In January 2012, the EPA proposed limited approval of the Pennsylvania Regional Haze State Implementation Plan. That proposed action would essentially approve PPL's analysis that further particulate controls at PPL Energy Supply's Pennsylvania plants are not warranted. The limited approval does not address deficiencies of the state plan arising from the remand of the CAIR rule. Previously, the EPA had determined that implementation of the CAIR requirements would meet regional haze BART (Best Available Retrofit Technology) requirements for sulfur dioxide and nitrogen oxides. In December 2011, the EPA proposed that implementation of the CSAPR would also meet the BART. This is expected to address that deficiency.

In Montana, the EPA Region 8 is developing the regional haze plan as the Montana Department of Environmental Quality declined to develop a BART state implementation plan at this time. PPL submitted to the EPA its analyses of the visibility impacts of sulfur dioxide, nitrogen oxides and particulate matter emissions for Colstrip Units 1 and 2 and Corette. PPL's analyses concluded that further reductions are not warranted. The EPA responded to PPL's reports for Colstrip and Corette and requested further information and analysis. PPL completed further analysis and submitted addendums to its initial reports for Colstrip and Corette. In February 2009, PPL received an information request for data related to the non-BART-affected emission sources of Colstrip Units 3 and 4. PPL responded to this request in March 2009.

In November 2010, PPL Montana received a request from the EPA Region 8, under the EPA's Reasonable Further Progress goals of the Regional Haze Rules, to provide further analysis with respect to Colstrip Units 3 and 4. PPL completed a high-level analysis of various control options to reduce emissions of sulfur dioxide and particulate matter for these units, and submitted that analysis to the EPA in January 2011. The analysis shows that any incremental reductions would not be cost effective and that further analysis is not warranted. PPL also concluded that further analysis for nitrogen oxides was not justifiable as these units installed controls under a Consent Decree in which the EPA had previously agreed that, when implemented, would satisfy the requirements for installing the BART for nitrogen oxides. The EPA is expected to issue a proposed Federal Implementation Plan for Montana in March 2012. Discussions with the EPA are ongoing with respect to this issue.

PPL and PPL Energy Supply cannot predict whether any additional reductions in emissions will be required in Pennsylvania or Montana. If additional reductions are required, the economic impact could be significant depending on what is required.

LG&E and KU also submitted analyses of the visibility impacts of their Kentucky BART-eligible sources to the Kentucky Division for Air Quality (KDAQ). Only LG&E's Mill Creek plant was determined to have a significant regional haze impact. The KDAQ has submitted a regional haze state implementation plan (SIP) to the EPA which requires the Mill Creek plant to reduce its sulfuric acid mist emissions from Units 3 and 4. After approval of the Kentucky SIP by the EPA and revision of the Mill Creek plant's Title V air permit, LG&E intends to install sorbent injection controls at the plant to reduce sulfuric acid mist emissions. In the event that the EPA determines that compliance with the CSAPR would be insufficient to meet the BART requirements, it would be necessary for LG&E and KU to reassess their planned compliance measures.

New Source Review (NSR)

The NSR regulations require major new or modified sources of regulated pollutants to receive pre-construction and operating permits with limits that prevent the significant deterioration of air quality in areas that are in attainment of the ambient air quality standards for certain pollutants.

The EPA has continued its NSR enforcement efforts targeting coal-fired generating plants. The EPA has asserted that modification of these plants has increased their emissions and, consequently, that they are subject to stringent NSR requirements under the Clean Air Act. In April 2009, PPL received EPA information requests for its Montour and Brunner Island plants. The requests are similar to those that PPL received several years ago for its Colstrip, Corette and Martins Creek plants. PPL and the EPA have exchanged certain information regarding this matter. In January 2009, PPL and other companies that own or operate the Keystone plant in Pennsylvania received a notice of violation from the EPA alleging that certain projects were undertaken without proper NSR compliance. PPL and PPL Energy Supply cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In addition, in August 2007, LG&E and KU received information requests for their Mill Creek, Trimble County, and Ghent plants, but have received no further communications from the EPA since providing their responses. PPL, LKE, LG&E and KU cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

In March 2009, KU received a notice alleging that KU violated certain provisions of the Clean Air Act's rules governing NSR and prevention of significant deterioration by installing sulfur dioxide scrubbers and SCR controls at its Ghent generating plant without assessing potential increased sulfuric acid mist emissions. KU contends that the work in question, as pollution control projects, was exempt from the requirements cited by the EPA. In December 2009, the EPA issued an information request on this matter. KU has exchanged settlement proposals and other information with the EPA regarding imposition of additional permit limits and emission controls and anticipates continued settlement negotiations. In addition, any settlement or future litigation could potentially encompass a September 2007 notice of violation alleging opacity violations at the plant. Depending on the provisions of a final settlement or the results of litigation, if any, resolution of this matter could involve significant increased operating and capital expenditures. PPL, LKE and KU cannot predict the final outcome of this matter, but currently do not expect such outcome to result in material losses above the respective amounts accrued by KU.

If PPL subsidiaries are found to have violated NSR regulations, PPL would, among other things, be required to meet permit limits reflecting Best Available Control Technology (BACT) for the emissions of any pollutant found to have significantly increased due to a major plant modification. The costs to meet such limits, including installation of technology at certain units, could be significant.

States and environmental groups also have initiated enforcement actions and litigation alleging violations of the NSR regulations by coal-fired plants, and PPL is unable to predict whether such actions will be brought against any of PPL's plants.

TC2 Air Permit (PPL, LKE, LG&E and KU)

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the TC2 baseload generating unit, but the agency upheld the permit in an Order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which were incorporated into a final revised permit issued by the KDAQ in January 2010. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, PPL, LKE, LG&E and KU cannot currently predict the outcome of this matter or the potential impact on the capital costs of this project, if any.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Global Climate Change

There is concern nationally and internationally about global climate change and the possible contribution of GHG emissions including, most significantly, carbon dioxide, from the combustion of fossil fuels. This has resulted in increased demands for carbon dioxide emission reductions from investors, environmental organizations, government agencies and the international community. These demands and concerns have led to federal legislative proposals, actions at regional, state and local levels, litigation relating to GHG emissions and the EPA regulations on GHGs.

Greenhouse Gas Legislation

While climate change legislation was considered during the 111th Congress, the outcome of the 2010 elections has halted the debate on such legislation in the current 112th Congress. The timing and elements of any future legislation addressing GHG emission reductions are uncertain at this time. In the current Congress, legislation barring the EPA from regulating GHG emissions under the existing authority of the Clean Air Act has been passed by the U.S. House of Representatives. Various bills providing for barring or delaying the EPA from regulating GHG emissions have been introduced in the U.S. Senate, but the prospects for passage of such legislation remain uncertain. At the state level, the 2010 elections in Pennsylvania have also reduced the likelihood of GHG legislation in the near term, and there are currently no prospects for such legislation in Kentucky or Montana.

Greenhouse Gas Regulations and Tort Litigation

As a result of the April 2007 U.S. Supreme Court decision that the EPA has the authority to regulate GHG emissions from new motor vehicles under the Clean Air Act, in April 2010, the EPA and the U.S. Department of Transportation issued new light-duty vehicle emissions standards that apply to 2012 model year vehicles. The EPA has also clarified that this standard triggers regulation of GHG emissions from stationary sources under the NSR and Title V operating permit provisions of the Clean Air Act starting in 2011. This means that any new sources or major modifications to existing sources causing a net significant emissions increase requires the BACT permit limits for GHGs. The EPA recently proposed guidance for conducting a BACT analysis for projects that trigger such a review. In addition, New Source Performance Standards for new and existing power plants were expected to be proposed in September 2011 and finalized in May 2012, but this has been delayed. The EPA is expected to announce a new schedule for this rulemaking in the future.

At the regional level, ten northeastern states signed a Memorandum of Understanding (MOU) agreeing to establish a GHG emission cap-and-trade program, called the Regional Greenhouse Gas Initiative (RGGI). The program commenced in January 2009 and calls for stabilizing carbon dioxide emissions, at base levels established in 2005, from electric power plants with capacity greater than 3 MW. The MOU also provides for a 10% reduction in carbon dioxide emissions from base levels by 2019.

Pennsylvania has not stated an intention to join the RGGI, but has enacted the Pennsylvania Climate Change Act of 2008 (PCCA). The PCCA established a Climate Change Advisory Committee to advise the PADEP on the development of a Climate Change Action Plan. In December 2009, the Advisory Committee finalized its Climate Change Action Report which identifies specific actions that could result in reducing GHG emissions by 30% by 2020. Some of the proposed actions, such as a mandatory 5% efficiency improvement at power plants, could be technically unachievable. To date, there have been no regulatory or legislative actions taken to implement the recommendations of the report. In addition, legislation has been introduced that would, if enacted, accelerate the solar supply requirements and restrict eligible solar projects to those located in Pennsylvania. PPL cannot predict at this time whether this legislation will be enacted.

Eleven Western states, including Montana and certain Canadian provinces, are members of the Western Climate Initiative (WCI). The WCI has established a goal of reducing carbon dioxide emissions 15% below 2005 levels by 2020 and is currently developing GHG emission allocations, offsets, and reporting recommendations.

In November 2008, the Governor of Kentucky issued a comprehensive energy plan including non-binding targets aimed at promoting improved energy efficiency, development of alternative energy, development of carbon capture and sequestration projects, and other actions to reduce GHG emissions. In December 2009, the Kentucky Climate Action Plan Council was established to develop an action plan addressing potential GHG reductions and related measures. To date the state has yet to issue a final plan. The impact of any such plan is not now determinable, but the costs to comply with the plan could be significant.

A number of lawsuits have been filed asserting common law claims including nuisance, trespass and negligence against various companies with GHG emitting facilities, and the law remains unsettled on these claims. In September 2009, the U.S.

Court of Appeals for the Second Circuit in the case of *AEP v. Connecticut* reversed a federal district court's decision and ruled that several states and public interest groups, as well as the City of New York, could sue five electric utility companies under federal common law for allegedly causing a public nuisance as a result of their emissions of GHGs. In June 2011, the U.S. Supreme Court overturned the lower court and held that such federal common law claims were displaced by the Clean Air Act and regulatory actions of the EPA. In *Comer v. Murphy Oil*, the U.S. Court of Appeals for the Fifth Circuit declined to overturn a district court ruling that plaintiffs did not have standing to pursue state common law claims against companies that emit GHGs. The complaint in the *Comer* case named the previous indirect parent of LKE as a defendant based upon emissions from the Kentucky plants. In January 2011, the Supreme Court denied a petition to reverse the Court of Appeals' ruling. In May 2011, the plaintiffs in the *Comer* case filed a substantially similar complaint in federal district court in Mississippi against 87 companies, including KU and three other indirect subsidiaries of LKE, under a Mississippi statute that allows the re-filing of an action in certain circumstances. Additional litigation in federal and state courts over these issues is continuing. PPL, LKE and KU cannot predict the outcome of this litigation or estimate a range of reasonably possible losses, if any.

In 2011, PPL's power plants emitted approximately 74 million tons of carbon dioxide compared with 68 million tons in 2010. The totals reflect 36 million tons from PPL Generation and 38 million tons from LG&E's and KU's generating fleet. All tons are U.S. short tons (2,000 lbs/ton).

Renewable Energy Legislation (PPL and PPL Energy Supply)

There has been interest in renewable energy legislation at both the state and federal levels. At the federal level, House and Senate bills proposed in the 111th Congress would have imposed mandatory renewable energy supply and energy efficiency requirements in the 15% to 20% range by approximately 2020. Earlier in 2011, there were discussions regarding a Clean Energy Standard (CES) that addressed not only renewables but also encouraged clean energy requirements (as yet to be defined). At this time, neither the renewable energy debate nor the CES discussion is expected to gain momentum at the federal or state levels (beyond what is otherwise already required in Pennsylvania and Montana) in the near term.

PPL believes there are financial, regulatory and logistical uncertainties related to GHG reductions and the implementation of renewable energy mandates. These will need to be resolved before the impact of such requirements on PPL can be meaningfully estimated. Such uncertainties, among others, include the need to provide back-up supply to augment intermittent renewable generation, potential generation oversupply that could result from such renewable generation and back-up, impacts to PJM's capacity market and the need for substantial changes to transmission and distribution systems to accommodate renewable energy. These uncertainties are not directly addressed by proposed legislation. PPL and PPL Energy Supply cannot predict at this time the effect on their future competitive position, results of operation, cash flows and financial position of any GHG emissions, renewable energy mandate or other global climate change requirements that may be adopted, although the costs to implement and comply with any such requirements could be significant.

Water/Waste

Coal Combustion Residuals (CCRs) (PPL, PPL Energy Supply, LKE, LG&E and KU)

In June 2010, the EPA proposed two approaches to regulating the disposal and management of CCRs under the Resource Conservation and Recovery Act (RCRA). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. The first approach would regulate CCRs as a hazardous waste under Subtitle C of the RCRA. This approach would have very significant impacts on any coal-fired plant, and would require plants to retrofit their operations to comply with full hazardous waste requirements for the generation of CCRs and associated waste waters through transportation and disposal. This would also have a negative impact on the beneficial use of CCRs and could eliminate existing markets for CCRs. The second approach would regulate CCRs as a solid waste under Subtitle D of the RCRA. This approach would mainly affect disposal and most significantly affect any wet disposal operations. Under this approach, many of the current markets for beneficial uses would not be affected. Currently, PPL expects that several of its plants in Kentucky and Montana could be significantly impacted by the requirements of Subtitle D of the RCRA, as these plants are using surface impoundments for management and disposal of CCRs.

The EPA has issued information requests on CCR management practices at numerous plants throughout the power industry as it considers whether or not to regulate CCRs as hazardous waste. PPL has provided information on CCR management practices at most of its plants in response to the EPA's requests. In addition, the EPA has conducted follow-up inspections to evaluate the structural stability of CCR management facilities at several PPL plants and PPL has implemented certain actions in response to recommendations from these inspections.

The EPA is continuing to evaluate the unprecedented number of comments it received on its June 2010 proposed regulations. In October 2011, the EPA issued a Notice of Data Availability (NODA) that requests comments on selected documents that

the EPA received during the comment period for the proposed regulations. Comments were submitted on the NODA in November 2011. In addition, the U.S. House of Representatives in October 2011 approved a bill to modify Subtitle D of the RCRA to provide for the proper management and disposal of CCRs and that would preclude the EPA from regulating CCRs under Subtitle C of the RCRA. The bill has been introduced in the Senate and the prospect for passage of this legislation is uncertain. In January 2012, a coalition of environmental groups filed a 60-day notice of intent to sue the EPA for failure to perform nondiscretionary duties under RCRA, which could require a hard deadline for EPA to issue strict CCR regulations. In February 2012, a CCR recycling company also issued a 60-day notice of intent to sue the EPA over its timeliness in issuing CCR regulations, but that company requests that the EPA take a Subtitle D approach that would allow for continued recycling of CCRs.

PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict at this time the final requirements of the EPA's CCR regulations or potential changes to the RCRA and what impact they would have on their facilities, but the economic impact could be significant.

Martins Creek Fly Ash Release (PPL and PPL Energy Supply)

In 2005, there was a release of approximately 100 million gallons of water containing fly ash from a disposal basin at the Martins Creek plant used in connection with the operation of the plant's two 150 MW coal-fired generating units. This resulted in ash being deposited onto adjacent roadways and fields, and into a nearby creek and the Delaware River. PPL determined that the release was caused by a failure in the disposal basin's discharge structure. PPL conducted extensive clean-up and completed studies, in conjunction with a group of natural resource trustees and the Delaware River Basin Commission, evaluating the effects of the release on the river's sediment, water quality and ecosystem.

The PADEP filed a complaint in Pennsylvania Commonwealth Court against PPL Martins Creek and PPL Generation, alleging violations of various state laws and regulations and seeking penalties and injunctive relief. PPL and the PADEP have settled this matter. The settlement also required PPL to submit a report on the completed studies of possible natural resource damages. PPL subsequently submitted the assessment report to the Pennsylvania and New Jersey regulatory agencies and has continued discussing potential natural resource damages and mitigation options with the agencies. Subsequently, in August 2011 the DEP submitted its National Resource Damage Assessment report to the court and to the intervenors. The intervenors have commented on the report and the PADEP and PPL recently filed separate responses with the court. The settlement agreement for the Natural Resources Damage Claim has not yet been submitted to the court or for public comments.

Through December 31, 2011, PPL Energy Supply has spent \$28 million for remediation and related costs and an insignificant remediation liability remains on the balance sheet. PPL and PPL Energy Supply cannot be certain of the outcome of the natural resource damage assessment or the associated costs, the outcome of any lawsuit that may be brought by citizens or businesses or the exact nature of any other regulatory or other legal actions that may be initiated against PPL, PPL Energy Supply or their subsidiaries as a result of the disposal basin release. However, PPL and PPL Energy Supply currently do not expect such outcomes to result in material losses above the amounts currently recorded.

Seepages and Groundwater Infiltration - Pennsylvania, Montana and Kentucky

(PPL, PPL Energy Supply, LKE, LG&E and KU)

Seepages or groundwater infiltration have been detected at active and retired wastewater basins and landfills at various PPL plants. PPL has completed or is completing assessments of seepages or groundwater infiltration at various facilities and is working with agencies to implement abatement measures, where required. A range of reasonably possible losses cannot currently be estimated.

(PPL and PPL Energy Supply)

In 2007, six plaintiffs filed a lawsuit in the Montana Sixteenth Judicial District Court against the Colstrip plant owners asserting property damage claims from seepage from wastewater ponds at Colstrip. A settlement agreement was reached in July 2010 which would have resulted in a payment by PPL Montana, but certain of the plaintiffs later argued that the settlement was not final. The Colstrip plant owners filed a motion to enforce the settlement and in October 2011 the court granted the motion and ordered the settlement to be completed in 60 days. The plaintiffs have appealed the October order to the Montana Supreme Court, which is presently being briefed. The parties are in the process of submitting their briefs to the Montana Supreme Court. That court's decision is expected in the second half of 2012. The settlement ordered by the district court is, therefore, not final and PPL and PPL Energy Supply cannot predict the outcome of the appeal, although PPL Montana's share of any final settlement in excess of amounts recorded is not expected to be significant.

Conemaugh River Discharges (PPL and PPL Energy Supply)

In April 2007, PennEnvironment and the Sierra Club brought a Clean Water Act citizen suit in the U.S. District Court for the Western District of Pennsylvania (the Western District Court) against GenOn Northeast Management Company (then known as Reliant Energy Northeast Management Company) (GenOn), as operator of Conemaugh Generating Station (CGS), seeking civil penalties and injunctive relief for alleged violations of CGS's NPDES water discharge permit. A PPL Energy Supply subsidiary holds a 16.25% undivided, tenant-in-common ownership interest in CGS.

Throughout the relevant time period, the operators of CGS have worked closely with the PADEP to ensure that the facility is operated in a manner that does not cause any adverse environmental impacts to the Conemaugh River, a waterway already significantly impacted by discharges from abandoned coal mines and other historical industrial activity with respect to which neither PPL nor CGS had any involvement. Pursuant to a Consent Order and Agreement between the PADEP and GenOn (the CGS COA), a variety of studies have been conducted, a water treatment facility for cooling tower blowdown has been designed and built, and a second treatment facility for sulfur dioxide scrubber waste water has been designed (and is awaiting final PADEP approval for construction), all in order to comply with the stringent limits set out in CGS's NPDES permit.

In March 2011, the Western District Court entered a partial summary judgment in the plaintiffs' favor, declaring that discharges from CGS violated the NPDES permit. Subsequently, the parties agreed to settle the dispute and in August 2011 the court entered a Consent Decree and Order resolving the matter. PPL Energy Supply's share of the settlement is not significant.

In a separate matter, the PADEP plans to file a complaint in the Commonwealth Court of Pennsylvania alleging several violations of Clean Streams Law at the Conemaugh generating facility. The PADEP and GenOn Northeast Management Company, the operator, signed and lodged with the court a consent decree that when entered by the court will resolve the issues. It is expected that the court will enter the consent decree in March 2012 after a 30-day public comment period has lapsed. Under the terms of the consent decree, GenOn will be obligated to pay a civil penalty of \$500,000. PPL Energy Supply is responsible for 16.25% of this amount.

Other Issues (PPL, PPL Energy Supply, LKE, LG&E and KU)

In 2006, the EPA significantly decreased to 10 parts per billion (ppb) the drinking water standards related to arsenic. In Pennsylvania, Montana and Kentucky, this arsenic standard has been incorporated into the states' water quality standards and could result in more stringent limits in NPDES permits for PPL's Pennsylvania, Montana and Kentucky plants. Subsequently, the EPA developed a draft risk assessment for arsenic that increases the cancer risk exposure by more than 20 times, which would lower the current standard from 10 ppb to 0.1 ppb. If the lower standard becomes effective, costly treatment would be required to attempt to meet the standard and, at this time, there is no assurance that it could be achieved. PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict the outcome of the draft risk assessment and what impact, if any, it would have on their facilities, but the costs could be significant.

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxics Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all PCB-containing equipment. PPL, PPL Energy Supply, LKE, LG&E and KU cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on their facilities, but the costs could be significant.

The EPA finalized requirements in 2004 for new or modified cooling water intake structures. These requirements affect where generating facilities are built, establish intake design standards and could lead to requirements for cooling towers at new and modified power plants. Another rule, finalized in 2004, that addressed existing structures was withdrawn following a 2007 decision by the U.S. Court of Appeals for the Second Circuit. In 2009, however, the U.S. Supreme Court ruled that the EPA has discretion to use cost-benefit analysis in determining the best technology available for minimizing adverse environmental impact to aquatic organisms. The EPA published the proposed rule in April 2011. The industry and PPL reviewed the proposed rule and submitted comments. The EPA is evaluating comments and meeting with industry groups to discuss options. The final rule is to be issued by July 2012. The proposed rule contains two requirements to reduce impact to aquatic organisms. The first requires all existing facilities to meet standards for the reduction of mortality of aquatic organisms that become trapped against water intake screens regardless of the levels of mortality actually occurring or the cost of achieving the requirements. The second requirement is to determine and install best technology available to reduce mortality of aquatic organisms that are pulled through the plant's cooling water system. A form of cost-benefit analysis is allowed for this second requirement. This process involves a site-specific evaluation based on nine factors including impacts to energy delivery reliability and remaining useful life of the plant. PPL, PPL Energy Supply, LKE, LG&E and KU will be unable to determine the exact impact until a final rule is issued, the required studies have been completed, and each state in which they operate has decided how to implement the rule.

In October 2009, the EPA released its Final Detailed Study of the Steam Electric Power Generating effluent limitations guidelines and standards. Final regulations are expected to be effective in January 2014. PPL expects the revised guidelines and standards to be more stringent than the current standards especially for sulfur dioxide scrubber wastewater and ash basin discharges, which could result in more stringent discharge permit limits. In the interim, PPL is unable to predict whether the EPA and the states may impose more stringent limits on a case-by-case best professional judgment basis under existing authority as permits are renewed.

PPL has signed a Consent Order and Agreement (the Brunner COA) with the PADEP under which it agreed, under certain conditions, to take further actions to minimize the possibility of fish kills at its Brunner Island plant. Fish are attracted to warm water in the power plant discharge channel, especially during cold weather. Debris at intake pumps can result in a unit trip or reduction in load, causing a sudden change in water temperature. PPL is in the process of constructing a barrier to prevent debris from entering the river water intake area at a cost which is not expected to be material.

PPL has also investigated alternatives to exclude fish from the discharge channel and submitted three alternatives to the PADEP. According to the Brunner COA, once the cooling towers at Brunner Island became operational, PPL must implement one of these fish exclusion alternatives if a fish kill occurs in the discharge channel due to thermal impacts from the plant. Following start-up of the cooling towers in April 2010, several hundred dead fish were found in the cooling tower intake basket although there were no sudden changes in water temperature. In the third quarter of 2010, PPL discussed this matter with the PADEP and both parties agreed that this condition was not one anticipated by the Brunner COA, thereby concluding it did not trigger a need to implement a fish exclusion project. At this time, no fish exclusion project is planned.

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the Cabinet issued a final order upholding the permit. In December 2010, the environmental groups appealed the order to state court. PPL, LKE, LG&E, and KU are unable to predict the outcome of this matter or estimate a range of reasonably possible losses, if any.

The EPA and the Army Corps of Engineers are working on a guidance document that will expand the federal government's interpretation of what constitutes "waters of the United States" (WOUS) subject to regulation under the Clean Water Act. This change has the potential to affect generation and delivery operations, with the most significant effect being the potential elimination of the existing regulatory exemption for plant waste water treatment systems. The costs that may be imposed as a result of any eventual expansion of this interpretation cannot reliably be estimated at this time.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Superfund and Other Remediation

PPL Electric is a potentially responsible party at several sites listed by the EPA under the federal Superfund program, including the Columbia Gas Plant site, the Metal Bank site and the Ward Transformer site. Clean-up actions have been or are being undertaken at all of these sites, the costs of which have not been significant to PPL Electric. However, should the EPA require different or additional measures in the future, or should PPL Electric's share of costs at multi-party sites increase significantly more than currently expected, the costs could be significant.

PPL Electric, LG&E and KU are remediating or have completed the remediation of several sites that were not addressed under a regulatory program such as Superfund, but for which PPL Electric, LG&E and KU may be liable for remediation. These include a number of former coal gas manufacturing facilities in Pennsylvania and Kentucky previously owned or operated or currently owned by predecessors or affiliates of PPL Electric, LG&E and KU. There are additional sites, formerly owned or operated by PPL Electric, LG&E and KU predecessors or affiliates, for which PPL Electric, LG&E and KU lack information on current site conditions and are therefore unable to predict what, if any, potential liability they may have.

In June 2011, Lepore-Moyers Partnership (LMP) filed a complaint in federal district court against PPL Electric, UGI Corporation and a neighboring property owner relating to contamination allegedly emanating from the former Mount Joy Manufactured Gas Plant (MGP) site located in Lancaster County, Pennsylvania. LMP owns property adjacent to the Mount Joy MGP site and claims that environmental testing done on its property indicates the presence of volatile organic compounds in the soil and/or groundwater. LMP claims that defendants are responsible for, among other things, the reimbursement of costs, future response costs, investigation and remediation of the contamination, and damages caused by the contamination. PPL Electric expects the costs related to this matter to be insignificant.

Depending on the outcome of investigations at sites where investigations have not begun or been completed or developments at sites for which PPL currently lacks information, the costs of remediation and other liabilities could be substantial. PPL and its subsidiaries also could incur other non-remediation costs at sites included in current consent orders or other contaminated sites which could be significant. PPL is unable to estimate a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require several PPL subsidiaries to take more extensive assessment and remedial actions at former coal gas manufacturing facilities. PPL cannot estimate a range of reasonably possible losses, if any, related to these matters.

Under the Pennsylvania Clean Streams Law, subsidiaries of PPL Generation are obligated to remediate acid mine drainage at former mine sites and may be required to take additional steps to prevent potential acid mine drainage at previously capped refuse piles. One PPL Generation subsidiary is pumping mine water at two mine sites and treating water at one of these sites. Another PPL Generation subsidiary has installed a passive wetlands treatment system at a third site. At December 31, 2011, PPL Energy Supply had accrued a discounted liability of \$24 million to cover the costs of pumping and treating groundwater at the two mine sites for 50 years and for operating and maintaining passive wetlands treatment at the third site. PPL Energy Supply discounted this liability based on risk-free rates at the time of the mine closures. The weighted-average rate used was 8.15%. Expected undiscounted payments are estimated at \$2 million for 2012, \$1 million for each of the years from 2013 through 2016, and \$133 million for work after 2016.

From time to time, PPL undertakes remedial action in response to spills or other releases at various on-site and off-site locations, negotiates with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiates with property owners and other third parties alleging impacts from PPL's operations, and undertakes similar actions necessary to resolve environmental matters which arise in the course of normal operations. Based on analyses to date, resolution of these general environmental matters is not expected to have a material adverse impact on PPL's operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in material additional costs for the Registrants.

Electric and Magnetic Fields

Concerns have been expressed by some members of the public regarding potential health effects of power frequency EMFs, which are emitted by all devices carrying electricity, including electric transmission and distribution lines and substation equipment. Government officials in the U.S. and the U.K. have reviewed this issue. The U.S. National Institute of Environmental Health Sciences concluded in 2002 that, for most health outcomes, there is no evidence that EMFs cause adverse effects. The agency further noted that there is some epidemiological evidence of an association with childhood leukemia, but that the evidence is difficult to interpret without supporting laboratory evidence. The U.K. National Radiological Protection Board (part of the U.K. Health Protection Agency) concluded in 2004 that, while the research on EMFs does not provide a basis to find that EMFs cause any illness, there is a basis to consider precautionary measures beyond existing exposure guidelines. The Stakeholder Group on Extremely Low Frequency EMF, set up by the U.K. Government, has issued two reports, one in April 2007 and one in June 2010, describing options for reducing public exposure to EMF. The U.K. Government responded to the first report in 2009, agreeing to some of the proposals, including a proposed voluntary code to optimally phase 132 kilovolt overhead lines to reduce public exposure to EMF where it is cost effective to do so. In February 2011, the U.K. Government and the Energy Networks Association agreed to voluntary codes of practice under which new high voltage lines will be designed and operated using optimal phasing to reduce EMF unless doing so would be unreasonable, and defining the circumstances under which utilities will need to provide evidence of compliance with EMF exposure limits adopted by the U.K. Government. The U.K. Government is currently considering the second report which concentrates on EMF exposure from distribution systems. PPL and its subsidiaries believe research on EMF and health issues should continue and are taking steps to reduce EMFs, where practical, in the design of new transmission and distribution facilities. PPL and its subsidiaries are unable to predict what effect, if any, the EMF issue might have on their operations and facilities either in the U.S. or the U.K., and the associated cost, or what, if any, liabilities they might incur related to the EMF issue.

Environmental Matters - WPD (PPL)

WPD's distribution businesses are subject to environmental regulatory and statutory requirements. PPL believes that WPD has taken and continues to take measures to comply with the applicable laws and governmental regulations for the protection of the environment.

The U.K. Government has requested that utilities undertake projects to alleviate the impact of flooding on the U.K. utility infrastructure, including major electricity substations. WPD has agreed with the Ofgem to spend \$44 million on flood prevention, which will be recovered through rates during the ten-year period commencing April 2010. WPD is currently liaising on site-specific proposals with local offices of a U.K. Government agency.

The U.K.'s 2008 Climate Change Act imposes a duty on certain companies, including WPD, to report on climate change adaptation. The first information request was received by WPD in March 2010 and submissions for all four distribution network operators were made in June 2011. In October 2011, the U.K. Government confirmed that the reports submitted by WPD fulfill the obligations imposed by Climate Change Act. WPD has worked with other U.K. electricity network operators to undertake research with the internationally recognized U.K. Met Office (the national weather service) and to report using common agreed methodology.

There are no other material legal or administrative proceedings pending against or related to WPD with respect to environmental matters. See "Electric and Magnetic Fields" above for a discussion of EMFs.

Other

Nuclear Insurance (PPL and PPL Energy Supply)

PPL Susquehanna is a member of certain insurance programs that provide coverage for property damage to members' nuclear generating plants. Facilities at the Susquehanna plant are insured against property damage losses up to \$2.75 billion under these programs. PPL Susquehanna is also a member of an insurance program that provides insurance coverage for the cost of replacement power during prolonged outages of nuclear units caused by certain specified conditions.

Under the property and replacement power insurance programs, PPL Susquehanna could be assessed retroactive premiums in the event of the insurers' adverse loss experience. At December 31, 2011, this maximum assessment was \$44 million.

In the event of a nuclear incident at the Susquehanna plant, PPL Susquehanna's public liability for claims resulting from such incident would be limited to \$12.6 billion under provisions of The Price-Anderson Act Amendments under the Energy Policy Act of 2005. PPL Susquehanna is protected against this liability by a combination of commercial insurance and an industry assessment program.

In the event of a nuclear incident at any of the reactors covered by The Price-Anderson Act Amendments under the Energy Policy Act of 2005, PPL Susquehanna could be assessed up to \$235 million per incident, payable at \$35 million per year.

At December 31, 2011, the property, replacement power and nuclear incident insurers maintained an A.M. Best financial strength rating of A ("Excellent").

Guarantees and Other Assurances

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

In the normal course of business, the Registrants enter into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries enter.

(PPL)

PPL fully and unconditionally guarantees all of the debt securities of PPL Capital Funding.

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The table below details guarantees provided as of December 31, 2011. The total recorded liability at December 31, 2011 and 2010 was \$14 million for PPL and \$11 million for LKE. Other than as noted in the descriptions for "WPD guarantee of pension and other obligations of unconsolidated entities," the probability of expected payment/performance under each of these guarantees is remote.

	Exposure at December 31, 2011 (a)	Expiration Date
PPL		
Indemnifications for sale of PPL Gas Utilities	\$ 300 (b)	
Indemnifications related to the WPD Midlands acquisition	(c)	
WPD indemnifications for entities in liquidation and sales of assets	287 (d)	2014 - 2018
WPD guarantee of pension and other obligations of unconsolidated entities	88 (e)	2015
Tax indemnification related to unconsolidated WPD affiliates	8 (f)	2012
PPL Energy Supply (g)		
Letters of credit issued on behalf of affiliates	21 (h)	2012 - 2014
Retrospective premiums under nuclear insurance programs	44 (i)	
Nuclear claims assessment under The Price-Anderson Act Amendments under The Energy Policy Act of 2005	235 (j)	
Indemnifications for sales of assets	338 (k)	2012 - 2025
Indemnification to operators of jointly owned facilities	6 (l)	
Guarantee of a portion of a divested unconsolidated entity's debt	22 (m)	2018
PPL Electric (n)		
Guarantee of inventory value	14 (o)	2016
LKE (n)		
Indemnification of lease termination and other divestitures	301 (p)	2021 - 2023
LG&E and KU (q)		
LG&E and KU guarantee of shortfall related to OVEC	(r)	2040

- (a) Represents the estimated maximum potential amount of future payments that could be required to be made under the guarantee.
- (b) PPL has provided indemnification to the purchaser of PPL Gas Utilities and Penn Fuel Propane, LLC for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including certain pre-closing unknown environmental liabilities relating to former manufactured gas plant properties or off-site disposal sites, if any, outside of Pennsylvania. The indemnification provisions for most representations and warranties, including tax and environmental matters, are capped at \$45 million, in the aggregate, and are triggered (i) only if the individual claim exceeds \$50,000, and (ii) only if, and only to the extent that, in the aggregate, total claims exceed \$4.5 million. The indemnification provisions for most representations and warranties expired on September 30, 2009 without any claims having been made. Certain representations and warranties, including those having to do with transaction authorization and title, survive indefinitely, are capped at the purchase price and are not subject to the above threshold or deductible. The indemnification provision for the tax matters representations survives for the duration of the applicable statute of limitation. The indemnification provision for the environmental matters representations expired on September 30, 2011 without any claims having been made. The indemnification for covenants survives until the applicable covenant is performed and is not subject to any cap.
- (c) WPD Midlands Holdings Limited (formerly Central Networks Limited) had agreed prior to the acquisition to indemnify certain former directors of a Turkish entity in which WPD Midlands Holdings Limited previously owned an interest for any liabilities that may arise as a result of an investigation by Turkish tax authorities, and PPL WEM has received a cross-indemnity from E.ON AG with respect to these indemnification obligations. Additionally, PPL subsidiaries agreed to provide indemnifications to subsidiaries of E.ON AG for certain liabilities relating to properties and assets owned by affiliates of E.ON AG that were transferred to WPD Midlands in connection with the acquisition. The maximum exposure and expiration of these indemnifications cannot be estimated because the maximum potential liability is not capped and there is no expiration date in the transaction documents.
- (d) In connection with the liquidation of wholly owned subsidiaries that have been deconsolidated upon turning the entities over to the liquidators, certain affiliates of PPL Global have agreed to indemnify the liquidators, directors and/or the entities themselves for any liabilities or expenses arising during the liquidation process, including liabilities and expenses of the entities placed into liquidation. In some cases, the indemnifications are limited to a maximum amount that is based on distributions made from the subsidiary to its parent either prior or subsequent to being placed into liquidation. In other cases, the maximum amount of the indemnifications is not explicitly stated in the agreements. The indemnifications generally expire two to seven years subsequent to the date of dissolution of the entities. The exposure noted only includes those cases in which the agreements provide for a specific limit on the amount of the indemnification, and the expiration date was based on an estimate of the dissolution date of the entities.
- In connection with their sales of various businesses, WPD and its affiliates have provided the purchasers with indemnifications that are standard for such transactions, including indemnifications for certain pre-existing liabilities and environmental and tax matters. In addition, in connection with certain of these sales, WPD and its affiliates have agreed to continue their obligations under existing third-party guarantees, either for a set period of time following the transactions or upon the condition that the purchasers make reasonable efforts to terminate the guarantees. Finally, WPD and its affiliates remain secondarily responsible for lease payments under certain leases that they have assigned to third parties.
- (e) As a result of the privatization of the utility industry in the U.K., certain electric associations' roles and responsibilities were discontinued or modified. As a result, certain obligations, primarily pension-related, associated with these organizations have been guaranteed by the participating members. Costs are allocated to the members based on predetermined percentages as outlined in specific agreements. However, if a member becomes insolvent, costs can be reallocated to and are guaranteed by the remaining members. At December 31, 2011, WPD has recorded an estimated discounted liability based on its current allocated percentage of the total expected costs for which the expected payment/performance is probable. Neither the expiration date nor the maximum amount of potential payments for certain obligations is explicitly stated in the related agreements. Therefore, they have been estimated based on the types of obligations.
- (f) Two WPD unconsolidated affiliates were refinanced during 2005. Under the terms of the refinancing, WPD has indemnified the lender against certain tax and other liabilities.
- (g) Other than the letters of credit, all guarantees of PPL Energy Supply, on a consolidated basis, also apply to PPL on a consolidated basis for financial reporting purposes.
- (h) Standby letter of credit arrangements under PPL Energy Supply's credit facilities for the purposes of protecting various third parties against nonperformance by PPL. This is not a guarantee by PPL on a consolidated basis.
- (i) PPL Susquehanna is contingently obligated to pay this amount related to potential retrospective premiums that could be assessed under its nuclear insurance programs. See "Nuclear Insurance" above for additional information.

- (j) This is the maximum amount PPL Susquehanna could be assessed for each incident at any of the nuclear reactors covered by this Act. See "Nuclear Insurance" above for additional information.
- (k) PPL Energy Supply's maximum exposure with respect to certain indemnifications and the expiration of the indemnifications cannot be estimated because, in the case of certain indemnification provisions, the maximum potential liability is not capped by the transaction documents and the expiration date is based on the applicable statute of limitation. The exposure and expiration dates noted are only for those cases in which the agreements provide for specific limits.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchaser of the Long Island generation business for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including liabilities relating to certain renewable energy facilities which were previously owned by one of the PPL subsidiaries sold in the transaction but which were unrelated to the Long Island generation business. The indemnification provisions are subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of most representations and warranties. The indemnification provisions for most representations and warranties expired in the third quarter of 2011.

A subsidiary of PPL Energy Supply has agreed to provide indemnification to the purchasers of the Maine hydroelectric facilities for damages arising out of any breach of the representations, warranties and covenants under the respective transaction agreements and for damages arising out of certain other matters, including liabilities of the PPL Energy Supply subsidiary relating to the pre-closing ownership or operation of those hydroelectric facilities. The indemnification obligations are subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of representations and warranties. The indemnification provisions for certain representations and warranties expired in the second quarter of 2011.

Subsidiaries of PPL Energy Supply have agreed to provide indemnification to the purchasers of certain non-core generation facilities sold in March 2011 (see Note 9 for additional information) for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreements and for damages arising out of certain other matters relating to the facilities that were the subject of the transaction, including certain reduced capacity payments (if any) at one of the facilities in the event specified PJM rule changes are proposed and become effective. The indemnification provisions are subject to certain customary limitations, including thresholds for allowable claims, caps on aggregate liability, and time limitations for claims arising out of breaches of most representations and warranties.

- (l) In December 2007, a subsidiary of PPL Energy Supply executed revised owners agreements for two jointly owned facilities, the Keystone and Conemaugh generating plants. The agreements require that in the event of any default by an owner, the other owners fund contributions for the operation of the generating plants, based upon their ownership percentages. The maximum obligation among all owners, for each plant, is currently \$20 million. The non-defaulting owners, who make up the defaulting owner's obligations, are entitled to the generation entitlement of the defaulting owner, based upon their ownership percentage. The agreements do not have an expiration date.
- (m) A PPL Energy Supply subsidiary owned a one-third equity interest in Safe Harbor Water Power Corporation (Safe Harbor) that was sold in March 2011. Beginning in 2008, PPL Energy Supply guaranteed one-third of any amounts payable with respect to certain senior notes issued by Safe Harbor. Under the terms of the sale agreement, PPL Energy Supply continues to guarantee the portion of Safe Harbor's debt, but received a cross-indemnity from the purchaser in the event PPL Energy Supply is required to make a payment under the guarantee. Exposure noted reflects principal only. See Note 9 for additional information on the sale of this interest.
- (n) All guarantees of PPL Electric and LKE, on a consolidated basis, also apply to PPL on a consolidated basis for financial reporting purposes.
- (o) PPL Electric entered into a contract with a third party logistics firm that provides inventory procurement and fulfillment services. Under the contract, the logistics firm has title to the inventory purchased for PPL Electric's use. Upon termination of the contract, PPL Electric has guaranteed to purchase any remaining inventory that has not been used or sold by the logistics firm at the weighted-average cost at which the logistics firm purchased the inventory, thus protecting the logistics firm from reductions in the fair value of the inventory.
- (p) LKE provides certain indemnifications, the most significant of which relate to the termination of the WKE lease in July 2009. These guarantees cover the due and punctual payment, performance and discharge by each party of its respective present and future obligations. The most comprehensive of these guarantees is the LKE guarantee covering operational, regulatory and environmental commitments and indemnifications made by WKE under the WKE Transaction Termination Agreement. This guarantee has a term of 12 years ending July 2021, and a cumulative maximum exposure of \$200 million. Certain items such as non-excluded government fines and penalties fall outside the cumulative cap. Another guarantee with a maximum exposure of \$100 million covering other indemnifications expires in 2023. Certain matters are currently under discussion among the parties, including one matter currently in arbitration and a further matter for which LKE is contesting the applicability of the indemnification requirement. The matter in arbitration may be ruled upon during early 2012, which ruling may result in increases or decreases to the liability estimate LKE has currently recorded. The ultimate outcome of both matters cannot be predicted at this time. Additionally, LKE has indemnified various third parties related to historical obligations for other divested subsidiaries and affiliates. The indemnifications vary by entity and the maximum amount limits range from being capped at the sale price to no specified maximum; however, LKE is not aware of formal claims under such indemnities made by any party at this time. LKE could be required to perform on these indemnifications in the event of covered losses or liabilities being claimed by an indemnified party. No additional material loss is anticipated by reason of such indemnification.
- (q) All guarantees of LG&E and KU also apply to LKE on a consolidated basis for financial reporting purposes.
- (r) As described in the "Energy Purchase Commitments" section of this footnote, pursuant to a power purchase agreement with OVEC, LG&E and KU are obligated to pay a demand charge which includes, among other charges, decommissioning costs, postretirement and post employment benefits. The demand charge is expected to cover LG&E's and KU's shares of the cost of these items over the term of the contract. However, in the event there is a shortfall in covering these costs, LG&E and KU are obligated to pay their share of the excess.

