

## Kevin Stogran

Director of IT Risk  
Service – Information  
Technology  
American Electric Power  
Service Corporation

Kevin Stogran is the director of IT Risk Services within the Information Technology organization of American Electric Power Service Corporation. He is a mechanical engineer by education but has had numerous roles throughout his 34-year career at AEP. In his current role, he is responsible for leading AEP's IT Risk and Compliance Management team which has responsibility for all aspects of enterprise cybersecurity, including cyber risk management, real-time operations, assessments, monitor and response, cybersecurity engineering, policy and standards, business continuity and IT compliance. His team has also developed and facilitates AEP's CSOC (Cyber Security Operations Center) which is a multi-utility threat and information-sharing program. His prior assignments at AEP included leading the generation dispatch system support teams and the production coordination functions within AEP's Commercial Operations organization and initially at AEP as a steam generator engineer within the power plant engineering organization.
