at our election, our entire indebtedness with respect to those securities will be satisfied and discharged, if there shall have been irrevocably deposited with the Trustee or any Paying Agent (other than the Company), in trust:

- money sufficient, or
- in the case of a deposit made prior to the maturity of such Mortgage Securities, non-redeemable Eligible Obligations (as defined in the Mortgage) sufficient, or
- a combination of the items listed in the preceding two bullet points, which in total are sufficient,

to pay when due the principal of, and any premium, and interest due and to become due on such Mortgage Securities or portions of such Mortgage Securities on and prior to their maturity.

(See Section 901.)

Our right to cause our entire indebtedness in respect of the Mortgage Securities of any series to be deemed to be satisfied and discharged as described above will be subject to the satisfaction of any conditions specified in the instrument creating such series.

The Mortgage will be deemed satisfied and discharged when no Mortgage Securities remain outstanding and when we have paid all other sums payable by us under the Mortgage. (See Section 902.)

All moneys we pay to the Trustee or any Paying Agent on Bonds that remain unclaimed at the end of two years after payments have become due may be paid to or upon our order. Thereafter, the Holder of such Bond may look only to us for payment. (See Section 703.)

Duties of the Trustee; Resignation and Removal of the Trustee; Deemed Resignation

The Trustee will have, and will be subject to, all the duties and responsibilities specified with respect to an indenture trustee under the Trust Indenture Act. Subject to these provisions, the Trustee will be under no obligation to exercise any of the powers vested in it by the Mortgage at the request of any holder of Mortgage Securities, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred thereby. The Trustee will not be required to expend or risk its own funds or otherwise incur financial liability in the performance of its duties if the Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

The Trustee may resign at any time by giving written notice to us.

The Trustee may also be removed by act of the Holders of a majority in principal amount of the then outstanding Mortgage Securities of any series.

No resignation or removal of the Trustee and no appointment of a successor trustee will become effective until the acceptance of appointment by a successor trustee in accordance with the requirements of the Mortgage.

Under certain circumstances, we may appoint a successor trustee and if the successor accepts, the Trustee will be deemed to have resigned.

(See Section 1110.)

Evidence to be Furnished to the Trustee

Compliance with Mortgage provisions is evidenced by written statements of our officers or persons selected or paid by us. In certain cases, opinions of counsel and certifications of an engineer, accountant, appraiser or other expert (who in some cases must be independent) must be furnished. In addition, the Mortgage requires us to give to the Trustee, not less than annually, a brief statement as to our compliance with the conditions and covenants under the Mortgage.

Miscellaneous Provisions

The Mortgage provides that certain Mortgage Securities, including those for which payment or redemption money has been deposited or set aside in trust as described under "—Satisfaction and Discharge" above, will not be deemed to be "outstanding" in determining whether the Holders of the requisite principal amount of the outstanding Mortgage Securities have given or taken any demand, direction, consent or other action under the Mortgage as of any date, or are present at a meeting of Holders for quorum purposes. (See Section 101.)

We will be entitled to set any day as a record date for the purpose of determining the Holders of outstanding Mortgage Securities of any series entitled to give or take any demand, direction, consent or other action under the Mortgage, in the manner and subject to the limitations provided in the Mortgage. In certain circumstances, the Trustee also will be entitled to set a record date for action by Holders. If such a record date is set for any action to be taken by Holders of particular Mortgage Securities, such action may be taken only by persons who are Holders of such Mortgage Securities on the record date. (See Section 107.)

Governing Law

The Mortgage and the Mortgage Securities provide that they are to be governed by and construed in accordance with the laws of the State of New York except where the Trust Indenture Act is applicable or where otherwise required by law. (See Section 115.) The effectiveness of the lien of the Mortgage, and the perfection and priority thereof, will be governed by Kentucky law.

Regarding the Trustee

The Trustee under the Mortgage is the Bank of New York Mellon ("BNYM"). In addition to acting as Trustee, BNYM also maintains various banking and trust relationships with us and some of our affiliates.

Book-Entry Only Issuance—The Depository Trust Company

DTC will act as the initial securities depositary for the Bonds. The Bonds will be issued as fully-registered securities registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. The global bonds will be deposited with the Trustee as custodian for DTC.

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds securities for its participants ("Direct Participants") and also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts, thereby eliminating the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). The rules that apply to DTC and those using its system are on file with the SEC. More information about DTC can be found at www.dtcc.com.

Purchases of the Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the Bonds on DTC's records. The ownership interest of each actual purchaser ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchases, but Beneficial Owners should receive written confirmations providing details of the transactions, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which they purchased Bonds. Transfers of ownership interests on the Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in Bonds, except in the event that use of the book-entry system for the Bonds is discontinued.

To facilitate subsequent transfers, all Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of the Bonds with DTC and their registration in the name of Cede & Co. or such other nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts the Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners, will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Notices will be sent to DTC.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Bonds unless authorized by a Direct Participant in accordance with DTC's procedures. Under its usual procedures, DTC mails an omnibus proxy to us as soon as possible after the record date. The omnibus proxy assigns the voting or consenting rights of Cede & Co. to those Direct Participants to whose accounts the Bonds are credited on the record date. We believe that these arrangements will enable the Beneficial Owners to exercise rights equivalent in substance to the rights that can be directly exercised by a registered Holder of the Bonds.

Payments of principal and interest on the Bonds will be made to Cede & Co. (or such other nominee of DTC). DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from us or the Trustee, on payable date in accordance with their respective holdings shown on DTC's records. Payments by participants to Beneficial Owners will be governed by standing instructions and customary practices and will be the responsibility of such participant and not of DTC, the Trustee or us, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment to Cede & Co. (or such other nominee of DTC) is the responsibility of us or the Trustee. Disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners is the responsibility of Direct and Indirect Participants.

A Beneficial Owner will not be entitled to receive physical delivery of the Bonds. Accordingly, each Beneficial Owner must rely on the procedures of DTC to exercise any rights under the Bonds.

DTC may discontinue providing its services as securities depositary with respect to the Bonds at any time by giving us or the Trustee reasonable notice. In the event no successor securities depositary is obtained, certificates for the Bonds will be printed and delivered.

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources that we believe to be reliable, but neither we nor the underwriters take any responsibility for the accuracy of this information.

UNDERWRITING

LG&E and the underwriters have entered into an underwriting agreement with respect to the Bonds. Subject to certain conditions, each underwriter has severally, but not jointly, agreed to purchase the principal amount of Bonds indicated in the following table:

Underwriters	Principal Amount of Bonds
Citigroup Global Markets Inc.	$ 50,000,000
RBS Securities Inc.	50,000,000
SunTrust Robinson Humphrey, Inc.	50,000,000
U.S. Bancorp Investments, Inc.	50,000,000
BBVA Securities Inc.	12,500,000
BNY Mellon Capital Markets, LLC	12,500,000
Mizuho Securities USA Inc.	12,500,000
PNC Capital Markets LLC	12,500,000
Total	$250,000,000

The underwriters are committed to take and pay for all of the Bonds being offered, if any are taken.

Bonds sold by the underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this prospectus supplement. Any Bonds sold by the underwriters to securities dealers may be sold at a discount from the initial public offering price of up to 0.50% of the principal amount of the Bonds. Any such securities dealers may resell any Bonds purchased from the underwriters to certain other brokers or dealers at a discount from the initial public offering price of up to 0.25% of the principal amount of the Bonds. If all the Bonds are not sold at the initial offering price, the underwriters may change the offering price and the other selling terms.

The Bonds are a new issue of securities with no established trading market. LG&E has been advised by the underwriters that the underwriters intend to make a market in the Bonds as permitted by applicable laws and regulations. The underwriters are not obligated, however, to do so and any such market making may be discontinued at any time without notice at the sole discretion of the underwriters. Accordingly, no assurance can be given as to the liquidity of, or trading markets for, the Bonds.

In connection with the offering, the underwriters may purchase and sell Bonds in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of Bonds than they are required to purchase in the offering. Stabilizing transactions consist of certain bids or purchases made for the purpose of preventing or retarding a decline in the market price of the Bonds while the offering is in progress.

The underwriters also may impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased Bonds sold by or for the account of such underwriter in stabilizing or short covering transactions.

These activities by the underwriters, as well as other purchases by the underwriters for their own accounts, may stabilize, maintain or otherwise affect the market price of the Bonds. As a result, the price of the Bonds may be higher than the price that otherwise might exist in the open market. If these activities are commenced, they may be discontinued by the underwriters at any time. These transactions may be effected in the over-the-counter market or otherwise.

It is expected that delivery of the Bonds will be made on or about the day specified on the cover page of this prospectus supplement, which will be the fifth business day (T+5) following the date of this prospectus supplement. Under Rule 15c6-1 under the Exchange Act, trades in the secondary market generally are required to settle within three business days (T+3), unless the parties to any such trade expressly agree otherwise. Accordingly, the purchasers who wish to trade the Bonds on the date of this prospectus supplement or the next succeeding business day will be required to specify an alternative settlement cycle at the time of any such trade to prevent a failed settlement. Purchasers of the Bonds who wish to trade the Bonds on the date of this prospectus supplement or the next succeeding business day should consult their own advisors.

LG&E estimates that its share of the total expenses of the offering, excluding the underwriting discount, will be approximately $500,000.

LG&E has agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended.

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the underwriters and their respective affiliates have provided, and may in the future provide, a variety of these services to LG&E and to persons and entities with relationships with LG&E, for which they received or will receive customary fees and expenses. In particular, certain of the underwriters or their affiliates are agents or lenders under the credit or other borrowing facilities of LG&E and its affiliates.

In the ordinary course of their various business activities, the underwriters and their respective affiliates, officers, directors and employees may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of LG&E (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with LG&E. The underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

The offering of the Bonds by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part.

VALIDITY OF THE BONDS

Pillsbury Winthrop Shaw Pittman LLP, New York, New York, and Dorothy E. O'Brien, Esq., Deputy General Counsel, Legal and Environmental Affairs of LG&E will pass upon the validity of the Bonds for LG&E. Davis Polk & Wardwell LLP, New York, New York, will pass upon the validity of the Bonds for the underwriters. However, all matters pertaining to the organization of LG&E and LG&E's title to its property and the liens of the Mortgage upon LG&E's properties will be passed upon only by Ms. O'Brien and Frost & Brown Todd LLC, Louisville, Kentucky. As to matters involving the law of the Commonwealth of Kentucky, Pillsbury Winthrop Shaw Pittman LLP and Davis Polk & Wardwell LLP will rely on the opinion of Ms. O'Brien, Frost & Brown Todd LLC and Stoll Keenon Ogden PLLC, Louisville, Kentucky.

We will provide the specific terms of these securities in supplements to this prospectus. You should read this prospectus and the supplements carefully before you invest.

We may offer the securities directly or through underwriters or agents. The applicable prospectus supplement will describe the terms of any particular plan of distribution.

Investing in the securities involves certain risks. See "Risk Factors" on page 4.

PPL Corporation's common stock is listed on the New York Stock Exchange and trades under the symbol "PPL."

These securities have not been approved or disapproved by the Securities and Exchange Commission or any state securities commission, nor has the Securities and Exchange Commission or any state securities commission determined that this prospectus is accurate or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is March 28, 2012.

TABLE OF CONTENTS

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement that PPL Corporation, PPL Capital Funding, Inc. ("PPL Capital Funding"), PPL Energy Supply, LLC ("PPL Energy Supply"), PPL Electric Utilities Corporation ("PPL Electric"), LG&E and KU Energy LLC ("LKE"), Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") have each filed with the Securities and Exchange Commission, or SEC, using the "shelf" registration process. Under this shelf process, we may, from time to time, sell combinations of the securities described in this prospectus in one or more offerings. Each time we sell securities, we will provide a prospectus supplement that will contain a description of the securities we will offer and specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. You should read both this prospectus and any prospectus supplement together with additional information described under "Where You Can Find More Information."

We may use this prospectus to offer from time to time:

- shares of PPL Corporation Common Stock, par value $.01 per share ("PPL Common Stock");
- shares of PPL Corporation Preferred Stock, par value $.01 per share ("PPL Preferred Stock");
- contracts or other rights to purchase shares of PPL Common Stock or PPL Preferred Stock ("PPL Stock Purchase Contracts");
- stock purchase units, each representing (1) a PPL Stock Purchase Contract and (2) debt securities or preferred trust securities of third parties (such as debt securities or subordinated debt securities of PPL Capital Funding, preferred trust securities of a subsidiary trust or United States Treasury securities) that are pledged to secure the stock purchase unit holders' obligations to purchase PPL Common Stock or PPL Preferred Stock under the PPL Stock Purchase Contracts ("PPL Stock Purchase Units");
- PPL Corporation's Depositary Shares, issued under a deposit agreement and representing a fractional interest in PPL Preferred Stock;
- PPL Capital Funding's unsecured and unsubordinated debt securities ("PPL Capital Funding Debt Securities");
- PPL Capital Funding's unsecured and subordinated debt securities ("PPL Capital Funding Subordinated Debt Securities");
- PPL Energy Supply's unsecured and unsubordinated debt securities;
- PPL Energy Supply's unsecured and subordinated debt securities;
- PPL Energy Supply's preferred limited liability company membership interests;
- PPL Electric's Series Preferred Stock ("PPL Electric Preferred Stock");
- PPL Electric's Preference Stock ("PPL Electric Preference Stock");
- PPL Electric's Depositary Shares, issued under a deposit agreement and representing a fractional interest in PPL Electric Preferred Stock or PPL Electric Preference Stock;
- PPL Electric's First Mortgage Bonds issued under PPL Electric's 2001 indenture, as amended and supplemented ("PPL Electric First Mortgage Bonds"), which will be secured by the lien of the 2001 indenture on PPL Electric's electric distribution and certain transmission properties (subject to certain exceptions to be described in a prospectus supplement);
- LKE's unsecured and unsubordinated debt securities;
- LG&E's First Mortgage Bonds issued under LG&E's 2010 indenture, as amended and supplemented ("LG&E First Mortgage Bonds"), which will be secured by the lien of the 2010 indenture on LG&E's

Kentucky electric generation, transmission and distribution properties and natural gas distribution properties (subject to certain exceptions to be described in a prospectus supplement); and

- KU's First Mortgage Bonds issued under KU's 2010 indenture, as amended and supplemented ("KU First Mortgage Bonds"), which will be secured by the lien of the 2010 indenture on KU's Kentucky electric generation, transmission and distribution properties (subject to certain exceptions to be described in a prospectus supplement).

We sometimes refer to the securities listed above collectively as the "Securities."

PPL Corporation will fully and unconditionally guarantee the payment of principal, premium and interest on the PPL Capital Funding Debt Securities and PPL Capital Funding Subordinated Debt Securities as will be described in supplements to this prospectus. We sometimes refer to PPL Corporation's guarantees of PPL Capital Funding Debt Securities as "PPL Guarantees" and PPL Corporation's guarantees of PPL Capital Funding Subordinated Debt Securities as the "PPL Subordinated Guarantees."

Information contained herein relating to each registrant is filed separately by such registrant on its own behalf. No registrant makes any representation as to information relating to any other registrant or Securities or guarantees issued by any other registrant, except that information relating to PPL Capital Funding's Securities is also attributed to PPL Corporation.

As used in this prospectus, the terms "we," "our" and "us" generally refer to:

- PPL Corporation with respect to Securities, PPL Guarantees or PPL Subordinated Guarantees issued by PPL Corporation or PPL Capital Funding;
- PPL Energy Supply with respect to Securities issued by PPL Energy Supply;
- PPL Electric, with respect to Securities issued by PPL Electric;
- LKE, with respect to Securities issued by LKE;
- LG&E, with respect to Securities issued by LG&E; and
- KU, with respect to Securities issued by KU.

For more detailed information about the Securities, the PPL Guarantees and the PPL Subordinated Guarantees, you can read the exhibits to the registration statement. Those exhibits have been either filed with the registration statement or incorporated by reference to earlier SEC filings listed in the registration statement.

RISK FACTORS

Investing in the Securities involves certain risks. You are urged to read and consider the risk factors relating to an investment in the Securities described in the Annual Reports on Form 10-K of PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E and KU, as applicable, for the year ended December 31, 2011, and incorporated by reference in this prospectus. Before making an investment decision, you should carefully consider these risks as well as other information we include or incorporate by reference in this prospectus. The risks and uncertainties we have described are not the only ones affecting PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E and KU. The prospectus supplement applicable to each type or series of Securities we offer may contain a discussion of additional risks applicable to an investment in us and the particular type of Securities we are offering under that prospectus supplement.

FORWARD-LOOKING INFORMATION

Certain statements included or incorporated by reference in this prospectus, including statements concerning expectations, beliefs, plans, objectives, goals, strategies, future events or performance and underlying assumptions and other statements which are other than statements of historical fact are "forward-looking statements" within the meaning of the federal securities laws. Although we believe that the expectations and assumptions reflected in these statements are reasonable, there can be no assurance that these expectations will prove to be correct. Forward-looking statements are subject to many risks and uncertainties, and actual results may differ materially from the results discussed in forward-looking statements. In addition to the specific factors discussed in the "Risk Factors" section in this prospectus and our reports that are incorporated by reference, the following are among the important factors that could cause actual results to differ materially from the forward- looking statements:

- fuel supply cost and availability;
- continuing ability to recover fuel costs and environmental expenditures in a timely manner at LG&E and KU, and natural gas supply costs at LG&E;
- weather conditions affecting generation, customer energy use and operating costs;
- operation, availability and operating costs of existing generation facilities;
- the length of scheduled and unscheduled outages at our generating facilities;
- transmission and distribution system conditions and operating costs;
- potential expansion of alternative sources of electricity generation;
- potential laws or regulations to reduce emissions of "greenhouse" gases or the physical effects of climate change;
- collective labor bargaining negotiations;
- the outcome of litigation against us;
- potential effects of threatened or actual terrorism, war or other hostilities, or natural disasters;
- our commitments and liabilities;
- market demand and prices for energy, capacity, transmission services, emission allowances, renewable energy credits and delivered fuel;
- competition in retail and wholesale power and natural gas markets;
- liquidity of wholesale power markets;
- defaults by counterparties under energy, fuel or other power product contracts;
- market prices of commodity inputs for ongoing capital expenditures;
- capital market conditions, including the availability of capital or credit, changes in interest rates and certain economic indices, and decisions regarding capital structure;
- stock price performance of PPL Corporation;
- volatility in the fair value of debt and equity securities and its impact on the value of assets in PPL Susquehanna's nuclear plant decommissioning trust funds and in defined benefit plans, and the potential cash funding requirements if fair value declines;
- interest rates and their effect on pension, retiree medical, and nuclear decommissioning liabilities, and interest payable on certain debt securities;
- volatility in or the impact of other changes in financial or commodity markets and economic conditions;
- profitability and liquidity, including access to capital markets and credit facilities;
- new accounting requirements or new interpretations or applications of existing requirements;

- changes in securities and credit ratings;
- foreign currency exchange rates;
- current and future environmental conditions, regulations and other requirements and the related costs of compliance, including environmental capital expenditures, emission allowance costs and other expenses;
- legal, regulatory, political, market or other reactions to the 2011 incident at the nuclear generating facility at Fukushima, Japan, including additional Nuclear Regulatory Commission requirements;
- political, regulatory or economic conditions in states, regions or countries where we conduct business;
- receipt of necessary governmental permits, approvals and rate relief;
- new state, federal or foreign legislation, including new tax, environmental, healthcare or pension-related legislation;
- state, federal and foreign regulatory developments;
- the outcome of any rate cases by our regulated utilities;
- the impact of any state, federal or foreign investigations applicable to us and the energy industry;
- the effect of any business or industry restructuring;
- development of new projects, markets and technologies;
- performance of new ventures; and
- business dispositions or acquisitions and our ability to successfully operate such acquired businesses and realize expected benefits from business acquisitions.

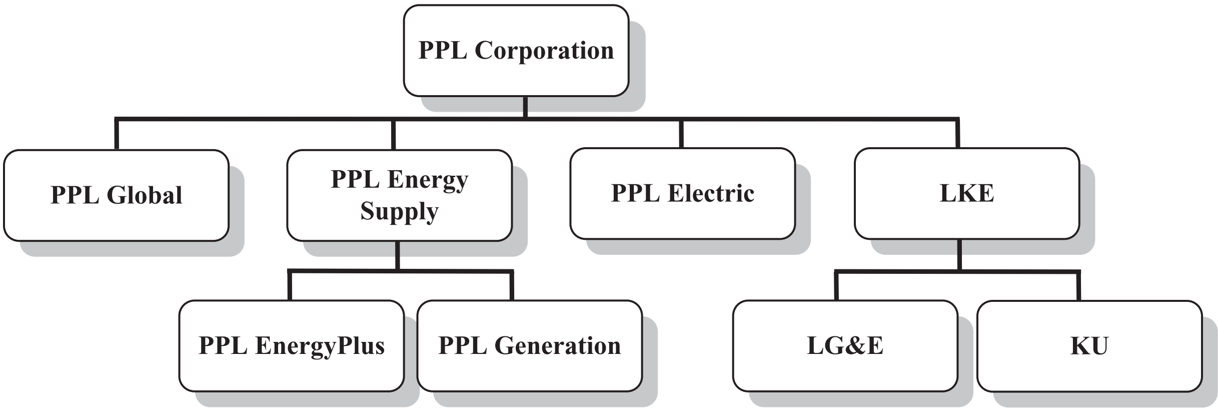
Any such forward-looking statements should be considered in light of such important factors and in conjunction with other documents we file with the SEC.

New factors that could cause actual results to differ materially from those described in forward-looking statements emerge from time to time, and it is not possible for us to predict all such factors, or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking statement speaks only as of the date on which such statement is made, and, except as required by applicable law, we undertake no obligation to update the information contained in such statement to reflect subsequent developments or information.

PPL CORPORATION

PPL Corporation, incorporated in 1994 and headquartered in Allentown, Pennsylvania, is an energy and utility holding company. Through its subsidiaries, PPL Corporation generates electricity from power plants in the northeastern, northwestern and southeastern United States; markets wholesale or retail energy primarily in the northeastern and northwestern portions of the United States; and delivers electricity to customers in Pennsylvania, Kentucky, Virginia, Tennessee and the United Kingdom, and natural gas to customers in Kentucky.

PPL Corporation's principal subsidiaries are shown below:



PPL Corporation conducts its operations through the following segments:

Supply

PPL Corporation, through its indirect, wholly owned subsidiaries, PPL Generation, LLC ("PPL Generation") and PPL EnergyPlus, LLC ("PPL EnergyPlus") owns and operates electricity generating power plants, markets and trades this electricity and other purchased power to competitive wholesale and retail markets and acquires and develops competitive domestic generation projects. Both of these subsidiaries are direct, wholly owned subsidiaries of PPL Energy Supply. See "PPL Energy Supply, LLC" below for more information.

Pennsylvania Regulated

PPL Corporation's Pennsylvania Regulated segment includes the regulated electric delivery operations of PPL Electric. As of December 31, 2011, PPL Electric delivered electricity to approximately 1.4 million customers in eastern and central Pennsylvania. See "PPL Electric Utilities Corporation" below for more information.

Kentucky Regulated

The Kentucky Regulated segment consists of the operations of LKE, which owns and operates regulated public utilities engaged in the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas, representing primarily the activities of LG&E and KU. As of December 31, 2011, LG&E provided electric service to approximately 394,000 customers and provided natural gas service to approximately 319,000 customers in Kentucky, and KU delivered electricity to approximately 541,000 customers in Kentucky and Virginia. See "Louisville Gas and Electric Company" and "Kentucky Utilities Company," respectively, for more information.

International Regulated

The International Regulated segment consists primarily of electric distribution operations in the United Kingdom. Through its subsidiaries, as of December 31, 2011, PPL Global delivered electricity to approximately 7.8 million end-users in the United Kingdom. PPL Global is a wholly owned, indirect subsidiary of PPL Corporation.

PPL Corporation's subsidiaries, including PPL Energy Supply, PPL Electric, LKE, LG&E and KU, are separate legal entities and are not liable for the debts of PPL Corporation, and PPL Corporation is not liable for the debts of its subsidiaries (other than under the PPL Guarantees of PPL Capital Funding Debt Securities and PPL Subordinated Guarantees of PPL Capital Funding Subordinated Debt Securities). None of PPL Energy Supply, PPL Electric, LKE, LG&E or KU will guarantee or provide other credit or funding support for the Securities to be offered by PPL Corporation pursuant to this prospectus.

PPL CAPITAL FUNDING, INC.

PPL Capital Funding is a Delaware corporation and a wholly owned subsidiary of PPL Corporation. PPL Capital Funding's primary business is to provide PPL Corporation with financing for its operations. PPL Corporation will fully and unconditionally guarantee the payment of principal, premium and interest on the PPL Capital Funding Debt Securities pursuant to the PPL Guarantees and the PPL Capital Funding Subordinated Debt Securities pursuant to the PPL Subordinated Guarantees, as will be described in supplements to this prospectus.

PPL ENERGY SUPPLY, LLC

PPL Energy Supply, formed in 2000 and headquartered in Allentown, Pennsylvania, is an energy company engaged through its subsidiaries in the generation and marketing of electricity, primarily in the northeastern and northwestern power markets of the United States. PPL Energy Supply's major operating subsidiaries are PPL Generation and PPL Energy Plus. PPL Energy Supply is an indirect wholly owned subsidiary of PPL Corporation. See "PPL Corporation" above for more information.

PPL Generation and PPL EnergyPlus

At December 31, 2011, PPL Energy Supply owned or controlled, through its subsidiaries, 10,508 MW of electric power generation capacity and was implementing capital projects at certain of its existing generation facilities in Pennsylvania and Montana to provide 191 MW of additional generating capacity by the end of 2013. Generating capacity controlled by PPL Generation and other PPL Energy Supply subsidiaries includes power obtained through PPL EnergyPlus' tolling or power purchase agreements.

PPL Generation owns and operates a portfolio of competitive domestic power generating assets. Its power plants are located in Pennsylvania and Montana and are fueled by coal, uranium, natural gas, oil and water. The electricity from these plants is sold to PPL Energy Plus under FERC-jurisdictional power purchase agreements.

PPL Energy Plus sells electricity produced by PPL Generation subsidiaries, participates in wholesale market load-following auctions, and markets various energy products and commodities such as: capacity, transmission, financial transmission rights, coal, natural gas, oil, uranium, emission allowances, renewable energy credits and other commodities in competitive wholesale and competitive retail markets, primarily in the northeastern and northwestern United States.

PPL Energy Plus also provides energy-related products and services, such as engineering and mechanical contracting, construction and maintenance services, to commercial and industrial customers.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by PPL Energy Supply pursuant to this prospectus.

PPL ELECTRIC UTILITIES CORPORATION

PPL Electric, incorporated in 1920 and headquartered in Allentown, Pennsylvania, is a direct subsidiary of PPL Corporation and a regulated public utility. As of December 31, 2011, PPL Electric delivered electricity to approximately 1.4 million customers in eastern and central Pennsylvania. PPL Electric also provides electricity supply as a "provider of last resort," or "PLR," to retail customers in that territory that do not choose an alternative electricity provider.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by PPL Electric pursuant to this prospectus.

LG&E AND KU ENERGY LLC

LKE, a holding company formed in 2003, is a wholly owned subsidiary of PPL Corporation. LKE's regulated utility operations are conducted through its subsidiaries, LG&E and KU, which constitute substantially all of LKE's assets. LG&E and KU are regulated public utilities engaged in the generation, transmission, distribution and sale of electric energy. LG&E also engages in the distribution and sale of natural gas. LG&E and KU maintain their separate identities and serve customers in Kentucky under their respective names. KU also serves customers in Virginia under the Old Dominion Power name and customers in Tennessee under the KU name.

See "Louisville Gas and Electric Company" and "Kentucky Utilities Company" below for additional information about LG&E and KU.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by LKE pursuant to this prospectus.

LOUISVILLE GAS AND ELECTRIC COMPANY

LG&E, headquartered in Louisville, Kentucky and incorporated in Kentucky in 1913, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. At December 31, 2011, LG&E owned or controlled 3,352 MW of electric power generation capacity. Subject to certain regulatory approvals, LG&E is planning capital projects at certain of its existing generation facilities to provide 483 MW of additional generating capacity by 2016. LG&E also anticipates retiring 563 MW of generating capacity by the end of 2015 to meet certain environmental regulations. As of December 31, 2011, LG&E provided electric service to approximately 394,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in nine counties. As of December 31, 2011, LG&E provided natural gas service to approximately 319,000 customers in its electric service area and seven additional counties in Kentucky.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by LG&E pursuant to this prospectus.

KENTUCKY UTILITIES COMPANY

KU, headquartered in Lexington, Kentucky and incorporated in Kentucky in 1912 and Virginia in 1991, is a regulated utility engaged in the generation, transmission, distribution and sale of electricity in Kentucky, Virginia and Tennessee. At December 31, 2011, KU owned or controlled 4,833 MW of electric power generation capacity. Subject to certain regulatory approvals, KU is planning capital projects at certain of its existing generation facilities to provide 652 MW of additional generating capacity by 2016. KU also anticipates retiring 234 MW of generating capacity by the end of 2015 to meet certain environmental regulations. As of December 31, 2011, KU provided electric service to approximately 512,000 customers in 77 counties in central, southeastern and western Kentucky and approximately 29,000 customers in five counties in southwestern Virginia. As of December 31, 2011, KU's service area covered approximately 4,800 non-contiguous square miles. KU also sells wholesale electric energy to 12 municipalities in Kentucky. In Virginia, KU operates under the name Old Dominion Power Company.

Neither PPL Corporation nor any of its subsidiaries or affiliates will guarantee or provide other credit or funding support for the Securities to be offered by KU pursuant to this prospectus.

The offices of PPL Corporation, PPL Capital Funding, PPL Energy Supply and PPL Electric are located at Two North Ninth Street, Allentown, Pennsylvania 18101-1179 (Telephone number (610) 774-5151).

The offices of LKE and LG&E are located at 220 West Main Street, Louisville, Kentucky 40202 (Telephone number (502) 627-2000).

The offices of Kentucky Utilities Company are located at One Quality Street, Lexington, Kentucky 40507 (Telephone number (502) 627-2000).

The information above concerning PPL Corporation, PPL Capital Funding, PPL Energy Supply, PPL Electric, LKE, LG&E and KU and, if applicable, their respective subsidiaries is only a summary and does not purport to be comprehensive. For additional information about these companies, including certain assumptions, risks and uncertainties involved in the forward-looking statements contained or incorporated by reference in this prospectus, you should refer to the information described in "Where You Can Find More Information."

USE OF PROCEEDS

Except as otherwise described in a prospectus supplement, the net proceeds from the sale of the PPL Capital Funding Debt Securities and the PPL Capital Funding Subordinated Debt Securities will be loaned to PPL Corporation and/or its subsidiaries, and PPL Corporation and/or its subsidiaries are expected to use the proceeds of such loans, and the proceeds of the other Securities issued by PPL Corporation, for general corporate purposes, including repayment of debt. Except as otherwise described in a prospectus supplement, each of PPL Energy Supply, PPL Electric, LKE, LG&E and KU is expected to use the proceeds of the Securities it issues for general corporate purposes, including repayment of debt, and for capital expenditures related to construction costs.

RATIOS OF EARNINGS TO FIXED CHARGES AND EARNINGS TO COMBINED FIXED CHARGES AND PREFERRED STOCK DIVIDENDS

PPL Corporation

The following table sets forth PPL Corporation's ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends for the periods indicated:

	Twelve Months Ended December 31,				
	2011	2010	2009	2008	2007
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends (a)	3.1	2.7	1.9	3.1	2.8

(a) See PPL Corporation's reports on file with the SEC pursuant to the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as described under "Where You Can Find More Information" for more information. PPL Corporation had no preferred securities outstanding during the periods indicated; therefore, the ratio of earnings to combined fixed charges and preferred stock dividends is the same as the ratio of earnings to fixed charges.

PPL Energy Supply

The following table sets forth PPL Energy Supply's ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred securities dividends for the periods indicated:

	Twelve Months Ended December 31,				
	2011	2010	2009	2008	2007
Ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred securities dividends (a)	5.5	2.7	0.6(b)	2.2	2.3

(a) See PPL Energy Supply's reports on file with the SEC pursuant to the Exchange Act as described under "Where You Can Find More Information" for more information. PPL Energy Supply had no preferred securities outstanding during the periods indicated; therefore, the ratio of earnings to combined fixed charges and preferred securities dividends is the same as the ratio of earnings to fixed charges.

(b) Upon reflecting the reclassification of PPL Global's operating results as Discontinued Operations, earnings were less than fixed charges for this period. See PPL Energy Supply's reports on file with the SEC pursuant to the Exchange Act for additional information. The total amount of fixed charges for this period was approximately $364 million and the total amount of earnings was approximately $206 million. The amount of the deficiency, or the amount of fixed charges in excess of earnings, was approximately $158 million.

PPL Electric

The following table sets forth PPL Electric's ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends for the periods indicated:

	Twelve Months Ended December 31,				
	2011	2010	2009	2008	2007
Ratio of earnings to fixed charges (a)	3.4	2.9	2.8	3.4	2.7
Ratio of earnings to combined fixed charges and preferred stock dividends (a)	2.9	2.4	2.3	2.8	2.3

(a) See PPL Electric's reports on file with the SEC pursuant to the Exchange Act as described under "Where You Can Find More Information" for more information.

LKE

The following table sets forth LKE's ratio of earnings to fixed charges and ratio of earnings to combined fixed charges for the periods indicated. The following table includes the periods before and after PPL Corporation's acquisition of LKE on November 1, 2010, and is labeled as Predecessor or Successor.

	Successor		Predecessor			
	12 Months Ended Dec. 31, 2011	2 Months Ended Dec. 31, 2010	10 Months Ended Oct. 31, 2010	Twelve Months Ended Dec. 31		
				2009	2008	2007
Ratio of earnings to fixed charges (a)	3.7	3.9	2.7	2.3	2.5	2.9

(a) See LKE's reports on file with the SEC pursuant to the Exchange Act as described under "Where You Can Find More Information" for more information.

LG&E

The following table sets forth LG&E's ratio of earnings to fixed charges and ratio of earnings to combined fixed charges for the periods indicated. The following table includes the periods before and after PPL Corporation's acquisition of LKE, LG&E's parent, on November 1, 2010, and is labeled as Predecessor or Successor.

	Successor		Predecessor			
	12 Months Ended Dec. 31, 2011	2 Months Ended Dec. 31, 2010	10 Months Ended Oct. 31, 2010	Twelve Months Ended Dec. 31		
				2009	2008	2007
Ratio of earnings to fixed charges (a)	5.2	4.8	4.7	3.7	3.8	4.4

(a) See LG&E's reports on file with the SEC pursuant to the Exchange Act as described under "Where You Can Find More Information" for more information.

KU

The following table sets forth KU's ratio of earnings to fixed charges and ratio of earnings to combined fixed charges for the periods indicated. The following table includes the periods before and after PPL Corporation's acquisition of LKE, KU's parent, on November 1, 2010, and is labeled as Predecessor or Successor.

	Successor		Predecessor			
	12 Months Ended Dec. 31, 2011	2 Months Ended Dec. 31, 2010	10 Months Ended Oct. 31, 2010	Twelve Months Ended Dec. 31		
				2009	2008	2007
Ratio of earnings to fixed charges (a)	4.8	6.0	4.0	3.7	3.9	5.1

(a) See KU's reports on file with the SEC pursuant to the Exchange Act as described under "Where You Can Find More Information" for more information.

WHERE YOU CAN FIND MORE INFORMATION

Available Information

PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E and KU each file reports and other information with the SEC. You may obtain copies of this information by mail from the Public Reference Room of the SEC, 100 F Street, N.E., Room 1580, Washington, D.C. 20549, at prescribed rates. Further information on the operation of the SEC's Public Reference Room in Washington, D.C. can be obtained by calling the SEC at 1-800-SEC-0330.

PPL Corporation's Internet Web site is www.pplweb.com. On the Investor Center page of that Web site PPL Corporation provides access to all SEC filings of PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E and KU free of charge, as soon as reasonably practicable after filing with the SEC. The information at PPL Corporation's Internet Web site is not incorporated in this prospectus by reference, and you should not consider it a part of this prospectus. Additionally, PPL Corporation's, PPL Energy Supply's, PPL Electric's, LKE's, LG&E's and KU's filings are available at the SEC's Internet Web site (www.sec.gov).

In addition, reports, proxy statements and other information concerning PPL Corporation, PPL Energy Supply and PPL Electric can be inspected at their offices at Two North Ninth Street, Allentown, Pennsylvania 18101-1179; reports and other information concerning LKE and LG&E can be inspected at their offices at 220 West Main Street, Louisville, Kentucky 40202, and reports and other information concerning KU can be inspected at its office at One Quality Street, Lexington, Kentucky 40507.

Incorporation by Reference

Each of PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E and KU will "incorporate by reference" information into this prospectus by disclosing important information to you by referring you to another document that it files separately with the SEC. The information incorporated by reference is deemed to be part of this prospectus, and later information that we file with the SEC will automatically update and supersede that information. This prospectus incorporates by reference the documents set forth below that have been previously filed with the SEC. These documents contain important information about the registrants.

Additional documents that PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E and KU file with the SEC pursuant to Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act, between the date of this prospectus and the termination of the offering of the Securities are also incorporated herein by reference. In addition, any additional documents that PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E or KU file with the SEC pursuant to these sections of the Exchange Act after the date of the filing of the registration statement containing this prospectus, and prior to the effectiveness of the registration statement are also incorporated herein by reference. Unless specifically stated to the contrary, none of the information that PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E or KU files or discloses under Items 2.02 or 7.01 of any Current Report on Form 8-K that have been furnished or may from time to time be furnished with the SEC is or will be incorporated by reference into, or otherwise included in, this prospectus.

Each of PPL Corporation, PPL Energy Supply, PPL Electric, LKE, LG&E and KU will provide without charge to each person, including any beneficial owner, to whom a copy of this prospectus has been delivered, a copy of any and all of its filings with the SEC. You may request a copy of these filings by writing or telephoning the appropriate registrant at:

For PPL Corporation, PPL Energy Supply and PPL Electric:
Two North Ninth Street
Allentown, Pennsylvania 18101-1179

Attention: Treasurer
Telephone: 1-800-345-3085

No separate financial statements of PPL Capital Funding are included herein or incorporated herein by reference. PPL Corporation and PPL Capital Funding do not consider those financial statements to be material to holders of the PPL Capital Funding Debt Securities or PPL Capital Funding Subordinated Debt Securities because (1) PPL Capital Funding is a wholly owned subsidiary that was formed for the primary purpose of providing financing for PPL Corporation and its subsidiaries, (2) PPL Capital Funding does not currently engage in any independent operations and (3) PPL Capital Funding does not currently plan to engage, in the future, in more than minimal independent operations. See "PPL Capital Funding." PPL Capital Funding has received a "no action" letter from the Staff of the SEC stating that the Staff would not raise any objection if PPL Capital Funding does not file periodic reports under Sections 13 and 15(d) of the Exchange Act. Accordingly, PPL Corporation and PPL Capital Funding do not expect PPL Capital Funding to file those reports.

EXPERTS

The consolidated financial statements of PPL Corporation, PPL Energy Supply, LLC and PPL Electric Utilities Corporation appearing in such companies' Annual Reports (Form 10-K) for the year ended December 31, 2011 including schedules appearing therein, and the effectiveness of PPL Corporation's internal control over financial reporting as of December 31, 2011, have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in its reports thereon included therein, and incorporated herein by reference which, as to the year 2010, are based in part on the report of PricewaterhouseCoopers LLP, independent registered public accounting firm. Such consolidated financial statements are incorporated herein by reference in reliance upon such reports given on the authority of such firm as experts in accounting and auditing.

The audited historical financial statements of Central Networks (collectively Central Networks East plc, Central Networks Limited and certain other related assets and liabilities) included in PPL Corporation's Current Report on Form 8-K dated March 27, 2012 have been incorporated herein by reference in reliance on the report of PricewaterhouseCoopers LLP, independent accountants, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of LG&E and KU Energy LLC and the financial statements of Louisville Gas and Electric Company and Kentucky Utilities Company appearing in such companies' Annual Reports (Form 10-K) for the year ended December 31, 2011 including schedules appearing therein have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in its reports included therein, and incorporated herein by reference. Such financial statements are incorporated herein by reference in reliance upon such reports given on the authority of such firm as experts in accounting and auditing. The consolidated financial statements of LG&E and KU Energy LLC and the financial statements of Louisville Gas and Electric Company and Kentucky Utilities Company as of December 31, 2010 and for the periods from January 1, 2010 to October 31, 2010, and November 1, 2010 to December 1, 2010, and for the year ended December 31, 2009 incorporated herein by reference have been so incorporated in reliance on the reports of PricewaterhouseCoopers LLP, independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

VALIDITY OF THE SECURITIES AND THE PPL GUARANTEES

Dewey & LeBoeuf LLP, New York, New York or Simpson Thacher & Bartlett LLP, New York, New York and Frederick C. Paine, Esq., Senior Counsel of PPL Services Corporation will pass upon the validity of the Securities, the PPL Guarantees and the PPL Subordinated Guarantees for PPL Corporation, PPL Capital Funding, PPL Energy Supply and PPL Electric. Dewey & LeBoeuf LLP and John P. Fendig, Esq. of LG&E and KU Energy LLC will pass upon the validity of any LKE, LG&E and KU Securities for those issuers. Sullivan & Cromwell LLP, New York, New York or Davis Polk & Wardwell LLP, New York, New York will pass upon the validity of the Securities, the PPL Guarantees and the PPL Subordinated Guarantees for any underwriters or agents. Dewey & LeBoeuf LLP, Simpson Thacher & Bartlett LLP, Sullivan & Cromwell LLP and Davis Polk & Wardwell LLP will rely on the opinion of Mr. Paine as to matters involving the law of the Commonwealth of Pennsylvania and on the opinion of Mr. Fendig as to matters involving the laws of the Commonwealths of Kentucky and Virginia and the State of Tennessee.

Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/16; Base Period 12ME 2/28/15)

Filing Requirement
807 KAR 5:001 Section 16(7)(k)
Sponsoring Witness: Valerie L. Scott

Description of Filing Requirement:

The most recent Federal Energy Regulatory Commission Form 1 (electric), Federal Energy Regulatory Commission Form 2 (gas), or Public Service Commission Form T (telephone).

Response:

LG&E's most recent FERC Form 1 and KPSC Annual Report for Major Natural Gas Companies for the year ended December 31, 2013, are attached. Please note that by a FERC Order dated July 12, 2007 in FERC Docket No. CP07-232-000, LG&E was granted a Section (7) exemption by the FERC under the Natural Gas Act, and as a part of that exemption LG&E was granted "a waiver of reporting and accounting requirements," which includes the filing of Form 2 with the FERC. In addition, on February 15, 2008, the Public Service Commission issued an order granting LG&E's request to cease the annual filing of the FERC Form 2. In lieu of filing a FERC Form 2 with the Public Service Commission, LG&E was ordered to file a paper copy of the annual report information that it files with the Public Service Commission electronically, and include with such copy a paper copy of the notes to its financial statements that LG&E had previously filed as part of its FERC Form 2.

Dear Mr. Blake,

Enclosed please find copies of our manually signed reports on the regulatory-basis financial statements of Louisville Gas and Electric Company and Kentucky Utilities Company as of December 31, 2013 and 2012, and for the years then ended. Please retain this letter and the enclosures in your files as evidence of our authorization to include the attached reports in the 2013 Annual Form 1 filed with the Federal Energy Regulatory Commission.

If you have any questions regarding the form or use of this report, please call me.

Regards,

Ritu Furlan

Report of Independent Auditors

To the Board of Directors and Stockholder of Louisville Gas and Electric Company:

We have audited the financial statements of Louisville Gas and Electric Company, which comprise the comparative balance sheet as of December 31, 2013 and 2012, and the related statements of income, retained earnings and cash flows for the years then ended and the related notes to the financial statements, included on pages 110 through 123.68 in the Federal Energy Regulatory Commission ("FERC") Form No. 1.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with the financial reporting provisions of the Uniform System of Accounts prescribed by the FERC described in Note 1; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets, liabilities, and proprietary capital of Louisville Gas and Electric Company at December 31, 2013 and 2012, and its income and expenses and its cash flows for the years then ended, in accordance with the Uniform System of Accounts prescribed by the FERC described in Note 1.

Regulatory Basis of Accounting

As described in Note 1 to the financial statements, the financial statements have been prepared by Louisville Gas and Electric Company in accordance with the Uniform System of Accounts prescribed by the FERC, which is a basis of accounting other than U.S. generally accepted accounting principles to meet the requirements of the FERC. Our opinion is not modified with respect to this matter.

Restriction on Use

Our report is intended solely for the information and use of the FERC and is not intended to be and should not be used by anyone other than these specified parties.

Ernst & Young LLP

INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

GENERAL INFORMATION

I. Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q)is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

(1) one million megawatt hours of total annual sales,
(2) 100 megawatt hours of annual sales for resale,
(3) 500 megawatt hours of annual power exchanges delivered, or
(4) 500 megawatt hours of annual wheeling for others (deliveries plus losses).

III. What and Where to Submit

(a) Submit FERC Forms 1 and 3-Q electronically through the forms submission software. Retain one copy of each report for your files. Any electronic submission must be created by using the forms submission software provided free by the Commission at its web site: http://www.ferc.gov/docs-filing/eforms/form-1/elec-subm-soft.asp. The software is used to submit the electronic filing to the Commission via the Internet.

(b) The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

(c) Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:

Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

(d) For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

a) Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

b) Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

Reference Schedules	Pages
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

e) The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of _____ for the year ended on which we have reported separately under date of ___________ , we have also reviewed schedules ___________________of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases."

The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(f) Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. To further that effort, new selections, "Annual Report to Stockholders," and "CPA Certification Statement" have been added to the dropdown "pick list" from which companies must choose when eFiling. Further instructions are found on the Commission's website at http://www.ferc.gov/help/how-to.asp.

(g) Federal, State and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from http://www.ferc.gov/docs-filing/eforms/form-1/form-1.pdf and http://www.ferc.gov/docs-filing/eforms.asp#3Q-gas .

IV. When to Submit:

FERC Forms 1 and 3-Q must be filed by the following schedule:

a) FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and

b) FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

V. Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,144 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 150 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

GENERAL INSTRUCTIONS

I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.

II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

III Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

V. Enter the month, day, and year for all dates. Use customary abbreviations. **The "Date of Report" included in the header of each page is to be completed only for resubmissions** (see VII. below).

VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

VII For any resubmissions, submit the electronic filing using the form submission software only. Please explain the reason for the resubmission in a footnote to the data field.

VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and” firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and “firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

(3) ’Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

(4) 'Person' means an individual or a corporation;

(5) 'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

(7) 'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power; ......

(11) "project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

(a) To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development -costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the -proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports salt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

General Penalties

The Commission may assess up to $1 million per day per violation of its rules and regulations. *See* FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Kent W. Blake, Chief Financial Officer
220 West Main Street
Louisville, KY 40202

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Kentucky July 2, 1913

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Respondent furnishes electric and natural gas services in the City of Louisville and adjacent territory in Kentucky.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) ☐ Yes...Enter the date when such independent accountant was initially engaged:
(2) ☒ No

INFORMATION ON FORMULA RATES
Formula Rate Variances

1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1.
2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1.
3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts.
4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

IMPORTANT CHANGES DURING THE QUARTER/YEAR

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.
2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.
3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.
4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.
5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.
7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.
8. State the estimated annual effect and nature of any important wage scale changes during the year.
9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Page 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
11. (Reserved.)
12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.
13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.
14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)

1. None.

2. None.

3. None.

4. None of a material nature.

5. None.

6. LG&E issued long-term first mortgage bonds totaling $250 million on November 14, 2013. The bonds mature in November 2043 and have an interest rate of 4.65%. This transaction was approved by the KPSC on August 3, 2012, in Case No. 2012-00233. LG&E received FERC authorization in FERC Docket No. ES13-54-000 for up to $500 million in the form of money pool debt, commercial paper or any other type of short-term loan through November 30, 2015. LG&E's money pool balance was zero at December 31, 2013, and December 31, 2012, respectively. LG&E established a commercial paper program in February 2012, allowing issuance of up to $250 million. The program was increased to $350 million effective April 1, 2013. As of December 31, 2013, and December 31, 2012, the outstanding commercial paper balance is $20 million and $55 million, respectively.