The Registrants provide other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage requires a maximum \$4 million deductible per occurrence and provides maximum aggregate coverage of \$200 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

16. Related Party Transactions

(PPL Energy Supply and PPL Electric)

PLR Contracts/Purchase of Accounts Receivable

In 2009, PPL EnergyPlus supplied PPL Electric's entire PLR load under power purchase contracts that expired on December 31, 2009. Under these contracts, PPL EnergyPlus provided electricity at the predetermined capped prices that PPL Electric was authorized to charge its PLR customers. These purchases totaled \$1.8 billion in 2009 and included nuclear decommissioning recovery and amortization of an up-front contract payment. Additionally, beyond 2009, PPL EnergyPlus has been awarded a portion of the PLR generation supply through competitive solicitations. See Note 15 for additional information on PPL Electric's energy procurement plan for the period January 2011 through May 2013 and related competitive solicitations. PPL Electric's purchases from PPL EnergyPlus for 2011 and 2010 totaled \$26 million and \$320 million. The purchases are included in the Statements of Income as "Wholesale energy marketing to affiliate" by PPL Energy Supply and as "Energy purchases from affiliate" by PPL Electric.

Under the standard Supply Master Agreement for the solicitation process, PPL Electric requires all suppliers to post collateral once credit exposures exceed defined credit limits. PPL EnergyPlus is required to post collateral with PPL Electric: (a) when the market price of electricity to be delivered by PPL EnergyPlus exceeds the contract price for the forecasted quantity of electricity to be delivered and (b) this market price exposure exceeds a contractual credit limit. Based on the current credit rating of PPL Energy Supply, as guarantor, PPL EnergyPlus' credit limit was \$35 million at December 31, 2011. In no instance is PPL Electric required to post collateral to suppliers under these supply contracts.

PPL Electric's customers may choose an alternative supplier for their generation supply. See Note 1 for additional information regarding PPL Electric's purchases of accounts receivable from alternative suppliers, including PPL EnergyPlus.

At December 31, 2011, PPL Energy Supply had a net credit exposure of \$36 million to PPL Electric from its commitment as a PLR supplier and from the sale of its accounts receivable to PPL Electric.

NUG Purchases

PPL Electric has a reciprocal contract with PPL EnergyPlus to sell electricity purchased under contracts with NUGs. PPL Electric purchases electricity from the NUGs at contractual rates and then sells the electricity at the same price to PPL EnergyPlus. These purchases were insignificant in 2011 and 2010 and were \$70 million in 2009. These amounts are included in the Statements of Income as "Electric revenue to affiliate" by PPL Electric, and as "Energy purchases from affiliate" by PPL Energy Supply. Most of the NUG contracts have expired, with the final NUG contract expiring in 2014.

Wholesale Sales and Purchases *(LG&E and KU)*

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail native load. When LG&E has excess generation capacity after serving its own retail native load and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail native load and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost. Savings realized from such intercompany transactions are shared equally between the two companies. The volume of energy each company has to sell to the other is dependent on its native load needs and its available generation.

Allocations of PPL Services Costs *(PPL Energy Supply, PPL Electric and LKE)*

PPL Services provides corporate functions such as financial, legal, human resources and information technology services. PPL Services charges the respective PPL subsidiaries for the cost of certain services when they can be specifically identified. The cost of services that is not directly charged to PPL subsidiaries is allocated to applicable subsidiaries based on an average of the subsidiaries' relative invested capital, operation and maintenance expenses and number of employees. PPL Services allocated the following amounts, which PPL management believes are reasonable, including amounts applied to accounts that are further distributed between capital and expense.

	2011	2010	2009 (a)
PPL Energy Supply	\$ 189	\$ 232	\$ 214
PPL Electric	145	134	121
LKE	16	3 (b)	

(a) Excludes allocated costs associated with the February 2009 workforce reduction. See Note 13 for additional information.

(b) Represents costs allocated during the two months ending December 31, 2010 as LKE was acquired November 1, 2010.

Intercompany Billings by LKS (LG&E and KU)

LKS provides LG&E and KU with a variety of centralized administrative, management and support services. The cost of these services is directly charged to the company or, for general costs that cannot be directly attributed, charged based on predetermined allocation factors, including the following measures: number of customers, total assets, revenues, number of employees and/or other statistical information. LKS charged the amounts in the table below, which LKE management believes are reasonable, including amounts that are further distributed between capital and expense.

	Successor		Predecessor	
	Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
LG&E	\$ 190	\$ 32	\$ 200	\$ 180
KU	204	34	222	155

In addition, LG&E and KU provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E and KU are reimbursed through LKS.

Intercompany Borrowings

(PPL Energy Supply)

A PPL Energy Supply subsidiary holds revolving lines of credit and demand notes from certain affiliates. A note with PPL Energy Funding had an outstanding balance at December 31, 2011 of \$198 million, which is reflected in "Notes receivable from affiliates" on the Balance Sheet. The interest rate on this borrowing was equal to one-month LIBOR plus 3.50%. There were no balances outstanding at December 31, 2010. Interest earned on these revolving facilities is included in "Interest Income from Affiliates" on the Statements of Income. For 2011, interest earned on borrowings was \$8 million, which was substantially attributable to borrowings by PPL Energy Funding as discussed above. For 2010, interest earned on borrowings, excluding the term notes discussed below, was \$5 million. Interest rates were equal to one-month LIBOR plus 1% and one-month LIBOR plus 3.50%. For 2009, interest earned on borrowings was insignificant.

(PPL Energy Supply, LKE, LG&E and KU)

In November 2010, a PPL Energy Supply subsidiary held term notes with LG&E and KU. These notes were subsequently repaid and therefore no balances were outstanding at December 31, 2010. Interest on these notes was due monthly at interest rates between 4.24% and 7.04%. Interest on these notes is included in "Interest Income from Affiliates" for PPL Energy Supply and "Interest Expense with Affiliates" for LKE, LG&E and KU. When balances were outstanding, interest on these notes was \$4 million for 2010.

(LKE)

LKE maintains a \$300 million revolving line of credit with a PPL Energy Supply subsidiary whereby LKE can borrow funds on a short-term basis at market-based rates. The interest rates on borrowings are equal to one-month LIBOR plus a spread. There was no balance outstanding at December 31, 2011 or 2010. Interest on the revolving line of credit with the PPL Energy Supply subsidiary was not significant for 2011 or 2010.

After PPL's acquisition of LKE in November 2010, LKE held a note receivable from a PPL affiliate. At December 31, 2011, \$15 million was outstanding compared with \$61 million at December 31, 2010. The interest rate on the outstanding borrowing was 2.27% and 2.26% for 2011 and 2010. Interest income on this note was not significant in 2011 or 2010.

Prior to PPL's acquisition of LKE in November 2010, LKE had revolving credit facilities and several short-term and long-term loans with its former E.ON AG affiliates. During 2010 and 2009, LKE incurred interest expense on these debt arrangements of \$131 million and \$155 million, which is included in the Statements of Income as "Interest Expense with Affiliate." The consolidated debt had a weighted-average interest rate of 3.76% at December 31, 2009. Any such borrowings were repaid in 2010 prior to or at the time of the acquisition by PPL.

(LG&E)

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to \$500 million at an interest rate based on a market index of commercial paper issues. At December 31, 2011 there was no balance outstanding. At December 31, 2010, \$12 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%. Interest expense incurred on the money pool agreement with LKE and/or KU was not significant for 2011, 2010 or 2009.

Prior to PPL's acquisition of LKE in November 2010, LG&E had long-term loans from its former E.ON AG affiliates. During 2010 and 2009, LG&E incurred interest expense related to these debt arrangements of \$22 million and \$27 million, which is included in the Statements of Income as "Interest Expense with Affiliate." The long-term intercompany debt had a weighted-average interest rate of 5.49% at December 31, 2009. Any such borrowings were repaid in 2010 prior to or at the time of the acquisition by PPL.

(KU)

KU participates in an intercompany money pool agreement whereby LKE and/or LG&E make available to KU funds up to \$500 million at an interest rate based on a market index of commercial paper issues. At December 31, 2011, there was no balance outstanding. At December 31, 2010, \$10 million was outstanding. The interest rate for the period ended December 31, 2010 was 0.25%. Interest expense incurred on the money pool agreement with LKE and/or LG&E was not significant for 2011, 2010 or 2009.

Prior to PPL's acquisition of LKE in November 2010, KU had long-term loans from its former E.ON AG affiliates. During 2010 and 2009, KU incurred interest expense on these debt arrangements of \$62 million and \$69 million, which are included in the Statements of Income as "Interest Expense with Affiliate." The long-term intercompany debt had a weighted-average interest rate of 5.50% at December 31, 2009. Any such borrowings were repaid in 2010 prior to or at the time of the acquisition by PPL.

(PPL Energy Supply)

Intercompany Derivatives

In 2010 and 2009, PPL Global, which was a subsidiary of PPL Energy Supply, entered into a combination of average rate forwards and average rate options with PPL to sell British pounds sterling. These hedging instruments had terms identical to average rate forwards and average rate options entered into by PPL with third parties to protect the translation of expected income denominated in British pounds sterling to U.S. dollars. As a result of PPL Energy Supply's January 2011 distribution of its membership interest in PPL Global to its parent, gains and losses, both realized and unrealized, on these types of hedging instruments are reflected in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income. PPL Energy Supply recorded an insignificant net gain in 2010 and a net loss of \$9 million during 2009 related to average rate forwards and average rate options. Contracts outstanding at December 31, 2010 hedged a total exposure of £89 million related to the translation of expected income in 2011. The fair value of these positions was insignificant at December 31, 2010.

PPL Global was also a party to forward contracts with PPL to sell British pounds sterling to protect the value of a portion of its net investment in WPD. These hedging instruments had terms identical to forward sales contracts entered into by PPL with third parties. The total amount of the contracts outstanding at December 31, 2010 was £35 million (\$62 million based on contracted rates). The fair value of these positions at December 31, 2010 was an asset of \$7 million, which is included in "Current Assets - Price risk management assets" with an offsetting after-tax amount included in the foreign currency translation adjustment component of AOCI on the Balance Sheet.

As a result of PPL Energy Supply's distribution of its membership interest in PPL Global to its parent, these intercompany derivatives were removed from PPL Energy Supply's balance sheet in 2011. See Note 9 for additional information.

Trademark Royalties

A PPL subsidiary owns PPL trademarks and billed certain affiliates for their use. PPL Energy Supply was billed \$40 million of license fees in 2011, 2010 and 2009. These fees are primarily included in "Other operation and maintenance" on the Statements of Income.

On December 31, 2011, this agreement was terminated.

Distribution of Interest in PPL Global to Parent

In January 2011, PPL Energy Supply distributed its membership interest in PPL Global to its parent, PPL Energy Funding. See Note 9 for additional information.

Intercompany Insurance (PPL Electric)

PPL Power Insurance Ltd. (PPL Power Insurance) is a subsidiary of PPL that provides insurance coverage to PPL and its subsidiaries for property damage, general/public liability and workers' compensation.

Due to damages resulting from several PUC-reportable storms that occurred in 2011, PPL Electric has exceeded its deductible for the 2011 policy year. Probable recoveries on insurance claims with PPL Power Insurance of \$26.5 million were recorded during 2011, of which \$16 million was included in "Other operation and maintenance" on the Statement of Income and the remainder was recorded in PP&E on the Balance Sheet.

Other (PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

See Note 1 for discussions regarding the intercompany tax sharing agreement and Note 7 for a discussion regarding capital transactions by PPL Energy Supply, PPL Electric, LKE, LG&E and KU. For PPL Energy Supply, PPL Electric and LKE, refer to Note 1 for discussions regarding intercompany allocations of stock-based compensation expense. For PPL Energy Supply, PPL Electric, LG&E and KU, see Note 13 for discussions regarding intercompany allocations associated with defined benefits.

17. Other Income (Expense) - net

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The breakdown of "Other Income (Expense) - net" was:

	PPL			PPL Energy Supply			PPL Electric		
	2011	2010	2009	2011	2010	2009	2011	2010	2009

Other Income (Expense) - net	\$ (1)		\$ 1	\$ 6

- (a) Represents PPL Energy Supply's \$25 million gain on its tender offers to purchase up to \$250 million aggregate principal amount of certain of its outstanding senior notes and PPL's additional net gain of \$4 million as a result of reclassifying net gains on related cash flow hedges from AOCI into earnings.
- (b) Represents a gain on foreign currency contracts that hedged the repayment of the 2011 Bridge Facility borrowing.
- (c) As a result of PPL Electric's redemption of 7.125% Senior Secured Bonds due 2013, PPL recorded a gain on the accelerated amortization of the fair value adjustment to the debt recorded in connection with previously settled fair value hedges.
- (d) Represents losses reclassified from AOCI into earnings associated with discontinued hedges at PPL for debt that had been planned to be issued by PPL Energy Supply. As a result of the expected net proceeds from the sale of certain non-core generation facilities, coupled with the monetization of full-requirement sales contracts, the debt issuance was no longer needed.
- (e) Represents a foreign currency loss related to the repayment of the 2011 Bridge Facility borrowing.

18. Fair Value Measurements and Credit Concentration

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). PPL and its subsidiaries use, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

Included in discontinued operations		(3)	3
Settlements		(21)	(54)
Balance at end of period	\$		\$ 24

Net gains and losses on assets and liabilities classified as Level 3 and included in earnings for the years ended were reported in the Statements of Income as follows:

	PPL and PPL Energy Supply			
	Energy Commodities, net			
	Unregulated Retail Electric and Gas	Wholesale Energy Marketing	Net Energy Trading Margins	Energy Purchases
December 31, 2011				
Total gains (losses) included in earnings	\$ 32		\$ (1)	\$ (96)
Change in unrealized gains (losses) relating to positions still held at the reporting date	23	\$ 5	1	(2)
December 31, 2010				
Total gains (losses) included in earnings	11	14		(162)
Change in unrealized gains (losses) relating to positions still held at the reporting date	4	6		(119)

PPL and its subsidiaries recognize transfers between levels at end-of-reporting-period values.

Price Risk Management Assets/Liabilities - Energy Commodities

Energy commodity contracts are generally valued using the income approach, except for exchange-traded derivative gas, oil and emission allowance contracts, which are valued using the market approach and are classified as Level 1. When observable inputs are used to measure all or most of the value of a contract, the contract is classified as Level 2. Over-the-counter (OTC) contracts are valued using quotes obtained from an exchange, binding and non-binding broker quotes, prices posted by ISOs or published tariff rates. Furthermore, PPL and its subsidiaries obtain independent quotes from the market to validate the forward price curves. OTC contracts include forwards, swaps, options and structured deals for electricity, gas, oil and/or emission allowances and may be offset with similar positions in exchange-traded markets. To the extent possible, fair value measurements utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. For example, the fair value of a structured deal that delivers power to an illiquid delivery point may be measured by valuing the nearest liquid trading point plus the value of the basis between the two points. The basis input may be from market quotes, FTR prices or historical prices.

When unobservable inputs are significant to the fair value measurement, a contract is classified as Level 3. Additionally, Level 2 and Level 3 fair value measurements include adjustments for credit risk based on PPL's own creditworthiness (for net liabilities) and its counterparties' creditworthiness (for net assets). PPL's credit department assesses all reasonably available market information and probabilities of default used to calculate the credit adjustment. PPL assumes that observable market prices include sufficient adjustments for liquidity and modeling risks, but for Level 3 fair value measurements, PPL also assesses the need for additional adjustments for liquidity or modeling risks. The contracts classified as Level 3 represent contracts for which delivery is at a location where pricing is unobservable or the delivery dates are beyond the dates for which independent prices are available. To measure the fair value of these contracts, PPL uses internally developed models that project forward prices. The models use proxy locations, historical settlement prices and extrapolation of observable forward curves.

In certain instances, energy commodity contracts are transferred between Level 2 and Level 3. The primary reasons for the transfers during 2011 and 2010 were changes in the availability of market information and changes in the significance of the unobservable portion of the contract. As the delivery period of a contract becomes closer, market information may become available. When this occurs, the model's unobservable inputs are replaced with observable market information.

Price Risk Management Assets/Liabilities - Interest Rate Swaps/Foreign Currency Exchange Contracts/Cross-Currency Swaps

To manage their interest rate risk, PPL and its subsidiaries generally use interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. To manage their foreign currency exchange risk, PPL and its subsidiaries generally use foreign currency exchange contracts such as forwards and options, as well as cross-currency swaps that contain characteristics of both interest rate and foreign currency exchange contracts. PPL and its subsidiaries use an income approach to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates) and forward foreign currency exchange rates (e.g., GBP and Euro), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, PPL and its subsidiaries cannot practicably obtain market information to value credit risk and therefore rely on their own models. These models use projected probabilities of default based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3. Certain cross-currency contracts were executed in 2011 and upon remeasurement of their fair value were transferred to Level 3 due to the significance of the credit adjustment driven by the long dated nature of the contracts.

(PPL and PPL Energy Supply)

NDT Funds

PPL and PPL Energy Supply generally use the market approach to measure the fair value of equity securities held in the NDT funds.

- The fair value measurements of equity securities classified as Level 1 are based on quoted prices in active markets and are comprised of securities that are representative of the Wilshire 5000 index, which is invested in approximately 70% large-cap stocks and 30% mid/small-cap stocks.
- Investments in commingled equity funds are classified as Level 2 and represent securities that track the S&P 500 index and the Wilshire 4500 index. These fair value measurements are based on firm quotes of net asset values per share, which are not obtained from a quoted price in an active market.

Debt securities are generally measured using a market approach, including the use of matrix pricing. Common inputs include reported trades, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs, as well as benchmark yields, credit valuation adjustments, reference data from market research publications, monthly payment data, collateral performance and new issue data.

The debt securities held by the NDT funds at December 31, 2011 have a weighted-average coupon of 4.40% and a weighted-average maturity of 8.46 years.

Auction Rate Securities

PPL's and PPL Energy Supply's auction rate securities include Federal Family Education Loan Program guaranteed student loan revenue bonds, as well as various municipal bond issues. At December 31, 2011, contractual maturities for these auction rate securities were a weighted average of approximately 24 years. PPL and PPL Energy Supply do not have significant exposure to realize losses on these securities; however, auction rate securities are classified as Level 3 because failed auctions limit the amount of observable market data that is available for measuring the fair value of these securities.

The fair value of auction rate securities is estimated using an income approach with inputs for the underlying structure and credit quality of each security; the present value of future interest payments, estimated based on forward rates of the SIFMA Index, and principal payments discounted using interest rates for bonds with a credit rating and remaining term to maturity similar to the stated maturity of the auction rate securities; and the impact of auction failures or redemption at par.

Nonrecurring Fair Value Measurements

The following nonrecurring fair value measurements occurred during the reporting periods, resulting in asset impairments.

	Carrying Amount (a)	Fair Value Measurements Using		Loss (b)
		Level 2	Level 3	
Sulfur dioxide emission allowances (c):				
September 30, 2011	\$ 1			\$ 1
March 31, 2011	1			1
December 31, 2010	2		\$ 1	1
September 30, 2010	6		2	4
June 30, 2010	11		3	8
March 31, 2010	13		10	3
December 31, 2009	20		13	7
March 31, 2009	45		15	30
RECs (c):				
September 30, 2011	1			1
June 30, 2011	2	\$ 1		1
March 31, 2011	3			3
Certain non-core generation facilities:				
September 30, 2010	473	381		96
Long Island generation business:				
December 31, 2009	132	128		5
September 30, 2009	137	133		5
June 30, 2009	189	138		52

(a) Represents carrying value before fair value measurement.

(b) Losses on sulfur dioxide emission allowances and RECs were recorded in the Supply segment and included in "Other operation and maintenance" on the Statements of Income. Losses on certain non-core generation facilities and the Long Island generation business were recorded in the Supply segment and included in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income.

(c) Current and long-term sulfur dioxide emission allowances and RECs are included in "Other intangibles" in their respective areas on the Balance Sheets.

Sulfur Dioxide Emission Allowances

Due to declines in market prices, PPL Energy Supply assessed the recoverability of sulfur dioxide emission allowances not expected to be consumed. When available, observable market prices were used to value the sulfur dioxide emission allowances. When observable market prices were not available, fair value was modeled using prices from observable transactions and appropriate discount rates. The modeled values were significant to the overall fair value measurement, resulting in the Level 3 classification.

RECs

Due to declines in forecasted full-requirement obligations in certain markets as well as declines in market prices, PPL Energy Supply assessed the recoverability of certain RECs not expected to be used. Observable market prices (Level 2) were used to value the RECs.

Certain Non-Core Generation Facilities

Certain non-core generation facilities met the held for sale criteria at September 30, 2010. As a result, net assets held for sale were written down to their estimated fair value less cost to sell. The fair value in the table above excludes \$4 million of estimated costs to sell and was based on the negotiated sales price (achieved through an active auction process). See Note 9 for additional information on the completed sale.

Long Island Generation Business

The Long Island generation business met the held for sale criteria at June 30, 2009. As a result, net assets held for sale were written down to their estimated fair value less cost to sell. The fair value in the table above excludes \$1 million of estimated costs to sell and was based on the negotiated sales price (achieved through an active auction process). See Note 9 for additional information on the completed sale.

Financial Instruments Not Recorded at Fair Value (PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

The carrying amounts of contract adjustment payments related to the 2010 Purchase Contract component of the 2010 Equity Units, the 2011 Purchase Contract component of the 2011 Equity Units, and long-term debt on the Balance Sheets and their estimated fair values are set forth below. The fair values of these instruments were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates. The effect of third-party credit enhancements is not included in the fair value measurement.

	December 31, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
PPL				
Contract adjustment payments (a)	\$ 198	\$ 198	\$ 146	\$ 148
Long-term debt	17,993	19,392	12,663	12,868
PPL Energy Supply				
Long-term debt	3,024	3,397	5,589	5,919
PPL Electric				
Long-term debt	1,718	2,012	1,472	1,578
LKE				
Long-term debt	4,073	4,306	3,825	3,607
LG&E				
Long-term debt	1,112	1,164	1,112	1,069
KU				
Long-term debt	1,842	2,000	1,841	1,728

(a) Included in "Other current liabilities" and "Other deferred credits and noncurrent liabilities" on the Balance Sheets.

The carrying value of short-term debt (including notes between affiliates), when outstanding, represents or approximates fair value due to the variable interest rates associated with the financial instruments. The carrying value of held-to-maturity, short-term investments approximates fair value due to the liquid nature and short-term duration of these instruments.

Credit Concentration Associated with Financial Instruments

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL and its subsidiaries enter into contracts with many entities for the purchase and sale of energy. Many of these contracts qualify for NPNS and as such, the fair value of these contracts is not reflected in the financial statements. However, the fair value of these contracts is considered when committing to new business from a credit perspective. See Note 19 for information on credit policies used by PPL and its subsidiaries to manage credit risk, including master netting arrangements and collateral requirements.

(PPL)

At December 31, 2011, PPL had credit exposure of \$3.0 billion from energy trading partners, excluding the effects of netting arrangements and collateral. As a result of netting arrangements and collateral, PPL's credit exposure was reduced to \$866 million. One of the counterparties accounted for 11% of the exposure, and the next highest counterparty accounted for 6% of the exposure. Ten counterparties accounted for \$457 million, or 53%, of the net exposure. These counterparties had an investment grade credit rating from S&P or Moody's. The foregoing excludes a long-term supply contract with SMGT due to SMGT's filing for bankruptcy protection during the fourth quarter of 2011. The outstanding accounts receivable associated with SMGT at December 31, 2011 was \$14 million, of which \$11 million has been reserved. See Note 15 for more information.

(PPL Energy Supply)

At December 31, 2011, PPL Energy Supply had credit exposure of \$3.0 billion from energy trading partners, excluding exposure from related parties and the effects of netting arrangements and collateral. As a result of netting arrangements and collateral, this credit exposure was reduced to \$863 million. One of the counterparties accounted for 11% of the exposure, and the next highest counterparty accounted for 6% of the exposure. Ten counterparties accounted for \$457 million, or 53%, of the net exposure. These counterparties had an investment grade credit rating from S&P or Moody's. The foregoing excludes a long-term supply contract with SMGT due to SMGT's filing for bankruptcy protection during the fourth quarter of 2011. The outstanding accounts receivable associated with SMGT at December 31, 2011 was \$14 million, of which \$11 million has been reserved. See Note 15 for more information.

(PPL Electric)

At December 31, 2011, PPL Electric had no credit exposure under energy supply contracts (including its supply contracts with PPL EnergyPlus).

(LKE, LG&E and KU)

At December 31, 2011, LKE's, LG&E's and KU's credit exposure was not significant.

19. Derivative Instruments and Hedging Activities

Risk Management Objectives

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

PPL has a risk management policy approved by the Board of Directors to manage market risk and counterparty credit risk. The RMC, comprised of senior management and chaired by the Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions and market prices, verification of risk and transaction limits, VaR analyses, portfolio stress tests, gross margin at risk analyses, sensitivity analyses and daily portfolio reporting, including open positions, determinations of fair value and other risk management metrics. During the second quarter of 2011, the RMC formally approved the inclusion of the risk programs for LKE (acquired in November 2010) under the risk management policy. WPD Midlands (acquired in April 2011) adhered to the applicable risk management programs, including interest rate and foreign currency exchange programs, from the date of acquisition.

Market Risk

Market risk is the potential loss PPL and its subsidiaries may incur as a result of price changes associated with a particular financial or commodity instrument. PPL and its subsidiaries utilize forward contracts, futures contracts, options, swaps and structured deals, such as tolling agreements, as part of risk management strategies, to minimize unanticipated fluctuations in earnings caused by changes in commodity prices, volumes of full-requirement sales contracts, basis exposure, interest rates and/or foreign currency exchange rates. All derivatives are recognized on the Balance Sheets at their fair value, unless they qualify for NPNS.

PPL is exposed to market risk from foreign currency exchange risk primarily associated with its investments in U.K. affiliates, as well as additional market risk from certain subsidiaries, as discussed below. As described in Note 9, in January 2011, PPL Energy Supply distributed its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. Therefore, effective January 2011, PPL Energy Supply is no longer subject to interest rate and foreign currency exchange risk associated with investments in U.K. affiliates.

PPL Energy Supply is exposed to market risk from:

- commodity price, basis and volumetric risks for energy and energy-related products associated with the sale of electricity from its generating assets and other electricity marketing activities (including full-requirement sales contracts) and the purchase of fuel and fuel-related commodities for generating assets, as well as for proprietary trading activities;
- interest rate and price risk associated with debt used to finance operations, as well as debt and equity securities in NDT funds and defined benefit plans; and
- foreign currency exchange rate risk associated with firm commitments in currencies other than the applicable functional currency.

PPL Electric is exposed to market and volumetric risks from PPL Electric's obligation as PLR. The PUC has approved a cost recovery mechanism that allows PPL Electric to pass through to customers the cost associated with fulfilling its PLR obligation. This cost recovery mechanism substantially eliminates PPL Electric's exposure to market risk. PPL Electric also mitigates its exposure to volumetric risk by entering into full-requirement supply agreements for its customers. These supply agreements transfer the volumetric risk associated with the PLR obligation to the energy suppliers.

By definition, the regulatory environments for PPL's other regulated entities, LKE (through its subsidiaries LG&E and KU) and WPD, significantly mitigate market risk. LG&E's and KU's rates are set to permit the recovery of prudently incurred costs, including certain mechanisms for fuel, gas supply and environmental expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses. LG&E and KU primarily utilized forward financial transactions to manage price risk associated with expected economic generation capacity in excess of expected load requirements. WPD does not have supply risks as it is only in the distribution business.

LG&E also utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on interest expense. WPD utilizes over-the-counter cross currency swaps to limit exposure to market fluctuations on interest and principal payments from foreign currency exchange rates.

Credit Risk

Credit risk is the potential loss PPL and its subsidiaries may incur due to a counterparty's non-performance, including defaults on payments and energy commodity deliveries.

PPL is exposed to credit risk from interest rate and foreign currency derivatives with financial institutions, as well as additional credit risk through certain of its subsidiaries, as discussed below.

PPL Energy Supply is exposed to credit risk from commodity derivatives with their energy trading partners, which include other energy companies, fuel suppliers and financial institutions.

PPL Electric is exposed to credit risk from PPL Electric's supply agreements for its PLR obligation.

LG&E is exposed to credit risk from interest rate derivatives with financial institutions.

The majority of PPL's and its subsidiaries' credit risk stems from PPL subsidiaries' commodity derivatives for multi-year contracts for energy sales and purchases. If PPL Energy Supply's counterparties fail to perform their obligations under such contracts and PPL Energy Supply could not replace the sales or purchases at the same prices as those under the defaulted contracts, PPL Energy Supply would incur financial losses. Those losses would be recognized immediately or through lower revenues or higher costs in future years, depending on the accounting treatment for the defaulted contracts. In the event a supplier of LKE (through its subsidiaries LG&E and KU) or PPL Electric defaults on its obligation, those entities would be required to seek replacement power or replacement fuel in the market. In general, incremental costs incurred by these entities would be recoverable from customers in future rates.

PPL and its subsidiaries have credit policies to manage their credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. PPL and its subsidiaries may request the additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade or their exposures exceed an established credit limit. See Note 18 for credit concentration associated with financial instruments.

Master Netting Arrangements

PPL and its subsidiaries have elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

PPL's and PPL Energy Supply's obligation to return counterparty cash collateral under master netting arrangements was \$147 million and \$338 million at December 31, 2011 and December 31, 2010.

PPL Electric, LKE, LG&E and KU had no obligation to return cash collateral under master netting arrangements at December 31, 2011 and December 31, 2010.

PPL Energy Supply, PPL Electric and KU had not posted any cash collateral under master netting arrangements at December 31, 2011 and December 31, 2010.

PPL, LKE and LG&E had posted cash collateral under master netting arrangements of \$29 million at December 31, 2011 and \$19 million at December 31, 2010.

Commodity Price Risk (Non-trading)

(PPL and PPL Energy Supply)

Commodity price and basis risks are among PPL's and PPL Energy Supply's most significant risks due to the level of investment that PPL and PPL Energy Supply maintain in their competitive generation assets, as well as the extent of their marketing and proprietary trading activities. Several factors influence price levels and volatilities. These factors include, but are not limited to, seasonal changes in demand, weather conditions, available generating assets within regions, transportation/transmission availability and reliability within and between regions, market liquidity, and the nature and extent of current and potential federal and state regulations.

PPL and PPL Energy Supply enter into financial and physical derivative contracts, including forwards, futures, swaps and options, to hedge the price risk associated with electricity, gas, oil and other commodities. Certain contracts qualify for

NPNS or are non-derivatives and are therefore not reflected in the financial statements until delivery. PPL and PPL Energy Supply segregate their remaining non-trading activities into two categories: cash flow hedge activity and economic activity. In addition, the monetization of certain full-requirement sales contracts in 2010 impacted both the cash flow hedge and economic activity, as discussed below.

Monetization of Certain Full-Requirement Sales Contracts

In July 2010, in order to raise additional cash for the LKE acquisition, PPL Energy Supply monetized certain full-requirement sales contracts that resulted in cash proceeds of \$249 million and triggered certain accounting:

- A portion of these sales contracts had previously been accounted for as NPNS and received accrual accounting treatment. PPL Energy Supply could no longer assert that it was probable that any contracts with these counterparties would result in physical delivery. Therefore, the fair value of the NPNS contracts of \$160 million was recorded on the Balance Sheet in "Price risk management assets," with a corresponding gain of \$144 million recorded to "Wholesale energy marketing - Realized" on the Statement of Income, and \$16 million recorded to "Wholesale energy marketing - Unrealized economic activity," related to full-requirement sales contracts that had not been monetized.
- The related purchases to supply these sales contracts were accounted for as cash flow hedges, with the effective portion of the change in fair value being recorded in AOCI and the ineffective portion recorded in "Energy purchases - Unrealized economic activity." The corresponding cash flow hedges were redesignated and all amounts previously recorded in AOCI were reclassified to earnings. This resulted in a pre-tax reclassification of \$(173) million of losses from AOCI into "Energy purchases - Unrealized economic activity" on the Statement of Income. An additional charge of \$(39) million was also recorded in "Wholesale energy marketing - Unrealized economic activity" on the Statement of Income to reflect the fair value of the sales contracts previously accounted for as economic activity.
- The net result of these transactions, excluding the full-requirement sales contracts that have not been monetized, was a loss of \$(68) million, or \$(40) million, after tax.

The proceeds of \$249 million from these monetizations are reflected in the Statement of Cash Flows as a component of "Net cash provided by operating activities."

Cash Flow Hedges

Many derivative contracts have qualified for hedge accounting so that the effective portion of a derivative's gain or loss is deferred in AOCI and reclassified into earnings when the forecasted transaction occurs. The cash flow hedges that existed at December 31, 2011 range in maturity through 2016. At December 31, 2011, the accumulated net unrecognized after-tax gains (losses) that are expected to be reclassified into earnings during the next 12 months were \$394 million for PPL and PPL Energy Supply. Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedge transaction is probable of not occurring. For 2011, such reclassifications were insignificant. For 2010 and 2009, such reclassifications were after-tax gains (losses) of \$(89) million and \$9 million. The amounts recorded in 2010 were primarily due to the monetization of certain full-requirement sales contracts, for which the associated hedges are no longer required, as discussed above.

For 2011, 2010 and 2009, hedge ineffectiveness associated with energy derivatives was, after-tax, a loss of \$(22) million, a loss of \$(30) million and a gain of \$41 million.

In addition, when cash flow hedge positions fail hedge effectiveness testing, hedge accounting is not permitted in the quarter in which this occurs and, accordingly, the entire change in fair value for the periods that failed is recorded to the Statement of Income. Certain power and gas cash flow hedge positions failed effectiveness testing during 2008 and the first quarter of 2009. However, these positions were not redesignated as hedges, as prospective regression analysis demonstrated that these hedges were expected to be highly effective over their term. During 2009, fewer power and gas cash flow hedges failed hedge effectiveness testing; therefore, a portion of the previously recognized unrealized gains recorded in 2008 associated with these hedges were reversed. For 2009, after-tax gains (losses) of \$(215) million were recognized in earnings as a result of these reversals. During the first quarter of 2010, after-tax gains (losses) of \$(82) million were recognized in earnings as a result of these reversals continuing. Effective April 1, 2010, clarifying accounting guidance was issued that precludes the reversal of previously recognized gains/losses resulting from hedge failures. By the end of the first quarter of 2010, all previously recorded hedge ineffectiveness gains resulting from hedge failures were reversed; thus, the new accounting guidance did not have a significant impact at adoption on April 1, 2010.

Economic Activity

Certain derivative contracts economically hedge the price and volumetric risk associated with electricity, gas, oil and other commodities but do not receive hedge accounting treatment. These derivatives hedge a portion of the economic value of PPL and PPL Energy Supply's competitive generation assets and unregulated full-requirement and retail contracts, which are subject to changes in fair value due to market price volatility and volume expectations. Additionally, economic activity includes the ineffective portion of qualifying cash flow hedges (see "Cash Flow Hedges" above). The derivative contracts in this category that existed at December 31, 2011 range in maturity through 2019.

Examples of economic activity include certain purchase contracts used to supply full-requirement sales contracts; FTRs or basis swaps used to hedge basis risk associated with the sale of competitive generation or supplying unregulated full-requirement sales contracts; spark spreads (sale of electricity with the simultaneous purchase of fuel); retail electric and gas activities; and fuel oil swaps used to hedge price escalation clauses in coal transportation and other fuel-related contracts. PPL Energy Supply also uses options, which include the sale of call options and the purchase of put options tied to a particular generating unit. Since the physical generating capacity is owned, the price exposure is limited to the cost of the particular generating unit and does not expose PPL Energy Supply to uncovered market price risk.

Unrealized activity associated with monetizing certain full-requirement sales contracts was also included in economic activity during 2011.

The net fair value of economic positions at December 31, 2011 and December 31, 2010 was a net (asset) liability of \$63 million and \$389 million for PPL Energy Supply. The unrealized gains (losses) for economic activity are as follows.

	<u>2011</u>	<u>2010</u>	<u>2009</u>
Operating Revenues			
Unregulated retail electric and gas	\$ 31	\$ 1	\$ 6
Wholesale energy marketing	1,407	(805)	(229)
Operating Expenses			
Fuel	6	29	49
Energy purchases	(1,123)	286	(155)

The net gains (losses) recorded in "Wholesale energy marketing" resulted primarily from certain full-requirement sales contracts for which PPL Energy Supply did not elect NPNS, from hedge ineffectiveness, including hedges that failed effectiveness testing, as discussed in "Cash Flow Hedges" above, and from the July 2010 monetization of certain full-requirement sales contracts. The net gains (losses) recorded in "Energy purchases" resulted primarily from certain purchase contracts to supply the full-requirement sales contracts noted above for which PPL Energy Supply did not elect hedge treatment, from hedge ineffectiveness, including hedges that failed effectiveness testing, and from purchase contracts that no longer hedge the full-requirement sales contracts that were monetized as discussed above in "Monetization of Certain Full-Requirement Sales Contracts."

(PPL, LKE, LG&E and KU)

LG&E and KU primarily utilized forward financial transactions to manage price risk associated with expected economic generation capacity in excess of expected load requirements. Hedge accounting treatment was not elected for these transactions; therefore, realized and unrealized gains and losses are recorded in the Statements of Income.

The net fair value of economic positions for LKE, LG&E and KU at December 31, 2010 were not significant. There are no economic positions at December 31, 2011. Unrealized gains (losses) for economic activity for LKE, LG&E and KU in 2011, 2010 and 2009 were not significant.

(PPL and PPL Energy Supply)

Commodity Price Risk (Trading)

PPL Energy Supply also executes energy contracts to take advantage of market opportunities. As a result, PPL Energy Supply may at times create a net open position in its portfolio that could result in significant losses if prices do not move in the manner or direction anticipated. PPL Energy Supply's trading activity is shown in "Net energy trading margins" on the Statements of Income.

Commodity Volumetric Activity

PPL Energy Supply currently employs four primary strategies to maximize the value of its wholesale energy portfolio. As further discussed below, these strategies include the sales of baseload generation, optimization of intermediate and peaking generation, marketing activities, and proprietary trading activities. The tables within this section present the volumes of PPL Energy Supply's derivative activity, excluding those that qualify for NPNS, unless otherwise noted.

Sales of Baseload Generation

PPL Energy Supply has a formal hedging program for its competitive baseload generation fleet, which includes 7,252 MW of nuclear, coal and hydroelectric generating capacity. The objective of this program is to provide a reasonable level of near-term cash flow and earnings certainty while preserving upside potential of power price increases over the medium term. PPL Energy Supply sells its expected generation output on a forward basis using both derivative and non-derivative instruments. Both are included in the following tables.

The following table presents the expected sales, in GWh, from competitive baseload generation and tolling arrangements that are included in the baseload portfolio based on current forecasted assumptions for 2012-2014. These expected sales could be impacted by several factors, including plant availability.

	2012	2013	2014
	53,737	53,136	53,502

The following table presents the percentage of expected baseload generation sales shown above that has been sold forward under fixed price contracts and the related percentage of fuel that has been purchased or committed at December 31, 2011.

Year	Derivative Sales (a)	Total Power Sales (b)	Fuel Purchases (c)	
			Coal	Nuclear
2012	85%	93%	98%	100%
2013	63%	71%	89%	100%
2014 (d)	4%	10%	62%	100%

- (a) Excludes non-derivative contracts and contracts that qualify for NPNS. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.
- (b) Amount represents derivative (including contracts that qualify for NPNS) and non-derivative contracts. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option. Percentages are based on fixed-price contracts only.
- (c) Coal and nuclear contracts receive accrual accounting treatment, as they are not derivative contracts. Percentages are based on both fixed- and variable-priced contracts.
- (d) Volumes for derivative sales contracts that deliver in future periods total 1,541 GWh and 7.2 Bcf.

In addition to the fuel purchases above, PPL Energy Supply attempts to economically hedge the fuel price risk that is within its fuel-related and coal transportation contracts, which are tied to changes in crude oil or diesel prices. PPL Energy Supply has also entered into contracts to financially hedge the physical sale of oil. The following table presents the net volumes (in thousands of barrels) of derivative (sales)/purchase contracts used in support of these strategies at December 31, 2011.

	2012	2013	2014
Oil Swaps	591	540	240

Optimization of Intermediate and Peaking Generation

In addition to its competitive baseload generation activities, PPL Energy Supply attempts to optimize the overall value of its competitive intermediate and peaking fleet, which includes 3,256 MW of gas and oil-fired generation. The following table presents the net volumes of derivative (sales)/purchase contracts used in support of this strategy at December 31, 2011.

	Units	2012	2013	2014 (a)
Power Sales	GWh	(2,860)	(1,224)	(408)
Fuel Purchases (b)	Bcf	27.1	8.1	2.5

- (a) Volumes for derivative contracts used in support of these strategies that deliver in future periods are insignificant.
- (b) Included in these volumes are non-options and exercised option contracts that converted to non-option derivative contracts. Volumes associated with option contracts are not significant.

Marketing Activities

PPL Energy Supply's marketing portfolio is comprised of full-requirement sales contracts and their related supply contracts, retail gas and electricity sales contracts and other marketing activities. The full-requirement sales contracts and their related supply contracts make up a significant component of the marketing portfolio. The obligations under the full-requirement sales contracts include supplying a bundled product of energy, capacity, RECs, and other ancillary products. The full-requirement sales contracts PPL Energy Supply is awarded do not provide for specific levels of load, and actual load could vary significantly from forecasted amounts. PPL Energy Supply uses a variety of strategies to hedge its full-requirement sales contracts, including purchasing energy at a liquid trading hub or directly at the load delivery zone, purchasing capacity and RECs in the market and supplying the energy, capacity and RECs with its generation. The following table presents the volume of (sales)/purchase contracts, excluding FTRs, RECs, basis and capacity contracts, used in support of these activities at December 31, 2011.

	<u>Units</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>
Energy sales contracts (a)	GWh	(16,235)	(6,524)	(3,681)
Related energy supply contracts (a)				
Energy purchases	GWh	10,658	1,359	136
Volumetric hedges (b)	GWh	254	128	93
Generation supply	GWh	5,389	4,462	3,259
Retail gas sales contracts	Bcf	(13.5)	(2.6)	(0.7)
Retail gas purchase contracts	Bcf	13.2	2.5	0.7

(a) Includes NPNS and contracts that are not derivatives, which receive accrual accounting.

(b) PPL Energy Supply uses power and gas options, swaps and futures to hedge the volumetric risk associated with full-requirement sales contracts since the demand for power varies hourly. Volumes for option contracts factor in the probability of an option being exercised and may be less than the notional amount of the option.

Proprietary Trading Activity

At December 31, 2011, PPL Energy Supply's proprietary trading positions, excluding FTR, basis and capacity contract activity that is included in the tables below, were not significant.

Other Energy-Related Positions

FTRs and Other Basis Positions

PPL Energy Supply buys and sells FTRs and other basis positions to mitigate the basis risk between delivery points related to the sales of its generation, the supply of its full-requirement sales contracts and retail contracts, as well as for proprietary trading purposes. The following table presents the net volumes of derivative FTR and basis (sales)/purchase contracts at December 31, 2011.

	<u>Units</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>
FTRs	GWh	16,562		
Power Basis Positions (a)	GWh	(18,035)	(8,343)	(2,628)
Gas Basis Positions (a)	Bcf	11.0	(5.2)	(0.9)

(a) Net volumes that deliver in future periods are (677) GWh and (5.1) Bcf.

