General taxes. General taxes expense, which includes taxes for property, payroll, gross receipts, and other miscellaneous items, increased by $10.7 million, or 5.1%, for the year ended December 31, 2012 compared to the year ended December 31, 2011. This increase was principally due to higher property taxes of $7.3 million, most of which is the result of incremental taxes associated with our New York acquisition.

Other income (expenses). Other expenses decreased $5.7 million, or 1.9%, for the year ended December 31, 2012 compared to the same period in the prior year. This decrease is attributable to an increase in AFUDC of $4.3 million resulting from increased construction activity, including our business transformation project and a decrease in interest expense, net of interest income of $1.6 million.

Provision for income taxes. Our consolidated provision for income taxes increased $58.3 million, or 29.3%, to $257.0 million for the year ended December 31, 2012. The effective tax rates for the years ended December 31, 2012 and 2011 were 40.7% and 39.5%, respectively. The rate for the twelve months ended December 31, 2011 includes a $4.5 million tax benefit related to one of our operating companies contributing non-utility property to a county authority within its operating area.

Income (loss) from discontinued operations, net of tax. As noted above, the financial results of our regulated water and wastewater systems in Arizona, New Mexico, Texas and Ohio and our Applied Water Management, Inc. subsidiary within the Market-Based Operations segment have been classified as discontinued operations for all periods presented. The loss in 2012 is primarily comprised of net losses recorded in connection with the disposition of our Arizona, New Mexico and Ohio subsidiaries. The 2011 income amount reflects the operations for the discontinued subsidiaries and an after-tax benefit of $15.1 million related to the cessation of depreciation for our Arizona, New Mexico, and Texas subsidiaries. Under GAAP, operations that are considered discontinued cease to depreciate their assets. Partially offsetting the 2011 income from discontinued operations, net of tax amount was $25.1 million after tax write-downs recorded in 2011 to reduce the net asset values of certain of our discontinued operations.

Segment Results of Operations

We have two operating segments, which are also our reportable segments: the Regulated Businesses and the Market-Based Operations. These segments are determined based on how we assess performance and allocate resources. We evaluate the performance of our segments and allocated resources based on several factors, with the primary measure being income from continuing operations before income taxes.

Regulated Businesses Segment

The following table summarizes certain financial information for our Regulated Businesses for the periods indicated:

	For the Years Ended December 31,		
	2013	2012	2011
		(in thousands)	
Operating revenues	$ 2,593,918	$ 2,564,434	$ 2,368,891
Operation and maintenance expense	1,105,444	1,129,986	1,092,611
Operating expenses, net	1,700,052	1,685,734	1,609,276
Income from continuing operations before income taxes	654,834	649,117	535,445

Operating Revenues. Our primary business involves the ownership of water and wastewater utilities that provide services to residential, commercial, industrial and other customers. This business is subject to state regulation and our results of operations can be impacted significantly by rates authorized by the state regulatory commissions in the states in which we operate. The table below details additional annualized revenues awarded, including step increases and assuming a constant volume, resulting from rate authorizations granted in 2013, 2012 and 2011:

	Years Ended December 31,		
	2013	2012	2011
		(in millions)	
State			
General Rate Cases:			
Pennsylvania (1)	$ 26.0	$ —	$ 62.1
New Jersey	—	30.0	—
Kentucky (2)	6.9	—	—
Missouri	—	24.0	—
Illinois	—	17.9	—
Indiana	—	1.9	—
California (3)	3.5	32.9	—
West Virginia (4)	8.5		5.1
Virginia(5)	—	2.6	4.8
Tennessee	—	5.2	5.6
Iowa	—	2.8	—
New York(6)	—	5.6	—
Other	0.1	0.2	1.2
Total—General Rate Cases	$ 45.0	$ 123.1	$ 78.8

---

(1) On December 19, 2013, a rate case settlement was approved with an effective date of January 1, 2014. This rate increase combined, in part, wastewater and water rates.

(2) Final order was received on October 25, 2013. The increase approximated the interim rates, net of the reserve that had been recorded since July 27, 2013.

(3) Second step increase from the 2012 rate case became effective on April 1, 2013.

(4) Final order issued on September 26, 2013 by the West Virginia Public Service Commission. New rates were put into effect October 11, 2013.

(5) The new rates provided additional annualized revenue of $2.3 million in 2012 and $4.3 million in 2011 for jurisdictional customers, and $0.3 million in 2013 and $0.5 million in 2011 for non-jurisdictional customers, which are not subject to commission approval.

(6) Amount includes a $3.0 million increase effective April 1, 2012, with the remainder of $1.4 million and $1.2 million becoming effective April 1, 2013 and April 1, 2014, respectively.

The effective dates for the more significant increases granted in 2012 were January 1, 2012, April 1, 2012, May 1, 2012 and October 1, 2012 for our California, Missouri, New Jersey, and Illinois subsidiaries, respectively. The effective date for the 2011 Pennsylvania rate increase was November 11, 2011. The 2011 increase in Virginia was effective in March 2011 while the Tennessee and West Virginia increases were effective in April 2011.

As previously noted, an increasing number of states are permitting rates to be adjusted outside of a general rate case for certain costs, such as mechanisms that permit a return on capital investments to replace aging infrastructure. The following table details additional annualized revenue authorized through infrastructure surcharge mechanisms which were granted in 2013, 2012 and 2011. As these surcharges are typically rolled into the new base rates and therefore are reset to zero when new base rates are effective, certain of these charges may also be reflected in the total general rate case amounts awarded in the table above if the order date was following the infrastructure surcharge filing date:

	Years Ended December 31,		
	2013	2012	2011
		(in millions)	
Infrastructure Charges:			
Pennsylvania (1)	$ 19.8	$ 10.5	$ 16.4
New Jersey (2)	4.0	—	—
Missouri (3)	7.9	4.2	5.8
Indiana (4)	3.9	3.7	—
Illinois (5)	0.5	—	3.7
Other	—	—	0.3
Total—Infrastructure Charges	$ 36.1	$ 18.4	$ 26.2

---

(1) Quarterly filings made with PUC. $6.7 million, $3.7 million, $2.9 million and $6.5 million effective October 1, 2013, July 1, 2013, April 1, 2013 and January 1, 2013, respectively.
(2) Effective July 1, 2013.
(3) $5.4 million effective June 21, 2013 and $2.5 million effective December 14, 2013.
(4) Effective December 18, 2013.
(5) Effective October 1, 2013.

Comparison of Results of Operations for the Years Ended December 31, 2013 and 2012

Operating revenues increased by $29.5 million, or 1.1%, for the year ended December 31, 2013 compared to the same period in 2012. The increase in revenues was primarily due to rate increases obtained through rate authorizations for a number of our operating companies of which the impact was approximately $72.4 million. Additionally revenues increased by $16.4 million due to increased surcharge and amortization of balancing accounts. Lastly, revenues were higher by $9.9 million as a result of acquisitions, with the most significant being the result of our New York acquisition in the second quarter of 2012 (additional four months of revenue in 2013 compared to 2012) and the acquisition of Dale by our Virginia subsidiary in the fourth quarter of 2013. These increases were partially offset by decreased revenues of approximately $64.5 million as a result of lower demand, principally driven by the hot and dry weather conditions in the central and northeast portions of the country in 2012 versus cooler and wetter weather conditions in 2013.

The following table sets forth the amounts and percentages of Regulated Businesses' revenues and billed water sales volume by customer class:

	For the Years Ended December 31,							
	2013	2012	Increase (Decrease)	Percentage	2013	2012	Increase (Decrease)	Percentage
	Operating Revenues (dollars in thousands)				Billed Water Sales Volume (gallons in millions)			
Customer Class								
Water service								
Residential	$ 1,465,174	$ 1,465,803	$ (629)	(0.0%)	180,976	188,927	(7,951)	(4.2%)
Commercial	520,875	518,253	2,622	0.5%	80,392	84,226	(3,834)	(4.6%)
Industrial	118,939	121,902	(2,963)	(2.4%)	37,107	39,429	(2,322)	(5.9%)
Public and other	211,591	212,289	(698)	(0.3%)	51,009	54,202	(3,193)	(5.9%)
Other water revenues	118,323	120,988	(2,665)	(2.2%)	—	—	—	—
Billed water services	2,434,902	2,439,235	(4,333)	(0.2%)	349,484	366,784	(17,300)	(4.7%)
Unbilled water services	30,142	4,484	25,658	572.2%				
Total water revenues	2,465,044	2,443,719	21,325	0.9%				
Wastewater revenues	82,831	78,168	4,663	6.0%				
Other revenues	46,043	42,547	3,496	8.2%				
	$ 2,593,918	$ 2,564,434	$ 29,484	1.1%				

Water Services— Consistent with the above discussion, water service operating revenues for the year ended December 31, 2013 totaled $2,465.0 million, a $21.3 million increase, or 0.9%, over the same period of 2012. However, the mix between billed revenues/billed volumes to unbilled revenues/unbilled volumes have changed significantly principally as a result of our CIS implementation. Unbilled revenue has increased $25.7 million compared to the same period in the prior year mainly as a result of delayed invoicing to customers. With the implementation, we made a decision to increase the level of scrutiny and verification around bills being generated by the new system, in particular larger and/or more complex bills. As such bills that exceed certain tolerance levels are being held until verification can be performed. As such, the timing of issuance of bills has caused a decrease in billed volumes in 2013 when compared to 2012, with a corresponding increase in unbilled usage. For our residential and commercial customers, we believe that the majority of the decline in billed volumes is attributable to the weather abnormalities between 2012 and 2013 as well as the implementation of our new CIS system by our regulated subsidiaries. For the remaining customer classes, we believe the decline in billed volumes is mainly due to the delay in invoicing the customer as a result of our CIS implementation.

Wastewater services— Our subsidiaries provide wastewater services in 10 states. Revenues from these services increased by $4.7 million, or 6.0%, to $82.8 million for the year ended December 31, 2013, from the same period of 2012. The increase was primarily attributable to rate increases in our Pennsylvania subsidiary as well as the Dale acquisition in November, 2013.

Other revenues—Other revenues, which includes such items as reconnection charges, initial application service fees, certain rental revenues, revenue collection services for others and similar items, increased $3.5 million, or 8.2%, compared to the year ended December 31, 2012. The increase in revenues for the year ended December 31, 2013 as compared to the same period in the prior year was mainly due to the additional surcharge revenues offset by decreases in revenues related to billings for others, reconnection and late fees.

Operation and maintenance. Operation and maintenance expense decreased $24.5 million, or 2.2%, for the year ended December 31, 2013, compared to the year ended December 31, 2012. Operation and maintenance expense for 2013 and 2012, by major expense category, were as follows:

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 271,181	$ 274,775	$ (3,594)	(1.3%)
Employee-related costs	455,690	472,075	(16,385)	(3.5%)
Operating supplies and services	215,702	210,947	4,755	2.3%
Maintenance materials and supplies	65,853	81,062	(15,209)	(18.8%)
Customer billing and accounting	52,625	49,257	3,368	6.8%
Other	44,393	41,870	2,523	6.0%
Total	$ 1,105,444	$ 1,129,986	$ (24,542)	(2.2%)

Production costs including fuel and power, purchased water, chemicals and waste disposal costs decreased by $3.6 million, or 1.3%, for 2013 compared to 2012. Production costs by major expense type were as follows:

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Purchased water	$ 111,119	$ 110,173	$ 946	0.9%
Fuel and power	86,337	89,282	(2,945)	(3.3%)
Chemicals	47,901	49,334	(1,433)	(2.9%)
Waste disposal	25,824	25,986	(162)	(0.6%)
Total	$ 271,181	$ 274,775	$ (3,594)	(1.3%)

Overall, production costs decreased for the year ended December 31, 2013 compared to the prior year as a result of reduction in chemical and fuel and power costs resulting from decreased usage mainly attributable to lower consumption in most of our states.

Employee-related costs including salaries and wages, group insurance, and pension expense decreased $16.4 million, or 3.5%, for 2013 compared to 2012. These employee-related costs represented 41.2% and 41.8% of operation and maintenance expenses for 2013 and 2012, respectively, and include the categories shown in the following table:

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Salaries and wages	$ 323,022	$ 326,370	$ (3,348)	(1.0%)
Pensions	48,374	56,299	(7,925)	(14.1%)
Group insurance	65,872	71,103	(5,231)	(7.4%)
Other benefits	18,422	18,303	119	0.7%
Total	$ 455,690	$ 472,075	$ (16,385)	(3.5%)

The overall decrease in employee-related costs was primarily attributable to decreased salaries and wages, group insurance and pension expense. The decrease in salaries and wages was mainly the result of lower employee incentive and stock compensation expense of approximately $5.9 million in addition to higher capitalization rates, due to increased capital investment, and a reduction in headcount partially offset by increased overtime and annual wage increases. The decrease in pension expense was primarily due to decreased contributions in certain of our regulated operating companies whose costs are recovered based on our funding policy, which is to fund at least the greater of the minimum amount required by the Employee Retirement Income Security Act of 1974 or the normal cost. The reduction in group insurance expense is mainly attributable to higher capitalization rates and reduced headcount.

Operating supplies and services include expenses for office operation, legal and other professional services, including transportation expenses, information systems rental charges and other office equipment rental charges. Overall, these costs increased $ 4.8 million, or 2.3%, for the year ended December 31, 2013 compared to the same period in 2012.

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Contracted services	$ 93,744	$ 87,675	$ 6,069	6.9%
Office supplies and services	45,272	49,354	(4,082)	(8.3%)
Transportation	20,620	22,917	(2,297)	(10.0%)
Rents	15,830	16,943	(1,113)	(6.6%)
Other	40,236	34,058	6,178	18.1%
Total	$ 215,702	$ 210,947	$ 4,755	2.3%

The overall increase in operating supplies and services was primarily due to increased contracted services and higher other operating supplies and services. These increases were mainly due to incremental costs attributable to the continued maturity of our Enterprise Resource Planning system in conjunction with the implementation of Phase I and Phase II of our business transformation project. Additionally, contracted services increased due to the use of contractors for other specific projects. Other increases in the other operating supplies and services costs are related to a $1.3 million increase in condemnation costs and a $1.2 million increase in conservation expense as well as the inclusion in 2012 of a $1.0 million reduction in anticipated insurance recovery of expenses incurred as a result of Hurricane Sandy and a $2.1 million credit adjustment resulting from the finalization of rate decisions in California and are offset by $1.6 million of insurance proceeds related to recovery of expenses related to Hurricanes Irene and Sandy received in 2013. The decrease in office supplies and services due to cost containment efforts primarily related to employee travel. Transportation costs decreased due to the reduction of leased vehicles.

Maintenance materials and services, which includes emergency repair as well as costs for preventive maintenance, decreased $15.2 million, or 18.8%, for 2013 compared to 2012.

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Maintenance services and supplies	$ 65,853	$ 81,062	$ (15,209)	(18.8%)

The decrease of $15.2 million in 2013 is mainly attributable to 2012 including increased preventive maintenance expenses throughout our regulated subsidiaries, including hydrant and tank painting, meter testing, pump, tank and well maintenance, and paving costs.

Customer billing and accounting expenses increased by $3.4 million, or 6.8%, for 2013 compared to 2012.

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Uncollectible accounts expense	$ 26,443	$ 22,541	$ 3,902	17.3 %
Postage	12,757	12,694	63	0.5 %
Other	13,425	14,022	(597)	(4.3 %)
Total	$ 52,625	$ 49,257	$ 3,368	6.8 %

The increase in the uncollectible accounts expense was primarily due to an increase in our Regulated Businesses' customer accounts receivable attributable to rate increases and an increase in the overall aging of receivables due to our CIS implementation.

Other operation and maintenance expenses include casualty and liability insurance premiums and regulatory costs. These costs increased by $2.5 million, or 6.0%, for 2013 compared to 2012.

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Insurance	$ 35,406	$ 31,883	$ 3,523	11.0%
Regulatory expenses	8,987	9,987	(1,000)	(10.0%)
Total	$ 44,393	$ 41,870	$ 2,523	6.0%

Insurance costs in 2013 were higher, compared to 2012, primarily due to higher casualty insurance costs as a result of historical claims experience and retroactive adjustments.

Operating expenses. The increase in operating expenses for the year ended December 31, 2013 is primarily due to the higher O&M expenses as explained above, as well as higher depreciation and amortization expense of $26.3 million and higher general tax expense of $12.4 million. The increase in depreciation and amortization is primarily due to additional utility plant placed in service, including $10.8 million of incremental expense resulting from the assets placed in service for our business transformation project. The increase in general tax expense is primarily due to higher property taxes in our New York subsidiary due to a full year of expense in 2013 on properties acquired in the second quarter of 2012 of $5.2 million, the inclusion of property tax adjustments that reduced expense for our Indiana and Missouri subsidiaries by $4.0 million in 2012, and higher 2013 gross receipts taxes in our New Jersey subsidiary of $3.5 million.

Comparison of Results of Operations for the Years Ended December 31, 2012 and 2011

Operating revenues increased by $195.5 million, or 8.3%, for the year ended December 31, 2012 compared to the same period in 2011. The increase in revenues was primarily due to rate increases obtained through rate authorizations for a number of our operating companies of which the impact was approximately $128.7 million, and higher consumption in our mid-west and certain northeastern states in 2012 compared to 2011, which amounted to an increase of approximately $39.1 million. The increased consumption is primarily attributable to the warmer/drier weather in our mid-western and certain of our northeastern states in the second and third quarters of 2012. Lastly, revenues were higher by $26.7 million as a result of revenues from newly acquired systems, with the most significant being our New York acquisition in the second quarter of 2012.

The following table sets forth the amounts and percentages of Regulated Businesses' revenues and billed water sales volume by customer class:

	For the Years Ended December 31,							
	2012	2011	Increase (Decrease)	Percentage	2012	2011	Increase (Decrease)	Percentage
	Operating Revenues (dollars in thousands)				Billed Water Sales Volume (gallons in millions)			
Customer Class								
Water service								
Residential	$ 1,465,803	$ 1,338,671	$ 127,132	9.5%	188,927	180,916	8,011	4.4%
Commercial	518,253	473,904	44,349	9.4%	84,226	81,455	2,771	3.4%
Industrial	121,902	114,096	7,806	6.8%	39,429	39,295	134	0.3%
Public and other	212,289	206,290	5,999	2.9%	54,202	52,069	2,133	4.1%
Other water revenues	120,988	117,598	3,390	2.9%	—	—	—	—

Billed water services	2,439,235	2,250,559	188,676	8.4%	366,784	353,735	13,049	3.7%
Unbilled water services	4,484	2,030	2,454	120.9%				
Total water revenues	2,443,719	2,252,589	191,130	8.5%				
Wastewater revenues	78,168	76,301	1,867	2.4%				
Other revenues	42,547	40,001	2,546	6.4%				
	$ 2,564,434	$ 2,368,891	$ 195,543	8.3%				

The following discussion related to water services indicates the increase or decrease in the Regulated Businesses' revenues and associated billed water sales volumes in gallons by customer class.

Water Services—Water service operating revenues for the year ended December 31, 2012 totaled $ 2,443.7 million, a $191.1 million increase, or 8.5%, over the same period of 2011. Overall, the water services revenue increase is related to increases in all customer classes and is mainly due to rate increases as well as increased sales volume. The volume of water sold increased by 3.7% for the year ended December 31, 2012 to 366.8 billion gallons, from 353.7 billion gallons for the same period in 2011. We believe this higher consumption is attributable to the warmer/drier weather in our northeastern and mid-western operating states as compared to the prior year. Also contributing to the increased sales volume was the additional consumption resulting from our New York acquisition.

Wastewater services—Our subsidiaries provide wastewater services in nine states. Revenues from these services increased by $1.9 million, or 2.4%, to $78.2 million for the year ended December 31, 2012, from the same period of 2011. The increase was primarily attributable to rate increases in a number of our operating companies.

Other revenues—Other revenues include such items as reconnection charges, initial application service fees, certain rental revenues, revenue collection services for others and similar items. The increase in revenues for the year ended December 31, 2012 a s compared to the same period in the prior year was mainly due to the receipt of insurance proceeds related to business interruption for our Joplin, Missouri service area which was affected by tornados in 2011.

Operation and maintenance. Operation and maintenance expense increased $37.4 million, or 3.4%, for the year ended December 31, 2012, compared to the year ended December 31, 2011. Operation and maintenance expense for 2012 and 2011, by major expense category, were as follows:

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 274,775	$ 262,563	$ 12,212	4.7%
Employee-related costs	472,075	489,836	(17,761)	(3.6%)
Operating supplies and services	210,947	187,215	23,732	12.7%
Maintenance materials and supplies	81,062	73,109	7,953	10.9%
Customer billing and accounting	49,257	42,722	6,535	15.3%
Other	41,870	37,166	4,704	12.7%
Total	$ 1,129,986	$ 1,092,611	$ 37,375	3.4%

Production costs including fuel and power, purchased water, chemicals and waste disposal costs increased by $12.2 million, or 4.7%, for 2012 compared to 2011. Production costs by major expense type were as follows:

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Purchased water	$ 110,173	$ 99,008	$ 11,165	11.3%
Fuel and power	89,282	87,879	1,403	1.6%
Chemicals	49,334	48,354	980	2.0%
Waste disposal	25,986	27,322	(1,336)	(4.9%)
Total	$ 274,775	$ 262,563	$ 12,212	4.7%

Overall, production costs increased for the year ended December 31, 2012 compared to the prior year mainly as a result of increased purchased water costs, attributable to increased production resulting from higher consumption in most of our subsidiaries, with more significant increases occurring in our California and Illinois subsidiaries. For 2011, our California subsidiary's customer needs were met without the need for purchased water.

Employee-related costs including salaries and wages, group insurance, and pension expense decreased $17.8 million, or 3.6%, for 2012 compared to 2011. These employee-related costs represented 41.8% and 44.8% of operation and maintenance expenses for 2012 and 2011, respectively, and include the categories shown in the following table:

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Salaries and wages	$ 326,370	$ 327,777	$ (1,407)	(0.4%)
Pensions	56,299	68,885	(12,586)	(18.3%)
Group insurance	71,103	75,120	(4,017)	(5.3%)
Other benefits	18,303	18,054	249	1.4%
Total	$ 472,075	$ 489,836	$ (17,761)	(3.6%)

The overall decrease in employee-related costs was primarily attributable to decreased salaries and wages, group insurance and pension expense. The decrease in salaries and wages was primarily due to higher capitalization rates due to increased capital investment and a reduction in headcount as a result of organizational streamlining and vacancies, some of which have been back-filled with temporary labor and therefore included within contracted services in the operating supplies and services category below. Partially offsetting the decrease was higher costs resulting from wage increases, higher stock-based compensation expense as well as increased costs due to the addition of employees from our New York acquisition. The reduction in group insurance expense is mainly attributable to lower headcount as a result of vacancies, a decrease in the overall cost per person, as well as higher capitalization rates. The decrease in pension expense was primarily due to decreased contributions in certain of our regulated operating companies whose costs are recovered based on our funding policy, which is to fund at least the greater of the minimum amount required by the Employee Retirement Income Security Act of 1974 or the normal cost.

Operating supplies and services include expenses for office operation, legal and other professional services, including transportation expenses, information systems rental charges and other office equipment rental charges. Overall, these costs increased $23.7 million, or 12.7%, for the year ended December 31, 2012 compared to the same period in 2011.

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Contracted services	$ 87,675	$ 72,851	$ 14,824	20.3%
Office supplies and services	49,354	46,783	2,571	5.5%
Transportation	22,917	24,915	(1,998)	(8.0%)
Rents	16,943	15,619	1,324	8.5%
Other	34,058	27,047	7,011	25.9%
Total	$ 210,947	$ 187,215	$ 23,732	12.7%

The overall increase in operating supplies and services was primarily due to increased contracted services and higher other operating supplies and services. The contracted services increase was mainly due to incremental costs associated with the backfilling of positions, including those vacated by employees who are assigned to our business transformation project; the use of contractors for other specific projects, the intent of which is to improve processes and operating efficiency and effectiveness over the long-term; and lastly additional costs resulting from the roll-out and stabilization of our ERP in the third quarter of 2012. The increase in the other operating supplies and services costs is primarily related to the roll-out and stabilization of the ERP in addition to incremental expenses associated with our New York acquisition of $1.1 million, and an increase of $1.5 million for community relations and customer education in order to communicate the importance of water conservation. Additionally, 2011 included a reduction of $2.2 million for an anticipated insurance recovery of expenses incurred as a result of severe weather storms, in particular Hurricane Irene, which is partially offset by a reduction recorded in 2012 of $1.0 million in anticipated insurance recovery of expenses incurred as a result of Hurricane Sandy. Partially offsetting the increase in other operating supplies and services was a $2.1 million credit adjustment recorded in 2012 resulting from the finalization of rate decisions in California.

Maintenance materials and services, which includes emergency repair as well as costs for preventive maintenance, increased $8.0 million, or 10.9%, for 2012 compared to 2011.

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Maintenance services and supplies	$ 81,062	$ 73,109	$ 7,953	10.9%

The increase of $8.0 million in 2012 is mainly attributable to increased preventive maintenance expenses throughout our regulated subsidiaries, including hydrant and tank painting, meter testing, pump, tank and well maintenance, and paving costs.

Customer billing and accounting expenses increased by $6.5 million, or 15.3%, for 2012 compared to 2011.

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Uncollectible accounts expense	$ 22,541	$ 16,074	$ 6,467	40.2%
Postage	12,694	12,382	312	2.5%
Other	14,022	14,266	(244)	(1.7%)
Total	$ 49,257	$ 42,722	$ 6,535	15.3%

The increase in the uncollectible accounts expense was mainly the result of a refinement to our allowance for uncollectible calculation based on more detailed data trends which were derived in conjunction with the development of our new Customer Information System.

Other operation and maintenance expenses include casualty and liability insurance premiums and regulatory costs. These costs increased by $4.7 million, or 12.7%, for 2012 compared to 2011.

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Insurance	$ 31,883	$ 29,733	$ 2,150	7.2%
Regulatory expenses	9,987	7,433	2,554	34.4%
Total	$ 41,870	$ 37,166	$ 4,704	12.7%

Insurance costs were higher, compared to 2011, as 2012 insurance reflected incremental expense resulting from the resolution of prior years' claims. Regulatory expenses increased in 2012 as a result of the inclusion in 2011 of a deferral of previously expensed costs in one of our subsidiaries.

Operating expenses. The increase in operating expenses for the year ended December 31, 2012 is primarily due to the higher O&M expenses as explained above, as well as higher depreciation and amortization expense of $28.1 million, resulting from additional utility plant placed in service, and increased general taxes of $10.0 million, principally attributable to higher property taxes relating to our New York acquisition.

Market-Based Operations Segment

The following table provides certain financial information for our Market-Based Operations segment for the periods indicated:

	For the Years Ended December 31,		
	2013	2012	2011
	(in thousands)		
Operating revenues	$ 325,463	$ 330,329	$ 327,815
Operation and maintenance expense	264,253	276,809	278,375
Operating expenses, net	277,691	288,099	290,768
Income from continuing operations before income taxes	50,637	45,817	39,324

Comparison of Results of Operations for the Years Ended December 31, 2013 and 2012

Operating revenues. Revenues decreased $4.9 million for the year ended December 31, 2013, compared to the same period in 2012, primarily due to the lower revenues of $17.3 million resulting from termination of certain municipal and industrial operations and maintenance contracts, most of which occurred in 2012. Additionally, revenues from capital project activities associated with military construction decreased $8.4 million, due to lower levels of work as compared to the prior year. These decreases were offset by a net increase of $4.0 million from price redeterminations for several of our military contracts as well as an increase of $16.6 million in our HOS revenues associated with contract growth, most notably in New York City.

Operation and maintenance. Operation and maintenance expense decreased $ 12.6 million, or 4.5%, for the year ended December 31, 2013, compared to the year ended December 31, 2012.

The following table provides information regarding operation and maintenance expense for the years ended December 31, 2013, and 2012, by major expense category:

	For the Years Ended December 31,			
	2013	2012	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 38,943	$ 42,772	$ (3,829)	(9.0%)
Employee-related costs	67,042	71,002	(3,960)	(5.6%)
Operating supplies and services	111,755	117,749	(5,994)	(5.1%)
Maintenance materials and supplies	41,775	36,730	5,045	13.7%
Other	4,738	8,556	(3,818)	(44.6%)
Total	$ 264,253	$ 276,809	$ (12,556)	(4.5%)

As noted in the table above, decreases in operating supplies and services, production costs and employee-related costs were partially offset by an increase in maintenance materials and supplies. The decrease in production costs and employee-related costs is mostly due to the termination of certain municipal and industrial operations and maintenance contracts. The decrease in operating supplies and services is attributable to the release of $3.8 million in loss contract reserves due to the resolution of certain outstanding issues and uncertainties. Additionally, 2013 was impacted by decreased construction activity for our military contracts and is partially offset by increased HOS contracted services expense as well as higher printing and postage costs associated with expanding into new markets, including New York City. The increase in maintenance materials and supplies is primarily due to higher HOS repair costs, which is attributable to new contracts, an increase in the number of claims, as well as the average cost per claim and is partially offset by the terminated municipal and industrial operations and maintenance contracts. The decrease in the other category is mainly due to decreases in uncollectible accounts expense of $3.5 million, which is due to 2012 including incremental amounts related to terminated contracts in addition to improved collection experience in 2013 for certain other municipal and industrial operations and maintenance contracts.

Operating expense. The decrease in operating expenses for the year ended December 31, 2013 is primarily driven by the decrease in operation and maintenance expense, which is explained above.

Income from continuing operations before income taxes. The $4.8 million increase for the year ended December 31, 2013, is the result of the aforementioned changes in operating revenues and operating and maintenance expense.

Comparison of Results of Operations for the Years Ended December 31, 2012 and 2011

Operating revenues. The increase in revenues for the year ended December 31, 2012, compared to the same period in 2011, is primarily attributable to an $8.0 million increase in our HOS revenues associated with continued contract growth and a price increase. Also contributing to the higher revenues was a $2.2 million increase in our Contract Operations Group revenues which is mainly due to incremental revenues associated with military construction and operation and maintenance projects. These increases were offset by decreases in our Carbon Services Group revenues of $6.0 million, as we are no longer providing these services to the Regulated Businesses, and a decrease in revenues in our Terratec business of $1.8 million.

Operation and maintenance. Operation and maintenance expense decreased $1.6 million, or 0.6%, for the year ended December 31, 2012, compared to the year ended December 31, 2011.

The following table provides information regarding operation and maintenance expense for the years ended December 31, 2012, and 2011, by major expense category:

	For the Years Ended December 31,			
	2012	2011	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 42,772	$ 47,897	$ (5,125)	(10.7%)
Employee-related costs	71,002	75,012	(4,010)	(5.3%)
Operating supplies and services	117,749	108,552	9,197	8.5%
Maintenance materials and supplies	36,730	38,568	(1,838)	(4.8%)
Other	8,556	8,346	210	2.5%
Total	$ 276,809	$ 278,375	$ (1,566)	(0.6%)

The increase in operating supplies and services is attributable to increased construction activity for our military contracts. In addition, 2011 included the release of a $2.2 million loss contract reserve due to the resolution of certain outstanding issues and uncertainties. Offsetting the increase in operating supplies and services are decreases in production, employee-related and maintenance costs which is the result of expired and terminated contracts. Additionally, operating supplies and services is lower due to lower Carbon Services Group expenses, which corresponds to its lower revenues.

Operating expense. The decrease in operating expenses for the year ended December 31, 2012 is primarily driven by the decrease in operation and maintenance expense, which is explained above.

Income from continuing operations before income taxes. The $6.5 million increase for the year ended December 31, 2012, is the result of the aforementioned changes in operating revenues and operating and maintenance expense.

Liquidity and Capital Resources

We regularly evaluate cash requirements for current operations, commitments, development activities and capital expenditures. Our business is very capital intensive and requires significant capital resources. A majority of these capital resources are provided by internally generated cash flows from operations. When necessary, we obtain additional funds from external sources in the debt and equity capital markets and through bank borrowings. Our access to external financing on reasonable terms depends on our credit ratings and current business conditions, including that of the water utility industry in general, as well as conditions in the debt or equity capital markets. If these business and market conditions deteriorate to the extent that we no longer have access to the capital markets at reasonable terms, we have access to an unsecured revolving credit facility with aggregate bank commitments of $1.25 billion. We rely on this revolving credit facility and the capital markets to fulfill our short-term liquidity needs, to issue letters of credit and to support our commercial paper program. Disruptions in the credit markets may discourage lenders from extending the terms of such commitments or agreeing to new commitments. Market disruptions may also limit our ability to issue debt and equity securities in the capital markets. See "—Credit Facility and Short-Term Debt." In order to meet our short-term liquidity needs, we, through American Water Capital Corp. ("AWCC"), our financing subsidiary, issue commercial paper, which is supported by the revolving credit facility. AWCC had no outstanding borrowings and $41.8 million of outstanding letters of credit under its credit facility as of December 31, 2013. As of December 31, 2013, AWCC had $1.25 billion available under our credit facility that we could use to fulfill our short-term liquidity needs, to issue letters of credit and support our $630.3 million outstanding commercial paper. We can provide no assurances that our lenders will meet their existing commitments or that we will be able to access the commercial paper or loan markets in the future on terms acceptable to us or at all.

In addition, our regulated operating companies receive advances and contributions from customers, home builders and real estate developers to fund construction necessary to extend service to new areas. Advances for construction are refundable for limited periods, which vary according to state regulations, as new customers begin to receive service or other contractual obligations are fulfilled. Amounts which are no longer refundable are reclassified to contributions in aid of construction. Utility plant funded by advances and contributions is excluded from the rate base. Generally, we depreciate contributed property and amortize contributions in aid of construction at the composite rate of the related property. Some of our subsidiaries do not depreciate contributed property, based on regulatory guidelines.

We use our capital resources, including cash, to (i) fund operating and capital requirements, including construction expenditures, (ii) pay off maturing debt, (iii) pay dividends, (iv) fund pension and postretirement welfare obligations and (v) invest in new and existing ventures. We spend a significant amount of cash on construction projects that we expect to have a long-term return on investment. Additionally, we operate in rate-regulated environments in which the amount of new investment recovery may be limited, and where such recovery takes place over an extended period of time, as our recovery is subject to regulatory lag. See "Business—Regulation—Economic Regulation." We expect to fund future maturities of long-term debt through a combination of external debt and to the extent available cash flows from operations. Since we continue to make investments equal to or greater than our cash flows from operating activities, we have no plans to reduce debt significantly.

We believe that our ability to access the capital markets, our revolving credit facility and our cash flows from operations will generate sufficient cash to fund our short-term requirements. We fund liquidity needs for capital investment, working capital and other financial commitments through cash flows from operations, public and private debt offerings, commercial paper markets and to the extent necessary, our revolving credit facility. We believe we have sufficient liquidity and ability to manage our expenditures should there be a disruption of the capital and credit markets.

In addition, the Company can delay major capital investments or other funding requirements or pursue financing from other sources to preserve liquidity, if necessary. The Company believes it can rely upon cash flows from operations to meet its obligations and fund its minimum required capital investments for an extended period of time.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the third quarter of each fiscal year. Our future cash flows from operating activities will be affected by, among other things, economic utility regulation; infrastructure investment; inflation; compliance with environmental, health and safety standards; production costs; customer growth; declining per customer usage of water; weather and seasonality; and overall economic conditions.

Cash flows from operating activities have been a reliable, steady source of funding, sufficient to meet operating requirements, make our dividend payments and fund a portion of our capital expenditure requirements. We will seek access to debt and equity capital markets to meet the balance of our capital expenditure requirements as needed. There can be no assurance that we will be able to access such markets successfully on favorable terms or at all. Operating cash flows can be negatively affected by changes in our rate regulated environments or changes in our customers' economic outlook and ability to pay for service in a timely manner. We can provide no assurance that our customers' historical payment pattern will continue in the future.

The following table provides a summary of the major items affecting our cash flows from operating activities for the periods indicated:

	For the Years Ended December 31, 2013	2012	2011
	(in thousands)		
Net income	$ 369,264	$ 358,070	$ 309,613
Add (subtract):			
Non-cash operating activities(1)	761,772	688,126	677,569
Changes in working capital(2)	(137,374)	38,812	7,905
Pension and postretirement healthcare contributions	(97,500)	(129,410)	(186,730)
Net cash flows provided by operations	$ 896,162	$ 955,598	$ 808,357

---

(1) Includes, depreciation and amortization, provision for deferred income taxes, amortization of deferred investment tax credits, provision for losses on utility accounts receivable, allowance for other funds used during construction, (gain) loss on sale of assets, and pension and non-pension post retirement benefits expense and other non-cash items. Details of each component can be found in the Consolidated Statements of Cash Flows.

(2) Changes in working capital include changes to accounts receivable and unbilled utility revenue, income taxes receivable, other current assets, accounts payable, taxes accrued (including income taxes), interest accrued and other current liabilities.

Our working capital needs are primarily limited to funding the increase in our customer accounts receivable and unbilled revenues which is mainly associated with the revenue increase as a result of rate increases in our Regulated Businesses. We address the timing issue through the aforementioned liquidity funding mechanisms. Our cash collections for our Regulated Businesses' accounts receivable has been slower than historical payment patterns, in particular for those operating companies in which we implemented the new CIS system in May 2013. We believe the slowdown in collections is the result of the system implementation and therefore is only temporary in nature. We implemented the CIS system in our remaining Regulated Businesses in October 2013 and we would expect to experience a similar slowdown in cash collections for these operating companies in the first half of 2014.

The decrease in cash flows from operations for the year ended December 31, 2013 compared to the same period in 2012 is principally due to changes in working capital, which is related to the aforementioned delays in billing and slower collections in our accounts receivable and the change in payables in 2013, as we were delayed in 2012 in executing payable at normal volumes due to the implementation of Phase I of our business transformation project. Partially offsetting these working capital decreases was a reduction in the pension and postretirement healthcare contributions in 2013.

The increase in cash flows from operations for the year ended December 31, 2012 compared to the same period in 2011 is primarily attributable to additional revenues in 2012 and lower pension and postretirement healthcare contributions.

The Company expects to make pension and postretirement benefit contributions to the plan trusts of $49.3 million in 2014, of which $10.7 million was already made in 2014. In addition, we estimate that contributions will amount to $64.0 million in 2015, $68.8 million in 2016, $67.5 million in 2017 and $62.3 million in 2018. Actual amounts contributed could change materially from these estimates as a result of changes in assumptions and actual investment returns.

Cash Flows from Investing Activities

Cash flows used in investing activities were as follows for the periods indicated:

	For the Years Ended December 31,		
	2013	2012	2011
	(in thousands)		
Net capital expenditures	$ (980,252)	$ (928,574)	$ (924,858)
Proceeds from sale of assets and securities	918	561,739	9,972
Acquisitions	(23,658)	(44,560)	(7,220)
Other investing activities, net(1)	(50,302)	29,039	9,709
Net cash flows used in investing activities	$ (1,053,294)	$ (382,356)	$ (912,397)

---

(1) Includes removal costs from property, plant and equipment retirements, net funds released and other.

Cash flows used in investing activities increased in 2013 compared to 2012 primarily due to an increase in our capital expenditures for the year ended December 31, 2013 principally as a result of incremental spending associated with the replacement of our transmission and distribution infrastructure.

Our infrastructure investment plan consists of both infrastructure renewal programs, where we replace infrastructure as needed, and major capital investment projects, where we construct new water and wastewater treatment and delivery facilities to meet new customer growth and water quality regulations. Our projected capital expenditures and other investments are subject to periodic review and revision to reflect changes in economic conditions and other factors.

The following table provides a summary of our historical capital expenditures related to upgrading our infrastructure and systems :

	For the Years Ended December 31,		
	2013	2012	2011
	(in thousands)		
Transmission and distribution	$ 435,449	$ 343,640	$ 298,564
Treatment and pumping	89,278	138,072	191,771
Services, meter and fire hydrants	178,412	171,855	175,635
General structures and equipment	131,446	104,854	84,059
Business transformation project	59,746	107,049	99,891
Sources of supply	50,013	44,602	58,066
Wastewater	35,908	18,502	16,872
Total capital expenditures	$ 980,252	$ 928,574	$ 924,858

Capital expenditures for the year ended December 31, 2013, increased by $51.7 million or 5.6% compared to 2012, principally due to our continued replacement of transmission and distribution infrastructure, rehabilitation to storage facilities and dam rehabilitation and increased expenditures related to information systems, and vehicles. Partially offsetting this increase was reduction in treatment and pumping expenditures due to the completion of certain water treatment plant projects in 2012 as well as a reduction in our business transformation expenses also due to completion of Phase I of the project in 2012 and the implementation of a portion of Phase II in May 2013.

Capital expenditures for the year ended December 31, 2012 increased by $3.7 million, or 0.4%, compared to 2011, mainly as a result of an increase in the replacement of transmission/distribution infrastructure and higher business transformation project expenditures, partially offset by a reduction in treatment and pumping expenditures due to the completion of certain water treatment plant projects, for which major expenditures occurred in 2011.

In 2013, we implemented Phase II, the final phase, of our business transformation project. Through December 31, 2013 including AFUDC, capital expenditures amounted to $322.8 million on the project with $65.8 million spent in 2013. As we make adjustments to our operations as a result of this project, we may incur incremental expenses prior to realizing the benefits of a more efficient workforce and operating structure. While we believe such expenditures to realize the efficiencies can be recovered through regulated rates, we can provide no guarantee that we will be able to achieve timely rate recovery of these increased costs associated with this transformation project. Any such delays or difficulties encountered with such recovery may have a material and adverse impact on our business, customer relationships and financial results.

The change in proceeds from sale of assets and securities from 2013 to 2012 and 2012 to 2011 reflects the fact that 2012 included cash proceeds of $561.7 million received from the sale of our Arizona, New Mexico and Ohio subsidiaries in 2012 partially offset by cash proceeds used for acquisition purposes, with the largest being the acquisition of additional regulated water operations in New York

One avenue to seek growth is through tuck-ins, by helping commissions with troubled water systems as well as other acquisitions that are complementary to our existing business and support the continued geographical diversification and growth of our operations. Generally, acquisitions are funded initially with short-term debt and later refinanced with the proceeds from long-term debt or equity offerings.

The following provides a summary of the acquisitions and dispositions affecting our cash flows from investing activities in the years indicated:

2013:

- We paid approximately $23.7 million for ten water and five wastewater system. These acquisitions added approximately 30,000 customers to our existing regulated footprint. The largest of these acquisitions was the acquisition of the stock of a wastewater system in Virginia with approximately 20,000 customers in November 2013 for a purchase price of $5.1 million (net of cash acquired of $6.9 million) plus assumed liabilities.
- We received approximately $0.9 million for the sale of assets and securities.

2012:

- We paid approximately $44.6 million for numerous regulated water and wastewater systems in New York, Pennsylvania, Indiana, Missouri and West Virginia, with the largest associated with the acquisition of seven regulated water systems in New York in May 2012 for a purchase price of $36.7 million plus assumed liabilities.
- We received approximately $561.7 million from the sale of our assets and securities, including $458.9 million associated with the sale of our Arizona, New Mexico and Ohio regulated subsidiaries.

2011:

- We paid approximately $7.2 million for numerous regulated water and wastewater systems in Missouri, New Jersey, and Pennsylvania, with the largest associated with the acquisition of 11 regulated water systems and 48 wastewater systems in Missouri in May 2011 for a purchase price of $3.3 million.
- We received approximately $10.0 million for the sale of assets and securities, including $6.2 million associated with the sale of our Texas subsidiary's assets and $2.9 million from the sale of the Applied Water Management subsidiary.

As previously noted, in 2014, we estimate that our total capital plan is $1.1 billion with approximately $900 million allocated to upgrading our infrastructure and systems, $100 million for acquisitions and $100 million for strategic investment purposes. For years in the foreseeable future beyond 2014, we estimate such investment will be between $1.1 and $1.2 billion per year.

We intend to invest capital prudently to provide essential services to our regulated customer base, while working with regulators in the various states in which we operate to have the opportunity to earn an appropriate rate of return on our investment and a return of our investment.

Our investing activities could require considerable capital resources which we have generated through operations and attained through financing activities. We can provide no assurances that these resources will be sufficient to meet our expected investment needs and may be required to delay or reevaluate our investment plans.

Cash Flows from Financing Activities

Our financing activities, primarily focused on funding construction expenditures, include the issuance of long-term and short-term debt, primarily through AWCC. We intend to access capital markets on a regular basis, subject to market conditions. In addition, new infrastructure may be funded with customer advances and contributions for construction (net of refunds). This amounted to $19.3 million, $31.9 million and $22.3 million for the years ended December 31, 2013, 2012 and 2011, respectively. As previously noted AWCC is a wholly-owned finance subsidiary of the Company. Based on the needs of our regulated subsidiaries and the Company, AWCC borrows in the capital markets and then, through intercompany loans, provides those borrowings to the regulated subsidiaries and the Company. The regulated subsidiaries and the Company are obligated to pay their portion of the respective principal and interest to AWCC in the amount necessary to enable AWCC to meet its debt service obligations. Because the Company's borrowings are not a source of capital for the regulated subsidiaries, the Company is not able to recover the interest charges on the Company's debt through regulated water and wastewater rates. As of December 31, 2013, AWCC has made long-term fixed rate loans and commercial paper loans to our Regulated Businesses amounting to $2.9 billion and $390.9 million, respectively. Additionally, as of December 31, 2013, AWCC has made long-term fixed rate loans and commercial paper loans to the Company totaling $778.3 million and $239.4 million to the Company, respectively.

On May 4, 2012, we and AWCC filed a universal shelf registration statement that enabled us to offer and sell from time to time various types of securities, including common stock, preferred stock and debt securities, all subject to market demand and ratings status. During 2013 and 2012, $400 million and $300 million, respectively, of debt securities were issued pursuant to this filing.

As previously noted, on October 8, 2013, we announced the purchase and retirement through a tender offer of $225.8 million in aggregate outstanding principal amount of our 6.08% Senior Notes due 2017. On October 8, 2013, we paid $271.8 million to effect the tender, which in addition to the principal included a repurchase premium of $39.4 million and accrued interest of $6.6 million. Also, in October 2013 and related to the tender, we recorded transaction fees of $0.7 million and a write-off of $0.5 million for unamortized debt issuance costs. The redemption was originally financed through commercial paper borrowing. If we continue to finance this debt through commercial paper borrowings and with the assumption that current short-term rates remain the same, we would expect to have pre-tax interest expense savings of approximately $13.1 million in 2014.

On November 1, 2013, we issued notices of redemption for $74.8 million and $75.0 million of outstanding Senior Notes with an original maturity date of 2038 and interest rates of 8.25% and 10.0%, respectively. These notes were retired on December 1, 2013.

On November 20, 2013, AWCC issued $400 million of 3.850% Senior Notes due 2024.

Also on December 21, 2013, an additional $101.0 million with interest rate of 5.39% in Senior Notes matured.

The following long-term debt was issued in 2013:

Company	**Type**	**Interest Rate**	**Maturity**	**Amount (in thousands)**
American Water Capital Corp.	Senior notes–fixed rate	3.85%	2024 (a)	$ 400,000
American Water Capital Corp.	Private activity bonds and government funded debt–fixed rate	2.30%-2.90%	2021-2030(b)	8,122
Other subsidiaries	Private activity bonds and government funded debt–fixed rate	1.59%-2.41%	2031-2033(c)	2,737
Total issuances				$ $410,859

(a) On November 20, 2013, AWCC closed on a 3.85% senior fixed rate notes. Proceeds used to refinance commercial paper borrowings.

(b) Proceeds from the above issuance were received in the fourth quarter of 2013 and have been utilized to fund certain specific projects. $6.7 million of these proceeds are held in trust pending our certification that we have incurred qualifying capital expenditures. These issuances have been presented as non-cash on the Consolidated Statements of Cash Flows. Subsequent releases of all or a lesser portion of the funds by the trust are reflected as the release of restricted funds and are included in the investing activities in the Consolidated Statements of Cash Flows.

(c) Proceeds from the above issuances were received from Pennsylvania Infrastructure Investment Authority ("PennVest") and has been used to fund certain projects.

In addition to the above issuances, we also assumed $12.7 million of debt as a result of a acquisitions in 2013, of which $12.5 million is the result of our Dale Service Corporation stock acquisition in the fourth quarter of 2013.

The following long-term debt was retired through optional redemption or payment at maturity during 2013:

Company	Type	Interest Rate	Maturity	Amount (in thousands)
American Water Capital Corp.	Senior notes-fixed rate	5.39%-10.00%	2013-2017	$ 476,638
Other subsidiaries (1)	Private activity bonds and government funded debt–fixed rate	0.00% -5.50%	2013-2041	17,663
Other subsidiaries	Mortgage bonds–fixed rate	6.59%	2013	2,000
Other subsidiaries	Mandatory redeemable preferred stock	8.49%-9.18%	2031-2036	1,650
Other	Capital leases & other			359
Total retirements & redemptions				$ 498,310

(1) Includes a $3.6 million of non-cash redemptions resulting from the use of restricted funds.

The following long-term debt was issued in 2012:

Company	Type	Interest Rate	Maturity	Amount (in thousands)
American Water Capital Corp.	Senior notes–fixed rate	4.30%	2042(a)	$ 300,000
Other subsidiaries	Private activity bonds and government funded debt–fixed rate	0.00%-5.00%	2025-2041(b)	68,746
Other subsidiaries	Private activity bonds and government funded debt–fixed rate	1.00%-2.76%	2025-2041(c)	14,730
Other subsidiaries	Mortgage bonds–fixed rate	4.29%	2022	700
Total issuances				$ 384,176

(a) The net proceeds from this issuance were used to finance certain redemptions of long-term debt and to fund the repayment of short-term debt.

(b) Proceeds from these issuances were received from New Jersey Environmental Infrastructure Trust and will be used to fund certain specific projects. The proceeds are held in trust pending our certification that we have incurred qualifying expenditures. These issuances have been presented as non-cash on the Consolidated Statements of Cash Flows. Subsequent releases of all or a lesser portion of the funds by the Trust are reflected as the release of restricted funds and are included in the investing activities in the Consolidated Statements of Cash Flows.

(c) Proceeds from these issuances were received from the Pennsylvania Infrastructure Investment Authority and has been used to fund specified projects.

Also, in the second quarter of 2012, and in connection with the acquisition of our additional subsidiaries in New York, we assumed debt of $25.2 million with coupon rates of 5.00% to 6.00% and maturity dates ranging from 2015 to 2035. In September 2012, we redeemed $10.9 million of these outstanding bonds with original maturity dates of 2031 to 2035 and interest rates ranging from 5.00% to 6.00%.

The following long-term debt was retired through optional redemption or payment at maturity during 2012:

Company	Type	Interest Rate	Maturity	Amount (in thousands)
American Water Capital Corp.	Senior notes-fixed rate	8.25%	2038	$ 10
Other subsidiaries	Private activity bonds and government funded debt–fixed rate	0.00%-9.60%	2012-2041	447,325
Other subsidiaries	Mortgage bonds–fixed rate	6.85%-7.95%	2012	24,200
Other subsidiaries	Mandatory redeemable preferred stock	4.60%-9.18%	2013-2036	1,549
Other	Capital leases & other			419
Total retirements & redemptions				$ 473,503

Included in the long-term debt redemptions/retirements is $4.2 million related to our previously held Ohio subsidiary, which was classified in discontinued operations prior to its divestiture.

The following long-term debt was issued in 2011:

Company	Type	Interest Rate	Maturity	Amount (in thousands)
Other subsidiaries	Private activity bonds and government funded debt–fixed rate	0.00%-1.56%	2031	$ 12,510
Total issuances				$ 12,510

The following long-term debt was retired through optional redemption or payment at maturity during 2011:

Company	Type	Interest Rate	Maturity	Amount (in thousands)
American Water Capital Corp.	Senior notes-fixed rate	6.00%-8.25%	2011-2039	$ 28,287
Other subsidiaries	Private activity bonds and government funded debt-fixed rate	0.00%-5.90%	2011-2034	7,976
Other subsidiaries	Mortgage bonds–fixed rate	8.21%-9.71%	2011-2022	33,191
Other subsidiaries	Mandatory redeemable preferred stock	4.60%-9.18%	2013-2019	1,888
Other	Capital leases & other			4,078
Total retirements & redemptions				$ 75,420

From time to time and as market conditions warrant, we may engage in long-term debt retirements via tender offers, open market repurchases or other viable alternatives to strengthen our balance sheets.

Credit Facility and Short-Term Debt

The short-term debt balance, consisting of commercial paper, net of discount, amounted to $630.3 million and $270.0 million at December 31, 2013 and 2012, respectively.

On October 29, 2012, we terminated a previously maintained senior unsecured credit facility for $840 million and entered into a new unsecured revolving credit facility with $1 billion in aggregate total commitments from a diversified group of 14 banks and which was to have matured on October 29, 2017 (subject to up to two 1-year extensions at our request). On September 9, 2013, The Company announced that AWCC and its lender had agreed to increase lending commitments under AWCC's revolving credit facility from $1 billion to $1.25 billion. In addition, $1.18 billion of the credit facility has been extended from its original termination date of October 2017 to October 2018. Interest rates on advances under the facility are based on a credit spread to the Eurodollar rate or base rate with the credit spread of 1.00% through June 2012 and then based on the higher of AWCC's Moody's Investors Service, which we refer to as Moody's or Standard & Poor's Ratings Services ratings, which we refer to as S&P, credit rating. At current ratings that spread would be 1.00%. This facility requires the Company to maintain a ratio of consolidated capitalization of not more than 0.70 to 1.00. The facility will be principally used to support AWCC's commercial paper program and to provide up to $150.0 million in letters of credit.

We closely monitor events in the financial markets and the financial institutions associated with this credit facility. In accordance with the credit agreement, no financial institution can have more than $250.0 million of the aggregate commitment through the facility expiration date . If any lender defaults in its obligation to fund advances, the Company may request the other lenders to assume the defaulting lender's commitment or replace such defaulting lender by designating an assignee willing to assume the commitment. However, the remaining lenders have no obligation to assume a defaulting lender's commitment and we can provide no assurances that we will be able to replace a defaulting lender.

The following table provides information as of December 31, 2013 and 2012, regarding the respective credit facility in effect at the time, letters of credit sub-limits and available funds under those revolving credit facilities, as well as outstanding amounts of commercial paper and outstanding borrowings under the respective facilities:

	Credit Facility Commitment	Available Credit Facility Capacity	Letter of Credit Sublimit	Available Letter of Credit Capacity	Outstanding Commercial Paper (Net of Discount)	Credit Line Borrowings
				(in thousands)		
December 31, 2013	$ 1,250,000	$ 1,208,215	$ 150,000	$ 108,215	$ 630,307	$ —
December 31, 2012	$ 1,000,000	$ 967,137	$ 150,000	$ 117,137	$ 269,985	$ —

AWCC had no outstanding borrowings under the credit facility and $41.6 million of outstanding letters of credit under this credit facility as of February 21, 2014. Also, as of February 21, 2014, AWCC had $629.9 million of commercial paper outstanding.

The weighted-average interest rate on short-term borrowings for the years ended December 31, 2013 and 2012 was approximately 0.37 % and 0.49%, respectively.

Capital Structure

The following table indicates the percentage of our capitalization represented by the components of our capital structure as of December 31, 2013, 2012 and 2011:

	At December 31, 2013	At December 31, 2012	At December 31, 2011
Common stockholder equity and preferred stock without mandatory redemption rights	45%	44%	42%
Long-term debt and redeemable preferred stock at redemption value	49%	52%	53%
Short-term debt and current portion of long-term debt	6%	4%	5%
	100 %	100%	100%

The changes in the capital structure between periods were mainly attributable to changes in outstanding commercial paper balances. The increase in 2011 was the result of funding the majority of 2011 cash requirements with commercial paper as a result of anticipating the proceeds from the divestiture of our Arizona and New Mexico regulated businesses in 2012. We used the net proceeds from the sale to pay down commercial paper in 2012.

Debt Covenants

Our debt agreements contain financial and non-financial covenants. To the extent that we are not in compliance, we or our subsidiaries may be restricted in our ability to pay dividends, issue debt or access our revolving credit lines. We were in compliance with our covenants as of December 31, 2013. Long-term debt indentures contain a number of covenants that, among other things, limit the Company from issuing debt secured by the Company's assets, subject to certain exceptions.

Certain long-term notes and the revolving credit facility require us to maintain a ratio of consolidated total indebtedness to consolidated total capitalization of not more than 0.70 to 1.00. On December 31, 2013, our ratio was 0. 55 to 1.00 and therefore we were in compliance with the ratio.

Security Ratings

Our access to the capital markets, including the commercial paper market, and respective financing costs in those markets, is directly affected by securities ratings of the entity that is accessing the capital markets. We primarily access the capital markets, including the commercial paper market, through AWCC. However, we also issue debt at our regulated subsidiaries, primarily in the form of tax exempt securities, to lower our overall cost of debt.

On May 24, 2013, Standard & Poor's Rating Service, ("S&P"), upgraded its corporate credit rating to A- on AWCC and American Water and AWCC's "A2" short term rating. On that date, they also confirmed its stable rating outlook for American Water and AWCC. On May 29, 2013, Moody's upgraded its rating outlook for both American Water and AWCC from Baa2 to Baa1 and revised its rating outlook to stable.

The following table shows the Company's securities ratings as of December 31, 2013:

Securities	Moody's Investors Service	Standard & Poor's Ratings Service
Senior unsecured debt	Baa1	A-
Commercial paper	P2	A2

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon our ability to generate cash flows in an amount sufficient to service our debt and meet our investment plans. We can provide no assurances that our ability to generate cash flow is sufficient to maintain our existing ratings. None of our borrowings are subject to default or prepayment as a result of the downgrading of these security ratings, although such a downgrading could increase fees and interest charges under our credit facility.

As part of the normal course of business, we routinely enter into contracts for the purchase and sale of water, energy, chemicals and other services. These contracts either contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if we are downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to rely on such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that we provide collateral to secure our obligations. We do not expect to post any collateral which will have a material adverse impact on the Company's results of operations, financial position or cash flows.

Dividends

Our board of directors has adopted a dividend practice to distribute to our stockholders a portion of our net cash provided by operating activities as regular quarterly dividends, rather than retaining that cash for other purposes. We expect that dividends will be paid quarterly to holders of record approximately 15 days prior to the distribution date. Since the dividends on our common stock will not be cumulative, only declared dividends will be paid.

During 2013, 2012 and 2011, we paid $149.5 million, $213.5 million and $157.9 million in dividends, respectively. For 2013, we paid a dividend of $0.28 per share on December 2, September 3 and June 3 to all shareholders of record as of November 15, 2013, August 19, 2013, and May 24, 2013, respectively.

For 2012, we paid a dividend of $0.25 per share on December 28, December 3 and September 3 and $0.23 per share on June 1 and March 1. The December 28, 2012 cash dividend payment of $0.25 per share would have historically been paid in March 2013, however, the Board approved accelerating the payment date to 2012 to take advantage of the existing 2012 tax rates. For 2011, we paid a dividend of $0.23 per share on December 1 and September 1 and $0.22 per share on June 1 and March 1.

On December 13, 2013, our board of directors declared a quarterly cash dividend payment of $0.28 per share payable on March 3, 2014 to all shareholders of record as of February 3, 2014.

Regulatory Restrictions

The issuance by the Company or AWCC of long-term debt or equity securities does not require authorization of any state PUC if no guarantee or pledge of the regulated subsidiaries is utilized. However, state PUC authorization is required to issue long-term debt or equity securities at most of our regulated subsidiaries. Our regulated subsidiaries normally obtain the required approvals on a periodic basis to cover their anticipated financing needs for a period of time or in connection with a specific financing.

Under applicable law, our subsidiaries can pay dividends only from retained, undistributed or current earnings. A significant loss recorded at a subsidiary may limit the dividends that the subsidiary can distribute to us.

Insurance Coverage

We carry various property, casualty and financial insurance policies with limits, deductibles and exclusions that we believe are consistent with industry standards. However, insurance coverage may not be adequate or available to cover unanticipated losses or claims. Additionally, annual policy renewals can be impacted by claims experience which in turn can impact coverage terms and conditions on a going forward basis. We are self-insured to the extent that losses are within the policy deductible or exceed the amount of insurance maintained. Such losses could have a material adverse effect on our short-term and long-term financial condition and our results of operations and cash flows.

Contractual Obligations and Commitments

We enter into obligations with third parties in the ordinary course of business. These financial obligations, as of December 31, 2013, are set forth in the table below:

Contractual obligation	Total	Less Than 1 year	1-3 Years	3-5 years	More Than 5 years
			(in thousands)		
Long-term debt obligations (a)	$ 5,183,709	$ 12,492	$ 110,178	$ 1,042,563	$ 4,018,476
Interest on long-term debt (b)	4,443,386	294,944	592,723	546,411	3,009,308
Capital lease obligations (c)	913	32	78	99	704
Interest on capital lease obligations (d)	952	111	212	197	432
Operating lease obligations (e)	147,530	15,898	24,317	17,997	89,318
Purchase water obligations (f)	715,443	54,288	105,615	87,017	468,523
Other purchase obligations (g)	76,416	76,416	-	-	-
Postretirement benefit plans' obligations (h)	79,737	12,137	35,300	32,300	-
Pension plan obligations (h)	273,191	37,191	97,500	97,500	41,000
Preferred stocks with mandatory redemption requirements	18,902	1,650	3,300	3,300	10,652
Interest on preferred stock with mandatory redemption requirements	14,155	1,549	2,671	2,101	7,834
Other obligations (i)	896,770	203,601	134,508	116,546	442,115
Total	$ 11,851,104	$ 710,309	$ 1,106,402	$ 1,946,031	$ 8,088,362

(a)

Note: The above table reflects only financial obligations and commitments. Therefore, performance obligations associated with our Market-Based Operations are not included in the above amounts.

(a) Represents sinking fund obligations and debt maturities.

(b) Represents expected interest payments on outstanding long-term debt. Amounts reported may differ from actual due to future financing of debt.

(c) Represents future minimum payments under noncancelable capital leases.

(d) Represents expected interest payments on noncancelable capital leases.

(e) Represents future minimum payments under noncancelable operating leases, primarily for the lease of motor vehicles, buildings, land and other equipment including water facilities and systems constructed by partners under the Public-Private Partnerships described below.

(f) Represents future payments under water purchase agreements for minimum quantities of water.

(g) Represents the open purchase orders as of December 31, 2013, for goods and services purchased in the ordinary course of business.

(h) Represents contributions expected to be made to pension and post retirement benefit plans for the years 2014 through 2019.

(i) Includes an estimate of advances for construction to be refunded, capital expenditures estimated to be required under legal and binding contractual obligations, contracts entered into for energy purchases, a liability associated with a conservation agreement and service agreements.

Public-Private Partnerships

West Virginia-American Water Company, which we refer to as WVAWC, has entered into a series of agreements with various public entities, which we refer to as the Partners, to establish certain joint ventures, commonly referred to as “public-private partnerships.” Under the public-private partnerships, WVAWC constructed utility plant, financed by WVAWC, and the Partners constructed utility plant (connected to WVAWC’s property), financed by the Partners. WVAWC agreed to transfer and convey some of its real and personal property to the Partners in exchange for an equal principal amount of Industrial Development Bonds, commonly referred to as IDBs, issued by the Partners under a state Industrial Development Bond and Commercial Development Act. WVAWC leased back the total facilities, including portions funded by both WVAWC and the Partners, under leases for a period of 40 years.

WVAWC leased back the transferred facilities under capital leases for a period of 40 years. The leases have payments that approximate the payments required by the terms of the IDBs. We have presented the transaction on a net basis in the consolidated financial statements. The carrying value of the transferred facilities, which is presented within utility plant, was approximately $158. 1 million at December 31, 2013.

Performance Obligations

We have entered into agreements for the provision of services to water and wastewater facilities for the United States military, municipalities and other customers. These military services agreements expire between 2051 and 2060 and have remaining performance commitments as measured by estimated remaining contract revenues of $2.0 billion at December 31, 2013. The Operations and Maintenance agreements with municipalities and other customers expire between 2014 and 2048 and have remaining performance commitments as measured by estimated remaining contract revenue of $928.0 million at December 31, 2013. Some of the Company’s long-term contracts to operate and maintain a municipality’s, federal government’s or other party’s water or wastewater treatment and delivery facilities include responsibility for certain major maintenance for some of the facilities, in exchange for an annual fee.

Critical Accounting Policies and Estimates

The application of critical accounting policies is particularly important to our financial condition and results of operations and provides a framework for management to make significant estimates, assumptions and other judgments. Although our management believes that these estimates, assumptions and other judgments are appropriate, they relate to matters that are inherently uncertain. Accordingly, changes in the estimates, assumptions and other judgments applied to these accounting policies could have a significant impact on our financial condition and results of operations as reflected in our consolidated financial statements.

Our financial condition, results of operations and cash flows are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. Management believes that the areas described below require significant judgment in the application of accounting policy or in making estimates and assumptions in matters that are inherently uncertain and that may change in subsequent periods. Our management has reviewed these critical accounting policies, and the estimates and assumptions regarding them, with our audit committee. In addition, our management has also reviewed the following disclosures regarding the application of these critical accounting policies with the audit committee.

Regulatory Accounting

Our regulated utility subsidiaries are subject to regulation by state PUCs and the local governments of the states in which they operate. As such, we account for these regulated operations in accordance with authoritative guidance that requires us to reflect the effects of rate regulation in our financial statements. Use of the authoritative guidance is applicable to utility operations that meet the following criteria (1) third-party regulation of rates; (2) cost-based rates; and (3) a reasonable assumption that all costs will be recoverable from customers through rates. As of December 31, 2013, we had concluded that the operations of our regulated subsidiaries meet the criteria. If it is concluded in a future period that a separable portion of the business no longer meets the criteria, we are required to eliminate the financial statement effects of regulation for that part of the business, which would include the elimination of any or all regulatory assets and liabilities that had been recorded in the consolidated financial statements. Failure to meet the criteria of the authoritative guidance could materially impact our consolidated financial statements as a one-time extraordinary item and continued impacts on our operating activities.

Regulatory assets represent costs that have been deferred to future periods when it is probable that the regulator will allow for recovery through rates charged to customers. Regulatory liabilities represent revenues received from customers to fund expected costs that have not yet been incurred. As of December 31, 2013, we have recorded $858.5 million of net regulatory assets, including $242.9 million of income taxes that are recoverable through rates, within our Consolidated Financial Statements. Also, at December 31, 2013, we had recorded $373.3 million of regulatory liabilities within our consolidated financial statements. See Note 6 of the Notes to Consolidated Financial Statements for further information regarding the significant regulatory assets and liabilities.

For each regulatory jurisdiction where we conduct business, we continually assess whether the regulatory assets and liabilities continue to meet the criteria for probable future recovery or settlement. This assessment includes consideration of factors such as changes in applicable regulatory environments, recent rate orders to other regulated entities in the same jurisdiction, the status of any pending or potential deregulation legislation and the ability to recover costs through regulated rates. If subsequent events indicate that the regulatory assets or liabilities no longer meet the criteria for probable future recovery or settlement, our statement of operations and financial position could be materially affected.

Goodwill

The Company's annual impairment reviews are performed as of November 30 of each year, in conjunction with the timing of the completion of the Company's annual strategic business plan. At December 31, 2013, the Company's goodwill was $ 1,207.8 million. The Company also undertakes interim reviews when the Company determines that a triggering event that would more likely than not reduce the fair value of a reporting unit below its carrying value has occurred.

In September 2011, the FASB issued revised guidance intended to simplify how an entity tests goodwill for impairment. The amendments allow an entity first to assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. An entity is no longer required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The amendments were effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 and early adoption was permitted.

The Company decided to adopt this new guidance in 2012 and for its 2013 and 2012 annual tests applied the qualitative test ("step 0" or "step 0 test") to its reporting units for the annual impairment test performed as of November 30, 2013 and 2012.

The Company completed a quantitative fair value measurement of its reporting units when performing its goodwill impairment analysis on November 30, 2011. As of the 2011 testing date, a quantitative assessment was made and implied that the fair value of its reporting units was well in excess of their carrying amount and no impairment was required.

In the 2013 and 2012 qualitative step 0 test at November 30, 2013 and 2012, after assessing various events and circumstances that would affect the estimated fair value of the reporting units in its base line November 30, 2011 test, the Company determined that it was not required to calculate the fair value of its reporting units at November 30, 2013 and 2012. The Company determined that it was more likely than not that its reporting unit fair values are greater than the reporting unit carrying values and no impairment is necessary.

On a periodic basis or in the case of a triggering event, the Company will use the two-step impairment test to identify potential goodwill impairment and measures the amount of a goodwill impairment loss to be recognized (if any). The step 1 calculation used to identify potential impairment compares the calculated fair value for each of the Company's reporting units to their respective net carrying values (book values), including goodwill, on the measurement date. If the fair value of any reporting unit is less than such reporting unit's carrying value, then step 2 is performed to measure the amount of the impairment loss (if any) for such reporting unit.

The step 2 calculation of the impairment test compares, by reporting unit, the implied fair value of the goodwill to the carrying value of goodwill. The implied fair value of goodwill is equal to the excess of the fair value of each reporting unit above the fair value of such reporting unit's identified assets and liabilities. If the carrying value of goodwill exceeds the implied fair value of goodwill for any reporting unit, an impairment loss is recognized in an amount equal to the excess (not to exceed the carrying value of goodwill) for that reporting unit.

The determination of the fair value of each reporting unit and the fair value of each reporting unit's assets and liabilities is performed as of the measurement date using observable market data before and after the measurement date (if that subsequent information is relevant to the fair value on the measurement date).

There can be no assurances that the Company will not be required to recognize an impairment of goodwill in the future due to market conditions or other factors related to the Company's performance. These market events could include a decline over a period of time of the Company's stock price, a decline over a period of time in valuation multiples of comparable water utilities, the lack of an increase in the Company's market price consistent with its peer companies, or decreases in control premiums. A decline in the forecasted results in our business plan, such as changes in rate case results or capital investment budgets or changes in our interest rates, could also result in an impairment charge.

For the years ended December 31, 2013 and 2012, no impairment charge was recorded. For the year ended December 31, 2011, no impairment charge was recorded for our continuing operations. In 2011, we recorded a pre-tax charge to goodwill of $25.5 million relating to parent company goodwill associated with businesses classified as discontinued operations.

Impairment of Long-Lived Assets

Long-lived assets include land, buildings, equipment and long-term investments. Long-lived assets, other than investments and land are depreciated over their estimated useful lives, and are reviewed for impairment whenever changes in circumstances indicate the carrying value of the asset may not be recoverable. Such circumstances would include items such as a significant decrease in the market value of a long-lived asset, a significant adverse change in the manner in which the asset is being used or planned to be used or in its physical condition, or a history of operating or cash flow losses associated with the use of the asset. In addition, changes in the expected useful life of these long-lived assets may also be an impairment indicator. When such events or changes occur, we estimate the fair value of the asset from future cash flows expected to result from the use and, if applicable, the eventual disposition of the assets, and compare that to the carrying value of the asset. If the carrying value is greater than the fair value, an impairment loss is recognized equal to the amount by which the asset's carrying value exceeds its fair value. The key variables that must be estimated include assumptions regarding sales volume, rates, operating costs, labor and other benefit costs, capital additions, assumed discount rates and other economic factors. These variables require significant management judgment and include inherent uncertainties since they are forecasting future events. A variation in the assumptions used could lead to a different conclusion regarding the realizability of an asset and, thus, could have a significant effect on the consolidated financial statements.

The long-lived assets of the regulated utility subsidiaries are grouped on a separate entity basis for impairment testing as they are integrated state-wide operations that do not have the option to curtail service and generally have uniform tariffs. A regulatory asset is charged to earnings if and when future recovery in rates of that asset is no longer probable.

The fair values of long-term investments are dependent on the financial performance and solvency of the entities in which we invest, as well as volatility inherent in the external markets. In assessing potential impairment for these investments, we consider these factors. If such assets are considered impaired, an impairment loss is recognized equal to the amount by which the asset's carrying value exceeds its fair value.

Revenue Recognition

Revenues of the regulated utility subsidiaries are recognized as water and wastewater services are delivered to customers and include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the date of the meter reading associated with the latest customer invoice to the end of the accounting period. Unbilled utility revenues as of December 31, 2013 and 2012 were $217.1 million and $180.6 million, respectively. Increases in volumes delivered to the utilities' customers and rate mix due to changes in usage patterns in customer classes in the period could be significant to the calculation of unbilled revenue. Changes in the timing of meter reading schedules and the number and type of customers scheduled for each meter reading date would also have an effect on the estimated unbilled revenue; however, since the majority of our customers are generally billed on a monthly basis, total operating revenues would remain materially unchanged. During 2013 and in connection with our CIS implementation, there are instances where billings to customers have been delayed, including a conscious decision to delay billings in order to increase the level of scrutiny and verification around bills being generated by the new system, in particular larger and/or more complex bills. As a result of these delays in billings, unbilled revenues at December 31, 2013 has increased significantly, however, total operating revenues would be materially unchanged due to a corresponding decrease in billed revenue.

Revenue from Market-Based Operations is recognized as services are rendered. Revenues from certain construction projects are recognized over the contract term based on the estimated percentage of completion during the period compared to the total estimated services to be provided over the entire contract. Losses on contracts are recognized during the period in which the loss first becomes probable and estimable. Revenues recognized during the period in excess of billings on construction contracts are recorded as unbilled revenue. Billings in excess of revenues recognized on construction contracts are recorded as other current liabilities on the balance sheet until the recognition criteria are met. Changes in contract performance and related estimated contract profitability may result in revisions to costs and revenues and are recognized in the period in which revisions are determined.

Accounting for Income Taxes

The parent company and its subsidiaries participate in a consolidated federal income tax return for United States tax purposes. Members of the consolidated group are charged with the amount of federal income tax expense determined as if they filed separate returns.

Certain income and expense items are accounted for in different time periods for financial reporting than for income tax reporting purposes. The Company provides deferred income taxes on the difference between the tax basis of assets and liabilities and the amounts at which they are carried in the financial statements. These deferred income taxes are based on the enacted tax rates expected to be in effect when these temporary differences are projected to reverse. In addition, the regulated utility subsidiaries recognize regulatory assets and liabilities for the effect on revenues expected to be realized as the tax effects of temporary differences, previously flowed through to customers, reverse.

Accounting for Pension and Postretirement Benefits

We maintain noncontributory defined benefit pension plans covering eligible employees of our regulated utility and shared service operations. Benefits under the plans are based on the employee's years of service and compensation. The pension plans have been closed for most employees hired on or after January 1, 2006. Union employees hired on or after January 1, 2001 had their accrued benefit frozen and will be able to receive this benefit as a lump sum upon termination or retirement. Union employees hired on or after January 1, 2001 and non-union employees hired on or after January 1, 2006 will be provided with a 5.25% of base pay defined contribution plan. We also maintain other postretirement benefit plans, which provide varying levels of medical and life insurance for eligible retirees. These retiree welfare plans are closed for union employees hired on or after January 1, 2006. The plans had previously closed for non-union employees hired on or after January 1, 2002. The Company also has several unfunded noncontributory supplemental non-qualified pension plans that provide additional retirement benefits to certain employees. The Company does not participate in a multiemployer plan. See Note 14 of the Notes to Consolidated Financial Statements for further information regarding the accounting for the defined benefit pension plans and postretirement benefit plans. The Company's pension and postretirement benefit costs are developed from actuarial valuations. Inherent in these valuations are key assumptions provided by the Company to its actuaries, including the discount rate and expected long-term rate of return on plan assets. Material changes in the Company's pension and postretirement benefit costs may occur in the future due to changes in these assumptions as well as fluctuations in plan assets. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other postretirement benefit expense that the Company recognizes. The primary assumptions are:

- Discount Rate—The discount rate is used in calculating the present value of benefits, which are based on projections of benefit payments to be made in the future. The objective in selecting the discount rate is to measure the single amount that, if invested at the measurement date in a portfolio of high-quality debt instruments, would provide the necessary future cash flows to pay the accumulated benefits when due;
- Expected Return on Plan Assets ("EROA")—Management projects the future return on plan assets considering prior performance, but primarily based upon the plans' mix of assets and expectations for the long-term returns on those asset classes. These projected returns reduce the net benefit costs we record currently;
- Rate of Compensation Increase—Management projects employees' pay increases, which are used to project employees' pension benefits at retirement; and
- Health Care Cost Trend Rate—Management projects the expected increases in the cost of health care.

The discount rate assumption, which is determined for the pension and postretirement benefit plans independently, is subject to change each year, consistent with changes in applicable high-quality, long-term corporate bond indices. At year end 2011, we began using an approach that ap proximates the process of settlement of obligations tailored to the plans' expected cash flows by matching the plans' cash flows to the coupons and expected maturity values of individually selected bonds. The yield curve was developed for a portfolio containing the majority of United States-issued AA-graded non-callable (or callable with make-whole provisions) corporate bonds. For each plan, the discount rate was developed as the level equivalent rate that would yield the same present value as using spot rates aligned with the projected benefit payments. The discount rate for determining pension benefit obligations was 5.12%, 4.17% and 5.02% at December 31, 2013, 2012 and 2011, respectively. The discount rate for determining other post-retirement benefit obligations was 5.10%, 4.16% and 5.05% at December 31, 2013, 2012 and 2011, respectively.

In selecting an expected return on plan assets, we considered tax implications, past performance and economic forecasts for the types of investments held by the plans. The long-term EROA assumption used in calculating pension cost was 7.49% for 2013, 7.75%, for 2012 and 7.90% for 2011. The weighted average EROA assumption used in calculating other postretirement benefit costs was 6.99% for 2013, 7.41% for 2012 and 7.60% for 2011.

The asset allocations for the Company's U.S. pension plan at December 31, 2013 and 2012, by asset category, are as follows:

Asset category	**Target Allocation 2014**	**Percentage of Plan Assets At December 31, 2013**	**2012**
Equity securities	52%	64%	70%
Fixed income	40%	35%	30%
Real Estate	6%	—	—
Real estate investment trusts ("REITs")	2%	1%	—
Total	100%	100%	100%

The investment policy guidelines of the pension plan require that the fixed income portfolio has an overall weighted average credit rating of AA or better by Standard & Poor's and the minimum credit quality for fixed income securities must be BBB- or better. Up to 20% of the portfolio may be invested in collateralized mortgage obligations backed by the United States Government.

The Company's other postretirement benefit plans are partially funded. The asset allocations for the Company's other postretirement benefit plans at December 31, 2013 and 2012, by asset category, are as follows:

Asset category	Target Allocation 2014	Percentage of Plan Assets At December 31, 2013	2012
Equity securities	47%	48%	59%
Fixed income	53%	52%	38%
REITs	—	—	3%
Total	100%	100%	100%

The Company's investment policy, and related target asset allocation, is evaluated periodically through asset liability studies. The studies consider projected cash flows of maturity liabilities, projected asset class return risk, and correlation and risk tolerance.

The pension and postretirement welfare plan trusts investments include debt and equity securities held either directly or through commingled funds. The trustee for the Company's defined benefit pension and post retirement welfare plans uses independent valuation firms to calculate the fair value of plan assets. Additionally, the company independently verifies the assets values. Approximately 56.1% of the assets are valued using the quoted market price for the assets in an active market at the measurement date, while 43.9% of the assets are valued using other inputs.

In selecting a rate of compensation increase, we consider past experience in light of movements in inflation rates. Our rate of compensation increase was 3.15% for 2013, 3.19% for 2012 and 3.25% for 2011.

In selecting health care cost trend rates, we consider past performance and forecasts of increases in health care costs. Our health care cost trend rate used to calculate the periodic cost was 7.25% in 2013 gradually declining to 5.00% in 2019 and thereafter.

Assumed health care cost trend rates have a significant effect on the amounts reported for the other postretirement benefit plans. The health care cost trend rate is based on historical rates and expected market conditions. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

Change in Actuarial Assumption	Impact on Other Postretirement Benefit Obligation at December 31, 2013	Impact on 2013 Total Service and Interest Cost Components
	(in thousands)	
Increase assumed health care cost trend by 1%	$ 72,238	$ 7,367
Decrease assumed health care cost trend by 1%	$ 60,261	$ 5,974

We will use a discount rate and EROA of 5.12% and7.49%, respectively, for estimating our 2014 pension costs. Additionally, we will use a discount rate and EROA of 5.10% and 6.99%, respectively, for estimating our 2014 other postretirement benefit costs. A decrease in the discount rate or the EROA would increase our pension expense. Our 2012 and 2011 pension and postretirement costs, including such expenses charged to our discontinued operations, were $72.2 million and $87.3 million, respectively. The Company expects to make pension and postretirement benefit contributions to the plan trusts of $49.3 million, $64.0 million, $68.8 million $67.5 and $62.3 million in 2014, 2015, 2016, 2017 and 2018, respectively. Actual amounts contributed could change significantly from these estimates. The assumptions are reviewed annually and at any interim re-measurement of the plan obligations. The impact of assumption changes is reflected in the recorded pension and postretirement benefit amounts as they occur, or over a period of time if allowed under applicable accounting standards. As these assumptions change from period to period, recorded pension and postretirement benefit amounts and funding requirements could also change.

New Accounting Standards

Balance Sheet Offsetting

In December 2011, the Financial Accounting Standards Board ("FASB") issued accounting guidance to amend the existing disclosure requirements for offsetting financial assets and liabilities to enhance current disclosures, as well as to improve comparability of balance sheets prepared under U.S. Generally Accepted Accounting Principles ("GAAP") and International Financial Reporting Standards ("IFRS"). In January 2013, the FASB issued additional guidance on the scope of these disclosures. The revised disclosure guidance applies to derivative instruments and securities borrowing and lending transactions that are either offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement. The revised disclosure guidance is effective on a retrospective basis for interim and annual periods beginning January 1, 2013. As this guidance provides for additional disclosure requirements only, the adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Testing Indefinite-Lived Intangible Assets for Impairment

In July 2012, the FASB updated the accounting guidance related to testing indefinite-lived intangible assets for impairment. This update permits an entity to perform a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test under current guidance. This update is effective for annual and interim impairment tests performed by the Company beginning on January 1, 2013. The adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Amounts Reclassified Out of Accumulated Other Comprehensive Income ("AOCI")

In February 2013, the FASB updated accounting guidance to add new disclosure requirements for items reclassified out of AOCI. The update does not change the current requirements for reporting net income or other comprehensive income in financial statements. However, the amendments require an entity to provide information about the amounts reclassified out of AOCI by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is required to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures that provide additional detail about those amounts. The amendments are required to be applied prospectively for interim and annual reporting periods beginning January 1, 2013. As this guidance provides for additional disclosure requirements only, the adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Presentation of an Unrecognized Tax Benefit When a Net Operating Loss ("NOL") or Tax Credit Carryforward Exists

In July 2013, the FASB updated the income tax accounting guidance to resolve diversity in presentation by addressing when an entity should present unrecognized tax benefits on a net basis if there are available NOL or tax credit carryforwards. The update requires an entity to net unrecognized tax benefits against the deferred tax assets for same-jurisdiction NOL or similar tax loss carryforwards or tax credit carryforwards. Gross presentation will be required only if such carryforwards are not available or would not be used by the entity to settle any additional income taxes resulting from disallowance of the uncertain tax position. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The amendments are required to be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application and early adoption are permitted. The Company adopted this guidance effective June 30, 2013.

Inclusion of the Fed Funds Effective Swap Rate as a Benchmark Interest Rate for Hedge Accounting Purposes

In July 2013, the FASB updated the derivatives and hedging accounting guidance to provide for the inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate ("OIS")) as a US benchmark interest rate for hedge accounting purposes, in addition to interest rates on direct Treasury obligations of the US government ("UST") and the London Interbank Offered Rate ("LIBOR"). The amendment also removes the restriction on using different benchmark rates for similar hedges. The update is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. As the Company has not entered into new or redesignated hedging relationships, the adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Fair Value Measurements

In May 2011, the Financial Accounting Standards Board ("FASB") issued updated accounting guidance related to fair value measurements and disclosures that result in common fair value measurements and disclosures between U.S. Generally Accepted Accounting Principles ("GAAP") and International Financial Reporting Standards. This new guidance amends current fair value measurement and disclosure guidance to increase transparency around valuation inputs and investment categorization. This guidance was effective for interim and annual periods beginning on January 1, 2012 and was required to be applied prospectively. The adoption of this guidance did not have a significant impact on the Company's results of operations, financial position or cash flows.

Comprehensive Income

In June 2011, the FASB issued guidance on the presentation of comprehensive income. The new guidance allows an entity to present components of net income and other comprehensive income in either one continuous statement or in two separate, but consecutive statements. The new guidance eliminates the current option to report other comprehensive income and its components in the statement of changes in equity. While the new guidance changes the presentation of comprehensive income, there are no changes to the components that are recognized in net income or other comprehensive income under current accounting guidance. In December 2011, the FASB deferred the requirement to present reclassification adjustments of other comprehensive income on the face of the income statement. This new guidance on the presentation of comprehensive income was effective for the Company beginning on January 1, 2012. As the Company already presented the components of net income and other comprehensive income in one continuous statement prior to the adoption of the guidance, the adoption of the new guidance did not have an impact on its results of operations, financial position or cash flows.

Testing Goodwill for Impairment

In September 2011, the FASB updated the accounting guidance related to testing goodwill for impairment. This update permits an entity to assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test that is currently in place. Under the new guidance, an entity will not be required to calculate the fair value of a reporting unit unless the entity determines, based on the qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. This update is effective for annual and interim goodwill impairment tests performed by the Company beginning on January 1, 2012. The adoption of this update to the guidance did not have a significant impact on the Company's results of operations, financial position or cash flows.

Revenue Arrangements with Multiple Deliverables

In October 2009, the Financial Accounting Standards Board ("FASB") issued authoritative guidance that amends existing guidance for identifying separate deliverables in a revenue-generating transaction where multiple deliverables exist, and provides guidance for allocating and recognizing revenue based on those separate deliverables. This guidance was effective for the Company beginning on January 1, 2011 and is required to be applied prospectively to new or significantly modified revenue arrangements. The adoption of this guidance did not have a significant impact on the Company's results of operations, financial position or cash flows.

Business Combinations

In December 2010, the FASB clarified the requirements for reporting of pro forma revenue and earnings disclosures for business combinations. The accounting update specified that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments also expanded the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments are effective prospectively for business combinations finalized after January 1, 2011. As this guidance clarifies and provides for additional disclosure requirements only, the adoption of this guidance has not had a material impact on the Company's results of operations, financial position or cash flows.

Intangibles—Goodwill

In December 2010, the FASB issued authoritative guidance that modifies step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. The update requires that for those reporting units, an entity is required to perform step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. In determining whether it is more likely than not that a goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. The qualitative factors are consistent with existing authoritative guidance, which requires that goodwill of a reporting unit be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. This guidance was effective for the Company beginning on January 1, 2011. The adoption of this update did not have a significant impact on the Company's results of operations, financial position or cash flows.

The following recently issued accounting standards are not yet required to be adopted by the Company or included in the consolidated results of operations or financial position of the Company: Obligations Resulting from Joint and Several Liability Arrangements

In February 2013, the FASB issued guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date. Examples of obligations within the scope of the updated guidance include debt arrangements, other contractual obligations and settled litigation and judicial rulings. The update requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date as the sum of the following: (a) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. The updated guidance also includes additional disclosures regarding the nature and amount of the obligation, as well as other information about those obligations. The update is effective on a retrospective basis for interim and annual periods beginning January 1, 2014. Early adoption is permitted. The Company is evaluating the specific provisions of the updated guidance, but does not expect the adoption of this guidance to have a significant impact on the Company's results of operations, financial position or cash flows.

Foreign Currency Matters

In June 2013, the FASB issued guidance for a parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. The amendments resolve differing views in practice and apply to the release of the cumulative translation adjustment into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or a business within a foreign entity. The update is effective prospectively for interim and annual periods beginning January 1, 2014. Early adoption is permitted. The Company does not expect the adoption of the updated guidance to have a significant impact on its results of operations, financial position or cash flows.

Service Concession Arrangements

In January 2014, the FASB issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide them and at what price. The grantor also controls, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in the arrangement should not be recognized as property, plant and equipment of the operating entity. This update should be applied on a modified retrospective basis to service concession arrangements that exist at the beginning of an entity's fiscal year of adoption. This requires the cumulative effect of applying the update to be recognized as an adjustment to the opening retained earnings balance for the annual period of adoption. The update is effective for interim and annual periods beginning January 1, 2015. Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk associated with changes in commodity prices, equity prices and interest rates. We are exposed to risks from changes in interest rates as a result of our issuance of variable and fixed rate debt and commercial paper. We manage our interest rate exposure by limiting our variable rate exposure and by monitoring the effects of market changes in interest rates. We also have the ability to enter into financial derivative instruments, which could include instruments such as, but not limited to, interest rate swaps, forward starting swaps, swaptions and U.S. Treasury lock agreements to manage and mitigate interest rate risk exposure. As of December 31, 2013, a hypothetical increase of interest rates by 1% associated with our short-term borrowings would result in a $6.3 million decrease in our pre-tax earnings.

In July 2010, we entered into an interest rate swap agreement with a notional amount of $100.0 million. This agreement effectively converted the interest on $100.0 million of outstanding 6.085% fixed rate debt maturing 2017 to a variable rate of six-month LIBOR plus 3.422%. We entered into this interest rate swap to mitigate interest cost at the parent company relating to debt that was incurred by our prior owners and was not used in any manner to finance the cash needs of our subsidiaries. For the years ended December 31, 2013 and 2012, the interest rate swap reduced interest expense by $2.0 and $2.4 million, respectively. As the swap interest rates are fixed through April 2014, a hypothetical 1% increase in the interest rates associated with the interest swap agreement would result in a $0.3 million decrease on our pre-tax earnings for the year ended December 31, 2013. This calculation holds all other variables constant and assumes only the discussed changes in interest rates.

Our risks associated with price increases for chemicals, electricity and other commodities are reduced through contractual arrangements and the ability to recover price increases through rates. Non-performance by these commodity suppliers could have a material adverse impact on our results of operations, financial position and cash flows.

The market price of our common stock may experience fluctuations, many of which are unrelated to our operating performance. In particular, our stock price may be affected by general market movements as well as developments specifically related to the water and wastewater industry. These could include, among other things, interest rate movements, quarterly variations or changes in financial estimates by securities analysts and governmental or regulatory actions. This volatility may make it difficult for us to access the capital markets in the future through additional offerings of our common stock, regardless of our financial performance, and such difficulty may preclude us from being able to take advantage of certain business opportunities or meet business obligations.

We are exposed to credit risk through our water, wastewater and other water-related activities for both our Regulated Businesses and Market-Based Operations. Our Regulated Businesses serve residential, commercial, industrial and other customers while our Market-Based Operations engage in business activities with developers, government entities and other customers. Our primary credit risk is exposure to customer default on contractual obligations and the associated loss that may be incurred due to the non-payment of customer accounts receivable balances. Our credit risk is managed through established credit and collection policies which are in compliance with applicable regulatory requirements and involve monitoring of customer exposure and the use of credit risk mitigation measures such as letters of credit or prepayment arrangements. Our credit portfolio is diversified with no significant customer or industry concentrations. In addition, our Regulated Businesses are generally able to recover all prudently incurred costs including uncollectible customer accounts receivable expenses and collection costs through rates.

The Company's retirement trust assets are exposed to the market prices of debt and equity securities. Changes to the retirement trust asset value can impact the Company's pension and other benefits expense, funded status and future minimum funding requirements. Our risk is reduced through our ability to recover pension and other benefit costs through rates. In addition, pension and other benefits liabilities decrease as fixed income asset values decrease (fixed income yields rise) since the rate at which we discount pension and other retirement trust asset future obligations is highly correlated to fixed income yields.

We are also exposed to a potential national economic recession or further deterioration in local economic conditions in the markets in which we operate. The credit quality of our customer accounts receivable is dependent on the economy and the ability of our customers to manage through unfavorable economic cycles and other market changes. In addition, as a result of the downturn in the economy and heightened sensitivity of the impact of additional rate increases on certain customers, there can be no assurances that regulators will grant sufficient rate authorizations. Therefore our ability to fully recover operating expense, recover our investment and provide an appropriate return on invested capital made in our Regulated Businesses may be adversely impacted.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
American Water Works Company, Inc.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations and comprehensive income, of cash flows, and of changes in stockholders' equity, present fairly, in all material respects, the financial position of American Water Works Company, Inc. and Subsidiary Companies at December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying notes are an integral part of these consolidated financial statements.

Note 1: Organization and Operation

American Water Works Company, Inc. ("AWW") and its subsidiaries (collectively referred to herein as the "Company") is the holding company for regulated and market-based subsidiaries throughout the United States of America and two Canadian provinces. The regulated subsidiaries included in continuing operations provide water and wastewater services as public utilities. These regulated subsidiaries are operationally segregated into 16 U.S. states in which the Company operates regulated utilities. The market-based subsidiaries include various lines of business including Homeowner Services, which provides water and sewer line protection plans for homeowners, and the Contract Operations group, which conducts operation and maintenance of water and wastewater facilities for the U.S. Military, municipalities and the food and beverage industry.

Note 2: Significant Accounting Policies

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of AWW and its subsidiaries. Intercompany balances and transactions between subsidiaries have been eliminated. The Company uses the equity method to report its investments in two joint venture investments in each of which the Company holds a 50% voting interest and cannot exercise control over the operations and policies of the investments. Under the equity method, the Company records its interests as an investment and its percentage share of earnings as earnings or losses of investee.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. The Company considers benefit plan assumptions; the carrying values of goodwill and other long-lived assets, including regulatory assets; revenue recognition; and accounting for income taxes to be its critical accounting estimates. The Company's significant estimates that are particularly sensitive to change in the near term are amounts reported for pension and other postemployment benefits, contingency-related obligations and goodwill.

Regulation

The Company's regulated utilities are subject to economic regulation by the public utility commissions and the local governments of the states in which they operate (the "Regulators"). These Regulators have allowed recovery of costs and credits which the Company has recorded as regulatory assets and liabilities. Accounting for future recovery of costs and credits as regulatory assets and liabilities is in accordance with authoritative guidance applicable to those companies whose rates are established by or are subject to approval by an independent third-party regulator. Regulated utilities defer costs and credits on the balance sheet as regulatory assets and liabilities when it is probable that those costs and credits will be recognized in the rate making process in a period different from the period in which they would have been reflected in operations by a market-based company. These deferred regulatory assets and liabilities are then reflected in the statement of operations in the period in which the costs and credits are reflected in the rates charged for service. (See Note 6)

Property, Plant and Equipment

Property, plant and equipment consist primarily of utility plant. Additions to utility plant and replacements of retirement units of property are capitalized. Costs include material, direct labor and such indirect items as engineering and supervision, payroll taxes and benefits, transportation and an allowance for funds used during construction. The costs incurred to acquire and internally develop computer software for internal use are capitalized as a unit of property. The carrying value of these costs amounted to $303,798 and $155,221 at December 31, 2013 and 2012, respectively. The 2013 increase was primarily due to the implementation of new billing and asset management systems. The cost of repairs; maintenance, including planned major maintenance activities; and minor replacements of property is charged to maintenance expense as incurred.

When units of property are replaced, retired or abandoned, the recorded value thereof is credited to the asset account and charged to accumulated depreciation. To the extent the Company recovers cost of removal or other retirement costs through rates after the retirement costs are incurred, a regulatory asset is recorded. In some cases, the Company recovers retirement costs through rates during the life of the associated asset and before the costs are incurred. These amounts result in a regulatory liability being reported based on the amounts previously recovered through customer rates, until the costs to retire those assets are incurred.

The cost of property, plant and equipment is depreciated using the straight-line average remaining life method.

Nonutility property consists primarily of buildings and equipment utilized by the Company for internal operations. This property is stated at cost, net of accumulated depreciation calculated using the straight-line method over the estimated useful lives of the assets, ranging from three to 50 years.

Cash and Cash Equivalents

Substantially all cash is invested in interest-bearing accounts. All highly liquid investments with a maturity of three months or less when purchased are considered to be cash equivalents.

Prior to January 1, 2012, the Company had overdraft protection provided by a revolving credit line with PNC Bank, N.A. Bank overdrafts on these accounts were reported as short-term debt and the change in the overdraft balance was reported as financing activities in the accompanying Consolidated Statements of Cash Flows. The Company did not renew this credit line at December 31, 2011. Accordingly, the Company’s outstanding checks on its cash accounts with PNC Bank, N.A. are classified as of January 1, 2012 and forward as other current liabilities in the accompanying Consolidated Balance Sheets, and changes in those accounts are included in operating activities for 2013 and 2012 in the accompanying Consolidated Statements of Cash Flows.

Restricted Funds

Restricted funds primarily represent proceeds from financings for the construction and capital improvement of facilities and deposits for future services under operation and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred. Restricted funds expected to be released within 12 months subsequent to year end are classified as current.

Accounts Receivable

Accounts receivable include regulated utility customer accounts receivable, which represent amounts billed to water and wastewater customers on a cycle basis. Credit is extended based on the guidelines of the applicable Regulators and collateral is generally not required. Also included are market-based trade accounts receivable and non-utility customer receivables of the regulated subsidiaries. Unbilled receivables are accrued when service has been provided but has not been billed to customers.

Allowance for Uncollectible Accounts

Allowances for uncollectible accounts are maintained for estimated probable losses resulting from the Company’s inability to collect receivables from customers. Accounts that are outstanding longer than the payment terms are considered past due. A number of factors are considered in determining the allowance for uncollectible accounts, including the length of time receivables are past due and previous loss history. The Company writes off accounts when they become uncollectible. (See Note 5)

Materials and Supplies

Materials and supplies are stated at the lower of cost or net realizable value. Cost is determined using the average cost method.

Goodwill

Goodwill is primarily associated with the acquisitions of AWW in 2003 and E’town Corporation in 2001 (the “Acquisitions”) and has been assigned to reporting units based on the fair values at the date of the Acquisitions. The Regulated Businesses segment is a single reporting unit. In the Market-Based Operations segment, the business is comprised of four reporting units for its market-based services. Goodwill is reviewed annually or more frequently if changes in circumstances indicate the carrying value may not be recoverable. Annual impairment reviews are performed in the fourth quarter of the calendar year, in conjunction with the timing of the completion of the Company’s annual strategic business plan.

The Company considers the carrying value of goodwill to be one of its critical accounting estimates. The Company believes the assumptions and other considerations used to value goodwill to be appropriate. However, if experience differs from the assumptions and considerations used in its analysis, the resulting change could have a material adverse impact on the consolidated financial s tatements.

No impairment charge was recorded in the Company's continuing operations for the years ended December 31, 2013, 2012 and 2011.

Long-Lived Assets

Long-lived assets include land, buildings, equipment and long-term investments. Long-lived assets, other than investments and land, are depreciated over their estimated useful lives, and are reviewed for impairment whenever changes in circumstances indicate the carrying value of the asset may not be recoverable. Such circumstances would include items such as a significant decrease in the market value of a long-lived asset, a significant adverse change in the manner the asset is being used or planned to be used or in its physical condition, or a history of operating or cash flow losses associated with the use of the asset. In addition, changes in the expected useful life of these long-lived assets may also be an impairment indicator. When such events or changes occur, the Company estimates the fair value of the asset from future cash flows expected to result from the use and, if applicable, the eventual disposition of the asset and compares that to the carrying value of the asset. If the carrying value is greater than the fair value, an impairment loss is recorded.

The Company considers the fair value of long-lived assets to be one of its critical accounting estimates. The Company believes the assumptions and other considerations used to evaluate the carrying value of long-lived assets are appropriate. However, if actual experience differs from the assumptions and considerations used in its estimates, the resulting change could have a material adverse impact on the consolidated financial statements.

The key variables to determine value include assumptions regarding sales volume, rates, operating costs, labor and other benefit costs, capital additions, assumed discount rates and other economic factors. These variables require significant management judgment and include inherent uncertainties , since they are forecasting future events. If such assets are considered impaired, an impairment loss is recognized equal to the amount by which the asset's carrying value exceeds its fair value.

The long-lived assets of the regulated utility subsidiaries are grouped on a separate entity basis for impairment testing as they are integrated state-wide operations that do not have the option to curtail service and generally have uniform tariffs. A regulatory asset is charged to earnings if and when future recovery in rates of that asset is no longer probable.

The Company holds other investments including investments in privately held companies and investments in joint ventures accounted for using the equity method. The Company's investments in privately held companies and joint ventures are classified as other long-term assets.

The fair values of long-term investments are dependent on the financial performance and solvency of the entities in which the Company invests, as well as volatility inherent in the external markets. If such assets are considered impaired, an impairment loss is recognized equal to the amount by which the asset's carrying value exceeds its fair value.

Advances for Construction and Contributions in Aid of Construction

Regulated utility subsidiaries may receive advances for construction ("a dvances") and contributions in aid of construction ("contributions") from customers, home builders and real estate developers to fund construction necessary to extend service to new areas.

Advances are refundable for limited periods of time as new customers begin to receive service or other contractual obligations are fulfilled. Included in other current liabilities at December 31, 2013 and 2012 in the accompanying Consolidated Balance Sheets are estimated refunds of $ 17,308 and $19,698, respectively. Those amounts represent expected refunds during the next 12-month period.

Advances that are no longer refundable are reclassified to contributions. Contributions are permanent collections of plant assets or cash for a particular construction project. For ratemaking purposes, the amount of such contributions generally serves as a rate base reduction since the contributions represent non-investor supplied funds.

Generally, the Company depreciates utility plant funded by contributions and amortizes its contributions balance as a reduction to depreciation expense, producing a result which is functionally equivalent to reducing the original cost of the utility plant for the contributions. In accordance with applicable regulatory guidelines, some of the Company's subsidiaries do not amortize contributions, and any contribution received remains on the balance sheet indefinitely. Amortization of contributions in aid of construction was $22,363, $20,979 and $18,327 for the years ended December 31, 2013, 2012 and 2011, respectively.

Recognition of Revenues

Revenues of the regulated utility subsidiaries are recognized as water and wastewater services are provided, and include amounts billed to customers on a cycle basis and unbilled amounts based on estimated usage from the date of the meter reading associated with the latest customer invoice to the end of the accounting period.

The Company has agreements with the United States Government to operate and maintain water and wastewater systems at various military bases pursuant to 50-year contracts ("military agreements"). These contracts also include construction components that are accounted for separately from the operations and management components. The military agreements are subject to periodic price redetermination adjustments and modifications for changes in circumstance. Additionally, the Company has agreements ranging in length from two to 40 years with various industries and municipalities to operate and maintain water and wastewater systems ("O&M agreements"). Revenue from operations and management services are recognized as services are provided. (See Note 15)

Construction Contracts

Revenues from construction projects are recognized over the contract term based on the estimated percentage of completion during the period compared to the total estimated services to be provided over the entire contract. Losses on contracts are recognized during the period in which the loss first becomes probable and estimable. Revenues recognized during the period in excess of billings on construction contracts are recorded as unbilled revenue. Billings in excess of revenues recognized on construction contracts are recorded as other current liabilities until the recognition criteria are met. Changes in contract performance and related estimated contract profitability may result in revisions to costs and revenues and are recognized in the period in which revisions are determined.

Income Taxes

AWW and its subsidiaries participate in a consolidated federal income tax return for U.S. tax purposes. Members of the consolidated group are charged with the amount of federal income tax expense determined as if they filed separate returns.

Certain income and expense items are accounted for in different time periods for financial reporting than for income tax reporting purposes. The Company provides deferred income taxes on the difference between the tax basis of assets and liabilities and the amounts at which they are carried in the financial statements. These deferred income taxes are based on the enacted tax rates expected to be in effect when these temporary differences are projected to reverse. In addition, the regulated utility subsidiaries recognize regulatory assets and liabilities for the effect on revenues expected to be realized as the tax effects of temporary differences, previously flowed through to customers, reverse.

Investment tax credits have been deferred by the regulated utility subsidiaries and are being amortized to income over the average estimated service lives of the related assets.

The Company recognizes accrued interest and penalties related to tax positions as a component of income tax expense and accounts for sales tax collected from customers and remitted to taxing authorities on a net basis.

Allowance for Funds Used During Construction ("AFUDC")

AFUDC is a non-cash credit to income with a corresponding charge to utility plant that represents the cost of borrowed funds or a return on equity funds devoted to plant under construction. The regulated utility subsidiaries record AFUDC to the extent permitted by the Regulators.

Environmental Costs

The Company's water and wastewater operations are subject to federal, state, local and foreign requirements relating to environmental protection, and as such, the Company periodically becomes subject to environmental claims in the normal course of business. Environmental expenditures that relate to current operations or provide a future benefit are expensed or capitalized as appropriate. Remediation costs that relate to an existing condition caused by past operations are accrued, on an undiscounted basis, when it is probable that these costs will be incurred and can be reasonably estimated. Remediation costs accrued amounted to $3,300 and $4,400 at December 31, 2013 and 2012, respectively. The accrual relates entirely to a conservation agreement entered into by a subsidiary of the Company with the National Oceanic and Atmospheric Administration ("NOAA") requiring the Company to, among other provisions, implement certain measures to protect the steelhead trout and its habitat in the Carmel River watershed in the state of California. The Company has agreed to pay $1,100 annually from 2010 to 2016. The Company pursues recovery of incurred costs through all appropriate means, including regulatory recovery through customer rates. The Company's regulatory assets at December 31, 2013 and 2012 include $8,027 and $8,656, respectively, related to the NOAA agreement.

Derivative Financial Instruments

The Company uses derivative financial instruments for purposes of hedging exposures to fluctuations in interest rates. These derivative contracts are entered into for periods consistent with the related underlying exposures and do not constitute positions independent of those exposures. The Company does not enter into derivative contracts for speculative purposes and does not use leveraged instruments.

All derivatives are recognized on the balance sheet at fair value. On the date the derivative contract is entered into, the Company may designate the derivative as a hedge of the fair value of a recognized asset or liability (fair-value hedge) or a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability (cash-flow hedge).

Changes in the fair value of a fair-value hedge, along with the gain or loss on the underlying hedged item, are recorded in current-period earnings. The effective portion of gains and losses on cash-flow hedges are recorded in other comprehensive income, until earnings are affected by the variability of cash flows. Any ineffective portion of designated hedges is recognized in current-period earnings.

Cash flows from derivative contracts are included in net cash provided by operating activities.

New Accounting Standards

The following recently issued accounting standards have been adopted by the Company and have been included in the consolidated results of operations, financial position or footnotes of the accompanying Consolidated Financial Statements:

Balance Sheet Offsetting

In December 2011, the Financial Accounting Standards Board ("FASB") issued accounting guidance to amend the existing disclosure requirements for offsetting financial assets and liabilities to enhance current disclosures, as well as to improve comparability of balance sheets prepared under U.S. Generally Accepted Accounting Principles ("GAAP") and International Financial Reporting Standards ("IFRS"). In January 2013, the FASB issued additional guidance on the scope of these disclosures. The revised disclosure guidance applies to derivative instruments and securities borrowing and lending transactions that are either offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement. The revised disclosure guidance is effective on a retrospective basis for interim and annual periods beginning January 1, 2013. As this guidance provides for additional disclosure requirements only, the adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Testing Indefinite-Lived Intangible Assets for Impairment

In July 2012, the FASB updated the accounting guidance related to testing indefinite-lived intangible assets for impairment. This update permits an entity to perform a qualitative assessment to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test under current guidance. This update is effective for annual and interim impairment tests performed by the Company beginning on January 1, 2013. The adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Amounts Reclassified Out of Accumulated Other Comprehensive Income ("AOCI")

In February 2013, the FASB updated accounting guidance to add new disclosure requirements for items reclassified out of AOCI. The update does not change the current requirements for reporting net income or other comprehensive income in financial statements. However, the amendments require an entity to provide information about the amounts reclassified out of AOCI by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is required to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures that provide additional detail about those amounts. The amendments are required to be applied prospectively for interim and annual reporting periods beginning January 1, 2013. As this guidance provides for additional disclosure requirements only, the adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Presentation of an Unrecognized Tax Benefit When a Net Operating Loss ("NOL") or Tax Credit Carryforward Exists

In July 2013, the FASB updated the income tax accounting guidance to resolve diversity in presentation by addressing when an entity should present unrecognized tax benefits on a net basis if there are available NOL or tax credit carryforwards. The update requires an entity to net unrecognized tax benefits against the deferred tax assets for same-jurisdiction NOL or similar tax loss carryforwards or tax credit carryforwards. Gross presentation will be required only if such carryforwards are not available or would not be used by the entity to settle any additional income taxes resulting from disallowance of the uncertain tax position. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. The amendments are required to be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application and early adoption are permitted. The Company adopted this guidance effective June 30, 2013. (See Note 13)

Inclusion of the Fed Funds Effective Swap Rate as a Benchmark Interest Rate for Hedge Accounting Purposes

In July 2013, the FASB updated the derivatives and hedging accounting guidance to provide for the inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate ("OIS")) as a US benchmark interest rate for hedge accounting purposes, in addition to interest rates on direct Treasury obligations of the US government ("UST") and the London Interbank Offered Rate ("LIBOR"). The amendment also removes the restriction on using different benchmark rates for similar hedges. The update is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. As the Company has not entered into new or redesignated hedging relationships, the adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

The following recently announced accounting standards are not yet required to be adopted by the Company or included in the consolidated results of operations or financial position of the Company:

Obligations Resulting from Joint and Several Liability Arrangements

In February 2013, the FASB issued guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date. Examples of obligations within the scope of the updated guidance include debt arrangements, other contractual obligations and settled litigation and judicial rulings. The update requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date as the sum of the following: (a) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. The updated guidance also includes additional disclosures regarding the nature and amount of the obligation, as well as other information about those obligations. The update is effective on a retrospective basis for interim and annual periods beginning January 1, 2014. Early adoption is permitted. The Company is evaluating the specific provisions of the updated guidance, but does not expect the adoption of this guidance to have a significant impact on the Company's results of operations, financial position or cash flows.

Foreign Currency Matters

In June 2013, the FASB issued guidance for a parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. The amendments resolve differing views in practice and apply to the release of the cumulative translation adjustment into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or a business within a foreign entity. The update is effective prospectively for interim and annual periods beginning January 1, 2014. Early adoption is permitted. The Company does not expect the adoption of the updated guidance to have a significant impact on its results of operations, financial position or cash flows.

Service Concession Arrangements

In January 2014, the FASB issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide them and at what price. The grantor also controls, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in the arrangement should not be recognized as property, plant and equipment of the operating entity. This update should be applied on a modified retrospective basis to service concession arrangements that exist at the beginning of an entity's fiscal year of adoption. This requires the cumulative effect of applying the update to be recognized as an adjustment to the opening retained earnings balance for the annual period of adoption. The update is effective for interim and annual periods beginning January 1, 2015. Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Reclassifications

Certain reclassifications have been made to conform previously reported data to the current presentation.

Note 3: Acquisitions and Divestitures

Acquisitions

During 2013, the Company closed on 15 acquisitions of various regulated water and wastewater systems for a total aggregate net purchase price of $23,658. Assets acquired (primarily utility plant) totaled $67,403, and liabilities assumed totaled $43,745, including $25,654 of contributions in aid of construction and assumed debt of $12,673. Included in these totals was the Company's November 14, 2013 acquisition of all of the capital stock of Dale Service Corporation ("Dale"), a regulated wastewater utility company, for a total cash purchase price of $5,090 (net of cash acquired of $6,910), plus assumed liabilities. The Dale acquisition added approximately twenty thousand wastewater customers to the Company's existing water services footprint in Northern Virginia. The Dale acquisition was accounted for as a business combination; accordingly, operating results from November 14, 2013 were included in the Company's results of operations. The purchase price was allocated to the net tangible and intangible assets based upon their estimated fair values at the date of acquisition. The Company's regulatory practice has been followed whereby property, plant and equipment (rate base) is considered fair value for business combination purposes. Similarly, regulatory assets and liabilities acquired have been recorded at book value and are subject to regulatory approval where applicable. The acquired debt has been valued in a manner consistent with the Company's Level 3 pre-acquisition debt. (See Note 17) Non-cash assets acquired in the Dale acquisition (primarily utility plant) totaled $40,999; liabilities assumed totaled $35,909, including debt assumed of $12,570 and contributions of $19,163. The pro forma impact of this acquisition would not have been material to the Company's results of operations for the years ended December 31, 2013, 2012 and 2011, respectively.

During 2012, the Company closed on 10 acquisitions of various regulated water and wastewater systems for a total aggregate purchase price of $44,560. Included in this total was the Company's May 1, 2012 acquisition of all of the capital stock of Aqua New York, Inc. for a total cash purchase price of $36,688 plus assumed liabilities. Assets acquired in the Aqua New York acquisition totaled $102,727, including $59,139 of plant, $27,400 of regulatory assets, and $12,181 of goodwill; liabilities assumed totaled $66,039, including long-term debt of $25,215, $11,885 of regulatory liabilities, $15,424 of deferred taxes, $1,708 of other liabilities, $1,060 of contributions in aid of construction and $9,710 of pension and postretirement welfare liabilities. Assets acquired (primarily utility plant) in the other nine acquisitions during 2012 totaled $12,514; liabilities assumed totaled $4,642.

During 2011, the Company closed on nine acquisitions of regulated water and wastewater systems for an aggregate purchase price of $7,220. The purchase price for each acquisition was allocated to the net tangible and intangible assets based upon their estimated fair values at the acquisition date. Assets acquired totaled $12,919, of which $12,814 was utility plant. Liabilities assumed totaled $4,945, including contributions in aid of construction of $3,847 . The Company recorded gains on acquisitions during 2011 totaling $754.

Divestitures

In January 2012, the Company completed the sale of its Arizona and New Mexico subsidiaries. After post-close adjustments, net proceeds from the sale totaled $458,860, and the Company recorded a pretax loss on sale of $2,198.

In May 2012, the Company completed the sale of its Ohio subsidiary. After post-close adjustments, net proceeds from the sale totaled $102,154, and the Company recorded a pretax loss on sale of $4,095.

In December 2011, the Company completed the sale of its Applied Water Management subsidiary, part of its Market-Based Operations segment. Proceeds from the sale totaled $2,923. The Company recorded a pretax loss on sale of $3,126 in 2011. In 2012, the Company recorded an additional pretax loss of $114 for certain post-close adjustments.

In June 2011, the Company completed the sale of the assets of its Texas subsidiary for proceeds of $6,245. In the first quarter of 2011, the Company recognized an after-tax impairment charge of $552 for parent company goodwill allocated to the Texas subsidiary.

Operating results and the financial position of the five subsidiaries named above are included in the accompanying financial statements as discontinued operations.

A summary of discontinued operations presented in the Consolidated Statements of Operations and Comprehensive Income follows:

	Years Ended December31,		
	2013	2012	2011
Operating revenues	$ 0	$ 19,377	$ 173,447
Total operating expenses, net	0	27,630	147,012
Operating income (loss)	0	(8,253)	26,435
Other income (expense), net	0	(168)	(270)
Income (loss) from discontinued operations before tax	0	(8,421)	26,165
Provision for income taxes	0	7,759	21,481
Income (loss) from discontinued operations, net of tax	$ 0	$ (16,180)	$ 4,684

The provision for income taxes of discontinued operations includes the recognition of tax expense related to the difference between the tax basis and book basis of assets upon the sales of the Arizona, New Mexico and Ohio that resulted in taxable gains, since an election was made under Section 338(h)(10) of the Internal Revenue Code to treat the sales as asset sales.

There were no assets or liabilities of discontinued operations in the accompanying Consolidated Balance Sheets at December 31, 2013 and 2012.

Note 4: Utility Plant

The components of utility plant by category at December 31 are as follows:

	Range of Remaining Useful Lives	2013	2012
Water plant			
Land and other non-depreciable assets		$ 132,295	$ 129,953
Sources of supply	11 to 127 Years	659,249	623,015
Treatment and pumping facilities	3 to 101 Years	3,006,140	2,944,178
Transmission and distribution facilities	9 to 116 Years	7,489,208	7,033,958
Services, meters and fire hydrants	9 to 93 Years	2,898,293	2,729,679
General structures and equipment	3 to 112 Years	995,186	865,992
Wastewater plant	2 to 115 Years	683,112	565,894
Construction work in progress		275,202	349,496
		16,138,685	15,242,165
Less accumulated depreciation		3,894,326	3,657,221
		$ 12,244,359	$ 11,584,944

Utility plant depreciation expense of continuing operations amounted to $337,653 in 2013, $314,639 in 2012 and $268,987 in 2011. The Company's regulated utility subsidiaries record depreciation in conformity with amounts approved by state regulators after regulatory review of information the Company submits to support its estimates of the assets' remaining useful lives.

