

ATTACHMENT 6
Variations
Special Waste Landfill Permit
Big Sandy Plant – Ash Pond Closure
Lawrence County, Kentucky

The following variations from the requirements outlined in the Division of Waste Management Application for a Special Waste Landfill Permit (DEP 7094A) are requested:

- Maximum Plan Sheet size for all attachments is 30" x 46" instead of 24" x 36" ,as required in Item 2 in the administrative instructions for engineering drawings. This variance is requested to provide continuity between permit drawings and current Kentucky Power Company (KPCo) standards.
- **Attachment 20** – Surface water and ground water monitoring point locations are presented in Attachments 23 and 44, respectively.
- **Attachments 49 & 50** – 401 KAR 45:50 *Public Information Procedures* – Although technically a new permit, the facility is currently permitted to operate under KPDES permit. The proposed permit is for the closure of the facility. No new facilities are being proposed; no horizontal expansions; no landfarming or composting is being proposed; no research, development, and demonstrations; no transfer of ownership, and; no new wastes are currently being proposed by KPCo and AEP.

These requested variations outlined above are necessary due to the extent of the project and property boundaries and for the purposes of clarity.