Capacity Positions

PPL Energy Supply buys and sells capacity related to the sales of its generation and the supply of its full-requirement sales contracts. These contracts qualify for NPNS and receive accrual accounting. PPL Energy Supply also sells and purchases capacity for proprietary trading purposes. These contracts are marked to fair value through earnings. The following table presents the net volumes of derivative capacity (sales)/purchase contracts at December 31, 2011.

	<u>Units</u>	<u>2012</u>	<u>2013</u>	<u>2014 (a)</u>
Capacity	MW-months	(7,797)	(3,108)	(2,578)

(a) Volumes that deliver in future periods are 989 MW-months.

Interest Rate Risk

(PPL, PPL Energy Supply, LKE and LG&E)

PPL and its subsidiaries have issued debt to finance their operations, which exposes them to interest rate risk. PPL and its subsidiaries utilize various financial derivative instruments to adjust the mix of fixed and floating interest rates in their debt portfolio, adjust the duration of their debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under the risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of PPL's and its subsidiaries' debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges *(PPL and PPL Energy Supply)*

Interest rate risks include exposure to adverse interest rate movements for outstanding variable rate debt and for future anticipated financings. PPL and PPL Energy Supply enter into financial interest rate swap contracts that qualify as cash flow hedges to hedge floating interest rate risk associated with both existing and anticipated debt issuances. For PPL, outstanding interest rate swap contracts ranged in maturity through 2022 and had a notional value of \$150 million at December 31, 2011. No contracts were outstanding for PPL Energy Supply at December 31, 2011.

Through PPL, PPL WEM holds a notional position in cross-currency interest rate swaps totaling \$960 million that mature through 2021 to hedge the interest payments and principal of the U.S. dollar-denominated senior notes issued by PPL WEM in April 2011. Additionally, PPL WW holds a notional position in cross-currency interest rate swaps totaling \$302 million that mature through December 2028 to hedge the interest payments and principal of its U.S. dollar-denominated senior notes. In 2010, these PPL WW swaps were part of PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding effective January 2011, these swaps are no longer part of PPL Energy Supply's business.

For 2011, hedge ineffectiveness associated with interest rate derivatives resulted in a net after-tax gain (loss) of \$(9) million for PPL, which included a gain (loss) of \$(4) million attributable to certain interest rate swaps that failed hedge effectiveness testing during the second quarter of 2011. For 2010, hedge ineffectiveness associated with these derivatives resulted in a net after-tax gain (loss) of \$(9) million for PPL and was insignificant for PPL Energy Supply. For 2009, hedge ineffectiveness associated with these derivatives was insignificant for PPL and PPL Energy Supply.

Cash flow hedges are discontinued if it is no longer probable that the original forecasted transaction will occur by the end of the originally specified time periods and any amounts previously recorded in AOCI are reclassified into earnings once it is determined that the hedged transaction is probable of not occurring. PPL had no such reclassifications for 2011. As a result of the expected net proceeds from the anticipated sale of certain non-core generation facilities, coupled with the monetization of certain full-requirement sales contracts, debt that had been planned to be issued by PPL Energy Supply in 2010 was no longer needed. As a result, hedge accounting associated with interest rate swaps entered into by PPL in anticipation of a debt issuance by PPL Energy Supply was discontinued. PPL reclassified into earnings a net after-tax gain (loss) of \$(19) million in 2010 and an insignificant amount in 2009. PPL Energy Supply had no such reclassifications in 2011, 2010 and 2009.

At December 31, 2011, the accumulated net unrecognized after-tax gains (losses) on qualifying derivatives that are expected to be reclassified into earnings during the next 12 months were \$(12) million for PPL and insignificant for PPL Energy Supply. Amounts are reclassified as the hedged interest payments are made.

Fair Value Hedges

(PPL and PPL Energy Supply)

PPL and PPL Energy Supply are exposed to changes in the fair value of their debt portfolios. To manage this risk, PPL and PPL Energy Supply may enter into financial contracts to hedge fluctuations in the fair value of existing debt issuances due to changes in benchmark interest rates. At December 31, 2011, PPL held contracts that range in maturity through 2047 and had a notional value of \$99 million. PPL Energy Supply did not hold any such contracts at December 31, 2011. PPL and PPL Energy Supply did not recognize gains or losses resulting from the ineffective portion of fair value hedges or from a portion of the hedging instrument being excluded from the assessment of hedge effectiveness for 2011, 2010 and 2009.

(PPL)

In 2011, PPL Electric redeemed \$400 million of 7.125% Senior Secured Bonds due 2013. As a result of this redemption, PPL recorded a gain (loss) of \$22 million, or \$14 million after tax, for 2011 in "Other Income (Expense) - net" on the

Statement of Income as a result of accelerated amortization of the fair value adjustments to the debt in connection with previously settled fair value hedges. Additionally, PPL recognized insignificant amounts from hedges of debt that no longer qualified as fair value hedges for 2010 and 2009.

(PPL Energy Supply)

PPL Energy Supply did not recognize any gains or losses resulting from hedges of debt issuances that no longer qualified as fair value hedges for 2011, 2010 and 2009.

Economic Activity (PPL, LKE and LG&E)

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income when the hedged transaction occurs. At December 31, 2011, LG&E held contracts with aggregate notional amounts of \$179 million that range in maturity through 2033. The fair value of these contracts were recorded as liabilities of \$60 million and \$34 million at December 31, 2011 and 2010, with equal offsetting amounts recorded as regulatory assets.

Prior to the third quarter of 2010, LG&E Predecessor accounted for these contracts as cash flow hedges and reclassified amounts previously recorded in AOCI to earnings in the same period during which the forecasted transaction affected earnings.

Foreign Currency Risk

(PPL and PPL Energy Supply)

PPL is exposed to foreign currency risk, primarily through investments in U.K. affiliates. In addition, PPL and its subsidiaries are exposed to foreign currency risk associated with firm commitments in currencies other than the applicable functional currency.

PPL has adopted a foreign currency risk management program designed to hedge certain foreign currency exposures, including firm commitments, recognized assets or liabilities, anticipated transactions and net investments. In addition, PPL enters into financial instruments to protect against foreign currency translation risk of expected earnings.

Cash Flow Hedges

PPL may enter into foreign currency derivatives associated with foreign currency-denominated debt and the exchange rate associated with firm commitments (including those for the purchase of equipment) denominated in foreign currencies; however, at December 31, 2011, there were no existing contracts of this nature. Amounts previously settled and recorded in AOCI are reclassified as the hedged interest payments are made and as the related equipment is depreciated. Insignificant amounts are expected to be reclassified into earnings during the next 12 months.

During 2011, 2010 and 2009, no cash flow hedges were discontinued because it was probable that the original forecasted transaction would not occur by the end of the originally specified time periods.

Fair Value Hedges

PPL enters into foreign currency forward contracts to hedge the exchange rate risk associated with firm commitments denominated in foreign currencies; however, at December 31, 2011, there were no existing contracts of this nature and no gains or losses recorded for 2011, 2010 and 2009 related to hedge ineffectiveness, or from a portion of the hedging instrument being excluded from the assessment of hedge effectiveness, or from hedges of firm commitments that no longer qualified as fair value hedges.

Net Investment Hedges

PPL enters into foreign currency contracts on behalf of a subsidiary to protect the value of a portion of its net investment in WPD. In 2010 and 2009, these contracts were included in PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding, effective January 2011, these contracts are no longer included in PPL Energy Supply's business.

The contracts outstanding at December 31, 2011 had an aggregate notional amount of £92 million (approximately \$150 million based on contracted rates). The settlement dates of these contracts range from January 2012 through September 2012. At December 31, 2011 and 2010, the fair value of these positions was a net asset of \$7 million. For 2011, PPL recognized an insignificant amount of activity in the foreign currency translation adjustment component of AOCI. For 2010 and 2009, PPL and PPL Energy Supply recognized insignificant amounts in the foreign currency translation adjustment component of AOCI. At December 31, 2011, PPL had \$19 million of accumulated net investment hedge after-tax gains (losses) that were included in the foreign currency translation adjustment component of AOCI. At December 31, 2010, PPL and PPL Energy Supply had \$15 million of accumulated net investment hedge after-tax gains (losses) that were included in the foreign currency translation adjustment component of AOCI.

Economic Activity

(PPL)

In anticipation of the repayment of a portion of the GBP-denominated borrowings under the 2011 Bridge Facility with U.S. dollar proceeds received from PPL's issuance of common stock and 2011 Equity Units and PPL WEM's issuance of U.S. dollar-denominated senior notes, as discussed in Note 7, PPL entered into forward contracts to purchase GBP in order to economically hedge the foreign currency exchange rate risk related to the repayment. When these trades were settled in April 2011, PPL recorded \$55 million of pre-tax, net gains (losses) in "Other Income (Expense) - net" on the Statements of Income.

(PPL and PPL Energy Supply)

PPL and PPL Energy Supply may enter into foreign currency contracts as an economic hedge of anticipated earnings denominated in British pounds sterling. In 2010 and 2009, these contracts were included in PPL Energy Supply's business. As a result of the distribution of PPL Energy Supply's membership interest in PPL Global to PPL Energy Funding, effective January 2011, these contracts are no longer included in PPL Energy Supply's business. At December 31, 2011, the total exposure hedged by PPL was £288 million and the fair value of these positions was a net asset of \$11 million. These contracts had termination dates ranging from January 2012 to November 2012. For PPL and PPL Energy Supply, the net fair value of similar hedging instruments outstanding at December 31, 2010 was insignificant. PPL records gains (losses) on these contracts, both realized and unrealized, in "Other Income (Expense) - net" on the Statements of Income. PPL Energy Supply records gains (losses) on these contracts, both realized and unrealized, in "Income (Loss) from Discontinued Operations (net of income taxes)" on the Statements of Income. For 2011, PPL recorded gains (losses) of \$10 million. For 2010, the amounts for PPL and PPL Energy Supply were insignificant. For 2009, PPL and PPL Energy Supply recorded gains (losses) of \$(9) million.

Accounting and Reporting

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

All derivative instruments are recorded at fair value on the Balance Sheet as an asset or liability unless they qualify for NPNS. NPNS contracts for PPL and PPL Energy Supply include full-requirement sales contracts, other physical sales contracts and certain retail energy and physical capacity contracts, and for PPL Electric include full-requirement purchase contracts and other physical purchase contracts. Changes in the derivatives' fair value are recognized currently in earnings unless specific hedge accounting criteria are met, except for the changes in fair value of LG&E's interest rate swaps, which beginning in the third quarter of 2010, have been recognized as regulatory assets. See Note 6 for amounts recorded in regulatory assets at December 31, 2011 and December 31, 2010.

See Note 1 for additional information on accounting policies related to derivative instruments.

(PPL)

The following tables present the fair value and location of derivative instruments recorded on the Balance Sheets.

	December 31, 2011				December 31, 2010

Interest rate swaps		55		32
Total noncurrent		55		32
Total derivatives		\$ 60		\$ 36

(a) Represents the location on the Balance Sheet.

The following tables present the pre-tax effect of derivative instruments recognized in income or regulatory assets for the periods ended December 31, 2011, 2010 and 2009, for the Successor and Predecessor.

Derivatives Not Designated as Hedging Instruments:	Location of Gain (Loss) Recognized in Income on Derivatives	Successor		Predecessor	
		Year Ended December 31, 2011	Two Months Ended December 31, 2010	Ten Months Ended October 31, 2010	Year Ended December 31, 2009
Interest rate swaps	Interest expense	\$ (8)	\$ (1)	\$ (7)	\$ 1
Commodity contracts	Operating revenues - retail and wholesale	(1)	(2)	3	9
	Total	<u>\$ (9)</u>	<u>\$ (3)</u>	<u>\$ (4)</u>	<u>\$ 10</u>

Derivatives Not Designated as Hedging Instruments:	Location of Gain (Loss) Recognized as Regulatory Liabilities/Assets	December 31, 2011	December 31, 2010
Interest rate swaps	Regulatory assets	\$ (26)	\$ (43)

(KU)

There were no derivatives designated as hedging instruments as of December 31, 2011 and December 31, 2010. There were no after-tax balances of accumulated net gains (losses) in AOCI at December 31, 2011 and 2010. The gains and losses recognized in income on derivatives associated with commodity contracts were not significant for the periods ended December 31, 2011, 2010, and 2009.

Credit Risk-Related Contingent Features (PPL, PPL Energy Supply, LKE and LG&E)

Certain of PPL's, PPL Energy Supply's, LKE's and LG&E's derivative contracts contain credit risk-related contingent provisions which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in the credit ratings of PPL, PPL Energy Supply, LKE, LG&E, or certain of their subsidiaries. Most of these provisions would require PPL, PPL Energy Supply, LKE or LG&E to transfer additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these provisions also would allow the counterparty to require additional collateral upon each decrease in the credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade (i.e., below BBB- for S&P or Fitch, or Baa3 for Moody's), and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent provisions require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization by PPL, PPL Energy Supply, LKE or LG&E on derivative instruments in net liability positions.

Additionally, certain of PPL's, PPL Energy Supply's, LKE's and LG&E's derivative contracts contain credit risk-related contingent provisions that require PPL, PPL Energy Supply, LKE or LG&E to provide "adequate assurance" of performance if the other party has reasonable grounds for insecurity regarding PPL's, PPL Energy Supply's, LKE's or LG&E's performance of its obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" provisions.

At December 31, 2011, the effect of a decrease in credit ratings below investment grade on derivative contracts that contain credit contingent features and were in a net liability position is summarized as follows:

	PPL	PPL Energy Supply	LKE	LG&E
Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent provisions	\$ 156	\$ 118	\$ 39	\$ 39
Aggregate fair value of collateral posted on these derivative instruments	38	9	29	29
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)	183	173	10	10

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

20. Goodwill and Other Intangible Assets

Goodwill

(PPL and PPL Energy Supply)

The changes in the carrying amount of goodwill by segment were:

	Kentucky Regulated		International Regulated		Supply		Total	
	2011	2010	2011	2010	2011	2010	2011	2010
PPL								
Balance at beginning of period (a)	\$ 662		\$ 679	\$ 715	\$ 420	\$ 91	\$ 1,761	\$ 806
Goodwill recognized during the period (b)		\$ 662	2,391			334	2,391	996
Allocation to discontinued operations (c)						(5)		(5)
Effect of foreign currency exchange rates			(38)	(36)			(38)	(36)
Balance at end of period (a)	\$ 662	\$ 662	\$ 3,032	\$ 679	\$ 420	\$ 420	\$ 4,114	\$ 1,761

	International Regulated		Supply		Total		
	2011	2010	2011	2010	2011	2010	
PPL Energy Supply							
Balance at beginning of period (a)		\$ 679	\$ 715	\$ 86	\$ 91	\$ 765	\$ 806
Derecognition (d)		(679)				(679)	
Allocation to discontinued operations (c)					(5)		(5)
Effect of foreign currency exchange rates			(36)				(36)
Balance at end of period (a)		\$ 679	\$ 86	\$ 86	\$ 86	\$ 765	\$ 765

- (a) There were no accumulated impairment losses related to goodwill.
 (b) Activity in 2011 recognized as a result of the acquisition of WPD Midlands. Activity in 2010 recognized as a result of the acquisition of LKE. A portion of the goodwill related to the acquisition of LKE was allocated to the Supply segment. See Note 10 for additional information.
 (c) Represents goodwill allocated to certain non-core generation facilities that were held for sale in 2010 and sold in 2011.
 (d) Represents the amount of goodwill derecognized as a result of PPL Energy Supply's distribution of its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. See Note 9 for additional information on the distribution. Subsequent to the distribution, PPL Energy Supply operates in a single reportable segment and reporting unit.

(LKE, LG&E and KU)

The changes in the carrying amounts of goodwill were as follows.

	LKE	LG&E	KU
Balance at December 31, 2009 and October 31, 2010, Predecessor (a)	\$ 837		
Dispositions (b)	(837)		
Purchase accounting adjustments (c)	996	\$ 389	\$ 607
Balance at December 31, 2010 and 2011, Successor (a)	\$ 996	\$ 389	\$ 607

- (a) The opening balances included \$1.5 billion of impairment losses related to goodwill recorded in 2009. There were no accumulated impairment losses related to goodwill at December 31, 2010 or 2011.
 (b) Predecessor goodwill was eliminated in purchase accounting at November 1, 2010.
 (c) Recognized as a result of the November 1, 2010 acquisition by PPL. For LG&E and KU, the allocation of goodwill was based on the net asset values of the respective companies. See Note 10 for additional information.

(LKE)

For the 2009 annual impairment test, the estimated fair values of LG&E and KU were based on a combination of the income approach, which estimates the fair value of the reporting unit based on discounted future cash flows and the market approach, which estimates the fair value of the reporting unit based on market comparables. The discounted cash flows for LG&E and KU were based on discrete financial forecasts developed by management for planning purposes and consistent with those given to E.ON AG, LKE's former parent company. Cash flows beyond the discrete forecasts were estimated using a terminal-value calculation, which incorporated historical and forecasted financial trends for each of LG&E and KU and considered long-term earnings growth rates for publicly-traded peer companies. The level 3 income-approach valuations included a cash flow discount rate of 6.3% and a terminal-value growth rate of 1.1%. In addition, subsequent to 2009 but prior to the issuance of the 2009 financial statements, discussions were held with interested parties for the possible sale of LKE, including the regulated utilities. Data from this process was used for evaluating the carrying value of goodwill at December 31, 2009.

Based on information represented by bids received from interested parties, including PPL, LKE completed a goodwill impairment analysis at December 31, 2009. As a result of the impairment analysis described above, LKE recorded a goodwill impairment charge of \$1.5 billion in 2009. The primary factors contributing to the goodwill impairment charge in 2009 were the significant economic downturn, which caused a decline in the volume of projected sales of electricity to

commercial customers and an increase in the implied discount rate due to higher risk premiums. In addition, a lower control premium was assumed, based on observable market data.

Other Intangibles

(PPL)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Contracts (a) (b)	\$ 611	\$ 155	\$ 597	\$ 49
Land and transmission rights (c)	263	110	256	110
Emission allowances/RECs (d) (e) (f)	20		37	
Licenses and other (g)	265	35	242	30
Total subject to amortization	1,159	300	1,132	189
Not subject to amortization due to indefinite life:				
Land and transmission rights	16		16	
Easements (h)	199		77	
Total not subject to amortization due to indefinite life	215		93	
Total	\$ 1,374	\$ 300	\$ 1,225	\$ 189

- (a) Gross carrying amount for 2010 includes \$394 million, which represents the fair value of contracts with terms favorable to market recognized as a result of the 2010 acquisition of LKE. The weighted average amortization period of these contracts was five years at the acquisition date. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same weighted-average period as the intangible assets, eliminating any income statement impact. See Note 6 for additional information.
- (b) Gross carrying amount for 2011 includes \$10 million, which represents the fair value of customer contracts with terms favorable to market recognized as a result of the 2011 acquisition of WPD Midlands. The weighted-average amortization period of these contracts was ten years at the acquisition date. See Note 10 for additional information.
- (c) Gross carrying amount for 2010 includes \$14 million, which represents the fair value of land and transmission rights recognized as a result of the 2010 acquisition of LKE. The weighted-average amortization period of these rights was 14 years at the acquisition date. An offsetting regulatory liability was recorded related to these rights, which is being amortized over the same weighted-average period as the intangible assets, eliminating any income statement impact. See Note 6 for additional information.
- (d) These emission allowances/RECs are expensed when consumed or sold. Consumption expense was \$16 million, \$45 million, and \$32 million in 2011, 2010 and 2009. Consumption expense is expected to be insignificant in future periods.
- (e) Gross carrying amount for 2010 includes the fair value of emission allowances recognized as a result of the 2010 acquisition of LKE. An offsetting regulatory liability was recorded related to these emission allowances, which is being amortized as the emission allowances are consumed, eliminating any income statement impact. See Note 6 for additional information. The carrying amounts of these emission allowances were \$5 million and \$16 million as of December 31, 2011 and 2010. Consumption related to these emission allowances was \$11 million and \$2 million for 2011 and 2010.
- (f) During 2011 and 2010, PPL recorded \$7 million and \$17 million of impairment charges. See Note 18 for additional information.
- (g) "Other" includes costs for the development of licenses, the most significant of which is the COLA. Amortization of these costs begins when the related asset is placed in service. See Note 8 for additional information on the COLA.
- (h) Gross carrying amount for 2011 includes \$88 million, which represents the fair value of easements recognized as a result of the 2011 acquisition of WPD Midlands. See Note 10 for additional information.

Current intangible assets are included in "Other current assets" and long-term intangible assets are included in "Other intangibles" in their respective areas on the Balance Sheets.

Amortization expense, excluding consumption of emission allowances/RECs, was as follows:

	2011	2010	2009
Intangible assets with no regulatory offset	\$ 25	\$ 24	\$ 22
Intangible assets with regulatory offset	87	11	
Total	\$ 112	\$ 35	\$ 22

Amortization expense for each of the next five years, excluding consumption of emission allowances/RECs, is estimated to be:

	2012	2013	2014	2015	2016
Intangible assets with no regulatory offset	\$ 24	\$ 24	\$ 24	\$ 24	\$ 22
Intangible assets with a regulatory offset	46	52	46	51	27
Total	\$ 70	\$ 76	\$ 70	\$ 75	\$ 49

(PPL Energy Supply)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Contracts	\$ 203	\$ 53	\$ 203	\$ 38
Land and transmission rights	17	13	19	16
Emission allowances/RECs (a) (b)	15		20	
Licenses and other (c)	255	30	239	29
Total subject to amortization	490	96	481	83
Not subject to amortization due to indefinite life:				
Easements (d)			77	
Total	\$ 490	\$ 96	\$ 558	\$ 83

- (a) Removed from the Balance Sheets and expensed when consumed or sold. Consumption expense was \$16 million, \$46 million, and \$32 million in 2011, 2010, and 2009. Consumption expense is expected to be insignificant in future periods.
- (b) During 2011 and 2010, PPL Energy Supply recorded \$7 million and \$16 million of impairment charges. See Note 18 for additional information.
- (c) "Other" includes costs for the development of licenses, the most significant of which is the COLA. Amortization of these costs begins when the related asset is placed in service. See Note 8 for additional information on the COLA.
- (d) Easements for 2010 pertain to WPD. As a result of PPL Energy Supply's January 2011 distribution of its membership interest in PPL Global to its parent, PPL Energy Funding, the assets and liabilities of PPL Global, including WPD's easements at December 31, 2010 were removed from PPL Energy Supply's balance sheet in 2011. See Note 9 for additional information.

Current intangible assets are included in "Other current assets" and long-term intangible assets are presented as "Other intangibles" in their respective areas on the Balance Sheets.

Amortization expense, excluding consumption of emission allowances/RECs, was as follows:

	2011	2010	2009
Amortization expense	\$ 20	\$ 20	\$ 19

Amortization expense for each of the next five years, excluding consumption of emission allowances/RECs, is estimated to be:

	2012	2013	2014	2015	2016
Estimated amortization expense	\$ 20	\$ 20	\$ 20	\$ 20	\$ 18

(PPL Electric)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Land and transmission rights	\$ 232	\$ 96	\$ 222	\$ 93
Licenses and other	4	1	3	1
Total subject to amortization	236	97	225	94
Not subject to amortization due to indefinite life:				
Land and transmission rights	16		16	
Total	\$ 252	\$ 97	\$ 241	\$ 94

Intangible assets are shown as "Intangibles" on the Balance Sheets.

Amortization expense was insignificant in 2011, 2010 and 2009, and is expected to be insignificant in future years.

(LKE)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Coal contracts (a)	\$ 269	\$ 89	\$ 269	\$ 9
Land and transmission rights (b)	14	1	14	
Emission allowances (c)	5		16	
OVEC power purchase agreement (d)	126	9	126	2
Total subject to amortization	\$ 414	\$ 99	\$ 425	\$ 11

- (a) Gross carrying amount represents the fair value of contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 6 for additional information.
- (b) Gross carrying amount represents the fair value of land and transmission rights recognized as an intangible asset as a result of adopting PPL's accounting policies in the Successor period. Amortization expense is recovered through base rates and is expected to be insignificant for future periods.
- (c) Represents the fair value of emission allowances recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these emission allowances, which is being amortized as the emission allowances are consumed, eliminating any income statement impact. Consumption related to these emission allowances was \$11 million and \$2 million for 2011 and 2010.
- (d) Gross carrying amount represents the fair value of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. See Note 6 for additional information.

Current intangible assets and long-term intangible assets are presented as "Other intangibles" in their respective areas on the Balance Sheets.

Amortization expense for the Successor, excluding consumption of emission allowances, was as follows:

	2011	2010
Intangible assets with no regulatory offset	\$ 1	
Intangible assets with regulatory offset	87	\$ 11
Total	\$ 88	\$ 11

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2012	2013	2014	2015	2016
Intangibles with regulatory offset	\$ 46	\$ 52	\$ 46	\$ 51	\$ 27

(LG&E)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Coal contracts (a)	\$ 124	\$ 46	\$ 124	\$ 6
Land and transmission rights (b)	6	1	6	
Emission allowances (c)	2		7	
OVEC power purchase agreement (d)	87	6	87	1
Total subject to amortization	\$ 219	\$ 53	\$ 224	\$ 7

- (a) Gross carrying amount represents the fair value of contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 6 for additional information.
- (b) Gross carrying amount represents the fair value of land and transmission rights recognized as an intangible asset as a result of adopting PPL's accounting policies in the Successor period. Amortization expense is recovered through base rates and is expected to be insignificant for future periods.
- (c) Represents the fair value of emission allowances recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these emission allowances, which is being amortized as the emission allowances are consumed, eliminating any income statement impact. Consumption related to these emission allowances was \$5 million and \$1 million for 2011 and 2010.
- (d) Gross carrying amount represents the fair value of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. See Note 6 for additional information.

Current intangible assets and long-term intangible assets are presented as "Other intangibles" in their respective areas on the Balance Sheets.

Amortization expense for the Successor, excluding consumption of emission allowances, was as follows:

	2011	2010
Intangible assets with no regulatory offset	\$ 1	
Intangible assets with regulatory offset	45	\$ 7
Total	\$ 46	\$ 7

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2012	2013	2014	2015	2016
Intangibles with regulatory offset	\$ 22	\$ 25	\$ 23	\$ 24	\$ 14

(KU)

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2011		December 31, 2010	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Contracts (a)	\$ 145	\$ 43	\$ 145	\$ 3

Emission allowances (c)	3		9	
OVEC power purchase agreement (d)	39	3	39	1
Total subject to amortization	\$ 195	\$ 46	\$ 201	\$ 4

- (a) Gross carrying amount represents the fair value of contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 6 for additional information.
- (b) Gross carrying amount represents the fair value of land and transmission rights recognized as an intangible asset as a result of adopting PPL's accounting policies in the Successor period. Amortization expense is recovered through base rates and is expected to be insignificant for future periods.
- (c) Represents the fair value of emission allowances recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these emission allowances, which is being amortized as the emission allowances are consumed, eliminating any income statement impact. Consumption related to these emission allowances was \$6 million and \$1 million for 2011 and 2010.
- (d) Gross carrying amount represents the fair value of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. See Note 6 for additional information.

Current intangible assets and long-term intangible assets are presented as "Other intangibles" in their respective areas on the Balance Sheets.

Amortization expense for the Successor, excluding consumption of emission allowances, was as follows:

	2011	2010
Intangible assets with regulatory offset	\$ 42	\$ 4

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2012	2013	2014	2015	2016
Intangibles with regulatory offset	\$ 24	\$ 27	\$ 23	\$ 27	\$ 13

21. Asset Retirement Obligations

(PPL)

WPD has recorded conditional AROs required by U.K. law related to treated wood poles, gas-filled switchgear and fluid-filled cables.

(PPL and PPL Energy Supply)

PPL Energy Supply has recorded liabilities in the financial statements to reflect various legal obligations associated with the retirement of long-lived assets, the most significant of which relates to the decommissioning of the Susquehanna plant. The accrued nuclear decommissioning obligation was \$292 million and \$270 million at December 31, 2011 and 2010, and is included in "Asset retirement obligations" on the Balance Sheets. The fair value of investments that are legally restricted for

the decommissioning of the Susquehanna nuclear plant was \$640 million and \$618 million at December 31, 2011 and 2010, and is included in "Nuclear plant decommissioning trust funds" on the Balance Sheets. See Notes 18 and 23 for additional information on the nuclear decommissioning trust funds. Other AROs recorded relate to various environmental requirements for coal piles, ash basins and other waste basin retirements.

PPL Energy Supply has recorded several conditional AROs, the most significant of which related to the removal and disposal of asbestos-containing material. In addition to the AROs that were recorded for asbestos-containing material, PPL Energy Supply identified other asbestos-related obligations, but were unable to reasonably estimate their fair values. PPL Energy Supply management was unable to reasonably estimate a settlement date or range of settlement dates for the remediation of all of the asbestos-containing material at certain of the generation plants. If economic events or other circumstances change that enable PPL Energy Supply to reasonably estimate the fair value of these retirement obligations, they will be recorded at that time.

PPL Energy Supply also identified legal retirement obligations associated with the retirement of a reservoir that could not be reasonably estimated due to an indeterminable settlement date.

(PPL and PPL Electric)

PPL Electric has identified legal retirement obligations for the retirement of certain transmission assets that could not be reasonably estimated due to indeterminable settlement dates. These assets are located on rights-of-way that allow the grantor to require PPL Electric to relocate or remove the assets. Since this option is at the discretion of the grantor of the right-of-way, PPL Electric is unable to determine when these events may occur.

(PPL, LKE, LG&E and KU)

LG&E's and KU's AROs are primarily related to the final retirement of assets associated with generating units. LG&E also has AROs related to natural gas mains and wells. LG&E's and KU's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. As described in Notes 1 and 6, the accretion and depreciation expense recorded by LG&E and KU is offset with a regulatory credit on the income statement, such that there is no earnings impact.

(PPL, PPL Energy Supply, LKE, LG&E and KU)

The changes in the carrying amounts of AROs were:

	PPL		PPL Energy Supply	
	2011	2010	2011	2010
ARO at beginning of period	\$ 448	\$ 426	\$ 345	\$ 426
Accretion expense	33	32	26	31
Obligations assumed in acquisition of LKE		103		
Obligations assumed in acquisition of WPD Midlands (a)	15			
Derecognition (b)			(5)	
Obligations incurred	14	4	11	4
Changes in estimated cash flow or settlement date	5	(100)	(1)	(100)
Obligations settled	(18)	(17)	(17)	(16)
ARO at end of period	\$ 497	\$ 448	\$ 359	\$ 345
		LKE	LG&E	KU
ARO at December 31, 2009, Predecessor		\$ 65	\$ 31	\$ 34
Accretion expense		4	2	2
Changes in estimated cash flow or settlement date		54	30	24
Obligations settled		(1)	(1)	
ARO at October 31, 2010, Predecessor		122	62	60
Purchase accounting		(19)	(13)	(6)
ARO at December 31, 2010, Successor		103	49	54
Accretion expense		6	3	3
Obligations incurred		3	2	1
Changes in estimated cash flow or settlement date		7	4	3
Obligations settled		(1)	(1)	
ARO at December 31, 2011, Successor		\$ 118	\$ 57	\$ 61

- (a) Obligations required under U.K. law related to treated wood poles, gas-filled switchgear and fluid-filled cables. See Note 10 for additional information on the acquisition.
 (b) Represents AROs derecognized as a result of PPL Energy Supply's distribution of its membership interest in PPL Global to PPL Energy Supply's parent, PPL Energy Funding. See Note 9 for additional information on the distribution.

In the third quarter of 2010, PPL Susquehanna completed a site-specific study to update the estimated cost to dismantle and decommission each Susquehanna nuclear unit immediately following final shutdown. This estimate included decommissioning the radiological portions of the station and the cost of removal of non-radiological structures and materials. Based on this study, which used a methodology consistent with the prior site-specific study done in 2002, the decommissioning ARO liability and the associated long-lived asset were reduced by \$103 million. The primary factor for this decline was the lower estimated inflation rate assumption used in the 2010 ARO calculation.

The classification of AROs on the Balance Sheets was as follows.

	December 31, 2011				
	PPL	PPL Energy Supply	LKE	LG&E	KU
Current portion (a)	\$ 13	\$ 10	\$ 2	\$ 2	
Long-term portion (b)	484	349	116	55	\$ 61
Total	<u>\$ 497</u>	<u>\$ 359</u>	<u>\$ 118</u>	<u>\$ 57</u>	<u>\$ 61</u>

	December 31, 2010				
	PPL	PPL Energy Supply	LKE	LG&E	KU
Current portion (a)	\$ 13	\$ 13			
Long-term portion (b)	435	332	\$ 103	\$ 49	\$ 54
Total	<u>\$ 448</u>	<u>\$ 345</u>	<u>\$ 103</u>	<u>\$ 49</u>	<u>\$ 54</u>

- (a) Included in "Other current liabilities."
 (b) Included in "Asset retirement obligations."

22. Variable Interest Entities

(PPL and PPL Energy Supply)

In December 2001, a subsidiary of PPL Energy Supply entered into a \$455 million operating lease arrangement, as lessee, for the development, construction and operation of a gas-fired combined-cycle generation facility located in Lower Mt. Bethel Township, Northampton County, Pennsylvania. The owner/lessor of this generation facility, LMB Funding, LP, was created to own/lease the facility and incur the related financing costs. The initial lease term commenced on the date of commercial operation, which occurred in May 2004, and ends in December 2013. Under a residual value guarantee, if the generation facility is sold at the end of the lease term and the cash proceeds from the sale are less than the original acquisition cost, the subsidiary of PPL Energy Supply is obligated to pay up to 70.52% of the original acquisition cost. This residual value guarantee protects the other variable interest holders from losses related to their investments. LMB Funding, LP cannot extend or cancel the lease or sell the facility without the prior consent of the PPL Energy Supply subsidiary. As a result, LMB Funding, LP was determined to be a VIE and the subsidiary of PPL Energy Supply was considered the primary beneficiary that consolidates this VIE.

The lease financing, which includes \$437 million of "Long-term Debt" and \$18 million of "Noncontrolling interests" at December 31, 2011 and December 31, 2010, is secured by, among other things, the generation facility, the carrying amount of which is disclosed on the Balance Sheets. The debt matures at the end of the initial lease term. As a result of the consolidation, PPL Energy Supply has recorded interest expense in lieu of rent expense. For 2011, 2010 and 2009, additional depreciation on the generation facility of \$16 million, \$16 million and \$11 million was recorded.

23. Available-for-Sale Securities

(PPL, PPL Energy Supply, LKE and LG&E)

PPL and its subsidiaries classify certain short-term investments, securities held by the NDT funds and auction rate securities as available-for-sale. Available-for-sale securities are carried on the Balance Sheet at fair value. Unrealized gains and losses on these securities are reported, net of tax, in OCI or are recognized currently in earnings when a decline in fair value is determined to be other-than-temporary. The specific identification method is used to calculate realized gains and losses.

The following table shows the amortized cost, the gross unrealized gains and losses recorded in AOCI and the fair value of available-for-sale securities.

	December 31, 2011				December 31, 2010			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

PPL Energy Supply					
Amortized cost	\$ 14	\$ 69	\$ 62	\$ 77	\$ 222
Fair value	14	72	67	85	238

The following table shows proceeds from and realized gains and losses on sales of available-for-sale securities.

	2011	2010	2009
PPL			
Proceeds from sales of NDT securities (a)	\$ 156	\$ 114	\$ 201
Other proceeds from sales	163		154
Gross realized gains (b)	28	13	27
Gross realized losses (b)	16	5	20
PPL Energy Supply			
Proceeds from sales of NDT securities (a)	\$ 156	\$ 114	\$ 201
Other proceeds from sales			154
Gross realized gains (b)	28	13	27
Gross realized losses (b)	16	5	20

(a) These proceeds are used to pay income taxes and fees related to managing the trust. Remaining proceeds are reinvested in the trust.

(b) Excludes the impact of other-than-temporary impairment charges recognized in the Statements of Income.

Short-term Investments

(PPL, LKE and LG&E)

At December 31, 2010, LG&E held \$163 million aggregate principal amount of tax-exempt revenue bonds issued by Louisville/Jefferson County, Kentucky on behalf of LG&E that were purchased from the remarketing agent in 2008. At December 31, 2010, these investments were reflected in "Short-term investments" on the Balance Sheet. In 2011, LG&E received \$163 million for its investments in these bonds when they were remarketed to unaffiliated investors. No realized or unrealized gains (losses) were recorded on these securities, as the difference between carrying value and fair value was not significant.

(PPL and PPL Energy Supply)

In December 2008, the PEDFA issued \$150 million aggregate principal amount of Exempt Facilities Revenue Bonds, Series 2008A and 2008B due 2038 (Series 2008 Bonds) on behalf of PPL Energy Supply. PPL Investment Corp. acted as the initial purchaser of the Series 2008 Bonds upon issuance. In April 2009, PPL Investment Corp. received \$150 million for its investment in the Series 2008 Bonds when they were refunded by the PEDFA. No realized or unrealized gains (losses) were recorded on these securities, as the difference between carrying value and fair value was insignificant.

NDT Funds

Beginning in January 1999 and ending in December 2009, in accordance with the PUC Final Order, decommissioning costs were recovered from PPL Electric's customers through the CTC over the 11-year life of the CTC rather than the remaining life of the Susquehanna nuclear plant. The recovery included a return on unamortized decommissioning costs. Under the power supply agreements between PPL Electric and PPL EnergyPlus, these revenues were passed on to PPL EnergyPlus. Similarly, these revenues were passed on to PPL Susquehanna under a power supply agreement between PPL EnergyPlus and PPL Susquehanna.

Amounts collected from PPL Electric's customers for decommissioning, less applicable taxes, were deposited in external trust funds for investment and can only be used for future decommissioning costs. To the extent that the actual costs for decommissioning exceed the amounts in the nuclear decommissioning trust funds, PPL Susquehanna would be obligated to fund 90% of the shortfall.

When the fair value of a security is less than amortized cost, PPL and PPL Energy Supply must make certain assertions to avoid recording an other-than-temporary impairment that requires a current period charge to earnings. The NRC requires that nuclear decommissioning trusts be managed by independent investment managers, with discretion to buy and sell securities in the trusts. As a result, PPL and PPL Energy Supply have been unable to demonstrate the ability to hold an impaired security until it recovers its value; therefore, unrealized losses on debt securities through March 31, 2009 and unrealized losses on equity securities for all periods presented, represented other-than-temporary impairments that required a current period charge to earnings. PPL and PPL Energy Supply recorded impairments for certain securities invested in the NDT funds of \$6 million, \$3 million and \$18 million for 2011, 2010 and 2009. These impairments are reflected on the Statements of Income in "Other-Than-Temporary Impairments."

Effective April 1, 2009, when PPL and PPL Energy Supply intend to sell a debt security or more likely than not will be required to sell a debt security before recovery, then the other-than-temporary impairment recognized in earnings will equal

the entire difference between the security's amortized cost basis and its fair value. However, if there is no intent to sell a debt security and it is not more likely than not that they will be required to sell the security before recovery, but the security has suffered a credit loss, the other-than-temporary impairment will be separated into the credit loss component, which is recognized in earnings, and the remainder of the other-than-temporary impairment, which is recorded in OCI. Temporary impairments of debt securities and unrealized gains on both debt and equity securities are recorded to OCI.

24. New Accounting Guidance Pending Adoption

(PPL, PPL Energy Supply, PPL Electric, LKE, LG&E and KU)

Fair Value Measurements

Effective January 1, 2012, the Registrants will prospectively adopt accounting guidance that was issued to clarify existing fair value measurement guidance as well as enhance fair value disclosures. The additional disclosures required by this guidance include quantitative information about significant unobservable inputs used for Level 3 measurements, qualitative information about the sensitivity of recurring Level 3 measurements, information about any transfers between Level 1 and 2 of the fair value hierarchy, information about when the current use of a non-financial asset is different from the highest and best use, and the hierarchy classification for assets and liabilities whose fair value is disclosed only in the notes to the financial statements.

Any fair value measurement differences resulting from the adoption of this guidance will be recognized in income in the period of adoption. The adoption of this guidance is not expected to have a significant impact on the Registrants.

Testing Goodwill for Impairment

Effective January 1, 2012, the Registrants will prospectively adopt accounting guidance which will allow an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of goodwill. If, based on this assessment, the entity determines it is not more likely than not the fair value of a reporting unit is less than the carrying amount, the two-step goodwill impairment test is not necessary. However, the first step of the impairment test is required if an entity concludes it is more likely than not the fair value of a reporting unit is less than the carrying amount based on the qualitative assessment.

The adoption of this standard is not expected to have a significant impact on the Registrants.

Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, the Registrants will retrospectively adopt accounting guidance issued to enhance disclosures about financial instruments and derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

Upon adoption, the enhanced disclosure requirements are not expected to have a significant impact on the Registrants.

25. Subsequent Events

(PPL and PPL Energy Supply)

In February 2012 PPL announced that its indirect wholly owned subsidiary, PPL Generation, had entered into a definitive agreement (Acquisition Agreement) to acquire from AES Ironwood, Inc., a subsidiary of The AES Corporation, all of the equity interests of AES Ironwood, L.L.C. and AES Prescott, L.L.C., which together own and operate the 705 MW (winter rating) AES Ironwood combined-cycle natural-gas-fired power plant (Ironwood Facility) located in Lebanon, Pennsylvania. The Ironwood Facility began operation in 2001 and, since July 1, 2008, PPL EnergyPlus has supplied natural gas for the operation of the Ironwood Facility in return for receiving its full electricity output pursuant to a tolling agreement that expires in 2021.

The Acquisition Agreement provides for the sale of 100% of the issued and outstanding membership interests (collectively, the "Interests") of each of AES Ironwood, L.L.C. and AES Prescott, L.L.C. (collectively, the "Acquired Companies") to PPL Generation. The consideration payable by PPL Generation in respect of the acquisition is \$87 million in cash, which includes approximately \$4.8 million of net working capital of the Acquired Companies expected to be received at closing, plus the assumption at closing, through consolidation as a result of acquiring the Interests, of approximately \$217 million of net outstanding project indebtedness of AES Ironwood, L.L.C. The outstanding project indebtedness is represented by \$308.5 million aggregate principal amount of AES Ironwood, L.L.C. 8.857% senior secured bonds due 2025, the net amount of

which expected to be outstanding at closing is approximately \$226 million, plus \$8 million of debt service reserve loans, less approximately \$17 million of restricted cash reserves. The cash purchase price is subject to adjustment based on the amounts by which the actual closing date net working capital and net project indebtedness vary from expected balances.

AES Ironwood, Inc. and PPL Generation have each made customary representations, warranties and covenants in the Acquisition Agreement. The transaction is subject to customary closing conditions, including the expiration or termination of the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, receipt of required regulatory approvals, including approval by the Federal Energy Regulatory Commission under section 203 of the Federal Power Act, and either a reaffirmation of the current ratings of Standard & Poor's Rating Group and Moody's Investors Services, Inc. on the outstanding project indebtedness or consent of the holders of two-thirds of the outstanding project indebtedness.

PPL Energy Supply has agreed to guarantee PPL Generation's obligations under the Acquisition Agreement until the cash purchase price has been paid in full, including any post-closing adjustments for net working capital and project indebtedness.