The provision for depreciation expressed as a percentage of the aggregate average depreciable asset balances was 2.94 % in 2013 and 2012 and 2.68% in 2011.

Note 5: Allowance for Uncollectible Accounts

The following table summarizes the changes in the Company's allowances for uncollectible accounts:

	2013	2012	2011
Balance at January 1	$ (26,874)	$ (18,905)	$ (21,128)
Amounts charged to expense	(26,953)	(26,701)	(19,952)
Amounts written off	23,914	22,607	24,741
Recoveries of amounts written off	(4,040)	(3,875)	(2,566)
Balance at December 31	$ (33,953)	$ (26,874)	$ (18,905)

Note 6: Regulatory Assets and Liabilities

The regulatory assets represent costs that are expected to be fully recovered from customers in future rates. Except for income taxes, regulatory assets are excluded from the Company's rate base and generally do not earn a return. The components of regulatory assets at December 31 are as follows:

	2013	2012
Income taxes recoverable through rates	$ 242,902	$ 242,653
Debt and preferred stock expense	72,349	73,474
Deferred pension expense	109,799	326,578
Deferred other postretirement benefit expense	3,653	167,414
Deferred security costs	139	2,240
Deferred business services project expense	7,763	8,226
Deferred tank painting costs	33,519	31,526
Deferred rate case expense	9,407	11,614
Purchase premium recoverable through rates	60,787	60,241
Environmental remediation recoverable through rates	8,027	8,656
Coastal water project costs	16,826	21,175
San Clemente Dam project costs	44,404	31,403
Removal costs recoverable through rates	126,771	98,541
Other	122,119	115,373
	$ 858,465	$ 1,199,114

The Company has recorded a regulatory asset for the additional revenues expected to be realized as the tax effects of temporary differences previously flowed through to customers reverse. These temporary differences are primarily related to the difference between book and tax depreciation on property placed in service before the adoption by the regulatory authorities of full normalization for rate making purposes. Full normalization requires no flow through of tax benefits to customers. The regulatory asset for income taxes recoverable through rates is net of the reduction expected in future revenues as deferred taxes previously provided, attributable to the difference between the state and federal income tax rates under prior law and the current statutory rates, reverse over the average remaining service lives of the related assets.

Debt expense is amortized over the lives of the respective issues. Call premiums on the redemption of long-term debt, as well as unamortized debt expense, are deferred and amortized to the extent they will be recovered through future service rates. Expenses of preferred stock issues without sinking fund provisions are amortized over 30 years from date of issue; expenses of issues with sinking fund provisions are charged to operations as shares are retired.

Pension expense in excess of the amount contributed to the pension plans is deferred by certain subsidiaries. These costs will be recovered in future service rates as contributions are made to the pension plan. The Company also has regulatory assets of $ 90,380 and $294,136 at December 31, 2013 and 2012, respectively, which is the portion of the underfunded status that is probable of recovery through rates in future periods.

Postretirement benefit expense in excess of the amount recovered in rates through 1997 has been deferred by certain subsidiaries. These costs are recognized in the rates charged for water service and will be recovered as authorized by the Company's regulatory authorities. The Company also has regulatory assets of $3,113 and $166,379 at December 31, 2013 and 2012, respectively, which is the portion of the underfunded status that is probable of recovery through rates in future periods.

The costs of additional security measures that were implemented to protect facilities after the terrorist attacks on September 11, 2001 have been deferred by certain subsidiaries. These costs are recognized in the rates charged for water service by certain subsidiaries. These costs are being recovered over periods ranging from five to ten years from the time of regulatory approval.

Business services project expenses consist of reengineering and start-up activities for consolidated customer and shared administrative service centers that began operations in 2001. These costs are recognized in the rates charged for water service by certain subsidiaries.

Tank painting costs are generally deferred and amortized to current operations on a straight-line basis over periods ranging from five to 15 years, as authorized by the regulatory authorities in their determination of rates charged for service.

The Company amortizes rate case expenditures over regulatory approved amortization periods, typically three years. Rate case proceeding expenditures probable of future recovery are deferred.

Purchase premium recoverable through rates is primarily the recovery of the acquisition premiums related to an asset acquisition by the Company's California subsidiary during 2002, and acquisitions in 2007 by the Company's New Jersey subsidiary. As authorized for recovery by the California and New Jersey Regulators, these costs are being amortized to operations through November 2048.

Environmental remediation recoverable through rates is the recovery of costs incurred by the Company's California subsidiary under a settlement agreement entered into with NOAA to improve habitat conditions in the Carmel River Watershed.

Coastal water project costs include preliminary costs associated with the studying, testing and design of alternatives to help solve water supply shortages in Monterey, California. Coastal water project costs incurred through December 31, 2010 have been reviewed and approved for recovery through a surcharge. Costs deferred during 2013, 2012 and 2011 totaled $1,299, $1,987 and $2,528, respectively. The Company believes it is probable that the costs incurred since the last rate review will also be recoverable.

San Clemente Dam project costs represent costs incurred and deferred by the Company's California subsidiary pursuant to its efforts to investigate alternatives to strengthen or remove the dam due to potential earthquake and flood safety concerns. In June 2012, the California Public Utility Commission ("CPUC") issued a decision authorizing implementation of a project to reroute the Carmel River and remove the San Clemente Dam. The project includes the Company's California subsidiary, the California State Conservancy and the National Marine Fisheries Services. Under the order's terms, the CPUC has authorized recovery of all previous pre-construction costs incurred by the Company's subsidiary, and has authorized additional expenditures to be capped at $49,000 for the reroute and dam removal efforts and $2,500 for estimated interim dam safety measures. All pre-construction costs, totaling $24,303, are to be recovered via a surcharge over a 20-year period beginning October 2012; surcharge collections in 2013 and 2012 totaled $3,753 and $894, respectively. Costs deferred in addition to the pre-construction costs totaled $12,394 and $7,994 as of December 31, 2013 and 2012, respectively.

Other regulatory assets include certain deferred employee benefit costs as well as various regulatory balancing accounts which are deferred because the amounts are being recovered in rates or are probable of recovery through rates in future periods.

The components of regulatory liabilities at December 31 are as follows:

	2013	2012
Removal costs recovered through rates	$ 301,537	$ 285,901
Other	71,782	78,280
	$ 373,319	$ 364,181

Removal costs recovered through rates are retirement costs recovered during the life of the associated assets. In December 2008, the Company's subsidiary in New Jersey, at the direction of the New Jersey Regulator, began to amortize $48,000 of the total balance into operations via straight line amortization through November 2048.

Other regulatory liabilities include legal settlement proceeds, deferred gains, future customer refunds, and various regulatory balancing accounts.

Note 7: Goodwill

The Company's annual impairment reviews are performed as of November 30 of each year, in conjunction with the completion of the Company's annual strategic business plan. At November 30, 2013, the Company's goodwill was $ 1,207,741. The Company also undertakes interim reviews when the Company determines that a triggering event that would more likely than not reduce the fair value of a reporting unit below its carrying value has occurred.

In September 2011, the FASB issued revised guidance intended to simplify how an entity tests goodwill for impairment. The amendments allow an entity first to assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. An entity is no longer required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The amendments were effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 and early adoption was permitted.

The Company completed a quantitative fair value measurement of its reporting units when performing its goodwill impairment analysis on November 30, 2011. As of the 2011 testing date, a quantitative assessment was made and implied that the fair value of the Company's reporting units was well in excess of their carrying amount and no impairment was required.

The Company decided to adopt the new guidance for its 2012 annual test and applied the qualitative test ("step 0" or "step 0 test") to its reporting units for the annual impairment test performed as of November 30, 2012. No impairment measurement was deemed required.

In the current-year qualitative step 0 test at November 30, 2013, after assessing various events and circumstances that would affect the estimated fair value of the reporting units in its base line November 30, 2011 quantitative test, the Company has determined that it is not required to calculate the fair value of its reporting units at November 30, 2013. The Company has determined that it is more likely than not that its reporting unit fair values are greater than the reporting unit carrying values and no impairment is necessary.

There can be no assurances that the Company will not be required to recognize an impairment of goodwill in the future due to market conditions or other factors related to the Company's performance. These market events could include a decline over a period of time of the Company's stock price, a decline over a period of time in valuation multiples of comparable water utilities, the lack of an increase in the Company's market price consistent with its peer companies or decreases in control premiums. A decline in the forecasted results in the Company's business plan, such as changes in rate case results or capital investment budgets or changes in the Company's interest rates, could also result in an impairment charge.

The change in the Company's goodwill assets, as allocated between the reporting units is as follows:

	Regulated Unit		**Market-Based Units**		**Consolidated**		
	Cost	**Accumulated Impairment**	**Cost**	**Accumulated Impairment**	**Cost**	**Accumulated Impairment**	**Net**
Balance at January 1, 2012	$3,399,368	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,635,358	$ (2,440,289)	$ 1,195,069
Goodwill from acquisitions	12,181	0	0	0	12,181	0	12,181
Balance at December 31, 2012	$ 3,411,549	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,647,539	$ (2,440,289)	$ 1,207,250
Goodwill from acquisitions	428	0	0	0	428	0	428
Reclassifications and other activity	86	0	0	0	86	0	86
Balance at December 31, 2013	$ 3,412,063	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,648,053	$ (2,440,289)	$ 1,207,764

Note 8: Stockholders' Equity

Common Stock

Under American Water Stock Direct, a dividend reinvestment and direct stock purchase plan (the "DRIP") , stockholders may reinvest cash dividends and purchase additional Company common stock, up to certain limits, through a transfer agent without commission fees. The Company's transfer agent may buy newly issued shares directly from the Company or shares held in the Company's treasury. The transfer agent may also buy shares in the public markets or in privately negotiated transactions. Purchases generally will be made and credited to DRIP accounts once each week. As of December 31, 2013, there were 4,655 shares available for future issuance under the DRIP. The following table summarizes information regarding issuances under the DRIP for the years ended December 31, 2013 and 2012:

	2013	**2012**
Shares of common stock issued	53	60
Cash proceeds received	$ 2,171	$ 2,106

Cash dividend payments made during 2013 and 2012 were as follows:

	2013	2012
Dividends per share, three months ended:		
March 31	$ 0.00	$ 0.23
June 30	0.28	0.23
September 30	0.28	0.25
December 31	0.28	0.50
Total dividends paid, three months ended:		
March 31	$ 0	$ 40,414
June 30	49,744	40,529
September 30	49,810	44,080
December 31	49,896	88,436

On December 13, 2013, the Company declared a quarterly cash dividend of $0.28 per share, payable on March 3, 2014 to all shareholders of record as of February 3, 2014. As of December 31, 2013, the Company had accrued dividends totaling $49,909 included in other current liabilities on the accompanying Consolidated Balance Sheets.

Accumulated Other Comprehensive Loss

The following table presents changes in accumulated other comprehensive loss by component, net of tax:

	Defined Benefit Plans				Total
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial Loss	Foreign Currency Translation	Accumulated Other Comprehensive Loss
Beginning balance at January 1, 2012	$ (116,758)	$ 363	$ 14,938	$ 3,780	$ (97,677)
Other comprehensive income (loss) before reclassifications	(26,425)	0	0	434	(25,991)
Amounts reclassified from accumulated other comprehensive income	0	176	7,301	0	7,477
Other comprehensive income (loss) for the period	(26,425)	176	7,301	434	(18,514)
Ending balance at December 31, 2012	$ (143,183)	$ 539	$ 22,239	$ 4,214	$ (116,191)
Other comprehensive income (loss) before reclassifications	73,472	0	0	(1,001)	72,471
Amounts reclassified from accumulated other comprehensive income	0	174	8,911	0	9,085
Other comprehensive income (loss) for the period	73,472	174	8,911	(1,001)	81,556
Ending balance at December 31, 2013	$ (69,711)	$ 713	$ 31,150	$ 3,213	$ (34,635)

Stock Based Compensation

The Company has granted stock option and restricted stock unit awards to non-employee directors, officers and other key employees of the Company pursuant to the terms of its 2007 Omnibus Equity Compensation Plan (the "Plan"). The total aggregate number of shares of common stock that may be issued under the Plan is 15,500. As of December 31, 2013, a total of 9,612 shares are available for grant under the Plan. Shares issued under the Plan may be authorized-but-unissued shares of Company stock or reacquired shares of Company stock, including shares purchased by the Company on the open market for purposes of the Plan.

The Company recognizes compensation expense for stock awards over the vesting period of the award. The following table presents stock-based compensation expense recorded in operation and maintenance expense in the accompanying Consolidated Statements of Operations and Comprehensive Income for the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
Stock options	$ 3,170	$ 3,282	$ 3,182
Restricted stock units	8,718	7,658	6,340
Employee stock purchase plan	586	530	486
Stock-based compensation in operation and maintenance expense	12,474	11,470	10,008
Income tax benefit	(4,865)	(4,473)	(3,903)
After-tax stock-based compensation expense	$ 7,609	$ 6,997	$ 6,105

There were no significant stock-based compensation costs capitalized during the years ended December 31, 2013, 2012 and 2011.

The cost of services received from employees in exchange for the issuance of stock options and restricted stock awards is measured based on the grant date fair value of the awards issued. The value of stock options and restricted stock unit awards at the date of the grant is amortized through expense over the three-year service period. All awards granted in 2013, 2012 and 2011 are classified as equity.

The Company receives a tax deduction based on the intrinsic value of the award at the exercise date for stock options and the distribution date for restricted stock units. For each award, throughout the requisite service period, the Company recognizes the tax benefit s, which have been included in deferred tax assets, related to compensation costs. The tax deductions in excess of the benefits recorded throughout the requisite service period are recorded to shareholders' equity or the income statement and are included in the financing section of the statement of cash flows.

The Company stratified its grant populations and used historic employee turnover rates to estimate employee forfeitures. The estimated rate is compared to the actual forfeitures at the end of the period and adjusted as necessary.

Stock Options

In 2013, 2012 and 2011, the Company granted non-qualified stock options to certain employees under the Plan. The stock options vest ratably over the three-year service period beginning on January 1 of the year of grant. These awards have no performance vesting conditions and the grant date fair value i s amortized through expense over the requisite service period using the straight-line method.

The following table presents the weighted-average assumptions used in the Black-Scholes option- pricing model for grants and the resulting weighted-average grant date fair value per share of stock options granted in the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
Dividend yield	2.52%	2.70%	3.25%
Expected volatility	23.50%	28.35%	29.32%
Risk-free interest rate	0.70%	0.78%	1.93%
Expected life (years)	4.3	4.4	4.4
Exercise price	$ 39.60	$ 34.14	$ 27.08
Grant date fair value per share	$ 5.78	$ 6.11	$ 5.14

The Company utilized the "simplified method" to determine the expected stock option life due to insufficient historical experience to estimate the exercise patterns of the stock options granted. The Company began granting stock options at the time of its initial public offering in April 2008. Expected volatility is based on a weighted average of historic volatilities of traded common stock of peer companies (regulated water companies) over the expected term of the stock options and historic volatilities of the Company's common stock during the period it has been publicly traded. The dividend yield is based on the Company's expected dividend payments and the stock price on the date of grant. The risk-free interest rate is the market yield on U.S. Treasury strips with maturities similar to the expected term of the stock options. The exercise price of the stock options is equal to the fair market value of the underlying stock on the date of option grant. Stock options vest over periods ranging from one to three years and expire seven years from the effective date of the grant. The fair value of each option is estimated on the date of grant using the Black-Scholes option-pricing model.

The value of stock options at the date of the grant is amortized through expense over the requisite service period using the straight-line method. As of December 31, 2013, $2,226 of total unrecognized compensation cost related to nonvested stock options is expected to be recognized over the remaining weighted-average period of 1.4 years. The total grant date fair value of stock options vested during the years ended December 31, 2013, 2012 and 2011 was $3,512, $3,219, and $4,578, respectively.

The table below summarizes stock option activity for the year ended December 31, 2013:

	Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value
Options outstanding at January1, 2013	2,635	$ 25.77		
Granted	348	39.60		
Forfeited or expired	(68)	33.69		
Exercised	(860)	23.49		
Options outstanding at December 31, 2013	2,055	$ 28.80	4.0	$ 27,660
Exercisable at December 31, 2013	1,187	$ 24.48	3.1	$ 21,098

The following table summarizes additional information regarding stock options exercised during the years ended December 31, 201 3, 2012 and 2011:

	2013	2012	2011
Intrinsic value	$ 15,102	$ 14,515	$ 3,026
Exercise proceeds	20,211	22,112	8,991
Income tax benefit	4,383	4,017	511

Restricted Stock Units

During 2010, the Company granted selected employees 255 restricted stock units with internal performance measures and, separately, certain market thresholds. These awards vested in January 2013. The terms of the grants specified that if certain performance on internal measures and market thresholds were achieved, the restricted stock units would vest; if performance were surpassed, up to 175% of the target awards would be distributed; and if performance thresholds were not met, awards would be cancelled. In January 2013, an additional 148 restricted stock units were granted and distributed because performance was exceeded and 19 restricted stock units were cancelled because performance thresholds were not met.

In 2013, 2012 and 2011, the Company granted restricted stock units , both with and without performance conditions to certain employees under the Plan. The restricted stock units without performance conditions vest ratably over the three-year service period beginning January 1 of the year of the grant and the restricted stock units with performance conditions vest ratably over the three-year performance period beginning January 1 of the year of grant (the "Performance Period"). Distribution of the performance shares is contingent upon the achievement of internal performance measures and, separately, certain market thresholds over the Performance Period.

During 2013, 2012 and 2011, the Company granted restricted stock units to non-employee directors under the Plan. The restricted stock units vested on the date of grant; however, distribution of the shares will be made within 30 days of the earlier of (a) 15 months after grant date or (b) the participant's separation from service. Because these restricted stock units vested on grant date, the to tal grant date fair value was recorded in operation and maintenance expense included in the expense table above on the grant date.

Restricted stock units generally vest over periods ranging from one to three years. Restricted stock units granted with service-only conditions and those with internal performance measures are valued at the market value of the Company's common stock on the date of grant. Restricted stock units granted with market conditions are valued using a Monte Carlo model. Expected volatility is based on historical volatilities of traded common stock of the Company and comparative companies using daily stock prices over the past three years. The expected term is three years and the risk-free interest rate is based on the three-year U.S. Treasury rate in effect as of the measurement date. The following table presents the weighted-average assumptions used in the Monte Carlo simulation and the weighted-average grant date fair values of restricted stock units granted during the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
Expected volatility	19.37%	22.47%	29.50%
Risk-free interest rate	0.40%	0.43%	1.24%
Expected life (years)	3	3	3
Grant date fair value per share	$ 40.13	$ 37.40	$ 29.95

The grant date fair value of restricted stock awards that vest ratably and have market and/or performance and service conditions is amortized through expense over the requisite service period using the graded-vesting method. Restricted stock units that have no performance conditions are amortized through expense over the requisite service period using the straight-line method. As of December 31, 2013, $4,877 of total unrecognized compensation cost related to the nonvested restricted stock units is expected to be recognized over the weighted-average remaining life of 1.4 years. The total grant date fair value of restricted stock units vested during the years ended December 31, 2013, 2012 and 2011 was $8,891, $4,191 and $2,040, respectively.

The table below summarizes restricted stock unit activity for the year ended December 31, 2013:

	Shares	Weighted-Average Grant Date Fair Value (per share)
Non-vested total at January 1, 2013	540	$ 29.48
Granted	405	34.06
Vested	(364)	24.41
Forfeited	(23)	37.51
Cancelled	(19)	21.98
Non-vested total at December 31, 2013	539	$ 36.27

The following table summarizes additional information regarding restricted stock units distributed during the years ended December 31, 2013, 2012 and 2011:

	2013	2012	2011
Intrinsic value	$ 13,983	$ 6,159	$ 2,068
Income tax benefit	2,049	799	99

If dividends are paid with respect to shares of the Company's common stock before the restricted stock units are distributed, the Company credits a liability for the value of the dividends that would have been paid if the restricted stock units were shares of Company common stock. When the restricted stock units are distributed, the Company pays the participant a lump sum cash payment equal to the value of the dividend equivalents accrued. The Company accrued dividend equivalents totaling $648, $1,168 and $921 to retained earnings during the years ended December 31, 2013, 2012 and 2011, respectively.

Employee Stock Purchase Plan

Under the Company's Nonqualified Employee Stock Purchase Plan ("ESPP"), employees can use payroll deductions to acquire Company stock at the lesser of 90% of the fair market value of (a) the beginning or (b) the end of each three-month purchase period. As of December 31, 2013 there were 1,363 shares of common stock reserved for issuance under the ESPP. The Company's ESPP is considered compensatory. During the years ended December 31, 2013, 2012 and 2011, the Company issued 111, 118 and 121 shares, respectively, under the ESPP.

Note 9: Preferred Stock Without Mandatory Redemption Requirements

Certain preferred stock agreements do not require annual sinking fund payments or redemption except at the option of the subsidiaries . The Company had preferred stock yielding 4.50% totaling $1,720 outstanding at December 31, 2012. The Company elected to redeem that amount during 2013, accordingly none were outstanding at December 31, 2013.

The Company reflects its subsidiaries' preferred stock without mandatory redemption requirements, which represents the Company's noncontrolling interest, in the total stockholders' equity section of the accompanying Consolidated Balance Sheets. The dividends on these preferred shares have not been reflected as income attributable to noncontrolling interest in the Consolidated Statements of Operations and Comprehensive Income as the total amount of these dividends is not considered material. The dividends issued were $19 for 2013, $153 for 2012 and $224 for 2011. The amounts have been included as a component of other income (expenses) in the accompanying Consolidated Statements of Operations and Comprehensive Income.

Note 10: Long-Term Debt

The Company primarily incurs long-term debt to fund capital expenditures of the regulated subsidiaries. The components of long-term at December 31 are:

	Rate	Weighted Average Rate	Maturity Date	2013	2012
Long-term debt of American Water Capital Corp. ("AWCC")(a)					
Private activity bonds and government funded debt					
Fixed rate	2.30%-6.75%	5.63%	2018-2040	$ 330,732	$ 322,610
Senior notes					
Fixed rate	3.85%-8.27%	5.69%	2016-2042	3,312,761	3,389,399
Long-term debt of other subsidiaries					
Private activity bonds and government funded debt					
Fixed rate (b)	0.00%-6.20%	4.68%	2014-2041	863,716	865,969
Mortgage bonds					
Fixed rate	4.29%-9.71%	7.41%	2015-2039	676,500	678,500
Mandatorily redeemable preferred stock	8.47%-9.75%	8.60%	2019-2036	18,902	20,552
Notes payable and other(c)	12.17%	12.17%	2026	913	1,272
Long-term debt				5,203,524	5,278,302
Unamortized debt, net(d)				35,984	39,272
Fair value adjustment to interest rate hedge				4,724	7,715
Total long-term debt				$ 5,244,232	$ 5,325,289

(a) AWCC, which is a wholly-owned subsidiary of the Company, has a strong support agreement with its parent that, under certain circumstances, is the functional equivalent of a guarantee.
(b) Includes at December 31, 2013 $11,920 of variable rate debt with variable-to-fixed rate interest swaps paying between 3.93% and 4.72% per annum. This debt was assumed via acquisitions in 2013 (see below).
(c) Includes capital lease obligations of $913 and $1,049 at December 31, 2013 and 2012, respectively.
(d) Primarily fair value adjustments previously recognized in acquisition purchase accounting.

All $676,500 of the subsidiaries' mortgage bonds and $790,817 of the $863,716 total subsidiaries' private activity bonds and government funded debt are collateralized by utility plant.

Long-term debt indentures contain a number of covenants that, among other things, limit, subject to certain exceptions, the Company from issuing debt secured by the Company's assets. Certain long term notes require the Company to maintain a ratio of consolidated total indebtedness to consolidated total capitalization of not more than 0.70 to 1.00. The ratio at December 31, 2013 was 0. 55 to 1.00. In addition, the Company has $1,282,387 of notes which include the right to redeem the notes at par in whole or in part from time to time subject to certain restrictions.

The future sinking fund payments and maturities are as follows:

Year	Amount
2014	$ 14,174
2015	60,655
2016	52,901
2017	572,314
2018	473,648
Thereafter	$ 4,029,832

The following long-term debt was issued in 2013:

Company	Type	Interest Rate	Maturity	Amount
American Water Capital Corp.	Senior notes—fixed rate	3.85%	2024	$ 400,000
American Water Capital Corp. (1)	Private activity bonds and government funded debt—fixed rate	2.30%-2.90%	2021-2030	8,122
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	1.59-2.41%	2031-2033	2,737
Total issuances				$ 410,859

---

(1) Included in the issuance amounts for AWCC private activity bonds and government funded debt above was $6,702, which was initially kept in Trust pending the Company's certification that it has incurred qualifying capital expenditures. These issuances have been presented as non-cash in the accompanying Consolidated Statements of Cash Flows. Subsequent releases of all or a lesser portion of these funds by the applicable Trust are reflected as the release of restricted funds and are included in investing activities in the accompanying Consolidated Statements of Cash Flows.

The Company incurred debt issuance costs of $3,377 related to the above issuances. The Company also assumed debt of $12,673 via acquisitions during 2013.

The following long-term debt was retired through optional redemption or payment at maturity during 2013:

Company	Type	Interest Rate	Maturity	Amount
American Water Capital Corp. (2)	Senior notes—fixed rate	5.39%-10.00%	2013-2017	$ 476,638
Other subsidiaries(3)	Private activity bonds and government funded debt—fixed rate	0.00%-5.50%	2013-2041	17,663
Other subsidiaries	Mortgage bonds—fixed rate	6.59%	2013	2,000
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%-9.18%	2031-2036	1,650
Other	Notes payable and other			359
Total retirements and redemptions				$ 498,310

---

(2) In September 2013, the Company announced a tender offer for its 6.085% Senior Notes due 2017 (the "Notes"). The offer was contingent upon the satisfaction of certain conditions, which were satisfied during the fourth quarter of 2013. At that time, the Company repurchased $225,800 in aggregate principal amount of Notes that were validly tendered. The Company paid $271,798 to effect the tender, which, in addition to the principal, included $6,603 of accrued interest, a repurchase premium of $39,395, write-off of unamortized debt issuance costs of $525 and transaction fees of $663. The sum of the repurchase premium, the debt issuance amortization and transaction fees equaled the loss on debt extinguishment of $40,583, which is disclosed separately on the accompanying Consolidated Statement of Operations.

(3) Includes $3,565 of non-cash defeasance via the use of restricted funds.

Interest, net includes interest income of approximately $11,753 , $12,652 and $10,942 in 2013, 2012 and 2011, respectively.

One of the principal market risks to which the Company is exposed is changes in interest rates. In order to manage the exposure, the Company follows risk management policies and procedures, including the use of derivative contracts such as swaps. The Company reduces exposure to interest rates by managing commercial paper and debt maturities. The Company does not enter into derivative contracts for speculative purposes and does not use leveraged instruments. The derivative contracts entered into are for periods consistent with the related underlying exposures. The Company is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. The Company minimizes the counterparty credit risk on these transactions by dealing only with leading, credit-worthy financial institutions having long-term credit ratings of "A" or better.

The Company has an interest-rate swap to hedge $100,000 of its 6.085% fixed-rate debt maturing 2017. The Company pays variable interest of six-month LIBOR plus 3.422%. The swap is accounted for as a fair-value hedge and matures with the fixed-rate debt in 2017. The following table provides a summary of the derivative fair value balance recorded by the Company as of December 31, 2013 and 2012 and the line item in the Consolidated Balance Sheet in which such amount is recorded:

Balance sheet classification	**2013**	**2012**
Regulatory and other long-term assets		
Other	$ 4,776	$ 7,909
Long-term debt		
Long-term debt	4,724	7,715

For derivative instruments that are designated and qualify as fair-value hedges, the gain or loss on the hedge instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current net income. The Company includes the gain or loss on the derivative instrument and the offsetting loss or gain on the hedged item in interest expense for the years ended December 31 as follows:

Income Statement Classification	**2013**	**2012**	**2011**
Interest, net			
Gain (loss) on swap	$ (3,133)	$ 2,085	$ 6,722
(Loss) gain on borrowing	2,991	(1,604)	(6,455)
Hedge ineffectiveness	(142)	481	267

Note 11: Short-Term Debt

Short-term debt consists of commercial paper borrowings totaling $630,307 (net of discount of $193) and $269,985 (net of discount of $15) at December 31, 2013 and 2012, respectively. Included in the 2013 balance was $ 221,000 of borrowings with maturities greater than three months, all of which will mature during the first quarter of 2014.

On September 9, 2013, AWCC and its lenders agreed to increase total commitments under AWCC's revolving credit facility from $1,000,000 to $1,250,000. In addition, $1,180,000 of the credit facility was extended from its original termination date of October 2017 to October 2018. Other terms and conditions of the existing facility remained unchanged. The Company incurred $1,126 of issuance costs in connection with the increased lending commitments; these costs will be amortized over the remaining extended life of the credit facility.

At the same time, the Company also announced an increase in the maximum borrowing capability of its commercial paper program from $700,000 to $1,000,000.

AWCC had the following available capacity under its commercial paper program at December 31:

	2013	**2012**
Commercial paper program	$ 1,000,000	$ 700,000
Commercial paper program available capacity	369,500	430,000

At December 31, AWCC had the following sub-limits and available capacity under each applicable credit facility:

	2013	**2012**
Letter of credit sublimit	$ 150,000	$ 150,000
Letter of credit available capacity	108,215	117,137

At December 31, 2013, the Company had $ 41,785 of outstanding letters of credit, all of which were issued under the revolving credit facility noted above. At December 31, 2012, the Company had $34,148 of outstanding letters of credit, $32,863 of which was issued under the revolving credit facility noted above.

The following table presents the short-term borrowing activity for AWCC for the years ended December 31, 2013 and 2012:

	2013	**2012**
Average borrowings	$ 432,064	$ 277,952
Maximum borrowings outstanding	1,129,250	534,700
Weighted average interest rates, computed on a daily basis	0.37%	0.49%
Weighted average interest rates, at December 31	0.36%	0.46%

The credit facility requires the Company to maintain a ratio of consolidated debt to consolidated capitalization of not more than 0.70 to 1.00. The ratio at December 31, 2013 was 0.55 to 1.00.

None of the Company’s borrowings are subject to default or prepayment as a result of a downgrading of securities, although such a downgrading could increase fees and interest charges under the Company’s credit facility.

As part of the normal course of business, the Company routinely enters contracts for the purchase and sale of water, energy, fuels and other services. These contracts either contain express provisions or otherwise permit the Company and its counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if the Company is downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to rely on such a downgrade as a basis for making a demand for adequate assurance of future performance. Depending on the Company’s net position with the counterparty, the demand could be for the posting of collateral. In the absence of expressly agreed provisions that specify the collateral that must be provided, the obligation to supply the collateral requested will be a function of the facts and circumstances of the Company’s situation at the time of the demand. If the Company can reasonably claim that it is willing and financially able to perform its obligations, it may be possible to successfully argue that no collateral should be posted or that only an amount equal to two or three months of future payments should be sufficient. The Company does not expect to post any collateral which will have a material adverse impact on the Company’s results of operations, financial position or cash flows.

Note 12: General Taxes

Components of general tax expense from continuing operations for the years ended December 31 are as follows:

	2013	2012	2011
Gross receipts and franchise	$ 96,044	$ 92,612	$ 90,674
Property and capital stock	94,448	84,513	77,330
Payroll	31,375	32,724	31,705
Other general	12,775	11,363	10,769
	$ 234,642	$ 221,212	$ 210,478

Note 13: Income Taxes

Components of income tax expense from continuing operations for the years ended December 31 are as follows:

	2013	2012	2011
State income taxes:			
Current	$ 7,202	$ 26,604	$ (7,440)
Deferred			
Current	(405)	(280)	(171)
Non-current	26,821	24,256	44,576
	$ 33,618	$ 50,580	$ 36,965
Federal income taxes:			
Current	$ (19,995)	$ 31,482	$ 12,239
Deferred			
Current	(1,324)	(2,031)	(314)
Non-current	225,408	178,495	151,403
Amortization of deferred investment tax credits	(1,501)	(1,518)	(1,542)
	202,588	206,428	161,786
	$ 236,206	$ 257,008	$ 198,751

A reconciliation of income tax expense from continuing operations at the statutory federal income tax rate to actual income tax expense for the years ended December 31 is as follows:

	2013	2012	2011
Income tax at statutory rate	$ 211,914	$ 220,940	$ 176,288
Increases (decreases) resulting from:			
State taxes, net of federal taxes	21,852	32,877	24,027
Change in valuation allowance	(455)	143	(160)
Flow through differences	3,217	3,032	2,895
Amortization of deferred investment tax credits	(1,501)	(1,518)	(1,542)
Subsidiary preferred dividends	584	634	668
Other, net	595	900	(3,425)
Actual income tax expense	$ 236,206	$ 257,008	$ 198,751

The following table provides the components of the net deferred tax liability from continuing operations at December 31:

	2013	2012
Deferred tax assets:		
Advances and contributions	$ 510,122	$ 485,815
Deferred investment tax credits	10,027	10,610
Other postretirement benefits	107,773	100,301
Tax losses and credits	265,640	229,423
Pension benefits	122,143	113,919
Unamortized debt discount, net	20,249	21,711
Other	23,888	22,835
	1,059,842	984,614
Valuation allowance	(13,555)	(19,520)
	$ 1,046,287	$ 965,094
Deferred tax liabilities:		
Utility plant, principally due to depreciation differences	$ 2,478,617	$ 2,168,680
Income taxes recoverable through rates	81,135	82,400
Deferred security costs	58	921
Deferred business services project expenses	4,584	4,580
Deferred other postretirement benefits	65,071	57,895
Deferred pension benefits	169,336	102,847
Other	69,574	93,284
	2,868,375	2,510,607
	$(1,822,088)	$(1,545,513)

At December 31, 2013 and 2012, the Company recorded federal net operating loss ("NOL") carryforwards of $1,182,075 and $1,047,786, respectively. The 2013 balance includes $16,484 of windfall tax benefits on stock-based compensation that will not be recorded to equity until the benefit is realized. The Company believes the federal NOL carryforwards are more likely than not to be recovered and require no valuation allowance. The Company evaluated its ability to fully utilize the existing federal NOL carryforwards in light of the RWE divestiture in November 2009. Under Internal Revenue Code ("I.R.C.") Section 382, an ownership change occurs if there is a greater than fifty percent (50%) change in equity ownership of a company over a three-year period determined by reference to the ownership of persons holding five percent (5%) or more of that company's equity securities. If a company undergoes an ownership change as defined by I.R.C. Section 382, the company's ability to utilize its pre-change NOL carryforwards to offset post-change income may be limited.

The Company believes that the limitation imposed by I.R.C. Section 382 generally should not preclude use of its federal NOL carryforwards, assuming the Company has sufficient taxable income in future carryforward periods to utilize those NOL carryforwards. The Company's federal NOL carryforwards do not begin expiring until 2028.

At December 31, 2013 and 2012, the Company had state NOLs of $ 628,049 and $663,429, respectively, a portion of which are offset by a valuation allowance because the Company does not believe these NOLs are more likely than not to be realized. The state NOL carryforwards will expire between 2014 and 2033.

At December 31, 2013 and 2012, the Company had Canadian NOL carryforwards of $ 6,323 and $5,703, respectively. The majority of these carryforwards are offset by a valuation allowance because the Company does not believe these NOLs are more likely than not to be realized. The Canadian NOL carryforwards will expire between 2014 and 2033.

The Company had capital loss carryforwards for federal income tax purposes of $3,844 and $4,357 at December 31, 2013 and 2012, respectively. The Company has recognized a full valuation allowance for the capital loss carryforwards because the Company does not believe these losses are more likely than not to be recovered.

The Company files income tax returns in the United States federal jurisdiction and various state and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state or local or non-U.S income tax examinations by tax authorities for years before 2007.

The Company has state income tax examinations in progress and does not expect material adjustments to result.

The Patient Protection and Affordable Care Act (the "PPACA") became law on March 23, 2010, and the Health Care and Education Reconciliation Act of 2010 became law on March 30, 2010, which makes various amendments to certain aspects of the PPACA (together, the "Acts"). The PPACA effectively changes the tax treatment of federal subsidies paid to sponsors of retiree health benefit plans that provide a benefit that is at least actuarially equivalent to the benefits under Medicare Part D. The Acts effectively make the subsidy payments taxable in tax years beginning after December 31, 2012 and as a result, the Company followed its original accounting for the underfunded status of the other postretirement benefits for the Medicare Part D adjustment and recorded a reduction in deferred tax assets and an increase in its regulatory assets amounting to $6,241 and $6,432 at December 31, 2013 and 2012, respectively.

The following table summarizes the changes in the Company's gross liability, excluding interest and penalties, for unrecognized tax benefits:

Balance at January 1, 2012	$ 158,578
Increases in current period tax positions	40,620
Decreases in prior period measurement of tax positions	(18,205)
Balance at December 31, 2012	$ 180,993
Increases in current period tax positions	27,229
Decreases in prior period measurement of tax positions	(30,275)
Balance at December 31, 2013	$ 177,947

During the second quarter of 2013, the Company adopted updated income tax guidance, and as a result, reclassified as of December 31, 2012 $74,360 of unrecognized tax benefit from other long-term liabilities to deferred income taxes to conform to the current presentation in the accompanying Consolidated Balance Sheets. The total balance in the table above does not include interest and penalties of $242 and $260 as of December 31, 2013 and 2012, respectively, which is recorded as a component of income tax expense. The majority of the increased tax position is attributable to temporary differences. The increase in 2013 current period tax positions related primarily to the Company's change in tax accounting method filed in 2008 for repair and maintenance costs on its utility assets. The Company does not anticipate material changes to its unrecognized tax benefits within the next year. If the Company sustains all of its positions at December 31, 2013 and 2012, an unrecognized tax benefit of $7,439 and $7,532, respectively, excluding interest and penalties, would impact the Company's effective tax rate.

The following table summarizes the changes in the Company's valuation allowance:

Balance at January 1, 2011	$ 23,788
Increases in current period tax positions	1,525
Decreases in current period tax positions	(3,734)
Balance at December 31, 2011	$ 21,579
Increases in current period tax positions	0
Decreases in current period tax positions	(2,059)
Balance at December 31, 2012	$ 19,520
Increases in current period tax positions	0
Decreases in current period tax positions	(5,965)
Balance at December 31, 2013	$ 13,555

Included in 2013 is a discrete tax benefit totaling $2,979 associated with an entity re-organization within the Company's Market-Based segment that allowed for the utilization of state net operating loss carryforwards and the release of an associated valuation allowance.

Note 14: Employee Benefits

Pension and Other Postretirement Benefits

The Company maintains noncontributory defined benefit pension plans covering eligible employees of its regulated utility and shared services operations. Benefits under the plans are based on the employee's years of service and compensation. The pension plans have been closed for all employees. The pension plans were closed for most employees hired on or after January 1, 2006. Union employees hired on or after January 1, 2001 had their accrued benefit frozen and will be able to receive this benefit as a lump sum upon termination or retirement. Union employees hired on or after January 1, 2001 and non-union employees hired on or after January 1, 2006 are provided with a 5.25% of base pay defined contribution plan. The Company does not participate in a multiemployer plan.

The Company's pension funding practice is to contribute at least the greater of the minimum amount required by the Employee Retirement Income Security Act of 1974 or the normal cost. Further, the Company will consider additional contributions if needed to avoid "at risk" status and benefit restrictions under the Pension Protection Act of 2006. The Company may also consider increased contributions, based on other financial requirements and the plans' funded position. Pension plan assets are invested in a number of actively managed and indexed investments including equity and bond mutual funds, fixed income securities, guaranteed interest contracts with insurance companies and real estate investment trusts ("REITs").

Pension expense in excess of the amount contributed to the pension plans is deferred by certain regulated subsidiaries pending future recovery in rates charged for utility services as contributions are made to the plans. (See Note 6)

The Company also has unfunded noncontributory supplemental non-qualified pension plans that provide additional retirement benefits to certain employees.

The Company maintains other postretirement benefit plans providing varying levels of medical and life insurance to eligible retirees. The retiree welfare plans are closed for union employees hired on or after January 1, 2006. The plans had previously closed for non-union employees hired on or after January 1, 2002.

The Company's policy is to fund other postretirement benefit costs for rate-making purposes. Assets of the plans are invested in equity mutual funds, bond mutual funds and fixed income securities.

The obligations of the plans are dominated by obligations for active employees. Because the timing of expected benefit payments is so far in the future, the investment strategy is to allocate a significant percentage of assets to equities, which the Company believes will provide the highest return over the long-term period. The fixed income assets are invested in long duration debt securities and may be invested in fixed income instruments, such as futures and options, in order to better match the duration of the plan liability.

The Company periodically conducts asset liability studies to ensure the investment strategies are aligned with the profile of the plans' obligations.

None of the Company's securities are included in pension or other postretirement benefit plan assets.

The Company uses fair value for all classes of assets in the calculation of market-related value of plan assets by applying the fair value of the asset classes at the balance sheet date times the projected returns for that asset class.

The investment policy guidelines of the pension plan require that the fixed income portfolio has an overall weighted-average credit rating of A or better by Standard & Poor's.

The investment policies' objectives are focused on reducing the volatility of the plans' funding status over a long term horizon.

The fair values and asset allocations of pension plan assets at December 31, 2013, by asset category, follow:

Asset Category	Target Allocation 2014	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Percentage of Plan Assets at December 31, 2013

The following table presents a reconciliation of the beginning and ending balances of the fair value measurements using significant unobservable inputs (Level 3) where transfers in (out) represent benefit payments made during the year:

	Level 3
Balance, January 1, 2012	$ 148,574
Actual return on assets	28,420
Transfers in (out)	(3,369)
Balance, December 31, 2012	$ 173,625

The Company's other postretirement benefit plans are partially funded and the assets are held under various trusts. The investments and risk mitigation strategies for the plans are tailored specifically for each trust. In setting new strategic asset mixes, consideration is given to the likelihood that the selected asset allocation will effectively fund the projected plan liabilities and the risk tolerance of the Company. The Company periodically updates the long-term, strategic asset allocations and uses various analytics to determine the optimal asset allocation. Considerations include plan liability characteristics, liquidity characteristics, funding requirements, expected rates of return and the distribution of returns.

In June 2012, the Company implemented a de-risking strategy for the medical bargaining trust within the plan to minimize volatility. As part of the de-risking strategy, the Company revised the asset allocations to increase the matching characteristics of assets relative to liabilities. The initial de-risking asset allocation for the plan was 60% return-generating assets and 40% liability-driven assets. The investment strategies and policies for the plan reflect a balance of liability driven and return-generating considerations. The objective of minimizing the volatility of assets relative to liabilities is addressed primarily through asset—liability matching, asset diversification and hedging. The fixed income target asset allocation matches the bond-like and long-dated nature of the postretirement liabilities. Assets are broadly diversified within asset classes to achieve risk-adjusted returns that in total lower asset volatility relative to the liabilities. The Company assesses the investment strategy regularly to ensure actual allocations are in line with target allocations as appropriate. Strategies to address the goal of ensuring sufficient assets to pay benefits include target allocations to a broad array of asset classes and, within asset classes strategies are employed to provide adequate returns, diversification and liquidity.

The assets of the Company's other trusts within the other postretirement benefit plans have been primarily invested in equities and fixed income index funds. The assets under the various other postretirement benefit trusts are invested differently based on the assets and liabilities of each trust. The obligations of the other postretirement benefit plans are dominated by obligations for the medical bargaining trust. Thirty-nine percent and five percent of the total postretirement plan benefit obligations are related to the medical non-bargaining and life insurance trusts, respectively. Because expected benefit payments related to the benefit obligations are so far into the future, and the size of the medical non-bargaining and life insurance trusts' obligations are large compared to each trusts' assets, the investment strategy is to allocate a significant portion of the assets' investment to equities, which the Company believes will provide the highest long-term return and improve the funding ratio.

The Company engages third party investment managers for all invested assets. Managers are not permitted to invest outside of the asset class (e.g., fixed income, equity, alternatives) or strategy for which they have been appointed. Investment management agreements and recurring performance and attribution analysis are used as tools to ensure investment managers invest solely within the investment strategy they have been provided. Futures and options may be used to adjust portfolio duration to align with a plan's targeted investment policy.

In order to minimize asset volatility relative to the liabilities, a portion of plan assets is allocated to fixed income investments that are exposed to interest rate risk. Increases in interest rates generally will result in a decline in the value of fixed income assets while reducing the present value of the liabilities. Conversely, rate decreases will increase fixed income assets, partially offsetting the related increase in the liabilities. Within equities, risk is mitigated by constructing a portfolio that is broadly diversified by geography, market capitalization, manager mandate size, investment style and process

Actual allocations to each asset class vary from target allocations due to periodic investment strategy updates, market value fluctuations, the length of time it takes to fully implement investment allocation, and the timing of benefit payments and contributions. The asset allocation is rebalanced on a quarterly basis, if necessary.

The fair values and asset allocations of postretirement benefit plan assets at December 31, 2013, by asset category, follow:

Asset Category	**Target Allocation 2014**	**Total**	**Quoted Prices in Active Markets for Identical Assets (Level 1)**	**Significant Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**	**Percentage of Plan Assets at December 31, 2013**

Valuation Techniques Used to Determine Fair Value

Cash—Cash and investments with maturities of three months or less when purchased, including certain short-term fixed-income securities, are considered cash and are included in the recurring fair value measurements hierarchy as Level 1.

Equity securities—For equity securities, the trustees obtain prices from pricing services, whose prices are obtained from direct feeds from market exchanges, that the Company is able to independently corroborate. Equity securities are valued based on quoted prices in active markets and categorized as Level 1. Certain equities, such as international securities, are invested in commingled funds. These funds are valued to reflect the plan fund's interest in the fund based on the reported year-end net asset value. Since net asset value is not directly observable for the commingled funds, they are categorized as Level 2.

Fixed-income securities—The majority of U.S. Treasury securities and government bonds have been categorized as Level 1 because they trade in highly-liquid and transparent markets that the Company can corroborate. The fair values of corporate bonds, mortgage backed securities, certain government bonds and a guaranteed annuity contract are based on evaluated prices that reflect observable market information, such as actual trade information of similar securities, and have been categorized as Level 2 because the valuations are calculated using models which utilize actively traded market data that the Company can corroborate. Certain other guaranteed annuity contracts are categorized as Level 3 because the investments are not publicly quoted. The fund administrator values the fund using the net asset value per fund share, derived from the quoted prices in active markets of the underlying securities. Since these valuation inputs are not highly observable, these contracts have been categorized as Level 3. Exchange-traded future and option positions are reported in accordance with changes in daily variation margins that are settled daily. Exchange-traded options and futures, for which market quotations are readily available, are valued at the last reported sale price or official closing price on the primary market or exchange on which they are traded and are classified as Level 1.

REITs—REITs are invested in commingled funds. Commingled funds are valued to reflect the plan fund's interest in the fund based on the reported year-end net asset value. Since the net asset value is not directly observable for the commingled funds, they are categorized as Level 2.

The following table provides a rollforward of the changes in the benefit obligation and plan assets for the most recent two years for all plans combined:

	Pension Benefits		Other Benefits	
	2013	2012	2013	2012
Change in benefit obligation				
Benefit obligation at January 1	$ 1,621,244	$ 1,401,954	$ 687,082	$ 620,366
Service cost	37,872	34,209	15,282	14,207
Interest cost	68,096	70,866	28,700	31,570
Plan participants' contributions	—	—	2,514	2,394
Amendments	—	—	—	(1,758)
Actuarial (gain) loss	(180,688)	178,267	(148,410)	43,321
Divestitures	—	(73)	—	(94)
Curtailments	—	(3,460)	—	—
Settlements	—	(14,701)	—	—
Gross benefits paid	(52,392)	(45,818)	(25,263)	(24,910)
Federal subsidy	—	—	2,018	1,986
Benefit obligation at December 31	$ 1,494,132	$ 1,621,244	$ 561,923	$ 687,082
Change in Plan Assets				
Fair value of plan assets at January 1	$ 1,157,697	$ 981,068	$ 433,260	$ 382,670
Actual return on plan assets	208,821	138,560	36,202	42,981
Employer contributions	69,495	99,408	28,005	30,002
Plan participants' contributions	—	—	2,514	2,394
Settlements	—	(10,799)	—	—
Divestitures	—	(4,722)	—	123
Benefits paid	(52,392)	(45,818)	(25,263)	(24,910)
Fair value of plan assets at December 31	$ 1,383,621	$ 1,157,697	$ 474,718	$ 433,260
Funded status at December 31	$ (110,511)	$ (463,547)	$ (87,205)	$ (253,822)
Amounts recognized in the balance sheet consist of:				
Noncurrent asset	$ —	$ —	$ 1,271	$ 377
Current liability	(1,969)	(1,900)	(57)	(52)
Noncurrent liability	(108,542)	(461,647)	(88,419)	(254,147)
Net amount recognized	$ (110,511)	$ (463,547)	$ (87,205)	$ (253,822)

The following table provides the components of the Company's accumulated other comprehensive income and regulatory assets that have not been recognized as components of periodic benefit costs as of December 31:

	Pension Benefits		Other Benefits	
	2013	2012	2013	2012
Net actuarial loss	$ 145,376	$ 483,626	$ 17,632	$ 183,087
Prior service cost (credit)	4,418	5,142	(14,519)	(16,708)
Net amount recognized	$ 149,794	$ 488,768	$ 3,113	$ 166,379
Regulatory assets	$ 90,380	$ 294,136	$ 3,113	$ 166,379
Accumulated other comprehensive income	59,414	194,632	—	—
	$ 149,794	$ 488,768	$ 3,113	$ 166,379

At December 31, 2013 and 2012, the projected benefit obligation, accumulated benefit obligation and fair value of plan assets for pension plans with a projected obligation in excess of plan assets were as follows:

	Projected Benefit Obligation Exceeds the Fair Value of Plans' Assets 2013	Projected Benefit Obligation Exceeds the Fair Value of Plans' Assets 2012
Projected benefit obligation	$1,494,000	$1,621,000
Fair value of plan assets	1,384,000	1,158,000

	Accumulated Benefit Obligation Exceeds the Fair Value of Plans' Assets 2013	Accumulated Benefit Obligation Exceeds the Fair Value of Plans' Assets 2012
Accumulated benefit obligation	$ 43,000	$ 1,472,000
Fair value of plan assets	17,000	1,158,000

The accumulated postretirement benefit obligation exceeds plan assets for all of the Company's other postretirement benefit plans.

In August 2006, the Pension Protection Act ("PPA") was signed into law in the U.S. The PPA replaces the funding requirements for defined benefit pension plans by requiring that defined benefit plans contribute to 100% of the current liability funding target over seven years. Defined benefit plans with a funding status of less than 80% of the current liability are defined as being "at risk" and additional funding requirements and benefit restrictions may apply. The PPA was effective for the 2008 plan year with short-term phase-in provisions for both the funding target and at-risk determination. The Company's qualified defined benefit plan is currently funded above the at-risk threshold, and therefore the Company expects that the plans will not be subject to the "at risk" funding requirements of the PPA. The Company is proactively monitoring the plan's funded status and projected contributions under the law to appropriately manage the potential impact on cash requirements.

Minimum funding requirements for the qualified defined benefit pension plan are determined by government regulations and not by accounting pronouncements. The Company plans to contribute amounts at least equal to the greater of the minimum required contributions or the normal cost in 2014 to the qualified pension plans. The Company plans to contribute to its 2014 other postretirement benefit cost for rate-making purposes.

Information about the expected cash flows for the pension and postretirement benefit plans is as follows:

	Pension Benefits	Other Benefits
2014 expected employer contributions		
To plan trusts	$ 37,191	$ 12,137
To plan participants	1,970	81

The Company made 2014 contributions to fund pension benefits and other benefits of $7,680 and $3,034, respectively, through February 2014.

The following table reflects the net benefits expected to be paid from the plan assets or the Company's assets:

	Pension Benefits	Other Benefits	
	Expected Benefit Payments	Expected Benefit Payments	Expected Federal Subsidy Payments
2014	$ 64,519	$ 26,682	$ 2,170
2015	70,453	29,299	2,335
2016	75,924	31,837	2,514
2017	81,491	34,529	2,705
2018	86,616	37,265	2,890
2019—2023	499,770	215,648	17,804

Because the above amounts are net benefits, plan participants' contributions have been excluded from the expected benefits.

Accounting for pensions and other postretirement benefits requires an extensive use of assumptions about the discount rate, expected return on plan assets, the rate of future compensation increases received by the Company's employees, mortality, turnover and medical costs. Each assumption is reviewed annually. The assumptions are selected to represent the average expected experience over time and may differ in any one year from actual experience due to changes in capital markets and the overall economy. These differences will impact the amount of pension and other postretirement benefit expense that the Company recognizes.

The significant assumptions related to the Company's pension and other postretirement benefit plans are as follows:

	Pension Benefits			Other Benefits		
	2013	2012	2011	2013	2012	2011
Weighted-average assumptions used to determine December 31 benefit obligations						
Discount rate	5.12%	4.17%	5.02%	5.10%	4.16%	5.05%
Rate of compensation increase	3.15%	3.19%	3.25%	N/A	N/A	N/A
Medical trend	N/A	N/A	N/A	graded from 7.00% in 2013 to 5% in 2019+	graded from 7.25% in 2012 to 5% in 2019+	graded from 7.50% in 2012 to 5% in 2019+
Weighted-average assumptions used to determine net periodic cost						
Discount rate	4.17%	5.02%	5.32%	4.16%	5.05%	5.27%
Expected return on plan assets	7.49%	7.75%	7.90%	6.99%	7.41%	7.60%
Rate of compensation increase	3.19%	3.25%	3.50%	N/A	N/A	N/A
Medical trend	N/A	N/A	N/A	graded from 7.25% in 2013 to 5% in 2019+	graded from 7.50% in 2012 to 5% in 2019+	graded from 8.00% in 2011 to 5% in 2017+

N/A—Assumption is not applicable.

The discount rate assumption was determined for the pension and postretirement benefit plans independently. At year- end 2011, the Company began using an approach that approximates the process of settlement of obligations tailored to the plans' expected cash flows by matching the plans' cash flows to the coupons and expected maturity values of individually selected bonds. The yield curve was developed for a universe containing the majority of U.S.-issued AA-graded corporate bonds, all of which were non callable (or callable with make-whole provisions). Historically, for each plan, the discount rate was developed as the level equivalent rate that would produce the same present value as that using spot rates aligned with the projected benefit payments.

The expected long-term rate of return on plan assets is based on historical and projected rates of return, prior to administrative and investment management fees, for current and planned asset classes in the plans' investment portfolios. Assumed projected rates of return for each of the plans' projected asset classes were selected after analyzing historical experience and future expectations of the returns and volatility of the various asset classes. Based on the target asset allocation for each asset class, the overall expected rate of return for the portfolio was developed, adjusted for historical and expected experience of active portfolio management results compared to the benchmark returns and for the effect of expenses paid from plan assets. The Company's pension expense increases as the expected return on assets decreases.

Assumed health care cost trend rates have a significant effect on the amounts reported for the other postretirement benefit plans. The health care cost trend rate is based on historical rates and expected market conditions. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	One-Percentage-Point Increase	One-Percentage-Point Decrease
Effect on total of service and interest cost components	$ 7,367	$ (5,974)
Effect on other postretirement benefit obligation	$ 72,238	$ (60,261)

The following table provides the components of net periodic benefit costs for the years ended December 31:

	2013	2012	2011
Components of net periodic pension benefit cost			
Service cost	$ 37,872	$ 34,209	$ 33,641
Interest cost	68,096	70,866	69,047
Expected return on plan assets	(88,429)	(79,272)	(72,109)
Amortization of:			
Prior service cost (credit)	724	723	722
Actuarial (gain) loss	37,170	29,636	18,551
Settlement loss	—	7,135	—
Net periodic pension benefit cost	$ 55,433	$ 63,297	$ 49,852
Other changes in plan assets and benefit obligations recognized in other comprehensive income, net of tax			
Amortization of prior service credit (cost)	$ (174)	$ (176)	$ (175)
Current year actuarial (gain) loss	(73,472)	26,425	30,497
Amortization of actuarial gain (loss)	(8,911)	(7,301)	(4,504)
Total recognized in other comprehensive income	$ (82,557)	$ 18,948	$ 25,818
Total recognized in net periodic benefit cost and comprehensive income	$ (27,124)	$ 82,245	$ 75,670
Components of net periodic other postretirement benefit cost			
Service cost	$ 15,282	$ 14,207	$ 13,938
Interest cost	28,700	31,570	31,219
Expected return on plan assets	(30,285)	(28,711)	(28,779)
Amortization of:			
Prior service cost (credit)	(2,189)	(1,915)	(1,924)
Actuarial (gain) loss	11,128	9,537	7,133
Other	—	(696)	—
Net periodic other postretirement benefit cost	$ 22,636	$ 23,992	$ 21,587

The Company's policy is to recognize curtailments when the total expected future service of plan participants is reduced by greater than 10% due to an event that results in terminations and/or retirements.

The estimated amounts that will be amortized from accumulated other comprehensive income and regulatory assets into net periodic benefit cost in 2014 are as follows:

	Pension Benefits	Other Benefits
Actuarial (gain) loss	$ (131)	$ (81)
Prior service cost (credit)	724	(2,189)
Total	$ 593	$ (2,270)

Savings Plans for Employees

The Company maintains 401(k) savings plans that allow employees to save for retirement on a tax-deferred basis. Employees can make contributions that are invested at their direction in one or more funds. The Company makes matching contributions based on a percentage of an employee's contribution, subject to certain limitations. Due to the Company's discontinuing new entrants into the defined benefit pension plan, on January 1, 2006 the Company began providing an additional 5.25% of base pay defined contribution benefit for union employees hired on or after January 1, 2001 and non-union employees hired on or after January 1, 2006. Plan expenses totaled $8,054 for 2013, $8,091 for 2012 and $7,273 for 2011, respectively. All of the Company's contributions are invested in one or more funds at the direction of the employee.

Note 15: Commitments and Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. At December 31, 2013, the Company has accrued approximately $3,400 as probable costs and it is reasonably possible that additional losses could range up to $30,400 for these matters. For certain matters, the Company is unable to estimate possible losses. The Company believes that damages or settlements, if any, recovered by plaintiffs in such claims or actions will not have a material adverse effect on the Company's results of operations, financial position or cash flows.

The Company enters into agreements for the provision of services to water and wastewater facilities for the United States military, municipalities and other customers. The Company's military services agreements expire between 2051 and 2060 and have remaining performance commitments as measured by estimated remaining contract revenue of $ 1,988,000 at December 31, 2013. The military contracts are subject to customary termination provisions held by the U.S. Federal Government prior to the agreed upon contract expiration. The Company's Operations and Maintenance agreements with municipalities and other customers expire between 2014 and 2048 and have remaining performance commitments as measured by estimated remaining contract revenue of $928,000 at December 31, 2013. Some of the Company's long-term contracts to operate and maintain a municipality's, federal government's or other party's water or wastewater treatment and delivery facilities include responsibility for certain maintenance for some of those facilities, in exchange for an annual fee. Unless specifically required to perform certain maintenance activities, the maintenance costs are recognized when the maintenance is performed.

Commitments have been made in connection with certain construction programs. The estimated capital expenditures required under legal and binding contractual obligations amounted to $263,766 at December 31, 2013.

The Company's regulated subsidiaries maintain agreements with other water purveyors for the purchase of water to supplement their water supply. The Company's subsidiaries' purchased water expense under these types of agreements amounted to approximately $114,471, $115,426 and $104,384 during the years ended December 31, 2013, 2012 and 2011, respectively. The estimated annual commitment related to the minimum quantities of water purchased is expected to approximate $54,288 in 2014, $54,751 in 2015, $50,864 in 2016, $44,043 in 2017, $42,974 in 2018 and $468,523 thereafter.

Note 16: Earnings per Common Share

Earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security. The Company has participating securities related to restricted stock units, granted under the Company's 2007 Omnibus Equity Compensation Plan, that earn dividend equivalents on an equal basis with common shares. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities.

The following is a reconciliation of the Company's income from continuing operations, income (loss) from discontinued operations and net income and weighted-average common shares outstanding for calculating basic earnings per share:

	Years Ended December 31,		
Basic	**2013**	**2012**	**2011**
Income from continuing operations	$ 369,264	$ 374,250	$ 304,929
Income (loss) from discontinued operations, net of tax	0	(16,180)	4,684
Net income	369,264	358,070	309,613
Less: Distributed earnings to common shareholders	150,038	214,541	158,708
Less: Distributed earnings to participating securities	60	86	68
Undistributed earnings	219,166	143,443	150,837
Undistributed earnings allocated to common shareholders	219,082	143,385	150,772
Undistributed earnings allocated to participating securities	84	58	65
Total income from continuing operations available to common shareholders, basic	$ 369,120	$ 374,106	$ 304,796
Total income available to common shareholders, basic	$ 369,120	$ 357,926	$ 309,480
Weighted-average common shares outstanding, basic	177,814	176,445	175,484
Basic earnings per share: (a)			
Income from continuing operations	$ 2.08	$ 2.12	$ 1.74
Income (loss) from discontinued operations, net of tax	$ 0.00	$ (0.09)	$ 0.03
Net income	$ 2.08	$ 2.03	$ 1.76

(a) Amounts may not sum due to rounding.

Diluted earnings per common share is based on the weighted-average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents related to the restricted stock units, stock options, and employee stock purchase plan. The dilutive effect of the common stock equivalents is calculated using the treasury stock method and expected proceeds on vesting of the restricted stock units, exercise of the stock options and purchases under the employee stock purchase plan.

The following is a reconciliation of the Company's income from continuing operations, income (loss) from discontinued operations and net income and weighted-average common shares outstanding for calculating diluted earnings per share:

	Years Ended December 31,		
Diluted	2013	2012	2011
Total income from continuing operations available to common shareholders, basic	$ 369,120	$ 374,106	$ 304,796
Income (loss) from discontinued operations, net of tax	0	(16,180)	4,684
Total income available to common shareholders, basic	369,120	357,926	309,480
Undistributed earnings for participating securities	84	58	65
Total income from continuing operations available to common shareholders, diluted	$ 369,204	$ 374,164	$ 304,861
Total income available to common shareholders, diluted	$ 369,204	$ 357,984	$ 309,545
Weighted-average common shares outstanding, basic	177,814	176,445	175,484
Common stock equivalents:			
Restricted stock units	510	618	556
Stock options	730	607	490
Employee stock purchase plan	2	1	1
Weighted-average common shares outstanding, diluted	179,056	177,671	176,531
Diluted earnings per share (a)			
Income from continuing operations	$ 2.06	$ 2.11	$ 1.73
Income (loss) from discontinued operations, net of tax	$ 0.00	$ (0.09)	$ 0.03
Net income	$ 2.06	$ 2.01	$ 1.75

(a) Amounts may not sum due to rounding.

The following potentially dilutive common stock equivalents were not included in the earnings per share calculations for the years ended December 31 because they were anti-dilutive:

	2013	2012	2011
Stock options	327	619	711
Restricted stock units where certain performance conditions were not met	20	19	22

Note 17: Fair Values of Financial Instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported in the Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted pric es in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs. The fair values of instruments classified as Level 2 and 3 are determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market rates. As a majority of the Company's debts do not trade in active markets, the Company calculated a base yield curve using a risk-free rate (a U.S. Treasury securities yield curve) plus a credit spread that is based on the following two factors: an average of the Company's own publicly-traded debt securities and the current market rates for U.S. Utility A- (BBB+ at December 31, 2012) debt securities. The Company used these yield curve assumptions to derive a base yield for the Level 2 and Level 3 securities. Additionally, the Company adjusted the base yield for specific features of the debt securities including call features, coupon tax treatment and collateral for the Level 3 instruments.

The carrying amounts (including fair value adjustments previously recognized in acquisition purchase accounting) and fair values of the financial instruments are as follows:

2013	**Carrying**	**At Fair Value as of December 31,**			
Recurring Fair Value Measures	**Amount**	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 18,827	$ 0	$ 0	$ 22,795	$ 22,795
Long-term debt (excluding capital lease obligations)	5,224,492	2,263,355	1,462,404	2,057,506	5,783,265

2012	**Carrying**	**At Fair Value as of December 31,**			
Recurring Fair Value Measures	**Amount**	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 20,511	$ 0	$ 0	$ 27,263	$ 27,263
Long-term debt (excluding capital lease obligations)	5,303,729	2,400,847	1,677,776	2,252,272	6,330,895

Fair Value Measurements

To increase consistency and comparability in fair value measurements, FASB guidance establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels as follows:

- Level 1—quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date. Financial assets and liabilities utilizing Level 1 inputs include active exchange-traded equity securities, exchange-based derivatives, mutual funds and money market funds.
- Level 2—inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data. Financial assets and liabilities utilizing Level 2 inputs include fixed income securities, non-exchange-based derivatives, commingled investment funds not subject to purchase and sale restrictions and fair-value hedges.
- Level 3—unobservable inputs, such as internally-developed pricing models for the asset or liability due to little or no market activity for the asset or liability. Financial assets and liabilities utilizing Level 3 inputs include infrequently-traded non-exchange-based derivatives and commingled investment funds subject to purchase and sale restrictions.

Recurring Fair Value Measurements

The following table presents assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy as of December 31, 2013 and 2012, respectively:

	At Fair Value as of December 31, 2013			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets:				
Restricted funds	$ 29,259	$ 0	0	$ 29,259
Rabbi trust investments	0	444	0	444
Deposits	1,901	0	0	1,901
Mark-to-market derivative asset	0	4,776	0	4,776
Total assets	31,160	5,220	0	36,380
Liabilities:				
Deferred compensation obligation	0	11,928	0	11,928
Mark-to-market derivative liability	0	1,276	0	1,276
Total liabilities	0	13,204	0	13,204
Total net assets (liabilities)	$ 31,160	$ (7,984)	0	$ 23,176

	At Fair Value as of December 31, 2012			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets:				
Restricted funds	$ 40,547	$ 0	0	$ 40,547
Rabbi trust investments	0	481	0	481
Deposits	2,103	0	0	2,103
Mark-to-market derivative asset	0	7,909	0	7,909
Total assets	42,650	8,390	0	51,040
Liabilities:				
Deferred compensation obligation	0	10,237	0	$ 10,237
Total liabilities	0	10,237	0	10,237
Total net assets (liabilities)	$ 42,650	$ (1,847)	0	$ 40,803

Restricted funds—The Company's restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operations and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred. Restricted funds expected to be released within twelve months subsequent to year end are classified as current.

Rabbi trust investments—The Company's rabbi trust investments consist primarily of fixed income investments from which supplemental executive retirement plan benefits are paid. The Company includes these assets in other long-term assets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets.

Deferred compensation obligations—The Company's deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities. The value of the Company's deferred compensation obligations is based on the market value of the participants' notional investment accounts. The notional inve stments are comprised primarily of mutual funds, which are based on observable market prices.

Mark-to-market derivative asset and liability—The Company utilizes fixed-to-floating interest-rate swaps, typically designated as fair-value hedges, to achieve a targeted level of variable-rate debt as a percentage of total debt. The Company also employs derivative financial instruments in the form of variable-to-fixed interest rate swaps, classified as economic hedges, in order to fix the interest cost on some of its variable-rate debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

See Note 14 for the Company's fair value of qualified pension and postretirement welfare plans' assets.

Non-recurring Fair Value Measurements

As discussed in Note 7, the Company recognized continuing operations goodwill impairment charges of $0 for each of the years ended December 31, 2013, 2012 and 2011, respectively. The Company's goodwill valuation model includes significant unobservable inputs and falls within Level 3 of the fair value hierarchy.

Note 18: Leases

The Company has entered into operating leases involving certain facilities and equipment. Rental expenses under operating leases were $24,301 for 2013, $28,149 for 2012 and $32,752 for 2011. The operating leases for facilities will expire over the next 20 years and the operating leases for equipment will expire over the next five years. Certain operating leases have renewal options ranging from one to five years.

At December 31, 2013, the minimum annual future rental commitment under operating leases that have initial or remaining non-cancelable lease terms in excess of one year are $15,898 in 2014, $13,396 in 2015, $10,921 in 2016, $9,949 in 2017, $8,048 in 2018 and $89,318 thereafter.

The Company has a series of agreements with various public entities (the "Partners") to establish certain joint ventures, commonly referred to as "public-private partnerships." Under the public-private partnerships, the Company constructed utility plant, financed by the Company, and the Partners constructed utility plant (connected to the Company's property), financed by the Partners. The Company agreed to transfer and convey some of its real and personal property to the Partners in exchange for an equal principal amount of Industrial Development Bonds ("IDBs"), issued by the Partners under a state Industrial Development Bond and Commercial Development Act. The Company leased back the total facilities, including portions funded by both the Company and the Partners, under leases for a period of 40 years.

The leases related to the portion of the facilities funded by the Company have required payments from the Company to the Partners that approximate the payments required by the terms of the IDBs from the Partners to the Company (as the holder of the IDBs). As the ownership of the portion of the facilities constructed by the Company will revert back to the Company at the end of the lease, the Company has recorded these as capital leases. The lease obligation and the receivable for the principal amount of the IDBs are presented by the Company on a net basis. The gross cost of the facilities funded by the Company recognized as a capital lease asset was $158,115 and $158,565 at December 31, 2013 and 2012, respectively, which is presented within utility plant. The future payments under the lease obligations are equal to and offset by the payments receivable under the IDBs.

At December 31, 2013, the minimum annual future rental commitment under the operating leases for the portion of the facilities funded by the Partners that have initial or remaining non-cancelable lease terms in excess of one year included in the preceding minimum annual rental commitments are $3,755 in 2014 through 2018, and $77,072 thereafter.

Note 19: Segment Information

The Company has two operating segments referred to as the Regulated Businesses and Market-Based Operations segments. The Company's chief operating decision maker regularly reviews the operating results of the Regulated Businesses and Market-Based Operations segments to assess segment performance and allocate resources. The evaluation of segment performance and the allocation of resources are based on several measures. The measure that is most consistent with that used by management is income from continuing operations before income tax.

The Regulated Businesses segment includes the Company's 18 utility subsidiaries in continuing operations that provide water and wastewater services to customers in 16 U.S. states. With the exception of one company, each of these public utility subsidiaries is subject to regulation by public utility commissions and local governments. In addition to providing similar products and services and being subject to the public utility regulatory environment, each of the regulated subsidiaries has similar economic characteristics, production processes, types and classes of customers and water distribution or wastewater collection processes. Each of these companies is also subject to both federal and state regulation regarding the quality of water distributed and the discharge of wastewater residuals.

The Market-Based Operations segment is comprised of market-based businesses that provide a broad range of water and wastewater services and products including homeowner water and sewer line maintenance services, water and wastewater facility operations and maintenance services and products for cleansing water and wastewater and wastewater residuals management services.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. (See Note 2) The Regulated Businesses and Market-Based Operations segment information includes intercompany costs that are allocated by American Water Works Service Company, Inc. and intercompany interest that is charged by AWCC, which are eliminated to reconcile to the consolidated results of operations. Inter-segment revenues, which are primarily recorded at cost plus mark-up that approximates current market prices, include carbon regeneration services and leased office space, furniture and equipment provided by the Company's market-based subsidiaries to its regulated subsidiaries. Other includes corporate costs that are not allocated to the Company's subsidiaries, eliminations of inter-segment transactions, fair value adjustments and associated income and deductions related to the Acquisitions that have not been allocated to the segments for evaluation of segment performance and allocation of resource purposes. The adjustments related to the Acquisitions are reported in Other, as they are excluded from segment performance measures evaluated by management. The following table includes the Company's summarized segment information:

	As of or for the Year Ended December 31, 2013			
	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 2,593,918	$ 325,463	$ (17,523)	$ 2,901,858

Income from continuing operations	$ 0.32	$ 0.57	$ 0.84	$ 0.33
Net income	$ 0.32	$ 0.57	$ 0.84	$ 0.33

2012	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
	(In thousands, except per-share data)			
Operating revenues	$ 618,554	$ 745,607	$ 831,815	$ 680,913
Operating income	159,738	270,632	327,640	166,963
Income from continuing operations	49,252	116,663	154,111	54,224
Net income	41,754	107,026	153,812	55,478
Basic earnings per common share:				
Income from continuing operations	$ 0.28	$ 0.66	$ 0.87	$ 0.31
Net income	$ 0.24	$ 0.61	$ 0.87	$ 0.31
Diluted earnings per common share:				
Income from continuing operations	$ 0.28	$ 0.66	$ 0.87	$ 0.30
Net income	$ 0.24	$ 0.60	$ 0.86	$ 0.31

Amounts may not sum due to rounding; per share amounts may not sum due to changes in shares outstanding during the year.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

American Water Works Company, Inc. maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 (“the Exchange Act”) is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) of the Exchange Act) as of December 31, 2013 pursuant to 15d-15(e) under the Exchange Act.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2013, our disclosure controls and procedures were effective at a reasonable level of assurance. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our internal control over financial reporting is a process designed by or under the supervision of our Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect our transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and our directors; (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, including our Chief Executive Officer and the Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting, as of December 31, 2013, using the criteria described in *Internal Control—Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on our evaluation under the framework in Internal Control—Integrated Framework issued by COSO, our management concluded that our internal control over financial reporting was effective as of December 31, 2013.

The effectiveness of our internal control over financial reporting as of December 31, 2013 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report appearing in Part II, Item 8 of this Annual Report on Form 10-K.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS OF THE REGISTRANT AND CORPORATE GOVERNANCE

The information required by this item and not given below, is incorporated by reference in the Company's Proxy Statement for the 2014 Annual Meeting of Stockholders, to be filed with the Securities and Exchange Commission within 120 days following the end of the fiscal year covered by this report, under the captions entitled "Nominees for Election as Directors," "Information Relative to the Board of Directors and Committees of the Board of Directors," "Section 16(a) Beneficial Ownership Reporting Compliance ," and "Code of Ethics and Corporate Governance Guidelines."

We have adopted a Code of Ethics, which applies to directors and employees. The full text of the Code of Ethics is publicly available on our website at *http://www.amwater.com*. We intend to post on our website any amendments to certain provisions of our Code of Ethics and any waivers of such provisions granted to principal officers.

Name	Age	Office and Employment During Last Ten Years
Jeffry Sterba	58	Mr. Sterba has been our President and Chief Executive Officer since August 2010. He will cease to serve in that capacity following the Annual Meeting. He will continue to serve as an adviser to Ms. Story until January 1, 2015. Prior to joining American Water, Mr. Sterba served as Chairman and CEO of PNM Resources, Inc., the parent company of Public Service Company of New Mexico (PNM), Texas-New Mexico Power Company (TNMP) and First Choice Power, from 2000 until March 2010. Mr. Sterba previously served as Non-Executive Chairman of PNM Resources until retiring from the PNM Resources board in December 2011. After joining PNM in 1977, he held a succession of positions including Executive Vice President and Chief Operating Officer, Senior Vice President Bulk Power Services, Senior Vice President Asset Restructuring, Senior Vice President Retail Electric & Water Services and Vice President Revenue Management. From 1998 to 2000, Mr. Sterba was Executive Vice President of United States Enrichment Corporation (USEC), a global energy company headquartered in Maryland. He has served as the chair of Edison Electric Institute, the national association of shareholder owned utilities, and chair of the Electric Power Research Institute, a global non-profit center for energy and environment research. He serves on the board of directors of the Meridian Institute and previously served on the board of directors of the U.S. Chamber of Commerce.
Susan N. Story	54	Ms. Story has been our Senior Vice President and Chief Financial Officer since April 2013. Previously, she was employed for over 30 years by Southern Company, which owns and operates electric utilities in four states, and also is engaged in electric wholesale generation and telecommunications, including both wireless and wireline, fiber optic communications. Ms. Story was an executive officer of Southern Company from 2003 until she joined the Company. In addition, from January 2011 until she joined the Company, she served as the President and Chief Executive Officer of Southern Company Services, which provides shared services for all of Southern Company's subsidiaries, including information technology and cyber security efforts, human resources, procurement and supply chain management, marketing services, customer research and system transportation functions. From 2003 to December 2010, she was the President and Chief Executive Officer of Gulf Power Company, an electric utility serving the northwestern portion of Florida. Ms. Story is an independent board member of Raymond James Financial and serves on the boards of the Bipartisan Policy Center in Washington, DC and the Moffitt Cancer Center in Tampa, FL.
Walter J. Lynch	51	Mr. Lynch has served as our President and Chief Operating Officer of Regulated Operations since March 2010, and President of Regulated Operations since July 2008. Prior to that date, he served as Executive Vice President, Eastern Division. He also served as president of New Jersey American Water, Long Island American Water and our Northeast Region. Mr. Lynch joined us in 2001 and served as President of our Products and Services Group, where he was responsible for overseeing our Market-Based Operations. Prior to this, he was President of the Southwest Region of American Water Services. Mr. Lynch has more than 20 years of experience in engineering, sales and marketing, operations and business development. Before joining us, he was involved with various start-up and growth organizations in the environmental industry. Mr. Lynch worked for Mobil Oil Corporation following his departure from the United States Army where he attained the rank of Captain. In addition, Mr. Lynch is on the board of directors of the National Association of Water Companies and serves on its Executive Committee.
Kellye L. Walker	47	Ms. Walker has been our Chief Administrative Officer since September 2010, and Senior Vice President, General Counsel and Secretary since January 2010. From February 2007 to June 2009, Ms. Walker served as Senior Vice President and General Counsel of Diageo North America, Inc., the largest operating company of Diageo plc. From February 2003 to December 2006, Ms. Walker served as Senior Vice President, General Counsel and Secretary of BJ's Wholesale Club, Inc., a leading warehouse club operator. Ms. Walker also served as a partner with the law firm of Hill & Barlow in Boston, Massachusetts, and as a partner and/or associate with the law firms of Chaffe, McCall, Phillips, Toler & Sarpy in New Orleans, Louisiana, and Boult, Cummings, Connors & Berry in Nashville, Tennessee.

Name	Age	Office and Employment During Last Ten Years
Mark Chesla	54	Mr. Chesla has been our Vice President and Controller since November 2007. From 2001 to November 2007, Mr. Chesla was Vice President and Controller of Oglethorpe Power Corporation, in Atlanta, Georgia, where he served as that company's chief accounting officer. In this capacity he was responsible for all aspects of the accounting, internal financial management, regulatory and SEC reporting functions. Mr. Chesla was Vice President, Administration/Controller of SouthStar Energy Services LLC, in Atlanta, Georgia, from 1998 to 2001. Earlier, he held management positions with several other companies, including Piedmont Natural Gas Co., Inc., Aegis Technologies, Inc., Deloitte & Touche LLP and Carolina Power & Light Company.
Mark F. Strauss	62	Mr. Strauss has been our Senior Vice President of Corporate Strategy and Business Development since September 2010. From December 2006, until his new appointment in September 2010, Mr. Strauss was President of American Water Enterprises, managing our Market-Based Operations. Previously, Mr. Strauss was President and Chief Executive Officer of a line of business that we sold in 2012, Applied Water Management Group, which provided customized water and wastewater management solutions to real estate developers, industrial clients and small to midsized communities nationwide. Mr. Strauss joined Applied Water Management Group in 1997 as Corporate Counsel and Secretary. He was promoted to Chief Operating Officer in 2002, a position he held until his appointment as Division President and Chief Executive Officer in 2003. Earlier, he served as Vice President and General Counsel of Vizzoni Brothers Construction, Inc. Mr. Strauss serves as a director of Skylands Community Bank. Mr. Strauss was also an associate at the law firms of Ozzard, Rizzolo, Klein, Mauro & Savo and Toolan, Romond, Abbot and Domenichetti.
William M. Varley	56	Mr Varley has been Senior Vice President, Northeast Division and President of New Jersey American Water since January 2014. He is also President of New York American Water (formerly named Long Island American Water), a position he has held since 2007. Mr. Varley previously served as vice president and manager of Long Island American Water, as well as vice president of Business Development for New Jersey and New York. Prior to joining American Water in 2000, Mr. Varley was the district manager for Layne Christensen Co., a large water supply contracting company, for 13 years. There he oversaw Layne's Long Island well-drilling operations. He also worked for large consulting engineering firms Camp Dresser & McKee and Hazen & Sawyer as resident and design engineer for large wastewater treatment plant upgrades. Mr. Varley holds a bachelors of science in civil engineering technology from Rochester Institute of Technology.
Nick O. Rowe	56	Mr. Rowe has been the Senior Vice President of our Central Division since November 2011. From January 2009 until his new appointment in November 2011, Mr. Rowe was Senior Vice President of our Eastern Division, and from 2006 to January 2011, he was President of Kentucky American Water. From 2005 to 2006, he served as Vice President of Service Delivery Operations for the Southeast Region of American Water. From 2003 to 2005, he served as Vice President, Business Change for American Water in New Jersey, and from 1998 to 2003, Mr. Rowe was Vice President of Operations for Kentucky American Water. From 1987 to 1998, he served in various management positions with responsibility for the day-to-day operations of American Water facilities in several states including Virginia, West Virginia, and Pennsylvania. Mr. Rowe is involved with various regulatory agencies and civic and professional organizations. He is also a member of the American Water Works Association and the National Association of Water Companies.
Kathy L. Pape	61	Ms. Pape has been our Senior Vice President, Mid-Atlantic Division since November 2011, and President of Pennsylvania American Water since July 2007. From 1999 to 2007, Ms. Pape served as Senior Vice President, Treasurer and Rate Counsel for Aqua America, Inc. with responsibility for all financing activities, billing, rates and regulatory filings, budgeting and long-range planning. From 1994 to 1999, Ms. Pape was employed by us as Regional Counsel and Finance Manager, where her responsibilities included rates and regulatory affairs, finance, budgeting and customer service for 10 states. Prior to 1994, Ms. Pape was Vice President and Corporate Counsel for General Waterworks Management and Service Co., Assistant Counsel to the Pennsylvania Public Utility Commission and Assistant Consumer Advocate for the Pennsylvania Office of Consumer Advocate.

Name	Age	Office and Employment During Last Ten Years
William D. Rogers	53	Mr. Rogers has been our Vice President and Treasurer since October 2010. From 2005 to 2010, he was Chief Financial Officer for NV Energy, an investor-owned utility in Las Vegas, Nevada. From 2005 to 2007, he also served as NV Energy's Vice President of Finance, Risk and Tax and as Corporate Treasurer. Before joining NV Energy, Mr. Rogers was a managing director of capital markets for both Merrill Lynch and JPMorgan Chase in New York.
John R. Bigelow	59	Mr. Bigelow has been our Senior Vice President of Business Services since November 2011. From 2007 until his new appointment in November 2011, Mr. Bigelow was President of New Jersey American Water (NJAWC). Mr. Bigelow joined American Water in 1994 and held a number of senior management positions during his tenure, including American Water's Senior Vice President of Regulatory Programs and Enterprise Risk Management. From December 2003 to February 2006, Mr. Bigelow served as American Water's Chief Financial Officer, Vice President and Treasurer of NJAWC, and Director, Vice President and Treasurer of New Jersey American Resources Co. Mr. Bigelow began his career with GPU System Companies, where he spent 18 years in various leadership roles in the finance area.
Sharon Cameron	57	Ms. Cameron has been president of American Water Enterprises, our Market-Based Operations, since September 2010. She also serves as President of American Water Resources, Inc., a business she has been leading since 2002. Prior to joining American Water, Ms. Cameron was principal of Marketing Solutions, a marketing consulting firm she launched in 1998, and was a consultant to American Water on the Homeowner Services business. Previously, Ms. Cameron served as vice president of Marketing and Sales at Comcast Corporation (New Jersey), senior marketing manager at Menley & James Laboratories, and marketing manager at Campbell Soup Company.
Mark S. Smith	54	Mr. Smith has been our Vice President and Chief Information Officer since September 2012. From 2008 to 2012, Mr. Smith served as our ITS Senior Director, Business Application Development & Project Management Office. Prior to joining American Water, Mr. Smith, held several roles with Siemens and Shared Medical Systems (pre-acquisition) over a course of 23 years, including Group Manager of Management Information Systems and Director of the Shared Services Office where he was responsible for enterprise and system level architecture definition, administration and implementation for internal development as well as custom commercial applications.
Maureen Duffy	44	Ms. Duffy has been our Vice President of Corporate Communications and External Affairs since September 2011. From June 2011 to September 2011, Ms. Duffy served as the Executive Director of Corporate Communications and External Affairs. From September 2008 to June 2011, Ms. Duffy served as Director of External Communications, and from July 2006 until September 2008, she served as Director of Internal Communications. From November 1999 to July 2006, she held various positions with New Jersey American Water, which included Government Affairs/Media Specialist, Communications Manager and Director of Corporate Communications. Prior to joining American Water, Ms. Duffy reported and produced news for WNJN/WNET-TV.

Exhibit 31.1

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

I, Jeffry Sterba, certify that:

1. I have reviewed this annual report on Form 10-K of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

> a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
>
> b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
>
> c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
>
> d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

> a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
>
> b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

Note 1: Basis of Presentation

The unaudited consolidated financial statements provided in this report include the accounts of American Water Works, Company, Inc. and its subsidiaries (collectively, the "Company") after the elimination of intercompany accounts and transactions. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial reporting and with the rules and regulations for reporting on Form 10-Q. Accordingly, they do not contain certain information and disclosures required by GAAP for comprehensive financial statements. In the opinion of management, all adjustments necessary for a fair presentation of the financial position at March 31, 2015 and results of operations and cash flows for all periods presented have been made. All adjustments are of a normal, recurring nature, except as otherwise disclosed.

The Consolidated Balance Sheet as of December 31, 2014 is derived from the Company's audited consolidated financial statements at December 31, 2014. These unaudited financial statements and notes should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2014 which provides a more complete understanding of our accounting policies, financial position, operating results and other matters. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year, due primarily to the seasonality of the Company's operations.

The accompanying Notes to the Consolidated Financial Statements relate to continuing operations only unless otherwise indicated.

The Company reclassified previously reported 2014 data to conform to the current presentation for discontinued operations. See Note 3 for additional details on the Company's discontinued operations.

Note 2: New Accounting Pronouncements

The following recently issued accounting standards have been adopted by the Company and have been included in the consolidated results of operations, financial position or footnotes of the accompanying Consolidated Financial Statements:

Service Concession Arrangements

In January 2014, the Financial Accounting Standards Board ("FASB") issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide the services and at what price. The grantor also controls, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in the arrangement should not be recognized as property, plant and equipment of the operating entity. The update required application on a modified retrospective basis to service concession arrangements that existed at January 1, 2015. The Company reduced nonutility property and other long-term assets for infrastructure related to service concession arrangements and recognized a cumulative effect adjustment of $8,395, net of tax, to the opening balance of accumulated deficit at January 1, 2015.

Reporting Discontinued Operations

In April 2014, the FASB issued guidance that changed the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. Under the updated guidance, a discontinued operation is defined as a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has or will have a major effect on an entity's operations and financial results. A strategic shift could include a disposal of a major geographical area of operations, a major line of business, a major equity method investment or other major part of the entity. A component comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity including a reportable segment, an operating segment, a reporting unit, a subsidiary or an asset group. The update no longer precludes presentation as a discontinued operation if there are operations and cash flows of the component that have not been eliminated from the reporting entity's ongoing operations or if there is significant continuing involvement with a component after its disposal. The guidance is effective on a prospective basis for interim and annual periods beginning after December 15, 2014, which for the Company is January 1, 2015.

The following recently issued accounting standards are not yet required to be adopted by the Company:

Revenue from Contracts with Customers

In May 2014, the FASB issued a comprehensive new revenue recognition standard that supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the new guidance is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The guidance is effective for annual and interim periods beginning December 15, 2016, which for the Company is January 1, 2017. Early adoption is not permitted. The new guidance allows for either full retrospective adoption, meaning the guidance is applied to all of the periods presented, or modified retrospective adoption, meaning the standard is applied only to the most current period presented in the financial statements. The FASB voted on April 1, 2015 to propose to defer the effective date of the new revenue recognition standard by one year. Based on the proposed FASB decision, public organizations would apply the new revenue standard to annual reporting periods beginning after December 15, 2017, which is January 1, 2018 for the Company. Additionally in its proposal, the FASB decided to permit early adoption but not before the original public organization effective date (that is, annual periods beginning after December 15, 2016 or January 1, 2017 for the Company). The FASB plans to expose its decisions for a thirty-day public comment period in a proposed Accounting Standards Update, which is expected to be issued sometime during the second quarter of 2015. The Company is evaluating the new guidance, the best transition method and the impact the new standard will have on results of operations, financial position or cash flows.

Accounting for Stock-based Compensation with Performance Targets

In June 2014, the FASB issued guidance for the accounting for stock-based compensation tied to performance targets. The amendments clarify that a performance target that affects vesting of a share-based payment and that could be achieved after the requisite service period is a performance condition. As a result, the target is not reflected in the estimation of the award’s grant date fair value and compensation cost would be recognized over the required service period, if it is probable that the performance condition will be achieved. The updated guidance may be applied either: (a) prospectively to all awards granted or modified after the effective date or (b) retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. The guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, which for the Company is January 1, 2016. Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Disclosures of Uncertainties about an Entity’s Ability to Continue as a Going Concern

In August 2014, the FASB issued guidance that explicitly requires an entity’s management to assess the entity’s ability to continue as a going concern. The new guidance requires an entity to evaluate, at each interim and annual period, whether there are conditions or events that raise substantial doubt about the entity’s ability to continue as a going concern within one year after the date the financial statements are issued (or are available to be issued) and to provide related disclosures, if applicable. The new guidance is effective for annual periods ending after December 15, 2016 and for interim and annual periods thereafter, which for the Company is January 1, 2017. Early adoption is permitted. The adoption of this updated guidance is not expected to have a material impact on its results of operations, financial position or cash flows.

Hybrid Financial Instruments Issued in the Form of a Share

In November 2014, the FASB updated the derivatives and hedging guidance requiring issuers of, or investors in, hybrid financial instruments to determine whether the nature of the host contract is more akin to a debt instrument or an equity instrument by considering the economic characteristics and risks of the entire hybrid financial instrument, including the embedded derivative feature that is being evaluated for separate accounting from the host contract. This update should be applied on a modified retrospective basis to hybrid financial instruments issued in the form of a share that exist at the beginning of an entity’s fiscal year of adoption. The updated guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, which for the Company is January 1, 2016. Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Extraordinary and Unusual Items

In January 2015, the FASB issued guidance that eliminates the concept of an extraordinary item. As a result, an entity will no longer segregate an extraordinary item and present it separately from the results of ordinary operations or separately disclose income taxes or earnings per share information applicable to an extraordinary item. The presentation and disclosure guidance for items that are unusual in nature or occur infrequently has been retained and expanded to include items that are both unusual in nature and infrequently occurring. The updated guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, which for the Company is January 1, 2016. Early adoption is permitted. The updated guidance may be applied prospectively or retrospectively to all periods presented in the financial statements. The adoption of this updated guidance is not expected to have a material impact on results of operations, financial position or cash flows.

Amendments to the Consolidation Analysis

In February 2015, the FASB issued guidance that amends the consolidation analysis for variable interest entities ("VIEs") as well as voting interest entities. The amended guidance (1) modifies the assessment of limited partnerships as VIEs, (2) amends the effect that fees paid to a decision maker or service provider have on the VIE analysis, (3) amends how variable interests held by a reporting entity's related parties and de facto agents impact its consolidation conclusion, (4) clarifies how to determine whether equity holders have power over an entity and (5) provides a scope exception for registered and similar unregistered money market funds. The guidance is effective for the first interim period within annual reporting periods beginning after December 15, 2015, which for the Company is January 1, 2016. Early adoption is permitted as of the beginning of the annual period containing the adoption date. The guidance may be applied retrospectively to each prior reporting period presented or retrospectively with a cumulative effect adjustment to retained earnings for initial application of the guidance at the date of adoption (modified retrospective method). The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Presentation of Debt Issuance Costs

In April 2015, the FASB issued updated guidance on imputation of interest and simplifying the presentation of debt issuance costs. The updated guidance requires debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of the related liability. Such treatment is consistent with the current presentation of debt discounts or premiums. As it stood prior to amendment, debt issuance costs were reported in the balance sheet as an asset (i.e., a deferred charge), whereas debt discounts and premiums were, and remain, reported as deductions from or additions to the debt itself. Recognition and measurement guidance for debt issuance costs is not affected by the amendments. The effective date is for financial statements covering fiscal years beginning after December 15, 2015, and interim periods within fiscal years beginning after December 15, 2016. Early adoption is permitted for financial statements that have not been previously issued. The amended guidance must be applied on a retrospective basis. Thus, balance sheets for each period presented should be adjusted to reflect the period-specific effects of applying the new guidance. The Company is evaluating the new guidance and does not expect this new guidance to have a material impact on its results of operations, financial position or cash flows.

Accounting for Fees Paid in a Cloud Computing Arrangement

In April 2015, the FASB issued guidance clarifying how customers should account for fees paid in a cloud computing arrangement. Examples of cloud computing arrangements include software as a service, platform as a service, infrastructure as a service and other similar hosting arrangements. Under the new guidance, if a cloud computing arrangement contains a software license, the customer would account for the fees related to the software license element in a manner consistent with the acquisition of other software licenses. If the arrangement does not contain a software license, the customer would account for the arrangement as a service contract. The guidance may be applied retrospectively or prospectively to arrangements entered into, or materially modified after the effective date. The guidance is effective for annual periods, and interim periods therein, beginning after December 15, 2015, which for the Company is January 1, 2016. Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Note 3: Divestitures

In November 2014, the Company completed the sale of Terratec Environmental Ltd ("Terratec") previously included in the Market-Based Operations segment. A summary of discontinued operations presented in the Consolidated Statements of Operations and Comprehensive Income for the three months ended March 31, 2014 is as follows:

Operating revenues	$ 2,943
Total operating expenses, net	4,289
Loss from discontinued operations before income taxes	(1,346)
Benefit from income taxes	(356)
Loss from discontinued operations	$ (990)

Note 4: Stockholders' Equity

Accumulated Other Comprehensive Loss

The following table presents changes in accumulated other comprehensive loss by component, net of tax, for the three months ended March 31, 2015 and 2014, respectively:

	Defined Benefit Plans					
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial (Gain) Loss	Foreign Currency Translation	Loss on Cash Flow Hedge	Total Accumulated Other Comprehensive Loss
Beginning balance at January 1, 2015	$ (115,830)	$ 879	$ 31,119	$ 2,755	$ (791)	$ (81,868)
Other comprehensive income (loss) before reclassifications	—	—	—	(996)	—	(996)
Amounts reclassified from accumulated other comprehensive income (loss)	—	39	1,302	—	20	1,361
Net comprehensive income (loss) for the period	—	39	1,302	(996)	20	365
Ending balance at March 31, 2015	$ (115,830)	$ 918	$ 32,421	$ 1,759	$ (771)	$ (81,503)
Beginning balance at January 1, 2014	$ (69,711)	$ 713	$ 31,150	$ 3,213	$ —	$ (34,635)
Other comprehensive income (loss) before reclassifications	—	—	—	(550)	—	(550)
Amounts reclassified from accumulated other comprehensive income (loss)	—	41	(7)	—	—	34
Net comprehensive income (loss) for the period	—	41	(7)	(550)	—	(516)
Ending balance at March 31, 2014	$ (69,711)	$ 754	$ 31,143	$ 2,663	$ —	$ (35,151)

The Company does not reclassify the amortization of defined benefit pension cost components from accumulated other comprehensive loss directly to net income in its entirety. These accumulated other comprehensive income (loss) components are included in the computation of net periodic pension cost. (See Note 8)

The amortization of the loss on cash flow hedge is included in interest, net in the accompanying Consolidated Statements of Operations and Comprehensive Income.

Stock Options

In the first three months of 2015, the Company granted non-qualified stock options to certain employees under the Plan. The stock options vest ratably over the three-year service period beginning January 1, 2015. These awards have no performance vesting conditions and the grant date fair value is amortized through expense over the requisite service period using the straight-line method.

The following table presents the weighted-average assumptions used in the Black-Scholes option-pricing model and the resulting weighted-average grant date fair value per share of stock options granted through March 31, 2015:

Dividend yield	2.35%
Expected volatility	17.64%
Risk-free interest rate	1.48%
Expected life (years)	4.4
Exercise price	$ 52.75
Grant date fair value per share	$ 6.21

Stock options granted under the Plan have maximum terms of seven years, vest over periods ranging from one to three years, and are granted with exercise prices equal to the market value of the Company's common stock on the date of grant. As of March 31, 2015, $2,565 of total unrecognized compensation cost related to the non-vested stock options is expected to be recognized over the weighted-average period of 2.2 years.

The table below summarizes stock option activity for the three months ended March 31, 2015:

	Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value
Options outstanding at January 1, 2015	1,910	$ 33.47		
Granted	301	52.75		
Forfeited or expired	(28)	42.73		
Exercised	(152)	30.24		
Options outstanding at March 31, 2015	2,031	$ 36.44	3.6	$ 36,087
Exercisable at March 31, 2015	1,468	$ 31.89	2.6	$ 32,765

The following table summarizes additional information regarding stock options exercised during the three months ended March 31, 2015 and 2014:

	2015	2014
Intrinsic value	$ 3,575	$ 4,206
Exercise proceeds	4,605	6,822
Income tax benefit	1,084	1,151

Restricted Stock Units

During 2012, the Company granted selected employees 158 restricted stock units with internal performance measures and, separately, certain market thresholds. These awards vested in January 2015. The terms of the grants specified that if certain performance on internal measures and market thresholds was achieved, the restricted stock units would vest; if performance was surpassed, up to 175% of the target awards would be distributed; and if performance thresholds were not met, awards would be cancelled. In January 2015, an additional 93 restricted stock units were granted and distributed because performance thresholds were exceeded.

In the first three months of 2015, the Company granted restricted stock units, both with and without performance conditions, to certain employees and non-employee directors under the Plan. The restricted stock units without performance conditions vest ratably over the three-year service period beginning January 1, 2015 and the restricted stock units with performance conditions vest ratably over the three-year performance period beginning January 1, 2015 (the “Performance Period”). Distribution of the performance shares is contingent upon the achievement of internal performance measures and, separately, certain market thresholds over the Performance Period. The restricted stock units granted with service-only conditions and those with internal performance measures are valued at the market value of the Company’s common stock on the date of grant. The restricted stock units granted with market conditions are valued using a Monte Carlo model.

The following table presents the weighted-average assumptions used in the Monte Carlo simulation and the weighted-average grant date fair value of restricted stock units granted through March 31, 2015:

Expected volatility	14.90%
Risk-free interest rate	1.10%
Expected life (years)	3
Grant date fair value per share	$ 55.28

The grant date fair value of the restricted stock unit awards that vest ratably and have market and/or performance and service conditions is amortized through expense over the requisite service period using the graded-vesting method. Restricted stock units that have no performance conditions are amortized through expense over the requisite service period using the straight-line method. As of March 31, 2015, $7,391 of total unrecognized compensation cost related to the non-vested restricted stock units is expected to be recognized over the weighted-average remaining life of 1.6 years.

The table below summarizes restricted stock unit activity for the three months ended March 31, 2015:

	Shares	Weighted-Average Grant Date Fair Value (per share)
Non-vested total at January 1, 2015	516	$ 41.46
Granted	105	55.28
Performance share adjustment	93	38.11
Vested	(274)	38.56
Forfeited	(14)	43.22
Non-vested total at March 31, 2015	426	$ 45.94

The following table summarizes additional information regarding restricted stock units distributed during the three months ended March 31, 2015 and 2014:

	2015	2014
Intrinsic value	$ 15,250	$ 13,175
Income tax benefit	1,836	1,450

If dividends are paid with respect to shares of the Company's common stock before the restricted stock units are distributed, the Company credits a liability for the value of the dividends that would have been paid if the restricted stock units were shares of Company common stock. When the restricted stock units are distributed, the Company pays the participant a lump sum cash payment equal to the value of the dividend equivalents accrued. The Company accrued dividend equivalents totaling $45 and $175 to retained earnings during the three months ended March 31, 2015 and 2014, respectively.

Note 5: Long-Term Debt

The following long-term debt was retired through sinking fund payments during the first three months of 2015:

Company	Type	Rate	Maturity	Amount
American Water Capital Corp. ("AWCC") (a)	Private activity bonds and government funded debt—fixed rate	1.79%-2.90%	2021-2031	$ 807
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-5.30%	2015-2033	2,277
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments	12.17%	2026	7
Total retirements and redemptions				$ 4,291

(a) AWCC, which is a wholly-owned subsidiary of the Company, has a strong support agreement with its parent that, under certain circumstances, is the functional equivalent of a guarantee.

The Company has an interest rate swap to hedge $100,000 of its 6.085% fixed-rate debt maturing 2017. The Company pays variable interest of six-month LIBOR plus 3.422%. The swap is accounted for as a fair-value hedge and matures with the fixed-rate debt in 2017.

The following table provides a summary of the derivative fair value balance recorded by the Company and the line item in the Consolidated Balance Sheets in which such amount is recorded:

Balance sheet classification	March 31, 2015	December 31, 2014
Regulatory and other long-term assets		
Other	$ 3,874	$ 3,636
Long-term debt		
Long-term debt	3,794	3,570

For derivative instruments that are designated and qualify as fair-value hedges, the gain or loss on the hedge instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current net income. The Company includes the gain or loss on the derivative instrument and the offsetting loss or gain on the hedged item in interest expense as follows:

	Three Months Ended March 31,	
Income statement classification	**2015**	**2014**
Interest, net		
Gain (loss) on swap	$ 238	$ (377)
Gain (loss) on borrowing	(224)	328
Hedge ineffectiveness	14	(49)

Note 6: Short-Term Debt

Short-term debt consists of commercial paper borrowings totaling $544,531 (net of discount of $236) at March 31, 2015 and $449,959 (net of discount of $41) at December 31, 2014.

Note 7: Income Taxes

The Company's estimated annual effective tax rate for the three months ended March 31, 2015 was 39.5% compared to 40.1% for the three months ended March 31, 2014, excluding various discrete items.

The Company’s actual effective tax rates for continuing operations were as follows:

	Three Months Ended March 31,	
	2015	**2014**
Actual effective tax rate	40.0%	39.6%

Current deferred tax assets increased in 2015 due to the expected utilization of certain tax attributes within the next 12 months.

Note 8: Pension and Other Postretirement Benefits

The following table provides the components of net periodic benefit costs:

	Three Months Ended March 31,	
	2015	**2014**
Components of net periodic pension benefit cost		
Service cost	$ 9,334	$ 7,943
Interest cost	18,576	19,163
Expected return on plan assets	(24,366)	(23,709)
Amortization of:		
Prior service cost	188	181
Actuarial (gain) loss	6,277	(33)
Net periodic pension benefit cost	$ 10,009	$ 3,545
Components of net periodic other postretirement benefit cost		
Service cost	$ 3,443	$ 2,764
Interest cost	7,466	7,151
Expected return on plan assets	(6,299)	(6,875)
Amortization of:		
Prior service credit	(547)	(547)
Actuarial (gain) loss	1,252	(20)
Net periodic other postretirement benefit cost	$ 5,315	$ 2,473

The Company contributed $6,100 to its defined benefit pension plans in the first three months of 2015 and expects to contribute $21,900 during the balance of 2015. In addition, the Company contributed $6,632 for the funding of its other postretirement plans in the first three months of 2015 and expects to contribute $19,895 during the balance of 2015.

Note 9: Commitments and Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. At March 31, 2015, the Company has accrued approximately $4,800 as probable costs and it is reasonably possible that additional losses could range up to $29,900 for these matters. For certain matters, the Company is unable to estimate possible losses. The Company believes that damages or settlements recovered by plaintiffs in such claims or actions, if any, will not have a material adverse effect on the Company's results of operations, financial position or cash flows, individually or in the aggregate.

Note 10: Environmental Matters

The Company's water and wastewater operations are subject to federal, state, local and foreign requirements relating to environmental protection, and as such, the Company periodically becomes subject to environmental claims in the normal course of business. Environmental expenditures that relate to current operations or provide a future benefit are expensed or capitalized as appropriate. Remediation costs that relate to an existing condition caused by past operations are accrued, on an undiscounted basis, when it is probable that these costs will be incurred and can be reasonably estimated. Remediation costs accrued amounted to $2,200 at March 31, 2015 and December 31, 2014. The accrual relates to a conservation agreement entered into by a subsidiary of the Company with the National Oceanic and Atmospheric Administration ("NOAA") requiring the Company to, among other provisions, implement certain measures to protect the steelhead trout and its habitat in the Carmel River watershed in the state of California. The Company has agreed to pay $1,100 annually from 2010 through 2016. The Company pursues recovery of incurred costs through all appropriate means, including regulatory recovery through customer rates. The Company's regulatory assets at March 31, 2015 and December 31, 2014 include $7,794 and $7,791, respectively, related to the NOAA agreement.

Note 11: Earnings per Common Share

Earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security. The Company has participating securities related to restricted stock units, granted under the Company's 2007 Omnibus Equity Compensation Plan, that earn dividend equivalents on an equal basis with common shares. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities.

The following is a reconciliation of the Company's income from continuing operations, loss from discontinued operations and net income and weighted-average common shares outstanding for calculating basic earnings per share:

	Three Months Ended March 31,	
Basic	2015	2014
Income from continuing operations	$ 80,043	$ 69,113
Loss from discontinued operations, net of tax	—	(990)
Net income	80,043	68,123
Less: Distributed earnings to common shareholders	55,647	50,128
Less: Distributed earnings to participating securities	13	15
Undistributed earnings	24,383	17,980
Undistributed earnings allocated to common shareholders	24,378	17,975
Undistributed earnings allocated to participating securities	5	5
Total income from continuing operations available to common shareholders, basic	$ 80,025	$ 69,093
Total income available to common shareholders, basic	$ 80,025	$ 68,103
Weighted-average common shares outstanding, basic	179,458	178,539
Basic earnings per share: (a)		
Income from continuing operations	$ 0.45	$ 0.39
Loss from discontinued operations, net of tax	$ 0.00	$ (0.01)
Net income	$ 0.45	$ 0.38

(a) Earnings per share amounts are computed independently for income from continuing operations, loss from discontinued operations and net income. As a result, the sum of per-share amounts from continuing operations and discontinued operations may not equal the total per-share amount for net income.

Diluted earnings per common share is based on the weighted-average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents related to the restricted stock units, stock options, and employee stock purchase plan. The dilutive effect of the common stock equivalents is calculated using the treasury stock method and expected proceeds on vesting of the restricted stock units, exercise of the stock options and purchases under the employee stock purchase plan.

The following is a reconciliation of the Company's income from continuing operations, loss from discontinued operations and net income and weighted-average common shares outstanding for calculating diluted earnings per share:

	Three Months Ended March 31,	
Diluted	**2015**	**2014**
Total income from continuing operations available to common shareholders, basic	$ 80,025	$ 69,093
Loss from discontinued operations, net of tax	—	(990)
Total income available to common shareholders, basic	80,025	68,103
Undistributed earnings for participating securities	5	5
Total income from continuing operations available to common shareholders, diluted	$ 80,030	$ 69,098
Total income available to common shareholders, diluted	$ 80,030	$ 68,108
Weighted-average common shares outstanding, basic	179,458	178,539
Common stock equivalents:		
Restricted stock units	370	318
Stock options	466	599
Employee stock purchase plan	1	1
Weighted-average common shares outstanding, diluted	180,295	179,457
Diluted earnings per share (a)		
Income from continuing operations	$ 0.44	$ 0.39
Loss from discontinued operations, net of tax	$ 0.00	$ (0.01)
Net income	$ 0.44	$ 0.38

(a) Earnings per share amounts are computed independently for income from continuing operations, loss from discontinued operations and net income. As a result, the sum of per-share amounts from continuing operations and discontinued operations may not equal the total per-share amount for net income.

The following potentially dilutive common stock equivalents were not included in the earnings per share calculations because they were anti-dilutive:

	Three Months Ended March 31,	
	2015	**2014**
Stock options	301	470
Restricted stock units where certain performance conditions were not met	37	90

Note 12: Fair Value of Financial Assets and Liabilities

Fair Value of Financial Instruments

The Company used the following methods and assumptions to estimate its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported in the accompanying Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted prices in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs. The fair values of instruments classified as Level 2 and 3 are determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market rates. As a majority of the Company’s debts do not trade in active markets, the Company calculated a base yield curve using a risk-free rate (a U.S. Treasury securities yield curve) plus a credit spread that is based on the following two factors: an average of the Company’s own publicly-traded debt securities and the current market rates for U.S. Utility A- debt securities. The Company used these yield curve assumptions to derive a base yield for the Level 2 and Level 3 securities. Additionally, the Company adjusted the base yield for specific features of the debt securities including call features, coupon tax treatment and collateral for the Level 3 instruments.

The carrying amounts, including fair value adjustments previously recognized in acquisition purchase accounting and a fair value adjustment related to the Company’s interest rate swap fair value hedge (which is classified as Level 2 in the fair value hierarchy), and fair values of the financial instruments are as follows:

	Carrying Amount	At Fair Value as of March 31, 2015			
		Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 15,947	$ —	$ —	$ 21,011	$ 21,011
Long-term debt (excluding capital lease obligations)	5,487,521	2,963,789	1,485,337	2,065,021	6,514,147

	Carrying Amount	At Fair Value as of December 31, 2014			
		Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 17,151	$ —	$ —	$ 22,167	$ 22,167
Long-term debt (excluding capital lease obligations)	5,491,341	2,874,622	1,474,708	2,055,058	6,404,388

Recurring Fair Value Measurements

The following table presents assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy as of March 31, 2015 and December 31, 2014, respectively:

	At Fair Value as of March 31, 2015			
	Level 1	Level 2	Level 3	Total
Assets				
Restricted funds	$ 50,193	$ —	$ —	$ 50,193
Rabbi trust investments	—	12,217	—	12,217
Deposits	4,120	—	—	4,120
Mark-to-market derivative asset	—	3,874	—	3,874
Total assets	54,313	16,091	—	70,404
Liabilities				
Deferred compensation obligation	—	11,713	—	11,713
Mark-to-market derivative liability	—	995	—	995
Total liabilities	—	12,708	—	12,708
Total net assets (liabilities)	$ 54,313	$ 3,383	$ —	$ 57,696

	At Fair Value as of December 31, 2014			
	Level 1	Level 2	Level 3	Total
Assets				
Restricted funds	$ 45,182	$ —	$ —	$ 45,182
Rabbi trust investments	—	11,751	—	11,751
Deposits	4,158	—	—	4,158
Mark-to-market derivative asset	—	3,636	—	3,636
Total assets	49,340	15,387	—	64,727
Liabilities				
Deferred compensation obligation	—	11,765	—	11,765
Mark-to-market derivative liability	—	1,012	—	1,012
Total liabilities	—	12,777	—	12,777
Total net assets (liabilities)	$ 49,340	$ 2,610	$ —	$ 51,950

Restricted funds—The Company’s restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operations and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred. Also included in restricted funds above is $20,370 and $22,366 of money market funds held in trust for active employee benefits, at March 31, 2015 and December 31, 2014, respectively, which the Company includes in other current assets in the accompanying Consolidated Balance Sheets.

Rabbi trust investments—The Company’s rabbi trust investments consist primarily of fixed income investments and mutual funds from which supplemental executive retirement plan benefits and deferred compensation obligations can be paid. The Company includes these assets in other long-term assets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets.

Deferred compensation obligations—The Company’s deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities. The value of the Company’s deferred compensation obligations is based on the market value of the participants’ notional investment accounts. The notional investments are comprised primarily of mutual funds, which are based on observable market prices.

Mark-to-market derivative asset and liability—The Company utilizes fixed-to-floating interest-rate swaps, typically designated as fair-value hedges, to achieve a targeted level of variable-rate debt as a percentage of total debt. The Company also employs derivative financial instruments in the form of variable-to-fixed interest rate swaps, classified as economic hedges, in order to fix the interest cost on some of its variable-rate debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

Note 13: Segment Information

The Company has two operating segments that are also the Company's two reportable segments, referred to as Regulated Businesses and Market-Based Operations. The following table includes the Company's summarized segment information:

	As of or for the Three Months Ended March 31, 2015			
	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 615,410	$ 87,473	$ (4,805)	$ 698,078
Depreciation and amortization	99,968	1,064	6,345	107,377
Total operating expenses, net	424,411	76,032	(6,666)	493,777
Income from continuing operations before income taxes	134,142	12,057	(12,697)	133,502

	As of or for the Three Months Ended March 31, 2014			
	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 607,644	$ 75,855	$ (4,496)	$ 679,003
Depreciation and amortization	98,783	1,450	5,691	105,924
Total operating expenses, net	431,957	64,523	(4,919)	491,561
Income from continuing operations before income taxes	115,028	11,977	(12,653)	114,352

Note 14: Subsequent Event

On April 9, 2015, the California Public Utility Commission approved the settlement of California-American Water Company's general rate case with rates retroactive to January 1, 2015. Additionally, the settlement allowed recovery of prior expenditures incurred related to the business transformation project and authorized a sharing mechanism for prior contamination proceeds that were previously deferred. As a result of the finalization of this case pre-tax earnings were increased by $9,000.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements included in this Form 10-Q, other than statements of historical fact, may constitute forward-looking statements. Forward-looking statements can be identified by the use of words such as "may," "should," "will," "could," "estimates," "predicts," "potential," "continue," "anticipates," "believes," "plans," "expects," "future" and "intends" and similar expressions. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance to differ from those projected in the forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Factors that could cause or contribute to differences in results and outcomes from those in our forward-looking statements include, without limitation, those items discussed in the "Risk Factors" section or other sections in the Company's annual report on Form 10-K ("Form 10-K") for the year ended December 31, 2014 filed with the Securities and Exchange Commission ("SEC"). We undertake no obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

General

American Water Works Company, Inc. (herein referred to as "American Water" or the "Company") is the largest investor-owned United States water and wastewater utility company, as measured both by operating revenue and population served. Our primary business involves the ownership of water and wastewater utilities that provide water and wastewater services to residential, commercial, industrial and other customers. Our Regulated Businesses that provide these services are generally subject to economic regulation by state regulatory agencies in the states in which they operate. We report the results of these businesses in our Regulated Businesses segment. We also provide services that are not subject to economic regulation by state regulatory agencies. We report the results of these businesses in our Market-Based Operations segment. For further description of our businesses see Item 1, "Business," in our Form 10-K for the year ended December 31, 2014.

You should read the following discussion in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Quarterly Report on Form 10-Q and in our Form 10-K for the year ended December 31, 2014.

Overview

Financial Results

Highlights of our operating results for the three months ended March 31, 2015 compared to same period during 2014 include:

	Three Months Ended March 31, 2015	2014
Income from continuing operations	$ 0.44	$ 0.39
Loss from discontinued operations, net of tax	$ 0.00	$ (0.01)
Diluted earnings per share	$ 0.44	$ 0.38

Continuing Operations

Income from continuing operations increased 5 cents per diluted share for the quarter. Contributing to this increase were costs of 2 cents per diluted share last year resulting from the Freedom Industries chemical spill in West Virginia. The remainder of the increase is mainly from favorable operating results for our Regulated Businesses segment due to higher revenues, lower operating expenses and the finalization of our California general rate case.

Discontinued operations

In the fourth quarter of 2014, we sold our Terratec line of business, which was part of our Market-Based Operations segment. The after-tax loss from discontinued operations includes the operating results of the entity prior to the sale for the three months ended March 31, 2014.

Regulatory Matters

The table below provides details of annualized revenues awarded assuming a constant volume, resulting from rate authorizations that were effective in the first quarter of 2015:

State	**For the Three Months Ended March 31, 2015** **(In millions)**
General Rate Cases:	
Indiana (1)	$ 5.1
California (2)	5.2
Total General Rate cases	$ 10.3
Infrastructure charges:	
New Jersey (3)	$ 9.4
Illinois (4)	6.4
Total Infrastructure charges	$ 15.8

(1) Rates became effective January 29, 2015.
(2) Rates retroactive to January 1, 2015.
(3) Rates became effective January 1, 2015.
(4) Rates of $5.4 million and $1.0 million became effective January 1, 2015 and February 1, 2015, respectively.

On April 9, 2015, our California settlement was approved by the California Public Utility Commission. Rates were retroactive to January 1, 2015. The settlement also allowed recovery of prior expenditures incurred related to our business transformation project and authorized a sharing mechanism for prior contamination proceeds that were previously deferred, which has also been reflected in 2015 first quarter results.

On January 9, 2015, our New Jersey subsidiary filed a general rate case requesting additional annualized revenue of approximately $66.2 million. Also in the first in the first quarter of 2015, we filed for additional annualized revenues from infrastructure charges for our Missouri and New York subsidiaries of $1.9 million and $0.1 million, respectively.