7. None.

8. During the first quarter of 2013, exempt and non-exempt employees received routine wage increases in accordance with annual salary reviews. As outlined in the IBEW Local 2100 contract, union employees received a negotiated wage increase effective November 11, 2013.

9. See Notes 4 and 10 of Notes to Financial Statements on page 123.

10. None.

11. N/A

12. See Notes to Financial Statements on page 123.

13. On January 31, 2013, Chris Hermann, Senior Vice President – Energy Delivery, announced his retirement, effective May 1, 2013, and Paul W. Thompson, Senior Vice President – Energy Services, was named Chief Operating Officer, effective February 18, 2013. Effective February 18, 2013, Lonnie E. Bellar was named Vice President—Gas Distribution; John P. Malloy, Vice President—Customer Services; Edwin R. Staton, Vice President—State Regulation and Rates and P. Gregory Thomas, Vice President—Electric Distribution. Effective March 7, 2013, Thomas A. Jessee was named Vice President—Transmission.

14. LG&E is a participant in a cash pooling arrangement, but its proprietary capital ratio is above 30 percent.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) ☒ An Original (2) ☐ A Resubmission	/ /	End of 2013/Q4

STATEMENT OF INCOME

Quarterly

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

5. Do not report fourth quarter data in columns (e) and (f)
6. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility columnin a similar manner to a utility department. Spread the amount(s) over lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
7. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

STATEMENT OF INCOME FOR THE YEAR (Continued)

9. Use page 122 for important notes regarding the statement of income for any account thereof.
10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
11 Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purches, and a summary of the adjustments made to balance sheet, income, and expense accounts.
12. If any notes appearing in the report to stokholders are applicable to the Statement of Income, such notes may be included at page 122.
13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

STATEMENT OF RETAINED EARNINGS

1. Do not report Lines 49-53 on the quarterly version.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, year to date, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436 - 439 inclusive). Show the contra primary account affected in column (b)
4. State the purpose and amount of each reservation or appropriation of retained earnings.
5. List first account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, include them on pages 122-123.

NOTES TO FINANCIAL STATEMENTS

1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Cormmission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.
7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.
8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred.
9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

PAGE 122 INTENTIONALLY LEFT BLANK
SEE PAGE 123 FOR REQUIRED INFORMATION.

GLOSSARY OF TERMS AND ABBREVIATIONS

KU **-** Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E **-** Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE **-** LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS **-** LG&E and KU Services Company, a subsidiary of LKE that provides services to LKE and its subsidiaries.

PPL **-** PPL Corporation, the parent holding company of LKE and other subsidiaries.

Other terms and abbreviations

401(h) account **-** A sub-account established within a qualified pension trust to provide for the payment of retiree medical costs.

AOCI **-** accumulated other comprehensive income or loss.

ARO **-** asset retirement obligation.

BREC **-** Big Rivers Electric Corporation, a power-generating rural electric cooperative in western Kentucky.

Cane Run Unit 7 **-** a natural gas combined-cycle unit under construction in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional electric generating capacity of 640 MW (141 MW and 499 MW to LG&E and KU) in 2015.

CAIR **-** the EPA's Clean Air Interstate Rule.

CCR **-** Coal Combustion Residuals. CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act **-** federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

CPCN **-** Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facility for furnishing of utility service to the public.

CSAPR **-** Cross-State Air Pollution Rule.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2013/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Dodd-Frank Act **-** the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DSM **-** Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of costs and revenues lost by implementing DSM programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

EBPB **-** Employee Benefit Plan Board. The administrator of PPL's qualified retirement plans, which is charged with the fiduciary responsibility to oversee and manage those plans and the investments associated with those plans.

ECR **-** Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and by-products from the production of energy from coal.

EPA **-** Environmental Protection Agency, a U.S. government agency.

E.W. Brown **-** a generating station in Kentucky with capacity of 1,594 MW.

FERC **-** Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch **-** Fitch, Inc., a credit rating agency.

GAAP **-** Generally Accepted Accounting Principles in the U.S.

GHG **-** greenhouse gas(es).

GLT **-** Gas Line Tracker. The KPSC approved LG&E's recovery of costs associated with gas service lines, gas risers, leak mitigation, and gas main replacements. Rate recovery became effective January 1, 2013.

Green River Unit 5 **-** a natural gas combined-cycle unit proposed to be built in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional electric generating capacity of 700MW (280 MW and 420 MW to LG&E and KU) in 2018.

IBEW – International Brotherhood of Electrical Workers

IRS **-** Internal Revenue Service, a U.S. government agency.

KPSC **-** Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

kWh **-** kilowatt-hour, basic unit of electrical energy.

LG&E 2010 Mortgage Indenture **-** LG&E's indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as supplemented.

LIBOR **-** London Interbank Offered Rate.

MATS **-** Mercury and Air Toxics Standards.

Moody's **-** Moody's Investors Service, Inc., a credit rating agency.

MW **-** megawatt, one thousand kilowatts.

MWh **-** megawatt-hour, one thousand kilowatt-hours.

NERC **-** North American Electric Reliability Corporation.

NGCC **-** Natural gas-fired combined-cycle turbine.

NPNS **-** the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

OCI **-** other comprehensive income or loss.

OVEC **-** Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined summer rating capacities of 2,120 MW.

PJM **-** PJM Interconnection, L.L.C., operator of the electricity transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PP&E **-** property, plant and equipment.

RFC **-** Reliability*First* Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

S&P **-** Standard & Poor's Ratings Services, a credit rating agency.

Scrubber **-** an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC **-** the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

***SERC* -** SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

Superfund - federal environmental statute that addresses remediation of contaminated sites; states also have similar statutes.

***TC2* -** Trimble County Unit 2, a coal-fired plant located in Kentucky with a net summer capacity of 732 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2, or 549 MW of the capacity.

***Tolling agreement* -** agreement whereby the owner of an electricity generating facility agrees to use that facility to convert fuel provided by a third party into electricity for delivery back to the third party.

***VEBA* -** Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

***VIE* -** variable interest entity.

***Volumetric risk* -** the risk that the actual load volumes provided under full-requirement arrangements could vary significantly from forecasted volumes.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

As permitted by the FERC for the Year Ended December 31, 2013 Form 1, the Notes to Financial Statements set forth below are principally from the Respondent's SEC Form 10-K for the Year Ended December 31, 2013, which was filed with the SEC on February 24, 2014. Accordingly, these Notes do not reflect updated information since this filing date.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

General

Capitalized terms and abbreviations appearing in the notes to financial statements are defined in the glossary. Dollars are in millions, unless otherwise noted.

Business and Consolidation

LG&E is engaged in the regulated generation, transmission, distribution and sale of electricity. LG&E also engages in the regulated distribution and sale of natural gas.

The financial statements of LG&E include the company's own accounts as well as the accounts of all entities in which the company has a controlling financial interest. Entities for which a controlling financial interest is not demonstrated through voting interests are evaluated based on accounting guidance for VIEs. LG&E has no controlling interest in a VIE. Investments in entities in which a company has the ability to exercise significant influence but does not have a controlling financial interest are accounted for under the equity method. All other investments are carried at cost or fair value. All significant intercompany transactions have been eliminated. Any noncontrolling interests are reflected in the financial statements.

The financial statements of LG&E include its share of any undivided interests in jointly owned facilities, as well as its share of the related operating costs of those facilities. See Note 9 for additional information.

Regulation

LG&E is a cost-based rate-regulated utility for which rates are set by regulators to enable LG&E to recover the costs of providing electric or gas service and to provide a reasonable return to shareholders. Rates are generally established based on a test period adjusted to exclude unusual or nonrecurring items. As a result, the financial statements are subject to the accounting for certain types of regulation as prescribed by GAAP and reflect the effects of regulatory actions. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and regulatory liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 4 for additional details regarding regulatory matters.

Accounting Records

The system of accounts for LG&E is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." LG&E continuously assesses potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals for environmental remediation are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless realization is assured.

Price Risk Management

Energy and energy-related contracts are used to hedge the variability of expected cash flows associated with the generating units and marketing activities. Interest rate contracts are used to hedge exposures to changes in the fair value of debt instruments and to hedge exposures to variability in expected cash flows associated with existing floating-rate debt instruments or forecasted fixed-rate issuances of debt. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain energy and energy-related contracts meet the definition of a derivative, while others do not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, markets are periodically assessed to determine whether market mechanisms have evolved that would facilitate net settlement. Certain derivative energy contracts have been excluded from the requirements of derivative accounting treatment because NPNS has been elected. These contracts are accounted for using accrual accounting. All other contracts that have been classified as derivative contracts are reflected on the Balance Sheets at fair value. These contracts are recorded as "Price risk management assets" and "Price risk management liabilities" on the Balance Sheets. The portion of derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while the portion of derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent

Liabilities."

Energy and energy-related contracts are assigned a strategy and accounting classification. Processes exist that allow for subsequent review and validation of the contract information. See Note 14 for more information. The accounting department provides the traders and the risk management department with guidelines on appropriate accounting classifications for various contract types and strategies. Some examples of these guidelines include, but are not limited to:

- Physical coal, limestone, lime, uranium, electric transmission, gas transportation, gas storage and renewable energy credit contracts not traded on an exchange are not derivatives due to the lack of net settlement provisions.

- Only contracts where physical delivery is deemed probable throughout the entire term of the contract can qualify for NPNS.

- Physical transactions that permit cash settlement and financial transactions do not qualify for NPNS because physical delivery cannot be asserted; however, these transactions can receive cash flow hedge treatment if they effectively hedge the volatility in the future cash flows for energy-related commodities.

- Certain purchased option contracts or net purchased option collars may receive cash flow hedge treatment.

- Derivative transactions that do not qualify for NPNS or cash flow hedge treatment, or for which NPNS or cash flow hedge treatment is not elected, are recorded at fair value through earnings.

A similar process is also followed by the treasury department as it relates to interest rate derivatives. Examples of accounting guidelines provided to the treasury department staff include, but are not limited to:

- Transactions to lock in an interest rate prior to a debt issuance can be designated as cash flow hedges; to the extent the forecasted debt issuances remain probable of occurring.

- Derivative transactions that do not qualify for cash flow or net investment hedge treatment are marked to fair value through earnings.

- Derivative transactions may be marked to fair value through regulatory assets/liabilities if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps that are included in customer rates.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the classification of the hedged items.

LG&E has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

See Notes 13 and 14 for additional information on derivatives.

Revenue

Revenue Recognition

Operating revenues, except for certain energy and energy-related contracts that meet the definition of derivative instruments and "Energy-related businesses," are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' meters are read and bills are rendered throughout the month, rather than all being read at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by the estimated average cents per kWh. Unbilled wholesale energy revenues are recorded at month-end to reflect estimated amounts until actual dollars and MWhs are confirmed and invoiced. Any difference between estimated and actual revenues is adjusted the following month.

Accounts Receivable

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts. Accounts receivable that are acquired are initially recorded at fair value on the date of acquisition.

Allowance for Doubtful Accounts

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs, the age of the receivable, counterparty creditworthiness and economic conditions. Specific events, such as bankruptcies, are also considered. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when it is known they will be received.

The changes in the allowance for doubtful accounts at December 31 were:

		Additions			
	Balance at Beginning of Period	Charged to Income	Charged to Other Accounts (a)	Deductions (b)	Balance at End of Period
2013	$ 1	$ 2	$ 1	$ 2	$ 2
2012	2	2	-	3	1

(a) Primarily related to capital projects, thus the provision was recorded as an adjustment to construction work

in progress.
(b) Primarily related to uncollectible accounts written off.

Cash

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

Restricted Cash and Cash Equivalents

Bank deposits and other cash equivalents that are restricted by agreement or that have been clearly designated for a specific purpose are classified as restricted cash and cash equivalents. The change in restricted cash and cash equivalents is reported as an investing activity on the Statements of Cash Flows. On the Balance Sheets, the current portion of restricted cash and cash equivalents is shown in "Other current assets" while the noncurrent portion is included in "Other noncurrent assets".

LG&E had restricted cash and cash equivalents for cash collateral posted to counterparties of $22 million and $32 million at December 31, 2013 and 2012.

Fair Value Measurements

LG&E values certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities and cash and cash equivalents. LG&E uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

LG&E classifies fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

- **Level 1 -** quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

- **Level 2 -** inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.

- **Level 3 -** unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, LG&E's assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

Short-term Investments

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Other current assets" on the Balance Sheets.

Cost Method Investment

LG&E has an investment in OVEC, which is accounted for using the cost method. The investment is recorded in "Other noncurrent assets" on the Balance Sheets. LG&E and 11 other electric utilities are equity owners of OVEC. OVEC's power is currently supplied to LG&E and 12 other companies affiliated with the various owners. LG&E owns 5.63% of OVEC's common stock. Pursuant to a power purchase agreement, LG&E is contractually entitled to its ownership percentage of OVEC's output, which is approximately 120 MW.

LG&E's investment in OVEC is not significant. The direct exposure to loss as a result of LG&E's involvement with OVEC is generally limited to the value of its investment; however, LG&E may be conditionally responsible for a pro-rata share of certain OVEC obligations. As part of PPL's acquisition of LKE, the value of the power purchase contract was recorded as an intangible asset with an offsetting regulatory liability, both of which are being amortized using the units-of-production method until March 2026, the expiration date of the agreement. See Notes 10 and 15 for additional discussion on the power purchase agreement.

Long-Lived and Intangible Assets

Property, Plant and Equipment

PP&E is recorded at original cost, unless impaired. PP&E acquired in business combinations is recorded at fair value at the time of acquisition, which establishes its original cost. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost for constructed assets includes material, labor, contractor costs, certain overheads and financing costs, where applicable. The cost of repairs and minor replacements are charged to expense as incurred. LG&E records costs associated with planned major maintenance projects in the period in which the costs are incurred. No costs associated with planned major maintenance projects are accrued in advance of the period in which the work is performed. LG&E accrues costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. See "Asset Retirement Obligations" below and Note 4 for additional information.

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. LG&E’s weighted-average rates of depreciation for regulated utility plant were 4.52% and 4.91% at December 31, 2013 and 2012.

The KPSC approved new lower depreciation rates for LG&E as part of the rate-case settlement agreement reached in November 2012. The new rates became effective January 1, 2013 and resulted in lower depreciation of approximately $8 million in 2013, exclusive of net additions to PP&E.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to obtain an initial license and renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, LG&E considers the expected use of the asset; the expected useful life of other assets to which the useful life of the intangible asset may relate; legal, regulatory, or contractual provisions that may limit the useful life; the company's historical experience as evidence of its ability to support renewal or extension; the effects of obsolescence, demand, competition, and other economic factors; and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

LG&E accounts for emission allowances as intangible assets. LG&E is allocated emission allowances by states based on its generation facilities' historical emissions experience, and have purchased emission allowances generally when it is expected that additional allowances will be needed. The carrying value of allocated emission allowances is initially recorded at zero value and purchased allowances are initially recorded based on their purchase price. When consumed or sold, emission allowances are removed from the Balance Sheets at their weighted-average carrying value. Since the economic benefits of emission allowances are not diminished until they are consumed, emission allowances are not amortized; rather, they are expensed when consumed or a gain or loss is recognized when sold. Such expense is included in "Fuel" on the Statements of Income. Gains and losses on the sale of emission allowances are included in "Other operation and maintenance" on the Statements of Income.

Asset Impairment (Excluding Investments)

LG&E reviews long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable. A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

Goodwill is reviewed for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment in circumstances when a portion of goodwill has been allocated to a business to be disposed. LG&E is a single reporting unit.

LG&E may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a two-step quantitative test. If the qualitative evaluation (referred to as "step zero") is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step quantitative impairment test is not necessary. However, the quantitative impairment test is required if management concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the step zero assessment.

If the carrying amount of the reporting unit, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

LG&E elected to perform the qualitative step zero evaluation of goodwill in the fourth quarter of 2013 and determined that it was not more likely than not that the fair value of its goodwill was less than its carrying value.

Asset Retirement Obligations

LG&E records liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased through the recognition of accretion expense classified within "Other operation and maintenance" on the Statements of Income to reflect changes in the obligation due to the passage of time. The accretion and depreciation expenses recorded by LG&E are recorded as a regulatory asset, such that there is no earnings impact.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset. See Note 16 for additional information on AROs.

Compensation and Benefits

Defined Benefits

LG&E sponsors and participates in defined benefit pension and other postretirement plans. The plans LG&E participates in are sponsored by LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of certain plans to LG&E based on its participation. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

LG&E and LKE use an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 8 for a discussion of defined benefits.

Taxes

Income Taxes

LG&E is included in PPL's consolidated U.S. federal income tax return.

Significant management judgment is required in developing LG&E's provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and valuation allowances on deferred tax assets.

Significant management judgment is also required to determine the amount of benefit to be recognized in relation to an uncertain tax position. LG&E uses a two-step process to evaluate tax positions. The first step requires LG&E to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires LG&E to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements of LG&E in future periods.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

LG&E records valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. LG&E considers the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If LG&E determines that it is able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if LG&E determines that it is not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made.

LG&E defers investment tax credits when the credits are utilized and amortizes the deferred amounts over the average lives of the related assets.

LG&E recognizes interest and penalties in "Income Taxes" on its Statements of Income.

See Note 3 for additional discussion regarding income taxes.

The provision for LG&E's deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheets in noncurrent "Regulatory assets" or "Regulatory liabilities."

The income tax provision for LG&E is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Tax benefits are not shared between companies. A tax benefit inures only to the entity that gave rise to said benefit. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. LG&E's intercompany tax receivables (payables) were $(8) million and $5 million at December 31, 2013 and 2012.

Taxes, Other Than Income

LG&E presents sales taxes in "Other current liabilities" on the Balance Sheets. These taxes are not separately reflected on the Statements of Income. See Note 3 for details on taxes included in "Taxes, other than income" on the Statements of Income.

Other

Leases

LG&E evaluates whether arrangements entered into contain leases for accounting purposes. See Note 7 for a discussion of arrangements under which LG&E is a lessee for accounting purposes.

Fuel, Materials and Supplies

Fuel, natural gas stored underground and materials and supplies are valued at the lower of cost or market using the average cost method. Fuel costs for electric generation are charged to expense as used. For LG&E, natural gas supply costs are charged to expense as delivered to the distribution system. See Note 4 for further discussion of the fuel adjustment clause and gas supply clause.

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31.

	2013	2012
Fuel	$ 64	$ 61
Natural gas stored underground (a)	48	42
Materials and supplies	42	39
Total	$ 154	$ 142

(a) The majority of LG&E's natural gas stored underground is held to serve retail customers

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 10 for further discussion of recorded and unrecorded guarantees.

New Accounting Guidance Adopted

Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, LG&E retrospectively adopted accounting guidance issued to enhance disclosures about derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

The adoption of this guidance resulted in enhanced disclosures but did not have a significant impact on LG&E. See Note 14 for the new disclosures.

Testing Indefinite-Lived Intangible Assets for Impairment

Effective January 1, 2013, LG&E prospectively adopted accounting guidance that allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of an indefinite-lived intangible asset. If, based on this assessment, the entity determines that it is more likely than not that the fair value of the indefinite-lived intangible asset exceeds the carrying amount, a quantitative impairment test does not need to be performed. If the entity concludes otherwise, a quantitative impairment test must be performed by determining the fair value of the asset and comparing it with the carrying value. The entity would record an impairment charge, if necessary.

The adoption of this guidance did not have a significant impact on LG&E.

2. Preferred Securities

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2013 or 2012.

3. Income and Other Taxes

The provision for LG&E's deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Significant components of LG&E's deferred income tax assets and liabilities were as follows at December 31.

	2013	2012
Deferred Tax Assets		
Regulatory liabilities	$ 59	$ 54
Deferred investment tax credits	15	16
Income taxes due to customers	19	21
Other	28	9
Total deferred tax assets	121	100
Deferred Tax Liabilities		
Plant - net	585	526
Regulatory assets	83	86
Accrued pension costs	24	27
Other	8	9
Total deferred tax liabilities	700	648
Net deferred tax liability	$ 579	$ 548

LG&E expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

At December 31, 2013, LG&E had $10 million of federal net operating loss carryforwards that expire in 2032 and $22 million of state net operating loss carryforwards that expire in 2030.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" at December 31 were:

	2013	2012
Income Tax Expense (Benefit)		
Current - Federal	$ 52	$ (2)
Current - State	16	3
Total Current Expense (Benefit)	68	1
Deferred - Federal	33	65
Deferred - State	(2)	6
Total Deferred Expense, excluding benefits of operating loss carryforwards	31	71
Investment tax credit, net - Federal	(2)	(3)
Tax benefit of operating loss carryforwards		
Deferred - Federal	(3)	-
Total Tax Benefit of Operating Loss Carryforwards	(3)	-
Total income tax expense	$ 94	$ 69
Total income tax expense - Federal	$ 80	$ 60
Total income tax expense - State	14	9
Total income tax expense	$ 94	$ 69

	2013	2012
Reconciliation of Income Taxes		
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	$ 90	$ 67
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	10	5
Amortization of investment tax credit	(2)	(3)
Other	(4)	-
Total increase	4	2
Total income tax expense	$ 94	$ 69
Effective income tax rate	36.6%	35.9%

	2013	2012
Taxes, other than income		
Property and other	$ 24	$ 23
Total	$ 24	$ 23

Unrecognized Tax Benefits

LG&E's unrecognized tax benefits and changes in those unrecognized tax benefits are insignificant at December 31, 2013 and 2012. At December 31, 2013, no significant changes in unrecognized tax benefits are projected over the next 12 months.

At December 31, the total unrecognized tax benefits and related indirect effects that, if recognized, would decrease the effective tax rate were insignificant.

At December 31, 2013 and 2012, receivable (payable) balances were recorded for interest related to tax positions. The amounts were insignificant. The interest expense (benefit) was recognized in income taxes. The amounts were insignificant.

The income tax provisions for LG&E are calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if each subsidiary filed a separate consolidated return. Based on this tax sharing agreement, LG&E indirectly files tax returns in two major tax jurisdictions. With few exceptions, at December 31, 2013, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

U.S. (federal) (a)	10/31/2010 and prior
Kentucky (state)	2010 and prior

(a) The ten month period ending October 31, 2010 remains open under the standard three year statute of limitations; however, the IRS has completed its audit of these periods under the Compliance Assurance Process, effectively closing them to audit adjustments. No issues remain outstanding.

4. Utility Rate Regulation

Regulatory Assets and Liabilities

As discussed in Note 1 and summarized below, LG&E reflects the effects of regulatory actions in the financial statements for its cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the balance sheet date.

LG&E is subject to the jurisdiction of the KPSC and FERC.

LG&E's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through other means. As such, LG&E generally earns a return on regulatory assets.

As a result of purchase accounting requirements, certain fair value amounts related to contracts that had favorable or unfavorable terms relative to market were recorded on the Balance Sheets with an offsetting regulatory asset or liability. LG&E recovers in customer rates the cost of coal contracts, power purchases and emission allowances. As a result, management believes the regulatory assets and liabilities created to offset the fair value amounts at LKE’s acquisition date meet the recognition criteria established by existing accounting guidance and eliminate any rate-making impact of the fair value adjustments. LG&E's customer rates will continue to reflect the original contracted prices for these contracts.

The following tables provide information about the regulatory assets and liabilities of cost-based rate-regulated utility operations at December 31.

	2013	2012
Current Regulatory Assets:		
Environmental cost recovery	$ 2	$ 1
Gas supply clause	10	11
Fuel adjustment clause	2	6
Demand side management	3	1
Total current regulatory assets	$ 17	$ 19
Noncurrent Regulatory Assets:		
Defined benefit plans	$ 164	$ 232
Storm costs	51	59
Unamortized loss on debt	18	20
Interest rate swaps	44	67
AROs	21	15
Other	5	7
Total noncurrent regulatory assets	$ 303	$ 400
Current Regulatory Liabilities:		
Gas supply clause	$ 3	$ 4
Gas line tracker	6	-
Total current regulatory liabilities	$ 9	$ 4
Noncurrent Regulatory Liabilities:		
Coal contracts (a)	$ 43	$ 61
Power purchase agreement - OVEC (a)	69	75
Net deferred tax assets	26	28
Interest rate swaps	43	7
Other	2	3
Total noncurrent regulatory liabilities	$ 183	$ 174

(a) These liabilities were recorded as offsets to certain intangible assets that were recorded at fair value upon the acquisition of LKE.

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory

Matters."

Defined Benefit Plans

Defined benefit plan regulatory assets and liabilities represent the portion of unrecognized transition obligation, prior service cost and net actuarial losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices and generally, are amortized over the average remaining service lives of plan participants. These regulatory assets and liabilities are adjusted at least annually or whenever the funded status of defined benefit plans is re-measured. Of the regulatory asset and liability balances recorded, costs of $13 million are expected to be amortized into net periodic defined benefit costs in 2014.

Storm Costs

LG&E has the ability to request from the KPSC the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer and amortize such costs for regulatory accounting and reporting purposes. Once such authority is granted, LG&E can request recovery of those expenses in a base rate case.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2035.

Environmental Cost Recovery

Kentucky law permits LG&E to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Clean Air Act and those federal, state or local environmental requirements which apply to coal combustion wastes and by-products from coal-fired electric generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is typically recovered within 12 months. As a result of the settlement agreement in the 2012 rate case, beginning in 2013, LG&E will receive a 10.25% return on equity for all ECR projects included in the 2009 and 2011 compliance plans. In 2012, LG&E was authorized to receive a 10.63% return on equity for projects associated with the 2009 compliance plan and a 10.10% return on equity for projects associated with the 2011 compliance plan.

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and variances between actual and expected costs from prior periods are adjusted quarterly in LG&E's rates, subject to approval by the KPSC. The gas supply clause includes a separate natural gas procurement incentive mechanism, which allows LG&E's rates to be adjusted annually to share variances between actual costs and market indices between the shareholders and the customers during each performance-based rate year (12 months ending October 31). The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are typically recovered within 18 months.

Fuel Adjustment Clauses

LG&E's retail electric rates contain a fuel adjustment clause, whereby variances in the cost of fuel to generate electricity, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel adjustment clause and, to the extent appropriate, reestablish the fuel charge included in base rates. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered within 12 months.

Demand Side Management

LG&E's DSM programs consist of energy efficiency programs which are intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. LG&E's rates contain a DSM provision which includes a rate recovery mechanism that provides for concurrent recovery of DSM costs, and allows for the recovery of DSM revenues from lost sales associated with the DSM programs. Additionally, LG&E earns an approved return on equity for capital expenditures associated with the residential and commercial load management/demand conservation programs. The cost of DSM programs is assigned only to the class or classes of customers that benefit from the programs.

Interest Rate Swaps

In November 2012 and April 2013, LG&E entered into forward-starting interest rate swaps with PPL that hedged the interest payments on new debt that was expected to be issued in 2013. In September 2013, these hedges were terminated and LG&E entered into new forward-starting interest rate swaps with PPL, effectively extending the start date of the prior hedges from September 2013 to December 2013. All of these swaps had terms identical to forward-starting swaps entered into by PPL with third parties. New debt totaling $250 million was issued in November 2013 and the hedges issued in September were terminated in November 2013. Net cash settlements of $43 million were received on the swaps that were terminated in September and November, which are included in "Cash Flows from Operating Activities" on the Statements of Cash Flows. Net realized gains on these swaps will be returned through regulated rates. As such, the net settlements were reclassified from AOCI to regulatory liabilities and are being recognized in "Interest Expense" on the Statements of Income over the life of the newly issued debt. For the year ended December 31, 2013, there was no hedge ineffectiveness recorded for the interest rate derivatives. See Note 14 for additional information related to the forward-starting interest rate swaps.

In addition to the hedges terminated as a result of the debt issuance, realized amounts associated with LG&E's interest rate swaps, including a terminated swap contract from 2008, are recoverable through rates based on an order from the KPSC, LG&E's unrealized losses and gains are recorded as a regulatory asset or liability until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the terms of the associated debt, which matures through 2033. Amortization of the gain or loss related to the 2008 terminated swap contract is to be recovered through 2035, as approved by the KPSC.

AROs

As discussed in Note 1, the accretion and depreciation expenses related to LG&E's AROs are recorded as a regulatory asset, such that there is no earnings impact. When an asset with an ARO is retired, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

Gas Line Tracker

In the 2012 rate case order, the KPSC approved the GLT rate recovery mechanism. The GLT authorizes LG&E to recover its incremental operating expenses and depreciation, and to earn a 10.25% return on equity for capital associated with the five year gas service riser and leak mitigation program. As part of this program, LG&E makes necessary repairs and assumes ownership of natural gas lines. LG&E annually files projected costs in October to become effective on the first billing cycle in January. After the completion of a plan year, LG&E submits a balancing adjustment filing to the KPSC to amend rates charged for the differences between the actual costs and actual GLT charges for the preceding year.

Coal Contracts

As a result of purchase accounting associated with PPL's acquisition of LKE, LG&E's coal contracts were recorded at fair value on the Balance Sheets with offsets to regulatory assets for those contracts with unfavorable terms relative to current market prices and offsets to regulatory liabilities for those contracts with favorable terms relative to current market prices. These regulatory assets and liabilities are being amortized over the same terms as the related contracts, which expire at various times through 2016.

Power Purchase Agreement - OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, the fair value of the OVEC power purchase agreement was recorded on the balance sheets with an offset to regulatory liabilities. The regulatory liabilities are being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition.

Regulatory Liability Associated with Net Deferred Tax Assets

LG&E's regulatory liabilities associated with net deferred tax assets represent the future revenue impact from the reversal of deferred income taxes required primarily for unamortized investment tax credits. These regulatory liabilities are recognized when the offsetting deferred tax assets are recognized. For general-purpose financial reporting, these regulatory liabilities and the deferred tax assets are not offset; rather, each is displayed separately.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2013/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Regulatory Matters

Rate Case Proceedings

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of $34 million and an increase in annual base gas rates of $15 million and authorized a 10.25% return on equity. The approved rates became effective January 1, 2013.

CPCN Filings

In January 2014, LG&E and KU filed an application for a CPCN with the KPSC requesting approval to build a NGCC generating unit at KU's Green River generating site and a solar generating facility at the E. W. Brown generating site.

Storm Costs

In August 2011, a strong storm hit LG&E's service area causing significant damage and widespread outages for approximately 139,000 customers. LG&E filed an application with the KPSC in September 2011, requesting approval of a regulatory asset recorded to defer, for future recovery, $8 million in incremental operation and maintenance expenses related to the storm restoration. An order was received in December 2011 granting the request. On December 20, 2012, the KPSC, in the approval of the unanimous rate case settlement agreement, authorized regulatory asset recovery effective January 1, 2013, over a five year period.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

5. Financing Activities

Credit Arrangements and Short-term Debt

LG&E maintains a credit facility to enhance liquidity, provide credit support and provide a backup to its commercial paper program. The amounts borrowed below are recorded as “Short-term debt” on the Balance Sheets. The following credit facility was in place at:

	December 31, 2013				
	Expiration Date	Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backup	Unused Capacity
Syndicated Credit Facility (a) (b)	Nov. 2017	$ 500	-	$ 20	$ 480

	December 31, 2012	
	Borrowed	Letters of Credit Issued and Commercial Paper Backup
Syndicated Credit Facility (a) (b)	-	$ 55

(a) LG&E pays customary fees under its facility and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.

(b) The facility contains a financial covenant requiring debt to total capitalization not to exceed 70% as calculated in accordance with the facility and other customary covenants.

LG&E maintains a commercial paper program to provide an additional financing source to fund short-term liquidity needs, as necessary. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by LG&E's Syndicated Credit Facility. The following commercial paper program was in place at:

December 31, 2013			
Weighted - Average Interest Rate	**Capacity**	**Commercial Paper Issuances**	**Unused Capacity**
0.29%	$ 350	$ 20	$ 330

December 31, 2012	
Weighted - Average Interest Rate	**Commercial Paper Issuances**
0.42%	$ 55

See Note 11 for discussion of intercompany borrowings.

Long-term Debt

	Weighted-Average Rate	Maturities	December 31, 2013
Senior Secured Notes/First Mortgage Bonds (a) (b)	2.77%	2015 - 2043	$ 1,359
Fair market value adjustments			(1)
Unamortized discount			(5)
Total Long-term Debt			$ 1,353

			December 31, 2012
Senior Secured Notes/First Mortgage Bonds (a) (b)	2.49%	2015 - 2040	$ 1,109
Fair market value adjustments			6
Unamortized discount			(3)
Total Long-term Debt			$ 1,112

(a) LG&E's first mortgage bonds are secured by the lien of the LG&E 2010 Mortgage Indenture which creates a lien, subject to certain exceptions and exclusions, on substantially all of LG&E's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $3.2 billion and $2.7 billion at December 31, 2013 and 2012.

(b) Includes LG&E's series of first mortgage bonds that were issued to the respective trustees of tax-exempt revenue bonds to secure its respective obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amount, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. These first mortgage bonds were issued under the LG&E 2010 Mortgage Indenture and are secured as noted in (a) above. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E. The related revenue bond documents allow LG&E to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2013, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a term rate mode totaled $294 million. At December 31, 2013, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a variable rate mode totaled $280 million.

Several series of the tax-exempt revenue bonds are insured by monoline bond insurers whose ratings were reduced due to exposures relating to insurance of sub-prime mortgages. Of the bonds outstanding, $135 million are in the form of insured auction rate securities, wherein interest rates are reset either weekly or every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. During 2008, interest rates increased, and LG&E experienced failed auctions when there were insufficient bids for the bonds. When a failed auction occurs, the interest rate is set pursuant to a formula stipulated in the indenture. As noted above, the instruments governing these auction rate bonds permit LG&E to convert the bonds to other interest rate modes.

Certain variable rate tax-exempt revenue bonds totaling $120 million at December 31, 2013, are subject to tender for purchase by LG&E at the option of the holder and to mandatory tender for purchase by LG&E upon the occurrence of certain events.

None of the outstanding debt securities noted above have sinking fund requirements. The aggregate maturities of long-term debt for the periods 2014 through 2018 and thereafter are $250 million in 2015 and $1,109 million after 2018.

Long-term Debt and Equity Securities Activities

In November 2013, LG&E issued $250 million of 4.65% First Mortgage Bonds due 2043. LG&E received proceeds of $246 million, net of discounts and underwriting fees, which were used for repayment of short-term debt, including commercial paper, for capital expenditures and for other general corporate purposes.

Legal Separateness

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of LKE are each separate legal entities. These subsidiaries are not liable for the debts of LKE. Accordingly, creditors of LKE may not satisfy their debts from the assets of their subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, LKE is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of these subsidiaries may not satisfy their debts from the assets of LKE (or their other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions, Capital Contributions and Related Restrictions

LG&E is subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E believes, however, that this statutory restriction, as applied to its circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. In February 2012, LG&E petitioned the FERC requesting authorization to pay dividends in the future based on retained earnings balances calculated without giving effect to the impact of purchase accounting adjustments for the acquisition of LKE by PPL. In May 2012, FERC approved the petition with the further condition that LG&E may not pay dividends if such payment would cause its adjusted equity ratio to fall below 30% of total capitalization. Accordingly, at December 31, 2013, net assets of $1.0 billion were restricted for purposes of paying dividends to LKE, and net assets of $1.0 billion were available for payment of dividends to LKE. LG&E believes it will not be required to change its current dividend practices as a result of the foregoing requirement. Orders from the KPSC require LG&E to obtain prior consent or approval before lending amounts to PPL.

During the year, LG&E paid dividends of $99 million to its parent, LKE, and received capital contributions of $86 million from LKE.

6. Acquisitions, Development and Divestitures

LG&E from time to time evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. Any resulting transactions may impact future financial results.

Development

Cane Run Unit 7 Construction

In September 2011, LG&E and KU filed an application for a CPCN with the KPSC requesting approval to build Cane Run Unit 7. In May 2012, the KPSC issued an order approving the request. LG&E will own a 22% undivided interest, and KU will own a 78% undivided interest in the new NGCC generating unit. A formal request for recovery of the costs associated with the construction was not included in the CPCN application but certain Cane Run Unit 7 construction work in progress has been included in base rates and the remaining capital costs are expected to be included in future rate proceedings. LG&E and KU commenced preliminary construction activities in the third quarter of 2012 and project construction is expected to be completed by May 2015. The project, which includes building a natural gas supply pipeline and related transmission projects, has an estimated cost of approximately $600 million.

In conjunction with this construction and to meet new, more stringent EPA regulations with a 2015 compliance date, LG&E anticipates retiring three older coal-fired electric generating units at the Cane Run plant, which have a combined summer capacity rating of 563 MW.

Future Capacity Needs

In January 2014, LG&E and KU filed an application for a CPCN with the KPSC requesting approval to construct a NGCC unit at KU's Green River generating site (Green River Unit 5) and a solar generating facility at the E. W. Brown generating site. Subject to finalizing details, regulatory applications, permitting and construction schedules, Green River Unit 5 is expected to have approximately 700 MW of capacity at an estimated cost of $700 million and is planned to be operational in 2018. Green River Unit 5 will be jointly owned by LG&E and KU, with LG&E owning a 40% undivided interest and KU owning a 60% undivided interest. The solar generating facility is expected to have approximately 10 MW of capacity at an estimated cost of $36 million and is planned to be operational in 2016. The solar generating facility will be jointly owned by LG&E and KU, with LG&E owning a 36% undivided interest and KU owning a 64% undivided interest.

7. Leases

LG&E has entered into various agreements for the lease of office space, vehicles, land, gas storage and other equipment.

Rent expense for operating leases was $7 million at December 31, 2013 and 2012.

Total future minimum rental payments for all operating leases are estimated to be:

2014	$	6
2015		5
2016		4
2017		2
2018		2
Thereafter		12
Total	$	31

8. Retirement and Postemployment Benefits

Defined Benefits

LG&E sponsors and participates in non-contributory defined benefit pension plans. These plans are applicable to the majority of LG&E employees. The plan LG&E participates in is sponsored by LKE. LG&E is allocated a portion of the funded status and costs of the plan sponsored by LKE based on its participation in the plan, which management believes is reasonable. LG&E’s and LKE’s defined benefit pension plans were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above the standard matching contributions to their savings plans. The majority of employees are eligible for certain health care and life insurance benefits upon retirement through a contributory plan sponsored by LKE. Postretirement health benefits may be paid from 401(h) accounts established as part of the LKE plan within the PPL Services Corporation Master Trust, funded VEBA trusts and company funds.

The following table provides the components of net periodic defined benefit costs for LG&E's pension benefit plan for the years ended December 31.

	LG&E Sponsored Pension Benefits	
	2013	2012
Net periodic defined benefit costs (credits):		
Service cost	$ 2	$ 2
Interest cost	14	14
Expected return on plan assets	(20)	(19)
Amortization of:		
Prior service cost (credit)	2	3
Actuarial (gain) loss	14	11
Net periodic defined benefit costs (credits)	$ 12	$ 11
Other Changes in Plan Assets and Benefit Obligations Recognized in Regulatory Assets - Gross:		
Net (gain) loss	$ (20)	$ 18
Amortization of:		
Prior service cost	(2)	(2)
Actuarial (loss)	(14)	(11)
Total recognized in regulatory assets	(36)	5
Total recognized in net periodic benefit costs and regulatory assets	$ (24)	$ 16

For the plan sponsored by LG&E, the estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2014 are $8 million ($2 million amortization of prior service cost and $6 million amortization of actuarial loss). For the plan LG&E participates in, estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2014 are $5 million ($2 million amortization of prior service cost and $3 million amortization of actuarial loss).

The net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction and other non-expense accounts, for LG&E’s pension benefits were $14 million and $13 million in 2013 and 2012. Allocations to LG&E for net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction and other non-expense accounts, for pension benefits were $5 million in 2013 and 2012. Net periodic defined benefits costs charged to operating expense, excluding amounts charged to construction and other non-expense accounts for other postretirement benefits were $4 million and $5 million in 2013 and 2012. These allocated amounts are based on LG&E’s participation in those plans, which management believes is reasonable.

The following weighted-average assumptions were used in the valuation of the benefit obligations at December 31.

	LG&E Sponsored Pension Benefits	
	2013	**2012**
Discount rate	5.13%	4.20%

The following weighted-average assumptions were used to determine the net periodic defined benefit costs for the years ended December 31.

	LG&E Sponsored Pension Benefits	
	2013	**2012**
Discount rate	4.20%	5.00%
Expected return on plan assets (a)	7.10%	7.25%

(a) The expected long-term rates of return for pension benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. Each plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

The funded status of LG&E's plan at December 31, was as follows:

	LG&E Sponsored Pension Benefits	
	2013	**2012**
Change in Benefit Obligation		
Benefit Obligation, beginning of period	$ 331	$ 298
Service cost	2	1
Interest cost	14	14
Actuarial (gain) loss	(35)	32
Gross benefits paid (a)	(21)	(14)
Benefit Obligation, end of period	$ 291	$ 331

Gross benefits paid (a)	(21)	(14)
Plan assets at fair value, end of period	281	287
Funded Status, end of period	$ (10)	$ (44)
Amounts recognized in the Balance Sheets consist of:		
Noncurrent liability	(10)	(44)
Net amount recognized, end of period	$ (10)	$ (44)

(a) LG&E's pension plan offered a limited-time program in 2013 during which terminated vested participants could elect to receive their accrued pension benefit as a one-time lump-sum payment. The increase in gross benefits paid is primarily the result of $7 million of lump-sum cash payments made to terminated vested participants in 2013 in connection with this offering.

LG&E's pension plan had projected and accumulated benefit obligations in excess of plan assets at December 31, 2013 and 2012.

In addition to the plan it sponsors, LG&E is allocated a portion of the funded status and costs of certain defined benefit plans sponsored by LKE based on its participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retired employees are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to LG&E for pension benefits resulted in a liability of $9 million and $58 million at December 31, 2013 and 2012.

Allocations to LG&E for other postretirement benefits resulted in a liability of $73 million and $81 million at December 31, 2013 and 2012.

Plan Assets - Pension Plans

The pension plans sponsored by LKE and LG&E are invested in the PPL Services Corporation Master Trust (the Master Trust) that also includes 401(h) accounts that are restricted for certain other postretirement benefit obligations. The investment strategy for the Master Trust is to achieve a risk-adjusted return on a mix of assets that, in combination with the Company’s funding policy, will ensure that sufficient assets are available to provide long-term growth and liquidity for benefit payments, while also managing the duration of the assets to complement the duration of the liabilities. The Master Trust benefits from a wide diversification of asset types, investment fund strategies and external investment fund managers, and therefore has no significant concentration of risk.

The investment policy of the Master Trust outlines investment objectives and defines the responsibilities of the EBPB, external investment managers, investment advisor and trustee and custodian. The investment policy is reviewed annually by PPL's Board of Directors.

The EBPB created a risk management framework around the trust assets and pension liabilities. This framework considers the trust assets as being composed of three sub-portfolios: growth, immunizing and liquidity portfolios. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities, generally with long durations, and derivative positions. The immunizing portfolio is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

Target allocation ranges have been developed for each portfolio on a plan basis based on input from external consultants with a goal of limiting funded status volatility. The EBPB monitors the investments in each portfolio on a plan basis, and seeks to obtain a target portfolio that emphasizes reduction of risk of loss from market volatility. In pursuing that goal, the EBPB establishes revised guidelines from time to time. EBPB investment guidelines on a plan basis, as well as the weighted average of such guidelines, as of the end of 2013 are presented below.

The asset allocation for the trust and the target allocation by portfolio, at December 31, are as follows:

	Percentage of Trust Assets	2013 Target Asset Allocation (a)	
	2013 (a)	Weighted Average	LKE Plans
Growth Portfolio	**59%**	**55%**	**55%**
Equity securities	30%		
Debt securities (b)	17%		
Alternative investments	12%		
Immunizing Portfolio	**39%**	**43%**	**43%**
Debt securities (b)	40%		
Derivatives	(1)%		
Liquidity Portfolio	**2%**	**2%**	**2%**
Total	100%	100%	100%

	Percentage of Trust Assets
	2012
Growth Portfolio	**58%**
Equity securities	31%
Debt securities (b)	18%
Alternative investments	9%
Immunizing Portfolio	**41%**
Debt securities (b)	34%
Derivatives	1%
Liquidity Portfolio	**1%**
Total	100%

(a) Allocations exclude consideration of a guaranteed annuity contract held by the LG&E and KU Retirement Plan.
(b) Includes commingled debt funds, which the Company treats as debt securities for asset allocation purposes.

LG&E’s and LKE’s pension plans’ assets are invested solely in the PPL Services Corporation Master Trust, which is fully disclosed below. The fair value of LG&E’s plan's assets of $281 million and $287 million at December 31, 2013 and 2012 represents an interest of approximately 7% in the Master Trust for both years. The fair value of LKE’s plan’s assets of $1.2 billion and $1.1 billion at December 31, 2013 and 2012 represent approximately 29% and 26% in the Master Trust.

The fair value of net assets in the pension plan trusts by asset class and level within the fair value hierarchy was:

Balance at end of period	$ 1	$ 27	$ 75	$ 42	$ 1	$ 146

The fair value measurements of cash and cash equivalents are based on the amounts on deposit.

The market approach is used to measure fair value of equity securities. The fair value measurements of equity securities (excluding commingled funds), which are generally classified as Level 1, are based on quoted prices in active markets. These securities represent actively and passively managed investments that are managed against various equity indices.

Investments in commingled equity and debt funds are categorized as equity securities. These investments are classified as Level 2, except for exchange-traded funds, which are classified as Level 1 based on quoted prices in active markets. The fair value measurements for Level 2 investments are based on firm quotes of net asset values per share, which are not considered obtained from a quoted price in an active market. Investments in commingled equity funds include funds that invest in U.S. and international equity securities. Investments in commingled debt funds include funds that invest in a diversified portfolio of emerging market debt obligations, as well as funds that invest in investment grade long-duration fixed-income securities.

The fair value measurements of debt securities are generally based on evaluated prices that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences. The fair value of debt securities is generally measured using a market approach, including the use of pricing models which incorporate observable inputs. Common inputs include benchmark yields, reported trades, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as monthly payment data, future predicted cash flows, collateral performance and new issue data. For the PPL Services Corporation Master Trust, these securities represent investments in securities issued by U.S. Treasury and U.S. government sponsored agencies; investments securitized by residential mortgages, auto loans, credit cards and other pooled loans; investments in investment grade and non-investment grade bonds issued by U.S. companies across several industries; investments in debt securities issued by foreign governments and corporations; and exchange traded funds.

Investments in commodities represent ownership of units of a commingled fund that is invested as a long-only, unleveraged portfolio of exchange-traded futures and forward contracts in tangible commodities to obtain broad exposure to all principal groups in the global commodity markets, including energies, agriculture and metals (both precious and industrial) using proprietary commodity trading strategies. The fund has daily liquidity with a specified notification period. The fund's fair value is based upon a unit value as calculated by the fund's trustee.