SCHEDULE I - PPL CORPORATION
NOTES TO CONDENSED UNCONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

PPL Corporation is a holding company and conducts substantially all of its business operations through its subsidiaries. Substantially all of its consolidated assets are held by such subsidiaries. Accordingly, its cash flow and its ability to meet its obligations are largely dependent upon the earnings of these subsidiaries and the distribution or other payment of such earnings to it in the form of dividends, loans or advances or repayment of loans and advances from it. These condensed financial statements and related footnotes have been prepared in accordance with Reg. §210.12-04 of Regulation S-X. These statements should be read in conjunction with the consolidated financial statements and notes thereto of PPL Corporation.

PPL Corporation indirectly or directly owns all of the ownership interests of its significant subsidiaries. PPL Corporation does not own the preferred securities of PPL Electric Utilities Corporation. PPL Corporation relies on dividends or loans from its subsidiaries to fund PPL Corporation's dividends to its common shareholders and to meet its other cash requirements.

2. Commitments and Contingencies

See Note 15 to PPL Corporation's consolidated financial statements for commitments and contingencies of its subsidiaries.

Guarantees and Other Assurances

PPL Corporation's subsidiaries are separate and distinct legal entities and have no obligation to pay any amounts that may become due under PPL Corporation's guarantees or other assurances or to make any funds available for such payment.

PPL Corporation fully and unconditionally guarantees the payment of principal, premium and interest on all of the debt securities of PPL Capital Funding. The estimated maximum potential amount of future payments that could be required under the guarantees at December 31, 2011 was \$5.2 billion. These guarantees will expire in 2067.

PPL Corporation has provided indemnification to the purchaser of PPL Gas Utilities and Penn Fuel Propane, LLC for damages arising out of any breach of the representations, warranties and covenants under the related transaction agreement and for damages arising out of certain other matters, including certain pre-closing unknown environmental liabilities relating to former manufactured gas plant properties or off-site disposal sites, if any, outside of Pennsylvania. The estimated maximum potential amount of future payments that could be required under the indemnifications at December 31, 2011 was \$300 million. The indemnification provisions for most representations and warranties, including tax and environmental matters, are capped at \$45 million, in the aggregate, and are triggered (i) only if the individual claim exceeds \$50,000, and (ii) only if, and only to the extent that, in the aggregate, total claims exceed \$4.5 million. The indemnification provisions for most representations and warranties expired on September 30, 2009 without any claims having been made. Certain representations and warranties, including those having to do with transaction authorization and title, survive indefinitely, are capped at the purchase price and are not subject to the above threshold or deductible. The indemnification provision for the tax matters representations survives for the duration of the applicable statute of limitation. The indemnification provision for the environmental matters representations expired on September 30, 2011 without any claims having been made. The indemnification for covenants survives until the applicable covenant is performed and is not subject to any cap.

The probability of expected payment under each of the guarantees is remote.

Schedule I - LG&E and KU Energy LLC
Notes to Condensed Unconsolidated Financial Statements

1. Basis of Presentation

LG&E and KU Energy LLC (LKE) is a holding company and conducts substantially all of its business operations through its subsidiaries. Substantially all of its consolidated assets are held by such subsidiaries. Accordingly, its cash flow and its ability to meet its obligations are largely dependent upon the earnings of these subsidiaries and the distribution or other payment of such earnings to it in the form of dividends or repayment of loans and advances from the subsidiaries. These condensed financial statements and related footnotes have been prepared in accordance with Reg. §210.12-04 of Regulation S-X. These statements should be read in conjunction with the consolidated financial statements and notes thereto of LKE.

LKE indirectly or directly owns all of the ownership interests of its significant subsidiaries. LKE relies primarily on dividends from its subsidiaries to fund LKE's dividends to its member and to meet its other cash requirements.

2. Commitments and Contingencies

See Note 15 to LKE's consolidated financial statements for commitments and contingencies of its subsidiaries.

Guarantees

In connection with various divestitures, LKE has indemnified/guaranteed respective parties against certain liabilities that may arise in connection with these transactions and business activities. The terms of these indemnifications/guarantees vary, as do the expiration terms. LKE has issued direct financial guarantees to parties involved in the WKE lease termination, which occurred in July 2009. These guarantees cover the due and punctual payment, performance and discharge by each party of its respective present and future obligations. The most comprehensive of these guarantees is a guarantee covering operational, regulatory and environmental commitments and indemnifications made by WKE under the WKE Transaction Termination Agreement. This guarantee has a term of 12 years beginning on July 16, 2009 and a cumulative maximum exposure of \$200 million. Certain items, such as non-excluded government fines and penalties, fall outside the cumulative cap. Another guarantee with a maximum exposure of \$100 million covering other indemnifications expires in 2023. Certain matters are currently under discussion among the parties, including one matter currently in arbitration and a further matter for which LKE is contesting the applicability of the indemnification requirement. The matter in arbitration may be ruled upon during early 2012, which ruling may result in increases or decreases to the liability estimate LKE has currently recorded. The ultimate outcome of both matters cannot be predicted at this time. See Note 9, Discontinued Operations, for further information. Additionally, LKE has indemnified various third parties related to historical obligations for divested subsidiaries and affiliates. The indemnifications vary by entity and the maximum amounts range from being capped at the sale price to no specified maximum; however, LKE is not aware of claims made by any party at this time. LKE could be required to perform on these indemnifications in the event of covered losses or liabilities being claimed by an indemnified party. No additional material loss is anticipated by reason of such indemnifications. A subsidiary of LKE has recorded liabilities for all guarantees totaling \$11 million with respect to which LKE has certain guarantee obligations.

(a) PPL Electric's business is seasonal in nature, with peak sales periods generally occurring in the winter and summer months. Accordingly, comparisons among quarters of a year may not be indicative of overall trends and changes in operations.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS
ON ACCOUNTING AND FINANCIAL DISCLOSURE**

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures.

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

The registrants' principal executive officers and principal financial officers, based on their evaluation of the registrants' disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Securities Exchange Act of 1934) have concluded that, as of December 31, 2011, the registrants' disclosure controls and procedures are effective to ensure that material information relating to the registrants and their consolidated subsidiaries is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, particularly during the period for which this annual report has been prepared. The aforementioned principal officers have concluded that the disclosure controls and procedures are also effective to ensure that information required to be disclosed in reports filed under the Exchange Act is accumulated and communicated to management, including the principal executive and principal financial officers, to allow for timely decisions regarding required disclosure.

PPL Corporation

PPL acquired WPD Midlands on April 1, 2011. These companies are included in PPL's 2011 financial statements as of the date of the acquisition, on a one-month lag. WPD Midlands accounted for approximately 9% of PPL's net income for the twelve months ended December 31, 2011. WPD Midlands represented 19% and 27% of PPL's total assets and net assets at December 31, 2011. The internal control over financial reporting of WPD Midlands was excluded from a formal evaluation of effectiveness of PPL's disclosure controls and procedures. This decision was based upon the significance of these companies to PPL, and the timing of integration efforts underway to transition WPD Midlands' processes, information technology systems and other components of internal control over financial reporting to the internal control structure of PPL. PPL has expanded its consolidation and disclosure controls and procedures to include the acquired companies, and PPL continues to assess the current internal control over financial reporting at WPD Midlands. Risks related to the increased account balances were partially mitigated by PPL's expanded controls and PPL's existing policy of consolidating foreign subsidiaries on a one-month lag, which provided management additional time for review and analysis of WPD Midlands' results and their incorporation into PPL's consolidated financial statements.

(b) Changes in internal control over financial reporting.

PPL Corporation

PPL's principal executive officer and principal financial officer have concluded that a recent systems migration related to the WPD Midlands acquisition created a material change to its internal control over financial reporting. Specifically, on December 1, 2011 the use of legacy information technology systems at WPD Midlands was discontinued and the related data, processes and internal controls were migrated to the systems, processes and controls currently in place at PPL WW. Due to PPL's existing policy of consolidating foreign subsidiaries on a one-month lag, the system migration will primarily impact 2012 financial reporting for PPL and will likely have limited impact on PPL's 2011 financial reporting.

Risks related to the system migration were partially mitigated by PPL's expanded internal control over financial reporting that were implemented subsequent to the acquisition and PPL's existing policy of consolidating foreign subsidiaries on a one-month lag, which provided management additional time for review and analysis of WPD Midlands' results and their incorporation into PPL's consolidated financial statements. PPL continues to assess the internal control over financial reporting at WPD subsequent to the December 1, 2011 system migration.

The aforementioned principal executive officer and principal financial officer have concluded that there were no other changes in the registrant's internal control over financial reporting during the registrant's fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

The registrants' principal executive officers and principal financial officers have concluded that there were no changes in the registrants' internal control over financial reporting during the registrants' fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrants' internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

PPL Corporation

PPL's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) or 15d-15(f). PPL's internal control over financial reporting is a process designed to provide reasonable assurance to PPL's management and Board of Directors regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in "Internal Control - Integrated Framework," our management concluded that our internal control over financial reporting was effective as of December 31, 2011. The effectiveness of our internal control over financial reporting has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report contained on page 195.

In accordance with SEC rules, management excluded WPD Midlands from its evaluation of internal control over financial reporting due to the significance of these companies to PPL's financial results and the migration of WPD Midlands' legacy information technology systems, processes and controls to those at PPL WW. WPD Midlands accounted for 9% of PPL's net income for the year ended December 31, 2011. WPD Midlands represented 19% and 27% of PPL's consolidated total assets and net assets, respectively, at December 31, 2011. As discussed above, PPL Corporation is continuing to enhance and evaluate processes, information technology systems and other components of internal control over financial reporting as part of its ongoing integration activities.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Management of PPL's non-accelerated filer companies, PPL Energy Supply, PPL Electric, LKE, LG&E and KU, are responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f) or 15d-15(f). PPL's internal control over financial reporting is a process designed to provide reasonable assurance to PPL's management and Board of Directors regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Under the supervision and with the participation of our management, including our principal executive officers and principal financial officers, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in "Internal Control - Integrated Framework," our management concluded that our internal control over financial reporting was effective as of December 31, 2011. This annual report does not include an attestation report of Ernst & Young LLP, the companies' independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the companies' registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit the companies to provide only management's report in this annual report.

ITEM 9B. OTHER INFORMATION

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

PPL Corporation

Additional information for this item will be set forth in the sections entitled "Nominees for Directors," "Board Committees - Audit Committee" and "Section 16(a) Beneficial Ownership Reporting Compliance" in PPL's 2012 Notice of Annual Meeting and Proxy Statement, which will be filed with the SEC not later than 120 days after December 31, 2011, and which information is incorporated herein by reference. There have been no changes to the procedures by which shareowners may recommend nominees to PPL's board of directors since the filing with the SEC of PPL's 2011 Notice of Annual Meeting and Proxy Statement. Information required by this item concerning the executive officers of PPL is set forth at the end of Part I of this report.

PPL has adopted a code of ethics entitled "Standards of Integrity" that applies to all directors, managers, trustees, officers (including the principal executive officers, principal financial officers and principal accounting officers (each, a "principal officer")), employees and agents of PPL and PPL's subsidiaries for which it has operating control (including PPL Energy Supply, PPL Electric, LKE, LG&E and KU). The "Standards of Integrity" are posted on PPL's Internet website: www.pplweb.com/about/corporate+governance. A description of any amendment to the "Standards of Integrity" (other than a technical, administrative or other non-substantive amendment) will be posted on PPL's Internet website within four business days following the date of the amendment. In addition, if a waiver constituting a material departure from a provision of the "Standards of Integrity" is granted to one of the principal officers, a description of the nature of the waiver, the name of the person to whom the waiver was granted and the date of the waiver will be posted on PPL's Internet website within four business days following the date of the waiver.

PPL also has adopted its "Guidelines for Corporate Governance," which address, among other things, director qualification standards and director and board committee responsibilities. These guidelines, and the charters of each of the committees of PPL's board of directors, are posted on PPL's Internet website: www.pplweb.com/about/corporate+governance.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 10 is omitted as PPL Energy Supply, PPL Electric, LKE, LG&E and KU meet the conditions set forth in General Instruction (I)(1)(a) and (b) of Form 10-K.

EXECUTIVE OFFICERS OF THE REGISTRANTS

Officers of the Registrants are elected annually by their Boards of Directors (or Board of Managers for PPL Energy Supply) to serve at the pleasure of the respective Boards. There are no family relationships among any of the executive officers, nor is there any arrangement or understanding between any executive officer and any other person pursuant to which the officer was selected.

There have been no events under any bankruptcy act, no criminal proceedings and no judgments or injunctions material to the evaluation of the ability and integrity of any executive officer during the past five years.

Listed below are the executive officers at December 31, 2011.

PPL Corporation

- (a) On July 22, 2011, James H. Miller resigned as President. On November 17, 2011, he also resigned as Chief Executive Officer. Mr. Miller has announced he will be retiring, effective April 1, 2012.
- (b) On July 22, 2011, William H. Spence resigned as Executive Vice President and was elected President and Chief Operating Officer. On November 17, 2011, he also resigned as Chief Operating Officer and was elected President and Chief Executive Officer.
- (c) Designated an executive officer of PPL by virtue of their respective positions at a PPL subsidiary.

ITEM 11. EXECUTIVE COMPENSATION

PPL Corporation

Information for this item will be set forth in the sections entitled "Compensation of Directors," "Compensation Committee Interlocks and Insider Participation" and "Executive Compensation" in PPL's 2012 Notice of Annual Meeting and Proxy Statement, which will be filed with the SEC not later than 120 days after December 31, 2011, and which information is incorporated herein by reference.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 11 is omitted as PPL Energy Supply, PPL Electric, LKE, LG&E and KU meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

PPL Corporation

Information for this item will be set forth in the section entitled "Stock Ownership" in PPL's 2012 Notice of Annual Meeting and Proxy Statement, which will be filed with the SEC not later than 120 days after December 31, 2011, and which information is incorporated herein by reference. In addition, provided below in tabular format is information as of December 31, 2011, with respect to compensation plans (including individual compensation arrangements) under which equity securities of PPL are authorized for issuance.

Equity Compensation Plan Information

	Number of securities to be issued upon exercise of outstanding options, warrants and rights (3)	Weighted-average exercise price of outstanding options, warrants and rights (3)	Number of securities remaining available for future issuance under equity compensation plans (4)
Equity compensation plans approved by security holders (1)	4,559,845 - ICP <u>2,970,353</u> - ICPKE 7,530,198 - Total	\$ 30.90- ICP \$ 30.28- ICPKE \$ 30.65- Combined	1,107,321 - ICP 7,608,727 - ICPKE <u>14,452,166</u> - DDCP 23,168,214 - Total
Equity compensation plans not approved by security holders (2)			

- (1) Includes (a) the Amended and Restated Incentive Compensation Plan (ICP), under which stock options, restricted stock, restricted stock units, performance units, dividend equivalents and other stock-based awards may be awarded to executive officers of PPL; (b) the Amended and Restated Incentive Compensation Plan for Key Employees (ICPKE), under which stock options, restricted stock, restricted stock units, performance units, dividend equivalents and other stock-based awards may be awarded to non-executive key employees of PPL and its subsidiaries; and (c) the Directors Deferred Compensation Plan (DDCP), under which stock units may be awarded to directors of PPL. See Note 12 to the Financial Statements for additional information.
- (2) All of PPL's current compensation plans under which equity securities of PPL are authorized for issuance have been approved by PPL's shareowners.
- (3) Relates to common stock issuable upon the exercise of stock options awarded under the ICP and ICPKE as of December 31, 2011. In addition, as of December 31, 2011, the following other securities had been awarded and are outstanding under the ICP, ICPKE and DDCP: 45,400 shares of restricted stock, 549,805 restricted stock units and 236,714 performance units under the ICP; 24,600 shares of restricted stock, 1,420,230 restricted stock units and 161,894 performance units under the ICPKE; and 425,306 stock units under the DDCP.

- (4) Based upon the following aggregate award limitations under the ICP, ICPKE and DDCP: (a) under the ICP, 15,769,431 awards (i.e., 5% of the total PPL common stock outstanding as of April 23, 1999) granted after April 23, 1999; (b) under the ICPKE, 16,573,608 awards (i.e., 5% of the total PPL common stock outstanding as of January 1, 2003) granted after April 25, 2003, reduced by outstanding awards for which common stock was not yet issued as of such date of 2,373,812 resulting in a limit of 14,199,796; and (c) under the DDCP, 15,052,856 securities. In addition, each of the ICP and ICPKE includes an annual award limitation of 2% of total PPL common stock outstanding as of January 1 of each year.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 12 is omitted as PPL Energy Supply, PPL Electric, LKE, LG&E and KU meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

PPL Corporation

Information for this item will be set forth in the sections entitled "Transactions with Related Persons" and "Independence of Directors" in PPL's 2012 Notice of Annual Meeting and Proxy Statement, which will be filed with the SEC not later than 120 days after December 31, 2011, and is incorporated herein by reference.

PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Item 13 is omitted as PPL Energy Supply, PPL Electric, LKE, LG&E and KU meet the conditions set forth in General Instructions (I)(1)(a) and (b) of Form 10-K.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

PPL Corporation

Information for this item will be set forth in the section entitled "Fees to Independent Auditor for 2011 and 2010" in PPL's 2012 Notice of Annual Meeting and Proxy Statement, which will be filed with the SEC not later than 120 days after December 31, 2011, and which information is incorporated herein by reference.

PPL Energy Supply, LLC

The following table presents an allocation of fees billed, including expenses, by Ernst & Young LLP (EY) to PPL for the fiscal years ended December 31, 2011 and 2010, for professional services rendered for the audit of PPL Energy Supply's annual financial statements and for fees billed for other services rendered by EY.

	<u>2011</u>	<u>2010</u>
	(in thousands)	
Audit fees (a)	\$ 1,701	\$ 2,581
Audit-related fees (b)	9	16
Tax fees (c)	518	375
All other fees (d)		118

(a) Includes estimated fees for audit of annual financial statements and review of financial statements included in PPL Energy Supply's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.

(b) Fees for performance of specific agreed-upon procedures.

- (c) Includes fees for tax advice in connection with a tax basis and earnings and profit study, a private letter ruling related to the sale of Safe Harbor, the funding of the Western Power Utilities Pension Scheme, review and consultation related to PPL's recognition of tax benefits resulting from U.S. Court decisions, consultation and analysis related to non-income tax process improvements initiated by PPL and review, consultation and analysis related to investment tax credits and related capital expenditures on certain hydro-electric plant upgrades.
- (d) Fees related to access to an EY online accounting research tool and an International Financial Reporting Standards diagnostic readiness assessment.

PPL Electric Utilities Corporation

The following table presents an allocation of fees billed, including expenses, by EY to PPL for the fiscal years ended December 31, 2011 and 2010, for professional services rendered for the audit of PPL Electric's annual financial statements and for fees billed for other services rendered by EY.

	<u>2011</u>	<u>2010</u>
	(in thousands)	
Audit fees (a)	\$ 1,193	\$ 810
Audit-related fees (b)	45	21
Tax fees (c)	19	58
All other fees (d)		42

- (a) Includes estimated fees for audit of annual financial statements and review of financial statements included in PPL Electric's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.
- (b) Fees for consultation on a transmission and distribution study and performance of specific agreed-upon procedures.
- (c) Fees for consultation and analysis related to non-income tax process improvements initiated by PPL and review and consultation related to tax impacts resulting from U.S. Court decisions.
- (d) Fees related to access to an EY online accounting research tool and an International Financial Reporting Standards diagnostic readiness assessment.

LG&E and KU Energy LLC

For the fiscal year ended 2011, EY served as LKE's independent auditor. For the fiscal year ended 2010, PricewaterhouseCoopers LLP (PwC) served as LKE's independent auditor. The following table presents an allocation of fees billed, including expenses, by EY and PwC to LKE for the fiscal years ended December 31, 2011 and 2010, for professional services rendered for the audits of LKE's annual financial statements and for fees billed for other services rendered by EY and PwC.

	<u>Successor</u>	<u>Predecessor</u>
	<u>2011</u>	<u>2010</u>
	(in thousands)	
Audit fees (a)	\$ 1,528	\$ 1,964

- (a) Includes estimated fees for audit of annual financial statements and review of financial statements included in LKE's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.

Louisville Gas and Electric Company

For the fiscal year ended 2011, EY served as LG&E's independent auditor. For the fiscal year ended 2010, PwC served as LG&E's independent auditor. The following table presents an allocation of fees billed, including expenses, by EY and PwC to LG&E for the fiscal years ended December 31, 2011 and 2010, for professional services rendered for the audits of LG&E's annual financial statements and for fees billed for other services rendered by EY and PwC.

	<u>Successor</u>	<u>Predecessor</u>
	<u>2011</u>	<u>2010</u>
	(in thousands)	
Audit fees (a)	\$ 552	\$ 871
All other fees		1

(a) Includes estimated fees for audit of annual financial statements and review of financial statements included in LG&E's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.

Kentucky Utilities Company

For the fiscal year ended 2011, EY served as KU's independent auditor. For the fiscal year ended 2010, PwC served as KU's independent auditor. The following table presents an allocation of fees billed, including expenses, by EY and PwC to KU for the fiscal years ended December 31, 2011 and 2010, for professional services rendered for the audits of KU's annual financial statements and for fees billed for other services rendered by EY and PwC.

	<u>Successor</u>	<u>Predecessor</u>
	<u>2011</u>	<u>2010</u>
	(in thousands)	
Audit fees (a)	\$ 552	\$ 811
Tax fees		6
All other fees		1

(a) Includes estimated fees for audit of annual financial statements and review of financial statements included in KU's Quarterly Reports on Form 10-Q and for services in connection with statutory and regulatory filings or engagements, including comfort letters and consents for financings and filings made with the SEC.

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

Approval of Fees The Audit Committee of PPL has procedures for pre-approving audit and non-audit services to be provided by the independent auditor. These procedures are designed to ensure the continued independence of the independent auditor. More specifically, the use of the independent auditor to perform either audit or non-audit services is prohibited unless specifically approved in advance by the Audit Committee of PPL. As a result of this approval process, the Audit Committee of PPL has pre-approved specific categories of services and authorization levels. All services outside of the specified categories and all amounts exceeding the authorization levels are approved by the Chair of the Audit Committee of PPL, who serves as the Committee designee to review and approve audit and non-audit related services during the year. A listing of the approved audit and non-audit services is reviewed with the full Audit Committee of PPL no later than its next meeting.

The Audit Committee of PPL approved 100% of the 2011 and 2010 services provided by EY.

The Audit Committee of PPL approved 100% of the 2010 services provided by PwC to LKE, LG&E and KU following their acquisition by PPL. Prior to the November 2010 acquisition of LKE by PPL, the Audit Committee of LKE, LG&E and KU maintained procedures for pre-approval of independent auditor services and fees substantially similar to those described above. The LKE, LG&E and KU Audit Committee approved 100% of the 2010 services provided by PwC prior to the PPL acquisition.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

PPL Corporation, PPL Energy Supply, LLC, PPL Electric Utilities Corporation, LG&E and KU Energy LLC, Louisville Gas and Electric Company and Kentucky Utilities Company

(a) The following documents are filed as part of this report:

1. Financial Statements - Refer to the "Table of Contents" for an index of the financial statements included in this report.
2. Supplementary Data and Supplemental Financial Statement Schedule - included in response to Item 8.

Schedule I - PPL Corporation Condensed Unconsolidated Financial Statements.

Schedule I - LG&E and KU Energy LLC Condensed Unconsolidated Financial Statements.

All other schedules are omitted because of the absence of the conditions under which they are required or because the required information is included in the financial statements or notes thereto.

3. Exhibits

See Exhibit Index immediately following the signature pages.

SHAREOWNER AND INVESTOR INFORMATION

Annual Meetings: The 2012 annual meeting of shareowners of PPL will be held on Wednesday, May 16, 2012, at the Zoellner Arts Center, on the campus of Lehigh University in Bethlehem, Pennsylvania, in Northampton County.

Proxy and Information Statement Material: A proxy statement and notice of PPL's annual meeting is mailed to all shareowners of record as of February 29, 2012.

PPL Annual Report: The report is published and mailed in the beginning of April to all shareowners of record. The latest annual report can be accessed at www.pplweb.com. If you have more than one account, or if there is more than one investor in your household, you may call the PPL Shareowner Information Line to request that only one annual report be delivered to your address. Please provide account numbers for all duplicate mailings.

Dividends: Subject to the declaration of dividends on PPL common stock by the PPL Board of Directors or its Executive Committee and PPL Electric preference stock by the PPL Electric Board of Directors, dividends are paid on the first business day of April, July, October and January. The 2012 record dates for dividends are expected to be March 9, June 8, September 10 and December 10.

Direct Deposit of Dividends: Shareowners may choose to have their dividend checks deposited directly into their checking or savings account.

PPL Shareowner Information Line (1-800-345-3085): Shareowners can get detailed corporate and financial information 24 hours a day using the PPL Shareowner Information Line. They can hear timely recorded messages about earnings, dividends and other company news releases; request information by fax; and request printed materials in the mail. Other PPL publications, such as the annual and quarterly reports to the Securities and Exchange Commission (Forms 10-K and 10-Q), will be mailed upon request, or write to:

THIS AMENDMENT NO. 2 TO AMENDED AND RESTATED LOAN AGREEMENT, dated as of October 1, 2011 (this “Amendment No. 2 to Loan Agreement”), by and between the LOUISVILLE/JEFFERSON COUNTY METRO GOVERNMENT, KENTUCKY, the governmental successor in interest by operation of law to the County of Jefferson, Kentucky, being a public body corporate and politic duly created and existing as a de jure political subdivision under the Constitution and laws of the Commonwealth of Kentucky, and LOUISVILLE GAS AND ELECTRIC COMPANY, a corporation organized and existing under the laws of the Commonwealth of Kentucky.

WITNESSETH:

WHEREAS, the Louisville/Jefferson County Metro Government, Kentucky (the “Metro Government” or “Issuer”) is the governmental successor in interest by operation of law to the County of Jefferson, Kentucky and constitutes a public body corporate and politic duly created and existing as a de jure political subdivision under the Constitution and laws of the Commonwealth of Kentucky, and pursuant to the provisions of Chapter 67C and Sections 103.200 to 103.285, inclusive, of the Kentucky Revised Statutes (the “Act”), the Issuer has the power to enter into the transactions contemplated by this Amendment No. 2 to Loan Agreement and to carry out its obligations hereunder; and

WHEREAS, Issuer came into legal existence on January 6, 2003, by operation of law and voter approval in accordance with laws now codified as Chapter 67C of the Kentucky Revised Statutes and replaced and superseded the prior governments of both the City of Louisville, Kentucky and the County of Jefferson, Kentucky (the “Predecessor County”) and pursuant to law has mandatorily assumed all existing contracts and obligations of the former City and County and has been endowed with all powers of each of such former City and County; and

WHEREAS, the Metro Government, as successor to the Predecessor County, is authorized pursuant to the Act to issue negotiable bonds and lend the proceeds from the sale of such bonds to a utility company to finance and refinance the acquisition of “pollution control facilities,” as defined by the Act (“Pollution Control Facilities”), for the abatement and control of air pollution and to refund bonds of the Predecessor County which were previously issued for any of such purposes; and

WHEREAS, on May 19, 2000, the Issuer, at the request of Louisville Gas and Electric Company (the “Company”), issued its Pollution Control Revenue Bonds, 2000 Series A (Louisville Gas and Electric Company Project) in the original principal amount of \$25,000,000 (the “Bonds” or “2000 Series A Bonds”), pursuant to the Indenture of Trust dated as of May 1, 2000, with The Bank of New York Mellon, as Trustee, Paying Agent and Bond Registrar (the “Trustee”), which Indenture of Trust was amended and restated pursuant to the Amended and Restated Indenture of Trust dated as of September 1, 2008, between the Issuer and the Trustee, and has been further amended and supplemented pursuant to the Supplemental Indenture No. 1 to Amended and Restated Indenture of Trust dated as of September 1, 2010, between the Issuer and the Trustee (collectively, “Original Indenture of Trust”), and the Issuer loaned the proceeds of the 2000 Series A Bonds to the Company pursuant to the Loan Agreement dated as of May 1, 2000, between the Issuer and the Company, which Loan Agreement was amended and restated pursuant to the Amended and Restated Loan Agreement dated as of September 1, 2008, between the Issuer and the Company, and has been further amended and supplemented pursuant to the Amendment No. 1 to Loan Agreement dated as of September 1, 2010, between the Issuer and the Company (collectively, the “Loan Agreement”); and

WHEREAS, pursuant to Section 13.01 of the Original Indenture of Trust, the consent of the holders of the 2000 Series A Bonds is not required for the Issuer and the Company to enter into an amendment to the Loan Agreement in order to conform the Loan Agreement with changes and modifications to the Original Indenture of Trust made pursuant to Section 12.01 of the Original Indenture of Trust; and

WHEREAS, it is now appropriate and necessary that the Loan Agreement be amended pursuant to Section 13.01 of the Original Indenture of Trust in order to permit the Bonds to be converted to a mode that will allow for the 2000 Series A Bonds to be purchased by the Purchaser (as hereinafter defined) and to bear interest at the rates applicable during a “LIBOR Index Rate Period”, as more particularly described and provided for in the Second Amended and Restated Indenture of Trust dated as of October 1, 2011, between the Issuer and Trustee (the “Indenture” or “Indenture of Trust”); and

WHEREAS, pursuant to and in accordance with the provisions of the Act and an Ordinance duly adopted by the Issuer on [October 27,] 2011, and in furtherance of the purposes of the Act and at the request of the Company, the Issuer has determined to enter into this Amendment No. 2 to Loan Agreement; and

WHEREAS, the Issuer and the Trustee have entered into the Second Amended and Restated Indenture of Trust between the Issuer and the Trustee of even date (the “Indenture of Trust”) herewith pursuant to ARTICLE XII of the Original Indenture of Trust; and

WHEREAS, the Company shall cause to be delivered to the Issuer and the Trustee the opinion of Bond Counsel required under ARTICLE XIII of the Indenture of Trust concurrently with the execution and delivery of this Amendment No. 2 to Loan Agreement; and

WHEREAS, all acts, conditions and things required by the Constitution and laws of the Commonwealth of Kentucky and by the requirements of the Issuer to happen, exist and be performed precedent to and in the execution and delivery of this Amendment No. 2 to Loan Agreement have happened, have existed and have been performed as so required in order to make this Amendment No. 2 to Loan Agreement a valid and binding loan agreement for the security of the holders of the 2000 Series A Bonds and for the payment of all amounts due under the Loan Agreement and this Amendment No. 2 to Loan Agreement in accordance with their respective terms.

NOW, THEREFORE, FOR AND IN CONSIDERATION OF THE PREMISES AND THE MUTUAL COVENANTS AND AGREEMENTS HEREINAFTER CONTAINED, THE PARTIES HERETO AGREE EACH WITH THE OTHER AS FOLLOWS:

ARTICLE I

AMENDMENTS TO THE LOAN AGREEMENT

Section 1.1. Amendment of Section 1.02. Incorporation of Certain Terms by Reference. The following defined terms are hereby added to Section 1.02 of the Loan Agreement and shall have the meanings set forth in ARTICLE I of the Indenture of Trust:

“Bank”
“Base Rate”
“Bond Purchase and Bank Covenants Agreement”
“Default Rate”
“Federal Funds Open Rate”
“Governmental Authority”
“Initial Libor Index Rate Period”
“LIBOR”
“LIBOR Applicable Rating Level”
“LIBOR Index Rate”
“LIBOR Index Rate Period”
“LIBOR Margin”
“Margin Rate Factor”
“Maximum Federal Corporate Tax Rate”
“Prime Rate”
“Purchaser”

Section 1.2. Amendment of Section 1.03 Additional Definitions. In addition to the terms whose definitions are incorporated by reference herein pursuant to ARTICLE I of the Indenture of Trust, the following terms shall have the meanings set forth in this Section unless the use or context clearly indicates otherwise:

“Taxable Period” means, with respect to the 2000 Series A Bonds, the period which elapses from the date on which the interest on the 2000 Series A Bonds is includable in the gross income of the holders thereof as a result of a Determination of Taxability to and including the mandatory purchase date for the 2000 Series A Bonds as a result of such Determination of Taxability.

“Taxable Rate” means LIBOR plus the LIBOR Margin.

Section 1.3. Amendment of Section 10.3. Obligations to Prepay Loan. Section 10.3 of the Loan Agreement is hereby amended and restated to read as follows:

Section 10.3 Obligations to Prepay Loan.

(a) Mandatory Redemption Upon Determination of Taxability. Company shall be obligated to prepay the entire Loan or any part thereof, as provided below, prior to the required full payment of the 2000 Series A Bonds (or prior to making provision for payment thereof in accordance with the Indenture) on the 180th day (or such earlier date as may be designated by Company), which, in every case, must be a Business Day, upon the occurrence of a Determination of Taxability. The Issuer and Company shall take all actions required to mandatorily redeem the 2000 Series A Bonds at the cost of the Company upon the terms specified in this Agreement and in Article IV of the Indenture following the occurrence of a Determination of Taxability, including, but not limited to, prepaying appropriate amounts due on the 2000 Series A Bonds in order to effect such redemption. The 2000 Series A Bonds shall be redeemed by the Issuer, in whole, or in such part as described below, at a redemption price equal to 100% of the principal amount thereof, without redemption premium, plus accrued interest, if any, to the redemption date, within 180 days following a Determination of Taxability. For purposes of this section, a “Determination of Taxability” shall mean the receipt by the Trustee of written notice from a current or former registered owner of a 2000 Series A Bond or from the Company or the Issuer of (i) the issuance of a published or private ruling or a technical advice memorandum by the Internal Revenue Service in which the Company participated or has been given the opportunity to participate, and which ruling or memorandum the Company, in its discretion, does not contest or from which no further right of administrative or judicial review or appeal exists, or (ii) a final determination from which no further right of appeal exists of any court of competent jurisdiction in the United States in a proceeding in which the Company has participated or has been a party, or has been given the opportunity to participate or be a party, in each case, to the effect that as a result of a failure by the Company to perform or observe any covenant or agreement or the inaccuracy of any representation contained in this Agreement or any other agreement or certificate delivered in connection with the 2000 Series A Bonds, the interest on the 2000 Series A Bonds is included in the gross income of the owners thereof for federal income tax purposes, other than with respect to a person who is a “substantial user” or a “related person” of a substantial user within the meaning of the Section 147 of Internal Revenue Code of 1986, as amended (the “Code”); provided, however, that no such Determination of Taxability shall be considered to exist as a result of the Trustee receiving notice from a current or former registered owner of a 2000 Series A Bond or from the Issuer unless (i) the Issuer or the registered owner or former registered owner of the 2000 Series A Bond involved in such proceeding or action (A) gives the Company and the Trustee prompt notice of the commencement thereof, and (B) (if the Company agrees to pay all expenses in connection therewith) offers the Company the opportunity to control unconditionally the defense thereof, and (ii) either (A) the Company does not agree within 30 days of receipt of such offer to pay such expenses and liabilities and to control such defense, or (B) the Company shall exhaust or choose not to exhaust all available proceedings for the contest, review, appeal or rehearing of such decree, judgment or action which the Company determines to be appropriate. No Determination of Taxability described above will result from the inclusion of interest on any 2000 Series A Bond in the computation of minimum or indirect taxes. All of the 2000 Series A Bonds shall be redeemed upon a Determination of Taxability as described above unless, in the opinion of Bond Counsel, redemption of a portion of the 2000 Series A Bonds of one or more series or one or more maturities would have the result that interest payable on the remaining 2000 Series A Bonds outstanding after the redemption would not be so included in any such gross income.

In the event any of the Issuer, the Company or the Trustee has been put on notice or becomes aware of the existence or pendency of any inquiry, audit or other proceedings relating to the 2000 Series A Bonds being conducted by the Internal Revenue Service, the party so put on notice shall give immediate written notice to the other parties of such matters.

Promptly upon learning of the occurrence of a Determination of Taxability (whether or not the same is being contested), or any of the events described in this Section 10.3(a), the Company shall give notice thereof to the Trustee and the Issuer.

(b) In the case of the mandatory obligation of Company to prepay the Loan or any part thereof after the occurrence of a Determination of Taxability, pursuant to Section 10.3(a) hereof, Company shall be obligated to prepay such Loan or such part thereof not later than 180 days after any such final determination as specified in Section 10.3(a) hereof and to provide to Trustee for deposit in the Bond Fund an amount sufficient, together with other funds deposited with the Trustee and available for such purpose, to redeem such 2000 Series A Bonds at the price of 100% of the principal amount thereof in accordance with Section 5.1 hereof plus interest accrued and to accrue to the date of redemption of the 2000 Series A Bonds and to pay all reasonable and necessary fees and expenses of Trustee and any paying agents and all other liabilities of Company accrued and to accrue hereunder to the date of redemption of the 2000 Series A Bonds.

(c) If a Determination of Taxability occurs when all or any portion of the 2000 Series A Bonds are owned by the Purchaser, the Company hereby agrees to pay to the Purchaser, in addition to the redemption price of the 2000 Series A Bonds owned by the Purchaser, the following additional amounts:

(i) an additional amount equal to the difference between (1) the amount of interest paid on the 2000 Series A Bonds during the Taxable Period and (2) the amount of interest that would have been paid on the 2000 Series A Bonds during the Taxable Period had the 2000 Series A Bonds borne interest at the Taxable Rate; and

(ii) an amount equal to any interest, penalties on overdue interest and additions to tax (as referred to in Subchapter A of Chapter 68 of the Code) owed by the Purchaser as a result of occurrence of a Determination of Taxability.

ARTICLE II

REPRESENTATIONS, WARRANTIES AND COVENANTS

Section 2.1. Representations, Warranties and Covenants by the Issuer. The Issuer represents, warrants and covenants that:

(a) The Issuer is a public body corporate and politic duly created and existing as a de jure political subdivision under the Constitution and laws of the Commonwealth of Kentucky and, pursuant to the Act, the Issuer has the power to enter into this Amendment No. 2 to Loan Agreement and the Indenture of Trust and the transactions contemplated hereby and thereby and to carry out its obligations hereunder and thereunder.

(b) To its knowledge, the Issuer is not in default under or in violation of the Constitution or any of the laws of the Commonwealth of Kentucky relevant to the consummation of the transactions contemplated hereby, and the Issuer has been duly authorized to execute and deliver this Amendment No. 2 to Loan Agreement and the Indenture of Trust. The Issuer agrees that it will do or cause to be done in a timely manner all things necessary to preserve and keep in full force and effect its existence, and to carry out Issuer's respective representations, warranties, covenants, agreements and obligations set forth in this Amendment No. 2 to Loan Agreement.

Section 2.2. Representations, Warranties and Covenants by the Company. The Company represents, warrants and covenants that:

(a) The Company (i) is a corporation duly incorporated, validly existing and in good standing under the laws of the Commonwealth of Kentucky, (ii) is duly qualified, authorized and licensed to transact business in each jurisdiction wherein failure to qualify would have a material adverse effect on the conduct of its business, and (iii) is not in violation of any provision of its Articles of Incorporation, its By-Laws or any laws of the Commonwealth of Kentucky relevant to the transactions contemplated hereby.

(b) The Company has full and complete legal power and authority to execute and deliver this Amendment No. 2 to Loan Agreement, and has by proper corporate action duly authorized the execution and delivery of this Amendment No. 2 to Loan Agreement.

(c) No event of default, and no event of the type described in clauses (a) through (f) of Section 9.1 of the Loan Agreement has occurred and is continuing, and no condition exists which, with the giving of notice or the lapse of time, or both, would constitute an event of default or a default under any agreement or instrument to which the Company is a party or by which the Company is or may be bound or to which any of the property or assets of the Company is or may be subject which would impair in any material respect its ability to carry out its obligations under the Loan Agreement, this Amendment No. 2 to Loan Agreement or the transactions contemplated hereby or thereby. Neither the execution and delivery of the Loan Agreement, this Amendment No. 2 to Loan Agreement, nor the consummation of the transactions contemplated hereby or by the Indenture of Trust, nor the fulfillment of or compliance with the terms and conditions hereof or thereof, conflicts with or results in a breach of the terms, conditions or provisions of any corporate restriction or any agreement or instrument to which the Company is now a party or by which it is bound, or constitutes a default under any of the foregoing, or results in the creation or imposition of any prohibited lien, charge or encumbrance whatsoever upon any of the property or assets of the Company under the terms of any instrument or agreement.

ARTICLE III

MISCELLANEOUS

Section 3.1. Term of Amendment No. 2 to Loan Agreement. This Amendment No. 2 to Loan Agreement shall remain in full force and effect from the date hereof to and including the later of May 1, 2027, or until such time as all of the 2000 Series A Bonds shall have been fully paid (or provision

made for such payment pursuant to the Indenture of Trust and any amendments thereto), whichever shall be later; provided, however, that the Loan Agreement, as amended pursuant to this Amendment No. 2 to Loan Agreement, may be cancelled and terminated prior to said date in accordance with the provisions of Section 11.1 of the Loan Agreement.

Section 3.2. Ratification. Except as amended and supplemented by Articles I and II hereof, the Issuer and the Company hereby ratify and reaffirm the terms and provisions of the Loan Agreement and their respective representations, warranties, covenants, agreements and obligations set forth therein.

Section 3.3. Effective Date. This Amendment No. 2 to Loan Agreement has been made and entered into as of the date first written above.

Section 3.4. Binding Effect. This Amendment No. 2 to Loan Agreement shall inure to the benefit of and shall be binding upon the Issuer, the Company and their respective successors and assigns, subject, however, to the limitations contained in Sections 7.2, 8.1 and 8.3 of the Loan Agreement.

Section 3.5. Severability. In the event any provision of this Amendment No. 2 to Loan Agreement shall be held invalid or unenforceable by any court of competent jurisdiction, such holding shall not invalidate or render unenforceable any other provision hereof.

Section 3.6. Execution in Counterparts. This Amendment No. 2 to Loan Agreement may be simultaneously executed in several counterparts, each of which shall be an original and all of which shall constitute but one and the same instrument.

Section 3.7. Applicable Law. This Amendment No. 2 to Loan Agreement shall be governed by and construed in accordance with the laws of the Commonwealth of Kentucky.

Section 3.8. Captions. The captions or headings in this Amendment No. 2 to Loan Agreement are for convenience only and in no way define, limit or describe the scope or intent of any provisions, Articles or Sections of this Amendment No. 2 to Loan Agreement.

Section 3.9. No Pecuniary Liability of Issuer. No provision, covenant or agreement contained in this Amendment No. 2 to Loan Agreement or breach thereof shall constitute or give rise to a pecuniary liability of the Issuer or a charge upon its general credit or taxing powers.

(signature page immediately follows)

IN WITNESS WHEREOF, the Issuer and the Company have caused this Amendment No. 2 to Loan Agreement to be executed in their respective corporate names and their respective corporate seals to be hereunto affixed and attested by their duly authorized officers, all of the date first written.

TENTH AMENDMENT TO REIMBURSEMENT AGREEMENT

THIS TENTH AMENDMENT TO REIMBURSEMENT AGREEMENT, dated as of February 22, 2012 (this “Amendment”), to the Existing Reimbursement Agreement (as defined below) is made by PPL ENERGY SUPPLY, LLC, a Delaware limited liability company (the “Account Party”), and certain of the Lenders (such capitalized term and other capitalized terms used in this preamble and the recitals below to have the meanings set forth in, or are defined by reference in, Article I below).