Following the close of the quarter, additional annualized revenue of $1.6 million resulting from infrastructure charges in our Pennsylvania subsidiary became effective on April 1, 2015 and on April 30, 2015 our West Virginia subsidiary requested additional annual water and wastewater revenue of approximately $35.6 million as part of a general rate case filing.

As of May 6, 2015, we are awaiting final orders in four states, including New Jersey and West Virginia, requesting additional annualized revenue of $102.4 million and $4.4 million in additional annualized revenues for infrastructure charges in three states. There is no assurance that all or any portion of these requests will be granted.

Focusing on Central Themes

For 2015, our focus is anchored on five central themes: 1) Customers, 2) Safety, 3) People, 4) Growth and 5) Operational Efficiency. We will continue our focus on operating our business responsibly and managing our operating and capital costs in a manner that benefits our customers and produces value for our shareholders. Additionally, we will continue our ongoing strategy that ensures a safe workplace for our employees, emphasizes public safety for our customers, and that leverages our people resources, processes and technology innovation to make ourselves more effective and efficient. The progress that we have made in the first three months of 2015 with respect to growth and continuing to improve our operational efficiency ratio is described below.

Growth - Infrastructure improvements, acquisitions and strategic investments

During the first three months of 2015, we made capital investments of approximately $167.3 million to improve infrastructure in our Regulated Businesses. For the full-year of 2015, our total capital plan is $1.2 billion, most of which will be allocated to improving infrastructure in our Regulated Businesses with an additional $0.1 billion allocated for acquisitions and strategic investments.

On April 30, 2015, we announced that we had signed an agreement to acquire Environmental Disposal Corporation (“EDC”), which provides wastewater services to more than 5,300 customer accounts located in New Jersey. The acquisition is pending approval by the New Jersey Board of Public Utilities.

Technology and Operational Efficiency - Continuing Improvement in O&M Efficiency Ratio for our Regulated Businesses

We continued to improve on our operation and maintenance (“O&M”) efficiency ratio. Our O&M efficiency ratio for the twelve months ended March 31, 2015 was 36.3%, compared to 38.0% for the twelve months ended March 31, 2014. The improvement in the 2015 O&M efficiency ratio over this period was principally attributable to an increase in Regulated Businesses’ revenue and a decrease in the O&M expenses.

Our O&M efficiency ratio (a non-GAAP measure) is defined as our regulated operation and maintenance expense divided by regulated operating revenues, where both O&M expense and operating revenues are adjusted to eliminate purchased water expense. We also excluded from operating revenues and O&M expenses the estimated impact from changes in consumption as a result of weather and the West Virginia Freedom Industries chemical spill. Additionally, from the O&M expenses, we exclude the allocable portion of non-O&M support services cost, mainly depreciation and general taxes that are reflected in the Regulated Businesses segment as O&M costs but for consolidated financial reporting purposes are categorized within other line items in the Statement of Operations.

We evaluate our operating performance using this measure because management believes it is a direct measure of the efficiency of our Regulated Businesses’ operations. This information is intended to enhance an investor’s overall understanding of our operating performance. The O&M efficiency ratio is not a measure defined under GAAP and may not be comparable to other companies’ operating measures and should not be used in place of the GAAP information provided elsewhere in this report. The following table provides a reconciliation that compares O&M and operating revenues, as determined in accordance with GAAP, to those amounts utilized in the calculation of our O&M efficiency ratio for the twelve months ended March 31, 2015 as compared to the same period in 2014.

Regulated O&M Efficiency Ratio (a Non-GAAP Measure):

	For the Twelve Months Ended March 31,	
	2015	2014
	(In thousands)	
Total Operation and Maintenance Expense	$ 1,348,516	$ 1,306,962
Less:		
Operation and maintenance expense—Market-Based Operations	301,183	248,032
Operation and maintenance expense—Other	(52,677)	(55,399)
Total Regulated Operation and Maintenance Expense	1,100,010	1,114,329
Less:		
Regulated purchased water expense	120,590	114,217
Allocation of non-operation and maintenance expense	39,855	35,073
Impact of West Virginia Freedom Industries chemical spill	5,797	4,861
Estimated impact of weather (mid-point of range)	(1,762)	(1,687)
Adjusted Regulated Operation and Maintenance Expense (a)	$ 935,530	$ 961,865
Total Operating Revenues	$ 3,030,403	$ 2,926,000
Less:		
Operating revenues—Market-Based Operations	366,296	315,259
Operating revenues—Other	(17,988)	(17,583)
Total Regulated Operating Revenues	2,682,095	2,628,324
Less:		
Regulated purchased water expense*	120,590	114,217
Plus:		
Impact of West Virginia Freedom Industries chemical spill	—	1,012
Estimated impact of weather (mid-point of range)	16,785	15,625
Adjusted Regulated Operating Revenues (b)	$ 2,578,290	$ 2,530,744
Adjusted Regulated Operation and Maintenance Efficiency Ratio (a)/(b)	36.3%	38.0%

* Calculation assumes purchased water revenues approximate purchased water expenses.

Consolidated Results of Operations and Changes from Prior Periods

	For the Three Months Ended March 31,		
	2015	2014	Favorable (Unfavorable) Change
	(In thousands, except per share amounts)		
Operating revenues	$ 698,078	$ 679,003	$ 19,075

The following is a discussion of the consolidated results of operations for the three months ended March 31, 2015 compared to the three ended March 31, 2014:

Three Months Ended March 31, 2015 Compared to Three Months Ended March 31, 2014

Operating revenues. Consolidated operating revenues for the quarter ended March 31, 2015 increased $19.1 million, or 2.8%, compared to the same quarter last year. Revenues in our Market-Based Operations segment rose $11.6 million, largely driven by incremental revenue from our military contracts due to increased construction type projects and the addition of two military bases in the second half of 2014 coupled with contract growth in our Homeowner Services Group (“HOS”). Revenues in our Regulated Businesses segment rose $7.8 million mainly attributable to rate increases, partially offset by reduced consumption in 2015. For further information, see the respective “Operating Revenues” discussions within the “Segment Results.”

Operation and maintenance. Consolidated O&M decreased by $1.3 million, or 0.4%, compared to the same period in 2014. O&M in our Regulated Businesses segment decreased $11.5 million primarily due to lower production costs of $5.5 million driven by lower supplier prices related to fuel and power costs, 2014 costs associated with Freedom Industries chemical spill of $4.6 million and authorized recovery of $3.1 million in costs as a result of the finalization of our California general rate case. These decreases were partially offset by higher O&M costs in our Market-Based Operations segment of $11.8 million, principally due to increased activity under our military contracts, corresponding with the increased revenue. For further discussions on the changes in our Regulated Businesses and Market-Based Operations segments' O&M, see the respective "Operation and Maintenance" discussions within the "Segment Results."

Depreciation and amortization. Depreciation and amortization expense increased by $1.5 million, or 1.4%, primarily as a result of additional utility plant placed in service.

General Taxes. General taxes increased $3.0 million, or 5.0%, primarily due to a true-up of business and opportunity taxes and higher property tax assessments for various subsidiaries in our Regulated Businesses segment.

Other income (expenses). Other expenses decreased by $2.3 million, or 3.1%, compared to the same period in 2014. The decrease is primarily due to authorization through the California rate case of a sharing mechanism between shareholders and customers for proceeds from a $4.1 million chemical settlement and the recovery of the allowance for borrowed funds used during construction on the authorized business transformation costs.

Provision for income taxes. Our consolidated provision for income taxes increased $8.2 million, or 18.2%, to $53.5 million for the three months ended March 31, 2015, due to the increase in pre-tax income. The effective tax rates for the three months ended March 31, 2015 and 2014 were 40.0% and 39.6%, respectively.

Loss from discontinued operations, net of tax. As previously noted, the financial results of our Terratec line of business previously reported in our Market-Based Operations segment were classified as discontinued operations for all periods presented. The disposition of Terratec was finalized in the fourth quarter of 2014. For the three months ended March 31, 2014, the loss from discontinued operations, net of tax, represents the operating results of Terratec for the period.

Segment Results

We have two reportable segments: the Regulated Businesses and the Market-Based Operations Segments. We evaluate the performance of our segments and allocate resources based on several factors, with the primary measure being income before income taxes.

Regulated Businesses Segment

The following table summarizes certain financial information for our Regulated Businesses Segment for the periods indicated:

	For the Three Months Ended March 31,		
	2015	2014	Increase (Decrease)
	(In thousands)		
Operating revenues	$ 615,410	$ 607,644	$ 7,766
Operation and maintenance expense	266,330	277,827	(11,497)
Operating expenses, net	424,411	431,957	(7,546)
Income from continuing operations before income taxes	134,142	115,028	19,114

Operating revenues. Our primary business involves the ownership of water and wastewater utilities that provide services to residential, commercial, industrial and other customers. This business generally is subject to state economic regulation and our results of operations are impacted significantly by rates authorized by the state regulatory commissions in the states in which we operate.

Comparison of Results of Operations for the Three Months Ended March 31, 2015 and 2014

Operating revenues increased by $7.8 million, or 1.3%, for the quarter primarily due to incremental revenues of approximately $9.0 million resulting from rate increases and infrastructure surcharges for a number of our operating companies. Partially offsetting this increase was a decrease in revenues of approximately $3.3 million as a result of lower demand compared to the same period in last year.

The following table sets forth information regarding the Regulated Businesses' revenues and billed water sales volume by customer class for the periods indicated:

	For the Three Months Ended March 31,							
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	Operating Revenues (Dollars in thousands)				Billed Water Sales Volume (Gallons in millions)			
Customer Class								
Water service								
Residential	$ 347,141	$ 353,524	$ (6,383)	(1.8%)	37,654	39,937	(2,283)	(5.7%)
Commercial	122,598	129,819	(7,221)	(5.6%)	17,290	18,989	(1,699)	(8.9%)
Industrial	30,969	33,569	(2,600)	(7.7%)	8,997	9,815	(818)	(8.3%)
Public and other	76,129	83,966	(7,837)	(9.3%)	11,837	13,409	(1,572)	(11.7%)
Other water revenues	7,480	777	6,703	862.7%	—	—	—	—
Billed water services	584,317	601,655	(17,338)	(2.9%)	75,778	82,150	(6,372)	(7.8%)
Unbilled water services	(3,806)	(26,207)	22,401	(85.5%)				
Total water service revenues	580,511	575,448	5,063	0.9%				
Wastewater service revenues	22,818	22,408	410	1.8%				
Other revenues	12,081	9,788	2,293	23.4%				
	$ 615,410	$ 607,644	$ 7,766	1.3%				

Water Services – Water service operating revenues for the three months ended March 31, 2015 totaled $580.5 million, a $5.1 million increase, or 0.9%, over the same period of 2014. As described above, the increase is primarily due to rate increases and infrastructure surcharges. Also, the mix between billed and unbilled water revenue for the three-month period ended March 31, 2015, compared to the same periods in 2014 has changed. This change is principally the result of addressing the majority of delayed billings that existed at December 31, 2013, by billing those customers in the first quarter of 2014. The delayed billings resulted from the implementation of our Customer Information System ("CIS") in 2013. Additionally, included in the first quarter 2014 was a credit of $1.0 million issued to the customers of West Virginia in connection with the Freedom Industries chemical spill.

Wastewater services – Our subsidiaries provide wastewater services in eleven states. Revenues from these services increased $0.4 million, or 1.8%, for the three months ended March 31, 2015 compared to the same period in 2014.

Other revenues – Other revenues, which include such items as reconnection charges, initial application service fees, certain rental revenues, revenue collection services for others and similar items, increased $2.3 million, or 23.4%, for the three months ended March 31, 2015. The increase is principally due to incremental revenues for late payment fees and reconnection fees.

Operation and maintenance expense. Operation and maintenance expense decreased $11.5 million, or 4.1%, the three months ended March 31, 2015 compared to the same period in 2014.

The following table provides information regarding operation and maintenance expense for the three months ended March 31, 2015 and 2014, by major expense category:

	For the Three Months Ended March 31,			
	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 63,785	$ 69,259	$ (5,474)	(7.9%)
Employee-related costs	109,129	107,181	1,948	1.8%
Operating supplies and services	46,273	56,265	(9,992)	(17.8%)
Maintenance materials and supplies	19,431	20,447	(1,016)	(5.0%)
Customer billing and accounting	15,127	13,205	1,922	14.6%
Other	12,585	11,470	1,115	9.7%
Total	$ 266,330	$ 277,827	$ (11,497)	(4.1%)

Production costs by major expense type were as follows:

	For the Three Months Ended March 31,			
	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Purchased Water	$ 26,371	$ 27,082	$ (711)	(2.6%)
Fuel and Power	21,194	23,918	(2,724)	(11.4%)
Chemicals	9,597	10,668	(1,071)	(10.0%)
Waste Disposal	6,623	7,591	(968)	(12.8%)
Total	$ 63,785	$ 69,259	$ (5,474)	(7.9%)

Production costs decreased by $5.5 million, or 7.9%, for the three months ended March 31, 2015. The decrease was primarily due to decreases in fuel, power and chemicals costs. The fuel and power decrease was primarily a result of lower fuel and natural prices and a rebate received at one of our subsidiaries in 2015 and as well as higher costs in the prior-year period resulting from the harsh winter weather conditions in 2014 principally in our mid-western states. The decrease in chemical costs is principally due to a sharing mechanism authorized in our Indiana general rate case which allowed for the recognition of prior contamination proceeds that were previously deferred. Also, contributing to the chemical expense reduction is lower chemical usage attributable to a new process for one of our districts in Illinois.

The following table provides information with respect to components of employee-related costs for the three months ended March 31, 2015 and 2014:

	For the Three Months Ended March 31,			
	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Salaries and wages	$ 80,490	$ 81,083	$ (593)	(0.7%)
Pensions	7,715	6,820	895	13.1%
Group insurance	15,741	14,365	1,376	9.6%
Other benefits	5,183	4,913	270	5.5%
Total	$ 109,129	$ 107,181	$ 1,948	1.8%

The overall increase in employee-related costs for the three months ended March 31, 2015 compared to the same period in 2014 was primarily due to an increase in pension and postretirement benefit costs (which is included in group insurance expenses). These increases are principally due to the adoption of new mortality assumptions based on the Society of Actuaries RP 2014 mortality table and a decrease in the discount rate assumptions, which resulted in increased plan obligations. These increases were partially offset by decreases as a result of the finalization of our California rate case.

Operating supplies and services include expenses for office operation, legal and professional services, including transportation expenses, and information systems and other office equipment rental charges. Overall these costs decreased $10.0 million, or 17.8%, for the three months ended March 31, 2015 compared to the same period in 2014. The decrease was primarily the result of higher incremental costs in 2014 of $3.6 million attributable to the January 2014 Freedom Industries chemical spill in West Virginia, an adjustment of $3.2 million attributable to the recovery of previously expensed business transformation costs as a result of the finalization of rate case in California and decreased transportation costs, principally due to a reduction in costs associated with leased vehicles.

Maintenance materials and supplies, which include preventive maintenance and emergency repair costs, decreased $1.0 million, or 5.0%, for the three months ended March 31, 2015 compared to the same period in 2014. The decrease is primarily due to decreases in paving, backfilling and other repair costs, which were higher in the first quarter of 2014 due to higher than normal main breaks as a result of the abnormally harsh winter weather conditions experienced throughout our operating areas in 2014.

Customer billing and accounting expenses, which include uncollectible accounts expense, postage and other customer related expenses, increased by $1.9 million, or 14.6%, for the three months ended March 31, 2015 and is attributable to incremental uncollectible expense mainly associated with an increase in installment plans at one of our subsidiaries and an increase in customer accounts receivable attributable to the overall aging of receivables.

Other operation and maintenance expense includes casualty and liability insurance premiums and regulatory costs. The increase in these costs for the three months ended March 31, 2015 compared to the prior year period was primarily driven by increased casualty insurance costs, as a result an increase in historical claims experience resulting in premium adjustments. The premium adjustments are based upon current facts and circumstances with respect to outstanding claims and are subject to change as the claims mature.

Operating expenses. The decrease in operating expenses for the three months ended March 31, 2015 is principally due to the decrease in operation and maintenance expense explained above offset by higher incremental general taxes of $3.1 million, including increased business and occupation taxes in one of our subsidiaries, and higher depreciation and amortization expense.

Market-Based Operations

The following table provides financial information for our Market-Based Operations segment for the periods indicated:

	For the Three Months Ended March 31,		
	2015	2014	Increase (Decrease)
	(In thousands)		
Operating revenues	$ 87,473	$ 75,855	$ 11,618
Operation and maintenance expense	73,533	61,745	11,788
Operating expenses, net	76,032	64,523	11,509
Income from continuing operations before income taxes	12,057	11,977	80

Operating revenues. Revenues for the three months ended March 31, 2015 increased $11.6 million, compared to the same period in 2014, as a result of incremental revenues in our Military Services Group (“Military”) of $8.7 million and HOS of $3.8 million partially offset by lower Contract Operations Group (“ConOps”) revenues. The increase in Military is primarily related to additional revenues from construction project activities associated with our military contracts and the addition of Hill Air Force Base and Picatinny Arsenal in the second half of 2014. The incremental revenues in HOS are primarily the result of contract growth, mainly through our New York City contracts, as well as expansion into other geographic areas. The decrease in Contract Operations group revenue is attributable to a reduction in project activity for one of our projects, which is nearing completion, and a decrease in reimbursable revenues related to lower natural gas prices.

Operation and maintenance. Operation and maintenance expense increased $11.8 million, or 19.1%, for the three months ended March 31, 2015.

The following table provides information regarding categories of operation and maintenance expense for the periods indicated:

	For the Three Months Ended March 31,			
	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 9,087	$ 9,268	$ (181)	(2.0%)
Employee-related costs	15,673	13,720	1,953	14.2%
Operating supplies and services	33,025	25,434	7,591	29.8%
Maintenance materials and supplies	14,287	11,357	2,930	25.8%
Other	1,461	1,966	(505)	(25.7%)
Total	$ 73,533	$ 61,745	$ 11,788	19.1%

As noted in the table above, the primary factor contributing to the overall increase was operating supplies and services. This increase corresponds with the incremental revenues and is mainly attributable to growth in construction project activities under our military contracts, as well as the addition of the two new military contracts discussed above. In addition, the increase in maintenance materials and supplies was primarily due to higher HOS repair costs, which is associated with new contracts as well as an increase in the frequency and severity of the claims.

Liquidity and Capital Resources

For a general overview of our sources and uses of capital resources, see the introductory discussion under “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources,” contained in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2014.

We rely on our revolving credit facility, the capital markets and our cash flows from operations to fulfill our short-term liquidity needs, to issue letters of credit and to support our commercial paper program. We fund liquidity needs for capital investment, working capital and other financial commitments through cash flows from operations, public and private debt offerings, commercial paper markets and, to the extent necessary, our revolving credit facility. We regularly evaluate the capital markets and closely monitor the financial condition of the financial institutions with contractual commitments in the revolving credit facility.

In order to meet our short-term liquidity needs, we, through AWCC, our financing subsidiary, issue commercial paper, which is supported by the revolving credit facility. The revolving credit facility is also used, to a limited extent, to support our issuance of letters of credit and, from time to time, for direct borrowings. As of March 31, 2015, AWCC had no outstanding borrowings and $37.6 million of outstanding letters of credit under the revolving credit facility. As of March 31, 2015, AWCC had $1.2 billion available under the credit facility that we can use to fulfill our short-term liquidity needs, to issue letters of credit and support our $544.5 million outstanding commercial paper. We can provide no assurances that our lenders will meet their existing commitments or that we will be able to access the commercial paper or loan markets in the future on terms acceptable to us or at all.

As noted in our Form 10-K, in February 2015, our Board of Directors authorized a common stock repurchase program for the specific purpose of providing a vehicle to minimize share dilution that occurs through our dividend reinvestment, employee stock purchase and executive compensation programs. We commenced the program in April 2015 and through May 4, 2015 have repurchased 84.4 thousand shares.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the third quarter of each fiscal year. Cash flows from continuing operating activities for the three months ended March 31, 2015 were $198.6 million compared to $244.9 million for the three months ended March 31, 2014.

The following table provides a summary of the major items affecting our cash flows from operating activities for the three months ended March 31, 2015 and 2014:

	For the Three Months Ended March 31,	
	2015	**2014**
	(In thousands)	
Net income	$ 80,043	$ 68,123
Add (subtract):		
Non-cash activities (1)	149,395	174,110
Changes in working capital (2)	(18,087)	13,355
Pension and postretirement healthcare contributions	(12,732)	(10,714)
Net cash flows provided by operations	$ 198,619	$ 244,874

(1) Includes depreciation and amortization, provision for deferred income taxes, amortization of deferred investment tax credits, provision for losses on accounts receivable, allowance for other funds used during construction, (gain) loss on asset dispositions and purchases, pension and non-pension postretirement benefits expense, stock-based compensation expense and other non-cash items. Details of each component can be found in the Consolidated Statements of Cash Flows.

(2) Changes in working capital include changes to receivables and unbilled revenues, taxes receivable (including income taxes), other current assets, accounts payable, taxes accrued (including income taxes), interest accrued, change in book overdraft and other current liabilities.

The decrease in cash flows from operating activities during the three months ended March 31, 2015 as compared to the same period in 2014 reflects changes in working capital and an increase in pension and postretirement benefit contributions of $2.0 million. The decrease in working capital for the three months ended March 31, 2015 compared to the same period in the prior year is principally the result of higher cash collections for our Regulated Businesses in the first quarter of 2014, as we delayed some 2013 billings to the first quarter of 2014 when we implemented our new customer information system in 2013. Also, contributing to the changes in working capital was the timing of accounts payable and an increase in accrued dividends and accrued insurance.

Due to the continued severe drought in California, in April 2015, the Governor of California mandated a water usage restriction that would cut the state’s overall water usage by 25% compared with 2013 levels. As a result of our California subsidiary’s water revenue adjustment mechanism (“WRAM”), which has the effect of reducing the adverse impact of customers’ conservation efforts, such restrictions should not have a significant impact on our result of operations. However, cash flows from operations could be affected as the surcharges or surcredits we recognize on these accounts are collected or refunded to customers through surcharges or surcredits generally over periods ranging from twelve to thirty-six months.

Our working capital needs are primarily limited to funding the increase in our customer accounts receivable and unbilled revenues which is mainly associated with the revenue increase as a result of rate increases in our Regulated Businesses segment. We address this timing issue through the aforementioned liquidity funding mechanisms.

Cash Flows from Investing Activities

The following table provides information regarding cash flows used in investing activities for the three months ended March 31, 2015 and 2014:

	For the Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Net capital expenditures	$ (226,411)	$ (192,466)
Proceeds from sale of assets and securities	1,214	243
Acquisitions	(48)	(2,279)
Other investing activities, net (1)	(21,271)	(10,698)
Net cash flows used in investing activities	$ (246,516)	$ (205,200)

(1) Includes removal costs from property, plant and equipment retirements, net and net funds released.

The increase in capital expenditures is principally due to less harsh winter conditions in the first quarter of 2015 compared to the same period in 2014 in certain of our Regulated Businesses' territories which allowed for an increase in capital improvements in 2015.

Cash Flows from Financing Activities

The following table provides information regarding cash flows provided by (used in) financing activities for the three months ended March 31, 2015 and 2014:

	For the Three Months Ended March 31,	
	2015	2014
	(In thousands)	
Repayments of long-term debt	$ (4,291)	$ (3,392)
Proceeds from short-term borrowings	94,572	7,920
Dividends paid	(55,615)	(49,968)
Other financing activities, net (1)	14,445	9,557
Net cash flows provided by (used in) financing activities	$ 49,111	$ (35,883)

(1) Includes proceeds from issuance of employee stock plans and DRIP and advances and contributions for construction, net of refunds.

Our financing activities, primarily focused on funding construction expenditures, include the issuance of long-term and short-term debt, primarily through AWCC. We intend to access the capital markets on a regular basis, subject to market conditions. In addition, new infrastructure may be financed with customer advances (net of refunds) and contributions in aid of construction (net of refunds).

As previously noted, AWCC is a wholly-owned finance subsidiary of American Water Works Company, Inc. (the "parent company"). Based on the needs of our regulated subsidiaries and the parent company, AWCC borrows in the capital markets and then, through intercompany loans, provides proceeds of those borrowings to the regulated subsidiaries and the parent company. The regulated subsidiaries and the parent company are obligated to pay to AWCC their respective portion of principal and interest in the amount required to enable AWCC to meet its debt service obligations. Because the parent company borrowings are not a source of capital for the Company's regulated subsidiaries, the Company is not able to recover the interest charges on parent company debt through regulated water and wastewater rates.

We intend to utilize commercial paper for short-term liquidity, as commercial paper borrowings have historically been a more flexible and lower cost option. However, if necessary, we utilize our credit facility to complement our borrowings in the commercial paper market. In the event of disruptions in the money market sector of the debt capital markets, borrowings under our revolving credit facility may be more efficient and a lower cost alternative to commercial paper.

The Company did not issue long-term debt during the first three months of 2015.

The following long-term debt was retired through sinking fund provisions or payment at maturity during the first three months of 2015:

Company	Type	Rate	Maturity	Amount (In thousands)
American Water Capital Corp.	Private activity bonds and government funded debt—fixed rate	1.79%-2.90%	2021-2031	$ 807
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-5.30%	2015-2041	2,277
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments	12.17%	2026	7
Total retirements and redemptions				$ 4,291

From time to time, and as market conditions warrant, we may engage in additional long-term debt retirements via tender offers, open market repurchases or other transactions.

Credit Facilities and Short-Term Debt

Short-term debt balance, consisting of commercial paper, net of discount, amounted to $544.5 million at March 31, 2015.

The following table provides information as of March 31, 2015 regarding letters of credit sub-limits under our revolving credit facility and available funds under the revolving credit facility, as well as outstanding amounts of commercial paper and borrowings under our revolving credit facility.

	Credit Facility Commitment	Available Credit Facility Capacity	Letter of Credit Sub-limit	Available Letter of Credit Capacity	Outstanding Commercial Paper (Net of Discount)	Credit Line Borrowings
			(In thousands)			
March 31, 2015	$ 1,250,000	$ 1,212,386	$ 150,000	$ 112,386	$ 544,531	$ —

The weighted-average interest rate on short-term borrowings for the three months ended March 31, 2015 and 2014 was approximately 0.47% and 0.32%, respectively.

Capital Structure

The following table provides information regarding our capital structure for the periods presented:

	At March 31, 2015	At December 31, 2014
Total common stockholders' equity	45%	45%
Long-term debt and redeemable preferred stock at redemption value	49%	50%
Short-term debt and current portion of long-term debt	6%	5%
	100%	100%

Debt Covenants

Our debt agreements contain financial and non-financial covenants. To the extent that we are not in compliance, we, or our subsidiaries, may be restricted in the ability to pay dividends, issue new debt or access our revolving credit facility. For two of our smaller operating companies, we have informed our counterparties that we will provide only unaudited financial information at the subsidiary level, which resulted in technical non-compliance with certain of their reporting requirements. We do not believe this change will materially impact us. Our failure to comply with restrictive covenants under our credit facility could accelerate repayment obligations. Our long-term debt indentures contain a number of covenants that, among other things, limit the Company from issuing debt secured by the Company’s assets, subject to certain exceptions.

Certain long-term notes and the revolving credit facility require us to maintain a ratio of consolidated debt to consolidated capitalization (as defined in the relevant documents) of not more than 0.70 to 1.00. As of March 31, 2015, our ratio was 0.55 to 1.00 and therefore we were in compliance with the covenant.

Security Ratings

Our access to the capital markets, including the commercial paper market, and respective financing costs in those markets, is directly affected by securities ratings of the entity that is accessing the capital markets. We primarily access the capital markets, including the commercial paper market, through AWCC. However, we have also issued debt through our regulated subsidiaries, primarily in the form of tax exempt securities or borrowings under state revolving funds, to lower our overall cost of debt.

The following table shows the Company's securities ratings as of March 31, 2015:

Securities	**Moody's Investors Service**	**Standard & Poor's Ratings Service**
Senior unsecured debt	Baa1	A-
Commercial paper	P2	A2

On April 22, 2015, Moody's reaffirmed our Baa1 corporate credit rating for American Water and AWCC and AWCC's "P2" commercial paper rating. At the same time, Moody's revised its rating outlook for American Water and AWCC to positive from stable.

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon our ability to generate cash flows in an amount sufficient to service our debt and meet our investment plans. We can provide no assurances that our ability to generate cash flows is sufficient to maintain our existing ratings. None of our borrowings are subject to default or prepayment if a downgrading of these security ratings, although such a downgrading could increase fees and interest charges under our credit facility.

As part of the normal course of business, we routinely enter into contracts for the purchase and sale of water, energy, fuels and other services. These contracts either contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if our debt is downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to reference such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that we provide collateral to secure our obligations. We do not expect that our posting of collateral would have a material adverse impact on our results of operations, financial position or cash flows.

Dividends

On March 2, 2015, we made a cash dividend payment of $0.31 per share to shareholders of record as of February 9, 2015.

On April 28, 2015, our board of directors declared a quarterly cash dividend payment of $0.34 per share payable on June 1, 2015 to shareholders of record as of May 11, 2015. Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Market Risk

There have been no significant changes to our market risk since December 31, 2014. For a discussion of our exposure to market risk, refer to Part II, Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," contained in our Form 10-K for the year ended December 31, 2014.

Application of Critical Accounting Policies and Estimates

Our financial condition, results of operations and cash flows are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates," in our Form 10-K for the year ended December 31, 2014 for a discussion of our critical accounting policies.

Recent Accounting Pronouncements

See Part I, Item 1 – Financial Statements (Unaudited) – Note 2 – New Accounting Pronouncements in this Quarterly Report on Form 10-Q for a discussion of new accounting standards recently adopted or pending adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. For further discussion of market risks see “Market Risk” in Part I, Item 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

American Water Works Company, Inc. maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 (“the Exchange Act”) is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) of the Exchange Act) as of March 31, 2015 pursuant to 15d-15(e) under the Exchange Act.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2015, our disclosure controls and procedures were effective at a reasonable level of assurance. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the three months ended March 31, 2015, that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The following information updates and amends the information provided in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 (the "Form 10-K") in Part I, Item 3, "Legal Proceedings".

Alternative Water Supply in Lieu of Carmel River Diversions

On March 18, 2015, the California Public Utilities Commission (“CPUC”) issued a decision approving, in part, the settlement agreement among California-American Water Company (“Cal Am”), the Monterey County Water Resource Agency (“MCWRA”) and the County of Monterey, by authorizing Cal Am’s recovery of $1.9 million of costs advanced to MCWRA, plus interest and fees under the reimbursement agreement and credit line agreement among the Marina Coast Water District (“MCWD”), the MCWRA and Cal Am. These agreements, along with the water purchase agreement and other related ancillary agreements among MCWD, MCWRA and Cal Am relate to the regional desalination project involving the proposed construction of a desalination facility in the City of Marina. The CPUC disallowed the additional recovery of approximately $765,000 without prejudice because there was insufficient information for the CPUC to determine the reasonableness of such amount. Cal Am can file another application for recovery when such amount is known and determinable. On April 17, 2015, the MCWD filed an application with the CPUC for a rehearing of the settlement approval with the MCWRA and Monterey County.

On March 13, 2015, the San Francisco Superior Court (the “Court”) issued a tentative decision on the Complaint for Declaratory Relief filed by Cal Am against MCWRA and MCWD, seeking a determination by the Court as to whether the Agreements are void as a result of the alleged conflict of interest of a former member of the MCWRA board of directors, or remained valid. The Court found that four of the five Agreements are void and a final decision has yet to be issued.

Overflow of Diesel Fuel Tank

On March 2, 2015, Virginia American Water Company ("VAWC") - Hopewell District had an overflow of a diesel fuel day tank at its low lift pump station located along the Appomattox River in Hopewell, Virginia. Approximately 500 gallons of diesel fuel overflowed the day tank and onto the ground and a portion of the fuel ultimately entered the river. VAWC notified first responders and retained Clean Harbors, an emergency response company, to control the overflow area and perform clean-up at the site and in the river. On March 4, 2015, the US Environmental Protection Agency (“EPA”) issued an Emergency Removal/Response Administrative Order directing the performance by VAWC of removal actions to mitigate the release. Removal efforts are ongoing under the Order subject to oversight by the US EPA and the Virginia Department of Environmental Quality ("VDEQ"). VAWC has received a request for information regarding the overflow of the diesel fuel tank from the US EPA and is in the process of preparing its response. On April 1, 2015, the VDEQ issued a Notice of Violation (“NOV”) alleging violations arising from the incident without providing a specific fine or penalty amount. The NOV also alleged violations relating to discharges of chlorinated water into the river that were identified during the course of the response to the Hopewell diesel overflow. VAWC is investigating this issue and has taken steps to prevent any potential for such discharges going forward.

West Virginia Elk River Freedom Industries’ Chemical Spill

On April 9, 2015, the federal district court denied a motion to dismiss all claims against the Company for lack of personal jurisdiction in a case relating to the Freedom Industries’ spill. A separate motion to dismiss filed by American Water Works Service Company, Inc. (“AWWSC”) and West Virginia – American Water Company (“WVAWC”) (and joined by the Company) asserting various legal defenses remains pending. As previously disclosed, four of the cases pending before the federal district court were consolidated for purposes of discovery, and an amended consolidated class action complaint for those cases (“federal action”) was filed on December 9, 2014 by several plaintiffs who allegedly suffered economic losses, loss of use of property and tap water or other specified adverse consequences as a result of the Freedom Industries spill, on behalf of a purported class of all persons and businesses supplied with, using, or exposed to water contaminated with Crude MCHM and provided by WVAWC in Logan, Clay, Lincoln, Roane, Jackson, Boone, Putnam, and Kanawha Counties and the Culloden area of Cabell County, West Virginia as of January 9, 2014. The consolidated complaint names several individuals and corporate entities as defendants, including AWWSC, WVAWC and the Company. The plaintiffs seek unspecified damages for alleged business or economic losses; unspecified damages or a mechanism for recovery to address a variety of alleged costs, loss of use of property, personal injury and other consequences allegedly suffered by purported class members; punitive damages and certain additional relief, including the establishment of a medical monitoring program to protect the purported class members from an alleged increased risk of contracting serious latent disease.

On May 6, 2015, the Company received a pre-litigation demand letter from a purported stockholder seeking to have the Company's Board of Directors, among other things, commence litigation against any and all persons and entities responsible for matters relating to the Freedom Industries' spill, including the Company's officers and directors. The Board of Directors intends to review the demand letter with its legal advisor and will respond to such letter in due course.

General

Periodically, the Company is involved in other proceedings or litigation arising in the ordinary course of business. We do not believe that the ultimate resolution of these matters will materially affect the Company's financial position or results of operations. However, litigation and other proceedings are subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. It is possible that some litigation and other proceedings could be decided unfavorably to us, and that any such unfavorable decisions could have a material adverse effect on the Company's business, financial condition, results of operations, and cash flows.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in the "Risk Factors" in the Company's Form 10-K for the year ended December 31, 2014, and our other public filings, which could materially affect our business, financial condition or future results. There have been no material changes from risk factors previously disclosed in "Risk Factors" in the Company's Form 10-K for the year ended December 31, 2014.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Section 2: EX-31.1 (EX-31.1)

Exhibit 31.1

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Susan N. Story, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31.2

CERTIFICATION OF PRINCIPAL FINANCIAL OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Linda G. Sullivan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

Note 1: Basis of Presentation

The unaudited consolidated financial statements provided in this report include the accounts of American Water Works, Company, Inc. and its subsidiaries (collectively, the “Company”) after the elimination of intercompany accounts and transactions. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial reporting and with the rules and regulations for reporting on Form 10-Q. Accordingly, they do not contain certain information and disclosures required by GAAP for comprehensive financial statements. In the opinion of management, all adjustments necessary for a fair statement of the financial position at June 30, 2015 and results of operations and cash flows for all periods presented have been made. All adjustments are of a normal, recurring nature, except as otherwise disclosed.

The Consolidated Balance Sheet as of December 31, 2014 is derived from the Company's audited consolidated financial statements at December 31, 2014. The unaudited financial statements and notes included in this report should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2014 which provides a more complete discussion of the Company’s accounting policies, financial position, operating results and other matters. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year, due primarily to the seasonality of the Company’s operations.

The accompanying Notes to the Consolidated Financial Statements relate to continuing operations only unless otherwise indicated.

The Company reclassified previously reported 2014 data to conform to the current presentation for discontinued operations. See Note 3 for additional details on the Company’s discontinued operations.

Note 2: New Accounting Pronouncements

The following recently issued accounting standards have been adopted by the Company and have been included in the consolidated results of operations, financial position or footnotes of the accompanying Consolidated Financial Statements:

Service Concession Arrangements

In January 2014, the Financial Accounting Standards Board (“FASB”) issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide the services and at what price. The grantor must also control, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in such an arrangement should not be recognized as property, plant and equipment of the operating entity. To comply with this guidance, application was required on a modified retrospective basis to service concession arrangements that existed at January 1, 2015. The Company reduced nonutility property and other long-term assets for infrastructure related to service concession arrangements and recognized a cumulative effect adjustment of $8,395, net of tax, to the opening balance of accumulated deficit at January 1, 2015.

Reporting Discontinued Operations

In April 2014, the FASB issued guidance that changed the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. Under the updated guidance, a discontinued operation is defined as a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has or will have a major effect on an entity’s operations and financial results. A strategic shift could include a disposal of a major geographical area of operations, a major line of business, a major equity method investment or other major part of the entity. A component comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity including a reportable segment, an operating segment, a reporting unit, a subsidiary or an asset group. The update no longer precludes presentation as a discontinued operation if there are operations and cash flows of the component that have not been eliminated from the reporting entity’s ongoing operations or if there is significant continuing involvement with a component after its disposal. The guidance is effective on a prospective basis for interim and annual periods beginning after December 15, 2014 (January 1, 2015 for the Company).

The following recently issued accounting standards are not yet required to be adopted by the Company:

Revenue from Contracts with Customers

In May 2014, the FASB issued a comprehensive new revenue recognition standard that supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the new guidance is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled to receive in exchange for those goods or services. The guidance was originally effective for annual and interim periods beginning after December 15, 2016 (January 1, 2017 for the Company). Early adoption was not permitted. The new guidance allows for either full retrospective adoption, meaning the guidance is applied to all of the periods presented, or modified retrospective adoption, meaning the standard is applied only to the most current period presented in the financial statements. The FASB voted on July 9, 2015 to defer the effective date of the new revenue recognition standard by one year, to annual reporting periods beginning after December 15, 2017 (January 1, 2018 for the Company). Additionally in its decision, the FASB decided to permit early adoption of the standard, but not before annual periods beginning after December 15, 2016 (January 1, 2017 for the Company). The Company is evaluating the new guidance, the best transition method and the impact the new standard will have on the Company's results of operations, financial position or cash flows.

Accounting for Stock-based Compensation with Performance Targets

In June 2014, the FASB issued guidance for the accounting for stock-based compensation tied to performance targets. The amendments clarify that a performance target that affects vesting of a share-based payment and that could be achieved after the requisite service period is a performance condition. As a result, the target is not reflected in the estimation of the award's grant date fair value and compensation cost would be recognized over the required service period, if it is probable that the performance condition will be achieved. The updated guidance may be applied either: (a) prospectively to all awards granted or modified after the effective date or (b) retrospectively to all awards with performance targets that are outstanding as of the beginning of the earliest annual period presented in the financial statements and to all new or modified awards thereafter. The guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015 (January 1, 2016 for the Company). Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Disclosures of Uncertainties about an Entity's Ability to Continue as a Going Concern

In August 2014, the FASB issued guidance that explicitly requires an entity's management to assess the entity's ability to continue as a going concern. The new guidance requires an entity to evaluate, at each interim and annual period, whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued (or are available to be issued) and to provide related disclosures, if applicable. The new guidance is effective for annual periods ending after December 15, 2016 and for interim and annual periods thereafter (January 1, 2017 for the Company). Early adoption is permitted. The adoption of this updated guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows.

Amendments to the Consolidation Analysis

In February 2015, the FASB issued guidance that amends the consolidation analysis for variable interest entities ("VIEs") as well as voting interest entities. The amended guidance (1) modifies the assessment of limited partnerships as VIEs, (2) amends the effect that fees paid to a decision maker or service provider have on the VIE analysis, (3) amends how variable interests held by a reporting entity's related parties and de facto agents impact its consolidation conclusion, (4) clarifies how to determine whether equity holders have power over an entity and (5) provides a scope exception for registered and similar unregistered money market funds. The guidance is effective for the first interim period within annual reporting periods beginning after December 15, 2015 (January 1, 2016 for the Company). Early adoption is permitted as of the beginning of the annual period containing the adoption date. The guidance may be applied retrospectively to each prior reporting period presented or retrospectively with a cumulative effect adjustment to retained earnings for initial application of the guidance at the date of adoption (modified retrospective method). The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Presentation of Debt Issuance Costs

In April 2015, the FASB issued updated guidance on imputation of interest and simplifying the presentation of debt issuance costs. The updated guidance requires debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of the related liability. Such treatment is consistent with the current presentation of debt discounts or premiums. Prior to this amendment, debt issuance costs were reported in the balance sheet as an asset (i.e., a deferred charge), whereas debt discounts and premiums were, and remain, reported as deductions from or additions to the debt itself. Recognition and measurement guidance for debt issuance costs is not affected by the amendments. The effective date is for financial statements covering fiscal years beginning after December 15, 2015 (January 1, 2016 for the Company) and interim periods within fiscal years beginning after December 15, 2016 (January 1, 2017 for the Company). Early adoption is permitted for financial statements that have not been previously issued. The amended guidance must be applied on a retrospective basis. Thus, balance sheets for each period presented should be adjusted to reflect the period-specific effects of applying the new guidance. The Company is evaluating the new guidance and does not expect this new guidance to have a material impact on its results of operations, financial position or cash flows.

Accounting for Fees Paid in a Cloud Computing Arrangement

In April 2015, the FASB issued guidance clarifying how customers should account for fees paid in a cloud computing arrangement. Examples of cloud computing arrangements include software as a service, platform as a service, infrastructure as a service and other similar hosting arrangements. Under the new guidance, if a cloud computing arrangement contains a software license, the customer would account for the fees related to the software license element in a manner consistent with the acquisition of other software licenses. If the arrangement does not include a software license, the customer would account for the arrangement as a service contract. The guidance may be applied retrospectively or prospectively to arrangements entered into, or materially modified after the effective date. The guidance is effective for annual periods, and interim periods therein, beginning after December 15, 2015 (January 1, 2016 for the Company). Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Note 3: Acquisitions and Divestitures

Acquisitions

During the six-month period ended June 30, 2015, the Company closed on three acquisitions of various regulated water and wastewater systems for a total aggregate purchase price of $41,175. Assets acquired, principally plant, totaled $65,708, including $1,798 of goodwill, and liabilities assumed totaled $22,301, including $7,707 of contributions in aid of construction and other long-term liabilities of $14,039.

On July 9, 2015, the Company made a strategic acquisition in Water Solutions Holdings, LLC, a Delaware limited liability company, including its wholly owned subsidiary, Keystone Clearwater Solutions ("Keystone"), by acquiring a ninety-five percent interest in the entity for approximately $130,000. Keystone is a water service provider that offers a range of water related services to the oil and gas industry primarily in the Appalachian region of Pennsylvania, Ohio and West Virginia. The acquisition agreement calls for purchase price adjustments related to working capital, capital expenditures and results of operations through the date of close. The Company also entered into an agreement giving it the right to purchase the remaining membership interests upon the occurrence of certain triggering events or at defined dates of December 31, 2016 and December 31, 2018. The owners of the remaining membership interests also have the right to sell their membership interests upon the occurrence of these same triggering events or defined dates. The Company is in the process of determining the purchase price allocation for this acquisition.

Divestitures

In November 2014, the Company completed the sale of Terratec Environmental Ltd ("Terratec") previously included in the Market-Based Operations segment. A summary of discontinued operations presented in the Consolidated Statements of Operations and Comprehensive Income for the three and six months ended June 30, 2014 is as follows:

	Three Months Ended June 30,	Six Months Ended June 30,
	2014	2014
Operating revenues	$ 4,381	$ 7,324
Total operating expenses, net	5,394	9,683
Operating loss	(1,013)	(2,359)
Other income (expenses), net	(1)	(1)
Loss from discontinued operations before income taxes	(1,014)	(2,360)
Benefit from income taxes	(139)	(495)
Loss from discontinued operations	$ (875)	$ (1,865)

Note 4: Stockholders’ Equity

Accumulated Other Comprehensive Loss

The following table presents changes in accumulated other comprehensive loss by component, net of tax, for the six months ended June 30, 2015 and 2014, respectively:

	Defined Benefit Plans					
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial (Gain) Loss	Foreign Currency Translation	Loss on Cash Flow Hedge	Total Accumulated Other Comprehensive Loss
Beginning balance at January 1, 2015	$ (115,830)	$ 879	$ 31,119	$ 2,755	$ (791)	$ (81,868)
Other comprehensive income (loss) before reclassifications	—	—	—	(906)	—	(906)
Amounts reclassified from accumulated other comprehensive income (loss)	—	78	2,604	—	39	2,721
Net comprehensive income (loss) for the period	—	78	2,604	(906)	39	1,815
Ending balance at June 30, 2015	$ (115,830)	$ 957	$ 33,723	$ 1,849	$ (752)	$ (80,053)
Beginning balance at January 1, 2014	$ (69,711)	$ 713	$ 31,150	$ 3,213	$ —	$ (34,635)
Other comprehensive income (loss) before reclassifications	—	—	—	(104)	—	(104)
Amounts reclassified from accumulated other comprehensive income (loss)	—	83	(15)	—	—	68
Net comprehensive income (loss) for the period	—	83	(15)	(104)	—	(36)
Ending balance at June 30, 2014	$ (69,711)	$ 796	$ 31,135	$ 3,109	$ —	$ (34,671)

The Company does not reclassify the amortization of defined benefit pension cost components from accumulated other comprehensive loss directly to net income in its entirety. These accumulated other comprehensive income (loss) components are included in the computation of net periodic pension cost. (See Note 8)

The amortization of the loss on cash flow hedge is included in interest, net in the accompanying Consolidated Statements of Operations and Comprehensive Income.

Antidilutive Stock Repurchase Program

In February 2015, the Company’s Board of Directors authorized a common stock repurchase program for the specific purpose of providing a vehicle to mitigate the dilutive effect of shares issued through the Company’s dividend reinvestment, employee stock purchase and executive compensation activities. This program allows the Company to purchase up to 10,000 shares of its outstanding common stock over an unrestricted period of time to minimize dilution. Under the program, the Company may repurchase its common stock in the open market or through privately negotiated transactions. The program is being conducted in accordance with Rule 10b-18 of the Securities Exchange Act, as amended, and to facilitate the purchases, the Company has also entered into a Rule 10b5-1 share repurchase plan with a broker.

The shares repurchased are held as treasury shares, at cost, until cancelled or reissued at the discretion of the Company’s management. During the three months ended June 30, 2015, the Company repurchased 250 shares of common stock in the open market at an aggregate cost of $13,231 under the program.

Stock Options

In the first six months of 2015, the Company granted non-qualified stock options to certain employees under the Company’s 2007 Omnibus Equity Compensation Plan (the “2007 Plan”). The stock options vest ratably over the three-year service period beginning January 1, 2015. These awards have no performance vesting conditions and the grant date fair value is amortized through expense over the requisite service period using the straight-line method.

The following table presents the weighted-average assumptions used in the Black-Scholes option-pricing model and the resulting weighted-average grant date fair value per share of stock options granted during the six months ended June 30, 2015:

Dividend yield	2.35%
Expected volatility	17.64%
Risk-free interest rate	1.48%
Expected life (years)	4.4
Exercise price	$ 52.75
Grant date fair value per share	$ 6.21

Stock options granted under the 2007 Plan have a maximum term of seven years, vest over periods ranging from one to three years, and are granted with exercise prices equal to the fair market value of the Company’s common stock on the date of grant. As of June 30, 2015, $2,222 of total unrecognized compensation cost related to the non-vested stock options is expected to be recognized over the weighted-average period of 1.9 years.

The table below summarizes stock option activity for the six months ended June 30, 2015:

	Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value
Options outstanding at January 1, 2015	1,910	$ 33.47		
Granted	301	52.75		
Forfeited or expired	(39)	44.18		
Exercised	(262)	29.49		
Options outstanding at June 30, 2015	1,910	$ 36.83	3.4	$ 23,757
Exercisable at June 30, 2015	1,358	$ 32.16	2.4	$ 22,369

The following table summarizes additional information regarding stock options exercised during the six months ended June 30, 2015 and 2014:

	2015	2014
Intrinsic value	$ 6,218	$ 6,691
Exercise proceeds	7,717	9,075
Income tax benefit	1,928	1,951

Restricted Stock Units

During 2012, the Company granted selected employees an aggregate of 158 restricted stock units with internal performance measures and, separately, certain market thresholds. These awards vested in January 2015. The terms of the grants generally specified that to the extent certain performance goals, comprised of internal measures and market thresholds, were achieved, the restricted stock units would vest; if target performance was surpassed, up to 175% of the target awards would be distributed; and if performance thresholds were not met, the awards would be forfeited. In January 2015, 93 shares of common stock were issued pursuant to the vesting of these restricted stock units because performance thresholds were exceeded.

In June 2015, the Company granted 15 restricted stock units to non-employee directors under the 2007 Plan. The restricted stock units vested on the date of grant; however, distribution of the shares will be made within 30 days of the earlier of (a) 15 months after grant date or (b) the participant’s separation from service. Because these restricted stock units vested on grant date, the total grant date fair value was recorded in operation and maintenance expense on the grant date.

In the first six months of 2015, the Company granted restricted stock units, both with and without performance conditions, to certain employees under the 2007 Plan. The restricted stock units without performance conditions vest ratably over the three-year service period beginning January 1, 2015 and the restricted stock units with performance conditions vest ratably over the three-year performance period beginning January 1, 2015 (the “Performance Period”). Vesting of the shares underlying the restricted stock units with performance conditions is contingent upon the achievement of internal performance measures and, separately, certain market thresholds over the Performance Period. The restricted stock units granted with service-only conditions and those with internal performance measures are valued at the market value of the Company’s common stock on the date of grant. The restricted stock units granted with market conditions are valued using a Monte Carlo model.

The following table presents the weighted-average assumptions used in the Monte Carlo simulation for restricted stock units with market conditions granted during the six months ended June 30, 2015:

Expected volatility	14.93%
Risk-free interest rate	1.07%
Expected life (years)	3

The grant date fair value of the restricted stock unit awards that vest ratably and have market and/or performance and service conditions is amortized through expense over the requisite service period using the graded-vesting method. Restricted stock units that have no performance conditions are amortized through expense over the requisite service period using the straight-line method. As of June 30, 2015, $7,314 of total unrecognized compensation cost related to the non-vested restricted stock units is expected to be recognized over the weighted-average remaining life of 1.4 years.

The table below summarizes restricted stock unit activity for the six months ended June 30, 2015:

	Shares	Weighted-Average Grant Date Fair Value (per share)
Non-vested total at January 1, 2015	516	$ 41.46
Granted	150	55.63
Performance share adjustment	93	38.11
Vested	(302)	39.40
Forfeited	(19)	44.80
Non-vested total at June 30, 2015	438	$ 46.88

The following table summarizes additional information regarding restricted stock units distributed during the six months ended June 30, 2015 and 2014:

	2015	2014
Intrinsic value	$ 15,931	$ 14,266
Income tax benefit	1,900	1,551

If dividends are paid with respect to shares of the Company’s common stock before the restricted stock units are distributed, the Company credits a liability for the value of the dividends that would have been paid if the restricted stock units were shares of Company common stock. When the restricted stock units are distributed, the Company pays the participant a lump sum cash payment equal to the value of the dividend equivalents accrued. The Company accrued dividend equivalents totaling $423 and $417 to retained earnings during the six months ended June 30, 2015 and 2014, respectively.

Note 5: Long-Term Debt

The following long-term debt was issued during the first six months of 2015:

Company	Type	Rate	Maturity	Amount
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	1.00%	2022	$ 7,748

The following long-term debt was retired through sinking fund payments during the first six months of 2015:

Company	Type	Rate	Maturity	Amount
American Water Capital Corp.(a)	Private activity bonds and government funded debt—fixed rate	1.79%-2.90%	2021-2031	$ 807
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-5.30%	2015-2041	3,671
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments	12.23%	2026	16
Total retirements and redemptions				$ 5,694

(a) AWCC, which is a wholly-owned subsidiary of the Company, has a support agreement with its parent that, under certain circumstances, is the functional equivalent of a guarantee.

The Company has an interest rate swap to hedge $100,000 of its 6.085% fixed-rate debt maturing 2017. The Company pays variable interest of six-month LIBOR plus 3.422%. The swap is accounted for as a fair-value hedge and matures with the fixed-rate debt in 2017.

The following table provides a summary of the derivative fair value balance recorded by the Company and the line item in the Consolidated Balance Sheets in which such amount is recorded:

Balance sheet classification	June 30, 2015	December 31, 2014
Regulatory and other long-term assets		
Other	$ 3,472	$ 3,636
Long-term debt		
Long-term debt	3,396	3,570

For derivative instruments that are designated and qualify as fair-value hedges, the gain or loss on the hedge instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current net income. The Company includes the gain or loss on the derivative instrument and the offsetting loss or gain on the hedged item in interest expense as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
Income statement classification	2015	2014	2015	2014
Interest, net				
Gain (loss) on swap	$ (402)	$ 174	$ (164)	$ (203)
Gain (loss) on borrowing	398	(75)	174	253
Hedge ineffectiveness	(4)	99	10	50

Note 6: Short-Term Debt

Short-term debt consists of commercial paper borrowings totaling $820,982 (net of discount of $218) at June 30, 2015 and $449,959 (net of discount of $41) at December 31, 2014. At June 30, 2015, there are $60,000 of borrowings with maturities greater than three months. At December 31, 2014, there were no borrowings outstanding with maturities greater than three months.

On June 30, 2015, the Company, American Water Capital Corp. (“AWCC”), and AWCC’s lenders amended and restated AWCC’s outstanding credit agreement, dated as of October 29, 2012, associated with the revolving credit facility, to extend the expiration date of the facility from October 2018 to June 2020 and, subject to the terms of the credit agreement, to allow AWCC to request to extend further the term of the credit facility for up to two one-year periods. The financial covenants with respect to the credit facility remained unchanged.

Note 7: Income Taxes

The Company's estimated annual effective tax rate for the six months ended June 30, 2015 was 39.5% compared to 39.8% for the six months ended June 30, 2014, excluding various discrete items.

The Company's actual effective tax rates for continuing operations were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Actual effective tax rate	39.6%	39.6%	39.8%	39.6%

Note 8: Pension and Other Postretirement Benefits

The following table provides the components of net periodic benefit costs:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Components of net periodic pension benefit cost				
Service cost	$ 9,334	$ 7,944	$ 18,668	$ 15,887
Interest cost	18,576	19,163	37,152	38,326
Expected return on plan assets	(24,366)	(23,710)	(48,732)	(47,419)
Amortization of:				
Prior service cost	189	181	377	362
Actuarial (gain) loss	6,277	(32)	12,554	(65)
Net periodic pension benefit cost	$ 10,010	$ 3,546	$ 20,019	$ 7,091
Components of net periodic other postretirement benefit cost				
Service cost	$ 3,444	$ 2,765	$ 6,887	$ 5,529
Interest cost	7,465	7,151	14,931	14,302
Expected return on plan assets	(6,299)	(6,875)	(12,598)	(13,750)
Amortization of:				
Prior service credit	(548)	(547)	(1,095)	(1,094)
Actuarial (gain) loss	1,253	(20)	2,505	(40)
Net periodic other postretirement benefit cost	$ 5,315	$ 2,474	$ 10,630	$ 4,947

The Company contributed $12,200 to its defined benefit pension plans in the first six months of 2015 and expects to contribute $15,800 during the balance of 2015. In addition, the Company contributed $13,264 for the funding of its other postretirement plans in the first six months of 2015 and expects to contribute $13,263 during the balance of 2015.

Note 9: Commitments and Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. At June 30, 2015, the Company has accrued approximately $3,800 of probable loss contingencies and has estimated that the maximum amount of losses associated with reasonably possible loss contingencies is $29,600. For certain matters, the Company is unable to estimate possible losses. The Company believes that damages or settlements recovered by plaintiffs in such claims or actions, if any, will not, individually or in the aggregate, have a material adverse effect on the Company's results of operations, financial position or cash flows.

On January 9, 2014, a chemical storage tank owned by Freedom Industries, Inc. leaked two substances used for processing coal, 4-methylcyclohexane methanol, or MCHM, and PPH/DiPPH, a mix of polyglycol ethers, into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant intake in Charleston, West Virginia. To date, 58 lawsuits have been filed against WVAWC with respect to this matter in the United States District Court for the Southern District of West Virginia or West Virginia Circuit Courts in Kanawha, Boone and Putnam counties. Fifty-two of the state court cases naming WVAWC, and one case naming both WVAWC and American Water Works Service Company, Inc. ("AWWSC," and together with WVAWC and the Company, the "American Water Defendants") were removed to the United States District Court for the Southern District of West Virginia, but are subject to motions to remand the cases back to the state courts and have been consolidated for the sole purpose of resolving venue issues. Four of the cases pending before the federal district court were consolidated for purposes of discovery, and an amended consolidated complaint for those cases was filed on December 9, 2014 by several plaintiffs who allegedly suffered economic losses, loss of use of property and tap water or other specified adverse consequences as a result of the Freedom Industries spill, on behalf of a purported class of all persons and businesses supplied with, using, or exposed to water contaminated with Crude MCHM and provided by WVAWC in Logan, Clay, Lincoln, Roane, Jackson, Boone, Putnam, and Kanawha Counties and the Culloden area of Cabell County, West Virginia as of January 9, 2014. The amended consolidated complaint names several individuals and corporate entities as defendants, including the American Water Defendants. The plaintiffs seek unspecified damages for alleged business or economic losses; unspecified damages or a mechanism for recovery to address a variety or alleged costs, loss of use of property, personal injury and other consequences allegedly suffered by purported class members; punitive damages and certain additional relief, including the establishment of a medical monitoring program to protect the purported class members from an alleged increased risk of contracting serious latent disease.

On April 9, 2015, the court in the Federal action denied a motion to dismiss all claims against the Company for lack of personal jurisdiction. A separate motion to dismiss filed by AWWSC and WVAWC (and joined by the Company) asserting various legal defenses in the Federal action was resolved by the court on June 3, 2015. The court dismissed three causes of action but denied the motion to dismiss with respect to the remaining causes of actions and allowed the plaintiffs to continue to pursue the various claims for damages alleged in their amended consolidated complaint. On July 6, 2015, the plaintiffs filed a motion seeking certification of a class defined to include persons who resided in dwellings served by WVAWC's Kanawha Valley Treatment Plant ("KVTP") on January 9, 2014, persons who owned businesses served by the KVTP on January 9, 2014, and hourly employees who worked for such businesses. The plaintiffs seek a class-wide determination of liability against the American Water Defendants, among others, and of damages to the three groups of plaintiffs as a result of the "Do Not Use" order that was issued after the Freedom Industries spill. This motion remains pending. On July 22, 2015, the court directed the parties to the Federal action to attend mediation scheduled for September 30, 2015. It is expected that the plaintiffs in the 53 state court cases, which were removed to federal court and are presently subject to stayed motions to remand to state court, will also participate in this mediation. The Company believes that the causes of action asserted against the American Water Defendants in the lawsuits described above are without merit and continues to vigorously defend itself in these proceedings.

Note 10: Environmental Matters

The Company's water and wastewater operations are subject to federal, state, local and foreign requirements relating to environmental protection, and as such, the Company periodically becomes subject to environmental claims in the normal course of business. Environmental expenditures that relate to current operations or provide a future benefit are expensed or capitalized as appropriate. Remediation costs that relate to an existing condition caused by past operations are accrued, on an undiscounted basis, when it is probable that these costs will be incurred and can be reasonably estimated. Remediation costs accrued amounted to $1,100 and $2,200 at June 30, 2015 and December 31, 2014, respectively. The accrual relates to a conservation agreement entered into by a subsidiary of the Company with the National Oceanic and Atmospheric Administration ("NOAA") requiring the Company to, among other provisions, implement certain measures to protect the steelhead trout and its habitat in the Carmel River watershed in the state of California. The Company has agreed to pay $1,100 annually from 2010 through 2016. The Company pursues recovery of incurred costs through all appropriate means, including regulatory recovery through customer rates. The Company's regulatory assets at June 30, 2015 and December 31, 2014 include $7,794 and $7,791, respectively, related to the NOAA agreement.

Note 11: Earnings per Common Share

Earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security. The Company has participating securities related to restricted stock units, granted under the 2007 Plan, that earn dividend equivalents on an equal basis with common shares. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities.

The following is a reconciliation of the Company's income from continuing operations, loss from discontinued operations and net income and weighted-average common shares outstanding for calculating basic earnings per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
Basic	2015	2014	2015	2014
Income from continuing operations	$ 123,075	$ 110,174	$ 203,118	$ 179,287
Loss from discontinued operations, net of tax	—	(875)	—	(1,865)
Net income	123,075	109,299	203,118	177,422
Less: Distributed earnings to common shareholders	61,394	55,647	117,041	105,775
Less: Distributed earnings to participating securities	19	17	32	32
Undistributed earnings	61,662	53,635	86,045	71,615
Undistributed earnings allocated to common shareholders	61,646	53,619	86,025	71,593
Undistributed earnings allocated to participating securities	16	16	20	22
Total income from continuing operations available to common shareholders, basic	$ 123,040	$ 110,141	$ 203,066	$ 179,233
Total income available to common shareholders, basic	$ 123,040	$ 109,266	$ 203,066	$ 177,368
Weighted-average common shares outstanding, basic	179,564	178,863	179,511	178,702
Basic earnings per share: (a)				
Income from continuing operations	$ 0.69	$ 0.62	$ 1.13	$ 1.00
Loss from discontinued operations, net of tax	$ 0.00	$ (0.00)	$ 0.00	$ (0.01)
Net income	$ 0.69	$ 0.61	$ 1.13	$ 0.99

(a) Earnings per share amounts are computed independently for income from continuing operations, loss from discontinued operations and net income. As a result, the sum of per-share amounts from continuing operations and discontinued operations may not equal the total per-share amount for net income.

Diluted earnings per common share is based on the weighted-average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents related to the restricted stock units, stock options, and employee stock purchase plan. The dilutive effect of the common stock equivalents is calculated using the treasury stock method and expected proceeds on vesting of the restricted stock units, exercise of the stock options and purchases under the employee stock purchase plan.

The following is a reconciliation of the Company's income from continuing operations, loss from discontinued operations and net income and weighted-average common shares outstanding for calculating diluted earnings per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
Diluted	2015	2014	2015	2014
Total income from continuing operations available to common shareholders, basic	$ 123,040	$ 110,141	$ 203,066	$ 179,233
Loss from discontinued operations, net of tax	—	(875)	—	(1,865)
Total income available to common shareholders, basic	123,040	109,266	203,066	177,368
Undistributed earnings for participating securities	16	16	20	22
Total income from continuing operations available to common shareholders, diluted	$ 123,056	$ 110,157	$ 203,086	$ 179,255
Total income available to common shareholders, diluted	$ 123,056	$ 109,282	$ 203,086	$ 177,390
Weighted-average common shares outstanding, basic	179,564	178,863	179,511	178,702
Common stock equivalents:				
Restricted stock units	395	379	393	358
Stock options	409	449	440	451
Employee stock purchase plan	3	2	4	1
Weighted-average common shares outstanding, diluted	180,371	179,693	180,348	179,512
Diluted earnings per share: (a)				
Income from continuing operations	$ 0.68	$ 0.61	$ 1.13	$ 1.00
Loss from discontinued operations, net of tax	$ 0.00	$ (0.00)	$ 0.00	$ (0.01)
Net income	$ 0.68	$ 0.61	$ 1.13	$ 0.99

(a) Earnings per share amounts are computed independently for income from continuing operations, loss from discontinued operations and net income. As a result, the sum of per-share amounts from continuing operations and discontinued operations may not equal the total per-share amount for net income.

The following potentially dilutive common stock equivalents were not included in the earnings per share calculations because they were anti-dilutive:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Stock options	295	346	295	490
Restricted stock units where certain performance conditions were not met	42	80	42	80

Note 12: Fair Value of Financial Assets and Liabilities

Fair Value of Financial Instruments

The Company used the following methods and assumptions to estimate its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported in the accompanying Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted prices in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs. The fair values of instruments classified as Level 2 and 3 are determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market rates. As a majority of the Company's debts do not trade in active markets, the Company calculated a base yield curve using a risk-free rate (a U.S. Treasury securities yield curve) plus a credit spread that is based on the following two factors: an average of the Company's own publicly-traded debt securities and the current market rates for U.S. Utility debt securities with a bond credit rating of A-. The Company used these yield curve assumptions to derive a base yield for the Level 2 and Level 3 securities. Additionally, the Company adjusted the base yield for specific features of the debt securities including call features, coupon tax treatment and collateral for the Level 3 instruments.

The carrying amounts, including fair value adjustments previously recognized in acquisition purchase accounting and a fair value adjustment related to the Company's interest rate swap fair value hedge (which is classified as Level 2 in the fair value hierarchy), and fair values of the financial instruments are as follows:

		At Fair Value as of June 30, 2015			
	Carrying Amount	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 15,941	$ —	$ —	$ 20,195	$ 20,195
Long-term debt (excluding capital lease obligations)	5,492,681	2,814,037	1,460,219	2,010,748	6,285,004

		At Fair Value as of December 31, 2014			
	Carrying Amount	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 17,151	$ —	$ —	$ 22,167	$ 22,167
Long-term debt (excluding capital lease obligations)	5,491,341	2,874,622	1,474,708	2,055,058	6,404,388

Recurring Fair Value Measurements

The following table presents assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy as of June 30, 2015 and December 31, 2014, respectively:

	At Fair Value as of June 30, 2015			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets				
Restricted funds	$ 36,738	$ —	$ —	$ 36,738
Rabbi trust investments	—	12,531	—	12,531
Deposits	1,322	—	—	1,322
Mark-to-market derivative asset	—	3,472	—	3,472
Total assets	38,060	16,003	—	54,063
Liabilities				
Deferred compensation obligation	—	11,789	—	11,789
Mark-to-market derivative liability	—	887	—	887
Total liabilities	—	12,676	—	12,676
Total net assets	$ 38,060	$ 3,327	$ —	$ 41,387

	At Fair Value as of December 31, 2014			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets				
Restricted funds	$ 45,182	$ —	$ —	$ 45,182
Rabbi trust investments	—	11,751	—	11,751
Deposits	4,158	—	—	4,158
Mark-to-market derivative asset	—	3,636	—	3,636
Total assets	49,340	15,387	—	64,727
Liabilities				
Deferred compensation obligation	—	11,765	—	11,765
Mark-to-market derivative liability	—	1,012	—	1,012
Total liabilities	—	12,777	—	12,777
Total net assets	$ 49,340	$ 2,610	$ —	$ 51,950

Restricted funds—The Company's restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operations and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred. Also included in restricted funds above is $7,177 and $22,366 of money market funds held in trust for active employee benefits, at June 30, 2015 and December 31, 2014, respectively, which the Company includes in other current assets in the accompanying Consolidated Balance Sheets.

Rabbi trust investments—The Company's rabbi trust investments consist primarily of equity and fixed income indexed funds from which supplemental executive retirement plan benefits and deferred compensation obligations can be paid. The Company includes these assets in other long-term assets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets.

Deferred compensation obligations—The Company's deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities. The value of the Company's deferred compensation obligations is based on the market value of the participants' notional investment accounts. The notional investments are comprised primarily of mutual funds, which are based on observable market prices.

Mark-to-market derivative asset and liability—The Company utilizes fixed-to-floating interest-rate swaps, typically designated as fair-value hedges, to achieve a targeted level of variable-rate debt as a percentage of total debt. The Company also employs derivative financial instruments in the form of variable-to-fixed interest rate swaps, classified as economic hedges, in order to fix the interest cost on some of its variable-rate debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

Note 13: Segment Information

The Company has two operating segments that are also the Company’s two reportable segments, referred to as Regulated Businesses and Market-Based Operations. The following table includes the Company’s summarized segment information:

As of or for the Three Months Ended June 30, 2015

	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 686,811	$ 99,976	$ (4,666)	$ 782,121
Depreciation and amortization	102,002	1,134	5,787	108,923
Total operating expenses, net	428,176	82,844	(6,460)	504,560
Income from continuing operations before income taxes	198,756	17,737	(12,866)	203,627
Total assets	14,777,921	329,156	1,625,255	16,732,332

As of or for the Three Months Ended June 30, 2014

	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 678,101	$ 81,022	$ (4,345)	$ 754,778
Depreciation and amortization	98,181	1,458	6,046	105,685
Total operating expenses, net	435,429	67,639	(3,077)	499,991
Income from continuing operations before income taxes	182,418	13,982	(13,897)	182,503
Total assets	13,857,864	293,696 (a)	1,274,887	15,426,447

As of or for the Six Months Ended June 30, 2015

	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 1,302,221	$ 187,449	$ (9,471)	$ 1,480,199
Depreciation and amortization	201,970	2,198	12,132	216,300
Total operating expenses, net	852,587	158,876	(13,126)	998,337
Income from continuing operations before income taxes	332,898	29,794	(25,563)	337,129
Total assets	14,777,921	329,156	1,625,255	16,732,332

As of or for the Six Months Ended June 30, 2014

	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 1,285,745	$ 156,877	$ (8,841)	$ 1,433,781
Depreciation and amortization	196,964	2,908	11,737	211,609
Total operating expenses, net	867,386	132,162	(7,996)	991,552
Income from continuing operations before income taxes	297,446	25,959	(26,550)	296,855
Total assets	13,857,864	293,696 (a)	1,274,887	15,426,447

(a) Amount includes assets of discontinued operations of $3,845.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). All statements included in this Form 10-Q, other than statements of historical fact, may constitute forward-looking statements. Forward-looking statements can be identified by the use of words such as "may," "should," "will," "could," "estimates," "predicts," "potential," "continue," "anticipates," "believes," "plans," "expects," "future" and "intends" and similar expressions. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance to differ from those projected in the forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Factors that could cause or contribute to differences in results and outcomes from those in our forward-looking statements include, without limitation, those items discussed in the "Risk Factors" section or other sections in the Company's annual report on Form 10-K ("Form 10-K") for the year ended December 31, 2014 filed with the Securities and Exchange Commission ("SEC"). We undertake no obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

General

American Water Works Company, Inc. ("American Water" or the "Company") is the largest investor-owned United States water and wastewater utility company, as measured both by operating revenue and population served. Our primary business involves the ownership of water and wastewater utilities that provide water and wastewater services to residential, commercial, industrial and other customers. These utilities are generally subject to economic regulation by state regulatory agencies in the states in which they operate. We report the financial results of these utilities in our Regulated Businesses segment. We also provide other services through businesses that are not subject to economic regulation by state regulatory agencies. We report the results of these businesses in our Market-Based Operations segment. For further description of our businesses see Part I, Item 1, "Business," in our Form 10-K.

You should read the following discussion in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Quarterly Report on Form 10-Q and in our Form 10-K.

Overview

Financial Results

Highlights of our operating results per diluted share for the three and six months ended June 30, 2015 compared to same periods during 2014 are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Income from continuing operations	$ 0.68	$ 0.61	$ 1.13	$ 1.00
Loss from discontinued operations, net of tax	$ 0.00	$ 0.00	$ 0.00	$ (0.01)
Diluted earnings per share	$ 0.68	$ 0.61	$ 1.13	$ 0.99

Continuing Operations

Income from continuing operations increased 7 cents and 13 cents per diluted share for the quarter and year-to-date, respectively. Excluding the costs related to the Freedom Industries chemical spill in West Virginia of 2 cents and 4 cents per diluted share for the three and six months ended June 30, 2014, earnings for the three and six months ended June 30, 2015, increased 5 cents and 9 cents per diluted share, respectively, mainly due to continued revenue growth in our Regulated Businesses and Market-Based Operations segments and lower operating and maintenance expenses in our Regulated Businesses segment. Also, adding to the increase for the six months ended June 30, 2015 was the finalization of our California general rate case.

Discontinued Operations

In the fourth quarter of 2014, we sold our Terratec line of business, which was part of our Market-Based Operations segment. The after-tax loss from discontinued operations for both the three and six months ended June 30, 2014 includes the operating results of the entity prior to the sale.

Regulatory Matters

The table below provides details by state and effective date in 2015 of annualized revenues awarded assuming a constant volume, resulting from rate authorizations:

	For the Three Months Ended June 30, 2015	For the Six Months Ended June 30, 2015
	(In millions)	
State		
General Rate Cases:		
Maryland (June 19)	$ 0.5	$ 0.5
Indiana (January 29)	—	5.1
California (January 1)	—	5.2
Total General Rate cases	$ 0.5	$ 10.8
Infrastructure charges:		
Pennsylvania (April 1)	$ 1.6	$ 1.6
Tennessee (June 30)	2.2	2.2
Missouri (June 27) (a)	1.9	1.9
New Jersey (January 1)	—	9.4
Illinois (b)	—	5.9
New York (June 1)	0.1	0.1
Total Infrastructure charges	$ 5.8	$ 21.1

(a) The Office of the Public Counsel filed an appeal notice claiming St. Louis County no longer meets the required population requirement for an infrastructure charge.
(b) Rates of $4.9 million and $1.0 million became effective January 1, 2015 and February 1, 2015, respectively.

On April 9, 2015, our California general rate case settlement was approved by the California Public Utilities Commission (the "CPUC"), with rates retroactive to January 1, 2015. The settlement, which also allowed for recovery of prior expenditures incurred related to our business transformation project and authorized a sharing mechanism for prior contamination proceeds that were previously deferred, was reflected in 2015 first quarter results.

On April 30, 2015, our West Virginia subsidiary filed a general rate case requesting additional annualized water and wastewater revenue of approximately $35.6 million.

Following the close of the second quarter, additional annualized revenue of $4.6 million resulting from infrastructure charges in our Pennsylvania subsidiary became effective on July 1, 2015. Also, additional annualized revenue of $0.2 million resulting from the approval of our general wastewater rate case in Kentucky became effective on July 2, 2015.

In July 2015, our California subsidiary filed an application with the CPUC to request changes to the present rate design and the emergency conservation and rationing plan for water customers in certain areas within its Monterey County service district. If approved, the proposed changes would allow (i) recovery in authorized cost of service of existing under-collections of the net water revenue adjustment mechanism/ modified cost balancing account ("WRAM/MCBA") balance, currently amounting to approximately $45 million, over 20 years earning a pretax rate of 8.41%; (ii) an annual consumption true-up mechanism and rate design that provide for more timely collection of the cost of service; and (iii) modification of existing conservation and rationing plans. We expect a CPUC decision in mid to late 2016.

On July 31, 2015, our Missouri subsidiary filed a general rate case requesting additional annualized revenue of approximately $25.2 million.

As of July 31, 2015, we are awaiting final general rate case orders in three states, requesting additional annualized revenue of $127.0 million. There is no assurance that all or any portion of these requests will be granted.

Focusing on Central Themes

For 2015, our focus is anchored on five central themes: 1) Customers, 2) Safety, 3) People, 4) Growth and 5) Operational Efficiency. We will continue our focus on operating our business responsibly and managing our operating and capital costs in a manner that benefits our customers and produces value for our shareholders. Additionally, we will continue our ongoing strategy that ensures a safe workplace for our employees, emphasizes public safety for our customers, and leverages our people resources, processes and technology innovation to make our business more effective and efficient. The progress that we have made in the first six months of 2015 with respect to growth and improvement in our operational efficiency ratio is described below.

Growth - Infrastructure improvements, acquisitions and strategic investments

During the first half of 2015, we made capital investments of approximately $514.9 million, consisting of approximately $473.6 million to improve infrastructure in our Regulated Businesses and the remaining $41.3 million for acquisitions of regulated operations. For the full-year of 2015, our total capital investment is expected to be in the range of $1.2 to $1.3 billion, most of which will be allocated to improving infrastructure in our Regulated Businesses with an additional $200 million allocated for acquisitions and strategic investments.

On April 30, 2015, we announced the signing of an agreement to acquire Environmental Disposal Corporation (“EDC”), which provides wastewater services to more than 5,300 customer accounts located in New Jersey. The acquisition is pending approval by the New Jersey Board of Public Utilities.

On May 21, 2015, upon the approval of the New Jersey Board of Public Utilities, we completed our acquisition of the Borough of Haddonfield’s water and wastewater system and on May 22, 2015, we completed the acquisition of the City of Arnold, Missouri’s wastewater system. These acquisitions added approximately 4,500 water and 13,800 wastewater customers to our regulated operations.

On July 9, 2015, we made a strategic acquisition in Water Solutions Holdings, LLC, including its wholly owned subsidiary, Keystone Clearwater Solutions (“Keystone”), by acquiring a ninety-five percent interest in the entity with a purchase price of approximately $130 million. Keystone is a water service provider that offers a range of water-related services to the oil and gas industry primarily in the Appalachian region of Pennsylvania, Ohio and West Virginia.

Technology and Operational Efficiency - Continuing Improvement in O&M Efficiency Ratio for our Regulated Businesses

We continued to improve on our operation and maintenance (“O&M”) efficiency ratio (a non-GAAP measure). Our O&M efficiency ratio for the twelve months ended June 30, 2015 was 35.9%, compared to 37.7% for the twelve months ended June 30, 2014. The improvement in the 2015 O&M efficiency ratio over this period was principally attributable to an increase in Regulated Businesses’ revenue and a decrease in the O&M expenses.

We evaluate our operating performance using this measure because management believes it is a direct measure of the efficiency of our Regulated Businesses’ operations. This information is intended to enhance an investor’s overall understanding of our operating performance. The O&M efficiency ratio is not a measure defined under GAAP and may not be comparable to other companies’ operating measures and should not be used in place of the GAAP information provided elsewhere in this report.

Our O&M efficiency ratio is defined as our regulated operation and maintenance expense divided by regulated operating revenues, where both O&M expense and operating revenues are adjusted to eliminate purchased water expense. We also excluded from operating revenues and O&M expenses the estimated impact from changes in consumption as a result of weather and the West Virginia Freedom Industries chemical spill. Additionally, from the O&M expenses, we exclude the allocable portion of non-O&M support services cost, mainly depreciation and general taxes that are reflected in the Regulated Businesses segment as O&M costs but for consolidated financial reporting purposes are categorized within other line items in the Statement of Operations. We exclude these items from the calculation as we believe such items are not reflective of management’s ability to increase efficiency of the Company’s regulated operations.

The following table provides the calculation and reconciliation that compares O&M and operating revenues, as determined in accordance with GAAP, to those amounts utilized in the calculation of our O&M efficiency ratio for the twelve months ended June 30, 2015 as compared to the same period in 2014.

Calculation and Reconciliation of Regulated O&M Efficiency Ratio (a Non-GAAP Measure):

	For the Twelve Months Ended June 30,	
	2015	2014
	(In thousands)	
Total Operation and Maintenance Expense	$ 1,347,291	$ 1,326,931
Less:		
Operation and maintenance expense—Market-Based Operations	316,456	254,668
Operation and maintenance expense—Other	(55,333)	(53,896)
Total Regulated Operation and Maintenance Expense	1,086,168	1,126,159
Less:		
Regulated purchased water expense	118,708	119,974
Allocation of non-operation and maintenance expense	39,165	36,027
Impact of West Virginia Freedom Industries chemical spill	618	9,820
Estimated impact of weather (mid-point of range)	(1,762)	(893)
Adjusted Regulated Operation and Maintenance Expense (a)	$ 929,439	$ 961,231
Total Operating Revenues	$ 3,057,746	$ 2,962,213
Less:		
Operating revenues—Market-Based Operations	385,250	321,226
Operating revenues—Other	(18,309)	(17,541)
Total Regulated Operating Revenues	2,690,805	2,658,528
Less:		
Regulated purchased water expense*	118,708	119,974
Plus:		
Impact of West Virginia Freedom Industries chemical spill	—	1,012
Estimated impact of weather (mid-point of range)	16,785	9,918
Adjusted Regulated Operating Revenues (b)	$ 2,588,882	$ 2,549,484
Adjusted Regulated Operation and Maintenance Efficiency Ratio (a)/(b)	35.9%	37.7%

* Calculation assumes purchased water revenues approximate purchased water expenses.

(a) Amounts may not sum due to rounding

The following is a discussion of the consolidated results of operations for the three and six months ended June 30, 2015 compared to the same periods in 2014:

Three Months Ended June 30, 2015 Compared to Three Months Ended June 30, 2014

Operating revenues. Consolidated operating revenues for the quarter ended June 30, 2015 increased $27.3 million, or 3.6%, compared to the same quarter last year. Revenues in our Market-Based Operations segment rose $19.0 million, largely driven by incremental revenue from our military contracts due to increased construction type projects and the addition of two military bases in the second half of 2014 coupled with contract growth in our Homeowner Services Group (“HOS”). Revenues in our Regulated Businesses segment rose $8.7 million mainly attributable to rate increases, infrastructure charges and increased demand, partially offset by decreased surcharges and balancing accounts in 2015. For further information, see the respective “Operating Revenues” discussions within the “Segment Results.”

Operation and maintenance. Consolidated O&M decreased by $1.2 million, or 0.4%, compared to the same period in 2014. This decrease resulted from continued cost management; lower costs associated with the Freedom Industries chemical spill; a reduction in uncollectible expense; and reduced employee-related, condemnation and production costs. These decreases were partially offset by an increase of $15.3 million in O&M costs associated with our Market-Based Operations segment, principally due to increased activity under our military contracts, as noted in the operating revenue discussion above. For further information on the changes in our Regulated Businesses and Market-Based Operations segments’ O&M, see the respective “Operation and Maintenance” discussions within the “Segment Results” section below.

Depreciation and amortization. Depreciation and amortization expense increased by $3.2 million, or 3.1%, primarily as a result of additional utility plant placed in service.

General Taxes. General taxes increased $3.4 million, or 6.0%, primarily due higher property tax assessments for various subsidiaries in our Regulated Businesses segment.

Other income (expenses). Other expenses increased by $1.7 million, or 2.3%, compared to the same period in 2014. The increase is primarily due to an increase in interest expense, mainly as a result of a $500 million debt issuance in the third quarter of 2014.

Provision for income taxes. Our consolidated provision for income taxes increased $8.2 million, or 11.4%, to $80.6 million for the three months ended June 30, 2015, due to the increase in pre-tax income. The effective tax rate for both the three months ended June 30, 2015 and 2014 was 39.6%.

Loss from discontinued operations, net of tax. As previously noted, the financial results of our Terratec line of business previously reported in our Market-Based Operations segment were classified as discontinued operations for all periods presented. The disposition of Terratec was finalized in the fourth quarter of 2014. For the three months ended June 30, 2014, the loss from discontinued operations, net of tax, represents the operating results of Terratec for the period.

Six Months Ended June 30, 2015 Compared to Six Months Ended June 30, 2014

Operating revenues. Consolidated operating revenues for the six months ended June 30, 2015 increased $46.4 million, or 3.2%, compared to the same period last year. Revenues in our Market-Based Operations segment rose $30.6 million, largely driven by incremental revenue from our military contracts due to increased construction type projects and the addition of two military bases in the second half of 2014 coupled with contract growth in our HOS. Revenues in our Regulated Businesses segment rose $16.5 million mainly attributable to rate increases, infrastructure charges and increased demand, partially offset by decreased surcharges and balancing accounts in 2015. For further information, see the respective “Operating Revenues” discussions within the “Segment Results” section below.

Operation and maintenance. Consolidated O&M decreased by $2.6 million, or 0.4%, compared to the same period in 2014. This decrease was attributable to lower O&M costs in our Regulated Businesses segment of $25.3 million from continued cost management, lower production and condemnation costs, and authorized recovery of costs as a result of the finalization of our California general rate case in the first quarter of 2015. Also, contributing to lower costs in our Regulated Businesses was the inclusion in 2014 of costs associated with the Freedom Industries chemical spill of $9.8 million. These decreases were partially offset by an increase of $27.1 million in O&M costs in our Market-Based Operations segment, principally due to increased activity under our military contracts, as noted in the operating revenue discussion above. For further information on the changes in our Regulated Businesses and Market-Based Operations segments’ O&M, see the respective “Operation and Maintenance” discussions within the “Segment Results” section below.

Depreciation and amortization. Depreciation and amortization expense increased by $4.7 million, or 2.2%, primarily as a result of additional utility plant placed in service.

General Taxes. General taxes increased $6.4 million, or 5.5%, primarily due to a true-up of business and occupation taxes and higher property tax assessments for various subsidiaries in our Regulated Businesses segment.

Other income (expenses). Other expenses decreased by $0.6 million, or 0.4%, compared to the same period in 2014. The decrease is primarily due to authorization through the California rate case of a sharing mechanism between shareholders and customers for prior chemical contamination settlement proceeds of $4.1 million that were previously deferred and the recovery of the allowance for borrowed funds used during construction on the authorized business transformation costs. These decreases were offset by incremental interest expense principally due to the $500 million debt issuance in the third quarter of 2014.

Provision for income taxes. Our consolidated provision for income taxes increased $16.4 million, or 14.0%, to $134.0 million for the six months ended June 30, 2015, due to the increase in pre-tax income. The effective tax rates for the six months ended June 30, 2015 and 2014 were 39.8% and 39.6%, respectively.

Loss from discontinued operations, net of tax. As previously noted, the financial results of our Terratec line of business previously reported in our Market-Based Operations segment were classified as discontinued operations for all periods presented. The disposition of Terratec was finalized in the fourth quarter of 2014. For the six months ended June 30, 2014, the loss from discontinued operations, net of tax, represents the operating results of Terratec for the period.

Segment Results

We have two reportable segments: the Regulated Businesses and the Market-Based Operations Segments. We evaluate the performance of our segments and allocate resources based on several factors, with the primary measure being income before income taxes.

Regulated Businesses Segment

The following table summarizes certain financial information for our Regulated Businesses Segment for the periods indicated:

	For the Three Months Ended June 30,			For the Six Months Ended June 30,		
	2015	2014	Increase (Decrease)	2015	2014	Increase (Decrease)
			(In thousands)			
Operating revenues	$ 686,811	$ 678,101	$ 8,710	$ 1,302,221	$ 1,285,745	$ 16,476
Operation and maintenance expense	270,279	284,121	(13,842)	536,609	561,948	(25,339)
Operating expenses, net	428,176	435,429	(7,253)	852,587	867,386	(14,799)
Income from continuing operations before income taxes	198,756	182,418	16,338	332,898	297,446	35,452

Operating revenues. Our primary business involves the ownership of water and wastewater utilities that provide services to residential, commercial, industrial and other customers. This business generally is subject to state economic regulation and our results of operations are impacted significantly by rates authorized by the state regulatory commissions in the states in which we operate.

Operating revenues increased by $8.7 million, or 1.3%, for the three months ended June 30, 2015, as compared to the same period in 2014. This increase is principally due to incremental revenues of approximately $8.6 million, attributable to rate increases, including infrastructure charges, obtained through rate authorizations for a number of our operating companies. Additionally, operating revenues increased by $2.7 million, due to higher demand for the quarter ended June 30, 2015 compared to 2014. Partially offsetting these increases was a $3.6 million decrease in 2015 revenues attributable to the amortization of balancing accounts.

Operating revenues increased by $16.5 million, or 1.3%, for the six months ended June 30, 2015, as compared to the same period in 2014, primarily due to incremental revenues of approximately $17.5 million resulting from rate increases, including the infrastructure charges for a number of our operating companies. Partially offsetting these increases was a reduction in revenues from the amortization of balancing accounts in 2015 compared to 2014 of approximately $4.1 million.

The following table sets forth information regarding the Regulated Businesses’ revenues and billed water sales volume by customer class for the periods indicated:

	For the Three Months Ended June 30,							
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	Operating Revenues (Dollars in thousands)				Billed Water Sales Volume (Gallons in millions)			
Customer Class								
Water service								
Residential	$ 373,166	$ 364,906	$ 8,260	2.3%	41,725	41,705	20	0.0%
Commercial	135,631	130,617	5,014	3.8%	19,727	19,092	635	3.3%
Industrial	32,021	31,419	602	1.9%	9,573	9,591	(18)	(0.2%)
Public and other	83,021	81,293	1,728	2.1%	12,889	12,510	379	3.0%
Other water revenues	8,710	7,822	888	11.4%	—	—	—	—
Billed water services	632,549	616,057	16,492	2.7%	83,914	82,898	1,016	1.2%
Unbilled water services	15,961	23,246	(7,285)	(31.3%)				
Total water service revenues	648,510	639,303	9,207	1.4%				
Wastewater service revenues	25,170	24,254	916	3.8%				
Other revenues	13,131	14,544	(1,413)	(9.7%)				
	$ 686,811	$ 678,101	$ 8,710	1.3%				

	For the Six Months Ended June 30,							
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	Operating Revenues (Dollars in thousands)				Billed Water Sales Volume (Gallons in millions)			
Customer Class								
Water service								
Residential	$ 720,307	$ 718,430	$ 1,877	0.3%	79,379	81,642	(2,263)	(2.8%)
Commercial	258,229	260,436	(2,207)	(0.8%)	37,017	38,081	(1,064)	(2.8%)
Industrial	62,990	64,988	(1,998)	(3.1%)	18,570	19,406	(836)	(4.3%)
Public and other	159,150	165,259	(6,109)	(3.7%)	24,726	25,919	(1,193)	(4.6%)
Other water revenues	16,190	8,599	7,591	88.3%	—	—	—	—
Billed water services	1,216,866	1,217,712	(846)	(0.1%)	159,692	165,048	(5,356)	(3.2%)
Unbilled water services	12,155	(2,961)	15,116	510.5%				
Total water service revenues	1,229,021	1,214,751	14,270	1.2%				
Wastewater service revenues	47,988	46,662	1,326	2.8%				
Other revenues	25,212	24,332	880	3.6%				
	$ 1,302,221	$ 1,285,745	$ 16,476	1.3%				

Water Services – Consistent with the above discussion, water service operating revenues for the three months ended June 30, 2015 totaled $648.5 million, a $9.2 million increase, or 1.4%, over the same period of 2014. For the six months ended June 30, 2015, these revenues increased $14.3 million, or 1.2%, compared to the six months ended June 30, 2014. As described above, the increases for both the three and six months are primarily due to rate increases and infrastructure charges partially offset by a reduction in revenues attributable to the amortization of balancing accounts. Also, contributing to the incremental revenue for the three months ended June 30, 2015 compared to the same period last year was higher demand. Also, it should be noted that the mix between billed and unbilled water revenue for the six-month period ended June 30, 2015, compared to the same period in 2014 has changed. This change is principally the result of addressing the majority of delayed customer billings that existed at December 31, 2013, by billing those customers in the first quarter of 2014. The delayed billings resulted from the implementation of our Customer Information System (“CIS”) in 2013.

Wastewater services – Our subsidiaries provide wastewater services in eleven states. Revenues from these services increased $0.9 million, or 3.8%, and $1.3 million, or 2.8%, for the three and six months ended June 30, 2015, respectively, compared to the same periods in 2014 as the result of adding additional systems through acquisitions.

Other revenues – Other revenues, which include reconnection charges, initial application service fees, certain rental revenues, revenue collection services for others and other similar items, decreased $1.4 million, or 9.7%, for the three months ended June 30, 2015. This decrease is principally due to 2014 including $2.4 million in insurance proceeds for business interruption as a result of Hurricane Sandy. The six months ended June 30, 2015 increased $0.9 million, or 3.6%, due to incremental revenues for late payment fees and reconnection fees offset by the insurance proceeds mentioned above.

Operation and maintenance expense. Operation and maintenance expense decreased $13.8 million, or 4.9%, and $25.3 million, or 4.5%, for the three and six months ended June 30, 2015, respectively, compared to the same period in 2014.

The following table provides information regarding operation and maintenance expense for the three and six months ended June 30, 2015 and 2014, by major expense category:

	For the Three Months Ended June 30,				For the Six Months Ended June 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Production costs	$ 72,219	$ 74,141	$ (1,922)	(2.6%)	$ 136,004	$ 143,400	$ (7,396)	(5.2%)
Employee-related costs	106,277	107,599	(1,322)	(1.2%)	215,406	214,780	626	0.3%
Operating supplies and services	48,907	53,991	(5,084)	(9.4%)	95,180	110,256	(15,076)	(13.7%)
Maintenance materials and supplies	16,619	17,713	(1,094)	(6.2%)	36,050	38,160	(2,110)	(5.5%)
Customer billing and accounting	13,588	16,082	(2,494)	(15.5%)	28,715	29,287	(572)	(2.0%)
Other	12,669	14,595	(1,926)	(13.2%)	25,254	26,065	(811)	(3.1%)
Total	$ 270,279	$ 284,121	$ (13,842)	(4.9%)	$ 536,609	$ 561,948	$ (25,339)	(4.5%)

Production costs by major expense type were as follows:

	For the Three Months Ended June 30,				For the Six Months Ended June 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Purchased Water	$ 30,694	$ 32,576	$ (1,882)	(5.8%)	$ 57,065	$ 59,658	$ (2,593)	(4.3%)
Fuel and Power	21,518	21,217	301	1.4%	42,712	45,135	(2,423)	(5.4%)
Chemicals	12,359	12,127	232	1.9%	21,956	22,795	(839)	(3.7%)
Waste Disposal	7,648	8,221	(573)	(7.0%)	14,271	15,812	(1,541)	(9.7%)
Total	$ 72,219	$ 74,141	$ (1,922)	(2.6%)	$ 136,004	$ 143,400	$ (7,396)	(5.2%)

Production costs decreased by $1.9 million, or 2.6%, and $7.4 million, or 5.2%, for the three and six months ended June 30, 2015, respectively, compared to the same periods in the prior year. The decrease for the second quarter was primarily due to a reduction in purchased water costs principally from lower usage in our California subsidiary. Purchased water and fuel and power costs in California are recorded in a balancing account and therefore do not impact earnings. The decrease for the six months ended June 30, 2015 was primarily due to decreases in purchased water as discussed above and fuel and power expenses principally attributable to incremental costs in 2014 due to harsher weather conditions in certain states and lower fuel and natural gas prices in 2015.

The following table provides information with respect to components of employee-related costs for the three and six months ended June 30, 2015 and 2014:

	For the Three Months Ended June 30,				For the Six Months Ended June 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Salaries and wages	$ 78,990	$ 82,568	$ (3,578)	(4.3%)	$ 159,480	$ 163,651	$ (4,171)	(2.5%)
Pensions	7,351	6,800	551	8.1%	15,066	13,620	1,446	10.6%
Group insurance	15,064	13,765	1,299	9.4%	30,805	28,130	2,675	9.5%
Other benefits	4,872	4,466	406	9.1%	10,055	9,379	676	7.2%
Total	$ 106,277	$ 107,599	$ (1,322)	(1.2%)	$ 215,406	$ 214,780	$ 626	0.3%

For the three and six months ended June 30, 2015 compared to the same periods in 2014 salaries and wages decreased as a result of the reduction in headcount and severance costs associated with the restructuring of certain organizational functions in 2014 as well as higher capitalization rates in 2015. Pension and postretirement benefit costs (which is included in group insurance expenses) increased principally due to the adoption of new mortality assumptions based on the Society of Actuaries RP 2014 mortality table and a decrease in the discount rate assumptions, which resulted in increased plan obligations.

Operating supplies and services include expenses for office operation, legal and professional services, transportation expenses, and information systems and other office equipment rental charges. Overall these costs decreased $5.1 million, or 9.4%, and $15.1 million, or 13.7%, for the three and six months ended June 30, 2015, respectively, compared to the same periods in 2014. The decrease was primarily due to incremental costs in 2014 associated with the Freedom Industries chemical spill in West Virginia and increased condemnation-related costs. Also, contributing to the decrease were lower fuel prices and leased vehicle costs for both the three and six months ended June 30, 2015. The decrease for the six months ended June 30, 2015 also included a $3.2 million adjustment in the first quarter of 2015 attributable to the recovery of previously expensed business transformation costs as a result of the finalization of our California rate case.

Maintenance materials and supplies, which include preventive maintenance and emergency repair costs, decreased $1.1 million, or 6.2%, and $2.1 million, or 5.5%, for the three and six months ended June 30, 2015, respectively, compared to the same periods in 2014. The decrease for both the three and six months is primarily due to decreases in paving, backfilling and other repair costs. These costs were higher in the first quarter of 2014 as compared to the same period in 2015 due to higher than normal main breaks as a result of the abnormally severe winter weather conditions experienced in certain states.

Customer billing and accounting expenses, which include uncollectible accounts expense, postage and other customer related expenses, decreased by $2.5 million, or 15.5%, and $0.6 million, or 2.0%, for the three and six months ended June 30, 2015, respectively, compared to the same periods in 2014, and is principally attributable to improvements in our uncollectible expense.

Other operation and maintenance expense includes casualty and liability insurance premiums and regulatory costs. The decrease in these costs for both the three and six months ended June 30, 2015 compared to the prior year periods was primarily driven by 2014 claims costs associated with the Freedom Industries chemical spill in West Virginia. The premium adjustments are based upon current facts and circumstances with respect to outstanding claims and are subject to change as the claims mature.

Operating expenses. The decrease in operating expenses for the three and six months ended June 30, 2015 is principally due to the decrease in operation and maintenance expense explained above offset by higher depreciation and amortization expense from additional utility plant placed in service and incremental general taxes mainly due to increased property and gross receipt taxes for certain of our operating companies.

Market-Based Operations

The following table provides financial information for our Market-Based Operations segment for the periods indicated:

	For the Three Months Ended June 30,			For the Six Months Ended June 30,		
	2015	2014	Increase (Decrease)	2015	2014	Increase (Decrease)
	(In thousands)					
Operating revenues	$ 99,976	$ 81,022	$ 18,954	$ 187,449	$ 156,877	$ 30,572
Operation and maintenance expense	80,587	65,314	15,273	154,120	127,059	27,061
Operating expenses, net	82,844	67,639	15,205	158,876	132,162	26,714
Income from continuing operations before income taxes	17,737	13,982	3,755	29,794	25,959	3,835

Operating revenues. Revenues for the three and six months ended June 30, 2015 increased $19.0 million and $30.6 million, respectively, compared to the same periods in 2014, as a result of incremental revenues in our Military Services Group (“Military”) and HOS lines of business partially offset by lower Contract Operations Group (“Contract Operations”) revenues. For the three and six months ended June 30, 2015, Military revenue increased $15.8 million and $24.5 million, respectively. These increases are primarily related to additional revenues from construction project activities associated with our military contracts and the addition of Hill Air Force Base and Picatinny Arsenal in the second half of 2014. HOS revenues increased $3.3 million and $7.1 million for the three and six months ended June 30, 2015, respectively. The incremental revenues in HOS are primarily the result of contract growth, mainly through our New York City contracts, as well as expansion into other geographic areas.

Operation and maintenance. Operation and maintenance expense increased $15.3 million, or 23.4%, and $27.1 million, or 21.3%, for the three and six months ended June 30, 2015, respectively.

The following table provides information regarding categories of operation and maintenance expense for the periods indicated:

	For the Three Months Ended June 30,				For the Six Months Ended June 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Production costs	$ 8,829	$ 8,593	$ 236	2.7%	$ 17,916	$ 17,861	$ 55	0.3%
Employee-related costs	17,162	15,356	1,806	11.8%	32,835	29,076	3,759	12.9%
Operating supplies and services	39,952	29,248	10,704	36.6%	72,977	54,682	18,295	33.5%
Maintenance materials and supplies	13,150	10,953	2,197	20.1%	27,437	22,310	5,127	23.0%
Other	1,494	1,164	330	28.4%	2,955	3,130	(175)	(5.6%)
Total	$ 80,587	$ 65,314	$ 15,273	23.4%	$ 154,120	$ 127,059	$ 27,061	21.3%

As noted in the table above, the primary factor contributing to the overall increase was operating supplies and services. This increase corresponds with the incremental revenues recognized in the Market-Based Operations segment and is mainly attributable to growth in construction project activities under our military contracts, as well as the addition of the two new military contracts discussed above. In addition, the increase in maintenance materials and supplies was primarily due to higher HOS claim costs, which are associated with new contracts as well as an increase in the frequency and severity of the claims.

Liquidity and Capital Resources

For a general overview of our sources and uses of capital resources, see the introductory discussion under “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources,” contained in Part II, Item 7 of our Form 10-K.

We rely on our revolving credit facility, the capital markets and our cash flows from operations to fulfill our short-term liquidity needs, to issue letters of credit and to support our commercial paper program. We fund liquidity needs for capital investment, working capital and other financial commitments through cash flows from operations, public and private debt offerings, commercial paper markets and, to the extent necessary, our revolving credit facility. We regularly evaluate the capital markets and closely monitor the financial condition of the financial institutions with contractual commitments in the revolving credit facility.

In order to meet our short-term liquidity needs, we, through AWCC, our wholly owned financing subsidiary, issue commercial paper, which is supported by an unsecured revolving credit facility. Indebtedness under the credit facility is considered “debt” for purposes of a support agreement between American Water and AWCC, which serves as a functional equivalent of a guarantee by American Water of AWCC’s payment obligations under the credit facility. The revolving credit facility is also used, to a limited extent, to support our issuance of letters of credit and, from time to time, for direct borrowings.

On June 30, 2015, we, AWCC and the lenders amended and restated our outstanding credit agreement, dated as of October 29, 2012, associated with the revolving credit facility, to extend the expiration date of the facility from October 2018 to June 2020 and to allow AWCC to request to extend further the term of the credit facility for up to two one-year periods. An extension request must satisfy certain conditions and receive approval of the lenders, as set forth in the agreement. The financial covenants with respect to the credit facility remained unchanged.

As of June 30, 2015, AWCC had no outstanding borrowings and $40.4 million of outstanding letters of credit under the revolving credit facility. As of June 30, 2015, AWCC had $1.2 billion available under the credit facility to fulfill our short-term liquidity needs, to issue letters of credit and support $821.0 million in outstanding commercial paper. We can provide no assurances that the lenders will meet their existing commitments to AWCC under the credit facility or that we will be able to access the commercial paper or loan markets in the future on terms acceptable to us or at all.

As noted in our Form 10-K, in February 2015, our Board of Directors authorized an anti-dilutive common stock repurchase program for the specific purpose of providing a vehicle to mitigate the dilutive effect of shares issued through our dividend reinvestment, employee stock purchase and executive compensation programs. This program allows us to purchase up to 10 million shares of our common stock over an unrestricted period of time. We may effect repurchases in the open market or through privately negotiated transactions. We commenced making purchases under this program in April 2015, and through June 30, 2015, we have repurchased an aggregate of 250 thousand shares.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the third quarter of each fiscal year. Cash flows from continuing operating activities for the six months ended June 30, 2015 were $418.0 million compared to $450.6 million for the six months ended June 30, 2014.

The following table provides a summary of the major items affecting our cash flows from operating activities for the six months ended June 30, 2015 and 2014:

	For the Six Months Ended June 30,	
	2015	2014
	(In thousands)	
Net income	$ 203,118	$ 177,422
Add (subtract):		
Non-cash activities (1)	368,586	371,045
Changes in working capital (2)	(128,245)	(76,419)
Pension and postretirement healthcare contributions	(25,464)	(21,433)
Net cash flows provided by operations	$ 417,995	$ 450,615

(1) Includes depreciation and amortization, deferred income taxes and amortization of deferred investment tax credits, provision for losses on accounts receivable, allowance for other funds used during construction, gain on asset dispositions and purchases, pension and non-pension postretirement benefits expense and other non-cash items. Details of each component can be found in the Consolidated Statements of Cash Flows.

(2) Changes in working capital include changes to receivables and unbilled revenues, taxes accrued (including income taxes), accounts payable and accrued expenses and other current assets and liabilities, net.

The decrease in cash flows from operating activities during the six months ended June 30, 2015, as compared to the same period in 2014, reflects changes in working capital and an increase in pension and postretirement benefit contributions of $4.0 million. The decrease in working capital for the six months ended June 30, 2015 compared to the same period in the prior year is the result of higher cash collections for our Regulated Businesses in the first quarter of 2014, as we delayed some 2013 billings to the first quarter of 2014 when we implemented our new customer information system in 2013, the timing of accounts payable and an increase in accrued dividends and insurance.

Due to the continued severe drought in California, in April 2015, the Governor of California mandated water usage restrictions intended to reduce the state's overall water usage by 25% compared with 2013 levels. As a result of our California subsidiary's WRAM, which has the effect of reducing the adverse financial impact on us of our California customers' conservation efforts, such restrictions should not have a significant impact on our result of operations. However, cash flows from operations could be affected as the surcharges or surcredits we recognize on these accounts are collected from or refunded to customers generally over periods ranging from twelve to thirty-six months. The impact of the WRAM on cash flows for the first six months of 2015 was approximately $10 million.

Our working capital needs are primarily limited to funding the increase in our customer accounts receivable and unbilled revenues which is mainly associated with the revenue increase as a result of rate increases in our Regulated Businesses segment.

Cash Flows from Investing Activities

The following table provides information regarding cash flows used in investing activities for the six months ended June 30, 2015 and 2014:

	For the Six Months Ended June 30,	
	2015	2014
	(In thousands)	
Net capital expenditures	$ (478,821)	$ (401,781)
Proceeds from sale of assets	4,780	665
Acquisitions and related costs	(41,244)	(2,869)
Other investing activities, net [1]	(51,890)	(34,189)
Net cash flows used in investing activities	$ (567,175)	$ (438,174)

(1) Includes removal costs from property, plant and equipment retirements, net and net funds restricted.

The increase in capital expenditures is principally due to less harsh winter conditions in the first quarter of 2015 compared to the same period in 2014 in certain of our Regulated Businesses, which allowed us to increase our capital improvements during the six months ended June 30, 2015.

The increase in cash utilized for acquisitions during the first six months of 2015 compared to the same period in 2014 is principally due to the purchase of two regulated systems, the Borough of Haddonfield, New Jersey's water and wastewater systems and the City of Arnold, Missouri's wastewater system.

We are currently considering a plan to construct a new corporate headquarters to consolidate our support services and certain of our Market-Based Operations employees within a single location. We are considering several alternatives for the location of the new headquarters. The cost of construction, which would take several years to complete, is currently estimated to be up to $165 million, depending on the location selected and exclusive of any tax incentives that the Company may receive.

Cash Flows from Financing Activities

The following table provides information regarding cash flows provided by (used in) financing activities for the six months ended June 30, 2015 and 2014:

	For the Six Months Ended June 30, 2015	For the Six Months Ended June 30, 2014
	(In thousands)	
Proceeds from long-term debt	$ 7,748	$ —
Repayments of long-term debt	(5,694)	(4,565)
Proceeds from short-term borrowings	371,023	72,131
Dividends paid	(116,649)	(105,390)
Other financing activities, net (1)	14,424	30,552
Net cash flows provided by (used in) financing activities	$ 270,852	$ (7,272)

(1) Includes proceeds from issuance of common stock under various employee stock plans and our dividend reinvestment plan, advances and contributions for construction, net of refunds, debt issuance costs, share repurchase and tax benefits realized from equity compensation.

Our financing activities, primarily focused on funding construction expenditures, include the issuance of long-term and short-term debt, primarily through AWCC. We intend to access the capital markets on a regular basis, subject to market and general economic conditions. In addition, new infrastructure may be financed with customer advances (net of refunds) and contributions in aid of construction.

Based on the liquidity and capital needs of American Water and our regulated subsidiaries, AWCC borrows funds on a short-term basis and through intercompany loans, provides the proceeds of those borrowings to the regulated subsidiaries and American Water. The regulated subsidiaries and American Water are obligated to pay to AWCC their respective portion of AWCC's debt service obligations. Because American Water borrowings are not a source of capital for the Company's regulated subsidiaries, the Company is not able to recover the interest charges on its debt through regulated water and wastewater rates.

On May 7, 2015, American Water and AWCC filed with the SEC a universal shelf registration statement that enables us to meet our capital needs through the offer and sale to the public from time to time of an unlimited amount of various types of securities, including American Water common stock, preferred stock and other equity securities and AWCC debt securities, all subject to market conditions and demand, general economic conditions, and as applicable, rating status. The shelf registration will expire in May 2018.

We intend to utilize commercial paper for short-term liquidity, as commercial paper borrowings have historically been a more flexible and lower cost option. However, we are able to utilize our credit facility to the extent necessary to complement our borrowings in the commercial paper market. In the event of disruptions in the money market sector of the debt capital markets or in response to economic conditions generally, borrowings under our revolving credit facility may be more efficient and a lower cost alternative to commercial paper.

The following long-term debt was issued during the first six months of 2015:

Company	Type	Rate	Maturity	Amount (In thousands)
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	1.00%	2022	$ 7,748

The following long-term debt was retired through sinking fund provisions or payment at maturity during the first six months of 2015:

Company	Type	Rate	Maturity	Amount (In thousands)
American Water Capital Corp.	Private activity bonds and government funded debt—fixed rate	1.79%-2.90%	2021-2031	$ 807
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-5.30%	2015-2041	3,671
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments	12.23%	2026	16
Total retirements and redemptions				$ 5,694

From time to time, and as market conditions warrant, we may engage in additional long-term debt retirements via tender offers, open market repurchases or other transactions.

Credit Facilities and Short-Term Debt

Short-term debt, consisting of commercial paper, net of discount, amounted to $821.0 million at June 30, 2015.

The following table provides information as of June 30, 2015 regarding letters of credit sub-limits under our revolving credit facility and available funds under the revolving credit facility, as well as outstanding amounts of commercial paper and borrowings under our revolving credit facility.

	Credit Facility Commitment	Available Credit Facility Capacity	Letter of Credit Sub-limit	Available Letter of Credit Capacity	Outstanding Commercial Paper (Net of Discount)	Credit Line Borrowings
	(In thousands)					
June 30, 2015	$ 1,250,000	$ 1,209,615	$ 150,000	$ 109,615	$ 820,982	$ —

The weighted-average interest rate on short-term borrowings for the three months ended June 30, 2015 and 2014 was approximately 0.27% and 0.29%, respectively, and 0.51% and 0.31% for the six months ended June 30, 2015 and 2014, respectively.

Capital Structure

The following table provides information regarding our capital structure for the periods presented:

	At June 30, 2015	At December 31, 2014
Total common stockholders' equity	44%	45%
Long-term debt and redeemable preferred stock at redemption value	48%	50%
Short-term debt and current portion of long-term debt	8%	5%
	100%	100%

Debt Covenants

Our debt agreements contain financial and non-financial covenants. To the extent that we are not in compliance with these covenants, such an event may create an event of default under the debt agreement and we, or our subsidiaries, may be restricted in the ability to pay dividends, issue new debt or access our revolving credit facility. For two of our smaller operating companies, we have informed our counterparties that we will provide only unaudited financial information at the subsidiary level, which resulted in technical non-compliance with certain of their reporting requirements under debt agreements. We do not believe this event will materially impact us. Our long-term debt indentures also contain a number of covenants that, among other things, limit the Company from issuing debt secured by the Company's assets, subject to certain exceptions. Our failure to comply with any of these covenants could accelerate repayment obligations.

Certain long-term notes and the revolving credit facility require us to maintain a ratio of consolidated debt to consolidated capitalization (as defined in the relevant documents) of not more than 0.70 to 1.00. As of June 30, 2015, our ratio was 0.56 to 1.00 and therefore we were in compliance with the covenant.

Security Ratings

Our access to the capital markets, including the commercial paper market, and respective financing costs in those markets, may be directly affected by our securities ratings. We primarily access the debt capital markets, including the commercial paper market, through AWCC. However, we have also issued debt through our regulated subsidiaries, primarily in the form of tax exempt securities or borrowings under state revolving funds, to lower our overall cost of debt.

The following table shows the Company's securities ratings as of June 30, 2015:

Securities	Moody's Investors Service	Standard & Poor's Ratings Service
Senior unsecured debt	Baa1	A
Commercial paper	P2	A-1

On May 7, 2015, Standard & Poor's ("S&P") raised our corporate credit rating on AWCC and American Water from A- to A and our commercial paper rating from A-2 to A-1 on American Water and AWCC. S&P also confirmed its stable rating outlook.

On April 22, 2015, Moody's reaffirmed our Baa1 corporate credit rating for American Water and AWCC and AWCC's P2 commercial paper rating. At the same time, Moody's revised its rating outlook for American Water and AWCC to positive from stable.

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon our ability to generate cash flows in an amount sufficient to service our debt and meet our investment plans. We can provide no assurances that our ability to generate cash flows is sufficient to maintain our existing ratings. None of our borrowings are subject to default or prepayment as a result of a downgrading of these security ratings, although such a downgrading could increase fees and interest charges under our credit facility.

As part of the normal course of business, we routinely enter into contracts for the purchase and sale of water, energy, fuels and other services. These contracts either contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if our debt is downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to reference such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that we provide collateral to secure our obligations. We do not expect that our posting of collateral would have a material adverse impact on our results of operations, financial position or cash flows.

Dividends

On June 1, 2015, we made a cash dividend payment of $0.34 per share to shareholders of record as of May 11, 2015.

On July 24, 2015, our board of directors declared a quarterly cash dividend payment of $0.34 per share payable on September 1, 2015 to shareholders of record as of August 10, 2015. Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Application of Critical Accounting Policies and Estimates

Our financial condition, results of operations and cash flows are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates," in our Form 10-K for a discussion of our critical accounting policies.

Recent Accounting Pronouncements

See Note 2: New Accounting Pronouncements to our consolidated financial statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for a discussion of new accounting standards recently adopted or pending adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. There have been no significant changes to our exposure to market risk since December 31, 2014. For a discussion of our exposure to market risk, refer to Part II, Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," contained in our Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

American Water maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of June 30, 2015.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of June 30, 2015, our disclosure controls and procedures were effective at a reasonable level of assurance.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the three months ended June 30, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act).

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The following information updates and amends the information provided in our Form 10-K in Part I, Item 3, “Legal Proceedings,” and in the Company’s Quarterly Report on Form 10-Q for the quarter ended March 31, 2015 in Part II, Item 1, “Legal Proceedings.”

Alternative Water Supply in Lieu of Carmel River Diversions

On March 18, 2015, the CPUC issued a decision approving, in part, the settlement agreement among California-American Water Company (“Cal Am”), the Monterey County Water Resource Agency (“MCWRA”) and the County of Monterey, by authorizing Cal Am’s recovery of $1.9 million of costs advanced to MCWRA, plus interest and fees under the reimbursement agreement and credit line agreement among the Marina Coast Water District (“MCWD”), MCWRA and Cal Am. These agreements, along with the water purchase agreement and other related ancillary agreements among MCWD, MCWRA and Cal Am, relate to the regional desalination project (“RDP”) involving the proposed construction of a desalination facility in the City of Marina. The CPUC denied without prejudice the additional recovery of approximately $765,000 because there was insufficient information for the CPUC to determine the reasonableness of such amount. Cal Am is permitted to file another application for recovery at a future date. On April 17, 2015, MCWD filed an application with the CPUC for a rehearing of the settlement approval.

On April 29, 2015, the San Francisco County Superior Court issued a final decision on the Complaint for Declaratory Relief filed by Cal Am against MCWRA and MCWD regarding the validity of the RDP agreements. In its final decision, the court ruled that four of the five RDP agreements are void. On the basis of previous rulings and dismissals, on June 1, 2015, the court entered its judgment declaring that four of the five RDP agreements are void and the credit line agreement is not void. On June 30, 2015, MCWD filed its notice of appeal of the court’s judgment. Cal Am and MCWRA filed post-judgment motions to recover trial costs and attorneys’ fees. On July 21, 2015, the court issued an order declaring Cal Am and MCWRA “are clearly the prevailing parties” in the Declaratory Relief action and awarded trial costs to Cal Am in the approximate amount of $56,000 (of approximately $99,000 sought). The motions to recover attorneys’ fees, seeking approximately $1.2 million, have not yet been heard by the court. In July 2015, Cal Am and MCWRA filed a Complaint (the “Cal Am July 2015 Complaint”) against MCWD and RMC Water and Environment, a private engineering consulting firm. Cal Am seeks to recover compensatory, consequential and incidental damages associated with the failure of the RDP in an amount to be proven at trial, which have been alleged in the Cal Am July 2015 Complaint to be in excess of $10.0 million, as well as punitive and treble damages, statutory penalties and attorneys’ fees.