Investments in real estate represent an investment in a partnership whose purpose is to manage investments in core U.S. real estate properties diversified geographically and across major property types (e.g., office, industrial, retail, etc.). The manager is focused on properties with high occupancy rates with quality tenants. This results in a focus on high income and stable cash flows with appreciation being a secondary factor. Core real estate generally has a lower degree of leverage when compared with more speculative real estate investing strategies. The partnership has limitations on the amounts that may be redeemed based on available cash to fund redemptions. Additionally, the general partner may decline to accept redemptions when necessary to avoid adverse consequences for the partnership, including legal and tax implications, among others. The fair value of the investment is based upon a partnership unit value.

Investments in private equity represent interests in partnerships in multiple early-stage venture capital funds and private equity fund of funds that use a number of diverse investment strategies. Four of the partnerships have limited lives of ten years, while the fifth has a life of 15 years, after which liquidating distributions will be received. Prior to the end of each partnership's life, the investment cannot be redeemed with the partnership; however, the interest may be sold to other parties, subject to the general partner's approval. The PPL Services Corporation Master Trust has unfunded commitments of $76 million that may be required during the lives of the partnerships. Fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Investments in hedge funds represent investments in three hedge fund of funds. Hedge funds seek a return utilizing a number of diverse investment strategies. The strategies, when combined aim to reduce volatility and risk while attempting to deliver positive returns under all market conditions. Major investment strategies for the hedge fund of funds include long/short equity, market neutral, distressed debt, and relative value. Generally, shares may be redeemed with 65 to 95 days prior written notice. The funds are subject to short term lockups and have limitations on the amount that may be withdrawn based on a percentage of the total net asset value of the fund, among other restrictions. All withdrawals are subject to the general partner's approval. The fair value for two of the funds has been estimated using the net asset value per share and the third fund's fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

The fair value measurements of derivative instruments utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. These securities primarily represent investments in interest rate swaps and swaptions (the option to enter into an interest rate swap) which are valued based on the swap details, such as swap curves, notional amount, index and term of index, reset frequency, volatility and payer/receiver credit ratings.

Insurance contracts, classified as Level 3, represent an investment in an immediate participation guaranteed group annuity contract. The fair value is based on contract value, which represents cost plus interest income less distributions for benefit payments and administrative expenses.

Plan Assets – Other Postretirement Benefit Plans

LKE’s postretirement benefit plan is invested primarily in a 401(h) account, with insignificant amounts invested in money market funds within VEBA trusts for liquidity. LKE’s other postretirement benefit plan was invested primarily in a 401(h) account as disclosed in the PPL Services Corporation Master Trusts.

Expected Cash Flows - Defined Benefit Plans

LG&E's defined benefit plan has the option to utilize available prior year credit balances to meet current and future contribution requirements. LG&E does not plan to contribute to its pension plan in 2014. LG&E contributed $8 million to LKE’s pension plan on behalf of LG&E employees in January 2014.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid by the plans for LG&E retirees.

	LG&E Sponsored Pension Plan	Allocated from LKE Pension Plan
2014	$ 15	$ 11
2015	15	11
2016	15	11
2017	16	12
2018	17	12
2019-2023	99	68

Savings Plans

Substantially all employees of LG&E are eligible to participate in a 401(k) deferred savings plan. Employer contributions to the plan were $7 million and $6 million in 2013 and 2012.

9. Jointly Owned Facilities

At December 31, 2013 and 2012, the Balance Sheets reflect the owned interests in the facilities listed below.

	Ownership Interest	Electric Plant	Accumulated Depreciation	Construction Work in Progress
December 31, 2013				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 7	$ 1
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	46	5	1
Trimble County Unit 1	75.00%	308	42	18
Trimble County Unit 2	14.25%	200	19	14
Trimble County Units 5-6	29.00%	29	3	-
Trimble County Units 7-10	37.00%	69	7	1
Cane Run Unit 7	22.00%	-	-	91
Green River Unit 5	40.00%	-	-	1
December 31, 2012				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 5	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	46	3	-
Trimble County Unit 1	75.00%	304	33	10
Trimble County Unit 2	14.25%	198	14	13
Trimble County Units 5-6	29.00%	29	2	-
Trimble County Units 7-10	37.00%	68	6	2
Cane Run Unit 7	22.00%	-	-	16

LG&E provides its own funding for its share of each of the above facilities. LG&E receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

10. Commitments and Contingencies

Energy Purchases, Energy Sales and Other Commitments

Energy Purchase Commitments

LG&E and KU enter into purchase contracts to supply the coal and natural gas requirements for generation facilities and LG&E's gas supply operations. These contracts include the following commitments:

Contract Type	**Maximum Maturity Date**
Coal	2019
Coal Transportation and Fleeting Services	2024
Natural Gas Storage	2024
Natural Gas Transportation	2024

LG&E has a power purchase agreement with OVEC expiring in June 2040. See "Guarantees and Other Assurances" below for information on the OVEC power purchase contract. Future obligations for power purchases from OVEC are unconditional demand payments, comprised of annual minimum debt service payments, as well as contractually required reimbursement of plant operating, maintenance and other expenses as follows:

2014	$ 18
2015	18
2016	18
2017	19
2018	20
Thereafter	504
	$ 597

In addition, LG&E had total energy purchases under the OVEC power purchase agreement of $18 million and $20 million during 2013 and 2012.

Legal Matters

LG&E is involved in legal proceedings, claims and litigation in the ordinary course of business. LG&E cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Regulatory Issues

See Note 4 for information on regulatory matters related to utility rate regulation.

Enactment of Financial Reform Legislation

The Dodd-Frank Act became effective in July 2010 and includes provisions that impose derivative transaction reporting requirements and require most over-the-counter derivative transactions to be executed through an exchange and to be centrally cleared. The Dodd-Frank Act also provides that the U.S. Commodity Futures Trading Commission (CFTC) may impose collateral and margin requirements for over-the-counter derivative transactions, as well as capital requirements for certain entity classifications. The CFTC is establishing final rules on major provisions in the Dodd-Frank Act through its rulemaking process. Several final rules providing for the definition of the terms "swap", "swap dealer", and "major swap participant" became effective in October 2012. The entity classification thresholds and requirements set forth in these final rules do not require LG&E to register as either a swap dealer or major swap participant. Consequently, as commercial end users, LG&E is not subject to the heightened regulatory requirements applicable to swap dealers or major swap participants, including Business Conduct Standards, enhanced recordkeeping and reporting, clearing and exchange trading of CFTC-mandated swaps and other complex requirements under other CFTC regulations. The Dodd-Frank Act and its implementing regulations, however, have imposed on LG&E significant additional and costly recordkeeping, reporting and documentation requirements.

LG&E could face significantly higher operating costs or may be required to post additional collateral if it or its counterparties are subject to capital or margin requirements as ultimately adopted in the implementing regulations of the Dodd-Frank Act. Additionally, the burden that the Dodd-Frank Act and implementing regulations impose on all market participants could cause decreased liquidity in the bilateral swap market as financial entities discontinue their proprietary trading operations. Decreased liquidity could increase costs for LG&E to successfully meet hedge targets. LG&E will continue to evaluate the provisions of the Dodd-Frank Act and its implementing regulations, but could incur significant costs related to compliance with the Act and regulations.

FERC Market-Based Rate Authority

In 1998, the FERC authorized LG&E and KU to make wholesale sales of electricity and related products at market-based rates. In that order, the FERC directed LG&E and KU to file an updated market analysis within three years after the order, and every three years thereafter. Since then, periodic market-based rate filings with the FERC have been made by LG&E and KU. In June 2011, FERC approved PPL’s market-based rate update for the Southeast region, including LG&E and KU. Also, in June 2011, the FERC issued an order approving LG&E's and KU’s request for a determination that they no longer be deemed to have market power in the BREC balancing area and removing restrictions on their market-based rate authority in such region. LG&E cannot predict the ultimate outcome of these update filings at this time.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties of up to $1 million per day, per violation, for certain violations.

LG&E monitors its compliance with the Reliability Standards and continues to self-report potential violations of certain applicable reliability requirements and submit accompanying mitigation plans, as required. The resolution of a number of potential violations is pending. Any Regional Reliability Entity (including RFC or SERC) determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing its programs to ensure compliance with the Reliability Standards by LG&E, certain other instances of potential non-compliance may be identified from time to time. LG&E cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any, other than the amounts currently recorded.

In October 2012, the FERC initiated its consideration of proposed changes to Reliability Standards to address the impacts of Geomagnetic Disturbances on the reliable operation of the bulk-power system, which might, among other things, lead to a requirement to install equipment that blocks geo-magnetically induced currents on implicated transformers. On May 16, 2013, FERC issued Order No. 779, requiring NERC to submit two types of Reliability Standards for FERC's approval in twelve month intervals. The first type would require certain owners and operators of the nation's electricity infrastructure, such as LG&E, to develop and implement operational procedures to mitigate the effects of Geomagnetic Disturbances on the bulk-power system. This NERC proposed standard was filed by NERC with FERC for approval in January of 2014, with a comment due date of March 24, 2014. The second type is to require owners and operators of the bulk-power system to assess certain Geomagnetic Disturbance events and develop and implement plans to protect the bulk-power system from those events and must be filed by NERC with FERC for approval by January 22, 2015. LG&E may be required to make significant expenditures in new equipment or modifications to its facilities to comply with the new requirements. LG&E is unable to predict the amount of any expenditures that may be required as a result of the adoption of any Reliability Standards for Geomagnetic Disturbances.

Environmental Matters

Due to the environmental issues discussed below or other environmental matters, it may be necessary for LG&E to modify, curtail, replace or cease operation of certain facilities or performance of certain operations to comply with statutes, regulations and other requirements of regulatory bodies or courts. In addition, legal challenges to new environmental permits or rules add to the uncertainty of estimating the future cost impact of these permits and rules.

LG&E is entitled to recover, through the ECR mechanism, certain costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which are applicable to coal combustion wastes and by-products from facilities that generate electricity from coal in accordance with approved compliance plans. Costs not covered by the ECR mechanism for LG&E are subject to rate recovery before the KPSC. LG&E can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

Air

CSAPR (formerly Clean Air Transport Rule) and CAIR

In July 2011, the EPA adopted the CSAPR. The CSAPR replaced the EPA's previous CAIR which was invalidated in July 2008 by the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit Court). CAIR subsequently was effectively reinstated by the D.C. Circuit Court in December 2008, pending finalization of the CSAPR. Like CAIR, CSAPR targeted sources in the eastern U.S. and would have required reductions in sulfur dioxide and nitrogen oxides in two phases (2012 and 2014).

In December 2011, the D.C. Circuit Court stayed implementation of the CSAPR and left CAIR in effect pending a final decision on the validity of the rule. In August 2012, the D.C. Circuit Court issued a ruling invalidating CSAPR, remanding the rule to the EPA for further action, and leaving CAIR in place during the interim. In June 2013, the U.S. Supreme Court granted the EPA's petition for review of the D.C. Circuit Court's August 2012 decision. Oral arguments before the U.S. Supreme Court were held in December 2013. Prior to a revised transport rule from the EPA, coal-fired generating plants could face tighter emission limitations on nitrogen oxides through state action.

The Kentucky fossil-fueled generating plants can meet the CAIR sulfur dioxide emission requirements by utilizing sulfur dioxide allowances (including banked allowances and optimizing existing controls). To meet standards for nitrogen oxides under the CAIR, LG&E will need to buy allowances and/or make operational changes. LG&E does not currently anticipate that the costs of meeting these reinstated CAIR standards will be significant.

National Ambient Air Quality Standards

LG&E’s fossil-fueled generating plants may face further reductions in emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxides, sulfur dioxide and/or fine particulates.

In 2010, the EPA finalized a new one-hour standard for sulfur dioxide and required states to identify areas that meet those standards and areas that are in non-attainment. In July 2013, the EPA finalized non-attainment designations for part of Jefferson County in Kentucky. Attainment must be achieved by 2018. States are working on designations for other areas.

In December 2012, the EPA issued final rules that strengthen the fine particulate standards. Under the final rules, states and the EPA have until 2015 to identify non-attainment areas, and states have until 2020 to achieve attainment for those areas.

LG&E anticipates that some of the measures required for compliance with the CAIR, or the MATS, or the Regional Haze requirements (as discussed below), such as upgraded or new sulfur dioxide scrubbers at certain plants and the previously announced retirement of coal-fired generating units at the Cane Run plant, will help to achieve compliance with the new one-hour sulfur dioxide standard. If additional reductions were to be required, the financial impact could be significant.

Until particulate matter and sulfur dioxide maintenance and compliance plans are developed by the EPA and state or local agencies, including identification and finalization of attainment designations for particulate matter, LG&E cannot predict the impact of the new standards.

MATS

In May 2011, the EPA published a proposed regulation requiring stringent reductions of mercury and other hazardous air pollutants from power plants. In February 2012, the EPA published the final rule, known as the MATS, with an effective date of April 2012. The rule is being challenged by industry groups and states in the D.C. Circuit Court, where oral arguments were held in December 2013. The rule provides for a three-year compliance deadline with the potential for a one-year extension as provided under the statute. LG&E has received compliance extensions for certain plants. LG&E is considering extension requests for other plants as well.

At the time the MATS rule was proposed, LG&E filed requests with the KPSC for environmental cost recovery based on its expected need to install environmental controls including chemical additive and fabric-filter baghouses to remove air pollutants. Recovery of the cost of certain controls was granted by the KPSC in December 2011. LG&E's anticipated retirement of certain coal-fired electricity generating units located at Cane Run is in response to MATS and other environmental regulations. LG&E is continuing to assess whether any revisions of its approved compliance plans will be necessary.

LG&E is continuing to conduct in-depth reviews of the MATS, including the potential implications to scrubber wastewater discharges. See the discussion of effluent limitations guidelines and standards below.

Regional Haze and Visibility

The EPA's regional haze programs were developed under the Clean Air Act to eliminate man-made visibility degradation by 2064. Under the programs, states are required to take action via state plans to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977.

The primary power plant emissions affecting visibility are sulfur dioxide, nitrogen oxides and particulates. To date, the focus of regional haze activity has been the western U.S. because the EPA had determined that the regional trading program in the eastern U.S. under CSAPR satisfied BART requirements to reduce sulfur dioxide and nitrogen oxides. However, the D.C. Circuit Court's August 2012 decision to vacate and remand CSAPR and to implement CAIR in its place on an interim basis leaves power plants located in the eastern U.S., including LG&E’s plants, exposed to reductions in sulfur dioxide and nitrogen oxides as required by BART, unless the D.C. Circuit Court's decision, now pending before the U.S. Supreme Court, is overturned.

In addition to this exposure stemming from the remand of CSAPR, LG&E's Mill Creek Units 3 and 4 are required to reduce sulfuric acid mist emissions because they were determined to have a significant regional haze impact. These reductions are in the Kentucky Division of Air Quality's regional haze state implementation plan that was submitted to the EPA. LG&E is currently installing sorbent injection technology to comply with these reductions, the costs of which are not expected to be significant.

New Source Review (NSR)

The EPA has continued its NSR enforcement efforts targeting coal-fired generating plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act.

In August 2007, LG&E received information requests for the Mill Creek and Trimble County plants, but has received no further communications from the EPA since providing its responses. LG&E cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

States and environmental groups also have commenced litigation alleging violations of the NSR regulations by coal-fired generating plants across the nation. If LG&E is found to have violated NSR regulations by significantly increasing pollutants through a major plant modification, it would, among other things, be required to meet stringent permit limits reflecting Best Available Control Technology (BACT) for pollutants meeting the National Ambient Air Quality Standards (NAAQS) in the area and reflecting Lowest Achievable Emission Rates (LAER) for pollutants not meeting the NAAQS in the area. The costs to meet such limits, including installation of technology at certain units, could be significant.

TC2 Air Permit

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which, in January 2010, were incorporated into a final revised permit issued by the KDAQ. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, LG&E cannot predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

Cane Run Environmental Claims

In the 2011 to 2013 time period, the Louisville Metro Air Pollution Control District issued several notices of violation alleging violations of local air quality rules at the Cane Run plant. In November 2013, LG&E entered into a settlement resolving the pending citations in return for payment of a civil penalty in a non-material amount and performance of remedial measures not expected to result in material costs.

On September 6, 2013, LG&E received a letter on behalf of two residents adjacent to the Cane Run plant notifying various federal, state, and local agencies of their intent to file a citizen suit for alleged violations of the Clean Air Act (CAA) and Resource Conservation and Recovery Act (RCRA). On December 16, 2013, six residents, on behalf of themselves and others similarly situated, filed a class action complaint against LG&E in the U.S. District Court for the Western District of Kentucky for alleged violations of the CAA and RCRA. In addition, these plaintiffs assert common law claims of nuisance, trespass, and negligence. These plaintiffs seek injunctive relief and civil penalties that would accrue to governmental agencies, plus costs and attorney fees, for the alleged statutory violations. Under the common law claims, these plaintiffs seek monetary compensation and punitive damages for property damage and diminished property values for a class consisting of residents within four miles of the plant. In their individual capacities, these plaintiffs seek compensation for alleged adverse health effects. LG&E cannot predict the outcome of this matter or the potential impact on operations of the Cane Run plant. LG&E has previously announced that it anticipates retiring the coal-fired units at Cane Run before the end of 2015.

GHG Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has authority under the Clean Air Act to regulate GHG emissions from new motor vehicles, in April 2010, the EPA and the U.S. Department of Transportation issued new light-duty vehicle emissions standards that applied beginning with 2012 model year vehicles. The EPA also clarified that this standard, beginning in 2011, authorized regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act. As a result, any new sources or major modifications to existing GHG sources causing a net significant emissions increase now require adherence to the BACT permit limits for GHGs. The rules were challenged, and in June 2012 the D.C. Circuit Court upheld the EPA's regulations. In December 2012, the D.C. Circuit Court denied petitions for rehearing pertaining to its June 2012 opinion. On October 15, 2013, the U.S. Supreme Court granted certiorari for several petitions to decide whether the NSR provisions of the Clean Air Act require the EPA to regulate GHG emissions from stationary sources, such as power plants.

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a revised proposal for new power plants (a prior proposal was issued in 2012) by September 20, 2013, with a final rule in a timely fashion thereafter, and to issue proposed standards for existing plants by June 1, 2014 with a final rule to be issued by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and the state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from $23.80 to $38 per metric ton in 2015 may also lead to more costly regulatory requirements; the White House Office of Management and Budget (OMB) has opened this issue for public comment. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect LG&E and others in the industry as modifications to electricity delivery systems to improve the ability to withstand major storms may be needed in order to meet those requirements.

The EPA issued its revised proposal for new sources on September 20, 2013 as directed by the White House. This proposal was published in the Federal Register on January 8, 2014, with comments due on March 10, 2014. Unlike the EPA's prior proposal, the EPA's revised proposal established separate emission standards for coal and gas units based on the application of different technologies. The coal standard is based on the application of partial carbon capture and sequestration technology, but because this technology is not presently commercially available, the revised proposal effectively precludes the construction of new coal plants. The EPA proposed the same standard for NGCC power plants as was proposed in 2012 and may not be consistently achievable. In addition, the EPA deleted the explicit exemption previously proposed for simple-cycle natural gas plants.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. In November 2011, the Council issued a final report to the Secretary of Kentucky's Energy and Environment Cabinet for his consideration. The final report acknowledged that the recommendations would require additional review and analysis prior to implementation, and that many of the recommendations would likely require, in part, further legislative or regulatory actions. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting plants and, although the decided cases to date have not sustained claims brought on the basis of these theories of liability, the law remains unsettled on these claims. In September 2009, the U.S. Court of Appeals for the Second Circuit in the case of AEP v. Connecticut reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the Second Circuit and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In addition, in Comer v. Murphy Oil (Comer case), the U.S. Court of Appeals for the Fifth Circuit (Fifth Circuit) declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the Comer case named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a petition to reverse the Fifth Circuit's ruling. In May 2011, the plaintiffs in the Comer case filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including four of LG&E’s affiliates but excluding LG&E, under a Mississippi statute that allows the re-filing of an action in certain circumstances. In March 2012, the Mississippi federal district court granted defendants' motions to dismiss the state common law claims. Plaintiffs appealed to the U.S. Court of Appeals for the Fifth Circuit, and in May 2013, the Fifth Circuit affirmed the district court's dismissal of the case. Additional litigation in federal and state courts over such issues is continuing. LG&E cannot predict the outcome of these lawsuits or estimate a range of reasonably possible losses, if any.

In 2013, LG&E and its jointly owned power plants emitted approximately 17 million tons of carbon dioxide compared with 18 million tons in 2012. All tons are U.S. short tons (2,000 pounds/ton).

Renewable Energy Legislation

There has been interest in renewable energy legislation at both the state and federal levels. Federal legislation on renewable energy is not expected to be enacted this year.

LG&E believes there are financial, regulatory and logistical uncertainties related to the implementation of renewable energy mandates that will need to be resolved before the impact of such requirements on them can be estimated. Such uncertainties, among others, include the need to provide back-up supply to augment intermittent renewable generation, potential generation over-supply and downward pressure on energy prices that could result from such renewable generation and back-up, impacts to PJM's capacity market and the need for substantial changes to transmission and distribution systems to accommodate renewable energy sources. These uncertainties are not directly addressed by proposed legislation. LG&E cannot predict at this time the effect of renewable energy mandates that may be adopted, although the costs to implement and comply with any such requirements could be significant.

Water/Waste

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous) under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. Regulating CCRs as a hazardous waste under Subtitle C of the RCRA would materially increase costs and result in early retirements of many coal-fired plants, as it would require plants to retrofit their operations to comply with full hazardous waste requirements for the generation of CCRs and associated waste waters through generation, transportation and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. The EPA's proposed approach to regulate CCRs as non-hazardous waste under Subtitle D of the RCRA would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, LG&E expects that several of its plants could be significantly impacted by the EPA's proposed non-hazardous waste regulations, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. LG&E has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several plants and has implemented or is implementing certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) requesting comments on selected documents it received during the comment period for the proposed regulations. In September 2013, in response to the proposed Effluent Limitation Guidelines, PPL submitted comments on the proposed CCR regulations. Also, in September 2013, PPL commented on a second CCR NODA seeking comment on additional information related to the EPA's proposal.

A coalition of environmental groups and two CCR recycling companies have filed lawsuits against the EPA seeking a deadline for final rulemaking and, in settlement of that litigation, the EPA has agreed to issue its final rulemaking by the end of 2014.

In July 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from issuing final CCR regulations and would set non-hazardous CCR standards under RCRA and authorize state permit programs. It remains uncertain whether similar legislation will likely be passed by the U.S. Senate. LG&E cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on its facilities, but the financial and operational impact is expected to be material if CCRs are regulated as hazardous waste and significant if regulated as non-hazardous.

Trimble County Landfill Permit

In May 2011, LG&E submitted an application for a special waste landfill permit to handle coal combustion residuals generated at the Trimble County plant. After extensive review of the permit application in May 2013, the Kentucky Division of Waste Management denied the permit application on the grounds that the proposed facility would violate the Kentucky Cave Protection Act because it would eliminate an on-site karst feature considered to be a cave. After assessing additional options for managing coal combustion residuals, in January 2014, LG&E submitted to the Kentucky Division of Waste Management a landfill permit application for an alternate site adjacent to the plant. LG&E and KU are unable to determine the precise impact of this matter until a landfill permit is issued and any resulting legal challenges are concluded.

Seepages and Groundwater Infiltration

Seepages or groundwater infiltration has been detected at active and retired wastewater basins and landfills at various LG&E plants. LG&E has completed or is completing assessments of seepages or groundwater infiltration at various facilities and has completed or is working with agencies to implement assessment or abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

Clean Water Act 316(b)

The EPA published proposed rule 316(b) for existing facilities in April 2011. The EPA has been evaluating the comments it received to the proposed rule and meeting with industry groups to discuss options. The proposed rule contains two requirements to reduce impact to aquatic organisms at cooling water intake structures. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens (impingement) regardless of the levels of mortality actually occurring or the cost to achieve the standards. The second requirement is to determine and install the best technology available to reduce mortality of aquatic organisms pulled through a plant's cooling water system (entrainment). A form of cost-benefit analysis is allowed for this second requirement involving a site-specific evaluation based on nine factors, including impacts to energy delivery reliability and the remaining useful life of the plant. The final rule is expected by April 17, 2014. Until the final rule is issued, LG&E cannot estimate a range of reasonably possible costs, if any, that would be required to comply with such a regulation.

Effluent Limitations Guidelines (ELGs) and Standards

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations contain requirements that would affect the inspection and operation of CCR facilities, if finalized. The EPA has indicated that it will coordinate these regulations with the regulation of CCRs discussed above. The proposal contains alternative approaches, some of which could significantly impact LG&E’s coal-fired plants. LG&E worked with industry groups to comment on the proposed regulation on September 20, 2013. The final regulation is expected to be issued in May 2014 but it may be delayed. At the present time, LG&E is unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant. Pending finalization of the ELGs, certain states and environmental groups (including Kentucky) are proposing more stringent technology-based limits in permit renewals. Depending on the final limits imposed, the costs of compliance could be significant and costs could be imposed ahead of federal timelines.

Other Issues

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxic Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all or some PCB-containing equipment. The EPA is planning to propose the revised regulations in November 2014. PCBs are found, in varying degrees, in LG&E’s operations. LG&E cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on its facilities, but the costs could be significant.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to the Trimble Circuit Court, but the case was subsequently transferred to the Franklin Circuit Court. In September 2013, the court reversed the Cabinet order upholding the permit and remanded the permit to the agency for further proceedings. In October 2013, LG&E filed a notice of appeal with the Kentucky Court of Appeals. LG&E is unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

The EPA and the Army Corps of Engineers are working on a guidance document that will expand the federal government's interpretation of what constitutes "waters of the U.S." subject to regulation under the Clean Water Act. This change has the potential to affect generation and delivery operations, with the most significant effect being the potential elimination of the existing regulatory exemption for plant waste water treatment systems. The costs that may be imposed on LG&E as a result of any eventual expansion of this interpretation cannot reliably be estimated at this time but could be significant.

Superfund and Other Remediation

LG&E is remediating or has completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which LG&E may be liable for remediation. These include a number of former coal gas manufacturing plants previously owned or operated or currently owned by predecessors or affiliates of LG&E. There are additional sites, formerly owned or operated by LG&E

predecessors or affiliates, for which LG&E lacks information on current site conditions and is therefore unable to predict what, if any, potential liability they may have.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which LG&E currently lacks information, the costs of remediation and other liabilities could be material. LG&E cannot estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require LG&E to take more extensive assessment and remedial actions at former coal gas manufacturing plants. LG&E cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, LG&E undertakes remedial action in response to spills or other releases at various on-site and off-site locations, negotiates with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiates with property owners and other third parties alleging impacts from LG&E’s operations and undertakes similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on LG&E’s operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in significant additional costs for LG&E.

Other

Labor Unions

In 2014, certain labor agreement negotiations are scheduled to begin. For LG&E, negotiations with the IBEW will begin in October 2014. The current agreement expires in November 2014. LG&E cannot predict the outcome of the union labor negotiations.

The labor agreement expiring in 2014 covered 701 employees at December 31, 2013, which is 70% of LG&E’s total workforce.

Guarantees and Other Assurances

In the normal course of business, LG&E enters into agreements that provide financial performance assurance to third parties. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

Pursuant to the OVEC power purchase contract, LG&E is obligated to pay for its share of OVEC's excess debt service, post-retirement and decommissioning costs, as well as any shortfall from amounts currently included within a demand charge designed to cover these costs over the term of the contract. LG&E's proportionate share of OVEC's outstanding debt was $89 million at December 31, 2013. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchases Commitments" above for additional information on the OVEC power purchase contract.

LG&E provides other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries including LG&E, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of $225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

Wholesale Sales and Purchases

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail customers and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost. Savings realized from such intercompany transactions are shared equally between both companies. The volume of energy each company has to sell to the other is dependent on its retail customers' needs and its available generation.

Support Costs

LKS provides LG&E with administrative, management and support services. Where applicable, the costs of these services are charged to LG&E as direct support costs. General costs that cannot be directly attributed to LG&E are allocated and charged as indirect support costs. LKS bases its indirect allocations on LG&E’s number of employees, total assets, revenues, number of customers and/or other statistical information. LKS charged the following amounts for the years ended December 31, and believe these amounts are reasonable, including amounts applied to accounts that are further distributed between capital and expense.

2013	2012
$ 216	$ 186

LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E are reimbursed through LKS.

Intercompany Derivatives

Periodically, LG&E enters into forward-starting interest rate swaps with PPL. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties. See Note 14 for additional information on intercompany derivatives.

Other

See Note 1 for discussions regarding the intercompany tax sharing agreement and Note 5 for a discussion regarding capital transactions by LG&E. See Note 8 for discussions regarding intercompany allocations associated with defined benefits.

12. Other Income (Expense) – net

The components of "Other Income (Expense) - net" for 2013 and 2012 for LG&E were not significant.

13. Fair Value Measurements and Credit Concentration

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. During 2013 and 2012, there were no transfers between Level 1 and Level 2. See Note 1 for information on the levels in the fair value hierarchy.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	December 31, 2013			
	Total	Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	$ 8	$ 8	$ -	$ -
Restricted cash and cash equivalents (a)	22	22	-	-
Total assets	$ 30	$ 30	$ -	$ -
Liabilities				
Price risk management liabilities:				
Interest rate swaps	$ 36	$ -	$ 36	$ -
Total liabilities	$ 36	$ -	$ 36	$ -

	December 31, 2012			
	Total	Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	$ 22	$ 22	$ -	$ -
Restricted cash and cash equivalents (a)	32	32	-	-
Price risk management assets:				
Interest rate swaps	7	-	7	-
Total assets	$ 61	$ 54	$ 7	$ -
Liabilities				
Price risk management liabilities:				
Interest rate swaps	$ 58	$ -	$ 58	$ -
Total liabilities	$ 58	$ -	$ 58	$ -

(a) Included in "Other noncurrent assets" on the Balance Sheets.

Price Risk Management Assets/Liabilities - Interest Rate Swaps

To manage interest rate risk, LG&E uses interest rate contracts such as forward-starting swaps. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR) as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3. Accounting personnel, who report to the CFO, interpret analysis quarterly to classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

Financial Instruments Not Recorded at Fair Value

The carrying amounts of long-term debt on the Balance Sheets and its estimated fair values are set forth below. The fair values were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates, which incorporate the credit risk of LG&E. These instruments are classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	December 31, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt	$ 1,353	$ 1,372	$ 1,112	$ 1,178

The carrying value of short-term debt (including notes between affiliates), when outstanding, approximates fair value due to the variable interest rates associated with the short-term debt and is classified as Level 2.

Credit Concentration Associated with Financial Instruments

Contracts are entered into with many entities for the purchase and sale of energy. When NPNS is elected, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 14 for information on credit policies used to manage credit risk, including master netting arrangements and collateral requirements.

At December 31, 2013, LG&E's credit exposure was not significant.

14. Derivative Instruments and Hedging Activities

Risk Management Objectives

PPL has a risk management policy approved by the Board of Directors to manage market risk (including price, liquidity and volumetric risk) and credit risk (including non-performance risk and payment default risk). Senior management oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, and verification of risk and transaction limits.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts and swaps are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of the contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected. The table below summarizes the market risks that affect LG&E.

Commodity price risk (including basis and volumetric risk)	M
Interest rate risk:	
Debt issuances	M
Defined benefit plans	M
Equity securities price risk:	
Defined benefit plans	M

M = The regulatory environment, by definition, significantly mitigates market risk.

Commodity price risk

LG&E's rates include certain mechanisms for fuel, gas supply and environmental expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses.

Interest rate risk

LG&E is exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt and utilizes forward starting interest rate swaps to hedge changes in benchmark interest rates in connection with future debt issuances.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

LG&E is exposed to credit risk from interest rate derivatives with third-party financial institutions.

The majority of LG&E’s credit risk stems from energy sales and purchases. In the event a supplier of LG&E defaults on its obligation, it would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by LG&E would be recoverable from customers in future rates, thus mitigating the financial risk for these entities.

LG&E has credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. LG&E may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

Master Netting Arrangements

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

LG&E had no obligation to return cash collateral under master netting arrangements at December 31, 2013 and 2012.

LG&E had posted cash collateral under master netting arrangements of $22 million and $32 million at December 31, 2013 and 2012.

See "Offsetting Derivative Investments" below for a summary of derivative positions presented in the balance sheets where a right of setoff exists under these arrangements.

Interest Rate Risk

LG&E issues debt to finance its operations, which exposes it to interest rate risk. Various financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of the debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges

In November 2012 and April 2013, LG&E entered into forward-starting interest rate swaps with PPL that hedged the interest payments on new debt that was expected to be issued in 2013. In September 2013, these hedges were terminated and LG&E entered into new forward-starting interest rate swaps with PPL, effectively extending the start date of the prior hedges from September 2013 to December 2013. All of these swaps had terms identical to forward-starting swaps entered into by PPL with third parties. New debt totaling $250 million was issued in November 2013 and the hedges issued in September were terminated in November 2013. Net cash settlements of $43 million were received on the swaps that were terminated in September and November, which are included in "Cash Flows from Operating Activities" on the Statement of Cash Flows. Realized gains and losses on these swaps are probable of recovery through regulated rates; as such, the net settlements were reclassified from AOCI to regulatory liabilities and are being recognized in "Interest Expense" on the Statements of Income over the life of the newly issued debt. For 2013, there was no hedge ineffectiveness recorded for the interest rate derivatives.

Economic Activity

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income when the hedged transaction occurs. At December 31, 2013, LG&E held contracts with a notional amount of $179 million that range in maturity through 2033.

Accounting and Reporting

All derivative instruments are recorded at fair value on the Balance Sheets as an asset or liability unless NPNS is elected. Changes in the fair value of derivatives not designated as NPNS are recognized currently in earnings unless specific hedge accounting criteria are met and designated as such, except for the change in fair value of LG&E's interest rate swaps that are recognized as regulatory assets or regulatory liabilities. See Note 4 for amounts recorded in regulatory assets and regulatory liabilities at December 31, 2013 and 2012.

See Note 1 for additional information on accounting policies related to derivative instruments.

The following table presents the fair value and the location on the Balance Sheets of derivative instruments designated as cash flow hedges.

	December 31, 2013		December 31, 2012	
	Assets	Liabilities	Assets	Liabilities
Current:				
Price Risk Management Assets/Liabilities (a):

Total noncurrent	-	32	-	53
Total derivatives	$ -	$ 36	$ -	$ 58

(a) Represents the location on the Balance Sheets.

The following tables present the pre-tax effect of derivatives not designated as cash flow hedges that are recognized in income or regulatory assets.

Derivative Instruments	**Location of Gain (Loss)**	**2013**	**2012**
Interest rate swaps	Interest Expense	$ (8)	$ (8)
Commodity contracts	Operating Revenues	-	-
	Total	$ (8)	$ (8)

Derivative Instruments	**Location of Gain (Loss)**	**2013**	**2012**
Interest rate swaps	Regulatory assets - noncurrent	$ 22	$ 1

Offsetting Derivative Instruments

LG&E has master netting arrangements or similar agreements in place including derivative clearing agreements with futures commission merchants (FCMs) to permit the trading of cleared derivative products on one or more futures exchanges. The clearing arrangements permit an FCM to use and apply any property in its possession as a set off to pay amounts or discharge obligations owed by a customer upon default of the customer and typically do not place any restrictions on the FCM's use of collateral posted by the customer. LG&E also enters into agreements pursuant to which it trades certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to setoff amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

LG&E has elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The tables below summarize the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

	Assets			
		Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Received	Net
December 31, 2012				
Treasury derivatives	$ 7	$ -	$ -	$ 7

	Liabilities			
		Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Received	Net
December 31, 2013				
Treasury derivatives	$ 36	$ -	$ 20	$ 16
December 31, 2012				
Treasury derivatives	$ 58	$ -	$ 30	$ 28

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of LG&E. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in the credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade (i.e., below BBB- for S&P or Fitch, or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding the performance of LG&E's obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

At December 31, 2013, the effect of a decrease in credit ratings below investment grade on derivative contracts that contain credit risk-related contingent features and were in a net liability position is summarized as follows:

Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent provisions	$	26
Aggregate fair value of collateral posted on these derivative instruments		22
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)		6

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheets.

15. Other Intangible Assets

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2013				December 31, 2012			
	Gross Carrying Amount		Accumulated Amortization		Gross Carrying Amount		Accumulated Amortization	
Subject to amortization:								
Coal contracts (a)	$	124	$	81	$	124	$	62
Land and transmission rights		7		1		8		1
Emission allowances (b)		1		-		1		-
OVEC power purchase agreement (c)		87		17		87		13
Total subject to amortization	$	219	$	99	$	220	$	76

(a) Gross carrying amount represents the fair value at the acquisition date of coal contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 4 for additional information.

(b) Represents the fair value at the acquisition date of emission allowances recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability is recorded related to these emission allowances, which is being amortized as the emission allowances are consumed, eliminating any income statement impact. Consumption related to these emission allowances was insignificant in 2013 and in 2012.

(c) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. See Note 4 for additional information.

Current intangible assets are included in "Other current assets" on the Balance Sheets. Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Amortization expense, excluding consumption of emission allowances, was as follows:

	2013	2012
Intangible assets with regulatory offset	23	23
Total	$ 23	$ 23

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2014	2015	2016	2017	2018
Intangibles with regulatory offset	$ 23	$ 24	$ 13	$ 6	$ 6

16. Asset Retirement Obligations

LG&E's AROs are primarily related to the final retirement of assets associated with generating units. LG&E also has AROs related to natural gas mains and wells. LG&E's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. As described in Notes 1 and 4, LG&E's accretion and depreciation expense are recorded as a regulatory asset, such that there is no earnings impact. In 2013, AROs were revalued primarily due to updates in the estimated cash flows for ash ponds and CCR surface impoundments based on updated cost estimates.

The changes in the carrying amounts of AROs were as follows.

	2013	2012
ARO at beginning of period	$ 62	$ 57
Accretion expense	3	3
Changes in estimated cash flow or settlement date	17	5
Obligations settled	(8)	(3)
ARO at end of period	74	62

Substantially all of the ARO balances are classified as noncurrent at December 31, 2013 and 2012.

17. New Accounting Guidance Pending Adoption

Accounting for Obligations Resulting from Joint and Several Liability Arrangements

Effective January 1, 2014, LG&E will retrospectively adopt accounting guidance for the recognition, measurement and disclosure of certain obligations resulting from joint and several liability arrangements when the amount of the obligation is fixed at the reporting date. If the obligation is determined to be in the scope of this guidance, it will be measured as the sum of the amount the reporting entity agreed to pay on the basis of its arrangements among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. This guidance also requires additional disclosures for these obligations.

The adoption of this guidance is not expected to have a significant impact on LG&E.

Presentation of Unrecognized Tax Benefits When Net Operating Loss Carryforwards, Similar Tax Losses, or Tax Credit Carryforwards Exist

Effective January 1, 2014, LG&E will prospectively adopt accounting guidance that requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets.

The adoption of this guidance is not expected to have a significant impact on LG&E.

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106)

1. Report below the original cost of electric plant in service according to the prescribed accounts.
2. In addition to Account 101, Electric Plant in Service (Classified), this page and the next include Account 102, Electric Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction Not Classified-Electric.
3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.
4. For revisions to the amount of initial asset retirement costs capitalized, included by primary plant account, increases in column (c) additions and reductions in column (e) adjustments.
5. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
6. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d)

ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 11, column (c), and that reported for electric plant in service, pages 204-207, column 9d), excluding retirements of non-depreciable property.
3. The provisions of Account 108 in the Uniform System of accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

INVESTMENTS IN SUBSIDIARY COMPANIES (Account 123.1)

1. Report below investments in Accounts 123.1, investments in Subsidiary Companies.
2. Provide a subheading for each company and List there under the information called for below. Sub - TOTAL by company and give a TOTAL in columns (e),(f),(g) and (h)
(a) Investment in Securities - List and describe each security owned. For bonds give also principal amount, date of issue, maturity and interest rate.
(b) Investment Advances - Report separately the amounts of loans or investment advances which are subject to repayment, but which are not subject to current settlement. With respect to each advance show whether the advance is a note or open account. List each note giving date of issuance, maturity date, and specifying whether note is a renewal.
3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.

FOOTNOTE DATA

Schedule Page: 233 Line No.: 1 Column: f

Goowill is the value attributed to KU's franchise as a result of PPL’s acquisition of LKE in November 2010.

Schedule Page: 233 Line No.: 4 Column: f

The balance of $69,382,916 relates to the fair value measurement of $86,856,705 for the power purchase contract between LG&E and OVEC that was recognized as a result of the acquisition by PPL in November 2010. The variance is 38 months of amortization in 2010, 2011, 2012 and 2013.

Schedule Page: 233 Line No.: 7 Column: f

The balance of $42,713,979 relates to the fair value measurement of $123,813,249 for LG&E's coal contracts that was recognized as a result of the acquisition by PPL in November 2010. The variance is 38 months of amortization in 2010, 2011, 2012 and 2013.

Schedule Page: 233 Line No.: 10 Column: f

The balance of $1,542,359 relates to the fair value measurement of $3,219,107 for LG&E's SO2 emission allowances that was recognized as a result of the acquisition by PPL in November 2010. The variance is 38 months of amortization in 2010, 2011, 2012 and 2013.

CAPITAL STOCKS (Account 201 and 204) (Continued)

3. Give particulars (details) concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.
4. The identification of each class of preferred stock should show the dividend rate and whether the dividends are cumulative or non-cumulative.
5. State in a footnote if any capital stock which has been nominally issued is nominally outstanding at end of year.
Give particulars (details) in column (a) of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledgee and purposes of pledge.

OTHER PAID-IN CAPITAL (Accounts 208-211, inc.)

Report below the balance at the end of the year and the information specified below for the respective other paid-in capital accounts. Provide a subheading for each account and show a total for the account, as well as total of all accounts for reconciliation with balance sheet, Page 112. Add more columns for any account if deemed necessary. Explain changes made in any account during the year and give the accounting entries effecting such change.

(a) Donations Received from Stockholders (Account 208)-State amount and give brief explanation of the origin and purpose of each donation.

(b) Reduction in Par or Stated value of Capital Stock (Account 209): State amount and give brief explanation of the capital change which gave rise to amounts reported under this caption including identification with the class and series of stock to which related.

(c) Gain on Resale or Cancellation of Reacquired Capital Stock (Account 210): Report balance at beginning of year, credits, debits, and balance at end of year with a designation of the nature of each credit and debit identified by the class and series of stock to which related.

(d) Miscellaneous Paid-in Capital (Account 211)-Classify amounts included in this account according to captions which, together with brief explanations, disclose the general nature of the transactions which gave rise to the reported amounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224)

1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.
2. In column (a), for new issues, give Commission authorization numbers and dates.
3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.
5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.
6. In column (b) show the principal amount of bonds or other long-term debt originally issued.
7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224)

1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.
2. In column (a), for new issues, give Commission authorization numbers and dates.
3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.
5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.
6. In column (b) show the principal amount of bonds or other long-term debt originally issued.
7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224) (Continued)

10. Identify separate undisposed amounts applicable to issues which were redeemed in prior years.
11. Explain any debits and credits other than debited to Account 428, Amortization and Expense, or credited to Account 429, Premium on Debt - Credit.
12. In a footnote, give explanatory (details) for Accounts 223 and 224 of net changes during the year. With respect to long-term advances, show for each company: (a) principal advanced during year, (b) interest added to principal amount, and (c) principle repaid during year. Give Commission authorization numbers and dates.
13. If the respondent has pledged any of its long-term debt securities give particulars (details) in a footnote including name of pledgee and purpose of the pledge.
14. If the respondent has any long-term debt securities which have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.
15. If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest expense in column (i). Explain in a footnote any difference between the total of column (i) and the total of Account 427, interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.
16. Give particulars (details) concerning any long-term debt authorized by a regulatory commission but not yet issued.

FOOTNOTE DATA

Schedule Page: 256 Line No.: 1 Column: a

Per instruction 9 concerning the treatment of unamortized debt expense, premium or discount, original debt premiums and expenses are being amortized over the lives of the related issues and remarketing expenses are being amortized through the put dates of the remarketed bonds.

Schedule Page: 256 Line No.: 2 Column: a

Pollution control series bonds are obligations of LG&E, issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates LG&E to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds.

Schedule Page: 256 Line No.: 16 Column: a

As of December 31, 2013, the company had in effect four interest-rate swap agreements to hedge its exposure to tax exempt rates related to Pollution Control Bonds, Variable Rate Series. The Company’s position under the swap agreements are to pay a fixed rate and receive a variable rate based on the Securities Industry and Financial Markets Association Index or London Interbank Offered Rate (LIBOR). The specifics for each swap agreement related to notional amounts, maturity dates, payable and receivable positions are as follows:

Notional Amount	Maturity	Payable	Receivable
$83,335,000	11/01/2020	Fixed 5.495%	SIFMA Index
$32,000,000	10/01/2033	Fixed 3.657%	68% of 1 mo LIBOR
$32,000,000	10/01/2033	Fixed 3.645%	68% of 1 mo LIBOR
$32,000,000	10/01/2033	Fixed 3.695%	68% of 1 mo LIBOR

By Order in Case No. 2012-00233, LG&E was authorized by the KPSC to enter into hedging agreements to lock in interest rates for debt that was issued in November 2013. In October 2012, LG&E entered into $150 million of forward-starting swaps using PPL as a pass through entity for all hedging agreements. In April 2013, LG&E added an additional $100 million of forward-starting swaps with PPL. In September 2013 when the initial swaps settled, LG&E entered into $250 million of forward-starting swaps with PPL during the interim period until the debt was issued. The settled swaps netted a gain of $43 million recorded as a regulatory liability at December 31, 2013. The regulatory liability is being amortized over the life of the debt to which it relates.

Schedule Page: 256 Line No.: 18 Column: a

Proceeds from LG&E’s First Mortgage Bonds issued in 2010 were used to repay the loans from a PPL subsidiary and for general corporate purposes. Proceeds from LG&E's First Mortgage Bonds issued in 2013 were used for capital expenditures and general corporate purposes. The first mortgage bonds were issued at a discount.

In April 2011, LG&E filed 2011 Registration Statements with the SEC related to offers to exchange securities issued in November 2010 in transactions not registered under the Securities Act of 1933 with similar but registered securities. The 2011 Registration Statements became effective in June 2011 and the exchanges were completed in July 2011, with substantially all securities being exchanged.

As of December 31, 2013, all of the Company’s long-term debt is collateralized by a first mortgage lien on substantially all of the assets of the Company in Kentucky.

Schedule Page: 256.1 Line No.: 1 Column: a

LG&E did not have long-term notes with associated companies in 2013.

Schedule Page: 256.1 Line No.: 4 Column: a

Upon completion of the acquisition by PPL, push-down accounting was used, resulting in adjustments to certain of the Company’s assets and liabilities to reflect their estimated fair values on the acquisition date.

The following pollution control bonds with coupon rates listed below were fair valued as a

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

FOOTNOTE DATA

result of the PPL acquisition:

Bond Issue	(221) Principal	(224) Fair Value Adjustment	Total Purchase Accounting
Louisville Metro 2007 Series A, due 6/1/2033, 1.15%	$31,000,000	$2,702,070	$33,702,070
Trimble County 2007 Series A, due 6/1/2033, 4.600%	$60,000,000	($2,062,667)	$57,937,333
Jefferson County 2000 Series A, due 5/1/2027, Var	$25,000,000	$1,397,125	$26,397,125
Louisville Metro 2005 Series A, due 2/1/2035, 2.20%	$40,000,000	$4,540,189	$44,540,189

The purchase accounting adjustments were recorded to Other Long-Term Debt Account (224). At December 31, 2013, all fair market value adjustments, with the exception of Trimble County 2007 Series A, were written off due to mandatory puts on the bonds. Amortization is recorded to Interest on Long-Term Debt Account (427).

RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be field, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.
3. A substitute page, designed to meet a particular need of a company, may be used as Long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR

1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual, or estimated amounts of such taxes are know, show the amounts in a footnote and designate whether estimated or actual amounts.
2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.)
Enter the amounts in both columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.
3. Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b)amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Continued)

5. If any tax (exclude Federal and State income taxes)- covers more then one year, show the required information separately for each tax year, identifying the year in column (a).
6. Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment in a foot- note. Designate debit adjustments by parentheses.
7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.
8. Report in columns (i) through (l) how the taxes were distributed. Report in column (I) only the amounts charged to Accounts 408.1 and 409.1 pertaining to electric operations. Report in column (l) the amounts charged to Accounts 408.1 and 109.1 pertaining to other utility departments and amounts charged to Accounts 408.2 and 409.2. Also shown in column (l) the taxes charged to utility plant or other balance sheet accounts.
9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

ELECTRIC OPERATING REVENUES (Account 400)

1. The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.
2. Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The -average number of customers means the average of twelve figures at the close of each month.
4. If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
5. Disclose amounts of $250,000 or greater in a footnote for accounts 451, 456, and 457.2.

ELECTRIC OPERATING REVENUES (Account 400)

6. Commercial and industrial Sales, Account 442, may be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent if such basis of classification is not generally greater than 1000 Kw of demand. (See Account 442 of the Uniform System of Accounts. Explain basis of classification in a footnote.)
7. See pages 108-109, Important Changes During Period, for important new territory added and important rate increase or decreases.
8. For Lines 2,4,5,and 6, see Page 304 for amounts relating to unbilled revenue by accounts.
9. Include unmetered sales. Provide details of such Sales in a footnote.

Items which compose Other Electric Revenues (456) year-to-date activity:

2013 invoices to Kosmos	$ 934,467
Other items less than $250,000 each	410,640
Total Other Electric Revenues	$ 1,345,107

Schedule Page: 300 Line No.: 21 Column: c

Items which compose Other Electric Revenues (456) year-to-date activity:

2012 invoices to Kosmos	$ 1,133,043
Other items less than $250,000 each	317,972
Total Other Electric Revenues	$ 1,451,015

Schedule Page: 300 Line No.: 22 Column: b

Items which compose Revenues from Transmission of Electricity of Others (456.1) year-to-date activity:

2013 invoices to Owensboro Municipal Utilities	$ 2,139,002
2013 invoices to East Kentucky Power Cooperative	1,777,242
2013 invoices to Kentucky Municipal Power Agency	786,337
2013 invoices to City of Frankfort	638,746
2013 invoices to Cargill Power Markets, LLC	394,013
2013 invoices to City of Madisonville	259,407
Other items less than $250,000 each	1,449,481
Total Revenues from Transmission of Electricity of Others	$ 7,444,228

Schedule Page: 300 Line No.: 22 Column: c

Items which compose Revenues from Transmission of Electricity of Others (456.1) year-to-date activity:

2012 invoices to East Kentucky Power Cooperative	$ 2,466,391
2012 invoices to Owensboro Municipal Utilities	2,265,781
2012 invoices to Kentucky Municipal Power Agency	1,107,526
2012 invoices to City of Frankfort	579,593
2012 invoices to Ameren Energy Marketing Company	499,855
2012 invoices to City of Madisonville	265,532
Other items less than $250,000 each	1,193,100
Total Revenues from Transmission of Electricity of Others	$ 8,377,778

Schedule Page: 300 Line No.: 1 Column: $

This value contains unbilled revenue of $920,587 and accrued revenue of $82,655. The accrued revenue represents the following:

DSM Accrual	$ 2,929,479
ECR Accrual	1,529,176
FAC Accrual	(4,376,000)
Total Accrual	$ 82,655

Schedule Page: 300 Line No.: 1 Column: MWH

Unbilled revenue of 16,742 MWH represents the net change of unbilled MWH from the previous period; as a result, it could be positive or negative.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

Louisville Gas and Electric Company	(1) ☒ An Original (2) ☐ A Resubmission	/ /	End of 2013/Q4

SALES FOR RESALE (Account 447)

1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.

SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.

LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401,iine 24.
10. Footnote entries as required and provide explanations following all required data.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

FOOTNOTE DATA

Schedule Page: 320 Line No.: 90 Column: c

The credit is due to transmission study adjustments that were performed for and billed to Southwest Power Pool and Transerv International.

Schedule Page: 320 Line No.: 121 Column: b

The credit balance is the result of the monthly amortization of the net Regulatory Liability for the MISO Exit Fee. During the 2012 KY base rate case, the Company netted the MISO Exit Fee Regulatory Asset and Regulatory Liability together for a net Regulatory Liability as of January 1, 2013.

Schedule Page: 320 Line No.: 141 Column: b

The credit is due to meter tampering charges billed to customers to offset cost of meter maintenance. Cost is recorded in several other accounts.

Schedule Page: 320 Line No.: 141 Column: c

The credit is due to meter tampering charges billed to customers to offset cost of meter maintenance. Cost is recorded in several other accounts.

Schedule Page: 320 Line No.: 184 Column: b

Amortization expense related to Information Technology software maintenance contracts, which was previously classified as Maintenance of General Plant (935), is considered to be a service to the company and these related expenses were moved to Outside Services Employed (923).

Schedule Page: 320 Line No.: 196 Column: b

Amortization expense related to Information Technology software maintenance contracts, which was previously classified as Maintenance of General Plant (935), is considered to be a service to the company and these related expenses were moved to Outside Services Employed (923).

PURCHASED POWER (Account 555)
(Including power exchanges)

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

PURCHASED POWER(Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.
9. Footnote entries as required and provide explanations following all required data.

Name of Respondent Louisville Gas and Electric Company	This Report Is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2013/Q4

TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1)
(Including transactions referred to as 'wheeling')

1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).
3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c)
4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

FOOTNOTE DATA

Schedule Page: 328 Line No.: 1 Column: m

The total consists of East Kentucky Power Cooperative Schedule 1 and Schedule 2 charges.

Schedule Page: 328 Line No.: 2 Column: k

The total consists of a true-up of prior periods.

Schedule Page: 328 Line No.: 2 Column: m

The total consists of a true-up of prior periods for East Kentucky Power Cooperative Schedule 1 and Schedule 2 charges related to firm transmission.

Schedule Page: 328 Line No.: 3 Column: l

The total consists of the amortization of a regulatory asset authorized by the settlement agreement between LG&E, KU and East Kentucky Power Cooperative regarding the Network Integration Transmission Service Agreement. FERC Docket Nos. ER06-1458-000, ER06-1458-001 and ER06-1458-002.

Schedule Page: 328 Line No.: 4 Column: a

LG&E transmits electricity for Indiana Municipal Power Agency (IMPA) from Trimble County Unit 1 to the MISO-LGEE interface or the PJM-LGEE interface at no cost to IMPA. This agreement was reached between LG&E and IMPA as a result of LG&E's exit from the MISO.

Schedule Page: 328 Line No.: 4 Column: d

The OLF transmission service agreement between LG&E and Indiana Municipal Power Agency has no expiration date.

Schedule Page: 328 Line No.: 5 Column: a

LG&E transmits electricity for Indiana Municipal Power Agency (IMPA) from Trimble County Unit 1 to the MISO-LGEE interface or the PJM-LGEE interface at no cost to IMPA. This agreement was reached between LG&E and IMPA as a result of LG&E's exit from the MISO.

Schedule Page: 328 Line No.: 5 Column: d

The LFP transmission service agreement between LG&E and Indiana Municipal Power Agency has a termination date of 1/01/2020 for Trimble County Unit 2.

Schedule Page: 328 Line No.: 6 Column: a

LG&E transmits electricity for Illinois Municipal Electric Agency (IMEA) from Trimble County Unit 1 to the MISO-LGEE interface or the PJM-LGEE interface at no cost to IMEA. This agreement was reached between LG&E and IMEA as a result of LG&E's exit from the MISO.

Schedule Page: 328 Line No.: 6 Column: d

The OLF transmission service agreement between LG&E and Illinois Municipal Electric Agency has a termination date of 3/01/2023 for Trimble County Unit 1.

Schedule Page: 328 Line No.: 7 Column: a

LG&E transmits electricity for Illinois Municipal Electric Agency (IMEA) from Trimble County Unit 1 to the MISO-LGEE interface or the PJM-LGEE interface at no cost to IMEA. This agreement was reached between LG&E and IMEA as a result of LG&E's exit from the MISO.

Schedule Page: 328 Line No.: 7 Column: d

The LFP transmission service agreement between LG&E and Illinois Municipal Electric Agency has a termination date of 1/01/2020 for Trimble County Unit 2.

Schedule Page: 328 Line No.: 8 Column: m

The total consists of Cargill Power Markets, LLC Schedule 1 and Schedule 2 charges.

Schedule Page: 328 Line No.: 9 Column: m

The total consists of Cargill Power Markets, LLC Schedule 1 and Schedule 2 charges.

Schedule Page: 328 Line No.: 10 Column: a

LG&E and KU are owned by PPL.

Schedule Page: 328 Line No.: 10 Column: m

The total consists of Schedule 1 and Schedule 2 charges related to various counterparties.

Schedule Page: 328 Line No.: 11 Column: a

LG&E and KU are owned by PPL.

Schedule Page: 328 Line No.: 11 Column: m

The total consists of Schedule 1 and Schedule 2 charges related to various counterparties.

Schedule Page: 328 Line No.: 12 Column: a

LG&E and KU are owned by PPL.

Schedule Page: 328 Line No.: 12 Column: d

TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)
(Including transactions referred to as "wheeling")

1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.
3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations. OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to- Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.
4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.
5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
6. Enter "TOTAL" in column (a) as the last line.
7. Footnote entries and provide explanations following all required data.

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Account 403, 404, 405)
(Except amortization of aquisition adjustments)

1. Report in section A for the year the amounts for : (b) Depreciation Expense (Account 403; (c) Depreciation Expense for Asset Retirement Costs (Account 403.1; (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).
2. Report in Section 8 the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.
3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.

Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.

In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.

For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification Listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.

4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

Name of Respondent Louisville Gas and Electric Company	This Report Is: (1) ☒ An Original (2) ☐ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2013/Q4

REGULATORY COMMISSION EXPENSES

1. Report particulars (details) of regulatory commission expenses incurred during the current year (or incurred in previous years, if being amortized) relating to format cases before a regulatory body, or cases in which such a body was a party.
2. Report in columns (b) and (c), only the current year's expenses that are not deferred and the current year's amortization of amounts deferred in previous years.

Line No.	Description (Furnish name of regulatory commission or body the docket or case number and a description of the case) (a)	Assessed by Regulatory Commission (b)	Expenses of Utility (c)	Total Expense for Current Year (b) + (c) (d)	Deferred in Account 182.3 at Beginning of Year (e)

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R, D & D) project initiated, continued or concluded during the year. Report also support given to others during the year for jointly-sponsored projects.(Identify recipient regardless of affiliation.) For any R, D & D work carried with others, show separately the respondent's cost for the year and cost chargeable to others (See definition of research, development, and demonstration in Uniform System of Accounts).
2. Indicate in column (a) the applicable classification, as shown below:

Classifications:
A. Electric R, D & D Performed Internally:
  (1) Generation
    a. hydroelectric
      i. Recreation fish and wildlife
      ii Other hydroelectric
    b. Fossil-fuel steam
    c. Internal combustion or gas turbine
    d. Nuclear
    e. Unconventional generation
    f. Siting and heat rejection
  (2) Transmission
    a. Overhead
    b. Underground
  (3) Distribution
  (4) Regional Transmission and Market Operation
  (5) Environment (other than equipment)
  (6) Other (Classify and include items in excess of $50,000.)
  (7) Total Cost Incurred
B. Electric, R, D & D Performed Externally:
  (1) Research Support to the electrical Research Council or the Electric Power Research Institute

Line No.	Classification (a)	Description (b)

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES (Continued)

(2) Research Support to Edison Electric Institute
(3) Research Support to Nuclear Power Groups
(4) Research Support to Others (Classify)
(5) Total Cost Incurred

3. Include in column (c) all R, D & D items performed internally and in column (d) those items performed outside the company costing $50,000 or more, briefly describing the specific area of R, D & D (such as safety, corrosion control, pollution, automation, measurement, insulation, type of appliance, etc.). Group items under $50,000 by classifications and indicate the number of items grouped. Under Other, (A (6) and B (4)) classify items by type of R, D & D activity.
4. Show in column (e) the account number charged with expenses during the year or the account to which amounts were capitalized during the year, listing Account 107, Construction Work in Progress, first. Show in column (f) the amounts related to the account charged in column (e)
5. Show in column (g) the total unamortized accumulating of costs of projects. This total must equal the balance in Account 188, Research, Development, and Demonstration Expenditures, Outstanding at the end of the year.
6. If costs have not been segregated for R, D &D activities or projects, submit estimates for columns (c), (d), and (f) with such amounts identified by "Est."
7. Report separately research and related testing facilities operated by the respondent.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

COMMON UTILITY PLANT AND EXPENSES

1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.
2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.
3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

(1) See attached sheet, page 356.1.

(2) See attached sheet, page 356.1.

(3) Depreciation - Electric $7,688,535; Gas $3,140,388. Amortization - Electric $5,643,550; Gas $2,305,153.

Common Utility expense accounts are not maintained, but such expenses are allocated to Electric and Gas Departments as follows:

Customer Accounts Expenses (excluding for uncollectable accounts).

Allocated between departments based on average number of customers served by each department for the year ending December 31, 2012.

Customer Service and Informational Expenses.

Allocated between departments based on gross revenues from ultimate consumers by departments for the twelve month period.

Administrative and General Expenses

The administrative and general expenses are allocated on the basis of total direct costs.

(4) The property original cost studies made pursuant to the Uniform System of Accounts included a separate classification for Common Utility Plant. Orders were issued in connection with such studies by Public Service Commission of Kentucky on September 16, 1941, and January 5, 1945, and the Federal Power Commission on December 15, 1944.

COMMON UTILITY PLANT AND EXPENSES

1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.
2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.
3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

Common Utility Plant (1)
Allocation to Utility Department (2)

Accounts 101 and 106	Electric 71%	Gas 29%	Balance End of Year

AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

PURCHASES AND SALES OF ANCILLARY SERVICES

Report the amounts for each type of ancillary service shown in column (a) for the year as specified in Order No. 888 and defined in the respondents Open Access Transmission Tariff.

In columns for usage, report usage-related billing determinant and the unit of measure.

(1) On line 1 columns (b), (c), (d), (e), (f) and (g) report the amount of ancillary services purchased and sold during the year.

(2) On line 2 columns (b) (c), (d), (e), (f), and (g) report the amount of reactive supply and voltage control services purchased and sold during the year.

(3) On line 3 columns (b) (c), (d), (e), (f), and (g) report the amount of regulation and frequency response services purchased and sold during the year.

(4) On line 4 columns (b), (c), (d), (e), (f), and (g) report the amount of energy imbalance services purchased and sold during the year.

(5) On lines 5 and 6, columns (b), (c), (d), (e), (f), and (g) report the amount of operating reserve spinning and supplement services purchased and sold during the period.

(6) On line 7 columns (b), (c), (d), (e), (f), and (g) report the total amount of all other types ancillary services purchased or sold during the year. Include in a footnote and specify the amount for each type of other ancillary service provided.

		Amount Purchased for the Year			Amount Sold for the Year

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Report data for plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant. 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct. 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20. 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)*(Continued)*

9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses. 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants. 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant. 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants) *(Continued)*

1. Report data for plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant. 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct. 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20. 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

HYDROELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Large plants are hydro plants of 10,000 Kw or more of installed capacity (name plate ratings)
2. If any plant is leased, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. If licensed project, give project number.
3. If net peak demand for 60 minutes is not available, give that which is available specifying period.
4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.

TRANSMISSION LINE STATISTICS

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
3. Report data by individual lines for all voltages if so required by a State commission.
4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

TRANSMISSION LINE STATISTICS (Continued)

7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)
8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

Size of Conductor and Material (i)	COST OF LINE (Include in Column (j) Land, Land rights, and clearing right-of-way)			EXPENSES, EXCEPT DEPRECIATION AND TAXES				Line No.

TRANSMISSION LINE STATISTICS

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
3. Report data by individual lines for all voltages if so required by a State commission.
4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)
8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVa except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

SUBSTATIONS (Continued)

5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES

1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies.
2. The reporting threshold for reporting purposes is $250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general".
3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.

Schedule Page: 429 Line No.: 40 Column: a

Costs between Louisville Gas and Electric Company and Kentucky Utilities Company are charged directly and are not allocated.

LG&E and KU Services Company (LKS) will allocate the costs of service among the affiliated companies using one of several methods that most accurately distributes the costs. The method of cost allocation varies based on the department rendering the service. Any of the methods may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes in the business, but are generally determined annually. The assignment methods currently used by LKS are as follows:

Contract Ratio – Based on the sum of the physical amount (i.e. tons of coal, cubic feet of natural gas) of the contract for both coal and natural gas for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Departmental Charge Ratio – A specific LKS department ratio based upon various factors. The departmental charge ratio typically applies to indirectly attributable costs such as departmental administrative, support, and/or material and supply costs that benefit more than one affiliate and that require allocation using general measures of cost causation. Methods for assignment are department-specific depending on the type of service being performed and are documented and monitored by the Budget Coordinators for each department. The numerator and denominator vary by department. The ratio is based upon various factors such as labor hours, labor dollars, departmental or entity headcount, capital expenditures, operations & maintenance costs, retail energy sales, charitable contributions, generating plant sites, average allocation of direct reports, net book value of utility plant, total line of business assets, electric capital expenditures, substation assets and transformer assets. These ratios are calculated on an annual basis. Any changes in these ratios will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in any of these ratios from that used in the prior year.

Electric Peak Load Ratio – Based on the sum of the monthly electric maximum system demands for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Energy Marketing Ratio – Based on the absolute value of megawatt hours purchased and sold for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Generation Ratio – Based on the annual forecast of megawatt hours, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Non-Fuel Material and Services Expenditures – Based on non-fuel material and services expenditures, net of reimbursements, for the immediately preceding twelve consecutive calendar months. The numerator is equal to such expenditures for a specific entity and/or line-of-business as appropriate and the denominator is equal to such expenditures for all applicable entities. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Customers Ratio – Based on the number of retail electric and/or gas customers. This ratio will be determined based on the actual number of customers at the end of the previous calendar year. In some cases, the ratio may be calculated based on the type of customer class being served (i.e. Residential, Commercial or Industrial). The numerator is the total number of each Company’s retail customers. The denominator is the total number of retail customers for both LG&E and KU. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Employees Ratio – Based on the number of employees benefiting from the performance of a service. This ratio will be determined based on actual counts of applicable employees at the end of the previous calendar year. A two-step assignment methodology is utilized to properly allocate LKS employee costs to the proper legal entity. The numerator for the first step of this ratio is the total number of employees for each specific company, and the denominator is the total number of employees for all companies in which an allocator is assigned (i.e. LG&E, KU and LKS). For the second step, the ratio of LKS to total employees will then be allocated to the other companies (LG&E, KU and LKC) based on each company’s ratio of labor dollars to total labor dollars. (LKC has no employees, but non-utility related labor is charged to it.) This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Meters Ratio – Based on the number or types of meters being utilized by all levels of customer classes within the system for the immediately preceding twelve consecutive calendar months. The numerator is equal to the number of meters for each utility and the denominator is equal to the total meters for KU and LG&E. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Transactions Ratio – Based on the sum of transactions occurring in the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. For example, services pertaining to Materials Logistics would define the transaction as the number of items ordered, picked and disbursed out of the warehouse. Services pertaining to Accounts Payable would define the transaction as the number of invoices processed. The Controller’s organization is responsible for maintaining and monitoring specific product/service methodology documentation for actual transactions related to LKS billings. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Revenue Ratio – Based on the sum of the revenue for the immediately preceding twelve

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2013/Q4

FOOTNOTE DATA

consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Revenue, Total Assets and Number of Employees Ratio – Based on an average of the revenue, total assets and number of employees ratios. This ratio is independently calculated for LG&E and KU. The numerator is the sum of Revenue Ratio, Total Assets Ratio and Number of Employees Ratio for the specific company. The denominator is three – the number of ratios being averaged. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Assets Ratio – Based on the total assets at year end for the preceding year. In the event of joint ownership of a specific asset, asset ownership percentages are utilized to assign costs. The numerator is the total assets for each specific company at the end of the preceding year. The denominator is the sum of total assets for each company in which an allocator is assigned (LG&E, KU and LKC). This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Utility Plant Assets Ratio – Based on the total utility plant assets at year end for the preceding year, the numerator of which is for an operating company or affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. In the event of joint ownership of a specific asset, ownership percentages are utilized to assign costs. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Transportation Resource Management System Chargeback Ratio – Based on the costs associated with providing and operating transportation fleet for all affiliated companies including developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles. Such rates are applied based on the specific equipment employment and the measured usage of services by the various company entities. This ratio is calculated monthly based on the actual transportation charges from the previous month. The numerator is the department labor charged to a specific company. The denominator is the total labor costs for the specific department. The ratio is then multiplied by the total transportation costs to determine the amount charged to each company.

Ownership Percentages – Based on the contractual ownership percentages of jointly-owned generating units. This ratio is updated as a result of new jointly-owned generating units, and is based on the total forecasted energy needs. The numerator is the specific company’s forecasted incremental capacity and/or energy needs. The denominator is the total incremental capacity and/or energy needs of all companies.

22200500 Louisville Gas and Electric Company 01/01/2013 - 12/31/2013

Important Changes During the Year (Ref Page: 108)

	Explain
Give particulars concerning the matters indicated below.	
1. Changes in and important additions to franchise rights:	None.
2. Acquisition of ownership in other companies by reorganization, merger or consolidation with other companies:	None.
3. Purchase or sale of an operating unit or system:	None.
4. Important leaseholds (other than leaseholds for natural gas lands) thant have been accquired or given assigned or surrendered:	None of a material nature.
5. Important extension or reduction of transmission or distribution system:	None.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees.	LG&E issued long-term first mortgage bonds totaling $250 million on November 14, 2013. The bonds mature in November 2043 and have an interest rate of 4.65%. This transaction was approved by the KPSC on August 3, 2012, in Case No. 2012-00233. LG&E received FERC authorization in FERC Docket No. ES13-54-000 for up to $500 million in the form of money pool debt, commercial paper or any other type of short-term loan through November 30, 2015. LG&E's money pool balance was zero at December 31, 2013, and December 31, 2012, respectively. LG&E established a commercial paper program in February 2012, allowing issuance of up to $250 million. The program was increased to $350 million effective April 1, 2013. As of December 31, 2013, and December 31, 2012, the outstanding commercial paper balance is $20 million and $55 million, respectively.
7. Changes in articles of incoporation or amendments to charter: Explain the nature and purpose of such changes or amendments.	None.
8. State the estimated annual effect and nature of any important wage scale changes during the year.	During the first quarter of 2013, exempt and non-exempt employees received routine wage increases in accordance with annual salary reviews. As outlined in the IBEW Local 2100 contract, union employees received a negotiated wage increase of 2.5% effective November 11, 2013.
9. State briefly the status of any materially important legal proceedings pending at the end of the year and the results.	See Notes 4 and 10 of Notes to Financial Statements on page 123.
10. Describe briefly any materially important transactions not disclosed elsewhere in this report in which an officer, director, or associated company was a party or had a material interest.	None.
11. Estimated increase or decrease in annual revenues caused by important rate changes.	Not applicable.

Average Construction Work in Progress Balance (Var W)		0	0
2. Gross Rate for Borrowed Funds s(S/W) + d[(D/(D+P+C))(1-(S/W)]			
3. Rate for Other Funds [1-(S/W)][p(P/D+P+C)) + c(C/(D+P+C))]			
4. Weighted Average Rate Actually Used for the Year:			
a. Rate for Borrowed Funds			0
b. Rate for Other Funds			0

22200500 Louisville Gas and Electric Company 01/01/2013 - 12/31/2013

General Description of Construction Overhead Procedure - Components of Formulat (Ref Page: 218) - NOTES

LOCAL ENGINEERING:

Salaries and expenses of Generation Services Department, Energy Delivery Department and Gas Department personnel engaged in construction work, but not assignable to a particular work order (“WO”), are charged to engineering clearing WOs which have been set up in a clearing account for each department. Examples of such charges are: work with the construction budget, cost of estimating, construction work, preparation of field reports, conferences on construction matters and general supervision of construction projects.

Each month the costs accumulated in these clearing WOs are allocated to specific WOs coming under the direct supervision of the depts. The WOs are spread based on total direct cost of WOs.

The labor and expenses of engineers and foremen who are directly assigned to a particular WO are charged to that WO.

SERVICE CONTRACT CHARGES:

These expenses are charged directly to construction and other projects based on service performed.

EMPLOYEE BENEFITS:

Vacation, holiday, sick and other off-duty payments, hospitalization, dental, group life insurance and pension costs, are charged to construction based on the ratio of direct labor charged to construction to the total direct labor.

ADMINISTRATIVE AND GENERAL EXPENSES:

The allocation of administrative and general expenses to construction is based on a study of the estimated time engaged in construction activities by persons and departments charging time to FERC Account 920. The administrative and general salaries and expenses (FERC 920-921) applicable to construction are allocated to all construction WOs on the basis of total direct costs.

Note:

ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION (AFUDC):

LG&E does not capitalize AFUDC for gas utility plant.

		0	$0.00	
		0	$0.00	
		0	$0.00	

Note:
Gas fields at Canmer and Flint Hill have been retired. These facilities are currently used in other gas-system operations.

Due to pipeline and compressor station capacity and multiple fields discharging into one pipeline system, total Max Daily Delivery Capacity has been estimated, even though individual fields may have greater deliverability than shown, and may aggregate to a higher total, especially earlier in the season when operated independently.

Notes to Financial Statements

Per Kentucky PSC Order No. 2008-00007, attached are the “Notes to Financial Statements” for Louisville Gas & Electric Company as reported in the FERC Form No. 1 for the period ended December 31, 2013.

GLOSSARY OF TERMS AND ABBREVIATIONS

KU **-** Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E **-** Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE **-** LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS **-** LG&E and KU Services Company, a subsidiary of LKE that provides services to LKE and its subsidiaries.

PPL **-** PPL Corporation, the parent holding company of LKE and other subsidiaries.

Other terms and abbreviations

401(h) account **-** A sub-account established within a qualified pension trust to provide for the payment of retiree medical costs.

AOCI **-** accumulated other comprehensive income or loss.

ARO **-** asset retirement obligation.

BREC **-** Big Rivers Electric Corporation, a power-generating rural electric cooperative in western Kentucky.

Cane Run Unit 7 **-** a natural gas combined-cycle unit under construction in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional electric generating capacity of 640 MW (141 MW and 499 MW to LG&E and KU) in 2015.

CAIR **-** the EPA's Clean Air Interstate Rule.

CCR **-** Coal Combustion Residuals. CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act **-** federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

CPCN **-** Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facility for furnishing of utility service to the public.

CSAPR **-** Cross-State Air Pollution Rule.

Dodd-Frank Act **-** the Dodd-Frank Wall Street Reform and Consumer Protection Act that was signed into law in July 2010.

DSM **-** Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of costs and revenues lost by implementing DSM programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

EBPB **-** Employee Benefit Plan Board. The administrator of PPL's qualified retirement plans, which is charged with the fiduciary responsibility to oversee and manage those plans and the investments associated with those plans.

ECR **-** Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and by-products from the production of energy from coal.

EPA **-** Environmental Protection Agency, a U.S. government agency.

E.W. Brown **-** a generating station in Kentucky with capacity of 1,594 MW.

FERC **-** Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

Fitch **-** Fitch, Inc., a credit rating agency.

GAAP **-** Generally Accepted Accounting Principles in the U.S.

GHG **-** greenhouse gas(es).

GLT **-** Gas Line Tracker. The KPSC approved LG&E's recovery of costs associated with gas service lines, gas risers, leak mitigation, and gas main replacements. Rate recovery became effective January 1, 2013.

Green River Unit 5 **-** a natural gas combined-cycle unit proposed to be built in Kentucky, jointly owned by LG&E and KU, which is expected to provide additional electric generating capacity of 700MW (280 MW and 420 MW to LG&E and KU) in 2018.

IBEW – International Brotherhood of Electrical Workers

IRS **-** Internal Revenue Service, a U.S. government agency.

KPSC **-** Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

kWh **-** kilowatt-hour, basic unit of electrical energy.

LG&E 2010 Mortgage Indenture **-** LG&E's indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as trustee, as supplemented.

LIBOR **-** London Interbank Offered Rate.

MATS **-** Mercury and Air Toxics Standards.

Moody's **-** Moody's Investors Service, Inc., a credit rating agency.

MW **-** megawatt, one thousand kilowatts.

MWh **-** megawatt-hour, one thousand kilowatt-hours.

NERC **-** North American Electric Reliability Corporation.

NGCC **-** Natural gas-fired combined-cycle turbine.

NPNS **-** the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

OCI **-** other comprehensive income or loss.

OVEC **-** Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined summer rating capacities of 2,120 MW.

PJM **-** PJM Interconnection, L.L.C., operator of the electricity transmission network and electric energy market in all or parts of Delaware, Illinois, Indiana, Kentucky, Maryland, Michigan, New Jersey, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and the District of Columbia.

PP&E **-** property, plant and equipment.

RFC **-** Reliability*First* Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

S&P **-** Standard & Poor's Ratings Services, a credit rating agency.

Scrubber **-** an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC **-** the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SERC **-** SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

Superfund **-** federal environmental statute that addresses remediation of contaminated sites; states also have similar statutes.

TC2 **-** Trimble County Unit 2, a coal-fired plant located in Kentucky with a net summer capacity of 732 MW. LKE indirectly owns a 75% interest (consists of LG&E's 14.25% and KU's 60.75% interests) in TC2, or 549 MW of the capacity.

Tolling agreement **-** agreement whereby the owner of an electricity generating facility agrees to use that facility to convert fuel provided by a third party into electricity for delivery back to the third party.

VEBA **-** Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

VIE **-** variable interest entity.

Volumetric risk **-** the risk that the actual load volumes provided under full-requirement arrangements could vary significantly from forecasted volumes.

As permitted by the FERC for the Year Ended December 31, 2013 Form 1, the Notes to Financial Statements set forth below are principally from the Respondent's SEC Form 10-K for the Year Ended December 31, 2013, which was filed with the SEC on February 24, 2014. Accordingly, these Notes do not reflect updated information since this filing date.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

General

Capitalized terms and abbreviations appearing in the notes to financial statements are defined in the glossary. Dollars are in millions, unless otherwise noted.

Business and Consolidation

LG&E is engaged in the regulated generation, transmission, distribution and sale of electricity. LG&E also engages in the regulated distribution and sale of natural gas.

The financial statements of LG&E include the company's own accounts as well as the accounts of all entities in which the company has a controlling financial interest. Entities for which a controlling financial interest is not demonstrated through voting interests are evaluated based on accounting guidance for VIEs. LG&E has no controlling interest in a VIE. Investments in entities in which a company has the ability to exercise significant influence but does not have a controlling financial interest are accounted for under the equity method. All other investments are carried at cost or fair value. All significant intercompany transactions have been eliminated. Any noncontrolling interests are reflected in the financial statements.

The financial statements of LG&E include its share of any undivided interests in jointly owned facilities, as well as its share of the related operating costs of those facilities. See Note 9 for additional information.

Regulation

LG&E is a cost-based rate-regulated utility for which rates are set by regulators to enable LG&E to recover the costs of providing electric or gas service and to provide a reasonable return to shareholders. Rates are generally established based on a test period adjusted to exclude unusual or nonrecurring items. As a result, the financial statements are subject to the accounting for certain types of regulation as prescribed by GAAP and reflect the effects of regulatory actions. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and regulatory liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 4 for additional details regarding regulatory matters.

Accounting Records

The system of accounts for LG&E is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." LG&E continuously assesses potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals for environmental remediation are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless realization is assured.

Price Risk Management

Energy and energy-related contracts are used to hedge the variability of expected cash flows associated with the generating units and marketing activities. Interest rate contracts are used to hedge exposures to changes in the fair value of debt instruments and to hedge exposures to variability in expected cash flows associated with existing floating-rate debt instruments or forecasted fixed-rate issuances of debt. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain energy and energy-related contracts meet the definition of a derivative, while others do not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, markets are periodically assessed to determine whether market mechanisms have evolved that would facilitate net settlement. Certain derivative energy contracts have been excluded from the requirements of derivative accounting treatment because NPNS has been elected. These contracts are accounted for using accrual accounting. All other contracts that have been classified as derivative contracts are reflected on the Balance Sheets at fair value. These contracts are recorded as "Price risk management assets" and "Price risk management liabilities" on the Balance Sheets. The portion of derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while the portion of derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent

Liabilities."

Energy and energy-related contracts are assigned a strategy and accounting classification. Processes exist that allow for subsequent review and validation of the contract information. See Note 14 for more information. The accounting department provides the traders and the risk management department with guidelines on appropriate accounting classifications for various contract types and strategies. Some examples of these guidelines include, but are not limited to:

- Physical coal, limestone, lime, uranium, electric transmission, gas transportation, gas storage and renewable energy credit contracts not traded on an exchange are not derivatives due to the lack of net settlement provisions.

- Only contracts where physical delivery is deemed probable throughout the entire term of the contract can qualify for NPNS.

- Physical transactions that permit cash settlement and financial transactions do not qualify for NPNS because physical delivery cannot be asserted; however, these transactions can receive cash flow hedge treatment if they effectively hedge the volatility in the future cash flows for energy-related commodities.

- Certain purchased option contracts or net purchased option collars may receive cash flow hedge treatment.

- Derivative transactions that do not qualify for NPNS or cash flow hedge treatment, or for which NPNS or cash flow hedge treatment is not elected, are recorded at fair value through earnings.

A similar process is also followed by the treasury department as it relates to interest rate derivatives. Examples of accounting guidelines provided to the treasury department staff include, but are not limited to:

- Transactions to lock in an interest rate prior to a debt issuance can be designated as cash flow hedges; to the extent the forecasted debt issuances remain probable of occurring.

- Derivative transactions that do not qualify for cash flow or net investment hedge treatment are marked to fair value through earnings.

- Derivative transactions may be marked to fair value through regulatory assets/liabilities if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps that are included in customer rates.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the classification of the hedged items.

LG&E has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

See Notes 13 and 14 for additional information on derivatives.

Revenue

Revenue Recognition

Operating revenues, except for certain energy and energy-related contracts that meet the definition of derivative instruments and "Energy-related businesses," are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' meters are read and bills are rendered throughout the month, rather than all being read at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by the estimated average cents per kWh. Unbilled wholesale energy revenues are recorded at month-end to reflect estimated amounts until actual dollars and MWhs are confirmed and invoiced. Any difference between estimated and actual revenues is adjusted the following month.

Accounts Receivable

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts. Accounts receivable that are acquired are initially recorded at fair value on the date of acquisition.

Allowance for Doubtful Accounts

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs, the age of the receivable, counterparty creditworthiness and economic conditions. Specific events, such as bankruptcies, are also considered. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when it is known they will be received.

The changes in the allowance for doubtful accounts at December 31 were:

		Additions			
	Balance at Beginning of Period	Charged to Income	Charged to Other Accounts (a)	Deductions (b)	Balance at End of Period
2013	$ 1	$ 2	$ 1	$ 2	$ 2
2012	2	2	-	3	1

(a) Primarily related to capital projects, thus the provision was recorded as an adjustment to construction work in progress.

(b) Primarily related to uncollectible accounts written off.

Cash

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

Restricted Cash and Cash Equivalents

Bank deposits and other cash equivalents that are restricted by agreement or that have been clearly designated for a specific purpose are classified as restricted cash and cash equivalents. The change in restricted cash and cash equivalents is reported as an investing activity on the Statements of Cash Flows. On the Balance Sheets, the current portion of restricted cash and cash equivalents is shown in "Other current assets" while the noncurrent portion is included in "Other noncurrent assets".

LG&E had restricted cash and cash equivalents for cash collateral posted to counterparties of $22 million and $32 million at December 31, 2013 and 2012.

Fair Value Measurements

LG&E values certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities and cash and cash equivalents. LG&E uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

LG&E classifies fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

- **Level 1 -** quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

- **Level 2 -** inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.

- **Level 3 -** unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, LG&E's assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

Short-term Investments

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Other current assets" on the Balance Sheets.

Cost Method Investment

LG&E has an investment in OVEC, which is accounted for using the cost method. The investment is recorded in "Other noncurrent assets" on the Balance Sheets. LG&E and 11 other electric utilities are equity owners of OVEC. OVEC's power is currently supplied to LG&E and 12 other companies affiliated with the various owners. LG&E owns 5.63% of OVEC's common stock. Pursuant to a power purchase agreement, LG&E is contractually entitled to its ownership percentage of OVEC's output, which is approximately 120 MW.

LG&E's investment in OVEC is not significant. The direct exposure to loss as a result of LG&E's involvement with OVEC is generally limited to the value of its investment; however, LG&E may be conditionally responsible for a pro-rata share of certain OVEC obligations. As part of PPL's acquisition of LKE, the value of the power purchase contract was recorded as an intangible asset with an offsetting regulatory liability, both of which are being amortized using the units-of-production method until March 2026, the expiration date of the agreement. See Notes 10 and 15 for additional discussion on the power purchase agreement.

Long-Lived and Intangible Assets

Property, Plant and Equipment

PP&E is recorded at original cost, unless impaired. PP&E acquired in business combinations is recorded at fair value at the time of acquisition, which establishes its original cost. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost for constructed assets includes material, labor, contractor costs, certain overheads and financing costs, where applicable. The cost of repairs and minor replacements are charged to expense as incurred. LG&E records costs associated with planned major maintenance projects in the period in which the costs are incurred. No costs associated with planned major maintenance projects are accrued in advance of the period in which the work is performed. LG&E accrues costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. See "Asset Retirement Obligations" below and Note 4 for additional information.

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. LG&E’s weighted-average rates of depreciation for regulated utility plant were 4.52% and 4.91% at December 31, 2013 and 2012.

The KPSC approved new lower depreciation rates for LG&E as part of the rate-case settlement agreement reached in November 2012. The new rates became effective January 1, 2013 and resulted in lower depreciation of approximately $8 million in 2013, exclusive of net additions to PP&E.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to obtain an initial license and renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, LG&E considers the expected use of the asset; the expected useful life of other assets to which the useful life of the intangible asset may relate; legal, regulatory, or contractual provisions that may limit the useful life; the company's historical experience as evidence of its ability to support renewal or extension; the effects of obsolescence, demand, competition, and other economic factors; and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

LG&E accounts for emission allowances as intangible assets. LG&E is allocated emission allowances by states based on its generation facilities' historical emissions experience, and have purchased emission allowances generally when it is expected that additional allowances will be needed. The carrying value of allocated emission allowances is initially recorded at zero value and purchased allowances are initially recorded based on their purchase price. When consumed or sold, emission allowances are removed from the Balance Sheets at their weighted-average carrying value. Since the economic benefits of emission allowances are not diminished until they are consumed, emission allowances are not amortized; rather, they are expensed when consumed or a gain or loss is recognized when sold. Such expense is included in "Fuel" on the Statements of Income. Gains and losses on the sale of emission allowances are included in "Other operation and maintenance" on the Statements of Income.

Asset Impairment (Excluding Investments)

LG&E reviews long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable. A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

Goodwill is reviewed for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment in circumstances when a portion of goodwill has been allocated to a business to be disposed. LG&E is a single reporting unit.

LG&E may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a two-step quantitative test. If the qualitative evaluation (referred to as "step zero") is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step quantitative impairment test is not necessary. However, the quantitative impairment test is required if management concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the step zero assessment.

If the carrying amount of the reporting unit, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

LG&E elected to perform the qualitative step zero evaluation of goodwill in the fourth quarter of 2013 and determined that it was not more likely than not that the fair value of its goodwill was less than its carrying value.

Asset Retirement Obligations

LG&E records liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased through the recognition of accretion expense classified within "Other operation and maintenance" on the Statements of Income to reflect changes in the obligation due to the passage of time. The accretion and depreciation expenses recorded by LG&E are recorded as a regulatory asset, such that there is no earnings impact.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset. See Note 16 for additional information on AROs.

Compensation and Benefits

Defined Benefits

LG&E sponsors and participates in defined benefit pension and other postretirement plans. The plans LG&E participates in are sponsored by LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of certain plans to LG&E based on its participation. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

LG&E and LKE use an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 8 for a discussion of defined benefits.

Taxes

Income Taxes

LG&E is included in PPL’s consolidated U.S. federal income tax return.

Significant management judgment is required in developing LG&E’s provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and valuation allowances on deferred tax assets.

Significant management judgment is also required to determine the amount of benefit to be recognized in relation to an uncertain tax position. LG&E uses a two-step process to evaluate tax positions. The first step requires LG&E to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires LG&E to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact the financial statements of LG&E in future periods.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

LG&E records valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. LG&E considers the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If LG&E determines that it is able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if LG&E determines that it is not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made.

LG&E defers investment tax credits when the credits are utilized and amortizes the deferred amounts over the average lives of the related assets.

LG&E recognizes interest and penalties in "Income Taxes" on its Statements of Income.

See Note 3 for additional discussion regarding income taxes.

The provision for LG&E’s deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheets in noncurrent "Regulatory assets" or "Regulatory liabilities."

The income tax provision for LG&E is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Tax benefits are not shared between companies. A tax benefit inures only to the entity that gave rise to said benefit. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. LG&E's intercompany tax receivables (payables) were $(8) million and $5 million at December 31, 2013 and 2012.

Taxes, Other Than Income

LG&E presents sales taxes in "Other current liabilities" on the Balance Sheets. These taxes are not separately reflected on the Statements of Income. See Note 3 for details on taxes included in "Taxes, other than income" on the Statements of Income.

Other

Leases

LG&E evaluates whether arrangements entered into contain leases for accounting purposes. See Note 7 for a discussion of arrangements under which LG&E is a lessee for accounting purposes.

Fuel, Materials and Supplies

Fuel, natural gas stored underground and materials and supplies are valued at the lower of cost or market using the average cost method. Fuel costs for electric generation are charged to expense as used. For LG&E, natural gas supply costs are charged to expense as delivered to the distribution system. See Note 4 for further discussion of the fuel adjustment clause and gas supply clause.

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31.

	2013	2012
Fuel	$ 64	$ 61
Natural gas stored underground (a)	48	42
Materials and supplies	42	39
Total	$ 154	$ 142

(a) The majority of LG&E's natural gas stored underground is held to serve retail customers

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 10 for further discussion of recorded and unrecorded guarantees.

New Accounting Guidance Adopted

Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, LG&E retrospectively adopted accounting guidance issued to enhance disclosures about derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

The adoption of this guidance resulted in enhanced disclosures but did not have a significant impact on LG&E. See Note 14 for the new disclosures.

Testing Indefinite-Lived Intangible Assets for Impairment

Effective January 1, 2013, LG&E prospectively adopted accounting guidance that allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of an indefinite-lived intangible asset. If, based on this assessment, the entity determines that it is more likely than not that the fair value of the indefinite-lived intangible asset exceeds the carrying amount, a quantitative impairment test does not need to be performed. If the entity concludes otherwise, a quantitative impairment test must be performed by determining the fair value of the asset and comparing it with the carrying value. The entity would record an impairment charge, if necessary.

The adoption of this guidance did not have a significant impact on LG&E.

2. Preferred Securities

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2013 or 2012.

3. Income and Other Taxes

The provision for LG&E's deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Significant components of LG&E's deferred income tax assets and liabilities were as follows at December 31.

	2013	2012
Deferred Tax Assets		
Regulatory liabilities	$ 59	$ 54
Deferred investment tax credits	15	16
Income taxes due to customers	19	21
Other	28	9
Total deferred tax assets	121	100
Deferred Tax Liabilities		
Plant - net	585	526
Regulatory assets	83	86
Accrued pension costs	24	27
Other	8	9
Total deferred tax liabilities	700	648
Net deferred tax liability	$ 579	$ 548

LG&E expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

At December 31, 2013, LG&E had $10 million of federal net operating loss carryforwards that expire in 2032 and $22 million of state net operating loss carryforwards that expire in 2030.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" at December 31 were:

	2013	2012
Income Tax Expense (Benefit)		
Current - Federal	$ 52	$ (2)
Current - State	16	3
Total Current Expense (Benefit)	68	1
Deferred - Federal	33	65
Deferred - State	(2)	6
Total Deferred Expense, excluding benefits of operating loss carryforwards	31	71
Investment tax credit, net - Federal	(2)	(3)
Tax benefit of operating loss carryforwards		
Deferred - Federal	(3)	-
Total Tax Benefit of Operating Loss Carryforwards	(3)	-
Total income tax expense	$ 94	$ 69
Total income tax expense - Federal	$ 80	$ 60
Total income tax expense - State	14	9
Total income tax expense	$ 94	$ 69

	2013	2012
Reconciliation of Income Taxes		
Federal income tax on Income Before Income Taxes at statutory tax rate - 35%	$ 90	$ 67
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	10	5
Amortization of investment tax credit	(2)	(3)
Other	(4)	-
Total increase	4	2
Total income tax expense	$ 94	$ 69
Effective income tax rate	36.6%	35.9%

	2013	2012
Taxes, other than income		
Property and other	$ 24	$ 23
Total	$ 24	$ 23

Unrecognized Tax Benefits

LG&E's unrecognized tax benefits and changes in those unrecognized tax benefits are insignificant at December 31, 2013 and 2012. At December 31, 2013, no significant changes in unrecognized tax benefits are projected over the next 12 months.

At December 31, the total unrecognized tax benefits and related indirect effects that, if recognized, would decrease the effective tax rate were insignificant.

At December 31, 2013 and 2012, receivable (payable) balances were recorded for interest related to tax positions. The amounts were insignificant. The interest expense (benefit) was recognized in income taxes. The amounts were insignificant.

The income tax provisions for LG&E are calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if each subsidiary filed a separate consolidated return. Based on this tax sharing agreement, LG&E indirectly files tax returns in two major tax jurisdictions. With few exceptions, at December 31, 2013, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

U.S. (federal) (a)	10/31/2010 and prior
Kentucky (state)	2010 and prior

(a) The ten month period ending October 31, 2010 remains open under the standard three year statute of limitations; however, the IRS has completed its audit of these periods under the Compliance Assurance Process, effectively closing them to audit adjustments. No issues remain outstanding.

4. Utility Rate Regulation

Regulatory Assets and Liabilities

As discussed in Note 1 and summarized below, LG&E reflects the effects of regulatory actions in the financial statements for its cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the balance sheet date.

LG&E is subject to the jurisdiction of the KPSC and FERC.

LG&E's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through other means. As such, LG&E generally earns a return on regulatory assets.

As a result of purchase accounting requirements, certain fair value amounts related to contracts that had favorable or unfavorable terms relative to market were recorded on the Balance Sheets with an offsetting regulatory asset or liability. LG&E recovers in customer rates the cost of coal contracts, power purchases and emission allowances. As a result, management believes the regulatory assets and liabilities created to offset the fair value amounts at LKE’s acquisition date meet the recognition criteria established by existing accounting guidance and eliminate any rate-making impact of the fair value adjustments. LG&E's customer rates will continue to reflect the original contracted prices for these contracts.