WITNESSETH:

WHEREAS, the Account Party, the Lenders and The Bank of Nova Scotia, as the Issuer and as Administrative Agent, are all parties to the Reimbursement Agreement, dated as of March 31, 2005 (as amended or otherwise modified prior to the date hereof, the “Existing Reimbursement Agreement”, and as amended by this Amendment and as the same may be further amended, supplemented, amended and restated or otherwise modified from time to time, the “Reimbursement Agreement”); and

WHEREAS, the Account Party has requested that the Lenders amend certain provisions of the Existing Reimbursement Agreement and the Lenders are willing to modify the Existing Reimbursement Agreement on the terms and subject to the conditions hereinafter set forth;

NOW, THEREFORE, the parties hereto hereby covenant and agree as follows:

ARTICLE I
DEFINITIONS

SECTION 1.1. Certain Definitions. The following terms when used in this Amendment shall have the following meanings (such meanings to be equally applicable to the singular and plural forms thereof):

“Account Party” is defined in the preamble.

“Amendment” is defined in the preamble.

“Existing Reimbursement Agreement” is defined in the first recital.

“Reimbursement Agreement” is defined in the first recital.

SECTION 1.2. Other Definitions. Terms for which meanings are provided in the Existing Reimbursement Agreement are, unless otherwise defined herein or the context otherwise requires, used in this Amendment with such meanings.

ARTICLE II
AMENDMENTS TO THE EXISTING REIMBURSEMENT AGREEMENT

Effective as of the date hereof, but subject to the occurrence of the satisfaction of the conditions in Article III, the provisions of the Existing Reimbursement Agreement referred to below are hereby amended in accordance with this Article II

SECTION 2.1. Amendment to Section 1.1. Section 1.1 of the Existing Reimbursement Agreement is hereby amended (a) by deleting the definition of “Applicable Margin”, (b) by deleting the reference to “Applicable Margin” in the definition of “Debt Rating” and (c) by amending and restating the definitions of “Applicable Commitment Fee Margin”, “Applicable Letter of Credit Margin”, “Applicable Margin” and “Incorporated Agreement” in their entireties as follows:

“Applicable Commitment Fee Margin” from time to time, the following percentages per annum, based upon the Debt Rating as set forth below:

<u>Pricing Level</u>	<u>Debt Rating</u>	<u>Applicable Commitment Fee Margin</u>
1	≥ A- from S&P/ A3 from Moody’s	0.125%
2	BBB+ from S&P/ Baa1 from Moody’s	0.175%
3	BBB from S&P/ Baa2 from Moody’s	0.20%
4	BBB- from S&P/Baa3 from Moody’s	0.25%
5	<BBB- from S&P/ Baa3 from Moody’s	0.35%

“Applicable Letter of Credit Margin” from time to time, the following percentages per annum, based upon the Debt Rating as set forth below:

<u>Pricing Level</u>	<u>Debt Rating</u>	<u>Applicable Letter of Credit Margin</u>
1	≥ A- from S&P/ A3 from Moody’s	1.10%
2	BBB+ from S&P/ Baa1 from Moody’s	1.35%
3	BBB from S&P/ Baa2 from Moody’s	1.60%
4	BBB- from S&P/Baa3 from Moody’s	1.725%
5	<BBB- from S&P/ Baa3 from Moody’s	1.975%

“Incorporated Agreement” means the \$4,000,000,000 Revolving Credit Agreement, dated as of October 19, 2010, as amended by Amendment No. 1 to the Revolving Credit Agreement, dated as of October 19, 2011, among the Account Party, the lenders from time to time party thereto, Wells Fargo Bank, National Association, as administrative agent, issuing lender and swingline lender, certain financial institutions, as syndication agents, certain financial institutions, as lead arrangers, and certain financial institutions, as documentation agents, as in effect on the date hereof and without giving effect to any subsequent modification, supplement, amendment or waiver by the lenders under, or by other parties to, the Incorporated Agreement, unless the Required Lenders agree in writing that such modification, supplement, amendment or waiver shall apply to such provisions or schedules incorporated herein.

SECTION 2.2. Amendment to Section 3.1. Section 3.1 of the Existing Reimbursement Agreement is hereby amended by replacing the reference therein to “the Applicable Margin” with a reference to “2%”.

ARTICLE III CONDITIONS TO EFFECTIVENESS

This Amendment and the amendments contained herein shall become effective as of the date hereof when each of the conditions set forth in this Article III shall have been fulfilled to the satisfaction of the Administrative Agent.

SECTION 3.1. Counterparts. The Administrative Agent shall have received counterparts hereof executed on behalf of the Account Party and the each of the Lenders.

SECTION 3.2. Costs and Expenses, etc. The Administrative Agent shall have received for the account of each Lender, all fees, costs and expenses due and payable pursuant to Section 10.3 of the Reimbursement Agreement, if then invoiced.

SECTION 3.3. Satisfactory Legal Form. The Administrative Agent and its counsel shall have received all information, and such counterpart originals or such certified or other copies of such materials, as the Administrative Agent or its counsel may reasonably request, and all legal matters incident to the effectiveness of this Amendment shall be satisfactory to the Administrative Agent and its counsel. All documents executed or submitted pursuant hereto or in connection herewith shall be reasonably satisfactory in form and substance to the Administrative Agent and its counsel.

ARTICLE IV MISCELLANEOUS

SECTION 4.1. Cross-References. References in this Amendment to any Article or Section are, unless otherwise specified, to such Article or Section of this Amendment.

SECTION 4.2. Loan Document Pursuant to Existing Reimbursement Agreement. This Amendment is a Loan Document executed pursuant to the Existing Reimbursement Agreement and shall (unless otherwise expressly indicated therein) be construed, administered and applied in accordance with all of the terms and provisions of the Existing Reimbursement Agreement, as amended hereby, including Article X thereof.

SECTION 4.3. Successors and Assigns. This Amendment shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns.

SECTION 4.4. Counterparts. This Amendment may be executed by the parties hereto in several counterparts, each of which when executed and delivered shall be an original and all of which shall constitute together but one and the same agreement. Delivery of an executed counterpart of a signature page

to this Amendment by facsimile shall be effective as delivery of a manually executed counterpart of this Amendment.

SECTION 4.5. Governing Law. THIS AMENDMENT WILL BE DEEMED TO BE A CONTRACT MADE UNDER AND GOVERNED BY THE INTERNAL LAWS OF THE STATE OF NEW YORK (INCLUDING FOR SUCH PURPOSE SECTIONS 5-1401 AND 5-1402 OF THE GENERAL OBLIGATIONS LAW OF THE STATE OF NEW YORK).

SECTION 4.6. Full Force and Effect; Limited Amendment. Except as expressly amended hereby, all of the representations, warranties, terms, covenants, conditions and other provisions of the Existing Reimbursement Agreement and the Loan Documents shall remain unchanged and shall continue to be, and shall remain, in full force and effect in accordance with their respective terms. The amendments set forth herein shall be limited precisely as provided for herein to the provisions expressly amended herein and shall not be deemed to be an amendment to, waiver of, consent to or modification of any other term or provision of the Existing Reimbursement Agreement or any other Loan Document or of any transaction or further or future action on the part of any Obligor which would require the consent of the Lenders under the Existing Reimbursement Agreement or any of the Loan Documents.

SECTION 4.7. Representations and Warranties. In order to induce the Lenders to execute and deliver this Amendment, the Account Party hereby represents and warrants to the Lenders, on the date this Amendment becomes effective pursuant to Article III, that both before and after giving effect to this Amendment, all statements set forth in clauses (a) and (b) of Section 5.2.1 of the Reimbursement Agreement are true and correct as of such date, except to the extent that any such statement expressly relates to an earlier date (in which case such statement was true and correct on and as of such earlier date).

IN WITNESS WHEREOF, the parties hereto have executed and delivered this Amendment as of the date first above written.

AMENDMENT NO. 4**TO****PPL OFFICERS DEFERRED COMPENSATION PLAN**

WHEREAS, PPL Services Corporation ("PPL") has adopted the PPL Officers Deferred Compensation Plan ("Plan") effective July 1, 2000; and

WHEREAS, the Plan was amended and restated effective November 1, 2003, and subsequently amended by Amendment No. 1, 2 and 3; and

WHEREAS, PPL desires to further amend the Plan;

NOW, THEREFORE, the Plan is hereby amended as follows:

I. Effective January 1, 2012, the following sections of Articles 1, 2, 3, and 4 are amended to read:

Article I
Purpose

1.1 The purpose of this Executive Deferred Compensation Plan is to provide certain executive officers and senior management employees of PPL and other Participating Companies a financially advantageous method to defer earned income. This Plan received account balances from the terminated PPL Montana Officers Deferred Compensation Plan and the terminated PPL Global Officers Deferred Compensation Plan, effective November 1, 2003, by reason of the merger of those two terminated Plans into this Plan as of that date.

Article II
Definitions

2.12 "**Plan**" means this Executive Deferred Compensation Plan as set forth herein and as hereafter amended from time to time.

2.16 "**Savings Plan**" means the PPL Deferred Savings Plan, PPL Subsidiary Savings Plan, or PPL Retirement Savings Plan.

Article III
Eligibility

3.1 Any elected officer or other key employee of PPL or of a Participating Company who is designated as eligible in a resolution adopted by the Board of Directors of such Participating Company and is approved for participation in this Plan by the CLC.

As of January 1, 2012, all newly hired salaried employees in Base Pay Salary Groups 1-10 shall be eligible, and as of June 1, 2012, all salaried employees hired prior to January 1, 2012, who are not eligible for participation shall be eligible if they are in or attain Base Pay Salary Groups 1-10. Any salaried employee of PPL or a Participating Company hired after January 1, 2012, who is not in Base Pay Salary Groups 1-10 and whose Cash Compensation and Cash Awards for the calendar year exceed the annual income ceiling of Code Section 401(a)(17) shall be eligible for the make-up contribution of Section 4.12 only.

Article IV
Deferred Cash Compensation and Deferred Cash Awards

4.1 Participant shall have the right to elect to defer all, or a portion, of his Cash Compensation in excess of the estimated minimum annual payroll tax amount that the Participant must legally pay without regard to any deferral election.

4.10 The Account of any Participant hired prior to January 1, 2012, with Deferred Cash Compensation and Deferred Cash Awards for the calendar year

shall be increased by a matching contribution amount, equal to 100% of the aggregate Deferred Cash Compensation and Deferred Cash Awards that do not exceed 3% of Cash Compensation, minus the maximum amount of Matching Contributions that could have been made to Participant's Accounts in the PPL Deferred Savings Plan and/or PPL Subsidiary Savings Plan for that calendar year if the Participant had made the maximum employee contributions permitted.

4.11 The Account of any Participant hired on or after January 1, 2012, with Deferred Cash Compensation and Deferred Cash Awards for the calendar year shall be increased by a Matching Contribution and a Fixed Contribution. The Matching Contribution shall be an amount equal to 100% of the aggregate Deferred Cash Compensation and Deferred Cash Awards that do not exceed 6% Cash Compensation, minus the maximum amount of Matching Contributions that could have been made to the Participant's Accounts in the PPL Retirement Savings Plan for that calendar year if the Participant made the maximum employee contributions permitted. The Fixed Contribution shall be an amount equal to 3% of Cash Compensation minus the amount of the Fixed Contribution made to the Participant's Accounts in the PPL Retirement Savings Plan for that calendar year.

4.12 For each year a salaried employee is eligible for the make-up contribution described herein, in accordance with Section 3.1, there shall be an Account for that employee to which shall be credited an amount equal to 9% of the excess of the Cash Compensation and Cash Awards for the year over the Code Section 401(a)(17) annual income ceiling. Except for the absence of any deferral by the employee, this Account shall constitute an "Account" under this Plan and subject to all provisions herein.

II. Except as provided for in this Amendment No. 4, all other provisions of the Plan shall remain in full force and effect.

IN WITNESS WHEREOF, this Amendment No. 4 is executed this ____ day of _____, 2012.

AMENDMENT NO. 5

TO

PPL SUPPLEMENTAL EXECUTIVE RETIREMENT PLAN

WHEREAS, PPL Services Corporation ("PPL") adopted the PPL Supplemental Executive Retirement Plan (the "Plan"), effective July 1, 2000, for certain of its employees; and

WHEREAS, the Plan was amended and restated effective July 1, 2003, and subsequently amended by Amendment No. 1, 2, 3 and 4; and

WHEREAS, PPL desires to further amend the Plan;

NOW, THEREFORE, the Plan is hereby amended as follows:

I. Effective January 1, 2012, the following sections of Articles 2 and 3 are amended to read as follows:

ARTICLE II **DEFINITIONS**

2. Definitions.

The following terms shall have the same definitions as they are given in the PPL Retirement Plan:

- (a) Actuarial Equivalent.
- (b) Affiliated Company or Affiliated Companies.
- (c) Board of Directors (herein referred to as "Board").
- (d) PPL.

The following terms shall have the following definitions under this PPL Supplemental Executive Retirement Plan:

- (e) **"Benefit"** means the Benefit payable under this Plan calculated under Article 4.
- (f) **"Cause"** for Participant's Termination of Employment by PPL or an Affiliated Company means
 - (1) If a "Change in Control," as defined below, has occurred,
 - (A) the willful and continued failure by Participant to substantially perform Participant's duties with PPL or an Affiliated Company (other than any such failure resulting from Participant's incapacity due to physical or mental illness or, if applicable, any such actual or anticipated failure after the issuance of any "Notice of Termination for Good Reason" by the Participant pursuant to any severance agreement between Participant and PPL or an Affiliated Company) after a written demand for substantial performance is delivered to Participant by the Board, which demand specifically identifies the manner in which the Board believes that Participant has not substantially performed Participant's duties,

or
 - (B) the willful engaging by Participant in conduct which is demonstrably and materially injurious to PPL or an Affiliated

Company, monetarily or otherwise.

(C) For purposes of Subsections (A) and (B) of this definition, (A) no act, or failure to act, on Participant's part shall be deemed "willful" unless done, or omitted to be done, by Participant not in good faith and without reasonable belief that Participant's act, or failure to act, was in the best interest of PPL or the Affiliated Company, and (B) in the event of a dispute concerning the application of this provision, no claim by PPL or an Affiliated Company that Cause exists shall be given effect unless PPL or the Affiliated Company establishes to the Board by clear and convincing evidence that Cause exists.

(2) If a "Change in Control," as defined below, has not occurred, "Cause" means:

- (i) Participant's engagement is misconduct which is materially injurious to PPL or an Affiliated Company,
- (ii) Participant's insubordination after clear and lawful direction,
- (iii) Participant's commission of a felony in the performance of duties to PPL or an Affiliated Company,
- (iv) Participant's commission of an act or acts constituting any fraud against or embezzlement from PPL or an Affiliated Company,
- (v) Participant's material breach of any confidentiality or non-competition covenant entered into between the Participant and PPL or an Affiliated Company, or
- (vi) Participant's employment with a competitor while employed by PPL or an Affiliated Company. The determination of the existence of Cause shall be made by the Board in good faith, which determination shall be conclusive for the purpose of this Plan.

(g) "Change in Control" shall mean the occurrence of any of the following events:

- (i) any Person or Group is or becomes the "beneficial owner" (as defined in rules 13d-3 and 13d-5 under the Securities Exchange Act of 1934, as amended) directly or indirectly of more than 30% of the total voting power of the voting stock of PPL Corporation (or any entity which controls PPL Corporation) within a 12-month period, including by way of merger, consolidation, tender or exchange offer, or otherwise;
- (ii) a reorganization, recapitalization, merger or consolidation (a "Corporate Transaction") involving PPL Corporation, unless securities representing 70% or more of the combined voting power of the then outstanding voting securities entitled to vote generally in the election of directors of PPL Corporation or the corporation resulting from such Corporate Transaction (or the parent of such corporation) are held subsequent to such transaction by the Person or Persons who were the "beneficial owners" of the outstanding voting securities entitled to vote generally in the election of directors of PPL Corporation immediately prior to such Corporate Transaction, in substantially the same proportions as their ownership immediately prior to such Corporate Transaction;
- (iii) the sale or disposition, in one or a series of related transactions, of all or substantially all, of the assets of PPL Corporation to any

Person or Group; or

- (iv) during any period of 12 months, individuals who at the beginning of such period constituted the Board (together with any new directors whose election by such Board or whose nomination for election by the stockholders of PPL Corporation was approved by a vote of a majority of the directors of PPL Corporation, then still in office, who were either directors at the beginning of such period or whose election or nomination for election was previously so approved) cease for any reason to constitute a majority of the Board, then in office.
- (h) **"CLC"** shall mean the Corporate Leadership Council of PPL Corporation.
- (i) **"Early Retirement Reduction Factor"** means the percentage that appears adjacent to the Participant's age below determined under the appropriate column.
- (1) Column (1) shall apply to any Retiree.
- (2) Column (2) shall apply to any Terminated Vested Participant.

Percentage of Benefit Received

Benefits Start	(1) Age When Retiree	(2) Terminated Vested
	60	100
59	95	90
58	90	80
57	85	70
56	80	60
55	75	50
54	70	N/A
53	65	N/A
52	60	N/A
51	55	N/A
50	50	N/A
49 or younger	N/A	N/A

- (j) **"Good Reason"** shall mean "Good Reason" or such similar concept as defined in any employment, severance, or similar agreement then in effect between the Participant and any of PPL or an Affiliated Company, or, if no such agreement containing a definition of "Good Reason" is then in effect or if such term is not defined therein, "Good Reason" shall mean without the Participant's consent, (i) a change caused by PPL or an Affiliated Company in the Participant's duties and responsibilities which is materially inconsistent with the Participant's position at the applicable entity that is a member of the Affiliated Companies, (ii) a material reduction in the Participant's annual base salary, annual incentive compensation opportunity or other employee benefits (excluding any such reduction that is part of a plan to reduce annual base salaries, annual incentive compensation opportunities or other employee benefits of comparably situated employees of any entity that is a member of the Affiliated Companies generally), or (iii) a relocation of the Participant's current principle place of employment; provided that, notwithstanding anything to the contrary in the foregoing, the Participant shall only have "Good Reason" to terminate employment following the applicable entity's failure to remedy the act which is alleged to constitute "Good Reason" within thirty

(30) days following such entity's receipt of written notice from the Participant specifying such act, so long as such notice is provided within sixty (60) days after such event has first occurred.

(k) **"Participant"** means

(1) any elected officer or other key employee of PPL or of a Participating Company who is hired prior to January 1, 2012, is designated as eligible in a resolution adopted by the board of directors of such Participating Company, and is approved for participation in this Plan by the CLC.

(2) any individual formerly described in Paragraph (1) who has not yet had a Termination of Employment, or any individual formerly described in Paragraph (1) who has had a Termination of Employment and is entitled to receive benefits under Article 3 of this Plan. All Participants of this Plan are listed in Appendix A.

(l) **"Participating Company"** means PPL Services Corporation, PPL Electric Utilities Corporation (prior to February 14, 2000, PP&L, Inc.), PPL EnergyPlus, LLC (prior to February 14, 2000, PP&L EnergyPlus Co., LLC), PPL Global, LLC, PPL Montana, LLC and each other Affiliated Company that is designated by the CLC to adopt this Plan by action of its board of directors or managers.

(m) **"Plan"** means this Supplemental Executive Retirement Plan, as amended from time to time.

(n) **"PPL Corporation"** means PPL Corporation (prior to February 14, 2000, PP&L Resources, Inc.).

(o) **"Retiree"** means a Participant who has a Termination of Employment after:

(1) attaining age 55 and completing at least 10 Years of Service, or

(2) attaining age 60.

(p) **"Retirement Plan"** means the PPL Retirement Plan, as amended from time to time.

(q) **"Section 409A"** means Section 409A of the Internal Revenue Code of 1986, as amended, and the final Treasury Regulations issued thereunder.

(r) **"Supplemental Final Average Earnings"** means the following:

(1) Supplemental Final Average Earnings means twelve times the average of a Participant's "compensation" as defined in Paragraphs (A) through (B) below, from PPL and/or an Affiliated Company, for the 60 highest full months in the final 120 (or fewer) full consecutive months during which he is employed by PPL and/or an Affiliated Company. For this purpose, non-consecutive months interrupted by periods in which the Participant receives no "compensation" shall be treated as consecutive. For purposes of this Section, "compensation" shall include the following:

(A) the Participant's base salary from PPL and/or any Affiliated Company prior to any deferrals to the Officers Deferred Compensation Plan or any other nonqualified deferred compensation plan of an Affiliated Company or any Internal Revenue Code section 401(k) plan by which Participant is covered, plus

(B) the value of any cash grants attributable to any month used in the average, awarded to Participant pursuant to the

executive incentive awards program initially approved by the Board on October 25, 1989 or any similar program maintained by an Affiliated Company. For the final calendar year of employment, "Compensation" shall include an amount equal to the value of any cash grant that would have been paid for service in the final calendar year of employment, as if 100% of target goals were achieved, but prorated by multiplying by a fraction equal to the number of full calendar months of service completed divided by 12.

- (2) For the purposes of determining the Participant's "compensation" under Subsection (1) of this definition, the CLC will determine the amount of any cash grant awarded to the Participant under any incentive awards program, and prorate such amount over the year for which the award was granted.

Notwithstanding the foregoing, if a Participant transfers from a Participating Company to an Affiliated Company that is not a Participating Company after becoming a Participant, earnings with the Affiliated Company after the date of such transfer (or for the duration of each such transfer if the Participant transfers more than once) shall not count in the Participant's Supplemental Final Average Earnings.

- (s) **"Terminated Vested Participant"** means a Participant:

(1) who has a Termination of Employment after attaining age 50 but not age 55, and completing at least 10 Years of Service.

- (t) **"Termination of Employment"** means the Participant's separation from service (as such term is defined in Section 409A) from PPL and all Affiliated Companies.

- (u) **"Years of Service"** means the number of full and partial years used to calculate Participant's accrued benefit under the Retirement Plan, or which would be used to calculate an accrued benefit if the Participant were eligible to participate in the Retirement Plan but (1) excluding years prior to Participant's attainment of age 30, and (2) including service with any Affiliated Company prior to the Participant's most recently becoming a Participant eligible under this Plan, provided such service would otherwise be counted under the Retirement Plan, but excluding any such service with an Affiliated Company performed before the Affiliated Company became an Affiliated Company, and (3) including Supplemental Years of Service granted to the Participant as set forth in Appendix A. In the event of a "Change in Control," and a Termination of Employment by PPL or an Affiliated Company not for Cause, or a Termination of Employment for Good Reason, all Supplemental Years of Service granted to the Participant as set forth in Appendix A shall become Years of Service and Years of Vesting Service under the Plan, on a pro rata basis, as follows:

(1) For Supplemental Years of Service requiring a specified number of Years of Service, by multiplying the maximum number of Supplemental Years of Service by actual Years of Service divided by the specified number of Years of Service otherwise required.

(2) For Supplemental Years of Service requiring attainment of a specified age, by multiplying the maximum number of Supplemental Years of Service by actual Years of Service divided by the number of Years of Service that would have been attained if the Participant worked to the specified age.

(v) **"Year(s) of Vesting Service"** means (1) the number of full years used to calculate Participant's vested interest in his accrued benefit under the Retirement Plan, or which would be used if eligible under the Retirement Plan, but excluding any such service with an Affiliated Company performed before the Affiliated Company became an Affiliated Company, and (2) the number of Supplemental Years of Service, if any, that may have been granted to the Participant, as set forth in Appendix A. In the event of a "Change in Control," and a Termination of Employment by PPL or an Affiliated Company not for Cause, or a Termination of Employment for Good Reason, all Supplemental Years of Service granted to the Participant as set forth in Appendix A shall become Years of Service and Years of Vesting Service under the Plan, on a pro rata basis, as follows:

(1) For Supplemental Years of Service requiring a specified number of Years of Service, by multiplying the maximum number of Supplemental Years of Service by actual Years of Vesting Service divided by the specified number of Years of Service otherwise required.

(2) For Supplemental Years of Service requiring attainment of a specified age, by multiplying the maximum number of Supplemental Years of Service by actual Years of Vesting Service divided by the number of Years of Vesting Service that would have been attained if the Participant worked to the specified age.

ARTICLE III

BENEFIT ELIGIBILITY

3. Benefit Eligibility.

(c) Notwithstanding Section 3(a), in the event of a "Change in Control," all Participants who have a Termination of Employment by PPL or an Affiliated Company not for Cause, or who have a Termination of Employment for Good Reason, shall be eligible for a Benefit.

II. Except as provided for in this Amendment No. 5, all other provisions of the Plan shall remain in full force and effect.

IN WITNESS WHEREOF, this Amendment No. 5 is executed this ____ day of _____, 2012.

PPL CORPORATION
 2011 ANNUAL REPORT
 TO THE SECURITIES AND EXCHANGE COMMISSION
 ON FORM 10-K

POWER OF ATTORNEY

The undersigned directors of PPL Corporation, a Pennsylvania corporation, that is to file with the Securities and Exchange Commission, Washington, D.C., under the provisions of the Securities Exchange Act of 1934, as amended, its Annual Report on Form 10-K for the year ended December 31, 2011 ("Form 10-K Report"), do hereby appoint each of William H. Spence, Paul A. Farr, Robert J. Grey and Michael A. McGrail, and each of them, their true and lawful attorney, with power to act without the other and with full power of substitution and resubstitution, to execute for them and in their names the Form 10-K Report and any and all amendments thereto, whether said amendments add to, delete from or otherwise alter the Form 10-K Report, or add or withdraw any exhibits or schedules to be filed therewith and any and all instruments in connection therewith. The undersigned hereby grant to each said attorney full power and authority to do and perform in the name of and on behalf of the undersigned, and in any and all capacities, any act and thing whatsoever required or necessary to be done in and about the premises, as fully and to all intents and purposes as the undersigned might do, hereby ratifying and approving the acts of each of the said attorneys.

IN WITNESS WHEREOF, the undersigned have hereunto set their hands this day of February, 2012.

CERTIFICATION

I, WILLIAM H. SPENCE, certify that:

1. I have reviewed this annual report on Form 10-K of PPL Corporation (the "registrant") for the year ended December 31, 2011;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

I, KENT W. BLAKE, certify that:

1. I have reviewed this annual report on Form 10-K of Louisville Gas and Electric Company (the "registrant") for the year ended December 31, 2011;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 95

Responding Witness: Paula H. Pottinger, Ph.D.

Q-95. Please identify any and all measures the Company has undertaken within the past three years, including those the Company will take during the fully forecasted test period, to minimize its employee benefit health care costs.

A-95. The Company introduced the following plan design changes:

- employed spouse premium
- office visit co-pay for a specialist increased
- co-pays for mail order prescriptions, up to a 90-day supply, increased to 2.5 x retail
- vision coverage separated from medical, voluntary 100% employee-paid

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 96

Responding Witness: Paula H. Pottinger, Ph.D.

Q-96. State the annualized cost savings associated with each measure (whether actual or projected), and show how the Company estimated such amount.

A-96. The projected savings are at the Medical Plan level:

Cost Saving Measure	Projected Annualized Savings
1. Employed Spouse Premium	\$3,438,000
2. Increased Office Visit co-pay for Specialist	\$130,000
3. Increased co-pay for mail order prescriptions, up to a 90-day supply, to 2.5 x retail	\$366,000
4. Vision coverage separated from medical, 100% employee paid	\$297,000

See attached for explanation of how these amounts were estimated.

Cost Saving Measure #1 – Employed Spouse Premium

* Based on the Company's 2012 enrollment following its ESP audit compared to its 2011 enrollment as of that date, the estimated total annual employee health plan savings attributable to the employed spouse premium that became effective January 1, 2012 is \$3,438,000. This savings estimate was derived as follows:

- > 432 spouses were dropped from coverage x \$6,524 average annual 2012 health care cost per spouse = \$2,818,000
- > 171 spouses' coverage was changed from primary to secondary x \$3,628 average 2012 savings per spouse = \$620,000
- > The 2012 average annual health care cost per spouse was derived as follows:
 - (a) Calendar year actual 2010 incurred claims
 - * Reduced by claims above specific stop loss attachment point
 - * Adjusted for actual large claimants in relation to expected large claimants below Company's stop loss attachment point, based on a Mercer actuarial distribution for 2 million+ active health plan enrollees
 - (b) Trended to 2012 assuming
 - * 9.25% annual medical trend for EPO participants and 8.25% annual medical trend for PPO participants
 - * 8.75% annual Rx trend
 - (c) Reduced for expected Rx rebates, based on contract terms with Medco
 - (d) Increased for third party administration expenses and stop loss premiums
 - (e) Total projected claims from (d) allocated among employee health plan options based on actuarial values from Mercer's MedPrice actuarial employee health plan pricing model and among employee health plan tiers based on the following factors:
 - * Employee - 1
 - * Spouse - 1.05
 - * Children - 0.85
 - (f) 2011 Spousal enrollment among the Company's employee health plan options utilized to develop weighted average (\$6,524) of spousal annual projected costs for each Company health plan option

> For spouses whose Company coverage was changed from primary to secondary, the Company's employee health plan was estimated to save 80% of estimated average spousal medical costs and 0% of estimated average spousal administrative and Rx costs. On a blended basis, 55.6% of the estimated \$6,524 average annual 2012 health care cost per spouse was assumed would be saved by the Company's employee health plan.

Note: The annualized savings figure has not been adjusted for health insurance trend subsequent to 2012.

Cost Saving Measure #2 – Increased Office Visit co-pay for Specialist

In 2014, co-pays for specialist physician office visits were increased from \$30 per visit to \$40 per visit. Annual estimated savings of \$130,000.

(a) Mercer's MedPrice actuarial employee health plan pricing model was applied to obtain the impact of this change. The result was a 0.35% reduction in projected medical expenses.

(b) 0.35% of projected 2014 medical claims based on March 2013 enrollment for the options affected by the co-pay change was \$130,000.

Cost Saving Measure #3 - Increased co-pay for mail order prescriptions, up to a 90-day supply, to 2.5 x retail

In 2014, co-pays for mail order prescriptions (up to 90 day supply) were increased from 2 x retail copays to 2.5 x retail copays. Annual estimated savings of \$366,000.

- (a) Mercer's Rx actuarial pricing model was applied to obtain the impact of this change. The result was a 2.9% reduction in projected Rx expenses.
- (b) 2.9% of projected 2014 Rx claims based on March 2013 enrollment was \$366,000.

Cost Saving Measure #4 - Vision coverage separated from medical, 100% employee paid

In 2014, vision coverage was separated from the Company's employee health plan, becoming 100% employee paid. Annual estimated savings of \$267,000.

(a) \$6.68 per enrolled employee per month insured vision premium for 2014 was multiplied by March 2013 enrollment of 3,331 to obtain \$267,000.

Note: None of the annualized savings figures have been adjusted for health insurance trend subsequent to 2014.

When reviewing the figures above keep in mind LKE's rounding policy - all monthly rates are rounded to the nearest dollar and then employee contributions are calculated and rounded to the nearest dollar. When multiple plan changes apply in a given year, like 2014, the aggregate impact reported will not equal the sum of the impact of each of the plan changes viewed independently.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 97

Responding Witness: Paula H. Pottinger, Ph.D.

Q-97. Has the Company increased the co-payment provisions borne by employees? If not, why not?

A-97. Yes, in 2014:

- co-payment for specialist office visit increased from \$30 to \$40
- co-payment for mail order prescriptions up to 90-day supply, increased from 2 x retail to 2.5 x retail

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 98

Responding Witness: Paula H. Pottinger, Ph.D.

Q-98. Describe any and all incentives the Company has built into its employee health care benefit package to encourage cost economies.

A-98. The Company implemented several wellness initiatives, including:

- disease management programs targeting hypertension, diabetes and hyperlipidemia
- tobacco-premium with smoking cessation alternative
- Tobacco restricted workplace
- wellness incentive for attending on-site Health Fair
- fitness and weight-loss program reimbursement
- wellness matching grants program
- on-site flu shots and mammograms
- Anthem Nurse coaching program

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 99

Responding Witness: Paula H. Pottinger, Ph.D.

Q-99. Provide the most current health care premiums and related invoices.

A-99. The medical plan is self-insured and the Company is billed weekly for claims processed.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 100

Responding Witness: Daniel K. Arbough

Q-100. For insurance coverage for which the Company is self-insured, please provide a description of that self-insurance, a description of how it is accounted for in the utility's books and records and a description of activity for each year 2010 through 2014 and fully forecasted test period.

A-100. LG&E is not fully self-insured for any of its insurance programs. The Company is self-insured for health insurance until it meets the spend required in its stop-loss policy and the Company has deductibles for other insurance programs. See attachment for summary of these limits.

LG&E experienced one claim in excess of its self-insured retention limits in the years 2010-2014. It was a property insurance claim that occurred in August 2012 related to Mill Creek Station Unit 4. LG&E received \$409K in recovery from the property carriers.

Claims incurred that are below the deductible are allocated to expenses or capital as appropriate. Claims forecasted in the test period are estimated based on historical experience.

See responses to Question No. 101 and Question No. 102 for a summary of activity for each year 2010 through 2014 and the fully forecasted test period.

Type of Insurance Coverage	Self Insured Retention/ Deductible	Exceptions
Property & Machinery	\$ 2,500,000	
Property - Gas Storage	\$ 100,000	
Excess Liability	\$ 2,000,000	Prior to 12/31/11, SIR was \$1,000,000
Fiduciary/EBL	\$ 2,000,000	
Pollution Legal Liability	\$ 1,000,000	
Directors & Officers Liability	\$ 1,000,000	\$2,500,000 Securities claims
Cyber Liability	\$ 1,000,000	Coverage began 8/30/12
Excess Workers' Compensation	\$ 1,000,000	
Employed Lawyers Professional Liability	\$ 1,000,000	
Employment Practice Liability	\$ 500,000	Was \$250,000 within US and \$50,000 outside US prior to 6/16/11
Blanket Crime, including ERISA bond endorsement	\$ 250,000	\$2,500 - Money Orders, Counterfeit & Credit Card Forgery
River Marine - Hull & Machinery	\$ 100,000	\$25,000 Hull total loss
River Marine - P&L	\$ 100,000	
Heath Insurance Stop Loss Limit, per individual	\$ 300,000	Prior to 1/1/2012, stop loss limit was \$250,000

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 101

Responding Witness: Daniel K. Arbough

Q-101. Please provide the amount of insurance expense, by insurance type (i.e., property insurance, liability insurance, workers compensation, directors & officers liability insurance, etc.) for each year 2010 through 2014, and the projected expense for the fully forecasted test period, and identify the accounts in which the associated costs are included.

A-101. See the response to Question No. 102 for benefits related insurance expenses, including workers compensation, group life insurance, medical/dental insurance and long term disability insurance. Other insurance expenses are itemized in the attached for the test period and each year 2010 through 2014. The significant increase in the property insurance forecast is the result of new assets going into service such as environmental projects at Mill Creek.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 102

Responding Witness: Paula H. Pottinger, Ph.D.

Q-102. Please provide a detailed listing for each of the respective employee benefits, including:

- a. the amount budgeted by account for each year 2010 through 2014, and the amounts projected for the fully forecasted test period;
- b. the amount expensed by account for each year 2010 through 2014;
- c. an explanation for any change of 10% or more from the previous year;
- d. the amount charged to capital;
- e. the amount charged to other; and
- f. any studies the Company is relying on as justification for the reasonableness of the benefits provided.

A-102.

- a. The Company budgets for employee benefits and other labor related cost using summarized allocation rates. The rates include various employee benefits, incentive compensation, off-duty and payroll taxes. At the start of each budget period, estimates are obtained for each of these components from the appropriate sources. These amounts are combined and the allocation rate is calculated using an estimated labor base. The benefits are allocated to each FERC account based on where labor dollars are budgeted. See attached which includes a breakdown of totals by year by the originating Company and component and the allocated total by FERC account.
- b. See attached.
- c. See attached.
- d. See attached.

- e. See attached.

- f. The Company utilizes several different studies and services to justify the reasonableness of the benefits that are provided to the employees. Following is a list of services that have historically been used:
 - Mercer's National Survey of Employer-Sponsored Health Plans
 - Towers Watson Benefits Online. This is an integrated suite of web-enabled services designed to help organizations monitor and manage their benefit programs.
 - Our consultant's (Mercer & Towers Watson) perform studies tailored to plans, including Funding and PBGC Premium Analysis for Qualified Retirement Plan, and Feasibility Study of Lump Sum Window for Terminated Vested Participants for PPL
 - See the response to PSC 1-34.

Notes:

- (1) The budget for 2010 was developed in a prior budget system and converted to the current Power Plant budget System.
The budget allocations for FERC 107/108 include engineering overheads and A&G overheads. The details are not available to separate.
- (2) Beginning in 2012, the methodology was changed for labor related cost that were budgeted to Payroll taxes were budgeted to FERC 408 and benefits to FERC 926.
Offduty and Incentive Compensation are allocated to FERC based on budgeted labor.

**Louisville Gas and Electric Company
Incentive Compensation**

Explanations provided for Changes >\$100k and 10%

a - Expense increased due to the decrease in the discount rate and updated per capita claims costs, partially offset by a decrease in headcount.

b - Decrease in expense due to updated participant data, partially offset by the decrease in discount rate and updated per capita claims costs.

c - Increase in expense due to updated per capita claims costs and updated mortality assumption, partially offset by the increase in the discount rate and updated trend assumption.

d - The decrease in expense is primarily due to demographic gains, the addition of a premium of tobacco users and updated mortality assumptions, partially offset by decrease in the discount rate and updated per capita claims costs.

Explanations provided for Changes >\$100k and 10%

a - Decrease in expense due to reduction in salary increase assumption and net liability gains recorded in 2012 as there were less pay periods than in 2011.

b - Increase in expense due to lower discount rates, partially offset by additional contributions to the plan.

c - Decrease in expense related to discount rate being up 90+ basis points.

Explanations provided for Changes >\$100k and 10%

a - Change in account balances primarily due to fluctuations in the amount due to the Pension Benefit Guarantee Corporation for federal government insurance coverage for the Company's pension plans.

b - Increase partially due to the reinsurance fee required by Obamacare accrued in 2014.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 103

Responding Witness: Daniel K. Arbough

Q-103. Pension. Please provide a copy of the Company's most recent pension plan actuarial report for each pension plan provided by the Company.

A-103. See response to KIUC 1-15.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 104

Responding Witness: Russel A. Hudson

Q-104. Budget Variance Reports. Provide for each year 2010 through 2014, the capital budget variance reports of the Company, and the operating budget variance reports of the Company, in the most detailed format available.

A-104. For capital budget variance reports the most detailed format available is by project. See the response to Question No. 107, which lists the variances between actual and budget for each capital project in the year 2010 through 2014. For operating expense budget variance reports for the combined Companies for each year from 2010 through 2014, see the attached OPEX variance reports.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 105

Responding Witness: Kent W. Blake

Q-105. Budget. Provide all assumptions reflected in the Company's fully forecasted test period.

A-105. All assumptions reflected in the Company's fully forecasted test period are contained in the written direct testimony of Kent W. Blake and David S. Sinclair filed with LG&E's Application and Tab 16 of the Filing Requirements.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 106

Responding Witness: Kent W. Blake

- Q-106. Capital Budget. Provide copies of all operating and capital budget instructions, assumptions, directives, manuals, policies and procedures, timelines, and descriptions of budget procedures used for each year 2010 through 2014.
- A-106. The Companies' budget instructions, directives, manuals, policies and procedures, timelines, and descriptions of budget procedures can be found by reference in Tab 16 – 807 KAR 5:001 Section 16 (7)(c) of the Filing Requirements and Attachment to PSC 1-9 of this proceeding. See attached for the budget assumptions for each year 2010 through 2014.

Attachment in Separate File

The attachment is being
provided in a separate
file.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 107

Responding Witness: Russel A. Hudson

Q-107. Capital Budgets. Provide, in the most detailed format available, for each year 2010 through 2014, and for the fully forecasted test period:

- a. the budgeted capital additions by type of plant,
- b. the actual results (where applicable) for each year by type of plant, and
- c. an explanation for any variance of 10% or more.
- d. Provide, by project, for 2010 - 2014 and for the fully forecasted test period test year, the budgeted reliability capital additions and the actual reliability capital additions. Explain any variance of 10% or more.

A-107. a. See attached.

b. See attached.

c. See attached. For the variances of 10% or more, a dollar level of \$25,000 is used as the threshold for variance explanations. The \$25,000 level is the variance amount above project sanction which drives a revised Authorization for Investment Proposal (AIP).

d. See attached.

The attachment is being
provided in a separate
file.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 108

Responding Witness: Kent W. Blake / Paul W. Thompson

Q-108. Please list and describe all cost savings programs implemented from the time of the Company's last rate case through the present.

A-108. As explained in Mr. Blake's testimony, under the Company's long-standing business philosophy, LG&E uses the same criteria as that of the Commission in evaluating its practices and operations and seeks the most effective, least-cost option that will ensure the delivery of safe and reliable service. This well-established philosophy is employed in a rigorous capital project approval process that is detailed in Exhibit KWB-2, Capital and Investment Review Policy, and the similar review and approval process used for contracts and other disbursements. In addition, LG&E's long-standing policy requires that all procurement contracts be competitively bid, subject to limited exceptions. Finally, LG&E's planning and budgeting process, for the reasons discussed in Mr. Blake's testimony, improves efficiency and productivity.

LG&E has implemented numerous programs to achieve efficiency and productivity. These programs are described in detail in the testimony of Paul W. Thompson. While the implementation of some programs may result in cost savings, tracking cost savings is impractical if not impossible given the many operational factors and variables that exist and the dynamic of operating a vertically-integrated utility system.

Below is a listing of programs LG&E has implemented to achieve efficiency and productivity since new rates went into effect on January 1, 2013, following the last rate case:

1. Remote performance monitoring for each coal fired facility except Green River. This initiative assists with detecting anomalies that could indicate faults or emerging issues with plant equipment and systems. The program collects data from distributed control systems and sends it to Black and Veatch. Black and Veatch monitors and analyzes the data using models that track normal operating ranges of data points. During analysis, Black and Veatch looks for points that are operating outside of these normal ranges. If abnormal parameters are observed, Black and Veatch alerts the Companies

with key information to help diagnose the issue and return the parameter to normal operational values. The Companies have improved efficiency by avoiding costly failures and maintaining equipment properly. In cases where damage or failure is unavoidable, Black and Veatch's analysis helps identify the cause of the failure and steps to prevent reoccurrence.

2. Downtown Louisville network load flow modeling. This initiative has improved LG&E's capability to model and plan for the downtown Louisville electrical system. Better modeling capability allows for a more timely and accurate study of the network under all operating conditions. Improved modeling also allows system planners to optimize expenditures for capacity enhancements needed to serve new load and to improve the safety, reliability, and performance of network facilities. This initiative is associated with LG&E's effort to install advanced metering in the downtown Louisville network, which will be used to gather detailed time coincidental load data necessary for improved modeling.
3. Louisville downtown network supervisory control and data acquisition. This initiative provides real-time monitoring and control of critical network equipment for electric distribution operations. This includes information about transformer loading, voltage, transformer temperature, and water levels. This data assists with managing the network by identifying small issues before they escalate. The system also enhances worker safety and decreases operational expense by enabling remote operation of network protectors. Workers are no longer required to physically enter a confined space to determine equipment status. Finally, this initiative provides historical data to enhance system modeling and capacity planning, which in turn allows LG&E to maximize its investment in existing network infrastructure, better plan equipment maintenance cycles, and minimize spending to serve new load.
4. Reorganization of safety and technical training. The Companies reorganized their safety and technical training program to centralize these functions across all lines of business. A centralized safety department paves the way for enhanced communication and best practice sharing Company wide, which should help reduce or prevent incidents and lead to efficiencies in processes by establishing common expectations.
5. Faulted circuit indicators. Faulted circuit indicators ("FCIs") are devices installed on lines and cables to provide a visible indication of the detection of fault current and are used to help identify and isolate faulted line and cable sections. The program speeds up the identification and isolation of faulted cable segments, which is a time consuming process, and speeds up the restoration of service to unfaulted sections. Without FCIs, multi-segment, underground residential installations must be isolated and tested one by one. FCIs allow faulted cable sections to be identified by visual inspection and minimal testing, thus saving time.