On July 30, 2015, MCWD filed a Complaint (the “MCWD July 2015 Complaint”) in San Francisco County Superior Court against Cal Am, MCWRA and certain unidentified individual defendants. MCWD is seeking to recover compensatory damages associated with the failure of the RDP in an amount to be proven at trial, which have been alleged in the MCWD July 2015 Complaint to be at least $18.0 million, as well as exemplary damages and attorneys’ fees. Cal Am has not yet responded to the MCWD July 2015 Complaint, but it intends to contest vigorously the causes of action stated against it.

A one-day trial on MCWD’s December 11, 2014 Petition for Writ of Mandate and Complaint for Declaratory and Injunctive Relief and the Ag Land Trust Petition was conducted on July 23, 2015 in Santa Cruz County Superior Court. The court denied both Petitions in their entirety. MCWD’s January 2015 Petition against the State Lands Commission and Cal Am remains active, and the deadline for Answers is August 21, 2015. The matter is scheduled for a one-day trial on November 20, 2015 in Santa Cruz County Superior Court.

In addition to the foregoing matters, Cal Am’s ability to move forward on the Monterey Peninsula Water Supply Project (the “Water Supply Project”) is subject to extensive administrative review by the CPUC, review by other government agencies of necessary permit applications, and intervention from other parties, including some that are not participants in the settlement agreements relating to the Water Supply Project. In addition, there have been delays in the initial timetable for the preparation and certification by the CPUC of an environmental impact report due to, among other things, uncertainties regarding timing of government approval of various required permits. On July 9, 2015, the CPUC extended the environmental review of the Water Supply Project, and has not yet issued a revised procedural schedule with the final order date for the Water Supply Project. As a result, Cal Am estimates that the earliest date by which the Water Supply Project could be completed is sometime in 2018. We cannot assure that Cal Am’s application for the Water Supply Project will be approved or that the Water Supply Project will be completed on a timely basis, if ever.

Overflow of Diesel Fuel Tank

On March 2, 2015, Virginia-American Water Company (“VAWC”) - Hopewell District had an overflow of a diesel fuel day tank at its low lift pump station located along the Appomattox River in Hopewell, Virginia. Approximately 500 gallons of diesel fuel overflowed the day tank and onto the ground and a portion of the fuel ultimately entered the river. VAWC notified first responders and retained Clean Harbors, an emergency response company, to control the overflow area and perform clean-up at the site and in the river. On March 4, 2015, the U.S. Environmental Protection Agency (“EPA”) issued an Emergency Removal/Response Administrative Order directing the performance by VAWC of removal actions to mitigate the release. VAWC and Clean Harbors conducted removal efforts under the Order subject to oversight by the EPA and the Virginia Department of Environmental Quality (“VDEQ”), and on May 11, 2015, the EPA issued a notice of completion of the work required under the Order. VAWC also has received and responded to a request from the EPA for information regarding the overflow of the diesel fuel tank.

On April 1, 2015, VDEQ issued a Notice of Violation (“NOV”) alleging violations arising from this incident without providing a specific fine or penalty amount. The NOV also alleged violations relating to discharges of chlorinated water into the river that were identified during the course of the response to the Hopewell diesel overflow. VAWC has taken steps to prevent any potential for such discharges going forward. VAWC and VDEQ continue to discuss resolving the NOV through a consent order.

West Virginia Elk River Freedom Industries’ Chemical Spill

As previously disclosed, four of the cases pending before the federal district court were consolidated for purposes of discovery, and an amended consolidated class action complaint for those cases (“Federal action”) was filed on December 9, 2014 by several plaintiffs who allegedly suffered economic losses, loss of use of property and tap water or other specified adverse consequences as a result of the Freedom Industries spill, on behalf of a purported class of all persons and businesses supplied with, using, or exposed to water contaminated with crude 4-methylcyclohexane methanol (“MCHM”) and provided by West Virginia-American Water Company (“WVAWC”) in Logan, Clay, Lincoln, Roane, Jackson, Boone, Putnam, and Kanawha Counties and the Culloden area of Cabell County, West Virginia as of January 9, 2014. The amended consolidated complaint names several individuals and corporate entities as defendants, including American Water Works Service Company, Inc. (“AWWSC”), WVAWC and the Company. The plaintiffs seek unspecified damages for alleged business or economic losses; unspecified damages or a mechanism for recovery to address a variety of alleged costs, loss of use of property, personal injury and other consequences allegedly suffered by purported class members; punitive damages and certain additional relief, including the establishment of a medical monitoring program to protect the purported class members from an alleged increased risk of contracting serious latent disease.

On April 9, 2015, the court in the Federal action denied a motion to dismiss all claims against the Company for lack of personal jurisdiction. A separate motion to dismiss filed by AWWSC and WVAWC (and joined by the Company) asserting various legal defenses in the Federal action was resolved by the court on June 3, 2015. The court dismissed three causes of action but denied the motion to dismiss with respect to the remaining causes of actions and allowed the plaintiffs to continue to pursue the various claims for damages alleged in their amended consolidated complaint. On July 6, 2015, the plaintiffs filed a motion seeking certification of a class defined to include persons who resided in dwellings served by WVAWC’s Kanawha Valley Treatment Plant (“KVTP”) on January 9, 2014, persons who owned businesses served by the KVTP on January 9, 2014, and hourly employees who worked for such businesses. The plaintiffs seek a class-wide determination of liability against the American Water defendants, among others, and of damages to the three groups of plaintiffs as a result of the “Do Not Use” order issued after the Freedom Industries spill. This motion remains pending. On July 22, 2015, the court directed the parties to the Federal action to attend mediation scheduled for September 30, 2015. It is expected that the plaintiffs in the 53 state court cases, which were removed to federal court and are presently subject to stayed motions to remand to state court, will also participate in this mediation.

General

Periodically, the Company is involved in other proceedings or litigation arising in the ordinary course of business. We do not believe that the ultimate resolution of these matters will materially affect the Company’s financial position or results of operations. However, litigation and other proceedings are subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. It is possible that some litigation and other proceedings could be decided unfavorably to us, and that any such unfavorable decisions could have a material adverse effect on the Company’s business, financial condition, results of operations, and cash flows.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in the “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2014, and our other public filings, which could materially affect our business, financial condition or future results. There have been no material changes from risk factors previously disclosed in “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2014.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (a)	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Program
April 7 - April 30, 2015	77,400	$ 54.29	77,400	9,922,600
May 1 - May 29, 2015	85,291	53.43	85,291	9,837,309
June 1 - June 26, 2015	87,309	51.16	87,309	9,750,000
Total	250,000	52.93	250,000	

(a) The anti-dilutive common stock repurchase program was announced in February 2015 and allows the Company to purchase up to 10 million shares over an unrestricted period of time.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. MINE SAFETY DISCLOSURES

None

ITEM 5. OTHER INFORMATION

On August 3, 2015, the Board of Directors of the Company approved the amendment and restatement of the Company’s existing bylaws (the “Bylaws”) in their entirety. The following is a brief description of the amendments made to the Bylaws.

- Electronic Consents and Transmission of Notices. The Bylaws were amended to provide for the electronic conduct of meetings and electronic receipt of consents, and for the electronic transmission of notices.
- Director Actions. The vote required by the Board of Directors to take certain specified actions was amended throughout the Bylaws from a majority of directors present at the meeting to a majority of the total number of authorized directors, disregarding the existence of vacancies on the Board of Directors.
- Conduct of Stockholder Meetings. The Bylaws were amended to (A) permit the Board to appoint a presiding officer with respect to a stockholder meeting only if no other designated officer is present, (B) provide specifically for the role and duties of an inspector of election, and (C) include a non-exclusive list of the types of rules and procedures with respect to the holding and conduct of a stockholders meeting which may be adopted by the Board of Directors or the chairman of such meeting.
- Adjournment of Stockholder Meetings. The Bylaws were clarified to state that (A) adjournments of stockholder meetings may be taken regardless of whether a quorum is present, and (B) quorum is not broken by the subsequent withdrawal of a stockholder and a meeting may continue after such withdrawal even if less than a quorum remains.
- Special Meetings of Stockholders; Stockholder Proposals. The Bylaws include provisions permitting stockholders holding at least 15% of the shares of Company stock entitled to vote to call a special meeting, and requiring stockholders to provide advance notice of director proposals in connection with a stockholder meeting. These provisions were amended to update the information that is required to be provided by stockholders about the nature of any such proposal and relationships between the submitting stockholder and such proposal, as well to require information regarding the purpose of the requested special meeting. The Bylaws were also amended to clarify generally the procedures to be followed in connection with such meetings.
- Qualifications of Directors. The Bylaws include provisions requiring stockholders to provide advance notice of director nominations by a stockholder at a stockholder meeting. The Bylaws were amended to add specific eligibility requirements for such nominations by stockholders as well as to update the information and documentation that must be provided by nominating stockholders.
- Indemnification. The Bylaws were amended to clarify the terms for providing indemnification and the Company’s obligation to advance expenses to certain indemnified persons, and to provide for a dispute resolution mechanism.

- Bylaw Amendments. The Bylaws were amended to require that specific notice of proposed bylaw amendments be provided in connection with the proposed amendment of the Bylaws in the future by the Board of Directors or the stockholders.
- Broker Non-Votes. The Bylaws were amended to clarify that broker non-votes are not to be counted as votes cast at a stockholder meeting.
- Record Dates. The Bylaws were amended to include a provision governing the fixing in advance by the Board of Directors of record dates.
- Certificates and Fractional Shares. The Bylaws amended to clarify that the Company may require a bond in connection with the issuance of a new certificate in the event of alleged loss, theft or destruction of a certificate or the issuance of uncertificated shares in replacement thereof, and may issue fractional shares.
- Other Miscellaneous Changes. The amended Bylaws include certain changes and additions designed to clarify the Bylaws and make them consistent with the amendments made thereto as well as current Delaware law and good governance practices, and to provide additional general provisions and definitions for completeness.

The foregoing description of the amendment and restatement of the Bylaws is qualified in its entirety by reference to the text of the amended and restated Bylaws, which are filed herewith as Exhibit 3.2 and incorporated herein by reference.

ITEM 6. EXHIBITS

Exhibit Number	Exhibit Description
3.1	Restated Certificate of Incorporation of American Water Works Company, Inc. (incorporated by reference to Exhibit 3.1 to the Company's Quarterly Report on Form 10-Q, File No. 001-34028, filed November 6, 2008).
*3.2	Amended and Restated Bylaws of American Water Works Company, Inc.
*10.1	Form of American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan 2015 Stock Unit Grant for Non-Employee Directors.
10.2	Amended and Restated Credit Agreement, dated as of June 30, 2015, by and among American Water Works Company, Inc., American Water Capital Corp., each of the Lenders party thereto, Wells Fargo Bank, National Association, as administrative agent, JPMorgan Chase Bank, N.A., as syndication agent, and Mizuho Bank, Ltd. and PNC Bank, National Association, as co-documentation agents (incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K, File No. 001-34028, filed July 7, 2015).
*10.3	Severance Agreement and General Release, dated January 6, 2015, by and between American Water Works Company, Inc. and Kellye L. Walker.
*10.4	Letter, dated February 17, 2015, by and between American Water Works Company, Inc. and Michael A. Sgro.
*10.5	Letter, dated December 12, 2014, by and between American Water Works Company, Inc. and Brenda J. Holdnak, Ph.D.

AMENDED AND RESTATED
BYLAWS OF

AMERICAN WATER WORKS COMPANY, INC.
a Delaware corporation

As adopted on and with effect from August 3, 2015

ARTICLE I

Offices

SECTION 1. Registered Office. The registered office of American Water Works Company, Inc. (the "Corporation") in the State of Delaware shall be located in the City of Wilmington.

SECTION 2. Principal Office. The principal office for the transaction of the business of the Corporation shall be at such place as the Board of Directors of the Corporation (the "Board of Directors" or the "Board") may determine. The Board is hereby granted full power and authority to change said principal office from one location to another.

SECTION 3. Other Offices. The Corporation may also have and maintain offices in such other places, within or without the State of Delaware, as the Board may, from time to time, determine or as the business of the Corporation may require.

ARTICLE II

Meetings of Stockholders

SECTION 1. Annual Meetings. The annual meeting of the stockholders for the election of directors and for such other business as may properly come before the meeting in accordance with all applicable requirements of these Bylaws and the General Corporation Law of the State of Delaware, as amended from time to time ("DGCL"), shall be held at such place (within or without the State of Delaware), date (which date shall not be a legal holiday in the place where the meeting is to be held) and hour as shall be designated by resolution of the Board adopted by a majority of the total number of authorized directors (whether or not there exist any vacancies in previously authorized directorships at the time such resolution is presented to the Board for adoption). The Board may, in its sole discretion, determine that the meeting shall not be held at any place, but may instead be held solely by means of remote communication as provided under the DGCL.

SECTION 2. Notice of Meetings. Each stockholder of record of each class of stock of the Corporation then outstanding and entitled to vote at any meeting of stockholders shall be given written notice of such meeting, which notice shall state the place, date and hour of the meeting, and, in the case of a special meeting, the purpose or purposes for which the meeting is called. Except as otherwise expressly required by law, notice of each meeting of stockholders shall be given not less than ten (10) nor more than sixty (60) days before the date of such meeting to each stockholder entitled to vote at such meeting. An affidavit of the Secretary or an

Assistant Secretary of the Corporation or of the transfer agent or other agent of the Corporation that the notice has been given shall, in the absence of fraud, be prima facie evidence of the facts stated therein. Notice given by electronic transmission shall only be valid if it complies with Section 232 of the DGCL.

SECTION 3. Notice of Business to be Brought Before a Meeting.

(a) At an annual meeting of the stockholders, only such business shall be conducted as shall have been properly brought before the meeting. To be properly brought before an annual meeting, such business must be (i) specified in a notice of meeting given by or at the direction of the Board of Directors, (ii) if not specified in a notice of meeting (or any supplement thereto), otherwise brought before the meeting by the Board of Directors or the Chairman of the Board of Directors, or (iii) otherwise properly brought before the meeting by a stockholder present in person who (A) was a beneficial owner of shares of the Corporation both at the time of giving the notice provided for in this Section 3 and at the time of the meeting, (B) is entitled to vote at the meeting, and (C) has complied with this Section 3 in all applicable respects. For the avoidance of doubt, except for proposals properly made in accordance with Rule 14a-8 (and interpretations thereunder) promulgated under the Securities Exchange Act of 1934, as amended, and the rules and regulations thereunder (the "Exchange Act")), and included in the notice of meeting given by or at the direction of the Board of Directors, clause (iii) above shall be the exclusive means for a stockholder to bring business before an annual meeting of stockholders. For purposes of this Section 3, "present in person" shall mean that the stockholder proposing that the business be brought before the annual meeting of the Corporation, or, if the proposing stockholder is not an individual, a qualified representative of such proposing stockholder, appear at such annual meeting. For purposes of these Bylaws, a "qualified representative" of a stockholder shall be, (i) a if such stockholder is a general or limited partnership, any general partner or person who functions as a general partner of the general or limited partnership or who controls the general or limited partnership, (ii) if such stockholder is a corporation or a limited liability company, any officer or person who functions as an officer of the corporation or limited liability company or any officer, director, general partner or person who functions as an officer, director or general partner of any entity ultimately in control of the corporation or limited liability company or (iii) if such stockholder is a trust, any trustee of such trust. Stockholders seeking to nominate persons for election to the Board of Directors must comply with Section 4 and Section 5, and this Section 3 shall not be applicable to such nominations except as expressly provided in Section 4 and Section 5.

(b) Without qualification, for business to be properly brought before an annual meeting by a stockholder, the stockholder must (i) provide a Timely Notice (as defined below) thereof in writing and in proper form to the Secretary of the Corporation, and (ii) provide any updates or supplements to such notice at the times and in the forms required by this Section 3. To be timely, a stockholder's notice must be delivered to, or mailed to and received at, the principal executive offices of the Corporation not less than ninety (90) days nor more than one hundred twenty (120) days prior to the one-year anniversary of the preceding year's annual meeting; *provided, however*, that if the date of the annual meeting is more than thirty (30) days before or more than sixty (60) days after such anniversary date, notice by the stockholder to be timely must be so delivered, or mailed and received, not later than the ninetieth (90th) day prior to such annual meeting or, if later, the tenth (10th) day following the day on which public disclosure of the date of such annual meeting was first made (a notice satisfying the time period requirements of this Section 3(b) is referred to as a "Timely Notice"). In no event shall any adjournment or postponement of an annual meeting or the announcement thereof commence a new time period for the giving of Timely Notice as described above.

(c) To be in proper form for purposes of this Section 3, a stockholder's notice to the Secretary shall set forth:

(i) As to each Proposing Person (as defined below), (A) the name and address of such Proposing Person (including, if applicable, the name and address that appear on the Corporation's books and records); (B) the class or series and number of shares of the Corporation that are, directly or indirectly, owned of record or beneficially owned (within the meaning of Rule 13d-3 under the Exchange Act) by such Proposing Person, except that such Proposing Person shall in all events be deemed to beneficially own any shares of any class or series of the Corporation as to which such Proposing Person has a right to acquire beneficial ownership at any time in the future; (C) a representation that the stockholder intends to appear in person or by qualified representative at the meeting to propose the business described in the Timely Notice; and (D) a representation as to whether the stockholder intends or is part of a group which intends (x) to deliver a proxy statement and/or form of proxy to holders of at least the percentage of the Corporation's outstanding capital stock required to approve the proposed business described in the Timely Notice and/or (y) otherwise to solicit proxies from stockholders in support of such proposed business (the disclosures to be made pursuant to the foregoing clauses (A), (B), (C) and (D) are referred to as "Stockholder Information");

(ii) As to each Proposing Person, (A) the full notional amount of any securities that, directly or indirectly, underlie any "derivative security" (as such term is defined in Rule 16a-1(c) under the Exchange Act) that constitutes a "call equivalent position" (as such term is defined in Rule 16a-1(b) under the Exchange Act) (a "Synthetic Equity Position") and that is, directly or indirectly, held or maintained by such Proposing Person with respect to any shares of any class or series of shares of the Corporation; *provided that*, for the purposes of the definition of "Synthetic Equity Position," the term "derivative security" shall also include any security or instrument that would not otherwise constitute a "derivative security" (as such term is defined in Rule 16a-1(c) under the Exchange Act) as a result of any feature that would make any conversion, exercise or similar right or privilege of such security or instrument becoming determinable only at some future date or upon the happening of a future occurrence, in which case the determination of the amount of securities into which such security or instrument would be convertible or exercisable shall be made assuming that such security or instrument is immediately convertible or exercisable at the time of such determination; and, *provided*, *further*, that any Proposing Person satisfying the requirements of Rule 13d-1(b)(1) under the Exchange Act (other than a Proposing Person that so satisfies Rule 13d-1(b)(1) under the Exchange Act solely by reason of Rule 13d-1(b)(1)(ii)(E)) shall not be deemed to hold or maintain the notional amount of any securities that underlie a Synthetic Equity Position held by such Proposing Person as a hedge with respect to a *bona fide* derivatives trade or position of such Proposing Person arising in the ordinary course of such Proposing Person's business as a derivatives dealer, (B) any rights to dividends on the shares of any class or series of shares of the Corporation owned beneficially by such Proposing Person that are separated or separable from the underlying shares of the Corporation, (C) any material pending or threatened legal proceeding in which such Proposing Person is a party or material participant involving the Corporation or any of its officers or directors, or any affiliate of the Corporation, (D) any other material relationship between such Proposing Person, on the one hand, and the Corporation, any affiliate of the Corporation or any significant competitor of the Corporation, on the other hand, (E) any direct or indirect material interest in any material contract or agreement of such Proposing Person with the Corporation, any affiliate of the Corporation or any significant competitor of the Corporation (including, in any such case, any employment agreement, collective bargaining agreement or consulting agreement) and (F) any other information relating to such Proposing Person that would be required to be disclosed in a proxy statement or other filing required to be made in connection with solicitations of proxies or consents by such Proposing Person in support of the business proposed to be brought before the meeting pursuant to Section 14(a) of the Exchange Act (the disclosures to be made pursuant to the foregoing clauses (A) through (F) are referred to as "Disclosable Interests"); *provided*, *however*, that Disclosable Interests shall not include any such disclosures with respect to the ordinary course business activities of any broker, dealer, commercial bank, trust company or other nominee who is a Proposing Person solely as a result of being the stockholder directed to prepare and submit the notice required by these Bylaws on behalf of a beneficial owner; and

(iii) As to each item of business that the stockholder proposes to bring before the annual meeting, (A) a brief description of the business desired to be brought before the annual meeting, the reasons for conducting such business at the annual meeting and any material interest in such business of each Proposing Person, (B) the text of the proposed business (including the text of any resolutions proposed for consideration), and (C) a reasonably detailed description of all agreements, arrangements and understandings (x) between or among any of the Proposing Persons or (y) between or among any Proposing Person and any other person or entity (including their names) in connection with the proposal of such business by such stockholder, including without limitation any agreements that would be required to be disclosed pursuant to Item 5 or Item 6 of a Schedule 13D that would be filed pursuant to the Exchange Act (regardless of whether the requirement to file a Schedule 13D is applicable to the Proposing Person or other person or entity); and (D) any other information relating to such item of business that would be required to be disclosed in a proxy statement or other filing required to be made in connection with solicitations of proxies in support of the business proposed to be brought before the meeting pursuant to Section 14(a) of the Exchange Act; *provided*, *however*, that the disclosures required by this paragraph (iii) shall not include any disclosures with respect to any broker, dealer, commercial bank, trust company or other nominee who is a Proposing Person solely as a result of being the stockholder directed to prepare and submit the notice required by these Bylaws on behalf of a beneficial owner.

For purposes of this Section 3, the term "Proposing Person" shall mean (i) the stockholder providing the notice of business proposed to be brought before an annual meeting, (ii) the beneficial owner or beneficial owners, if any, on whose behalf the notice of the business proposed to be brought before the annual meeting is made, (iii) any participant (as defined in paragraphs (a)(ii)-(vi) of Instruction 3 to Item 4 of Schedule 14A, or any successor instructions) with such stockholder or beneficial owner in such solicitation of proxies in respect of any such proposed business, (iv) any "affiliate" of such stockholder (for purposes of these Bylaws, such term shall have the definition provided for in Rule 12b-2 under the Exchange Act) or beneficial owner; and (v) any person controlling, controlled by or under common control with any person referred to in clauses (i) and (ii) above.

(d) A Proposing Person shall update and supplement its notice to the Corporation of its intent to propose business at an annual meeting, if necessary, so that the information provided or required to be provided in such notice pursuant to this Section 3 shall be true and correct (i) as of the record date for the determination of persons entitled to receive notice of the meeting and (ii) the date that is five (5) business days prior to the meeting and, in the event of any adjournment or postponement thereof, five (5) business days prior to such adjourned or postponed meeting. In the case of an update and supplement pursuant to clause (i) of this Section, such update and supplement shall be received by the Secretary at the principal executive offices of the Corporation not later than eight (8) business days after the record date for the determination of persons entitled to receive notice of the meeting. In the case of an update and supplement pursuant to clause (ii) above, such update and supplement shall be delivered to, or mailed and received by, the Secretary at the principal executive offices of the Corporation not later than two (2) business days prior to the date for the meeting, and, in the event of any adjournment or postponement thereof, two (2) business days prior to such adjourned or postponed meeting. For purposes of these Bylaws, the term "business day" shall mean any day that is not a Saturday or Sunday, a Federal or state legal holiday in the state of the Corporation's principal place of business, or a day on which banks in the city of the Corporation's principal place of business are required or permitted to close.

(e) Notwithstanding anything in these Bylaws to the contrary (other than the provisions of Section 3(g) hereof relating to any proposal made in accordance with Rule 14a-8 under the Exchange Act and included in the proxy statement), no business shall be conducted at an annual meeting that is not properly brought before the meeting in accordance with this Section 3. The presiding officer of the meeting shall, if the facts warrant, determine that the business was not properly brought before the meeting in accordance with this Section 3, and if he or she should so determine, he or she shall so declare to the meeting and any such business not properly brought before the meeting shall not be transacted. In addition, business proposed to be brought by a stockholder may not be brought before the annual meeting if such stockholder takes action contrary to the representations made in the stockholder notice applicable to such business or if the stockholder notice applicable to such business contains an untrue statement of a material fact or omits to state a material fact necessary to make the statements therein not misleading.

(f) Notwithstanding any notice of the annual meeting sent to stockholders on behalf of the Corporation, a stockholder must comply with this Section 3 to conduct business at any annual meeting. If the stockholder's proposed business is the same or relates to business brought by the Corporation and included in its annual meeting notice, the stockholder is nevertheless required to comply and give its own separate and timely written notice to the Secretary pursuant to this Section 3.

(g) This Section 3 is expressly intended to apply to any business proposed to be brought before an annual meeting of stockholders other than any proposal made in accordance with Rule 14a-8 under the Exchange Act and included in the Corporation's proxy statement. In addition to the requirements of this Section 3 with respect to any business proposed to be brought before an annual meeting, each Proposing Person shall comply with all applicable requirements of the Exchange Act with respect to any such business. Nothing in this Section 3 shall be deemed to affect any rights of (1) a stockholder to request inclusion of proposals in the Corporation's proxy statement pursuant to Rule 14a-8 (or any successor provision) under the Exchange Act or (2) the Corporation to omit a proposal from the Corporation's proxy statement pursuant to Rule 14a-8 (or any successor provision) under the Exchange Act.

(h) For purposes of these Bylaws, "public disclosure" shall mean disclosure (i) in a press release issued through a national news or wire service, (ii) in a document publicly filed by the Corporation with the Securities and Exchange Commission (the "SEC") pursuant to Sections 13, 14 or 15(d) of the Exchange Act, or (iii) another method reasonably intended by the Corporation to achieve broad-based dissemination of the information contained therein.

SECTION 4. Notice of Nominations for Election to the Board of Directors.

(a) Nominations of any person for election to the Board of Directors at an annual meeting or at a special meeting (but only if the election of directors is a matter specified in the notice of meeting given by or at the direction of the person calling such special meeting) may be made at such meeting only (i) by or at the direction of the Board of Directors, including by any committee or persons authorized to do so by the Board of Directors or these Bylaws, or (ii) by a stockholder present in person (A) who was a beneficial owner of shares of the Corporation both at the time of giving the notice provided for in this Section 4 and at the time of the meeting, (B) is entitled to vote at the meeting, and (C) has complied with this Section 4 and Section 5 as to such notice and nomination. For purposes of this Section 4, "present in person" shall mean that the stockholder proposing that the business be brought before the meeting of the Corporation, or, if the proposing stockholder is not an individual, a qualified representative (as defined in Section 3(a) hereof) of such stockholder, appear at such meeting. The foregoing clause (ii) shall be the exclusive means for a stockholder to make any nomination of a person or persons for election to the Board of Directors at an annual meeting or special meeting.

(b) Without qualification, for a stockholder to make any nomination of a person or persons for election to the Board of Directors at an annual meeting, the stockholder must (A) provide Timely Notice (as defined in Section 3) thereof in writing and in proper form to the Secretary of the Corporation, (B) provide the information, agreements and questionnaires with respect to such stockholder and its candidate for nomination as required to be set forth by this Section 4 and Section 5 and (C) provide any updates or supplements to such notice at the times and in the forms required by this Section 4 and Section 5.

(c) Without qualification, if the election of directors is a matter specified in the notice of meeting given by or at the direction of the person calling a special meeting, then for a stockholder to make any nomination of a person or persons for election to the Board of Directors at a special meeting, the stockholder must (i) provide timely notice thereof in writing and in proper form to the Secretary of the Corporation at the principal executive offices of the

Corporation, (ii) provide the information with respect to such stockholder and its candidate for nomination as required by this Section 4 and Section 5 and (iii) provide any updates or supplements to such notice at the times and in the forms required by this Section 4. To be timely, a stockholder's notice for nominations to be made at a special meeting must be delivered to, or mailed and received at, the principal executive offices of the Corporation not earlier than the one hundred twentieth (120th) day prior to such special meeting and not later than the ninetieth (90th) day prior to such special meeting or, if later, the tenth (10th) day following the day on which public disclosure (as defined in Section 3(h)) of the date of such special meeting was first made.

(d) In no event shall any adjournment or postponement of an annual meeting or special meeting or the announcement thereof commence a new time period for the giving of a stockholder's notice as described above.

(e) Notwithstanding any provision of this Section 4 to the contrary, in the event that the number of directors to be elected to the Board of Directors at the next annual meeting of stockholders is increased by virtue of an increase in the size of the Board of Directors and either all of the nominees for director at the next annual meeting of stockholders or the size of the increased Board of Directors is not publicly announced or disclosed by the Corporation at least one hundred (100) days prior to the first anniversary of the preceding year's annual meeting, a stockholder notice shall also be considered timely hereunder, but only with respect to nominees to stand for election at the next annual meeting as the result of any new positions created by such increase, if it is delivered to the Secretary at the principal place of business of the Corporation not later than the close of business on the tenth (10th) day following the first day on which all such nominees or the size of the increased Board shall have been publicly announced or disclosed by the Corporation.

(f) To be in proper form for purposes of this Section 4, a stockholder's notice to the Secretary shall set forth:

(i) As to each Nominating Person (as defined below), the Stockholder Information (as defined in Section 3(c)(i), except that for purposes of this Section 4 the term "Nominating Person" shall be substituted for the term "Proposing Person" in all places it appears in Section 3(c)(i));

(ii) As to each Nominating Person, any Disclosable Interests (as defined in Section 3(c)(ii), except that for purposes of this Section 4 the term "Nominating Person" shall be substituted for the term "Proposing Person" in all places it appears in Section 3(c)(ii) and the disclosure with respect to the business to be brought before the meeting in Section 3(c) (ii) shall be made with respect to the election of directors at the meeting);

(iii) As to each candidate whom a Nominating Person proposes to nominate for election as a director, (A) all information with respect to such candidate for nomination that would be required to be set forth in a stockholder's notice pursuant to this Section 4 and Section 5 if such candidate for nomination were a Nominating Person, (B) all information relating to such candidate for nomination that is required to be disclosed in a proxy statement or other filings required to be made in connection with solicitations of proxies for election of directors in a contested election pursuant to Section 14(a) under the Exchange Act (including such candidate's written consent to being named in the proxy statement as a nominee and to serving as a director if elected), (C) a description of any direct or indirect material interest in any material contract or agreement between or among any Nominating Person, on the one hand, and each candidate for nomination or his or her respective affiliates or associates or any other participants in such solicitation, on the other hand, including, without limitation, all information that would be required to be disclosed pursuant to Item 404 under Regulation S-K if such Nominating Person were the "registrant" for purposes of such rule and the candidate for nomination were a director or executive officer of such registrant (the disclosures to be made pursuant to the foregoing clauses (A) through (C) are referred to as "Nominee Information"), and (D) a completed and signed questionnaire, representation and agreement as provided in Section 5(a).

For purposes of this Section 4, the term "Nominating Person" shall mean: (i) the stockholder providing the notice of the nomination proposed to be made at the meeting, (ii) the beneficial owner or beneficial owners, if different, on whose behalf the notice of the nomination proposed to be made at the meeting is made, (iii) any participant (as defined in paragraphs (a)(ii)-(vi) of Instruction 3 to Item 4 of Schedule 14A, or any successor instruction) with such stockholder or beneficial owner in any solicitation of proxies in respect of any such proposed nomination, (iv) any affiliate of such stockholder, and (v) any person controlling, controlled by or under common control with any person referred to in the preceding clauses (i) and (ii).

(g) A stockholder providing notice of any nomination proposed to be made at a meeting shall further update and supplement such notice, if necessary, so that the information provided or required to be provided in such notice pursuant to this Section 4 and Section 5 shall be true and correct (i) as of the record date for the determination of persons entitled to receive notice of the meeting and (ii) the date that is five (5) business days prior to the meeting and, in the event of any adjournment or postponement thereof, five (5) business days prior to such adjourned or postponed meeting. In the case of an update and supplement pursuant to clause (i) of this Section, such update and supplement shall be received by the Secretary at the principal executive offices of the Corporation not later than eight (8) business days after the record date for the determination of persons entitled to receive notice of the meeting. In the case of an update and supplement pursuant to clause (ii) above, such update and supplement shall be delivered to, or mailed and received by, the Secretary at the principal executive offices of the Corporation not later than two (2) business days prior to the date for the meeting, and, in the event of any adjournment or postponement thereof, two (2) business days prior to such adjourned or postponed meeting.

(h) In addition to the requirements of this Section 4 and Section 5 with respect to any nomination proposed to be made at a meeting, each Nominating Person shall comply with all applicable requirements of the Exchange Act and the DGCL with respect to any such nominations.

(i) Notwithstanding any notice of the annual meeting sent to stockholders on behalf of the Corporation, a stockholder must comply with this Section 4 and Section 5 to propose director nominations at any annual meeting.

SECTION 5. Additional Requirements for Valid Nomination of Candidates to Serve as Director and, if Elected, to be Seated as Directors.

(a) To be eligible to be a candidate for election as a director of the Corporation at an annual or special meeting, a candidate must be nominated in the manner prescribed in Section 4 and, in addition to any other requirements of these Bylaws:

(i) the candidate for nomination, whether nominated by the Board of Directors or by a stockholder, must have previously delivered (in accordance with the time period prescribed for delivery in a notice to such candidate given by or on behalf of the Board of Directors) to the Secretary at the principal executive offices of the Corporation: (A) a completed written questionnaire (in a form provided by the Corporation upon written request) with respect to the background, qualifications, stock ownership and independence of such proposed nominee, and (B) a written representation and agreement (in form provided by the Corporation upon written request) that such candidate for nomination (1) is not and, if elected as a director during his or her term of office, will not become a party to (x) any agreement, arrangement or understanding with, and has not given and will not give any commitment or assurance to, any person or entity as to how such proposed nominee, if elected as a director of the Corporation, will act or vote on any issue or question (a "Voting Commitment") that has not been disclosed therein to the Corporation, or (y) any Voting Commitment that could limit or interfere with such proposed nominee's ability to comply, if elected as a director of the Corporation, with such proposed nominee's fiduciary duties under applicable law, (2) is not and will not become a party to any agreement, arrangement or understanding with any person or entity other than the Corporation with respect to any direct or indirect compensation, reimbursement or indemnification in connection with service or action as a director that has not been disclosed therein; and (3) would be in compliance, if elected as a director of the corporation, and will comply with all applicable corporate governance, code of conduct, conflict of interest, confidentiality, stock ownership and trading and other policies and guidelines of the Corporation applicable to directors and in effect during such person's term in office as a director (and, if requested in writing by any candidate for nomination, the Secretary of the Corporation shall provide to such candidate for nomination all such policies and guidelines then in effect);

(ii) the candidate for nomination, whether nominated by the Board of Directors or by a stockholder: (A) shall not be a member of the board of directors of more than two (2) other public companies, and (B) shall not have been (1) convicted in a criminal proceeding, or the named subject in a criminal proceeding that is presently pending (other than traffic violations and other minor offenses), (2) the subject of any order, judgment or decree, not subsequently reversed, suspended or vacated, of any federal or state court or other authority, or any professional disciplinary body, which enjoined or otherwise limited him or her from engaging in any activity in connection with the purchase or sale of any security or commodity, or the right to be associated with persons engaged in any such activities, or finding that he or she had violated any federal or state securities laws or federal commodities laws, (3) the subject of any sanction or order, not subsequently reversed, suspended or vacated, of any self-regulatory organization, any registered entity, or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member, (4) suspended or barred from (x) being associated as an officer or director of, or a person serving in a similar capacity with, an issuer, (y) being associated with a public accounting firm, or (z) appearing or practicing as an attorney before the SEC or any similar non-U.S. authority; or (5) engaged, and is not currently engaged, in any conduct for which disclosure thereof by the Corporation would be required pursuant to Regulation S-K assuming the candidate had already been elected as a member of the Board; and

(iii) at the request of the Board of Directors, such other information as may reasonably be required by the Corporation to determine the eligibility of such proposed candidate for nomination to serve as an independent director or audit committee financial expert of the Corporation under applicable law, securities exchange rule or regulation, or any publicly-disclosed corporate governance guideline or committee charter of the Corporation.

(b) No candidate shall be eligible for nomination as a director of the Corporation unless such candidate for nomination and the Nominating Person seeking to place such candidate’s name in nomination has complied with Section 4 and this Section 5, as applicable. The presiding officer at the meeting shall, if the facts warrant, determine that a nomination was not properly made in accordance with Section 4 and this Section 5, and if he or she should so determine, he or she shall so declare such determination to the meeting, the defective nomination shall be disregarded and any ballots cast for the candidate in question (but in the case of any form of ballot listing other qualified nominees, only the ballots cast for the nominee in question) shall be void and of no force or effect.

(c) Notwithstanding anything in these Bylaws to the contrary, no candidate for nomination shall be eligible to be seated as a director of the Corporation unless the candidate is qualified, nominated and elected in accordance with this Section 5 and Article III, Section 4.

SECTION 6. Special Meetings.

(a) Special meetings of the stockholders of the Corporation may only be called (i) at any time and for any purpose or purposes, by the Board pursuant to a resolution adopted by a majority of the total number of authorized directors (whether or not there exist any vacancies in previously authorized directorships at the time any such resolution is presented to the Board for adoption), or by the Chairman of the Board, or (ii) by the Secretary of the Corporation, upon the written request of the holders of record as of the record date fixed in accordance with Section 6(d) who hold, in the aggregate, at least fifteen percent (15%) of the voting power of the outstanding shares of the Corporation (the “Requisite Percentage”) at the time such request is submitted by the holders of such Requisite Percentage, subject to and in accordance with this Section 6. The notice of a special meeting shall state the purpose or purposes of the special meeting, and the business to be conducted at the special meeting shall be limited to the purpose or purposes stated in the notice. Except in accordance with this Section 6, stockholders shall not be permitted to propose business to be brought before a special meeting of the stockholders. Stockholders who nominate persons for election to the Board of Directors at a special meeting must also comply with the requirements set forth in Section 4 and Section 5.

(b) No stockholder may request that the Secretary of the Corporation call a special meeting of the stockholders pursuant to Section 6(a) (a "Stockholder Requested Special Meeting") unless a stockholder of record has first submitted a request in writing that the Board of Directors fix a record date (a "Request Record Date") for the purpose of determining the stockholders entitled to request that the Secretary of the Corporation call a Stockholder Requested Special Meeting, which request shall be in proper form and delivered to, or mailed and received by, the Secretary of the Corporation at the principal executive offices of the Corporation.

(c) To be in proper form for purposes of this Section 6, a request by a stockholder for the Board of Directors to fix a Request Record Date shall set forth:

(i) As to each Requesting Person (as defined below), (A) the Stockholder Information (as defined in Section 3(c)(i), except that for purposes of this Section 6 the term "Requesting Person" shall be substituted for the term "Proposing Person" in all places it appears in Section 3(c)(i)); and (B) a representation that such Requesting Person intends to hold the shares of the Corporation described in the Stockholder Information through the date of the Stockholder Requested Special Meeting;

(ii) As to each Requesting Person, any Disclosable Interests (as defined in Section 3(c)(ii), except that for purposes of this Section 6 the term "Requesting Person" shall be substituted for the term "Proposing Person" in all places it appears in Section 3(c)(ii) and the disclosure in clause (F) of Section 3(c)(ii) shall be made with respect to the business proposed to be conducted at the special meeting or the proposed election of directors at the special meeting, as the case may be);

(iii) As to the purpose or purposes of the Stockholder Requested Special Meeting, (A) a reasonably brief description of (1) the specific purpose or purposes of the Stockholder Requested Special Meeting, (2) the matter(s) proposed to be acted on at the Stockholder Requested Special Meeting, and (3) the reasons for conducting such business at the Stockholder Requested Special Meeting, (B) a reasonably detailed description of any material interest in such matter of each Requesting Person, and (C) a reasonably detailed description of all agreements, arrangements and understandings (x) between or among any of the Requesting Persons or (y) between or among any Requesting Person and any other person or entity (including their names) in connection with the request for the Stockholder Requested Special Meeting or the business proposed to be acted on at the Stockholder Requested Special Meeting; and

(iv) If directors are proposed to be elected at the Stockholder Requested Special Meeting, the Nominee Information for each person whom a Requesting Person expects to nominate for election as a director at the special meeting.

For purposes of this Section 6(c), the term "Requesting Person" shall mean (i) the stockholder making the request to fix a Request Record Date for the purpose of determining the stockholders entitled to request that the Secretary call a Stockholder Requested Special Meeting, and (ii) the beneficial owner or beneficial owners, if different, on whose behalf such request is made.

(d) Within ten (10) days after receipt of a request to fix a Request Record Date in proper form and otherwise in compliance with this Section 6 from any stockholder of record, the Board of Directors may adopt a resolution fixing a Request Record Date for the purpose of determining the stockholders entitled to request that the Secretary of the Corporation call a Stockholder Requested Special Meeting, which date shall not precede the date upon which the resolution fixing the Request Record Date is adopted by the Board of Directors. If no resolution fixing a Request Record Date has been adopted by the Board of Directors within the ten (10) day period after the date on which such a request to fix a Request Record Date was received, the Request Record Date in respect thereof shall be deemed to be the twentieth (20th) day after the date on which such a request is received. Notwithstanding anything in this Section 6 to the contrary, no Request Record Date shall be fixed if the Board of Directors determines that the written request or requests to call a Stockholder Requested Special Meeting (each, a "Special Meeting Request" and collectively, the "Special Meeting Requests"), that would otherwise be submitted following such Request Record Date could not comply with the requirements set forth in Section 6(g).

(e) In order for a Stockholder Requested Special Meeting to be called, one or more Special Meeting Requests, in the form required by this Section 6, must be signed by stockholders as who, as of the Request Record Date, hold of record or beneficially, in the aggregate, more than the Requisite Percentage and must be timely delivered to the Secretary of the Corporation at the principal executive offices of the Corporation. To be timely, a Special Meeting Request must be delivered to the principal executive offices of the Corporation not later than the sixtieth (60th) day following the Request Record Date. In determining whether a Stockholder Requested Special Meeting has been properly requested, multiple Special Meeting Requests delivered to the Secretary will be considered together only if (i) each Special Meeting Request identifies the same purpose or purposes of the Stockholder Requested Special Meeting and the same matters proposed to be acted on at such meeting (in each case as determined in good faith by the Board), and (ii) such Special Meeting Requests have been dated and delivered to the Secretary within sixty (60) days of the earliest dated Special Meeting Request.

(f) To be in proper form for purposes of this Section 6, a Special Meeting Request must include and set forth (a) a reasonably brief statement of (i) the specific purpose or purposes of the stockholder requested special meeting, (ii) the matter(s) proposed to be acted on at the Stockholder Requested Special Meeting, and (iii) the reasons for conducting such business at the Stockholder Requested Special Meeting, and (b) the text of the proposed business (including the text of any resolutions proposed for consideration), if applicable, and (c) with respect to any stockholder or stockholders submitting a Special Meeting Request (except for any stockholder that has provided such request in response to a solicitation made pursuant to, and in accordance with, Section 14(a) of the Exchange Act by way of a solicitation statement filed on Schedule 14A) (a "Solicited Stockholder") the information required to be provided pursuant to this Section 6 of a Requesting Person. A stockholder may revoke a Special Meeting Request by written revocation delivered to the Secretary at any time prior to the Stockholder Requested Special Meeting. If any such revocation(s) are received by the Secretary after the Secretary's receipt of Special Meeting Requests from the Requisite Percentage of stockholders, and as a result of such revocation(s) there no longer are unrevoked demands from the Requisite Percentage of stockholders to call a Stockholder Requested Special Meeting, the Board of

Directors shall have the discretion to determine whether or not to proceed with the Stockholder Requested Special Meeting.

(g) The Secretary shall not accept, and shall consider ineffective, a Special Meeting Request if (i) such Special Meeting Request does not comply with this Section 6 or relates to an item of business to be transacted at the Stockholder Requested Special Meeting that is not a proper subject for stockholder action under applicable law; (ii) the Special Meeting Request is received by the Corporation during the period commencing ninety (90) days prior to the first anniversary of the date of the immediately preceding annual meeting of stockholders and ending on the date of the final adjournment of the next annual meeting of stockholders; (iii) an identical or substantially similar item (a "Similar Item") to that included in the Special Meeting Request was presented at any meeting of stockholders held within one year prior to receipt by the Corporation of such Special Meeting Request (it being understood that the election of directors at the preceding annual meeting of stockholders shall be deemed not to constitute a Similar Item in respect of a proposal to remove one or more directors or the entire Board at a Stockholder Requested Special Meeting); (iv) the Board calls an annual or special meeting of stockholders (in lieu of calling the Stockholder Requested Special Meeting) in accordance with Section 6(i); (v) a Similar Item is already included in the Corporation's notice as an item of business to be brought before a meeting of stockholders that has been called but not yet held; or (vi) such Special Meeting Request was made in a manner that involved a violation of Regulation 14A under the Exchange Act or other applicable law.

(h) Business transacted at any Stockholder Requested Special Meeting shall be limited to the purpose stated in the valid Special Meeting Request; provided, however, that nothing herein shall prohibit the Board from submitting matters to the stockholders at any Stockholder Requested Special Meeting. If none of the stockholders who submitted and signed the Special Meeting Request (but excluding any Solicited Stockholder) appears at or sends a qualified representative to the Stockholder Requested Special Meeting to present the matters to be presented for consideration that were specified in the Stockholder Meeting Request, the Corporation need not present such matters for a vote at such meeting.

(i) Any special meeting of stockholders, including any Stockholder Requested Special Meeting, shall be held at such date and time as may be fixed by the Board in accordance with these Bylaws and in compliance with applicable law; provided that a Stockholder Requested Special Meeting shall be held within ninety (90) days after the Corporation receives one or more valid Special Meeting Requests in compliance with this Section 6 from stockholders having beneficial ownership of at least the Requisite Percentage; provided, further, that the Board shall have the discretion to call an annual or special meeting of stockholders (in lieu of calling the Stockholder Requested Special Meeting) in accordance with Section 6(j) or cancel any Stockholder Requested Special Meeting that has been called but not yet held for any of the reasons set forth in the foregoing provisions of this Section 6.

(j) If a Special Meeting Request is made that complies with this Section 6, the Board may (in lieu of calling the Stockholder Requested Special Meeting) present a Similar Item for stockholder approval at any other meeting of stockholders that is held within ninety (90) days after the Corporation receives such Special Meeting Request.

(k) In connection with a Stockholder Requested Special Meeting called in accordance with this Section 6, the stockholder or stockholders (except for any Solicited Stockholder) who requested that the Board of Directors fix a record date for notice and voting for the special meeting in accordance with this Section 6 or who signed and delivered a Special Meeting Request to the Secretary shall further update and supplement the information previously provided to the Corporation in connection with such requests, if necessary, so that the information provided or required to be provided in such requests pursuant to this Section 6 shall be true and correct (i) as of the record date for the determination of persons entitled to receive notice of the special meeting and (ii) the date that is five (5) business days prior to the special meeting and, in the event of any adjournment or postponement thereof, five (5) business days prior to such adjourned or postponed special meeting. In the case of an update and supplement pursuant to clause (i) of this Section, such update and supplement shall be received by the Secretary at the principal executive offices of the Corporation not later than eight (8) business days after the record date for the determination of persons entitled to receive notice of the special meeting. In the case of an update and supplement pursuant to clause (ii) above, such update and supplement shall be delivered to, or mailed and received by, the Secretary at the principal executive offices of the Corporation not later than two (2) business days prior to the date for the special meeting, and, in the event of any adjournment or postponement thereof, two (2) business days prior to such adjourned or postponed special meeting.

(l) Notwithstanding anything in these Bylaws to the contrary, the Secretary shall not be required to call a Stockholder Requested Special Meeting pursuant to this Section 6 except in accordance with this Section 6. If the Board of Directors shall determine that any request to fix a record date for notice and voting for the special meeting or Special Meeting Request was not properly made in accordance with this Section 6, or shall determine that the stockholder or stockholders requesting that the Board of Directors fix such record date or submitting a Special Meeting Request have not otherwise complied with this Section 6, then the Board of Directors shall not be required to fix such record date or to call and hold the Stockholder Requested Special Meeting. In addition to the requirements of this Section 6, each Requesting Person shall comply with all requirements of applicable law, including all requirements of the Exchange Act, with respect to (i) any request to fix a record date for notice and voting for the Stockholder Requested Special Meeting, (ii) any Special Meeting Request or (iii) a Stockholder Requested Special Meeting.

(m) After receipt of Special Meeting Requests in proper form and in accordance with this Section 6 from a stockholder or stockholders holding the Requisite Percentage, the Board of Directors shall duly call, and determine the place, date and time of, a Stockholder Requested Special Meeting for the purpose or purposes and to conduct the business specified in the Special Meeting Requests received by the Corporation; provided that the Stockholder Requested Special Meeting shall be held within ninety (90) days after the Corporation receives one or more valid Special Meeting Requests in compliance with this Section 6 from stockholders holding at least the Requisite Percentage; provided, further, that the Board shall have the discretion to call an annual or special meeting of stockholders (in lieu of calling the Stockholder Requested Special Meeting) in accordance with Section 6(g) or cancel any Stockholder Requested Special Meeting that has been called but not yet held for any of the reasons set forth in the foregoing provisions of this Section 6. The record date for notice and voting for such a Stockholder Requested Special Meeting shall be fixed in accordance with

Article XI, Section 6 of these Bylaws. The Board of Directors shall provide written notice of such Stockholder Requested Special Meeting in accordance with Article II, Section 2 of these Bylaws.

SECTION 7. Quorum. Except as otherwise expressly required by law, by the Corporation's Restated Certificate of Incorporation or these Bylaws, the presence, in person, by remote communication, if applicable, or by proxy duly authorized, of the holders of a majority of the outstanding shares of stock entitled to vote shall constitute a quorum for the transaction of business at any meeting of the stockholders of the Corporation or any adjournment thereof. The stockholders present at a duly called or convened meeting at which a quorum is present, may continue to transact business until adjournment, notwithstanding the withdrawal of enough stockholders to leave less than a quorum. In the absence of a quorum at any such meeting or any adjournment or adjournments thereof, a majority in voting interest of those present in person or by proxy and entitled to vote thereat, or any officer entitled to preside at, or to act as secretary of, such meeting may adjourn such meeting until stockholders holding the amount of stock requisite for a quorum are present in person or by proxy.

SECTION 8. Adjourned Meeting; Notice. After the meeting has been duly called to order, the presiding officer of the meeting may adjourn any meeting of stockholders, annual or special, from time to time, to reconvene at the same or some other place, and notice need not be given of any such adjourned meeting if the time and place thereof are announced at the meeting at which the adjournment is taken. When a meeting is adjourned to another time or place, unless these Bylaws otherwise require, notice need not be given of the adjourned meeting if the time, place, if any, thereof, and the means of remote communications, if any, by which stockholders and proxy holders may be deemed to be present in person and vote at such adjourned meeting are announced at the meeting at which the adjournment is taken. At the adjourned meeting, the Corporation may transact any business which might have been transacted at the original meeting. If the adjournment is for more than thirty (30) days, a notice of the adjourned meeting shall be given to each stockholder of record entitled to vote at the meeting. If after the adjournment a new record date for stockholders entitled to vote is fixed for the adjourned meeting, the Board of Directors shall fix a new record date for notice of such adjourned meeting in accordance with Section 213(a) of the DGCL and Article XI, Section 7 of these Bylaws, and shall give notice of the adjourned meeting to each stockholder of record entitled to vote at such adjourned meeting as of the record date fixed for notice of such adjourned meeting.

SECTION 9. Conduct of Meetings.

(a) Officers of the Meeting. The Chairman of the Board, or in the absence of the Chairman, the President, or in their absence, the Vice Chairman, or if no such officer is present, a director designated by the Board, shall call meetings of the stockholders to order and shall act as chairman of the meeting. The Secretary, or in the absence of the Secretary, an Assistant Secretary, shall act as secretary of the meeting of the stockholders, but in the absence of the Secretary and Assistant Secretary at a meeting of the stockholders the chairman of the meeting may appoint any person to act as secretary of the meeting.

(b) Order of Business. The chairman of the meeting shall have the right to determine the order of business at the meeting.

(c) Meeting Protocol. To the maximum extent permitted by applicable law, the Board shall be entitled to adopt, or in absence of the Board doing so, the chairman of the meeting shall be entitled to prescribe, such rules or regulations for the conduct of meetings of stockholders as it, he or she shall deem necessary, appropriate or convenient. Such rules, regulations and procedures, whether adopted by the Board or prescribed by the chairman of the meeting, may include, without limitation, the following: (i) establishing an agenda for the meeting and the order for the consideration of the items of business on such agenda; (ii) restricting admission to the time set for the commencement of the meeting; (iii) limiting attendance at the meeting to stockholders of record of the Corporation entitled to vote at the meeting, their duly authorized proxies or other such persons as the chairman of the meeting may determine; (iv) limiting participation at the meeting on any matter to stockholders of record of the Corporation entitled to vote on such matter, their duly authorized proxies or other such persons as the chairman of the meeting may determine to recognize and, as a condition to recognizing any such participant, requiring such participant to provide the chairman of the meeting with evidence of his or her name and affiliation, whether he or she is a stockholder or a proxy for a stockholder, and the class and series and number of shares of each class and series of capital stock of the Corporation which are owned beneficially and/or of record by such stockholder; (v) limiting the time allotted to questions or comments by participants; (vi) taking such actions as are necessary or appropriate to maintain order, decorum, safety and security at the meeting; (vii) removing any stockholder who refuses to comply with meeting procedures, rules or guidelines as established by the chairman of the meeting; (viii) complying with any state and local laws and regulations concerning safety and security; and (ix) taking such other action deemed necessary, appropriate or convenient, in the sole discretion of the chairman of the meeting, for the proper conduct of the meeting. Unless otherwise determined by the chairman of the meeting, meetings of stockholders shall not be required to be held in accordance with the rules of parliamentary procedure.

SECTION 10. Inspectors. The Board may, in advance of any meeting of stockholders, appoint one or more inspectors to act at such meeting or any adjournment thereof. If any of the inspectors so appointed shall fail to appear or act, the chairman of the meeting may, or if inspectors shall not have been appointed, the chairman of the meeting shall, appoint one or more inspectors. Each inspector, before entering upon the discharge of his duties, shall take and sign an oath faithfully to execute the duties of inspector at such meeting with strict impartiality and according to the best of his ability. The inspectors shall (i) ascertain the number of shares of capital stock of the Corporation outstanding and the voting power of each, (ii) ascertain the number of shares represented at the meeting, (iii) ascertain the existence of a quorum, (iv) ascertain the validity and effect of proxies, (v) count and tabulate all votes, ballots or consents, (vi) determine and retain for a reasonable period a record of the disposition of all challenges made to any determination made by the inspectors, (vii) certify the determination of the number of shares represented at the meeting and their count of all votes and ballots, and (viii) do such acts as are proper to conduct the election or vote with fairness to all stockholders. On request of the chairman of the meeting, the inspectors shall make a report in writing of any challenge, request or matter determined by them and shall execute a certificate of any fact found by them. No director or candidate for the office of director shall act as an inspector of an election of directors. The inspectors may appoint or retain other persons or entities to assist the inspectors in the performance of the duties of the inspectors. In determining the validity and counting of all proxies and ballots, the inspectors shall act in accordance with applicable law.

SECTION 11. Voting. Unless otherwise provided in the Restated Certificate of Incorporation, each stockholder shall be entitled to one vote for each share of capital stock held by such stockholder. All voting, including on the election of directors but excepting where otherwise required by applicable law or the Restated Certificate of Incorporation, may take place via a voice vote. The Board of Directors, in its discretion, or the officer of the Corporation presiding at a meeting of stockholders, in his or her discretion, may require that any votes cast at a meeting of stockholders shall be cast by written ballot. When a quorum is present, except as otherwise provided by statute, by applicable stock exchange rules, by the Restated Certificate of Incorporation or these Bylaws, in all matters other than the election of directors, the affirmative vote of the majority of shares present in person, by remote communication, if applicable, or represented by proxy at the meeting and entitled to vote generally on the subject matter shall be the act of the stockholders. For the purposes of this Section 11, Broker Non-Votes represented at the meeting but not permitted to vote on a particular matter shall not be counted, with respect to the vote on such matter, in the number of (a) votes cast, (b) votes cast affirmatively, or (c) votes cast negatively.

SECTION 12. Proxies. Each stockholder entitled to vote at a meeting of stockholders may authorize another person or persons to act for such stockholder by proxy authorized by an instrument in writing or by a transmission permitted by law filed in accordance with the procedure established for the meeting, but no such proxy shall be voted or acted upon after three (3) years from its date, unless the proxy provides for a longer period. The revocability of a proxy that states on its face that it is irrevocable shall be governed by the provisions of Section 212 of the DGCL. A written proxy may be in the form of a telegram, cablegram, or other means of electronic transmission which sets forth or is submitted with information from which it can be determined that the telegram, cablegram, or other means of electronic transmission was authorized by the person.

SECTION 13. Lists of Stockholders. The Secretary shall prepare and make, at least ten (10) days before every meeting of stockholders, a complete list of the stockholders entitled to vote at the meeting, provided, however, if the record date for determining the stockholders entitled to vote is less than ten (10) days before the meeting date, the list shall reflect the stockholders entitled to vote as of the tenth (10th) day before the meeting date. The stockholder list shall be arranged in alphabetical order and show the address of each stockholder and the number of shares registered in the name of each stockholder. The Corporation shall not be required to include electronic mail addresses or other electronic contact information on such list. Such list shall be open to the examination of any stockholder, for any purpose germane to the meeting for a period of at least ten (10) days prior to the meeting: (i) on a reasonably accessible electronic network, provided that the information required to gain access to such list is provided with the notice of the meeting, or (ii) during ordinary business hours, at the principal place of business of the Corporation. In the event that the Corporation determines to make the list available on an electronic network, the Corporation may take reasonable steps to ensure that such information is available only to stockholders of the Corporation. If the meeting is to be held at a physical location, then the list shall be produced and kept at the time and place of the meeting during the whole time thereof, and may be inspected by any stockholder who is present. If the meeting is to be held solely by means of remote communications, then the list shall be open to the examination of any stockholder during the whole time of the meeting on a reasonably accessible electronic network, and the information required to access such list shall be provided with the notice of the meeting. The stock ledger shall be the only evidence as to who are the stockholders entitled to examine the stock ledger, the list required by this Section 13 or the books of the Corporation, or to vote in person or by proxy at any meeting of stockholders.

SECTION 14. Postponement and Cancellation of Meetings. Any previously scheduled annual or special meeting of the stockholders may be postponed, and any previously scheduled annual or special meeting of the stockholders called by the Board may be canceled, by resolution of the Board upon public notice given prior to the time previously scheduled for such meeting of stockholders.

ARTICLE III

Board of Directors

SECTION 1. General Powers. The property, business and affairs of the Corporation shall be managed by or under the direction of the Board, which may exercise all such powers of the Corporation and do all such lawful acts and things as are not by law or by the Restated Certificate of Incorporation directed or required to be exercised or done by the stockholders.

SECTION 2. Number of Directors. The number of directors which shall constitute the whole Board shall be fixed from time to time by resolution of the Board adopted by a majority of the total number of authorized directors (whether or not there exist any vacancies in previously authorized directorships at the time such resolution is presented to the Board for adoption). The number of directors may be decreased at any time and from time to time by a majority of the directors then in office, but only to eliminate vacancies existing by reason of the death, resignation, removal or expiration of the term of one or more directors. No decrease in the number of directors constituting the Board shall shorten the term of any incumbent director.

SECTION 3. Term. The entire Board shall stand for election or re-election by the stockholders at each annual meeting, and each director shall be elected to serve until his or her successor shall be elected and duly qualified or until his or her earlier death, resignation or removal in the manner as herein provided.

SECTION 4. Qualifications. In addition to the requirements set forth in Article II, Section 5 regarding the eligibility of candidates for election as a director of the Corporation, each director shall be at least 21 years of age. Directors need not be stockholders or citizens or residents of the United States of America.

SECTION 5. Majority Voting in the Election of Directors.

(a) Except as provided in Section 8 of this Article III, each director shall be elected by the vote of the majority of the votes cast with respect to the director at any meeting for the election of directors at which a quorum is present (an "Election Meeting"), provided that if as of a date that is fourteen (14) days in advance of the date the Corporation files its definitive proxy statement (regardless of whether or not thereafter revised or supplemented) with the Securities and Exchange Commission the number of nominees exceeds the number of directors to be elected at such meeting (a "Contested Election"), each of the directors to be elected at the Election Meeting shall be elected by the affirmative vote of a plurality of the votes cast by the shares represented in person or by proxy at any such meeting and entitled to vote at such meeting with respect to the election of directors. For purposes of this Section 5, a “majority of the votes cast” means that the number of votes cast “for” a candidate for director must exceed the number of votes cast “against” that candidate for director (with “abstentions” and “broker non-votes” not counted as votes cast as either “for” or “against” such director’s election). In the event an Election Meeting involves the election of directors by separate votes by class or classes or series, the determination as to whether an election constitutes a Contested Election shall be made on a class by class or series by series basis, as applicable.

(b) The Nominating/Corporate Governance Committee has established procedures under which, in an uncontested election of directors, if any incumbent director nominated for re-election does not receive the vote of at least the majority of the votes cast at any meeting for the election of directors at which a quorum is present, such director will promptly tender his or her resignation to the Board. The Nominating/Corporate Governance Committee will make a recommendation to the Board on whether to accept or reject such tendered resignation, or whether other action should be taken. The Board will act on the tendered resignation, taking into account the Nominating/Corporate Governance Committee’s recommendation, and publicly disclose (by a press release, a filing with the SEC or other broadly disseminated means of communication) its decision regarding the tendered resignation and the rationale behind the decision within ninety (90) days from the date of the certification of the election results. The Nominating/Corporate Governance Committee in making its recommendation, and the Board in making its decision, may each consider any factors or other information that it considers appropriate and relevant. The director who tenders his or her resignation will not participate in the recommendation of the Nominating/Corporate Governance Committee or the decision of the Board with respect to his or her resignation. If a director’s resignation is not accepted by the Board, such director will continue to serve until the next annual meeting and until his or her successor is duly elected, or his or her earlier resignation or removal. If a director’s resignation is accepted by the Board, then the Board, in its sole discretion, may fill any resulting vacancy pursuant to the provisions of Section 8 below or may decrease the size of the Board of Directors pursuant to the provisions of Section 2 above.

SECTION 6. Resignations.

(a) Any director may resign at any time upon notice given in writing or by electronic transmission to the Chairman of the Board, the President or the Secretary; *provided*, *however*, that if such notice is given by electronic transmission, such electronic transmission must either set forth or be submitted with information from which it can be determined that the electronic transmission was authorized by the director. A resignation is effective when the resignation is delivered unless the resignation specifies a later effective date or an effective date determined upon the happening of an event or events. Acceptance of such resignation shall not be necessary to make it effective. A resignation which is conditioned upon the director failing to receive a specified vote for reelection as a director may provide that it is irrevocable. Unless otherwise provided in the Restated Certificate of Incorporation or these Bylaws, when one or more directors resign from the Board, effective at a future date, a majority of the directors then in office, including those who have so resigned, shall have power to fill such vacancy or vacancies, the vote thereon to take effect when such resignation or resignations shall become effective.

SECTION 7. Removal of Directors. Any director or the entire Board may be removed, with or without cause, at any time upon the affirmative vote of holders of a majority of the shares then entitled to vote at an election of directors.

SECTION 8. Vacancies. Vacancies in the Board and newly created directorships resulting from any increase in the authorized number of directors may be filled by a majority of the directors then in office, although less than a quorum, or by a sole remaining director or by the stockholders of the Corporation at the next annual meeting or any special meeting called for such purpose. Each director so chosen shall hold office until his or her successor shall be elected and shall qualify or until his or her earlier death, resignation or removal in the manner as herein provided.

SECTION 9. Place of Meetings. The Board may hold its meetings at such place or places within or without the State of Delaware as the Board may from time to time determine or as shall be designated in the respective notices or waivers of notice thereof.

SECTION 10. Annual and Regular Meetings. The annual meeting of the Board for the purpose of electing officers and for the transaction of such other business as may come before the meeting shall be held as soon as possible following adjournment of the annual meeting of the stockholders at the place of such annual meeting of the stockholders. Notice of such annual meeting of the Board need not be given. The Board from time to time may by resolution provide for the holding of regular meetings and fix the place (which may be within or without the State of Delaware), date and time of such meetings. Notice of regular meetings need not be given; provided, however, that if the Board shall fix or change the time or place of any regular meeting, notice of such action shall be mailed promptly, or given by telephone (including by a voice or text messaging system), facsimile or electronic mail to each director who shall not have been present at the meeting at which such action was taken, directed to each director at that director's address, telephone number, facsimile number or electronic mail address, as the case may be, as shown on the Corporation's records, or shall be delivered to him or her personally.

SECTION 11. Special Meetings. Special meetings of the Board shall be held whenever called by the Chairman of the Board, the President or at least two of the directors, at such place, date and time as may be specified in the respective notices or waivers of notice of such meetings. Special meetings of the Board may be called on at least twenty-four (24) hours' notice to each director if notice is given to each director personally or by telephone (including by a voice or text messaging system), facsimile or electronic mail, or on three (3) days' notice from the official date of deposit if notice is sent by internationally recognized courier to each director, directed to each director at that director's address, telephone number, facsimile number or electronic mail address, as the case may be, as shown on the Corporation's records. Such notice need not state the purpose of, nor the business to be transacted at, that meeting, except as may otherwise be required by these Bylaws or applicable law. Notice need not be given to a director present at a meeting. A meeting may be held at any time without notice if all the directors are present or if those not present waive notice of the meeting in writing either before or after that meeting.

SECTION 12. Quorum and Manner of Acting. Except as provided by law, the Restated Certificate of Incorporation or these Bylaws, a majority of the total number of directors then in office shall be present in person at any meeting of the Board in order to constitute a quorum for the transaction of business at such meeting. The affirmative vote of a majority of those directors present at any such meeting at which a quorum is present shall be necessary for the passage of any resolution or act of the Board, unless a different vote is required by applicable law, the Restated Certificate of Incorporation or these Bylaws. In the absence of a quorum for any such meeting, a majority of the directors present thereat may adjourn such meeting from time to time until a quorum shall be present thereat. Notice of any adjourned meeting need not be given.

SECTION 13. Organization. The Board shall from time to time, but in no event less frequently than annually, elect a Chairman of the Board from among the directors. The Chairman of the Board may be, but is not required to be, an officer or employee of the Corporation. Meetings of the Board shall be presided over by the Chairman of the Board, or such other person as the Board may determine. The Secretary shall act as secretary of the meeting, and in his or her absence such other person as the person presiding over the meeting may appoint.

SECTION 14. Action Without a Meeting. Unless otherwise restricted by the Restated Certificate of Incorporation or these Bylaws, any action required or permitted to be taken at any meeting of the Board or of any committee thereof may be taken without a meeting if all members of the Board or any committee thereof, as the case may be, consent thereto in writing, or by electronic transmission, and the writing or writings or electronic transmissions are filed with the minutes of proceedings of the Board of Directors or committee thereof, as the case may be.

SECTION 15. Meetings by Electronic Communications Equipment. Any one or more members of the Board, or any committee designated by the Board, may participate in a meeting of the Board, or such committee, by means of conference telephone or other communications equipment by means of which all persons participating in the meeting can hear each other, and participation in a meeting by such means shall constitute presence in person at such meeting.

SECTION 16. Compensation. Each director, in consideration of his or her serving as such, shall be entitled to receive from the Corporation such amount per annum or such fees for attendance at meetings of the Board or of any committee, or both, as the Board shall from time to time determine. The Board may likewise provide that the Corporation shall reimburse each director or member of a committee for any expenses incurred by him or her on account of his or her attendance at any such meeting. Unless otherwise determined by the Board of Directors, a director who is an employee of the Corporation shall not receive any compensation for service on the Board of Directors, but shall be reimbursed for expenses of attendance at meetings in accordance with the Corporation's applicable policies and procedures for such reimbursement. Nothing contained in this Section shall be construed to preclude any director from serving the Corporation in any other capacity and receiving compensation therefor.

ARTICLE IV

Committees

SECTION 1. Committees. The Board shall, by resolution adopted by a majority of the total number of authorized directors (whether or not there exist any vacancies in previously authorized directorships at the time such resolution is presented to the Board for adoption), designate a compensation committee, a nominating/corporate governance committee, an audit committee, and, if so desired from time to time, other committees to serve at the pleasure of the Board. Each committee shall consist of two or more of the directors of the Corporation. Any such committee, to the extent provided in the resolution of the Board, shall have and may exercise all the powers and authority of the Board in the management of the business and affairs of the Corporation and may authorize the seal of the Corporation to be affixed to all papers which may require it; but no such committee shall have the power or authority to amend the Restated Certificate of Incorporation (except as may be authorized in accordance with the provisions of Section 141(c)(1) of the DGCL), adopt an agreement of merger or consolidation, recommend to the stockholders the sale, lease, or exchange of all or substantially all of the Corporation's properties and assets, recommend to the stockholders a dissolution of the Corporation or a revocation of a dissolution or to amend these Bylaws. Unless a resolution of the Board adopted by a majority of the total number of authorized directors (whether or not there exist any vacancies in previously authorized directorships at the time such resolution is presented to the Board for adoption) expressly provides, no such committee shall have the power or authority to declare a dividend. Such committee(s) shall have such name(s) as may be determined from time to time by resolution adopted by the Board. Each committee shall keep regular minutes of its meetings and report the same to the Board when required. The Board may designate one or more directors as alternate members of any committee, who may replace any absent or disqualified member at any meeting of the committee. In the absence or disqualification of a member of the committee, the member or members thereof present at any meeting and not disqualified from voting, whether or not he, she or they constitute a quorum, may unanimously appoint another member of the Board to act at the meeting in place of any such absent or disqualified member.

SECTION 2. Committee Rules. Each committee of the Board may fix its own rules of procedure and shall hold its meetings as provided by such rules, except as may otherwise be provided by the resolution of the Board designating such committee or the charter adopted by the Board for such committee. In the absence of such rules, each committee shall conduct its business in as nearly as may be in the same manner as the Board conducts its business pursuant to Article III of these Bylaws.

SECTION 3. Termination of Committee Membership. In the event any person shall cease to be a director of the Corporation, such person shall simultaneously therewith cease to be a member of any committee appointed by the Board of Directors.

ARTICLE V

Officers

SECTION 1. Number. The principal officers of the Corporation shall be designated by the Board and shall consist of a President, such number of Vice Presidents as the Board may determine from time to time, a Treasurer, a Secretary and such number of Assistant Treasurers and Assistant Secretaries as the Board may determine from time to time. The Board may, in its discretion, create such offices and confer such titles as Chief Executive Officer, Chief Financial Officer, Chief Operating Officer or Chief Legal Officer and designate any Vice President by a number or numbers or a word or words (including, without limitation, the words “Executive” and “Senior”) added before or after such title. The Board may appoint, and authorize the appointment of, such other officers of the Corporation as the Board deems necessary, and such officers shall have such authority and shall perform such duties as these Bylaws or as the Board may prescribe. Any number of offices may be held by the same person, except that no person may simultaneously hold the offices of President and Secretary.

SECTION 2. Term of Office. Each officer shall hold office until his or her successor is duly elected and qualified or until his or her earlier death or resignation or removal in the manner hereinafter provided.

SECTION 3. Removal and Resignation. Any officer, agent or employee of the Corporation may be removed, either with or without cause, by an affirmative vote of the majority of the Board of Directors at any regular or special meeting of the Board of Directors, or, except in the case of any officer elected by the Board, by any committee or superior officer upon whom such power may be conferred by the Board. Designation of an officer shall not itself create contract rights. Any officer may resign at any time by giving written or electronic notice to the Corporation. Any resignation shall take effect at the date of the receipt of that notice or at any later time specified in that notice. Unless otherwise specified in the notice of resignation, the acceptance of the resignation shall not be necessary to make it effective. Any resignation is without prejudice to the rights, if any, of the Corporation under any contract to which the officer is a party.

SECTION 4. President. The President, subject to the direction of the Board, shall have such powers and perform such duties as pertain to the office of President and as the Board may from time to time prescribe, shall have the direction of all subordinate officers, agents and employees and may assign such duties to such other officers as he or she deems appropriate, and shall perform such other duties and exercise such other powers as may from time to time be prescribed by these Bylaws or the Board.

SECTION 5. Vice Presidents. Each Vice President shall have such powers and perform such duties as the Board or the President may from time to time prescribe and shall perform such other duties as may be prescribed by these Bylaws. At the request of the President, or in case of his or her absence or inability to act, any of the Vice Presidents shall perform the duties of the President and, when so acting, shall have all the powers of, and be subject to all the restrictions upon, the President.

SECTION 6. Treasurer. The Treasurer shall have charge and custody of, and be responsible for, all funds and securities of the Corporation, and shall deposit all such funds in the name of the Corporation in such banks, trust companies or other depositories as shall be selected in accordance with the provisions of these Bylaws. He or she shall disburse the funds of the Corporation as may be ordered by the Board, making proper vouchers for such disbursements, and shall render to the Board whenever required to do so, and shall present at the annual meeting of the stockholders, if called upon to do so, a statement of all his or her transactions as Treasurer. He or she shall have such powers and perform such duties as pertain to the office of Treasurer and shall perform such other duties as may from time to time be assigned to him or her by the Board.

SECTION 7. Secretary. The Secretary shall keep the records of the proceedings of all meetings of the stockholders and the Board or any committees thereof. He or she shall affix the seal of the Corporation to all deeds, contracts, bonds or other instruments requiring the corporate seal when the same shall have been signed on behalf of the Corporation by a duly authorized officer and shall be the custodian of all contracts, deeds, documents and all other indicia of title to properties owned by the Corporation and of its other corporate records (except accounting records). He or she shall have such powers and perform such duties as pertain to the office of Secretary and shall perform such other duties as may from time to time be assigned to him or her by the Board.

SECTION 8. Other Officers, Assistant Officers and Agents. Officers, assistant officers and agents, if any, other than those whose duties are provided for in these Bylaws, shall have such authority and perform such duties as may from time to time be prescribed by resolution of the Board or by the person responsible for appointing such officers, assistant officers and agents, as the case may be.

SECTION 9. Execution of Contracts and Instruments. Notwithstanding the foregoing description of the duties and powers of corporate officers, the Board may from time to time limit or qualify such duties and powers by an instrument designated by the Board or pursuant to the Board’s delegated authority as a corporate delegation of authority, and the duties and powers of the Corporation’s officers shall be so limited. The Board may also from time to time specifically authorize one or more officers or agents of the Corporation to enter into such contracts, execute such instruments and take such other actions in the name of and on behalf of the Corporation for such specific purposes and in connection with such specific matters and transactions as the Board in its discretion may determine. Any instrument may be executed on behalf of and in the name of the Corporation: (a) by the Chairman of the Board, the President, the Chief Executive Officer (if any), the Chief Financial Officer (if any), the Chief Operating Officer (if any) or any Vice President, together with the Secretary, the Treasurer or any Assistant Secretary, or any Assistant Treasurer, in each case, subject to any instrument that the Board or those authorized by it may designate as a "corporate delegation of authority," (b) by such officers specifically authorized to act by Board resolution for a specific purpose or (c) by any other person authorized to do so by, and subject to the limits stated in, the instrument that the Board or those authorized by it may designate as a "corporate delegation of authority", and such persons shall be deemed agents of the Corporation for such purposes. Except as otherwise designated or expressly authorized by these Bylaws, or an instrument properly designated as a "corporate delegation of authority" no officer, employee or agent of the Corporation shall have any power or authority to bind the Corporation by contract or otherwise or to pledge its credit or to render it liable pecuniarily for any purpose or to any amount.

SECTION 10. Security. The Board may require any officer, agent or employee of the Corporation to provide security for the faithful performance of his or her duties, in such amount and of such character as may be determined from time to time by the Board.

ARTICLE VI

Proxies, Checks, Drafts, Bank Accounts, Etc.

The President, or any other officer designated by the Board as having such authority, shall have authority from time to time to exercise in the name and on behalf of the Corporation the powers and rights which the Corporation may have as the holder of stock or other securities or interests in any other corporation or business entity and to vote or consent in respect of such stock, securities or interest; the President or such designated officers may designate an agent or agents to perform such function and may instruct the person or persons so appointed as to the manner of exercising such powers and rights; and the President or such designated officers may execute or cause to be executed in the name and on behalf of the Corporation and under its corporate seal, or otherwise, such written proxies, powers of attorney or other instruments as they may deem necessary or proper in order that the Corporation may exercise its said powers and rights. All checks and drafts on the Corporation bank accounts and all bills of exchange and promissory notes, and all acceptances, obligations and other instruments for the payment of money, shall be signed by such officer or officers or agent or agents or other employee or employees as shall be thereunto authorized from time to time by the Board. Third parties shall be entitled to rely on the authority delegated by the Board or pursuant to its delegated authority in an instrument designated as a "corporate delegation of authority" as to all matters governed by this Article VI.

ARTICLE VII

Books and Records

The books and records of the Corporation may be kept at such places within or without the State of Delaware as the Board may from time to time determine.

ARTICLE VIII

Seal

The corporate seal shall have inscribed thereon the name of the Corporation and may be used by causing it or a facsimile thereof to be impressed or affixed or reproduced or otherwise. The seal may be affixed by any officer of the Corporation to any instrument executed by authority of the Corporation, and the seal when so affixed may be attested by the signature of any officer of the Corporation.

ARTICLE IX

Fiscal Year

The fiscal year of the Corporation shall end on the 31st day of December in each year, unless changed by resolution of the Board.

ARTICLE X

Indemnification

SECTION 1. Indemnification of Directors and Officers in Third Party Proceedings. Subject to the other provisions of this Article X, the Corporation shall indemnify and hold harmless, to the fullest extent permitted by the DGCL (as the same exists now or as it may be hereinafter amended, but, in the case of any such amendment, only to the extent that such amendment permits the Corporation to provide broader indemnification rights than said law permitted the Corporation to provide prior to such amendment), any person (and the heirs, executors, administrators or estate of such person) who was or is a party or is threatened to be made a party to, or otherwise becomes involved in, any threatened, pending or completed action, suit, investigation, inquiry, hearing, mediation, arbitration, other alternative dispute mechanism or any other proceeding, whether civil, criminal, administrative, regulatory, investigative, legislative or otherwise and whether formal or informal (as further defined in Section 19 of this Article X, a "Proceeding") (other than an action by or in the right of the Corporation) by reason of the fact that such person is or was serving, or had agreed to serve, in an Official Capacity (as defined in Section 19 of this Article X) for the Corporation, or while serving in an Official Capacity for the Corporation is or was serving at the request of the Corporation in an Official Capacity for another corporation, partnership, limited liability company, joint venture, trust or other enterprise (an "Other Enterprise"), including service with respect to employee benefit plans maintained or sponsored by the Corporation, or is an employee of the Corporation specifically designated by the Board as an indemnified employee (hereinafter, each of the foregoing persons, a "Covered Person"), against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such Proceeding if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the Corporation, and, with respect to any criminal Proceeding, had no reasonable cause to believe his or her conduct was unlawful.

SECTION 2. Indemnification of Directors and Officers in Actions by or in the Right of the Corporation. Subject to the other provisions of this Article X, the Corporation shall indemnify and hold harmless, to the fullest extent permitted by the DGCL, any Covered Person who was or is a party or is threatened to be made a party to, or otherwise becomes involved in, a Proceeding by or in the right of the Corporation against Expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the Corporation; provided that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable to the Corporation unless and only to the extent that Delaware Court of Chancery or the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability but in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which the Delaware Court of Chancery or such other court shall deem proper.

SECTION 3. Successful Defense. To the extent that a Covered Person has been successful on the merits or otherwise in defense of any Proceeding described in Sections 1 or 2 of this Article X, or in defense of any claim, issue or matter therein, such person shall be indemnified against Expenses (as defined in Section 19 of this Article X) (including attorneys' fees) actually and reasonably incurred by such person in connection therewith.

SECTION 4. Indemnification of Others. Subject to the other provisions of this Article X, the Corporation shall have power to indemnify its employees and its agents to the extent not prohibited by the DGCL or other applicable law. Subject to applicable law, the Board shall have the power to delegate the determination of whether employees or agents shall be indemnified to such person or persons as the Board determines.

SECTION 5. Advance Payment of Expenses.

(a) Expenses (including attorneys' fees) incurred by any Covered Person in defending any Proceeding shall be paid by the Corporation in advance of the final disposition of such Proceeding. Such advances shall be paid by the Corporation within ten (10) calendar days after the receipt by the Corporation of a statement or statements from the claimant requesting such advance or advances from time to time; *provided*, that the payment of such expenses incurred by a Covered Person in his or her capacity as a director or officer shall be made only upon delivery to the Corporation of an undertaking in writing by or on behalf of such Covered Person to repay all amounts so advanced if it shall ultimately be determined by final judicial decision from which there is no further right of appeal (a "final disposition") that such Covered Person is not entitled to be indemnified for such expenses under this bylaw or otherwise. The Covered Person's undertaking to repay the Corporation any amounts advanced for Expenses shall not be required to be secured and shall not bear interest.

(b) Except as otherwise provided in the DGCL or this Section 5, the Corporation shall not impose on the Covered Person additional conditions to the advancement of Expenses or require from the Covered Person additional undertakings regarding repayment. Advancements of Expenses shall be made without regard to the Covered Person's ability to repay the Expenses.

(c) Advancements of Expenses pursuant to this subsection shall not require approval of the Board or the stockholders of the Corporation, or of any other person or body. The Secretary shall promptly advise the Board in writing of the request for advancement of Expenses, of the amount and other details of the request and of the undertaking to make repayment provided pursuant to this Section 5.

(d) Advancements of Expenses to a Covered Person shall include any and all reasonable Expenses incurred pursuing an action to enforce this right of advancement, including Expenses incurred preparing and forwarding statements to the Corporation to support the advancements claimed.

(e) The right to advancement of Expenses shall not apply to (i) any action, suit or proceeding against a Covered Person brought by the Corporation and approved by a majority of the authorized members of the Board which alleges willful misappropriation of corporate assets by such agent, wrongful disclosure of confidential information, or any other willful and deliberate breach in bad faith of such agent's duty to the Corporation or its stockholders, or (ii) any claim for which indemnification is excluded pursuant to these Bylaws, but shall apply to any Proceeding referenced in Section 6(c) prior to a determination that the person is not entitled to be indemnified by the Corporation.

SECTION 6. Limitations on Indemnification. Except as otherwise required by the DGCL or the Corporation's Restated Certificate of Incorporation, the Corporation shall not be obligated to indemnify any person pursuant to this Article X in connection with any Proceeding (or any part of any Proceeding):

(a) for which payment has actually been made to or on behalf of such person under any statute, insurance policy, indemnity provision, vote or otherwise, except with respect to any excess beyond the amount paid;

(b) for an accounting or disgorgement of profits pursuant to Section 16(b) of the Exchange Act, or similar provisions of federal, state or local statutory law or common law, if such person is held liable therefor (including pursuant to any settlement arrangements);

(c) for any reimbursement of the Corporation by such person of any bonus or other incentive-based or equity-based compensation or of any profits realized by such person from the sale of securities of the Corporation, as required in each case under the Exchange Act, including any such reimbursements that arise from an accounting restatement of the Corporation pursuant to Section 304 of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act") or the rules of any national securities exchange upon which the Corporation's securities are listed, if such person is held liable therefor (including pursuant to any settlement arrangements);

(d) for any reimbursement of the Corporation by such person of profits arising from the purchase and sale by such person of securities in violation of Section 306 of the Sarbanes-Oxley Act, if such person is held liable therefor (including pursuant to any settlement arrangements);

(e) initiated by such person against the Corporation or its directors, officers, employees, agents or other indemnitees, unless (a) the Board authorized the Proceeding (or the relevant part of the Proceeding) prior to its initiation, (b) the Corporation provides the indemnification, in its sole discretion, pursuant to the powers vested in the Corporation under applicable law, (c) otherwise made under Section 5 of this Article X or (d) otherwise required by applicable law; or

(f) if prohibited by applicable law.

SECTION 7. Indemnification Claims; Determination.

(a) To obtain indemnification under this Article X, a Covered Person shall submit to the Corporation a written request, including therein or therewith such documentation and information as is reasonably available to the Covered Person and is reasonably necessary to determine whether and to what extent the Covered Person is entitled to indemnification. Upon written request by a Covered Person for indemnification, a determination (the "Determination"), if required by applicable law, with respect to the Covered Person's entitlement thereto shall be made as follows: (i) by the Board by majority vote of a quorum consisting of Disinterested Directors (as defined in Section 19 of this Article X); (ii) if such a quorum of Disinterested Directors cannot be obtained, by majority vote of a committee duly designated by the Board (all directors, whether or not Disinterested Directors, may participate in such designation) consisting solely of two or more Disinterested Directors; (iii) if such a committee cannot be designated, by any Independent Counsel (as defined in Section 19 of this Article X) selected by the Board, as prescribed in (i) above or by the committee of the Board prescribed in (ii) above, in a written opinion to the Board, a copy of which shall be delivered to the claimant; or if a quorum of the Board cannot be obtained for (a) above and the committee cannot be designated under (b) above, selected by majority vote of the full Board (in which directors who are parties may participate); or (iv) if such Independent Legal Counsel determination cannot be obtained, by majority vote of a quorum of stockholders consisting of stockholders who are not parties to such Proceeding, or if no such quorum is obtainable, by a majority vote of stockholders who are not parties to the Proceeding. If it is so determined that the claimant is entitled to indemnification, payment to the claimant shall be made within thirty (30) calendar days after such determination.

(b) If a claim for indemnification under this Article X is not paid in full by the Corporation within thirty (30) calendar days after a determination is made pursuant to Section 7(a) that the claimant is entitled to be indemnified, or (ii) if a request for advancement of Expenses under this Article X is not paid in full by the Corporation within ten (10) calendar days after a statement pursuant to Section 5 above and the required Undertaking, if any, have been received by the Corporation, the claimant may at any time thereafter bring suit against the Corporation in a court of competent jurisdiction to recover the unpaid amount of the claim for indemnification or request for advancement of Expenses and, if successful in whole or in part, the claimant shall be entitled to be paid also any and all Expenses incurred in connection with prosecuting such claim. In any such suit, the Corporation shall, to the fullest extent not prohibited by law, have the burden of proving that the claimant is not entitled to the requested indemnification or advancement of Expenses. It shall be a defense to any such action that, under the DGCL or other applicable law, the claimant has not met the standard of conduct which makes it permissible for the Corporation to indemnify the claimant for the amount claimed or that the claimant is not entitled to the requested advancement of Expenses, but (except where the required Undertaking, if any, has not been tendered to the Corporation) the burden of proving such defense shall be on the Corporation. Neither the failure of the Corporation (including its Disinterested Directors, Independent Counsel or stockholders) to have made a determination prior to the commencement of such action that indemnification of the claimant is proper in the circumstances because he or she has met the applicable standard of conduct set forth under the DGCL or other applicable law, nor an actual determination by the Corporation (including its Disinterested Directors, Independent Counsel or stockholders) that the claimant has not met such applicable standard of conduct, shall be a defense to the action or create a presumption that the claimant has not met the applicable standard of conduct.

(c) The termination of any Proceeding by judgment, order, settlement, conviction, or upon a plea of *nolo contendere* or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which the person reasonably believed to be in or not opposed to the best interests of the Corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that the person's conduct was unlawful.

(d) If a Determination shall have been made pursuant to Section 7(a) above that the claimant is entitled to indemnification, the Corporation shall be bound by such determination in any judicial proceeding commenced pursuant to Section 7(b) above.

(e) The Corporation shall be precluded from asserting in any judicial proceeding commenced pursuant to Section 7(b) above that the procedures and presumptions of this Bylaw are not valid, binding and enforceable and shall stipulate in such proceeding that the Corporation is bound by all the provisions of this Bylaw.

SECTION 8. Procedures for the Determination of Whether Standards Have Been Satisfied.

(a) Costs. All costs incurred by the Corporation in making the Determination shall be borne solely by the Corporation, including, but not limited to, the costs of legal counsel, proxy solicitations and judicial determinations. The Corporation shall also be solely responsible for paying all costs incurred by it in defending any suits or Proceedings challenging payments by the Corporation to a Covered Person under these Bylaws.

(b) Timing of the Determination. The Corporation shall use its best efforts to make the Determination contemplated by Section 7 hereof as promptly as is reasonably practicable under the circumstances.

SECTION 9. Non-exclusivity of Rights. The rights of indemnification and advancement of Expenses provided in this Article X shall not be deemed exclusive of any other rights to which a person seeking indemnification or advancement of expenses may be entitled under any bylaw, agreement, insurance policy, vote of stockholders or disinterested directors or otherwise, both as to action in his or her official capacity and as to action in another capacity while holding such office. The Corporation is specifically authorized to enter into an agreement with any of its directors, officers, employees or agents providing for indemnification and advancement of expenses, including attorneys' fees, that may change, enhance, qualify or limit any right to indemnification or advancement of expenses created by this Article X, to the fullest extent not prohibited by the DGCL or other applicable law.

SECTION 10. Continuation of Rights. The rights of indemnification and advancement of expenses provided in this Article X shall continue as to any person who has ceased to be a director, officer, partner, member, trustee, agent or employee and shall inure to the benefit of his or her heirs, executors, administrators and estates.

SECTION 11. Contract Rights. Without the necessity of entering into an express contract, the obligations of the Corporation to indemnify a director, officer, partner, member, trustee, agent or employee under this Article X, including the duty to advance expenses, shall be considered a contract right between the Corporation and such individual and shall be effective to the same extent and as if provided for in a contract between the Corporation and the director or executive officer. Such contract right shall be deemed to vest at the commencement of such individual's service to or at the request of the Corporation, and no amendment, modification or repeal of this Article X shall affect, to the detriment of the indemnified person and such indemnified person's heirs, executors, administrators and estate, such obligations of the Corporation in connection with a claim based on any act or failure to act occurring before such modification or repeal.

SECTION 12. Subrogation. In the event of payment of indemnification to a person described in Sections 1 or 2 of this Article X, the Corporation shall be subrogated to the extent of such payment to any right of recovery such person may have and such person, as a condition of receiving indemnification from the Corporation, shall execute all documents and do all things that the Corporation may deem necessary or desirable to perfect such right of recovery, including the execution of such documents necessary to enable the Corporation effectively to enforce any such recovery.

SECTION 13. No Duplication of Payments. The Corporation shall not be liable under this Article X to make any payment in connection with any claim made against a person described in Sections 1 or 2 of this Article X to the extent such person has otherwise received payment (under any insurance policy, bylaw, agreement or otherwise) of the amounts otherwise payable as indemnity hereunder.

SECTION 14. Insurance and Funding.

(a) The Board of Directors may authorize that the Corporation purchase and maintain, at the Corporation's expense, insurance to protect the Corporation and any person against any liability or expense asserted against or incurred by such person in connection with any Proceeding, whether or not the Corporation would have the power to indemnify such person against such liability or expense by law or under this Article X or otherwise. The Corporation may create a trust fund, grant a security interest or use other means (including, without limitation, a letter of credit) to insure the payment of such sums as may become necessary to effect the indemnification provided herein.

(b) Any full or partial payment by an insurance company under any insurance policy covering any director, officer, employee, agent or other person indemnified above made to or on behalf of a person entitled to indemnification under this Article X shall relieve the Corporation of its liability for indemnification provided for under this Article X or otherwise to the extent of such payment.

(c) Any insurance or other financial arrangement made on behalf of a person pursuant to this Section 14 may be provided by the Corporation or any other person approved by the Board of Directors, even if all or part of the other person's stock or other securities is owned by the Corporation. In the absence of fraud, (i) the decision of the Board of Directors as to the propriety of the terms and conditions of any insurance or other financial arrangement made pursuant to this Section 14 and the choice of the person to provide the insurance or other financial arrangement is conclusive; and (ii) the insurance or other financial arrangement does not subject any director approving it to personal liability for his action in approving the insurance or other financial arrangement; even if a director approving the insurance or other financial arrangement is a beneficiary of the insurance or other financial arrangement.

SECTION 15. No Imputation. The knowledge and/or actions, or failure to act, of any other officer, director, employee or agent of the Corporation or an Other Enterprise shall not be imputed to an indemnified person for purposes of determining the right to indemnification under this Article X.

SECTION 16. Reliance. Persons who after the date of the adoption of Article X or any amendment thereto serve or continue to serve the Corporation in an Official Capacity or who, while serving in an Official Capacity, serve or continue to serve in an Official Capacity for an Other Enterprise, shall be conclusively presumed to have relied on the rights to indemnification and advancement of Expenses contained in this Article X.

SECTION 17. Severability. If this Article X or any portion hereof shall be invalidated on any ground by any court of competent jurisdiction, then the Corporation shall nevertheless indemnify and hold harmless each director and officer and any other person indemnified pursuant to this Article X as to all Expenses with respect to any Proceeding to the full extent permitted by any applicable portion of this Article X that shall not have been invalidated and to the fullest extent permitted by applicable law.

SECTION 18. Notices. Any notice, request or other communication required or permitted to be given to the Corporation under this Article X shall be in writing and either delivered in person or sent by U.S. mail, overnight courier or by e-mail or other electronic transmission, to the Secretary of the Corporation and shall be effective only upon receipt by the Secretary.

SECTION 19. Certain Definitions.

(a) The term "Corporation" shall include, in addition to American Water Works Company, Inc. and, in the event of a consolidation or merger involving the Corporation, in addition to the resulting corporation, any constituent corporation (including any constituent of a constituent) absorbed in a consolidation or merger which, if its separate existence had continued, would have had power and authority to indemnify its directors, officers, employees or agents, so that any person who is or was a director, officer, employee or agent of such constituent corporation, or is or was serving at the request of such constituent corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, shall stand in the same position under the provisions of this Article X with respect to the resulting or surviving corporation as such person would have with respect to such constituent corporation if its separate existence had continued.

(b) The term "Disinterested Director" means a director of the Corporation who is not and was not a party to the matter in respect of which indemnification is sought by the claimant.

(c) The term "Expenses" shall be broadly construed and shall include, without limitation, all direct and indirect losses, liabilities, expenses, including fees and expenses of attorneys, fees and expenses of accountants, court costs, transcript costs, fees and expenses of experts, witness fees and expenses, travel expenses, printing and binding costs, telephone charges, delivery service fees, the premium, security for, and other costs relating to any bond (including cost bonds, appraisal bonds, or their equivalents), judgments, fines (including excise taxes assessed on a person with respect to an employee benefit plan) and amounts paid in settlement and all other disbursements or expenses of the types customarily incurred in connection with (i) the investigation, prosecution, defense, appeal or settlement of a Proceeding, (ii) serving as an actual or prospective witness, or preparing to be a witness in a Proceeding, or other participation in, or other preparation for, any Proceeding, (iii) any compulsory interviews or depositions related to a Proceeding, (iv) any non-compulsory interviews or depositions related to a Proceeding, subject to the person receiving advance written approval by the Corporation to participate in such interviews or depositions, and (v) responding to, or objecting to, a request to provide discovery in any Proceeding. Expenses shall also include any federal, state, local and foreign taxes imposed on such person as a result of the actual or deemed receipt of any payments under this Article X.

(d) The term "Independent Counsel" means a law firm, a member of a law firm, or an independent practitioner, that is experienced in matters of corporation law and shall include any person who, under the applicable standards of professional conduct then prevailing, would not have a conflict of interest in representing either the corporation or the claimant in an action to determine the claimant's rights under this Article X.

(e) The term "Official Capacity" shall mean service as a director or officer of the Corporation or service, at the request of the Corporation while serving in an Official Capacity for the Corporation, as a director, officer, partner, member, manager, trustee, employee, agent or other representative of an Other Enterprise.

(f) The term "Proceeding" shall be broadly construed and shall include, without limitation, the investigation, preparation, prosecution, defense, settlement, mediation, arbitration and appeal of, and the giving of testimony in, any Proceeding.

(g) The term "serving at the request of the Corporation" includes any service as a director, officer, employee, or agent of the Corporation that imposes duties on such persons, including duties relating to an employee benefit plan and its participants or beneficiaries.

(h) The term "not opposed to the best interest of the Corporation," when used in the context of a Covered Person's service with respect to employee benefit plans maintained or sponsored by the Corporation, describes the actions of a person who acts in good faith and in a manner he reasonably believes to be in the best interests of the participants and beneficiaries of an employee benefit plan.

ARTICLE XI

Shares and Their Transfer

SECTION 1. Certificated and Uncertificated Shares. The shares of the Corporation shall be represented by certificates, or shall be uncertificated shares evidenced by a book-entry system, or a combination of both. Certificates shall be signed by, or in the name of the Corporation by, (i) the President or a Vice President and (ii) the Secretary or an Assistant Secretary, certifying the number and class of shares of the Corporation owned by the holder of such certificate. If such a certificate is countersigned (a) by a transfer agent or an assistant transfer agent other than the Corporation or its employee or (b) by a registrar other than the Corporation or its employee, the signature of any such President, Vice President, Secretary or Assistant Secretary may be a facsimile. In case any officer(s) who have signed, or whose facsimile signature(s) have been used on, any such certificate(s) shall cease to be such officer(s) of the Corporation, whether because of death, resignation or otherwise, before such certificate(s) have been delivered by the Corporation, such certificate(s) may nevertheless be issued and delivered as though the person or persons who signed such certificate(s) or whose facsimile signature(s) have been used thereon had not ceased to be such officer(s) of the Corporation.

SECTION 2. Registered Stockholders. A record shall be kept of the name of the person, firm or corporation owning each share of stock of the Corporation, including, in the case of stock represented by each certificate for stock of the Corporation issued, the number of shares represented by each such certificate, and the date thereof, and, in the case of cancellation, the date of cancellation. Except as otherwise expressly required by law, the person in whose name shares of stock stand on the books of the Corporation shall be deemed the owner thereof for all purposes as regards the Corporation. Without limiting the generality of the foregoing, the Corporation (a) shall be entitled to recognize the exclusive right of a person registered on its books as the owner of shares to receive dividends and to vote as such owner; and (b) shall not be bound to recognize any equitable or other claim to or interest in such share or shares on the part of another person, whether or not it shall have express or other notice thereof, except as otherwise provided by the laws of Delaware.

SECTION 3. Transfers of Stock. Transfers of stock shall be made only upon the transfer books of the Corporation kept at an office of the Corporation or by transfer agents designated to transfer shares of the stock of the Corporation. Except when a certificate is issued in accordance with Section 4 of this Article XI, in the case of stock represented by a certificate, an outstanding certificate for the number of shares involved shall be surrendered for cancellation before a new certificate is issued therefor.

SECTION 4. Lost, Destroyed or Mutilated Certificates. In the case of an alleged loss or destruction or the mutilation of a certificate representing stock of the Corporation, a new certificate may be issued in place thereof, in the manner and upon such terms as the Board may prescribe. Without limiting the generality of the foregoing, the Corporation may issue a new certificate of stock or uncertificated shares in the place of any certificate theretofore issued by it, alleged to have been lost, stolen or destroyed, and the Corporation may require the owner of the lost, stolen or destroyed certificate, or such owner's legal representative, to give the Corporation a bond sufficient to indemnify it against any claim that may be made against it on account of the alleged loss, theft or destruction of any such certificate or the issuance of such new certificate or uncertificated shares.

SECTION 5. Fractional Shares. The Corporation shall have the complete discretion to issue fractional shares.

SECTION 6. Record Date. The Board of Directors may by resolution of the Board adopted by a majority of the total number of authorized directors (whether or not there exist any vacancies in previously authorized directorships at the time such resolution is presented to the Board for adoption) fix in advance a date as a record date for the determination of the stockholders entitled to notice of and to vote at any meeting of stockholders, or entitled to receive payment of any dividends or other distribution, or to exercise the rights in respect to any change, conversion, or exchange of capital stock, and in such case only stockholders of record on the date so fixed shall be entitled to such notice of, and to vote at, such meeting, or to receive payment of such dividend or other distribution, or allotment of rights, or exercise such rights, as the case may be, and notwithstanding any transfer of any stock on the books of the Corporation after any such record date fixed as herein provided. In no event may any such record date: (i) be more than sixty (60) days preceding the date of any meeting of stockholders, or the date for the payment of any dividend, or the date when any change or conversion or exchange of capital stock shall go into effect, or (ii) precede the date upon which the resolution fixing the record date is adopted by the Board of Directors. A determination of stockholders of record entitled to notice of or to vote at any meeting of stockholders shall apply to any adjournment of the meeting; *provided*, *however*, that the Board may fix a new record date for the adjourned meeting.

ARTICLE XII

General Provisions

SECTION 1. Section Headings. Section headings in these Bylaws are for convenience of reference only and shall not be given any substantive effect in limiting or otherwise construing any provision herein.

SECTION 2. Gender. All words used in these Bylaws in the masculine gender shall extend to and shall include the feminine and neuter genders.

SECTION 3. Time Periods. In applying any provision of these Bylaws that requires that an act be done or not be done a specified number of days prior to an event or that an act be done during a period of a specified number of days prior to an event, unless the use of business days are specified, calendar days shall be used, the day of the doing of the act shall be excluded, and the day of the event shall be included.

SECTION 4. Evidence of Authority. A certificate by the Secretary, or an Assistant Secretary, or a temporary Secretary, as to any action taken by the stockholders, directors, a committee or any officer or representative of the Corporation shall, as to all persons who rely on the certificate in good faith, be conclusive evidence of such action.

SECTION 5. Restated Certificate of Incorporation. All references in these Bylaws to the Restated Certificate of Incorporation shall be deemed to refer to the Restated Certificate of Incorporation of the Corporation, as amended and in effect from time to time, including the terms of any certificate of designations of any series of Preferred Stock.

SECTION 6. Bylaw Provisions Additional and Supplemental to Provisions of Law. All restrictions, limitations, requirements and other provisions of these Bylaws shall be construed, insofar as possible, as supplemental and additional to all provisions of law applicable to the subject matter thereof and shall be fully complied with in addition to the said provisions of law unless such compliance shall be illegal.

SECTION 7. Interpretation. Unless the context requires otherwise, the general provisions, rules of construction and definitions in the DGCL shall govern the construction of these Bylaws. Reference in these Bylaws to any provision of the DGCL shall be deemed to include all amendments thereof. The term “person” includes both a corporation and a natural person. The term “Chief Executive Officer” shall be equivalent to the term “President” under the DGCL.

SECTION 8. Inconsistent Provisions. In the event that any provision of these Bylaws is or becomes inconsistent with any provision of the Corporation’s Restated Certificate of Incorporation, the DGCL or any other applicable law, such provision of these Bylaws shall not be given any effect to the extent of such inconsistency but shall otherwise be given full force and effect.

SECTION 9. Notices. Except as otherwise specifically provided herein or required by the DGCL or other applicable law or the Restated Certificate of Incorporation, all notices required to be given to any person pursuant to these Bylaws shall be in writing and may in every instance be effectively given by hand delivery to the recipient thereof, by depositing such notice in the mails, postage paid, addressed to such person at his or her last known address as the same appears on the books of the Corporation. Notices may also be sent by facsimile or other electronic transmission.

SECTION 10. Notice to Stockholders by Electronic Transmission.

(a) Without limiting the manner by which notice otherwise may be given effectively to stockholders pursuant to the DGCL, the Restated Certificate of Incorporation or these Bylaws, any notice to stockholders given by the Corporation under any provision of the DGCL, the Restated Certificate of Incorporation or these Bylaws shall be effective if given by a form of electronic transmission consented to by the stockholder to whom the notice is given. Any such consent shall be revocable by the stockholder by written notice to the Corporation. Any such consent shall be deemed revoked if (a) the Corporation is unable to deliver by electronic transmission two consecutive notices given by the Corporation in accordance with such consent;

and (b) such inability becomes known to the Secretary or an Assistant Secretary of the Corporation or to the transfer agent, or other person responsible for the giving of notice. However, the inadvertent failure to treat such inability as a revocation shall not invalidate any meeting or other action.

(b) Any notice given pursuant to the preceding paragraph shall be deemed given: (i) if by facsimile telecommunication, when directed to a number at which the stockholder has consented to receive notice; (ii) if by electronic mail, when directed to an electronic mail address at which the stockholder has consented to receive notice; (iii) if by a posting on an electronic network together with separate notice to the stockholder of such specific posting, upon the later of (A) such posting and (B) the giving of such separate notice; and (iv) if by any other form of electronic transmission, when directed to the stockholder. An affidavit of the Secretary or an Assistant Secretary or of the transfer agent or other agent of the Corporation that the notice has been given by a form of electronic transmission shall, in the absence of fraud, be prima facie evidence of the facts stated therein.

(c) For purposes of these Bylaws, an "electronic transmission" means any form of communication, not directly involving the physical transmission of paper, that creates a record that may be retained, retrieved, and reviewed by a recipient thereof, and that may be directly reproduced in paper form by such a recipient through an automated process.

SECTION 11. Notice to Stockholders Sharing an Address. Except as otherwise prohibited under the DGCL, without limiting the manner by which notice otherwise may be given effectively to stockholders, any notice to stockholders given by the Corporation under the provisions of the DGCL, the Restated Certificate of Incorporation or these Bylaws shall be effective if given by a single written notice to stockholders who share an address if (a) consented to by the stockholders at that address to whom such notice is given, or (b) the Corporation complies with the provisions of Rule 14a-3(e) of the Exchange Act. The stockholder consent referenced in the immediately preceding sentence shall be revocable by the stockholder by written notice to the Corporation. Any stockholder who fails to object in writing to the Corporation, within sixty (60) days of having been given written notice by the Corporation of its intention to send the single notice, shall be deemed to have consented to receiving such single written notice.

SECTION 12. Waiver of Notice. Whenever notice is required to be given to stockholders, directors or other persons under any provision of the DGCL, the Restated Certificate of Incorporation or these Bylaws, a written waiver, signed by the person entitled to notice, or a waiver by electronic transmission by the person entitled to notice, whether before or after the time of the event for which notice is to be given, shall be deemed equivalent to notice. Attendance of a person at a meeting, whether in person, by remote communication, if applicable, or by proxy, shall constitute a waiver of notice of such meeting, except when the person attends a meeting for the express purpose of objecting at the beginning of the meeting, to the transaction of any business because the meeting is not lawfully called or convened. Neither the business to be transacted at, nor the purpose of, any regular or special meeting of the stockholders or the board of directors, as the case may be, need be specified in any written waiver of notice or any waiver by electronic transmission unless so required by the Restated Certificate of Incorporation or these Bylaws. Any person so waiving notice of such a meeting shall be bound by the proceedings of any such meeting in all respects as if due notice thereof had been given.

ARTICLE XIII

Exclusive Forum

Unless the Corporation consents in writing to the selection of an alternative forum, the sole and exclusive forum for (i) any derivative action or proceeding brought on behalf of the Corporation, (ii) any action asserting a claim of breach of a fiduciary duty owed by any director or officer or other employee of the Corporation to the Corporation or the Corporation's stockholders, (iii) any action asserting a claim against the Corporation or any director or officer or other employee of the Corporation arising pursuant to any provision of the DGCL or the Corporation's Restated Certificate of Incorporation or Bylaws (in each case, as they may be amended from time to time), or (iv) any action asserting a claim against the Corporation or any director or officer or other employee of the Corporation governed by the internal affairs doctrine, shall be a state court located within the State of Delaware (or, if no state court located within the State of Delaware has jurisdiction, the federal district court for the District of Delaware), in all cases to the fullest extent permitted by law and subject to said court having personal jurisdiction over the indispensable parties named as defendants therein.

ARTICLE XIV

Amendments

These Bylaws and any amendment thereof may be altered, amended or repealed, or new bylaws may be adopted by (i) the Board by resolution adopted by a majority of the total number of authorized directors (whether or not there exist any vacancies in previously authorized directorships at the time such resolution is presented to the Board for adoption) acting at any special or regular meeting of the Board if, in addition to any other notice required by these Bylaws and other applicable requirements contained herein, notice of such amendment, alteration or repeal is contained in the notice or waiver of notice of such meeting, which notice shall also include, without limitation, the text of any such proposed amendment and/or any resolution calling for any such amendment, alteration or repeal, or (ii) the stockholders, provided that, in addition to any other notice required by these Bylaws and other applicable requirements contained herein, notice of such amendment, alteration or repeal is contained in the notice or waiver of notice of such meeting, which notice (or proxy statement accompanying such notice or accessible through a website URL provided in such notice or in a document accompanying such notice) shall also include, without limitation, the text of any such proposed amendment and/or any resolution calling for any such amendment, alteration or repeal.

AMERICAN WATER WORKS COMPANY, INC.

CERTIFICATE OF AMENDMENT OF BYLAWS

The undersigned hereby certifies that he is the duly elected, qualified, and acting Assistant Secretary of AMERICAN WATER WORKS COMPANY, INC., a Delaware corporation (the "Corporation"), and that the foregoing bylaws were amended and restated on August 3, 2015 by the Corporation's board of directors.

IN WITNESS WHEREOF, the undersigned has hereunto set his or her hand this 3rd day of August, 2015.

/s/ Jeffrey M. Taylor
Jeffrey M. Taylor, Assistant Secretary

Section 3: EX-10.1 (EX-10.1)

Exhibit 10.1

AMERICAN WATER WORKS COMPANY, INC.

2007 OMNIBUS EQUITY COMPENSATION PLAN

STOCK UNIT GRANT

This STOCK UNIT GRANT, dated as of May 15, 2015 (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to ______ (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has determined to grant each non-employee member of the Board of Directors of the Company (the "Board") who is a non-employee director of the Company immediately following the Company's 2015 Annual Stockholder meeting a stock unit grant that will be converted to shares of common stock of the Company, par value $0.01 per share, (the "Company Stock") at a later date;

WHEREAS, the Participant is a non-employee director on the Board; and

WHEREAS, the Committee has determined that the stock unit grant granted to the Participant shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan") and the terms and conditions of such stock unit shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant _____ units (the "Stock Units"). Each Stock Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable distribution date, as described in Paragraph 4 below.

2. Stock Unit Account. The Company shall establish and maintain a Stock Unit account as a bookkeeping account on its records (the "Stock Unit Account") for the Participant and shall record in such Stock Unit Account the number of Stock Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Stock Unit Account established for the Participant.

3. Vesting. The Participant shall be fully vested in the Stock Units credited to the Participant's Stock Unit Account pursuant to this Grant on the Date of Grant.

4. Distribution. The Stock Units shall be converted to shares of Company Stock and distributed by the Company within thirty (30) days following the earlier of (i) August 14, 2016 (the "Specified Date") (or, if applicable, the Deferred Date, as defined in Paragraph 5 below), (ii) the Participant's separation from service (within the meaning of section 409A of the Internal

Revenue Code of 1986, as amended (the "Code")) with the Company (the "Separation from Service Date"), or (iii) the date of a Change of Control (as defined below) (the "Change of Control Date"). At the time of distribution, all Stock Units shall be converted to an equivalent number of shares of Company Stock, and the Participant shall receive a single sum distribution of such shares of Company Stock, which shall be issued under the Plan. For purposes of this Grant, the term "Change of Control" shall have the same meaning as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Code and its corresponding regulations.

5. Deferrals. The Participant may make an irrevocable election to defer the Specified Date (or further defer the Deferred Date (as defined below), if applicable) of all of the Stock Units, plus dividend equivalents earned on such Stock Units as described in Paragraph 6 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Specified Date cannot be earlier than five (5) years from the original Specified Date under Paragraph 4 (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Specified Date (or twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Specified Date, the Participant must elect to defer 100% of the Stock Units, including corresponding dividend equivalents, granted to the Participant under this Grant and complete the deferral election form provided to the Participant by the Committee, in the form attached hereto as Exhibit A or as may subsequently modified in the discretion of the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Separation from Service Date or Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant's Stock Units, plus corresponding dividend equivalents, will be made as a result of the occurrence of the Separation from Service Date or Change of Control Date, whichever is earlier. If a Specified Date is delayed one or more times pursuant to this Paragraph 5, the new Specified Date shall be referred to as the "Deferred Date."

6. Dividend Equivalents. Until the earlier of the Specified Date (or the Deferred Date, if elected), Separation from Service Date or Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the "Dividend Equivalent Account") the value of the dividends that would have been distributed if the Stock Units credited to the Participant's Stock Unit Account as of the date of payment of any such dividend were shares of Company Stock. At the same time that the Stock Units are converted to shares of Company Stock and distributed to the Participant, the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

7. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Stock Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

8. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to distribution pursuant to this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law. The Participant also hereby agrees to be bound by the terms and conditions of the Plan and this Grant. The Participant further agrees to be bound by the determinations and decisions of the Committee with respect to this Grant and the Plan and the Participant's rights to benefits under this Grant and the Plan, and agrees that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

9. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a)The obligation of the Company to deliver shares of Company Stock upon the distribution of the Stock Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee. The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(b) As a condition to receive any shares of Company Stock upon conversion of the Stock Units, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the distribution of the Stock Units shall not be tradable until the Participant owns enough shares of Company Stock outright, as stock units convertible into shares of Company Stock, and time-based restricted Company Stock, to meet or exceed five (5) times the Participant's annual cash retainer, which ownership requirement must be satisfied by the

the fifth (5th) anniversary of the Participant's commencement of service as a director on the Board.

10. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder and the Participant's acceptance of this Grant is the Participant's agreement to be bound by the interpretations and decisions of the Committee with respect to this Grant and the Plan.

11. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 6), or the right to vote, with respect to any Stock Units.

12. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer (as defined in the Plan) and shall not interfere in any way with the right to terminate the Participant's employment or service at any time. The right to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

13. Assignment and Transfers. No Stock Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Stock Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Stock Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

14. Withholding. To the extent required by applicable law, the Participant shall be required to pay to the Company, or make other arrangements satisfactory to the Company to provide for the payment of, any federal, state, local or other taxes that the Company is required to withhold with respect to the Grant, vesting or distribution of the Stock Units and dividend equivalents.

15. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Stock Units shall not be considered eligible earnings for purposes of any other plans maintained by the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

16. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

17. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the records of the Company, or to such other address as the Participant may designate to the Company in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

18. Section 409A of the Code.

(a) This Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered to avoid any penalty sanctions under section 409A of the Code. If any distribution cannot be provided or made at the time specified herein or as elected by the Participant, then such distribution shall be provided in full at the earliest time thereafter when such sanctions cannot be imposed. Except according to a valid election made pursuant to Paragraph 5 above, in no event may the Participant designate the calendar year of distribution.

(b) Notwithstanding any provision to the contrary in this Grant, if any of the distributions under this Grant are payable to the Participant upon separation from service (within the meaning of section 409A of the Code) from the Employer, then if at the time of the Participant's separation from service the Participant is a "specified employee" (as such term is defined in section 409A(2)(B)(i) of the Code and its corresponding regulations) as determined by the Company (or any successor thereto) in its sole discretion in accordance with its specified employee determination policy, then all distributions to the Participant pursuant to this Grant shall be postponed for a period of six (6) months following the Participant's separation from service from the Employer. The postponed amounts shall be distributed to the Participant in a lump sum within thirty (30) days after the date that is six (6) months following the Participant's separation from service from the Employer. If the Participant dies during such six (6)-month period and prior to the distribution of the postponed amounts hereunder, the amounts delayed on account of section 409A of the Code shall be distributed to the personal representative of the Participant's estate within sixty (60) days after the date of the Participant's death, and any amounts not delayed shall be distributed to the personal representative of the Participant's estate in accordance with the terms of this Grant.

EXHIBIT A

SUBSEQUENT DEFERRAL ELECTION FORM

PART A. TIME OF DISTRIBUTION

I, ______________, (the "Participant") hereby irrevocably elect to have all of the Stock Units, plus corresponding dividend equivalents, (the "Deferred Units") granted to me pursuant to the Stock Unit Grant, dated as of May 15, 2015, (the "Grant") under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan") that would have been distributed by American Water Works Company, Inc. to me on the Specified Date (as defined in the Grant), instead be distributed to me on the deferred date designated below (the "Deferred Date"), which date must be at least five (5) years later than the Specified Date, and this election is at least twelve (12) months prior to the Specified Date (to make this deferral election you must defer all of the Stock Units, plus corresponding dividend equivalents, granted to you pursuant the Grant, meaning there is no partial deferral):

Number of Stock Units, and Dividend Equivalents, to be Further Deferred (All Must Be Deferred)	Original Specified Date (Election Must Be Made at Least 12 Months Prior to the Specified Date)	Deferred Date (Must be a date that is at least 5 years later than the Original Specified Date)
100%	August 14, 2016	

PART B. ACKNOWLEDGMENT

I understand and expressly agree that (i) the Deferred Date for the Deferred Units shall be the date I specified in Part A above (which is a date that is at least five (5) years later than the original Specified Date), and (ii) I will not be entitled to receive distribution of the Deferred Units on an earlier date, except in the event that the Separation from Service Date (as defined in the Grant) or the Change of Control Date (as defined in the Grant) occurs prior to the Deferred Date. I also understand and expressly agree that this deferral election is irrevocable, is being made at least twelve (12) months prior to the original Specified Date, and shall not take effect until twelve (12) months after the date on which I make this election. I further understand and agree that the terms and conditions of the Grant and the Plan are hereby incorporated into this form. Lastly, I understand and agree that this deferral election applies to 100% of the Stock Units, and corresponding dividend equivalents, granted to me pursuant to the Grant.