The following tables provide information about the regulatory assets and liabilities of cost-based rate-regulated utility operations at December 31.

	2013	2012
Current Regulatory Assets:		
Environmental cost recovery	$ 2	$ 1
Gas supply clause	10	11
Fuel adjustment clause	2	6
Demand side management	3	1
Total current regulatory assets	$ 17	$ 19
Noncurrent Regulatory Assets:		
Defined benefit plans	$ 164	$ 232
Storm costs	51	59
Unamortized loss on debt	18	20
Interest rate swaps	44	67
AROs	21	15
Other	5	7
Total noncurrent regulatory assets	$ 303	$ 400
Current Regulatory Liabilities:		
Gas supply clause	$ 3	$ 4
Gas line tracker	6	-
Total current regulatory liabilities	$ 9	$ 4
Noncurrent Regulatory Liabilities:		
Coal contracts (a)	$ 43	$ 61
Power purchase agreement - OVEC (a)	69	75
Net deferred tax assets	26	28
Interest rate swaps	43	7
Other	2	3
Total noncurrent regulatory liabilities	$ 183	$ 174

(a) These liabilities were recorded as offsets to certain intangible assets that were recorded at fair value upon the acquisition of LKE.

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory

Matters."

Defined Benefit Plans

Defined benefit plan regulatory assets and liabilities represent the portion of unrecognized transition obligation, prior service cost and net actuarial losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices and generally, are amortized over the average remaining service lives of plan participants. These regulatory assets and liabilities are adjusted at least annually or whenever the funded status of defined benefit plans is re-measured. Of the regulatory asset and liability balances recorded, costs of $13 million are expected to be amortized into net periodic defined benefit costs in 2014.

Storm Costs

LG&E has the ability to request from the KPSC the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer and amortize such costs for regulatory accounting and reporting purposes. Once such authority is granted, LG&E can request recovery of those expenses in a base rate case.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2035.

Environmental Cost Recovery

Kentucky law permits LG&E to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Clean Air Act and those federal, state or local environmental requirements which apply to coal combustion wastes and by-products from coal-fired electric generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is typically recovered within 12 months. As a result of the settlement agreement in the 2012 rate case, beginning in 2013, LG&E will receive a 10.25% return on equity for all ECR projects included in the 2009 and 2011 compliance plans. In 2012, LG&E was authorized to receive a 10.63% return on equity for projects associated with the 2009 compliance plan and a 10.10% return on equity for projects associated with the 2011 compliance plan.

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and variances between actual and expected costs from prior periods are adjusted quarterly in LG&E's rates, subject to approval by the KPSC. The gas supply clause includes a separate natural gas procurement incentive mechanism, which allows LG&E's rates to be adjusted annually to share variances between actual costs and market indices between the shareholders and the customers during each performance-based rate year (12 months ending October 31). The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are typically recovered within 18 months.

Fuel Adjustment Clauses

LG&E's retail electric rates contain a fuel adjustment clause, whereby variances in the cost of fuel to generate electricity, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel adjustment clause and, to the extent appropriate, reestablish the fuel charge included in base rates. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered within 12 months.

Demand Side Management

LG&E's DSM programs consist of energy efficiency programs which are intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. LG&E's rates contain a DSM provision which includes a rate recovery mechanism that provides for concurrent recovery of DSM costs, and allows for the recovery of DSM revenues from lost sales associated with the DSM programs. Additionally, LG&E earns an approved return on equity for capital expenditures associated with the residential and commercial load management/demand conservation programs. The cost of DSM programs is assigned only to the class or classes of customers that benefit from the programs.

Interest Rate Swaps

In November 2012 and April 2013, LG&E entered into forward-starting interest rate swaps with PPL that hedged the interest payments on new debt that was expected to be issued in 2013. In September 2013, these hedges were terminated and LG&E entered into new forward-starting interest rate swaps with PPL, effectively extending the start date of the prior hedges from September 2013 to December 2013. All of these swaps had terms identical to forward-starting swaps entered into by PPL with third parties. New debt totaling $250 million was issued in November 2013 and the hedges issued in September were terminated in November 2013. Net cash settlements of $43 million were received on the swaps that were terminated in September and November, which are included in "Cash Flows from Operating Activities" on the Statements of Cash Flows. Net realized gains on these swaps will be returned through regulated rates. As such, the net settlements were reclassified from AOCI to regulatory liabilities and are being recognized in "Interest Expense" on the Statements of Income over the life of the newly issued debt. For the year ended December 31, 2013, there was no hedge ineffectiveness recorded for the interest rate derivatives. See Note 14 for additional information related to the forward-starting interest rate swaps.

In addition to the hedges terminated as a result of the debt issuance, realized amounts associated with LG&E's interest rate swaps, including a terminated swap contract from 2008, are recoverable through rates based on an order from the KPSC, LG&E's unrealized losses and gains are recorded as a regulatory asset or liability until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the terms of the associated debt, which matures through 2033. Amortization of the gain or loss related to the 2008 terminated swap contract is to be recovered through 2035, as approved by the KPSC.

AROs

As discussed in Note 1, the accretion and depreciation expenses related to LG&E's AROs are recorded as a regulatory asset, such that there is no earnings impact. When an asset with an ARO is retired, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

Gas Line Tracker

In the 2012 rate case order, the KPSC approved the GLT rate recovery mechanism. The GLT authorizes LG&E to recover its incremental operating expenses and depreciation, and to earn a 10.25% return on equity for capital associated with the five year gas service riser and leak mitigation program. As part of this program, LG&E makes necessary repairs and assumes ownership of natural gas lines. LG&E annually files projected costs in October to become effective on the first billing cycle in January. After the completion of a plan year, LG&E submits a balancing adjustment filing to the KPSC to amend rates charged for the differences between the actual costs and actual GLT charges for the preceding year.

Coal Contracts

As a result of purchase accounting associated with PPL's acquisition of LKE, LG&E's coal contracts were recorded at fair value on the Balance Sheets with offsets to regulatory assets for those contracts with unfavorable terms relative to current market prices and offsets to regulatory liabilities for those contracts with favorable terms relative to current market prices. These regulatory assets and liabilities are being amortized over the same terms as the related contracts, which expire at various times through 2016.

Power Purchase Agreement - OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, the fair value of the OVEC power purchase agreement was recorded on the balance sheets with an offset to regulatory liabilities. The regulatory liabilities are being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition.

Regulatory Liability Associated with Net Deferred Tax Assets

LG&E's regulatory liabilities associated with net deferred tax assets represent the future revenue impact from the reversal of deferred income taxes required primarily for unamortized investment tax credits. These regulatory liabilities are recognized when the offsetting deferred tax assets are recognized. For general-purpose financial reporting, these regulatory liabilities and the deferred tax assets are not offset; rather, each is displayed separately.

Regulatory Matters

Rate Case Proceedings

In December 2012, the KPSC approved a rate case settlement agreement providing for increases in annual base electricity rates of $34 million and an increase in annual base gas rates of $15 million and authorized a 10.25% return on equity. The approved rates became effective January 1, 2013.

CPCN Filings

In January 2014, LG&E and KU filed an application for a CPCN with the KPSC requesting approval to build a NGCC generating unit at KU's Green River generating site and a solar generating facility at the E. W. Brown generating site.

Storm Costs

In August 2011, a strong storm hit LG&E's service area causing significant damage and widespread outages for approximately 139,000 customers. LG&E filed an application with the KPSC in September 2011, requesting approval of a regulatory asset recorded to defer, for future recovery, $8 million in incremental operation and maintenance expenses related to the storm restoration. An order was received in December 2011 granting the request. On December 20, 2012, the KPSC, in the approval of the unanimous rate case settlement agreement, authorized regulatory asset recovery effective January 1, 2013, over a five year period.

5. Financing Activities

Credit Arrangements and Short-term Debt

LG&E maintains a credit facility to enhance liquidity, provide credit support and provide a backup to its commercial paper program. The amounts borrowed below are recorded as “Short-term debt” on the Balance Sheets. The following credit facility was in place at:

	December 31, 2013				
	Expiration Date	Capacity	Borrowed	Letters of Credit Issued and Commercial Paper Backup	Unused Capacity
Syndicated Credit Facility (a) (b)	Nov. 2017	$ 500	-	$ 20	$ 480

	December 31, 2012	
	Borrowed	Letters of Credit Issued and Commercial Paper Backup
Syndicated Credit Facility (a) (b)	-	$ 55

(a) LG&E pays customary fees under its facility and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.
(b) The facility contains a financial covenant requiring debt to total capitalization not to exceed 70% as calculated in accordance with the facility and other customary covenants.

LG&E maintains a commercial paper program to provide an additional financing source to fund short-term liquidity needs, as necessary. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by LG&E's Syndicated Credit Facility. The following commercial paper program was in place at:

December 31, 2013			
Weighted - Average Interest Rate	**Capacity**	**Commercial Paper Issuances**	**Unused Capacity**
0.29%	$ 350	$ 20	$ 330

December 31, 2012	
Weighted - Average Interest Rate	**Commercial Paper Issuances**
0.42%	$ 55

See Note 11 for discussion of intercompany borrowings.

Long-term Debt

	Weighted-Average Rate	**Maturities**	**December 31, 2013**
Senior Secured Notes/First Mortgage Bonds (a) (b)	2.77%	2015 - 2043	$ 1,359
Fair market value adjustments			(1)
Unamortized discount			(5)
Total Long-term Debt			$ 1,353

			December 31, 2012
Senior Secured Notes/First Mortgage Bonds (a) (b)	2.49%	2015 - 2040	$ 1,109
Fair market value adjustments			6
Unamortized discount			(3)
Total Long-term Debt			$ 1,112

(a) LG&E's first mortgage bonds are secured by the lien of the LG&E 2010 Mortgage Indenture which creates a lien, subject to certain exceptions and exclusions, on substantially all of LG&E's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $3.2 billion and $2.7 billion at December 31, 2013 and 2012.

(b) Includes LG&E's series of first mortgage bonds that were issued to the respective trustees of tax-exempt revenue bonds to secure its respective obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amount, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. These first mortgage bonds were issued under the LG&E 2010 Mortgage Indenture and are secured as noted in (a) above. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E. The related revenue bond documents allow LG&E to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2013, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a term rate mode totaled $294 million. At December 31, 2013, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a variable rate mode totaled $280 million.

Several series of the tax-exempt revenue bonds are insured by monoline bond insurers whose ratings were reduced due to exposures relating to insurance of sub-prime mortgages. Of the bonds outstanding, $135 million are in the form of insured auction rate securities, wherein interest rates are reset either weekly or every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. During 2008, interest rates increased, and LG&E experienced failed auctions when there were insufficient bids for the bonds. When a failed auction occurs, the interest rate is set pursuant to a formula stipulated in the indenture. As noted above, the instruments governing these auction rate bonds permit LG&E to convert the bonds to other interest rate modes.

Certain variable rate tax-exempt revenue bonds totaling $120 million at December 31, 2013, are subject to tender for purchase by LG&E at the option of the holder and to mandatory tender for purchase by LG&E upon the occurrence of certain events.

None of the outstanding debt securities noted above have sinking fund requirements. The aggregate maturities of long-term debt for the periods 2014 through 2018 and thereafter are $250 million in 2015 and $1,109 million after 2018.

Long-term Debt and Equity Securities Activities

In November 2013, LG&E issued $250 million of 4.65% First Mortgage Bonds due 2043. LG&E received proceeds of $246 million, net of discounts and underwriting fees, which were used for repayment of short-term debt, including commercial paper, for capital expenditures and for other general corporate purposes.

NOTES TO FINANCIAL STATEMENTS (Continued)

Legal Separateness

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of LKE are each separate legal entities. These subsidiaries are not liable for the debts of LKE. Accordingly, creditors of LKE may not satisfy their debts from the assets of their subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, LKE is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of these subsidiaries may not satisfy their debts from the assets of LKE (or their other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions, Capital Contributions and Related Restrictions

LG&E is subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E believes, however, that this statutory restriction, as applied to its circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. In February 2012, LG&E petitioned the FERC requesting authorization to pay dividends in the future based on retained earnings balances calculated without giving effect to the impact of purchase accounting adjustments for the acquisition of LKE by PPL. In May 2012, FERC approved the petition with the further condition that LG&E may not pay dividends if such payment would cause its adjusted equity ratio to fall below 30% of total capitalization. Accordingly, at December 31, 2013, net assets of $1.0 billion were restricted for purposes of paying dividends to LKE, and net assets of $1.0 billion were available for payment of dividends to LKE. LG&E believes it will not be required to change its current dividend practices as a result of the foregoing requirement. Orders from the KPSC require LG&E to obtain prior consent or approval before lending amounts to PPL.

During the year, LG&E paid dividends of $99 million to its parent, LKE, and received capital contributions of $86 million from LKE.

6. Acquisitions, Development and Divestitures

LG&E from time to time evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with the projects, sell, cancel or expand them, execute tolling agreements or pursue other options. Any resulting transactions may impact future financial results.

Development

Cane Run Unit 7 Construction

In September 2011, LG&E and KU filed an application for a CPCN with the KPSC requesting approval to build Cane Run Unit 7. In May 2012, the KPSC issued an order approving the request. LG&E will own a 22% undivided interest, and KU will own a 78% undivided interest in the new NGCC generating unit. A formal request for recovery of the costs associated with the construction was not included in the CPCN application but certain Cane Run Unit 7 construction work in progress has been included in base rates and the remaining capital costs are expected to be included in future rate proceedings. LG&E and KU commenced preliminary construction activities in the third quarter of 2012 and project construction is expected to be completed by May 2015. The project, which includes building a natural gas supply pipeline and related transmission projects, has an estimated cost of approximately $600 million.

In conjunction with this construction and to meet new, more stringent EPA regulations with a 2015 compliance date, LG&E anticipates retiring three older coal-fired electric generating units at the Cane Run plant, which have a combined summer capacity rating of 563 MW.

Future Capacity Needs

In January 2014, LG&E and KU filed an application for a CPCN with the KPSC requesting approval to construct a NGCC unit at KU's Green River generating site (Green River Unit 5) and a solar generating facility at the E. W. Brown generating site. Subject to finalizing details, regulatory applications, permitting and construction schedules, Green River Unit 5 is expected to have approximately 700 MW of capacity at an estimated cost of $700 million and is planned to be operational in 2018. Green River Unit 5 will be jointly owned by LG&E and KU, with LG&E owning a 40% undivided interest and KU owning a 60% undivided interest. The solar generating facility is expected to have approximately 10 MW of capacity at an estimated cost of $36 million and is planned to be operational in 2016. The solar generating facility will be jointly owned by LG&E and KU, with LG&E owning a 36% undivided interest and KU owning a 64% undivided interest.

7. Leases

LG&E has entered into various agreements for the lease of office space, vehicles, land, gas storage and other equipment.

Rent expense for operating leases was $7 million at December 31, 2013 and 2012.

Total future minimum rental payments for all operating leases are estimated to be:

2014	$	6
2015		5
2016		4
2017		2
2018		2
Thereafter		12
Total	$	31

8. Retirement and Postemployment Benefits

Defined Benefits

LG&E sponsors and participates in non-contributory defined benefit pension plans. These plans are applicable to the majority of LG&E employees. The plan LG&E participates in is sponsored by LKE. LG&E is allocated a portion of the funded status and costs of the plan sponsored by LKE based on its participation in the plan, which management believes is reasonable. LG&E's and LKE's defined benefit pension plans were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above the standard matching contributions to their savings plans. The majority of employees are eligible for certain health care and life insurance benefits upon retirement through a contributory plan sponsored by LKE. Postretirement health benefits may be paid from 401(h) accounts established as part of the LKE plan within the PPL Services Corporation Master Trust, funded VEBA trusts and company funds.

The following table provides the components of net periodic defined benefit costs for LG&E's pension benefit plan for the years ended December 31.

	LG&E Sponsored Pension Benefits	
	2013	2012
Net periodic defined benefit costs (credits):		
Service cost	$ 2	$ 2
Interest cost	14	14
Expected return on plan assets	(20)	(19)
Amortization of:		
Prior service cost (credit)	2	3
Actuarial (gain) loss	14	11
Net periodic defined benefit costs (credits)	$ 12	$ 11
Other Changes in Plan Assets and Benefit Obligations Recognized in Regulatory Assets - Gross:		
Net (gain) loss	$ (20)	$ 18
Amortization of:		
Prior service cost	(2)	(2)
Actuarial (loss)	(14)	(11)
Total recognized in regulatory assets	(36)	5
Total recognized in net periodic benefit costs and regulatory assets	$ (24)	$ 16

For the plan sponsored by LG&E, the estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2014 are $8 million ($2 million amortization of prior service cost and $6 million amortization of actuarial loss). For the plan LG&E participates in, estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2014 are $5 million ($2 million amortization of prior service cost and $3 million amortization of actuarial loss).

The net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction and other non-expense accounts, for LG&E’s pension benefits were $14 million and $13 million in 2013 and 2012. Allocations to LG&E for net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction and other non-expense accounts, for pension benefits were $5 million in 2013 and 2012. Net periodic defined benefits costs charged to operating expense, excluding amounts charged to construction and other non-expense accounts for other postretirement benefits were $4 million and $5 million in 2013 and 2012. These allocated amounts are based on LG&E’s participation in those plans, which management believes is reasonable.

The following weighted-average assumptions were used in the valuation of the benefit obligations at December 31.

	LG&E Sponsored Pension Benefits	
	2013	**2012**
Discount rate	5.13%	4.20%

The following weighted-average assumptions were used to determine the net periodic defined benefit costs for the years ended December 31.

	LG&E Sponsored Pension Benefits	
	2013	**2012**
Discount rate	4.20%	5.00%
Expected return on plan assets (a)	7.10%	7.25%

(a) The expected long-term rates of return for pension benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. Each plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

The funded status of LG&E's plan at December 31, was as follows:

	LG&E Sponsored Pension Benefits	
	2013	2012
Change in Benefit Obligation		
Benefit Obligation, beginning of period	$ 331	$ 298
Service cost	2	1
Interest cost	14	14
Actuarial (gain) loss	(35)	32
Gross benefits paid (a)	(21)	(14)
Benefit Obligation, end of period	$ 291	$ 331
Change in Plan Assets		
Plan assets at fair value, beginning of period	287	256
Actual return on plan assets	4	32
Employer contributions	11	13
Gross benefits paid (a)	(21)	(14)
Plan assets at fair value, end of period	281	287
Funded Status, end of period	$ (10)	$ (44)
Amounts recognized in the Balance Sheets consist of:		
Noncurrent liability	(10)	(44)
Net amount recognized, end of period	$ (10)	$ (44)

(a) LG&E's pension plan offered a limited-time program in 2013 during which terminated vested participants could elect to receive their accrued pension benefit as a one-time lump-sum payment. The increase in gross benefits paid is primarily the result of $7 million of lump-sum cash payments made to terminated vested participants in 2013 in connection with this offering.

LG&E's pension plan had projected and accumulated benefit obligations in excess of plan assets at December 31, 2013 and 2012.

In addition to the plan it sponsors, LG&E is allocated a portion of the funded status and costs of certain defined benefit plans sponsored by LKE based on its participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retired employees are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to LG&E for pension benefits resulted in a liability of $9 million and $58 million at December 31, 2013 and 2012.

Allocations to LG&E for other postretirement benefits resulted in a liability of $73 million and $81 million at December 31, 2013 and 2012.

Plan Assets - Pension Plans

The pension plans sponsored by LKE and LG&E are invested in the PPL Services Corporation Master Trust (the Master Trust) that also includes 401(h) accounts that are restricted for certain other postretirement benefit obligations. The investment strategy for the Master Trust is to achieve a risk-adjusted return on a mix of assets that, in combination with the Company’s funding policy, will ensure that sufficient assets are available to provide long-term growth and liquidity for benefit payments, while also managing the duration of the assets to complement the duration of the liabilities. The Master Trust benefits from a wide diversification of asset types, investment fund strategies and external investment fund managers, and therefore has no significant concentration of risk.

The investment policy of the Master Trust outlines investment objectives and defines the responsibilities of the EBPB, external investment managers, investment advisor and trustee and custodian. The investment policy is reviewed annually by PPL's Board of Directors.

The EBPB created a risk management framework around the trust assets and pension liabilities. This framework considers the trust assets as being composed of three sub-portfolios: growth, immunizing and liquidity portfolios. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities, generally with long durations, and derivative positions. The immunizing portfolio is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

Target allocation ranges have been developed for each portfolio on a plan basis based on input from external consultants with a goal of limiting funded status volatility. The EBPB monitors the investments in each portfolio on a plan basis, and seeks to obtain a target portfolio that emphasizes reduction of risk of loss from market volatility. In pursuing that goal, the EBPB establishes revised guidelines from time to time. EBPB investment guidelines on a plan basis, as well as the weighted average of such guidelines, as of the end of 2013 are presented below.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2013/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The asset allocation for the trust and the target allocation by portfolio, at December 31, are as follows:

	Percentage of Trust Assets	2013 Target Asset Allocation (a)	
	2013 (a)	Weighted Average	LKE Plans
Growth Portfolio	**59%**	**55%**	**55%**
Equity securities	30%		
Debt securities (b)	17%		
Alternative investments	12%		
Immunizing Portfolio	**39%**	**43%**	**43%**
Debt securities (b)	40%		
Derivatives	(1)%		
Liquidity Portfolio	**2%**	**2%**	**2%**
Total	100%	100%	100%

	Percentage of Trust Assets
	2012
Growth Portfolio	**58%**
Equity securities	31%
Debt securities (b)	18%
Alternative investments	9%
Immunizing Portfolio	**41%**
Debt securities (b)	34%
Derivatives	1%
Liquidity Portfolio	**1%**
Total	100%

(a) Allocations exclude consideration of a guaranteed annuity contract held by the LG&E and KU Retirement Plan.
(b) Includes commingled debt funds, which the Company treats as debt securities for asset allocation purposes.

LG&E's and LKE's pension plans' assets are invested solely in the PPL Services Corporation Master Trust, which is fully disclosed below. The fair value of LG&E's plan's assets of $281 million and $287 million at December 31, 2013 and 2012 represents an interest of approximately 7% in the Master Trust for both years. The fair value of LKE's plan's assets of $1.2 billion and $1.1 billion at December 31, 2013 and 2012 represent approximately 29% and 26% in the Master Trust.

The fair value of net assets in the pension plan trusts by asset class and level within the fair value hierarchy was:

The fair value measurements of cash and cash equivalents are based on the amounts on deposit.

The market approach is used to measure fair value of equity securities. The fair value measurements of equity securities (excluding commingled funds), which are generally classified as Level 1, are based on quoted prices in active markets. These securities represent actively and passively managed investments that are managed against various equity indices.

Investments in commingled equity and debt funds are categorized as equity securities. These investments are classified as Level 2, except for exchange-traded funds, which are classified as Level 1 based on quoted prices in active markets. The fair value measurements for Level 2 investments are based on firm quotes of net asset values per share, which are not considered obtained from a quoted price in an active market. Investments in commingled equity funds include funds that invest in U.S. and international equity securities. Investments in commingled debt funds include funds that invest in a diversified portfolio of emerging market debt obligations, as well as funds that invest in investment grade long-duration fixed-income securities.

The fair value measurements of debt securities are generally based on evaluated prices that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences. The fair value of debt securities is generally measured using a market approach, including the use of pricing models which incorporate observable inputs. Common inputs include benchmark yields, reported trades, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as monthly payment data, future predicted cash flows, collateral performance and new issue data. For the PPL Services Corporation Master Trust, these securities represent investments in securities issued by U.S. Treasury and U.S. government sponsored agencies; investments securitized by residential mortgages, auto loans, credit cards and other pooled loans; investments in investment grade and non-investment grade bonds issued by U.S. companies across several industries; investments in debt securities issued by foreign governments and corporations; and exchange traded funds.

Investments in commodities represent ownership of units of a commingled fund that is invested as a long-only, unleveraged portfolio of exchange-traded futures and forward contracts in tangible commodities to obtain broad exposure to all principal groups in the global commodity markets, including energies, agriculture and metals (both precious and industrial) using proprietary commodity trading strategies. The fund has daily liquidity with a specified notification period. The fund's fair value is based upon a unit value as calculated by the fund's trustee.

Investments in real estate represent an investment in a partnership whose purpose is to manage investments in core U.S. real estate properties diversified geographically and across major property types (e.g., office, industrial, retail, etc.). The manager is focused on properties with high occupancy rates with quality tenants. This results in a focus on high income and stable cash flows with appreciation being a secondary factor. Core real estate generally has a lower degree of leverage when compared with more speculative real estate investing strategies. The partnership has limitations on the amounts that may be redeemed based on available cash to fund redemptions. Additionally, the general partner may decline to accept redemptions when necessary to avoid adverse consequences for the partnership, including legal and tax implications, among others. The fair value of the investment is based upon a partnership unit value.

Investments in private equity represent interests in partnerships in multiple early-stage venture capital funds and private equity fund of funds that use a number of diverse investment strategies. Four of the partnerships have limited lives of ten years, while the fifth has a life of 15 years, after which liquidating distributions will be received. Prior to the end of each partnership's life, the investment cannot be redeemed with the partnership; however, the interest may be sold to other parties, subject to the general partner's approval. The PPL Services Corporation Master Trust has unfunded commitments of $76 million that may be required during the lives of the partnerships. Fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Investments in hedge funds represent investments in three hedge fund of funds. Hedge funds seek a return utilizing a number of diverse investment strategies. The strategies, when combined aim to reduce volatility and risk while attempting to deliver positive returns under all market conditions. Major investment strategies for the hedge fund of funds include long/short equity, market neutral, distressed debt, and relative value. Generally, shares may be redeemed with 65 to 95 days prior written notice. The funds are subject to short term lockups and have limitations on the amount that may be withdrawn based on a percentage of the total net asset value of the fund, among other restrictions. All withdrawals are subject to the general partner's approval. The fair value for two of the funds has been estimated using the net asset value per share and the third fund's fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

The fair value measurements of derivative instruments utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. These securities primarily represent investments in interest rate swaps and swaptions (the option to enter into an interest rate swap) which are valued based on the swap details, such as swap curves, notional amount, index and term of index, reset frequency, volatility and payer/receiver credit ratings.

Insurance contracts, classified as Level 3, represent an investment in an immediate participation guaranteed group annuity contract. The fair value is based on contract value, which represents cost plus interest income less distributions for benefit payments and administrative expenses.

Plan Assets – Other Postretirement Benefit Plans

LKE’s postretirement benefit plan is invested primarily in a 401(h) account, with insignificant amounts invested in money market funds within VEBA trusts for liquidity. LKE’s other postretirement benefit plan was invested primarily in a 401(h) account as disclosed in the PPL Services Corporation Master Trusts.

Expected Cash Flows - Defined Benefit Plans

LG&E's defined benefit plan has the option to utilize available prior year credit balances to meet current and future contribution requirements. LG&E does not plan to contribute to its pension plan in 2014. LG&E contributed $8 million to LKE’s pension plan on behalf of LG&E employees in January 2014.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid by the plans for LG&E retirees.

	LG&E Sponsored Pension Plan	**Allocated from LKE Pension Plan**
2014	$ 15	$ 11
2015	15	11
2016	15	11
2017	16	12
2018	17	12
2019-2023	99	68

Savings Plans

Substantially all employees of LG&E are eligible to participate in a 401(k) deferred savings plan. Employer contributions to the plan were $7 million and $6 million in 2013 and 2012.

9. Jointly Owned Facilities

At December 31, 2013 and 2012, the Balance Sheets reflect the owned interests in the facilities listed below.

	Ownership Interest	Electric Plant	Accumulated Depreciation	Construction Work in Progress
December 31, 2013				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 7	$ 1
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	46	5	1
Trimble County Unit 1	75.00%	308	42	18
Trimble County Unit 2	14.25%	200	19	14
Trimble County Units 5-6	29.00%	29	3	-
Trimble County Units 7-10	37.00%	69	7	1
Cane Run Unit 7	22.00%	-	-	91
Green River Unit 5	40.00%	-	-	1
December 31, 2012				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 5	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	46	3	-
Trimble County Unit 1	75.00%	304	33	10
Trimble County Unit 2	14.25%	198	14	13
Trimble County Units 5-6	29.00%	29	2	-
Trimble County Units 7-10	37.00%	68	6	2
Cane Run Unit 7	22.00%	-	-	16

LG&E provides its own funding for its share of each of the above facilities. LG&E receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

10. Commitments and Contingencies

Energy Purchases, Energy Sales and Other Commitments

Energy Purchase Commitments

LG&E and KU enter into purchase contracts to supply the coal and natural gas requirements for generation facilities and LG&E's gas supply operations. These contracts include the following commitments:

Contract Type	Maximum Maturity Date
Coal	2019
Coal Transportation and Fleeting Services	2024
Natural Gas Storage	2024
Natural Gas Transportation	2024

LG&E has a power purchase agreement with OVEC expiring in June 2040. See "Guarantees and Other Assurances" below for information on the OVEC power purchase contract. Future obligations for power purchases from OVEC are unconditional demand payments, comprised of annual minimum debt service payments, as well as contractually required reimbursement of plant operating, maintenance and other expenses as follows:

2014	$ 18
2015	18
2016	18
2017	19
2018	20
Thereafter	504
	$ 597

In addition, LG&E had total energy purchases under the OVEC power purchase agreement of $18 million and $20 million during 2013 and 2012.

Legal Matters

LG&E is involved in legal proceedings, claims and litigation in the ordinary course of business. LG&E cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Regulatory Issues

See Note 4 for information on regulatory matters related to utility rate regulation.

Enactment of Financial Reform Legislation

The Dodd-Frank Act became effective in July 2010 and includes provisions that impose derivative transaction reporting requirements and require most over-the-counter derivative transactions to be executed through an exchange and to be centrally cleared. The Dodd-Frank Act also provides that the U.S. Commodity Futures Trading Commission (CFTC) may impose collateral and margin requirements for over-the-counter derivative transactions, as well as capital requirements for certain entity classifications. The CFTC is establishing final rules on major provisions in the Dodd-Frank Act through its rulemaking process. Several final rules providing for the definition of the terms "swap", "swap dealer", and "major swap participant" became effective in October 2012. The entity classification thresholds and requirements set forth in these final rules do not require LG&E to register as either a swap dealer or major swap participant. Consequently, as commercial end users, LG&E is not subject to the heightened regulatory requirements applicable to swap dealers or major swap participants, including Business Conduct Standards, enhanced recordkeeping and reporting, clearing and exchange trading of CFTC-mandated swaps and other complex requirements under other CFTC regulations. The Dodd-Frank Act and its implementing regulations, however, have imposed on LG&E significant additional and costly recordkeeping, reporting and documentation requirements.

LG&E could face significantly higher operating costs or may be required to post additional collateral if it or its counterparties are subject to capital or margin requirements as ultimately adopted in the implementing regulations of the Dodd-Frank Act. Additionally, the burden that the Dodd-Frank Act and implementing regulations impose on all market participants could cause decreased liquidity in the bilateral swap market as financial entities discontinue their proprietary trading operations. Decreased liquidity could increase costs for LG&E to successfully meet hedge targets. LG&E will continue to evaluate the provisions of the Dodd-Frank Act and its implementing regulations, but could incur significant costs related to compliance with the Act and regulations.

FERC Market-Based Rate Authority

In 1998, the FERC authorized LG&E and KU to make wholesale sales of electricity and related products at market-based rates. In that order, the FERC directed LG&E and KU to file an updated market analysis within three years after the order, and every three years thereafter. Since then, periodic market-based rate filings with the FERC have been made by LG&E and KU. In June 2011, FERC approved PPL’s market-based rate update for the Southeast region, including LG&E and KU. Also, in June 2011, the FERC issued an order approving LG&E's and KU’s request for a determination that they no longer be deemed to have market power in the BREC balancing area and removing restrictions on their market-based rate authority in such region. LG&E cannot predict the ultimate outcome of these update filings at this time.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties of up to $1 million per day, per violation, for certain violations.

LG&E monitors its compliance with the Reliability Standards and continues to self-report potential violations of certain applicable reliability requirements and submit accompanying mitigation plans, as required. The resolution of a number of potential violations is pending. Any Regional Reliability Entity (including RFC or SERC) determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing its programs to ensure compliance with the Reliability Standards by LG&E, certain other instances of potential non-compliance may be identified from time to time. LG&E cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any, other than the amounts currently recorded.

In October 2012, the FERC initiated its consideration of proposed changes to Reliability Standards to address the impacts of Geomagnetic Disturbances on the reliable operation of the bulk-power system, which might, among other things, lead to a requirement to install equipment that blocks geo-magnetically induced currents on implicated transformers. On May 16, 2013, FERC issued Order No. 779, requiring NERC to submit two types of Reliability Standards for FERC's approval in twelve month intervals. The first type would require certain owners and operators of the nation's electricity infrastructure, such as LG&E, to develop and implement operational procedures to mitigate the effects of Geomagnetic Disturbances on the bulk-power system. This NERC proposed standard was filed by NERC with FERC for approval in January of 2014, with a comment due date of March 24, 2014. The second type is to require owners and operators of the bulk-power system to assess certain Geomagnetic Disturbance events and develop and implement plans to protect the bulk-power system from those events and must be filed by NERC with FERC for approval by January 22, 2015. LG&E may be required to make significant expenditures in new equipment or modifications to its facilities to comply with the new requirements. LG&E is unable to predict the amount of any expenditures that may be required as a result of the adoption of any Reliability Standards for Geomagnetic Disturbances.

Environmental Matters

Due to the environmental issues discussed below or other environmental matters, it may be necessary for LG&E to modify, curtail, replace or cease operation of certain facilities or performance of certain operations to comply with statutes, regulations and other requirements of regulatory bodies or courts. In addition, legal challenges to new environmental permits or rules add to the uncertainty of estimating the future cost impact of these permits and rules.

LG&E is entitled to recover, through the ECR mechanism, certain costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements which are applicable to coal combustion wastes and by-products from facilities that generate electricity from coal in accordance with approved compliance plans. Costs not covered by the ECR mechanism for LG&E are subject to rate recovery before the KPSC. LG&E can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

Air

CSAPR (formerly Clean Air Transport Rule) and CAIR

In July 2011, the EPA adopted the CSAPR. The CSAPR replaced the EPA's previous CAIR which was invalidated in July 2008 by the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit Court). CAIR subsequently was effectively reinstated by the D.C. Circuit Court in December 2008, pending finalization of the CSAPR. Like CAIR, CSAPR targeted sources in the eastern U.S. and would have required reductions in sulfur dioxide and nitrogen oxides in two phases (2012 and 2014).

In December 2011, the D.C. Circuit Court stayed implementation of the CSAPR and left CAIR in effect pending a final decision on the validity of the rule. In August 2012, the D.C. Circuit Court issued a ruling invalidating CSAPR, remanding the rule to the EPA for further action, and leaving CAIR in place during the interim. In June 2013, the U.S. Supreme Court granted the EPA's petition for review of the D.C. Circuit Court's August 2012 decision. Oral arguments before the U.S. Supreme Court were held in December 2013. Prior to a revised transport rule from the EPA, coal-fired generating plants could face tighter emission limitations on nitrogen oxides through state action.

The Kentucky fossil-fueled generating plants can meet the CAIR sulfur dioxide emission requirements by utilizing sulfur dioxide allowances (including banked allowances and optimizing existing controls). To meet standards for nitrogen oxides under the CAIR, LG&E will need to buy allowances and/or make operational changes. LG&E does not currently anticipate that the costs of meeting these reinstated CAIR standards will be significant.

National Ambient Air Quality Standards

LG&E’s fossil-fueled generating plants may face further reductions in emissions as a result of more stringent national ambient air quality standards for ozone, nitrogen oxides, sulfur dioxide and/or fine particulates.

In 2010, the EPA finalized a new one-hour standard for sulfur dioxide and required states to identify areas that meet those standards and areas that are in non-attainment. In July 2013, the EPA finalized non-attainment designations for part of Jefferson County in Kentucky. Attainment must be achieved by 2018. States are working on designations for other areas.

In December 2012, the EPA issued final rules that strengthen the fine particulate standards. Under the final rules, states and the EPA have until 2015 to identify non-attainment areas, and states have until 2020 to achieve attainment for those areas.

LG&E anticipates that some of the measures required for compliance with the CAIR, or the MATS, or the Regional Haze requirements (as discussed below), such as upgraded or new sulfur dioxide scrubbers at certain plants and the previously announced retirement of coal-fired generating units at the Cane Run plant, will help to achieve compliance with the new one-hour sulfur dioxide standard. If additional reductions were to be required, the financial impact could be significant.

Until particulate matter and sulfur dioxide maintenance and compliance plans are developed by the EPA and state or local agencies, including identification and finalization of attainment designations for particulate matter, LG&E cannot predict the impact of the new standards.

MATS

In May 2011, the EPA published a proposed regulation requiring stringent reductions of mercury and other hazardous air pollutants from power plants. In February 2012, the EPA published the final rule, known as the MATS, with an effective date of April 2012. The rule is being challenged by industry groups and states in the D.C. Circuit Court, where oral arguments were held in December 2013. The rule provides for a three-year compliance deadline with the potential for a one-year extension as provided under the statute. LG&E has received compliance extensions for certain plants. LG&E is considering extension requests for other plants as well.

At the time the MATS rule was proposed, LG&E filed requests with the KPSC for environmental cost recovery based on its expected need to install environmental controls including chemical additive and fabric-filter baghouses to remove air pollutants. Recovery of the cost of certain controls was granted by the KPSC in December 2011. LG&E's anticipated retirement of certain coal-fired electricity generating units located at Cane Run is in response to MATS and other environmental regulations. LG&E is continuing to assess whether any revisions of its approved compliance plans will be necessary.

LG&E is continuing to conduct in-depth reviews of the MATS, including the potential implications to scrubber wastewater discharges. See the discussion of effluent limitations guidelines and standards below.

Regional Haze and Visibility

The EPA's regional haze programs were developed under the Clean Air Act to eliminate man-made visibility degradation by 2064. Under the programs, states are required to take action via state plans to make reasonable progress every decade, including the application of Best Available Retrofit Technology (BART) on power plants commissioned between 1962 and 1977.

The primary power plant emissions affecting visibility are sulfur dioxide, nitrogen oxides and particulates. To date, the focus of regional haze activity has been the western U.S. because the EPA had determined that the regional trading program in the eastern U.S. under CSAPR satisfied BART requirements to reduce sulfur dioxide and nitrogen oxides. However, the D.C. Circuit Court's August 2012 decision to vacate and remand CSAPR and to implement CAIR in its place on an interim basis leaves power plants located in the eastern U.S., including LG&E’s plants, exposed to reductions in sulfur dioxide and nitrogen oxides as required by BART, unless the D.C. Circuit Court's decision, now pending before the U.S. Supreme Court, is overturned.

In addition to this exposure stemming from the remand of CSAPR, LG&E's Mill Creek Units 3 and 4 are required to reduce sulfuric acid mist emissions because they were determined to have a significant regional haze impact. These reductions are in the Kentucky Division of Air Quality's regional haze state implementation plan that was submitted to the EPA. LG&E is currently installing sorbent injection technology to comply with these reductions, the costs of which are not expected to be significant.

New Source Review (NSR)

The EPA has continued its NSR enforcement efforts targeting coal-fired generating plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act.

In August 2007, LG&E received information requests for the Mill Creek and Trimble County plants, but has received no further communications from the EPA since providing its responses. LG&E cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

States and environmental groups also have commenced litigation alleging violations of the NSR regulations by coal-fired generating plants across the nation. If LG&E is found to have violated NSR regulations by significantly increasing pollutants through a major plant modification, it would, among other things, be required to meet stringent permit limits reflecting Best Available Control Technology (BACT) for pollutants meeting the National Ambient Air Quality Standards (NAAQS) in the area and reflecting Lowest Achievable Emission Rates (LAER) for pollutants not meeting the NAAQS in the area. The costs to meet such limits, including installation of technology at certain units, could be significant.

TC2 Air Permit

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which, in January 2010, were incorporated into a final revised permit issued by the KDAQ. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, LG&E cannot predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

Cane Run Environmental Claims

In the 2011 to 2013 time period, the Louisville Metro Air Pollution Control District issued several notices of violation alleging violations of local air quality rules at the Cane Run plant. In November 2013, LG&E entered into a settlement resolving the pending citations in return for payment of a civil penalty in a non-material amount and performance of remedial measures not expected to result in material costs.

On September 6, 2013, LG&E received a letter on behalf of two residents adjacent to the Cane Run plant notifying various federal, state, and local agencies of their intent to file a citizen suit for alleged violations of the Clean Air Act (CAA) and Resource Conservation and Recovery Act (RCRA). On December 16, 2013, six residents, on behalf of themselves and others similarly situated, filed a class action complaint against LG&E in the U.S. District Court for the Western District of Kentucky for alleged violations of the CAA and RCRA. In addition, these plaintiffs assert common law claims of nuisance, trespass, and negligence. These plaintiffs seek injunctive relief and civil penalties that would accrue to governmental agencies, plus costs and attorney fees, for the alleged statutory violations. Under the common law claims, these plaintiffs seek monetary compensation and punitive damages for property damage and diminished property values for a class consisting of residents within four miles of the plant. In their individual capacities, these plaintiffs seek compensation for alleged adverse health effects. LG&E cannot predict the outcome of this matter or the potential impact on operations of the Cane Run plant. LG&E has previously announced that it anticipates retiring the coal-fired units at Cane Run before the end of 2015.

GHG Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has authority under the Clean Air Act to regulate GHG emissions from new motor vehicles, in April 2010, the EPA and the U.S. Department of Transportation issued new light-duty vehicle emissions standards that applied beginning with 2012 model year vehicles. The EPA also clarified that this standard, beginning in 2011, authorized regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act. As a result, any new sources or major modifications to existing GHG sources causing a net significant emissions increase now require adherence to the BACT permit limits for GHGs. The rules were challenged, and in June 2012 the D.C. Circuit Court upheld the EPA's regulations. In December 2012, the D.C. Circuit Court denied petitions for rehearing pertaining to its June 2012 opinion. On October 15, 2013, the U.S. Supreme Court granted certiorari for several petitions to decide whether the NSR provisions of the Clean Air Act require the EPA to regulate GHG emissions from stationary sources, such as power plants.

In June 2013, President Obama released his Climate Action Plan which reiterates the goal of reducing greenhouse gas emissions in the U.S. "in the range of" 17% below 2005 levels by 2020 through such actions as regulating power plant emissions, promoting increased use of renewables and clean energy technology, and establishing tighter energy efficiency standards. Also, by Presidential Memorandum the EPA was directed to issue a revised proposal for new power plants (a prior proposal was issued in 2012) by September 20, 2013, with a final rule in a timely fashion thereafter, and to issue proposed standards for existing plants by June 1, 2014 with a final rule to be issued by June 1, 2015. The EPA was further directed to require that states develop implementation plans for existing plants by June 2016. Regulation of existing plants could have a significant industry-wide impact depending on the structure and stringency of the final rule and the state implementation plans. The Administration's recent increase in its estimate of the "social cost of carbon" (which is used to calculate benefits associated with proposed regulations) from $23.80 to $38 per metric ton in 2015 may also lead to more costly regulatory requirements; the White House Office of Management and Budget (OMB) has opened this issue for public comment. Additionally, the Climate Action Plan requirements related to preparing the U.S. for the impacts of climate change could affect LG&E and others in the industry as modifications to electricity delivery systems to improve the ability to withstand major storms may be needed in order to meet those requirements.

The EPA issued its revised proposal for new sources on September 20, 2013 as directed by the White House. This proposal was published in the Federal Register on January 8, 2014, with comments due on March 10, 2014. Unlike the EPA's prior proposal, the EPA's revised proposal established separate emission standards for coal and gas units based on the application of different technologies. The coal standard is based on the application of partial carbon capture and sequestration technology, but because this technology is not presently commercially available, the revised proposal effectively precludes the construction of new coal plants. The EPA proposed the same standard for NGCC power plants as was proposed in 2012 and may not be consistently achievable. In addition, the EPA deleted the explicit exemption previously proposed for simple-cycle natural gas plants.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. In November 2011, the Council issued a final report to the Secretary of Kentucky's Energy and Environment Cabinet for his consideration. The final report acknowledged that the recommendations would require additional review and analysis prior to implementation, and that many of the recommendations would likely require, in part, further legislative or regulatory actions. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting plants and, although the decided cases to date have not sustained claims brought on the basis of these theories of liability, the law remains unsettled on these claims. In September 2009, the U.S. Court of Appeals for the Second Circuit in the case of AEP v. Connecticut reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the Second Circuit and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In addition, in Comer v. Murphy Oil (Comer case), the U.S. Court of Appeals for the Fifth Circuit (Fifth Circuit) declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the Comer case named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a petition to reverse the Fifth Circuit's ruling. In May 2011, the plaintiffs in the Comer case filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including four of LG&E’s affiliates but excluding LG&E, under a Mississippi statute that allows the re-filing of an action in certain circumstances. In March 2012, the Mississippi federal district court granted defendants' motions to dismiss the state common law claims. Plaintiffs appealed to the U.S. Court of Appeals for the Fifth Circuit, and in May 2013, the Fifth Circuit affirmed the district court's dismissal of the case. Additional litigation in federal and state courts over such issues is continuing. LG&E cannot predict the outcome of these lawsuits or estimate a range of reasonably possible losses, if any.

In 2013, LG&E and its jointly owned power plants emitted approximately 17 million tons of carbon dioxide compared with 18 million tons in 2012. All tons are U.S. short tons (2,000 pounds/ton).

Renewable Energy Legislation

There has been interest in renewable energy legislation at both the state and federal levels. Federal legislation on renewable energy is not expected to be enacted this year.

LG&E believes there are financial, regulatory and logistical uncertainties related to the implementation of renewable energy mandates that will need to be resolved before the impact of such requirements on them can be estimated. Such uncertainties, among others, include the need to provide back-up supply to augment intermittent renewable generation, potential generation over-supply and downward pressure on energy prices that could result from such renewable generation and back-up, impacts to PJM's capacity market and the need for substantial changes to transmission and distribution systems to accommodate renewable energy sources. These uncertainties are not directly addressed by proposed legislation. LG&E cannot predict at this time the effect of renewable energy mandates that may be adopted, although the costs to implement and comply with any such requirements could be significant.

Water/Waste

Coal Combustion Residuals (CCRs)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs (as either hazardous or non-hazardous) under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. Regulating CCRs as a hazardous waste under Subtitle C of the RCRA would materially increase costs and result in early retirements of many coal-fired plants, as it would require plants to retrofit their operations to comply with full hazardous waste requirements for the generation of CCRs and associated waste waters through generation, transportation and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. The EPA's proposed approach to regulate CCRs as non-hazardous waste under Subtitle D of the RCRA would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, LG&E expects that several of its plants could be significantly impacted by the EPA's proposed non-hazardous waste regulations, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. LG&E has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several plants and has implemented or is implementing certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) requesting comments on selected documents it received during the comment period for the proposed regulations. In September 2013, in response to the proposed Effluent Limitation Guidelines, PPL submitted comments on the proposed CCR regulations. Also, in September 2013, PPL commented on a second CCR NODA seeking comment on additional information related to the EPA's proposal.

A coalition of environmental groups and two CCR recycling companies have filed lawsuits against the EPA seeking a deadline for final rulemaking and, in settlement of that litigation, the EPA has agreed to issue its final rulemaking by the end of 2014.