6. Portable transformer fleet addition. LG&E expanded its portable transformer fleet to respond more readily to transformer failures, to complete substation enhancement projects without service interruption, and to expand its capability to remove transformers from service for necessary maintenance without interrupting electric service. LG&E utilizes a portable transformer strategy to provide contingency for substation transformer failures. The majority of LG&E's distribution power transformers have a customized "bus duct" on the secondary side of the transformer and a spare transformer cannot easily be installed for a failed unit. Typically, a portable transformer is installed and the failed unit is sent out for rewind/repair (an 8–12 month process). Upon return, the transformer is reinstalled in its original position. A portable transformer is also much faster to install (24-30 hours) versus a direct replacement (3-5 days depending upon size). A direct replacement also requires additional work and investment at a later date to modify the bus duct for permanent service.
7. Replace aging substation infrastructure. The Companies have initiated a collection of programs that covers the annual replacement of critical- and maintenance-intensive substation equipment. Efficiency and productivity are gained by replacement under planned conditions rather than an unplanned, emergency condition. Planned work provides efficient use of resources, shorter and more efficient response time, and synergies with other work occurring in the same time window.
8. New asset and resource management ("ARM") software. The Companies licensed new software to help manage work and resources after the software previously used by the Companies was no longer supported. The new ARM software ensures efficiency, consistency, and accuracy with high-volume work management, including resource integration and tracking, documentation, and reporting.
9. Mobile workforce management. The Companies have recently implemented new software called Mobile Workforce Management ("MWM"). MWM supports the Companies' restoration processes and enhances the efficiency and timeliness of critical outage information exchange between customers, field personnel, and the distribution control center. The MWM application enables mobile assignment of repair, operations, and maintenance tasks to truck laptop computers. Employees complete work tasks electronically, thus allowing for efficient and timely processing by back-office personnel.
10. Master facility plan. The Companies completed a master facility plan in 2014. While completing the plan, the Companies assessed each facility's status and functional space capabilities. The information learned will assist with investment decisions in long-term operational planning.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 109

Responding Witness: Paul W. Thompson / Kent W. Blake

Q-109. Please describe each program and provide the anticipated savings as well as the actual savings realized to date.

A-109. See response to Question No. 108.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 110

Responding Witness: Kent W. Blake / Paul W. Thompson

Q-110. Include calculations of savings amounts and explain any assumptions used in such calculations.

A-110. No such calculation exists. See the response to Question No. 108.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 111

Responding Witness: Kent W. Blake / Paul W. Thompson

Q-111. For each cost-saving program listed, provide the cost-benefit analyses. Show the impact of each cost saving program on the fully forecasted test period. If there are none, explain why.

A-111. See the response to Question No. 108. No such cost-benefit analyses exist. As a matter of our long-standing business philosophy, LG&E uses the same criteria as that of the Commission in evaluating our practices and operations. LG&E seeks the most effective, least-cost option that will ensure the delivery of safe and reliable service. The assumption contained in the request for information (i.e., net-benefits) is not applicable in this case. To the extent cost savings result from any program, the impact of such cost savings is embedded in the test period.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 112

Responding Witness: Christopher M. Garrett

Q-112. Provide the amount of customer service deposits by month for each year 2010 through 2014, and the projected deposits for the fully forecasted test period.

A-112. See attached.

Louisville Gas and Electric Company
Case No. 2014-00372
Summary of Total Customer Deposits
For the Months January 2010 through December 2014, plus the Fully Forecasted Test Period

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 113

Responding Witness: John J. Spanos

Q-113. Please identify all abnormal, atypical, and/or unusual historical plant activity of the Company's investment which occurred and was removed from the historical analysis of the Company's investment/data for depreciation purposes.

A-113. There was not any data considered abnormal, atypical and/or unusual for depreciation purposes for Cane Run Unit 7 Generating Station. Additionally, there were no historical data for Accounts 341 through 346 in the life analyses of the 2011 Depreciation Study considered abnormal, atypical and/or unusual.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 114

Responding Witness: John J. Spanos

Q-114. Please state, by account, the values of additions, retirements, gross salvage, cost of removal, etc., that were modified from the Company's continuing property records for inclusion and presentation in its most recent depreciation study and work papers. Each adjustment should be categorized by year, account, and dollar amount, (e.g., 2008 gross salvage value for account XXX was adjusted to reflect a reimbursement rather than gross salvage). Further, provide the reason for each modification.

A-114. There were no entries that were modified from the Company's continuing property records for inclusion in its most recent depreciation study. However, there were a few entries that have been coded as non-recurring and not part of the life or net salvage analyses.

The attached document sets forth entries which were adjusted. The entries include Account, transaction type, transaction year, retirement amount, cost of removal and description of entry. Additionally, there is one retirement classified as final retirements which were not included in the interim life analyses.

Waterside Units 7&8

a. Date of retirement	September 2006
b. Amount of retirement	\$4,109,827
c. Accounts	341-346
d. Reason for retirement	End of economic useful life

Electric Plant

Sales and Reimbursements Excluded from Depreciation Study Analysis for the Period 2002-2011

<u>Account</u>	<u>Transaction Type</u>	<u>Transaction Year</u>	<u>Retirement</u>	<u>Cost of Removal</u>	<u>CP Salvage</u>	<u>Description</u>
34300	Reimbursed Retirement	2004	-	\$ (1,270,131.94)	\$ -	Insurance proceeds related to failure of Brown CT 7 turbine blades, vanes and associated equipment
34300	Reimbursed Retirement	2003	(1,344,213.36)	\$ -	\$ -	Retirement reimbursed by insurance proceeds related to failure of Brown CT 7 turbine blades, vanes and associated equipment
36400	Sale	2007	-	\$ -	\$ (5,846,142.48)	Sale of Poles to Bell South

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 115

Responding Witness: John J. Spanos

Q-115. In any instance where the Company relied on typical ranges from other utilities, if any, provide the corresponding data associated with the typical industry data identifying the utility, the specific value associated with that utility and when each utility's regulator approved such a value.

A-115. The attached document sets forth typical life spans of other utility's combined cycle facilities which were considered in determining the life span of Cane Run Unit 7. All of these life spans were determined within the last ten years.

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 117

Responding Witness: Christopher M. Garrett

Q-117. Provide all internal and external audit reports, management letters, consultants' reports etc. from 2010-2014, inclusive, which address in any way, the Company's property accounting and/or depreciation practices.

A-117. For the 2011 Depreciation Study see Tab 49 of the Filing Requirements. For the 2011 Life Assessment Study see the response to AG 1-67 in Case No. 2012-00222. See attached for the Cane Run 7 Generating Station depreciation rate calculations and the steam account reserve study reclassification by component.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2014-00372

**Response to Attorney General's Initial Request for Information
Dated January 8, 2015**

Question No. 118

Responding Witness: Christopher M. Garrett

Q-118. Please provide a copy of the Company's current capitalization policy. If the policy has changed at all since 2010, please provide a copy of all prior policies in effect during any portion of that period. Please identify and explain all changes since the most recent depreciation study which might affect existing depreciation rates, as well as the proposed depreciation rates for Cane Run 7.

A-118. See attached. The changes to the capitalization policy had no effect on the existing depreciation rates or the proposed depreciation rates for Cane Run 7.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Policy

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authorizing the expenditure of funds;
3. controlling and reporting of capital expenditures;
4. developing review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is performing and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following two sets of criteria should be used to determine whether or not capitalization is appropriate:

The improvement must meet both of the following criteria:

1. Be a minimum of \$2,000.
2. Meet the definition of a capitalizable cost under the [FERC Uniform System of Accounts](#).

In addition, the improvement must do at least one of the following criteria:

1. Extend the original useful life of the asset.
2. Increase the throughput or capacity of the asset.
3. Increase operating efficiency.

Questions relating to the categorization of an expenditure as capital or O&M expense should be directed to Property Accounting. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See [Property Accounting's Home Page](#).

Scope

This policy applies to LG&E and KU Energy LLC (“LKE” or “the Company”) and its subsidiaries.

General Requirements

1. All capital spending that is expected to occur during the current year must be budgeted in the approved Business Plan (BP).
2. There will be no carry-over of spending capital authority from one year to the next.
3. An Authorization for Investment Proposal (AIP) must be completed in PowerPlant for all capital spending projects.

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 2 of 9

Capital and Investment Review

4. Projects with a total cost of \$2,000 or less will be expensed.
5. An [Investment Proposal](#) (IP) and [Capital Evaluation Model](#) (CEM) must be completed for all capital spending projects greater than \$500,000 unless otherwise approved by Financial Planning and Analysis (FP&A).
6. The Information Technology Department must approve all capital projects involving anything related to information technology.
7. All investment projects greater than \$1,000,000 require the approval of the Investment Committee (IC).
8. The IC is required to approve any overrun of \$500,000 or greater on previously approved proposals. If the previous proposal was below the IC threshold and the revised amount is over the respective IC threshold, the proposal needs to be approved by the IC regardless of the increase amount.

Capital Planning

The BP is used to inform senior management of future capital-spending projections. These plans are prepared annually on a line of business (LOB) basis and include the forecast of capital projections during the most current annual planning period. The first year of the BP, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the BP, each LOB will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's BP for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the [Authority Limit Matrix](#) approval requirements and all other reviews as stated on the AIP in PowerPlant. Projects are not considered approved until appropriate approvals are obtained.

The AIP is used to request the appropriate approvals for spending on capital projects. A completed AIP is subject to the following conditions:

- An AIP must be submitted and approved in PowerPlant prior to committing to or incurring any capital expenditure.
- Approvals must be obtained up to the levels designated in the [Authority Limit Matrix](#) for the dollar amount of any project (which may include multiple projects). The combined dollar amount on multiple projects grouped together using the Budget Item field in PowerPlant is the determinant for approval levels.
- Any AIP over \$500,000 must include an IP and CEM and must be submitted to FP&A for approval.

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 3 of 9

Capital and Investment Review

- A completed AIP must be submitted and approved prior to the disposal of any capital asset. In addition, an IP must be submitted for disposal projects of \$500,000 or more.
- A revised AIP must be submitted for significant project overruns (see below).

Investment Proposal: The IP is used to explain in detail the nature and justification of the capital project. Capital projects over \$500,000 on a burdened basis require the submittal of an IP and CEM along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The IP template is published on the FP&A intranet website and must include the following sections at a minimum:

- Header – Include the project name, total expenditures, project number, LOB, who prepared the project and who will present the project (if applicable).
- Executive Summary (½-page length recommended) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Include financial benefits, funding information and qualitative reasons why this proposal should be pursued.
- Background – Explain the history of the project that has led to the need for the project.
- Project Description – Include project scope, timeline and project cost.
- Economic Analysis and Risks – Include bid summary, assumptions, financial summary, environmental impact, risks and other alternatives considered (including their net present value revenue requirements [NPVRR] per the CEM, if applicable).
- Conclusion and recommendation.
- It is recommended that the IP not exceed 5 pages.

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget must either be offset by a like reduction in one or more budgeted projects, approved by the Resource Allocation Committee (RAC) if subject to the RAC Tenets or have prior written approval by the LKE Chief Financial Officer (CFO) and Chief Executive Officer (CEO). FP&A and/or Forecast and Budgeting-Corporate (F&B) must approve AIPs for unbudgeted projects (see *FP&A and F&B Approvals* below). Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, approved by the RAC if subject to the its Tenets or the additional funding requires prior written approval by the LKE CFO and CEO. These projects are considered “unbudgeted” in PowerPlant since the full funding is not coming from the original budget for that project. FP&A and/or F&B must approve AIPs for under-funded projects (see *FP&A and F&B Approvals* below).

LG&E and KU Board and PPL approvals: Any budget item over \$30 million requires the approval of the LG&E and KU Energy Board and the PPL CEO. Budget items over \$100

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 4 of 9

Capital and Investment Review

million additionally require the approval of the PPL Finance Committee. Cost overruns greater than 20% on budget items approved by the PPL Finance Committee must be re-approved by the Committee before spending occurs. If an overrun on a budget item results in a total cost of \$100 million or more, the proposal must be approved by the PPL Finance Committee before spending occurs.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient (project is expected to be 10% or \$100,000 over, whichever is less, subject to a minimum of \$25,000) to complete the project, **a revised AIP must be completed and the revised forecasted project cost must be included in the capital forecast to be reviewed and approved by the RAC and IC. Additionally, when completing the revised AIP, the following conditions apply (see [Capital Appendix](#)):**

- If the project overrun is expected to be \$500,000 or greater and the project had been approved by the IC, the revised project, including a revised IP and CEM, must be presented and re-approved by the IC.
- If project overrun is \$100,000 or more, but less than \$500,000, provide a clear description of the overrun in the revised AIP to FP&A. If the total project is greater than \$500,000, whether it was below or above this threshold previous to the overrun, an IP and CEM are required. If the project is \$500,000 or below, no IP or CEM are required.
- If the previous project proposal was below the IC threshold and revised amount is over the IC threshold, the proposal needs to be approved by the IC regardless of the increased amount. A revised IP and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects, or the overspending requires prior written approval by the LKE CFO and CEO. Project overruns of greater than \$500,000 are subject to the [RAC Tenets](#).
- Revised AIPs must be approved for the total revised dollar amount using the approval limits in the [Authority Limit Matrix](#).

FP&A and F&B Approvals: Unbudgeted projects or those projects requiring an IP and CEM (i.e., over \$500,000) must include FP&A and F&B review and approval. Unbudgeted projects less than \$100,000 require F&B Manager approval and those \$100,000 and over require FP&A Director approval.

Budgeted projects less than \$500,000 are approved as normally required by the [Authority Limit Matrix](#) and do not require the approval of FP&A and F&B.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed \$500,000 which is budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 5 of 9

Capital and Investment Review

elsewhere in this policy. Each Generation miscellaneous project must be budgeted, but an AIP need not be prepared for it and it will not be activated in PowerPlant. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project number for funding as funds are being moved from one project to another. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. The new project will still need to be marked as “unbudgeted” in PowerPlant and will have to be approved by FP&A and/or F&B.

Other Miscellaneous Projects: Several lines of business use miscellaneous projects which are budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. (Examples include various facilities improvements and miscellaneous substation projects.) These projects are opened and closed on an annual basis. The projects are authorized and approved for the entire budgeted amount when they are opened. Pertinent information regarding the assets and locations of the capital expenditures should be and sent to Property Accounting when the projects are completed.

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement greater than \$25,000 being finalized and evidence of such review must be attached to the AIP. This does not apply to customer refund agreements.
- If a fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under \$1 million, the net spending amount may be used to determine whether an IP and CEM are required.
- Third Party jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under \$1 million neither the IP nor the CEM are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 6 of 9

Capital and Investment Review

Preliminary Survey and Investigation: Projects that are originally set up for preliminary survey and investigation are treated as indirect projects and are auto approved and opened in PowerPlant. Once the preliminary survey and investigation work is complete, the determination must be made if the project will move forward as capital or be abandoned and expensed. If the project moves forward as capital, a new project must be created in PowerPlant and must follow the approval levels based on the Authority Limit Matrix. It is the responsibility of the budget coordinator to notify Property Accounting and make the appropriate accounting transactions to move preliminary survey and investigation charges to capital or to expense as appropriate.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency which is defined as one of the following: 1) the expenditure is needed to address an immediate safety risk; 2) the equipment has failed; or 3) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system.

OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the necessary paperwork and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an early activated AIP are as follows:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP approval process. FP&A and F&B must also be copied on this email. Should the AIP be for an unbudgeted project, approval from FP&A and F&B will be required for the early activation.
- In the event the project has been previously approved by the IC, the above email from the highest LOB authority would not be required. Instead, verification from FP&A that the project had indeed been approved by the IC would be sufficient approval.
- The approval request email must include the following information:
 - Project number
 - Project description
 - Total project amount
 - Name of the individual whose highest level of authority is required, and any associated delegation of authority (DOA)

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 7 of 9

Capital and Investment Review

- Description of the need for the early activation
 - For an unbudgeted project, the budgeted project number that will cover the unbudgeted spending.
- Additionally, for either scenario 1 or 2 above, an automated AIP must be submitted for \$10,000 and approved by the project manager and budget coordinator for the project in order for the project to be moved to “open” status in PowerPlant.
 - Property Accounting will maintain a log of early activated projects, and copies of the email approvals will be filed with the AIP.
 - A revised AIP (for the full project amount) for all projects that are early activated must be received by Property Accounting, or FP&A if necessary, with all required approvals, as soon as possible, but no later than 30 business days after the early activation. Repeated failure to comply with this timing may require email approval by the appropriate LOB VP for early activation of all future AIPs.

Project In-Service and/or Completion

Upon project in-service and/or completion, the project manager or budget coordinator most familiar with the project is required to do the following:

1. Verify completion date (if the date is not correct, it needs to be updated in PowerPlant). Entering a completion date changes the project status to “completed”.
2. Verify actual in-service date (if the date is not correct, it needs to be updated in PowerPlant). Entering an in-service date without a completion date changes the project status to “in-service”. Verify actual installed costs and actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
3. Verify units of property installed and units of property retired (report to Property Accounting if different from AIP).

Post Completion Audits

Budget coordinators are required to perform a post-completion audit (PCA) of projects as discussed in the guidelines below. The review must be provided to FP&A and the IC.

- Projects greater than \$5,000,000 (excluding blankets) must have a PCA performed within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of FP&A, a random audit of anything less than \$5,000,000 can be requested for auditing purposes.
- A PCA template is available on the [FP&A website](#). Also, samples of PCAs are available on the website under “Examples”. Transmission PCAs are not included on the website due to the Standards of Conduct.
- In case of impairment, a PCA is always required.

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 8 of 9

Capital and Investment Review**Leases**

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate LOB, Financial Accounting and Analysis and the Tax department to determine if the lease is structured as a capital or operating lease. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the LKE Lease Policy for more details.

Blanket Capital Projects

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is prepared (i.e., Gas and Electric Distribution New Business by area). The blanket projects hold a “bucket” of budget dollars which is used to fund specific tasks under \$500,000 as they are identified throughout the year. For Gas and Electric Distribution and Metering, blanket projects are not closed each year, but they are re-budgeted each year and are unitized on an “as-spent” basis. For Transmission, blanket projects are opened and closed on an annual basis.

Authorization: Each December, a list of all budgeted blanket projects for the next year must be submitted to the IC for approval, along with the forecast for the current year’s blanket capital spending. At the discretion of the IC, some blanket projects (e.g., Gas Leak Mitigation or Pole Inspection and Treatment) may require an IP and CEM and will not be included in the routine blanket listing. These projects will be presented to the IC in December as separate projects. An AIP or PCA is not required for the routine blanket capital projects.

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a \$500,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy. Should a task on a blanket project exceed \$500,000, then appropriate corrective action (i.e., AIP, CEM, etc.) and charge corrections via VOLTS and CODs to correct the charges to the correct project should be completed as soon as possible.

Criteria for Creating a New Blanket Project: New blanket capital projects require the approval of both Property Accounting and FP&A. To open new blanket projects, a partial AIP in the amount of \$10,000 must go through the approval process in PowerPlant. New blanket capital projects created after the budget process is complete are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in

LG&E AND KU ENERGY LLC Policy

Date: 12/01/2014

Page 9 of 9

Capital and Investment Review

this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

Monthly Spending Report: The budget coordinator for each LOB incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects (including those approved under a stand-alone IP) comparing the total year-to-date spending against the approved budget. Any substitution of non-blanket projects' budgets to cover new blanket projects' budgets must be noted on the report and tracked throughout the year. This report must be submitted to FP&A and Property Accounting for review by the eleventh business day of the following month.

Penalties for Noncompliance

Failure to comply with this policy may result in disciplinary action, up to and including discharge.

LG&E AND KU ENERGY LLC Policy

Capital and Investment Review

Policy

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authorizing the expenditure of funds;
3. controlling and reporting of capital expenditures;
4. developing review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is performing and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following two sets of criteria should be used to determine whether or not capitalization is appropriate:

The improvement must meet both of the following criteria:

1. Be a minimum of \$2,000.
2. Meet the definition of a capitalizable cost under the [FERC Uniform System of Accounts](#).

In addition, the improvement must do at least one of the following criteria:

1. Extend the original useful life of the asset.
2. Increase the throughput or capacity of the asset.
3. Increase operating efficiency.

Questions relating to the categorization of an expenditure as capital or O&M expense should be directed to Property Accounting. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See [Property Accounting's Home Page](#).

Scope

This policy applies to LG&E and KU Energy LLC ("LKE" or "the Company") and its subsidiaries.

General Requirements

1. All capital spending that is expected to occur during the current year must be budgeted in the approved Business Plan (BP).
2. There will be no carry-over of spending capital authority from one year to the next.
3. An Authorization for Investment Proposal (AIP) must be completed in PowerPlant for all capital spending projects.

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 2 of 9

Capital and Investment Review

4. Projects with a total cost of \$2,000 or less will be expensed.
5. An [Investment Proposal](#) (IP) and [Capital Evaluation Model](#) (CEM) must be completed for all capital spending projects greater than \$500,000 unless otherwise approved by Financial Planning and Analysis (FP&A).
6. The Information Technology Department must approve all capital projects involving anything related to information technology.
7. All investment projects greater than \$1,000,000 require the approval of the Investment Committee (IC).
8. The IC is required to approve any overrun of \$500,000 or greater on previously approved proposals. If the previous proposal was below the IC threshold and the revised amount is over the respective IC threshold, the proposal needs to be approved by the IC regardless of the increase amount.

Capital Planning

The BP is used to inform senior management of future capital-spending projections. These plans are prepared annually on a line of business (LOB) basis and include the forecast of capital projections during the most current annual planning period. The first year of the BP, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the BP, each LOB will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's BP for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the [Authority Limit Matrix](#) approval requirements and all other reviews as stated on the AIP in PowerPlant. Projects are not considered approved until appropriate approvals are obtained.

The AIP is used to request the appropriate approvals for spending on capital projects. A completed AIP is subject to the following conditions:

- An AIP must be submitted and approved in PowerPlant prior to committing to or incurring any capital expenditure.
- Approvals must be obtained up to the levels designated in the [Authority Limit Matrix](#) for the dollar amount of any project (which may include multiple projects). The combined dollar amount on multiple projects grouped together using the Budget Item field in PowerPlant is the determinant for approval levels.
- Any AIP over \$500,000 must include an IP and CEM and must be submitted to FP&A for approval.

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 3 of 9

Capital and Investment Review

- A completed AIP must be submitted and approved prior to the disposal of any capital asset. In addition, an IP must be submitted for disposal projects of \$500,000 or more.
- A revised AIP must be submitted for significant project overruns (see below).

Investment Proposal: The IP is used to explain in detail the nature and justification of the capital project. Capital projects over \$500,000 on a burdened basis require the submittal of an IP and CEM along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The IP template is published on the FP&A intranet website and must include the following sections at a minimum:

- Header – Include the project name, total expenditures, project number, LOB, who prepared the project and who will present the project (if applicable).
- Executive Summary (½-page length recommended) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Include financial benefits, funding information and qualitative reasons why this proposal should be pursued.
- Background – Explain the history of the project that has led to the need for the project.
- Project Description – Include project scope, timeline and project cost.
- Economic Analysis and Risks – Include bid summary, assumptions, financial summary, environmental impact, risks and other alternatives considered (including their net present value revenue requirements [NPVRR] per the CEM, if applicable).
- Conclusion and recommendation.
- It is recommended that the IP not exceed 5 pages.

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget must either be offset by a like reduction in one or more budgeted projects, approved by the Resource Allocation Committee (RAC) if subject to the RAC Tenets or have prior written approval by the LKE Chief Financial Officer (CFO) and Chief Executive Officer (CEO). FP&A must approve AIPs for unbudgeted projects (see *FP&A Approvals* below). Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, approved by the RAC if subject to the its Tenets or the additional funding requires prior written approval by the LKE CFO and CEO. These projects are considered “unbudgeted” in PowerPlant since the full funding is not coming from the original budget for that project. FP&A must approve AIPs for under-funded projects (see *FP&A Approvals* below).

LG&E and KU Board and PPL approvals: Any budget item over \$30 million requires the approval of the LG&E and KU Energy Board and the PPL CEO. Budget items over \$100 million additionally require the approval of the PPL Finance Committee. Cost overruns greater than 20% on budget items approved by the PPL Finance Committee must be re-approved by the

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 4 of 9

Capital and Investment Review

Committee before spending occurs. If an overrun on a budget item results in a total cost of \$100 million or more, the proposal must be approved by the PPL Finance Committee before spending occurs.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient (project is expected to be 10% or \$100,000 over, whichever is less, subject to a minimum of \$25,000) to complete the project, **a revised AIP must be completed before the overrun occurs and the following conditions apply** (see [Capital Appendix](#)):

- If the project overrun is expected to be \$500,000 or greater and the project had been approved by the IC, the revised project, including a revised IP and CEM, must be presented and re-approved by the IC.
- If project overrun is \$100,000 or more, but less than \$500,000, provide a clear description of the overrun in the revised AIP to FP&A. If the total project is greater than \$500,000, whether it was below or above this threshold previous to the overrun, an IP and CEM are required (new or revised). If the project is \$500,000 or below, no IP or CEM are required.
- If the previous project proposal was below the IC threshold and revised amount is over the IC threshold, the proposal needs to be approved by the IC regardless of the increase amount. A revised IP and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects, or the overspending requires prior written approval by the LKE CFO and CEO. Project overruns of greater than \$500,000 are subject to the [RAC Tenets](#).
- Revised AIPs must be approved for the total revised dollar amount using the approval limits in the [Authority Limit Matrix](#).

FP&A Approvals: Unbudgeted projects or those projects requiring an IP and CEM (i.e., over \$500,000) must include FP&A review and approval. Unbudgeted projects less than \$100,000 require FP&A manager approval, and those \$100,000 and over require FP&A director approval.

Budgeted projects less than \$500,000 are approved as normally required by the [Authority Limit Matrix](#) and do not require the approval of FP&A.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed \$500,000 which is budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. Each Generation miscellaneous project must be budgeted, but an AIP need not be prepared for it and it will not be activated in PowerPlant. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 5 of 9

Capital and Investment Review

number for funding as funds are being moved from one project to another. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. The new project will still need to be marked as “unbudgeted” in PowerPlant and will have to be approved by FP&A.

Other Miscellaneous Projects: Several lines of business use miscellaneous projects which are budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. (Examples include various facilities improvements and miscellaneous substation projects.) These projects are opened and closed on an annual basis. The projects are authorized and approved for the entire budgeted amount when they are opened. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year. For each task opened, a paper miscellaneous project AIP form must be prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on [Property Accounting's Home Page](#).

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement greater than \$25,000 being finalized and evidence of such review must be attached to the AIP. This does not apply to customer refund agreements.
- If a fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under \$1 million, the net spending amount may be used to determine whether an IP and CEM are required.
- Third Party jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under \$1 million neither the IP nor the CEM are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

Preliminary Engineering: Projects that are originally set up for preliminary engineering are treated as indirect projects and are auto approved and opened in PowerPlant. Once the

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 6 of 9

Capital and Investment Review

preliminary engineering work is complete, the determination must be made if the project will move forward as capital or be abandoned and expensed. If the project moves forward as capital, a new project must be created in PowerPlant and must follow the approval levels based on the Authority Limit Matrix. It is the responsibility of the budget coordinator to notify Property Accounting and make the appropriate accounting transactions to move preliminary engineering charges to capital or to expense as appropriate.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency which is defined as one of the following: 1) the expenditure is needed to address an immediate safety risk; 2) the equipment has failed; or 3) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system.

OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the necessary paperwork and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an early activated AIP are as follows:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP approval process. FP&A must also be copied on this email. Should the AIP be for an unbudgeted project, approval from FP&A will be required for the early activation.
- In the event the project has been previously approved by the IC, the above email from the highest LOB authority would not be required. Instead, verification from FP&A that the project had indeed been approved by the IC would be sufficient approval.
- The approval request email must include the following information:
 - Project number
 - Project description
 - Total project amount
 - Name of the individual whose highest level of authority is required, and any associated delegation of authority (DOA)
 - Description of the need for the early activation

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 7 of 9

Capital and Investment Review

- For an unbudgeted project, the budgeted project number that will cover the unbudgeted spending.
- Additionally, for either scenario 1 or 2 above, an automated AIP must be submitted for \$10,000 and approved by the project manager and budget coordinator for the project in order for the project to be moved to “open” status in PowerPlant.
- Property Accounting will maintain a log of early activated projects, and copies of the email approvals will be filed with the AIP.
- A revised AIP (for the full project amount) for all projects that are early activated must be received by Property Accounting, or FP&A if necessary, with all required approvals, as soon as possible, but no later than 30 business days after the early activation. Repeated failure to comply with this timing may require email approval by the appropriate LOB VP for early activation of all future AIPs.

Project In-Service and/or Completion

Upon project in-service and/or completion, the project manager or budget coordinator most familiar with the project is required to do the following:

1. Verify completion date (if the date is not correct, it needs to be updated in PowerPlant). Entering a completion date changes the project status to “completed”.
2. Verify actual in-service date (if the date is not correct, it needs to be updated in PowerPlant). Entering an in-service date without a completion date changes the project status to “in-service”. Verify actual installed costs and actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
3. Verify units of property installed and units of property retired (report to Property Accounting if different from AIP).

Post Completion Audits

Budget coordinators are required to perform a post-completion audit (PCA) of projects as discussed in the guidelines below. The review must be provided to FP&A and the IC.

- Projects greater than \$5,000,000 (excluding blankets) must have a PCA performed within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of FP&A a random audit of anything less than \$5,000,000 can be requested for auditing purposes.
- A PCA template is available on the [FP&A website](#). Also, samples of PCAs are available on the website under “Examples”. Transmission PCAs are not included on the website due to the Standards of Conduct.
- In case of impairment, a PCA is always required.

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 8 of 9

Capital and Investment Review**Leases**

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate LOB, Financial Accounting and Analysis and the Tax department to determine if the lease is structured as a capital or operating lease. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the LKE Lease Policy for more details.

Blanket Capital Projects

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is prepared (i.e., Gas and Electric Distribution New Business by area). The blanket projects hold a “bucket” of budget dollars which is used to fund specific tasks under \$500,000 as they are identified throughout the year. For Gas and Electric Distribution and Metering, blanket projects are not closed each year, but they are re-budgeted each year and are unitized on an “as-spent” basis. For Transmission, blanket projects are opened and closed on an annual basis. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year.

Authorization: Each December, a list of all budgeted blanket projects for the next year must be submitted to the IC for approval, along with the forecast for the current year’s blanket capital spending. At the discretion of the IC, some blanket projects (e.g., Gas Leak Mitigation or Pole Inspection and Treatment) may require an IP and PCA and will not be included in the routine blanket listing. These projects will be presented to the IC in December as separate projects. An AIP or PCA is not required for the routine blanket capital projects.

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a \$500,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy. Should a task on a blanket project exceed \$500,000, then appropriate corrective action (i.e., AIP, CEM, etc.) and charge corrections via VOLTS and CODs to correct the charges to the correct project should be completed as soon as possible. Miscellaneous type blankets, such as small tools and transmission projects, should have a paper miscellaneous AIP prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on [Property Accounting’s Home Page](#).

LG&E AND KU ENERGY LLC Policy

Date: 05/01/2014

Page 9 of 9

Capital and Investment Review

Criteria for Creating a New Blanket Project: New blanket capital projects require the approval of both Property Accounting and FP&A. To open new blanket projects, a partial AIP in the amount of \$10,000 must go through the approval process in PowerPlant. New blanket capital projects created after the budget process is complete are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

Monthly Spending Report: The budget coordinator for each LOB incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects (including those approved under a stand-alone IP) comparing the total year-to-date spending against the approved budget. Any substitution of non-blanket projects' budgets to cover new blanket projects' budgets must be noted on the report and tracked throughout the year. This report must be submitted to FP&A for review by the eleventh business day of the following month. FP&A, after reviewing, will send the report to Property Accounting.

Penalties for Noncompliance

Failure to comply with this policy may result in disciplinary action, up to and including discharge.

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Page 1 of 10

Capital and Investment Review

Policy

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authorizing the expenditure of funds;
3. controlling and reporting of capital expenditures;
4. developing review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is performing and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following criteria should be used to determine whether or not capitalization is appropriate:

1. Does the improvement extend the original useful life of the asset?
2. Does the improvement increase the throughput or capacity of the asset?
3. Does the improvement increase operating efficiency?
4. Does the improvement meet the definition of a capitalizable cost under the FERC Uniform System of Accounts?

If the answer is yes to any of the above questions, capitalization is appropriate for the project. Questions relating to the categorization of an expenditure as capital or O&M expense should be directed to Property Accounting. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See [Property Accounting's Home Page](#).

Scope

This policy applies to LG&E and KU Energy LLC (“LKE” or “the Company”) and its subsidiaries.

General Requirements

1. All capital spending that is expected to occur during the current year must be budgeted in the approved Medium Term Plan (MTP).
2. There will be no carry-over of spending capital authority from one year to the next.

LG&E AND KU ENERGY LLC Policy

,Date: 02/01/2011

Capital and Investment Review

3. An Authorization for Investment Proposal (AIP) must be completed in PowerPlant for all capital spending projects.
4. Projects with a total cost of \$2,000 or less will be expensed.
5. An [Investment Proposal](#) (IP) and [Capital Evaluation Model](#) (CEM) must be completed for all capital spending projects greater than \$300,000 unless otherwise approved by Financial Planning and Controlling (FP&C).
6. The Information Technology Department must approve all capital projects involving anything related to information technology.
7. All investment projects greater than \$1,000,000, with the exception of development proposals, require the approval of the Investment Committee (IC). For development proposals and real property, the threshold is \$500,000.
8. The IC is required to approve any overrun of \$300,000 or greater on previously approved proposals. If the previous proposal was below the IC threshold and the revised amount is over the respective IC threshold, the proposal needs to be approved by the IC regardless of the increase amount.

Capital Planning

The MTP is used to inform senior management of future capital-spending projections. These plans are prepared annually on a line of business (LOB) basis and include the forecast of capital projections during the most current annual planning period. The first year of the MTP, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the MTP, each LOB will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's MTP for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the [Authority Limit Matrix](#) approval requirements and all other reviews as stated on the AIP in PowerPlant. Projects are not considered approved until appropriate approvals are obtained.

The AIP is used to request the appropriate approvals for spending on capital projects. A completed AIP is subject to the following conditions:

- An AIP must be submitted and approved in PowerPlant prior to committing to or incurring any capital expenditure.
- Approvals must be obtained up to the levels designated in the [Authority Limit Matrix](#) for the dollar amount of any project (which may include multiple projects). The combined dollar

LG&E AND KU ENERGY LLC Policy

,Date: 02/01/2011

Page 3 of 10

Capital and Investment Review

amount on multiple projects grouped together using the Budget Item field in PowerPlant is the determinant for approval levels.

- Any AIP over \$300,000, except for development proposals, must include an IP and CEM and must be submitted to FP&C for approval. Development proposals must have other adequate supporting documentation attached and, should they become viable projects, must have an AIP submitted, accompanied by the IP and CEM if over the \$300,000 threshold.
- A completed AIP must be submitted and approved prior to the disposal of any capital asset. In addition, an IP must be submitted for disposal projects of \$300,000 or more.
- A revised AIP must be submitted for significant project overruns (see below).

Investment Proposal: The IP is used to explain in detail the nature and justification of the capital project. Capital projects over \$300,000 on a fully loaded basis require the submittal of an IP and CEM along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The IP template is published on the FP&C intranet website and must include the following sections at a minimum:

- Header – Include the project name, total expenditures, project number, LOB and who will present the project.
- Executive Summary (max ½ page) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Include financial benefits as well as qualitative reasons why this proposal should be pursued.
- Background – Explain why the project is needed.
- Project Description – Include project scope, timeline and project cost.
- Economic Analysis and Risks – Include bid summary, assumptions, financial summary, sensitivities (for proposals to IC only), environmental impact, risks and other alternatives considered.
- Conclusion and recommendation
- It is recommended that the IP not exceed 5 pages.

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget must either be offset by a like reduction in one or more budgeted projects, approved by the Resource Allocation Committee (RAC) if subject to the RAC Tenets or must have prior written approval by the LKE Chief Financial Officer (CFO) and Chief Executive Officer (CEO). FP&C must approve AIPs for unbudgeted projects (see *FP&C Approvals* below). Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Page 4 of 10

Capital and Investment Review

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, approved by the RAC if subject to the its Tenets or the additional funding requires prior written approval by the LKE CFO and CEO. These projects are considered “unbudgeted” in PowerPlant since the full funding is not coming from the original budget for that project. The FP&C Department must approve AIPs for under-funded projects (see *FP&C Approvals* below).

LG&E and KU Board and PPL approvals: Any budget item over \$30 million requires the approval of the LG&E and KU Energy Board and the PPL CEO. Budget items over \$100 million additionally require the approval of the PPL Finance Committee. Cost overruns greater than 20% on budget items approved by the PPL Finance Committee must be re-approved by the Committee before spending occurs. If an overrun on a budget item results in a total cost of \$100 million or more, the proposal must be approved by the PPL Finance Committee before spending occurs.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient (project is expected to be 10% or \$100,000 over, whichever is less, subject to a minimum of \$25,000) to complete the project, **a revised AIP must be completed before the overrun occurs and the following conditions apply (see Capital Appendix):**

- If the project overrun is expected to be \$300,000 or greater and the project had been approved by the IC, the revised project, including a revised IP and CEM, must be presented and re-approved by the IC.
- If project overrun is \$100,000 or more, but less than \$300,000, provide updated financials and an explanation for the overrun to FP&C. If the total project is greater than \$300,000, whether it was below or above this threshold previous to the overrun, an IP and CEM are required (new or revised). If the project is \$300,000 or below, no IP or CEM are required.
- If the previous project proposal was below the IC threshold and revised amount is over the IC threshold, the proposal needs to be approved by the IC regardless of the increase amount. A revised IP and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects; or the overspending requires prior written approval by the LKE CFO and CEO. Project overruns of greater than \$300,000 are subject to the RAC Tenets.
- Revised AIPs must be approved for the total revised dollar amount using the approval limits in the [Authority Limit Matrix](#).

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Page 5 of 10

Capital and Investment Review

FP&C Approvals: Unbudgeted projects or those projects requiring an IP and CEM (i.e., over \$300,000) must be forwarded to FP&C for review and approval. Unbudgeted projects less than \$100,000 require FP&C manager approval, and those \$100,000 and over require FP&C director approval.

Budgeted projects less than \$300,000 are approved as normally required by the [Authority Limit Matrix](#) and do not require the prior approval of FP&C.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed \$300,000 which is budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. Each Generation miscellaneous project must be budgeted, but an AIP need not be prepared for it and it will not be activated in PowerPlant. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project number for funding. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. However, as funds are being moved from one project to another, the new project will still need to be marked as “unbudgeted” in PowerPlant and will have to be approved by FP&C.

Other Miscellaneous Projects: Several lines of business use miscellaneous projects which are budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from blanket projects described elsewhere in this policy. (Examples include various facilities improvements and miscellaneous substation projects.) These projects are opened and closed on an annual basis. The projects are authorized and approved for the entire budgeted amount when they are opened. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year. For each task opened, a paper miscellaneous project AIP form must be prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on [Property Accounting’s Home Page](#).

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement greater than \$25,000 being finalized

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Page 6 of 10

Capital and Investment Review

and evidence of such review must be attached to the AIP. This does not apply to customer refund agreements.

- If a fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under \$1 million, the net spending amount may be used to determine whether an IP and CEM are required.
- Third Party jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under \$1 million neither the IP nor the CEM are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

Preliminary Engineering: Projects that are originally set up for preliminary engineering are treated as indirect projects and are auto approved and opened in PowerPlant. Once the preliminary engineering work is complete, the determination must be made if the project will move forward as capital or be abandoned and expensed. If the project moves forward as capital, a new project must be created in PowerPlant and must follow the approval levels based on the Authority Matrix. It is the responsibility of the budget coordinator to notify Property Accounting and make the appropriate accounting transactions to move preliminary engineering charges to capital or to expense as appropriate.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency which is defined as one of the following: 1) the expenditure is needed to address an immediate safety risk; 2) the equipment has failed; or 3) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system.

OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Page 7 of 10

Capital and Investment Review

necessary paperwork, and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an early activated AIP:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP approval process. FP&C must also be copied on this email. Should the AIP be for an unbudgeted project, approval from FP&C will be required for the early activation.
- In the event the project has been previously approved by the IC, the above email from the highest LOB authority would not be required. Instead, verification from FP&C that the project had indeed been approved by the IC would be sufficient approval.
- The approval request email must include the following info:
 - Project number
 - Project description
 - Total project amount
 - Name of the individual whose highest level of authority is required, and any associated delegation of authority (DOA)
 - Description of the need for the early activation
 - For an unbudgeted project, the budgeted project number that will cover the unbudgeted spending.
- Additionally, for either scenario 1 or 2 above, an automated AIP must be submitted for \$10,000 and approved by the project manager and budget coordinator for the project in order for the project to be moved to “open” status in PowerPlant.
- The Property Accounting Department will maintain a log of early activated projects, and copies of the email approvals will be filed with the AIP.
- A revised AIP (for the full project amount) for all projects that are early activated must be received by the Property Accounting Department, or FP&C if necessary, with all required approvals, within 10 business days of the early activation. Repeated failure to comply

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Page 8 of 10

Capital and Investment Review

with this timing will require email approval by the appropriate LOB VP for early activation of all future AIPs.

Project In-Service and/or Completion

Upon project in-service and/or completion, the project manager or budget coordinator most familiar with the project is required to do the following:

1. Verify completion date (if the date is not correct, it needs to be updated in PowerPlant). Entering a completion date changes the project status to “completed”.
2. Verify actual in-service date (if the date is not correct, it needs to be updated in PowerPlant). Entering an in-service date without a completion date changes the project status to “in-service”. Verify actual installed costs and actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
3. Verify units of property installed and units of property retired (report to Property Accounting if different from AIP).

Post Completion Audits

Budget coordinators are required to perform a post-completion audit (PCA) of projects as discussed in the guidelines below. The review must be provided to FP&C and the IC.

- Projects greater than \$5,000,000 (excluding blankets) must have a PCA performed within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of FP&C a random audit of anything less than \$5,000,000 can be requested for auditing purposes.
- A PCA template is available on the [FP&C website](#). Also, samples of PCAs are available on the website under “Examples”. Transmission PCAs are not included on the website due to the Standards of Conduct.
- In case of impairment, a PCA is always required.

Leases

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate LOB, Financial Accounting and Reporting and the Tax department to determine if the lease is structured as a capital or operating lease. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the LKE Lease Policy for more details.

Blanket Capital Projects

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Capital and Investment Review

prepared (i.e., Gas and Electric Distribution New Business by area.) The blanket projects hold a “bucket” of budget dollars which is used to fund specific tasks under \$300,000 as they are identified throughout the year. For Distribution and Metering, blanket projects are not closed each year but they are re-budgeted each year and are unitized on an “as-spent” basis. For Transmission, blanket projects are opened and closed on an annual basis. They must be set up as task level unitization within PowerPlant and are unitized by task as completed each year.