Section 4: EX-10.3 (EX-10.3)

Exhibit 10.3

SEVERANCE AGREEMENT AND GENERAL RELEASE

This Severance Agreement and General Release ("Agreement"), dated January ___, 2015, is among American Water Works Company, Inc. and American Water Works Service Company, Inc. (collectively, "American Water" or the "Company") and Kellye L. Walker (the "Executive").

RECITALS

WHEREAS, the Executive has been employed by the Company as Senior Vice President, General Counsel and Secretary;

WHEREAS, the Executive and the Company previously entered into a Letter Agreement, dated November 11, 2014, (the "Letter Agreement") pursuant to which it was agreed that Executive's employment with American Water would terminate on January 6, 2015 (the "Separation Date") and Executive would receive certain payments if Executive executes, and does not revoke, this Agreement; and

WHEREAS, without admission of liability on the part of either of the Executive or the Company (herein, the "Parties"), the Parties desire to resolve amicably the Executive's separation from employment, and to establish the terms of a severance agreement and release of claims.

NOW, THEREFORE, in consideration of the promises and conditions set forth herein, the sufficiency of which is hereby acknowledged, the Company and the Executive agree as follows:

1. **Termination of Employment; Consulting Obligations Following Termination.** Executive understands and agrees that her termination of employment is effective as of the close of business on the Separation Date. Executive agrees that for the six (6) month period following the Separation Date, Executive shall provide consulting services to the Company, which services shall be those as are reasonably requested by the Company's Chief Executive Officer; provided, that these consulting services shall not limit Executive's ability to become employed by another employer.
2. **Severance; Conditions of Receipt and Timing.** In return for the execution and non-revocation of the Agreement and the full performance by the Executive of the Executive's obligations described in this Agreement, the Company agrees to provide the Executive with the following:
    a. Executive will receive a cash severance payment equal to $612,250 (the "Severance Payment"), less applicable federal, state and local tax withholdings and deductions in accordance with the Company's normal payroll practices. The Severance Payment will be paid to Executive in substantially equal installments over the twelve (12) month period following the Separation Date (the "Severance Period") in accordance with the Company's payroll schedule in effect on the Separation Date; provided, that the first payment shall be paid to Executive within thirty (30) days following the Separation Date and include any installments that would be payable within such thirty (30) day period, and the subsequent installment payments shall be paid in accordance with the Company's scheduled payroll dates over the remainder of the twelve (12) month period from the Separation Date.
    b. Executive will receive a cash payment equal to $318,125 (the "Consulting Payment"), less applicable federal, state and local tax withholdings and deductions in accordance with the Company's normal payroll practices, which Consulting Payment is intended to compensate Executive for the consulting services that Executive has agreed to provide to the Company for the six (6) month period following the Separation Date. The Consulting Payment will be paid to Executive in substantially equal installments over the six (6) month period following the Separation Date in accordance with the Company's payroll schedule in effect on the Separation Date; provided, that the first payment shall be paid to Executive within thirty (30) days following the Separation Date and include any installments that would be payable within such thirty (30) day period, and the subsequent installment payments shall be paid in accordance with the Company's scheduled payroll dates over the remainder of the six (6) month period from the Separation Date.
    c. For the eighteen (18) month period following the Separation Date (the "Continuation Period"), Executive shall continue to be eligible to receive the group health insurance coverages under the Company's health plans in which Executive was participating immediately prior to the Separation Date, provided that such participation is permissible under the health benefit provisions under the federal Consolidated Omnibus Budget Reconciliation Act ("COBRA") and subject to the terms of the applicable plan documents and subject

to such changes to the terms of such plans as the Company determines shall apply to employees of the Company generally; provided further that, in order to receive such coverages for the Continuation Period, Executive shall be required to pay to the Company, at or prior to the time that premium payments are due for the month, the full monthly COBRA premium required by the Company under such plans for continuation coverage by terminated employees and if Executive ceases to pay the applicable COBRA premium in accordance with the terms set forth herein, the continuation coverage shall end. During the Continuation Period, the Company will reimburse to Executive, on the first Company payroll date of each month that follows the date such payment is due, an amount equal to (x) the monthly payment Executive paid for such continuation coverage, less (y) the amount that Executive would have been required to pay for such coverage if Executive had been employed by the Company at such time, (the "COBRA Payment"), less applicable federal, state and local tax withholdings and deductions in accordance with the Company's normal payroll practices; provided that Executive shall cease to be eligible to receive the monthly COBRA Payments on the earliest of: (I) the end of the Continuation Period, (II) the first month in which Executive does not pay the applicable monthly COBRA continuation coverage premium, (III) the first month Executive is eligible to be covered by another employer's group health plan, or (IV) the date Executive otherwise ceases to be eligible for coverage under such plans under COBRA.

d. With respect to the Company's 2014 Annual Incentive Plan ("2014 AIP"), Executive will be eligible to receive a bonus award under the 2014 AIP, which bonus award amount will be determined by multiplying (i) Executive's target award amount, by (ii) the corporate multiplier that is approved by the Board of Directors based on the Company's performance. The 2014 AIP award will be paid to Executive at the same time as continuing employees are paid their bonuses under the 2014 AIP, which shall be between March 1, 2015 and March 14, 2015, subject to any deferral agreement Executive previously entered into with the Company with respect to the 2014 AIP.

e. Conditions of Receipt and Timing. The Executive shall not be entitled to receive the amounts described in subsections a. through d. of this Section 2 unless and until (i) the Executive signs this Agreement, (ii) the seven (7)-day Revocation Period referenced in Section 4(c)(vi) below expires without the Executive having exercised the Executive's right of revocation, and (iii) all Company property has been returned to the Company in accordance with Section 6 below.

f. No Other Severance Benefits. Executive acknowledges and agrees that the amounts set forth in subsections a. through d. of this Section 2 are in complete satisfaction of any and all compensation and benefits due to Executive from the Company, and that no further severance, compensation, benefits or other amounts are owed or will be paid to Executive, other than the amounts described in Section 3 of the Agreement.

3. **Accrued Benefits**. In addition to the amounts provided under Section 2 of this Agreement, following Executive's Separation Date, Executive will be entitled to receive all (i) accrued, but unpaid, base salary earned by, but not paid to, Executive prior to Executive's Separation Date, which will be paid to Executive on the first Company payroll date that follows Executive's Separation Date, subject to any deferral agreement Executive previously entered into with the Company with respect to such base salary; (ii) any accrued, but unused, vacation as of Executive's Separation Date, which will be paid to Executive on the first Company payroll date that follows Executive's Separation Date; and (iii) any accrued or owing, but not yet paid, vested benefits under the Company's 401(k) plan and nonqualified deferred compensation plan in which Executive participated, which will be paid to Executive at the times provided under such plans. Any stock options, restricted stock units and performance stock unit grants that were granted to Executive under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (collectively, the "Equity Awards") that are outstanding and vested as of Executive's Separation Date will be subject to the terms and conditions of the respective grant agreements covering such Equity Awards, and any outstanding Equity Awards which are not vested as of Executive's Separation Date are terminated as of Executive's Separation Date and Executive shall have no further rights with respect to such unvested Equity Awards.

4. **General Release of Legal Claims; Cooperation; Indemnification.**

a. General Release of Legal Claims. Except as expressly permitted or required by this Agreement or by law and as set forth in Section 4(b) below, the Executive (on behalf of the Executive and the Executive's heirs, successors, assigns and representatives) hereby agrees to unconditionally and irrevocably release and discharge, to the maximum extent permitted by law, American Water Works Service Company, Inc., American Water Works Company, Inc., and all of their respective divisions, parents, subsidiaries, affiliates or related companies, their past, present and future officers, directors, shareholders, benefit plans, insurers, attorneys, legal representatives, employees and agents and all of their respective heirs, executors,

KLW Executive's Initials

administrators, successors and assigns, or any other persons and/or entities through which American Water has acted with respect to the Executive (collectively, the "Releasees") from any and all claims or causes of action, suits, and demands whatsoever in law or in equity, known or unknown, arising out of or in any way connected with, or relating to any event, matter or occurrence existing or occurring before Executive signs this Agreement, including, but not limited to:

i. any claims relating to the Executive's employment with or separation of employment from the Company;

ii. any statutory, regulatory, common law or other claims of any kind, including, but not limited to, breach of contract claims (whether written or oral, express or implied), tort claims, public policy claims, defamation claims, retaliation claims, wrongful discharge claims, claims for emotional distress or pain and suffering and claims of fraud or misrepresentation;

iii. any claims for attorneys' fees or costs;

iv. any claims for monetary damages based on discrimination, retaliation or harassment claims including, but not limited to, claims under Title VII of the Civil Rights Act of 1964, as amended, the Employee Retirement Income Security Act of 1974, as amended, and the Americans With Disabilities Act ("ADA"), as amended;

v. any claims under the Pennsylvania Human Relations Act, the Pennsylvania Equal Pay Law, the Pennsylvania Breastfeeding Rights law, the Pennsylvania Smoking in the Workplace law, the Pennsylvania Whistleblower Law, the Pennsylvania Pregnancy Guidelines of the Pennsylvania Human Relations Commission, the Pennsylvania Minimum Wage Law, and Pennsylvania common law;

vi. any claims under the New Jersey Law Against Discrimination, the New Jersey Conscientious Employee Protection Act, the New Jersey State Wage and Hour Law, the New Jersey Equal Pay Act, the New Jersey Family Leave Act, the New Jersey Constitution, the New Jersey Security and Financial Empowerment Act, and New Jersey common law;

vii. any and all other claims under applicable state, county or local ordinances or regulations; or any whistleblower or other law prohibiting retaliation to the extent permitted by law;

viii. any claims regarding leaves of absence, including, but not limited to, claims under the Family and Medical Leave Act or any federal, state or local law or statute relating to leave;

ix. any claims for unpaid or withheld wages, severance, benefits, bonuses, commissions and/or other compensation of any kind, including, but not limited to, claims under any applicable federal, state or local laws;

x. any claims for monetary damages under the Age Discrimination in Employment Act of 1967 ("ADEA"), as amended by the Older Workers Benefit Protection Act ("OWBPA"), and any applicable federal, state or local laws;

xi. any claims for health and welfare benefits including, but not limited to, life insurance, accidental death and disability insurance, sick leave or other employer provided plans or programs for group health insurance coverage (excluding claims for COBRA continuation coverage);

xii. any claims under any federal, state or local military leave laws, including the Uniformed Services Employment and Reemployment Rights Act;

xiii. any claims under the Occupational Safety and Health Act;

xiv. any claims under the federal Worker Adjustment and Retraining Notification Act or state law equivalent statutes;

xv. any claims under the Fair Credit Reporting Act;

xvi. any claims under the National Labor Relations Act;

xvii. any claims under the Sarbanes-Oxley Act; or

xviii. any other claims relating to the Executive's hire, employment, or separation thereof.

KLW Executive's Initials

b. Scope of the Agreement. The foregoing shall in no event apply to any claims that, as a matter of applicable law, are not waivable. American Water and the Executive agree that nothing in this Agreement prevents or prohibits the Executive from: (i) making any disclosure of relevant and necessary information or documents in connection with any charge, action, investigation, or proceeding relating to this Agreement, or as required by law or legal process; (ii) participating, cooperating, or testifying in any charge, action, investigation, or proceeding with, or providing information to, any self-regulatory organization, governmental agency or legislative body, pursuant to the Sarbanes-Oxley Act; (iii) filing, testifying, participating in or otherwise assisting in a proceeding relating to an alleged violation of any federal, state or municipal law relating to fraud, or any rule or regulation of the Securities and Exchange Commission or any self-regulatory organization; or (iv) challenging the knowing and voluntary nature of the release of ADEA claims pursuant to the OWBPA. To the extent permitted by law, upon receipt of any subpoena, court order or other legal process compelling the disclosure of any such information or documents, the Executive agrees to give written notice within two (2) business days of receipt of such to American Water and prior to providing any response thereto so as to permit American Water to protect its interests in confidentiality to the fullest extent possible. To the fullest extent provided by law, the Executive agrees and acknowledges, however, that the Executive is waiving any right to recover monetary damages in connection with any such charge, action, investigation or proceeding. To the extent the Executive receives any monetary relief in connection with any such charge, action, investigation or proceeding, American Water will be entitled to an offset for the benefits made pursuant to this Agreement, to the fullest extent provided by law.

American Water and the Executive further agree that the Equal Employment Opportunity Commission ("EEOC") and comparable state or local agencies have the authority to carry out their statutory duties by investigating charges, issuing determinations, and filing lawsuits in Federal or state court in their own name, or taking any action authorized by the EEOC or comparable state or local agencies. The Executive retains the right to participate in any such action and to seek any appropriate non-monetary relief. The Executive retains the right to communicate with the EEOC and comparable state or local agencies and such communication can be initiated by the Executive or in response to the government and such right is not limited by any non-disparagement claims. American Water and the Executive agree that communication with employees plays a critical role in the EEOC's enforcement process because employees inform the agency of employer practices that might violate the law. For this reason, the right to communicate with the EEOC is a right that is protected by Federal law and the Agreement does not prohibit or interfere with those rights. Notwithstanding the foregoing, the Executive agrees to waive any right to recover monetary damages in any charge, complaint or lawsuit filed by the Executive or by anyone else on the Executive's behalf.

c. Waiver of Claims under the ADEA. The Executive acknowledges and agrees that the Executive is waiving any claims under the ADEA, as amended by the OWBPA, and that:

i. the Executive is receiving consideration which is in addition to anything of value to which the Executive otherwise would have been entitled;

ii. the Executive fully understands the terms of this Agreement and the Executive enters into it voluntarily without any coercion on the part of any person or entity;

iii. the Executive was given adequate time to consider all implications and to freely and fully consult with and seek the advice of whomever the Executive deemed appropriate and has done so;

iv. the Executive was advised in writing, by way of this Agreement, to consult an attorney before signing this Agreement;

v. the Executive was advised that the Executive has twenty-one (21) calendar days from the date hereof within which to consider this Agreement before signing it and, in the event that the Executive signs this Agreement and returns it back to the Company during this time period, said signing constitutes a knowing and voluntary waiver of this time period, and the Executive understands that any changes to this Agreement, whether material or not, do not restart the twenty-one (21) day period; and

vi. the Executive has seven (7) calendar days after executing this Agreement within which to revoke this Agreement (the "Revocation Period"). If the seventh day is a weekend or national holiday, the Executive has until the next business day to revoke. If the Executive elects to revoke this Agreement, the Executive shall notify Leonard A. Crane, Vice President, Human Resources, in

KLW Executive's Initials

writing of the Executive's revocation. Any determination of whether the Executive's revocation was timely shall be determined by the date of actual receipt by Mr. Crane.

d. Non-Released Claims. In addition to claims expressly permitted by this Agreement or by law and claims or actions identified in Section 4(b), the general release in this Section 4 does not apply to:

   i. any claims relating to amounts described in Section 4 of this Letter Agreement, to the extent such were earned and vested as of the Separation Date, but not paid prior to the Separation Date;

   ii. any claims to require the Company to honor its commitments set forth in this Agreement;

   iii. any claims for unemployment compensation or workers' compensation; or

   iv. any claims to interpret or to determine the scope, meaning or effect of this Agreement.

e. Adequacy of Consideration. The Executive agrees that this Agreement (and, in particular, this Section 4) is supported by adequate consideration to which the Executive would otherwise not be entitled if the Executive did not sign this Agreement.

f. Cooperation. The Executive agrees that the Executive shall cooperate with the Releasees in the defense of any claim currently pending or hereinafter pursued against the Releasees without the payment of any additional compensation other than as set forth in this Agreement. American Water shall pay the Executive for all of the Executive's reasonable costs and expenses incurred in connection with such cooperation. In the case of legal proceedings, the Executive agrees to notify, in writing, the individual then holding the office of General Counsel, American Water Works Service Company, Inc., 1025 Laurel Oak Road, Voorhees, NJ 08043, of any subpoena or other similar notice to give testimony or provide documentation within two (2) business days of receipt of the same and prior to providing any response thereto. Nothing in this Agreement shall preclude the Executive from participating in and fully cooperating with any governmental investigation.

g. Indemnification. The Company agrees to hold harmless and indemnify the Executive for any and all claims arising out of any lawsuits, charges of discrimination, or wage claims (the "Cases") for which the Executive would be indemnified if an executive of the Company, including reasonable attorney's fees, costs and damages and other related litigation expenses. To the extent the Executive was a covered insured by any Company insurance policy, nothing herein negates such coverage or indemnity provided by such policy. The Company's duty to indemnify and hold the Executive harmless shall not apply if the Executive fails to cooperate in the investigation or defense of the Cases or any other proceedings in which the Executive has been identified as a material witness. To the extent that it is necessary for the Executive to retain counsel other than the Company's counsel with respect to any matter, counsel shall be selected by the Company subject to approval by the Executive, which approval shall not be withheld unreasonably.

5. **Confidentiality**. Except as expressly permitted or required by this Agreement or by law and as set forth in Section 4(b), the Executive shall, at all times from and after the date hereof, keep all confidential and proprietary business information and trade secrets (as defined below) secret and confidential and shall not, directly or indirectly, disclose or use any of the confidential and proprietary business information and trade secrets.

a. Confidentiality. The Executive shall not at any time disclose the terms of this Agreement or the circumstances surrounding the Executive's separation from American Water with any person or entity except that the Executive may disclose information about either subject matter with the Executive's attorney, tax advisor or spouse/legal partner; provided, that the Executive's attorney, tax advisor or spouse/legal partner first agrees to maintain the confidentiality of any disclosed information as a condition to receiving the information. Notwithstanding the immediately preceding sentence, information regarding this Agreement which is publicly disclosed in an American Water press release or Company filing with the Securities and Exchange Commission shall not be subject to this restriction. Nothing contained in this Agreement shall preclude the Executive from cooperating fully with any governmental investigation.

b. Non-Disclosure of Confidential Information and Trade Secrets. The Executive acknowledges that as an executive of American Water, the Executive had access to and was entrusted with the Company's confidential and proprietary business information and trade secrets. The Executive represents and agrees that, at all times prior to the Separation Date, the Executive has maintained and, on and at all times subsequent to the Separation Date, the Executive will continue to maintain such information in strict confidence and has not disclosed, used, transferred or sold and will not disclose, use, transfer or sell (directly or indirectly) such information to any third party (except as may be required by law or legal process or, while Executive was employed by the Company, the disclosure of such was necessary or appropriate for Executive to perform the duties of Executive's employment with the Company) so long as such information or proprietary data remains confidential and has not been properly and lawfully disclosed or is not otherwise in the public domain.

c. Definition of "Confidential and Proprietary Business Information and Trade Secrets". For purposes of this Agreement, "confidential and proprietary business information and trade secrets" includes, but is not limited to, all information about markets, key personnel, operational methods, proprietary intellectual property, real property, plans for future developments, projects in the pipeline, bid information, manuals, training materials, forms and procedures, policies, customer or prospective customer lists, customer related data, marketing plans and strategies, financial information, attorney-client privileged communications, attorney work product, documents relating to any of the foregoing, and other written and oral materials (whether computerized or on hard copy) which are related to the business of the Company, its subsidiaries and its affiliates and the confidentiality of which the Company attempts to maintain with reasonable efforts and which the Company has not released to the general public.

6. **Return of Property**. The Executive shall immediately return to American Water any and all property of the Company, its subsidiaries and its affiliates in the Executive's possession, including (without limitation) all papers, documents, business plans, project pipeline information, correspondence, office passes, telephones, blackberry/iPhone or other mobile telecommunications devices, credit cards, electronic or digitally stored information, and computer equipment.

7. **Resignation**. The Executive shall sign letters of resignation effective as of the Separation Date where required to satisfy legal or governance requirements for such offices the Executive holds with the Company, its subsidiaries and its affiliates.

8. **Disparaging Statements**. Except as expressly permitted or required by this Agreement or by law and as set forth in Section 4(b), the Executive understands and agrees that as a condition for payment to the Executive of the consideration herein described, the Executive shall not make any false, disparaging or derogatory statements to any media outlet, industry group, financial institution, current, former or prospective employee or executive, consultant, vendor, client or customer of the Company regarding the Company or any of its directors, officers, employees, agents or representatives or about the Company's business affairs, information technology division, or financial condition. The Company shall not make any false, disparaging or derogatory statements to any media outlet, industry group, financial institution, current or prospective employer of the Executive regarding the Executive.

9. **Non-Admissions**. The Parties agree that this Agreement shall not in any way be construed as an admission by the Company, the Executive or the Releasees that any of them has acted wrongfully with respect to any matter whatsoever, including without limitation any matter relating to the Executive's employment or the termination thereof.

10. **Tax Withholding**. Notwithstanding any other provision of this Agreement, American Water shall, to the extent required by law, withhold applicable federal, state and local income and other taxes from any payments due to Executive hereunder. Executive shall be solely responsible for all taxes that result from Executive's receipt of the payments, benefits and distributions to be provided under this Agreement, and none of American Water nor any of its subsidiaries or affiliates makes nor have they made any representation, warranty or guarantee of any federal, state or local tax consequences to Executive of Executive's receipt of any payment, benefit or distribution hereunder, including, but not limited to, under section 409A of the Internal Revenue Code of 1986, as amended (the "Code").

11. **Obligation to Cooperate**. Following the Separation Date, if, in connection with any investigation, governmental inquiry, threatened litigation or filed litigation involving the Company, Executive is called upon to assist the Company, to provide evidence, or testify in any manner, Executive agrees to fully cooperate with the Company, irrespective of whether such investigation, governmental inquiry, threatened litigation or filed litigation occurs during the Severance Period or thereafter. If requested by the Company, Executive agrees to be present and participate in the trial related to any such matter. Executive will, to the extent permitted by applicable law, be reimbursed for Executive's reasonable costs and expenses.

12. **Section 409A**. To the extent applicable, this Agreement is intended to comply with the applicable provisions of section 409A of the Code. Accordingly, all provisions herein are intended to be construed and interpreted to comply with section 409A of the Code or an exemption therefrom. Further, for purposes of section 409A of the Code, it is intended that each payment provided for hereunder, including each payment under a right to receive installment payments, be treated as a separate payment. Executive understands and agrees that none of the Company nor any of the other Releasees (i) have any obligation to indemnify or otherwise protect Executive from the obligation to pay any taxes pursuant to section 409A of the Code and (ii) makes or has made any representation, warranty or guarantee to Executive of compliance under section 409A of the Code.

13. **General Terms.**

a. Notices. All notices, demands or other communications to be given or delivered under or by reason of the provisions of this Agreement shall be in writing and shall be deemed to have been given when delivered personally to the recipient two (2) business days after the date when sent to the recipient by reputable express courier service (charges prepaid) or four (4) business days after the date when mailed to the recipient by certified or registered mail, return receipt requested and postage prepaid. Such notices, demands and other communications shall be sent to the Executive and to the Company at the addresses set forth below or to such other address or to the attention of such other person as the recipient party has specified by prior written notice to the sending party.

If to Executive:

Kellye L Walker
1670 Cloverly Lane
Jenkintown, PA 19046

If to Company:

Walter J. Lynch
American Water Works Service Company, Inc.
1025 Laurel Oak Road
Voorhees, NJ 08043

b. Modification. This Agreement sets forth the entire understanding of the Company and the Executive as to the subject matter contained herein and can be modified only by a writing signed by both the Executive and a duly authorized agent of American Water.

c. Entire Agreement. This Agreement constitutes the entire understanding and agreement between the Company and the Executive hereto with respect to severance payments and other payments described herein and the settlement of claims against the Company and cancels all previous oral and written negotiations, agreements, commitments and writings in connection therewith.

d. Assignment. All of the terms and provisions of this Agreement shall be binding upon and inure to the benefit of and be enforceable by the respective heirs, executors, administrators, legal representatives, successors and assigns of the Company and the Executive hereto.

e. Severability. If any term or other provision of this Agreement is invalid, illegal or incapable of being enforced by any rule of law or public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect, insofar as the foregoing can be accomplished without materially affecting the economic benefits anticipated by the parties to this Agreement. Upon such determination that any term or other provision is invalid, illegal or incapable of being enforced, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible to the fullest extent permitted by applicable law in an acceptable manner to the end that the transactions contemplated hereby are fulfilled to the extent possible.

f. Counterparts. This Agreement may be executed in one or more counterparts, which shall, collectively or separately, constitute one agreement. Signatures delivered by facsimile (including, without limitation, by portable document format (“pdf”)) shall be effective for all purposes.

g. Choice of Law and Forum. This Agreement shall be governed by the substantive law of the State of New Jersey without regard to its conflict of law rules. The Company and the Executive consent to the exclusive jurisdiction of the courts of New Jersey to adjudicate any and all disputes arising between them and hereby waive any and all objections based on alleged lack of personal jurisdiction.

KLW Executive's Initials

The Company and the Executive have carefully read and understand all of the provisions of this Agreement. They enter into this Agreement freely, knowingly, and voluntarily. In entering into this Agreement, neither the Company nor the Executive is relying upon any representations or promises not expressly set forth in this Agreement. Intending to be legally bound to this Agreement, the Company's representative and the Executive sign their names below.

Exhibit 10.4

AMERICAN WATER

February 17, 2015

Mr. Michael Sgro
131 Walnut Street
Jenkintown, PA 19046

Dear Mike:

On behalf of American Water, I am pleased to confirm your promotion to Senior Vice President, General Counsel reporting to Susan Story, President and Chief Executive Officer. The effective date of this promotion is February 17, 2015. We are confident that you will find your new position to be personally rewarding and one in which you can make significant contributions to the Company. The conditions of this promotion are as follows:

Compensation:

Effective with the promotion date, your new bi-weekly salary will be $14,423.08 and when annualized would be approximately $375,000. The new salary grade for your position will be ML3. Your job performance will be reviewed annually as part of our performance management system and you may be eligible for a merit increase in 2016.

Annual Incentive:

You will continue to be eligible to participate in the Company's Annual Incentive Plan (AIP). Effective on the date of your promotion, your AIP target bonus of 30% will increase to a 50% target bonus of your new annual base salary. Any amount awarded to you as a participant under the Annual Incentive Plan will be determined in accordance with the terms of the Plan. Your 2016 AIP will be prorated based upon your promotion date. Actual payout of the Annual Incentive Plan bonus is discretionary and based on factors including company performance and individual performance objectives.

Long Term Incentive:

You will continue to be eligible to receive an equity award under the Company's Long Term Incentive Plan (LTIP), if such an award is approved by the Compensation Committee of the American Water Board of Directors. Effective on the date of your promotion, your LTIP target bonus of 30% will increase to a target of 90% of your annual base salary. You will receive a communication shortly from the Company after the Compensation Committee approves an award for you.

Benefits:

Your current benefits will remain unchanged and in effect, including your current vacation accrual.

.

1025 Laurel Oak Road, Voorhees, NJ 08043

You are entitled to the severance benefits provided under the Executive Severance Policy. The severance benefits are provided to executives whose employment is involuntarily terminated by American Water for reasons other than Cause. Under the policy, you will receive salary continuation benefits based on your pay grade, which would be 12 months of your base salary, plus a prorated Annual Incentive Plan bonus to the extent such a payment is provided under the terms of the Annual Incentive Plan. A copy of the Executive Severance Policy is provided to you with this offer.

We look forward to working with you and to the contributions you will continue make to American Water, as well as the opportunity to provide you with professional growth. If you have questions, please contact me at 856-782-3659.

Once you have reviewed the offer please sign below and return a copy to me. Your signature will indicate your acceptance of our offer of employment as outlined in this letter.

Sincerely,

/s/ BJ Holdnak

and U.S. Mail
Brenda J. Holdnak, Ph.D.
4 Valcourt Circle
Simpsonville, SC 29680

Dear BJ:

I am pleased to extend an offer of employment to you for the position of Vice President Human Resources on behalf of American Water Works Service Company, Inc. ("American Water" or the "Company"), a subsidiary of American Water Works Company, Inc. This position will report directly to me in my capacity as President and Chief Executive Officer. Your expected first day of employment will be January 19, 2015. We anticipate that you will find this new role to be personally rewarding and one in which you can make significant contributions to the Company. The following represents American Water's offer to you:

Term of Employment: You will be employed full time as an exempt employee for a term of two (2) years from January 19, 2015 to January 20, 2017, subject to the satisfactory performance of your duties, and will voluntarily terminate your employment and transition your duties at the conclusion of the term. You will not be eligible for any severance under the Company's policies during or following the term of your employment.

Salary: You will be paid bi-weekly at the rate of $12,500.00, which is approximately $325,000.00 annualized. The salary grade for your position will be ML3b. Your job performance will be reviewed annually as part of American Water's performance management system and you may be eligible to receive a merit increase annually beginning in 2016.

Annual Incentive Plan Bonus: You will be eligible to participate in the Company's Annual Incentive Plan and eligible to receive a target bonus of 50% of your annual base salary. Actual payout of the Annual Incentive Plan bonus occurs in March of each year and is discretionary and is based on specified written factors including company performance and your job performance.

Long Term Incentive Plan Award: You will not be eligible to participate in the Company's Long Term Incentive Plan and will not be eligible to receive any award under this plan.

Qualified Defined Contribution/401(k) Savings Plan: You will be eligible to participate in the Company's 401(k) Savings Plan upon your hire date. The Company will match 100% on the first 3% of your base pay plus 50% on the next 2% of your eligible compensation (e.g., Base Pay plus Bonus). In addition to your contributions and the Company's match, the Company will make an annual non-elective contribution to your 401(k) Savings Plan account of 5.25% of your base salary up to $265,000 (IRS pay limitation for 2015 and indexed annually) that will vest after one (1) year of service.

Non-Qualified Saving and Deferred Compensation Plan: You will be not be eligible for the Company's non-qualified executive defined contribution (i.e., the 5.25% Defined Contribution); however, beginning January 1, 2016, you are eligible to elect to make a Deferral Contribution on a portion of your base pay and bonus and receive the Company's Match on eligible Deferral Contributions.

Relocation and Annual Housing Allowing: In lieu of the full relocation benefit offered by the Company, you will be paid an annual housing allowance of $50,000 that will be made in equal installments on a bi-weekly basis subject to applicable taxes and withholdings. The foregoing notwithstanding, you also will be eligible to utilize the Company's relocation services through its vendor, NEI, for the purposes of assisting with finding suitable accommodations and the related services.

Benefits: American Water offers a comprehensive benefits package, which includes medical, dental, vision, life, short-term and long-term disability insurance coverage. You will be eligible to enroll in the Company's health care plans to receive these benefits after completing one (1) full calendar month of employment.

Vacation: You will be eligible for 20 vacation days and 5 floating holidays per calendar year. Vacation will be prorated based on your hire date.

This offer is contingent upon satisfactory background check results, verification of your eligibility to work in the United States, verification of all information supplied on your résumé and employment application, and the absence of any Non-Compete or Non-Solicitation Agreement with a prior employer.

Also, as a condition of employment, you will be required to pass a drug screen and background check. The test is administered by Aurico, a third party contractor who will reach out to you on the Company's behalf to initiate the process.

Once you have reviewed the offer, please sign below and return a copy to me. Your signature will indicate your acceptance of American Water's offer of employment as outlined in this letter.

I look forward to working with you and to the contributions you will make to American Water, as well as the opportunity to provide you with professional growth.

Sincerely,

Susan Story

Section 7: EX-10.6 (EX-10.6)

Exhibit 10.6

Severance Agreement and General Release

This Severance Agreement and General Release (the “Agreement”) dated December 22, 2014 is made and entered into by Leonard Crane (the “Executive”) and American Water Works Service Company, Inc. (“American Water” or the “Company”). As used herein any reference to the “Company” shall mean American Water Works Company, Inc., American Water Works Service Company, Inc., and all of their respective divisions, parents, subsidiaries, affiliates or related companies, their past, present and future officers, directors, shareholders, benefit plans, insurers, attorneys, legal representatives, employees and agents and all of their respective heirs, executors, administrators, successors and assigns, or any other persons and/or entities through which American Water has acted with respect to the Executive.

RECITALS

WHEREAS, the Executive is employed by the Company as Vice President Human Resources of American Water Works Service Company, Inc.;

WHEREAS, the Executive’s employment will be terminated on January 16, 2015;

WHEREAS, the Executive’s continued assistance is needed to effectuate an orderly transition;

WHEREAS, without admission of liability on the part of either of the Executive or the Company (herein, the “Parties”), the Parties desire to establish terms for a transition, to resolve amicably the Executive’s separation from employment, and to establish the terms of a severance agreement and release of claims; and

WHEREAS, the Executive is advised that the Executive has twenty-one (21) days to consider this Agreement, that the Executive is advised to consult with the Executive’s own attorney prior to signing this Agreement, and that the Executive may revoke the Agreement for a period of seven (7) days after signing it and the Agreement shall not be effective or enforceable until the expiration of the seven (7) day revocation period.

NOW, THEREFORE, in consideration of the promises and conditions set forth herein, the sufficiency of which is hereby acknowledged, the Company and the Executive agree as follows:

1. **Transition and Separation From Employment.**
    a. Transition. The Executive will facilitate a transition from the date hereof through midnight on January 16, 2015 (the “Transition Period”).
        i. During the Transition Period, the Executive’s physical presence in the office will be required to perform the transition tasks as defined below in Section 1.a.ii. unless otherwise instructed by the President and Chief Executive Officer of the Company or her designee.
        ii. During the Transition Period, the Executive shall perform and make reasonable good faith efforts to complete tasks and assignments specified by the President and Chief Executive Officer of the Company or her designee and to effect an orderly transition. Specifically, the Executive shall be responsible for those tasks and activities set forth in Exhibit A hereof (the “Transition Tasks”).
        iii. During the Transition Period and thereafter the Executive shall be available to answer questions and provide assistance on matters for which the Executive has knowledge or relevant information.
    b. Separation From Employment Date. The Executive’s employment with American Water shall be terminated effective January 16, 2015 (the “Separation From Employment Date”). The Executive will be paid through and including the Separation Date, will continue to be covered under American Water’s group health insurance plan through the Separation From Employment Date, and will be paid for any unused accrued vacation days as of the Separation From Employment Date.

2. **Severance; Conditions of Receipt and Timing.** In return for the execution and nonrevocation of the Agreement and the good faith performance by the Executive of the Executive's obligations described in this Agreement and provided that the Executive signs the Agreement within twenty-one (21) days from December 22, 2014 and signs the release of claims attached hereto at Exhibit B on or after the Separation From Employment Date, but no later than twenty-one (21) days after the Separation From Employment Date, the Company agrees to provide the Executive with the following compensation and benefits:

a. Severance. American Water shall pay to the Executive a severance of $230,000 (the equivalent of twelve (12) months of pay at the Executive's current salary) (the "Severance Payments"). The Severance Payments will be paid to the Executive in biweekly installments in the Company's regular payroll cycle over the twelve (12) month period following the Separation From Employment Date (the "Severance Period"), subject to all applicable federal, state and local taxes and deductions in accordance with American Water's normal payroll practices.

b. Group Health Insurance. The Executive may, at the Executive's option, continue to participate in American Water's group health insurance plan pursuant to the federal Consolidated Omnibus Budget Reconciliation Act ("COBRA"). American Water will pay all COBRA premiums and related costs for the Executive for twelve (12) months following the Executive's Separation From Employment Date. Thereafter, the Executive and any eligible dependents will be entitled to continue health care coverage at the Executive's sole expense for the remaining balance of the COBRA coverage period. The Executive's right to COBRA health care continuation will be set forth in a separate letter. If the Executive elects not to participate in the Company's group health insurance plan or if the Executive fails to make timely monthly contributions (as this term is defined in the COBRA documentation that shall be provided the Executive), the Executive shall lose all eligibility for continued participation in the Company's group health insurance plan.

c. AIP Award. The Executive will be eligible to receive a 2014 Annual Incentive Plan ("AIP") award if such an AIP award is paid out to eligible participants. The amount for the AIP award shall be calculated from January 1, 2014 to December 31, 2014 at 45% of $230,000 and adjusted by the Corporate Multiplier. The AIP award, if such an award is paid, shall be payable to the Executive in its entirety in a lump sum, less applicable withholdings, at the same time as other AIP awards are distributed to other executives of the Company. The Executive shall receive no other AIP award.

d. Long Term Incentive Plan. The Executive shall have ninety (90) days from the Separation From Employment Date to exercise any vested stock options granted to the Executive pursuant to the Company's Long Term Incentive Plans (the "LTIP") under which the Executive received benefits. Any stock option, restricted stock unit, or performance stock unit not vested on or before the Separation From Employment Date will be forfeited. The Executive shall receive no other LTIP award.

e. Transition Bonus. In recognition of and appreciation for the Executive's agreement to continue his employment and to assist in transitioning his duties as described in Section 1 until a successor is named, the Company shall pay the Employee a special bonus of $25,000 ("Transition Bonus") subject to all applicable federal, state and local taxes and deductions in accordance with American Water's normal payroll practices. Such Transition Bonus shall be payable to the executive within ten (10) days following the Separation From Employment Date.

f. Life Insurance. During the Severance Period, the Executive shall continue to participate in any employee or executive life insurance plan sponsored by the Company under which the Executive was covered as of the Separation From Employment Date, subject to the same terms and conditions as are applicable to then current active employees or executives of the Company during the Severance Period.

g. Retirement Benefits. The Executive will be entitled to all vested retirement benefits, if any, to which the Executive is entitled pursuant to the terms of the Company's retirement plans.

h. Employee Assistance Program. The Executive shall continue to be eligible to participate in the American Water Employee Assistance Program following the Separation From Employment Date subject to the same terms and conditions as are applicable to then current active employees and executives of the Company during the Severance Period.

i. Outplacement Services. American Water will provide the Executive twelve (12) months of outplacement services following the Separation From Employment Date through a designated provider arranged by the Company to assist the Executive in obtaining other employment. The parties agree that the designated provider shall be Career Concepts and that Career Concepts shall provide executive level outplacement services. The Executive will be provided direction on accessing outplacement services in a separate letter following the execution and non-revocation of this Agreement and Exhibit B.

j. Conditions of Receipt and Timing. The Executive shall not be entitled to receive the Severance Payments, the Company-paid COBRA premiums, the AIP award, the LTIP, Transition Bonus, the life insurance, the outplacement services, or continued access to the American Water Employee Assistance Program unless and until the Executive signs this Agreement, the Executive signs the attached Exhibit B, and the seven (7)-day Revocation Period referenced in Section 4(c)(vi) below expires without the Executive having exercised the Executive's right of revocation. Provided that this Agreement and Exhibit B are signed, and are not revoked, the Severance Payments and the benefits described herein will be made to the Executive consistent with the terms in Section 2a.

3. **Confidentiality; Non-Disclosure; Return of Property, Disparaging Statements, and References.**

a. Confidentiality. The Executive shall not at any time disclose the terms of this Agreement or the circumstances surrounding the Executive's separation from employment with American Water with any person or entity except that the Executive may disclose information about either subject matter with the Executive's attorney, tax advisor or spouse/legal partner provided that the Executive's attorney, tax advisor or spouse/legal partner first agrees to maintain the confidentiality of any disclosed information as a condition of receiving the information. The Executive may also disclose the terms of this Agreement to the extent necessary to apply for unemployment compensation benefits. Nothing contained in this Agreement shall preclude the Executive from cooperating fully with any governmental investigation.

b. Non-Disclosure of Confidential Information and Trade Secrets. The Executive acknowledges that as an employee of American Water the Executive had access to and was entrusted with the Company's confidential and proprietary business information and trade secrets. At all times prior to, during, and following the Executive's separation from employment with American Water, the Executive represents that the Executive has maintained and agrees that the Executive will continue to maintain such information in strict confidence and has not disclosed, used, transferred or sold and will not disclose, use, transfer or sell (directly or indirectly) such information to any third party (except as may be required by law or legal process) so long as such information or proprietary data remains confidential and has not been properly and lawfully disclosed or is not otherwise in the public domain.

c. Definition of' Confidential and Proprietary Business Information and Trade Secrets". For purposes of this Agreement, "confidential and proprietary business information and trade secrets" includes, but is not limited to, all information about markets, key personnel, operational methods, proprietary intellectual property, real property, plans for future developments, projects in the pipeline, bid information, manuals, books, training materials, forms and procedures, policies, customer or prospective customer lists, customer related data, marketing plans and strategies, financial information, documents relating to any of the foregoing, and other written and oral materials (whether computerized or on hard copy) which are related to the business of the Company and the confidentiality of which the Company attempts to maintain with reasonable efforts and which the Company has not released to the general public.

d. Return of Property. The Executive shall immediately return to American Water (and shall not retain any copies of) any and all property of the Company in the Executive's possession, including (without limitation) all papers, documents, business plans, project pipeline information, correspondence, office pass, telephones, blackberry, credit cards, electronic or digitally stored information, and computer equipment, and copies thereof on the Separation From Employment Date.

e. Disparaging Statements. The Executive agrees that the Executive will not make any statements or comments that would tend to disparage or would be detrimental to the Company.

f. References. The Executive agrees that all requests for references from prospective employers will be directed solely to the attention of Melanie Kennedy, Senior Director Human Resources, American Water Works Service Company, Inc., 1025 Laurel Oak Road, Voorhees, NJ 08043, melanie.kennedy@amwater.com. Upon any request for a reference, Ms. Kennedy will solely confirm the Executive's dates of employment with American Water, positions the Executive held with American Water, the Executive's last salary earned with American Water and that the Executive's employment ended on January 16, 2015.

g. Taxes. As required by law, the Company will issue the appropriate IRS Form(s) at the appropriate time. Any payments provided for herein shall be reduced by any amounts required to be withheld by the Company from time to time under applicable federal, state or local income or employment tax laws or similar statutes or other provisions oflaw then in effect. The Executive agrees that (i) the Executive shall be solely responsible for all taxes, including, but not limited to, income and excise taxes, imposed on the Executive in respect of amounts paid to the Executive by the Company under this Agreement; and (ii) the Executive shall not seek reimbursement from the Company for such taxes.

Leonard Crane's Initials

h. Internal Revenue Code Section 409A Exception. The Company has informed Executive that the Executive qualifies for an exception from Section 409A of the Internal Revenue Code ("Section 409A") that applies to separation pay plans, such as described herein, and as a result the Executive is not subject to a six (6) month payment delay for a "specified employee" as that term is defined under Section 409A. The Company agrees that should the Internal Revenue Service deem any payments hereunder to constitute deferred compensation for purposes of Section 409A, the Company agrees to indemnify the Executive for any penalties, interest, attorneys' fees and other costs that may result from violation of Section 409A.

i. Enforcement. The parties hereto agree and acknowledge that they may seek enforcement of this Agreement in any state or federal court of competent jurisdiction in the state of New Jersey. The parties hereto further consent to enforcement of any order or directive enforcing this Agreement from any court, whether in New Jersey or elsewhere, by any other state or federal court in which any party hereto may seek enforcement of any such order or directive and that the parties shall not oppose application of full faith and credit principles to the ruling of one court by another court.

4. **General Release of Legal Claims; Agreement Not to Sue; Adequacy of Consideration; Cooperation; Claims with Government Agencies.**

a. General Release of Legal Claims. The Executive (on behalf of the Executive and the Executive's heirs, successors, assigns and representatives) hereby agrees to unconditionally and irrevocably release and discharge, to the maximum extent permitted by law, the Company from any and all claims or causes of action, suits, and demands whatsoever in law or in equity, known or unknown, arising out of or in any way connected with, or relating to any event, matter or occurrence existing or occurring before you sign this Agreement, including, but not limited to:

i. any Claims relating to the Executive's employment with or separation of employment from the Company;

ii. any statutory, regulatory, common-law or other claims of any kind, including, but not limited to, breach of contract claims (whether written or oral, express or implied), tort claims, public policy claims, defamation claims, retaliation claims, wrongful discharge claims, claims for emotional distress or pain and suffering and claims of fraud or misrepresentation;

iii. any claims for attorneys' fees or costs;

iv. any discrimination, retaliation or harassment claims including, but not limited to, claims under Title VII of the Civil Rights Act of 1964, as amended, the Employee Retirement Income Security Act of 1974, as amended, the Americans With Disabilities Act ("ADA"), as amended, the New Jersey Constitution, the New Jersey Law Against Discrimination, the New Jersey Conscientious Employee Protection Act, the New Jersey Family Leave Act, the New Jersey Millville Dallas Airmotive Plant Job Loss Notification Act, and any other claims protected by federal, state or local laws;

v. any claims under any federal, state or local whistle-blower laws;

vi. any claims regarding leaves of absence, including, but not limited to, claims under the Family and Medical Leave Act or any federal, state or local law or statute relating to leave;

vii. any claims for unpaid or withheld wages, severance, benefits, bonuses, commissions and/or other compensation of any kind, including, but not limited to, claims under any applicable federal, state or local laws;

viii. any claims under the Age Discrimination in Employment Act of 1967, as amended by the Older Workers Benefit Protection Act, and any applicable federal, state or local laws;

ix. any claims for health and welfare benefits including, but not limited to, life insurance, accidental death & disability insurance, sick leave or other employer provided plans or programs for group health insurance coverage (excluding claims for COBRA continuation coverage);

x. any claims under any federal, state or local military leave laws, including the Uniformed Services Employment and Reemployment Rights Act;

xi. any claims under the Occupational Safety and Health Act;

xii. any claims under the federal Worker Adjustment and Retraining Notification Act or state law equivalent statutes;

xiii. any claims under the Fair Credit Reporting Act;

xiv. any claims under the National Labor Relations Act;

Leonard Crane's Initials

xv. any claims under the Sarbanes-Oxley Act; or

xvi. any other claims relating to the Executive's hire, employment, or separation thereof.

b. Scope of General Release. The Executive hereby acknowledges and agrees that this general release includes all claims the Executive ever had, now has or which the Executive's heirs, agents, executors or assigns, or any of them, hereafter can, shall or may have, for or by reason of any cause, matter or thing whatsoever arising at any time up to and including the date that the Executive signs this Agreement.

c. Waiver of Claims under the Age Discrimination in Employment Act. The Executive acknowledges and agrees that the Executive is waiving any claims under the Age Discrimination in Employment Act, as amended by the Older Workers Benefit Protection Act, and that:

i. the Executive is receiving consideration which is in addition to anything of value to which the Executive otherwise would have been entitled; and

ii. the Executive fully understands the terms of this Agreement and the Executive enters into it voluntarily without any coercion on the part of any person or entity; and

iii. the Executive was given adequate time to consider all implications and to freely and fully consult with and seek the advice of whomever the Executive deemed appropriate and has done so; and

iv. the Executive was advised in writing, by way of this Agreement, to consult an attorney before signing this Agreement; and

v. the Executive was advised that the Executive has twenty-one (21) calendar days from December 22, 2014 within which to consider this Agreement before signing it and, in the event that the Executive signs this Agreement and returns it back to the Company during this time period, said signing constitutes a knowing and voluntary waiver of this time period, and the Executive understands that any changes to this Agreement, whether material or not, do not restart the twenty-one (21) day period; and

vi. the Executive has seven (7) calendar days after executing this Agreement within which to revoke this Agreement (the "Revocation Period"). If the seventh day is a weekend or national holiday, the Executive has until the next business day to revoke. If the Executive elects to revoke this Agreement, the Executive shall notify Melanie Kennedy, Senior Director Human Resources, American Water Works Service Company, Inc., 1025 Laurel Oak Road, Voorhees, NJ 08043, melanie.kennedy@amwater.com in writing of the Executive's revocation. Any determination of whether the Executive's revocation was timely shall be determined by the date of actual receipt by Ms. Kennedy.

d. Non-Released Claims. The general release in this Section 4 does not apply to:

i. any claims for vested benefits under any Company retirement, 401 (k), profit sharing or other deferred compensation plan;

ii. any claims to require the Company to honor its commitments set forth in this Agreement;

iii. any claims for unemployment compensation or workers' compensation; or

iv. any claims to interpret or to determine the scope, meaning or effect of this Agreement.

e. Adequacy of Consideration. The Executive agrees that this Agreement (and, in particular, this Section 4) is supported by adequate consideration to which the Executive would otherwise not be entitled if the Executive did not sign this Agreement.

f. Cooperation. The Executive agrees that the Executive shall cooperate with the Company in the defense of any claim currently pending or hereinafter pursued against the Company on any matter that arose during the Executive's employment as Vice President Human Resources for American Water Works Service Company, Inc. without the payment of any additional compensation other than as set forth in this Agreement. American Water shall pay the Executive for all of the Executive's reasonable costs and expenses incurred in connection with such cooperation. In the case of legal proceedings, the Executive agrees to notify, in writing, the individual then holding the office of General Counsel, American Water Works Service Company, Inc., 1025 Laurel Oak Road, Voorhees, NJ 08043, of any subpoena or other similar notice to give testimony or provide documentation within two (2) business days of receipt of the same and prior to providing any response thereto. Nothing in this Agreement shall preclude the Executive from participating in and fully cooperating with any governmental investigation.

g. Indemnification. The Company agrees to defend, hold harmless, and indemnify the Executive for any and all claims arising from and/or in any way related to Executive’s employment with American Water, including but not limited to reasonable attorney’s fees, costs and damages and other related litigation expenses, for any and all claims arising out of any lawsuits, charges of discrimination, or wage claims (the “Cases”) for which the Executive would be indemnified if an executive of the Company. To the extent the Executive was a covered insured by any Company insurance policy, nothing herein negates such coverage or indemnity provided by such policy except Executive’s refusal to cooperate as defined in Section 4 (t) above. The Company’s duty to defend, indemnify, and hold the Executive harmless shall not apply ifthe Executive fails to cooperate in the investigation or defense of the Cases or any other proceedings in which the Executive has been identified as a material witness. To the extent that it is necessary for the Executive to retain counsel other than the Company’s counsel with respect to any matter, counsel shall be selected and paid by the Company subject to approval by the Executive, which approval shall not be withheld unreasonably.

h. Claims with Government Agencies. Nothing in this Agreement shall be construed to prevent the Executive from filing a charge with, or participating in an investigation conducted by, any governmental agency, including, without limitation, the United States Equal Employment Opportunity Commission (EEOC), or applicable state/city fair employment practices agency, to the extent required or permitted by law. Nevertheless, the Executive gives up the right to receive any monetary relief whatsoever, including but not limited to financial benefit or monetary recovery from any lawsuit filed or settlement reached by the EEOC, applicable state/city fair employment practices agency, or anyone else with respect to any claims released and waived in this Agreement. Additionally, after entering into this Agreement, the Executive agrees to give up the right to receive any financial benefit or monetary recovery whatsoever resulting from any lawsuit against the Company that the Executive initiated, sponsored or in which the Executive participated.

i. General Release by American Water. American Water hereby agrees to unconditionally and irrevocably release and discharge, to the maximum extent permitted by law, the Executive from any and all claims or causes of action, suits, and demands whatsoever in law or in equity, known or unknown, arising out of or in any way connected with, or relating to any event, matter or occurrence existing or occurring before the Company signs this Agreement, including but not limited to any claims arising from and/or in any way related to Executive’s employment with American Water so long as such conduct was not criminal or in violation of American Water’s policies and practices existing on or before the Executive’s Separation From Employment Date, including but not limited to American Water’s Code of Ethics Policy.

5. **Acknowledgements Concerning Compensation.** The Executive acknowledges and agrees that the payments set forth above shall constitute the total amount owed by the Company, and that the Executive has (i) received all wages and compensation owed through the Separation From Employment Date, (ii) been paid by the Company for all hours the Executive has worked for the Company, and that the Executive is in receipt of all other amounts due from the Company through the Separation From Employment Date, including but not limited to, all wages, payments, bonuses, benefits, pay in lieu of notice, salary continuation or severance, compensation, or any other remuneration of whatever kind arising from or relating to the Executive’s employment or the termination of the Executive’s employment with American Water, except for the payments and benefits expressly provided for under this Agreement, and (iii) the Executive has not suffered any on-the-job injury for which the Executive has not already filed a claim.

6. **General Terms.**

a. Notices. All notices, demands or other communications to be given or delivered under or by reason of the provisions of this Agreement shall be in writing and shall be deemed to have been given when delivered personally to the recipient, two (2) business days after the date when sent to the recipient by reputable express courier service (charges prepaid) or four (4) business days after the date when mailed to the recipient by certified or registered mail, return receipt requested and postage prepaid. Such notices, demands and other communications shall be sent to the Executive and to the Company at the addresses set forth below

If to Executive:

Leonard Crane
2041 Fitzwater Street
Philadelphia, PA 19146

If to Company:

Office of General Counsel
1025 Laurel Oak Road
Voorhees, NJ 08043

or to such other address or to the attention of such other person as the recipient party has specified by prior written notice to the sending party.

b. Modification. This Agreement sets forth the entire understanding of the Company and the Executive as to the subject matter contained herein and can be modified only by a writing signed by both the Executive and a duly authorized agent of American Water.

c. Entire Agreement. This Agreement constitutes the entire understanding and agreement between the Company and the Executive hereto with respect to severance payments and other benefits described herein and the settlement of claims against the Company and cancels all previous oral and written negotiations, agreements, commitments and writings in connection therewith.

d. Assignment. All of the terms and provisions of this Agreement shall be binding upon and inure to the benefit of and be enforceable by the respective heirs, executors, administrators, legal representatives, successors and assigns of the Company and the Executive hereto.

e. Interpretation of Agreement. If any provision of this Agreement or application thereof to anyone under any circumstances is adjudicated to be invalid or unenforceable in any jurisdiction, such invalidity or unenforceability shall not affect any other provision or application of this Agreement which can be given effect without the invalid or unenforceable provision or application and shall not invalidate or render unenforceable such provision or application in any other jurisdiction.

f Choice of Law and Forum. This Agreement shall be governed by the substantive law of the state of New Jersey without regard to its conflict of law rules. The Company and the Executive consent to the exclusive jurisdiction of the courts of New Jersey to adjudicate any and all disputes arising between them and hereby waive any and all objections based on alleged lack of personal jurisdiction.

The Company and the Executive have carefully read and understand all of the provisions of this Agreement. They enter into this Agreement freely, knowingly, and voluntarily. In entering into this Agreement, neither the Company nor the Executive is relying upon any representations or promises not expressly set forth in this Agreement. Intending to be legally bound to this Agreement, the Company's representative and the Executive sign their names below.

Walter Lynch

EXHIBIT A

TRANSITION TASKS

The Executive shall continue to guide and oversee the following activities to completion during the Transition Period:

1. Ensure the continuation of existing HR projects and activities
2. Ensure the continued transition of key staff in new roles within HR
3. Address HR issues that may arise during the period
4. Participate with the executive leadership team on critical company issues

EXHIBIT B

In consideration of the promises made in the AGREEMENT AND GENERAL RELEASE entered into between Leonard Crane (the "Executive") and American Water Works Service Company, Inc. (the "Company"), the Executive does hereby REMISE, RELEASE AND FOREVER DISCHARGE the Company, its officers, directors, employees, agents, attorneys, predecessors, successors and assigns (the "Releasees") from all actions, suits, claims and demands in law or equity that the Executive ever had, now has, or hereafter may have, from the beginning of time to the date of this Agreement, whether known or unknown, suspected or unsuspected. This release includes but is not limited to all claims arising under Title VII of the Civil Rights Act of 1964, Sections 1981 through 1988 of Title 42 of the United States Code, the Civil Rights Act of 1866, the Civil Rights Act of 1991, the Equal Pay Act, the United States Constitution, the Employee Retirement Income Security Act, the Americans with Disabilities Act, the National Labor Relations Act, the Occupational Safety and Health Act, the Immigration Reform and Control Act, Executive Orders 11246 and 11141, the Sarbanes-Oxley Act, the Worker Adjustment Protection Act of 1990, the Fair Credit Reporting Act, the Genetic Information Nondiscrimination Act, the Uniformed Services Employment and Reemployment Rights Act, the Employee Polygraph Protection Act, the New Jersey Constitution, the New Jersey Law Against Discrimination, the New Jersey Conscientious Employee Protection Act, the New Jersey Family Leave Act, the New Jersey Millville Dallas Airmotive Plant Job Loss Notification Act, and any other federal, state or local law or ordinances, or any common law claim under tort, contract or any other theories now or hereafter recognized, as amended where applicable. This release also includes claims which the Executive may have for any type of damages cognizable under any of the laws referenced herein, including, but not limited to, any and all claims for compensatory damages, punitive damages, and attorneys' fees and costs. The Executive shall not bring a lawsuit against any of the Releasees for any of the claims described above. Should any entity, agency, commission, or person file a charge, action, complaint or lawsuit against the Releasees based upon any of the above-released claims, the Executive agrees not to seek or accept any resulting relief whatsoever. The Executive also agrees that this release should be interpreted as broadly as possible to achieve the Executive's intention to waive all Claims which the Executive may have against the Releasees. The Executive acknowledges that the benefits made available to the Executive have been explained to the Executive by the Company and are due consideration in exchange for release of claims listed in Section 4 of the Agreement. Notwithstanding anything to the contrary herein, nothing in this Agreement shall impact or otherwise affect the Executive's rights under, and to enforce, this Agreement. The Executive is advised that the Executive has at least twenty-one (21) calendar days to consider this General Release, that the Executive is advised to consult with the Executive's own attorney prior to signing this General Release and that the Executive may revoke the General Release within a period of seven (7) days after signing and the General Release shall not be effective or enforceable until the expiration of the seven (7) day revocation period. American Water hereby agrees to unconditionally and irrevocably release and discharge, to the maximum extent permitted by law, the Executive from any and all claims or causes of action, suits, and demands whatsoever in law or in equity, known or unknown, arising out of or in any way connected with, or relating to any event, matter or occurrence existing or occurring before the Company signs this Agreement, including but not limited to any claims arising from and/or in any way related to Executive's employment with American Water so long as such conduct was not criminal or in violation of American Water's policies and practices existing on or before the Executive's Separation From Employment Date, including but not limited to American Water's Code of Ethics Policy.

Section 8: EX-31.1 (EX-31.1)

Exhibit 31.1

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Susan N. Story, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

Note 1: Basis of Presentation

The unaudited consolidated financial statements provided in this report include the accounts of American Water Works Company, Inc. and all of its subsidiaries in which a controlling interest is maintained (collectively, “American Water or the “Company”) after the elimination of intercompany accounts and transactions. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial reporting and with the rules and regulations for reporting on Form 10-Q. Accordingly, they do not contain certain information and disclosures required by GAAP for comprehensive financial statements. In the opinion of management, all adjustments necessary for a fair statement of the financial position at September 30, 2015 and results of operations and cash flows for all periods presented have been made. All adjustments are of a normal, recurring nature, except as otherwise disclosed.

The Consolidated Balance Sheet as of December 31, 2014 is derived from the Company's audited consolidated financial statements at December 31, 2014. The unaudited financial statements and notes included in this report should be read in conjunction with the Company’s Annual Report on Form 10-K for the year ended December 31, 2014 which provides a more complete discussion of the Company’s accounting policies, financial position, operating results and other matters. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year, due primarily to the seasonality of the Company’s operations.

Effective July 8, 2015, the Company acquired a ninety-five percent interest in Water Solutions Holdings, LLC (the “Keystone Acquisition”), including its wholly owned subsidiary, Keystone Clearwater Solutions, LLC. The Company also entered into an agreement, whereby it has the option to acquire from the minority owners, and the minority owners have the option to sell to the Company, the remaining five percent interest at fair value upon the occurrence of certain triggering events or at defined dates of December 31, 2016 and December 31, 2018. As the noncontrolling interest is redeemable at the option of the minority owners, the Company has classified the balance as redeemable noncontrolling interest, which is included in other long-term liabilities in the accompanying Consolidated Balance Sheets. The fair value of the redeemable noncontrolling interest was estimated to be $6,999 at the acquisition date. The net loss attributable to noncontrolling interest was $28 for the three and nine months ended September 30, 2015.

The accompanying Notes to the Consolidated Financial Statements relate to continuing operations only unless otherwise indicated.

Note 2: New Accounting Pronouncements

The following recently issued accounting standards have been adopted by the Company and have been included in the consolidated results of operations, financial position or footnotes of the accompanying Consolidated Financial Statements:

Service Concession Arrangements

In January 2014, the Financial Accounting Standards Board (“FASB”) issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide the services and at what price. The grantor must also control, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in such an arrangement should not be recognized as property, plant and equipment of the operating entity. To comply with this guidance, application was required on a modified retrospective basis to service concession arrangements that existed at January 1, 2015. The Company reduced nonutility property and other long-term assets for infrastructure related to service concession arrangements and recognized a cumulative effect adjustment of $8,395, net of tax, to the opening balance of accumulated deficit at January 1, 2015.

Reporting Discontinued Operations

In April 2014, the FASB issued guidance that changed the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. Under the updated guidance, a discontinued operation is defined as a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has or will have a major effect on an entity's operations and financial results. A strategic shift could include a disposal of a major geographical area of operations, a major line of business, a major equity method investment or other major part of the entity. A component comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity including a reportable segment, an operating segment, a reporting unit, a subsidiary or an asset group. The update no longer precludes presentation as a discontinued operation if there are operations and cash flows of the component that have not been eliminated from the reporting entity's ongoing operations or if there is significant continuing involvement with a component after its disposal. The guidance was effective January 1, 2015 for the Company and did not have an impact on the Company's results of operations, financial position or cash flows.

The following recently issued accounting standards are not yet required to be adopted by the Company:

Revenue from Contracts with Customers

In May 2014, the FASB issued a new revenue recognition standard that will replace most existing revenue recognition guidance in GAAP, including industry-specific guidance, and is intended to improve and converge with international standards the financial reporting requirements for revenue from contracts with customers. The core principle of the new guidance is that a company will recognize revenue for the transfer of goods or services to customers equal to the amount that it expects to be entitled to receive for those goods or services. The guidance also requires additional disclosures about the nature, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. The guidance allows for both retrospective and prospective methods of adoption and is effective January 1, 2018 for the Company. Early adoption is permitted, but not before January 1, 2017 for the Company. The Company is currently evaluating the impact, if any, that the adoption will have on its results of operations, financial position or cash flows and it has not yet selected a transition method.

Accounting for Stock-based Compensation with Performance Targets

In June 2014, the FASB issued guidance for the accounting for stock-based compensation tied to performance targets. The updated guidance resolves the diverse accounting treatment for share-based payments by requiring that a performance target that affects vesting of a share-based payment and that could be achieved after the requisite service period be treated as a performance condition. The requisite service periods ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. This guidance is effective January 1, 2016 for the Company and early adoption is permitted. The adoption of this updated guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows.

Disclosures of Uncertainties about an Entity's Ability to Continue as a Going Concern

In August 2014, the FASB issued guidance that explicitly requires an entity's management to assess the entity's ability to continue as a going concern. The new guidance requires an entity to evaluate, at each interim and annual period, whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued (or are available to be issued) and to provide related disclosures, if applicable. The guidance is effective January 1, 2017 for the Company and early adoption is permitted. The adoption of this updated guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows.

Amendments to the Consolidation Analysis

In February 2015, the FASB issued guidance that amends the consolidation analysis for variable interest entities ("VIEs") as well as voting interest entities. The amendments under the new guidance modify the evaluation of whether limited partnerships and similar legal entities are VIEs or voting interest entities and eliminate the presumption that a general partner should consolidate a limited partnership. The guidance is effective January 1, 2016 for the Company and early adoption is permitted. The guidance may be applied retrospectively to each prior reporting period presented or retrospectively with a cumulative effect adjustment to retained earnings for initial application of the guidance at the date of adoption (modified retrospective method). The adoption of this updated guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows.

Presentation of Debt Issuance Costs

In April 2015, the FASB issued updated guidance on imputation of interest and simplifying the presentation of debt issuance costs. The updated guidance requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of the related liability. Such treatment is consistent with the current presentation of debt discounts or premiums. The updated guidance is effective January 1, 2016 for the Company and early adoption is permitted. The amended guidance must be applied on a retrospective basis for all periods presented. The adoption of this updated guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows.

Accounting for Fees Paid in a Cloud Computing Arrangement

In April 2015, the FASB issued guidance clarifying how customers should account for fees paid in a cloud computing arrangement. Under the new guidance, if a cloud computing arrangement contains a software license, the customer would account for the software license element of the arrangement consistent with the acquisition of other software licenses. If the cloud computing arrangement does not include a software license, the customer would account for the arrangement as a service contract. The guidance is effective January 1, 2016 for the Company with early adoption permitted. The guidance may be applied retrospectively or prospectively to arrangements entered into, or materially modified after the effective date. The adoption of this updated guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows.

Amendments to the Measurement of Inventory

In July 2015, the FASB issued guidance on simplifying the measurement of inventory. The new guidance replaces the current lower of cost or market test with a lower of cost or net realizable value test when cost is determined on a first-in, first-out or average cost basis. The guidance is effective January 1, 2017 for the Company with early adoption permitted. The adoption of this guidance is not expected to have a material impact on the Company's results of operations, financial position or cash flows.

Note 3: Acquisitions and Divestitures

Acquisitions

During the nine-month period ended September 30, 2015, the Company closed on seven acquisitions of various regulated water and wastewater systems for a total aggregate purchase price of $44,049. Assets acquired, principally utility plant, totaled $67,420. Liabilities assumed totaled $23,008, including $8,415 of contributions in aid of construction and other long-term liabilities of $14,039. The Company recorded additional goodwill of $2,054 associated with four of its acquisitions, which is reported in its Regulated Businesses segment and is expected to be fully deductible for tax purposes. The Company also recognized a bargain purchase gain of $2,417 associated with three of its acquisitions, of which $1,301 was deferred as a regulatory liability.

The Company also closed on the Keystone Acquisition, which is included as part of the Market-Based Businesses segment, for a total purchase price of $132,819, net of cash received. The estimated fair value of assets acquired and liabilities assumed was $44,008 and $6,981, respectively, and principally included the acquisition of nonutility property of $25,462 and accounts receivable of $10,843. The preliminary purchase price allocation, which is based on the estimated fair value of net assets acquired, resulted in the Company recording redeemable noncontrolling interest of $6,999 and additional goodwill of $102,791. The purchase price allocation will be finalized once the valuation of net assets acquired has been completed. Goodwill is expected to be fully deductible for tax purposes. The pro forma impact of this acquisition would not have been material to the Company's results of operations for the three and nine month periods ended September 30, 2015 and 2014.

Divestitures

In November 2014, the Company completed the sale of Terratec Environmental Ltd ("Terratec") previously included in the Market-Based Businesses segment. A summary of discontinued operations presented in the Consolidated Statements of Operations and Comprehensive Income for the three and nine months ended September 30, 2014 is as follows:

	Three Months Ended September 30,	Nine Months Ended September 30,
	2014	2014
Operating revenues	$ 4,910	$ 12,234
Total operating expenses, net	7,973	17,657
Loss from discontinued operations before income taxes	(3,063)	(5,423)
Provision from income taxes	1,360	865
Loss from discontinued operations	$ (4,423)	$ (6,288)

Note 4: Stockholders' Equity

Accumulated Other Comprehensive Loss

The following table presents changes in accumulated other comprehensive loss by component, net of tax, for the nine months ended September 30, 2015 and 2014, respectively:

	Defined Benefit Plans					
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial Loss (Gain)	Foreign Currency Translation	Loss on Cash Flow Hedge	Total Accumulated Other Comprehensive Loss
Beginning balance at January 1, 2015	$ (115,830)	$ 879	$ 31,119	$ 2,755	$ (791)	$ (81,868)
Other comprehensive loss before reclassifications	—	—	—	(1,388)	—	(1,388)
Amounts reclassified from accumulated other comprehensive loss	—	117	3,906	—	58	4,081
Net comprehensive income (loss) for the period	—	117	3,906	(1,388)	58	2,693
Ending balance at September 30, 2015	$ (115,830)	$ 996	$ 35,025	$ 1,367	$ (733)	$ (79,175)
Beginning balance at January 1, 2014	$ (69,711)	$ 713	$ 31,150	$ 3,213	$ —	$ (34,635)
Other comprehensive loss before reclassifications	—	—	—	(594)	(825)	(1,419)
Amounts reclassified from accumulated other comprehensive loss	—	124	(22)	—	10	112
Net comprehensive income (loss) for the period	—	124	(22)	(594)	(815)	(1,307)
Ending balance at September 30, 2014	$ (69,711)	$ 837	$ 31,128	$ 2,619	$ (815)	$ (35,942)

The Company does not reclassify the amortization of defined benefit pension cost components from accumulated other comprehensive loss directly to net income in its entirety. These accumulated other comprehensive income (loss) components are included in the computation of net periodic pension cost. (See Note 8)

The amortization of the loss on cash flow hedge is reclassified to net income during the period incurred and is included in interest, net in the accompanying Consolidated Statements of Operations and Comprehensive Income. At September 30, 2015, an after-tax net loss of $78 is expected to be reclassified from accumulated other comprehensive loss to net income over the next 12 months.

Antidilutive Stock Repurchase Program

In February 2015, the Company's Board of Directors authorized a common stock repurchase program to mitigate the dilutive effect of shares issued through the Company's dividend reinvestment, employee stock purchase and executive compensation activities. This program allows the Company to purchase up to 10,000 shares of its outstanding common stock over an unrestricted period of time to minimize dilution. Under the program, the Company may repurchase its common stock in the open market or through privately negotiated transactions.

The shares repurchased are held as treasury shares, at cost, until cancelled or reissued at the discretion of the Company's management. During the nine months ended September 30, 2015, the Company repurchased 750 shares of common stock in the open market at an aggregate cost of $39,272 under the program.

Stock Options

In the first nine months of 2015, the Company granted non-qualified stock options to certain employees under the Company's 2007 Omnibus Equity Compensation Plan (the "2007 Plan"). The stock options vest ratably over the three-year service period beginning January 1, 2015. These awards have no performance vesting conditions and the grant date fair value is amortized through expense over the requisite service period using the straight-line method.

The following table presents the weighted-average assumptions used in the Black-Scholes option-pricing model and the resulting weighted-average grant date fair value per share of stock options granted during the nine months ended September 30, 2015:

Dividend yield	2.35%
Expected volatility	17.64%
Risk-free interest rate	1.48%
Expected life (years)	4.4
Exercise price	$ 52.75
Grant date fair value per share	$ 6.21

Stock options granted under the 2007 Plan have a maximum term of seven years, vest over periods ranging from one to three years, and are granted with exercise prices equal to the fair market value of the Company's common stock on the date of grant. As of September 30, 2015, $1,885 of total unrecognized compensation cost related to the non-vested stock options is expected to be recognized over the weighted-average period of 1.7 years.

The table below summarizes stock option activity for the nine months ended September 30, 2015:

	Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value
Options outstanding at January 1, 2015	1,910	$ 33.47		
Granted	301	52.75		
Forfeited or expired	(44)	44.70		
Exercised	(780)	32.70		
Options outstanding at September 30, 2015	1,387	$ 37.73	3.8	$ 24,072
Exercisable at September 30, 2015	860	$ 31.22	2.6	$ 20,526

The following table summarizes additional information regarding stock options exercised during the nine months ended September 30, 2015 and 2014:

	2015	2014
Intrinsic value	$ 15,812	$ 8,775
Exercise proceeds	25,497	10,831
Income tax benefit	4,724	2,634

Restricted Stock Units

During 2012, the Company granted selected employees an aggregate of 158 restricted stock units with internal performance measures and, separately, certain market thresholds. These awards vested in January 2015. The terms of the grants generally specified that to the extent certain performance goals, comprised of internal measures and market thresholds, were achieved, the restricted stock units would vest; if target performance was surpassed, up to 175% of the target awards would be distributed; and if performance thresholds were not met, the awards would be forfeited. In January 2015, 93 shares of common stock were issued pursuant to the vesting of these restricted stock units because performance thresholds were exceeded.

In June 2015, the Company granted 15 stock units to non-employee directors under the 2007 Plan. The stock units vested on the date of grant; however, distribution of the shares will be made within 30 days of the earlier of (a) 15 months after grant date or (b) the participant's separation from service. Because these stock units vested on grant date, the total grant date fair value was recorded in operation and maintenance expense on the grant date.

In the first nine months of 2015, the Company granted restricted stock units, both with and without performance conditions, to certain employees under the 2007 Plan. The restricted stock units without performance conditions vest ratably over the three-year service period beginning January 1, 2015 and the restricted stock units with performance conditions vest ratably over the three-year performance period beginning January 1, 2015 (the "Performance Period"). Vesting of the shares underlying the restricted stock units with performance conditions is contingent upon the achievement of internal performance measures and, separately, certain market thresholds over the Performance Period. The restricted stock units granted with service-only conditions and those with internal performance measures are valued at the market value of the Company's common stock on the date of grant. The restricted stock units granted with market conditions are valued using a Monte Carlo model.

The following table presents the weighted-average assumptions used in the Monte Carlo simulation for restricted stock units with market conditions granted during the nine months ended September 30, 2015:

Expected volatility	14.93%
Risk-free interest rate	1.07%
Expected life (years)	3

The grant date fair value of the restricted stock unit awards that vest ratably and have market and/or performance and service conditions is amortized through expense over the requisite service period using the graded-vesting method. Restricted stock units that have no performance conditions are amortized through expense over the requisite service period using the straight-line method. As of September 30, 2015, $5,845 of total unrecognized compensation cost related to the non-vested restricted stock units is expected to be recognized over the weighted-average remaining life of 1.1 years.

The table below summarizes restricted stock unit activity for the nine months ended September 30, 2015:

	Shares	Weighted-Average Grant Date Fair Value (per share)
Non-vested total at January 1, 2015	516	$ 41.46
Granted	150	55.63
Performance share adjustment	93	38.11
Vested	(304)	39.46
Forfeited	(22)	45.38
Non-vested total at September 30, 2015	433	$ 46.86

The following table summarizes additional information regarding restricted stock units issued during the nine months ended September 30, 2015 and 2014:

	2015	2014
Intrinsic value	$ 16,544	$ 14,938
Income tax benefit	1,957	1,592

If dividends are paid with respect to shares of the Company's common stock before the restricted stock units are distributed, the Company credits a liability for the value of the dividends that would have been paid if the restricted stock units were shares of Company common stock. When the restricted stock units are distributed, the Company pays the participant a lump sum cash payment equal to the value of the dividend equivalents accrued. The Company accrued dividend equivalents totaling $621 and $640 to retained earnings during the nine months ended September 30, 2015 and 2014, respectively.

Note 5: Long-Term Debt

The following long-term debt was issued during the first nine months of 2015:

Company	Type	Rate	Maturity	Amount
American Water Capital Corp. ("AWCC") (a)	Senior notes—fixed rate	3.40%-4.30%	2025-2045	$ 550,000
Other American Water subsidiaries	Private activity bonds and government funded debt—fixed rate	1.00%-1.56%	2022-2032	13,727
Total issuances				$ 563,727

(a) AWCC, which is a wholly owned subsidiary of the Company, has a support agreement with the Company that, under certain circumstances, is the functional equivalent of a guarantee.

The following long-term debt was retired through sinking fund payments during the first nine months of 2015:

	Type	Rate	Maturity	Amount
American Water Capital Corp.	Private activity bonds and government funded debt—fixed rate	1.79%-5.25%	2015-2031	$ 36,442
Other American Water subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-7.45%	2015-2041	50,733
Other American Water subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other American Water subsidiaries	Capital lease payments	12.23%	2026	26
Total retirements and redemptions				$ 88,401

The Company has an interest rate swap to hedge $100,000 of its 6.085% fixed-rate debt maturing 2017. The Company pays variable interest of six-month LIBOR plus 3.422%. The interest rate swap is a derivative instrument accounted for as a fair-value hedge and matures with the fixed-rate debt in 2017.

The following table provides a summary of the fair value for the interest rate swap and related debt recorded by the Company and the line item in the Consolidated Balance Sheets in which such amounts are recorded:

Balance sheet classification	September 30, 2015	December 31, 2014
Regulatory and other long-term assets		
Other	$ 3,493	$ 3,636
Long-term debt		
Long-term debt	3,478	3,570

For derivative instruments that are designated and qualify as fair-value hedges, the gain or loss on the hedge instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current net income. The Company includes the gain or loss on the derivative instrument and the offsetting loss or gain on the hedged item in interest expense as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Income statement classification	2015	2014	2015	2014
Interest, net				
Gain (loss) on swap	$ 21	$ (1,058)	$ (143)	$ (1,261)
Gain (loss) on borrowing	(82)	$ 945	92	1,198
Hedge ineffectiveness	(61)	(113)	(51)	(63)

Note 6: Short-Term Debt

Short-term debt consists of commercial paper borrowings totaling $379,944 (net of discount of $56) at September 30, 2015 and $449,959 (net of discount of $41) at December 31, 2014. At September 30, 2015, there were no borrowings with maturities greater than three months.

Note 7: Income Taxes

The Company's estimated annual effective tax rate for the nine months ended September 30, 2015 was 39.5% compared to 39.7% for the nine months ended September 30, 2014, excluding various discrete items.

The Company’s actual effective tax rates for continuing operations were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Actual effective tax rate	39.4%	40.6%	39.6%	40.1%

In connection with the Company’s filing of its consolidated 2014 tax return in September 2015, the Company deducted bonus depreciation of which approximately $88,840 of deferred tax liabilities is related to the Regulated Businesses segment.

Note 8: Pension and Other Postretirement Benefits

The following table provides the components of net periodic benefit costs:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Components of net periodic pension benefit cost				
Service cost	$ 9,334	$ 7,943	$ 28,002	$ 23,830
Interest cost	18,576	19,163	55,728	57,489
Expected return on plan assets	(24,366)	(23,709)	(73,098)	(71,128)
Amortization of:				
Prior service cost	188	181	565	543
Actuarial loss (gain)	6,277	(33)	18,831	(98)
Net periodic pension benefit cost	$ 10,009	$ 3,545	$ 30,028	$ 10,636
Components of net periodic other postretirement benefit cost				
Service cost	$ 3,443	$ 2,764	$ 10,330	$ 8,293
Interest cost	7,466	7,152	22,397	21,454
Expected return on plan assets	(6,299)	(6,875)	(18,897)	(20,625)
Amortization of:				
Prior service credit	(547)	(548)	(1,642)	(1,642)
Actuarial loss (gain)	1,252	(20)	3,757	(60)
Net periodic other postretirement benefit cost	$ 5,315	$ 2,473	$ 15,945	$ 7,420

The Company contributed $20,100 to its defined benefit pension plans in the first nine months of 2015 and expects to contribute $7,900 during the remainder of 2015. In addition, the Company contributed $19,895 for the funding of its other postretirement plans in the first nine months of 2015 and expects to contribute $6,632 during the remainder of 2015.

Note 9: Commitments and Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. At September 30, 2015, the Company has accrued approximately $3,600 of probable loss contingencies and has estimated that the maximum amount of losses associated with reasonably possible loss contingencies is $33,600. For certain matters, the Company is unable to estimate possible losses.

On January 9, 2014, a chemical storage tank owned by Freedom Industries, Inc. leaked two substances used for processing coal, 4-methylcyclohexane methanol, or MCHM, and PPH/DiPPH, a mix of polyglycol ethers, into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant intake in Charleston, West Virginia. To date, 58 lawsuits have been filed against WVAWC with respect to this matter in the United States District Court for the Southern District of West Virginia or West Virginia Circuit Courts in Kanawha, Boone and Putnam counties. Fifty-two of the state court cases naming WVAWC, and one case naming both WVAWC and American Water Works Service Company, Inc. ("AWWSC," and together with WVAWC and the Company, the "American Water Defendants") were removed to the United States District Court for the Southern District of West Virginia, but are subject to motions to remand the cases back to the state courts and have been consolidated for the sole purpose of resolving venue issues. Four of the cases pending before the federal district court were consolidated for purposes of discovery, and an amended consolidated complaint for those cases was filed on December 9, 2014 by several plaintiffs who allegedly suffered economic losses, loss of use of property and tap water or other specified adverse consequences as a result of the Freedom Industries spill, on behalf of a purported class of all persons and businesses supplied with, using, or exposed to water contaminated with Crude MCHM and provided by WVAWC in Logan, Clay, Lincoln, Roane, Jackson, Boone, Putnam, and Kanawha Counties and the Culloden area of Cabell County, West Virginia as of January 9, 2014. The amended consolidated complaint names several individuals and corporate entities as defendants, including the American Water Defendants. The plaintiffs seek unspecified damages for alleged business or economic losses; unspecified damages or a mechanism for recovery to address a variety or alleged costs, loss of use of property, personal injury and other consequences allegedly suffered by purported class members; punitive damages and certain additional relief, including the establishment of a medical monitoring program to protect the purported class members from an alleged increased risk of contracting serious latent disease.

On April 9, 2015, the court in the Federal action denied a motion to dismiss all claims against the Company for lack of personal jurisdiction. A separate motion to dismiss filed by AWWSC and WVAWC (and joined by the Company) asserting various legal defenses in the Federal action was resolved by the court on June 3, 2015. The court dismissed three causes of action but denied the motion to dismiss with respect to the remaining causes of actions and allowed the plaintiffs to continue to pursue the various claims for damages alleged in their amended consolidated complaint.

On July 6, 2015, the plaintiffs filed a motion seeking certification of a class defined to include persons who resided in dwellings served by WVAWC's Kanawha Valley Treatment Plant ("KVTP") on January 9, 2014, persons who owned businesses served by the KVTP on January 9, 2014, and hourly employees who worked for such businesses. The plaintiffs sought a class-wide determination of liability against the American Water Defendants, among others, and of damages to the three groups of plaintiffs as a result of the "Do Not Use" order that was issued after the Freedom Industries spill.

A court-directed mediation was held at the end of September 2015 with the assistance of private mediators. Representatives of the American Water Defendants, Eastman Chemical, the Federal action plaintiffs, and the plaintiffs in the 53 state court cases removed to Federal court, as well as insurance carriers for certain of the defendants, participated in the mediation. No resolution was reached and no further mediation discussions have been scheduled to date.

On October 8, 2015, the court in the Federal action granted in part and denied in part the plaintiffs' class certification motion. The court certified a class addressing certain liability elements of the negligence claims against Eastman Chemical and of the negligence and breach of contract claims against the American Water Defendants. However, the court granted the joint motion by defendants to exclude certain expert testimony, disallowing the testimony of plaintiffs' economic damages experts, and denied class certification as to any damages, including punitive damages. Thus, determination or quantification of damages, if any, would be made in subsequent proceedings on an individual basis.

The Company believes that the causes of action asserted against the American Water Defendants in the lawsuits described above are without merit and continues to vigorously defend itself in these proceedings. Given the current stage of these proceedings, the Company cannot reasonably estimate the amount of any reasonably possible losses or a range of such losses related to these proceedings.

Other than as described in this Note 9, the Company believes that damages or settlements recovered by plaintiffs, if any, in claims or actions will not, individually or in the aggregate, have a material adverse effect on the Company.

Note 10: Environmental Matters

The Company's water and wastewater operations are subject to federal, state, local and foreign requirements relating to environmental protection, and as such, the Company periodically becomes subject to environmental claims in the normal course of business. Environmental expenditures that relate to current operations or provide a future benefit are expensed or capitalized as appropriate. Remediation costs that relate to an existing condition caused by past operations are accrued, on an undiscounted basis, when it is probable that these costs will be incurred and can be reasonably estimated. Remediation costs accrued amounted to $1,100 and $2,200 at September 30, 2015 and December 31, 2014, respectively. The accrual relates to a conservation agreement entered into by a subsidiary of the Company with the National Oceanic and Atmospheric Administration ("NOAA") requiring the Company to, among other provisions, implement certain measures to protect the steelhead trout and its habitat in the Carmel River watershed in the state of California. The Company has agreed to pay $1,100 annually from 2010 through 2016. The Company's inception-to-date costs related to the NOAA agreement were recorded in regulatory assets in the accompanying Consolidated Balance Sheets at September 31, 2015 and December 31, 2014 and are expected to be fully recovered from customers in future rates.

Note 11: Earnings per Common Share

Earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security. The Company has participating securities related to restricted stock units, granted under the 2007 Plan, that earn dividend equivalents on an equal basis with common shares. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities.

The following table provides the components for calculating basic earnings per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Basic	2015	2014	2015	2014
Income from continuing operations	$ 173,894	$ 156,608	$ 377,012	$ 335,895
Loss from discontinued operations, net of tax	—	(4,423)	—	(6,288)
Net income	173,894	152,185	377,012	329,607
Less: Distributed earnings to common stockholders	61,192	55,664	178,234	161,439
Less: Distributed earnings to participating securities	19	17	51	49
Undistributed earnings	112,683	96,504	198,727	168,119
Undistributed earnings allocated to common stockholders	112,651	96,478	198,676	168,070
Undistributed earnings allocated to participating securities	32	26	51	49
Total income from continuing operations available to common stockholders, basic	$ 173,843	$ 156,565	$ 376,910	$ 335,797
Total net income available to common stockholders, basic	$ 173,843	$ 152,142	$ 376,910	$ 329,509
Weighted-average common shares outstanding, basic	179,578	178,992	179,534	178,800
Basic earnings per share: (a)				
Income from continuing operations	$ 0.97	$ 0.87	$ 2.10	$ 1.88
Loss from discontinued operations, net of tax	$ 0.00	$ (0.02)	$ 0.00	$ (0.04)
Net income	$ 0.97	$ 0.85	$ 2.10	$ 1.84

(a) Earnings per share amounts are computed independently for income from continuing operations available to common stockholders, loss from discontinued operations and net income available to common stockholders. As a result, the sum of per-share amounts for income from continuing operations available to common stockholders and discontinued operations may not equal the total per-share amount for net income available to common stockholders.

Diluted earnings per common share is based on the weighted-average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents related to the restricted stock units, stock options, and employee stock purchase plan. The dilutive effect of the common stock equivalents is calculated using the treasury stock method and expected proceeds on vesting of the restricted stock units, exercise of the stock options and purchases under the employee stock purchase plan.

The following table provides the components for calculating diluted earnings per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Diluted	2015	2014	2015	2014
Total income from continuing operations available to common stockholders, basic	$ 173,843	$ 156,565	$ 376,910	$ 335,797
Loss from discontinued operations, net of tax	—	(4,423)	—	(6,288)
Total net income available to common stockholders, basic	173,843	152,142	376,910	329,509
Undistributed earnings for participating securities	32	26	51	49
Total income from continuing operations available to common stockholders, diluted	$ 173,875	$ 156,591	$ 376,961	$ 335,846
Total net income available to common stockholders, diluted	$ 173,875	$ 152,168	$ 376,961	$ 329,558
Weighted-average common shares outstanding, basic	179,578	178,992	179,534	178,800
Common stock equivalents:				
Restricted stock units	442	497	439	460
Stock options	332	458	372	462
Employee stock purchase plan	1	1	1	1
Weighted-average common shares outstanding, diluted	180,353	179,948	180,346	179,723
Diluted earnings per share: (a)				
Income from continuing operations	$ 0.96	$ 0.87	$ 2.09	$ 1.87
Loss from discontinued operations, net of tax	$ 0.00	$ (0.02)	$ 0.00	$ (0.03)
Net income available	$ 0.96	$ 0.85	$ 2.09	$ 1.83

(a) Earnings per share amounts are computed independently for income from continuing operations available to common stockholders, loss from discontinued operations and net income available to common stockholders. As a result, the sum of per-share amounts for income from continuing operations available to common stockholders and discontinued operations may not equal the total per-share amount for net income available to common stockholders.

The following potentially dilutive common stock equivalents were not included in the earnings per share calculations because they were anti-dilutive:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Stock options	292	49	292	334
Restricted stock units where certain performance conditions were not met	21	53	22	53

Note 12: Fair Value of Financial Assets and Liabilities

Fair Value of Financial Instruments

The Company used the following methods and assumptions to estimate its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported in the accompanying Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted prices in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs. The fair values of instruments classified as Level 2 and 3 are determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market rates. As a majority of the Company's debts do not trade in active markets, the Company calculated a base yield curve using a risk-free rate (a U.S. Treasury securities yield curve) plus a credit spread that is based on the following two factors: an average of the Company's own publicly-traded debt securities and the current market rates for U.S. Utility debt securities with a bond credit rating of A. The Company used these yield curve assumptions to derive a base yield for the Level 2 and Level 3 securities. Additionally, the Company adjusted the base yield for specific features of the debt securities including call features, coupon tax treatment and collateral for the Level 3 instruments.

The carrying amounts, including fair value adjustments previously recognized in acquisition purchase accounting and a fair value adjustment related to the Company's interest rate swap fair value hedge (which is classified as Level 2 in the fair value hierarchy), and fair values of the financial instruments are as follows:

		Fair Value at September 30, 2015			
	Carrying Amount	Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 15,936	$ —	$ —	$ 21,612	$ 21,612
Long-term debt (excluding capital lease obligations)	5,960,128	3,379,017	1,449,557	1,941,459	6,770,033

		Fair Value at December 31, 2014			
	Carrying Amount	Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 17,151	$ —	$ —	$ 22,167	$ 22,167
Long-term debt (excluding capital lease obligations)	5,491,341	2,874,622	1,474,708	2,055,058	6,404,388

Recurring Fair Value Measurements

The following table presents assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy at September 30, 2015 and December 31, 2014, respectively:

	At Fair Value as of September 30, 2015			
Recurring Fair Value Measures	Level 1	Level 2	Level 3	Total
Assets				
Restricted funds	$ 32,174	$ —	$ —	$ 32,174
Rabbi trust investments	—	11,762	—	11,762
Deposits	1,666	—	—	1,666
Mark-to-market derivative asset	—	3,493	—	3,493
Other investments	4,135	—	—	4,135
Total assets	37,975	15,255	—	53,230
Liabilities				
Deferred compensation obligation	—	10,659	—	10,659
Mark-to-market derivative liability	—	865	—	865
Total liabilities	—	11,524	—	11,524
Total net assets	$ 37,975	$ 3,731	$ —	$ 41,706

	At Fair Value as of December 31, 2014			
Recurring Fair Value Measures	Level 1	Level 2	Level 3	Total
Assets				
Restricted funds	$ 22,817	$ —	$ —	$ 22,817
Rabbi trust investments	—	11,751	—	11,751
Deposits	4,158	—	—	4,158
Mark-to-market derivative asset	—	3,636	—	3,636
Other investments	22,365	—	—	22,365
Total assets	49,340	15,387	—	64,727
Liabilities				
Deferred compensation obligation	—	11,765	—	11,765
Mark-to-market derivative liability	—	1,012	—	1,012
Total liabilities	—	12,777	—	12,777
Total net assets	$ 49,340	$ 2,610	$ —	$ 51,950

Restricted funds—The Company's restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operations and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred.

Rabbi trust investments—The Company's rabbi trust investments consist primarily of equity and fixed income indexed funds from which supplemental executive retirement plan benefits and deferred compensation obligations can be paid. The Company includes these assets in other long-term assets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets.

Deferred compensation obligations—The Company's deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities. The value of the Company's deferred compensation obligations is based on the market value of the participants' notional investment accounts. The notional investments are comprised primarily of mutual funds, which are based on observable market prices.

Mark-to-market derivative asset and liability—The Company utilizes fixed-to-floating interest-rate swaps, typically designated as fair-value hedges, to achieve a targeted level of variable-rate debt as a percentage of total debt. The Company also employs derivative financial instruments in the form of variable-to-fixed interest rate swaps, classified as economic hedges, in order to fix the interest cost on some of its variable-rate debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

Other investments—Other investments primarily represent money market funds used for active employee benefits. The Company includes other investments in other current assets.

Note 13: Segment Information

The Company has two operating segments that are also the Company’s two reportable segments, referred to as Regulated Businesses and Market-Based Businesses. The following table includes the Company’s summarized segment information:

	As of or for the Three Months Ended September 30, 2015			
	Regulated Businesses	Market-Based Businesses	Other	Consolidated
Net operating revenues	$ 780,729	$ 120,373	$ (4,896)	$ 896,206
Depreciation and amortization	104,235	2,043	4,918	111,196
Total operating expenses, net	437,964	101,573	(4,614)	534,923
Income from continuing operations before income taxes	283,632	20,666	(17,213)	287,085
Total assets	15,091,471	497,051	1,516,651	17,105,173

	As of or for the Three Months Ended September 30, 2014			
	Regulated Businesses	Market-Based Businesses	Other	Consolidated
Net operating revenues	$ 753,701	$ 96,980	$ (4,512)	$ 846,169
Depreciation and amortization	99,120	1,447	6,222	106,789
Total operating expenses, net	434,912	79,915	(5,943)	508,884
Income from continuing operations before income taxes	258,539	17,634	(12,360)	263,813
Total assets	14,161,472	309,935 (a)	1,244,240	15,715,647

	As of or for the Nine Months Ended September 30, 2015			
	Regulated Businesses	Market-Based Businesses	Other	Consolidated
Net operating revenues	$ 2,082,950	$ 307,822	$ (14,367)	$ 2,376,405
Depreciation and amortization	306,205	4,241	17,050	327,496
Total operating expenses, net	1,290,551	260,449	(17,740)	1,533,260
Income from continuing operations before income taxes	616,530	50,460	(42,776)	624,214
Total assets	15,091,471	497,051	1,516,651	17,105,173

	As of or for the Nine Months Ended September 30, 2014			
	Regulated Businesses	Market-Based Businesses	Other	Consolidated
Net operating revenues	$ 2,039,446	$ 253,857	$ (13,353)	$ 2,279,950
Depreciation and amortization	296,084	4,354	17,960	318,398
Total operating expenses, net	1,302,298	212,075	(13,938)	1,500,435
Income from continuing operations before income taxes	555,985	43,593	(38,910)	560,668
Total assets	14,161,472	309,935 (a)	1,244,240	15,715,647

(a) Amount includes assets of discontinued operations of $6,256.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). All statements included in this Form 10-Q, other than statements of historical fact, may constitute forward-looking statements. Forward-looking statements can be identified by the use of words such as “may,” “should,” “will,” “could,” “estimates,” “predicts,” “potential,” “continue,” “anticipates,” “believes,” “plans,” “expects,” “future” and “intends” and similar expressions. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance to differ from those projected in the forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Factors that could cause or contribute to differences in results and outcomes from those in our forward-looking statements include, without limitation, those items discussed in the “Risk Factors” section or other sections in the Company’s annual report on Form 10-K (“Form 10-K”) for the year ended December 31, 2014, and in this Form 10-Q, each as filed with the Securities and Exchange Commission (“SEC”). We undertake no obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

General

American Water Works Company, Inc. (“American Water” or the “Company”) is the largest investor-owned United States water and wastewater utility company, as measured both by operating revenue and population served. Our primary business involves the ownership of water and wastewater utilities that provide water and wastewater services to residential, commercial, industrial and other customers. These utilities are generally subject to economic regulation by state regulatory agencies in the states in which they operate. We report the financial results of these utilities in our Regulated Businesses segment. We also provide other services through businesses that are not subject to economic regulation by state regulatory agencies. We report the results of these businesses in our Market-Based Businesses segment. For further description of our businesses see Part I, Item 1, “Business,” in our Form 10-K and “Overview - Growth - Infrastructure improvements, acquisitions and strategic investments” in this section.

You should read the following discussion in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Quarterly Report on Form 10-Q and in our Form 10-K.

Overview

Financial Results

Highlights of our operating results per diluted share for the three and nine months ended September 30, 2015 compared to same periods during 2014 are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	**2014**	**2015**	**2014**
Income from continuing operations	$ 0.96	$ 0.87	$ 2.09	$ 1.87
Loss from discontinued operations, net of tax	$ 0.00	$ (0.02)	$ 0.00	$ (0.03)
Diluted earnings per share	$ 0.96	$ 0.85	$ 2.09	$ 1.83

Continuing Operations

Income from continuing operations increased 9 cents and 22 cents per diluted share for the three and nine months ended September 30, 2015, respectively, compared to the same periods in the prior year. Excluding the costs related to the Freedom Industries chemical spill in West Virginia of 4 cents per diluted share for the nine months ended September 30, 2014, income for the nine months ended September 30, 2015 increased 18 cents per diluted share. The increases for both the three and nine month periods in 2015 compared to 2014 was mainly due to continued growth in both our Regulated Businesses and Market-Based Businesses segments.

For the quarter ended September 30, 2015, our Regulated Businesses segment continued to experience growth through infrastructure investment along with an increase in demand compared to the same period in the prior year. Our Market-Based Businesses segment also continued to experience earnings growth through its Military Services Group (“MSG”) line of business.

For the nine months ended September 30, 2015, the Regulated Businesses segment experienced growth through infrastructure investments and increased demand coupled with lower operating and maintenance expenses from a continued focus on operational efficiency. Our Market-Based Businesses segment also continued to experience earnings growth through its MSG line of business.

Discontinued Operations

In the fourth quarter of 2014, we sold our Terratec line of business, which was part of our Market-Based Businesses segment. The after-tax loss from discontinued operations for both the three and nine months ended September 30, 2014 includes the operating results of the entity prior to the sale.

Regulatory Matters

The table below provides rate authorizations by state of annualized revenues awarded assuming a constant volume and effective in 2015:

	For the Three Months Ended September 30, 2015	For the Nine Months Ended September 30, 2015
	(In millions)	
State		
General Rate Cases:		
New Jersey (September 21)	$ 22.0	$ 22.0
Kentucky (July 2) (a)	—	—
Maryland (June 19)	—	0.5
Indiana (January 29)	—	5.1
California (January 1)	—	5.2
Total General Rate cases	$ 22.0	$ 32.8
Infrastructure charges:		
Pennsylvania (b)	$ 4.6	$ 6.2
New Jersey (January 1)	—	9.4
Illinois (c)	—	5.9
Tennessee (June 30)	—	2.2
Missouri (June 27) (d)	—	1.9
New York (June 1)	—	0.1
Total Infrastructure charges	$ 4.6	$ 25.7

(a) Additional annualized revenue granted of $0.2 million; increase is effective in one-fourth increments over each of the next four years.
(b) Rates of $1.6 million and $4.6 million became effective April 1, 2015 and July 1, 2015, respectively.
(c) Rates of $4.9 million and $1.0 million became effective January 1, 2015 and February 1, 2015, respectively.
(d) The Office of the Public Counsel filed an appeal notice claiming St. Louis County no longer meets the required population requirement for an infrastructure charge.

In July 2015, our California subsidiary filed an application with the California Public Utilities Commission (the "CPUC") to request changes to the present rate design and the emergency conservation and rationing plan for water customers in certain areas within its Monterey County service district. If approved, the proposed changes would allow (i) recovery of existing under-collections of the net water revenue adjustment mechanism/modified cost balancing account ("WRAM/MCBA") balance, currently amounting to approximately $43 million, over 20 years earning a pretax rate of 8.41%; (ii) an annual consumption true-up mechanism and rate design that provide for more timely collection of the cost of service; and (iii) modification of existing conservation and rationing plans. We expect a CPUC decision in mid to late 2016. On November 4, 2015, our California subsidiary received an Assigned Commissioner's Scoping Memo and Ruling related to our WRAM filing. The Company is reviewing the terms of this document to determine the impact on the WRAM filing and the related timing of the decision, if any.

On July 31, 2015, our Missouri subsidiary filed a general rate case requesting additional annualized revenue of approximately $25.2 million.

Following the close of the third quarter, additional annualized revenue of $7.8 million resulting from infrastructure charges in our Pennsylvania subsidiary became effective on October 1, 2015. Also, on October 30, 2015, our Virginia subsidiary filed a general rate case requesting additional annualized revenue of approximately $8.7 million.

As of November 4, 2015, we are awaiting final general rate case orders in three states, requesting additional annualized revenue of $69.5 million. There is no assurance that all or any portion of these requests will be granted.

Focusing on Central Themes

For 2015, our focus is anchored on five central themes: 1) Customers, 2) Safety, 3) People, 4) Growth and 5) Operational Efficiency. We will continue our focus on operating our business responsibly and managing our operating and capital costs in a manner that benefits our customers and produces value for our shareholders. Additionally, we will continue our ongoing strategy that ensures a safe workplace for our employees, emphasizes public safety for our customers and communities, and leverages our human resources, processes and technology innovation to make our business more effective and efficient. The progress that we have made in the first nine months of 2015 with respect to growth and improvement in our operational efficiency ratio is described below.

Growth - Infrastructure improvements, acquisitions and strategic investments

During the nine months of 2015, we made capital investments of approximately $969.9 million, focused in three key areas:

- $793.1 million to improve infrastructure in our Regulated Businesses.
- $132.8 million for the acquisition (the “Keystone Acquisition”) of our ninety-five percent interest in Water Solutions Holdings, LLC, the parent company of Keystone Clearwater Solutions, LLC (“Keystone”), in the third quarter of 2015. Keystone is a water service provider that offers a range of water-related services to the oil and gas industry in the Appalachian region and is included in our Market-Based Businesses segment.
- $44.0 million for regulated acquisitions, which added a total of more than 19,000 water and wastewater customers.

For the full-year of 2015, our total capital investment, including acquisitions, is expected to be in the range of $1.3 to $1.4 billion, most of which is for improving infrastructure in our Regulated Businesses.

Technology and Operational Efficiency - Continuing Improvement in O&M Efficiency Ratio for our Regulated Businesses

We continued to improve on our operation and maintenance (“O&M”) efficiency ratio (a non-GAAP measure). Our adjusted O&M efficiency ratio for the twelve months ended September 30, 2015 was 35.8%, compared to 36.8% for the twelve months ended September 30, 2014. The improvement in the 2015 O&M efficiency ratio over this period was attributable to both an increase in revenue and decreases in O&M expenses.

We evaluate our operating performance using this measure because management believes it is a direct measure of the efficiency of our Regulated Businesses’ operations. This information is intended to enhance an investor’s overall understanding of our operating performance. The O&M efficiency ratio is not a measure defined under GAAP and may not be comparable to other companies’ operating measures and should not be used in place of the GAAP information provided elsewhere in this report.

Our O&M efficiency ratio is defined as our regulated operation and maintenance expense divided by regulated operating revenues, where both O&M expense and operating revenues were adjusted to eliminate purchased water expense. Additionally, from the O&M expenses, we excluded the allocable portion of non-O&M support services cost, mainly depreciation and general taxes that are reflected in the Regulated Businesses segment as O&M costs but for consolidated financial reporting purposes are categorized within other line items in the accompanying Consolidated Statement of Operations and Comprehensive Income. In addition, to the standard adjustments to the O&M Efficiency ratio for the twelve months ended September 30, 2015 and 2014, we have also excluded from operating revenues and O&M expenses the estimated impact from changes in consumption as a result of weather and the West Virginia Freedom Industries chemical spill. We excluded all the above items from the calculation as we believe such items are not reflective of management’s ability to increase efficiency of the Company’s regulated operations.

The following table provides the calculation and reconciliation that compares O&M and operating revenues, as determined in accordance with GAAP, to those amounts utilized in the calculation of our adjusted O&M efficiency ratio for the twelve months ended September 30, 2015 as compared to the same period in 2014.

Calculation and Reconciliation of Adjusted Regulated O&M Efficiency Ratio (a Non-GAAP Measure):

	For the Twelve Months Ended September 30, 2015	For the Twelve Months Ended September 30, 2014
	(In thousands)	
Total Operation and Maintenance Expense	$ 1,369,553	$ 1,330,605
Less:		
Operation and maintenance expense—Market-Based Businesses	337,415	272,386
Operation and maintenance expense—Other	(52,805)	(53,606)
Total Regulated Operation and Maintenance Expense	1,084,943	1,111,825
Less:		
Regulated purchased water expense	117,801	119,692
Allocation of non-operation and maintenance expense	37,095	37,975
Impact of West Virginia Freedom Industries chemical spill	136	10,302
Estimated impact of weather (mid-point of range)	—	(1,762)
Adjusted Regulated Operation and Maintenance Expense (a)	$ 929,911	$ 945,618
Total Operating Revenues	$ 3,107,783	$ 2,986,192
Less:		
Operating revenues—Market-Based Businesses	408,643	334,647
Operating revenues—Other	(18,693)	(17,594)
Total Regulated Operating Revenues	2,717,833	2,669,139
Less:		
Regulated purchased water expense*	117,801	119,692
Plus:		
Impact of West Virginia Freedom Industries chemical spill	—	1,012
Estimated impact of weather (mid-point of range)	—	16,785
Adjusted Regulated Operating Revenues (b)	$ 2,600,032	$ 2,567,244
Adjusted Regulated Operation and Maintenance Efficiency Ratio (a)/(b)	35.8%	36.8%

* Calculation assumes purchased water revenues approximate purchased water expenses.

Consolidated Results of Operations and Changes from Prior Periods

The following is a discussion of the consolidated results of operations for the three and nine months ended September 30, 2015 compared to the same periods in 2014:

Three Months Ended September 30, 2015 Compared to Three Months Ended September 30, 2014

Operating revenues. Consolidated operating revenues for the quarter ended September 30, 2015 increased $50.0 million, or 5.9%, compared to the same quarter last year. Revenues in our Regulated Businesses segment rose $27.0 million, which was mainly attributable to increases in rates, infrastructure charges and increased demand, partially offset by decreased surcharges and balancing accounts in 2015. Revenues in our Market-Based Businesses segment rose $23.4 million, largely driven by incremental revenue from our military contracts due to increased construction type projects and the addition of two military bases in the second half of 2014 coupled with contract growth in our Homeowner Services ("HOS") line of business and revenues as a result of the Keystone Acquisition in the third quarter of 2015. For further information, see the respective "Operating Revenues" discussions within the "Segment Results."

Operation and maintenance. Consolidated O&M increased by $22.3 million, or 6.5%, compared to the same period in 2014 which was primarily attributable to an increase of $21.0 million in O&M costs associated with our Market-Based Businesses segment, principally due to increased activity under our military contracts associated with the operating revenue increase discussed above, incremental costs in HOS resulting from contract growth and the addition of O&M costs as a result of the Keystone acquisition. For further information on the changes in our Regulated Businesses and Market-Based Businesses segments' O&M, see the respective "Operation and Maintenance" discussions within the "Segment Results" section below.

Depreciation and amortization. Depreciation and amortization expense increased by $4.4 million, or 4.1%, primarily as a result of additional utility plant placed in service.

Other income (expenses). Other expenses increased by $0.7 million, or 1.0%, compared to the same period in 2014. The increase is primarily due to an increase in interest expense, mainly as a result of a $550 million debt issuance in the third quarter of 2015, partially offset by higher allowance for funds used during construction in 2015.

Provision for income taxes. Our consolidated provision for income taxes increased $6.0 million, or 5.6%, to $113.2 million for the three months ended September 30, 2015, due to the increase in pre-tax income. The effective tax rate for the three months ended September 30, 2015 and 2014 was 39.4% and 40.6%, respectively. Included in the three months ended September 30, 2014 were $2.1 million of discrete tax charges associated with uncertain tax positions.

Loss from discontinued operations, net of tax. We disposed of our Terratec line of business, which was previously reported in our Market-Based Businesses segment, in the fourth quarter of 2014. These results were classified as discontinued operations for all periods presented. For the three months ended September 30, 2014, the loss from discontinued operations, net of tax, represents the operating results of Terratec for the period, costs associated with the then pending sale and an income tax valuation allowance.

Nine Months Ended September 30, 2015 Compared to Nine Months Ended September 30, 2014

Operating revenues. Consolidated operating revenues for the nine months ended September 30, 2015 increased $96.5 million, or 4.2%, compared to the same period last year. Revenues in our Market-Based Businesses segment rose $54.0 million, largely driven by incremental revenue from our military contracts due to increased construction type project activity and the addition of two military bases in the second half of 2014 coupled with contract growth in HOS and additional operating revenues attributable to the Keystone Acquisition. Revenues in our Regulated Businesses segment rose $43.5 million mainly attributable to rate increases, infrastructure charges and increased demand, partially offset by decreased surcharges and balancing accounts in 2015. For further information, see the respective "Operating Revenues" discussions within the "Segment Results" section below.

Operation and maintenance. Consolidated O&M increased by $19.7 million, or 2.0%, compared to the same period in 2014. This increase was primarily attributable to an additional $48.0 million in O&M costs in our Market-Based Businesses segment, principally due to increased activity related to our military contracts, as noted in the operating revenue discussion above, incremental costs in the HOS line of business and the addition of O&M costs as a result of the Keystone Acquisition. Partially offsetting the increase were lower O&M costs in our Regulated Businesses segment of $26.6 million from continued cost management, lower production and authorized recovery of costs as a result of the finalization of our California general rate case in the first quarter of 2015. Also, included in the 2014 results were incremental costs of $10.3 million associated with the Freedom Industries chemical spill, primarily included in operating supplies and services and other O&M expenses. For further information on the changes in our Regulated Businesses and Market-Based Businesses segments' O&M, see the respective "Operation and Maintenance" discussions within the "Segment Results" section below.

Depreciation and amortization. Depreciation and amortization expense increased by $9.1 million, or 2.9%, primarily as a result of additional utility plant placed in service.

General taxes. General taxes increased $5.9 million, or 3.3%, primarily due to incremental business and occupation taxes and higher property tax assessments for various subsidiaries in our Regulated Businesses segment.

Other income (expenses). Other expenses increased by $0.1 million, compared to the same period in 2014. The increase was primarily due to incremental interest expense from additional debt issuances, including the $550.0 million debt issuance in the third quarter of 2015. Partially offsetting the increases was incremental income as a result of the authorization through the California rate case of a sharing mechanism between shareholders and customers for prior chemical contamination settlement proceeds of $4.1 million and the recovery of the allowance for borrowed funds used during construction on authorized business transformation project costs.

Provision for income taxes. Our consolidated provision for income taxes increased $22.4 million, or 10.0%, to $247.2 million for the nine months ended September 30, 2015, due to the increase in pre-tax income. The effective tax rates for the nine months ended September 30, 2015 and 2014 were 39.6% and 40.1%, respectively. Included in the nine months ended September 30, 2014 were $2.0 million of discrete tax charges associated with uncertain tax positions.

Loss from discontinued operations, net of tax. We disposed of our Terratec line of business, which was previously reported in our Market-Based Businesses segment, in the fourth quarter of 2014. These results were classified as discontinued operations for all periods presented. The disposition of Terratec was finalized in the fourth quarter of 2014. For the nine months ended September 30, 2014, the loss from discontinued operations, net of tax, represents the operating results of Terratec for the period, the cost of the then pending sale and an income tax valuation allowance.

Segment Results

We have two reportable segments: the Regulated Businesses and the Market-Based Businesses segments. We evaluate the performance of our segments and allocate resources based on several factors, with the primary measure being income before income taxes.

Regulated Businesses Segment

The following table summarizes certain financial information for our Regulated Businesses Segment for the periods indicated:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2015	2014	Increase (Decrease)	2015	2014	Increase (Decrease)
	(In thousands)					
Operating revenues	$ 780,729	$ 753,701	$ 27,028	$ 2,082,950	$ 2,039,446	$ 43,504
Operation and maintenance expense	277,051	278,276	(1,225)	813,660	840,224	(26,564)
Operating expenses, net	437,964	434,912	3,052	1,290,551	1,302,298	(11,747)
Income from continuing operations before income taxes	283,632	258,539	25,093	616,530	555,985	60,545

Operating revenues. Our primary business involves the ownership of water and wastewater utilities that provide services to residential, commercial, industrial and other customers. This business generally is subject to state economic regulation and our results of operations are impacted significantly by rates authorized by the state regulatory commissions in the states in which we operate.

Operating revenues increased by $27.0 million, or 3.6%, for the three months ended September 30, 2015 and increased by $43.5 million, or 2.1%, for the nine months ended September 30, 2015. The increase for the three months ended September 30, 2015 compared to the same period in 2014 is primarily due to incremental revenues of $18.6 million associated with higher demand. We attribute this increase to overall milder weather conditions in 2014 compared to 2015. In the third quarter of 2015, weather conditions varied across our regulated states. We experienced higher revenues from hot and dry conditions in our Northeast region which were offset by lower revenues from wet and milder conditions in our Central region. Also, contributing to the increase in revenue was $10.0 million attributable to rate increases, including infrastructure charges, obtained through rate authorizations for a number of our operating companies, and $2.7 million attributable to acquisitions and organic growth. The balance of the increase is mainly due to incremental revenues from other, sewer, fire and other operating revenues. Partially offsetting these increases was a $12.0 million reduction in revenues from balancing accounts, most of which was the result of the California drought and the corresponding reduction in production costs. Also, included in the $12.0 million reduction in revenues was a $5.1 million charge associated with the

July 2015 application filed by our California subsidiary with the CPUC which requested a change to the present rate design and the emergency conservation and rationing plan for water customers in certain areas within our Monterey county service district.

The increase for the nine months ended September 30, 2015 compared to the same period in 2014 is principally due to incremental revenues of approximately $27.6 million attributable to rate increases, including infrastructure surcharges. Also contributing to the increase was $18.0 million associated with higher demand, as described above, $4.5 million attributable to acquisitions and organic growth. The remaining increase is due to incremental revenues generated from other, sewer, fire and other operating revenues. Partially offsetting these increases were a $16.1 million reduction in revenues from balancing accounts primarily related to the California drought and corresponding reduction in production costs. Also, included in the $16.0 million reduction in revenues was a $5.1 million charge associated with the July 2015 application filed by our California subsidiary discussed above.

The following table sets forth information regarding the Regulated Businesses' revenues and billed water sales volume by customer class for the periods indicated:

	For the Three Months Ended September 30,							
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	Operating Revenues (Dollars in thousands)				Billed Water Sales Volume (Gallons in millions)			
Customer Class								
Water service

Water service								
Residential	$1,154,700	$1,150,336	$ 4,364	0.4%	132,771	135,165	(2,394)	(1.8%)
Commercial	416,966	416,197	769	0.2%	61,276	61,839	(563)	(0.9%)
Industrial	98,530	100,337	(1,807)	(1.8%)	29,439	30,403	(964)	(3.2%)
Public and other	247,960	253,127	(5,167)	(2.0%)	38,868	40,372	(1,504)	(3.7%)
Other water revenues	31,341	21,057	10,284	48.8%	—	—	—	—
Billed water services	1,949,497	1,941,054	8,443	0.4%	262,354	267,779	(5,425)	(2.0%)
Unbilled water services	21,267	(8,973)	30,240	337.0%				
Total water service revenues	1,970,764	1,932,081	38,683	2.0%				
Wastewater service revenues	72,749	69,721	3,028	4.3%				
Other revenues	39,437	37,644	1,793	4.8%				
	$2,082,950	$2,039,446	$ 43,504	2.1%				

Water Services – Consistent with the discussion above, water service operating revenues for the three months ended September 30, 2015 totaled $741.7 million, a $24.4 million increase, or 3.4%, over the same period of 2014. For the nine months ended September 30, 2015, these revenues increased $38.7 million, or 2.0%, compared to the nine months ended September 30, 2014. As described above, the increases for both the three and nine months are primarily due to rate increases and infrastructure charges partially offset by a reduction in revenues attributable to balancing accounts. Also, contributing to the incremental revenue for the three months ended September 30, 2015 compared to the same period last year was higher demand for residential and commercial customers. The correlation between water service revenues and billed water sales volumes shown above is impacted by the California drought. California is experiencing a severe drought and in April 2015, the Governor of that state mandated water usage restrictions to reduce overall water usage by 25% in the state compared to 2013 levels. Our California customers are largely meeting the conservation targets. Revenue in California is decoupled from sales volume, aligning our water conservation goals with those of the state and our customers and therefore these usage reductions do not impact earnings. Excluding the impact of the volume reductions in California, volumes for our residential customers increased 2.2% and 0.1% for the three and nine months ended September 30, 2015, and commercial customers increased 4.5 % for the quarter and 0.9% for the nine months ended September 30, 2015. Also, the mix between billed and unbilled water revenue for the nine-month period ended September 30, 2015, compared to the same period in 2014, has changed. This change is principally the result of addressing the majority of delayed customer billings that existed at December 31, 2013, by billing those customers in the first quarter of 2014. The delayed billings resulted from the implementation of our Customer Information System in 2013.

Wastewater services – Our subsidiaries provide wastewater services in eleven states. Revenues from these services increased $1.7 million, or 7.4%, and $3.0 million, or 4.3%, for the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014, mainly as the result of adding additional systems through acquisitions.

Other revenues – Other revenues, which include reconnection charges, initial application service fees, certain rental revenues, revenue collection services for others and other similar items, increased $0.9 million, or 6.9%, for the three months ended September 30, 2015. The increase for the nine months ended September 30, 2015, of $1.8 million, or 4.8%, is primarily due to incremental revenues for late payment fees and reconnection fees partially offset by the inclusion in 2014 of $2.4 million of insurance proceeds for business interruption as a result of Hurricane Sandy.

