Grid 20/20: Focus on Resilience

Nov.
11 - 12

SHERATON
SOCIETY HILL

PHILADELPHIA, PA

Overview

The resilience of the electric power grid--particularly in light of extreme weather challenges, cyber security and shifting industry trends--is the focus of a forum PJM is facilitating this fall through its Grid 20/20 forum series. Providing a safe, reliable grid requires 20/20 vision to meet the needs and expectations of electricity consumers. For this reason, the "Grid 20/20: Focus on Resilience," intends to raise awareness and create opportunities for broader dialogue and knowledge sharing in planning and responding to disruptive events. Industry leaders, experts and members are invited to attend and participate. There is no registration fee for this event.

Featured Topics

- **Robustness** - Ability to absorb shocks and keep operating during a Physical or Cyber Security event
- **Resourcefulness** - Ability to manage a disruption as it unfolds and Communication best practices
- **Resilience** - Ability to absorb new lessons and get back to normal and the role of Policy and Investment