Authorization: Each December, a list of all budgeted blanket projects for the next year must be submitted to the IC for approval, along with the forecast for the current year’s blanket capital spending. At the discretion of the IC, some blanket projects (e.g., Gas Leak Mitigation or Pole Inspection and Treatment) may require an IP and PCA and will not be included in the routine blanket listing. These projects will be presented to the IC in December as separate projects. An AIP or PCA is not required for the routine blanket capital projects.

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a \$300,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy. Should a task on a blanket project exceed \$300,000, then appropriate corrective action, i.e. AIP, CEM etc., and charge corrections via VOLTS and CODs to correct the charges to the correct project should be completed as soon as possible. Miscellaneous type blankets, such as small tools and transmission projects, should have a paper miscellaneous AIP prepared with all the pertinent information about the asset and location of the capital expenditure and sent to Property Accounting when the task is opened on the blanket project. This form can be found on [Property Accounting’s Home Page](#).

Criteria for Creating a New Blanket Project: New blanket capital projects require the approval of both Property Accounting and FP&C. To open new blanket projects, a partial AIP in the amount of \$10,000 must go through the approval process in PowerPlant. New blanket capital projects created after the budget process is complete are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

LG&E AND KU ENERGY LLC Policy

Date: 02/01/2011

Page 10 of 10

Capital and Investment Review

Monthly Spending Report: The budget coordinator for each LOB incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects (including those approved under a stand-alone IP) comparing the total year-to-date spending against the approved budget. Any substitution of non-blanket projects' budgets to cover new blanket projects' budgets must be noted on the report and tracked throughout the year. This report must be submitted to FP&C for review by the eleventh business day of the following month. FP&C, after reviewing, will send the report to Property Accounting.

Penalties for Noncompliance

Failure to comply with this policy may result in disciplinary action, up to and including discharge.

Page 1 of 10

Capital and Investment Review**Policy**

The primary purpose of the Capital and Investment Review Policy is to establish a uniform process for:

1. capital planning and budgeting;
2. authority for the expenditure of funds;
3. control and reporting of capital expenditures;
4. development of review criteria for the authorization process;
5. recording lessons learned for future investments and decisions; and
6. determining how the investment is operating and how the returns compare to the project as sanctioned.

Further, these policies will provide management with the necessary tools to make informed business decisions. A capital expenditure includes adding, replacing or retiring units of property through the construction or acquisition process. Generally, it is inappropriate to capitalize expenditures that are part of routine or necessary maintenance programs. If a substantial improvement is made to an asset, the following criteria should be used to determine whether or not capitalization is appropriate:

1. Does the improvement extend the original useful life of the asset?
2. Does the improvement increase the throughput or capacity of the asset?
3. Has operating efficiency been improved?
4. Does the expenditure meet the definition of a capitalizable cost under the FERC Uniform System of Accounts?

If you answer yes to any of the above questions, capitalization is appropriate for your project. Questions relating to the categorization of an expense as capital or O&M should be referred to Property Accounting for utility matters or the appropriate fixed-asset accounting group for non-utility operations. The Controller will have the ultimate authority of interpreting expense versus capital decisions based on generally accepted accounting principles. See [Property Accounting's Home Page](#).

Scope

This policy applies to E.ON U.S. LLC and its subsidiaries' (E.ON U.S. or the Company).

General Requirements

1. All capital spending that is expected to occur during the year must be budgeted in the approved MTP budget .
2. There will be no carry-over of spending capital authority from one year to the next.
3. An Authorization for Investment Proposal (AIP) form must be completed for **all** capital spending projects.
4. Projects with a total cost of \$2,000 or less will be expensed.
5. An Investment Proposal must be completed for all capital spending projects greater than \$300,000.

E.ON U.S. LLC Policy

Date 07/20/09

Page 2 of 10

Capital and Investment Review

6. The Information Technology Department must approve **all** capital projects involving anything related to information technology.
7. All investment projects greater than \$1,000,000 with the exception of development proposals, require the approval of the Investment Committee (IC). For Development Proposals and Real Property the threshold is \$500,000.
8. The Investment Committee is required to approve any overrun of \$300,000 or greater on previously approved proposals. However, the Investment Committee has requested to be informed about all overruns which are \$100k or greater bi-annually. Therefore, all overruns on previously approved proposals which are \$100k or greater must be reported to Financial Planning and Controlling. If the previous proposal was below the Investment Committee threshold and the revised amount is over the respective Investment Committee threshold, the proposal needs to be approved by the Investment Committee regardless of the increase amount.

Capital Planning

The multi-year Capital Investment Plan will be used to inform senior management of future capital-spending projections. These plans are prepared annually on an operating business unit (OBU) basis and include the forecast of capital projections during the annual planning period. The first year of the capital investment plan, once approved, becomes the formal budget for that year.

Carry-Over Spending: During preparation of the Three-year Capital Investment Plans, each OBU will review all current-year projects to determine if they will be completed as of the end of the year. If a project is expected to be in process at year-end, but not complete, it must be included in the following year's Three-year Capital Investment Plan for additional funds to be approved.

Capital Approval Process

Authorization for Investment Proposal: Although specific capital projects are identified in the budgeting process, they are still subject to the [Authority Limit Matrices](#) signature requirements and all other signature reviews as stated on the face of the AIP. Projects are not considered approved until appropriate signatures are obtained as stated on the AIP form.

The [AIP form](#) is used to request the appropriate approvals for spending on capital projects. A completed AIP is required under the following conditions:

- An AIP form must be submitted and approved prior to committing to or incurring any capital expenditure. Approvals must be obtained in the sequence shown in the approval section of the AIP form.
- Approvals must be obtained up to the levels designated in the [Authority Limit Matrices](#) for the dollar amount of any project (which may include multiple AIPs).

Capital and Investment Review

- Any AIP over \$300,000, except for development proposals, must include an [Investment Proposal](#) and [Capital Evaluation Model](#) (CEM) and must be submitted to the Financial Planning & Controlling Department for approval. Development proposals must have other adequate supporting documentation attached and, should they become viable projects, must have a revised AIP submitted, accompanied by the Investment Proposal and Capital Evaluation Model if over the \$300,000 threshold.
- A completed AIP form must be submitted and approved prior to the disposal of any capital asset. In addition, an Investment Proposal must be submitted for disposal projects of \$300,000 or more.
- A revised AIP must be submitted for significant project overruns (See below).
- Instructions provided with the AIP form must be followed.

Investment Proposal: The Investment Proposal is used to explain in detail the nature and justification of the capital project. Capital projects over \$300,000 on a fully loaded basis require the submittal of an Investment Proposal and Capital Evaluation Model along with the AIP. The following information will provide senior management with consistent documentation for evaluating capital projects. The Investment Proposal which is published on the Financial Planning & Controlling intranet should include the following sections:

- A header that includes the project name, total expenditures, project number, Line of Business and who will present the project.
- Executive Summary (max ½ page) – Provide a summary explanation of the scope, purpose and necessity of the proposal. Should also include financial benefits as well as qualitative reasons why this proposal should be pursued.
- Background – why project is needed.
- Project Description – including project scope, timeline and project cost.
- Economic Analysis and Risks – this should include bid summary, assumptions, financial summary, sensitivities, environmental impact, risks and other alternatives considered.
- Capitalized interest must be included as part of capital spending on discrete projects in excess of €50 million based on the current exchange rate at the time of the preparation of the Investment Proposal which can be obtained at the xe.com website. Please consult Property Accounting for the current interest rate to use in the Capital Evaluation Model based on the most recent embedded cost of debt calculation. Also, if in doubt about whether the project qualifies for capitalized interest, please consult Property Accounting for assistance. When a project qualifies for capitalized interest, two Capital Evaluation Models must be run and attached to the Investment Proposal: one without capitalized interest for regulatory purposes and one with capitalized interest under International Financial Reporting Standards (IFRS). Approved spending levels and analysis of the economics of the project are to be based solely on the IFRS view, inclusive of capitalized interest.
- Conclusion and recommendation
- The Investment Proposal should not exceed 5 pages.

E.ON U.S. LLC Policy

Date 07/20/09

Page 4 of 10

Capital and Investment Review

Unbudgeted Projects: Any capital expenditure that is not included in the original, approved budget, must either be offset by a like reduction in one or more budgeted projects, or the overspending requires prior written approval by the E.ON U.S. LLC Chief Financial Officer (CFO) and Chief Executive Officer (CEO). The Financial Planning & Controlling Department must approve AIPs for unbudgeted projects (see *Approvals* below). In addition, unbudgeted project spending greater than \$300,000 is subject to the Resource Allocation Committee (RAC) Tenets. Certain Generation Miscellaneous Projects, as described below, are exempt from being considered unbudgeted.

Under-Funded Projects: Projects that are submitted for approval that were included in the original approved budget, where the requested capital amount is greater than the budgeted amount for that project, must either be offset by a like reduction in one or more budgeted projects, or the additional funding requires prior written approval by the E.ON U.S. LLC CFO and CEO. The Financial Planning & Controlling Department must approve AIPs for underfunded projects (see *Approvals* below). In addition, underfunded project spending greater than \$300,000 is subject to the Resource Allocation Committee (RAC) Tenets.

Project Overruns: When it is apparent that the amount approved on the original AIP will be insufficient (project is expected to be 10% or \$100,000 over; whichever is less, subject to a minimum of \$25,000) to complete the project, **a revised AIP must be completed before the overrun occurs and the following conditions apply (see Appendix A):**

- Project overrun is expected to be \$300,000 or greater and project had previously been above Investment Committee threshold the revised project amount needs to be approved by the Investment Committee. A new Investment Proposal and CEM are required as well.
- If project overrun is \$100,000 or more, but less than \$300,000 provide an explanation on the updated financials and explanation for the overrun. Updated Investment Proposal is not required.
- Previous project proposal was below Investment Committee threshold and revised amount is over Investment Committee threshold the proposal needs to be approved by the Investment Committee regardless of the increase amount. Revised Investment Proposal and CEM are required.
- Project overrun must be offset by a like reduction in one or more budgeted projects; or the overspending requires prior written approval by the E.ON U.S. LLC Chief Financial Officer (CFO) and the Chief Executive Officer (CEO). Project overruns of greater than \$300,000 are subject to the RAC Tenets.

The Investment Committee reviews project overruns of \$100k or greater two times a year. For this purpose the Lines of Business are required to provide a list of all project overruns of \$100k or greater to Financial Planning & Controlling. This applies only for the projects which exceed the Investment Committee threshold.

E.ON U.S. LLC Policy

Date 07/20/09

Page 5 of 10

Capital and Investment Review

At no time should overspending occur prior to the approval of the new AIP (subject to the emergency provision of the Delegated Powers of Authority). The additional funding requested must either be offset by a like reduction in one or more budgeted projects, or the additional funding requires prior written approval by the E.ON U.S. LLC CFO and CEO.

Revised AIPs must be approved for the total revised dollar amount using the approval limits in the [Authority Limit Matrices](#). All revised AIPs must be submitted to the Financial Planning & Controlling Department with a copy of the original AIP attached. Revised AIPs which meet the spending level threshold for Investment Committee approval will be provided to the Investment Committee for review.

Financial Planning & Controlling Approvals: Unbudgeted projects or those projects requiring an Investment Proposal (i.e. over \$300,000) must be forwarded to the Financial Planning & Controlling department for review and approval.

Budgeted projects less than \$300,000 are approved as normally required by the [Authority Limit Matrix](#) and do not require the prior approval of the Financial Planning & Controlling Department.

Generation Miscellaneous Projects: Each Generation plant site may have one miscellaneous project not to exceed \$300,000 which is budgeted to serve as a placeholder for small individual projects which arise during the year and which cannot be specifically anticipated during the budgeting process. This category of projects is different from Blanket Projects described elsewhere in this policy. Each Generation Miscellaneous Project must be budgeted, but an AIP must not be prepared for it and therefore it will not be activated in Oracle. Instead, as specific work is identified, the appropriate budget coordinator must create a new project number for the charges and prepare an AIP for the new project which references the budgeted placeholder project number. The new project is not considered unbudgeted to the extent that unused budget dollars are available in the budgeted placeholder project to cover it. The budget coordinator is responsible for tracking the accumulated spending of the individual projects to ensure that the budget is not exceeded. Property Accounting will also monitor the accumulated spending to ensure that the budget has not been exceeded.

Reimbursable Projects: Projects which will have all or a portion of the spending amount reimbursed by an outside party must follow the same guidelines as non-reimbursable projects, except as noted below:

- Tax Department review indicating whether Contribution in Aid of Construction is taxable must occur prior to any reimbursement agreement being finalized and evidence of such review must be attached to the AIP.

E.ON U.S. LLC Policy

Date 07/20/09

Page 6 of 10

Capital and Investment Review

- If fully executed agreement specifying the terms of reimbursement is attached to an AIP with gross spending under \$1 million the net spending amount may be used to determine whether an Investment Proposal and Capital Evaluation Model are required.
- Jointly-owned utility projects under the specified gross spending thresholds qualify for this exception without requiring the attachment of the executed joint ownership agreement.
- For all projects, the gross spending amount must always be used to determine the appropriate approval level.

Government-Mandated/Regulatory Compliance Projects: Projects which are not reimbursable but which are mandated by governmental legislation or other governmental authority must follow the same guidelines as all other projects except that for such AIPs with gross spending under \$1 million neither the Investment Proposal nor the Capital Evaluation Model are required, provided that the appropriate legislative docket numbers or applicable statute references are provided with the AIP.

Early Activation Guidelines

In order for a project to be early activated, the following criteria must be met:

1. The expenditure must be the result of a true emergency: 1) the equipment has failed; 2) a material problem has been found, requiring it to be replaced immediately in order to maintain the reliability of the system; 3) or the expenditure is needed to address an immediate safety risk.

OR

2. The equipment vendor has provided a quote for the capital purchase that is only valid for a short period of time. The time frame would not be long enough to complete all the necessary paperwork, and acquire all necessary approvals in time to place the order at the reduced price.

Process requirements for an Early Activated AIP:

- For each AIP that is early activated, Property Accounting must first receive email approval from the highest level of LOB authority based on the total amount of the AIP as per the AIP signature process. Financial Planning & Controlling must also be copied on this email. Should the AIP be for an unbudgeted project, approval from Financial Planning & Controlling will be required for the Early Activation.

E.ON U.S. LLC Policy

Date 07/20/09

Page 7 of 10

Capital and Investment Review

- In the event the project has been previously approved by the Investment Committee, the above email from the highest LOB authority would not be required. Instead, verification from Financial Planning & Controlling that the project had indeed been approved by the Investment Committee would be sufficient approval.
- The approval request email must include the following info: 1) Project Number; 2) Project Description; 3) Total Project amount; 4) Name of the individual whose highest level of signature authority is required, and any associated DOA's; 5) Description of the need for the early activation; 6) If the request is for an unbudgeted project, the email must contain the budgeted project number that will cover the unbudgeted spending.
- All normally required signatures must still be acquired on the AIP prior to sending the AIP to Property Accounting.
- The Property Accounting Department will maintain a log of Early Activated projects, and copies of the email approvals will be filed with the AIP.
- All AIPs that are early activated must be received by the Property Accounting Department, or Financial Planning & Controlling if necessary, with all required approvals, within 10 business days of the early activation. Repeated failure to comply with this timing will require email approval by the appropriate LOB VP for Early Activation of all future AIPs.

Project Completion

Upon project completion the project manager or budget coordinator closest to the project is required to:

1. Verify completion date (report to Property Accounting if different from AIP).
2. Update ORACLE project status to "completed".
3. Verify actual in-service date (report to Property Accounting if different from AIP).
4. Verify actual installed costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
5. Verify actual removal costs (report/explain any variances greater than 10% from the AIP to Property Accounting).
6. Verify units of property installed (report to Property Accounting if different from AIP).
7. Verify units of property retired (report to Property Accounting if different from AIP).

Budget coordinators are required to perform a post-completion audit of projects as discussed in the guidelines below. The review must be provided to the Financial Planning & Controlling Department and the Investment Committee.

E.ON U.S. LLC Policy

Date 07/20/09

Page 8 of 10

Capital and Investment Review**For Internal Review**

- E.ON U.S. requires that projects greater than \$5.0M (excluding blankets) complete a Post Completion Audit within 18 months of the project completion date unless otherwise agreed, to have a full year of financials to review.
- At the discretion of Financial Planning & Controlling a random audit of anything less than \$5.0M can be requested for auditing purposes.
- A PCA Template is available on the Financial Planning & Controlling website. Also, samples of Post Completion Audits are on Financial Planning & Controlling's website under "Examples". Transmission PCAs are not included on the website due to the Standards of Conduct.

For E.ON A.G.

The review must follow the requirement specified in the E.ON Planning and Controlling Manual (section C.8.4) which is available on Financial Planning & Controlling's website.

A Post Completion Audit should be submitted if one of the following criteria is valid:

- The project was approved by the E.ON Supervisory Board or the E.ON Finance and Investment Committee, or
- A project of at least \$50M Euros shows significant earnings deviations to the business plan originally presented. A significant deviation means that the Adjusted EBIT deviates more than 10% from the original plan in a three year period, or
- Before the completion of the construction of an asset over \$50M Euros, key assumptions of the valuation change leading to an overall change in value of 10%, or
- A PCA was agreed bilaterally between E.ON A.G. and the Market Unit at the time of the approval of the project.

In case of impairment, a PCA is always required. Otherwise, for projects which fulfill the criteria described above a PCA is generally performed three years after the realization of the project, e.g.

- Three years after the acquisition of a company, power plant, gas storage, etc.
- Three years after the start of the construction period of a power plant until three years after the completion of a power plant.
- Three years after the start of the exploration phase of a gas/oil field until three years after the start of the production phase of the gas/oil field.

Leases

Prior to the execution of any new lease entered into on behalf of the Company, a review must be conducted by the budget coordinator for the appropriate OBU, Financial Accounting and Reporting to determine if the lease is structured as a capital or operating lease, and by the Tax department. Additional reviews by Legal and Corporate Finance may be required depending on the total amount of the lease. See the E.ON U.S. LLC Lease Policy for more details.

E.ON U.S. LLC Policy

Date 07/20/09

Page 9 of 10

Capital and Investment Review**Blanket Capital Projects**

Background: Several lines of business (primarily Distribution and Transmission) use blanket capital projects to procure routine, frequently used assets (i.e., poles, meters, transformers) or to facilitate routine work for which specific information is not available at the time the budget is prepared (i.e. Gas and Electric Distribution New Business by area.) The blanket projects hold a “bucket” of budget dollars which is used to fund specific tasks (subprojects) under \$300,000 as they are identified throughout the year. Blanket projects are not closed each year but they are rebudgeted each year and are unitized on an “as-spent” basis.

Authorization: At the beginning of each calendar year, a list of all budgeted blanket projects must be submitted to the Investment Committee for approval, along with a summary of the previous year’s blanket capital spending. (A post-completion audit will not be required for blanket capital projects.)

Criteria for Spending under an Existing Blanket Project: Only work and materials of a routine nature which cannot be specifically identified at the time of budget preparation may be charged to a blanket project. Individual tasks (which may consist either of individual parts or of work orders containing both labor and material) must fall below a \$300,000 gross (of reimbursement) spending level. Otherwise, a separate, non-blanket capital project must be created which is subject to all requirements described elsewhere in this policy. Moreover, the same rules for spending authorization levels apply for spending under blanket capital projects as described elsewhere in this policy.

Criteria for Creating a New Unbudgeted Blanket Project: New blanket capital projects created after the budget process is complete do not require an approved AIP, but the request to open the project must be submitted to both Property Accounting and Financial Planning & Controlling. New blanket capital projects are always considered to be unbudgeted and are therefore subject to the same requirements for unbudgeted projects described elsewhere in this policy. The unbudgeted project authorized spending must be covered by either a budgeted blanket or a non-blanket project in accordance with the RAC Tenets.

Monthly Spending Report: The budget coordinator for each line of business incurring spending under blanket capital projects is required to prepare a monthly report listing all blanket projects and comparing the total year-to-date spending against budget. Any substitution of non-blanket projects’ budgets to cover new blanket projects’ budgets must be noted on the report and tracked throughout the year. This report must be submitted to Financial Planning & Controlling for review by the eleventh business day of the following month.

Penalties for Noncompliance

Failure to comply with this policy may result in disciplinary action, up to and including discharge.

Brett,

Actually, we are currently having 2 a year with each line of business. We have already had both of them and we have notes from the meeting if you would like them.

Thanks,
Angela

Subject: Year-end ARO review meeting

Angela,

It is correct to say that there is an annual meeting held to help identify ARO's, correct? I believe this was put in place last year to get various groups together to make sure all ARO's are identified. Can you let me know if this has happened yet for 2012 and if it has happened, would I be able to obtain minutes or anything else produced for the meeting?

Thanks,
Brett

Electric Distribution and General Facilities Meeting regarding AROs – April 2, 2012

Attendees: Steve Woodworth, Karan Kapp, Lisa Allen, Steve Reeves, Janna Singleton, Lynda Clark, Sara Wiseman, Angela Crescente and Beth McFarland, Jude Beyerle, Bob Ehrler, Paul Puckett and John Fendig via teleconference.

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~  
The following AROs were established prior to this meeting:

- disposal of asbestos found in distribution substations and general office facilities in places such as insulation, floor tiles and shingles.
- disposal of PCB oil found in bushings and line transformers.

~~~~~  
The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Regulators: Disposal of oil found in regulators is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. After a certain date, manufacturers stopped manufacturing regulators with PCB contaminated oil. Due to a company-wide effort to flush and retro fill regulators containing PCB, there should no longer be regulators in service that contain PCB oil.

Breakers: Disposal of oil found in breakers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, Company personnel estimate that there are few breakers remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. Recent breaker purchases by the Company contain SF6 gas. SF6 gas is not considered to be an ARO as greenhouse gas regulations rules only require reporting of SF6, they do not include requirements on control. SF6 will be sold or recycled upon retirement. Due to this fact, no ARO has been recorded for oil or SF6.

Freon (HVAC): There are certain regulations for disposal of Freon. However, when a unit is being replaced, the new unit cost covers the removal and disposal of the old unit which is completed by the contractor. There are no additional or separate charges for the cost of removal of the unit and the Freon inside the unit. Therefore, no ARO is being established.

Batteries: Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

Poles: Poles may be coated with creosote. However, there is no additional cost for disposal of creosote covered poles. Therefore, no ARO is being established.

Mercury in fixtures and light bulbs: Mercury is considered to be an ARO, however, light bulbs are considered to be O&M expenses. Therefore, there is no asset to establish an ARO. There is no additional cost for disposal of mercury in fixtures. Therefore, no ARO is being established.

Generation Meeting regarding AROs – April 26, 2012 (Monthly Maintenance Managers’ meeting held at E.W. Brown)

Attendees: David Cosby, Bob Ehrler, John Fendig, Jason Wilkerson, Mike Winkler, Bruce Rose, Shannon Charnas via teleconference. Sara Wiseman, Angela Cresconte, Danny Faulkner (Green River), Joe Didelot (Mill Creek), Tim Smith (Trimble County), Jeff Fraley (Brown plant manager), Mike Drake (Ghent), Brian Sumner (Brown), Steve Legler (Cane Run) and Jim Henry. *To be updated*

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a “legal obligation” and what the Company considers to be a “best practice” which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~  
The following AROs were established prior to this meeting:

- disposal of asbestos found in generation equipment and facilities in places such as insulation, floor tiles and shingles.
- remediation of ash ponds/other ponds, landfills, coal storage, oil storage, chemical storage, nuclear sources, generation wells, gypsum stack at Ghent, and floodwall penetration at Cane Run.

~~~~~  
The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Dix Dam: Retirement of dam structure-There are no environmental obligations to remove the dam. Dix Dam is not regulated by the FERC since the dam is on a Company owned lake. No specific environmental regulations regarding removal of the dam have been identified. It is possible that specific legally required actions may be required at the time of final retirement; however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

Ohio Falls: Retirement of dam structure-There are no environmental obligations to remove the dam. Ohio Falls is regulated by the FERC and has a permit to operate issued by the U.S. Army Corps of Engineers. The permits and FERC licenses do not list or enumerate specific or detailed remediation

steps upon abandonment. If Ohio Falls were to be retired it is likely that the Corps of Engineers and FERC would require certain abandonment activities to occur, however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

Coal Docks/Barge Unloading Facilities/ Tyrone Service Water Structure: The Legal Dept has made inquiries of various Company personnel in order to obtain historical information or documents to try to determine if any legal retirement obligations exist. They were unable to locate definitive data (ground leases, permits, etc.) or applicable rules (USCG, ACDE, etc.) positively indicating any legal obligations exist upon non-use. Due to this fact, no ARO has been recorded.**GSU/Auxiliary Transformers:** Disposal of oil found in GSUs is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, the Company has had a program for 30 years or so to eliminate all PCB oil in transformers. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

Oil Filled Instruments: Disposal of oil found in oil filled instruments is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, Company personnel estimate that there are few instruments remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

Oil Piping: No legal requirements to dig up or remove oil piping.

SCR Catalyst Layers: No SCR catalysts have been disposed of yet. Currently, there has been no final determination as to the final disposal method and costs for when the catalyst is retired off the financial records.

Bridges/Tunnels: A review of a sample of permits for these structures including Mill Creek Railroad, Ghent Pipe Tunnel, and GH Pipe and Slurry Bridge was made by the Legal Department. The permits did not list specific actions which must be completed at the time of removal. There is no requirement in the contract for the leases. These structures will continue to be reviewed to capture any changes. Therefore, no ARO has been recorded.

Easements/Leased Land: A review of easements by the Legal Department did not reveal any legal requirements to remove property upon retirement. The Legal Department will continue to review easement forms as they are revised to ensure this finding does not change. Therefore, no ARO is recorded.

Precipitator Plates: May become a low level radioactive source due to system usage. However, the amount and cost is not reasonable to estimate. The Company's past experiences has resulted in no cost for landfill disposal.

Batteries: Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

Gas Pipeline: Pipeline would require cut, capped and purged and is included in gas main ARO.

CFC/Freon/Halon: There are certain regulations for disposal, however due to the small dollar amounts involved, no ARO was established.

The following items are not considered to be AROs (for the reasons documented):

Bromine/Chlorine: These chemicals are not considered to be hazardous materials and therefore are not AROs.

Chimneys: There is no obligation to tear down. Federal Aviation regulations state that the chimney must have navigational lights mounted on them if over a certain height. However, this does not constitute an ARO. Chimney capping is also not an ARO and is a best practice in order to prevent deterioration.

Sewage Treatment: There is no legal or environmental for disposal of sewage facilities.

GR Limestone Silo: Limestone is not considered a hazardous material and therefore there are no requirements for an ARO to be established.

Electric Distribution and General Facilities Meeting regarding AROs – October 9, 2012

Decision made at October 9, 2012 meeting: No changes are required

Attendees: Karan Kapp, Lisa Allen, Steve Reeves, Lynda Clark, Sara Wiseman, Angela Crescente, Jamie Archer, Mike Winkler, Michael Haycox, Diana Wacker, Karen Daly, Travis Thompson at the BOC and Beth McFarland, Jude Beyerle, Tony Durbin via teleconference. John Fendig, Paul Puckett, Bob Ehrlie, Jerry Grant were unable to attend.

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~  
**The following AROs were established prior to this meeting:**

- disposal of asbestos found in distribution substations and general office facilities in places such as insulation, floor tiles and shingles.
- disposal of PCB oil found in bushings and line transformers.

~~~~~  
The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Regulators: Disposal of oil found in regulators is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. After a certain date, manufacturers stopped manufacturing regulators with PCB contaminated oil. Due to a company-wide effort to flush and retro fill regulators containing PCB, there should no longer be regulators in service that contain PCB oil.

Breakers: Disposal of oil found in breakers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, Company personnel estimate that there are few breakers remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. Recent breaker purchases by the Company contain

SF6 gas. SF6 gas is not considered to be an ARO as greenhouse gas regulations rules only require reporting of SF6, they do not include requirements on control. SF6 will be sold or recycled upon retirement. Due to this fact, no ARO has been recorded for oil or SF6.

Freon (HVAC): There are certain regulations for disposal of Freon. However, when a unit is being replaced, the new unit cost covers the removal and disposal of the old unit which is completed by the contractor. There are no additional or separate charges for the cost of removal of the unit and the Freon inside the unit. Therefore, no ARO is being established.

Batteries: Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

Poles: Poles may be coated with creosote. However, there is no additional cost for disposal of creosote covered poles. Therefore, no ARO is being established.

Mercury in fixtures and light bulbs: Mercury is considered to be an ARO, however, light bulbs are considered to be O&M expenses. Therefore, there is no asset to establish an ARO. There is no additional cost for disposal of mercury in fixtures. Therefore, no ARO is being established.

Gas Meeting regarding AROs – April 27, 2012

Attendees: Lisa Allen, Janice Porter, Sharon Wright, Steve Beatty, Kevin Murphy, Joshua Nash, Paul Stratman, Cindy Martin, Bill Harper, Eddie Harshfield, Pete Clyde, Tom Rieth, Mark Satkamp, John Skaggs, Russ Cloyd, Zach Thomas, Mike Winkler, Bob Ehrler, Shannon Charnas, Sara Wiseman, Angela Crescente, Pat Leenerts. *To be updated*

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital assets and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~  
**The following AROs were established prior to this meeting:**

- the permanent cutting, capping and purging activities of gas transmission mains and gas distribution mains and service abandonments including grouting of smaller than 4" mains and services, and disposal of asbestos coating on mains removed from the ground and;
- disposal of asbestos found in insulation, floor tiles and shingles; and
- permanent plugging of wells.

Cut, cap and purge activities are required regardless of whether the main is removed or abandoned in place. For purposes of quantifying the asbestos coating component of the ARO liability, it was determined that retirement activities typically do not include digging up the main, but rather the mains are abandoned in place. Occasionally, gas mains coated with asbestos material are dug up and result in human exposure, which does constitute an ARO liability. An estimate for this limited asbestos remediation is included in the current gas main ARO liabilities.

~~~~~  
The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Mercury from old metering stations related to spill cleanup – No way to reasonably estimate how much there would be in land/soil owned by the Company and there is no legal obligation to test now or in the event the land is sold.

Mercury in old equipment – No way to reasonably estimate and there is not much old equipment left that would have this issue. Any work related to this would generally be O&M related as well.

Potholes – These are used in the conversion of above ground to underground conductors and have a grease-like substance that would require remediation. However, there are very few of these believed to remain in our system and the cost would be very minimal.

Vessels – Vessels are found at the compressor stations. Vessels may contain sludge which has to be disposed of in a certain legally required manner. However, any disposal costs associated with the sludge in vessels would be done under O&M.

Acid – Acid has to be disposed of in a certain legally required manner. However, most of the time, acid is reused within the Company and any disposal and any disposal costs associated with acid is done under O&M.

.....

The following items are not considered to be AROs (for the reasons documented):

Sewage facilities – There is no legal obligation. The Company does remove sewage facilities in a certain way to satisfy our best practice approach, but not for a legal obligation.

Transmission Meeting regarding AROs – April 10, 2012

Attendees: Mike Winkler, Ed Clark, Sara Wiseman, Angela Crescente and Robby Trimble, Jon Miller, and John Fendig via teleconference.

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a “legal obligation” and what the Company considers to be a “best practice” which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~  
**The following AROs were established prior to this meeting:**

- disposal of asbestos found in transmission substations in places such as insulation, floor tiles and shingles.
- disposal of PCB oil found in bushings.

~~~~~  
The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

Culverts/Drainage/Berms/Substation Roadways: There are no environmental (only possible contractual) obligations associated with the actual physical disposal of culverts, drainage, berms and roadways. The Legal Dept has made inquiries of various Company personnel in order to obtain historical information or documents to try to determine if any legal retirement obligations exist. They were unable to locate definitive data or applicable rules positively indicating any legal obligations exist upon non-use. Due to this fact, no ARO has been recorded.

Transformers: Disposal of oil found in transformers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, the Company has had a program for 30 years or so to eliminate all PCB oil in transformers. Therefore, the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. This includes pad mount, overhead and station transformers.

Capacitors: Disposal of oil found in capacitors is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB

contaminated oil. However, there are no capacitors remaining that contain PCB oil. Therefore, no ARO has been recorded.

Breakers: Disposal of oil found in breakers is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. The Company must pay to dispose of or recycle PCB contaminated oil. However, Company personnel estimate that there are few breakers remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated. Recent breaker purchases by the Company contain SF6 gas. SF6 gas is not considered to be an ARO as greenhouse gas regulations rules only require reporting of SF6, they do not include requirements on control. SF6 will be sold or recycled upon retirement. Due to this fact, no ARO has been recorded for oil or SF6.

Batteries: Batteries do need to be disposed of in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement. Therefore, no ARO has been recorded.

Freon (HVAC): There are certain regulations for disposal of Freon. Only have 4 control houses with air conditioning. Future plans would be to add air conditioning one per year. Due to the small dollar amounts involved, no ARO was established.

Easement, Leases: A review of a sample of main easement/lease forms by the Legal Department did not reveal any legal requirements to remove property upon retirement. The Legal Department will continue to review easement forms as they are revised to ensure this finding does not change. Therefore, no ARO is recorded.

Underground Electric Lines: There is a minimal amount of oil found in underground electric lines, however, it is not PCB contaminated. The oil is pumped out of the lines upon removal or abandonment. Non PCB oil can generally be recycled at no cost to the Company or even sold. Therefore, since there is no cost to the Company an ARO is not required.

Poles: Poles may be coated with creosote. However, there is no additional cost for disposal of creosote covered poles. Therefore, no ARO has been recorded.

~~~~~  
The following items are not considered to be AROs (for the reasons documented):

**Sewage Facilities:** There is no legal obligation. We do remove sewage facilities in a certain way to satisfy our best practice approach, but not for a legal obligation.

Generation Meeting regarding AROs – October 18, 2012 (Monthly Maintenance Managers' meeting held at Green River)

*Decision made at October 18, 2012 meeting: No changes are required*

Attendees: David Cosby, Bob Ehrler, John Fendig, Jason Wilkerson, Mike Winkler, Bruce Rose, Shannon Charnas via teleconference. Sara Wiseman, Angela Crescente, Danny Faulkner (Green River), Joe Didelot (Mill Creek), Tim Smith (Trimble County), Jeff Fraley (Brown plant manager), Mike Drake (Ghent), Brian Sumner (Brown), Steve Legler (Cane Run) and Jim Henry. *To be updated*

The objectives of the meeting included:

- Refresher of definition of ARO
- Review of current list of recorded AROs
- Review of retirement unit listing to spur general discussion of other possible AROs

Special considerations:

- In order to determine and quantify the asset obligation it is important to understand the difference between a "legal obligation" and what the Company considers to be a "best practice" which is above and beyond the legal obligation.
- AROs apply only to the retirement of capital asset and should not be recorded as the result of costs which were originally accounted for as Operation and Maintenance Expense (O&M).
- Costs of removal should be split between legal and non-legal costs. Only legally required costs should be included in the ARO.

~~~~~  
The following AROs were established prior to this meeting:

- disposal of asbestos found in generation equipment and facilities in places such as insulation, floor tiles and shingles.
- remediation of ash ponds/other ponds, landfills, coal storage, oil storage, chemical storage, nuclear sources, generation wells, gypsum stack at Ghent, and floodwall penetration at Cane Run.

~~~~~  
The following items could possibly result in the establishment of AROs but the determination was made to not establish one (for the reasons documented):

**Dix Dam:** Retirement of dam structure-There are no environmental obligations to remove the dam. Dix Dam is not regulated by the FERC since the dam is on a Company owned lake. No specific environmental regulations regarding removal of the dam have been identified. It is possible that specific legally required actions may be required at the time of final retirement; however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

**Ohio Falls:** Retirement of dam structure-There are no environmental obligations to remove the dam. Ohio Falls is regulated by the FERC and has a permit to operate issued by the U.S. Army Corps of

Engineers. The permits and FERC licenses do not list or enumerate specific or detailed remediation steps upon abandonment. If Ohio Falls were to be retired it is likely that the Corps of Engineers and FERC would require certain abandonment activities to occur, however, at the present time the Company cannot ascertain what these activities might be. Therefore, no ARO will be recorded until such time as a reasonable estimate may be obtained.

**Coal Docks/Barge Unloading Facilities/ Tyrone Service Water Structure:** The Legal Dept has made inquiries of various Company personnel in order to obtain historical information or documents to try to determine if any legal retirement obligations exist. They were unable to locate definitive data (ground leases, permits, etc.) or applicable rules (USCG, ACOE, etc.) positively indicating any legal obligations exist upon non-use. Due to this fact, no ARO has been recorded.**GSU/Auxiliary Transformers:** Disposal of oil found in GSUs is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, the Company has had a program for 30 years or so to eliminate all PCB oil in transformers. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

**Oil Filled Instruments:** Disposal of oil found in oil filled instruments is an ARO. However, non PCB oil can generally be recycled at no cost to the Company or even sold. PCB contaminated oil is not recyclable and the Company must pay to dispose of it. However, Company personnel estimate that there are few instruments remaining which may contain PCB contaminated oil. Therefore the amount of the PCB contaminated oil remaining is considered to be minimal and cannot be estimated.

**Oil Piping:** No legal requirements to dig up or remove oil piping.

**SCR Catalyst Layers:** No SCR catalysts have been disposed of yet. Currently, there has been no final determination as to the final disposal method and costs for when the catalyst is retired off the financial records.

**Bridges/Tunnels:** A review of a sample of permits for these structures including Mill Creek Railroad, Ghent Pipe Tunnel, and GH Pipe and Slurry Bridge was made by the Legal Department. The permits did not list specific actions which must be completed at the time of removal. There is no requirement in the contract for the leases. These structures will continue to be reviewed to capture any changes. Therefore, no ARO has been recorded.

**Easements/Leased Land:** A review of easements by the Legal Department did not reveal any legal requirements to remove property upon retirement. The Legal Department will continue to review easement forms as they are revised to ensure this finding does not change. Therefore, no ARO is recorded.

**Precipitator Plates:** May become a low level radioactive source due to system usage. However, the amount and cost is not reasonable to estimate. The Company's past experiences has resulted in no cost for landfill disposal.

**Batteries:** Batteries do need to be disposed in a certain manner for environmental reasons; however, most batteries are recycled at no cost to the Company upon retirement.

**Gas Pipeline:** Pipeline would require cut, capped and purged and is included in gas main ARO.

**CFC/Freon/Halon:** There are certain regulations for disposal, however due to the small dollar amounts involved, no ARO was established.

**The following items are not considered to be AROs (for the reasons documented):**

**Bromine/Chlorine:** These chemicals are not considered to be hazardous materials and therefore are not AROs.

**Chimneys:** There is no obligation to tear down. Federal Aviation regulations state that the chimney must have navigational lights mounted on them if over a certain height. However, this does not constitute an ARO. Chimney capping is also not an ARO and is a best practice in order to prevent deterioration.

**Sewage Treatment:** There is no legal or environmental for disposal of sewage facilities.

**GR Limestone Silo:** Limestone is not considered a hazardous material and therefore there are no requirements for an ARO to be established.

**Subject:** RE: Paddy's Run ASB - ARO Question  
**Attachments:** Support for Paddy's Run Revaluation.pdf

Drew,

The reason for the revision was the change in final settlement date from 2015 to 2019 with expected settlement activity in between. I have attached support for this activity. Please let me know if you have any questions.

Thanks,  
 Angela

**Subject:** Paddy's Run ASB - ARO Question

Angela,

I had a question regarding the Paddy's Run - ASB ARO. I noticed that last year there was a revision for 443k for this ARO, I was curious if you could tell me what this revision was for and provide any support that you have available, specifically the discount rate used to calculate the accretion for this revision.

Additionally, I wanted to follow up with you about Brett Wemor's request for support regarding the 750k loss in the "Purc-GasMain&ServAbandon-Dist" ARO. Do you know when we can expect to receive this support?

If you have any questions about these requests please let me know.

Thank you,

Drew

 Subject: RE: Canal and Paddy's

Steve,

Per our conversation, you are still in agreement with the estimates provided last year. The activities budgeted in 2012 would not be expected to have any asbestos removal dollars in them since it is engineering and stack removal. Based on the information we currently have available, it would be best to use 60% of the expected asbestos removal dollars for Canal in 2017 and approximately 20% in 2018 and 2019 since the contractors have explained that they intend to remove most of the asbestos upfront. For Paddy's, it would be best to use 60% in 2015 and 10% in 2016, 2017, 2018, 2019. Please confirm or feel free to correct any misunderstandings I have.

Thanks,  
 Angela

Subject: Canal and Paddy's

Steve,

Do you still agree with the expected ARO removal dollar estimate for both Canal and Paddy's that we got from you last year? We have Canal listed at about \$1,575,000 in total for asbestos removal and Paddy's is listed in total at about \$4,600,000 for asbestos removal. I understand we are expecting some demolition charges in 2012, which would mean I will need to set up some expected retirement activity in the ARO estimates. In order to book this estimate for December, I need to know as soon as possible.

Thanks for your help,  
Angela

Janna,

Please forgive me if I have misplaced your email. Would you mind resending me the rates as requested below?

Thanks,  
Angela

Janna,

Would you please provide me the yield curve for a BBB+ rated entity as of December 1, 2011?

Thanks,  
Angela

Discount Rate Calculation

Drew,

Please see the attached screenshots reflecting the proper ARO Cost of Removal account 108799.

Thanks,  
Angela

Angela,

For these projects, can you please send me a screen shot from Oracle that shows these projects set up as an ARO in the system?

Thank you,

Drew

Sara,

I am sorry, but in my previous e-mail I wanted to mention that it would be helpful if we could receive this information by the end of the week or early next week. Also, my last request in the attachment says "January-June 2010" when it should read "January-June 2012". I have attached it again to this e-mail.

Thank you,

Drew

Garrett

Preparers: Carol Foxworthy, Senior Rate & Regulatory Analyst  
Sara Wiseman, Manager, Property Accounting

FERC Audit of PPL Corporation, including  
its service companies and associated companies  
For the period January 1, 2010 – December 31, 2011

Data request: 9034

LG&E and KU reports asset retirement costs in the following accounts:

Account 317, Asset Retirement Costs for Steam Production  
Account 337, Asset Retirement Costs for Hydraulic Production  
Account 347, Asset Retirement Costs for Other Production  
Account 359.1, Asset Retirement Costs for Transmission Plant  
Account 374, Asset Retirement Costs for Distribution Plant  
Account 399.1, Asset Retirement Costs for General Plant

Provide a narrative that describes the accounting for these asset retirement costs, including journal entries that show the debit and credit side of this accounting. Where are the assets and associated liabilities reflected in the transmission formula rate?