Operation and maintenance expense. Operation and maintenance expense decreased $1.2 million, or 0.4%, and $26.6 million, or 3.2% for the three and nine months ended September 30, 2015, respectively, compared to the same period in 2014.

The following table provides information regarding operation and maintenance expense for the three and nine months ended September 30, 2015 and 2014, by major expense category:

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
				(Dollars in thousands)				
Production costs	$ 79,657	$ 79,455	$ 202	0.3%	$ 215,661	$ 222,855	$ (7,194)	(3.2%)
Employee-related costs	105,537	106,672	(1,135)	(1.1%)	320,943	321,452	(509)	(0.2%)
Operating supplies and services	48,363	53,204	(4,841)	(9.1%)	143,543	163,460	(19,917)	(12.2%)
Maintenance materials and supplies	14,351	15,421	(1,070)	(6.9%)	50,401	53,581	(3,180)	(5.9%)
Customer billing and accounting	15,916	15,420	496	3.2%	44,631	44,707	(76)	(0.2%)
Other	13,227	8,104	5,123	63.2%	38,481	34,169	4,312	12.6%
Total	$ 277,051	$ 278,276	$ (1,225)	(0.4%)	$ 813,660	$ 840,224	$ (26,564)	(3.2%)

Production costs by major expense type were as follows:

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Purchased Water	$ 32,767	$ 33,674	$ (907)	(2.7%)	$ 89,832	$ 93,332	$ (3,500)	(3.8%)
Fuel and Power	26,560	25,890	670	2.6%	69,272	71,025	(1,753)	(2.5%)
Chemicals	14,577	12,521	2,056	16.4%	36,533	35,316	1,217	3.4%
Waste Disposal	5,753	7,370	(1,617)	(21.9%)	20,024	23,182	(3,158)	(13.6%)
Total	$ 79,657	$ 79,455	$ 202	0.3%	$ 215,661	$ 222,855	$ (7,194)	(3.2%)

Production costs increased by $0.2 million for the three months ended September 30, 2015 compared to the same period last year. Chemical costs increased by $2.1 million in the quarter as 2014 included recognition of prior contamination proceeds authorized in a rate case for one of our operating subsidiaries. This increase was offset by lower waste disposal costs due to a change in the amount allowed by a cost recovery mechanism in one of our operating companies.

For the nine months ended September 30, 2015, production costs decreased by $7.2 million, or 3.2% compared to the same period last year and was primarily due to decreases in purchased water, principally from lower usage in our California subsidiary, fuel and power due to lower fuel and natural gas prices, and lower waste disposal costs partially offset by higher chemical expenses. Purchased water and fuel and power costs in California are recorded in a balancing account and therefore do not impact earnings. The decrease in waste disposal costs was attributable to the aforementioned change in the amount allowed by a cost recovery mechanism.

The following table provides information with respect to components of employee-related costs for the three and nine months ended September 30, 2015 and 2014:

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Salaries and wages	$ 78,653	$ 81,456	$ (2,803)	(3.4%)	$ 238,133	$ 245,107	$ (6,974)	(2.8%)
Pensions	7,428	6,648	780	11.7%	22,494	20,268	2,226	11.0%
Group insurance	14,843	13,759	1,084	7.9%	45,648	41,889	3,759	9.0%
Other benefits	4,613	4,809	(196)	(4.1%)	14,668	14,188	480	3.4%
Total	$ 105,537	$ 106,672	$ (1,135)	(1.1%)	$ 320,943	$ 321,452	$ (509)	(0.2%)

Overall, employee-related costs decreased for both the three and nine months ended September 30, 2015 compared to the same periods in 2014. Salaries and wages decreased for the three and nine months ended September 30, 2015 due to a reduction in headcount and an increase in capital projects which in turn resulted in higher capitalization rates. Also contributing to the reduction in costs was lower severance costs in 2015 as the 2014 costs included incremental costs associated with the restructuring of certain organizational functions. Pension costs and postretirement benefit costs (which is included in the group insurance line above) increased for both the quarter and nine months principally due to the adoption of new mortality assumptions and a decrease in the discount rate, which resulted in increased plan obligations.

Operating supplies and services include expenses for office operation, legal and professional services, transportation expenses, and information systems and other office equipment rental charges. The following table provides information with respect to components of operating supplies and services for the three and nine months ended September 30, 2015 compared to the same periods in 2014.

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Contracted services	$ 20,070	$ 22,711	$ (2,641)	(11.6%)	$ 60,569	$ 66,173	$ (5,604)	(8.5%)
Office supplies and services	11,349	11,382	(33)	(0.3%)	32,500	34,538	(2,038)	(5.9%)
Transportation	4,746	4,862	(116)	(2.4%)	12,345	15,143	(2,798)	(18.5%)
Rents	3,316	3,678	(362)	(9.8%)	10,850	11,509	(659)	(5.7%)
Other	8,882	10,571	(1,689)	(16.0%)	27,279	36,097	(8,818)	(24.4%)
Total	$ 48,363	$ 53,204	$ (4,841)	(9.1%)	$ 143,543	$ 163,460	$ (19,917)	(12.2%)

The decrease for the three months ended September 30, 2015 was primarily due to lower contracted services and conservation expense. The decrease for the nine months ended September 30, 2015 compared to the same period in 2014 was primarily due to a reduction in contracted services, lower transportation costs attributable to lower fuel prices and leased vehicle costs, incremental costs in 2014 associated with the Freedom Industries chemical spill in West Virginia of $2.7 million and decreased condemnation-related costs. The decrease for the nine months ended September 30, 2015 also included a $3.2 million adjustment in the first quarter of 2015 attributable to the recovery of previously expensed business transformation costs as a result of the finalization of our California rate case.

Maintenance materials and supplies, which include preventive maintenance and emergency repair costs, decreased $1.1 million, or 6.9%, and $3.2 million, or 5.9%, for the three and nine months ended September 30, 2015, respectively, compared to the same periods in 2014. The decrease for the nine months is primarily due to lower paving, backfilling and other repair costs. These repair costs were higher in the first quarter of 2014 as compared to the same period in 2015 due to higher than normal main breaks as a result of the abnormally severe winter weather conditions experienced in certain states.

Other operation and maintenance expense includes casualty and liability insurance premiums and regulatory costs. The increase for both the three and nine months ended September 30, 2015 compared to the comparable periods in the prior year was primarily driven by increased casualty insurance costs in the third quarter of 2015, as a result of an increase in historical claims experience resulting in premium adjustments. The premium adjustments are based upon current facts and circumstances with respect to outstanding claims and are subject to change as the claims mature.

Operating expenses. The increase in operating expenses for the three months ended September 30, 2015 is principally due to higher depreciation and amortization expense from additional utility plant placed in service partially offset by the decrease in operation and maintenance expense explained above and lower general taxes mainly due to decreased property taxes for certain of our operating companies. The decrease in the nine months ended September 30, 2015 compared to the same period in the prior year is mainly due to the decrease in operation and maintenance expense explained above offset by higher depreciation and amortization expense from additional utility plant placed in service and incremental general taxes primarily due to increased property and gross receipts taxes for certain of our operating companies.

Market-Based Businesses

The following table provides financial information for our Market-Based Businesses segment for the periods indicated:

	For the Three Months Ended September 30,			For the Nine Months Ended September 30,		
	2015	2014	Increase (Decrease)	2015	2014	Increase (Decrease)
	(In thousands)					
Operating revenues	$ 120,373	$ 96,980	$ 23,393	$ 307,822	$ 253,857	$ 53,965
Operation and maintenance expense	98,360	77,401	20,959	252,480	204,460	48,020
Operating expenses, net	101,573	79,915	21,658	260,449	212,075	48,374
Income from continuing operations before income taxes	20,666	17,634	3,032	50,460	43,593	6,867

Operating revenues. Revenues for the three and nine months ended September 30, 2015 increased $23.4 million and $54.0 million, respectively, compared to the same periods in 2014, as a result of incremental revenues in our MSG and HOS lines of business and from the Keystone Acquisition. For the three and nine months ended September 30, 2015, MSG revenue increased $10.9 million and $35.4 million, respectively, primarily from additional construction project activities and the addition of two new military contracts, Hill Air Force Base and Picatinny Arsenal, in the second half of 2014. HOS revenues increased $3.8 million and $10.8

million for the three and nine months ended September 30, 2015, respectively, principally from contract growth, mainly through our New York City contracts and expansion into other geographic areas. Also, contributing to the increase for both the three and nine months ended September 30, 2015 was incremental revenues of $10.0 million related to the Keystone Acquisition.

Operation and maintenance. Operation and maintenance expense increased $21.0 million, or 27.1%, and $48.0 million, or 23.5% for the three and nine months ended September 30, 2015, respectively.

The following table provides information regarding categories of operation and maintenance expense for the periods indicated:

	For the Three Months Ended September 30,				For the Nine Months Ended September 30,			
	2015	2014	Increase (Decrease)	Percentage	2015	2014	Increase (Decrease)	Percentage
				(Dollars in thousands)				
Production costs	$ 9,136	$ 8,511	$ 625	7.3%	$ 27,052	$ 26,372	$ 680	2.6%
Employee-related costs	19,820	15,993	3,827	23.9%	52,655	45,069	7,586	16.8%
Operating supplies and services	53,273	38,836	14,437	37.2%	126,250	93,518	32,732	35.0%
Maintenance materials and supplies	14,016	12,443	1,573	12.6%	41,453	34,753	6,700	19.3%
Other	2,115	1,618	497	30.7%	5,070	4,748	322	6.8%
Total	$ 98,360	$ 77,401	$ 20,959	27.1%	$ 252,480	$ 204,460	$ 48,020	23.5%

As noted in the table above, employee-related costs increased $3.8 million for the quarter and $7.6 million year-to-date compared to the prior year periods. The Keystone Acquisition added $3.1 million in employee-related costs for both the quarter and the nine months ended September 30, 2015. The year-to-date increase also includes incremental costs associated with construction-type activities and the two new military contracts.

Operating supplies and services increased $14.4 million and $32.7 million, for the three and nine months ended September 30, 2015, compared to the same periods in the prior year, mainly corresponding to contract growth in both the MSG and HOS lines of business, as well as military construction project activities. Also contributing to the increase was the acquisition of Keystone, which added $6.1 million to operating supplies and services for both the three and nine months ended September 30, 2015.

Maintenance materials and supplies increased $6.7 million for the year-to-date period primarily from higher HOS claim costs, which are associated with new contracts.

Liquidity and Capital Resources

For a general overview of our sources and uses of capital resources, see the introductory discussion under “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources,” contained in Part II, Item 7 of our Form 10-K.

We rely on our revolving credit facility, the capital markets and our cash flows from operations to fulfill our short-term liquidity needs, to issue letters of credit and to support our commercial paper program. We fund liquidity needs for capital investment, working capital and other financial commitments through cash flows from operations, public and private debt offerings, commercial paper markets and, to the extent necessary, our revolving credit facility. We regularly evaluate the capital markets and closely monitor the financial condition of the financial institutions with contractual commitments in the revolving credit facility.

In order to meet our short-term liquidity needs, we, through American Water Capital Corp. (“AWCC”), our wholly owned financing subsidiary, issue commercial paper, which is supported by an unsecured revolving credit facility. Indebtedness under the credit facility is considered “debt” for purposes of a support agreement between American Water and AWCC, which serves as a functional equivalent of a guarantee by American Water of AWCC’s payment obligations under the credit facility. The revolving credit facility is also used, to a limited extent, to support our issuance of letters of credit and, from time to time, for direct borrowings.

On June 30, 2015, we, AWCC and the lenders amended and restated our outstanding credit agreement, dated as of October 29, 2012, associated with the revolving credit facility, to extend the expiration date of the facility from October 2018 to June 2020 and to allow AWCC to request to extend further the term of the credit facility for up to two one-year periods. An extension request must satisfy certain conditions and receive approval of the lenders, as set forth in the agreement. The financial covenants with respect to the credit facility remained unchanged.

As of September 30, 2015, AWCC had no outstanding borrowings and $83.4 million of outstanding letters of credit under the revolving credit facility. As of September 30, 2015, AWCC had $1.2 billion available under the credit facility to fulfill our short-term liquidity needs, to issue letters of credit and support $379.9 million in outstanding commercial paper. We can provide no assurances that the lenders will meet their existing commitments to AWCC under the credit facility or that we will be able to access the commercial paper or loan markets in the future on terms acceptable to us or at all.

As noted in our Form 10-K, in February 2015, our Board of Directors authorized an anti-dilutive common stock repurchase program to mitigate the dilutive effect of shares issued through our dividend reinvestment, employee stock purchase and executive compensation programs. This program allows us to purchase up to 10 million shares of our common stock over an unrestricted period of time. We may effect repurchases in the open market or through privately negotiated transactions. We commenced making purchases under this program in April 2015, and through September 30, 2015, we have repurchased an aggregate of 750 thousand shares.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the third quarter of each fiscal year. Cash flows from operating activities for the nine months ended September 30, 2015 were $855.6 million compared to $840.3 million for the nine months ended September 30, 2014.

The following table provides a summary of the major items affecting our cash flows from operating activities for the nine months ended September 30, 2015 and 2014:

	For the Nine Months Ended September 30,	
	2015	**2014**
	(In thousands)	
Net income	$ 377,012	$ 329,607
Add (subtract):		
Non-cash activities (1)	589,405	576,940
Changes in working capital (2)	(70,804)	(30,502)
Pension and postretirement healthcare contributions	(39,995)	(35,783)
Net cash flows provided by operations	$ 855,618	$ 840,262

(1) Includes depreciation and amortization, deferred income taxes and amortization of deferred investment tax credits, provision for losses on accounts receivable, allowance for other funds used during construction, gain on asset dispositions and purchases, pension and non-pension postretirement benefits expense and other non-cash, net. Details of each component can be found in the Consolidated Statements of Cash Flows.

(2) Changes in working capital include changes to receivables and unbilled revenues, taxes accrued (including income taxes), accounts payable and accrued expenses and other current assets and liabilities, net.

The increase in cash flows from operating activities during the nine months ended September 30, 2015, as compared to the same period in 2014, reflects higher net income and changes in working capital. The decrease in working capital for the nine months ended September 30, 2015 compared to the same period in the prior year is principally the result of higher cash collections for our Regulated Businesses in the first quarter of 2014, as we delayed some 2013 billings to the first quarter of 2014 when we implemented our new customer information system in 2013. Also, contributing to the decline was a reduction in cash collections from our California utility customers of approximately $23 million due to the continued drought in California. The amounts are collected in balancing accounts and are generally recovered over 12 to 36 months.

Cash Flows from Investing Activities

The following table provides information regarding cash flows used in investing activities for the nine months ended September 30, 2015 and 2014:

	For the Nine Months Ended September 30, 2015	For the Nine Months Ended September 30, 2014
	(In thousands)	
Net capital expenditures	$ (791,079)	$ (664,871)
Proceeds from sale of assets	4,985	804
Acquisitions and related costs	(175,567)	(6,053)
Other investing activities, net (1)	(82,321)	(51,221)
Net cash flows used in investing activities	$ (1,043,982)	$ (721,341)

(1) Includes removal costs from property, plant and equipment retirements, net and net funds restricted.

The increase in capital expenditures is principally due to an increase in planned expenditures compared to the prior year and less harsh winter conditions in the first quarter of 2015 compared to the same period in 2014 in certain regions of our Regulated Businesses, which allowed us to increase our capital improvements during the nine months ended September 30, 2015.

The increase in cash utilized for acquisitions during the first nine months of 2015 compared to the same period in 2014 is principally due to the purchase of Keystone and two regulated systems, the Borough of Haddonfield, New Jersey's water and wastewater systems and the City of Arnold, Missouri's wastewater system.

We are currently considering a plan to construct a new corporate headquarters to consolidate our support services and certain of our Market-Based Businesses employees within a single location. We are considering several alternatives for the location of the new headquarters. The cost of construction, which would take several years to complete, is currently estimated to be up to $165 million, depending on the location selected and exclusive of any tax incentives that the Company may receive.

Cash Flows from Financing Activities

The following table provides information regarding cash flows provided by (used in) financing activities for the nine months ended September 30, 2015 and 2014:

	For the Nine Months Ended September 30, 2015	For the Nine Months Ended September 30, 2014
	(In thousands)	
Proceeds from long-term debt	$ 563,727	$ 500,497
Repayments of long-term debt	(88,401)	(137,939)
Repayments of short-term borrowings	(70,015)	(316,328)
Dividends paid	(177,664)	(160,848)
Anti-dilutive share repurchase	(39,257)	
Other financing activities, net (1)	52,118	42,861
Net cash flows provided by (used in) financing activities	$ 240,508	$ (71,757)

(1) Includes proceeds from issuance of common stock under various employee stock plans and our dividend reinvestment plan, advances and contributions for construction, net of refunds, debt issuance costs and tax benefits realized from equity compensation.

Our financing activities, primarily focused on funding construction expenditures, include the issuance of long-term and short-term debt, primarily through AWCC. We intend to access the capital markets on a regular basis, subject to market and general economic conditions. In addition, new infrastructure may be financed with customer advances (net of refunds) and contributions in aid of construction.

Based on the liquidity and capital needs of American Water and our regulated subsidiaries, AWCC borrows funds on a short-term basis and through intercompany loans, provides the proceeds of those borrowings to the regulated subsidiaries and American Water. The regulated subsidiaries and American Water are obligated to pay to AWCC their respective portion of AWCC's debt service obligations. Because American Water parent borrowings are not a source of capital for the Company's regulated subsidiaries, the Company is not able to recover the interest charges on its debt through regulated water and wastewater rates.

We typically utilize commercial paper to meet our short-term liquidity needs, as commercial paper borrowings have historically been a more flexible and lower cost option compared to borrowings under our revolving credit facility. However, we are able to utilize our revolving credit facility to the extent necessary to complement our borrowings in the commercial paper market. In the event of disruptions in the money market sector of the debt capital markets or in response to economic conditions generally, borrowings under our revolving credit facility may be more efficient and a lower cost alternative to commercial paper.

The following long-term debt was issued during the first nine months of 2015:

Company	**Type**	**Rate**	**Maturity**	**Amount**
American Water Capital Corp. (1)	Senior notes—fixed rate	3.40%-4.30%	2025-2045	$ 550,000
Other subsidiaries	Private activity bonds and government funded debt—fixed rate	1.00%-1.56%	2022-2032	13,727
Total issuances				$ 563,727

(1) On August 13, 2015, AWCC completed an offering of its senior fixed rate notes. Proceeds from this offering were used to lend funds to the Company and its regulated utilities, to refinance commercial paper borrowings and to finance redemptions of long-term debt.

The following long-term debt was retired through sinking fund provisions or payment at maturity during the first nine months of 2015:

Company	**Type**	**Rate**	**Maturity**	**Amount (In thousands)**
American Water Capital Corp.	Private activity bonds and government funded debt—fixed rate	1.79%-5.25%	2015-2031	$ 36,442
Other American Water subsidiaries	Private activity bonds and government funded debt—fixed rate	0.00%-7.45%	2015-2041	50,733
Other American Water subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other American Water subsidiaries	Capital lease payments	12.23%	2026	26
Total retirements and redemptions				$ 88,401

From time to time, and as market conditions warrant, we may engage in additional long-term debt retirements via tender offers, open market repurchases or other transactions.

Credit Facilities and Short-Term Debt

Short-term debt, consisting of commercial paper, net of discount, amounted to $379.9 million at September 30, 2015.

The following table provides information as of September 30, 2015 regarding letters of credit sub-limits under our revolving credit facility and available funds under the revolving credit facility, as well as outstanding amounts of commercial paper and borrowings under our revolving credit facility.

	Credit Facility Commitment	**Available Credit Facility Capacity**	**Letter of Credit Sub-limit**	**Available Letter of Credit Capacity**	**Outstanding Commercial Paper (Net of Discount)**	**Credit Line Borrowings**
	(In thousands)					
September 30, 2015	$ 1,250,000	$ 1,166,591	$ 150,000	$ 66,591	$ 379,944	$ —

The weighted-average interest rate on short-term borrowings for the three months ended September 30, 2015 and 2014 was approximately 0.44% and 0.29%, respectively, and 0.49% and 0.30% for the nine months ended September 30, 2015 and 2014, respectively.

Capital Structure

The following table provides information regarding our capital structure for the periods presented:

	At September 30, 2015	At December 31, 2014
Total common stockholders' equity	45%	45%
Long-term debt and redeemable preferred stock at redemption value	52%	50%
Short-term debt and current portion of long-term debt	3%	5%
	100%	100%

Debt Covenants

Our debt agreements contain financial and non-financial covenants. To the extent that we are not in compliance with these covenants, such an event may create an event of default under the debt agreement and we, or our subsidiaries, may be restricted in the ability to pay dividends, issue new debt or access our revolving credit facility. For two of our smaller operating companies, we have informed our counterparties that we will provide only unaudited financial information at the subsidiary level, which resulted in technical non-compliance with certain of their reporting requirements under debt agreements with respect to $8.0 million of outstanding debt. We do not believe this event will materially impact us. Our long-term debt indentures also contain a number of covenants that, among other things, limit the Company from issuing debt secured by the Company's assets, subject to certain exceptions. Our failure to comply with any of these covenants could accelerate repayment obligations.

Certain long-term notes and the revolving credit facility require us to maintain a ratio of consolidated debt to consolidated capitalization (as defined in the relevant documents) of not more than 0.70 to 1.00. As of September 30, 2015, our ratio was 0.55 to 1.00 and therefore we were in compliance with the covenant.

Security Ratings

Our access to the capital markets, including the commercial paper market, and respective financing costs in those markets, may be directly affected by our securities ratings. We primarily access the debt capital markets, including the commercial paper market, through AWCC. However, we have also issued debt through our regulated subsidiaries, primarily in the form of tax exempt securities or borrowings under state revolving funds, to lower our overall cost of debt.

The following table shows the Company's securities ratings as of September 30, 2015:

Securities	Moody's Investors Service	Standard & Poor's Ratings Service
Senior unsecured debt	A3	A
Commercial paper	P2	A-1

On August 7, 2015, Moody's upgraded the long-term ratings for American Water and AWCC from Baa1 to A3. At the same time, Moody's also affirmed AWCC's commercial paper rating at P2. Moody's rating outlook for American Water and AWCC remains as stable.

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon our ability to generate cash flows in an amount sufficient to service our debt and meet our investment plans. We can provide no assurances that our ability to generate cash flows is sufficient to maintain our existing ratings. None of our borrowings are subject to default or prepayment as a result of a downgrading of these security ratings, although such a downgrading could increase fees and interest charges under our credit facility.

As part of the normal course of business, we routinely enter into contracts for the purchase and sale of water, energy, fuels and other services. These contracts either contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if our debt is downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to reference such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that we provide collateral to secure our obligations. We do not expect that our posting of collateral would have a material adverse impact on our results of operations, financial position or cash flows.

Dividends

On September 1, 2015, we paid a cash dividend of $0.34 per share to the Company's shareholders of record as of August 10, 2015.

On October 30, 2015, our board of directors declared a quarterly cash dividend payment of $0.34 per share payable on December 1, 2015 to the Company's shareholders of record as of November 9, 2015. In 2014, a quarterly cash dividend was declared on September 19, 2014, which was prior to the end of the quarter, with a payment date of December 1, 2014.

Future dividends, declared at the discretion of the Board of Directors, will be dependent upon future earnings, cash flows, financial and legal requirements and other factors.

Application of Critical Accounting Policies and Estimates

Our financial condition, results of operations and cash flows are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates," in our Form 10-K for a discussion of our critical accounting policies.

Recent Accounting Pronouncements

See Note 2: New Accounting Pronouncements to our consolidated financial statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for a discussion of new accounting standards recently adopted or pending adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. There have been no significant changes to our exposure to market risk since December 31, 2014. For a discussion of our exposure to market risk, refer to Part II, Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," contained in our Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

American Water maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of September 30, 2015.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of September 30, 2015, our disclosure controls and procedures were effective at a reasonable level of assurance.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the three months ended September 30, 2015, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act).

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The following information updates and amends the information provided in our Form 10-K in Part I, Item 3, “Legal Proceedings,” and in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2015 in Part II, Item 1, “Legal Proceedings.” Capitalized terms used but not otherwise defined herein have the meanings set forth in our Form 10-K.

Alternative Water Supply in Lieu of Carmel River Diversions

Regional Desalination Project

On April 15, 2015, the CPUC issued a final decision approving, in part, the settlement agreement among California-American Water Company (“Cal Am”), the Monterey County Water Resource Agency (“MCWRA”) and the County of Monterey, by authorizing Cal Am’s recovery of $1.9 million of costs advanced to MCWRA, plus interest and fees under the reimbursement agreement and credit line agreement among the Marina Coast Water District (“MCWD”), MCWRA and Cal Am. These agreements, along with the water purchase agreement and other related ancillary agreements among MCWD, MCWRA and Cal Am, relate to the regional desalination project (“RDP”) involving the proposed construction of a desalination facility in the City of Marina. The CPUC denied without prejudice the additional recovery of approximately $765,000 because there was insufficient information for the CPUC to determine the reasonableness of such amount. Cal Am is permitted to file another application for recovery at a future date. On April 17, 2015, MCWD filed an application with the CPUC for a rehearing of the settlement approval. On October 22, 2015, the CPUC denied MCWD’s application for rehearing.

On April 29, 2015, the San Francisco County Superior Court issued a final decision on the Complaint for Declaratory Relief filed by Cal Am against MCWRA and MCWD regarding the validity of the RDP agreements. In its final decision, the court ruled that four of the five RDP agreements are void. On the basis of previous rulings and dismissals, on June 1, 2015, the court entered its judgment declaring that four of the five RDP agreements are void and the credit line agreement is not void. On June 30, 2015, MCWD filed its notice of appeal of the court’s judgment. On September 8, 2015, Cal Am and MCWRA filed a joint motion to dismiss this appeal, and on October 7, 2015 the court issued an order deferring a ruling on the motion to dismiss until the underlying appeal is heard and ruled upon. Cal Am and MCWRA have also filed post-judgment motions to recover trial costs and attorneys’ fees arising out of the Complaint for Declaratory Relief. In July and August 2015, the court awarded Cal Am approximately $1.4 million in costs and attorneys’ fees. On September 23, 2015, MCWD filed a notice of appeal of the award of attorneys’ fees.

In July 2015, Cal Am and MCWRA filed an Amended Complaint (the “Cal Am July 2015 Complaint”) in San Francisco County Superior Court, against MCWD and RMC Water and Environment, a private engineering consulting firm (“RMC”). Cal Am seeks to recover compensatory, consequential and incidental damages associated with the failure of the RDP in an amount to be proven at trial, which have been alleged in the Cal Am July 2015 Complaint to be in excess of $10.0 million, as well as punitive and treble damages, statutory penalties and attorneys’ fees.

On July 30, 2015, MCWD filed a Complaint (the “MCWD July 2015 Complaint”) in San Francisco County Superior Court against Cal Am, MCWRA and certain unidentified individual defendants. MCWD is seeking to recover compensatory damages associated with the failure of the RDP in an amount to be proven at trial, which have been alleged in the MCWD July 2015 Complaint to be at least $18.0 million, as well as exemplary damages and attorneys’ fees. Cal Am has not yet responded to the MCWD July 2015 Complaint, but it intends to contest vigorously the causes of action stated against it.

On August 12, 2015, RMC filed a Complaint for Damages (the “RMC Complaint”) in San Francisco County Superior Court against Cal Am and MCWRA seeking to recover damages associated with the failure of the RDP of at least $0.7 million, plus an unspecified amount of punitive damages against Cal Am. Cal Am has not yet responded to the RMC Complaint, but it intends to contest vigorously the causes of action stated against it.

Monterey Peninsula Water Supply Project

On October 6, 2015, the California Coastal Commission approved an amendment to Cal Am’s permits to operate the test slant well on the Cemex property.

A one-day trial on MCWD’s December 11, 2014 Petition for Writ of Mandate and Complaint for Declaratory and Injunctive Relief (the “MCWD December 2014 Petition”) and the Ag Land Trust Petition was conducted on July 23, 2015 in Santa Cruz County Superior Court. The court denied both petitions in their entirety. On August 31, 2015, MCWD filed a notice of appeal regarding the court’s denial of the MCWD December 2014 Petition. On October 1, 2015, pursuant to a stipulation among the parties, the court entered an order staying a hearing on the January 2015 Petition against the State Lands Commission until this appeal is resolved.

In addition, there have been delays in the initial timetable for the preparation and certification by the CPUC of an environmental impact report due to, among other things, uncertainties regarding timing of government approval of various required permits. On August 19, 2015, the statutory deadline for resolving the application related to the Water Supply Project was extended to December 31, 2016. Cal Am estimates that the earliest date by which the Water Supply Project could be completed is sometime in 2018. There can be no assurance that Cal Am's application for the Water Supply Project will be approved or that the Water Supply Project will be completed on a timely basis, if ever.

West Virginia Elk River Freedom Industries Chemical Spill

As previously disclosed, four of the cases pending before the federal district court were consolidated for purposes of discovery, and an amended consolidated class action complaint for those cases ("Federal action") was filed on December 9, 2014 by several plaintiffs who allegedly suffered economic losses, loss of use of property and tap water or other specified adverse consequences as a result of the Freedom Industries spill, on behalf of a purported class of all persons and businesses supplied with, using, or exposed to water contaminated with crude 4-methylcyclohexane methanol ("MCHM") and provided by West Virginia-American Water Company ("WVAWC") in Logan, Clay, Lincoln, Roane, Jackson, Boone, Putnam, and Kanawha Counties and the Culloden area of Cabell County, West Virginia as of January 9, 2014. The amended consolidated complaint names several individuals and corporate entities as defendants, including American Water Works Service Company, Inc. ("AWWSC"), WVAWC and the Company. The plaintiffs seek unspecified damages for alleged business or economic losses; unspecified damages or a mechanism for recovery to address a variety of alleged costs, loss of use of property, personal injury and other consequences allegedly suffered by purported class members; punitive damages and certain additional relief, including the establishment of a medical monitoring program to protect the purported class members from an alleged increased risk of contracting serious latent disease.

On April 9, 2015, the court in the Federal action denied a motion to dismiss all claims against the Company for lack of personal jurisdiction. A separate motion to dismiss filed by AWWSC and WVAWC (and joined by the Company) asserting various legal defenses in the Federal action was resolved by the court on June 3, 2015. The court dismissed three causes of action but denied the motion to dismiss with respect to the remaining causes of actions and allowed the plaintiffs to continue to pursue the various claims for damages alleged in their amended consolidated complaint.

On July 6, 2015, the plaintiffs filed a motion seeking certification of a class defined to include persons who resided in dwellings served by WVAWC's Kanawha Valley Treatment Plant ("KVTP") on January 9, 2014, persons who owned businesses served by the KVTP on January 9, 2014, and hourly employees who worked for such businesses. The plaintiffs sought a class-wide determination of liability against the American Water Defendants, among others, and of damages to the three groups of plaintiffs as a result of the "Do Not Use" order issued after the Freedom Industries spill.

A court-directed mediation was held at the end of September 2015 with the assistance of private mediators. Representatives of the American Water Defendants, Eastman Chemical, the Federal action plaintiffs, and the plaintiffs in the 53 state court cases removed to Federal court, as well as insurance carriers for certain of the defendants, participated in the mediation. No resolution was reached and no further mediation discussions have been scheduled to date.

On October 8, 2015, the court in the Federal action granted in part and denied in part the plaintiffs' class certification motion. The court certified a class addressing certain liability elements of the negligence claims against Eastman Chemical and of the negligence and breach of contract claims against the American Water Defendants. However, the court granted the joint motion by defendants to exclude certain expert testimony, disallowing the testimony of plaintiffs' economic damages experts, and denied class certification as to any damages, including punitive damages. Thus, determination or quantification of damages, if any, would be made in subsequent proceedings on an individual basis.

General

Periodically, the Company is involved in other proceedings or litigation arising in the ordinary course of business. We do not believe that the ultimate resolution of these matters will materially affect the Company's financial position or results of operations. However, litigation and other proceedings are subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. It is possible that some litigation and other proceedings could be decided unfavorably to us, and that any such unfavorable decisions could have a material adverse effect on the Company's business, financial condition, results of operations, and cash flows.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in the “Risk Factors” in our Form 10-K, and our other public filings, which could materially affect our business, financial condition or future results. Other than as set forth below, there have been no material changes from risk factors previously disclosed in “Risk Factors” in our Form 10-K.

Keystone’s operations may expose the Company to substantial costs and liabilities with respect to environmental matters.

Keystone’s operations, and the operation generally of natural gas and oil exploration and production facilities by Keystone’s customers, are subject to stringent federal, state and local laws, rules, regulations and ordinances governing the release of materials into the environment or otherwise relating to environmental protection. These provisions may require the acquisition by Keystone of permits or licenses before providing its services to customers, prohibit the release of substances defined thereunder as hazardous in connection with these activities, and impose substantial liabilities for the violation thereof that may result from these operations. Failure to comply with these laws, rules, regulations and ordinances may result in substantial environmental remediation and other costs to Keystone, the assessment of administrative, civil and criminal penalties or the issuance of injunctions restricting or prohibiting certain activities. Under existing environmental laws and regulations, Keystone could be held strictly liable for the removal or remediation of previously released materials or property contamination regardless of whether the release resulted from its operations, or whether its operations were in compliance with all applicable laws at the time they were performed. While the Company has attempted to structure and maintain its ownership and control of Keystone’s operations in such a way as to insulate the Company, its regulated subsidiaries and its other market-based operations from any liabilities associated with Keystone’s operations, including liabilities for environmental matters, there can be no assurance that such efforts will be sufficient to prevent the Company from incurring liability for the operations of Keystone.

Changes in environmental laws and regulations occur frequently, and any changes that result in more stringent or costly water or wastewater handling, storage, transport, disposal or cleanup requirements could require Keystone to make significant expenditures to maintain compliance with such requirements, and may otherwise have a material adverse effect on Keystone’s competitive position, financial condition and results of operations.

We have recorded a significant amount of goodwill, and we may never realize the full value of our intangible assets, causing us to record impairments that may negatively affect our results of operations.

Our total assets include $1.3 billion of goodwill at September 30, 2015. The goodwill is primarily associated with the acquisition of American Water by an affiliate of our previous owner in 2003, the acquisition of E’Town Corporation by a predecessor to our previous owner in 2001, and the acquisition of Keystone which was completed in July 2015. Goodwill represents the excess of the purchase price the purchaser paid over the fair value of the net tangible and other intangible assets acquired. Goodwill is recorded at fair value on the date of an acquisition and is reviewed annually or more frequently if changes in circumstances indicate the carrying value may not be recoverable. As required by the applicable accounting rules, we have taken significant non-cash charges to operating results for goodwill impairments in the past.

We may be required to recognize an impairment of goodwill in the future due to market conditions or other factors related to our performance or the performance of an acquired business. These market conditions could include a decline over a period of time of our stock price, a decline over a period of time in valuation multiples of comparable water utilities, market price performance of our common stock that compares unfavorably to our peer companies, decreases in control premiums, or, with respect to our Keystone operations, fluctuations in the level of exploration and production activities in the Marcellus and Utica shale regions served by Keystone. A decline in the results forecasted in our business plan due to events such as changes in rate case results, capital investment budgets or interest rates, could also result in an impairment charge. Recognition of impairments of a significant portion of goodwill would result in a charge to income in the period in which the impairment occurred, which may negatively affect our reported results of operations and total capitalization. The effects of any such impairment could be material and could make it more difficult to maintain our credit ratings, secure financing on attractive terms, maintain compliance with debt covenants and meet expectations of our regulators.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

In February 2015, the Company announced that its Board of Directors authorized an anti-dilutive common stock repurchase program to mitigate the dilutive effect of shares issued through the Company’s dividend reinvestment, employee stock purchase and executive compensation activities. The program allows the Company to purchase up to 10 million shares of its outstanding common stock over an unrestricted period of time in the open market or through privately negotiated transactions. The program is conducted in accordance with Rule 10b-18 of the Exchange Act, and, to facilitate these repurchases, the Company has also entered into a Rule 10b5-1 share repurchase plan with a broker, which allows the Company to repurchase its shares at times when it otherwise might be prevented from doing so under insider trading laws or because of self-imposed trading blackout periods. Subject to applicable regulations, the Company may elect to amend or cancel the program or the Rule 10b5-1 parameters at its discretion.

The following table includes shares of common stock acquired by the Company during the quarter ended September 30, 2015.

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (a)	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Program
July 1 - July 31, 2015	154,957	$50.85	154,957	9,595,043
August 1 - August 31, 2015	181,726	$52.79	181,726	9,413,317
September 1 - September 29, 2015	163,317	$52.41	163,317	9,250,000
Total	500,000	$52.34	500,000	

(a) An anti-dilutive common stock repurchase program was announced by the Company in February 2015 and allows the Company to purchase up to 10 million shares over an unrestricted period of time. Through September 30, 2015, the Company has repurchased 750,000 shares under this program.

Section 2: EX-31.1 (EX-31.1)

Exhibit 31.1

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Susan N. Story, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

> a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Section 3: EX-31.2 (EX-31.2)

Exhibit 31.2

CERTIFICATION OF PRINCIPAL FINANCIAL OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Linda G. Sullivan, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

c) Evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

d) Disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting,

to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Note 1: Basis of Presentation

The accompanying Consolidated Balance Sheet of American Water Works Company, Inc. and Subsidiary Companies (the "Company") at March 31, 2014, the Consolidated Statements of Operations and Comprehensive Income for the three months ended March 31, 2014 and 2013, the Consolidated Statements of Cash Flows for the three months ended March 31, 2014 and 2013, and the Consolidated Statements of Changes in Stockholders' Equity for the three months ended March 31, 2014 and 2013, are unaudited, but reflect all adjustments, which are, in the opinion of management, necessary to present fairly the consolidated financial position, the consolidated changes in stockholders' equity, the consolidated results of operations and comprehensive income, and the consolidated cash flows for the periods presented. All adjustments are of a normal, recurring nature, except as otherwise disclosed. Because they cover interim periods, the unaudited consolidated financial statements and related notes to the consolidated financial statements do not include all disclosures and notes normally provided in annual financial statements and, therefore, should be read in conjunction with the Company's Consolidated Financial Statements and related Notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year, due primarily to the seasonality of the Company's operations.

Certain reclassifications have been made to previously reported data to conform to the current presentation.

Note 2: New Accounting Pronouncements

The following recently issued accounting standards have been adopted by the Company and have been included in the consolidated results of operations, financial position or footnotes of the accompanying Consolidated Financial Statements:

Obligations Resulting from Joint and Several Liability Arrangements

In February 2013, the Financial Accounting Standards Board ("FASB") issued guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date. Examples of obligations within the scope of the updated guidance include debt arrangements, other contractual obligations and settled litigation and judicial rulings. The update requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date as the sum of the following: (a) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. The updated guidance also includes additional disclosures regarding the nature and amount of the obligation, as well as other information about those obligations. The update is effective on a retrospective basis for interim and annual periods beginning January 1, 2014. The adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Foreign Currency Matters

In June 2013, the FASB issued guidance for a parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. The amendments resolve differing views in practice and apply to the release of the cumulative translation adjustment into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or a business within a foreign entity. The update is effective prospectively for interim and annual periods beginning January 1, 2014. The adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

The following recently announced accounting standards are not yet required to be adopted by the Company or included in the consolidated results of operations, financial position or footnotes of the Company:

Service Concession Arrangements

In January 2014, the FASB issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide the services and at what price. The grantor also controls, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in the arrangement should not be recognized as property, plant and equipment of the operating entity. This update should be applied on a modified retrospective basis to service concession arrangements that exist at the beginning of an entity's fiscal year of adoption. This requires the cumulative effect of applying the update to be recognized as an adjustment to the opening retained earnings balance for the annual period of adoption. The update is effective for interim and annual periods beginning January 1, 2015. Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Reporting Discontinued Operations

In April 2014, the FASB issued guidance that changes the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. Under the updated guidance, a discontinued operation is defined as a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that ha s or will have a major effect on an entity’s operations and financial results. A strategic shift could include a disposal of a major geographical area of operations, a major line of business, a major equity method investment or other major part of the entity. A component comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity including a reportable segment, an operating segment, a reporting unit, a subsidiary or an asset group. The update no longer precludes presentation as a discontinued operation if there are operations and cash flows of the component that have not been eliminated from the reporting entity’s ongoing operations or if there is significant continuing involvement with a component after its disposal. The guidance is effective for new disposals after January 1, 2015 and early adoption is permitted for new disposals that have not yet been reported in financial statements. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Note 3: Acquisitions

Acquisitions

During the three-month period ended March 31, 2014, the Company closed on two acquisitions: one a regulated water system and the other a regulated system providing water and wastewater services. The aggregate purchase price of these acquisitions totaled $2,279. Assets acquired totaled $2,503 and consisted of utility plant of $1,887, non-utility plant of $315 and goodwill of $301. Liabilities assumed were $224 of contributions in aid of construction.

Note 4: Goodwill

The Company’s annual goodwill impairment test is conducted at November 30 of each calendar year. Interim reviews are performed when the Company determines that a triggering event that would more likely than not reduce the fair value of a reporting unit below its carrying value has occurred. The Company has determined no such triggering event had occurred during the three months ended March 31, 2014.

The change in the Company’s goodwill assets, as allocated between the reporting units is as follows :

	Regulated Unit		Market-Based Operations		Consolidated		
	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Total Net
Balance at January 1, 2014	$ 3,412,063	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,648,053	$ (2,440,289)	$ 1,207,764

Balance at March 31, 2013	$ 3,411,460	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,647,450	$ (2,440,289)	$ 1,207,161

Note 5: Stockholders’ Equity

Common Stock

Under American Water Stock Direct, a dividend reinvestment and direct stock purchase plan (the “DRIP”) , stockholders may reinvest cash dividends and purchase additional Company common stock, up to certain limits, through a transfer agent without commission fees. The Company’s transfer agent may buy newly issued shares directly from the Company or shares held in the

Company's treasury. The transfer agent may also buy shares in the public markets or in privately negotiated transactions. Purchases generally will be made and credited to DRIP accounts once each week. As of March 31, 2014, there were 4,645 shares available for future issuance under the DRIP.

The following table summarizes information regarding issuances under the DRIP for the three months ended March 31, 2014 and 2013:

	2014	2013
Shares of common stock issued	10	10
Cash proceeds received	$ 438	$ 392

Cash dividend payments made during the three–month periods ended March 31, 2014 and 2013 were as follows:

	2014	2013
Dividends per share, three months ended: March 31	$ 0.28	$ 0.00
Total dividends paid, three months ended: March 31	$ 49,968	$ 0

The 2014 payment included $49,909 of dividends accrued as of December 31, 2013.

On April 29, 2014, the Company declared a quarterly cash dividend of $0.31 per share, payable on June 2, 2014 to all shareholders of record as of May 12, 2014.

Accumulated Other Comprehensive Income (Loss)

The following table presents changes in accumulated other comprehensive income (loss) by component, net of tax, for the three months ended March 31, 2014 and 2013, respectively:

	Defined Benefit Plans				
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial Loss	Foreign Currency Translation	Total Accumulated Other Comprehensive Loss
Beginning balance at January 1, 2014	$ (69,711)	$ 713	$ 31,150	$ 3,213	$ (34,635)
Other comprehensive income (loss) before reclassifications	0	0	0	(550)	(550)
Amounts reclassified from accumulated other comprehensive income	0	41	(7)	0	34
Other comprehensive income (loss) for the period	0	41	(7)	(550)	(516)
Ending balance at March 31, 2014	$ (69,711)	$ 754	$ 31,143	$ 2,663	$ (35,151)
Beginning balance at January 1, 2013	$ (143,183)	$ 539	$ 22,239	$ 4,214	$ (116,191)
Other comprehensive income (loss) before reclassifications	0	0	0	(366)	(366)
Amounts reclassified from accumulated other comprehensive income	0	43	2,228	0	2,271
Other comprehensive income (loss) for the period	0	43	2,228	(366)	1,905
Ending balance at March 31, 2013	$ (143,183)	$ 582	$ 24,467	$ 3,848	$ (114,286)

The Company does not reclassify the amortization of defined benefit pension cost components from accumulated other comprehensive income (loss) directly to net income in its entirety. These accumulated other comprehensive income components are included in the computation of net periodic pension cost. (See Note 9)

Stock-Based Compensation

The Company has granted stock option and restricted stock unit awards to non-employee directors, officers and other key employees of the Company pursuant to the terms of its 2007 Omnibus Equity Compensation Plan (the "Plan"). As of March 31 , 2014, a total of 8,896 shares were available for grant under the Plan. Shares issued under the Plan may be authorized-but-unissued shares of Company stock or reacquired shares of Company stock, including shares purchased by the Company on the open market for purposes of the Plan.

The Company recognizes compensation expense for stock awards over the vesting period of the award. The following table presents stock-based compensation expense recorded in operation and maintenance expense in the accompanying Consolidated Statements of Operations and Comprehensive Income for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31,	
	2014	**2013**
Stock options	$ 655	$ 752
Restricted stock units	1,919	1,157
Employee stock purchase plan	137	133
Stock-based compensation in operation and maintenance expense	2,711	2,042
Income tax benefit	(1,057)	(796)
After-tax stock-based compensation expense	$ 1,654	$ 1,246

There were no significant stock-based compensation costs capitalized during the three months ended March 31, 2014 and 2013, respectively.

Stock Options

In the first three months of 2014, the Company granted non-qualified stock options to certain employees under the Plan. The stock options vest ratably over the three-year service period beginning January 1, 2014. These awards have no performance vesting conditions and the grant date fair value is amortized through expense over the requisite service period using the straight-line method.

The following table presents the weighted-average assumptions used in the Black-Scholes option-pricing model and the resulting weighted-average grant date fair value per share of stock options granted through March 31 , 2014:

Dividend yield	2.54%
Expected volatility	17.70%
Risk-free interest rate	1.01%
Expected life (years)	3.5
Exercise price	$ 44.06
Grant date fair value per share	$ 4.49

Stock options granted under the Plan have maximum terms of seven years, vest over periods ranging from one to three years, and are granted with exercise prices equal to the market value of the Company’s common stock on the date of grant. As of March 31, 2014, $3,376 of total unrecognized compensation cost related to the non-vested stock options is expected to be recognized over the weighted-average period of 1.7 years.

The table below summarizes stock option activity for the three months ended March 31, 2014:

	Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value
Options outstanding at January 1, 2014	2,055	$ 28.80		
Granted	442	44.06		
Forfeited or expired	(10)	36.88		
Exercised	(249)	27.41		
Options outstanding at March 31, 2014	2,238	$ 31.93	4.4	$ 30,139
Exercisable at March 31, 2014	1,421	$ 26.80	3.4	$ 26,431

The following table summarizes additional information regarding stock options exercised during the three months ended March 31, 2014 and 2013:

	2014	2013
Intrinsic value	$ 4,206	$ 4,955
Exercise proceeds	6,822	6,893
Income tax benefit	1,151	1,418

Restricted Stock Units

During 2011, the Company granted selected employees 189 restricted stock units with internal performance measures and, separately, certain market thresholds. These awards vested in January 2014. The terms of the grants specified that if certain performance on internal measures and market thresholds were achieved, the restricted stock units would vest; if performance were surpassed, up to 175% of the target awards would be distributed; and if performance thresholds were not met, awards would be cancelled. In January 2014, an additional 113 restricted stock units were granted and distributed because performance thresholds were exceeded.

In the first three months of 2014, the Company granted restricted stock units, both with and without performance conditions, to certain employees under the Plan. The restricted stock units without performance conditions vest ratably over the three-year service period beginning January 1, 2014 and the restricted stock units with performance conditions vest ratably over the three-year performance period beginning January 1, 2014 (the "Performance Period"). Distribution of the performance shares is contingent upon the achievement of internal performance measures and, separately, certain market thresholds over the Performance Period. The restricted stock units granted with service-only conditions and those with internal performance measures are valued at the market value of the Company's common stock on the date of grant. The restricted stock units granted with market conditions are valued using a Monte Carlo model.

Weighted-average assumptions used in the Monte Carlo simulation are as follows for restricted stock units with market conditions granted through March 31, 2014:

Expected volatility	17.80%
Risk-free interest rate	0.72%
Expected life (years)	3

The grant date fair value of the restricted stock unit awards that vest ratably and have market and/or performance and service conditions is amortized through expense over the requisite service period using the graded-vesting method. Restricted stock units that have no performance conditions are amortized through expense over the requisite service period using the straight-line method. As of March 31, 2014, $10,250 of total unrecognized compensation cost related to the non-vested restricted stock units is expected to be recognized over the weighted-average remaining life of 1.4 years.

The table below summarizes restricted stock unit activity for the three months ended March 31, 2014:

	Shares	Weighted-Average Grant Date Fair Value (per share)
Non-vested total at January 1, 2014	539	$ 36.27
Granted	176	45.06
Performance share adjustment	113	30.34
Vested	(298)	30.69
Forfeited	(4)	39.11
Non-vested total at March 31, 2014	526	$ 41.09

The following table summarizes additional information regarding restricted stock units distributed during the three months ended March 31, 2014 and 2013:

	2014	2013
Intrinsic value	$ 13,175	$ 13,559
Income tax benefit	1,450	2,049

If dividends are declared with respect to shares of the Company's common stock before the restricted stock units are distributed, the Company credits a liability for the value of the dividends that would have been paid if the restricted stock units were shares of Company common stock. When the restricted stock units are distributed, the Company pays the participant a lump sum cash payment equal to the value of the dividend equivalents accrued. The Company accrued dividend equivalents totaling $ 175 and $9 to retained earnings during the three months ended March 31, 2014 and 2013, respectively.

Employee Stock Purchase Plan

Under the Nonqualified Employee Stock Purchase Plan (the "ESPP"), employees can use payroll deductions to acquire Company stock at the lesser of 90% of the fair market value of (a) the beginning or (b) the end of each three-month purchase period. As of Mar ch 31, 2014, there were 1,338 shares of common stock reserved for issuance under the ESPP. During the three months ended March 31, 2014, the Company issued 25 shares under the ESPP.

Note 6: Long-Term Debt

The Company primarily issues long-term debt to fund capital expenditures at the regulated subsidiaries. The components of long-term debt are as follows:

	Rate	Weighted Average Rate	Maturity	March 31, 2014	December 31, 2013
Long-term debt of American Water Capital Corp. ("AWCC") (a)					
Private activity bonds and government funded debt					
Fixed rate	2.30%-6.75%	5.63%	2018-2040	$ 330,732	$ 330,732
Senior notes					
Fixed rate	3.85%-8.27%	5.69%	2016-2042	3,312,757	3,312,761
Long-term debt of other subsidiaries					
Private activity bonds and government funded debt					
Fixed rate	0.00%-6.20%	4.69%	2014-2041	861,535	863,716
Mortgage bonds					
Fixed rate	4.29%-9.71%	7.41%	2015-2039	676,500	676,500
Mandatory redeemable preferred stock	8.47%-9.75%	8.61%	2019-2036	17,702	18,902
Capital lease obligation	12.17%	12.17%	2026	906	913
Long-term debt				5,200,132	5,203,524
Unamortized debt, net (b)				35,012	35,984
Fair value adjustment to interest rate hedge				4,396	4,724
Total long-term debt				$ 5,239,540	$ 5,244,232

(a) AWCC, which is a wholly-owned subsidiary of the Company, has a strong support agreement with its parent that, under certain circumstances, is the functional equivalent of a guarantee.

(b) Primarily fair value adjustments previously recognized in acquisition purchase accounting.

The Company did not issue long-term debt during the first three months of 2014.

The following long-term debt was retired through optional redemption or payment at maturity during the first three months of 2014:

Company	Type	Interest Rate	Maturity	Amount
American Water Capital Corp.	Senior notes–fixed rate	6.00%	2039	$ 4
Other subsidiaries	Private activity bonds and government funded debt–fixed rate	0.00%-5.25%	2014-2041	2,181
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments			7
Total retirements and redemptions				$ 3,392

Interest income included in interest, net is summarized below:

	Three Months Ended March 31, 2014	Three Months Ended March 31, 2013
Interest income	$ 3,377	$ 2,835

The Company has an interest-rate swap to hedge $100,000 of its 6.085% fixed-rate debt maturing 2017. The Company pays variable interest of six-month LIBOR plus 3.422%. The swap is accounted for as a fair-value hedge and matures with the fixed-rate debt in 2017.

The following table provides a summary of the derivative fair value balance recorded by the Company and the line item in the Consolidated Balance Sheets in which such amount is recorded:

Balance sheet classification	**March 31, 2014**	**December 31, 2013**
Regulatory and other long-term assets		
Other	$ 4,399	$ 4,776
Long-term debt		
Long-term debt	4,396	4,724

For derivative instruments that are designated and qualify as fair-value hedges, the gain or loss on the hedge instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current net income. The Company includes the gain or loss on the derivative instrument and the offsetting loss or gain on the hedged item in interest expense as follows:

	Three Months Ended March 31,	
Income statement classification	**2014**	**2013**
Interest, net		
Loss on swap	$ (377)	$ (673)
Gain on borrowing	328	548
Hedge ineffectiveness	(49)	(125)

Note 7: Short-Term Debt

Short-term debt consists of commercial paper borrowings totaling $638,227 (net of discount of $73) at March 31, 2014 and $630,307 (net of discount of $193) at December 31, 2013. During the first three months of 2014, the Company borrowed $35,000 with maturities greater than three months, and repaid $221,000 borrowed in 2013 with maturities greater than three months.

Note 8: Income Taxes

The Company's estimated annual effective tax rate for the three months ended March 31, 2014 was 40.1% compared to 39.8% for the three months ended March 31, 2013, excluding various discrete items.

The Company's actual effective tax rates were as follows:

	Three Months Ended March 31,	
	2014	**2013**
Actual effective tax rate	39.7%	35.1%

Included in 2013 are discrete items including $3,274 of tax benefits associated with an entity reorganization within the Company's Market-Based segment that allowed for the utilization of state net operating loss carryforwards and the release of a valuation allowance.

Current deferred tax assets increased in 2014 due to the expected utilization of certain tax attributes within the next 12 months.

Note 9: Pension and Other Postretirement Benefits

The following table provides the components of net periodic benefit costs:

	Three Months Ended March 31, 2014	Three Months Ended March 31, 2013
Components of net periodic pension benefit cost		
Service cost	$ 7,943	$ 9,468
Interest cost	19,163	17,024
Expected return on plan assets	(23,709)	(22,107)
Amortization of:		
Prior service cost (credit)	181	181
Actuarial (gain) loss	(33)	9,293
Net periodic pension benefit cost	$ 3,545	$ 13,859
Components of net periodic other postretirement benefit cost		
Service cost	$ 2,764	$ 3,820
Interest cost	7,151	7,175
Expected return on plan assets	(6,875)	(7,571)
Amortization of:		
Prior service cost (credit)	(547)	(547)
Actuarial (gain) loss	(20)	2,782
Net periodic other postretirement benefit cost	$ 2,473	$ 5,659

The Company contributed $7,680 to its defined benefit pension plans in the first three months of 2014 and expects to contribute $29,785 during the balance of 2014. In addition, the Company contributed $3,034 for the funding of its other postretirement plans in the first three months of 2014 and expects to contribute $9,103 during the balance of 2014.

Note 10: Commitments and Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. At March 31, 2014, the Company has accrued approximately $3,300 as probable costs and it is reasonably possible that additional losses could range up to $32,100 for these matters. For certain matters, the Company is unable to estimate possible losses. The Company believes that damages or settlements recovered by plaintiffs in such claims or actions, if any, will not have a material adverse effect on the Company's results of operations, financial position or cash flows.

The Company enters into agreements for the provision of services to water and wastewater facilities for the United States military, municipalities and other customers. The Company's military services agreements expire between 2051 and 2064 and have remaining performance commitments as measured by estimated remaining contract revenue of $2,258,662 at March 31, 2014. The military contracts are subject to customary termination provisions held by the U.S. Federal Government prior to the agreed upon contract expiration. The Company's Operations and Maintenance agreements with municipalities and other customers expire between 2014 and 2048 and have remaining performance commitments as measured by estimated remaining contract revenue of $938,071 at March 31, 2014. Some of the Company's long-term contracts to operate and maintain a municipality's, federal government's or other party's water or wastewater treatment and delivery facilities include responsibility for certain maintenance for some of those facilities, in exchange for an annual fee. Unless specifically required to perform certain maintenance activities, the maintenance costs are recognized when the maintenance is performed.

Note 11: Environmental Matters

The Company's water and wastewater operations are subject to federal, state, local and foreign requirements relating to environmental protection, and as such, the Company periodically becomes subject to environmental claims in the normal course of business. Environmental expenditures that relate to current operations or provide a future benefit are expensed or capitalized as appropriate. Remediation costs that relate to an existing condition caused by past operations are accrued, on an undiscounted basis, when it is probable that these costs will be incurred and can be reasonably estimated. Remediation costs accrued amounted to $3,300 at March 31, 2014 and December 31, 2013, respectively. The accrual relates to a conservation agreement entered into by a subsidiary of the Company with the National Oceanic and Atmospheric Administration ("NOAA") requiring the Company to, among other provisions, implement certain measures to protect the steelhead trout and its habitat in the Carmel River watershed in the state of California. The Company has agreed to pay $1,100 annually from 2010 through 2016. The Company pursues recovery of incurred costs through all appropriate means, including regulatory recovery through customer rates. The Company's regulatory assets at March 31, 2014 and December 31, 2013 include $7,833 and $8,027, respectively, related to the NOAA agreement.

Note 12: Earnings per Common Share

Earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security. The Company has participating securities related to restricted stock units, granted under the Company's 2007 Omnibus Equity Compensation Plan, that earn dividend equivalents on an equal basis with common shares. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities.

The following is a reconciliation of the Company's net income and weighted-average common shares outstanding for calculating basic earnings per share:

	Three Months Ended March 31,	
Basic	**2014**	**2013**
Net income	$ 68,123	$ 57,643
Less: Distributed earnings to common shareholders	50,128	9
Less: Distributed earnings to participating securities	15	0
Undistributed earnings	17,980	57,634
Undistributed earnings allocated to common shareholders	17,975	57,614
Undistributed earnings allocated to participating securities	5	20
Total income available to common shareholders, basic	$ 68,103	$ 57,623
Weighted-average common shares outstanding, basic	178,539	177,327
Basic net income per common share	$ 0.38	$ 0.32

Diluted earnings per common share is based on the weighted-average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents related to the restricted stock units, stock options, and employee stock purchase plan. The dilutive effect of the common stock equivalents is calculated using the treasury stock method and expected proceeds on vesting of the restricted stock units, exercise of the stock options and purchases under the employee stock purchase plan.

The following is a reconciliation of the Company’s net income and weighted-average common shares outstanding for calculating diluted earnings per share:

	Three Months Ended March 31,	
Diluted	**2014**	**2013**
Total income available to common shareholders, basic	$ 68,103	$ 57,623
Undistributed earnings for participating securities	5	20
Total income available to common shareholders, diluted	$ 68,108	$ 57,643
Weighted-average common shares outstanding, basic	178,539	177,327
Common stock equivalents:		
Restricted stock units	318	381
Stock options	599	755
Employee stock purchase plan	1	2
Weighted-average common shares outstanding, diluted	179,457	178,465
Diluted net income per common share	$ 0.38	$ 0.32

The following potentially dilutive common stock equivalents were not included in the earnings per share calculations because they were anti-dilutive:

	Three Months Ended March 31,	
	2014	**2013**
Stock options	470	317
Restricted stock units where certain performance conditions were not met	90	139

Note 13: Fair Value of Assets and Liabilities

Fair Value of Financial Instruments

The Company used the following methods and assumptions to estimate its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported in the accompanying Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted p rices in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs. The fair values of instruments classified as Level 2 and 3 are determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market rates. As a majority of the Company’s debts do not trade in active markets, the Company calculated a base yield curve using a risk-free rate (a U.S. Treasury securities yield curve) plus a credit spread that is based on the following two factors: an average of the Company’s own publicly-traded debt securities and the current market rates for U.S. Utility A- debt securities. The Company used these yield curve assumptions to derive a base yield for the Level 2 and Level 3 securities. Additionally, the Company adjusted the base yield for specific features of the debt securities including call features, coupon tax treatment and collateral for the Level 3 instruments.

The carrying amounts (including fair value adjustments previously recognized in acquisition purchase accounting) and fair values of the financial instruments are as follows:

Recurring Fair Value Measures	Carrying Amount	At Fair Value as of March 31, 2014 Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 17,621	$ 0	$ 0	$ 22,048	$ 22,048
Long-term debt (excluding capital lease obligations)	5,221,013	2,347,670	1,465,833	2,133,449	5,946,952

Recurring Fair Value Measures	Carrying Amount	At Fair Value as of December 31, 2013 Level 1	Level 2	Level 3	Total
Preferred stock with mandatory redemption requirements	$ 18,827	$ 0	$ 0	$ 22,795	$ 22,795
Long-term debt (excluding capital lease obligations)	5,224,492	2,263,355	1,462,404	2,057,506	5,783,265

Recurring Fair Value Measurements

The following table presents assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy as of March 31, 2014 and December 31, 2013, respectively:

Recurring Fair Value Measures	At Fair Value as of March 31, 2014 Level 1	Level 2	Level 3	Total
Assets:				
Restricted funds	$ 29,497	$ 0	$ 0	$ 29,497
Rabbi trust investments	0	682	0	682
Deposits	2,047	0	0	2,047
Mark-to-market derivative asset	0	4,399	0	4,399
Total assets	31,544	5,081	0	36,625
Liabilities:				
Deferred compensation obligation	0	11,476	0	11,476
Mark-to-market derivative liability	0	1,225	0	1,225
Total liabilities	0	12,701	0	12,701
Total net assets (liabilities)	$ 31,544	$ (7,620)	$ 0	$ 23,924

Recurring Fair Value Measures	At Fair Value as of December 31, 2013 Level 1	Level 2	Level 3	Total
Assets:				
Restricted funds	$ 29,259	$ 0	$ 0	$ 29,259
Rabbi trust investments	0	444	0	444
Deposits	1,901	0	0	1,901
Mark-to-market derivative asset	0	4,776	0	4,776
Total assets	31,160	5,220	0	36,380
Liabilities:				
Deferred compensation obligation	0	11,928	0	11,928
Mark-to-market derivative liability	0	1,276	0	1,276
Total liabilities	0	13,204	0	13,204
Total net assets (liabilities)	$ 31,160	$ (7,984)	$ 0	$ 23,176

Restricted funds—The Company's restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operations and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred. Restricted funds expected to be released within twelve months subsequent to the balance sheet date are classified as current.

Rabbi trust investments—The Company's rabbi trust investments consist primarily of fixed income investments from which supplemental executive retirement plan benefits are paid. The Company includes these assets in other long-term assets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets.

Deferred compensation obligations—The Company's deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities. The value of the Company's deferred compensation obligations is based on the market value of the participants' notional investment accounts. The notional investments are comprised primarily of mutual funds, which are based on observable market prices.

Mark-to-market derivative asset and liability—The Company utilizes fixed-to-floating interest-rate swaps, typically designated as fair-value hedges, to achieve a targeted level of variable-rate debt as a percentage of total debt. The Company also employs derivative financial instruments in the form of variable-to-fixed interest rate swaps, classified as economic hedges, in order to fix the interest cost on some of its variable-rate debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

Note 14: Segment Information

The Company has two operating segments that are also the Company's two reportable segments, referred to as Regulated Businesses and Market-Based Operations. The following table includes the Company's summarized segment information:

	As of or for the Three Months Ended March 31, 2014			
	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 607,644	$ 78,798	$ (4,496)	$ 681,946
Depreciation and amortization	98,783	1,604	5,691	106,078
Total operating expenses, net	431,957	68,812	(4,919)	495,850
Income (loss) before income taxes	115,028	10,631	(12,653)	113,006
Total assets	13,497,624	284,765	1,492,432	15,274,821
Capital expenditures	191,579	887	0	192,466

	As of or for the Three Months Ended March 31, 2013

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements included in this Form 10-Q, other than statements of historical fact, may constitute forward-looking statements. Forward-looking statements can be identified by the use of words such as "may," "should," "will," "could," "estimates," "predicts," "potential," "continue," "anticipates," "believes," "plans," "expects," "future" and "intends" and similar expressions. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance to differ from those projected in the forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Factors that could cause or contribute to differences in results and outcomes from those in our forward-looking statements include, without limitation, those items discussed in the "Risk Factors" section or other sections in the Company's annual report on Form 10-K ("Form 10-K") for the year ended December 31, 2013 filed with the Securities and Exchange Commission ("SEC"), as well as in Item IA of Part II of this Quarterly Report. We undertake no obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

General

American Water Works Company, Inc. (herein referred to as "American Water" or the "Company") is the largest investor-owned United States water and wastewater utility company, as measured both by operating revenue and population served. Our primary business involves the ownership of water and wastewater utilities that provide water and wastewater services to residential, commercial, industrial and other customers. Our Regulated Businesses that provide these services are generally subject to economic regulation by state regulatory agencies ("PUCs") in the states in which they operate. We report the results of these businesses in our Regulated Businesses segment. We also provide services that are not subject to economic regulation by the PUCs. We report the results of these businesses in our Market-Based Operations segment. For further description of our businesses see Item 1, "Business" section, found in our Form 10-K for the year ended December 31, 2013 filed with the SEC.

You should read the following discussion in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Quarterly Report on Form 10-Q and in our Form 10-K for the year ended December 31, 2013 filed with the SEC.

Overview

Financial Results. For the three months ended March 31, 2014, we reported net income of $68.1 million, or diluted earnings per share ("EPS") of $0.38 compared to $57.6 million, or diluted EPS of $0.32 for the comparable period in 2013.

The primary factors contributing to the increase in net income for the three months ended March 31, 2014 compared to the same period in 2013 was increased revenues in our Regulated Business segment partially offset by higher operation and maintenance expense ("O&M"), also in our Regulated Businesses. For further details, see "Consolidated Results of Operations and Variances" and "Segment Results" below.

For 2014, our goals include actively addressing regulatory lag that impacts return on our investments and promoting constructive regulatory frameworks, continuing to improve our regulated O&M efficiency ratio, making efficient use of our capital and expanding both our Regulated Businesses segment through focused acquisitions and/or organic growth and our Market-Based Operations segment through core growth, expanding markets and new offerings. Also, in 2014, we anticipate savings from expense reductions attributable to lower business transformation project-related implementation costs, lower pension costs and lower interest expense resulting from our 2013 debt refinancing. In addition, we will continue to concentrate on our customers by achieving established customer satisfaction and service quality targets. Regarding environmental sustainability, we are committed to maximizing our protection of the environment, reducing our carbon and waste footprints and water lost through leakage.

We expect to resolve three rate proceedings during 2014 and plan to file up to four general rate cases, including one which was already filed in January 2014. Additionally, we will file for infrastructure surcharges, either as part of our general rate case filings or in separate filings, and continue to pursue appropriate pass-through mechanisms for certain costs and forward-looking adjustments or mechanisms, including those that recognize declining usage.

The progress that we have made in the first three months of 2014 with respect to certain of these objectives is described below.

Addressing Regulatory Lag. On January 1, 2014, our Pennsylvania rate case settlement, which was approved on December 19, 2013 and provides for $26.0 million in additional annualized revenue, became effective. Also, on January 1, 2014, additional annualized revenues of $0.9 million, $10.1 million and $2.1 million resulting from infrastructure charges in our New York, New Jersey and Illinois subsidiaries, respectively, became effective. Additionally, an environmental cost adjustment mechanism to pass through expenses and capital costs of mandated environmental compliance measures by a utility, which was previously approved by the Missouri Public Service Commission in April 2013, was adopted by our Missouri subsidiary on January 3, 2014, and became effective February 3, 2014.

Also, in January 2014, our New York subsidiary filed two infrastructure surcharges producing additional annualized revenue of approximately $0.7 million and $0.2 million which became effective on March 3, 2014 and April 1, 2014, respectively.

On January 24, 2014, we filed our general rate case in Indiana requesting additional annualized revenues of $19.6 million. On February 28, 2014, the Iowa Utilities Board issued a final order, authorizing additional annualized revenue of $3.8 million for our Iowa subsidiary. The new rates were effective on April 18, 2014. The increase includes approximately $2.7 million of interim rates that were effective May 10, 2013.

On February 25, 2014, our Missouri subsidiary filed for additional revenues from infrastructure charges in the amount of $3.1 million. The filing is expected to be effective during the second quarter of 2014.

On April 1, 2014, the final $1.2 million of annualized revenue rate increase, previously approved by the New York State Public Service Commission in March of 2012, became effective.

In October, 2013, our Tennessee subsidiary filed a petition with the Tennessee Regulatory Authority (“TRA”) that would allow four alternative rate mechanisms including a Qualified Infrastructure Investment Program Rider, an Economic Development Investment Rider, a Safety and Environmental Compliance Rider, and a Production Costs and Other Pass-through mechanism. On January 10, 2014, we filed with the TRA a settlement agreement that we entered into with the Consumer Advocate and Protection Division. The TRA approved both the rate mechanisms and settlement agreement with an effective date of April 15, 2014.

As of May 5, 2014, we are awaiting final orders for general rate cases in two states, requesting additional annualized revenue of approximately $52.0 million, including the Indiana case filed in January 2014. There is no assurance that all, or any portion, of these requested increases will be granted.

Continuing Improvement in O&M Efficiency Ratio for our Regulated Businesses. Our O&M efficiency ratio (a non-GAAP measure) is calculated on our Regulated Businesses’ operations and is defined as operation and maintenance expense divided by operating revenues where both O&M and operating revenues are adjusted to eliminate the impact of purchased water. We also exclude the allocable portion of non-O&M support services costs, mainly depreciation and general taxes that are reflected in the Regulated Businesses segment as O&M costs but for consolidated financial reporting purposes are categorized within other line items in the Statement of Operations. Our O&M efficiency ratio was 41.5% for the three months ended March 31, 2014, compared to 42.9% for the three months ended March 31, 2013. The change in our 2014 O&M efficiency ratio for the three months ended March 31, 2014 was primarily attributable to the increase in our Regulated Businesses’ revenue.

We evaluate our operating performance using this measure because management believes it is a direct measure of the efficiency of our Regulated Businesses’ operations. This information is intended to enhance an investor’s overall understanding of our operating performance. The O&M efficiency ratio is not a measure defined under GAAP and may not be comparable to other companies’ operating measures and should not be used in place of the GAAP information provided elsewhere in this report. The following table provides a reconciliation that compares O&M and operating revenues, as determined in accordance with GAAP, to those amounts utilized in the calculation of our O&M efficiency ratio for the three months ended March 31, 2014 as compared to the same period in 2013:

Regulated O&M Efficiency Ratio (a Non-GAAP Measure):

	For the three months ended March 31,	
	2014	2013
	(In thousands)	
Total O&M	$ 329,275	$ 312,203
Less:		
O&M—Market-Based Operations	65,840	59,224
O&M—Other	(14,392)	(15,963)
Total Regulated O&M	277,827	268,942
Less:		
Regulated purchased water expense	27,082	23,984
Allocation of internal O&M	9,992	9,554
Adjusted Regulated O&M(a)	$ 240,753	$ 235,404
Total Operating Revenues	$ 681,946	$ 636,137
Less:		
Operating revenues—Market-Based Operations	78,798	67,336
Operating revenues—Other	(4,496)	(4,436)
Total Regulated operating revenues	607,644	573,237
Less: Regulated purchased water expense*	27,082	23,984
Adjusted Regulated operating revenues(b)	$ 580,562	$ 549,253
Regulated O&M efficiency ratio (a)/(b)	41.5%	42.9%

* Calculation assumes purchased water revenues are equal to purchased water expenses.

Making Efficient Use of Capital. We made capital investments of approximately $175.2 million during the three months ended March 31, 2014. Of this total investment, approximately $173.0 million was for Company-funded capital improvements with the remaining $2.2 million for the acquisition of regulated water and/or wastewater systems. For the full-year of 2014, we continue to estimate our total capital plan to be approximately $1.1 billion, with approximately $900 million to $1.0 billion allocated to upgrading our infrastructure and systems and $100 million for acquisitions and strategic investment purposes.

Expanding Markets and Developing New Offerings. During the three months ended March 31, 2014, our Regulated Businesses completed the purchase of a regulated water system and another regulated system with both water and wastewater services. These acquisitions added approximately 900 customers to our regulated operations. Also, as previously announced, in January 2014, our Military Services Group, within our Market-Based Operations was awarded a contract for ownership, operation and maintenance of the water and wastewater systems at Hill Air Force Base in Utah and our Homeowner Services Group ("HOS") expanded its water and sewer line protection programs into Maine, Minnesota and Oklahoma.

Other Matters.

West Virginia Freedom Industries Chemical Spill. As noted in the Form 10-K, on January 9, 2014, a chemical storage tank owned by Freedom Industries, Inc. leaked two substances, 4-methylcyclohexane methanol, or MCHM, and PPH, a mix of polyglycol ethers, into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant in Charleston, West Virginia. As a result of this event, income before income taxes was reduced by $5.9 million for the three months ended March 31, 2014.

As disclosed in more detail in Part II, Item 1, "Legal Proceedings" in this 10-Q to date, 58 lawsuits have been filed against WVAWC with respect to this matter in the United States District Court for the Southern District of West Virginia or West Virginia Circuit Courts in Kanawha, Boone, and Putman counties. (The state court cases have been removed to federal court and are subject to remand motions.) Many of these lawsuits also name Freedom Industries (which is now in bankruptcy), and a few also name the Company or other Company affiliates.

The Company and WVAWC believe that WVAWC has responded appropriately to, and has no responsibility for, the Freedom Industries spill and the Company, WVAWC and other Company-affiliated entities named in any of the lawsuits have valid, meritorious defenses to the lawsuits. The Company, WVAWC and the other Company affiliates intend to vigorously contest the lawsuits. Nevertheless, an adverse outcome in one or more of the lawsuits could have a material adverse effect on the Company's financial condition, results of operations, cash flows, liquidity and reputation. Moreover, WVAWC and the Company are unable to predict the outcome of the ongoing government investigations or any legislative initiatives that might affect water utility operations.

Consolidated Results of Operations and Variances

	Three Months Ended March 31, 2014	Three Months Ended March 31, 2013	Favorable (Unfavorable) Change
Operating revenues	$ 681,946	$ 636,137	$ 45,809
Operating expenses

The following is a discussion of the consolidated results of operations for the three months ended March 31, 2014 compared to the three months ended March 31, 2013:

Three Months Ended March 31, 2014 Compared to Three Months Ended March 31, 2013

Operating revenues. Consolidated operating revenues for the three months ended March 31, 2014 increased $45.8 million, or 7.2%, compared to the same period in 2013. The increase is the result of higher revenues in our Regulated Businesses segment of $34.4 million, which is mainly attributable to rate increases, incremental revenues from surcharges and amortization of balancing accounts as well as increased usage. Also, contributing to the higher revenues was an $11.5 million increase in our Market-Based Operations segment primarily due to incremental revenue from our military contracts as a result of increased construction type projects at Fort Meade and Belvoir as well as contract growth in our Homeowner Services Group ("HOS"). For further information, see the respective "Operating Revenues" discussions within the "Segment Results."

Operation and maintenance. Consolidated O&M for the three months ended March 31, 2014 increased by $17.1 million, or 5.5%, compared to the same period in 2013. The variance is primarily due to higher O&M costs in our Regulated Businesses segment of $8.9 million, principally due to increased production costs and in our Market-Based segment of $6.6 million mainly as a result of incremental cost related to increased activity in our military contracts, corresponding with the increased revenue. For further discussions on the changes in our Regulated and Market-Based segments' O&M, see the respective "Operation and Maintenance" discussions within the "Segment Results."

Depreciation and amortization. Depreciation and amortization expense increased by $6.4 million, or 6.5%, for the three months ended March 31, 2014, compared to the same period in the prior year principally as a result of additional utility plant placed in service, including Phase II of our business transformation project that went into service during the second and fourth quarters of 2013.

Other income (expenses). Other expenses decreased by $2.3 million, or 3.1%, for the three months ended March 31, 2014, compared to the same period in the prior year. The change is primarily due to a reduction in interest expense resulting from interest savings as a result of our 2013 refinancings, offset by a reduction in AFUDC which is mainly attributable to Phase II of our business transformation project being placed into service in the second and fourth quarters of 2013.

Provision for income taxes. Our consolidated provision for income taxes increased $13.7 million, or 44.0%, to $44.9 million for the three months ended March 31, 2014. The effective tax rates for the three months ended March 31, 2014 and 2013 were 39.7% and 35.1%, respectively. The 2013 rate included a $3.3 million tax benefit associated with a legal structure reorganization in our Market-Based segment. This strategic restructuring allows us to utilize state net operating loss carryforwards, which without the restructuring most likely would not have been utilized prior to their expiration.

Segment Results

We have two operating segments that are also our reportable segments: the Regulated Businesses and the Market-Based Operations. We evaluate the performance of our segments and allocate resources based on several factors, with the primary measure being income before income taxes.

Regulated Businesses Segment

The following table summarizes certain financial information for our Regulated Businesses for the periods indicated:

	For the three months ended March 31,		
	2014	2013	Increase (Decrease)
	(In thousands)		
Operating revenues	$ 607,644	$ 573,237	$ 34,407
Operation and maintenance expense	277,827	268,942	8,885
Operating expenses, net	431,957	415,516	16,441
Income before income taxes	115,028	98,781	16,247

Operating revenues. Our primary business involves the ownership of water and wastewater utilities that provide services to residential, commercial, industrial and other customers. This business is generally subject to PUC economic regulation and our results of operations are impacted significantly by rates authorized by the PUCs in the states in which we operate.

Operating revenues increased by $34.4 million, or 6.0%, for the three months ended March 31, 2014, as compared to the same period in 2013. The increase in revenues is principally due to incremental revenues of approximately $19.8 million attributable to rate increases from rate authorizations for a number of our operating companies and higher consumption which increased revenues by approximately $5.8 million. Additionally revenues were higher by $5.3 million due to increased surcharge and amortization of balancing accounts. Lastly, revenues increased by $3.3 million as a result of 2013 acquisitions, with the most significant being the acquisition of Dale Service Corporation (“Dale”) by our Virginia subsidiary in the fourth quarter of 2013.

The following table provides information regarding the Regulated Businesses' for the periods indicated:

	For the three months ended March 31,							
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	Operating Revenues (dollars in thousands)				Billed Water Sales Volume (gallons in millions)			
Customer Class								
Water service								
Residential	$ 353,524	$ 326,142	$ 27,382	8.4%	39,937	37,988	1,949	5.1%
Commercial	129,819	114,074	15,745	13.8%	18,989	16,922	2,067	12.2%
Industrial	33,569	28,201	5,368	19.0%	9,815	8,883	932	10.5%
Public and other	83,966	73,953	10,013	13.5%	13,409	11,627	1,782	15.3%
Other water revenues	777	5,134	(4,357)	(84.9%)	—	—	—	—
Billed water services	601,655	547,504	54,151	9.9%	82,150	75,420	6,730	8.9%
Unbilled water services	(26,207)	(5,460)	(20,747)	380.0%				
Total water service revenues	575,448	542,044	33,404	6.2%				
Wastewater service revenues	22,408	19,884	2,524	12.7%				
Other revenues	9,788	11,309	(1,521)	(13.4%)				
	$ 607,644	$ 573,237	$ 34,407	6.0%				

Water Services – Water service operating revenues for the three months ended March 31, 2014 totaled $575.4 million, a $33.4 million increase, or 6.2%, over the same period of 2013. As described above, this increase is primarily due to rate increases, higher consumption and incremental revenues associated with surcharges and amortization of balancing accounts. Also, it should be noted that the mix between billed revenues and unbilled revenues for the three months ended March 31, 2014, as compared to the same period in 2013, has changed. This change is principally the result of the implementation of our Customer Information System "CIS" as part of Phase II of our business transformation project. At December 31, 2013, unbilled revenues were significantly higher than historical levels due to billing delays in certain accounts. During the first quarter of 2014, we have addressed a majority of these delayed billings. Therefore, as a result, the change in unbilled water revenue for the first quarter of 2014 compared to the same period in 2013 has decreased by $20.7 million with a corresponding increase in billed revenues.

Wastewater services – Our subsidiaries provide wastewater services in ten states. Revenues from these services increased $2.5 million, or 12.7%, for the three months ended March 31, 2014, compared to the same period in 2013. The increase is primarily attributable to the Dale acquisition in the fourth quarter of 2013.

Operation and maintenance expense. Operation and maintenance expense increased $8.9 million, or 3.3%, for the three months ended March 31, 2014, compared to the same period in 2013.

The following table provides information regarding operation and maintenance expense for the three months ended March 31 , 2014 and 2013, by major expense category:

	For the three months ended March 31,			
	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 69,259	$ 60,450	$ 8,809	14.6%
Employee-related costs	107,181	113,201	(6,020)	(5.3%)
Operating supplies and services	56,265	54,360	1,905	3.5%
Maintenance materials and supplies	20,447	18,279	2,168	11.9%
Customer billing and accounting	13,205	10,172	3,033	29.8%
Other	11,470	12,480	(1,010)	(8.1%)
Total	$ 277,827	$ 268,942	$ 8,885	3.3%

Production costs by major expense type were as follows:

	For the three months ended March 31,			
	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Purchased Water	$ 27,082	$ 23,984	$ 3,098	12.9%
Fuel and Power	23,918	19,978	3,940	19.7%
Chemicals	10,668	10,604	64	0.6%
Waste Disposal	7,591	5,884	1,707	29.0%
Total	$ 69,259	$ 60,450	$ 8,809	14.6%

Production costs increased overall by $8.8 million, or 14.6%, for the three months ended March 31, 2014, compared to the same period in the prior year. The higher costs are mainly due to incremental purchased water costs, principally due to price increases in our California subsidiary and higher fuel and power costs due to increased customer demand and higher supplier prices in several of our operating facilities.

Employee-related costs, including salaries and wages, group insurance and pension expense, decreased $6.0 million, or 5.3%, for the three months ended March 31, 2014, compared to the same period in the prior year. These employee-related costs represent approximately 39% and 42% of operation and maintenance expense for the three months ended March 31, 2014 and 2013, respectively.

The following table provides information with respect to components of employee-related costs for the three months ended March 31, 2014 and 2013:

	For the three months ended March 31,			
	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Salaries and wages	$ 81,083	$ 78,845	$ 2,238	2.8%
Pensions	6,820	12,371	(5,551)	(44.9%)
Group insurance	14,365	16,844	(2,479)	(14.7%)
Other benefits	4,913	5,141	(228)	(4.4%)
Total	$ 107,181	$ 113,201	$ (6,020)	(5.3%)

The overall decrease in employee-related costs for the three months ended March 31, 2014, compared to the same period in 2013, was primarily due to a reduction in pension and group insurance expenses, with the primary driver of group insurance being postretirement benefit costs. These decreases are principally due to the change in the discount rate, which in turn results in decreased contributions, in particular in certain of our regulated operating companies whose costs are recovered based on our funding policy, which is to fund at least the minimum amount required by the Employee Retirement Income Security Act of 1974. Partially offsetting these decreases was an increase in salaries and wages expense for the three months ended March 31, 2014, compared to the same period in 2013. This increase is the result of annual wage increases and increased overtime expense attributable to increased number of main breaks as a result of the harsh winter weather conditions, offset by a reduction in incentive compensation expense due to a lower than expected 2013 incentive compensation payout as well as higher capitalization rates as a result of increased capital projects.

Operating supplies and services include the day-to-day expenses of office operation, legal and other professional services, transportation expenses, information systems rental charges and other office equipment rental charges. These costs increased $1.9 million, or 3.5%, for the three months ended March 31, 2014. The overall increase was primarily due to increased legal costs for our West Virginia subsidiary associated with the Freedom Industries Chemical Spill which occurred in January 2014. Partially offsetting the increase in costs was lower contracted service in the first quarter of 2014 compared to 2013. This decrease was the result of the inclusion in 2013 of additional costs, mainly as a result of backfilling positions; the use of contractors for certain projects; and incremental costs attributable to the continued maturity of our Enterprise Resource Planning systems in conjunction with the implementation of our business transformation project.

Maintenance materials and supplies, which include emergency repairs as well as costs for preventive maintenance, increased $2.2 million, or 11.9%, for the three months ended March 31, 2014, compared to the same period in 2013 mainly due to an increase in paving and backfilling and other repair costs resulting from the higher number of main breaks due to abnormally harsh winter weather conditions throughout our operating areas.

Customer billing and accounting expenses, which include uncollectible accounts expense, postage and other customer related expenses, increased $3.0 million, or 29.8%, for the three months ended March 31, 2014, respectively, compared to the same period in the prior year. This increase is primarily due to incremental uncollectible expense associated with an increase in customer accounts receivable attributable to theoverall aging of receivables as well as rate increases. We believe the aging of our receivables is the result of temporary changes made in our collection process with the implementation of our new Customer Information System in 2013.

Other operation and maintenance expense includes casualty and liability insurance premiums and regulatory costs. The decrease in these costs for the three months ended March 31, 2014, was primarily driven by lower regulatory expenses in one of our operating subsidiaries compared to the same period in the prior year.

Operating expenses. The increase in operating expenses, for the three months ended March 31, 2014, is principally due to the increase in operation and maintenance expense explained above and higher depreciation and amortization expense of $6.9 million. The increase in depreciation and amortization is primarily due to additional utility plant placed in service, including Phase II of our business transformation project.

Market-Based Operations

The following table provides financial information for our Market-Based Operations segment for the periods indicated:

	For the three months ended March 31,		
	2014	2013	Increase (Decrease)
	(In thousands)		
Operating revenues	$ 78,798	$ 67,336	$ 11,462
Operation and maintenance expense	65,840	59,224	6,616
Operating expenses, net	68,812	62,381	6,431
Income before income taxes	10,631	5,671	4,960

Operating revenues. Revenues for the three months ended March 31, 2014 increased $11.5 million, compared to the same period in 2013, due to incremental revenues in our Contract Operations Group of $7.6 million and HOS of $5.3 million due to contract growth mainly with our New York City contracts. The increase in the Contract Operations Group is primarily related to additional revenues from capital project activities associated with our military contracts partially offset by a reduction in revenues attributable to terminated municipal and industrial operations and maintenance contracts in 2013.

Operation and maintenance. Operation and maintenance expense increased $6.6 million, or 11.2%, for the three months ended March 31, 2014.

The following table provides information regarding categories of operation and maintenance expense for the three months ended March 31 , 2014 and 2013:

	For the three months ended March 31,			
	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)			
Production costs	$ 9,974	$ 10,059	$ (85)	(0.8%)
Employee-related costs	14,566	16,331	(1,765)	(10.8%)
Operating supplies and services	27,779	21,470	6,309	29.4%
Maintenance materials and supplies	11,503	10,586	917	8.7%
Other	2,018	778	1,240	159.4%
Total	$ 65,840	$ 59,224	$ 6,616	11.2%

As noted in the table above, the primary factor contributing to the overall increase was an in crease in operating supplies and services. This increase is attributable to the increase in construction project activities for our military contracts and corresponds with the incremental revenues.

Operating expense. The changes in operating expenses for the three months ended March 31, 2014, compared to the same period in 2013, are primarily due to the variances in the operation and maintenance expense explained above.

Liquidity and Capital Resources

For a general overview of our sources and uses of capital resources, see the introductory discussion under "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources," contained in part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2013.

We rely on our revolving credit facility, the capital markets and our cash flows from operations to fulfill our short-term liquidity needs, to issue letters of credit and to support our commercial paper program. We fund liquidity needs for capital investment, working capital and other financial commitments through cash flows from operations, public and private debt offerings, commercial paper markets and to the extent necessary, our revolving credit facility. We regularly evaluate the capital markets and closely monitor the financial condition of the financial institutions with contractual commitments in the revolving credit facility.

In order to meet our short-term liquidity needs, we, through AWCC, our financing subsidiary, issue commercial paper, which is supported by the revolving credit facility. The revolving credit facility is also used, to a limited extent, to support our issuance of letters of credit and from time to time, for direct borrowings. As of March 31, 2014, AWCC had no outstanding borrowings and $41.0 million of outstanding letters of credit under the revolving credit facility. As of March 31, 2014, AWCC had $1.2 billion available under the credit facility that we can use to fulfill our short-term liquidity needs, to issue letters of credit and support our $638.2 million outstanding commercial paper. We can provide no assurances that our lenders will meet their existing commitments or that we will be able to access the commercial paper or loan markets in the future on terms acceptable to us or at all.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the third quarter of each fiscal year. Cash flows from operating activities for the three months ended March 31, 2014 were $244.9 million compared to $149.6 million for the three months ended March 31, 2013.

The following table provides a summary of the major items affecting our cash flows from operating activities for the three months ended March 31, 2014 and 2013:

	Three Months Ended March 31, 2014	Three Months Ended March 31, 2013
	(In thousands)	
Net income	$ 68,123	$ 57,643
Add (subtract):		
Non-cash activities (1)	174,110	141,670
Changes in working capital (2)	13,355	(19,922)
Pension and postretirement healthcare contributions	(10,714)	(29,766)
Net cash flows provided by operations	$ 244,874	$ 149,625

(1) Includes, depreciation and amortization, provision for deferred income taxes, amortization of deferred investment tax credits, provision for losses on accounts receivable, allowance for other funds used during construction, (gain) loss on asset dispositions and purchases, pension and non-pension postretirement benefits expense, stock-based compensation expense and other non-cash items. Details of each component can be found in the Consolidated Statements of Cash Flows.

(2) Changes in working capital include changes to receivables and unbilled utility revenue, taxes receivable including income taxes, other current assets, accounts payable, taxes accrued (including income taxes), interest accrued, change in book overdraft and other current liabilities.

Our working capital needs are primarily limited to funding the increase in our customer accounts receivable and unbilled revenues which is mainly associated with the revenue increase as a result of rate increases in our Regulated Businesses. We address this timing issue through the aforementioned liquidity funding mechanisms. Our cash collections for our Regulated Businesses' accounts receivable, some of which were unbilled as December 31, 2013, showed improvement during the first quarter of 2014 compared to the second half of 2013. In the second half of 2013, the rate of cash collections in particular in those states in which we implemented CIS in the second quarter of 2013, were slower than historical payment patterns. We believe this degradation in cash collections to be as a result of certain implementation decisions, made as part of the CIS implementation, including such items as the manual validation of bills prior to being mailed to customers and decreased collection efforts. Therefore, we believe this situation to be only temporary in nature. Although cash collections increased during the first quarter of 2014, there are no assurances that this rate of cash collections will continue or be consistent with previous historical collection patterns.

The increase in cash flows from operating activities was primarily due to higher net income adjusted for non-cash activities, the changes in working capital and a reduction in pension and postretirement benefit contributions. The increase in working capital for the three months ended March 31, 2014 compared to the same period in the prior year is principally the result of increased processing of payments, accounts payable and accrued expenses, in the first quarter of 2013, which was attributed to delays in payment of vendor invoices in the latter portion of 2012 as a result of the implementation of Phase I of our business transformation project.

Cash Flows from Investing Activities

The following table provides information regarding cash flows used in investing activities for the periods indicated:

	Three Months Ended March 31,	
	2014	**2013**
	(In thousands)	
Net capital expenditures	$ (192,466)	$ (213,086)
Proceeds from sale of assets	243	280
Acquisitions	(2,279)	(2,836)
Other investing activities, net (1)	(10,698)	(12,068)
Net cash flows used in investing activities	$ (205,200)	$ (227,710)

(1) Includes removal costs from property, plant and equipment retirements, net and net funds released.

Cash flows used in investing activities for the three months ended March 31, 2014 was $205.2 million compared to $227.7 million for the three months ended March 31, 2013. The decrease in net capital expenditures is primarily due to the inclusion in 2013 of capital spending for our business transformation project.

Cash Flows from Financing Activities

Our financing activities, primarily focused on funding construction expenditures, include the issuance of long-term and short-term debt, primarily through AWCC. We intend to access the capital markets on a regular basis, subject to market conditions. In addition, new infrastructure may be financed with customer advances and contributions for construction (net of refunds).

As previously noted AWCC is a wholly-owned finance subsidiary of American Water Works Company, Inc. (the “parent company”). Based on the needs of our regulated subsidiaries and the parent company, AWCC borrows in the capital markets and then, through intercompany loans, provides those borrowings to the regulated subsidiaries and the parent company. The regulated subsidiaries and the parent company are obligated to pay their portion of the respective principal and interest to AWCC in the amount necessary to enable AWCC to meet its debt service obligations. Because the parent company borrowings are not a source of capital for the Company’s regulated subsidiaries, the Company is not able to recover the interest charges on parent company debt through regulated water and wastewater rates.

Our intent is to utilize commercial paper for short-term liquidity as commercial paper borrowings have historically been more flexible and a lower cost option. However, if necessary we utilize our credit facility to complement our borrowings in the commercial paper market. Certain disruptions in the money market sector of the debt capital markets may make borrowings under our revolving credit facility more efficient and/or a lower cost alternative to commercial paper.

No long-term debt was issued during the first three months of 2014.

The following long-term debt was retired through optional redemption, sinking fund provisions or payment at maturity during the first three months of 2014:

Company	Type	Interest Rate	Maturity	Amount
American Water Capital Corp.	Senior notes - fixed rate	6.00%	2039	$ 4
Other subsidiaries	Private activity bonds and government funded debt -fixed rate	0.00%-5.25%	2014-2041	2,181
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments			7
Total retirements and redemptions				$ 3,392

From time to time, and as market conditions warrant, we may engage in additional long-term debt retirements via tender offers, open market repurchases or other viable transactions.

Credit Facilities and Short-Term Debt

Short-term debt balance, consisting of commercial paper, net of discount, amounted to $638.2 million at March 31, 2014.

The following table provides information as of March 31, 2014 regarding letters of credit sub-limits under our revolving credit facility and available funds under the revolving credit facility, as well as outstanding amounts of commercial paper and borrowings under our revolving credit facility.

	Credit Facility Commitment	Available Credit Facility Capacity	Letter of Credit Sub-limit	Available Letter of Credit Capacity	Outstanding Commercial Paper (Net of Discount)	Credit Line Borrowings
	(In thousands)					
March 31, 2014	$ 1,250,000	$ 1,208,954	$ 150,000	$ 108,954	$ 638,227	$ -

The weighted-average interest rate on short-term borrowings for the three months ended March 31, 2014 and 2013 was approximately 0.32% and 0.41%, respectively.

Capital Structure

The following table provides information regarding our capital structure for the periods presented:

	At March 31, 2014	At December 31, 2013
Total common stockholders' equity	45%	45%
Long-term debt and redeemable preferred stock at redemption value	49%	49%
Short-term debt and current portion of long-term debt	6%	6%
	100%	100%

Debt Covenants

Our debt agreements contain financial and non-financial covenants. To the extent that we are not in compliance, we, or our subsidiaries, may be restricted in the ability to pay dividends, issue new debt or access our revolving credit facility. We were in compliance with our covenants as of March 31, 2014. As of April 30, 2014, two of our smaller operating companies are in technical non-compliance with certain of their reporting requirements. However, there is no impact on their financial health or their ability to access capital. Our failure to comply with restrictive covenants under our credit facility could accelerate repayment obligations. Our long-term debt indentures contain a number of covenants that, among other things, limit the Company from issuing debt secured by the Company's assets, subject to certain exceptions.

Certain long-term notes and the revolving credit facility require us to maintain a ratio of consolidated debt to consolidated capitalization of not more than 0.70 to 1.00. As of March 31, 2014, our ratio was 0.55 to 1.00 and therefore we were in compliance with the covenant.

Security Ratings

Our access to the capital markets, including the commercial paper market, and respective financing costs in those markets, is directly affected by securities ratings of the entity that is accessing the capital markets. We primarily access the capital markets, including the commercial paper market, through AWCC. However, we have also issued debt through our regulated subsidiaries, primarily in the form of tax exempt securities or borrowings under state revolving funds, to lower our overall cost of debt.

The following table shows the Company's securities ratings as of March 31, 2014:

Securities	Moody's Investors Service	Standard & Poor's Ratings Service
Senior unsecured debt	Baa1	A-
Commercial paper	P2	A2

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon our ability to generate cash flows in an amount sufficient to service our debt and meet our investment plans. We can provide no assurances that our ability to generate cash flows is sufficient to maintain our existing ratings. None of our borrowings are subject to default or prepayment as a result of the downgrading of these security ratings, although such a downgrading could increase fees and interest charges under our credit facility.

As part of the normal course of business, we routinely enter into contracts for the purchase and sale of water, energy, fuels and other services. These contracts either contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if we are downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to rely on such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that we provide collateral to secure our obligations. We do not expect that our posting of collateral would have a material adverse impact on our results of operations, financial position or cash flows.

Dividends

Our board of directors' practice has been to distribute to our shareholders a portion of our net cash provided by operating activities as regular quarterly dividends, rather than retaining that cash for other purposes. Since the dividends on our common stock are not cumulative, only declared dividends will be paid.

On March 3, 2014, we made a cash dividend payment of $0.28 per share to all shareholders of record as of February 3, 2014. In order to take advantage of existing 2012 tax rates, the cash dividend payment that would have historically been paid in March 2013 was paid in December 2012.

On April 29, 2014 our board of directors declared a quarterly cash dividend payment of $0.31 per share payable on June 2, 2014 to all shareholders of record as of May 12, 2014.

Market Risk

There have been no significant changes to our market risk since December 31, 2013 . For a discussion of our exposure to market risk, refer to Part II, Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," contained in our Annual Report on Form 10-K for the year ended December 31, 2013.

Application of Critical Accounting Policies and Estimates

Our financial condition, results of operations and cash flows are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates," in our Form 10-K for the year ended December 31, 2013 filed with the SEC for a discussion of our critical accounting policies.

Recent Accounting Pronouncements

See Part I, Item 1 – Financial Statements (Unaudited) – Note 2 – New Accounting Pronouncements in this Quarterly Report on Form 10-Q for a discussion of new accounting standards recently adopted or pending adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. For further discussion of market risks see "Market Risk" in Part I, Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

American Water Works Company, Inc. maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 ("the Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) of the Exchange Act) as of March 31, 2014 pursuant to 15d-15(e) under the Exchange Act.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2014 , our disclosure controls and procedures were effective at a reasonable level of assurance. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the three months ended March 31, 2014, that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The following information updates and amends the information provided in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 (the "Form 10-K") in Part I, Item 1, "Legal Proceedings."

Alternative Water Supply in Lieu of Carmel River Diversions

The Form 10-K describes the Complaint for Declaratory Relief filed by California-American Water Company ("CAWC") against the Marina Coast Water District ("MCWD") and the Monterey County Water Resources Agency ("MCWRA"), which, following a transfer of the case, is before the San Francisco County Superior Court. The Complaint seeks a determination by the Court as to whether the certain agreements related to the now-abandoned Regional Desalination Project are void as a result of the alleged conflict of interest of a former director of MCWRA (described in the Form 10-K), or remained valid. Subsequent to the filing of the Form 10-K, the former director entered a plea of no contest to, among other things, a felony violation of California Government Code section 1090 (“Section 1090”), which precludes public officials from being financially interested in any contract made by them in their official capacity.

MCWD filed a Cross-Complaint against CAWC and MCWRA, and a Motion for Summary Judgment and Summary Adjudication seeking a determination that the agreements are valid. In its pleadings, MCWD asserts that CAWC’s action was barred by a 60-day statute of limitations applicable to certain contracts entered into by the MCWD and to certain contracts entered into by the MCWRA. MCWD also argued that the Court does not have jurisdiction to determine the validity of the agreements on the basis that the agreements were approved by final decisions of the California Public Utilities Commission (the “CPUC”), and under the California Public Utilities Code, superior courts are prohibited from exercising jurisdiction to decide matters that would interfere with the CPUC's policies or performance of its duties.

On February 25, 2014, the Court ruled that CAWC's action was barred by the 60-day statutes of limitations. However, the Court also ruled that MCWRA had a four-year statute of limitations under California Government Code section 1092(b), which invalidates contracts made in violation of Section 1090. Therefore, the Court held that MCWRA's time for challenging the validity of the agreements had not expired. The Court also denied MCWD's motion for a summary adjudication that the agreements were valid or that the Court did not have jurisdiction to determine the validity of the agreements. MCWRA subsequently filed a motion with the Court seeking leave to file a cross-complaint for declaratory relief on the basis that the actions of the former director renders the agreements void. On April 15, 2014, the Court granted MCWRA’s motion, and on April 16, 2014, MCWRA filed a cross-complaint against MCWD, contending that the agreements were void as a result of the former director's conduct and financial interest in the agreements. MCWRA seeks a declaration of the parties' rights and duties under the agreements and a declaration that the agreements are void.

The Form 10-K also describes the filing by California-American Water Company ("CAWC") of a formal claim with Marina Coast Water District ("MCWD") seeking monetary damages from MCWD, and the Board of MCWD's notice that it rejected CAWC's claim. As noted in the Form 10-K, CAWC and MCWD entered into a tolling agreement and extensions of the agreement with respect to CAWC's claims, which toll applicable statutes of limitations and the deadline for a commencement of litigation regarding CAWC's claims until March 1, 2014. A subsequent agreement between CAWC and MCWD extended the tolling and deadline for the commencement of litigation to August 1, 2014.

Water Treatment Residuals Disposal Matters

The Form 10-K describes CAWC's advice to the Monterey County Health Department ("MCHD") that, based on an analysis requested by MCHD, it appears that some of the residual wastes from CAWC’s Ambler Park, Toro and Ryan Ranch water treatment plants may have exceeded California hazardous waste soluble threshold limit concentration requirements and should therefore have not been disposed of at the non-hazardous waste disposal facilities to which they were transported. The Form 10-K also referenced communications between the Company and the Monterey County District Attorney's Office, which advised CAWC that it received a report from MCHD that CAWC had transported and disposed such hazardous wastes in violation of applicable provisions of the California Health and Safety Code and the California Business and Professions Code. In April 2014, following further discussions, CAWC and the District Attorney entered into a Stipulation for Entry of Judgment designed to settle the matter, and the Superior Court of Monterey County, following its approval of the settlement on April 11, 2014, issued a Stipulated Judgment. Under the Stipulated Judgment, which did not constitute an admission by CAWC regarding any issue of fact alleged in the District Attorney's simultaneously-filed complaint, the Court permanently enjoined CAWC from engaging in violations of the California Health and Safety Code and related regulatory provisions and ordered CAWC to pay $389,855 (including $325,000 in civil penalties, $4,855 in costs, and $60,000 for a supplemental environmental project).

West Virginia Elk River Chemical Spill

The Form 10-K describes events related to the leakage of two substances (the substances are 4-methylcyclohexane methanol (“MCHM”), and PPH/DiPPH, a mix of polyglycol ethers) from a chemical storage tank owned by Freedom Industries, Inc. into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant intake in Charleston, West Virginia, and litigation that has ensued in connection with the matter. To date, 58 lawsuits have been filed against WVAWC with respect to this matter in the United States District Court for the Southern District of West Virginia or West Virginia Circuit Courts in Kanawha, Boone, and Putman counties. The state court cases were removed to the United States District Court for the Southern District of West Virginia, but are subject to motions to remand the cases to the state courts.

The Company and WVAWC believe that WVAWC has responded appropriately to, and has no responsibility for, the Freedom Industries spill and the Company, WVAWC and other Company-affiliated entities named in any of the lawsuits have valid, meritorious defenses to the lawsuits. The Company, WVAWC and the other Company affiliates intend to vigorously contest the lawsuits. Nevertheless, an adverse outcome in one or more of the lawsuits could have a material adverse effect on the Company's financial condition, results of operations, cash flows, liquidity and reputation. Moreover, WVAWC and the Company are unable to predict the outcome of the ongoing government investigations or any legislative initiatives that might affect water utility operations.

Moreover, by a letter dated February 18, 2014, and as summarized in the Form 10-K in Item 1A, “Risk Factors,” a purported stockholder made a demand that the Company's board of directors take action to remedy alleged breaches of fiduciary duties by all of the members of the board and the Company’s President and Chief Operating Officer, Regulated Operations in connection with this matter. The stockholder asserts his belief that the directors and officers breached their duties of loyalty and care and good faith when they knowingly and/or recklessly failed to monitor, protect and maintain the Company's valuable business operations and its reputation and goodwill in the marketplace. The board of directors has appointed a demand review committee that, with the assistance of independent counsel, will, among other things, investigate, evaluate and make recommendations to the board of directors based on its investigation. Once it has received the committee’s recommendations, the board of directors will determine the appropriate response to the demand letter.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in the “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2013, and our other public filings, which could materially affect our business, financial condition or future results. There have been no material changes from risk factors previously disclosed in “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2013.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

AMERICAN WATER

2014
Annual
Incentive
Plan

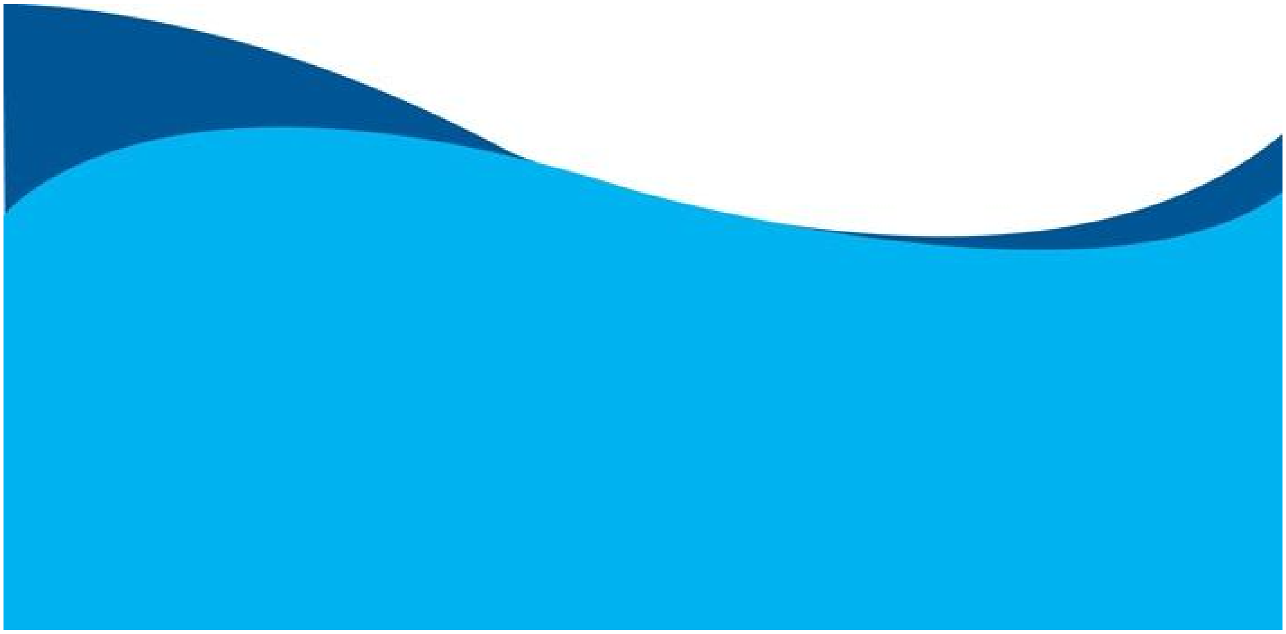

Table of Contents

THE 2014 ANNUAL INCENTIVE PLAN

Your Performance —Your Award

At American Water, your performance counts. We rely on our employees' knowledge and skills to help the company achieve its business objectives.

- The American Water 2014 Annual Incentive Plan (AIP) is designed to give eligible exempt employees an annual opportunity to earn a cash award that recognizes and rewards their contributions to the company's success. This means that company and individual performance are both taken into account to determine cash awards under the plan. We continue to make adjustments to the AIP design to reinforce the link between company and individual performance and award payouts.
- The AIP program for 2014 is similar to last year, and directly ties the amount of available cash for AIP payouts to company performance against specific metrics. For 2014, the performance metrics have been adjusted, replacing measures around Business Transformation. We have increased targets for safety, service quality and customer satisfaction. Doing so continues to drive value for our customers and focuses our efforts to ensure that the work we do is always safe.
- Your individual performance continues to play a large role in determining the amount of your payout. Employees who exceed their performance targets could receive higher payouts. Conversely, employees who underperform and do not meet their performance targets could receive lower payouts or no payout at all. In short, your performance directly impacts the amount of your award. The 2014 AIP is designed to challenge and motivate you to perform at your highest level, and promote the creation of value to the customer and shareholder. Read this brochure to learn about how the 2014 plan works and what it means for you.

ELEMENTS OF THE PROGRAM

- AIP award pool funding is based on overall corporate performance against specific financial and non-financial performance (represented by the Corporate Multiplier), then allocated across organizational groups/functional areas. Allocation is subject to senior management's discretion and recognizes organizational group/functional area results.
    - AIP funding for all eligible exempt employees depends on the company achieving its financial and nonfinancial performance.
    - A pre-determined financial threshold for company performance must be met in order for funding and any award to be provided under the AIP.
- Individual award payouts will be based on individual performance against specific goals represented by the Individual Performance Factor and paid from available organizational group/functional area funding.
- For 2014, the Individual Performance Factor range is 0%–200%. Individual payouts will be capped at 200% of AIP target award.
- Award opportunity (Target Award) is expressed as a percentage of base salary. (See Attachment B.)
    - Actual payout may be lower or higher than target depending on company and individual performance against specific goals.
- Individual performance is assessed by your manager and measured against your predetermined performance goals.
- Your AIP will be distributed as a cash award in March.
    - You must be actively employed with American Water on the date awards are paid to receive your 2014 AIP payout. You (or your beneficiary) may be eligible for a prorata award if you are disabled, retire, die, involuntarily terminate (not "for cause") or a divestiture occurred on or after July 1, 2014. In the event of an involuntary termination for cause, you would not be eligible to receive an award.

Eligibility

- You are eligible for an AIP award opportunity if you are a regular, full-time exempt employee of American Water.
  - Regular, full-time exempt employees who join American Water on or before September 30, 2014 are also eligible to participate in the AIP on a prorated basis.
  - Employees transferred from nonexempt to exempt status on or after September 30, 2014 are not eligible in the current plan year.
- If you are promoted or transferred during the plan year to a position with a higher AIP target level, or if you are reclassified/transferred to a position with a lower AIP target level, your award payout will be based on your new salary and target level as of December 12, 2014, except ML4s and above who will be prorated at each salary and target level. All AIP target awards will be paid based on salaries as of December 12, 2014.
- You must be an active employee with American Water on the date the payout is made in order to receive the award. You (or your beneficiary) may be eligible for a prorata award if you are disabled, retire, die, involuntarily terminate (not “for cause”) or a divestiture occurred on or after July 1, 2014. (Retirement under this plan is age 55 and 10 total years of employment service.)
- You are not eligible for an AIP award if:
  - you transfer from exempt status to nonexempt status during the current plan year or your job was reclassified to nonexempt status,
  - your performance rating is “Unacceptable” or “Too Soon to Rate,”
  - you have not complied with the company’s annual Code of Ethics certification by the established deadline, or
  - your employment was involuntarily terminated for cause.

Why Is the Plan Based on Individual Performance?

Since the value (as reflected in our share price and our return to shareholders) and success of our business depend on the achievement of annual company and individual performance goals, American Water recognizes the need to differentiate and reward the performance of employees who enable us to reach these goals. The 2014 AIP is designed to ensure that award payouts are directly tied to measurable contributions — both company and individual — to American Water’s success.

DETERMINING AIP AWARDS

AIP award payouts depend on individual performance; they also depend on overall corporate performance and organizational group/functional area results (which determine award pool funding).

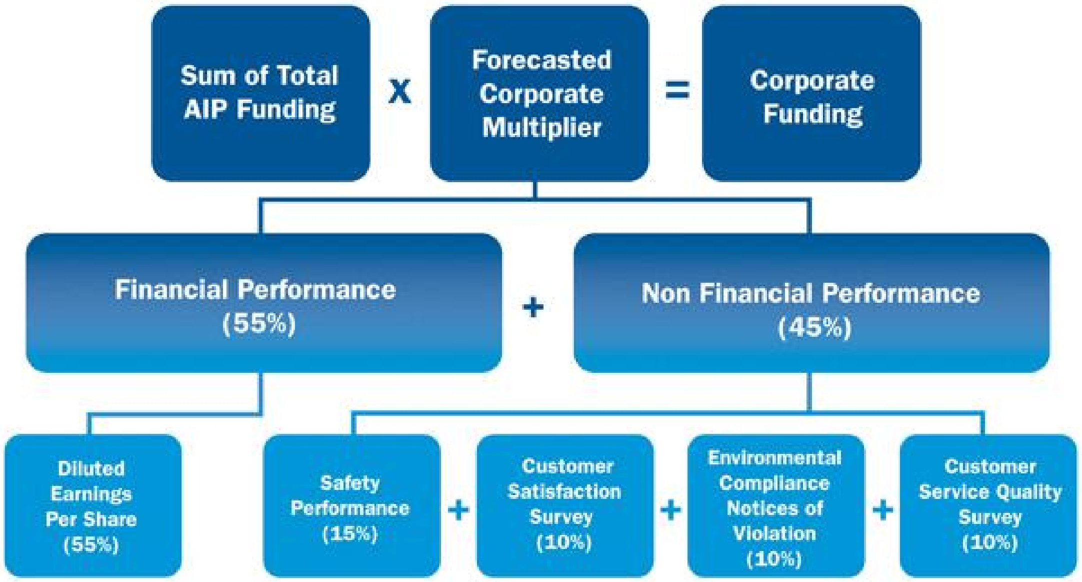
AIP awards will be determined according to the following three-step process:

- **Step 1:** Establish initial award pool based on overall corporate performance.
- **Step 2:** Allocate overall corporate funding to organizational groups/functional areas, and adjust specific organizational group/functional area funding to reflect results.
- **Step 3:** Determine AIP award based on individual performance; awards are paid from available organizational group/ functional area funding.

Step 1: Establish initial award pool based on overall corporate performance

Each year, American Water establishes funding for the AIP award pool. In 2014, the funding will be directly tied to company performance and represented by the Corporate Multiplier. The Corporate Multiplier can range from 0% to 150% depending on how well the company performed against the financial and operational goals described on the following page. Note that there is a predetermined threshold for company performance.

OVERALL CORPORATE PERFORMANCE



Step 1 (continued)

- **2014 Diluted Earnings Per Share (EPS) must be at least 94% of target** for any financial funding and award to be provided under the AIP.
- **2014 Diluted Earnings Per Share (EPS) must be at least 90% of target** for funding of any award to be provided under the AIP Non Financial Performance Factors.
- **Financial Metric (Weighted 55%)***
  - **Diluted Earnings Per Share** is a widely tracked measure of financial performance/profitability, and is calculated as follows:

Net Income to Common Stockholders ÷ **Average Outstanding Shares** (including dilutive securities such as stock options) = **Diluted Earnings per Share**

* 2014 Diluted Earnings Per Share (EPS) must be at least 94% of target for any financial funding and award to be provided under the AIP.

- **Non Financial Metric (Weighted 45%)****
  - Environmental Compliance Notices of Violation (NOVs) (10%)
  - Safety Performance (15%)
  - Customer Satisfaction Survey (10%)
  - Customer Service Quality Survey (10%)

** These outcomes are based on a combination of surveys, end-of-year results, data and other annual reports (For more details on these performance measures, see Attachment A at the back of this brochure).

Please note that AIP funding for all employees will depend on how well the company achieves its financial and non financial goals. A predetermined financial threshold for company performance must be met in order for funding and any award to be provided under the AIP. For 2014, the threshold is 90% of EPS target in order to fund any award to be provided under the AIP for non financial performance factors.

The financial and non financial metrics are added together to determine the Corporate Multiplier. So, even if certain metrics are not achieved, the funding may be reduced, but not eliminated altogether. However, if the company's financial performance does not meet the threshold, the Corporate Multiplier will be reduced to zero, which would eliminate any award payout. The Corporate Multiplier (and thus funding for payouts) may be adjusted to take into account nonrecurring items such as impairment charges, dissolutions or acquisitions of businesses or costs associated with one-time events.

Step 2: Allocate overall corporate funding, and adjust specific area funding to reflect results

Once the overall corporate funding is determined as described under Step 1, senior management will allocate the corporate funding to American Water's organizational groups and functional areas. The funding for each organizational group/ functional area may be increased or decreased, at senior management's discretion, to reflect specific organizational group/ functional area results.

Step 3: Determine individual AIP award

Your AIP target award (i.e., your award opportunity) is based on your job with the company and is expressed as a percentage of your base salary. Your actual award payout may be higher or lower than target depending on whether individual and company performance goals have been met, and your organizational group's/functional area's results. Contact your manager for information on your individual AIP target award.