In July 2013, the U.S. House of Representatives passed House Bill H.R. 2218, the Coal Residuals and Reuse Management Act of 2013, which would preempt the EPA from issuing final CCR regulations and would set non-hazardous CCR standards under RCRA and authorize state permit programs. It remains uncertain whether similar legislation will likely be passed by the U.S. Senate. LG&E cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on its facilities, but the financial and operational impact is expected to be material if CCRs are regulated as hazardous waste and significant if regulated as non-hazardous.

Trimble County Landfill Permit

In May 2011, LG&E submitted an application for a special waste landfill permit to handle coal combustion residuals generated at the Trimble County plant. After extensive review of the permit application in May 2013, the Kentucky Division of Waste Management denied the permit application on the grounds that the proposed facility would violate the Kentucky Cave Protection Act because it would eliminate an on-site karst feature considered to be a cave. After assessing additional options for managing coal combustion residuals, in January 2014, LG&E submitted to the Kentucky Division of Waste Management a landfill permit application for an alternate site adjacent to the plant. LG&E and KU are unable to determine the precise impact of this matter until a landfill permit is issued and any resulting legal challenges are concluded.

Seepages and Groundwater Infiltration

Seepages or groundwater infiltration has been detected at active and retired wastewater basins and landfills at various LG&E plants. LG&E has completed or is completing assessments of seepages or groundwater infiltration at various facilities and has completed or is working with agencies to implement assessment or abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

Clean Water Act 316(b)

The EPA published proposed rule 316(b) for existing facilities in April 2011. The EPA has been evaluating the comments it received to the proposed rule and meeting with industry groups to discuss options. The proposed rule contains two requirements to reduce impact to aquatic organisms at cooling water intake structures. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens (impingement) regardless of the levels of mortality actually occurring or the cost to achieve the standards. The second requirement is to determine and install the best technology available to reduce mortality of aquatic organisms pulled through a plant's cooling water system (entrainment). A form of cost-benefit analysis is allowed for this second requirement involving a site-specific evaluation based on nine factors, including impacts to energy delivery reliability and the remaining useful life of the plant. The final rule is expected by April 17, 2014. Until the final rule is issued, LG&E cannot estimate a range of reasonably possible costs, if any, that would be required to comply with such a regulation.

Effluent Limitations Guidelines (ELGs) and Standards

In June 2013, the EPA published proposed regulations to revise discharge limitations for steam electric generation wastewater permits. The proposed limitations are based on the EPA review of available treatment technologies and their capacity for reducing pollutants and include new requirements for fly ash and bottom ash transport water and metal cleaning waste waters, as well as new limits for scrubber wastewater and landfill leachate. The EPA's proposed ELG regulations contain requirements that would affect the inspection and operation of CCR facilities, if finalized. The EPA has indicated that it will coordinate these regulations with the regulation of CCRs discussed above. The proposal contains alternative approaches, some of which could significantly impact LG&E’s coal-fired plants. LG&E worked with industry groups to comment on the proposed regulation on September 20, 2013. The final regulation is expected to be issued in May 2014 but it may be delayed. At the present time, LG&E is unable to predict the outcome of this matter or estimate a range of reasonably possible costs, but the costs could be significant. Pending finalization of the ELGs, certain states and environmental groups (including Kentucky) are proposing more stringent technology-based limits in permit renewals. Depending on the final limits imposed, the costs of compliance could be significant and costs could be imposed ahead of federal timelines.

Other Issues

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxic Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all or some PCB-containing equipment. The EPA is planning to propose the revised regulations in November 2014. PCBs are found, in varying degrees, in LG&E’s operations. LG&E cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on its facilities, but the costs could be significant.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to the Trimble Circuit Court, but the case was subsequently transferred to the Franklin Circuit Court. In September 2013, the court reversed the Cabinet order upholding the permit and remanded the permit to the agency for further proceedings. In October 2013, LG&E filed a notice of appeal with the Kentucky Court of Appeals. LG&E is unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

The EPA and the Army Corps of Engineers are working on a guidance document that will expand the federal government's interpretation of what constitutes "waters of the U.S." subject to regulation under the Clean Water Act. This change has the potential to affect generation and delivery operations, with the most significant effect being the potential elimination of the existing regulatory exemption for plant waste water treatment systems. The costs that may be imposed on LG&E as a result of any eventual expansion of this interpretation cannot reliably be estimated at this time but could be significant.

Superfund and Other Remediation

LG&E is remediating or has completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which LG&E may be liable for remediation. These include a number of former coal gas manufacturing plants previously owned or operated or currently owned by predecessors or affiliates of LG&E. There are additional sites, formerly owned or operated by LG&E

predecessors or affiliates, for which LG&E lacks information on current site conditions and is therefore unable to predict what, if any, potential liability they may have.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which LG&E currently lacks information, the costs of remediation and other liabilities could be material. LG&E cannot estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require LG&E to take more extensive assessment and remedial actions at former coal gas manufacturing plants. LG&E cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, LG&E undertakes remedial action in response to spills or other releases at various on-site and off-site locations, negotiates with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiates with property owners and other third parties alleging impacts from LG&E’s operations and undertakes similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on LG&E’s operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in significant additional costs for LG&E.

Other

Labor Unions

In 2014, certain labor agreement negotiations are scheduled to begin. For LG&E, negotiations with the IBEW will begin in October 2014. The current agreement expires in November 2014. LG&E cannot predict the outcome of the union labor negotiations.

The labor agreement expiring in 2014 covered 701 employees at December 31, 2013, which is 70% of LG&E’s total workforce.

Guarantees and Other Assurances

In the normal course of business, LG&E enters into agreements that provide financial performance assurance to third parties. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

Pursuant to the OVEC power purchase contract, LG&E is obligated to pay for its share of OVEC's excess debt service, post-retirement and decommissioning costs, as well as any shortfall from amounts currently included within a demand charge designed to cover these costs over the term of the contract. LG&E's proportionate share of OVEC's outstanding debt was $89 million at December 31, 2013. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchases Commitments" above for additional information on the OVEC power purchase contract.

LG&E provides other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries including LG&E, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of $225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

Wholesale Sales and Purchases

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail customers and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost. Savings realized from such intercompany transactions are shared equally between both companies. The volume of energy each company has to sell to the other is dependent on its retail customers' needs and its available generation.

Support Costs

LKS provides LG&E with administrative, management and support services. Where applicable, the costs of these services are charged to LG&E as direct support costs. General costs that cannot be directly attributed to LG&E are allocated and charged as indirect support costs. LKS bases its indirect allocations on LG&E’s number of employees, total assets, revenues, number of customers and/or other statistical information. LKS charged the following amounts for the years ended December 31, and believe these amounts are reasonable, including amounts applied to accounts that are further distributed between capital and expense.

2013	2012
$ 216	$ 186

LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E are reimbursed through LKS.

Intercompany Derivatives

Periodically, LG&E enters into forward-starting interest rate swaps with PPL. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties. See Note 14 for additional information on intercompany derivatives.

Other

See Note 1 for discussions regarding the intercompany tax sharing agreement and Note 5 for a discussion regarding capital transactions by LG&E. See Note 8 for discussions regarding intercompany allocations associated with defined benefits.

12. Other Income (Expense) – net

The components of "Other Income (Expense) - net" for 2013 and 2012 for LG&E were not significant.

13. Fair Value Measurements and Credit Concentration

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. During 2013 and 2012, there were no transfers between Level 1 and Level 2. See Note 1 for information on the levels in the fair value hierarchy.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	December 31, 2013			
	Total	Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	$ 8	$ 8	$ -	$ -
Restricted cash and cash equivalents (a)	22	22	-	-
Total assets	$ 30	$ 30	$ -	$ -
Liabilities				
Price risk management liabilities:				
Interest rate swaps	$ 36	$ -	$ 36	$ -
Total liabilities	$ 36	$ -	$ 36	$ -

	December 31, 2012			
	Total	Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	$ 22	$ 22	$ -	$ -
Restricted cash and cash equivalents (a)	32	32	-	-
Price risk management assets:				
Interest rate swaps	7	-	7	-
Total assets	$ 61	$ 54	$ 7	$ -
Liabilities				
Price risk management liabilities:				
Interest rate swaps	$ 58	$ -	$ 58	$ -
Total liabilities	$ 58	$ -	$ 58	$ -

(a) Included in "Other noncurrent assets" on the Balance Sheets.

Price Risk Management Assets/Liabilities - Interest Rate Swaps

To manage interest rate risk, LG&E uses interest rate contracts such as forward-starting swaps. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR) as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3. Accounting personnel, who report to the CFO, interpret analysis quarterly to classify the contracts in the fair value hierarchy. Valuation techniques are evaluated periodically.

Financial Instruments Not Recorded at Fair Value

The carrying amounts of long-term debt on the Balance Sheets and its estimated fair values are set forth below. The fair values were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates, which incorporate the credit risk of LG&E. These instruments are classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	December 31, 2013		December 31, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt	$ 1,353	$ 1,372	$ 1,112	$ 1,178

The carrying value of short-term debt (including notes between affiliates), when outstanding, approximates fair value due to the variable interest rates associated with the short-term debt and is classified as Level 2.

Credit Concentration Associated with Financial Instruments

Contracts are entered into with many entities for the purchase and sale of energy. When NPNS is elected, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 14 for information on credit policies used to manage credit risk, including master netting arrangements and collateral requirements.

At December 31, 2013, LG&E's credit exposure was not significant.

14. Derivative Instruments and Hedging Activities

Risk Management Objectives

PPL has a risk management policy approved by the Board of Directors to manage market risk (including price, liquidity and volumetric risk) and credit risk (including non-performance risk and payment default risk). Senior management oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, and verification of risk and transaction limits.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts and swaps are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of the contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected. The table below summarizes the market risks that affect LG&E.

Commodity price risk (including basis and volumetric risk)	M
Interest rate risk:	
Debt issuances	M
Defined benefit plans	M
Equity securities price risk:	
Defined benefit plans	M

M = The regulatory environment, by definition, significantly mitigates market risk.

Commodity price risk

LG&E's rates include certain mechanisms for fuel, gas supply and environmental expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses.

Interest rate risk

LG&E is exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt and utilizes forward starting interest rate swaps to hedge changes in benchmark interest rates in connection with future debt issuances.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

LG&E is exposed to credit risk from interest rate derivatives with third-party financial institutions.

The majority of LG&E’s credit risk stems from energy sales and purchases. In the event a supplier of LG&E defaults on its obligation, it would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by LG&E would be recoverable from customers in future rates, thus mitigating the financial risk for these entities.

LG&E has credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. LG&E may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

Master Netting Arrangements

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

LG&E had no obligation to return cash collateral under master netting arrangements at December 31, 2013 and 2012.

LG&E had posted cash collateral under master netting arrangements of $22 million and $32 million at December 31, 2013 and 2012.

See "Offsetting Derivative Investments" below for a summary of derivative positions presented in the balance sheets where a right of setoff exists under these arrangements.

Interest Rate Risk

LG&E issues debt to finance its operations, which exposes it to interest rate risk. Various financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of the debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges

In November 2012 and April 2013, LG&E entered into forward-starting interest rate swaps with PPL that hedged the interest payments on new debt that was expected to be issued in 2013. In September 2013, these hedges were terminated and LG&E entered into new forward-starting interest rate swaps with PPL, effectively extending the start date of the prior hedges from September 2013 to December 2013. All of these swaps had terms identical to forward-starting swaps entered into by PPL with third parties. New debt totaling $250 million was issued in November 2013 and the hedges issued in September were terminated in November 2013. Net cash settlements of $43 million were received on the swaps that were terminated in September and November, which are included in "Cash Flows from Operating Activities" on the Statement of Cash Flows. Realized gains and losses on these swaps are probable of recovery through regulated rates; as such, the net settlements were reclassified from AOCI to regulatory liabilities and are being recognized in "Interest Expense" on the Statements of Income over the life of the newly issued debt. For 2013, there was no hedge ineffectiveness recorded for the interest rate derivatives.

Economic Activity

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income when the hedged transaction occurs. At December 31, 2013, LG&E held contracts with a notional amount of $179 million that range in maturity through 2033.

Accounting and Reporting

All derivative instruments are recorded at fair value on the Balance Sheets as an asset or liability unless NPNS is elected. Changes in the fair value of derivatives not designated as NPNS are recognized currently in earnings unless specific hedge accounting criteria are met and designated as such, except for the change in fair value of LG&E's interest rate swaps that are recognized as regulatory assets or regulatory liabilities. See Note 4 for amounts recorded in regulatory assets and regulatory liabilities at December 31, 2013 and 2012.

See Note 1 for additional information on accounting policies related to derivative instruments.

The following table presents the fair value and the location on the Balance Sheets of derivative instruments designated as cash flow hedges.

	December 31, 2013		December 31, 2012	
	Assets	Liabilities	Assets	Liabilities
Current:				
Price Risk Management Assets/Liabilities (a):				
Interest rate swaps	$ -	$ -	$ 7	$ -

(a) Represents the location on the Balance Sheets.

The following table presents the pre-tax effect of derivative instruments designated as cash flow hedges that are recognized in regulatory liabilities.

Derivative Instruments	Location of Gain (Loss)	2013	2012
Interest rate swaps	Regulatory liabilities - noncurrent	$ 36	$ 7

The following table presents the fair value and the location on the Balance Sheets of derivatives not designated as hedging instruments.

	December 31, 2013		December 31, 2012	
	Assets	**Liabilities**	**Assets**	**Liabilities**
Current:				
Other Current Assets/Liabilities (a):				
Interest rate swaps	$ -	$ 4	$ -	$ 5
Total current	-	4	-	5
Noncurrent:				
Price Risk Management Assets/Liabilities (a):				
Interest rate swaps	-	32	-	53
Total noncurrent	-	32	-	53
Total derivatives	$ -	$ 36	$ -	$ 58

(a) Represents the location on the Balance Sheets.

The following tables present the pre-tax effect of derivatives not designated as cash flow hedges that are recognized in income or regulatory assets.

Derivative Instruments	**Location of Gain (Loss)**	**2013**	**2012**
Interest rate swaps	Interest Expense	$ (8)	$ (8)
Commodity contracts	Operating Revenues	-	-
	Total	$ (8)	$ (8)

Derivative Instruments	**Location of Gain (Loss)**	**2013**	**2012**
Interest rate swaps	Regulatory assets - noncurrent	$ 22	$ 1

Offsetting Derivative Instruments

LG&E has master netting arrangements or similar agreements in place including derivative clearing agreements with futures commission merchants (FCMs) to permit the trading of cleared derivative products on one or more futures exchanges. The clearing arrangements permit an FCM to use and apply any property in its possession as a set off to pay amounts or discharge obligations owed by a customer upon default of the customer and typically do not place any restrictions on the FCM's use of collateral posted by the customer. LG&E also enters into agreements pursuant to which it trades certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to setoff amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

LG&E has elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The tables below summarize the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

	Assets			
		Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Received	Net
December 31, 2012				
Treasury derivatives	$ 7	$ -	$ -	$ 7

	Liabilities			
		Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Received	Net
December 31, 2013				
Treasury derivatives	$ 36	$ -	$ 20	$ 16
December 31, 2012				
Treasury derivatives	$ 58	$ -	$ 30	$ 28

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of LG&E. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in the credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade (i.e., below BBB- for S&P or Fitch, or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding the performance of LG&E's obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

At December 31, 2013, the effect of a decrease in credit ratings below investment grade on derivative contracts that contain credit risk-related contingent features and were in a net liability position is summarized as follows:

Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent provisions	$	26
Aggregate fair value of collateral posted on these derivative instruments		22
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)		6

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheets.

15. Other Intangible Assets

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2013		December 31, 2012	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Coal contracts (a)	$ 124	$ 81	$ 124	$ 62
Land and transmission rights	7	1	8	1
Emission allowances (b)	1	-	1	-
OVEC power purchase agreement (c)	87	17	87	13
Total subject to amortization	$ 219	$ 99	$ 220	$ 76

(a) Gross carrying amount represents the fair value at the acquisition date of coal contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 4 for additional information.

(b) Represents the fair value at the acquisition date of emission allowances recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability is recorded related to these emission allowances, which is being amortized as the emission allowances are consumed, eliminating any income statement impact. Consumption related to these emission allowances was insignificant in 2013 and in 2012.

(c) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. See Note 4 for additional information.

Current intangible assets are included in "Other current assets" on the Balance Sheets. Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Amortization expense, excluding consumption of emission allowances, was as follows:

	2013	2012
Intangible assets with regulatory offset	23	23
Total	$ 23	$ 23

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2014	2015	2016	2017	2018
Intangibles with regulatory offset	$ 23	$ 24	$ 13	$ 6	$ 6

16. Asset Retirement Obligations

LG&E's AROs are primarily related to the final retirement of assets associated with generating units. LG&E also has AROs related to natural gas mains and wells. LG&E's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. As described in Notes 1 and 4, LG&E's accretion and depreciation expense are recorded as a regulatory asset, such that there is no earnings impact. In 2013, AROs were revalued primarily due to updates in the estimated cash flows for ash ponds and CCR surface impoundments based on updated cost estimates.

The changes in the carrying amounts of AROs were as follows.

	2013	2012
ARO at beginning of period	$ 62	$ 57
Accretion expense	3	3
Changes in estimated cash flow or settlement date	17	5
Obligations settled	(8)	(3)
ARO at end of period	74	62

Substantially all of the ARO balances are classified as noncurrent at December 31, 2013 and 2012.

17. New Accounting Guidance Pending Adoption

Accounting for Obligations Resulting from Joint and Several Liability Arrangements

Effective January 1, 2014, LG&E will retrospectively adopt accounting guidance for the recognition, measurement and disclosure of certain obligations resulting from joint and several liability arrangements when the amount of the obligation is fixed at the reporting date. If the obligation is determined to be in the scope of this guidance, it will be measured as the sum of the amount the reporting entity agreed to pay on the basis of its arrangements among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. This guidance also requires additional disclosures for these obligations.

The adoption of this guidance is not expected to have a significant impact on LG&E.

Presentation of Unrecognized Tax Benefits When Net Operating Loss Carryforwards, Similar Tax Losses, or Tax Credit Carryforwards Exist

Effective January 1, 2014, LG&E will prospectively adopt accounting guidance that requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets.

The adoption of this guidance is not expected to have a significant impact on LG&E.

BLANK

18. Notes to Statement of Cash Flows

Supplemental disclosures of cash flow information.

	December 31, 2013	December 31, 2012
Cash paid during the period for:		
Income taxes	$ 51	$ 5
Interest on borrowed money	28	29
Other cash paid for interest	8	9

19. Notes to Statement of Income for the Year

See page 115, line 6, column (g). Electric Utility Depreciation Expense includes $8 million applicable to Common Utility Plant apportioned to Electric Operations.

See page 115, line 6, column (i). Gas Utility Depreciation Expense includes $3 million applicable to Common Utility Plant apportioned to Gas Operations.

See page 115, line 8, column (g). Electric Utility Amortization and Depletion of Utility Plant includes $6 million applicable to Common Utility Plant apportioned to Electric Operations.

See page 115, line 8, column (i). Gas Utility Amortization and Depletion of Utility Plant includes $2 million applicable to Common Utility Plant apportioned to Gas Operations.

Louisville Gas and Electric Company
Case No. 2014-00372
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/16; Base Period 12ME 2/28/15)

Filing Requirement
807 KAR 5:001 Section 16(7)(l)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

The annual report to shareholders or members and the statistical supplements covering the most recent two (2) years from the application filing date.

Response:

There are no annual reports to LG&E's shareholders during the period referenced. LG&E does not publish a statistical supplement.

Federal securities rules generally require the delivery of annual reports to public shareholders when requesting their vote via certain proxy solicitations. During the period in question, the common stock of LG&E has been wholly-owned by LG&E and KU Energy LLC, which is a wholly-owned subsidiary of PPL Corporation.

Copies of the audited annual financial statements and other financial information of LG&E relating to the period described are provided in Filing Requirement 807 KAR 5:001 Section 16(7)(p) [Tab No. 46].

Louisville Gas and Electric Company
Case No. 2014-00372
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/16; Base Period 12ME 2/28/15)

Filing Requirement
807 KAR 5:001 Section 16(7)(o)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

Complete monthly budget variance reports, with narrative explanations, for the twelve (12) months immediately prior to the base period, each month of the base period, and any subsequent months, as they become available.

Response:

The Company has only one monthly performance report used for management reporting to the CEO and executive officers that address budget variances. Although the performance report contains separate analyses of gas and electric margins, no separate income statement, balance sheet or statement of cash flows are presented for gas versus electric operations, or KU versus LG&E, and decisions are based on the overall utility operations of LG&E and KU.

See attached for the monthly reports for:

- March 2013 through February 2014 which are the twelve months prior to the base period.
- Each month of the base period. Reports for March 2014 through October 2014 are presently available. LG&E will provide these reports for the remaining periods requested in the upcoming months as they become available.

Performance Report

Total			1.6%	0.4%	3.0%	1.8%

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable to budget due to temperature and balance issues on Ghent 4 ID fan bearing and a turbine bearing failure and air heater pluggage on Trimble County 2.
- SAIDI is unfavorable YTD to budget due to a higher number of minor storms that occurred across Kentucky during January.
- Higher margins driven by higher retail volumes, as March heating degree days were 30% above normal.
- Capital spend YTD was $65m lower than budget due mainly to revised schedules for Mill Creek and Ghent environmental air work ($33m) expected to reverse by the end of 2013. Temporary differences on other environmental projects ($11m) and delayed spending on major Transmission and Distribution projects ($29m) are expected to reverse by year end and were partially offset by increased spend on Cane Run 7 ($10m).
- Capital spend full year is projected to be $18m lower than budget due mainly to delay in the Trimble County landfill to 2015 ($12m).

Significant Future Events

- In addition to the construction of Cane Run Unit 7, LG&E and KU continue to evaluate responses received from their request for proposals for up to 700 MW of capacity beginning as early as 2015. Initial assessments are expected to be completed in the second quarter.

Major Developments

- In Louisville and Lexington, March 2013 ranked as the coldest and the second coldest, respectively, in the last 20 years with heating degree days approximately 30% above normal.
- Old Dominion Power Company (KU’s operational unit in Virginia) filed an application with the Virginia State Corporation Commission to increase its rates to recover costs associated with improving service and reliability. The filing includes a $6.5 million or 9.6 percent rate increase premised upon a 10.8 percent return on equity. The rates will become effective January 1, 2014, pending approval from the Commission.
- The Kentucky Division of Waste Management notified LG&E of its intent to deny LG&E’s Special Waste Landfill permit application for the Trimble County CCR landfill. The denial was based solely on its interpretation of the Cave Protection Act and not on special waste regulations. LG&E plans to move forward with a new permit application for the next lowest cost alternate location which is also on existing plant property. The revised footprint will avoid any impact to the karst feature that was under review.
- For the third consecutive year, LG&E and KU have been awarded the ENERGY STAR Partner of the Year - Sustained Excellence Award by the EPA. The award recognizes LG&E and KU’s continued leadership in protecting the environment through superior energy efficiency. LG&E and KU, ENERGY STAR partners since 2009, have helped spur the construction of more than 2,800 ENERGY STAR-certified homes within their service territories. These accomplishments were recognized at an awards ceremony in Washington, D.C.

(1) Full year percentages represent a trailing twelve months.

(2) "Other" is typically comprised of the public authority customer class and KU's 12 full-requirements wholesale municipal customers.

(3) Excludes goodwill and other purchase accounting adjustments.

(4) Net of cost recovery mechanisms.

Note: Schedules may not sum due to rounding.

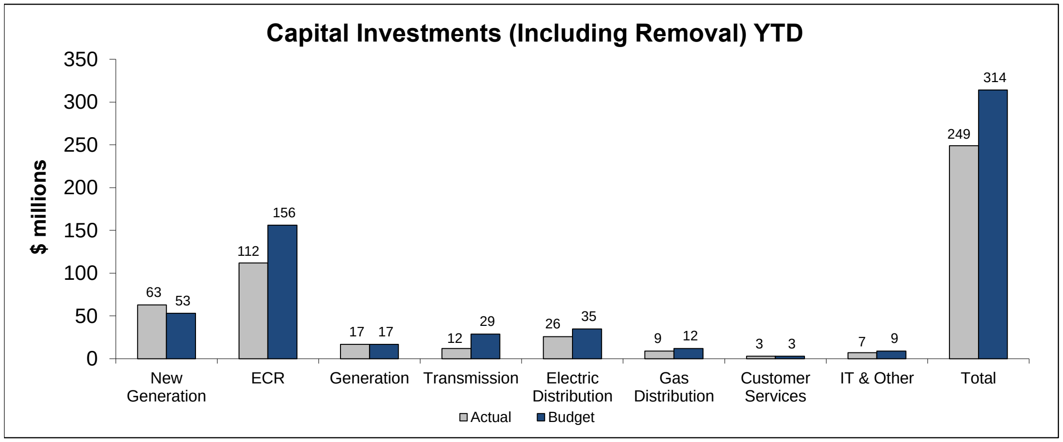
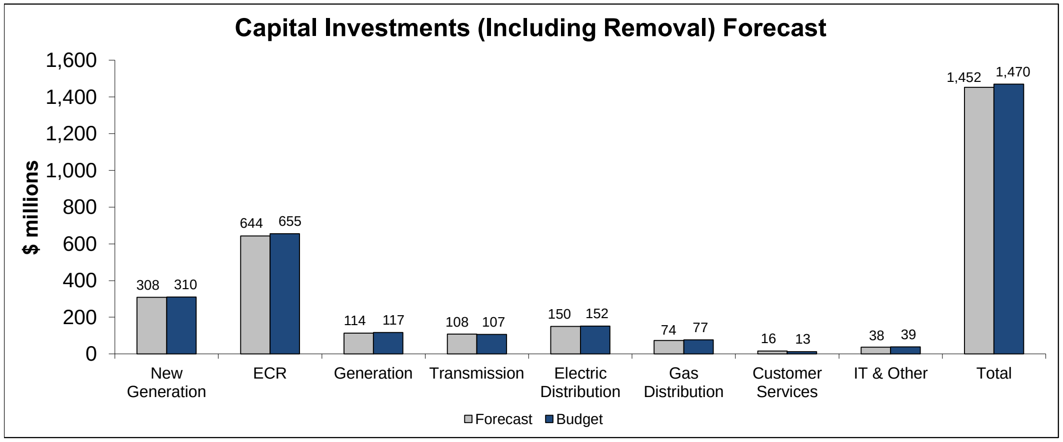
Capital Investments March 2013



Capital Investments (Including Removal) YTD

Capital was $65m lower than budget due mainly to revised schedules for Mill Creek and Ghent environmental air work ($33m) expected to reverse by the end of 2013. Temporary differences on other environmental projects ($11m) and delayed spending on major Transmission and Distribution projects ($29m) are expected to reverse by year end and were partially offset by increased spend on Cane Run 7 ($10m).



Capital Investments (Including Removal) Forecast

Capital is projected to be $18m lower than budget due mainly to delay in the Trimble County landfill to 2015 ($12m).

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable to budget due to temperature and balance issues on Ghent 4 ID fan bearing, turbine bearing failure and air heater pluggage on Trimble County 2, hydrogen seal leak and damaged bearing on Mill Creek 4 and damaged boiler corner support hangers on Brown 3.
- Lower margins YTD primarily due to $12 million of lower electricity demand revenues.
- Capital was $88m lower than budget YTD due mainly to revised schedules for Mill Creek and Ghent environmental air work ($49m) expected to reverse by the end of 2013. Temporary differences on other environmental projects ($4m) and delayed spending on major Transmission and Distribution projects ($39m) are expected to reverse by year end and were partially offset by increased spend on Cane Run 7 ($8m).
- Capital is projected to be $18m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Significant Future Events

- In addition to the construction of Cane Run Unit 7, LG&E and KU continue to evaluate responses received from their request for proposals for up to 700 MW of capacity beginning as early as 2015. Initial assessments are nearing completion with respondents to be notified during the second quarter.

Major Developments

- On April 18, LG&E and KU received its final audit report from SERC for the CIP audit conducted October 1-19, 2012. The SERC auditors indicated that the report's finding of 5 minor potential violations represented the fewest potential violations identified in a SERC CIP audit thus far. Importantly, the auditors were also extremely complimentary of LG&E/KU's preparedness, organization, and professionalism and the report itself described LG&E and KU as having "a very effective compliance program", which is the highest formal rating SERC gives.
- On April 22, LG&E celebrated the grand opening of a new one-of-a-kind beneficial use facility at Mill Creek. Company officials were joined by Senate Republican Leader Mitch McConnell and Senator Rand Paul; Commissioner of Agriculture James Comer; House Majority Floor Leader Rocky Adkins; and Charles Price, president and CEO of Charah, Inc. The Charah, Inc. SUL4R-PLUS® Product Manufacturing Facility is the first facility of its type and will recover approximately 300,000 tons of gypsum annually to create a unique sulfur product that will be sold to and distributed by agricultural companies. The facility is expected to create 20 new jobs when at full capacity by 2014.
- On April 27, LG&E and KU representatives met with KPSC staff for its quarterly update on major environmental projects as called for under the ECR Order approving these projects. That same Order had deferred decision on the installation of baghouses at Brown Units 1 and 2 until no sooner than the second half of 2013. The Company notified staff that it would not be pursuing this project as current analyses showed it was not in the economic interest of its customers. The Company noted that it did not, however, intend to retire these units at this time and is studying an additive product that may allow the units to meet environmental requirements for some time beyond 2015 with certain operational changes.
- On April 30, the Virginia State Corporation Commission issued an Order in KU's Virginia rate case that established a procedural schedule. A public evidentiary hearing is scheduled for October 1, 2013, with an Order expected by yearend and new rates effective January 1, 2014.

---

(1) Percentages represent a trailing twelve months.

(2) "Other" is typically comprised of the public authority customer class and KU's 12 full-requirements wholesale municipal customers.

(3) Excludes goodwill and other purchase accounting adjustments.

(4) Net of cost recovery mechanisms.

(5) The NERC Possible Violation Issues for the current month are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

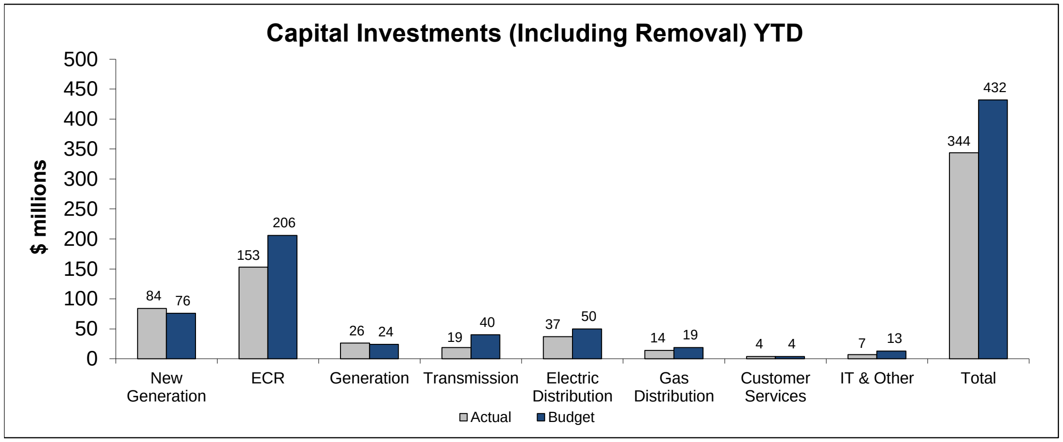
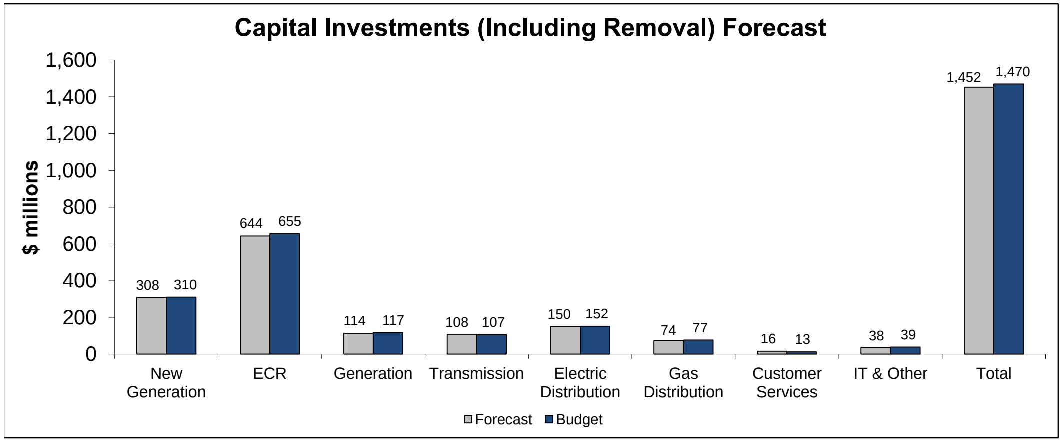
Balance Sheet April 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 59	$ 9	$ 49	Driven by lower capital spend than budgeted.
Accounts Receivable (Trade)	331	300	32	Tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	241	226	15	Increase in fuel ($9m), gas ($4m) and materials and supplies ($2m).
Deferred Income Taxes	13	13	(1)	
Prepayments and other current assets	53	69	(16)	Primarily due to receivables from insurance claims ($5m), IMEA/IMPA ($4m), interest ($3m), prepaid insurance ($3m) and mutual aid ($2m).
Total Current Assets	697	617	80	
Property, Plant, and Equipment	8,547	8,633	(86)	See capital chart for details.
Intangible Assets	254	254	(0)	
Other Property and Investments	1	1	0	
Regulatory Assets	639	637	2	
Goodwill	997	997	-	
Other Long-term Assets	103	105	(2)	
Total Assets	**$ 11,238**	**$ 11,245**	**$ (7)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 316	$ 248	$ 68	Primarily due to higher fuel volumes and higher capex accrual.
Accounts Payable - Affiliated Company	-	(0)	0	
Customer Deposits	49	48	1	
Derivative Liability	5	5	0	
Accrued Taxes	20	55	(35)	Tax payments made in actuals but not in budget until June.
Other Current Liabilities	151	139	12	Primarily higher accrued salaries than budgeted ($3m) and litigation proceeds not budgeted ($7m).
Total Current Liabilities	542	495	47	
Debt - Affiliated Company	-	-	-	
Debt	4,339	4,346	(8)	
Total Debt	4,339	4,346	(8)	
Deferred Tax Liabilities	588	591	(3)	
Investment Tax Credit	137	137	1	
Accumulated Provision for Pension and Related Benefits	265	267	(2)	
Asset Retirement Obligation	127	127	(0)	
Regulatory Liabilities	992	1,005	(13)	Primarily due to decrease in ECR (-5m), GSC (-3m), spare parts (-2m) and DSM (-2m), partially offset by increase in GLT (2m).
Derivative Liability	52	54	(2)	
Other Liabilities	236	238	(2)	
Total Deferred Credits and Other Liabilities	2,397	2,418	(21)	
Equity	3,960	3,985	(25)	
Total Liabilities and Equity	**$ 11,238**	**$ 11,245**	**$ (7)**	



Capital was $88m lower than budget due mainly to revised schedules for Mill Creek and Ghent environmental air work ($49m) expected to reverse by the end of 2013. Temporary differences on other environmental projects ($4m) and delayed spending on major Transmission and Distribution projects ($39m) are expected to reverse by year end and were partially offset by increased spend on Cane Run 7 ($8m).



Capital is projected to be $18m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

NERC Possible Violations(5)	0	3	3	8	N/A	29

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable YTD to budget due to temperature and balance issues on Ghent U4 ID fan bearing; turbine bearing failure, air heater pluggage and start-up failure generator lockout on Trimble County U2; hydrogen seal leak and damaged bearing on Mill Creek U4; damaged boiler corner support hangers on Brown U3 and air heater fouling on Ghent U3 & U4.
- Higher margins in May due to $4 million of higher electric energy and demand revenues and $2 million of higher DSM revenue (timing).
- Lower margins YTD due primarily to $10 million of lower electric demand revenues, partially offset by $3 million of higher DSM revenue with increased activity in certain energy efficiency programs and $3 million of higher gas margins.
- Capital was $114 million lower than budget YTD due mainly to revised schedules for environmental air work at Mill Creek for $27 million and Ghent for $21 million. Temporary differences on Ghent and Brown landfill projects of $13 million, other environmental projects of $7 million and delayed spending on major Transmission and Distribution projects of $43 million are expected to reverse by year end.
- Full year capital is projected to be $18 million lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.
- Lower other operation and maintenance in May related to timing of $6 million of lower outage maintenance and supplies and $2 million of labor savings.
- Lower other operation and maintenance YTD primarily related to $6 million of labor savings and other offsetting variances.

Major Developments

- LG&E and KU continue to expand customer commitment with a newly created Online Customer Panel which will include 1,000 customers, whose survey responses will help better understand customer's energy needs, opinions and preferences. Key findings from the surveys will be shared with the participants and employees. Participants will remain on the online panel for one year before another round of invitation letters will invite a new group of customers to join.
- LKE was recently recognized by the American Heart Association for the second year in a row as a Platinum Fit-Friendly Worksite. LKE was recognized for its commitment to health and wellness through initiatives such as WellFairs, the hypertension management program and others.

Significant Future Events

- The Engineering, Procurement and Construction contract is under final evaluation for the Brown 3 fabric filter and is expected to be executed in July.
- In addition to the construction of Cane Run Unit 7, LG&E and KU continue to evaluate responses received from their request for proposals for up to 700 MW of capacity beginning as early as 2015. A final decision is expected early Q3.
- Regarding the Virginia rate case, Virginia State Corporation Commission (VSCC) staff have been on site for a two-week rate case discovery effort. A public hearing will be held on June 24, 2013 in Norton, VA to receive testimony from public witnesses. A second hearing will be held on October 1, 2013 at the VSCC office to receive testimony of public witnesses and the evidence offered by KU, respondents and the Commission's staff.

(1) Percentages represent a trailing twelve months.

(2) "Other" is typically comprised of the public authority customer class and KU's 12 full-requirements wholesale municipal customers.

(3) Excludes goodwill and other purchase accounting adjustments.

(4) Net of cost recovery mechanisms.

(5) The 3 NERC Possible Violation Issues for YTD Actual are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

Note: Schedules may not sum due to rounding.

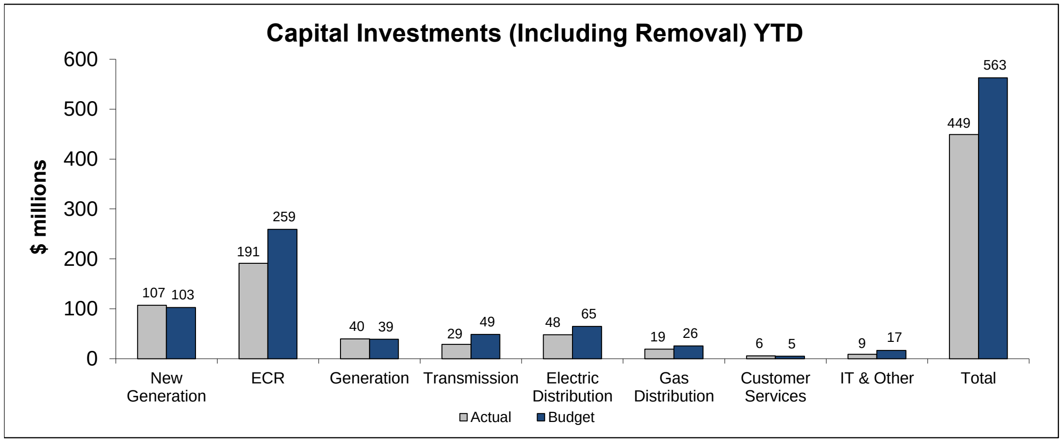
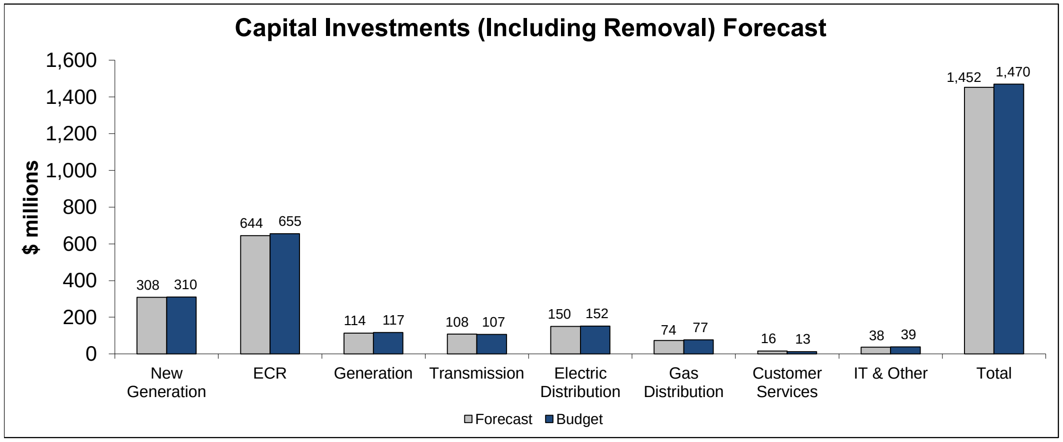
Balance Sheet May 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 20	$ 9	$ 11	
Accounts Receivable (Trade)	330	306	24	Tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	238	225	12	Primarily increase in fuel ($6m), gas ($4m) and materials and supplies ($3m).
Deferred Income Taxes	13	13	(1)	
Prepayments and other current assets	162	67	95	Primarily due to capital contribution from PPL not included in other receivable budget ($75m); also receivables from insurance claims ($5m), IMEA/IMPA ($3m), interest ($3m), prepaid insurance ($4m) and mutual aid ($2m).
Total Current Assets	763	621	142	
Property, Plant, and Equipment	8,623	8,736	(113)	See capital chart for details.
Intangible Assets	249	250	(1)	
Other Property and Investments	1	1	0	
Regulatory Assets	629	634	(5)	
Goodwill	997	997	-	
Other Long-term Assets	100	105	(5)	
Total Assets	**$ 11,362**	**$ 11,343**	**$ 19**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 275	$ 220	$ 54	Primarily due to higher fuel volumes.
Accounts Payable - Affiliated Company	65	(0)	65	Dividend declared.
Customer Deposits	49	48	1	
Derivative Liability	4	5	(1)	
Accrued Taxes	39	60	(22)	Tax payments made in actuals but not in budget until June.
Other Current Liabilities	114	100	14	Due primarily to wires made but not yet cleared, including payroll funding ($3m), payment to Opower software license ($2m) and payment to KBR for Ghent environmental projects ($10m).
Total Current Liabilities	546	434	112	
Debt - Affiliated Company	-	-	-	
Debt	4,396	4,487	(91)	Less short-term debt issued than budgeted (-$151m) due to lower capital spend, offset by notes payable to PPL ($60m). See Financing Activities page for more details.
Total Debt	4,396	4,487	(91)	
Deferred Tax Liabilities	588	598	(10)	Timing of recording of deferred taxes in actuals vs. budget.
Investment Tax Credit	137	136	1	
Accumulated Provision for Pension and Related Benefits	265	268	(3)	
Asset Retirement Obligation	126	128	(2)	
Regulatory Liabilities	1,028	1,000	28	Due primarily to increase in long-term interest rate swaps ($37m).
Derivative Liability	44	54	(9)	
Other Liabilities	240	239	2	
Total Deferred Credits and Other Liabilities	2,429	2,423	6	
Equity	3,991	3,999	(9)	
Total Liabilities and Equity	**$ 11,362**	**$ 11,343**	**$ 19**	



Capital was $114m lower than budget due mainly to revised schedules for Mill Creek ($27m) and Ghent ($21) environmental air work. Temporary differences on Ghent and Brown landfill projects ($13m), other environmental projects ($7m) and delayed spending on major Transmission and Distribution projects ($43m) are expected to reverse by year end.



Capital is projected to be $18m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable YTD to budget due to temperature and balance issues on Ghent U4 ID fan bearing; turbine bearing failure, air heater pluggage and start-up failure generator lockout on Trimble County U2; hydrogen seal leak and damaged bearing on Mill Creek U4; damaged boiler corner support hangers on Brown U3; air heater fouling on Ghent U3 & U4 and winding shorts on generator rotor on Cane Run U4.
- Lower margins in June due primarily to $8 million of lower electric energy and demand charge volumes.
- Lower margins YTD due primarily to $14 million of lower retail electric demand charge revenues, partially offset by net favorable margins on other retail rate mechanisms.
- Capital was $131 million lower than budget YTD due mainly to slower than expected mobilization for Mill Creek of $32 million and Ghent environmental air work of $24 million. Differences on Ghent and Brown landfill projects of $15 million and other environmental projects of $9 million are expected to reverse by year end. Transmission underspend of $21 million was due mainly to delayed spending on Cane Run U7, New Albany transmission work and line rating projects; Distribution variances of $29 million were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects.
- Full year capital is projected to be $19 million lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.
- Lower other operation and maintenance in June related primarily to $2 million of lower outage costs, $2 million of labor savings and $2 million of lower outside services.
- Lower other operation and maintenance YTD related to $3 million of lower outside services, $3 million of lower uncollectible accounts and $6 million of labor savings.

Major Developments

- LG&E and KU were recognized for several safety, communication and customer service awards in the month of June:
  - KU received the prestigious Kentucky Governor's Health and Safety Award for outstanding safety performance. Brown employees won the award for working 4,144,448 hours without a lost-time incident. Ghent employees won the award for working 1,272,552 hours without a lost-time incident.
  - At the Utility Communicators International Gala, LG&E and KU were the recipients of 11 Better Communication Competition Awards - representing the most by any utility. The awards winners were selected from more than 350 entries submitted by 35 utilities across the globe.
  - LG&E and KU's Residential Service Center ("RSC") placed in the Top 10 in the 2013 BenchmarkPortal Top 100 Call Center Contest – Medium Sized Contact Centers (100 - 249 employees). The RSC was also selected as one of four finalists in the International Quality & Productivity Center's Best in Class Call Center (under 200 staff) category for 2013. LG&E and KU received the honorable mention award behind the first and second place finishers.

Significant Future Events

- The Engineering, Procurement and Construction contract is under final evaluation for the Brown 3 fabric filter and is expected to be resolved in Q3.
- In addition to the construction of Cane Run Unit 7, LG&E and KU continue to evaluate responses received from their request for proposals for up to 700 MW of capacity beginning as early as 2015. A final decision is expected in the next few months.

---

(1) Percentages represent a trailing twelve months.

(2) "Other" is typically comprised of the public authority customer class and KU's 12 full-requirements wholesale municipal customers.

(3) Excludes goodwill and other purchase accounting adjustments.

(4) Net of cost recovery mechanisms.

(5) The seven NERC Possible Violation Issues for YTD Actual are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

Note: Schedules may not sum due to rounding.