Response:

Asset retirement costs are established upon the initial recognition of the asset retirement obligation (ARO) liability as required by FASB Accounting Standards Codification ("ASC") Topics 410 and 980-410 (formerly Statement of Financial Accounting Standards No. 143 ("SFAS 143"), *Accounting for AROs*, and the subsequent FASB Interpretation No. 47 ("FIN 47"). The following entry is made to establish an asset retirement cost:

|     |                                                            |
|-----|------------------------------------------------------------|
| Dr. | Account 101 - Plant in Service – ARO Asset Retirement Cost |
| Cr. | Account 230 – Asset Retirement Obligations                 |

Depreciation on ARO assets is calculated on a straight line basis (consistent with all utility depreciation calculations) over a life dictated by the settlement date of the ARO liability. The following journal entry reflecting depreciation expense for the ARO asset is:

|     |                                                      |
|-----|------------------------------------------------------|
| Dr. | Account 403 - Depreciation Expense                   |
| Cr. | Account 108 - Accumulated Provision for Depreciation |

As depreciation expense allocates the cost of installing an asset over its useful life, accretion expense allocates the increase in the cost of removing an asset over its useful life. Each period the ARO liability is increased through the recognition of accretion expense. The journal entry reflecting accretion is as follows:

|     |                                            |
|-----|--------------------------------------------|
| Dr. | Account 411 - Accretion Expense            |
| Cr. | Account 230 - Asset Retirement Obligations |

ARO accounting for utilities is intended to be earnings neutral; therefore, regulatory credits (on the income statement) and regulatory assets (on the balance sheet) are charged for the total depreciation and accretion expense amounts. The journal entry to record the offset is:

|     |                                       |
|-----|---------------------------------------|
| Dr. | Account 182 - Other Regulatory Assets |
| Cr. | Account 407 - Regulatory Credits      |

At the time of ARO settlement the appropriate ARO amounts in accounts 101, 108, 182 and 230 are reversed.

PRIVILEGED – DO NOT RELEASE

Garrett

Preparers: Carol Foxworthy, Senior Rate & Regulatory Analyst  
Sara Wiseman, Manager, Property Accounting

The net result of ARO accounting on the balance sheet is zero as ARO liabilities (account 230), net ARO assets (accounts 101 and 108) and regulatory assets (account 182) when netted together equal zero. There is no provision in the Attachment O Formula for presenting ARO assets and liabilities.

**Subject:** Follow-up discussion

Jesse,

Good morning. As we discussed last week, I would like to have a conference call to discuss some follow-up questions we have related to the asset retirement cost issue. Below are the follow-up questions we have regarding LGE/KU's asset retirement costs recorded in Accounts 317, 326, 337, 347, 359.1, 374, 399.1.

Explain the ARO obligation in detail.

Is accretion expense (that is recorded in Account 411.10) recovered via the transmission cost of service formula rate?

Are you recovering any ARO cost through the removal component of your current depreciation rates?

Is there any adjustment made to Account 108 for the asset retirement obligation or related costs?

Is there any portion of the asset retirement costs recorded in Account 403?

In response 9034, there is a statement that says, "There is no provision in the Attachment O Formula for presenting ARO assets and liabilities." If that's the case, explain how asset retirement costs are included in Accounts 317, 326, 337, 347, 359.1, 374, 399.1 and recovered in Plant in Service.

I am available this week Thursday - Friday from 9:00 a.m. to 3:00 p.m. Next week, I am available Monday - Wednesday 9:00 a.m. to 3:00 p.m. Please let me know if you have any questions.

Thanks,  
Nick

**Subject:** Call from Nick Coughlin  
**Importance:** High

Jesse received a call from Nick with an additional issue he wants to discuss on the call on Monday, and another issue that can be discussed on Monday if appropriate personnel are available, but if not may be discussed at a later date:

1. Nick wants someone on the call on Monday that understands and can speak to an LGE ARO item. Specifically, 2011 FERC Form 1, p. 234 Account 190 Beg. Balance of 18,155,786 – AR.
2. May be discussed Monday, but does not have to be on Monday: Nick is going to send Jesse a reconciliation spreadsheet reconciling Form 1 Account Balance vs. GL Account 190 Balance. He is able to reconcile for KU but can't hit numbers for LGE.

John and Valerie Scott – it's my understanding that Betty has gathered the names of the appropriate people for the call. Can you confirm that the individuals include the appropriate people to address these point(s) and if not have them included in the call?

Thanks  
Valerie

**Subject:** Follow-up discussion

Jesse,

Good morning. As we discussed last week, I would like to have a conference call to discuss some follow-up questions we have related to the asset retirement cost issue. Below are the follow-up questions we have regarding LGE/KU's asset retirement costs recorded in Accounts 317, 326, 337, 347, 359.1, 374, 399.1.

Explain the ARO obligation in detail.

Is accretion expense (that is recorded in Account 411.10) recovered via the transmission cost of service formula rate?

Are you recovering any ARO cost through the removal component of your current depreciation rates?

Is there any adjustment made to Account 108 for the asset retirement obligation or Garrett costs?

Is there any portion of the asset retirement costs recorded in Account 403?

In response 9034, there is a statement that says, “There is no provision in the Attachment O Formula for presenting ARO assets and liabilities.” If that’s the case, explain how asset retirement costs are included in Accounts 317, 326, 337, 347, 359.1, 374, 399.1 and recovered in Plant in Service.

I am available this week Thursday - Friday from 9:00 a.m. to 3:00 p.m. Next week, I am available Monday - Wednesday 9:00 a.m. to 3:00 p.m. Please let me know if you have any questions.

Thanks,  
Nick

**Sent:** Tuesday, December 18, 2012 10:31 AM  
**To:** Dillon, Jesse A  
**Subject:** ARO deferred tax discussion

Jesse,

Good morning. Below are my follow-up discussion topics for ARO-related deferred tax amounts. Please let me know if you have any questions. We can have a conference call to discuss these topics after January 1 or you can provide a written response to each of these 3 items – whatever works best for you all.

- Discuss each ARO-related deferred tax item recorded in Account 190 and reported in the FERC Form No. 1:

On page 234 of its 2011 FERC Form No. 1, LG&E reported an ARO-related deferred tax item on line 6

On page 234 of its 2010 FERC Form No. 1, KU reported an ARO-related deferred tax item on line 6

On page 234 of its 2010 FERC Form No. 1, LG&E reported an ARO-related deferred tax item on line 6

- Discuss the accounting treatment, including journal entries, for these ARO-related deferred tax items **before** the PPL acquisition and **after** the PPL acquisition.
- Discuss the formula rate treatment for these ARO-related deferred tax items.

Thank you,  
Nick

Thank you for the information. This reconciles to the difference identified in my spreadsheet.

Thank you,  
Nick

**Subject:** Power Tax Purchase Acct Report

Nick,  
Sorry I missed the call yesterday. Attached are two reports you requested. The first two pages are the Power Tax report that has the electric 190 balances for Purchased Accounting and the third page is the gas 190 Purchase Accounting report. The last column is the balances at 12/31/2011. If you have any questions please let me know. Valerie had also mentioned you need some ARO data, I will try to get that to you tomorrow.

Thanks  
Scott

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 120**

**Responding Witness: Christopher M. Garrett**

Q-120. Regarding FASB Statement No. 143, FIN 47, and FERC Order No. 631 in Docket No. RM02-7-000, on a plant account-by-plant account basis, please identify any and all "legal obligations" associated with the retirement of the assets contained in the account that result from the acquisition, construction, development and (or) the normal operation of the assets in the account. For the purposes of this question, please use the definition of a "legal obligation" provided in FASB Statement No. 143: "an obligation that a party is required to settle as a result of an existing or enacted law, statute, ordinance, or written or oral contract under the doctrine of promissory estoppel."

A-120. See attached.

**Louisville Gas and Electric  
Asset Retirement Obligations by Plant Account**

| ARO                     | Plant Account and Description                         | Legal Obligation                                                                                                     |
|-------------------------|-------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| Ash Ponds, Landfills    | 131100 - Structures and Improvements                  | Coal combustion by-product storage facilities must be properly closed and monitored.                                 |
| Coal Storage            | 131100 - Structures and Improvements                  | Must remove all material storage piles to eliminate the potential for contaminated storm water runoff from the site. |
| Floodwall Penetration   | 131100 - Structures and Improvements                  | Must fill concrete tunnels in order to maintain integrity of the floodwall.                                          |
| Generation Wells        | 131100 - Structures and Improvements                  | Wells must be properly covered and closed.                                                                           |
| Nuclear Sources         | 131200 - Boiler Plant Equipment                       | Removal and disposal of radioactive waste.                                                                           |
| Chemical Storage        | 131200 - Boiler Plant Equipment                       | Hazardous wastes must be removed from site and disposed of properly.                                                 |
| Asbestos - Generation   | 131200 - Boiler Plant Equipment                       | Removal and disposal of asbestos in the proper manner.                                                               |

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 121**

**Responding Witness: Christopher M. Garrett**

Q-121. For any asset retirement obligations identified above, please provide the "fair value" of the obligation. For the purposes of the question, fair value means "the amount at which that liability could be settled in a current [not future] transaction between willing parties, that is, other than in a forced or liquidation transaction." Please provide all assumptions and calculations underlying these amounts.

A-121. See attached for the current asset retirement obligation (ARO) liabilities. The calculation of the ARO liability is performed in the Fixed Asset system. Each month, the Fixed Asset system multiplies the current month's beginning ARO liability balance by the applicable discount rate and then divides that amount by 12 to arrive at the monthly accretion amount. This monthly amount is added to the current month's beginning liability balance to compute the current ending balance.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 122**

**Responding Witness: Christopher M. Garrett**

Q-122. Please provide the "credit adjusted risk free rate" used for any and all ARO calculations under FASB Statement No. 143, FIN 47, and FERC Order No. 631 calculations to date.

A-122. See attached.

The "credit adjusted risk free rate" is based on LG&E's credit rating. The discount rate used for each ARO is equal to the yield for a bond with LG&E's credit rating and a maturity date in the same year as the year the ARO is expected to be settled. The yields are based on indications provided by a major investment bank. FERC Order No. 631 does not have separate calculations.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 123**

**Responding Witness: Christopher M. Garrett**

Q-123. For all accounts for which the Company has collected non-legal AROs, but instead recorded a regulatory liability (regulatory liability for cost of removal), please provide the fair value of the related asset retirement cost as of December 31, 2010; December 31, 2011, December 31, 2012, and December 31, 2014. For the purposes of this question, assume that the Company has legal AROs for these accounts, and use the life and dispersion assumptions reflected in current depreciation rates.

A-123. LG&E is not required under any accounting or regulatory standard to perform these hypothetical calculations. Therefore, these hypothetical calculations require original work and have not been prepared.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 124**

**Responding Witness: John J. Spanos**

- Q-124. Provide the calculation of the annual amount of future gross salvage, cost of removal and net salvage incorporated into the Company's existing depreciation rates. If any of the amounts are reduced by the total amount of non-legal AROs included in year-end accumulated depreciation, show that calculation.
- A-124. The attached document sets forth the calculation of the future annual gross salvage and cost of removal incorporated into the Company's proposed depreciation rates. There are no existing depreciation rates for Cane Run Unit 7 as the facility is not in service to date. None of the proposed amounts are reduced by an amount of non-legal ARO.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 125**

**Responding Witness: Christopher M. Garrett**

Q-125. Are the amounts of cost of removal and gross salvage incorporated into the existing and proposed depreciation rates the same as they would have been in the absence of SFAS No. 143 and FIN 47? Please explain.

A-125. The amounts of cost of removal and gross salvage incorporated into the existing and proposed depreciation rates are the same as they would have been in the absence of SFAS No. 143 and FIN 47.

All of the cost of removal and gross salvage recorded on the books and developed into the depreciation rates are costs associated with normal business in the utility industry.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 126**

**Responding Witness: Edwin R. "Ed" Staton**

Q-126. Please provide any information, when known, that would have a material effect on net operating income, rate base, or cost of capital that have occurred after the filing of the application, but were not incorporated in the filed testimony and exhibits.

A-126. The Company will provide the requested information as applicable and otherwise will file the actual results for the estimated months of the base period within 45 days after the last day of the base period as required by KRS 278.192(2)(b). Please see the response to the First Request for Information of The Kroger Company No. 1-2 and Paragraph No. 13 in the Application.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 127**

**Responding Witness: Edwin R. "Ed" Staton**

Q-127. Please describe the status of any outstanding recommendations contained in the Company's management audits. Identify any savings or costs related to management audit recommendations, the impact of which is not already reflected in the fully forecasted test period of this case.

A-127. On January 14, 2015, the Commission issued a letter to LG&E and KU which stated that all recommendations have been completed.

The Companies have invested approximately \$7.4 million in one-time cost, with the majority being spent on the construction of a new call center in Morganfield, KY. In addition, the Companies reported that an annual recurring expense of \$5.6 million will be required to support the recommendations in the audit. All costs are reflected in the forecasted test period.

The Companies approached this process as an opportunity to validate a number of initiatives and enhance our customers' experiences. Customer focus is a core value and is reflected in the Companies' business processes, systems, organizational structures, decision-making, and most of all, in the behaviors of our employees. The Companies have long histories of providing award-winning customer service and genuine concern for customers, while working hard to keep rates among the lowest in the country. The Companies continue to invest in technology and processes designed to improve service to our customers that provide options to address customers' wants and needs. The Companies believe with their continued commitment to customers and the completion of these recommendations that it has achieved the purpose of this audit, which was to ensure the ratepayers are receiving efficient and effective provision of service consistent with industry best practices. The Companies take pride in being an industry leader and believe the obligation to serve goes far beyond regulatory accountability.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 128**

**Responding Witness: Russel A. Hudson**

Q-128. Please provide a detailed listing, description and dollar breakout of all social and service club dues, country club dues and charitable expenses included in the above-the-line expenses in the fully forecasted test period.

A-128. Social and service club dues and charitable expenses are all included in the below-the-line expenses in the fully forecasted test period. Country club dues are not included in the business plan and are not included in the fully forecasted test period.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 129**

**Responding Witness: Russel A. Hudson**

Q-129. Please provide a detailed listing, description and dollar breakout of all advertising expenses included in the above-the-line expense fully forecasted test period. In addition, indicate which of these advertising expenses can be considered promotional and institutional advertising.

A-129. See attached. The attached schedule lists all above-the-line promotional and institutional advertising; however, none of these costs are included in the base rate calculation. They were removed in Filing Requirement Tab 56- 07 KAR 5:001 Section 16(6)(d) pp. 7-8 of the Company's filing requirements.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information**

**Dated January 8, 2015**

**Question No. 132**

**Responding Witness: Christopher M. Garrett**

Q-132. Please explain in detail any major changes in accounting treatment for O&M expenses, retirements, replacements and removal costs instituted by the Company since 2010.

A-132. There have been no major changes in the accounting treatment for O&M expense, retirements, replacements and removal costs instituted by the Company since 2010. In response to this question, the Company provides the following:

In accordance with FERC Accounting guidelines (18 CFR, Balance Sheet Accounts, 108 Accumulated Provision for Depreciation of Electric Utility Plant), the net cost of removal depreciation accruals on the underlying parent assets (assets with asset retirement obligations (ARO)) are credited to Account 108 rather than account 254 – Regulatory Liabilities. Prior to August 2013, the monthly accruals were directly credited to Account 254 in lieu of Account 108. Per the 18 CFR, FERC approval was required to remove any amounts from (or not record required amounts to) Account 108. No such approval has been requested for parent ARO assets. Therefore, account 254 is no longer being used. This change had no impact for Kentucky rate making purposes.

Prior to August 2013, the monthly depreciation of ARO assets and ARO liability accretion accruals were credited to Account 407.4 – Regulatory Liabilities. In accordance with FERC Accounting guidelines (18 CFR, Balance Sheet Accounts, 182.3 Other Regulatory Assets), the Company now credits Accounts 403.1 and 411.10 since specific identification of the particular source of the regulatory asset can be made. Account 407.4 should be credited only when specific identification of the particular source of a regulatory asset cannot be made. This change had no impact for Kentucky rate making purposes.

In 2010, LKE changed its method of calculating the amount of unrecognized gains or losses recognized in the annual pension expense/income determined under ASC 715. Under its former method, the net unrecognized gains or losses in excess of 10% of the greater of the plan's projected benefit obligation or market-related value of plan assets were amortized on a straight-line basis over the

estimated average future service period of plan participants or average remaining life expectancy for plans with no or few active participants.

Under the current method, a second corridor is utilized for the net unrecognized gains or losses in excess of 30% of the plan's projected benefit obligation. The net unrecognized gains or losses outside the second corridor are now amortized on a straight-line method over a period equal to one-half of the average future service period of the plan participants. The current method provides more current recognition of gains and losses, thereby lessening the accumulation of unrecognized gains and losses.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information**

**Dated January 8, 2015**

**Question No. 133**

**Responding Witness: Valerie L. Scott**

Q-133. List each change in accounting principles made by the Company during 2010, 2011, 2012, 2013, and 2014, and for each such change, state the revenue and/or expense or capital impact in this filing.

A-133. Following are the changes in accounting principles made by the Company during 2010, 2011, 2012, 2013 and 2014:

Fair Value Measurements

In January 2010, the FASB issued guidance related to fair value measurement disclosures requiring separate disclosure of amounts of significant transfers in and out of level 1 and level 2 fair value measurements and separate information about purchases, sales, issuances and settlements within level 3 measurements. This guidance is effective for the interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about the roll-forward of activity in level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years.

This guidance has no impact on the Company's results of operations, financial position, liquidity or disclosures. This guidance did not have an impact on the Company's revenues and/or expense or capital.

Presentation of Comprehensive Income

Effective December 31, 2011, the Company retrospectively adopted accounting guidance that was issued to improve the comparability, consistency and transparency of financial reporting and to increase the prominence of items that are recorded in OCI. This guidance requires that all non-owner changes in stockholders' equity be presented either in a single continuous statement of comprehensive income or in two separate but consecutive statements where the first statement includes the components of net income and the second statement includes the components of OCI.

Regardless of whether an entity chooses to present comprehensive income in a single continuous statement or in two separate but consecutive statements, the guidance also would have required an entity to present on the face of the financial statements reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement(s) where the components of net income and the components of other comprehensive income are presented. However, subsequent to the issuance of this new accounting guidance, this requirement that companies present reclassification adjustments for each component of OCI in both net income and OCI on the face of the financial statements was deferred for further evaluation. The deferral did not change the requirement to present items of net income, items of other comprehensive income and total comprehensive income in either one continuous statement or two separate consecutive statements.

The adoption of this standard did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

#### Fair Value Measurements

Effective January 1, 2012, the Company prospectively adopted accounting guidance that was issued to clarify existing fair value measurement guidance and to enhance fair value disclosures. The additional disclosures required by this guidance include quantitative information about significant unobservable inputs used for Level 3 measurements, qualitative information about the sensitivity of recurring Level 3 measurements, information about any transfers between Levels 1 and 2 of the fair value hierarchy, information about when the current use of a non-financial asset is different from the highest and best use, and the fair value hierarchy classification for assets and liabilities whose fair value is disclosed only in the notes to the financial statements.

The adoption of this standard resulted in additional disclosures but did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

#### Testing Goodwill for Impairment

Effective January 1, 2012, the Company prospectively adopted accounting guidance which allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of goodwill. If, based on this assessment, the entity determines it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step goodwill impairment test is not necessary. However, the first step of the

impairment test is required if an entity concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the qualitative assessment.

The adoption of this standard did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

#### Improving Disclosures about Offsetting Balance Sheet Items

Effective January 1, 2013, the Company retrospectively adopted accounting guidance issued to enhance disclosures about derivative instruments that either (1) offset on the balance sheet or (2) are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset on the balance sheet.

The adoption of this guidance resulted in enhanced disclosures but did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

#### Testing Indefinite-Lived Intangible Assets for Impairment

Effective January 1, 2013, the Company prospectively adopted accounting guidance that allows an entity to elect the option to first make a qualitative evaluation about the likelihood of an impairment of an indefinite-lived intangible asset. If, based on this assessment, the entity determines that it is more likely than not that the fair value of the indefinite-lived intangible asset exceeds the carrying amount, a quantitative impairment test does not need to be performed. If the entity concludes otherwise, a quantitative impairment test must be performed by determining the fair value of the asset and comparing it with the carrying value. The entity would record an impairment charge, if necessary.

The adoption of this guidance did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

#### Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income (AOCI)

Effective January 1, 2013, the Company prospectively adopted accounting guidance issued to improve the reporting of reclassifications out of AOCI. The Company is required to provide information about the effects on net income of significant amounts reclassified out of AOCI by their respective statement of income line item, if the item is required to be reclassified to net income in its

entirety. For items not reclassified to net income in their entirety, the Company is required to reference other disclosures that provide greater detail about these reclassifications.

The adoption of this guidance required enhanced disclosures but did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Accounting for Obligations Resulting from Joint and Several Liability Arrangements

Effective January 1, 2014, the Company retrospectively adopted accounting guidance for the recognition, measurement and disclosure of certain obligations resulting from joint and several liability arrangements when the amount of the obligation is fixed at the reporting date. If the obligation is determined to be in the scope of this guidance, it will be measured as the sum of the amount the reporting entity agreed to pay on the basis of its arrangements among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. This guidance also requires additional disclosures for these obligations.

The adoption of this guidance did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

Presentation of Unrecognized Tax Benefits When Net Operating Loss Carryforwards, Similar Tax Losses, or Tax Credit Carryforwards Exist

Effective January 1, 2014, the Company prospectively adopted accounting guidance that requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets.

The adoption of this guidance did not have a significant impact on the Company. The adoption of this standard did not have an impact on the Company's revenues and/or expense or capital.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 134**

**Responding Witness: Valerie L. Scott**

Q-134. Provide a copy of the Company's two most recent management letters and recommendations received from the Company's independent auditors.

A-134. The Company has not received management letters or letters of recommendation from the Company's independent auditors for at least the last twelve years.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 135**

**Responding Witness: Robert M. Conroy**

Q-135. What is the ratemaking treatment for customer deposits proposed by the Company?

- a. Where is such proposal found in the filing?
- b. Provide the monthly level of customer deposits for the period December 2010 thru December 2014.
- c. Provide the monthly interest expense paid by the Company on customer deposits for the same period.

A-135. See the response to part a.

- a. For ratemaking purposes in this proceeding, the Companies followed the Commission's Order in Case No. 98-474 (KU) and Case No. 98-426 (LG&E) in which interest expenses on deposits are not included as a component of revenue requirement and customer deposits are not deducted from rate base or included as a component of capitalization.
- b. See attached.
- c. See attached.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 136**

**Responding Witness: Christopher M. Garrett**

Q-136. Please provide for each year from 2005 through 2014 the gross and net additions to deferred taxes. Please breakdown such additions within each year by sub-account, providing the number and name for each account and sub-account. Provide also the same information projected data for the fully forecasted test period.

- a. For each item by year please reconcile the gross to net additions and explain how that reconciliation was derived.

A-136. See attached for the net additions to Accumulated Deferred Income Taxes for 2005 through 2014 along with the fully forecasted test period. Note that certain subaccounts have changed through the years.

- a. The Company's reconciliations of these accounts are maintained based on net amounts, rather than being detailed by gross additions, deductions, etc.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 137**

**Responding Witness: Christopher M. Garrett**

Q-137. For each distinct tax-timing difference for which the Company has provided deferred taxes, please identify the amount of excess deferred income taxes (i.e. deferred taxes accrued by the Company at federal tax rates higher than the current corporate tax rate, the excess is the difference over the current rate) existing on the Company's books at December 31, 2014 which can be flowed back to ratepayers on an accelerated basis (i.e. such amortization is not prohibited by the normalization requirements of the Internal Revenue Code). Show how these amounts are calculated.

A-137. See attached.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 138**

**Responding Witness: Christopher M. Garrett**

Q-138. Will the amount of investment tax credits utilized be increased if the Company is granted its requested rate increase in these proceedings? If not, why not? If so, provide calculations showing the Company's best estimate as to how much ITC will be utilized.

A-138. No, the amount of investment tax credits will not change as a result of these proceedings. The Company currently has no unutilized ITC and no new ITC is included in these proceedings.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 139**

**Responding Witness: Daniel K. Arbough**

Q-139. List expense amounts for workers compensation insurance and claims for each year 2012, 2013 and 2014. Indicate in which expense accounts these items are recorded.

A-139. See response to Question No. 102 for a summary of workers compensation insurance expense for each year 2012, 2013 and 2014.

See attached for workers compensation claims incurred during 2012, 2013 and 2014.

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 140**

**Responding Witness: Paula H. Pottinger, Ph.D.**

Q-140. Please state whether any amounts have been booked during calendar year 2014, or will be booked during the fully forecasted test period, by the Company for the liability created pursuant to any employment severance compensation agreements.

A-140. Expenses related to severance compensation agreements in the amount of \$27,553.82 were booked during the calendar year 2014. No severance expenses were included in the fully forecasted test period.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 141**

**Responding Witness: Kent W. Blake**

Q-141. List any antitrust expense included in the fully forecasted test period.

A-141. No antitrust expense is included in the fully forecasted test period.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 142**

**Responding Witness: David S. Sinclair**

Q-142. Does the Company's proposed rate increase include any claim for attrition or suppression of sales?

- a. If so, please reference where this is presented.
- b. Provide a complete copy of any and all attrition studies or analyses prepared by or for the Company during the period 2010 through 2014

A-142. No, the Companies' forecast methodology does not include attrition or suppression of sales.

- a. Not applicable.
- b. Not applicable.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 143**

**Responding Witness: Paul W. Thompson**

Q-143. List and describe all maintenance programs and expenses which have been deferred into the fully forecasted test period from prior years 2012, 2013 and 2014, and for each item, explain the Company's reason for such deferral.

A-143. There are no maintenance programs and associated expenses that have been deferred from 2012, 2013, or 2014 to the fully forecasted test period.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 144**

**Responding Witness: David S. Sinclair**

Q-144. Regarding the direct testimony of Mr. Sinclair at page 3, please provide any and all work papers and/or econometric models used to develop number of customers by service type and/or service classification. Work papers should be provided in Excel format with all cells unlocked.

A-144. See response to PSC 2-36.

Dated January 8, 2015**

**Question No. 145**

**Responding Witness: Robert M. Conroy**

Q-145. Please reference Robert M. Conroy's testimony on pages 46-48 concerning the new gas rider for natural gas vehicles (Rider NGV). Please explain in detail how the request for LG&E to supply natural gas to customers for fueling fleet vehicles or for resale at a natural-gas fueling stations complies with KRS 278.508(1)(2)(3).

A-145. The Company's proposed Natural Gas Vehicle Service Rider ("Rider NGV") is designed to (i) enable customers receiving gas from the Company to use or resell such gas as a motor vehicle fuel, and (ii) to assure that the service is provided in a safe and operationally manageable way. KRS 278.508 primarily sets forth the manner of regulation of the sale and transportation of natural gas for use as a motor vehicle fuel.

The Company understands that KRS 278.508(1) provides that sales of natural gas for use as a motor vehicle fuel are not subject to Commission regulation. Under Rider NGV, the Company may sell natural gas under Rate IGS to a customer for its use or resale as a motor vehicle fuel. The Company's decision to make natural gas sales pursuant to a tariff rate has no effect on the Company's compliance with KRS 278.508(1). The Company does not anticipate that it will incur additional incremental costs to make such sales. Since the gas sold under Rider NGV will be separately metered and the Company has in place record keeping methodology that enables it to determine the cost of service to customers in its rate classes, it will comply with that portion of KRS 278.508(1) requiring separate records and books of account for such sales.

Under Rider NGV, the Company may transport natural gas for use as a motor vehicle fuel under Rate FT and, if applicable, Rider TS-2. These will be regulated transactions. The Company has not requested the use of flexible rates. This approach is consistent with KRS 278.508(2).

As set forth in the language of Rider NGV and in Mr. Conroy's testimony, there are safeguards in place to assure the safe delivery of gas under the Rider and to assure that the service is provided in an operationally manageable way. Thus, transactions under Rider NGV will not adversely affect the Company's cost or costs or the availability of natural gas to its utility sales customers, as required by KRS 278.508(3).

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 146**

**Responding Witness: Christopher M. Garrett**

Q-146. Reference company response to PSC 1-21, should the possibility of the Green River site being used in the future for an NGCC be considered in response to this question? If not, why not?

A-146. The land for the Green River combined cycle unit was classified as Account 105-Plant Held for Future Use in November 2014. Development costs associated with the unit at Green River are currently in Account 183-Preliminary Survey and Investigation.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 147**

**Responding Witness: David S. Sinclair**

Q-147. Regarding the direct testimony of Mr. Sinclair at page 3, please provide the econometric models used to develop the residential and commercial customer use per customer with all input data in Excel format. Also, please provide a description of each input variable and what purpose it serves in predicting use per customer.

A-147. See response to PSC 2-36.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 148**

**Responding Witness: David S. Sinclair**

Q-148. Please provide the weather normalized sales by month and by service classification for 2009-2014.

A-148. See attached.

**Louisville Gas & Electric**  
**Weather-Normalized Actual Sales by Revenue Class**  
**For the Period of Jan 2009 - Dec 2014**

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 149**

**Responding Witness: Christopher M. Garrett**

Q-149. Please provide the actual sales by month and by service classification for 2009-2014.

A-149. See attached.

**Louisville Gas & Electric**  
**Monthly Sales by Service Classification**  
**For the Period of Jan 2009 - Dec 2014**

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 150**

**Responding Witness: Kent W. Blake**

Q-150. Please provide for each year 2009 through 2014 and the base and test years, the amount of distribution base pay, overtime, incentive compensation and the amount of other pay broken down in the most detailed format available including the amount charged to capital, charged to expense and charged to other. If any of the other is ultimately expensed, provide the amount ultimately expensed in each year.

A-150. See attached. Actual payroll costs relating to calendar year 2009 are also provided, however the associated budgeted amounts are not included as the detailed labor components were not available until the Company implemented its current budgeting software, PowerPlant, in 2010.

Additionally, certain amounts included in the "Other Balance Sheet" column shown within this attachment relate to charges that will ultimately be expensed. However, due to the system process in which these charges are expensed, the labor portion of the amount is not readily determinable once the process is completed. The charges include, but are not limited to: stores expense undistributed, other regulatory assets, preliminary survey charges and transportation costs.

**Question No. 151**

**Responding Witness: Russel A. Hudson**

Q-151. For each year, 2009 through 2014 and the base and test years, provide a comparison of the amount of payroll that is budgeted versus actually charged to capital and O&M expense

A-151. See the response to Question No. 150.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 152**

**Responding Witness: Paula H. Pottinger, Ph.D.**

Q-152. For each employee group, provide the annual aggregate percentage increase in compensation granted and provide a breakdown of the aggregate percentage increase by type of increase (i.e. merit, promotion, step, etc.) for the years 2009 through 2014 and the base & test periods.

A-152. See attached. The table attached reflects increases by type for the years 2009 through 2014. The percentage increase categories for the base and test periods are expected to be consistent with prior years. Certain of the requested information is confidential and proprietary and is being provided under seal pursuant to a petition for confidential protection.

(1) The percentage increase by type for the base and test periods are expected to be consistent with prior years.

(2) LG&E IBEW negotiations resulted in annual increases of █████ effective 11/9/2015 and 11/7/2016. The remaining █████ offset other negotiated items.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 153**

**Responding Witness: Russel A. Hudson**

Q-153. Provide for each year 2009 through 2014 and the base and test years, the distribution overtime by account. For any account that increased from one year to the next by more than 10% please provide an explanation of the activities that caused the increase.

A-153. See attached. For the variances of 10% or more, a dollar level of \$25,000 is used as the threshold for variance explanations due to materiality.

| 887          | 301,537             | 40.38%        | Increase is due to higher leak call volumes, more leak repairs, gas dispatch vacancies filled with overtime by other employees, and corrosion control locating. Increases in corrosion control locating are driven by the quantity of capital work supported on straight time and the amount of time needed to address corrective work orders. | (654,519)          | -62.43%        |                                                                                                                                                              |

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 154**

**Responding Witness: Paula H. Pottinger, Ph.D.**

Q-154. For the respective base and test years, provide the number of positions included in the request that are not currently filled, a listing of the positions and the associated payroll expense for those vacant positions.

A-154. There are currently 92 net positions to be filled during the base year. There are no net incremental headcount additions during the test year due to the retirement of the Cane Run and Green River steam plants. See attached for listing of positions and associated payroll expense.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 156**

**Responding Witness: D. Ralph Bowling**

Q-156. Regarding the direct testimony of Paul Thompson, for the test period, please provide the number of employees that will be employed at the Cane Run 7 generating station for its day to day operations.

A-156. During the test period, 43 employees will be employed at the Cane Run 7 generating station for its day to day operations.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 157**

**Responding Witness: D. Ralph Bowling**

Q-157. Regarding the direct testimony of Paul Thompson, please explain what the Company anticipates will happen to the work force at the Cane Run generating stations that are scheduled to be retired.

A-157. Of the employees assigned to Cane Run, we expect 43 to remain with Cane Run 7, 25 to accept a severance benefit and retire, and 40 will be placed elsewhere in the generation fleet.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 158**

**Responding Witness: Thomas A. ("Tom") Jessee**

Q-158. Regarding the direct testimony of Paul Thompson – Transmission Workforce, at pages 31, for each month for 2009 through 2014 and the base and test years, please provide the number of employees assigned to the transmission workforce.

A-158. The Companies' workforce includes LKS, LG&E and KU employees. For actuals, LKS employees' labor costs are allocated to LG&E or KU consistent with the Cost Allocation Manual ("CAM"). For purposes of this response, we have included headcount for each Company. See attached.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 162**

**Responding Witness: John J. Spanos**

Q-162. Regarding the direct testimony of John Spanos at page 5, please explain what historical data you reviewed with respect to KU and LG&E's other production plant. Did you mean historical retirement data as provided in the Company's 2001 Depreciation Study that is on file with the Commission?

A-162. As stated on page 5 and 6 of Mr. Spanos' testimony, the historical data reviewed with respect to KU and LG&E's other production plant was the same data as provided in the 2011 Depreciation Study (not 2001 Depreciation Study). This data is on file with the Commission.

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 163**

**Responding Witness: John J. Spanos**

- Q-163. Regarding the direct testimony of John Spanos at page 5, please provide a copy of any notes and/or correspondence Mr. Spanos took or was given when he obtained supplementary information from management and operating personnel concerning practices and plans as they relate to plant operations for the Cane Run Unit 7.
- A-163. The attached documents set forth notes and/or correspondence Mr. Spanos collected when obtaining supplementary information from management and operation personnel concerning practices and plans as they relate to plant operations for Cane Run Unit 7.

John,

In lieu of the more detailed information you requested for No.3 below, the approved amounts for **CR 7 are \$451.6 million KU and \$127.3 million LG&E**. Current spend is \$372.2 KU and \$106.1 LG&E. Please let me know if you need any further information.

**Subject:** RE: Cane Run 7

Eric,

- 1) 691 MW gross is the winter max.
- 2) The planned date is May 1, 2015
- 3) Development of the WBS is ongoing, I hope to complete it around end of Nov 2014.
- 4) It will be dispatched per load demand.
- 5) The facility is designed for 300 starts per year.

Noel

**To:** Lively, Noel; Mooney, Mike (BOC 3)  
**Cc:** Wiseman, Sara  
**Subject:** Cane Run 7  
**Importance:** High

Noel, Mike,

The following information has been requested by our Depreciation Consultant in order to determine depreciation rates to be used for Cane Run 7. If these questions cannot be answered by you, if you would

forward it to whomever is the right person and copy me, I would greatly appreciate it. We would like to get a response by COB Monday if at all possible. As usual, please note that the responses provided will be subject to data requests for how the answers were determined.

Item 3 would seem to be the most difficult one, but I would hope that we could use the estimate provided as of June 2014 and allocate the estimated total cost over these numbers. If that seems reasonable, then we would just need to know the estimated total cost of the projects for the two companies for the Cane Run 7 projects.

Thanks,  
Eric Riggs

**Questions from John Spanos regarding Cane Run Unit 7:**

- 1) MW
- 2) Actual date going into service
- 3) Cost breakdown by account (estimated if available)
- 4) Whether the facility will be base load, load demand driven or peaker
- 5) Anticipated starts per year

There may be additional items needed but this is the primary information needed.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 164**

**Responding Witness: John J. Spanos**

Q-164. Regarding the direct testimony of John Spanos at page 8, please provide the objective information that Mr. Spanos used to form the basis for the probable retirement year for Cane Run Unit 7.

A-164. The key objective information used to form the basis for the probable retirement year for Cane Run Unit 7 was the estimates of other similar facilities across the United States. This information has been provided in response to Questions No. 115 and 163.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 165**

**Responding Witness: John J. Spanos**

- Q-165. Regarding the direct testimony of John Spanos at page 8, please provide the outlook from Company management that was provided to Mr. Spanos that he then used to form the basis for the probable retirement year for Cane Run Unit 7. Also, please provide any material that the Company management gave to Mr. Spanos in this regard.
- A-165. The outlook provided by Company management was provided to Mr. Spanos during a phone conversation at the beginning of his analyses. The material described the type of facility being constructed and the anticipated life expectancy of 40 years.

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 166**

**Responding Witness: John J. Spanos**

Q-166. Regarding the direct testimony of John Spanos at page 8, please provide all material that Mr. Spanos reviewed with respect to the age, use, size, nature of construction, and typical life spans experienced and used by other electric utilities for similar facilities that Mr. Spanos used to form the basis for the probable retirement year for Cane Run Unit 7.

A-166. Please see the document provided in response to Question No. 115. All of these facilities are less than 10 years old.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 167**

**Responding Witness: John J. Spanos**

Q-167. Regarding the direct testimony of John Spanos at page 9, please explain what historical net salvage data you reviewed with respect to KU and LG&E's. Did you mean historical retirement data as provided in the Company's 2001 Depreciation Study that is on file with the Commission?

A-167. As stated on page 9 of Mr. Spanos' testimony, the historical net salvage data reviewed in this analysis was the same data as provided in the 2011 Depreciation Study. This data assisted in understanding company practices for recording net salvage for other assets in the Other Production Accounts. Yes, this is the same data as provided in the company's 2011 Depreciation Study (not 2001 Depreciation Study) which is on file with the Commission.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 169**

**Responding Witness: Kent W. Blake**

Q-169. Please provide the revenue requirement impact of a 50-basis-point change in return on equity. Explain how the response was calculated.

A-169. Electric: + (-) \$9,104,564

The response was calculated by inputting a 50-basis-point change in the return on equity cost rate (Column I) on Schedule J-1.1/J-1.2, Page 1 of 4. The resulting 13-Month Average Weighted Cost (Column J) is input on Schedule A (Electric), Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

Gas: + (-) \$2,222,746

The response was calculated by inputting a 50-basis-point change in the return on equity cost rate (Column I) on Schedule J-1.1/J-1.2, Page 2 of 4. The resulting 13-Month Average Weighted Cost (Column J) is input on Schedule A (Gas), Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 170**

**Responding Witness: Kent W. Blake**

Q-170. Please provide the revenue requirement impact of a 100-basis-point change in return on equity. Explain how the response was calculated.

A-170. Electric: + (-) \$18,209,128

The response was calculated by inputting a 100-basis-point change in the return on equity cost rate (Column I) on Schedule J-1.1/J-1.2, Page 1 of 4. The resulting 13-Month Average Weighted Cost (Column J) is input on Schedule A (Electric), Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

Gas: + (-) \$4,445,493

The response was calculated by inputting a 100-basis-point change in the return on equity cost rate (Column I) on Schedule J-1.1/J-1.2, Page 2 of 4. The resulting 13-Month Average Weighted Cost (Column J) is input on Schedule A (Gas), Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 171**

**Responding Witness: Kent W. Blake**

Q-171. Please provide the revenue requirement impact of a 200-basis-point change in return on equity. Explain how the response was calculated.

A-171. Electric: + (-) \$36,418,256

The response was calculated by inputting a 200-basis-point change in the return on equity cost rate (Column I) on Schedule J-1.1/J-1.2, Page 1 of 4. The resulting 13-Month Average Weighted Cost (Column J) is input on Schedule A (Electric), Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

Gas: + (-) \$8,890,986

The response was calculated by inputting a 200-basis-point change in the return on equity cost rate (Column I) on Schedule J-1.1/J-1.2, Page 2 of 4. The resulting 13-Month Average Weighted Cost (Column J) is input on Schedule A (Gas), Required Rate of Return (Line No. 4) for the Forecasted Period. The resulting Revenue Deficiency (Line No. 8) is subtracted from the filed Revenue Increase Requested (Line No. 9) to obtain the revenue requirement impact.

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 172**

**Responding Witness: Valerie L. Scott / Counsel**

Q-172. Board of Directors Meeting Minutes. Please provide copies of the Board of Directors Meeting Minutes for the years 2009 through 2012 and 2013 year-to-date.

A-172. The Company objected to this request on January 19, 2015. Without waiver of that objection, the Company provided the 2009 minutes in Case No. 2009-00549 in its response to the AG 1-15, dated March 15, 2010, which the Company hereby incorporates by reference. The Company provided the minutes for 2010, 2011, and 2012 through June 28, 2012, in Case No. 2012-00222 in its response to the AG 1-108, dated July 31, 2012, which the Company hereby incorporates by reference. See attached for the minutes for the remainder of 2012, 2013, and 2014. No Board of Director meetings have been held to-date in 2015.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 175**

**Responding Witness: Paula H. Pottinger, Ph.D.**

Q-175. Regarding the direct testimony of Blake, Health Care Costs:

- a. Please identify any and all measures the Company has undertaken within the past three years, including the test year, to minimize its employee benefit health care costs.
- b. State the annualized cost savings associated with each measure, and show how the Company estimated such amount.
- c. Has the Company increased the co-payment provisions borne by employees? If not, why not?
- d. Describe any and all incentives the Company has built into its employee health care benefit package to encourage cost economies.

A-175.

- a. See response to Question No. 95.
- b. See response to Question No. 96.
- c. See response to Question No. 97.
- d. See response to Question No. 98.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 176**

**Responding Witness: Russel A. Hudson**

Q-176. Please provide the first year non-fuel operations and maintenance expenses for Cane Run Unit 7.

A-176. Total first year (May 2015 through April 2016) non- fuel operations and maintenance expenses to operate Cane Run Unit 7 is \$17,238,119. Based on the joint ownership agreement, 22% of the total cost or \$3,792,386 is allocated to LG&E.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 177**

**Responding Witness: Russel A. Hudson**

Q-177. Please provide the test year non-fuel operations and maintenance expenses for the existing Cane Run Units 4, 5 and 6.

A-177. The forecasted test year includes \$1,447,591 related to continuing environmental costs, security and site maintenance related to the Cane Run units 4, 5 and 6.

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 178**

**Responding Witness: Russel A. Hudson**

Q-178. Please provide the gross plant in service and depreciation reserves by month for the test period for the Cane Run Units 4, 5 and 6.

A-178. See attached. Per Title 18, Subchapter C – Accounts, Federal Power Act, Part 101 – Uniform System of Accounts prescribed for Public Utilities, account 108, accumulated provision for depreciation of utility plant shall be regarded and treated as a single composite provision for depreciation, but shall be segregated by functional classification. Further detail by plant account is not required, but is calculated for ease of reporting. The accumulated reserves for Cane Run Units 4, 5 and 6 in the attachment are an allocation of the steam plant reserve. The book reserve is allocated to the location level based on the life and salvage parameters as well as the age of the surviving plant balance. However, the development of the annual and monthly expense is based on the composite rate for the account.

| As of      | Cane Run Unit 4  |                      | Cane Run Unit 5  |                      | Cane Run Unit 6  |                      |
|------------|------------------|----------------------|------------------|----------------------|------------------|----------------------|

**LOUISVILLE GAS AND ELECTRIC COMPANY**

**CASE NO. 2014-00372**

**Response to Attorney General's Initial Request for Information  
Dated January 8, 2015**

**Question No. 179**

**Responding Witness: Christopher M. Garrett**

Q-179. Regarding the direct testimony of Blake and Conroy, Schedule B, in the same format and detail (i.e, monthly) as shown on Tab FCPIS B, please provide a schedules showing the actual "Electric Utility Activity" for calendar years 2009-2014. Please update this response during the course of the proceeding as data becomes available.

A-179. See attached. The information is not readily available for years 2009-2013; therefore, the Company is providing its annual plant reports in response to this request.