The Individual Performance Factor represents how well you achieve your annual individual performance goals. Your Individual Performance Factor (IPF) can range from 0% to 200%, depending on your performance for the plan year and the amount of organizational group/functional area funding available. This performance factor will then be multiplied by your Target Award to determine your 2014 AIP award payout. Individual payouts will be capped at 200% of AIP target award. Individual AIP awards are then paid from the available organizational group/functional area award funding, which may impact the original IPF determination. The sum of all individual awards within a given organizational group/functional area must not exceed its allocated pool of dollars.

INDIVIDUAL PERFORMANCE FACTOR (IPF)

Your individual performance factor is based on (a) your performance against specific targets, and (b) the amount of organizational group/functional area funding available

* The sum of individual awards for a specific organizational group/functional area must not exceed the funding allocated to that organizational group/functional area.

WHAT THE 2014 AIP MEANS FOR YOU

Performance Ratings

Most people are motivated to do their best; therefore the better you perform, the greater your potential award will be under the plan. It is your responsibility to maximize your award opportunity by achieving or exceeding your goals.

Each year, you and your manager identify four to six high priority and challenging performance targets, which represent where you can directly impact the company's success. These performance targets and their weightings should be specific, measurable and aligned with the company's performance targets. During your year end performance review, you and your manager will discuss how well you performed against the established targets, and rate your performance using one of the following performance ratings:

2014 PERFORMANCE RATING SCALE

RATING	DESCRIPTION
EXCEPTIONAL	Contributions are widely recognized as extraordinary. Results far exceed all defined expectations, producing important and substantial impact on the Company, Division, Operating Company, Line of Business or Function.
HIGHLY EFFECTIVE	Contributions are widely recognized as distinguished. Results exceed all or most expectations, producing a tangible and material impact on the Company, Division, Operating Company, Line of Business or Function.
COMMENDABLE	Contributions are widely recognized as meaningful. Results meet, and in some cases exceed expectations, producing a positive and desirable impact on the Company, Division, Operating Company, Line of Business or Function.
NEEDS IMPROVEMENT	Contributions are widely recognized as limited. Results generally meet but in some cases fall slightly short of expectations, producing inconsistent and marginal impact on the Company, Division, Operating Company, Line of Business or Function.
UNACCEPTABLE	Contributions are widely recognized as unsatisfactory. Results fall considerably short of expectations, producing negligible or no impact on the Company, Division, Operating Company, Line of Business or Function.
TOO SOON TO RATE	Contributions cannot be measured at this time because more time is needed to see a result.

Later, during the AIP process, your manager will use your rating to determine your Individual Performance Factor. Depending on how you performed during the year, you could potentially earn a higher payout — or you could earn a lower payout or no payout at all. In other words, **the AIP design gives you more power to impact the size of your award. It also means that you are accountable for meeting your performance goals.**

Award Funding Determination

Below are four scenarios that demonstrate how AIP funding may be calculated:

AIP FUNDING EXAMPLE

TOTAL AIP FUNDING*	**$20,000,000**
TOTAL AIP FUNDING FOR ORGANIZATIONAL GROUP*	**$ 2,000,000**

* The total is the sum of the target awards for the eligible employees.

	SCENARIO 1	**SCENARIO 2**	**SCENARIO 3**	**SCENARIO 4**
Financial Performance Factor	1.39	0.94	0.25	0.00
Non Financial Performance Factor	0.90	1.00	0.50	0.00
STEP 1: Establish corporate funding based on overall corporate performance				
Total of AIP Targets (A)	$20,000,000	$20,000,000	$20,000,000	$20,000,000
Financial Performance Factor (i) (55% weight)	1.39 × 0.55 = 0.76	0.94 × 0.55 = 0.52	0.25 × 0.55 = 0.14	0.00 × 0.55 = 0.00
Non Financial Performance Factor (ii) (45% weight)	0.90 × 0.45 = 0.41	1.00 × 0.45 = 0.45	0.50 × 0.45 = 0.23	0.00 × 0.45 = 0.00
i + ii = Corporate Multiplier (B)	1.17	0.97	0.37	0.00
A × B = Corporate Funding	$20,000,000 × 1.17 = **$23,400,000**	$20,000,000 × 0.97 = **$19,400,000**	$20,000,000 × 0.37 = **$7,400,000**	$20,000,000 × 0.00 = **$0**
STEP 2: Allocate overall corporate funding to organizational groups/functional areas; adjust specific organizational group/functional area funding to reflect results				
Organizational Group Pool (C) (Allocated from corporate funding)	$2,340,000	$1,940,000	$740,000	$0
Organizational Group Adjustment (D)	1.00 (Target)	.80 (Below Target)	1.20 (Above Target)	1.00 (Target)
C × D = Organizational Group Pool (adjusted based on results)	$2,340,000 × 1.00 = **$2,340,000**	$1,940,000 × 0.80 = **$1,552,000**	$740,000 × 1.20 = **$888,000**	$0 × 1.00 = **$0**

Both company and individual performance can significantly impact your final payout. Also, remember that the sum of individual awards for a specific organizational group/functional area must equal the funding allocated to that organizational group/functional area.

Please discuss the AIP with your manager to ensure you clearly understand how the formula works and how your performance impacts your potential award payout.

Receiving Your AIP Award

Awards will be paid in cash no later than March 14, 2015. If you are eligible for an award payout, please keep in mind that:

- You must be actively employed with the company on the date of payout.
- The payout will be based on your annual base salary as of December 12, 2014 and subject to all federal, state and local income tax withholdings.
- The American Water Board of Directors or its Designee has the right to adjust the award determination(s) and/or award payouts(s) at its discretion.

Remember, it's your performance — and your award: The contributions you make to American Water's success throughout the year ultimately impact the amount of your payout. Be sure to carefully review this brochure; then speak with your manager about the AIP and about what you can do to improve your performance and share the financial rewards of American Water's success.

FREQUENTLY ASKED QUESTIONS

How does the plan reward performance?

The AIP allows us to differentiate and reward the performance of employees who contribute to the achievement of the company's goals. The 2014 AIP directly ties award payouts to measurable contributions (company, organizational group/ functional area and individual) to American Water's success.

Who is eligible for the AIP?

All regular, full-time exempt employees are eligible to participate. If you join American Water on or before September 30, 2014, you are also eligible to participate in the plan on a prorated basis.

What do I have to do to receive an AIP award?

Any payout will depend largely on your performance, as well as on company, organizational group/functional area performance (including both financial and non financial), which determines funding.

If your performance is rated "Needs Improvement" or higher, you may receive an award payout — but only if threshold company performance metrics have been met. If your performance rating is "Unacceptable" or "Too Soon to Rate," you will not receive a payout. To maximize your award opportunity, it's important to meet with your manager to establish meaningful performance goals, and then work hard throughout the year to achieve those goals.

How is my AIP target award opportunity determined? How can I find out what it is?

Your AIP target award opportunity is based on your job and is expressed as a percentage of your base salary. Please see your manager to learn more about your target award opportunity for 2014.

How will my AIP award payout be calculated?

The size of the pool which funds your award is determined based on overall corporate performance and adjusted to reflect specific organizational group/functional area results. AIP funding for all eligible employees will depend on the company and/or organizational group/functional area achieving its non financial operational goals as well as financial goals. Once individual awards are calculated, they are paid from the organizational group/functional area funding.

What is the minimum and maximum that could be paid under the plan (as a percent of target)?

AIP award payouts can range from zero, to a maximum of an Individual Performance Factor of 200%. Payouts are capped at 200% of AIP target award.

Will I receive an award payout if I meet my individual performance goals but the company does not achieve minimum (threshold) performance?

No. A pre-determined financial threshold for company performance must be met in order for funding and any award to be provided under the AIP.

What happens if I leave American Water before I receive my award payout?

To receive the award payout, you must be actively employed with American Water on the date the payment is to be made. You (or your beneficiary) may be eligible for a prorata award if you are disabled, retire, die, involuntarily terminate (not "for cause") or a divestiture occurred on or after July 1, 2014. (Retirement under this plan is age 55 and 10 total years of employment service.) Employees involuntarily terminated for cause would not be eligible.

What happens if I change job positions or I receive a merit increase within American Water during the plan year?

In either scenario, your award payout will be based on your base salary and target level percentage as of December 12, 2014.

Safety Performance (15%)

Safety performance will be determined using the OSHA Recordable Incident Rate (ORIR), which measures injuries and illnesses requiring treatment beyond first aid per 200,000 hours worked. For 2014, the goal has been set at a rate less than 2.75 with the Regulated Operations at a rate less than 2.86 and the Market Based goal at a rate of less than 2.05. These goals will be evaluated against the graduated award scale below and discretion of management.

Service Quality (10%)

This metric is measured by the Service Quality Survey (SQS) which is conducted throughout the year for customers requesting service resulting in completion of a service order by a Field Service Representative (FSR). The score is based on the survey question "Overall, how satisfied were you with the outcome of your service contact?" which has a five-point response scale (Extremely Satisfied, Very Satisfied, Somewhat Satisfied, Somewhat Dissatisfied, Very Dissatisfied). The American Water target for 2014 is 85% extremely or very satisfied customers, and the graduated award scale is provided below.

March 7, 2014

Via e-mail and Overnight Delivery
Ms. Linda Sullivan
33111 Canyon Quail Trail
Agua Dulce, CA 91390

Dear Ms. Sullivan:

On behalf of American Water, I am pleased to extend our offer of employment to you for the position of Senior Vice President and Chief Financial Officer of American Water. Your expected first day of employment will be on or about May 1, 2014. We anticipate that you will find this new role to be personally rewarding and one in which you can make significant contributions to the Company. The following represents our offer to you:

Base Salary

You will be paid bi-weekly at the rate of $17,692.30 and when annualized would be approximately $460,000. The salary grade for your position will be ML2.

2014 Annual Incentive Plan (AlP) Eligibility

You will be eligible to participate in the Company's Annual Incentive Plan with a target bonus award payout of 75% of your annual base salary. Any amount awarded to you as a participant under the Annual Incentive Plan will be determined in accordance with the terms of that plan. Actual payout of the Annual Incentive Plan bonus is discretionary and based on factors including company performance and individual performance objectives. For 2014, you will be eligible for a full-year AIP payout based on your target level and the above noted factors.

2014 Long Term Incentive Plan (LTIP) Eligibility

You will be eligible for a full equity award under the Company's Long Term Incentive Plan at a target payout of 125% of your annual base salary, beginning in 2014, as approved by the Compensation Committee of the American Water Board of Directors. The 2014 award will be granted and priced as of your start date.

Additiona1 2014 LTIP Equity Grant

You are entitled to receive additional equity of $500,000 which will be granted on your start date. This grant will be 70% Performance Share Units based on Total Stockholder Return and American Water internal metrics and 30% Restricted Stock Units.

Benefits

American Water offers a comprehensive benefits package, the provisions of which will begin on the first of the month after one full calendar month of employment including medical insurance, dental insurance, life insurance, and short- and long-term disability insurance.

You will be eligible to participate in the Company's Savings and Investment Program (401k). You can roll over other qualified savings and investment retirement programs into the American Water plan. You will also be eligible to participate in the Non-Qualified Savings and Deferred Compensation Program and our Executive Physical Program in accordance with the terms of the plan details. Please refer to the enclosed 2014 Executive Benefits at a Glance documents for benefit details.

Vacation/Holidays

You will be eligible for 20 vacation days in 2014. In addition, you will be eligible for six (6) floating holidays in a calendar year.

Relocation

You will be eligible for the Gold package for the relocation benefits under American Water's relocation policy according to the parameters of our policy and eligibility criteria as set forth by the IRS. The policy states that if an employee resigns within 12 months of the date of his/her relocation, they are required to reimburse 100% of the relocation expenses to the Company. The management of your relocation will be handled by NEI Global Relocation.

Executive Severance Policy

You will be an eligible participant under the executive severance policy which provides severance benefits to executives whose employment is involuntarily terminated by American Water for reasons other than cause. Under the policy, you will receive salary continuation benefits in the form of 12 months of your base salary, plus a prorated annual incentive payment. A copy of the Executive Severance Policy will be available to you at your request.

We are looking forward to a favorable decision from you and you joining the American Water team. Please signify your acceptance of this offer of employment by signing this letter and returning it to me by email or by facsimile.

Sincerely,

/s/ Kellye L. Walker
Kellye L. Walker

Enclosures

This offer of employment extended by American Water is contingent upon successful completion of a drug screen, applicable background checks, verification of authorization to work and all information supplied on the resume and other information supplied by you, and the absence of any Non-Compete or Non-Solicitation Agreement with a prior employer.

I, Linda Sullivan, understand that my employment will be "at will," which means that I am not guaranteed employment or any particular job for any specified period of time. The Company or I may terminate my employment at any time, for any or no reason, with or without cause.

/s/ Linda Sullivan

Exhibit 10.3

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
RESTRICTED STOCK UNIT GRANT

This RESTRICTED STOCK UNIT GRANT, dated as of February 20, 2014 (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to _______________ (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the "Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the restricted stock unit portion of the Equity Award granted pursuant to the 2014 LTIP to the Participant shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan") and the terms and conditions of such restricted stock unit shall be memorialized in this grant (the " Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Restricted Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant ________________ units (the "Restricted Stock Units"). Each unit (a "Unit") shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable Redemption Date (as defined below).

2. Restricted Stock Unit Account. The Company shall establish and maintain a Restricted Stock Unit account as a bookkeeping account on its records (the "Restricted Stock Unit Account") for the Participant and shall record in such Restricted Stock Unit Account the number of Restricted Stock Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Restricted Stock Unit Account established for the Participant.

3. Vesting.

(a) Except as provided in subparagraph (c) below, the Restricted Stock Units shall vest on the following dates (each a " Service Date"), provided the Participant continues to be employed by, or providing service to, the Employer (as defined in the Plan) from the Date of Grant through the applicable Service Date:

Date	Units Vesting
January 1, 2015	1/3
January 1, 2016	1/3
January 1, 2017	1/3

(b) If at any time prior to the last Service Date the Participant's employment or service with the Employer terminates for any reason, including death or disability, then all of the unvested Restricted Stock Units shall be immediately forfeited and the Participant shall not have any rights with respect to the vesting or the redemption of any portion of the Restricted Stock Unit.

(c) If at any time prior to the last Service Date, but while the Participant is employed by or providing service to the Employer, a Change of Control (as defined below) occurs, then all of the unvested Restricted Stock Units shall become vested on the date of the Change of Control. For purposes of this Agreement, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Agreement unless the event constituting the Change of Control constitutes a change in the ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and its corresponding regulations. For the avoidance of doubt, if the Change of Control does not constitute a permitted change in control event under Code section 409A, then the Restricted Stock Unit shall not vest on the occurrence of the Change of Control.

(d) The date on which all or any portion of the Restricted Stock Unit becomes vested as described in this Paragraph 3 shall hereinafter be referred to as the "Vesting Date".

4. Redemption. Unless an election is made pursuant to Paragraph 5 below, the Restricted Stock Units shall be redeemed by the Company on the applicable Vesting Date or as soon as administratively practicable thereafter, but not later than forty-five (45) days following the Vesting Date, (the " Redemption Date"). On the Redemption Date (or, if applicable, the Deferred Date, as defined in Paragraph 5 below), all Restricted Stock Units that become vested pursuant to Paragraph 3 above shall be redeemed and converted to an equivalent number of shares of Company Stock, and the Participant shall receive a single sum distribution of such shares of Company Stock, which shall be issued under the Plan.

5. Deferrals. The Participant may make an irrevocable election to defer the Redemption Date (or further defer the Deferred Date (as defined below), if applicable) of any of the Restricted Stock Units that vest, plus dividend equivalents earned on such Restricted Stock Units as described in Paragraph 6 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the new Redemption Date cannot be earlier than five (5) years from the original Redemption Date under Paragraph 4 above (or five (5) years from the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Redemption Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Redemption Date, the Participant must complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code.
Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the redemption of the Participant's Restricted Stock Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Redemption Date is delayed one or more times pursuant to this Paragraph 5, the new Redemption Date shall be referred to as the "Deferred Date."

6. Dividend Equivalents. Until the Redemption Date (or the Deferred Date, if elected), if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the " Dividend Equivalent Account") the value of the dividends that would have been distributed if the Restricted Stock Units credited to the Participant's Restricted Stock Unit Account as of the date of payment of any such dividend were shares of Company Stock. On the Redemption Date (or the Deferred Date, if applicable), the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Units that have been forfeited as provided in Paragraph 3 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

7. Change of Control. Except as set forth in Paragraph 3(c) of this Grant, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Restricted Stock Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

8. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to redemption or distribution pursuant to this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

9. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the redemption of the Restricted Stock Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company Stock on the Redemption Date (or the Deferred Date, if applicable), the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the redemption of the Restricted Stock Units shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

10. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

11. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

12. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 6), or the right to vote, with respect to any Restricted Stock Units.

13. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

14. Assignment and Transfers. No Restricted Stock Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and a Restricted Stock Unit shall be redeemed and a dividend equivalent distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Restricted Stock Unit or dividend equivalent by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

15. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and redemption of the Restricted Stock Units and payment of dividend equivalents. Any tax withholding obligation of the Employer with respect to the redemption of the Restricted Stock Units may, at the Committee's discretion, be satisfied by having shares of Company Stock withheld, up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

16. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Restricted Stock Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

17. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

18. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

19. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Restricted Stock Units constitute "deferred compensation" under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable

law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 5 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

20. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

Exhibit 10.3A

AMENDMENT TO
AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
RESTRICTED STOCK UNIT GRANT

This AMENDMENT TO RESTRICTED STOCK UNIT GRANT (the "Amendment"), dated as of April 28, 2014 (the "Date of Amendment"), is delivered by American Water Works Company, Inc. (the "Company") to ______________________ (the "Participant") to amend that certain RESTRICTED STOCK UNIT GRANT.

RECITALS

WHEREAS, the Company has previously awarded the Participant a Restricted Stock Unit Grant dated February 20, 2014 (the " Grant Agreement"), governed by the terms of the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan");

WHEREAS, the Committee has determined to amend the Grant Agreement to cause the Participant to become vested upon the attainment of certain age and service conditions;

NOW, THEREFORE, the parties to this Amendment, intending to be legally bound hereby, agree as follows:

1. Vesting Upon Retirement. Notwithstanding any provision of the Grant Agreement to the contrary, if, on or after the first Vesting Date, the Participant's employment or service with the Employer terminates (for any reason other than for Cause) after the Participant's attainment of age 62 and completion of five (5) total years of service with the Employer, the Restricted Stock Units shall vest immediately as of the date of termination. For purposes of this Amendment, the term "Cause" shall mean a finding by the Committee that the Participant (A) has breached his or her employment or service contract with the Employer, if any; (B) has engaged in disloyalty to the Employer including, without limitation, fraud, embezzlement, theft, commission of a felony or proven dishonesty; (C) has disclosed trade secrets or confidential information of the Employer to persons not entitled to receive such information; (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Employer; or (E) has engaged in such other behavior detrimental to the interests of the Employer as the Committee determines.

2. Redemption. The Restricted Stock Units shall be redeemed by the Company as otherwise provided by the Grant Agreement. The redemption of Restricted Stock Units or distribution of any related amounts shall not be affected or accelerated as a result of this Amendment.

3. No Other Changes to Grant Agreement. The terms otherwise set forth under the Grant Agreement shall not be modified by this Amendment except as expressly amended above.

Exhibit 10.4

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
PERFORMANCE STOCK UNIT GRANT

This PERFORMANCE STOCK UNIT GRANT, dated as of February 20, 2014, (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to _______________ (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the " Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the " Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the performance stock unit portion of the Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of the performance stock unit grant that may be earned based on the performance goal relating to the Company's Total Stockholder Return shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Performance Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant _______________ performance stock units (the " Performance Units"). The Performance Units are contingently awarded and will be earned and distributable if and only to the extent that the performance goal and other conditions set forth in this Grant are met. Each Performance Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable payment date, as described in Paragraph 5 below. The number of Performance Units set forth above is equal to the target number of shares of Company Stock that the Participant will earn for 100% achievement of the performance goal described in Paragraph 3 below (the "Target Award").

2. Performance Unit Account. The Company shall establish and maintain a Performance Unit account as a bookkeeping account on its records (the "Performance Unit Account") for the Participant and shall record in such Performance Unit Account the number of Performance Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Performance Unit Account established for the Participant.

3. Performance Goal.

(a) Unless a Change of Control (as defined below) occurs prior to the end of Performance Period (as defined below), the distribution of the shares of Company Stock attributable to the Performance Units is contingent upon achievement of the performance goal described in subparagraph (b) below for the Performance Period and the Participant satisfying the continuation of employment and service with the Employer (as defined in the Plan) requirement described in Paragraph 4 below.

(b) The Company's Total Stockholder Return ("TSR") (as described in subparagraph (c) below) will be compared to the TSR of the companies in the Peer Group (as defined below) over the Performance Period. The actual number of Performance Units the Participant earns may be greater or less than the Target Award, or even zero, based on the Company's TSR percentile ranking relative to the TSR performance of the companies in the Peer Group, as follows:

Level of Achievement	**Percentile Ranking Relative to Peer Group**	**Percentage of Target Award Earned**
Maximum	75%	175%
Target	50%	100%
Threshold	25%	25%

If the Company’s actual TSR performance is between measuring points, the number of Performance Units the Participant earns will be interpolated. If the Company’s actual TSR performance is below the threshold, no Performance Units will be earned and all of Performance Units will be forfeited. If the Company’s actual TSR performance is greater than the maximum, only the maximum number of Performance Units will be earned.

(c) TSR represents stock price performance and dividend accumulation over the Performance Period for the Company and Peer Group. For purposes of this calculation, the initial stock price and the ending stock price are determined using the twenty (20) day average stock price for December 31, 2013, and December 31, 2016, as applicable. The twenty (20) day average stock price is the average of the daily closing stock prices for the twenty (20) trading days that end on the applicable December 31. To determine stock price performance, a dividend adjustment factor will be determined. The dividend adjustment factor takes into account each per share dividend paid for the Performance Period as well as the effect of any appreciation in stock price by reason of deeming the dividend to be reinvested in the stock. Dividend adjusted price shall be obtained from Bloomberg. The dividend adjusted price obtained from Bloomberg provides the closing price for the requested day, week, or month, adjusted for all applicable splits and dividend distributions. At the end of the Performance Period, the TSR for the Company, and for each company in the Peer Group, shall be determined pursuant to the following formula:

$$\text{TSR} = \frac{(\text{Dividend Adjusted Ending Stock Price} - \text{Dividend Adjusted Initial Stock Price})}{\text{Dividend Adjusted Initial Stock Price}}$$

The result shall be rounded to the nearest hundredth of one percent (.01%).

(d) As soon as administratively practicable following the end of the Performance Period, the Committee will determine whether and to what extent the performance goal has been met and certify the number of Performance Units the Participant has earned, if any. Except as described in Paragraph 4 below, the Participant must be employed by, or providing service to, the Employer on the last day of the Performance Period in order to earn the Performance Units.

(e) If a Change of Control occurs prior to the end of the Performance Period, then the Performance Period will end on the date of the Change of Control and the Performance Units will be deemed earned at the Target Award level as of the date of the Change of Control (the “Change of Control Date”). For purposes of this Grant, the term “Change of Control” shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the “Code”), and its corresponding regulations.

(f) For purposes of this Grant, the term “Performance Period” shall mean the three-year period beginning on January 1, 2014 and ending December 31, 2016, and the term “Peer Group” shall mean those companies that comprise the Dow Jones U.S. Utilities Index as of January 1, 2014. If a company in the Peer Group ceases to be a member of the Dow Jones U.S. Utilities Index at any time during the Performance Period, such company shall no longer be a company in the Peer Group.

4. Termination of Employment or Service.

(a) If, at least one year after the beginning of the Performance Period, but prior to the end of the Performance Period, the Participant ceases to be employed by, or provide service to, the Employer on account of any reason other than a termination for Cause (as defined below), the Participant will earn a pro-rata portion of the Performance Units, if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period. The prorated portion will be determined as the number of Performance Units that would have been earned if the Participant had remained employed through the last day of the Performance Period, multiplied by a fraction, which fraction shall be equal to (i) 1/3, if the Participant’s employment or service with the Employer terminates on or after January 1, 2015, but prior to January 1, 2016; (ii) 2/3, if the Participant’s employment or service with the Employer terminates on or after January 1, 2016, but prior to January 1, 2017; and (iii) 3/3, if the Participant’s employment or service terminates with the Employer on or after January 1, 2017. If the Participant ceases to be employed by, or provide service to, the Employer for any reason other than on account of Cause, the prorated number of Performance Units will be distributed in accordance with Paragraph 5.

(b) If at any time prior to the earlier of January 1, 2015 or a Change of Control, the Participant’s employment or service with the Employer is terminated by the Employer on account of any reason or no reason or by the Participant for any reason or no reason, all of the Performance Units subject to this Grant shall be immediately forfeited as of the date of the Participant’s termination of employment or service with the Employer and the Participant shall not have any rights with respect to the distribution of any portion of the Performance Units.

(c) If at any time prior to the date the Performance Units are distributed in accordance with Paragraph 5 the Participant 's employment or service with the Employer is terminated on account of Cause, all of the Performance Units subject to this Grant shall be immediately forfeited and the Participant will not have any rights with respect to the distribution of any portion of the Performance Units, irrespective of the level of achievement of the performance goal. For purposes of this Grant, the term "Cause" shall mean a finding by the Committee that the Participant (A) has breached his or her employment or service contract with the Employer, if any; (B) has engaged in disloyalty to the Employer including, without limitation, fraud, embezzlement, theft, commission of a felony or proven dishonesty; (C) has disclosed trade secrets or confidential information of the Employer to persons not entitled to receive such information; (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Employer; or (E) has engaged in such other behavior detrimental to the interests of the Employer as the Committee determines.

5. Time and Form of Payment with Respect to Performance Units. Unless an election is made pursuant to Paragraph 6 below, the Participant will receive a distribution with respect to the Performance Units earned as described in Paragraphs 3 and 4 above within seventy (70) days following the earlier of (i) January 1, 2017 (the "Distribution Date"), or (ii) the Change of Control Date. The Performance Units will be distributed in shares of Company Stock, with each Performance Unit earned equivalent to one share of Company Stock. Any Performance Units not earned because of the failure to attain the performance goal and service condition will be forfeited.

6. Deferrals. The Participant may make an irrevocable election to defer the Distribution Date (or further defer the Deferred Date (as defined below), if applicable) of all of the Performance Units that are earned, plus dividend equivalents earned on such Performance Units as described in Paragraph 7 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Distribution Date cannot be earlier than five (5) years from the original Distribution Date under Paragraph 5 above (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Distribution Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Distribution Date, the Participant must elect to defer 100% of the Performance Units, including corresponding dividend equivalents, earned by the Participant under this Grant, as well as 100% of the other performance stock units, including corresponding dividend equivalents, earned by the Participant under the 2014 LTIP, and complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant's earned Performance Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Distribution Date is delayed one or more times pursuant to this Paragraph 6, the new Distribution Date shall be referred to as the "Deferred Date."

7. Dividend Equivalents. Until the earlier of the Distribution Date (or the Deferred Date, if elected) or the Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the " Dividend Equivalent Account") the value of the dividends that would have been distributed if the Performance Units credited to the Participant's Performance Unit Account as of the date of payment of any such dividend were shares of Company Stock. At the same time that the Performance Units are converted to shares of Company Stock and distributed to the Participant, the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Performance Units that have been forfeited as provided in Paragraph 3 and 4 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

8. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Performance Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

9. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that, with respect to any right to distribution pursuant to the Plan or this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

10. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the Participant earning the Performance Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company Stock upon conversion of the earned Performance Units, the Participant agrees:

i. to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, _assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

ii. that any shares of Company Stock received by the Participant upon the distribution of the earned Performance Units pursuant to this Grant shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

11. The Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

12. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

13. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 7), or the right to vote, with respect to any Performance Units.

14. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

15. Assignment and Transfers. No Performance Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Performance Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Performance Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

16. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and distribution of the Performance Units and dividend equivalents. Any tax withholding obligation of the Employer with respect to the distribution of shares of Company Stock pursuant to the Performance Units that are earned by the Participant under this Grant may, at the Committee's discretion, be satisfied by having shares of Company Stock withheld up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

17. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Performance Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

18. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

19. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the

Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

20. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Performance Units constitute "deferred compensation" under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 6 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

21. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

Exhibit 10.4A

AMENDMENT TO
AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
PERFORMANCE STOCK UNIT GRANT

This AMENDMENT TO PERFORMANCE STOCK UNIT GRANT (the "Amendment"), dated as of April 28, 2014 (the "Date of Amendment"), is delivered by American Water Works Company, Inc. (the "Company") to ______________________ (the "Participant") to amend that certain PERFORMANCE STOCK UNIT GRANT.

RECITALS

WHEREAS, the Company has previously awarded the Participant a Performance Stock Unit Grant dated February 20, 2014 that may be earned based on the performance goal relating to the Company's Total Stockholder Return (the "Grant Agreement"), governed by the terms of the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan");

WHEREAS, the Committee has determined to amend the Grant Agreement to cause the Participant to become vested upon the attainment of certain age and service conditions;

NOW, THEREFORE, the parties to this Amendment, intending to be legally bound hereby, agree as follows:

1. Vesting Upon Retirement. Notwithstanding any provision of the Grant Agreement to the contrary, if, at least one year after the beginning of the Performance Period, but prior to the end of the Performance Period, the Participant ceases to be employed by or provide service to the Employer (for any reason other than for Cause) after the Participant's attainment of age 62 and completion of five (5) total years of service with the Employer, the Participant will earn the number of Performance Units that would have been earned if the Participant had remained employed through the last day of the Performance Period, if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period.

2. No Other Changes to Grant Agreement. The terms otherwise set forth under the Grant Agreement shall not be modified by this Amendment except as expressly amended above.

IN WITNESS WHEREOF, the Company has caused its duly authorized officer to execute this Amendment, effective as of the Date of Amendment.

AMERICAN WATER WORKS COMPANY, INC.

By: Jeffry E. Sterba

Its: President and CEO

Exhibit 10.5

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
PERFORMANCE STOCK UNIT GRANT

This PERFORMANCE STOCK UNIT GRANT, dated as of February 20, 2014, (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to _______________ (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the "Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the performance stock unit portion of the Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of the performance stock unit grant that may be earned based on performance goals relating to compounded earnings per share growth and operational efficiency improvement, as set forth in Exhibit A attached hereto, shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Performance Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant _______________ performance stock units (the "Performance Units"). The Performance Units are contingently awarded and will be earned and distributable if and only to the extent that the Performance Goals (as defined below) and other conditions set forth in this Grant are met. Each Performance Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable payment date, as described in Paragraph 5 below. The number of Performance Units set forth above is equal to the target number of shares of Company Stock that the Participant will earn for 100% achievement of the Performance Goals described in this Grant (the "Target Award").

Performance Unit Account. The Company shall establish and maintain a Performance Unit account as a bookkeeping account on its records (the "Performance Unit Account") for the Participant and shall record in such Performance Unit Account the number of Performance Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Performance Unit Account established for the Participant.

2. Performance Goals.

(a) Unless a Change of Control (as defined below) occurs prior to the end of the Performance Period (as defined below), the distribution of the shares of Company Stock attributable to the Performance Units is contingent upon achievement of the performance goals set forth in Exhibit A attached hereto (the "Performance Goals") and the Participant satisfying the continuation of employment and service with the Employer (as defined in the Plan) requirement described in Paragraph 4 below.

(b) As soon as administratively practicable following the end of the Performance Period, the Committee will determine whether and to what extent the Performance Goals have been met and certify the number of Performance Units the Participant has earned, if any. Except as described in Paragraph 4 below, the Participant must be employed by, or providing service to, the Employer on the last day of the Performance Period in order to earn the Performance Units.

(c) If a Change of Control occurs prior to the end of the Performance Period, then the Performance Period will end on the date of the Change of Control and the Performance Units will be deemed earned at the Target Award level as of the date of the Change of Control (the "Change of Control Date"). For purposes of this Grant, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and its corresponding regulations.

(d) For purposes of this Grant, the term “Performance Period” shall mean the three-year period beginning on January 1, 2014 and ending December 31, 2016.

3. Termination of Employment or Service.

(a) If, at least one year after the beginning of the Performance Period, but prior to the end of the Performance Period, the Participant ceases to be employed by, or provide service to, the Employer on account of any reason other than a termination for Cause (as defined below), the Participant will earn a pro-rata portion of the Performance Units, if the Performance Goals and the requirements of this Grant are met as of the last day of the Performance Period. The prorated portion will be determined as the number of Performance Units that would have been earned if the Participant had remained employed through the last day of the Performance Period, multiplied by a fraction, which fraction shall be equal to (i) 1/3, if the Participant’s employment or service with the Employer terminates on or after January 1, 2015, but prior to January 1, 2016; (ii) 2/3, if the Participant’s employment or service with the Employer terminates on or after January 1, 2016, but prior to January 1, 2017; and (iii) 3/3, if the Participant’s employment or service terminates with the Employer on or after January 1, 2017. If the Participant ceases to be employed by, or provide service to, the Employer for any reason other than on account of Cause, the prorated number of Performance Units will be distributed in accordance with Paragraph 5.

(b) If at any time prior to the earlier of January 1, 2015 or a Change of Control, the Participant’s employment or service with the Employer is terminated by the Employer on account of any reason or no reason or by the Participant for any reason or no reason, all of the Performance Units subject to this Grant shall be immediately forfeited as of the date of the Participant’s termination of employment or service with the Employer and the Participant shall not have any rights with respect to the distribution of any portion of the Performance Units.

(c) If at any time prior to the date the Performance Units are distributed in accordance with Paragraph 5 the Participant’s employment or service with the Employer is terminated on account of Cause, all of the Performance Units subject to this Grant shall be immediately forfeited and the Participant will not have any rights with respect to the distribution of any portion of the Performance Units, irrespective of the level of achievement of the Performance Goals. For purposes of this Grant, the term “Cause” shall mean a finding by the Committee that the Participant (A) has breached his or her employment or service contract with the Employer, if any; (B) has engaged in disloyalty to the Employer, including, without limitation, fraud, embezzlement, theft, commission of a felony or proven dishonesty; (C) has disclosed trade secrets or confidential information of the Employer to persons not entitled to receive such information; (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Employer; or (E) has engaged in such other behavior detrimental to the interests of the Employer as the Committee determines.

4. Time and Form of Payment with Respect to Performance Units. Unless an election is made pursuant to Paragraph 6 below, the Participant will receive a distribution with respect to the Performance Units earned as described in Paragraphs 3 and 4 above within seventy (70) days following the earlier of (i) January 1, 2017 (the “Distribution Date”), or (ii) the Change of Control Date. The Performance Units will be distributed in shares of Company Stock, with each Performance Unit earned equivalent to one share of Company Stock. Any Performance Units not earned because of the failure to attain the Performance Goals and service condition will be forfeited.

5. Deferrals. The Participant may make an irrevocable election to defer the Distribution Date (or further defer the Deferred Date (as defined below), if applicable) of all of the Performance Units that are earned, plus dividend equivalents earned on such Performance Units as described in Paragraph 7 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Distribution Date cannot be earlier than five (5) years from the original Distribution Date under Paragraph 5 above (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Distribution Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Distribution Date, the Participant must elect to defer 100% of the Performance Units, including corresponding dividend equivalents, earned by the Participant under this Grant, as well as 100% of the other performance stock units, including corresponding dividend equivalents, earned by the Participant under the 2014 LTIP, and complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant’s election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant’s earned Performance Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Distribution Date is delayed one or more times pursuant to this Paragraph 6, the new Distribution Date shall be referred to as the “Deferred Date.”

6. Dividend Equivalents. Until the earlier of the Distribution Date (or the Deferred Date, if elected) or the Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the “ Dividend Equivalent Account”) the value of the dividends that would have been distributed if the Performance Units credited to the Participant’s Performance Unit Account as of the date of payment of any such dividend were shares of Company Stock. At the same time that the Performance Units are converted to shares of Company Stock and distributed to the Participant, the

Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Performance Units that have been forfeited as provided in Paragraph 3 and 4 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

7. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Performance Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

8. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to distribution pursuant to the Plan or this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

9. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the Participant earning the Performance Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company upon conversion of the earned Performance Units, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that any shares of Company Stock received by the Participant upon the distribution of the earned Performance Units pursuant to this Grant shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

10. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

11. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

12. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 7), or the right to vote, with respect to any Performance Units.

13. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

14. Assignment and Transfers. No Performance Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Performance Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Performance Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

15. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and distribution of the Performance Units and dividend equivalents. Any tax withholding obligation of the Employer with respect to the distribution of shares of Company Stock pursuant to the Performance Units that are earned by the Participant under this Grant may, at the Committee's discretion, be satisfied by having shares of Company Stock withheld up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

16. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Performance Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

17. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

18. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

19. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Performance Units constitute "deferred compensation" under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 6 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

20. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

AMERICAN WATER WORKS COMPANY, INC.

By: Jeffry E. Sterba

Its: President and CEO

Exhibit 10.6

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
NONQUALIFIED STOCK OPTION GRANT

This STOCK OPTION GRANT, dated as of February 20, 2014, (the "Date of Grant") is delivered by American Water Works Company, Inc. (the "Company") to _______________ (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the " Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the " Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the nonqualified stock option portion of the Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of such nonqualified stock option shall be memorialized in this grant (the " Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Option. Subject to the terms and conditions set forth in this Grant and in the Plan, the Company hereby grants to the Participant a nonqualified stock option (the "Option") to purchase _______________ shares of Company Stock, at an exercise price of $44.06 per share of Company Stock.

2. Exercisability of Option.

(a) Except as provided in subparagraphs (b) or (c) below, the Option shall become exercisable on the following dates, if the Participant continues to be employed by, or providing service to, the Employer (as defined in the Plan) from the Date of Grant through the applicable date:

Date	Shares for Which the Option is Exercisable
January 1, 2015	1/3
January 1, 2016	1/3
January 1, 2017	1/3

The exercisability of the Option is cumulative, but shall not exceed 100% of the shares of Company Stock subject to the Option. If the foregoing schedule would produce fractional shares of Company Stock, the number of shares of Company Stock for which the Option becomes exercisable shall be rounded down to the nearest whole share of Company Stock. The Option shall become fully exercisable on January 1, 2017, if the Participant is employed by, or providing service to, the Employer on such date.

(b) If at any time prior to the date the Participant's Option becomes exercisable as described in subparagraph (a) above, the Participant's employment or service with the Employer is terminated on account of death or Total Disability (as defined below), the Option shall become fully exercisable on the date of the Participant's termination of employment or service with the Employer on account of death or Total Disability. For purposes of this Grant, the term " Total Disability" shall mean that the Participant has been determined to be totally disabled by the Social Security Administration.

(c) If a Change of Control occurs while the Participant is employed by or providing service to the Employer, then the Option shall become fully exercisable as of the date of the Change of Control. For purposes of this Grant, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code"), and its corresponding regulations.

3. Term of Option.

(a) The Option shall have a term from the Date of Grant through December 31, 2020, and shall terminate at the expiration of that period, unless it is terminated at an earlier date pursuant to the provisions of this Grant or the Plan.

(b) The Option shall automatically terminate upon the happening of the first of the following events:

(i) If the Participant's employment or service with the Employer terminates on account of death or Total Disability, the expiration of the one year period following the date of the Participant's termination of employment or service on account of death or Total Disability.

(ii) If the Participant's employment or service with the Employer terminates on account of Normal Retirement (as defined below), the expiration of the one year period following the date of the Participant's termination of employment or service on account of Normal Retirement. For purposes of this Grant, the term "Normal Retirement" shall mean, at the time of the Participant's termination of employment or service with the Employer, that the Participant has attained both (A) at least age 55, and (B) total years of employment and service with the Employer equals or exceeds 10.

(iii) If the Participant's employment or service with the Employer terminates for any reason other than on account of Cause (as defined below), Normal Retirement, death or Total Disability, the expiration of the ninety (90) day period following the date of the Participant's termination of employment or service for any reason other than on account of termination for Cause, death, Total Disability or Normal Retirement.

(iv) The date on which the Participant ceases to be employed by, or provide service to, the Employer for Cause. In addition, notwithstanding the prior provisions of this Paragraph 3, if the Participant engages in conduct that constitutes Cause after the Participant's employment or service terminates, the Option shall immediately terminate. For purposes of this Grant, the term "Cause" shall mean a finding by the Committee that the Participant (A) has breached his or her employment or service contract with the Employer, if any; (B) has engaged in disloyalty to the Employer, including, without limitation, fraud, embezzlement, theft, commission of a felony or proven dishonesty; (C) has disclosed trade secrets or confidential information of the Employer to persons not entitled to receive such information; (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Employer; or (E) has engaged in such other behavior detrimental to the interests of the Employer as the Committee determines.

Notwithstanding the foregoing, in no event may the Option be exercised after December 31, 20 20. Any portion of the Option that is not exercisable at the time the Participant ceases to be employed by, or provide service to, the Employer shall immediately terminate.

4. Exercise Procedures.

(a) Subject to the provisions of Paragraphs 2 and 3 above, the Participant may exercise part or all of the exercisable portion of the Option by giving the Company written notice of intent to exercise in the manner provided in this Grant, specifying the number of shares of Company Stock as to which the Option is to be exercised and the method of payment. Payment of the exercise price, together with any applicable tax withholding, shall be made in accordance with procedures established by the Committee from time to time based on the type of payment being made but, in any event, prior to issuance of the shares of Company Stock. The Participant shall pay the exercise price (i) in cash; (ii) with the approval of the Committee, by delivering shares of Company Stock, which shall be valued at their fair market value on the date of delivery, or by attestation (on a form prescribed by the Committee) to ownership of shares of Company Stock having a fair market value on the date of exercise, equal to the exercise price; (iii) by payment through a broker in accordance with procedures permitted by Regulation T of the Federal Reserve Board; or (iv) by such other method as the Committee may approve, to the extent permitted by applicable law. The Committee may impose from time to time such limitations as it deems appropriate on the use of shares of Company Stock to exercise the Option.

(b) The Participant may not exercise the Option unless the exercise of the Option and the issuance of shares of Company Stock complies with all applicable laws, rules, and regulations. The obligation of the Company to deliver shares of Company Stock upon exercise of the Option shall be subject to all applicable laws, rules, and regulations and such approvals by governmental agencies as may be deemed appropriate by the Committee, including such actions as Company counsel shall deem necessary or appropriate to comply with relevant securities laws and regulations. The Company shall be relieved of any liability with respect to any delayed issuance of shares of Company Stock or its failure to issue shares of Company Stock if such delay or failure is necessary to comply with applicable laws. The Company may require that the Participant (or other person exercising the Option after the Participant's death) represent that the Participant is purchasing the shares of Company Stock for the Participant's own account and not with a view to, or for sale in connection with, any distribution of the shares of Company Stock, or such other representations as the Committee deems appropriate.

(c) All obligations of the Company under this Grant shall be subject to the rights of the Company as set forth in the Plan to withhold amounts required to be withheld for any taxes, if applicable.

5. Change of Control. Except as set above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Option, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

6. Restrictions on Exercise. Except as the Committee may otherwise permit pursuant to the Plan, only the Participant may exercise the Option during the Participant's lifetime and, after the Participant's death, the Option shall be exercisable (subject to the limitations specified in the Plan) solely by the legal representatives of the Participant, or by the person who acquires the right to exercise the Option by will or by the laws of descent and distribution, to the extent that the Option is exercisable pursuant to this Agreement.

7. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. The Grant and exercise of the Option are subject to interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe the Option pursuant to the terms of the Plan, and its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and the Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all decisions and determinations of the Committee with respect to the Grant and the Plan shall be final and binding on the Participant and the Participant's beneficiaries and any other person claiming an interest under this Grant and the Plan on behalf of the Participant.

8. Restrictions on Sale or Transfer of Shares.

(a) The Participant agrees that he or she shall not sell, transfer, pledge, donate, assign, mortgage, hypothecate or otherwise encumber the shares of Company Stock underlying the Option unless the shares of Company Stock are registered under the Securities Act of 1933, as amended (the "Securities Act") or the Company is given an opinion of counsel reasonably acceptable to the Company that such registration is not required under the Securities Act.

(b) As a condition to receive any shares of Company Stock upon the exercise of the Option, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the exercise of the Option shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

9. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

10. No Employment or Other Rights. This Grant shall not confer upon the Participant any right to be retained by or in the employ or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

11. No Stockholder Rights. Neither the Participant, nor any person entitled to exercise the Participant's rights in the event of the Participant's death, shall have any of the rights and privileges of a stockholder with respect to the shares of Company Stock subject to the Option, until certificates for shares of Company Stock have been issued upon the exercise of the Option.

12. Assignment and Transfers. Except as the Committee may otherwise permit pursuant to the Plan, the rights and interests of the Participant under this Grant may not be sold, assigned, encumbered or otherwise transferred except, in the event of the death of the Participant, by will or by the laws of descent and distribution. In the event of any attempt by the Participant to alienate, assign, pledge, hypothecate, or otherwise dispose of the Option or any right hereunder, except as provided for in this Grant, or in the event of the levy or any attachment, execution or similar process upon the rights or interests hereby conferred, the Company may terminate the Option by notice to the Participant, and the Option and all rights hereunder shall thereupon become null and void. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company and to the Company's parents, subsidiaries, and affiliates. This Agreement may be assigned by the Company without the Participant's consent.

13. Effect on Other Benefits. The value of shares of Company Stock received upon exercise of the Option shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

14. Applicable Law. The validity, construction, interpretation and effect of this instrument shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

15. Taxation; Code Section 409A. The Plan and this Grant are intended to comply with the requirements of Code section 409A, to the extent applicable. This award shall be construed and administered such that the award either (i) qualifies for an exemption from the requirements of Code section 409A or (ii) satisfies the requirements of Code section 409A. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

16. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

17. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

Exhibit 10.6A

AMENDMENT TO
AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
NONQUALIFIED STOCK OPTION GRANT

This AMENDMENT TO NONQUALIFIED STOCK OPTION GRANT (the "Amendment"), dated as of April 28, 2014 (the "Date of Amendment"), is delivered by American Water Works Company, Inc. (the "Company") to ______________________ (the "Participant") to amend that certain NONQUALIFIED STOCK OPTION GRANT.

RECITALS

WHEREAS, the Company has previously awarded the Participant a Nonqualified Stock Option Grant dated February 20, 2014 (the " Grant Agreement"), governed by the terms of the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan");

WHEREAS, the Committee has determined to amend the Grant Agreement to cause the Participant to become vested upon the attainment of certain age and service conditions;

NOW, THEREFORE, the parties to this Amendment, intending to be legally bound hereby, agree as follows:

1. Exercisability of Option Upon Retirement. Notwithstanding any provision of the Grant Agreement to the contrary, if, on or after the first vesting date specified in Section 2(a), the Participant's employment or service with the Employer terminates (for any reason other than for Cause) after the Participant's attainment of age 62 and completion of at least five (5) total years of employment or service with the Employer, the Option shall become fully exercisable as of the date of termination.

2. Term of Option. If the Participant's employment or service with the Employer terminates on account of Normal Retirement (as defined below), the expiration of the one year period following the date of the Participant's termination of employment or service on account of Normal Retirement. For purposes of this Grant, the term "Normal Retirement" shall mean, at the time of the Participant's termination of employment or service with the Employer, that the Participant has attained either (A) both (i) at least age 55 and (ii) at least 10 total years of employment or service with the Employer, or (B) both (i) at least age 62, and (ii) at least five (5) total years of employment or service with the Employer.

3. No Other Changes to Grant Agreement. The terms otherwise set forth under the Grant Agreement shall not be modified by this Amendment except as expressly amended above.

Exhibit 10.7

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
RESTRICTED STOCK UNIT GRANT

This RESTRICTED STOCK UNIT GRANT, dated as of February 20, 2014 (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to Jeffry E. Sterba (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the "Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the restricted stock unit portion of the Equity Award granted pursuant to the 2014 LTIP to the Participant shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan") and the terms and conditions of such restricted stock unit shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Restricted Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant _______units (the "Restricted Stock Units"). Each unit (a "Unit") shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable Redemption Date (as defined below).

2. Restricted Stock Unit Account. The Company shall establish and maintain a Restricted Stock Unit account as a bookkeeping account on its records (the "Restricted Stock Unit Account") for the Participant and shall record in such Restricted Stock Unit Account the number of Restricted Stock Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Restricted Stock Unit Account established for the Participant.

3. Vesting.

(a) Except as provided in subparagraph (c) below, the Restricted Stock Units shall vest on the following date (the "Service Date"), provided the Participant continues to be employed by, or providing service to, the Employer (as defined in the Plan) from the Date of Grant through the applicable Service Date:

Date	Units Vesting
January 1, 2015	100

(b) If at any time prior to the Service Date, the Participant's employment or service with the Employer is terminated by the Participant for Good Reason, by the Employer without Cause, or on account of death or Total Disability (each as defined below), then all of the unvested Restricted Stock Units will immediately vest and the Participant will earn all of the Restricted Stock Units that would have been earned if the Participant had remained employed through the Service Date. For purposes of this Grant, the term "Good Reason" shall mean have the meaning that is provided in the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, and the term "Total Disability" shall mean that the Participant has been determined to be totally disabled by the Social Security Administration.

(c) If at any time prior to the Service Date, but while the Participant is employed by or providing service to the Employer, a Change of Control (as defined below) occurs, then all of the unvested Restricted Stock Units shall become vested on the date of the Change of Control. For purposes of this Agreement, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Agreement unless the event constituting the Change of Control constitutes a change in the ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and its corresponding regulations. For the avoidance of doubt, if the Change of Control does not constitute a permitted change in control event under Code section 409A, then the Restricted Stock Unit shall not vest on the occurrence of the Change of Control.

(d) The date on which all or any portion of the Restricted Stock Unit becomes vested as described in this Paragraph 3 shall hereinafter be referred to as the "Vesting Date".

(e) If at any time prior to the Vesting Date, the Participant's employment or service with the Employer is terminated on account of Cause, all of the Restricted Stock Units subject to this Grant shall be immediately forfeited and the Participant will not have any rights with respect to the vesting or the redemption of any portion of the Restricted Stock Units. For purposes of this Grant, the term " Cause" shall mean a finding by the Company, as determined in accordance with the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, that the Participant (A) has breached his employment or service contract with the Company; (B) has been convicted of, or pleaded guilty or nolo contender to a charge of, fraud, embezzlement, theft, or other felony; (C) except as required by order of a court of competent jurisdiction, has disclosed trade secrets or confidential information of the Company to persons not entitled to receive such information; or (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Company.

4. Redemption. Unless an election is made pursuant to Paragraph 5 below, the Restricted Stock Units shall be redeemed by the Company on the applicable Vesting Date or as soon as administratively practicable thereafter, but not later than forty-five (45) days following the Vesting Date, (the " Redemption Date"). On the Redemption Date (or, if applicable, the Deferred Date, as defined in Paragraph 5 below), all Restricted Stock Units that become vested pursuant to Paragraph 3 above shall be redeemed and converted to an equivalent number of shares of Company Stock, and the Participant shall receive a single sum distribution of such shares of Company Stock, which shall be issued under the Plan.

5. Deferrals. The Participant may make an irrevocable election to defer the Redemption Date (or further defer the Deferred Date (as defined below), if applicable) of any of the Restricted Stock Units that vest, plus dividend equivalents earned on such Restricted Stock Units as described in Paragraph 6 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the new Redemption Date cannot be earlier than five (5) years from the original Redemption Date under Paragraph 4 above (or five (5) years from the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Redemption Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Redemption Date, the Participant must complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code.
Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the redemption of the Participant's Restricted Stock Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Redemption Date is delayed one or more times pursuant to this Paragraph 5, the new Redemption Date shall be referred to as the "Deferred Date."

6. Dividend Equivalents. Until the Redemption Date (or the Deferred Date, if elected), if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the " Dividend Equivalent Account") the value of the dividends that would have been distributed if the Restricted Stock Units credited to the Participant's Restricted Stock Unit Account as of the date of payment of any such dividend were shares of Company Stock. On the Redemption Date (or the Deferred Date, if applicable), the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Units that have been forfeited as provided in Paragraph 3 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

7. Change of Control. Except as set forth in Paragraph 3(c) of this Grant, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Restricted Stock Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

8. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to redemption or distribution pursuant to this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

9. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the redemption of the Restricted Stock Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company Stock on the Redemption Date (or the Deferred Date, if applicable), the Participant agrees :

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the redemption of the Restricted Stock Units shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

10. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

11. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

12. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 6), or the right to vote, with respect to any Restricted Stock Units.

13. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

14. Assignment and Transfers. No Restricted Stock Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and a Restricted Stock Unit shall be redeemed and a dividend equivalent distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Restricted Stock Unit or dividend equivalent by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

15. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and redemption of the Restricted Stock Units and payment of dividend equivalents. Any tax withholding obligation of the Employer with respect to the redemption of the Restricted Stock Units may, at the Committee's discretion, be satisfied by having shares of Company Stock withheld, up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

16. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Restricted Stock Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

17. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

18. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

19. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Restricted Stock Units constitute "deferred compensation" under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 5 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

20. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

Exhibit 10.8

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
NONQUALIFIED STOCK OPTION GRANT

This STOCK OPTION GRANT, dated as of February 20, 2014, (the "Date of Grant") is delivered by American Water Works Company, Inc. (the "Company") to Jeffry E. Sterba (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the " Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the " Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the nonqualified stock option portion of the Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of such nonqualified stock option shall be memorialized in this grant (the " Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Option. Subject to the terms and conditions set forth in this Grant and in the Plan, the Company hereby grants to the Participant a nonqualified stock option (the "Option") to purchase _______ shares of Company Stock, at an exercise price of $44.06 per share of Company Stock.

2. Exercisability of Option.

(a) Except as provided in subparagraphs (b) or (c) below, the Option shall become exercisable on the following dates, if the Participant continues to be employed by, or providing service to, the Employer (as defined in the Plan) from the Date of Grant through the applicable date:

Date	Shares for Which the Option is Exercisable
January 1, 2015	100%

The exercisability of the Option is cumulative, but shall not exceed 100% of the shares of Company Stock subject to the Option. If the foregoing schedule would produce fractional shares of Company Stock, the number of shares of Company Stock for which the Option becomes exercisable shall be rounded down to the nearest whole share of Company Stock. The Option shall become fully exercisable on January 1, 2015, if the Participant is employed by, or providing service to, the Employer on such date.

(b) If at any time prior to the date the Participant's Option becomes exercisable as described in subparagraph (a) above, the Participant's employment or service with the Employer is terminated by the Participant for Good Reason, by the Company without Cause, or on account of death or Total Disability (each as defined below), the Option shall become fully exercisable on the date of the Participant's termination of employment or service with the Employer. For purposes of this Grant, the term "Good Reason" shall mean have the meaning that is provided in the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, and the term " Total Disability" shall mean that the Participant has been determined to be totally disabled by the Social Security Administration.

(c) If a Change of Control occurs while the Participant is employed by or providing service to the Employer, then the Option shall become fully exercisable as of the date of the Change of Control. For purposes of this Grant, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code"), and its corresponding regulations.

3. Term of Option.

(a) The Option shall have a term from the Date of Grant through December 31, 2020, and shall terminate at the expiration of that period, unless it is terminated at an earlier date pursuant to the provisions of this Grant or the Plan.

(b) The Option shall automatically terminate upon the happening of the first of the following events:

(i) If the Participant's employment or service with the Employer terminates for any reason other than on account of Cause (as defined below), the expiration of the two (2)- year period following the date of the Participant's termination of employment or service for any reason other than on account of termination for Cause.

(ii) The date on which the Participant ceases to be employed by, or provide service to, the Employer for Cause. In addition, notwithstanding the prior provisions of this Paragraph 3, if the Participant engages in conduct that constitutes Cause after the Participant 's employment or service terminates, the Option shall immediately terminate. For purposes of this Grant, the term " Cause" shall mean a finding by the Company, as determined in accordance with the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, that the Participant (A) has breached his employment or service contract with the Company; (B) has been convicted of, or pleaded guilty or nolo contendere to a charge of, fraud, embezzlement, theft, or other felony; (C) except as required by order of a court of competent jurisdiction, has disclosed trade secrets or confidential information of the Company to persons not entitled to receive such information; or (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Company.

Notwithstanding the foregoing, in no event may the Option be exercised after December 31, 20 20. Any portion of the Option that is not exercisable at the time the Participant ceases to be employed by, or provide service to, the Employer shall immediately terminate.

4. Exercise Procedures.

(a) Subject to the provisions of Paragraphs 2 and 3 above, the Participant may exercise part or all of the exercisable portion of the Option by giving the Company written notice of intent to exercise in the manner provided in this Grant, specifying the number of shares of Company Stock as to which the Option is to be exercised and the method of payment. Payment of the exercise price , together with any applicable tax withholding, shall be made in accordance with procedures established by the Committee from time to time based on the type of payment being made but, in any event, prior to issuance of the shares of Company Stock. The Participant shall pay the exercise price (i) in cash; (ii) with the approval of the Committee, by delivering shares of Company Stock, which shall be valued at their fair market value on the date of delivery, or by attestation (on a form prescribed by the Committee) to ownership of shares of Company Stock having a fair market value on the date of exercise, equal to the exercise price; (iii) by payment through a broker in accordance with procedures permitted by Regulation T of the Federal Reserve Board; or (iv) by such other method as the Committee may approve, to the extent permitted by applicable law. The Committee may impose from time to time such limitations as it deems appropriate on the use of shares of Company Stock to exercise the Option.

(b) The Participant may not exercise the Option unless the exercise of the Option and the issuance of shares of Company Stock complies with all applicable laws, rules, and regulations. The obligation of the Company to deliver shares of Company Stock upon exercise of the Option shall be subject to all applicable laws, rules, and regulations and such approvals by governmental agencies as may be deemed appropriate by the Committee, including such actions as Company counsel shall deem necessary or appropriate to comply with relevant securities laws and regulations. The Company shall be relieved of any liability with respect to any delayed issuance of shares of Company Stock or its failure to issue shares of Company Stock if such delay or failure is necessary to comply with applicable laws. The Company may require that the Participant (or other person exercising the Option after the Participant's death) represent that the Participant is purchasing the shares of Company Stock for the Participant's own account and not with a view to, or for sale in connection with, any distribution of the shares of Company Stock, or such other representations as the Committee deems appropriate.

(c) All obligations of the Company under this Grant shall be subject to the rights of the Company as set forth in the Plan to withhold amounts required to be withheld for any taxes, if applicable.

5. Change of Control. Except as set above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Option, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

6. Restrictions on Exercise. Except as the Committee may otherwise permit pursuant to the Plan, only the Participant may exercise the Option during the Participant's lifetime and, after the Participant's death, the Option shall be exercisable (subject to the limitations specified in the Plan) solely by the legal representatives of the Participant, or by the person who acquires the right to exercise the Option by will or by the laws of descent and distribution, to the extent that the Option is exercisable pursuant to this Agreement.

7. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. The Grant and exercise of the Option are subject to interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe the Option pursuant to the terms of the Plan, and its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and the Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all decisions and determinations of the Committee with respect to the Grant and the Plan shall be final and binding on the Participant and the Participant's beneficiaries and any other person claiming an interest under this Grant and the Plan on behalf of the Participant.

8. Restrictions on Sale or Transfer of Shares.

(a) The Participant agrees that he or she shall not sell, transfer, pledge, donate, assign, mortgage, hypothecate or otherwise encumber the shares of Company Stock underlying the Option unless the shares of Company Stock are registered under the Securities Act of 1933, as amended (the "Securities Act") or the Company is given an opinion of counsel reasonably acceptable to the Company that such registration is not required under the Securities Act.

(b) As a condition to receive any shares of Company Stock upon the exercise of the Option, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the exercise of the Option shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

9. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

10. No Employment or Other Rights. This Grant shall not confer upon the Participant any right to be retained by or in the employ or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

11. No Stockholder Rights. Neither the Participant, nor any person entitled to exercise the Participant's rights in the event of the Participant's death, shall have any of the rights and privileges of a stockholder with respect to the shares of Company Stock subject to the Option, until certificates for shares of Company Stock have been issued upon the exercise of the Option.

12. Assignment and Transfers. Except as the Committee may otherwise permit pursuant to the Plan, the rights and interests of the Participant under this Grant may not be sold, assigned, encumbered or otherwise transferred except, in the event of the death of the Participant, by will or by the laws of descent and distribution. In the event of any attempt by the Participant to alienate, assign, pledge, hypothecate, or otherwise dispose of the Option or any right hereunder, except as provided for in this Grant, or in the event of the levy or any attachment, execution or similar process upon the rights or interests hereby conferred, the Company may terminate the Option by notice to the Participant, and the Option and all rights hereunder shall thereupon become null and void. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company and to the Company's parents, subsidiaries, and affiliates. This Agreement may be assigned by the Company without the Participant's consent.

13. Effect on Other Benefits. The value of shares of Company Stock received upon exercise of the Option shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

14. Applicable Law. The validity, construction, interpretation and effect of this instrument shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

15. Taxation; Code Section 409A. The Plan and this Grant are intended to comply with the requirements of Code section 409A, to the extent applicable. This award shall be construed and administered such that the award either (i) qualifies for an exemption from the requirements of Code section 409A or (ii) satisfies the requirements of Code section 409A. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

16. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

17. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

Firmwide:125783979.3 076170.1015

Exhibit 10.9

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
PERFORMANCE STOCK UNIT GRANT

This PERFORMANCE STOCK UNIT GRANT, dated as of February 20, 2014, (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to Jeffry E. Sterba (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the " Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the performance stock unit portion of the Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of the performance stock unit grant that may be earned based on the performance goal relating to the Company's Total Stockholder Return shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Performance Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant _____ performance stock units (the "Performance Units"). The Performance Units are contingently awarded and will be earned and distributable if and only to the extent that the performance goal and other conditions set forth in this Grant are met. Each Performance Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable payment date, as described in Paragraph 5 below. The number of Performance Units set forth above is equal to the target number of shares of Company Stock that the Participant will earn for 100% achievement of the performance goal described in Paragraph 3 below (the "Target Award").

2. Performance Unit Account. The Company shall establish and maintain a Performance Unit account as a bookkeeping account on its records (the "Performance Unit Account") for the Participant and shall record in such Performance Unit Account the number of Performance Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Performance Unit Account established for the Participant.

3. Performance Goal.

(a) Unless a Change of Control (as defined below) occurs prior to the end of Performance Period (as defined below), the distribution of the shares of Company Stock attributable to the Performance Units is contingent upon achievement of the performance goal described in subparagraph (b) below for the Performance Period and the Participant satisfying the continuation of employment and service with the Employer (as defined in the Plan) requirement described in Paragraph 4 below.

(b) The Company's Total Stockholder Return ("TSR") (as described in subparagraph (c) below) will be compared to the TSR of the companies in the Peer Group (as defined below) over the Performance Period. The actual number of Performance Units the Participant earns may be greater or less than the Target Award, or even zero, based on the Company's TSR percentile ranking relative to the TSR performance of the companies in the Peer Group, as follows:

Level of Achievement	**Percentile Ranking Relative to Peer Group**	**Percentage of Target Award Earned**
Maximum	75%	175%
Target	50%	100%
Threshold	25%	25%

If the Company's actual TSR performance is between measuring points, the number of Performance Units the Participant earns will be interpolated. If the Company's actual TSR performance is below the threshold, no Performance Units will be earned and all of Performance Units will be forfeited. If the Company's actual TSR performance is greater than the maximum, only the maximum number of Performance Units will be earned.

(c) TSR represents stock price performance and dividend accumulation over the Performance Period for the Company and Peer Group. For purposes of this calculation, the initial stock price and the ending stock price are determined using the twenty (20) day average stock price for December 31, 2013, and December 31, 2016, as applicable. The twenty (20) day average stock price is the average of the daily closing stock prices for the twenty (20) trading days that end on the applicable December 31. To determine stock price performance, a dividend adjustment factor will be determined. The dividend adjustment factor takes into account each per share dividend paid for the Performance Period as well as the effect of any appreciation in stock price by reason of deeming the dividend to be reinvested in the stock. Dividend adjusted price shall be obtained from Bloomberg. The dividend adjusted price obtained from Bloomberg provides the closing price for the requested day, week, or month, adjusted for all applicable splits and dividend distributions. At the end of the Performance Period, the TSR for the Company, and for each company in the Peer Group, shall be determined pursuant to the following formula:

$$\text{TSR} = \frac{(\text{Dividend Adjusted Ending Stock Price} - \text{Dividend Adjusted Initial Stock Price})}{\text{Dividend Adjusted Initial Stock Price}}$$

The result shall be rounded to the nearest hundredth of one percent (.01%).

(d) As soon as administratively practicable following the end of the Performance Period, the Committee will determine whether and to what extent the performance goal has been met and certify the number of Performance Units the Participant has earned, if any. Except as described in Paragraph 4 below, the Participant must be employed by, or providing service to, the Employer on the last day of the Performance Period in order to earn the Performance Units.

(e) If a Change of Control occurs prior to the end of the Performance Period, then the Performance Period will end on the date of the Change of Control and the Performance Units will be deemed earned at the Target Award level as of the date of the Change of Control (the "Change of Control Date"). For purposes of this Grant, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code"), and its corresponding regulations.

(f) For purposes of this Grant, the term "Performance Period" shall mean the three-year period beginning on January 1, 2014 and ending December 31, 2016, and the term "Peer Group" shall mean those companies that comprise the Dow Jones U.S. Utilities Index as of January 1, 2014. If a company in the Peer Group ceases to be a member of the Dow Jones U.S. Utilities Index at any time during the Performance Period, such company shall no longer be a company in the Peer Group.

4.Termination of Employment or Service.

(a) If the Participant's employment or service with the Employer is terminated prior to January 1, 2015 by the Participant for Good Reason, by the Company without Cause, or on account of death or Total Disability (each as defined below), the Participant will earn all of the Performance Units that would have been earned if the Participant had remained employed through January 1, 2015 if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period. For purposes of this Grant, the term "Good Reason" shall mean have the meaning that is provided in the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, and the term "Total Disability" shall mean that the Participant has been determined to be totally disabled by the Social Security Administration. Any Performance Units that are earned pursuant to this Paragraph 4(a) will be distributed in accordance with Paragraph 5.

(b) If the Participant continues to be employed by, or providing service to, the Employer from the Date of Grant through January 1, 2015 or a Change of Control, or if the Participant's employment or service with the Employer is terminated prior to January 1, 2015 by the Company without Cause, by the Participant for Good Reason, or on account of death or Total Disability, the Participant will earn all of the Performance Units, if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period. If the Participant's employment or service with the Employer is terminated prior to January 1, 2015 by the Company without Cause, by the Participant for Good Reason, or on account of death or Total Disability, the Participant will earn all of the Performance Units, if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period. Any Performance Units that are earned pursuant to this Paragraph 4(b) will be distributed in accordance with Paragraph 5.

(c) If at any time prior to the date the Performance Units are distributed in accordance with Paragraph 5 the Participant's employment or service with the Employer is terminated on account of Cause, all of the Performance Units subject to this Grant shall be immediately forfeited and the Participant will not have any rights with respect to the distribution of any portion of the Performance Units, irrespective of the level of achievement of the performance goal. For purposes of this Grant, the term "Cause" shall mean a finding by the Company, as determined in accordance with the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, that the Participant (A) has breached his employment or service contract with the Company; (B) has been convicted of, or pleaded guilty or nolo contender to a charge of, fraud, embezzlement, theft, or other felony; (C) except as required by order of a court of competent jurisdiction, has disclosed trade secrets or confidential information of the Company to persons not entitled to receive such information; or (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Company.

5. Time and Form of Payment with Respect to Performance Units. Unless an election is made pursuant to Paragraph 6 below, the Participant will receive a distribution with respect to the Performance Units earned as described in Paragraphs 3 and 4 above within seventy (70) days following the earlier of (i) January 1, 2017 (the "Distribution Date"), or (ii) the Change of Control Date. The Performance Units will be distributed in shares of Company Stock, with each Performance Unit earned equivalent to one share of Company Stock. Any Performance Units not earned because of the failure to attain the performance goal and service condition will be forfeited.

6. Deferrals. The Participant may make an irrevocable election to defer the Distribution Date (or further defer the Deferred Date (as defined below), if applicable) of all of the Performance Units that are earned, plus dividend equivalents earned on such Performance Units as described in Paragraph 7 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Distribution Date cannot be earlier than five (5) years from the original Distribution Date under Paragraph 5 above (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Distribution Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Distribution Date, the Participant must elect to defer 100% of the Performance Units, including corresponding dividend equivalents, earned by the Participant under this Grant, as well as 100% of the other performance stock units, including corresponding dividend equivalents, earned by the Participant under the 2014 LTIP, and complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant's earned Performance Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Distribution Date is delayed one or more times pursuant to this Paragraph 6, the new Distribution Date shall be referred to as the "Deferred Date."

7. Dividend Equivalents. Until the earlier of the Distribution Date (or the Deferred Date, if elected) or the Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the " Dividend Equivalent Account") the value of the dividends that would have been distributed if the Performance Units credited to the Participant's Performance Unit Account as of the date of payment of any such dividend were shares of Company Stock. At the same time that the Performance Units are converted to shares of Company Stock and distributed to the Participant, the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Performance Units that have been forfeited as provided in Paragraph 3 and 4 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

8. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Performance Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

9. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that, with respect to any right to distribution pursuant to the Plan or this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

10. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the Participant earning the Performance Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company Stock upon conversion of the earned Performance Units, the Participant agrees:

i. to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, _assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

ii. that any shares of Company Stock received by the Participant upon the distribution of the earned Performance Units pursuant to this Grant shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

11. The Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

12. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

13. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 7), or the right to vote, with respect to any Performance Units.

14. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

15. Assignment and Transfers. No Performance Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Performance Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Performance Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

16. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and distribution of the Performance Units and dividend equivalents. Any tax withholding obligation of the Employer with respect to the distribution of shares of Company Stock pursuant to the Performance Units that are earned by the Participant under this Grant may, at the Committee's discretion, be satisfied by having shares of Company Stock withheld up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

17. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Performance Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

18. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

19. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

20. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Performance Units constitute "deferred compensation" under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be

deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 6 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

21. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

AMERICAN WATER WORKS COMPANY, INC.

By: George MacKenzie

G. MacKenzie

Its: Chairman of the Board of Directors

Exhibit 10.10

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
PERFORMANCE STOCK UNIT GRANT

This PERFORMANCE STOCK UNIT GRANT, dated as of February 20, 2014, (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to Jeffry E. Sterba (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees will be granted equity awards (collectively, the " Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the " Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee has determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP; and

WHEREAS, the Committee has determined that the performance stock unit portion of the Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of the performance stock unit grant that may be earned based on performance goals relating to compounded earnings per share growth and operational efficiency improvement, as set forth in Exhibit A attached hereto, shall be memorialized in this grant (the " Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Performance Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant ___________ performance stock units (the " Performance Units"). The Performance Units are contingently awarded and will be earned and distributable if and only to the extent that the Performance Goals (as defined below) and other conditions set forth in this Grant are met. Each Performance Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable payment date, as described in Paragraph 5 below. The number of Performance Units set forth above is equal to the target number of shares of Company Stock that the Participant will earn for 100% achievement of the Performance Goals described in this Grant (the " Target Award").

2. Performance Unit Account. The Company shall establish and maintain a Performance Unit account as a bookkeeping account on its records (the "Performance Unit Account") for the Participant and shall record in such Performance Unit Account the number of Performance Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Performance Unit Account established for the Participant.

3. Performance Goals.

(a) Unless a Change of Control (as defined below) occurs prior to the end of the Performance Period (as defined below), the distribution of the shares of Company Stock attributable to the Performance Units is contingent upon achievement of the performance goals set forth in Exhibit A attached hereto (the "Performance Goals") and the Participant satisfying the continuation of employment and service with the Employer (as defined in the Plan) requirement described in Paragraph 4 below.

(b) As soon as administratively practicable following the end of the Performance Period, the Committee will determine whether and to what extent the Performance Goals have been met and certify the number of Performance Units the Participant has earned, if any. Except as described in Paragraph 4 below, the Participant must be employed by, or providing service to, the Employer on the last day of the Performance Period in order to earn the Performance Units.

(c) If a Change of Control occurs prior to the end of the Performance Period, then the Performance Period will end on the date of the Change of Control and the Performance Units will be deemed earned at the Target Award level as of the date of the Change of Control (the " Change of Control Date"). For purposes of this Grant, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and its corresponding regulations.

(d) For purposes of this Grant, the term "Performance Period" shall mean the three-year period beginning on January 1, 2014 and ending December 31, 2016.

4. Termination of Employment or Service.

(a) If the Participant's employment or service with the Employer is terminated prior to January 1, 2015 by the Participant for Good Reason, by the Company without Cause, or on account of death or Total Disability (each as defined below), the Participant will earn all of the Performance Units that would have been earned if the Participant had remained employed through January 1, 2015 if the Performance Goals and the requirements of this Grant are met as of the last day of the Performance Period. For purposes of this Grant, the term "Good Reason" shall mean have the meaning that is provided in the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, and the term "Total Disability" shall mean that the Participant has been determined to be totally disabled by the Social Security Administration. Any Performance Units that are earned pursuant to this Paragraph 4(a) will be distributed in accordance with Paragraph 5.

(b) If the Participant continues to be employed by, or providing service to, the Employer from the Date of Grant through January 1, 2015 or a Change of Control, or if the Participant's employment or service with the Employer is terminated prior to January 1, 2015 by the Company without Cause, by the Participant for Good Reason, or on account of death or Total Disability, the Participant will earn all of the Performance Units, if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period. If the Participant's employment or service with the Employer is terminated prior to January 1, 2015 by the Company without Cause, by the Participant for Good Reason, or on account of death or Total Disability, the Participant will earn all of the Performance Units, if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period. Any Performance Units that are earned pursuant to this Paragraph 4(b) will be distributed in accordance with Paragraph 5.

(c) If at any time prior to the date the Performance Units are distributed in accordance with Paragraph 5 the Participant's employment or service with the Employer is terminated on account of Cause, all of the Performance Units subject to this Grant shall be immediately forfeited and the Participant will not have any rights with respect to the distribution of any portion of the Performance Units, irrespective of the level of achievement of the Performance Goals. For purposes of this Grant, the term "Cause" shall mean a finding by the Company, as determined in accordance with the Amended Employment Letter Agreement between the Participant and the Company that is dated March 26, 2012, that the Participant (A) has breached his employment or service contract with the Company; (B) has been convicted of, or pleaded guilty or nolo contender to a charge of, fraud, embezzlement, theft, or other felony; (C) except as required by order of a court of competent jurisdiction, has disclosed trade secrets or confidential information of the Company to persons not entitled to receive such information; or (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Company.

5. Time and Form of Payment with Respect to Performance Units. Unless an election is made pursuant to Paragraph 6 below, the Participant will receive a distribution with respect to the Performance Units earned as described in Paragraphs 3 and 4 above within seventy (70) days following the earlier of (i) January 1, 2017 (the "Distribution Date"), or (ii) the Change of Control Date. The Performance Units will be distributed in shares of Company Stock, with each Performance Unit earned equivalent to one share of Company Stock. Any Performance Units not earned because of the failure to attain the Performance Goals and service condition will be forfeited.

6. Deferrals. The Participant may make an irrevocable election to defer the Distribution Date (or further defer the Deferred Date (as defined below), if applicable) of all of the Performance Units that are earned, plus dividend equivalents earned on such Performance Units as described in Paragraph 7 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Distribution Date cannot be earlier than five (5) years from the original Distribution Date under Paragraph 5 above (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Distribution Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Distribution Date, the Participant must elect to defer 100% of the Performance Units, including corresponding dividend equivalents, earned by the Participant under this Grant, as well as 100% of the other performance stock units, including corresponding dividend equivalents, earned by the Participant under the 2014 LTIP, and complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant's earned Performance Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Distribution Date is delayed one or more times pursuant to this Paragraph 6, the new Distribution Date shall be referred to as the "Deferred Date."

7. Dividend Equivalents. Until the earlier of the Distribution Date (or the Deferred Date, if elected) or the Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the " Dividend Equivalent Account") the value of the dividends that would have been distributed if the Performance Units credited to the Participant's Performance Unit Account as of the date of payment of any such dividend were shares of Company Stock.

At the same time that the Performance Units are converted to shares of Company Stock and distributed to the Participant, the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Performance Units that have been forfeited as provided in Paragraph 3 and 4 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

8. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Performance Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

9. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to distribution pursuant to the Plan or this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

10. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the Participant earning the Performance Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company upon conversion of the earned Performance Units, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that any shares of Company Stock received by the Participant upon the distribution of the earned Performance Units pursuant to this Grant shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

11. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

12. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

13. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 7), or the right to vote, with respect to any Performance Units.

14. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

15. Assignment and Transfers. No Performance Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Performance Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Performance Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

16. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and distribution of the Performance Units and dividend equivalents. Any tax withholding obligation of the Employer with respect to the distribution of shares of Company Stock pursuant to the Performance Units that are earned by the Participant under this Grant may, at the Committee's discretion, be satisfied by having shares of Company Stock withheld up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

17. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Performance Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

18. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

19. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

20. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Performance Units constitute "deferred compensation" under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 6 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

21. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Jeffry Sterba, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

Note 1: Basis of Presentation

The accompanying Consolidated Balance Sheet of American Water Works Company, Inc. and Subsidiary Companies (the "Company") at June 30, 2014, the Consolidated Statements of Operations and Comprehensive Income for the three and six months ended June 30, 2014 and 2013, the Consolidated Statements of Cash Flows for the six months ended June 30, 2014 and 2013, and the Consolidated Statements of Changes in Stockholders' Equity for the six months ended June 30, 2014 and 2013, are unaudited, but reflect all adjustments, which are, in the opinion of management, necessary to present fairly the consolidated financial position, the consolidated changes in stockholders' equity, the consolidated results of operations and comprehensive income, and the consolidated cash flows for the periods presented. All adjustments are of a normal, recurring nature, except as otherwise disclosed. Because they cover interim periods, the unaudited consolidated financial statements and related notes to the consolidated financial statements do not include all disclosures and notes normally provided in annual financial statements and, therefore, should be read in conjunction with the Company's Consolidated Financial Statements and related Notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year, due primarily to the seasonality of the Company's operations.

Certain reclassifications have been made to previously reported data to conform to the current presentation. In 2014 the Company revised the 2013 balance sheet to classify $18,609 of deferred income taxes as current rather than non-current. The change in classification was not material to the previously issued financial statements.

Note 2: New Accounting Pronouncements

The following recently issued accounting standards have been adopted by the Company and have been included in the consolidated results of operations, financial position or footnotes of the accompanying Consolidated Financial Statements:

Obligations Resulting from Joint and Several Liability Arrangements

In February 2013, the Financial Accounting Standards Board ("FASB") issued guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date. Examples of obligations within the scope of the updated guidance include debt arrangements, other contractual obligations and settled litigation and judicial rulings. The update requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date as the sum of the following: (a) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. The updated guidance also includes additional disclosures regarding the nature and amount of the obligation, as well as other information about those obligations. The update is effective on a retrospective basis for interim and annual periods beginning January 1, 2014. The adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

Foreign Currency Matters

In June 2013, the FASB issued guidance for a parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. The amendments resolve differing views in practice and apply to the release of the cumulative translation adjustment into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or a business within a foreign entity. The update is effective prospectively for interim and annual periods beginning January 1, 2014. The adoption of this guidance did not have an impact on the Company's results of operations, financial position or cash flows.

The following recently announced accounting standards are not yet required to be adopted by the Company:

Service Concession Arrangements

In January 2014, the FASB issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide the services and at what price. The grantor also controls, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in the arrangement should not be recognized as property, plant and equipment of the operating entity. This update should be applied on a modified retrospective basis to service concession arrangements that exist at the beginning of an entity's fiscal year of adoption. This requires the cumulative effect of applying the update to be recognized as an adjustment to the opening retained earnings balance for the annual period of adoption. The update is effective for interim and annual periods beginning January 1, 2015. Early adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Reporting Discontinued Operations

In April 2014, the FASB issued guidance that changes the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. Under the updated guidance, a discontinued operation is defined as a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has or will have a major effect on an entity's operations and financial results. A strategic shift could include a disposal of a major geographical area of operations, a major line of business, a major equity method investment or other major part of the entity. A component comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity including a reportable segment, an operating segment, a reporting unit, a subsidiary or an asset group. The update no longer precludes presentation as a discontinued operation if there are operations and cash flows of the component that have not been eliminated from the reporting entity's ongoing operations or if there is significant continuing involvement with a component after its disposal. The guidance is effective for new disposals after January 1, 2015 and early adoption is permitted for new disposals that have not yet been reported in financial statements. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Revenue from Contracts with Customers

In May 2014, the FASB issued a comprehensive new revenue recognition standard that supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the new guidance is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The guidance is effective for annual and interim periods beginning January 1, 2017 and early adoption is not permitted. The new guidance allows for either full retrospective adoption, meaning the guidance is applied to all of the periods presented, or modified retrospective adoption, meaning the standard is applied only to the most current period presented in the financial statements. The Company is evaluating the new guidance, the best transition method and the impact the new standard will have on its results of operations, financial position or cash flows.

Accounting for Stock-based Compensation with Performance Targets

In June 2014, the FASB issued guidance for the accounting for stock-based compensation tied to performance targets. The amendments clarify that a performance target that affects vesting of a share-based payment and that could be achieved after the requisite service period is a performance condition. As a result, the target is not reflected in the estimation of the award's grant date fair value and compensation cost would be recognized over the required service period, if it is probable that the performance condition will be achieved. The guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Note 3: Acquisitions

Acquisitions

During the six-month period ended June 30, 2014, the Company closed on five acquisitions: four regulated water systems and one regulated water and wastewater system. The aggregate purchase price of these acquisitions totaled $2,869. Assets acquired, principally plant, totaled $5,985. Liabilities assumed totaled $3,117, including contributions in aid of construction of $1,425 and debt of $1,683.

Note 4: Goodwill

The Company's annual goodwill impairment test is conducted at November 30 of each calendar year. Interim reviews are performed when the Company determines that a triggering event that would more likely than not reduce the fair value of a reporting unit below its carrying value has occurred. The Company has determined no such triggering event had occurred during the six months ended June 30, 2014.

The change in the Company’s goodwill assets, as allocated between the reporting units is as follows:

	Regulated Unit		Market-Based Operations		Consolidated		
	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Total Net
Balance at January 1, 2014	$3,412,063	$ (2,332,670)	$ 235,990	$ (107,619)	$3,648,053	$ (2,440,289)	$1,207,764

Balance at June 30, 2013	$3,411,635	$ (2,332,670)	$ 235,990	$ (107,619)	$3,647,625	$ (2,440,289)	$1,207,336

Note 5: Stockholders’ Equity

Common Stock

Under American Water Stock Direct, a dividend reinvestment and direct stock purchase plan (the “DRIP”), stockholders may reinvest cash dividends and purchase additional Company common stock, up to certain limits, through the plan administrator without commission fees. The Company’s plan administrator may buy newly issued shares directly from the Company or shares held in the Company’s treasury. The plan administrator may also buy shares in the public markets or in privately negotiated transactions. Purchases generally will be made and credited to DRIP accounts once each week. As of June 30, 2014, there were 4,632 shares available for future issuance under the DRIP.

The following table summarizes information regarding issuances under the DRIP for the six months ended June 30, 2014 and 2013:

	2014	2013
Shares of common stock issued	23	23
Cash proceeds received	$ 1,031	$ 914

Cash dividend payments made during the three-month periods ended March 31 and June 30 were as follows:

	2014	2013
Dividends per share, three months ended:		
March 31	$ 0.28	$ 0.00
June 30	$ 0.31	$ 0.28
Total dividends paid, three months ended:		
March 31	$ 49,968	$ 0
June 30	$ 55,422	$ 49,744

The March 31, 2014 payment included $49,909 of dividends accrued as of December 31, 2013.

On July 30, 2014, the Company declared a quarterly cash dividend of $0.31 per share, payable on September 2, 2014 to shareholders of record as of August 11, 2014.

Accumulated Other Comprehensive Income (Loss)

The following table presents changes in accumulated other comprehensive income (loss) by component, net of tax, for the six months ended June 30, 2014 and 2013, respectively:

	Defined Benefit Plans				
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial Loss	Foreign Currency Translation	Total Accumulated Other Comprehensive Loss
Beginning balance at January 1, 2014	$ (69,711)	$ 713	$ 31,150	$ 3,213	$ (34,635)
Other comprehensive income (loss) before reclassifications	0	0	0	(104)	(104)
Amounts reclassified from accumulated other comprehensive income (loss)	0	83	(15)	0	68
Other comprehensive income (loss) for the period	0	83	(15)	(104)	(36)
Ending balance at June 30, 2014	$ (69,711)	$ 796	$ 31,135	$ 3,109	$ (34,671)
Beginning balance at January 1, 2013	$ (143,183)	$ 539	$ 22,239	$ 4,214	$ (116,191)
Other comprehensive income (loss) before reclassifications	0	0	0	(819)	(819)
Amounts reclassified from accumulated other comprehensive income (loss)	0	87	4,455	0	4,542
Other comprehensive income (loss) for the period	0	87	4,455	(819)	3,723
Ending balance at June 30, 2013	$ (143,183)	$ 626	$ 26,694	$ 3,395	$ (112,468)

The Company does not reclassify the amortization of defined benefit pension cost components from accumulated other comprehensive income (loss) directly to net income in its entirety. These accumulated other comprehensive income components are included in the computation of net periodic pension cost. (See Note 9)

Stock-Based Compensation

The Company has granted stock option and restricted stock unit awards to non-employee directors, officers and other key employees of the Company pursuant to the terms of its 2007 Omnibus Equity Compensation Plan (the "Plan"). As of June 30, 2014, a total of 8,797 shares were available for grant under the Plan. Shares issued under the Plan may be authorized-but-unissued shares of Company stock or reacquired shares of Company stock, including shares purchased by the Company on the open market for purposes of the Plan.

The Company recognizes compensation expense for stock awards over the vesting period of the award. The following table presents stock-based compensation expense recorded in operation and maintenance expense in the accompanying Consolidated Statements of Operations and Comprehensive Income for the three and six months ended June 30, 2014 and 2013:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Stock options	$ 702	$ 1,100	$ 1,357	$ 1,852
Restricted stock units	3,321	3,177	5,240	4,334
Employee stock purchase plan	148	143	285	276
Stock-based compensation in operation and maintenance expense	4,171	4,420	6,882	6,462
Income tax benefit	(1,627)	(1,724)	(2,684)	(2,520)
After-tax stock-based compensation expense	$ 2,544	$ 2,696	$ 4,198	$ 3,942

There were no significant stock-based compensation costs capitalized during the six months ended June 30, 2014 and 2013, respectively.

Stock Options

In the first six months of 2014, the Company granted non-qualified stock options to certain employees under the Plan. The stock options vest ratably over the three-year service period beginning January 1, 2014. These awards have no performance vesting conditions and the grant date fair value is amortized through expense over the requisite service period using the straight-line method.

The following table presents the weighted-average assumptions used in the Black-Scholes option-pricing model and the resulting weighted-average grant date fair value per share of stock options granted through June 30, 2014:

Dividend yield	2.55%
Expected volatility	17.75%
Risk-free interest rate	1.06%
Expected life (years)	3.6
Exercise price	$ 44.29
Grant date fair value per share	$ 4.57

Stock options granted under the Plan have maximum terms of seven years, vest over periods ranging from one to three years, and are granted with exercise prices equal to the market value of the Company's common stock on the date of grant. As of June 30, 2014, $2,971 of total unrecognized compensation cost related to the non-vested stock options is expected to be recognized over the weighted-average period of 1.5 years.

The table below summarizes stock option activity for the six months ended June 30, 2014:

	Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value
Options outstanding at January 1, 2014	2,055	$ 28.80		
Granted	491	44.29		
Forfeited or expired	(11)	37.32		
Exercised	(350)	25.95		
Options outstanding at June 30, 2014	2,185	$ 32.69	4.3	$ 36,614
Exercisable at June 30, 2014	1,320	$ 27.14	3.2	$ 29,454

The following table summarizes additional information regarding stock options exercised during the six months ended June 30, 2014 and 2013:

	2014	2013
Intrinsic value	$ 6,691	$ 9,246
Exercise proceeds	9,075	11,956
Income tax benefit	1,951	2,711

Restricted Stock Units

During 2011, the Company granted selected employees 189 restricted stock units with internal performance measures and, separately, certain market thresholds. These awards vested in January 2014. The terms of the grants specified that if certain performance on internal measures and market thresholds were achieved, the restricted stock units would vest; if performance were surpassed, up to 175% of the target awards would be distributed; and if performance thresholds were not met, awards would be cancelled. In January 2014, an additional 113 restricted stock units were granted and distributed because performance thresholds were exceeded.

In the first six months of 2014, the Company granted restricted stock units, both with and without performance conditions, to certain employees and non-employee directors under the Plan. The restricted stock units without performance conditions vest ratably over the three-year service period beginning January 1, 2014 and the restricted stock units with performance conditions vest ratably over the three-year performance period beginning January 1, 2014 (the "Performance Period"). Distribution of the performance shares is contingent upon the achievement of internal performance measures and, separately, certain market thresholds over the Performance Period. The restricted stock units granted with service-only conditions and those with internal performance measures are valued at the market value of the Company's common stock on the date of grant. The restricted stock units granted with market conditions are valued using a Monte Carlo model.

Weighted-average assumptions used in the Monte Carlo simulation are as follows for restricted stock units with market conditions granted through June 30, 2014:

Expected volatility	17.78%
Risk-free interest rate	0.75%
Expected life (years)	3

The grant date fair value of the restricted stock unit awards that vest ratably and have market and/or performance and service conditions is amortized through expense over the requisite service period using the graded-vesting method. Restricted stock units that have no performance conditions are amortized through expense over the requisite service period using the straight-line method. As of June 30, 2014, $9,529 of total unrecognized compensation cost related to the non-vested restricted stock units is expected to be recognized over the weighted-average remaining life of 1.2 years.

The table below summarizes restricted stock unit activity for the six months ended June 30, 2014:

	Shares	Weighted-Average Grant Date Fair Value (per share)
Non-vested total at January 1, 2014	539	$ 36.27
Granted	228	45.45
Performance share adjustment	113	30.34
Vested	(325)	31.77
Forfeited	(5)	39.44
Non-vested total at June 30, 2014	550	$ 41.48

The following table summarizes additional information regarding restricted stock units distributed during the six months ended June 30, 2014 and 2013:

	2014	2013
Intrinsic value	$ 14,266	$ 13,559
Income tax benefit	1,551	2,049

If dividends are paid with respect to shares of the Company’s common stock before the restricted stock units are distributed, the Company credits a liability for the value of the dividends that would have been paid if the restricted stock units were shares of Company common stock. When the restricted stock units are distributed, the Company pays the participant a lump sum cash payment equal to the value of the dividend equivalents accrued. The Company accrued dividend equivalents totaling $417 and $200 to retained earnings during the six months ended June 30, 2014 and 2013, respectively.

Employee Stock Purchase Plan

Under the Nonqualified Employee Stock Purchase Plan (the “ESPP”), employees can use payroll deductions to acquire Company stock at the lesser of 90% of the fair market value of (a) the beginning or (b) the end of each three-month purchase period. As of June 30, 2014, there were 1,310 shares of common stock reserved for issuance under the ESPP. During the six months ended June 30, 2014, the Company issued 53 shares under the ESPP.

Note 6: Long-Term Debt

The Company primarily issues long-term debt to fund capital expenditures at the regulated subsidiaries. The components of long-term debt are as follows:

	Rate	Weighted Average Rate	Maturity	June 30, 2014	December 31, 2013
Long-term debt of American Water Capital Corp. ("AWCC") (a)					
Private activity bonds and government funded debt					
Fixed rate	1.79%-6.75%	5.61%	2018-2040	$ 332,415	$ 330,732
Senior notes					
Fixed rate	3.85%-8.27%	5.69%	2016-2042	3,312,752	3,312,761
Long-term debt of other subsidiaries					
Private activity bonds and government funded debt					
Fixed rate	0.00%-6.20%	4.67%	2014-2041	869,476	863,716
Mortgage bonds					
Fixed rate	4.29%-9.71%	7.41%	2015-2039	676,500	676,500
Mandatorily redeemable preferred stock	8.47%-9.75%	8.61%	2019-2036	17,702	18,902
Capital lease obligations	12.17%	12.17%	2026	899	913
Long-term debt				5,209,744	5,203,524
Unamortized debt, net (b)				34,323	35,984
Interest rate swap fair value adjustment				4,471	4,724
Total long-term debt				$ 5,248,538	$ 5,244,232

(a) AWCC, which is a wholly-owned subsidiary of the Company, has a strong support agreement with its parent that, under certain circumstances, is the functional equivalent of a guarantee.

(b) Primarily fair value adjustments previously recognized in acquisition purchase accounting.

The Company issued the following long-term debt during 2014.

Company	Type	Rate	Maturity	Amount
Other subsidiaries (1)	Private activity bonds and government funded debt—fixed rate	0.00%-5.00%	2033	$ 9,977

(1) Issuance which was initially kept in Trust pending the Company's certification that it has incurred qualifying capital expenditures. This issuance has been presented as non-cash in the accompanying Consolidated Statements of Cash Flows.

The Company also assumed debt of $1,683 related to an acquisition in the second quarter of 2014.

The following long-term debt was retired through sinking fund payments and maturities during 2014:

Company	Type	Rate	Maturity	Amount
American Water Capital Corp.	Senior notes—fixed rate	6.00%	2039	$ 9
Other subsidiaries (1)	Private activity bonds and government funded debt—fixed rate	0.00%-5.25%	2014-2041	4,217
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments			14
Total retirements and redemptions				$ 5,440

(1) Includes $875 of non-cash defeasance via the use of restricted funds

Interest income included in interest, net is summarized below:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Interest income	$ 2,126	$ 2,845	$ 5,503	$ 5,680

The Company has an interest rate swap to hedge $100,000 of its 6.085% fixed-rate debt maturing 2017. The Company pays variable interest of six-month LIBOR plus 3.422%. The swap is accounted for as a fair-value hedge and matures with the fixed-rate debt in 2017.

The following table provides a summary of the derivative fair value balance recorded by the Company and the line item in the Consolidated Balance Sheets in which such amount is recorded:

Balance sheet classification	June 30, 2014	December 31, 2013
Regulatory and other long-term assets		
Other	$ 4,573	$ 4,776
Long-term debt		
Long-term debt	4,471	4,724

For derivative instruments that are designated and qualify as fair-value hedges, the gain or loss on the hedge instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current net income. The Company includes the gain or loss on the derivative instrument and the offsetting loss or gain on the hedged item in interest expense as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
Income statement classification	2014	2013	2014	2013
Interest, net				
Gain (loss) on swap	$ 174	$ (2,381)	$ (203)	$ (3,054)
Gain (loss) on borrowing	(75)	2,132	253	2,680
Hedge ineffectiveness	99	(249)	50	(374)

Note 7: Short-Term Debt

Short-term debt consists of commercial paper borrowings totaling $702,438 (net of discount of $69) at June 30, 2014 and $630,307 (net of discount of $193) at December 31, 2013. During the first six months of 2014, the Company borrowed $35,000 with maturities greater than three months, and repaid $35,000 and $221,000 borrowed in 2014 and 2013, respectively, with maturities greater than three months.

Note 8: Income Taxes

The Company’s estimated annual effective tax rate was 39.8% for the six months ended June 30, 2014 and June 30, 2013, excluding various discrete items.

The Company’s actual effective tax rates were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Actual effective tax rate	39.8%	39.6%	39.8%	38.1%

Included in 2013 are discrete items including $3,274 of tax benefits associated with an entity reorganization within the Company’s Market-Based Operations segment that allowed for the utilization of state net operating loss carryforwards and the release of a valuation allowance.

Current deferred tax assets increased in 2014 due to the expected utilization of certain tax attributes within the next 12 months.

Note 9: Pension and Other Postretirement Benefits

The following table provides the components of net periodic benefit costs:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Components of net periodic pension benefit cost				
Service cost	$ 7,944	$ 9,468	$ 15,887	$ 18,936
Interest cost	19,163	17,024	38,326	34,048
Expected return on plan assets	(23,710)	(22,107)	(47,419)	(44,214)
Amortization of:				
Prior service cost (credit)	181	181	362	362
Actuarial (gain) loss	(32)	9,292	(65)	18,585
Net periodic pension benefit cost	$ 3,546	$ 13,858	$ 7,091	$ 27,717
Components of net periodic other postretirement benefit cost				
Service cost	$ 2,765	$ 3,821	$ 5,529	$ 7,641
Interest cost	7,151	7,175	14,302	14,350
Expected return on plan assets	(6,875)	(7,571)	(13,750)	(15,142)
Amortization of:				
Prior service cost (credit)	(547)	(547)	(1,094)	(1,094)
Actuarial (gain) loss	(20)	2,782	(40)	5,564
Net periodic other postretirement benefit cost	$ 2,474	$ 5,660	$ 4,947	$ 11,319

The Company contributed $15,365 to its defined benefit pension plans in the first six months of 2014 and expects to contribute $22,100 during the balance of 2014. In addition, the Company contributed $6,068 for the funding of its other postretirement plans in the first six months of 2014 and expects to contribute $6,069 during the balance of 2014.

Note 10: Commitments and Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. At June 30, 2014, the Company has accrued approximately $1,700 as probable costs and it is reasonably possible that additional losses could range up to $31,400 for these matters. For certain matters, the Company is unable to estimate possible losses. The Company believes that damages or settlements recovered by plaintiffs in such claims or actions, if any, will not have a material adverse effect on the Company’s results of operations, financial position or cash flows, individually or in the aggregate.

The Company enters into agreements for the provision of services to water and wastewater facilities for the United States military, municipalities and other customers. The Company’s military services agreements expire between 2051 and 2064 and have remaining performance commitments as measured by estimated remaining contract revenue of $2,264,137 at June 30, 2014. The military contracts are subject to customary termination provisions held by the U.S. Federal Government prior to the agreed upon contract expiration. The Company’s Operations and Maintenance agreements with municipalities and other customers expire between 2014 and 2048 and have remaining performance commitments as measured by estimated remaining contract revenue of $920,680 at June 30, 2014. Some of the Company’s long-term contracts to operate and maintain a municipality’s, federal government’s or other party’s water or wastewater treatment and delivery facilities include responsibility for certain maintenance for some of those facilities, in exchange for an annual fee. Unless specifically required to perform certain maintenance activities, the maintenance costs are recognized when the maintenance is performed.

In addition to the reasonably possible amounts disclosed above, in September 2010, the Company declared an “impasse” in negotiations of its national benefits agreement with most of the labor unions representing employees in the Regulated Businesses. The prior agreement expired on July 31, 2010; however, negotiations did not produce a new agreement. The Company implemented its last, best and final offer on January 1, 2011 to enable the Company to provide health care coverage for its employees in accordance with terms of the offer. The unions challenged the Company’s right to implement its last, best, and final offer. In this regard, following the filing by the Utility Workers Union of America of an unfair labor practice charge, the National Labor Relations Board (“NLRB”) issued a complaint against the Company in January 2012, claiming that the Company implemented the last, best and final offer without providing sufficient notice of the existence of a dispute with the Federal Mediation and Conciliation Service, a state mediation agency, and several state departments of labor, in violation of Section 8(d)(3) of the National Labor Relations Act (the “NLRA”) and, therefore, the Company failed and refused to bargain with the union in violation of Sections 8(a)(1) and 8(a)(5) of the NLRA. The Company asserted that it did, in fact, provide sufficient notice under the circumstances pertaining to the negotiations.

On October 16, 2012, the NLRB Administrative Law Judge hearing the matter ruled that, although the Company did provide sufficient notification to the Federal Mediation and Conciliation Service, it did not provide notice to the state agencies, in violation of Section 8(d)(3) of the NLRA and, consequently, the Company violated Sections 8(a)(1) and 8(a)(5) of the NLRA. The Administrative Law Judge ordered, among other things, that the Company cease and desist from implementing the terms of its last, best and final offer without complying with the requirements of Section 8(d)(3) of the NLRA and make whole all affected employees for losses suffered as a result of the Company's implementation of its last, best and final offer.

In November 2012, the Company filed exceptions to the decision of the Administrative Law Judge in order to obtain a review by the full NRLB. The NLRB delegated its authority in the proceeding to a three member panel, which decided, on July 31, 2014, to affirm the Administrative Law Judge's decision and order, subject to certain modifications, including the requirement that in addition to lump sum awards to make whole all affected employees for losses suffered as a result of the Company's implementation of its last, best and final offer, the Company must compensate the affected employees for the adverse tax consequences, if any, of receiving the lump sum "make whole" payments.

On August 1, 2014, the Company filed an appeal of the NLRB's ruling with the United States Court of Appeals for the Seventh Circuit.

The "make whole" order, if upheld on appeal, would require the Company to provide back pay plus interest, from January 1, 2011 through the date of the final determination, as well as any applicable tax reimbursement. Based on current assumptions, the Company estimates that the cash impact could be up to the range of $3,500 to $4,500 per year (exclusive of any additional tax compensation payments), with the total impact dependent on the length of time the issue remains unresolved.

Note 11: Environmental Matters

The Company's water and wastewater operations are subject to federal, state, local and foreign requirements relating to environmental protection, and as such, the Company periodically becomes subject to environmental claims in the normal course of business. Environmental expenditures that relate to current operations or provide a future benefit are expensed or capitalized as appropriate. Remediation costs that relate to an existing condition caused by past operations are accrued, on an undiscounted basis, when it is probable that these costs will be incurred and can be reasonably estimated. Remediation costs accrued amounted to $2,200 and $3,300 at June 30, 2014 and December 31, 2013, respectively. The accrual relates to a conservation agreement entered into by a subsidiary of the Company with the National Oceanic and Atmospheric Administration ("NOAA") requiring the Company to, among other provisions, implement certain measures to protect the steelhead trout and its habitat in the Carmel River watershed in the state of California. The Company has agreed to pay $1,100 annually from 2010 through 2016. The Company pursues recovery of incurred costs through all appropriate means, including regulatory recovery through customer rates. The Company's regulatory assets at June 30, 2014 and December 31, 2013 include $7,645 and $8,027, respectively, related to the NOAA agreement.

Note 12: Earnings per Common Share

Earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security. The Company has participating securities related to restricted stock units, granted under the Company's 2007 Omnibus Equity Compensation Plan, that earn dividend equivalents on an equal basis with common shares. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities.

The following is a reconciliation of the Company’s net income and weighted-average common shares outstanding for calculating basic earnings per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
Basic	2014	2013	2014	2013
Net income	$ 109,299	$ 101,263	$ 177,422	$ 158,906
Less: Distributed earnings to common shareholders	55,647	49,913	105,775	49,922
Less: Distributed earnings to participating securities	17	22	32	22
Undistributed earnings	53,635	51,328	71,615	108,962
Undistributed earnings allocated to common shareholders	53,619	51,307	71,593	108,921
Undistributed earnings allocated to participating securities	16	21	22	41
Total income available to common shareholders, basic	$ 109,266	$ 101,220	$ 177,368	$ 158,843
Weighted-average common shares outstanding, basic	178,863	177,716	178,702	177,522
Basic net income per common share	$ 0.61	$ 0.57	$ 0.99	$ 0.89

Diluted earnings per common share is based on the weighted-average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents related to the restricted stock units, stock options, and employee stock purchase plan. The dilutive effect of the common stock equivalents is calculated using the treasury stock method and expected proceeds on vesting of the restricted stock units, exercise of the stock options and purchases under the employee stock purchase plan.

The following is a reconciliation of the Company’s net income and weighted-average common shares outstanding for calculating diluted earnings per share:

	Three Months Ended June 30,		Six Months Ended June 30,	
Diluted	2014	2013	2014	2013
Total income available to common shareholders, basic	$ 109,266	$ 101,220	$ 177,368	$ 158,843
Undistributed earnings for participating securities	16	21	22	41
Total income available to common shareholders, diluted	$ 109,282	$ 101,241	$ 177,390	$ 158,884
Weighted-average common shares outstanding, basic	178,863	177,716	178,702	177,522
Common stock equivalents:				
Restricted stock units	379	450	358	432
Stock options	449	742	451	760
Employee stock purchase plan	2	2	1	2
Weighted-average common shares outstanding, diluted	179,693	178,910	179,512	178,716
Diluted net income per common share	$ 0.61	$ 0.57	$ 0.99	$ 0.89

The following potentially dilutive common stock equivalents were not included in the earnings per share calculations because they were anti-dilutive:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2014	2013	2014	2013
Stock options	346	342	490	342
Restricted stock units where certain performance conditions were not met	80	149	80	149

Note 13: Fair Value of Assets and Liabilities

Fair Value of Financial Instruments

The Company used the following methods and assumptions to estimate its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported in the accompanying Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted prices in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs. The fair values of instruments classified as Level 2 and 3 are determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market rates. As a majority of the Company's debts do not trade in active markets, the Company calculated a base yield curve using a risk-free rate (a U.S. Treasury securities yield curve) plus a credit spread that is based on the following two factors: an average of the Company's own publicly-traded debt securities and the current market rates for U.S. Utility A- debt securities. The Company used these yield curve assumptions to derive a base yield for the Level 2 and Level 3 securities. Additionally, the Company adjusted the base yield for specific features of the debt securities including call features, coupon tax treatment and collateral for the Level 3 instruments.

The carrying amounts (including fair value adjustments previously recognized in acquisition purchase accounting) and fair values of the financial instruments are as follows:

		At Fair Value as of June 30, 2014			
Recurring Fair Value Measures	**Carrying Amount**	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 17,614	$ 0	$ 0	$ 22,594	$ 22,594
Long-term debt (excluding capital lease obligations)	5,230,028	2,414,488	1,492,834	2,198,648	6,105,970

		At Fair Value as of December 31, 2013			
Recurring Fair Value Measures	**Carrying Amount**	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 18,827	$ 0	$ 0	$ 22,795	$ 22,795
Long-term debt (excluding capital lease obligations)	5,224,492	2,263,355	1,462,404	2,057,506	5,783,265

Included in the long-term debt carrying amount above is a fair value adjustment related to the Company's interest rate swap fair value hedge, which is classified as Level 2 within the fair value hierarchy.

Recurring Fair Value Measurements

The following table presents assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy as of June 30, 2014 and December 31, 2013, respectively:

	At Fair Value as of June 30, 2014			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets				
Restricted funds	$ 41,184	$ 0	$ 0	$ 41,184
Rabbi trust investments	0	425	0	425
Deposits	1,123	0	0	1,123
Mark-to-market derivative asset	0	4,573	0	4,573
Total assets	42,307	4,998	0	47,305
Liabilities				
Deferred compensation obligation	0	11,297	0	11,297
Mark-to-market derivative liability	0	1,177	0	1,177
Total liabilities	0	12,474	0	12,474
Total net assets (liabilities)	$ 42,307	$ (7,476)	$ 0	$ 34,831

	At Fair Value as of December 31, 2013			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets				
Restricted funds	$ 29,259	$ 0	$ 0	$ 29,259
Rabbi trust investments	0	444	0	444
Deposits	1,901	0	0	1,901
Mark-to-market derivative asset	0	4,776	0	4,776
Total assets	31,160	5,220	0	36,380
Liabilities				
Deferred compensation obligation	0	11,928	0	11,928
Mark-to-market derivative liability	0	1,276	0	1,276
Total liabilities	0	13,204	0	13,204
Total net assets (liabilities)	$ 31,160	$ (7,984)	$ 0	$ 23,176

Restricted funds—The Company's restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operations and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred.

Rabbi trust investments—The Company's rabbi trust investments consist primarily of fixed income investments from which supplemental executive retirement plan benefits are paid. The Company includes these assets in other long-term assets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets.

Deferred compensation obligations—The Company's deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities. The value of the Company's deferred compensation obligations is based on the market value of the participants' notional investment accounts. The notional investments are comprised primarily of mutual funds, which are based on observable market prices.

Mark-to-market derivative asset and liability—The Company utilizes fixed-to-floating interest-rate swaps, typically designated as fair-value hedges, to achieve a targeted level of variable-rate debt as a percentage of total debt. The Company also employs derivative financial instruments in the form of variable-to-fixed interest rate swaps, classified as economic hedges, in order to fix the interest cost on some of its variable-rate debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

Note 14: Segment Information

The Company has two operating segments that are also the Company's two reportable segments, referred to as Regulated Businesses and Market-Based Operations. The following table includes the Company's summarized segment information:

	As of or for the Three Months Ended June 30, 2014			
	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 678,101	$ 85,403	$ (4,345)	$ 759,159

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements included in this Form 10-Q, other than statements of historical fact, may constitute forward-looking statements. Forward-looking statements can be identified by the use of words such as “may,” “should,” “will,” “could,” “estimates,” “predicts,” “potential,” “continue,” “anticipates,” “believes,” “plans,” “expects,” “future” and “intends” and similar expressions. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance to differ from those projected in the forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Factors that could cause or contribute to differences in results and outcomes from those in our forward-looking statements include, without limitation, those items discussed in the “Risk Factors” section or other sections in the Company’s annual report on Form 10-K (“Form 10-K”) for the year ended December 31, 2013 filed with the Securities and Exchange Commission (“SEC”). We undertake no obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

General

American Water Works Company, Inc. (herein referred to as “American Water” or the “Company”) is the largest investor-owned United States water and wastewater utility company, as measured both by operating revenue and population served. Our primary business involves the ownership of water and wastewater utilities that provide water and wastewater services to residential, commercial, industrial and other customers. Our Regulated Businesses that provide these services are generally subject to economic regulation by state regulatory agencies (“PUCs”) in the states in which they operate. We report the results of these businesses in our Regulated Businesses segment. We also provide services that are not subject to economic regulation by the PUCs. We report the results of these businesses in our Market-Based Operations segment. For further description of our businesses see Item 1, “Business,” in our Form 10-K for the year ended December 31, 2013.

You should read the following discussion in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Quarterly Report on Form 10-Q and in our Form 10-K for the year ended December 31, 2013.

Overview

Financial Results. For the three months ended June 30, 2014, we reported net income of $109.3 million, or diluted earnings per share (“EPS”) of $0.61, compared to $101.3 million, or diluted EPS of $0.57, for the comparable period in 2013. For the six months ended June 30, 2014, we reported net income of $177.4 million, or diluted EPS of $0.99 compared to $158.9 million, or diluted EPS of $0.89, for the comparable period in 2013

The primary factors contributing to the increase in net income for both the three and six months ended June 30, 2014 compared to the same periods in 2013 were favorable operating results from our Regulated Business segment despite higher costs resulting from the Freedom Industries chemical spill in West Virginia and higher customer uncollectible expense. Also contributing to the increase in net income for the year-to-date results was higher operating income from the Market-Based Operations segment and lower interest expense. For further details, see “Consolidated Results of Operations and Variances” and “Segment Results” below.

For 2014, our goals include actively addressing regulatory lag and promoting constructive regulatory frameworks, continuing to improve our regulated operation and maintenance (“O&M”) efficiency ratio, making efficient use of our capital and expanding both our Regulated Businesses segment through focused acquisitions and/or organic growth and our Market-Based Operations segment through core growth, expanding markets and new offerings. In addition, we will continue to focus on our customer service by achieving established customer satisfaction and service quality targets. Regarding environmental sustainability, we are committed to maximizing our protection of the environment, reducing our carbon and waste footprints and water lost through leakage.

In the second half of 2014, we expect to receive decisions on two general rate case proceedings, continue to file infrastructure surcharges either as part of our general rate case filings or in separate filings, and continue to pursue appropriate pass-through mechanisms for certain costs and forward-looking adjustments or mechanisms, including those that recognize declining usage.

The progress that we have made in the six months of 2014 with respect to certain of these objectives is described below.

Promoting Constructive Regulatory Frameworks. On April 1, 2014, the final $1.2 million of annualized revenues, previously approved by the New York State Public Service Commission in March of 2012, became effective. Also on April 1, 2014, additional annualized revenues of $0.2 million resulting from a New York infrastructure charge filing in January 2014 went into effect.

Effective April 15, 2014, additional annualized revenues of approximately $0.5 million attributable to alternative rate mechanisms including a Qualified Infrastructure Investment Program Rider, an Economic Development Investment Rider, a Safety and Environmental Compliance Rider and a Production Costs and Other Pass-through mechanism became effective for our Tennessee subsidiary.

New rates, which were approved for our Iowa subsidiary’s general rate case in February 2014, became effective on April 18, 2014. Additional annualized revenues as a result of this rate increase amounted to approximately $3.8 million. The increase includes approximately $2.7 million of interim rates that were effective May 10, 2013.

On May 30, 2014, annualized revenues of $3.7 million resulting from infrastructure charges in our Missouri subsidiary became effective.

The table below provides further details of annualized revenues, assuming a constant volume, resulting from rate authorizations granted in 2014:

	Annualized Rate Increases Granted	
	For the three months ended June 30, 2014	**For the six months ended June 30, 2014**
	(In millions)	
State		
General Rate Cases		
New York	$ 1.2	$ 1.2
Iowa	3.8	3.8
Total General Rate cases	$ 5.0	$ 5.0
Infrastructure charges		
New York	$ 0.2	$ 1.8
New Jersey	—	10.1
Missouri	3.7	3.7
Illinois	—	2.1
Tennessee	0.5	0.5
Total Infrastructure charges	$ 4.4	$ 18.2

On July 1, 2014, additional annualized revenue of $7.4 million resulting from infrastructure charges in our New Jersey subsidiary became effective.

In July 2014, a settlement with the Office of Ratepayer Advocates and other interveners was reached in our general rate case in California. The settlement, if approved, would provide $13.6 million in additional annualized revenues for 2015. The settlement also provides for escalation and attrition adjustments in 2016 and 2017 of $5.0 million and $6.3 million, respectively. The agreement is pending regulatory approval and is subject to change.

As of August 4, 2014, we are awaiting final orders for general rate cases in two states, including California, requesting additional annualized revenue of approximately $52.0 million. There is no assurance that all, or any portion, of these requested increases will be granted.

Continuing Improvement in O&M Efficiency Ratio for our Regulated Businesses. Our O&M efficiency ratio (a non-GAAP measure) is calculated on our Regulated Businesses’ operations and is defined as operation and maintenance expense divided by operating revenues where both O&M and operating revenues are adjusted to eliminate the impact of purchased water. We also exclude the allocable portion of non-O&M support services costs, mainly depreciation and general taxes that are reflected in the Regulated Businesses segment as O&M costs but for consolidated financial reporting purposes are categorized within other line items in the Statement of Operations. Our O&M efficiency ratio was 37.5% for the three months ended June 30, 2014, compared to 38.1% for the three months ended June 30, 2013. Our O&M efficiency ratio was 39.4% for the six months ended June 30, 2014, compared to 40.4% for the six months ended June 30, 2013. The change in our 2014 O&M efficiency ratio for both the three and six months ended June, 2014 was primarily attributable to the increase in our Regulated Businesses' revenue.

We evaluate our operating performance using this measure because management believes it is a direct measure of the efficiency of our Regulated Businesses' operations. This information is intended to enhance an investor's overall understanding of our operating performance. The O&M efficiency ratio is not a measure defined under GAAP and may not be comparable to other companies' operating measures and should not be used in place of the GAAP information provided elsewhere in this report. The following table provides a reconciliation that compares O&M and operating revenues, as determined in accordance with GAAP, to those amounts utilized in the calculation of our O&M efficiency ratio for the three and six months ended June 30, 2014 as compared to the same periods in 2013:

Regulated O&M Efficiency Ratio (a Non-GAAP Measure):

	For the three months ended June 30,		For the six months ended June 30,	
	2014	2013	2014	2013
	(In thousands)			
Total O&M	$ 342,974	$ 323,320	$ 672,249	$ 635,523
Less:				
O&M—Market-Based Operations	70,440	64,122	136,280	123,346
O&M—Other	(11,587)	(13,093)	(25,979)	(29,056)
Total Regulated O&M	284,121	272,291	561,948	541,233
Less:				
Regulated purchased water expense	32,576	26,819	59,658	50,803
Allocation of internal O&M	9,544	8,590	19,536	18,144
Adjusted Regulated O&M (a)	$ 242,001	$ 236,882	$ 482,754	$ 472,286
Total Operating Revenues	$ 759,159	$ 724,265	$ 1,441,105	$ 1,360,402
Less:				
Operating revenues—Market-Based Operations	85,403	80,755	164,201	148,091
Operating revenues—Other	(4,345)	(4,387)	(8,841)	(8,823)
Total Regulated operating revenues	678,101	647,897	1,285,745	1,221,134
Less: Regulated purchased water expense*	32,576	26,819	59,658	50,803
Adjusted Regulated operating revenues (b)	$ 645,525	$ 621,078	$ 1,226,087	$ 1,170,331
Regulated O&M efficiency ratio (a)/(b)	37.5%	38.1%	39.4%	40.4%

* Calculation assumes purchased water revenues are equal to purchased water expenses.