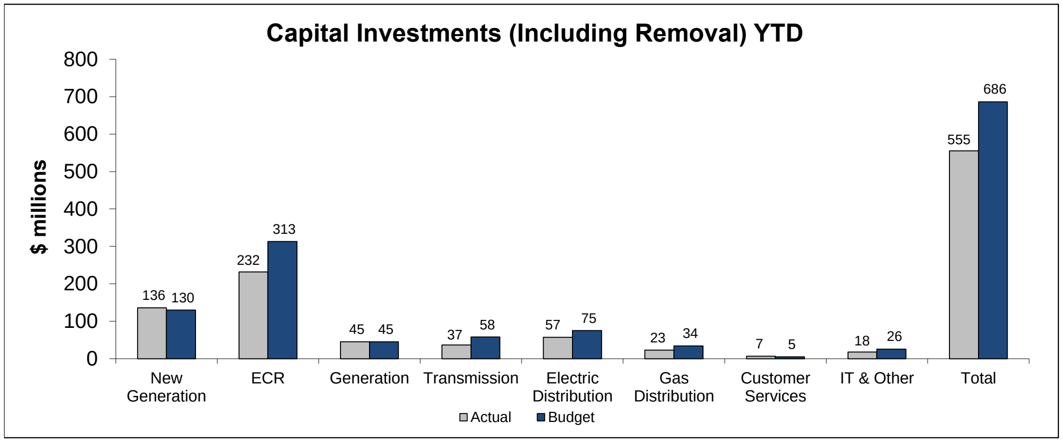
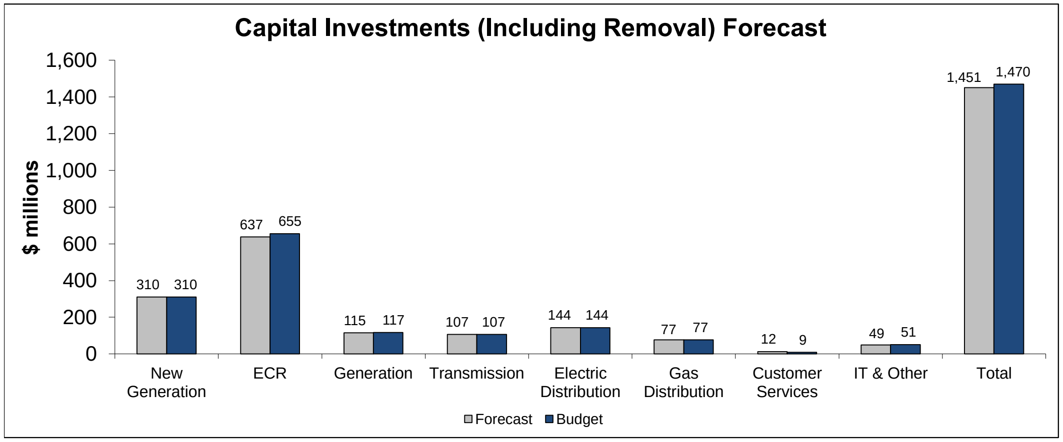
Balance Sheet June 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 23	$ 10	$ 14	See cash flow chart for details.
Accounts Receivable (Trade)	365	324	41	Due primarily to tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	251	230	20	Increase in fuel ($13m), gas ($3m) and materials and supplies ($4m).
Deferred Income Taxes	11	13	(3)	
Prepayments and other current assets	119	70	49	Primarily due to short-term derivative asset gain from forward hedges entered into in November 2012 with PPL as counterparty as a result of an increase in market interest rates ($57m).
Total Current Assets	768	647	121	
Property, Plant, and Equipment	8,701	8,832	(130)	See capital chart for details.
Intangible Assets	245	246	(1)	
Other Property and Investments	1	1	0	
Regulatory Assets	609	635	(27)	Due to interest rate swaps ($15m) and decrease in FAC ($12m).
Goodwill	997	997	-	
Other Long-term Assets	97	104	(8)	
Total Assets	**$ 11,418**	**$ 11,462**	**$ (44)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 302	$ 226	$ 76	Primarily differences in capex accrual and an increase in retainage fees and fuel volumes.
Accounts Payable - Affiliated Company	(0)	(0)	0	
Customer Deposits	49	48	1	
Derivative Liability	4	5	(1)	
Accrued Taxes	26	20	6	
Other Current Liabilities	125	110	15	Due primarily to timing of outstanding checks and cash funding ($16m).
Total Current Liabilities	507	409	98	
Debt - Affiliated Company	-	-	-	
Debt	4,400	4,494	(94)	Less short-term debt issued than budgeted ($141m) due to lower capital spend, offset by notes payable to PPL ($48m). See Financing Activities page for more details.
Total Debt	4,400	4,494	(94)	
Deferred Tax Liabilities	637	655	(18)	Timing of recording of deferred taxes in actuals vs. budget.
Investment Tax Credit	137	136	1	
Accumulated Provision for Pension and Related Benefits	266	269	(3)	
Asset Retirement Obligation	127	128	(1)	
Regulatory Liabilities	1,045	997	48	Primarily due to short-term derivative asset gain from forward hedges entered into in November 2012 with PPL as counterparty as a result of an increase in market interest rates ($57m).
Derivative Liability	39	54	(14)	Increase in interest rate swaps with non-related third parties due to an increase in market interest rates causing a decrease in the derivative liability.
Other Liabilities	240	239	0	
Total Deferred Credits and Other Liabilities	2,490	2,478	12	
Equity	4,021	4,081	(60)	
Total Liabilities and Equity	**$ 11,418**	**$ 11,462**	**$ (44)**	



Capital was $131m lower than budget due mainly to slower than expected mobilization for Mill Creek ($32m) and Ghent ($24) environmental air work. Differences on Ghent and Brown landfill projects ($15m) and other environmental projects ($9m) are expected to reverse by year end. Transmission underspend ($21m) was mainly due to delayed spending on Cane Run 7, New Albany transmission work and line rating projects; Distribution variances ($29m) were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects.



Capital is projected to be $19m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Cash Flow

June 2013

YTD	Actual	Budget	Variance	Comments
Net income	160	151	9	
Depreciation	179	175	4	
Deferred tax expense	95	110	-15	Differences in how annual estimates are spread in actuals vs. budget.

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable YTD to budget due to temperature and balance issues on Ghent U4 ID fan bearing; turbine bearing failure, air heater pluggage and start-up failure generator lockout on Trimble County U2; hydrogen seal leak and damaged bearing on Mill Creek U4; damaged boiler corner support hangers on Brown U3; air heater fouling on Ghent U3 & U4; winding shorts on generator rotor on Cane Run U4; and cooling tower distribution header failure on Ghent U4.
- Lower margins due primarily to $16 million of lower electric energy revenues driven by mild weather and $18 million of lower electric demand charge revenues, offset by $10 million favorable margins on other retail rate mechanisms and $2 million favorable gas margins.
- Capital was $26 million lower than budget in July due mainly to revised schedules for Mill Creek of $5 million and delay in Trimble County landfill to 2015 of $6 million. Timing of distribution capital spend driven partly by priority pipeline and gas riser replacements are not expected to cause full-year distribution variances.
- Capital was $157 million lower than budget YTD due mainly to slower than expected mobilization for Mill Creek of $37 million and Ghent environmental air work of $24 million. Spending delays on Ghent and Brown landfill projects of $14 million and other environmental projects of $6 million are expected to reverse by year end. Transmission underspend of $23 million was due mainly to delayed spending on Cane Run U7, New Albany transmission work and line rating projects; Distribution variances of $34 million were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects.
- Full year capital is projected to be $19 million lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Major Developments

- In Louisville and Lexington, July 2013 ranked as the 3rd and 5th coolest, respectively, in the past 20 years. The extremely mild summer weather has continued during the first half of August.
- Louisville millionaire and tea party favorite Matthew Bevin entered Kentucky's U.S. Senate race, setting up a Republican primary race with Minority Leader Mitch McConnell. The winner will face Democrat Alison Lundergan Grimes.
- The Kentucky Division for Air Quality released their audit findings of the Louisville Air Pollution Control District's ambient air particulate monitoring program. The audit findings were extensive including a statement that "the staff lacked an understanding of their responsibilities and the mathematics and scientific principles upon which air-monitoring programs are implemented." EPA will now review the audit report and determine whether to accept the air monitoring data. Since the Air District had hoped to use this data to demonstrate that the county was in attainment, the county status is now in question.

Significant Future Events

- LG&E and KU continue to evaluate responses received from their request for proposals for up to 700 MW of capacity beginning as early as 2015 as well as self-build alternatives. A decision on market opportunities versus self-build options is expected in Q3 and will be incorporated into the 2014-2018 business plan.

(1) Percentages represent a trailing twelve months.

(2) "Other" is typically comprised of the public authority customer class and KU's 12 full-requirements wholesale municipal customers.

(3) Excludes goodwill and other purchase accounting adjustments.

(4) Net of cost recovery mechanisms.

(5) The seven NERC Possible Violation Issues for YTD Actual are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

Note: Schedules may not sum due to rounding.

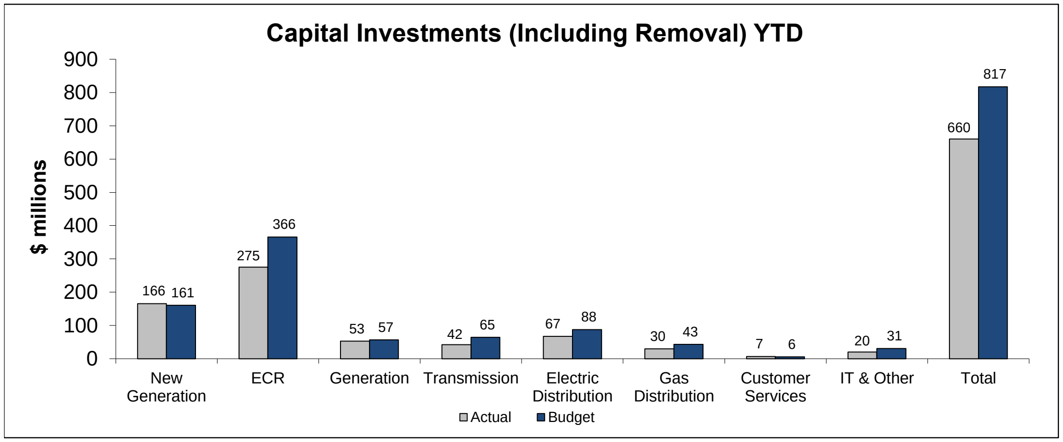
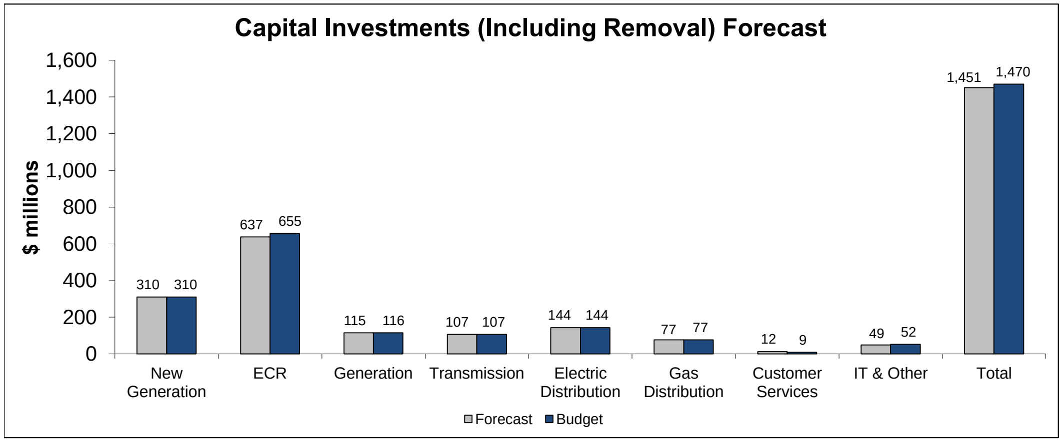
Balance Sheet July 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 15	$ 10	$ 5	
Accounts Receivable (Trade)	376	329	47	Due primarily to tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	251	237	14	Increase in fuel ($7m), gas ($2m) and materials and supplies ($4m).
Deferred Income Taxes	11	13	(3)	
Prepayments and other current assets	133	69	64	Primarily due to short-term derivative asset gain from forward hedges entered into in November 2012 with PPL as counterparty as a result of an increase in market interest rates ($71m).
Total Current Assets	786	658	128	
Property, Plant, and Equipment	8,778	8,935	(157)	See capital chart for details.
Intangible Assets	241	241	(1)	
Other Property and Investments	1	1	1	
Regulatory Assets	599	640	(40)	Primarily interest rate swaps ($17m) and decrease in FAC ($25m).
Goodwill	997	997	-	
Other Long-term Assets	97	104	(7)	
Total Assets	**$ 11,499**	**$ 11,575**	**$ (76)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 303	$ 231	$ 72	Primarily differences in capex accrual and an increase in retainage fees and fuel volumes.
Accounts Payable - Affiliated Company	(0)	(0)	0	
Customer Deposits	49	48	1	
Derivative Liability	4	5	(1)	
Accrued Taxes	48	35	13	
Other Current Liabilities	131	122	9	
Total Current Liabilities	535	442	93	
Debt - Affiliated Company	-	-	-	
Debt	4,400	4,525	(124)	Less short-term debt issued than budgeted ($171m) due to lower capital spend, offset by notes payable to PPL ($47m). See Financing Activities page for more details.
Total Debt	4,400	4,525	(124)	
Deferred Tax Liabilities	637	668	(30)	Timing of recording of deferred taxes in actuals vs. budget.
Investment Tax Credit	136	135	1	
Accumulated Provision for Pension and Related Benefits	266	270	(4)	
Asset Retirement Obligation	127	129	(2)	
Regulatory Liabilities	1,060	995	65	Primarily due to short-term derivative asset gain from forward hedges entered into in November 2012 with PPL as counterparty as a result of an increase in market interest rates ($71m).
Derivative Liability	37	54	(16)	Increase in interest rate swaps with non-related third parties due to an increase in market interest rates causing a decrease in the derivative liability.
Other Liabilities	243	237	6	
Total Deferred Credits and Other Liabilities	2,507	2,487	19	
Equity	4,057	4,121	(64)	
Total Liabilities and Equity	**$ 11,499**	**$ 11,575**	**$ (76)**	



Capital was $157m lower than budget due mainly to slower than expected mobilization for Mill Creek ($37m) and Ghent ($24) environmental air work. Spending delays on Ghent and Brown landfill projects ($14m) and other environmental projects ($6m) are expected to reverse by year end with the remaining ($10m) due to delay in the Trimble County landfill to 2015. Transmission underspend ($23m) was mainly due to delayed spending on Cane Run 7, New Albany transmission work and line rating projects; Distribution variances ($34m) were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects.



Capital is projected to be $19m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable to budget due primarily to Ghent Unit 4 cooling tower header failure, Trimble County Unit 2 low pressure turbine bearing failure and Cane Run Unit 4 generator rotor winding shorts.
- Lower margins in August due primarily to $9 million of lower energy revenues, as volumes were down 7% due to unseasonably mild temperatures, and $6 million of lower demand charge revenues, partially offset by favorable margins of $3 million on retail rate mechanisms.
- Lower margins YTD due primarily to $26 million of lower energy revenues, as volumes were down 3% due to mild weather, and $23 million of lower demand charge revenues, partially offset by favorable margins of $14 million on retail rate mechanisms.
- Capital was $23 million lower than budget in August due mainly to revised schedules for Mill Creek environmental work of $10 million and delay in Trimble County landfill to 2015 of $6 million. Timing of distribution capital spend driven partly by priority pipeline and gas riser replacements are not expected to cause full-year distribution variances.
- Capital was $180 million lower than budget YTD due mainly to slower than expected mobilization for Mill Creek of $47 million and Ghent environmental air work of $23 million. Spending delays on Brown landfill of $20 million and the delay of Trimble County landfill to 2015 due to permitting issues of $16 million are remaining environmental variances. Transmission underspend of $25 million was due mainly to delayed spending on Cane Run U7, New Albany transmission work and line rating projects; Distribution variances of $37 million were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects and are expected to reverse by year end.
- Full year capital is projected to be $19 million lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.
- Lower O&M in August due primarily to $3 million of lower outside services and $2 million of lower materials and other nonlabor costs.
- Lower O&M YTD due primarily to $8 million of labor savings, $7 million of lower outside services, $4 million of lower uncollectible accounts and $3 million of lower material costs.

Major Developments

- On September 6, 2013, LG&E and PPL received Notice of Intent to Sue for alleged violations of the federal Resource Conservation and Recovery Act and the Clean Air Act associated with LG&E's operation of the Cane Run generating facility. The suit itself is expected to be filed shortly before the end of the year. The notice does not indicate the court in which the action may be filed. We believe this private litigation may be a precursor to further civil litigation against the company from residents in and around the Cane Run site. LG&E is closing the Cane Run coal facility and landfill in mid-2015. LKE and PPL legal teams are jointly working to identify and hire legal counsel to assist in the defense of this suit and to prepare for potential additional litigation.
- LG&E and KU has received two awards for its safety and community initiatives.
  - o LG&E and KU won the National Highway Traffic Safety Administration 2013 Outstanding Service Award for its efforts to combat distracted driving.
  - o The Business First newspaper announced that LG&E and KU has earned a "Partners in Philanthropy Award" for being an outstanding corporate citizen. LG&E and KU achieved a third-place finish in the large-company category of firms with revenues higher than $50 million. This marks the second consecutive year LG&E and KU has received a strong ranking in the category, having finished fourth in last year's competition.

Significant Future Events

- LG&E and KU completed their evaluation of alternatives for generation capacity. LG&E and KU expect to make a filing with the Kentucky Public Service Commission in Q4 for a certificate of public convenience and necessity to build a new combined cycle gas unit for commercial operation in 2018.
- KU is proceeding with efforts to improve its returns on equity for its Old Dominion Power operations in Virginia and with the Kentucky municipal customers supplied under FERC-approved rates. KU is preparing rebuttal testimony and preparing for an October 1 hearing in the VA rate case and preparing to file a rate case at FERC during September.

(1) Percentages represent a trailing twelve months.

(2) "Other" is typically comprised of the public authority customer class and KU's 12 full-requirements wholesale municipal customers.

(3) Excludes goodwill and other purchase accounting adjustments.

(4) Net of cost recovery mechanisms.

(5) The nine NERC Possible Violation Issues for YTD Actual are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

Note: Schedules may not sum due to rounding.

Income Statement: Actual vs. Budget (YTD) August 2013

($ Millions)

	YTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 1,798	$ 1,868	$ (70)	Primarily lower electric energy volumes driven by unseasonably mild weather and economic conditions and lower electric demand charge revenues.
Gas Revenues	204	203	1	
Total Revenues	2,002	2,071	(69)	
Cost of Sales:				
Fuel Electric Costs	617	639	21	Decreased electric volumes and prices. Offset by unfavorable electric revenues above.
Gas Supply Expenses	101	101	0	
Purchased Power	39	45	6	
Other Electric Cost	66	75	9	Lower electric volumes and ECR costs.
Total Cost of Sales	823	859	36	
Gross Margin:				
Electric Margin	1,075	1,109	(34)	Primarily $26m of lower energy volumes (-3%) due to unseasonably mild weather, and $23m of lower demand charge revenues, partially offset by favorable margins of $14m on retail rate mechanisms.
Gas Margin	103	102	1	
Total Gross Margin	1,178	1,211	(33)	
Operating Expenses:				
O&M	455	479	24	Primarily $8m of labor savings, $7m of lower outside services, $4m of lower uncollectible accounts and $3m of lower material costs.
Depreciation & Amortization	218	224	6	
Taxes, Other than Income	32	32	0

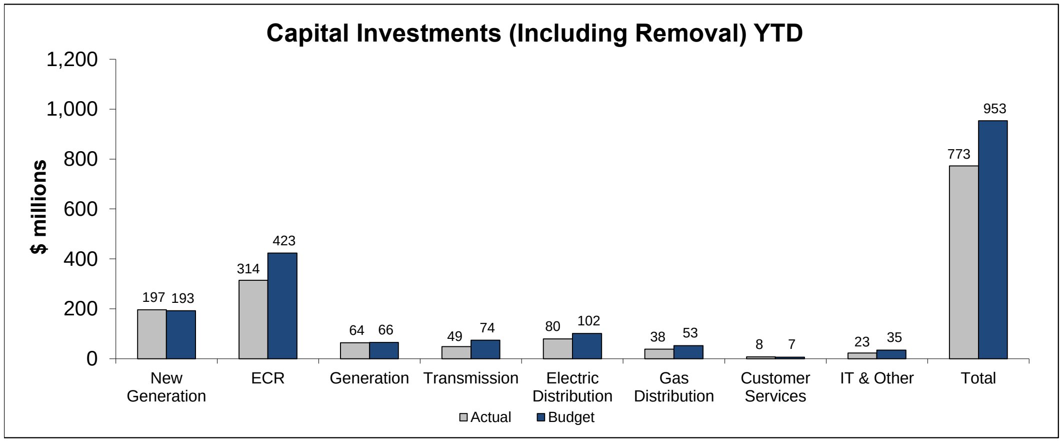
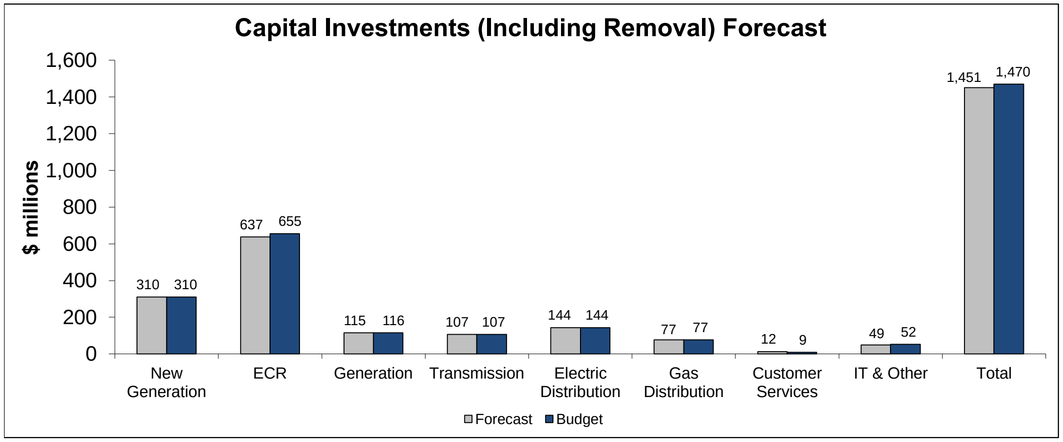
Balance Sheet August 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 13	$ 11	$ 3	
Accounts Receivable (Trade)	373	334	39	Due primarily to tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	259	243	16	Primarily an increase in fuel ($10m) and materials and supplies ($4m).
Deferred Income Taxes	8	13	(6)	
Prepayments and other current assets	136	67	69	Primarily due to short-term derivative asset gain from forward hedges entered into in November 2012 with PPL as counterparty as a result of an increase in market interest rates ($78m).
Total Current Assets	789	669	121	
Property, Plant, and Equipment	8,859	9,043	(184)	See capital chart for details.
Intangible Assets	236	237	(1)	
Other Property and Investments	1	1	1	
Regulatory Assets	594	638	(45)	Primarily interest rate swaps ($20m) and decrease in FAC ($31m).
Goodwill	997	997	-	
Other Long-term Assets	96	103	(8)	
Total Assets	**$ 11,572**	**$ 11,688**	**$ (116)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 338	$ 206	$ 132	Primarily differences in capex accrual and an increase in retainage fees and fuel volumes.
Accounts Payable - Affiliated Company	47	(0)	47	Dividends declared.
Customer Deposits	49	48	1	
Derivative Liability	4	5	(1)	
Accrued Taxes	66	50	16	Timing of tax payments and accruals in actuals vs. budget.
Other Current Liabilities	145	134	11	
Total Current Liabilities	649	443	206	
Debt - Affiliated Company	-	-	-	
Debt	4,355	4,585	(230)	Less short-term debt issued than budgeted ($274m) due to lower capital spend, partially offset by notes payable to PPL ($45m). See Financing Activities page for more details.
Total Debt	4,355	4,585	(230)	
Deferred Tax Liabilities	642	681	(39)	Timing of recording of deferred taxes in actuals vs. budget.
Investment Tax Credit	136	135	1	
Accumulated Provision for Pension and Related Benefits	266	271	(4)	
Asset Retirement Obligation	126	129	(3)	
Regulatory Liabilities	1,067	993	74	Primarily due to short-term derivative asset gain from forward hedges entered into in November 2012 with PPL as counterparty as a result of an increase in market interest rates ($78m).
Derivative Liability	35	54	(18)	Increase in interest rate swaps with non-related third parties due to an increase in market interest rates causing a decrease in the derivative liability.
Other Liabilities	247	237	10	
Total Deferred Credits and Other Liabilities	2,520	2,500	19	
Equity	4,048	4,160	(112)	
Total Liabilities and Equity	**$ 11,572**	**$ 11,688**	**$ (116)**	



Capital was $180 million lower than budget YTD due mainly to slower than expected mobilization for Mill Creek of $47 million and Ghent environmental air work of $23 million. Spending delays on Brown landfill of $20 million and the delay of Trimble County landfill to 2015 due to permitting issues of $16 million are remaining environmental variances. Transmission underspend of $25 million was due mainly to delayed spending on Cane Run U7, New Albany transmission work and line rating projects; Distribution variances of $37 million were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects and are expected to reverse by year end.



Capital is projected to be $19m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable to budget due primarily to Ghent Unit 4 cooling tower header failure, Trimble County Unit 2 low pressure turbine bearing failure and Cane Run Unit 4 generator rotor winding shorts.
- Lower margins in September due primarily to $6 million of lower energy revenues, as volumes were down 4% due to mild weather, and $5 million of lower demand charge revenues.
- Lower margins YTD due primarily to $32 million of lower energy revenues, as volumes were down 3% due to unseasonably mild temperatures, and $29 million of lower demand charge revenues, partially offset by favorable margins of $13 million on retail rate mechanisms.
- Capital was $193 million lower than budget YTD due mainly to slower than expected mobilization for Mill Creek of $55 million and Ghent environmental air work of $21 million. Spending delays on Brown landfill of $24m and the delay of Trimble County landfill to 2015 due to permitting issues of $21 million are remaining environmental variances. Transmission underspend of $25 million was due mainly to delayed spending on Cane Run U7, New Albany transmission work and line rating projects; Distribution variances of $37 million were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects and are expected to reverse by year end.
- Full year capital is projected to be $19 million lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.
- Lower O&M in September due primarily to $3 million of lower outside services and $7 million of lower materials and other non-labor costs.
- Lower O&M YTD due primarily to $9 million of labor savings, $11 million of lower outside services, $4 million of lower uncollectible accounts and $10 million of lower materials and other non-labor costs.

Major Developments

- On September 10 the combined LG&E/KU native load peaked at 6,434 MW, exceeding the previous peak for this summer of 6,409 MW that was set in July. This represents the first time that the summer peak was established in September.
- LG&E applied for, and received from the Louisville Metro Air Pollution Control District, a 6-month extension under the MATS regulations for completing the Cane Run Unit 7 project. The extension ties to LG&E's contract terms for final completion and acceptance testing of the new unit. LG&E previously received authorization for a one-year extension at Mill Creek.
- For the second consecutive year, LG&E and KU has been named as one of the top 10 utilities in economic development by Site Selection magazine. The selections were based on a number of criteria related to 2012 activity including new projects resulting in approximately 9,300 jobs and $1.7 billion in investment.
- KU is proceeding with efforts to improve its returns on equity (ROE) for its Old Dominion Power operations in Virginia and with the Kentucky municipal customers supplied under FERC-approved rates.
  - KU filed a Stipulation and Recommendation with the Virginia Staff agreeing to a $4.7 million revenue increase with new base rates going into effect on December 1, 2013 (one month earlier than requested).
  - KU filed a rate case with FERC to modify its wholesale power contracts and formula rates for its 12 municipal customers. KU testimony supports a 10.7 percent ROE and proposes a true-up component which effectively removes regulatory lag.

Significant Future Events

- LG&E and KU expects to make a filing with the Kentucky Public Service Commission in Q4 for a certificate of public convenience and necessity to build a new natural gas combined cycle (NGCC) unit for commercial operation in 2018. LG&E and KU also proposes to construct about a 10-megawatt solar facility at one of its existing generating stations. These projects do not materially impact LKE's 5-year capital plan; capital for the 2018 NGCC build was included in last year's business plan.

(1) Percentages represent a trailing twelve months.

(2) "Other" is typically comprised of the public authority customer class and KU's 12 full-requirements wholesale municipal customers.

(3) Excludes goodwill and other purchase accounting adjustments.

(4) Net of cost recovery mechanisms.

(5) The nine NERC Possible Violation Issues for YTD Actual are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

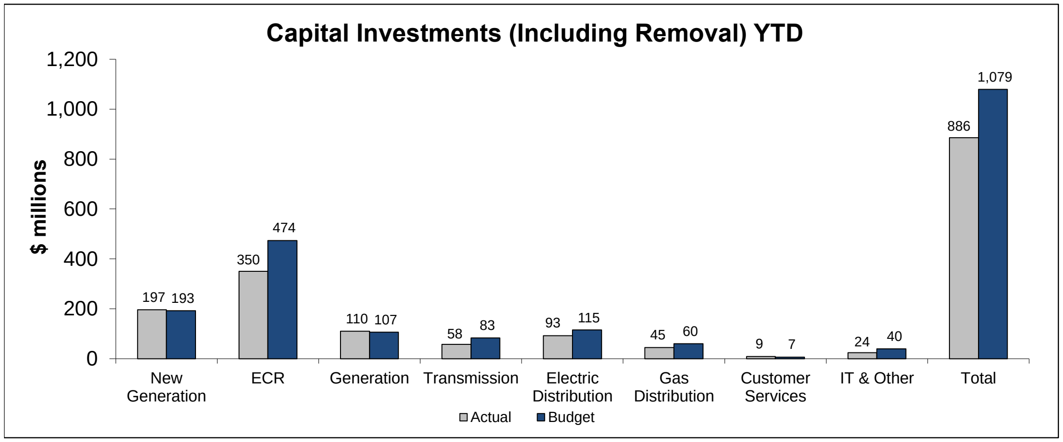
Balance Sheet September 2013

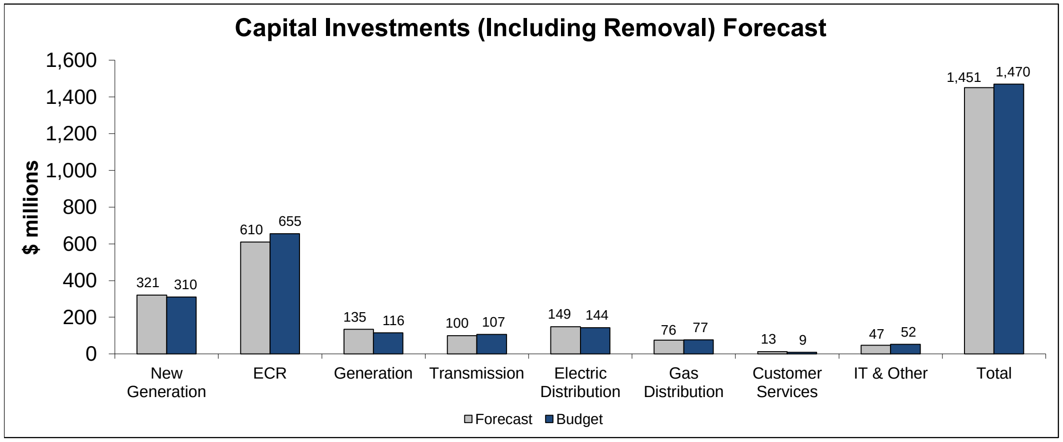
($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 21	$ 10	$ 11	See cash flow statement for details.
Accounts Receivable (Trade)	359	322	37	Due primarily to tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	275	254	21	Primarily an increase in fuel ($16m) and materials and supplies ($5m).
Deferred Income Taxes	20	13	6	
Prepayments and other current assets	43	65	(22)	Budget included $14m for forward hedging swaps entered into in Nov. 2012 compared to actuals of zero due to settlement in Sept.; also $5m for provision for bad debts above plan.
Total Current Assets	718	664	53	
Property, Plant, and Equipment	9,064	9,142	(78)	See capital chart for details.
Intangible Assets	232	233	(1)	
Other Property and Investments	1	1	1	
Regulatory Assets	595	627	(32)	Primarily interest rate swaps ($18m) and decrease in FAC ($16m).
Goodwill	997	997	-	
Other Long-term Assets	96	103	(7)	
Total Assets	**$ 11,702**	**$ 11,767**	**$ (65)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 314	$ 204	$ 110	Primarily differences in capex accrual and an increase in retainage fees and fuel volumes.
Accounts Payable - Affiliated Company	-	(0)	0	
Customer Deposits	49	48	1	
Derivative Liability	18	5	13	Primarily due to short-term derivative liability from forward hedges with PPL as counterparty ($14m).
Accrued Taxes	109	40	69	Timing of tax payments and accruals in actuals vs. budget.
Other Current Liabilities	156	147	10	Credit Cash Balance over plan ($4m); Accr Sal & Ben over plan ($3m)
Total Current Liabilities	646	443	203	
Debt - Affiliated Company	-	-	-	
Debt	4,339	4,593	(254)	Less short-term debt issued than budgeted ($281m) due to lower capital spend, partially offset by notes payable to PPL ($27m). See Financing Activities page for more details.
Total Debt	4,339	4,593	(254)	
Deferred Tax Liabilities	651	684	(32)	Timing of recording of deferred taxes in actuals vs. budget.
Investment Tax Credit	136	134	1	
Accumulated Provision for Pension and Related Benefits	267	272	(5)	
Asset Retirement Obligation	245	130	115	ARO unplanned revaluation.
Regulatory Liabilities	1,056	990	66	Primarily due to short-term derivative asset gain from forward hedges entered into in Nov. 2012 and settled in Sept. 2013 with PPL as counterparty ($84m); partially offset by loss from hedges entered into in Sept. 2013 with PPL as counterparty ($14m).
Derivative Liability	37	54	(17)	Forward hedges with PPL as counterpary entered into in Sept. 2013.
Other Liabilities	249	238	11	Long-term project engineering retention fee balances over Plan.
Total Deferred Credits and Other Liabilities	2,641	2,501	140	
Equity	4,075	4,229	(154)	
Total Liabilities and Equity	**$ 11,702**	**$ 11,767**	**$ (65)**	



Capital Investments (Including Removal) YTD

Capital was $193m lower than budget YTD due mainly to slower than expected mobilization for Mill Creek of $55m and Ghent environmental air work of $21m. Spending delays on Brown landfill of $24m and the delay of Trimble County landfill to 2015 due to permitting issues of $21m are remaining environmental variances. Transmission underspend of $25m was due mainly to delayed spending on Cane Run U7, New Albany transmission work and line rating projects; Distribution variances of $37m were driven by timing of circuit hardening, major substation projects, main replacement and gas riser projects and are expected to reverse by year end.



Capital Investments (Including Removal) Forecast

Capital is projected to be $19m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Cash Flow

September 2013

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable to budget due primarily to Mill Creek Unit 3 Turbine crossover expansion joint failure, Ghent Unit 4 cooling tower header failure, Trimble County Unit 2 low pressure turbine bearing failure and Cane Run Unit 4 generator rotor winding shorts.
- Lower margins YTD due primarily to $33 million of lower energy revenues, as volumes were down 3% due to unseasonably mild temperatures, and $29 million of lower demand charge revenues, partially offset by favorable margins of $21 million on retail rate mechanisms, off-system sales and gas.
- Capital was $176m lower than budget YTD due mainly to timing delays to be largely made up in November and December – see Full Year Forecast below.
- Full year capital is projected to be $19 million lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.
- Lower O&M YTD due primarily to $12 million of labor savings, $6 million of lower outside services, $4 million of lower uncollectible accounts and $13 million of lower materials and other nonlabor costs.

Major Developments

- Based on the federal government shutdown and consistent with LKE's vision to empower economic vitality and quality of life, LKE announced that it will match $2 for every $1 (extending beyond the previous $1 for $1 match) donated by residential customers to its heating assistance programs.
- Cane Run Unit 7 achieved a significant milestone as the combustion turbines and generators have been delivered to the site. The Heat Recovery Steam Generator drums and tube bundle sections have also begun to arrive by barge delivery in Louisville, staged near the plant site.
- LKE announced a financing agreement with local banks to fund $75 million in working capital needs. The agreement also supports regional economic development throughout the LG&E and KU service territories as it capitalizes on substantial local bank deposits and offers investment-grade lending opportunities to bank participants.
- LG&E and KU filed a prospectus in November each selling $250 million of 4.650 percent first mortgage bonds due November 15, 2043. The bonds have a spread to benchmark Treasury of 90 basis points, the lowest 30 year utility spread seen since April, and were offered at a price of 99.280 percent. LG&E and KU had hedged the underlying treasury rate risk earlier which will reduce the effective rate by about 58 bps.

Significant Future Events

- LKE expects to make a filing with the Kentucky Public Service Commission in Q4 for a CPCN to build a new NGCC unit at the Green River site for commercial operation in 2018. The filing also proposes to construct about a 10-megawatt solar facility at its Brown generating station.
- In addition, LG&E is expected to file in Q4 a new permit for the Trimble County landfill. In May, the Kentucky Division of Waste Management notified LG&E of its intent to deny the permit application. The new permit application will represent the next lowest cost alternate location which is also on existing plant property.

(1) Percentages represent a trailing twelve months.

(2) Excludes goodwill and other purchase accounting adjustments.

(3) Net of cost recovery mechanisms.

(4) The nine NERC Possible Violation Issues for YTD Actual are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

Note: Schedules may not sum due to rounding.

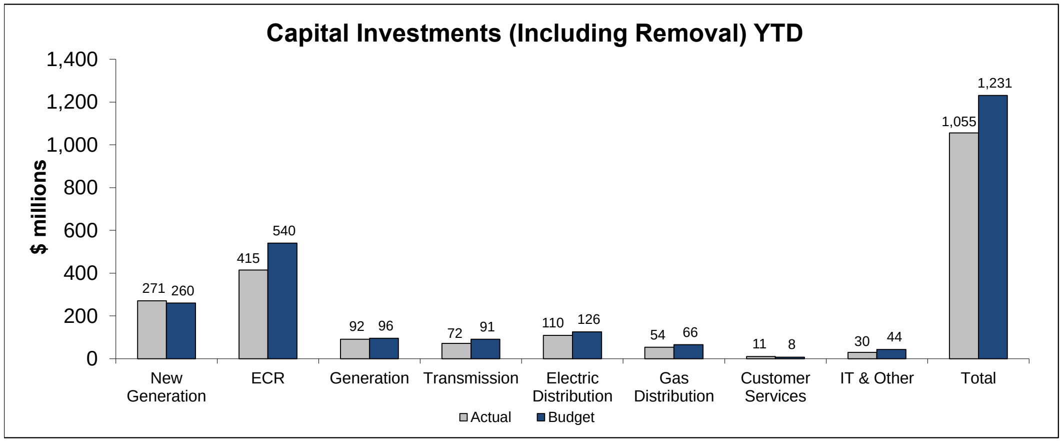
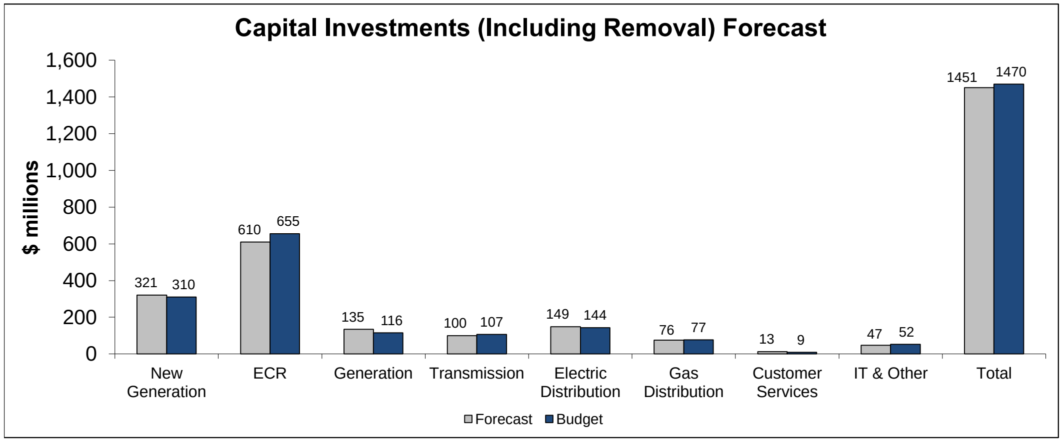
Balance Sheet October 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 31	$ 10	$ 21	Primarily forward starting swaps settlement and issuance of revolver debt.
Accounts Receivable (Trade)	321	302	20	Due primarily to tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	291	270	21	Primarily an increase in fuel ($17m) and materials and supplies ($4m).
Deferred Income Taxes	20	13	6	
Prepayments and other current assets	40	64	(24)	Budget included $14m for forward hedging swaps entered into in Nov. 2012 compared to actuals of zero due to settlement in Sept.; also $5m for provision for bad debts above plan.
Total Current Assets	702	658	44	
Property, Plant, and Equipment	9,200	9,266	(67)	See capital chart for details.
Intangible Assets	229	229	1	
Other Property and Investments	1	1	1	
Regulatory Assets	594	620	(26)	Primarily interest rate swaps ($17m) and decrease in FAC ($17m).
Goodwill	997	997	-	
Other Long-term Assets	96	102	(6)	
Total Assets	**$ 11,820**	**$ 11,873**	**$ (53)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 366	$ 206	$ 160	Primarily differences in capex accrual and an increase in retainage fees and fuel volumes.
Accounts Payable - Affiliated Company	-	(0)	0	
Customer Deposits	49	48	1	
Derivative Liability	25	5	20	Primarily due to short-term derivative liability from forward hedges with PPL as counterparty ($14m).
Accrued Taxes	108	38	71	Timing of tax payments and accruals in actuals vs. budget.
Other Current Liabilities	175	154	21	Credit Cash Balance over plan ($15m); Accr Sal & Ben over plan ($6m)
Total Current Liabilities	723	451	272	
Debt - Affiliated Company	-	-	-	
Debt	4,367	4,674	(307)	Less short-term debt issued than budgeted ($282m) due to lower capital spend and notes payable to PPL ($25m). See Financing Activities page for more details.
Total Debt	4,367	4,674	(307)	
Deferred Tax Liabilities	652	690	(38)	Timing of recording of deferred taxes in actuals vs. budget.
Investment Tax Credit	135	134	1	
Accumulated Provision for Pension and Related Benefits	267	273	(6)	
Asset Retirement Obligation	246	131	115	ARO unplanned revaluation.
Regulatory Liabilities	1,043	987	56	Primarily due to short-term derivative asset gain from forward hedges entered into in Nov. 2012 and settled in Sept. 2013 with PPL as counterparty partially offset by loss from hedges entered into in Sept. 2013 with PPL as counterparty ($64m); offset by an increase in cost of removal ($8m).
Derivative Liability	38	54	(16)	Forward hedges with PPL as counterpary entered into in Sept. 2013.
Other Liabilities	254	236	19	Primarily long-term project engineering retention fee balances over Plan.
Total Deferred Credits and Other Liabilities	2,635	2,503	132	
Equity	4,094	4,245	(150)	
Total Liabilities and Equity	**$ 11,820**	**$ 11,873**	**$ (53)**	



Capital was $176m lower than budget YTD due mainly to timing delays to be largely made up in November and December – see Full Year Forecast below.



Capital is projected to be $19m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable to budget due primarily to Mill Creek Unit 4 first reheater leaks, Mill Creek Unit 3 Turbine crossover expansion joint failure, Ghent Unit 4 cooling tower header failure, Trimble County Unit 2 low pressure turbine bearing failure and Cane Run Unit 4 generator rotor winding shorts. However, the units have run effectively when most needed as evidenced by the favorable YTD variance in Commercial Availability.
- Higher margins MTD on electric and gas due to volume increases resulting from colder than normal weather.
- Lower electric margins YTD due primarily to shortfalls of $59 million in electric energy and demand charge revenues, attributable to a mild summer, weak economic conditions (particularly the mining sector), as well as peak demand reductions and other changes in customer usage patterns. These shortfalls were partially offset by $23 million of incremental recovery on FAC (Fuel Adjustment Clause) and DSM (Demand Side Management) retail rate mechanisms.
- Lower O&M MTD primarily due to $3 million of lower outside services and $4 million of lower materials and other nonlabor costs.
- Lower O&M YTD primarily due to $13 million of labor savings, $9 million of lower outside services, $4 million of lower uncollectible accounts, $6 million of lower materials and $10 million of lower other nonlabor costs.
- Capital was $138m lower than budget YTD due mainly to timing delays to be largely made up in December – see Full Year Forecast below.
- Full year capital is projected to be $19 million lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Major Developments

- The Virginia Corporation Commission issued an order approving Old Dominion's settlement with no exceptions and an ROE range of 9.5% to 10.5% for annual information filings and earnings analysis. New rates, generating annual incremental revenues of $4.7 million, became effective December 1, 2013 consistent with the settlement.
- Nearly all the major construction contracts have been awarded with KU recently executing the engineering, procurement and construction ("EPC") contract with AMEC for the construction of the fabric filter on Brown Unit 3. EPC bids for Trimble County 1 are under evaluation and expected to be signed in January 2014.

Significant Future Events

- LG&E is expected to file a new permit for the Trimble County landfill in December after the Kentucky Division of Waste Management notified LG&E in May of its intent to deny the permit application. The new permit application will represent the next lowest cost alternate location which is also on existing plant property.
- LKE expects to make a filing with the Kentucky Public Service Commission at the end of December for a certificate for public convenience and necessity to build a new natural gas combined-cycle unit at the Green River site for commercial operation in 2018. The filing also proposes to construct about a 10-megawatt solar facility at its Brown generating station.

---

(1) Excludes goodwill and other purchase accounting adjustments.

(2) Net of cost recovery mechanisms.

(3) The 11 NERC Possible Violation Issues for YTD Actual are expected to be resolved through NERC's Find, Fix and Track ("FFT") process without financial penalty.

Note: Schedules may not sum due to rounding.

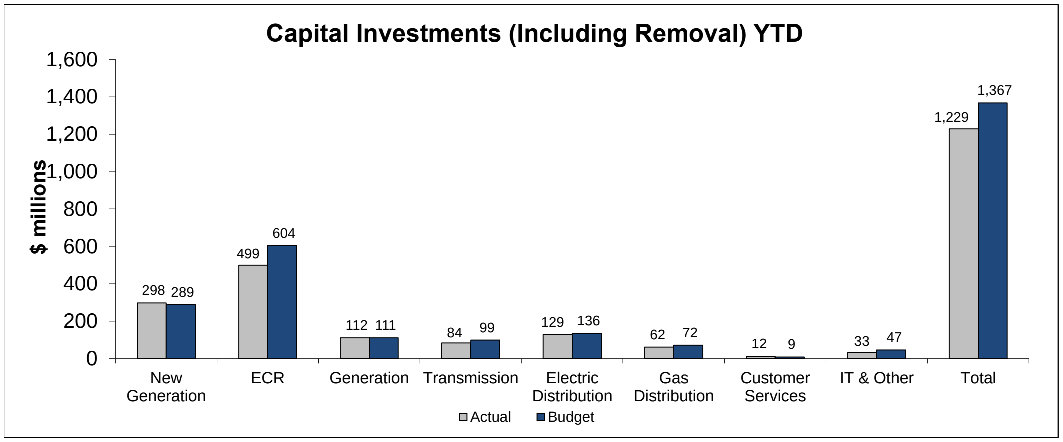
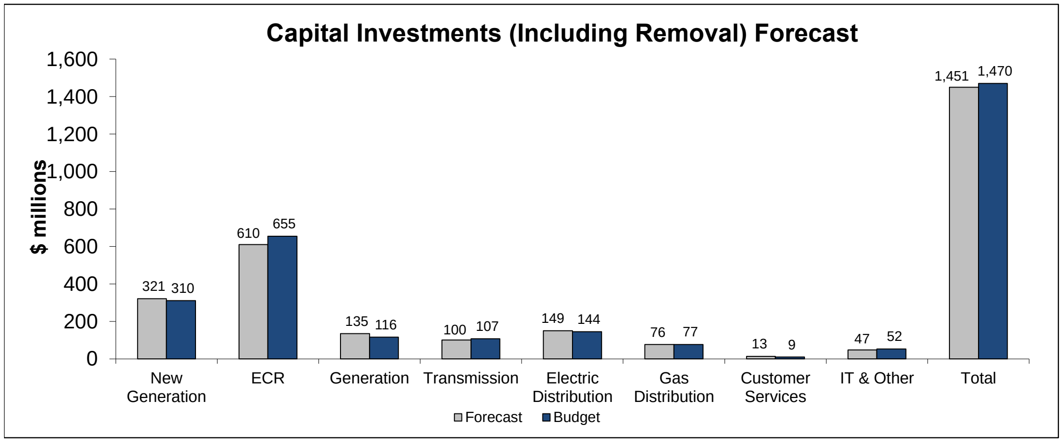
Balance Sheet November 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 153	$ 10	$ 143	Primarily lower capex payments, lower dividends than budgeted, forward starting swaps settlement and issuance of revolver debt.
Accounts Receivable (Trade)	358	310	48	Due primarily to tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	295	273	23	Primarily an increase in fuel ($20m) and materials and supplies ($3m).
Deferred Income Taxes	20	13	6	
Prepayments and other current assets	39	62	(23)	Budget included ($14m) for forward hedging swaps entered into in Nov. 2012 compared to actuals of zero due to settlement in Sept.; ($6m) for provision for bad debts above plan; and ($2m) AR to PPL in plan but no actuals.
Total Current Assets	865	668	197	
Property, Plant, and Equipment	9,343	9,373	(30)	See capital chart for details.
Intangible Assets	225	224	1	
Other Property and Investments	1	1	1	
Regulatory Assets	588	614	(26)	Primarily interest rate swaps ($19m) and decrease in FAC ($10m).
Goodwill	997	997	-	
Other Long-term Assets	99	102	(3)	
Total Assets	**$ 12,118**	**$ 11,979**	**$ 139**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 409	$ 174	$ 235	Primarily differences in capex accrual and an increase in retainage fees and fuel volumes.
Accounts Payable - Affiliated Company	138	(0)	138	Dividend payable to PPL.
Customer Deposits	50	48	1	
Derivative Liability	4	5	(1)	
Accrued Taxes	120	39	81	Timing of tax payments and accruals in actuals vs. budget.
Other Current Liabilities	125	116	9	
Total Current Liabilities	845	383	462	
Debt - Affiliated Company	-	-	-	
Debt	4,647	4,822	(175)	Less long-term debt issued in November then budgeted ($54m); short-term debt less then plan ($96m) due to lower capital spend and notes payable to PPL ($25m). See Financing Activities page for more details.
Total Debt	4,647	4,822	(175)	
Deferred Tax Liabilities	652	697	(45)	Timing of recording of deferred taxes in actuals vs. budget.
Investment Tax Credit	135	134	1	
Accumulated Provision for Pension and Related Benefits	268	274	(6)	
Asset Retirement Obligation	247	131	115	ARO unplanned revaluation.
Regulatory Liabilities	1,046	985	61	Primarily due to short-term derivative asset gain from forward hedges entered into in Nov. 2012 and settled in Sept. 2013 with PPL as counterparty partially offset by loss from hedges entered into in Sept. 2013 with PPL as counterparty ($71m); offset by an increase in cost of removal ($8m).
Derivative Liability	36	54	(18)	Forward hedges with PPL as counterpary entered into in Sept. 2013.
Other Liabilities	258	236	22	Primarily long-term project engineering retention fee balances over Plan.
Total Deferred Credits and Other Liabilities	2,641	2,510	131	
Equity	3,984	4,263	(279)	
Total Liabilities and Equity	**$ 12,118**	**$ 11,979**	**$ 139**	



Capital was $138m lower than budget YTD due mainly to timing delays to be largely made up in December – see Full Year Forecast below.



Capital is projected to be $19m lower than budget due mainly to the portion of Trimble landfill delay not offset by other spend variances.

Total			0.01%	

Variance Explanations

- The generation fleet's EAF and EFOR are unfavorable to budget due primarily to Mill Creek Unit 4 first reheater leaks and max steam flow issues, Mill Creek Unit 3 Turbine crossover expansion joint failure, Ghent Unit 4 cooling tower header failure, Trimble County Unit 2 low pressure turbine bearing failure and Cane Run Unit 4 generator rotor winding shorts. However, the units have run effectively when most needed as evidenced by the favorable YTD variance in Commercial Availability.

- Lower YTD margins due primarily to a shortfall of $58 million in electric energy revenues and demand charge revenues due to a mild summer, weak economic conditions (particularly the mining sector), as well as peak demand reductions and other changes in customer usage patterns. These shortfalls were partially offset by $15 million of net incremental recovery on rate mechanisms (FAC, DSM and ECR) and a combined $7 million of favorable margins from customer charges, gas deliveries and electric off system sales.

- Lower YTD O&M primarily due to $14 million of labor savings, $11 million of lower outside services, $7 million of lower materials, $5 million of lower uncollectible accounts, and $4 million of lower other nonlabor costs.

- Capital was $129m higher than budget MTD due primarily to increased spending on air compliance projects of $27 million, Ghent landfill of $27 million, Cane Run Unit 7 of $20 million and other timing variances from prior months that reversed in December.

- Capital was $11m lower than budget YTD due primarily to the portion of Trimble landfill delay not being offset by other spend variances.

Major Developments

- LKE continued advancement of its construction program in December as it executed an engineering, procurement and construction contract for the coal combustion residual transport system at its Brown facility. The Company also filed a new permit application for the landfill at Trimble County and a notice to file for its certificate of public convenience and necessity for its second combined cycle gas plant, Green River 5, and a proposed solar facility at Brown. For 2013, LKE prudently deployed $1.46 billion of capital, 40 percent more than any year in Company history, with a large portion of the investments earning real-time returns through ECR and other rate mechanisms.

- As a result of the recent “polar vortex”, LKE faced some of its coldest temperatures on record, leading to record-breaking energy usage across its service territories in the first part of January. The Company’s electric and gas systems performed well and successfully managed the increased energy demand while setting the following records: LG&E electric winter peak and natural gas 24-hour usage, KU all-time electric peak and all-time daily energy usage, and combined LG&E and KU electric winter peak and all-time daily energy usage. This solid start to 2014 follows a strong Q4 2013 where improved margins and continued cost management allowed LKE to beat earnings’ expectations.

- The Company will remain at the center of key energy and environmental policy debates as Kentucky lawmakers recently returned to Frankfort to begin the 2014 legislative session. In 2013, not only was there no significant state legislation that passed which adversely impacted LKE during 2013, but Company officials also provided testimony which was so compelling state representatives withdrew a bill which would have precluded the timely recovery of costs associated with natural gas used for electric generation.

Significant Future Events

- The Trimble County Fabric Filter EPC contract is currently under evaluation and is expected to be awarded in February.

---

(1) Excludes goodwill and other purchase accounting adjustments.

(2) Net of cost recovery mechanisms.

(3) The 11 NERC Possible Violation Issues for YTD Actual are minor and likely to be resolved through NERC’s Find, Fix and Track (“FFT”) process without financial penalty.

Balance Sheet December 2013

($ Millions)

	YTD	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 35	$ 10	$ 25	See Cash Flow Statement explanations.
Accounts Receivable (Trade)	410	328	82	Due primarily to tariff rate variance in receivable logic and extended due date granted in rate case.
Inventory	278	260	19	Primarily an increase in fuel ($13m) and materials and supplies ($4m).
Deferred Income Taxes	159	13	146	Due to the reclassification of deferred taxes from non-current to current for expected 2014 use of our net operating loss carry forwards.
Prepayments and other current assets	108	60	47	Unbudgeted notes received from assoc company $70m offset by budget including ($14m) for forward hedging swaps entered into in Nov. 2012 compared to actuals of zero due to settlement in Sept., ($4m) for provision for bad debts above plan, and ($2m) AR to PPL in plan but no actuals.
Total Current Assets	990	671	319	
Property, Plant, and Equipment	9,544	9,449	95	Primarily due to ARO unplanned revaluation ($113m). AROs were revalued primarily due to updates in the estimated cash flows for ash ponds and CCR surface impoundments based on updated cost estimates. This was partially offset by CapEx YTD variance ($11m) (see capital chart for details).
Intangible Assets	221	220	0	
Other Property and Investments	1	1	1	
Regulatory Assets	502	612	(110)	Primarily Pension and Postretirement due to increases in the discount rate ($77m) and interest rate swaps ($23m).
Goodwill	997	997	-	
Other Long-term Assets	96	102	(5)	
Total Assets	**$ 12,350**	**$ 12,051**	**$ 299**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 349	$ 181	$ 168	Primarily differences in CapEx accrual ($22m) and an increase in retainage fees ($22m) and fuel volumes ($35m).
Accounts Payable - Affiliated Company	(0)	(0)	0	
Customer Deposits	50	48	1	
Derivative Liability	4	5	(1)	
Accrued Taxes	39	26	13	Timing of tax payments and accruals in actuals vs. budget.
Other Current Liabilities	136	128	8	
Total Current Liabilities	578	389	189	
Debt - Affiliated Company	-	-	-	
Debt	4,810	4,802	7	
Total Debt	4,810	4,802	7	
Deferred Tax Liabilities	965	727	238	See Deferred Income Taxes explanation above. Remaining difference due to an increase to current year NOL utilization ($153m). This was partially offset by a decrease in bonus depreciation ($63m).
Investment Tax Credit	135	133	1	
Accumulated Provision for Pension and Related Benefits	152	274	(122)	Due to an increase in the discount rate.
Asset Retirement Obligation	245	132	113	ARO unplanned revaluation due to updates in the estimated cash flows for ash ponds and CCR surface impoundments based on updated cost estimates.
Regulatory Liabilities	1,047	983	64	Primarily due to short-term derivative asset gain from forward hedges entered into in Nov. 2012 and settled in Sept. 2013 with PPL as counterparty partially offset by loss from hedges entered into in Sept. 2013 with PPL as counterparty ($70m); offset by an increase in cost of removal ($15m).
Derivative Liability	32	54	(21)	Forward hedges with PPL as counterparty entered into in Sept. 2013.
Other Liabilities	238	231	7	
Total Deferred Credits and Other Liabilities	2,814	2,533	281	
Equity	4,149	4,328	(178)

Variance Explanations

- Generation volumes and GWh sales were impacted by cold weather in January. Generation volumes were also impacted by excellent plant availability.

- Higher electric margins were primarily due to $19 million from retail volumes impacted by weather and $4 million from excess generation sold at market prices.

Major Developments

- LKE demonstrated another solid safety performance in 2013, earning multiple safety and wellness awards. LG&E and KU's recordable rate for the year of 1.29 falls below last year's rate of 1.35 and the National Safety Council utility average of 3.10. Contractor metrics for the year were also strong with a recordable rate of 1.26 compared to 1.39 in 2012.

- The month of January brought the "polar vortex" and several days of colder than normal temperatures, snow and ice accumulation to our Kentucky service territories. LG&E and KU's electric and gas systems performed extremely well during this period. Commercial availability for the generation fleet was 99%, with no outages during the coldest days of the month. In addition to shattering numerous peak and usage records, the following statistics were also established for the LG&E and KU service territories during January 2014:
    - Third highest electricity delivery month in LG&E and KU's history, just behind August 2007 and August 2010
    - Seven days in January 2014 are included in the top 10 all-time electricity delivery days
    - Combined load exceeded the 6,000 MW level for 99 hours, whereas the 6,000 MW level had not been reached since February 2011

Major Developments (CONT'D)

- Moody's recently upgraded several ratings for LG&E and KU. Each company's issuer and senior unsecured ratings were upgraded to A3 from Baa1 and their senior secured ratings were upgraded to A1 from A2.

Significant Future Events

- The Trimble Country Fabric Filter Engineering, Procurement and Construction contract is currently under evaluation and is expected to be awarded during the first quarter.

---

(1) Excludes goodwill and other purchase accounting adjustments.

(2) Net of cost recovery mechanisms.

Income Statement: Actual vs. Budget and Forecast (Month/Year) January 2014

($ Millions)

Variance Explanations

- Current month and YTD generation volumes and GWh sales were impacted by cold weather. Generation volumes were also impacted by excellent plant availability.

- Current month margins were higher, driven by favorable weather and system availability, including $6 million from retail electric and $2 million from excess generation sold at market prices. This was partially offset by $3 million from lower gas margins due to a weather normalization adjustment related to unseasonably cold weather.

- Year to date higher margins driven by favorable weather and system availability, including $24 million from retail electric, $6 million from excess generation sold at market prices and $1 million from natural gas volumes.

- Current month capital expenditures were $20 million lower, due primarily to milestone shifts on Ghent environmental air projects.

- YTD capital expenditures were $35 million lower, due primarily to timing of spending on Cane Run U7 (weather related) and milestone shifts on Ghent environmental air projects.

- O&M full year forecast $7 million higher, due primarily to weather related expenses, partially offset by lower labor related costs.

Major Developments

- Following LKE's record-setting energy use in January, the month of February was highlighted by the return of a mini "polar vortex" along with severe weather, including strong winds and ice and snow events. LKE's systems maintained excellent safety performance in meeting the challenges of the severe weather and high demand. New February peak load demand records for KU and the combined system were established at 4,456 MWs and 6,290 MWs. During these difficult conditions, LKE allocated $200,000 to community action groups and non-profit organizations within its service territories, and through its mutual assistance programs released hundreds of personnel to assist with winter restoration efforts in Pennsylvania, South Carolina and Virginia.

- LKE recently marked a significant milestone in its efforts to comply with environmental regulations as it signed its remaining large Engineering, Procurement and Construction (EPC) contract for the 2011 ECR Plan air compliance projects. The Trimble County U1 baghouse EPC contract was executed with AMEC, the company which also serves as the EPC contractor on the Brown U3 baghouse project.

Significant Future Events

- LKE's capital plan remains on schedule for the full year, with heavy construction at Brown, Cane Run, Ghent and Mill Creek. LKE is also seeking permits at various plants. LKE filed the revised landfill permit application for Trimble County in January and will file the associated Division of Water and Corp of Engineer permits in the coming weeks. LKE expects to receive the landfill permit for Brown during the summer. Regarding new generation, LKE will file the air construction permit application for the Green River Natural Gas Combustion Cycle (NGCC) with the Division of Air Quality in March, and will file the Site Assessment Reports to support the CPCN for the Green River NGCC and the Brown Solar Facility with the KPSC in April.

[1] Excludes goodwill and other purchase accounting adjustments.

[2] Net of cost recovery mechanisms.

Variance Explanations

- YTD generation volumes and GWh sales were impacted by cold weather. Generation volumes were also impacted by excellent plant availability.

- YTD higher margins driven by favorable weather and system availability, including $26 million from retail electric sales, $7 million from off-system sales and $4 million from other margin components.

- YTD Capital expenditures were $47m lower than budget YTD due primarily to timing of spending on Cane Run Unit 7 and milestone shifts on Ghent environmental air projects, partially offset by higher than budgeted spending on Mill Creek environmental air projects due to delays in 2013.

- O&M full year forecast $7 million higher, due primarily to the impacts of the cold winter (bad debt expense, storms expense and plant maintenance), partially offset by lower pension and post-retirement benefit expenses.

Major Developments

- 2014 has been marked by historically cold weather and increased electricity consumption. The month of March maintained this winter-long trend with colder than normal temperatures and the establishment of a new March peak load of 4,092 MWs for the KU system.

- By letter dated March 17, 2014, the Sierra Club notified LG&E of its intent to sue LG&E using the citizen suit provisions under the Clean Water Act ("Notice"). In its Notice, the Sierra Club alleges that LG&E's Pollutant Discharge Elimination System Permit ("Permit") only allows "an occasional discharge" directly into the Ohio River from Outfall 002. The Sierra Club further alleges that LG&E has discharged from Outfall 002 directly into the Ohio River "on an almost daily basis." In response to the notice and consistent with LG&E's position, Bruce Scott, the Commissioner of the Kentucky Department for Environmental Protection, has publicly stated that LG&E's Permit does not contain a restriction on the frequency of discharge from Outfall 002 into the Ohio River and that LG&E is in compliance with its Permit. Notwithstanding the regulatory assurances that we are in compliance, we do expect the Sierra Club to initiate the lawsuit as a part of its nationwide campaign against fossil fuels.

Significant Future Events

- LKE's capital plan remains on schedule in 2014 with heavy construction at Brown, Cane Run, Ghent, and Mill Creek. LKE is also seeking permits at various plants. LKE filed the revised landfill permit application for Trimble County in January and will file the associated Division of Water and Corp of Engineer permits in the coming weeks. The landfill permit for Brown is expected during the summer. Regarding the Green River NGCC and the Brown Solar Facility, LKE is currently reviewing the Site Assessment Reports which will be filed with the KPSC in April. A formal hearing on the matter is scheduled to take place July 8 – July 10.

Variance Explanations

- MTD EFOR below budget due to first reheater pluggage at Cane Run 4 and a lost feed from the switchyard at Cane Run 6. MTD EAF was affected by Cane Run 6 scrubber repairs and a boiler ashpit cleaning.

- YTD generation volumes and GWh sales were impacted by cold weather. Generation volumes were also impacted by excellent plant availability.

- YTD higher margins driven by unusually cold weather and system availability, including $21 million from retail electric energy and demand charge revenues, $8 million from excess generation sold at market prices and $6 million from higher gas margins, higher transmission revenue and other retail mechanisms.

- MTD capital was $13 million higher than budget MTD due primarily to spending on Mill Creek environmental air projects due to delays in 2013.

- YTD capital was $34 million lower than budget due primarily to timing of spending on Cane Run Unit 7 and milestone shifts on Ghent environmental air projects, partially offset by higher than budgeted spending on Mill Creek environmental air projects due to delays in 2013.

- YTD higher O&M primarily due to $7 million of higher storm expenses and $2 million higher uncollectible accounts, partially offset by $3 million of labor savings.

- O&M full year forecast $7 million higher, due primarily to the impacts of the cold winter (bad debt expense, storms expense and plant maintenance), partially offset by labor savings.

Major Developments

- The KPSC issued an Order granting LG&E and KU's motion to hold the Green River 5 CPCN proceeding in abeyance for up to 90 days. LG&E and KU are currently assessing the potential impact of recent events on its future capacity needs, including the receipt of five-year termination notices from certain KU municipal wholesale customers totaling approximately 300 megawatts. LG&E and KU continue to meet with the respective municipals.

- LG&E and KU filed its Integrated Resource Plan which is required by the KPSC every three years. Key findings presented in the filing include: using DSM programs to reduce peak demand by 500 MWs by the end of 2018, the retirements of three coal-fired plants (Cane Run, Green River, and Tyrone), and the continuation of a 16 percent target reserve margin.

Significant Future Events

- The KPSC cancelled a July 8 hearing associated with the Green River 5 CPCN and scheduled an informal conference for August 7.

---

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.

Variance Explanations

- YTD generation volumes and GWh sales were impacted by favorable weather. Generation volumes were also impacted by excellent plant availability.
- MTD higher margins mostly driven by warmer weather, including $5 million from retail electric energy and demand charge revenues.
- YTD higher margins driven by favorable weather and system availability, including $26 million from retail electric energy and demand charge revenues, $9 million from excess generation sold at market prices and $8 million from higher gas margins, higher transmission revenue and other retail mechanisms.
- YTD capital was $36m lower than budget YTD due primarily to timing of spending on Cane Run Unit 7, the Ohio Falls rehabilitation project, circuit hardening and gas service risers, as well as milestone shifts on Ghent environmental air projects; partially offset by higher than budgeted spending on Mill Creek environmental air projects due to delays in 2013.
- MTD lower O&M due to $4 million of labor and benefit savings.
- YTD higher O&M primarily due to $8 million of higher storm expenses and $2 million of higher uncollectible accounts, partially offset by $7 million of labor and benefit savings.
- O&M full year forecast $7 million higher, due primarily to the impacts of the cold winter (bad debt expense, storms expense and plant maintenance), partially offset by labor savings.

Major Developments

- LKE was recently honored with multiple awards from external organizations covering a variety of disciplines. LKE's health and safety initiatives continue to flourish as LKE earned the Louisville Mayor's Healthy Hometown Award and five safety awards including two prestigious Kentucky Governor's Safety and Health Awards for Project Engineering and E.W. Brown. In addition to LKE's health and safety achievements, LKE has also been recognized for its efforts in support of employee commitment, supplier diversity and information technology. LKE's Strategic Business Integration program was one of two utilities worldwide who received an "Excellence in Practice" citation from the Association for Talent Development. LKE also garnered the 2014 EEI Supplier Diversity Excellence Award for working with 140 diverse businesses in 2013 with a total spend of approximately $133 million. Lastly, LKE was named a recipient of the 2014 CIO 100 by CIO magazine, for the deployment of a one-of-a-kind iPad application allowing the Aerial Patrol group to capture transmission data easily without having to manually download data into a computer.
- KU achieved a major milestone as the first fabric filter constructed at Ghent on Unit 3 was successfully placed in service and operating at full load.
- As previously referenced in the March report, the Sierra Club, along with the nonprofit environmental law organization Earthjustice, pursued its intent to sue LG&E and formally filed a federal lawsuit alleging violation of the Clean Water Act at LG&E's Mill Creek plant.
- Metro Council passed a natural gas franchise ordinance authorizing Louisville Metro Government to bid a gas franchise agreement for sixteen months and with a franchise fee of 2 percent of gross receipts. The 2 percent franchise fee will generate $3.8 million and will be utilized to improve public safety. The franchise fees represent pass-through charges and are shown as a separate line item on the bill including the name of the city assessing the charge.

Significant Future Events

- An informal conference related to the Green River 5 CPCN is scheduled for August 7.

---

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.

Variance Explanations

- YTD generation volumes and GWh sales were impacted by favorable weather. Generation volumes were also impacted by favorable plant availability.

- MTD and YTD capital spend lower due primarily to timing of spending on Cane Run Unit 7 and other projects.

- Full year higher capital due primarily to increased costs related to Ghent environmental air projects (Units 3 and 4 economizer work) and Mill Creek environmental air projects (Units 1, 2 and 4 fabric filters and wet flue gas desulfurization units) with some non-environmental spend offsets due to cost reductions.

- YTD higher margins driven principally by retail electric energy and demand revenues supported by favorable weather as well as $8 million from excess generation driven by favorable plant availability and higher market prices and $6 million from lower margin expenses driven by lower ammonia and limestone costs.

- MTD lower O&M primarily due to $3 million of labor and benefit savings and $1 million due to timing of maintenance.

Major Developments

- LKE reached an extraordinary safety accomplishment on June 30, as it completed 30 straight days with zero injuries. The feat demonstrates LKE's commitment to excellent safety performance during the current execution of the largest construction program in our history.

- LKE continues to gain industry recognition as it was recently honored for new customer service and communication initiatives. IVR Doctors and Market Strategies International acknowledged LKE's interactive voice response (IVR) system as the best among combined utilities with the "Gold Stethoscope" award. LKE has added new options to the IVR, allowing customers to automatically enroll in energy efficiency programs and apply for rebates. LKE also earned 14 awards in various categories in the 2014 Better Communications Competition held during the Utility Communicators International conference. LKE surpassed its own record and all other utilities for the most awards and received the prestigious "Communicator of the Year" Award. LKE highlighted its Energy Education initiative which assists the public in better understanding its actions concerning various industry topics.

- The nine terminating municipal customers rejected KU's last settlement position and stated that they would not be rescinding their termination notice. KU is continuing its evaluation of the decision on its future resource plans, including the Green River 5 CPCN.

Significant Future Events

- An informal conference related to the Green River 5 CPCN is scheduled for August 12.

---

(1) Excludes goodwill and other purchase accounting adjustments.

(2) Net of cost recovery mechanisms.

Cash Flow

June 2014

YTD	Actual	Budget	Variance	Comments
Net Income	180	149	31	Mostly due to higher electric and gas volumes resulting from favorable weather. See income statement for more details.
Depreciation	185	179	6	
Deferred Income Taxes	149	149	0	
Other Balance Sheet Movements	(41)	(19)	(22)	See balance sheet.
Funds From Operations	**473**	**459**	**14**	
Changes in accounts receivables	13	(9)	21	Lower unbilled utility revenue offset by higher customer accounts receivable.
Changes in inventories	43	38	5	
Change in Accounts Payable	(13)	(22)	10	Higher accounts payable due to higher than expected gas purchases due to colder than normal weather.
Change in Working Capital	**43**	**7**	**36**	
Operating Cash flow	**516**	**466**	**50**	
Capex	(556)	(603)	47	Lower due primarily to timing of spending on Cane Run Unit 7, the Ohio Falls rehabilitation project, circuit hardening and gas service risers, as well as milestone shifts on Ghent environmental air projects; partially offset by higher than budgeted spending on Mill Creek environmental air projects due to delays in 2013.
Other Investing	55	0	55	LKE cash from tax settlements with PPL.
Loans to Affiliates	0	0	0	
Investing Cash flow	**(501)**	**(603)**	**102**	
Dividends	(221)	(151)	(70)	Higher due to liquidity of LKE cash related to PPL tax settlements.
Equity Infusion	119	135	(16)	Budgeted KU and LGE capital distribution but only made distribution to KU in March.

Reconciliation of Allowed Return to

6/30/14 Trailing Twelve Months Regulatory Return and

Book ROE from Ongoing Operations

Allowed Return [1]		10.32%	
Adjustments (net of tax):			
Change in capitalization - non ECR	-1.26%		Growth in non-ECR capitalization (rate base) between rate cases does not earn a return
Change in ROE from average mechanism rate base gr	0.00%		Mechanisms have a real-time return
Change in weighted cost of debt	-0.18%		Additional borrowings offset by favorable rates
Change in margins	2.22%		Primarily new rates since last rate cases
Change in allowed expenses	-0.75%		Inflationary increases
		0.02%	
Actual Regulated ROE		10.34%	
Adjustments (net of tax):			
Impact of non-recoverable purchase accounting	-1.94%		
Impact of 'below the line' items not recoverable through rates	-0.09%		
		-2.03%	
Actual Book ROE from Ongoing Operations		8.31%	

[1] Based on the most recent base rate filings with test years ending 3/31/12 KPSC, 12/31/12 FERC, 12/31/12 VA.

Variance Explanations

- MTD generation volumes and GWh sales were impacted by unseasonably cool weather.

- YTD GWh sales were impacted by favorable weather earlier in the year.

- YTD capital spend lower due primarily to timing of spending on Cane Run Unit 7 and other projects.

- Full year higher capital due primarily to increased costs related to Ghent environmental air projects (Units 3 and 4 economizer work) and Mill Creek environmental air projects (Units 1, 2 and 4 fabric filters and wet flue gas desulfurization units) with some non-environmental spend offsets due to cost reductions.

- MTD lower margins driven by unseasonably mild weather resulting in $15 million lower retail electric energy and demand charge revenues which were partially offset by $1 million from favorable cost of production expenses.

- YTD higher margins due to $14 million higher retail electric energy and demand revenues resulting from favorable weather earlier this year, $8 million from the sale of excess generation driven by favorable plant availability and higher market prices, $5 million from lower cost of production margin expenses and $3 million from lower purchase power demand costs.

Major Developments

- LKE announced it will withdraw its proposal to build a new natural gas combined-cycle generating unit at Green River, however, will continue with plans to build a 10 megawatt solar generation facility at E.W. Brown. The decision is based upon revised estimates of future capacity timing requirements for LG&E and KU following the election by certain of KU's municipal customers to terminate their wholesale power contracts in 2019. The $700 million Green River 5 project was included in the 2014 Business Plan.

- In a significant development for LKE and PPL, U.S. District Court Judge Joseph McKinley eliminated several of the plaintiffs' claims in the Cane Run lawsuit. The court case was not completely dismissed, however, the judge rejected all but one of the statutory citizen suit claims by the group of neighbors, while still allowing the state-law tort case against LKE. LKE will continue to defend this matter vigorously.

- LKE marked another milestone in its efforts to comply with environmental regulations as the Kentucky Division of Waste Management issued a permit for construction of the Brown landfill. Charah, the selected contractor, has mobilized on-site and construction activities are underway as planned.

- LKE hosted a ceremony recognizing the construction of Kentucky's first megawatt scale carbon capture slipstream pilot plant to be installed at Brown Station. In collaboration with the University of Kentucky Center for Applied Energy Research, the $19.5 million project is expected to be completed later this year and testing will conclude in 2016.

- Both Louisville and Lexington have been impacted by mild weather, and July 2014 ranked as the 2nd and 4th coolest, respectively, in the past 20 years.

Significant Future Events

- Heavy construction is proceeding at Mill Creek, Ghent, Brown and Cane Run. All projects are expected to be in service by target completion dates. Mill Creek Unit 4 work is on schedule for the tie-in outage set for the fourth quarter of this year and engineering activities are underway for the Trimble County 1 fabric filter.

---

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.
(3) The possible violation issues for YTD Actual are believed to be minimal risk and are expected to receive a zero dollar penalty from the regulator.

Variance Explanations

- Current month generation volumes and GWh sales were impacted by unseasonably cool weather.

- YTD capital spend lower due primarily to timing of spending on Cane Run Unit 7 and other projects.

- Full year higher capital due primarily to increased costs related to Ghent environmental air projects (Units 3 and 4 economizer work) and Mill Creek environmental air projects (Units 1, 2 and 4 fabric filters and wet flue gas desulfurization units) with some non-environmental spend offsets due to cost reductions.

- Current month lower margins driven by unseasonably mild weather resulting in $11 million lower retail electric energy and demand charge revenues which were partially offset by $2 million from favorable cost of production expenses and $2 million from higher retail rate mechanism revenue.

- YTD higher margins due to $3 million higher retail electric energy and demand revenues, $8 million from the sale of excess generation driven by favorable plant availability and higher market prices, $5 million from lower cost of production margin expenses, $4 million from lower purchase power demand costs, and $3 million from higher gas margins and other revenues.

- Current month lower O&M primarily due to $4 million of labor and benefit savings and $1 million of materials expense savings.

- YTD lower O&M primarily due to $15 million of labor and benefit savings and $2 million lower material and other expenses partially offset by $7 million of higher storms expenses and $3 million higher uncollectible accounts.

Major Developments

- In order to meet planned reserve margins beginning in 2015 and extending through 2019, LKE executed a Tolling Agreement for Unit 3 at the Bluegrass Generation Station in Oldham County, KY. The agreement contains 165MWs of additional capacity from May 1, 2015 through April 30, 2019. This contract was assumed in the 2014 Business Plan.

- For the third consecutive year, LKE has been named one of the top 10 utilities in economic development by Site Selection magazine. The winners were chosen based on multiple criteria related to 2013 activity. LKE's efforts helped companies create 10,303 jobs and invest $2.6 billion in facility location or expansion projects.

- An Informal Conference was held with the KPSC and the Interveners regarding the Brown Solar CPCN case. Although nothing was finalized from the meeting, all parties are agreeable to consider a settlement.

- The DSM hearing concluded with all parties agreeing to file simultaneous briefs on September 30. This proceeding included LKE plans to expand and enhance five DSM programs for 2015 -2018, and offer up to 10,000 customers a smart meter on a voluntary basis.

Significant Future Events

- Heavy construction is proceeding at Mill Creek, Ghent, Brown, Cane Run and Trimble County. All projects are expected to be in service by target completion dates. Mill Creek Unit 4 and Ghent 4 tie-in outages are scheduled to occur during the fourth quarter of this year.

---

(1) Excludes goodwill and other purchase accounting adjustments.

(2) Net of cost recovery mechanisms.

(3) The possible violation issues for YTD Actual are believed to be minimal risk and are expected to receive a zero dollar penalty from the regulator.

Income Statement: Actual vs. Budget (YTD) August 2014

($ Millions)

	YTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 1,937	$ 1,909	$ 28	Due to higher electricity volumes resulting from favorable weather earlier this year.
Gas Revenues	$ 244	208	37	Due to higher gas volumes resulting from favorable weather earlier this year.
Total Revenues	$ 2,181	2,116	65	
Cost of Sales:				
Fuel Electric Costs	681	652	(29)	Due to higher electricity volumes resulting from favorable weather earlier this year.
Gas Supply Expenses	140	104	(36)	Due to higher gas volumes resulting from favorable weather earlier this year.
Purchased Power	37	47	11	Due to lower purchases than planned.
Other Electric Cost	70	83	13	Due primarily to lower plant system consumables costs.
Total Cost of Sales	928	887	(41)	
Gross Margin:				
Electric Margin	1,149	1,127	22	Higher margins driven by favorable weather and system availability earlier this year.
Gas Margin	104	103	1	
Total Gross Margin	1,253	1,230	23	
Operating Expenses:				
O&M	476	483	7	Due to primarily to labor and benefit savings and lower material and other expenses partially offset by higher storms expenses and uncollectible accounts.
Depreciation & Amortization	227	229	2	
Taxes, Other than Income	34	34	0	
Total Operating Expenses	737	746	9	
Other income	(5)	(5)	0

NERC Possible Violations[3]	0	0	5	9	N/A	11

Variance Explanations

- Current month capital was $34 million higher than budget due primarily to increased costs on environmental air projects at Mill Creek, timing of spend on environmental air projects at Trimble County and Ghent and timing of spend on Cane Run Unit 7.

- Full year higher capital due primarily to increased costs related to Ghent environmental air projects (Units 3 and 4 economizer work) and Mill Creek environmental air projects (Units 1, 2 and 4 fabric filters and wet flue gas desulfurization units) with some non-environmental spend offsets due to cost reductions.

- Current month lower margins driven by mild weather resulting in $11 million lower retail electric energy and demand charge revenues.

- YTD higher margins due to $8 million from the sale of excess generation driven by favorable plant availability and higher market prices during Q1, $7 million from lower cost of production margin expenses, and $5 million from lower purchase power demand costs partially offset by $9 million lower retail electric energy and demand revenues.

- Current month lower O&M primarily due to $4 million of labor and benefit savings, $4 million savings due to maintenance and outage timing shifts, and $1 million of materials expense savings, partially offset by $2 million higher uncollectible accounts.

- YTD lower O&M primarily due to $20 million of labor and benefit savings and $3 million lower material and other expenses partially offset by $7 million of higher storms expenses and $4 million higher uncollectible accounts.

Major Developments

- LKE reached two more construction milestones as Mill Creek Unit 4 recently began its twelve-week tie-in outage for the new FGD and baghouse; and the 8.2 mile 20” natural gas pipeline constructed to serve Cane Run 7 was charged to full pressure and placed into service.

- LKE and interveners (including Sierra Club and Kentucky Industrial Utility Customers) submitted a Joint Motion for Consideration and Approval of an Agreement, Stipulation, and Recommendation supporting the issuance of a CPCN for the construction of the 10 MW Solar Facility at the Brown Generating Station. The KPSC also issued an Order scheduling a hearing for November 24, 2014.

- LKE and all parties in the DSM/EE proceeding filed Post-Hearing Briefs. This proceeding included plans to expand and enhance five DSM programs for 2015 -2018, and offer up to 10,000 customers a smart meter on a voluntary basis. LKE requested an Order by mid-November.

Significant Future Events

- Rate case preparations are underway in anticipation of a November filing with the KPSC.

- Heavy construction is proceeding at Mill Creek, Ghent, Brown, Cane Run and Trimble County. All projects are expected to be in service by target completion dates. The Ghent Unit 4 tie-in outage for its new baghouse will begin in October and is scheduled to be finished by the end of the year.

---

[1] Excludes goodwill and other purchase accounting adjustments.

[2] Net of cost recovery mechanisms.

[3] The possible violation issues for YTD Actual are believed to be minimal risk and are expected to receive a zero dollar penalty from the regulator.

Balance Sheet September 2014

($ Millions)

	9/30/2014	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 47	$ 9	$ 38	Higher investment balances of $33m due to timing of CP due dates.
Accounts Receivable (Trade)	355	410	(55)	Lower unbilled utility revenue ($49m) and lower customer accounts receivable ($4m).
Inventory	274	262	12	Higher fuel related costs of $10m.
Deferred Income Taxes	69	159	(90)	Deferred Income Taxes reclassified from asset to liability Deferred Tax Liabilities.
Prepayments and other current assets	69	113	(44)	Lower notes receivable from affiliate ($70m) partially offset by higher intercompany income tax receivable $28m.
Total Current Assets	815	954	(139)	
Property, Plant, and Equipment	10,219	10,201	18	Higher completed construction $269m and accumulated depreciation $22m partially offset by lower CWIP ($275m).
Intangible Assets	185	186	(0)	
Other Property and Investments	1	1	0	
Regulatory Assets	506	480	26	Increases in ARO $16m, GSC $15m, and long term interest rate swap $11m LGE partially offset by decreases in FAC ($8m), DSM ($8m), and ECR ($5m)
Goodwill	997	997	-	
Other Long-term Assets	104	93	11	Higher due to $6m increase in value of forward starting swaps and $5m from the CPCN being put on hold for GR5 and funds being moved to preliminary survey account.
Total Assets	**$ 12,827**	**$ 12,912**	**$ (85)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 430	$ 344	$ 87	Increases in project engineering $39m, increase in and timing of coal receipts $16m, and $9m due to timing of payables.
Accounts Payable - Affiliated Company	0	0	0	
Customer Deposits	51	50	1	
Derivative Liability	4	4	1	
Accrued Taxes	44	68	(25)	Lower pre-tax income.
Other Current Liabilities	171	165	6	
Total Current Liabilities	701	631	70	
Debt - Affiliated Company	22	-	22	Short term note payable made to PPL.
Debt (1)	4,914	4,940	(26)	Lower issuance of Commercial Paper ($26m) due to lower pension and CapEx payments.
Total Debt	4,937	4,940	(4)	
Deferred Tax Liabilities	1,131	1,193	(62)	Deferred Tax Liabilities reclassified from liability to asset as Deferred Income Taxes.
Investment Tax Credit	132	132	(0)	
Accum Provision for Pension & Related Benefits	116	122	(6)	
Asset Retirement Obligation	275	250	26	KU Green River Ash and Environmental Pond Revaluation $27m.
Regulatory Liabilities	1,021	1,015	6	
Derivative Liability	43	32	11	Increase due to loss on long term interest rate swaps.
Other Liabilities	243	233	11	Accrued retiree medical post employee benefits $8m which are not budgeted for in the Other Liabilities account. In December the balance is moved to the liability account where it is budgeted for.
Total Deferred Credits and Other Liabilities	2,960	2,976	(16)	
Equity	4,230	4,364	(135)	
Total Liabilities and Equity	**$ 12,827**	**$ 12,912**	**$ (85)**	

(1) Includes all ST and LT debt. See Financing Activities page for details.

Note: Schedules may not sum due to rounding.

YTD	Actual	Budget	Variance	Comments
Net Income	270	251	19	Mostly due to higher electric and gas volumes resulting from favorable weather earlier in the year. See income statement for more details.
Depreciation	279	271	8	
Deferred Income Taxes	251	224	27	Differences in how annual estimates are spread in actuals vs. budget.
Other Balance Sheet Movements	(92)	51	(142)	See balance sheet.
Funds From Operations	**709**	**797**	**(88)**	
Changes in accounts receivables	54	(0)	55	Lower unbilled utility revenue offset by higher customer accounts receivable.
Changes in inventories	4	14	(10)	Higher fuel related costs.
Change in Accounts Payable	81	(9)	90	Increases in project engineering, in and timing of coal receipts, and due to timing of payables.
Change in Working Capital	**140**	**5**	**135**	
Operating Cash flow	**848**	**801**	**47**	
Capex	(843)	(921)	77	Lower due to milestone shifts on Ghent environmental air projects partially offset by higher than budgeted spending on Mill Creek environmental air projects and timing of spend on Cane Run Unit 7.
Other Investing	73	0	73	LKE cash from tax settlements with PPL.

KU and LG&E Combined

Reconciliation of Allowed Return to

9/30/14 Trailing Twelve Months Regulatory Return and

Book ROE from Ongoing Operations

Allowed Return [1]		10.32%	
Adjustments (net of tax):			
Change in capitalization - non ECR	-1.46%		Growth in non-ECR capitalization (rate base) between rate cases does not earn a return
Change in ROE from average mechanism rate base gr	0.00%		Mechanisms have a real-time return
Change in weighted cost of debt	-0.25%		Additional borrowings offset by favorable rates
Change in margins	2.20%		Primarily new rates since last rate cases
Change in allowed expenses	-0.97%		Inflationary increases
		-0.48%	
Actual Regulated ROE		9.84%	
Adjustments (net of tax):			
Impact of non-recoverable purchase accounting	-1.82%		
Impact of 'below the line' items not recoverable through rates	-0.09%		
		-1.90%	
Actual Book ROE from Ongoing Operations		7.94%	

[1] Based on the most recent base rate filings with test years ending 3/31/12 KPSC, 12/31/12 FERC, 12/31/12 VA.

NERC Possible Violations[(3)]	2	0	7	9	N/A	11

Variance Explanations

- Current month generation volumes higher than budget due to excellent plant performance and availability.

- Current month capital was $18 million higher than budget due primarily to increased costs on environmental air projects at Mill Creek and timing of spend on environmental air projects at Trimble County and Ghent, partially offset by timing of spend on Cane Run Unit 7.

- Full year higher capital due primarily to increased costs related to Ghent environmental air projects (Units 3 and 4 economizer work) and Mill Creek environmental air projects (Units 1, 2 and 4 fabric filters and wet flue gas desulfurization units) with some non-environmental spend offsets.

- YTD higher margins due to $9 million from the sale of excess generation driven by favorable plant availability and higher market prices during Q1, $7 million from lower cost of production margin expenses, $5 million from lower purchase power demand costs, and $2 million from higher retail rate mechanism revenue partially offset by $12 million lower retail electric energy and demand revenues.

- Current month lower O&M primarily due to $3 million from labor savings, $2 million from pension and medical cost savings, $2 million from avoided plant shutdown costs and $3 million from generation outages and maintenance savings due to timing and scope changes.

- YTD lower O&M primarily due to $16 million from pension and medical cost savings, $11 million from labor savings and $9 million from plant outage and other operating costs, partially offset by $7 million of higher storm restoration expenses and $5 million higher uncollectible accounts.

Major Developments

- On October 22, LG&E and KU filed “Notices of Intent” with the KPSC, indicating that the Company plans to file a request for base rate increases on November 26. A press release on the proposed rate case was issued on November 4 and required newspaper notices were provided to the Kentucky Press Association on November 5. The Company intends to seek increases in annual base rates of $30 million (2.7%) for LG&E Electric, $14 million (4.2%) for LG&E Gas, and $153 million (9.6%) for KU. The filings are based on a forecasted test year of July 1, 2015 through June 30, 2016, and a 10.5 percent ROE. If approved by the KPSC, new rates will be effective July 1, 2015.

- KU and the nine departing municipal customers recently participated in a settlement conference. The parties agreed that all remaining issues are conceptually resolved, although two open points remain related to credit provisions and the value of a generation source owned by one of the municipal customers. The agreed terms include a 10.25 percent ROE and is otherwise consistent with Plan expectations.

- LG&E and the IBEW ratified a three-year labor agreement through November 2017 containing 2.5 percent wage increases for each year. The agreement is consistent with Plan and bargaining authorization while providing additional flexibility within the workforce. The agreement covers approximately 700 employees.

- Another construction milestone was achieved as the Ghent Unit 4 tie-in outage for its new baghouse began in October.

Significant Future Events

- Heavy construction is proceeding at Mill Creek, Ghent, Brown, Cane Run and Trimble County; and all projects are expected to be in-service by target completion dates. The Ghent Unit 4 and Mill Creek Unit 4 tie-in outages are scheduled to be completed in mid-December. The construction of Cane Run 7 is approximately 90 percent complete, with first firing of gas for the unit expected during January of next year.

- A hearing in the CPCN proceeding for the Brown Solar facility is scheduled for November 24, 2014.

---

(1) Excludes goodwill and other purchase accounting adjustments.

(2) Net of cost recovery mechanisms.

(3) The possible violation issues for YTD Actual are believed to be minimal risk. One of those has been processed for a zero dollar penalty from the regulator. Though described by SERC as minimal risk, four of those have been included in a $30,000 package settlement proposed by SERC that includes possible violations from 2013. The two most recent possible violations are not included in this settlement proposal.

Balance Sheet October 2014

($ Millions)

	10/31/2014	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 21	$ 9	$ 12	Higher investment balances of $13m due to timing of CP due dates.
Accounts Receivable (Trade)	323	391	(68)	Lower unbilled utility revenue ($57m) and lower customer accounts receivable ($10m).
Inventory	298	280	17	Higher fuel related costs of $17m.
Deferred Income Taxes	69	159	(90)	Deferred Income Taxes reclassified from asset to liability Deferred Tax Liabilities.
Regulatory Assets Current	28	29	(1)	
Prepayments and other current assets	62	112	(50)	Lower notes receivable from affiliate ($70m) partially offset by higher intercompany income tax receivable $19m.
Total Current Assets	801	980	(179)	
Property, Plant, and Equipment	10,317	10,283	34	Higher completed construction $334m partially offset by lower CWIP ($268m) and accumulated depreciation $34m .
Intangible Assets	182	182	(0)	
Other Property and Investments	1	1	0	
Regulatory Assets Non Current	494	449	46	Increases in ARO $18m and long term interest rate swap $25m.
Goodwill	997	997	-	
Other Long-term Assets	104	92	12	Higher due to $5m increase in value of forward starting swaps and $5m from the CPCN being put on hold for GR5 and funds being moved to preliminary survey account.
Total Assets	**$ 12,896**	**$ 12,984**	**$ (88)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 389	$ 348	$ 42	Increases in project engineering accruals $9m, in and timing of coal receipts $24m, and in gas purchase accruals $2m and $3m due to timing of payables.
Accounts Payable - Affiliated Company	0	0	0	
Customer Deposits	51	50	1	
Derivative Liability	5	4	1	
Accrued Taxes	49	61	(12)	Lower pre-tax income.
Regulatory Liabilities Current	17	14	3	
Other Current Liabilities	192	175	18	Mostly due to $19m in payments on the last business day of the month out the A/P account which didn't have time to be funded from the Funding Account, creating negative cash in the A/P account and a liability in the credit cash adjustment account.
Total Current Liabilities	703	651	53	
Debt - Affiliated Company	30	6	25	Short term note payable made to PPL.
Debt (1)	4,956	4,996	(40)	Lower issuance of Commercial Paper ($40m) due to lower pension and CapEx payments.
Total Debt	4,986	5,001	(15)	
Deferred Tax Liabilities	1,131	1,193	(62)	Deferred Tax Liabilities reclassified from liability to asset as Deferred Income Taxes.
Investment Tax Credit	131	131	(0)	
Accum Provision for Pension & Related Benefits	116	123	(7)	
Asset Retirement Obligation	276	250	26	KU Green River Ash and Environmental Pond Revaluation $27m.
Regulatory Liabilities Non Current	1,002	994	8	
Derivative Liability	56	32	24	Increase due to loss on long term interest rate swaps.
Other Liabilities	246	233	13	Accrued retiree medical post employee benefits $9m which are not budgeted for in the Other Liabilities account. In December the balance is moved to the liability account where it is budgeted for.
Total Deferred Credits and Other Liabilities	2,960	2,957	3	
Equity	4,247	4,375	(129)	
Total Liabilities and Equity	**$ 12,896**	**$ 12,984**	**$ (88)**	

(1) Includes all ST and LT debt. See Financing Activities page for details.