Making Efficient Use of Capital. We made capital investments of approximately $212.7 million and $387.9 million during the three months and six months ended June 30, 2014, respectively. Of this total year-to-date investment, approximately $383.6 million was for Company-funded capital improvements with the remaining $4.3 million for the acquisition of regulated water and/or wastewater systems. For the full-year of 2014, we continue to estimate our total capital plan to be up to $1.1 billion, with approximately $900 million to $1.0 billion allocated to upgrading our infrastructure and systems and $35 to $100 million for acquisitions and strategic investment purposes.

Expanding Markets and Developing New Offerings. During the six months ended June 30, 2014, our Regulated Businesses completed the purchase of four regulated water systems and one regulated water and wastewater system. These acquisitions added approximately 1,200 water customers and 370 wastewater customers to our regulated operations. Also, as previously announced, in January 2014, our Military Services Group within our Market-Based Operations segment was awarded a contract for ownership, operation and maintenance of the water and wastewater systems at Hill Air Force Base in Utah. Additionally, in the first half of 2014 our Homeowner Services Group ("HOS") expanded its water and sewer line protection programs into Arkansas, Louisiana, Maine, Minnesota, Oklahoma, Vermont and Wyoming.

Other Matters.

West Virginia Freedom Industries Chemical Spill. As noted in the Form 10-K for the year ended December 31, 2013, on January 9, 2014, a chemical storage tank owned by Freedom Industries, Inc. leaked 4-methylcyclohexane methanol, or MCHM, and PPH/DiPHH, a mix of polyglycol ethers, into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant in Charleston, West Virginia. As a result of this event, income before income taxes was reduced by $5.0 million and $10.9 million for the three and six months ended June 30, 2014, respectively.

See Part II, Item 1, “Legal Proceedings” in this report for information regarding litigation and an investigation by the Public Service Commission of West Virginia relating to the Freedom Industries chemical spill. The Company and WVAWC believe that WVAWC has responded appropriately to, and has no responsibility for, the Freedom Industries chemical spill, and the Company, WVAWC and other Company-affiliated entities named in any of the lawsuits have valid, meritorious defenses to the lawsuits. The Company, WVAWC and the other Company affiliates intend to vigorously contest the lawsuits. Nevertheless, an adverse outcome in one or more of the lawsuits could have a material adverse effect on the Company's financial condition, results of operations, cash flows, liquidity and reputation. Moreover, WVAWC and the Company are unable to predict the outcome of the ongoing government investigations or any legislative initiatives that might affect water utility operations.

Labor Dispute Regarding National Benefits Agreement. In September 2010, the Company declared an “impasse” in negotiations of its national benefits agreement with most of the labor unions representing employees in the Regulated Businesses. The prior agreement expired on July 31, 2010; however, negotiations did not produce a new agreement. The Company implemented its last, best and final offer on January 1, 2011 to enable the Company to provide health care coverage for its employees in accordance with terms of the offer. The unions challenged the Company’s right to implement its last, best, and final offer. In this regard, following the filing by the Utility Workers Union of America of an unfair labor practice charge, the National Labor Relations Board (“NLRB”) issued a complaint against the Company in January 2012, claiming that the Company implemented the last, best and final offer without providing sufficient notice of the existence of a dispute with the Federal Mediation and Conciliation Service, a state mediation agency, and several state departments of labor, in violation of Section 8(d)(3) of the National Labor Relations Act (the “NLRA”) and, therefore, the Company failed and refused to bargain with the union in violation of Sections 8(a)(1) and 8(a)(5) of the NLRA. The Company asserted that it did, in fact, provide sufficient notice under the circumstances pertaining to the negotiations.

On October 16, 2012, the NLRB Administrative Law Judge hearing the matter ruled that, although the Company did provide sufficient notification to the Federal Mediation and Conciliation Service, it did not provide notice to the state agencies, in violation of Section 8(d)(3) of the NLRA and, consequently, the Company violated Sections 8(a)(1) and 8(a)(5) of the NLRA. The Administrative Law Judge ordered, among other things, that the Company cease and desist from implementing the terms of its last, best and final offer without complying with the requirements of Section 8(d)(3) of the NLRA and make whole all affected employees for losses suffered as a result of the Company’s implementation of its last, best and final offer.

In November 2012, the Company filed exceptions to the decision of the Administrative Law Judge in order to obtain a review by the full NRLB. The NLRB delegated its authority in the proceeding to a three member panel, which decided, on July 31, 2014, to affirm the Administrative Law Judge’s decision and order, subject to certain modifications, including the requirement that in addition to lump sum awards to make whole all affected employees for losses suffered as a result of the Company’s implementation of its last, best and final offer, the Company must compensate the affected employees for the adverse tax consequences, if any, of receiving the lump sum “make whole” payments.

On August 1, 2014, the Company filed an appeal of the NLRB’s ruling with the United States Court of Appeals for the Seventh Circuit.

The “make whole” order, if upheld on appeal, would require the Company to provide back pay plus interest, from January 1, 2011 through the date of the final determination, as well as any applicable tax reimbursement. Based on current assumptions, the Company estimates that the cash impact could be up to the range of $3.5 million to $4.5 million per year (exclusive of any additional tax compensation payments), with the total impact dependent on the length of time the issue remains unresolved.

Consolidated Results of Operations and Changes from Prior Periods

	Three Months Ended June 30,			Six Months Ended June 30,		
	2014	2013	Favorable (Unfavorable) Change	2014	2013	Favorable (Unfavorable) Change

The following is a discussion of the consolidated results of operations for the three and six months ended June 30, 2014 compared to the three and six months ended June 30, 2013:

Three Months Ended June 30, 2014 Compared to Three Months Ended June 30, 2013

Operating revenues. Consolidated operating revenues for the three months ended June 30, 2014 increased $34.9 million, or 4.8%, compared to the same period in 2013. The increase is the result of higher revenues in our Regulated Businesses segment of $30.2 million, which is mainly attributable to rate increases, incremental revenues from surcharges, amortization of balancing accounts and acquisitions. Also, contributing to the higher revenues was a $4.6 million increase in our Market-Based Operations segment primarily due to incremental revenue from our military contracts as a result of increased construction type projects at Forts Polk and Leavenworth as well as contract growth in our HOS. For further information, see the respective "Operating Revenues" discussions within the "Segment Results."

Operation and maintenance. Consolidated O&M for the three months ended June 30, 2014 increased by $19.7 million, or 6.1%, compared to the same period in 2013. The variance is primarily due to higher O&M costs in our Regulated Businesses segment of $11.8 million, principally due to increased production costs, uncollectible expense, maintenance and costs associated with the Freedom Industries chemical spill in West Virginia, partially offset by lower employee-related costs. Additionally, our Market-Based Operations segment O&M increased by $6.3 million mainly as a result of incremental cost related to increased activity in our military contracts, corresponding with the increased revenue. For further discussions on the changes in our Regulated and Market-Based segments' O&M, see the respective "Operation and Maintenance" discussions within the "Segment Results."

Depreciation and amortization. Depreciation and amortization expense increased by $4.5 million, or 4.4%, for the three months ended June 30, 2014, compared to the same period in the prior year principally as a result of additional utility plant placed in service, including our Customer Information and Enterprise Asset Management systems that went into service during the second and fourth quarters of 2013.

Other income (expenses). Other expenses decreased by $1.9 million, or 2.5%, for the three months ended June 30, 2014, compared to the same period in the prior year. The change is primarily due to a reduction in interest expense resulting from interest savings as a result of our 2013 refinancings, offset by a reduction in AFUDC which is mainly attributable to our Customer Information and Enterprise Asset Management systems being placed into service in the second and fourth quarters of 2013.

Provision for income taxes. Our consolidated provision for income taxes increased $5.7 million, or 8.6%, to $72.2 million for the three months ended June 30, 2014. The effective tax rates for the three months ended June 30, 2014 and 2013 were 39.8% and 39.6%, respectively.

Six Months Ended June 30, 2014 Compared to Six Months Ended June 30, 2013

Operating revenues. Consolidated operating revenues for the six months ended June 30, 2014 increased $80.7 million, or 5.9%, compared to the same period in 2013. The increase is the result of higher revenues in our Regulated Businesses segment of $64.6 million, which is mainly attributable to rate increases, incremental revenues from surcharges and amortization of balancing accounts as well as increased usage. Also contributing to the higher revenues was a $16.1 million increase in our Market-Based Operations segment primarily due to incremental revenue from our military contracts as a result of increased construction type projects at Forts Belvoir, Polk and Leavenworth and contract growth in our HOS. For further information, see the respective “Operating Revenues” discussions within the “Segment Results.”

Operation and maintenance. Consolidated O&M for the six months ended June 30, 2014 increased by $36.7 million, or 5.8%, compared to the same period in 2013. The variance is primarily due to higher O&M costs in our Regulated Businesses segment of $20.7 million, principally due to increased production costs, uncollectible expense, maintenance and costs associated with the Freedom Industries chemical spill in West Virginia, partially offset by lower employee-related costs. The variance in our Market-Based Operations segment of $12.9 million was mainly from incremental costs related to increased activity in our military contracts, corresponding with the increased revenue. For further discussions on the changes in our Regulated and Market-Based segments’ O&M, see the respective “Operation and Maintenance” discussions within the “Segment Results.”

Depreciation and amortization. Depreciation and amortization expense increased by $10.9 million, or 5.4%, for the six months ended June 30, 2014, compared to the same period in the prior year principally as a result of additional utility plant placed in service, including our Customer Information and Enterprise Asset Management systems that went into service during the second and fourth quarters of 2013.

Other income (expenses). Other expenses decreased by $4.2 million, or 2.8%, for the six months ended June 30, 2014, compared to the same period in the prior year. The change is primarily due to a reduction in interest expense resulting from interest savings as a result of our 2013 refinancings, offset by a reduction in AFUDC which is mainly attributable to our Customer Information and Enterprise Asset Management systems being placed into service in the second and fourth quarters of 2013.

Provision for income taxes. Our consolidated provision for income taxes increased $19.4 million, or 19.9%, to $117.1 million for the six months ended June 30, 2014. The effective tax rates for the six months ended June 30, 2014 and 2013 were 39.8% and 38.1%, respectively. The 2013 rate included a $3.3 million tax benefit associated with a legal structure reorganization in our Market-Based Operations segment. This strategic restructuring allowed us to utilize state net operating loss carryforwards prior to their expiration.

Segment Results

We have two operating segments that are also our reportable segments: the Regulated Businesses and the Market-Based Operations. We evaluate the performance of our segments and allocate resources based on several factors, with the primary measure being income before income taxes.

Regulated Businesses Segment

The following table summarizes certain financial information for our Regulated Businesses for the periods indicated:

	For the three months ended June 30,			For the six months ended June 30,		
	2014	**2013**	**Increase (Decrease)**	**2014**	**2013**	**Increase (Decrease)**
			(In thousands)			
Operating revenues	$ 678,101	$ 647,897	$ 30,204	$ 1,285,745	$ 1,221,134	$ 64,611
Operation and maintenance expense	284,121	272,291	11,830	561,948	541,233	20,715
Operating expenses, net	435,429	419,517	15,912	867,386	835,033	32,353
Income before income taxes	182,418	170,007	12,411	297,446	268,788	28,658

Operating revenues. Our primary business involves the ownership of water and wastewater utilities that provide services to residential, commercial, industrial and other customers. This business generally is subject to PUC economic regulation, and our results of operations are impacted significantly by rates authorized by the PUCs in the states in which we operate.

Operating revenues increased by $30.2 million, or 4.7%, for the three months ended June 30, 2014, as compared to the same period in 2013. The increase in revenues is principally due to incremental revenues of approximately $20.8 million attributable to rate increases from rate authorizations for a number of our operating companies; approximately $1.4 million resulting from higher consumption, $3.1 million due to increased surcharges and amortization of balancing accounts and approximately $3.5 million attributable to acquisitions, most of which occurred in the second half of 2013. The most significant contributor to the increase in revenues from acquisitions was Dale Service Corporation (“Dale”), which was acquired by our Virginia subsidiary in the fourth quarter of 2013.

Operating revenues increased by $64.6 million, or 5.3%, for the six months ended June 30, 2014, as compared to the same period in 2013. The increase in revenues is principally due to incremental revenues of approximately $40.6 million attributable to rate increases from rate authorizations for a number of our operating companies; $8.4 million due to increased surcharges and amortization of balancing accounts; approximately $7.2 million from higher consumption and $6.8 million as a result of 2013 acquisitions. The most significant contributor to the increase in revenues from acquisitions was Dale. The following table provides information regarding the Regulated Businesses' for the periods indicated:

	For the three months ended June 30,							
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage

Other revenues	24,332	22,177	2,155	9.7%				
	$1,285,745	$1,221,134	$ 64,611	5.3%				

Water Services – Water service operating revenues for the three months ended June 30, 2014 totaled $639.3 million, a $22.6 million increase, or 3.7%, over the same period of 2013. For the six months ended June 30, 2014, these revenues increased $56.0 million, or 4.8%, compared to the six months ended June 30, 2013. As described above, the increases for both the three and six months ended June 30, 2014 are primarily due to rate increases, higher consumption and incremental revenues associated with surcharges and amortization of balancing accounts. Also, it should be noted that the mix between billed revenues and unbilled revenues for the six months ended June 30, 2014, as compared to the same period in 2013, has changed. This change is principally the result of the implementation of our Customer Information System ("CIS") as part of Phase II of our business transformation project. At December 31, 2013, unbilled revenues were significantly higher than historical levels due to billing delays in certain accounts. During the first quarter of 2014, we addressed a majority of these delayed billings. Therefore, as a result, the change in unbilled water revenue for the first six months of 2014, compared to the same period in 2013, has decreased by $21.0 million with a corresponding increase in billed revenues.

Wastewater services – Our subsidiaries provide wastewater services in ten states. Revenues from these services increased $3.9 million, or 19.2%, and $6.4 million, or 16.0%, for the three and six months ended June 30, 2014, respectively, compared to the same periods in 2013. The increase is primarily attributable to the Dale acquisition in the fourth quarter of 2013.

Other revenues – The increase in the other revenues for the three and six months ended June 30, 2014 is principally due to $2.4 million in insurance proceeds for business interruption as a result of Hurricane Sandy and an increase in late payment fees.

Operation and maintenance expense. Operation and maintenance expense increased $11.8 million, or 4.3%, and $20.7 million, or 3.8%, for the three and six months ended June 30, 2014, respectively, compared to the same periods in 2013.

The following table provides information regarding operation and maintenance expense for the three and six months ended June 30, 2014 and 2013, by major expense category:

	For the three months ended June 30,				For the six months ended June 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Production costs	$ 74,141	$ 65,155	$ 8,986	13.8%	$ 143,400	$ 125,605	$ 17,795	14.2%
Employee-related costs	107,599	115,283	(7,684)	(6.7%)	214,780	228,484	(13,704)	(6.0%)
Operating supplies and services	53,991	55,423	(1,432)	(2.6%)	110,256	109,783	473	0.4%
Maintenance materials and supplies	17,713	14,097	3,616	25.7%	38,160	32,376	5,784	17.9%
Customer billing and accounting	16,082	12,015	4,067	33.8%	29,287	22,187	7,100	32.0%
Other	14,595	10,318	4,277	41.5%	26,065	22,798	3,267	14.3%
Total	$ 284,121	$ 272,291	$ 11,830	4.3%	$ 561,948	$ 541,233	$ 20,715	3.8%

Production costs by major expense type were as follows:

	For the three months ended June 30,				For the six months ended June 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Purchased Water	$ 32,576	$ 26,819	$ 5,757	21.5%	$ 59,658	$ 50,803	$ 8,855	17.4%
Fuel and Power	21,217	20,259	958	4.7%	45,135	40,237	4,898	12.2%
Chemicals	12,127	11,330	797	7.0%	22,795	21,934	861	3.9%
Waste Disposal	8,221	6,747	1,474	21.8%	15,812	12,631	3,181	25.2%
Total	$ 74,141	$ 65,155	$ 8,986	13.8%	$ 143,400	$ 125,605	$ 17,795	14.2%

Production costs increased overall by $9.0 million, or 13.8%, and $17.8 million, or 14.2%, for the three and six months ended June 30, 2014, respectively, compared to the same periods in the prior year. The purchased water increases principally reflect increased prices in our California subsidiary. Fuel and power costs increased due to increased customer demand and higher supplier prices in several of our operating facilities as well as incremental costs as a result of the Dale acquisition in the fourth quarter of 2013. The increase in waste disposal costs for both the three and six month periods is principally due to an increase in the amount allowed by a cost recovery mechanism in one of our operating companies and the Dale acquisition. Also, contributing to the six month increase was incremental costs associated with the Freedom Industries chemical spill in West Virginia.

Employee-related costs, including salaries and wages, group insurance and pension expense, decreased $7.7 million, or 6.7%, and $13.7 million, or 6.0%, for the three and six months ended June 30, 2014, respectively, compared to the prior year periods. These employee-related costs represent approximately 38% and 42% of operation and maintenance expense for the three and six months ended June 30, 2014 and 2013, respectively.

The following table provides information with respect to components of employee-related costs for the three and six months ended June 30, 2014 and 2013:

	For the three months ended June 30,				For the six months ended June 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
				(Dollars in thousands)				
Salaries and wages	$ 82,568	$ 81,561	$ 1,007	1.2%	$ 163,651	$ 160,406	$ 3,245	2.0%
Pensions	6,800	12,257	(5,457)	(44.5%)	13,620	24,628	(11,008)	(44.7%)
Group insurance	13,765	16,803	(3,038)	(18.1%)	28,130	33,647	(5,517)	(16.4%)
Other benefits	4,466	4,662	(196)	(4.2%)	9,379	9,803	(424)	(4.3%)
Total	$ 107,599	$ 115,283	$ (7,684)	(6.7%)	$ 214,780	$ 228,484	$ (13,704)	(6.0%)

The overall decrease in employee-related costs for the three and six months ended June 30, 2014, compared to the same periods in 2013, was primarily due to a reduction in pension costs and postretirement benefit costs, which affects our group insurance expenses. These decreases are principally due to the change in assumptions used for the discount rate, which in turn results in decreased contributions. The decrease in contributions occurred principally at those of our regulated operating companies whose costs are recovered based on our funding policy, which is to fund at least the minimum amount required by the Employee Retirement Income Security Act of 1974. Partially offsetting these decreases was an increase in salaries and wages expense for the three and six months ended June 30, 2014, compared to the same periods in 2013. For the three month period, the increase is the result of severance-related costs and annual wage increases offset by higher capitalization rates as a result of increased capital projects. For the six month period, the increase is the result of severance-related costs, annual wage increases and increased overtime expense attributable to an increased number of main breaks as a result of the harsh winter weather conditions, offset by a reduction in incentive compensation due to a lower than expected payout for the 2013 incentive period as well as higher capitalization rates as a result of increased capital projects.

Operating supplies and services include expenses of office operation, legal and other professional services, transportation expenses, information systems and other office equipment rental charges. These costs decreased $1.4 million, or 2.6%, for the three months ended June 30, 2014 and increased $0.5 million, or 0.4%, for the six months ended June 30, 2014. The overall decrease for the three month period was primarily due to lower contracted services as 2013 included additional costs, mainly as a result of backfilling positions; the use of contractors for certain projects; and incremental costs attributable to the continued maturity of our Enterprise Resource Planning systems in conjunction with the implementation of our business transformation project. Partially offsetting the aforementioned favorability for the six month period was increased costs for our West Virginia subsidiary associated with the Freedom Industries chemical spill which occurred in January 2014.

Maintenance materials and supplies, which include preventive maintenance and emergency repair costs, increased $3.6 million, or 25.7%, for the three months ended June 30, 2014, compared to the same period in 2013, mainly due to increased tank painting in our New Jersey subsidiary and higher paving and backfilling expenses throughout our operating areas. The increase of $5.8 million, or 17.9%, for the six months ended June 30, 2014, compared to the same period in 2013, is primarily due to the increase in tank painting and increases in paving and backfilling, and other repair costs, most of which is from the higher than normal main breaks in the first quarter of 2014 due to the abnormally harsh winter weather conditions experienced throughout our operating areas.

Customer billing and accounting expenses, which include uncollectible accounts expense, postage and other customer related expenses, increased $4.1 million, or 33.8%, and $7.1 million or 32.0%, respectively, for the three and six months ended June 30, 2014, compared to the same periods in the prior year. These increases are primarily due to incremental uncollectible expense associated with an increase in customer accounts receivable attributable to the overall aging of receivables as well as rate increases. We believe the aging of our receivables is the result of temporary changes made in our collection process with the implementation of our new Customer Information System in 2013. Although we anticipate uncollectible expense will continue to be higher this year, we expect the impact will lesson as our collection activities return to historical levels.

Other operation and maintenance expense includes casualty and liability insurance premiums and regulatory costs. The increase in casualty and liability insurance for the three and six months ended June 30, 2014 was primarily due to an increase in our expected retroactive premiums, principally due to incremental claims associated with the Freedom Industries chemical spill in West Virginia, net of favorable forecasted experience for already existing claims. These retroactive premiums are based upon current facts and circumstances of the outstanding claims and are subject to change as the claims mature. The increase in insurance costs is partially offset by lower regulatory expenses in one of our operating subsidiaries compared to the same periods in the prior year.

Operating expenses. The increase in operating expenses, for the three and six months ended June 30, 2014, is principally due to the increase in operation and maintenance expense explained above and higher depreciation and amortization expense of $4.7 million and $11.6 million for the three and six months ended June 30, 2014, respectively. The increase in depreciation and amortization is primarily due to additional utility plant placed in service, including our SAP Customer Information System and Enterprise Asset Management system.

Market-Based Operations

The following table provides financial information for our Market-Based Operations segment for the periods indicated:

	For the three months ended June 30,			For the six months ended June 30,		
	2014	2013	Increase (Decrease)	2014	2013	Increase (Decrease)
		(In thousands)				
Operating revenues	$ 85,403	$ 80,755	$ 4,648	$ 164,201	$ 148,091	$ 16,110
Operation and maintenance expense	70,440	64,122	6,318	136,280	123,346	12,934
Operating expenses, net	73,033	67,321	5,712	141,845	129,702	12,143
Income before income taxes	12,968	14,207	(1,239)	23,599	19,878	3,721

Operating revenues. Revenues for the three and six months ended June 30, 2014 increased $4.6 million and $16.1 million, respectively, compared to the same periods in 2013, as a result of incremental revenues in our Contract Operations Group (“ConOp”) and HOS lines of business. For the three and six months ended June 30, 2014, our ConOp’s revenue increased $2.3 million and $9.9 million, respectively. These increases are primarily related to additional revenues from capital project activities associated with our military contracts partially offset by price redeterminations received in 2013 for three of our military contracts totaling $2.3 million as well as a reduction in revenues attributable to terminated municipal and industrial operations and maintenance contracts. HOS revenues increased $3.8 million and $9.0 million for the three and six months ended June 30, 2014, respectively. This increase was principally the result of contract growth, mainly with our New York City contracts as well as expansion into other geographic areas, and price increases for certain existing customers.

Operation and maintenance. Operation and maintenance expense increased $6.3 million, or 9.9%, and $12.9 million, or 10.5%, for the three and six months ended June 30, 2014, respectively.

The following table provides information regarding categories of operation and maintenance expense for the periods indicated:

	For the three months ended June 30,				For the six months ended June 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
				(Dollars in thousands)

Maintenance materials and supplies	11,099	10,212	887	8.7%	22,602	20,798	1,804	8.7%
Other	1,247	1,182	65	5.5%	3,265	1,960	1,305	66.6%
Total	$ 70,440	$ 64,122	$ 6,318	9.9%	$ 136,280	$ 123,346	$ 12,934	10.5%

As noted in the table above, the primary factor contributing to the overall increase was an increase in operating supplies and services. This increase is mainly attributable to the increase in construction project activities for our military contracts and corresponds with the incremental revenues.

Operating expense. The changes in operating expenses for the three and six months ended June 30, 2014, compared to the same period in 2013, are primarily due to the variances in the operation and maintenance expense explained above.

Liquidity and Capital Resources

For a general overview of our sources and uses of capital resources, see the introductory discussion under “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources,” contained in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2013.

We rely on our revolving credit facility, the capital markets and our cash flows from operations to fulfill our short-term liquidity needs, to issue letters of credit and to support our commercial paper program. We fund liquidity needs for capital investment, working capital and other financial commitments through cash flows from operations, public and private debt offerings, commercial paper markets and, to the extent necessary, our revolving credit facility. We regularly evaluate the capital markets and closely monitor the financial condition of the financial institutions with contractual commitments in the revolving credit facility.

In order to meet our short-term liquidity needs, we, through AWCC, our financing subsidiary, issue commercial paper, which is supported by the revolving credit facility. The revolving credit facility is also used, to a limited extent, to support our issuance of letters of credit and, from time to time, for direct borrowings. As of June 30, 2014, AWCC had no outstanding borrowings and $40.0 million of outstanding letters of credit under the revolving credit facility. As of June 30, 2014, AWCC had $1.2 billion available under the credit facility that we can use to fulfill our short-term liquidity needs, to issue letters of credit and support our $702.4 million outstanding commercial paper. We can provide no assurances that our lenders will meet their existing commitments or that we will be able to access the commercial paper or loan markets in the future on terms acceptable to us or at all.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the third quarter of each fiscal year. Cash flows from operating activities for the six months ended June 30, 2014 were $450.6 million compared to $290.2 million for the six months ended June 30, 2013.

The following table provides a summary of the major items affecting our cash flows from operating activities for the six months ended June 30, 2014 and 2013:

	Six Months Ended June 30,	
	2014	**2013**
	(In thousands)	
Net income	$ 177,422	$ 158,906
Add (subtract):		
Non-cash activities (1)	371,045	329,592
Changes in working capital (2)	(76,419)	(138,808)
Pension and postretirement healthcare contributions	(21,433)	(59,493)
Net cash flows provided by operations	$ 450,615	$ 290,197

(1) Includes depreciation and amortization, provision for deferred income taxes, amortization of deferred investment tax credits, provision for losses on accounts receivable, allowance for other funds used during construction, (gain) loss on asset dispositions and purchases, pension and non-pension postretirement benefits expense, stock-based compensation expense and other non-cash items. Details of each component can be found in the Consolidated Statements of Cash Flows.

(2) Changes in working capital include changes to receivables and unbilled utility revenue, taxes receivable including income taxes, other current assets, accounts payable, taxes accrued (including income taxes), interest accrued, change in book overdraft and other current liabilities.

Our working capital needs are primarily limited to funding the increase in our customer accounts receivable and unbilled revenues which is mainly associated with the revenue increase as a result of rate increases in our Regulated Businesses segment. We address this timing issue through the aforementioned liquidity funding mechanisms. Our cash collections for our Regulated Businesses' accounts receivable, some of which were unbilled as December 31, 2013, showed improvement during the first half of 2014 compared to the second half of 2013. In the second half of 2013, the rate of cash collections, particularly in those states in which we implemented CIS in the second quarter of 2013, were slower than historical payment patterns. We believe this degradation in cash collections to be a result of certain process decisions, made as part of the CIS implementation, including the manual validation of bills prior to mailing to customers and decreased collection efforts. Therefore, we believe this situation to be only temporary in nature. Although cash collections increased during the first and second quarters of 2014, there are no assurances that the rate of cash collections will continue or be consistent with previous historical collection patterns.

The increase in cash flows from operating activities during the six months ended June 30, 2014 as compared to the same period in 2013 reflects higher net income adjusted for non-cash activities, changes in working capital and a reduction in pension and postretirement benefit contributions. The increase in working capital for the six months ended June 30, 2014 compared to the same period in the prior year is principally the result of increased processing of payments, accounts payable and accrued expenses in the first quarter of 2013, which was attributed to delays in payment of vendor invoices in the latter portion of 2012 as a result of the implementation of Phase I of our business transformation project.

Cash Flows from Investing Activities

The following table provides information regarding cash flows used in investing activities for the periods indicated:

	Six Months Ended June 30,	
	2014	2013
	(In thousands)	
Net capital expenditures	$ (401,781)	$ (429,830)
Proceeds from sale of assets and securities	665	580
Acquisitions	(2,869)	(4,602)
Other investing activities, net (1)	(34,189)	(25,535)
Net cash flows used in investing activities	$ (438,174)	$ (459,387)

(1) Includes removal costs from property, plant and equipment retirements, net and net funds released.

Cash flows used in investing activities for the six months ended June 30, 2014 was $438.1 million compared to $459.4 million for the six months ended June 30, 2013, reflecting decreased net capital expenditures. Net capital expenditures in 2013 included capital spending for our business transformation project which did not recur in 2014.

Cash Flows from Financing Activities

Our financing activities, primarily focused on funding construction expenditures, include the issuance of long-term and short-term debt, primarily through AWCC. We intend to access the capital markets on a regular basis, subject to market conditions. In addition, new infrastructure may be financed with customer advances (net of refunds) and contributions in aid of construction (net of refunds).

As previously noted, AWCC is a wholly-owned finance subsidiary of American Water Works Company, Inc. (the “parent company”). Based on the needs of our regulated subsidiaries and the parent company, AWCC borrows in the capital markets and then, through intercompany loans, provides proceeds of those borrowings to the regulated subsidiaries and the parent company. The regulated subsidiaries and the parent company are obligated to pay to AWCC their respective portion of principal and interest in the amount required to enable AWCC to meet its debt service obligations. Because the parent company borrowings are not a source of capital for the Company’s regulated subsidiaries, the Company is not able to recover the interest charges on parent company debt through regulated water and wastewater rates.

We intend to utilize commercial paper for short-term liquidity, as commercial paper borrowings have historically been a more flexible and lower cost option. However, if necessary, we utilize our credit facility to complement our borrowings in the commercial paper market. In the event of disruptions in the money market sector of the debt capital markets, borrowings under our revolving credit facility may be more efficient and a lower cost alternative to commercial paper.

The following table provides information on long-term debt that was issued during the first six months of 2014:

Company	Type	Rate	Maturity	Amount
Other subsidiaries (1)	Private activity bonds and government funded debt—fixed rate	0.00%-5.00%	2033	$ 9,977

(1) Proceeds from the above issuance, which were initially kept in Trust, were received from New Jersey Environmental Infrastructure Trust and will be used to fund certain specific projects. The proceeds are held in trust pending our certification that we have incurred qualifying expenditures. These issuances have been presented as non-cash in the accompanying Consolidated Statements of Cash Flows. Subsequent releases of the funds will be reflected as the release of restricted funds in the cash flows from investing activities section of the Consolidated Statements of Cash Flows.

In addition to the above issuance, we also assumed $1.7 million of debt as a result of an acquisition.

The following long-term debt was retired through sinking fund provisions or payment at maturity during the first six months of 2014:

Company	Type	Interest Rate	Maturity	Amount
American Water Capital Corp.	Senior notes—fixed rate	6.00%	2039	$ 9
Other subsidiaries (1)	Private activity bonds and government funded debt—fixed rate	0.00%-5.25%	2014-2041	4,217
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments			14
Total retirements and redemptions				$ 5,440

(1) Includes $0.9 million of non-cash defeasance via the use of restricted funds.

From time to time, and as market conditions warrant, we may engage in additional long-term debt retirements via tender offers, open market repurchases or other transactions.

Credit Facilities and Short-Term Debt

Short-term debt balance, consisting of commercial paper, net of discount, amounted to $702.4 million at June 30, 2014.

The following table provides information as of June 30, 2014 regarding letters of credit sub-limits under our revolving credit facility and available funds under the revolving credit facility, as well as outstanding amounts of commercial paper and borrowings under our revolving credit facility.

	Credit Facility Commitment	Available Credit Facility Capacity	Letter of Credit Sub-limit	Available Letter of Credit Capacity	Outstanding Commercial Paper (Net of Discount)	Credit Line Borrowings
	(In thousands)					
June 30, 2014	$ 1,250,000	$ 1,210,035	$ 150,000	$ 110,035	$ 702,438	$ —

The weighted-average interest rate on short-term borrowings for the three months ended June 30, 2014 and 2013 was approximately 0.29% and 0.35%, respectively, and 0.31% and 0.38% for the six months ended June 30, 2014 and 2013, respectively.

Capital Structure

The following table provides information regarding our capital structure for the periods presented:

	At June 30, 2014	At December 31, 2013
Total common stockholders' equity	45%	45%
Long-term debt and redeemable preferred stock at redemption value	48%	49%
Short-term debt and current portion of long-term debt	7%	6%
	100%	100%

Debt Covenants

Our debt agreements contain financial and non-financial covenants. To the extent that we are not in compliance, we, or our subsidiaries, may be restricted in the ability to pay dividends, issue new debt or access our revolving credit facility. For two of our smaller operating companies, we have informed our counterparties that we will provide only unaudited financial information at the subsidiary level, which resulted in technical non-compliance with certain of their reporting requirements. We do not believe this change will materially impact us. Our failure to comply with restrictive covenants under our credit facility could accelerate repayment obligations. Our long-term debt indentures contain a number of covenants that, among other things, limit the Company from issuing debt secured by the Company's assets, subject to certain exceptions.

Certain long-term notes and the revolving credit facility require us to maintain a ratio of consolidated debt to consolidated capitalization (as defined in the relevant documents) of not more than 0.70 to 1.00. As of June 30, 2014, our ratio was 0.55 to 1.00 and therefore we were in compliance with the covenant.

Security Ratings

Our access to the capital markets, including the commercial paper market, and respective financing costs in those markets, is directly affected by securities ratings of the entity that is accessing the capital markets. We primarily access the capital markets, including the commercial paper market, through AWCC. However, we have also issued debt through our regulated subsidiaries, primarily in the form of tax exempt securities or borrowings under state revolving funds, to lower our overall cost of debt.

On June 2, 2014, Standard & Poor's Rating Service ("S&P"), revised its rating outlook to positive from stable and affirmed its corporate credit rating of A- on AWCC and American Water and of A2 on AWCC's short term rating. The following table shows the Company's securities ratings as of June 30, 2014:

Securities	Moody's Investors Service	Standard & Poor's Ratings Service
Senior unsecured debt	Baa1	A-
Commercial paper	P2	A2

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon our ability to generate cash flows in an amount sufficient to service our debt and meet our investment plans. We can provide no assurances that our ability to generate cash flows is sufficient to maintain our existing ratings. None of our borrowings are subject to default or prepayment as a result of the downgrading of these security ratings, although such a downgrading could increase fees and interest charges under our credit facility.

As part of the normal course of business, we routinely enter into contracts for the purchase and sale of water, energy, fuels and other services. These contracts either contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if we are downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to reference such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that we provide collateral to secure our obligations. We do not expect that our posting of collateral would have a material adverse impact on our results of operations, financial position or cash flows.

Dividends

Our board of directors' practice has been to distribute to our shareholders a portion of our net cash provided by operating activities as regular quarterly dividends, rather than retaining that cash for other purposes. Since the dividends on our common stock are not cumulative, only declared dividends will be paid.

On March 3, 2014, we made a cash dividend payment of $0.28 per share to all shareholders of record as of February 3, 2014. On June 2, 2014 we made a quarterly cash dividend payment of $0.31 per share to all shareholders of record as of May 12, 2014.

To permit our shareholders to take advantage of 2012 tax rates, the cash dividend payment that would have historically been paid in March 2013 was paid in December 2012. On June 3, 2013, we made a cash dividend payment of $0.28 per share to all shareholders of record as of May 24, 2013.

On July 30, 2014 our board of directors declared a quarterly cash dividend payment of $0.31 per share payable on September 2, 2014 to all shareholders of record as of August 11, 2014.

Market Risk

There have been no significant changes to our market risk since December 31, 2013. For a discussion of our exposure to market risk, refer to Part II, Item 7A. "Quantitative and Qualitative Disclosures about Market Risk," contained in our Form 10-K for the year ended December 31, 2013.

Application of Critical Accounting Policies and Estimates

Our financial condition, results of operations and cash flows are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates," in our Form 10-K for the year ended December 31, 2013 for a discussion of our critical accounting policies.

Recent Accounting Pronouncements

See Part I, Item 1 – Financial Statements (Unaudited) – Note 2 – New Accounting Pronouncements in this Quarterly Report on Form 10-Q for a discussion of new accounting standards recently adopted or pending adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. For further discussion of market risks see "Market Risk" in Part I, Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

American Water Works Company, Inc. maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 ("the Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) of the Exchange Act) as of June 30, 2014 pursuant to 15d-15(e) under the Exchange Act.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of June 30, 2014, our disclosure controls and procedures were effective at a reasonable level of assurance. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the three months ended June 30, 2014, that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The following information updates and amends the information provided in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 (the "Form 10-K") in Part I, Item 3, "Legal Proceedings" and in the Form 10-Q for the quarter ended March 31, 2014 (“Form 10-Q”) in Part II, Item 1, "Legal Proceedings.”

Alternative Water Supply in Lieu of Carmel River Diversions

The Form 10-K describes the Complaint for Declaratory Relief filed by California-American Water Company ("CAWC") against the Marina Coast Water District ("MCWD") and the Monterey County Water Resources Agency ("MCWRA"), which, following a transfer of the case, continued before the San Francisco County Superior Court. The Complaint sought a determination by the Court as to whether certain agreements related to the now-abandoned Regional Desalination Project are void as a result of the alleged conflict of interest of a former director of MCWRA (described in the Form 10-K), or remained valid. As noted in the Form 10-Q, the former director entered a plea of no contest to, among other things, a felony violation of California Government Code section 1090 (“Section 1090”), which precludes public officials from being financially interested in any contract made by them in their official capacity. As also described in the Form 10-Q, the Court ruled that CAWC's action was barred by the statute of limitations, but that MCWRA was subject to a longer statute of limitations under California Government Code section 1092(b), which invalidates contracts made in violation of Section 1090. As further described in the Form 10-Q, MCWRA filed a cross-complaint against MCWD, contending that the agreements were void as a result of the former director's conduct and financial interest in the agreements.

On May 16, 2014, MCWD filed its answer to MCWRA's Cross-Complaint and a demurrer seeking to have CAWC removed as a party to the issue of whether the agreements are void. After a hearing on demurrer, the Court ruled on June 25, 2014 that MCWD’s demurrer was overruled and the case would proceed to trial on the issue of whether the agreements are void. Trial on the issue is scheduled for December 1-5, 2014.

The Form 10-K also describes the filing by CAWC of a formal claim with MCWD seeking monetary damages from MCWD, and the Board of MCWD's notice that it rejected CAWC's claim. As noted in the Form 10-K and Form 10-Q, CAWC and MCWD entered into a tolling agreement and extensions of the agreement with respect to CAWC's claims, which toll applicable statutes of limitations and the deadline for a commencement of litigation regarding CAWC's claims until August 1, 2014. A subsequent agreement between CAWC and MCWD extended the tolling and deadline for the commencement of litigation to December 31, 2014.

West Virginia Elk River Chemical Spill

The Form 10-K and Form 10-Q address, among other things, litigation relating to leakage of two substances from a chemical storage tank owned by Freedom Industries, Inc. into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant intake in Charleston, West Virginia.

To date, 58 lawsuits have been filed against WVAWC with respect to this matter in the United States District Court for the Southern District of West Virginia or West Virginia Circuit Courts in Kanawha, Boone, and Putnam counties. Fifty-two of the state court cases naming WVAWC, and one case naming both WVAWC and American Water Works Service Company, Inc. (“AWWSC,” and together with WVAWC and the Company, the "American Water Defendants") were removed to the United States District Court for the Southern District of West Virginia, but are subject to motions to remand the cases back to the state courts and have been consolidated for the sole purpose of resolving venue issues. Joint briefing on the remand issue for all cases was completed on July 18, 2014. Four of the cases pending before the federal district court were consolidated for purposes of discovery and a new consolidated complaint for those cases was filed on June 20, 2014 by several plaintiffs, including, among others, individuals who allegedly suffered personal injury from the Freedom Industries spill and businesses that allegedly suffered economic harm as a result of the Freedom Industries spill, on behalf of a purported class of individuals and entities that suffered economic losses, property losses and non-economic losses or injuries as a result of the Freedom Industries spill. The complaint names multiple individuals and corporate entities as defendants, including the American Water Defendants. The consolidated complaint's allegations against the American Water Defendants include various forms of negligence, strict products liability, breach of warranty, breach of contract, nuisance, trespass and breach of contract as a result of, among other things, the American Water Defendants' alleged failure to address the foreseeable risk posed by the Freedom Industries facility; failure to operate WVAWC's water treatment plant according to industry standards so as to protect public health and safety; failure to implement an alternative water supply to avoid a risk of water supply contamination allegedly identified by a state agency; and failure to advise the purported class members of the nature of the contaminated water. The plaintiffs seek unspecified compensatory and punitive damages for alleged personal injury, property damage, and financial losses, and certain equitable relief, including the establishment of a medical monitoring program to protect the purported class members from latent, dreaded disease.

On July 20, 2014, WVAWC, AWWSC and the Company each filed a separate Answer to the complaint. Each Answer denied liability to any of the plaintiffs for damages of any kind and asserted a number of affirmative defenses. Also on July 20, 2014, WVAWC and AWWSC together, and the Company separately, filed motions to dismiss the complaint on several grounds, including, in the case of the Company, the lack of jurisdiction over the Company.

On May 21, 2014, the Public Service Commission of West Virginia issued an Order initiating a General Investigation into certain issues relating to WVAWC's response to the Elk River Chemical Spill. WVAWC is subject to discovery from Commission staff and intervenors as part of the General Investigation. The Commission has scheduled a hearing for October 7-9, 2014.

Labor Dispute Regarding National Benefits Agreement

In September 2010, the Company declared an “impasse” in negotiations of its national benefits agreement with most of the labor unions representing employees in the Regulated Businesses. The prior agreement expired on July 31, 2010; however, negotiations did not produce a new agreement. The Company implemented its last, best and final offer on January 1, 2011 to enable the Company to provide health care coverage for its employees in accordance with terms of the offer. The unions challenged the Company’s right to implement its last, best, and final offer. In this regard, following the filing by the Utility Workers Union of America of an unfair labor practice charge, the National Labor Relations Board (“NLRB”) issued a complaint against the Company in January 2012, claiming that the Company implemented the last, best and final offer without providing sufficient notice of the existence of a dispute with the Federal Mediation and Conciliation Service, a state mediation agency, and several state departments of labor, in violation of Section 8(d)(3) of the National Labor Relations Act (the “NLRA”) and, therefore, the Company failed and refused to bargain with the union in violation of Sections 8(a)(1) and 8(a)(5) of the NLRA. The Company asserted that it did, in fact, provide sufficient notice under the circumstances pertaining to the negotiations.

On October 16, 2012, the NLRB Administrative Law Judge hearing the matter ruled that, although the Company did provide sufficient notification to the Federal Mediation and Conciliation Service, it did not provide notice to the state agencies, in violation of Section 8(d)(3) of the NLRA and, consequently, the Company violated Sections 8(a)(1) and 8(a)(5) of the NLRA . The Administrative Law Judge ordered, among other things, that the Company cease and desist from implementing the terms of its last, best and final offer without complying with the requirements of Section 8(d)(3) of the NLRA and make whole all affected employees for losses suffered as a result of the Company’s implementation of its last, best and final offer.

In November 2012, the Company filed exceptions to the decision of the Administrative Law Judge in order to obtain a review by the full NRLB. The NLRB delegated its authority in the proceeding to a three member panel, which decided, on July 31, 2014, to affirm the Administrative Law Judge’s decision and order, subject to certain modifications, including the requirement that in addition to lump sum awards to make whole all affected employees for losses suffered as a result of the Company’s implementation of its last, best and final offer, the Company must compensate the affected employees for the adverse tax consequences, if any, of receiving the lump sum “make whole” payments.

On August 1, 2014, the Company filed an appeal of the NLRB’s ruling with the United States Court of Appeals for the Seventh Circuit.

The “make whole” order, if upheld on appeal, would require the Company to provide back pay plus interest, from January 1, 2011 through the date of the final determination, as well as any applicable tax reimbursement. Based on current assumptions, the Company estimates that the cash impact could be up to the range of $3.5 million to $4.5 million per year (exclusive of any additional tax compensation payments), with the total impact dependent on the length of time the issue remains unresolved.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in the “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2013, and our other public filings, which could materially affect our business, financial condition or future results. There have been no material changes from risk factors previously disclosed in “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2013.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. MINE SAFETY DISCLOSURES

None

ITEM 5. OTHER INFORMATION

As discussed in Item 1 of our annual report on Form 10-K for the year ended December 31, 2013 under the caption, “Business – Condemnation,” a citizens group in Monterey, California submitted enough signatures to have a measure added to the June 2014 election ballot asking voters to decide whether the local water management district should conduct a nine-month feasibility study concerning the potential purchase of California-American Water Company’s Monterey service district. The election was held in June 2014, and the measure was defeated. However, we cannot assure that a similar measure may not be proposed in the future, or that such a measure, if submitted to a vote, will not be adopted.

Section 2: EX-10.1 (EX-10.1)

Exhibit 10.1

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
NONQUALIFIED STOCK OPTION GRANT

This STOCK OPTION GRANT, dated as of May 9, 2014, (the "Date of Grant") is delivered by American Water Works Company, Inc. (the "Company") to Susan N. Story (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees were granted equity awards (collectively, the "Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP;

WHEREAS, pursuant to the Employment Letter Agreement, dated April 29, 2014, between the Participant and the Company, and in conjunction with the Participant's election to the role of President and Chief Executive Officer effective as of May 9, 2014, the Committee has determined to supplement the Equity Award previously granted to the Participant with an additional four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants (collectively, the "Supplemental Equity Award");and

WHEREAS, the Committee has determined that the nonqualified stock option portion of the Supplemental Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of such nonqualified stock option shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Option. Subject to the terms and conditions set forth in this Grant and in the Plan, the Company hereby grants to the Participant a nonqualified stock option (the "Option") to purchase 14,966 shares of Company Stock, at an exercise price of $46.26 per share of Company Stock.

2. Exercisability of Option.

(a) Except as provided in subparagraphs (b) or (c) below, the Option shall become exercisable on the following dates, if the Participant continues to be employed by, or providing service to, the Employer (as defined in the Plan) from the Date of Grant through the applicable date:

Date	Shares for Which the Option is Exercisable
January 1, 2015	1/3
January 1, 2016	1/3
January 1, 2017	1/3

The exercisability of the Option is cumulative, but shall not exceed 100% of the shares of Company Stock subject to the Option. If the foregoing schedule would produce fractional shares of Company Stock, the number of shares of Company Stock for which the Option becomes exercisable shall be rounded down to the nearest whole share of Company Stock. The Option shall become fully exercisable on January 1, 2017, if the Participant is employed by, or providing service to, the Employer on such date.

(b) If at any time prior to the date the Participant's Option becomes exercisable as described in subparagraph (a) above, the Participant's employment or service with the Employer is terminated on account of death or Total Disability (as defined below), the Option shall become fully exercisable on the date of the Participant's termination of employment or service with the Employer on account of death or Total Disability. For purposes of this Grant, the term "Total Disability" shall mean that the Participant has been determined to be totally disabled by the Social Security Administration.

(c) If a Change of Control occurs while the Participant is employed by or providing service to the Employer, then the Option shall become fully exercisable as of the date of the Change of Control. For purposes of this Grant, the term “Change of Control” shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the “Code”), and its corresponding regulations.

3. Term of Option.

(a) The Option shall have a term from the Date of Grant through December 31, 2020, and shall terminate at the expiration of that period, unless it is terminated at an earlier date pursuant to the provisions of this Grant or the Plan.

(b) The Option shall automatically terminate upon the happening of the first of the following events:

(i) If the Participant's employment or service with the Employer terminates on account of death or Total Disability, the expiration of the one year period following the date of the Participant's termination of employment or service on account of death or Total Disability.

(ii) If the Participant's employment or service with the Employer terminates on account of Normal Retirement (as defined below), the expiration of the one year period following the date of the Participant's termination of employment or service on account of Normal Retirement. For purposes of this Grant, the term "Normal Retirement" shall mean, at the time of the Participant's termination of employment or service with the Employer, that the Participant has attained both (A) at least age 55, and (B) total years of employment and service with the Employer equals or exceeds 10.

(iii) If the Participant's employment or service with the Employer terminates for any reason other than on account of Cause (as defined below), Normal Retirement, death or Total Disability, the expiration of the ninety (90) day period following the date of the Participant's termination of employment or service for any reason other than on account of termination for Cause, death, Total Disability or Normal Retirement.

(iv) The date on which the Participant ceases to be employed by, or provide service to, the Employer for Cause. In addition, notwithstanding the prior provisions of this Paragraph 3, if the Participant engages in conduct that constitutes Cause after the Participant's employment or service terminates, the Option shall immediately terminate. For purposes of this Grant, the term "Cause" shall mean a finding by the Committee that the Participant (A) has breached his or her employment or service contract with the Employer, if any; (B) has engaged in disloyalty to the Employer, including, without limitation, fraud, embezzlement, theft, commission of a felony or proven dishonesty; (C) has disclosed trade secrets or confidential information of the Employer to persons not entitled to receive such information; (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Employer; or (E) has engaged in such other behavior detrimental to the interests of the Employer as the Committee determines.

Notwithstanding the foregoing, in no event may the Option be exercised after December 31, 2020. Any portion of the Option that is not exercisable at the time the Participant ceases to be employed by, or provide service to, the Employer shall immediately terminate.

4. Exercise Procedures.

(a) Subject to the provisions of Paragraphs 2 and 3 above, the Participant may exercise part or all of the exercisable portion of the Option by giving the Company written notice of intent to exercise in the manner provided in this Grant, specifying the number of shares of Company Stock as to which the Option is to be exercised and the method of payment. Payment of the exercise price, together with any applicable tax withholding, shall be made in accordance with procedures established by the Committee from time to time based on the type of payment being made but, in any event, prior to issuance of the shares of Company Stock. The Participant shall pay the exercise price (i) in cash; (ii) with the approval of the Committee, by delivering shares of Company Stock, which shall be valued at their fair market value on the date of delivery, or by attestation (on a form prescribed by the Committee) to ownership of shares of Company Stock having a fair market value on the date of exercise, equal to the exercise price; (iii) by payment through a broker in accordance with procedures permitted by Regulation T of the Federal Reserve Board; or (iv) by such other method as the Committee may approve, to the extent permitted by applicable law. The Committee may impose from time to time such limitations as it deems appropriate on the use of shares of Company Stock to exercise the Option.

(b) The Participant may not exercise the Option unless the exercise of the Option and the issuance of shares of Company Stock complies with all applicable laws, rules, and regulations. The obligation of the Company to deliver shares of Company Stock upon exercise of the Option shall be subject to all applicable laws, rules, and regulations and such approvals by governmental agencies as may be deemed appropriate by the Committee, including such actions as Company counsel shall deem necessary or appropriate to comply with relevant securities laws and regulations. The Company shall be relieved of any liability with respect to any delayed issuance of shares of Company Stock or its failure to issue shares of Company Stock if such delay or failure is necessary to comply with applicable laws. The Company may require that the Participant (or other person exercising the Option after the Participant's death) represent that the Participant is purchasing the shares of Company Stock for the Participant's own account and not with a view to, or for sale in connection with, any distribution of the shares of Company Stock, or such other representations as the Committee deems appropriate.

(c) All obligations of the Company under this Grant shall be subject to the rights of the Company as set forth in the Plan to withhold amounts required to be withheld for any taxes, if applicable.

5. Change of Control. Except as set above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Option, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

6. Restrictions on Exercise. Except as the Committee may otherwise permit pursuant to the Plan, only the Participant may exercise the Option during the Participant's lifetime and, after the Participant's death, the Option shall be exercisable (subject to the limitations specified in the Plan) solely by the legal representatives of the Participant, or by the person who acquires the right to exercise the Option by will or by the laws of descent and distribution, to the extent that the Option is exercisable pursuant to this Agreement.

7. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. The Grant and exercise of the Option are subject to interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe the Option pursuant to the terms of the Plan, and its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and the Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all decisions and determinations of the Committee with respect to the Grant and the Plan shall be final and binding on the Participant and the Participant's beneficiaries and any other person claiming an interest under this Grant and the Plan on behalf of the Participant.

8. Restrictions on Sale or Transfer of Shares.

(a) The Participant agrees that he or she shall not sell, transfer, pledge, donate, assign, mortgage, hypothecate or otherwise encumber the shares of Company Stock underlying the Option unless the shares of Company Stock are registered under the Securities Act of 1933, as amended (the "Securities Act") or the Company is given an opinion of counsel reasonably acceptable to the Company that such registration is not required under the Securities Act.

(b) As a condition to receive any shares of Company Stock upon the exercise of the Option, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the exercise of the Option shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company’s Board of Directors or a duly authorized committee thereof, from time to time.

9. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

10. No Employment or Other Rights. This Grant shall not confer upon the Participant any right to be retained by or in the employ or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

11. No Stockholder Rights. Neither the Participant, nor any person entitled to exercise the Participant's rights in the event of the Participant's death, shall have any of the rights and privileges of a stockholder with respect to the shares of Company Stock subject to the Option, until certificates for shares of Company Stock have been issued upon the exercise of the Option.

12. Assignment and Transfers. Except as the Committee may otherwise permit pursuant to the Plan, the rights and interests of the Participant under this Grant may not be sold, assigned, encumbered or otherwise transferred except, in the event of the death of the Participant, by will or by the laws of descent and distribution. In the event of any attempt by the Participant to alienate, assign, pledge, hypothecate, or otherwise dispose of the Option or any right hereunder, except as provided for in this Grant, or in the event of the levy or any attachment, execution or similar process upon the rights or interests hereby conferred, the Company may terminate the Option by notice to the Participant, and the Option and all rights hereunder shall thereupon become null and void. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company and to the Company's parents, subsidiaries, and affiliates. This Agreement may be assigned by the Company without the Participant's consent.

13. Effect on Other Benefits. The value of shares of Company Stock received upon exercise of the Option shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

14. Applicable Law. The validity, construction, interpretation and effect of this instrument shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

15. Taxation; Code Section 409A. The Plan and this Grant are intended to comply with the requirements of Code section 409A, to the extent applicable. This award shall be construed and administered such that the award either (i) qualifies for an exemption from the requirements of Code section 409A or (ii) satisfies the requirements of Code section 409A. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

16. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

17. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the Company has caused its duly authorized officer to execute this Grant, effective as of the Date of Grant.

AMERICAN WATER WORKS COMPANY, INC.

Section 3: EX-10.2 (EX-10.2)

Exhibit 10.2

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
PERFORMANCE STOCK UNIT GRANT

This PERFORMANCE STOCK UNIT GRANT, dated as of May 9, 2014, (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to Susan N. Story (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees were granted equity awards (collectively, the "Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP;

WHEREAS, pursuant to the Employment Letter Agreement, dated April 29, 2014, between the Participant and the Company, and in conjunction with the Participant's election to the role of President and Chief Executive Officer effective as of May 9, 2014, the Committee has determined to supplement the Equity Award previously granted to the Participant with an additional four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants (collectively, the "Supplemental Equity Award"); and

WHEREAS, the Committee has determined that the performance stock unit portion of the Supplemental Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of the performance stock unit grant that may be earned based on the performance goal relating to the Company's Total Stockholder Return shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Performance Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant 2,288 performance stock units (the "Performance Units"). The Performance Units are contingently awarded and will be earned and distributable if and only to the extent that the performance goal and other conditions set forth in this Grant are met. Each Performance Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable payment date, as described in Paragraph 5 below. The number of Performance Units set forth above is equal to the target number of shares of Company Stock that the Participant will earn for 100% achievement of the performance goal described in Paragraph 3 below (the "Target Award").

2. Performance Unit Account. The Company shall establish and maintain a Performance Unit account as a bookkeeping account on its records (the "Performance Unit Account") for the Participant and shall record in such Performance Unit Account the number of Performance Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Performance Unit Account established for the Participant.

3. Performance Goal.

(a) Unless a Change of Control (as defined below) occurs prior to the end of Performance Period (as defined below), the distribution of the shares of Company Stock attributable to the Performance Units is contingent upon achievement of the performance goal described in subparagraph (b) below for the Performance Period and the Participant satisfying the continuation of employment and service with the Employer (as defined in the Plan) requirement described in Paragraph 4 below.

(b) The Company's Total Stockholder Return ("TSR") (as described in subparagraph (c) below) will be compared to the TSR of the companies in the Peer Group (as defined below) over the Performance Period. The actual number of Performance Units the Participant earns may be greater or less than the Target Award, or even zero, based on the Company's TSR percentile ranking relative to the TSR performance of the companies in the Peer Group, as follows:

Level of Achievement	**Percentile Ranking Relative to Peer Group**	**Percentage of Target Award Earned**
Maximum	75%	175%
Target	50%	100%
Threshold	25%	25%

If the Company's actual TSR performance is between measuring points, the number of Performance Units the Participant earns will be interpolated. If the Company's actual TSR performance is below the threshold, no Performance Units will be earned and all of Performance Units will be forfeited. If the Company's actual TSR performance is greater than the maximum, only the maximum number of Performance Units will be earned.

(c) TSR represents stock price performance and dividend accumulation over the Performance Period for the Company and Peer Group. For purposes of this calculation, the initial stock price and the ending stock price are determined using the twenty (20) day average stock price for December 31, 2013, and December 31, 2016, as applicable. The twenty (20) day average stock price is the average of the daily closing stock prices for the twenty (20) trading days that end on the applicable December 31. To determine stock price performance, a dividend adjustment factor will be determined. The dividend adjustment factor takes into account each per share dividend paid for the Performance Period as well as the effect of any appreciation in stock price by reason of deeming the dividend to be reinvested in the stock. Dividend adjusted price shall be obtained from Bloomberg. The dividend adjusted price obtained from Bloomberg provides the closing price for the requested day, week, or month, adjusted for all applicable splits and dividend distributions. At the end of the Performance Period, the TSR for the Company, and for each company in the Peer Group, shall be determined pursuant to the following formula:

$$\text{TSR} = \frac{(\text{Dividend Adjusted Ending Stock Price} - \text{Dividend Adjusted Initial Stock Price})}{\text{Dividend Adjusted Initial Stock Price}}$$

The result shall be rounded to the nearest hundredth of one percent (.01%).

(d) As soon as administratively practicable following the end of the Performance Period, the Committee will determine whether and to what extent the performance goal has been met and certify the number of Performance Units the Participant has earned, if any. Except as described in Paragraph 4 below, the Participant must be employed by, or providing service to, the Employer on the last day of the Performance Period in order to earn the Performance Units.

(e) If a Change of Control occurs prior to the end of the Performance Period, then the Performance Period will end on the date of the Change of Control and the Performance Units will be deemed earned at the Target Award level as of the date of the Change of Control (the "Change of Control Date"). For purposes of this Grant, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code"), and its corresponding regulations.

(f) For purposes of this Grant, the term "Performance Period" shall mean the three-year period beginning on January 1, 2014 and ending December 31, 2016, and the term "Peer Group" shall mean those companies that comprise the Dow Jones U.S. Utilities Index as of January 1, 2014. If a company in the Peer Group ceases to be a member of the Dow Jones U.S. Utilities Index at any time during the Performance Period, such company shall no longer be a company in the Peer Group.

4. Termination of Employment or Service.

(a) If, at least one year after the beginning of the Performance Period, but prior to the end of the Performance Period, the Participant ceases to be employed by, or provide service to, the Employer on account of any reason other than a termination for Cause (as defined below), the Participant will earn a pro-rata portion of the Performance Units, if the performance goal and the requirements of this Grant are met as of the last day of the Performance Period. The prorated portion will be determined as the number of Performance Units that would have been earned if the Participant had remained employed through the last day of the Performance Period, multiplied by a fraction, which fraction shall be equal to (i) 1/3, if the Participant's employment or service with the Employer terminates on or after January 1, 2015, but prior to January 1, 2016; (ii) 2/3, if the Participant's employment or service with the Employer terminates on or after January 1, 2016, but prior to January 1, 2017; and (iii) 3/3, if the Participant's employment or service terminates with the Employer on or after January 1, 2017. If the Participant ceases to be employed by, or provide service to, the Employer for any reason other than on account of Cause, the prorated number of Performance Units will be distributed in accordance with Paragraph 5.

(b) If at any time prior to the earlier of January 1, 2015 or a Change of Control, the Participant's employment or service with the Employer is terminated by the Employer on account of any reason or no reason or by the Participant for any reason or no reason, all of the Performance Units subject to this Grant shall be immediately forfeited as of the date of the Participant's termination of employment or service with the Employer and the Participant shall not have any rights with respect to the distribution of any portion of the Performance Units.

(c) If at any time prior to the date the Performance Units are distributed in accordance with Paragraph 5 the Participant's employment or service with the Employer is terminated on account of Cause, all of the Performance Units subject to this Grant shall be immediately forfeited and the Participant will not have any rights with respect to the distribution of any portion of the Performance Units, irrespective of the level of achievement of the performance goal. For purposes of this Grant, the term "Cause" shall mean a finding by the Committee that the Participant (A) has breached his or her employment or service contract with the Employer, if any; (B) has engaged in disloyalty to the Employer including, without limitation, fraud, embezzlement, theft, commission of a felony or proven dishonesty; (C) has disclosed trade secrets or confidential information of the Employer to persons not entitled to receive such information; (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Employer; or (E) has engaged in such other behavior detrimental to the interests of the Employer as the Committee determines.

5. Time and Form of Payment with Respect to Performance Units. Unless an election is made pursuant to Paragraph 6 below, the Participant will receive a distribution with respect to the Performance Units earned as described in Paragraphs 3 and 4 above within seventy (70) days following the earlier of (i) January 1, 2017 (the "Distribution Date"), or (ii) the Change of Control Date. The Performance Units will be distributed in shares of Company Stock, with each Performance Unit earned equivalent to one share of Company Stock. Any Performance Units not earned because of the failure to attain the performance goal and service condition will be forfeited.

6. Deferrals. The Participant may make an irrevocable election to defer the Distribution Date (or further defer the Deferred Date (as defined below), if applicable) of all of the Performance Units that are earned, plus dividend equivalents earned on such Performance Units as described in Paragraph 7 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Distribution Date cannot be earlier than five (5) years from the original Distribution Date under Paragraph 5 above (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Distribution Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Distribution Date, the Participant must elect to defer 100% of the Performance Units, including corresponding dividend equivalents, earned by the Participant under this Grant, as well as 100% of the other performance stock units, including corresponding dividend equivalents, earned by the Participant under the 2014 LTIP, and complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant's earned Performance Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Distribution Date is delayed one or more times pursuant to this Paragraph 6, the new Distribution Date shall be referred to as the "Deferred Date."

7. Dividend Equivalents. Until the earlier of the Distribution Date (or the Deferred Date, if elected) or the Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the "Dividend Equivalent Account") the value of the dividends that would have been distributed if the Performance Units credited to the Participant's Performance Unit Account as of the date of payment of any such dividend were shares of Company Stock. At the same time that the Performance Units are converted to shares of Company Stock and distributed to the Participant, the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Performance Units that have been forfeited as provided in Paragraph 3 and 4 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

8. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Performance Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

9. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that, with respect to any right to distribution pursuant to the Plan or this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or

herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

10. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the Participant earning the Performance Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company Stock upon conversion of the earned Performance Units, the Participant agrees:

i. to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

ii. that any shares of Company Stock received by the Participant upon the distribution of the earned Performance Units pursuant to this Grant shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company’s Board of Directors or a duly authorized committee thereof, from time to time.

11. The Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

12. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

13. Grant Subject to Stockholder Approval. This Grant is made subject to, and any payment under this Grant is contingent upon, stockholder reapproval of the material terms of the performance goals of the Plan (or, if amendments to the Plan are proposed that include amendments to the performance goals set forth therein, the material terms of the performance goals as proposed to be amended) in accordance with the requirements of Code section 162(m) at either the Company's 2015 Annual Meeting of Stockholders or at a special meeting of stockholders to be held prior thereto.

14. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 7), or the right to vote, with respect to any Performance Units.

15. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

16. Assignment and Transfers. No Performance Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Performance Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Performance Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

17. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and distribution of the Performance Units and dividend equivalents. Any tax withholding obligation of the Employer with respect to the distribution of shares of Company Stock pursuant to the Performance Units that are earned by the Participant under this Grant may, at the Committee’s discretion, be satisfied by having shares of Company Stock withheld up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

18. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Performance Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

19. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

20. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

21. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Performance Units constitute “deferred compensation” under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 6 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

22. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

Section 4: EX-10.3 (EX-10.3)

Exhibit 10.3

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
PERFORMANCE STOCK UNIT GRANT

This PERFORMANCE STOCK UNIT GRANT, dated as of May 9, 2014, (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to Susan N. Story (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees were granted equity awards (collectively, the "Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP;

WHEREAS, pursuant to the Employment Letter Agreement, dated April 29, 2014, between the Participant and the Company, and in conjunction with the Participant's election to the role of President and Chief Executive Officer effective as of May 9, 2014, the Committee has determined to supplement the Equity Award previously granted to the Participant with an additional four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants (collectively, the "Supplemental Equity Award"); and

WHEREAS, the Committee has determined that the performance stock unit portion of the Supplemental Equity Award granted to the Participant pursuant to the 2014 LTIP shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan"), and the terms and conditions of the performance stock unit grant that may be earned based on performance goals relating to compounded earnings per share growth and operational efficiency improvement, as set forth in Exhibit A attached hereto, shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Performance Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant 2,519 performance stock units (the "Performance Units"). The Performance Units are contingently awarded and will be earned and distributable if and only to the extent that the Performance Goals (as defined below) and other conditions set forth in this Grant are met. Each Performance Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable payment date, as described in Paragraph 5 below. The number of Performance Units set forth above is equal to the target number of shares of Company Stock that the Participant will earn for 100% achievement of the Performance Goals described in this Grant (the "Target Award").

2. Performance Unit Account. The Company shall establish and maintain a Performance Unit account as a bookkeeping account on its records (the "Performance Unit Account") for the Participant and shall record in such Performance Unit Account the number of Performance Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Performance Unit Account established for the Participant.

3. Performance Goals.

(a) Unless a Change of Control (as defined below) occurs prior to the end of the Performance Period (as defined below), the distribution of the shares of Company Stock attributable to the Performance Units is contingent upon achievement of the performance goals set forth in Exhibit A attached hereto (the "Performance Goals") and the Participant satisfying the continuation of employment and service with the Employer (as defined in the Plan) requirement described in Paragraph 4 below.

(b) As soon as administratively practicable following the end of the Performance Period, the Committee will determine whether and to what extent the Performance Goals have been met and certify the number of Performance Units the Participant has earned, if any. Except as described in Paragraph 4 below, the Participant must be employed by, or providing service to, the Employer on the last day of the Performance Period in order to earn the Performance Units.

(c) If a Change of Control occurs prior to the end of the Performance Period, then the Performance Period will end on the date of the Change of Control and the Performance Units will be deemed earned at the Target Award level as of the date of the Change of Control (the "Change of Control Date"). For purposes of this Grant, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and its corresponding regulations.

(d) For purposes of this Grant, the term "Performance Period" shall mean the three-year period beginning on January 1, 2014 and ending December 31, 2016.

4. Termination of Employment or Service.

(a) If, at least one year after the beginning of the Performance Period, but prior to the end of the Performance Period, the Participant ceases to be employed by, or provide service to, the Employer on account of any reason other than a termination for Cause (as defined below), the Participant will earn a pro-rata portion of the Performance Units, if the Performance Goals and the requirements of this Grant are met as of the last day of the Performance Period. The prorated portion will be determined as the number of Performance Units that would have been earned if the Participant had remained employed through the last day of the Performance Period, multiplied by a fraction, which fraction shall be equal to (i) 1/3, if the Participant's employment or service with the Employer terminates on or after January 1, 2015, but prior to January 1, 2016; (ii) 2/3, if the Participant's employment or service with the Employer terminates on or after January 1, 2016, but prior to January 1, 2017; and (iii) 3/3, if the Participant's employment or service terminates with the Employer on or after January 1, 2017. If the Participant ceases to be employed by, or provide service to, the Employer for any reason other than on account of Cause, the prorated number of Performance Units will be distributed in accordance with Paragraph 5.

(b) If at any time prior to the earlier of January 1, 2015 or a Change of Control, the Participant's employment or service with the Employer is terminated by the Employer on account of any reason or no reason or by the Participant for any reason or no reason, all of the Performance Units subject to this Grant shall be immediately forfeited as of the date of the Participant's termination of employment or service with the Employer and the Participant shall not have any rights with respect to the distribution of any portion of the Performance Units.

(c) If at any time prior to the date the Performance Units are distributed in accordance with Paragraph 5 the Participant's employment or service with the Employer is terminated on account of Cause, all of the Performance Units subject to this Grant shall be immediately forfeited and the Participant will not have any rights with respect to the distribution of any portion of the Performance Units, irrespective of the level of achievement of the Performance Goals. For purposes of this Grant, the term "Cause" shall mean a finding by the Committee that the Participant (A) has breached his or her employment or service contract with the Employer, if any; (B) has engaged in disloyalty to the Employer, including, without limitation, fraud, embezzlement, theft, commission of a felony or proven dishonesty; (C) has disclosed trade secrets or confidential information of the Employer to persons not entitled to receive such information; (D) has breached any written noncompetition or nonsolicitation agreement between the Participant and the Employer; or (E) has engaged in such other behavior detrimental to the interests of the Employer as the Committee determines.

5. Time and Form of Payment with Respect to Performance Units. Unless an election is made pursuant to Paragraph 6 below, the Participant will receive a distribution with respect to the Performance Units earned as described in Paragraphs 3 and 4 above within seventy (70) days following the earlier of (i) January 1, 2017 (the "Distribution Date"), or (ii) the Change of Control Date. The Performance Units will be distributed in shares of Company Stock, with each Performance Unit earned equivalent to one share of Company Stock. Any Performance Units not earned because of the failure to attain the Performance Goals and service condition will be forfeited.

6. Deferrals. The Participant may make an irrevocable election to defer the Distribution Date (or further defer the Deferred Date (as defined below), if applicable) of all of the Performance Units that are earned, plus dividend equivalents earned on such Performance Units as described in Paragraph 7 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Distribution Date cannot be earlier than five (5) years from the original Distribution Date under Paragraph 5 above (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the

Distribution Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Distribution Date, the Participant must elect to defer 100% of the Performance Units, including corresponding dividend equivalents, earned by the Participant under this Grant, as well as 100% of the other performance stock units, including corresponding dividend equivalents, earned by the Participant under the 2014 LTIP, and complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant's earned Performance Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Distribution Date is delayed one or more times pursuant to this Paragraph 6, the new Distribution Date shall be referred to as the "Deferred Date."

7. Dividend Equivalents. Until the earlier of the Distribution Date (or the Deferred Date, if elected) or the Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the "Dividend Equivalent Account") the value of the dividends that would have been distributed if the Performance Units credited to the Participant's Performance Unit Account as of the date of payment of any such dividend were shares of Company Stock. At the same time that the Performance Units are converted to shares of Company Stock and distributed to the Participant, the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Performance Units that have been forfeited as provided in Paragraph 3 and 4 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

8. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Performance Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

9. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to distribution pursuant to the Plan or this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

10. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the Participant earning the Performance Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company upon conversion of the earned Performance Units, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that any shares of Company Stock received by the Participant upon the distribution of the earned Performance Units pursuant to this Grant shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company's Board of Directors or a duly authorized committee thereof, from time to time.

11. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

12. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

13. Grant Subject to Stockholder Approval. This Grant is made subject to, and any payment under this Grant is contingent upon, stockholder reapproval of the material terms of the performance goals of the Plan (or, if amendments to the Plan are proposed that include amendments to the performance goals set forth therein, the material terms of the performance goals as proposed to be amended) in accordance with the requirements of Code section 162(m) at either the Company's 2015 Annual Meeting of Stockholders or at a special meeting of stockholders to be held prior thereto.

14. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 7), or the right to vote, with respect to any Performance Units.

15. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

16. Assignment and Transfers. No Performance Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Performance Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Performance Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

17. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and distribution of the Performance Units and dividend equivalents. Any tax withholding obligation of the Employer with respect to the distribution of shares of Company Stock pursuant to the Performance Units that are earned by the Participant under this Grant may, at the Committee's discretion, be satisfied by having shares of Company Stock withheld up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

18. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Performance Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

19. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

20. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

21. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Performance Units constitute “deferred compensation” under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 6 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

22. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

Section 5: EX-10.4 (EX-10.4)

Exhibit 10.4

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
RESTRICTED STOCK UNIT GRANT

This RESTRICTED STOCK UNIT GRANT, dated as of May 9, 2014 (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to Susan N. Story (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has adopted a 2014 Long Term Incentive Plan ("2014 LTIP") pursuant to which designated employees were granted equity awards (collectively, the "Equity Award") for shares of Common Stock of the Company, par value $0.01 per share, (the "Company Stock");

WHEREAS, the Equity Award is comprised of four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants;

WHEREAS, the Committee determined that the Participant is eligible to participate in the 2014 LTIP and to grant the Participant an Equity Award under the 2014 LTIP;

WHEREAS, pursuant to the Employment Letter Agreement, dated April 29, 2014, between the Participant and the Company, and in conjunction with the Participant's election to the role of President and Chief Executive Officer effective as of May 9, 2014, the Committee has determined to supplement the Equity Award previously granted to the Participant with an additional four separate grants, a nonqualified stock option, a restricted stock unit, and two performance stock unit grants (collectively, the "Supplemental Equity Award"); and

WHEREAS, the Committee has determined that the restricted stock unit portion of the Supplemental Equity Award granted pursuant to the 2014 LTIP to the Participant shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan") and the terms and conditions of such restricted stock unit shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Restricted Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant 1,679 units (the "Restricted Stock Units"). Each unit (a "Unit") shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable Redemption Date (as defined below).

2. Restricted Stock Unit Account. The Company shall establish and maintain a Restricted Stock Unit account as a bookkeeping account on its records (the "Restricted Stock Unit Account") for the Participant and shall record in such Restricted Stock Unit Account the number of Restricted Stock Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Restricted Stock Unit Account established for the Participant.

3. Vesting.

(a) Except as provided in subparagraph (c) below, the Restricted Stock Units shall vest on the following dates (each a "Service Date"), provided the Participant continues to be employed by, or providing service to, the Employer (as defined in the Plan) from the Date of Grant through the applicable Service Date:

Date	Units Vesting
January 1, 2015	1/3
January 1, 2016	1/3
January 1, 2017	1/3

(b) If at any time prior to the last Service Date the Participant's employment or service with the Employer terminates for any reason, including death or disability, then all of the unvested Restricted Stock Units shall be immediately forfeited and the Participant shall not have any rights with respect to the vesting or the redemption of any portion of the Restricted Stock Unit.

(c) If at any time prior to the last Service Date, but while the Participant is employed by or providing service to the Employer, a Change of Control (as defined below) occurs, then all of the unvested Restricted Stock Units shall become vested on the date of the Change of Control. For purposes of this Agreement, the term "Change of Control" shall mean as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Agreement unless the event constituting the Change of Control constitutes a change in the ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code") and its corresponding regulations. For the avoidance of doubt, if the Change of Control does not constitute a permitted change in control event under Code section 409A, then the Restricted Stock Unit shall not vest on the occurrence of the Change of Control.

(d) The date on which all or any portion of the Restricted Stock Unit becomes vested as described in this Paragraph 3 shall hereinafter be referred to as the "Vesting Date".

4. Redemption. Unless an election is made pursuant to Paragraph 5 below, the Restricted Stock Units shall be redeemed by the Company on the applicable Vesting Date or as soon as administratively practicable thereafter, but not later than forty-five (45) days following the Vesting Date, (the "Redemption Date"). On the Redemption Date (or, if applicable, the Deferred Date, as defined in Paragraph 5 below), all Restricted Stock Units that become vested pursuant to Paragraph 3 above shall be redeemed and converted to an equivalent number of shares of Company Stock, and the Participant shall receive a single sum distribution of such shares of Company Stock, which shall be issued under the Plan.

5. Deferrals. The Participant may make an irrevocable election to defer the Redemption Date (or further defer the Deferred Date (as defined below), if applicable) of any of the Restricted Stock Units that vest, plus dividend equivalents earned on such Restricted Stock Units as described in Paragraph 6 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the new Redemption Date cannot be earlier than five (5) years from the original Redemption Date under Paragraph 4 above (or five (5) years from the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Redemption Date (twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Redemption Date, the Participant must complete the deferral election form provided to the Participant by the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Change of Control Date occurs prior to the Deferred Date, the redemption of the Participant's Restricted Stock Units, plus corresponding dividend equivalents, will be the Change of Control Date. If a Redemption Date is delayed one or more times pursuant to this Paragraph 5, the new Redemption Date shall be referred to as the "Deferred Date."

6. Dividend Equivalents. Until the Redemption Date (or the Deferred Date, if elected), if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the "Dividend Equivalent Account") the value of the dividends that would have been distributed if the Restricted Stock Units credited to the Participant's Restricted Stock Unit Account as of the date of payment of any such dividend were shares of Company Stock. On the Redemption Date (or the Deferred Date, if applicable), the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account; provided, however, that any dividends that were credited to the Participant's Dividend Equivalent Account that are attributable to Units that have been forfeited as provided in Paragraph 3 above shall be forfeited and not payable to the Participant. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

7. Change of Control. Except as set forth in Paragraph 3(c) of this Grant, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Restricted Stock Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

8. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to redemption or distribution pursuant to this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law.

9. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) To the extent permitted by Code Section 409A, the obligation of the Company to deliver shares of Company Stock upon the redemption of the Restricted Stock Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee.

(b) The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(c) As a condition to receive any shares of Company Stock on the Redemption Date (or the Deferred Date, if applicable), the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the redemption of the Restricted Stock Units shall be subject to the restrictions set forth in the Company's Stock Retention Program for Executives and any applicable clawback or recoupment policies and other policies that may be implemented by the Company’s Board of Directors or a duly authorized committee thereof, from time to time.

10. Participant Undertaking. The Participant agrees to take whatever additional actions and execute whatever additional documents the Company may in its reasonable judgment deem necessary or advisable in order to carry out or effect one or more of the obligations or restrictions imposed on the Participant pursuant to the provisions of this Grant.

11. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder. By accepting this Grant, the Participant agrees (A) to be bound by the terms of the Plan and this Grant, (B) to be bound by the determinations and decisions of the Committee with respect to this Grant, the Plan and the Participant's rights to benefits under this Grant and the Plan, and (C) that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

12. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 6), or the right to vote, with respect to any Restricted Stock Units.

13. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer and shall not interfere in any way with the right of the Employer to terminate the Participant's employment or service at any time. The right of the Employer to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

14. Assignment and Transfers. No Restricted Stock Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and a Restricted Stock Unit shall be redeemed and a dividend equivalent distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Restricted Stock Unit or dividend equivalent by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

15. Withholding. The Participant shall be required to pay to the Employer, or make other arrangements satisfactory to the Employer to provide for the payment of, any federal, state, local or other taxes that the Employer is required to withhold with respect to the grant, vesting and redemption of the Restricted Stock Units and payment of dividend equivalents. Any tax withholding obligation of the Employer with respect to the redemption of the Restricted Stock Units may, at the Committee’s discretion, be

satisfied by having shares of Company Stock withheld, up to an amount that does not exceed the minimum applicable withholding tax rate for federal (including FICA), state, local and other tax liabilities.

16. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Restricted Stock Units shall not be considered eligible earnings for purposes of any other plans maintained by the Company or the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

17. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

18. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the payroll records of the Employer, or to such other address as the Participant may designate to the Employer in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

19. Taxation; Code Section 409A. As applicable, this Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered in accordance with Code section 409A. Notwithstanding any provision to the contrary herein, if the Restricted Stock Units constitute “deferred compensation” under section 409A of the Code, distributions made with respect to this Grant may only be made in a manner and upon an event permitted by Code section 409A. To the extent that any provision of the Grant would cause a conflict with the requirements of Code section 409A, or would cause the administration of the Grant to fail to satisfy the requirements of Code section 409A, such provision shall, to the extent practicable if permitted by applicable law, be deemed null and void. In the event that it is determined not feasible to void a provision of this Grant, such provision shall be construed in a manner as to comply with the Code section 409A requirements. This Grant may be amended without the consent of the Participant in any respect deemed by the Committee or its delegate to be necessary in order to comply with Code section 409A. Unless a valid election is made pursuant to Paragraph 5 above, in no event may the Participant, directly or indirectly, designate the calendar year of distribution. Notwithstanding anything in the Plan or the Grant to the contrary, the Participant shall be solely responsible for the tax consequences of this Grant, and in no event shall the Company have any responsibility or liability if this Grant does not meet any applicable requirements of Code section 409A.

20. Severability. In the event one or more of the provisions of this Grant should, for any reason, be held to be invalid, illegal or unenforceable in any respect, such invalidity, illegality or unenforceability will not affect any other provisions of this Grant, and this Grant will be construed as if such invalid, illegal or unenforceable provision had never been contained herein.

(Back To Top)

Section 6: EX-10.5 (EX-10.5)

Exhibit 10.5

AMERICAN WATER WORKS COMPANY, INC.
2007 OMNIBUS EQUITY COMPENSATION PLAN
STOCK UNIT GRANT

This STOCK UNIT GRANT, dated as of May 9, 2014 (the "Date of Grant"), is delivered by American Water Works Company, Inc. (the "Company") to _____ (the "Participant").

RECITALS

WHEREAS, the Committee (as defined in the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan) has determined to grant each non-employee member of the Board of Directors of the Company (the "Board") who is a non-employee director of the Company immediately following the Company's 2014 Annual Stockholder meeting a stock unit grant that will be converted to shares of common stock of the Company, par value $0.01 per share, (the "Company Stock") at a later date;

WHEREAS, the Participant is a non-employee director on the Board; and

WHEREAS, the Committee has determined that the stock unit grant granted to the Participant shall be issued under the American Water Works Company, Inc. 2007 Omnibus Equity Compensation Plan (the "Plan") and the terms and conditions of such stock unit shall be memorialized in this grant (the "Grant").

NOW, THEREFORE, the parties to this Grant, intending to be legally bound hereby, agree as follows:

1. Grant of Stock Units. Subject to the terms and conditions set forth in this Grant and the Plan, the Company hereby grants to the Participant _____ units (the "Stock Units"). Each Stock Unit shall be a phantom right and shall be equivalent to one share of Company Stock on the applicable distribution date, as described in Paragraph 4 below.

2. Stock Unit Account. The Company shall establish and maintain a Stock Unit account as a bookkeeping account on its records (the "Stock Unit Account") for the Participant and shall record in such Stock Unit Account the number of Stock Units granted to the Participant. The Participant shall not have any interest in any fund or specific assets of the Company by reason of this grant or the Stock Unit Account established for the Participant.

3. Vesting. The Participant shall be fully vested in the Stock Units credited to the Participant's Stock Unit Account pursuant to this Grant on the Date of Grant.

4. Distribution. The Stock Units shall be converted to shares of Company Stock and distributed by the Company within thirty (30) days following the earlier of (i) August 14, 2015__ (the "Specified Date") (or, if applicable, the Deferred Date, as defined in Paragraph 5 below), (ii) the Participant's separation from service (within the meaning of section 409A of the Internal Revenue Code of 1986, as amended (the "Code")) with the Company (the "Separation from Service Date"), or (iii) the date of a Change of Control (as defined below) (the "Change of Control Date"). At the time of distribution, all Stock Units shall be converted to an equivalent number of shares of Company Stock, and the Participant shall receive a single sum distribution of such shares of Company Stock, which shall be issued under the Plan. For purposes of this Grant, the term "Change of Control" shall have the same meaning as such term is defined in the Plan, except that a Change of Control shall not be deemed to have occurred for purposes of this Grant unless the event constituting the Change of Control constitutes a change in ownership or effective control of the Company, or in the ownership of a substantial portion of the assets of the Company, within the meaning of section 409A of the Code and its corresponding regulations.

5. Deferrals. The Participant may make an irrevocable election to defer the Specified Date (or further defer the Deferred Date (as defined

below), if applicable) of all of the Stock Units, plus dividend equivalents earned on such Stock Units as described in Paragraph 6 below, to a later date, provided that (i) the election shall not take effect until at least twelve (12) months after the date on which the election is made, (ii) the deferred Specified Date cannot be earlier than five (5) years from the original Specified Date under Paragraph 4 (or five (5) years from the applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made), and (iii) the election must be made no less than twelve (12) months prior to the date of the Specified Date (or twelve (12) months prior to the previously applicable Deferred Date, if a subsequent deferral of a Deferred Date is being made). To defer the Specified Date, the Participant must elect to defer 100% of the Stock Units, including corresponding dividend equivalents, granted to the Participant under this Grant and complete the deferral election form provided to the Participant by the Committee, in the form attached hereto as Exhibit A or as may subsequently modified in the discretion of the Committee. If the Participant desires to make a further deferral, the Participant must make such election on a separate form provided by the Committee for such purpose. Any such election shall be made in accordance with section 409A of the Code and any corresponding guidance and regulations issued under section 409A of the Code. Notwithstanding a Participant's election pursuant to this Paragraph, if the Separation from Service Date or Change of Control Date occurs prior to the Deferred Date, the distribution of the Participant's Stock Units, plus corresponding dividend equivalents, will be made as a result of the occurrence of the Separation from Service Date or Change of Control Date, whichever is earlier. If a Specified Date is delayed one or more times pursuant to this Paragraph 5, the new Specified Date shall be referred to as the "Deferred Date."

6. Dividend Equivalents. Until the earlier of the Specified Date (or the Deferred Date, if elected), Separation from Service Date or Change of Control Date, if any dividends are paid with respect to the shares of Company Stock, the Company shall credit to a dividend equivalent account (the "Dividend Equivalent Account") the value of the dividends that would have been distributed if the Stock Units credited to the Participant's Stock Unit Account as of the date of payment of any such dividend were shares of Company Stock. At the same time that the Stock Units are converted to shares of Company Stock and distributed to the Participant, the Company shall pay to the Participant a lump sum cash payment equal to the value of the dividends credited to the Participant's Dividend Equivalent Account. No interest shall accrue on any dividend equivalents credited to the Participant's Dividend Equivalent Account.

7. Change of Control. Except as set forth above, the provisions set forth in the Plan applicable to a Change of Control (as defined in the Plan) shall apply to the Stock Units, and, in the event of a Change of Control, the Committee may take such actions as it deems appropriate pursuant to the Plan and is consistent with the requirements of section 409A of the Code.

8. Acknowledgment by Participant. By accepting this Grant, the Participant acknowledges that with respect to any right to distribution pursuant to this Grant, the Participant is and shall be an unsecured general creditor of the Company without any preference as against other unsecured general creditors of the Company, and the Participant hereby covenants for himself or herself, and anyone at any time claiming through or under the Participant, not to claim any such preference, and hereby disclaims and waives any such preference which may at any time be at issue, to the fullest extent permitted by applicable law. The Participant also hereby agrees to be bound by the terms and conditions of the Plan and this Grant. The Participant further agrees to be bound by the determinations and decisions of the Committee with respect to this Grant and the Plan and the Participant's rights to benefits under this Grant and the Plan, and agrees that all such determinations and decisions of the Committee shall be binding on the Participant, his or her beneficiaries and any other person having or claiming an interest under this Grant and the Plan on behalf of the Participant.

9. Restrictions on Issuance or Transfer of Shares of Company Stock.

(a) The obligation of the Company to deliver shares of Company Stock upon the distribution of the Stock Units shall be subject to the condition that if at any time the Committee shall determine in its discretion that the listing, registration or qualification of the shares of Company Stock upon any securities exchange or under any state or federal law, or the consent or approval of any governmental regulatory body is necessary or desirable as a condition of, or in connection with, the issuance of shares of Company Stock, the shares of Company Stock may not be issued in whole or in part unless such listing, registration, qualification, consent or approval shall have been effected or obtained free of any conditions not acceptable to the Committee. The issuance of shares of Company Stock and the payment of cash to the Participant pursuant to this Grant is subject to any applicable taxes and other laws or regulations of the United States or of any state having jurisdiction thereof.

(b) As a condition to receive any shares of Company Stock upon conversion of the Stock Units, the Participant agrees:

(i) to be bound by the Company's policies regarding the limitations on the transfer of such shares, and understands that there may be certain times during the year that the Participant will be prohibited from selling, transferring, pledging, donating, assigning, mortgaging, hypothecating or otherwise encumbering the shares; and

(ii) that the shares of Company Stock obtained by the Participant upon the distribution of the Stock Units shall not be tradable until the Participant owns enough shares of Company Stock outright, as stock units convertible into shares of Company Stock, and time-based restricted Company Stock, to meet or exceed five (5) times the Participant's annual cash retainer, which ownership requirement must be satisfied by the later of February 2015, or the fifth (5th) anniversary of the Participant's commencement of service as a director on the Board.

10. Grant Subject to Plan Provisions. This Grant is made pursuant to the Plan, the terms of which are incorporated herein by reference, and in all respects shall be interpreted in accordance with the Plan. In the event of any contradiction, distinction or difference between this Grant and the terms of the Plan, the terms of the Plan will control. Except as otherwise defined in this Grant, capitalized terms used in this Grant shall have the meanings set forth in the Plan. This Grant is subject to the interpretations, regulations and determinations concerning the Plan established from time to time by the Committee in accordance with the provisions of the Plan, including, but not limited to, provisions pertaining to (i) rights and obligations with respect to withholding taxes, (ii) the registration, qualification or listing of the shares of Company Stock, (iii) changes in capitalization of the Company, and (iv) other requirements of applicable law. The Committee shall have the authority to interpret and construe this Grant pursuant to the terms of the Plan, its decisions shall be conclusive as to any questions arising hereunder and the Participant's acceptance of this Grant is the Participant's agreement to be bound by the interpretations and decisions of the Committee with respect to this Grant and the Plan.

11. No Rights as Stockholder. The Participant shall not have any rights as a stockholder of the Company, including the right to any cash dividends (except as provided in Paragraph 6), or the right to vote, with respect to any Stock Units.

12. No Rights to Continued Employment or Service. This Grant shall not confer upon the Participant any right to be retained in the employment or service of the Employer (as defined in the Plan) and shall not interfere in any way with the right to terminate the

Participant's employment or service at any time. The right to terminate at will the Participant's employment or service at any time for any reason is specifically reserved.

13. Assignment and Transfers. No Stock Units or dividend equivalents awarded to the Participant under this Grant may be transferred, assigned, pledged, or encumbered by the Participant and the Stock Units and dividend equivalents shall be distributed during the lifetime of the Participant only for the benefit of the Participant. Any attempt to transfer, assign, pledge, or encumber the Stock Units or dividend equivalents under this Grant by the Participant shall be null, void and without effect. The rights and protections of the Company hereunder shall extend to any successors or assigns of the Company. This Grant may be assigned by the Company without the Participant's consent.

14. Withholding. To the extent required by applicable law, the Participant shall be required to pay to the Company, or make other arrangements satisfactory to the Company to provide for the payment of, any federal, state, local or other taxes that the Company is required to withhold with respect to the Grant, vesting or distribution of the Stock Units and dividend equivalents.

15. Effect on Other Benefits. The value of shares of Company Stock and dividend equivalents distributed with respect to the Stock Units shall not be considered eligible earnings for purposes of any other plans maintained by the Employer. Neither shall such value be considered part of the Participant's compensation for purposes of determining or calculating other benefits that are based on compensation, such as life insurance.

16. Applicable Law. The validity, construction, interpretation and effect of this Grant shall be governed by and construed in accordance with the laws of the State of Delaware, without giving effect to the conflicts of laws provisions thereof.

17. Notice. Any notice to the Company provided for in this instrument shall be addressed to the Company in care of the General Counsel at the Company's corporate headquarters, and any notice to the Participant shall be addressed to such Participant at the current address shown on the records of the Company, or to such other address as the Participant may designate to the Company in writing. Any notice shall be delivered by hand, sent by telecopy or enclosed in a properly sealed envelope addressed as stated above, registered and deposited, postage prepaid, in a post office regularly maintained by the United States Postal Service.

18. Section 409A of the Code.

(a) This Grant is intended to comply with the requirements of section 409A of the Code and shall be interpreted and administered to avoid any penalty sanctions under section 409A of the Code. If any distribution cannot be provided or made at the time specified herein or as elected by the Participant, then such distribution shall be provided in full at the earliest time thereafter when such sanctions cannot be imposed. Except according to a valid election made pursuant to Paragraph 5 above, in no event may the Participant designate the calendar year of distribution.

(b) Notwithstanding any provision to the contrary in this Grant, if any of the distributions under this Grant are payable to the Participant upon separation from service (within the meaning of section 409A of the Code) from the Employer, then if at the time of the Participant's separation from service the Participant is a "specified employee" (as such term is defined in section 409A(2)(B)(i) of the Code and its corresponding regulations) as determined by the Company (or any successor thereto) in its sole discretion in accordance with its specified employee determination policy, then all distributions to the Participant pursuant to this Grant shall be postponed for a period of six (6) months following the Participant's separation from service from the Employer. The postponed amounts shall be distributed to the Participant in a lump sum within thirty (30) days after the date that is six (6) months following the Participant's separation from service from the Employer. If the Participant dies during such six (6)-month period and prior to the distribution of the postponed amounts hereunder, the amounts delayed on account of section 409A of the Code shall be distributed to the personal representative of the Participant's estate within sixty (60) days after the date of the Participant's death, and any amounts not delayed shall be distributed to the personal representative of the Participant's estate in accordance with the terms of this Grant.

(Back To Top)

Section 7: EX-31.1 (EX-31.1)

Exhibit 31.1

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Susan N. Story, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;

   b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   c) evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   d) disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

   a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and

   b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

> c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
>
> d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

> a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
>
> b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

Note 1: Basis of Presentation

The accompanying Consolidated Balance Sheet of American Water Works Company, Inc. and Subsidiary Companies (the “Company”) at September 30, 2014, the Consolidated Statements of Operations and Comprehensive Income for the three and nine months ended September 30, 2014 and 2013, the Consolidated Statements of Cash Flows for the nine months ended September 30, 2014 and 2013, and the Consolidated Statements of Changes in Stockholders’ Equity for the nine months ended September 30, 2014 and 2013, are unaudited, but reflect all adjustments, which are, in the opinion of management, necessary to present fairly the consolidated financial position, the consolidated changes in stockholders’ equity, the consolidated results of operations and comprehensive income, and the consolidated cash flows for the periods presented. All adjustments are of a normal, recurring nature, except as otherwise disclosed. Because they cover interim periods, the unaudited consolidated financial statements and related notes to the consolidated financial statements do not include all disclosures and notes normally provided in annual financial statements and, therefore, should be read in conjunction with the Company’s Consolidated Financial Statements and related Notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013. The results of operations for interim periods are not necessarily indicative of the results that may be expected for the year, due primarily to the seasonality of the Company’s operations.

The accompanying Notes to the Consolidated Financial Statements relate to continuing operations only unless otherwise indicated. Certain reclassifications have been made to previously reported data to conform to the current presentation. In 2014 the Company revised the 2013 balance sheet to classify $18,609 of deferred income taxes as current rather than non-current. The change in classification was not material to the previously issued financial statements.

Note 2: New Accounting Pronouncements

The following recently issued accounting standards have been adopted by the Company and have been included in the consolidated results of operations, financial position or footnotes of the accompanying Consolidated Financial Statements:

Obligations Resulting from Joint and Several Liability Arrangements

In February 2013, the Financial Accounting Standards Board (“FASB”) issued guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date. Examples of obligations within the scope of the updated guidance include debt arrangements, other contractual obligations and settled litigation and judicial rulings. The update requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation is fixed at the reporting date as the sum of the following: (a) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. The updated guidance also includes additional disclosures regarding the nature and amount of the obligation, as well as other information about those obligations. The update was effective on a retrospective basis for interim and annual periods beginning January 1, 2014. The adoption of this guidance did not have an impact on the Company’s results of operations, financial position or cash flows.

Foreign Currency Matters

In June 2013, the FASB issued guidance for a parent’s accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. The amendments resolve differing views in practice and apply to the release of the cumulative translation adjustment into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or a business within a foreign entity. The update was effective prospectively for interim and annual periods beginning January 1, 2014. The adoption of this guidance did not have an impact on the Company’s results of operations, financial position or cash flows.

The following recently issued accounting standards are not yet required to be adopted by the Company:

Service Concession Arrangements

In January 2014, the FASB issued guidance for an operating entity that enters into a service concession arrangement with a public sector grantor who controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide the services and at what price. The grantor also controls, through ownership or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The guidance specifies that an operating entity should not account for the service concession arrangement as a lease. The operating entity should refer instead to other accounting guidance to account for the various aspects of the arrangement. The guidance also specifies that the infrastructure used in the arrangement should not be recognized as property, plant and equipment of the operating entity. This update should be applied on a modified retrospective basis to service concession arrangements that exist at the beginning of an entity’s fiscal year of adoption. This requires the cumulative effect of applying the update to be recognized as an adjustment to the opening retained earnings balance for the annual period of adoption. The update is effective for interim and annual periods beginning January 1, 2015. Early adoption is permitted. The adoption of this updated guidance is not expected to have a material impact on results of operations, financial position or cash flows.

Reporting Discontinued Operations

In April 2014, the FASB issued guidance that changes the criteria for determining which disposals can be presented as discontinued operations and modifies related disclosure requirements. Under the updated guidance, a discontinued operation is defined as a component or group of components that is disposed of or is classified as held for sale and represents a strategic shift that has or will have a major effect on an entity’s operations and financial results. A strategic shift could include a disposal of a major geographical area of operations, a major line of business, a major equity method investment or other major part of the entity. A component comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the entity including a reportable segment, an operating segment, a reporting unit, a subsidiary or an asset group. The update no longer precludes presentation as a discontinued operation if there are operations and cash flows of the component that have not been eliminated from the reporting entity’s ongoing operations or if there is significant continuing involvement with a component after its disposal. The guidance is effective on a prospective basis for interim and annual periods beginning after January 1, 2015. In general, this guidance is likely to result in fewer disposals of assets qualifying as discontinued operations.

Revenue from Contracts with Customers

In May 2014, the FASB issued a comprehensive new revenue recognition standard that supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the new guidance is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The guidance is effective for annual and interim periods beginning January 1, 2017 and early adoption is not permitted. The new guidance allows for either full retrospective adoption, meaning the guidance is applied to all of the periods presented, or modified retrospective adoption, meaning the standard is applied only to the most current period presented in the financial statements. The Company is evaluating the new guidance, the best transition method and the impact the new standard will have on its results of operations, financial position or cash flows.

Accounting for Stock-based Compensation with Performance Targets

In June 2014, the FASB issued guidance for the accounting for stock-based compensation tied to performance targets. The amendments clarify that a performance target that affects vesting of a share-based payment and that could be achieved after the requisite service period is a performance condition. As a result, the target is not reflected in the estimation of the award’s grant date fair value and compensation cost would be recognized over the required service period, if it is probable that the performance condition will be achieved. The guidance is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. The Company is evaluating the impact the updated guidance will have on its results of operations, financial position or cash flows.

Disclosures of Uncertainties about an Entity’s Ability to Continue as a Going Concern

In August 2014, the FASB issued guidance that explicitly requires an entity’s management to assess the entity’s ability to continue as a going concern. The new guidance requires an entity to evaluate, at each interim and annual period, whether there are conditions or events that raise substantial doubt about the entity’s ability to continue as a going concern within one year after the date the financial statements are issued (or are available to be issued) and to provide related disclosures, if applicable. The new guidance is effective for annual periods ending after December 15, 2016 and for interim and annual periods thereafter. Early adoption is permitted. The Company does not expect this new guidance to have a material impact on its results of operations, financial position or cash flows.

Note 3: Acquisitions and Divestitures

Acquisitions

During the nine-month period ended September 30, 2014, the Company closed on nine acquisitions: five regulated water systems, one regulated wastewater, and three regulated water and wastewater systems. The aggregate purchase price of these acquisitions totaled $6,134. Assets acquired, principally plant, totaled $13,119. Liabilities assumed totaled $6,985, including contributions in aid of construction of $4,231 and debt of $1,683.

Divestitures

In the third quarter of 2014, the Company approved a plan to exit the Class B biosolids management business by selling Terratec Environmental Ltd (“Terratec”), and as a result, has included the results as discontinued operations for all periods presented. Terratec, which was previously included in the Market-Based Operations segment, is based in Canada and provides environmentally sustainable management and disposal of biosolids and wastewater by-products. The Company expects to complete the disposition during the fourth quarter of 2014.

Included in the loss on discontinued operations is an estimated loss on the disposal of Terratec in the amount of $3,470. The provision for income taxes for 2014 includes the utilization of $1,480 of tax attributes as a result of the expected sale. Charges recorded in connection with the discontinued operations include estimates that are subject to subsequent adjustment.

A summary of discontinued operations presented in the Consolidated Statements of Operations and Comprehensive Income follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Operating revenues	$ 4,910	$ 7,006	$ 12,234	$ 16,904
Total operating expenses, net	7,973	6,297	17,657	17,430
Income (loss) from discontinued operations before income taxes	(3,063)	709	(5,423)	(526)
Provision (benefit) for income taxes	1,360	(47)	865	(374)
Income (loss) from discontinued operations	$ (4,423)	$ 756	$ (6,288)	$ (152)

Assets and liabilities of discontinued operations in the accompanying Consolidated Balance Sheets include the following:

	September 30, 2014	December 31, 2013
ASSETS		
Total property, plant and equipment	$ 2,168	$ 2,808
Current assets	4,088	4,953
Total assets of discontinued operations	$ 6,256	$ 7,761
LIABILITIES		
Current liabilities	$ 1,667	$ 3,824
Total liabilities of discontinued operations	$ 1,667	$ 3,824

Note 4: Goodwill

The Company's annual goodwill impairment test is conducted at November 30 of each calendar year. Interim reviews are performed when the Company determines that a triggering event that would more likely than not reduce the fair value of a reporting unit below its carrying value has occurred. The Company has determined no such triggering event had occurred during the nine months ended September 30, 2014.

The change in the Company's goodwill assets, as allocated between the reporting units is as follows:

	Regulated Unit		Market-Based Operations		Consolidated		
	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Cost	Accumulated Impairment	Total Net
Balance at January 1, 2014	$ 3,412,063	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,648,053	$ (2,440,289)	$ 1,207,764
Goodwill from acquisitions	301	0	0	0	301	0	301
Balance at September 30, 2014	$ 3,412,364	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,648,354	$ (2,440,289)	$ 1,208,065
Balance at January 1, 2013	$ 3,411,549	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,647,539	$ (2,440,289)	$ 1,207,250
Goodwill from acquisitions	405	0	0	0	405	0	405
Reclassifications and other activity	86	0	0	0	86	0	86
Balance at September 30, 2013	$ 3,412,040	$ (2,332,670)	$ 235,990	$ (107,619)	$ 3,648,030	$ (2,440,289)	$ 1,207,741

Note 5: Stockholders’ Equity

Common Stock

Under American Water Stock Direct, a dividend reinvestment and direct stock purchase plan (the “DRIP”), stockholders may reinvest cash dividends and purchase additional Company common stock, up to certain limits, through the plan administrator without commission fees. The Company’s plan administrator may buy newly issued shares directly from the Company or shares held in the Company’s treasury. The plan administrator may also buy shares in the public markets or in privately negotiated transactions. Purchases generally will be made and credited to DRIP accounts once each week. As of September 30, 2014, there were 4,621 shares available for future issuance under the DRIP.

The following table summarizes information regarding issuances under the DRIP for the nine months ended September 30, 2014 and 2013:

	2014	2013
Shares of common stock issued	34	35
Cash proceeds received	$ 1,590	$ 1,440

Cash dividend payments made during the three-month periods ended March 31, June 30 and September 30 were as follows:

	2014	2013
Dividends per share, three months ended:		
March 31	$ 0.28	$ 0.00
June 30	$ 0.31	$ 0.28
September 30	$ 0.31	$ 0.28
Total dividends paid, three months ended:		
March 31	$ 49,968	$ 0
June 30	$ 55,422	$ 49,744
September 30	$ 55,458	$ 49,810

On September 19, 2014, the Company declared a quarterly cash dividend of $0.31 per share, payable on December 1, 2014 to shareholders of record as of November 10, 2014. As of September 30, 2014, the Company had accrued dividends totaling $55,494 included in other current liabilities on the accompanying Consolidated Balance Sheet.

Accumulated Other Comprehensive Income (Loss)

The following table presents changes in accumulated other comprehensive income (loss) by component, net of tax, for the nine months ended September 30, 2014 and 2013, respectively:

	Defined Benefit Plans					
	Employee Benefit Plan Funded Status	Amortization of Prior Service Cost	Amortization of Actuarial (Gain) Loss	Foreign Currency Translation	Loss on Cash Flow Hedge	Total Accumulated Other Comprehensive Loss
Beginning balance at January 1, 2014	$ (69,711)	$ 713	$ 31,150	$ 3,213	$ 0	$ (34,635)
Other comprehensive income (loss) before reclassifications	0	0	0	(594)	(825)	(1,419)
Amounts reclassified from accumulated other comprehensive income (loss)	0	124	(22)	0	10	112
Net comprehensive income (loss) for the period	0	124	(22)	(594)	(815)	(1,307)
Ending balance at September 30, 2014	$ (69,711)	$ 837	$ 31,128	$ 2,619	$ (815)	$ (35,942)
Beginning balance at January 1, 2013	$ (143,183)	$ 539	$ 22,239	$ 4,214	$ 0	$ (116,191)
Other comprehensive income (loss) before reclassifications	0	0	0	(523)	0	(523)
Amounts reclassified from accumulated other comprehensive income (loss)	0	130	6,683	0	0	6,813
Net comprehensive income (loss) for the period	0	130	6,683	(523)	0	6,290
Ending balance at September 30, 2013	$ (143,183)	$ 669	$ 28,922	$ 3,691	$ 0	$ (109,901)

The Company does not reclassify the amortization of defined benefit pension cost components from accumulated other comprehensive income (loss) directly to net income in its entirety. These accumulated other comprehensive income components are included in the computation of net periodic pension cost. (See Note 9)

The amortization of the loss on cash flow hedge is included in interest, net in the accompanying Consolidated Statements of Operations and Comprehensive Income.

Stock-Based Compensation

The Company has granted stock option and restricted stock unit awards to non-employee directors, officers and other key employees of the Company pursuant to the terms of its 2007 Omnibus Equity Compensation Plan (the "Plan"). As of September 30, 2014, a total of 8,832 shares were available for grant under the Plan. Shares issued under the Plan may be authorized-but-unissued shares of Company stock or reacquired shares of Company stock, including shares purchased by the Company on the open market for purposes of the Plan.

The Company recognizes compensation expense for stock awards over the vesting period of the award. The following table presents stock-based compensation expense recorded in operation and maintenance expense in the accompanying Consolidated Statements of Operations and Comprehensive Income for the three and nine months ended September 30, 2014 and 2013:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Stock options	$ 632	$ 628	$ 1,989	$ 2,480
Restricted stock units	2,008	1,681	7,248	6,015
Employee stock purchase plan	148	145	433	421
Stock-based compensation in operation and maintenance expense	2,788	2,454	9,670	8,916
Income tax benefit	(1,087)	(957)	(3,771)	(3,477)
After-tax stock-based compensation expense	$ 1,701	$ 1,497	$ 5,899	$ 5,439

There were no significant stock-based compensation costs capitalized during the nine months ended September 30, 2014 and 2013, respectively.

Stock Options

In the first nine months of 2014, the Company granted non-qualified stock options to certain employees under the Plan. The stock options vest ratably over the three-year service period beginning January 1, 2014. These awards have no performance vesting conditions and the grant date fair value is amortized through expense over the requisite service period using the straight-line method.

The following table presents the weighted-average assumptions used in the Black-Scholes option-pricing model and the resulting weighted-average grant date fair value per share of stock options granted through September 30, 2014:

Dividend yield	2.55%
Expected volatility	17.75%
Risk-free interest rate	1.06%
Expected life (years)	3.6
Exercise price	$ 44.29
Grant date fair value per share	$ 4.57

Stock options granted under the Plan have maximum terms of seven years, vest over periods ranging from one to three years, and are granted with exercise prices equal to the market value of the Company's common stock on the date of grant. As of September 30, 2014, $2,241 of total unrecognized compensation cost related to the non-vested stock options is expected to be recognized over the weighted-average period of 1.2 years.

The table below summarizes stock option activity for the nine months ended September 30, 2014:

	Shares	Weighted-Average Exercise Price (per share)	Weighted-Average Remaining Life (years)	Aggregate Intrinsic Value
Options outstanding at January 1, 2014	2,055	$ 28.80		
Granted	491	44.29		
Forfeited or expired	(36)	39.29		
Exercised	(427)	25.36		
Options outstanding at September 30, 2014	2,083	$ 32.98	4.1	$ 31,773
Exercisable at September 30, 2014	1,243	$ 27.42	3.0	$ 25,862

The following table summarizes additional information regarding stock options exercised during the nine months ended September 30, 2014 and 2013:

	2014	2013
Intrinsic value	$ 8,775	$ 10,999
Exercise proceeds	10,831	15,499
Income tax benefit	2,634	3,138

Restricted Stock Units

During 2011, the Company granted selected employees 189 restricted stock units with internal performance measures and, separately, certain market thresholds. These awards vested in January 2014. The terms of the grants specified that if certain performance on internal measures and market thresholds was achieved, the restricted stock units would vest; if performance was surpassed, up to 175% of the target awards would be distributed; and if performance thresholds were not met, awards would be cancelled. In January 2014, an additional 113 restricted stock units were granted and distributed because performance thresholds were exceeded.

In the first nine months of 2014, the Company granted restricted stock units, both with and without performance conditions, to certain employees and non-employee directors under the Plan. The restricted stock units without performance conditions vest ratably over the three-year service period beginning January 1, 2014 and the restricted stock units with performance conditions vest ratably over the three-year performance period beginning January 1, 2014 (the "Performance Period"). Distribution of the performance shares is contingent upon the achievement of internal performance measures and, separately, certain market thresholds over the Performance

Period. The restricted stock units granted with service-only conditions and those with internal performance measures are valued at the market value of the Company's common stock on the date of grant. The restricted stock units granted with market conditions are valued using a Monte Carlo model.

Weighted-average assumptions used in the Monte Carlo simulation are as follows for restricted stock units with market conditions granted through September 30, 2014:

Expected volatility	17.78%
Risk-free interest rate	0.75%
Expected life (years)	3

The grant date fair value of the restricted stock unit awards that vest ratably and have market and/or performance and service conditions is amortized through expense over the requisite service period using the graded-vesting method. Restricted stock units that have no performance conditions are amortized through expense over the requisite service period using the straight-line method. As of September 30, 2014, $6,940 of total unrecognized compensation cost related to the non-vested restricted stock units is expected to be recognized over the weighted-average remaining life of 1.0 years.

The table below summarizes restricted stock unit activity for the nine months ended September 30, 2014:

	Shares	Weighted-Average Grant Date Fair Value (per share)
Non-vested total at January 1, 2014	539	$ 36.27
Granted	228	45.45
Performance share adjustment	113	30.34
Vested	(325)	31.77
Forfeited	(16)	41.24
Non-vested total at September 30, 2014	539	$ 41.47

The following table summarizes additional information regarding restricted stock units distributed during the nine months ended September 30, 2014 and 2013:

	2014	2013
Intrinsic value	$ 14,938	$ 13,983
Income tax benefit	1,592	2,049

If dividends are paid with respect to shares of the Company's common stock before the restricted stock units are distributed, the Company credits a liability for the value of the dividends that would have been paid if the restricted stock units were shares of Company common stock. When the restricted stock units are distributed, the Company pays the participant a lump sum cash payment equal to the value of the dividend equivalents accrued. The Company accrued dividend equivalents totaling $640 and $416 to retained earnings during the nine months ended September 30, 2014 and 2013, respectively.

Employee Stock Purchase Plan

Under the Nonqualified Employee Stock Purchase Plan (the "ESPP"), employees can use payroll deductions to acquire Company stock at the lesser of 90% of the fair market value of (a) the beginning or (b) the end of each three-month purchase period. As of September 30, 2014, there were 1,288 shares of common stock reserved for issuance under the ESPP. During the nine months ended September 30, 2014, the Company issued 75 shares under the ESPP.

Note 6: Long-Term Debt

The Company primarily issues long-term debt to fund capital expenditures at the regulated subsidiaries. The components of long-term debt are as follows:

	Rate	Weighted Average Rate	Maturity	September 30, 2014	December 31, 2013
Long-term debt of American Water Capital Corp. ("AWCC") (a)					
Private activity bonds and government funded debt					
Fixed rate	1.79%-6.25%	5.42%	2021-2040	$ 254,655	$ 330,732
Senior notes					
Fixed rate	3.40%-8.27%	5.44%	2016-2042	3,812,752	3,312,761
Long-term debt of other subsidiaries					
Private activity bonds and government funded debt					
Fixed rate	0.00%-6.20%	4.67%	2015-2041	814,025	863,716
Mortgage bonds					
Fixed rate	4.29%-9.71%	7.41%	2015-2039	676,500	676,500
Mandatorily redeemable preferred stock	8.47%-9.75%	8.61%	2019-2036	17,702	18,902
Capital lease obligations	12.17%	12.17%	2026	893	913
Long-term debt				5,576,527	5,203,524
Unamortized debt, net (b)				32,133	35,984
Interest rate swap fair value adjustment				3,527	4,724
Total long-term debt				$ 5,612,187	$ 5,244,232

(a) AWCC, which is a wholly-owned subsidiary of the Company, has a strong support agreement with its parent that, under certain circumstances, is the functional equivalent of a guarantee.

(b) Primarily fair value adjustments previously recognized in acquisition purchase accounting.

The Company issued the following long-term debt during 2014.

Company	Type	Rate	Maturity	Amount
American Water Capital Corp.	Senior notes—fixed rate	3.40%-4.30%	2025-2042	$ 500,000
Other subsidiaries (1)	Private activity bonds and government funded debt—fixed rate	0.00%-5.00%	2031-2033	10,474
Total issuances				$ 510,474

(1) Issuance includes $9,977 which was initially kept in trust pending the Company's certification that it has incurred qualifying capital expenditures. This amount has been presented as non-cash in the accompanying Consolidated Statements of Cash Flows.

The Company also assumed debt of $1,683 related to an acquisition in the second quarter of 2014.

The following long-term debt was retired through sinking fund payments and maturities during 2014:

Company	Type	Rate	Maturity	Amount
American Water Capital Corp.	Private activity bonds and government funded debt—fixed rate	6.00%-6.75%	2014-2031	$ 77,760
American Water Capital Corp.	Senior notes—fixed rate	6.00%	2039	9
Other subsidiaries (1)	Private activity bonds and government funded debt—fixed rate	0.00%-5.25%	2014-2041	60,165
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments			20
Total retirements and redemptions				$ 139,154

(1) Includes $1,215 of non-cash defeasance via the use of restricted funds

Interest income included in interest, net is summarized below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Interest income	$ 3,527	$ 2,935	$ 9,030	$ 8,615

The Company has an interest rate swap to hedge $100,000 of its 6.085% fixed-rate debt maturing 2017. The Company pays variable interest of six-month LIBOR plus 3.422%. The swap is accounted for as a fair-value hedge and matures with the fixed-rate debt in 2017.

The following table provides a summary of the derivative fair value balance recorded by the Company and the line item in the Consolidated Balance Sheets in which such amount is recorded:

Balance sheet classification	September 30, 2014	December 31, 2013
Regulatory and other long-term assets		
Other	$ 3,515	$ 4,776
Long-term debt		
Long-term debt	3,527	4,724

For derivative instruments that are designated and qualify as fair-value hedges, the gain or loss on the hedge instrument as well as the offsetting loss or gain on the hedged item attributable to the hedged risk are recognized in current net income. The Company includes the gain or loss on the derivative instrument and the offsetting loss or gain on the hedged item in interest expense as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Income statement classification	2014	2013	2014	2013
Interest, net				
Gain (loss) on swap	$ (1,058)	$ 385	$ (1,261)	$ (2,670)
Gain (loss) on borrowing	945	(247)	1,198	2,434
Hedge ineffectiveness	(113)	138	(63)	(236)

Note 7: Short-Term Debt

Short-term debt consists of commercial paper borrowings totaling $313,979 (net of discount of $21) at September 30, 2014 and $630,307 (net of discount of $193) at December 31, 2013. During the first nine months of 2014, the Company borrowed $35,000 with maturities greater than three months, and repaid $35,000 and $221,000 borrowed in 2014 and 2013, respectively, with maturities greater than three months.

Note 8: Income Taxes

The Company's estimated annual effective tax rate was 39.7% for the nine months ended September 30, 2014 and September 30, 2013, excluding various discrete items.

The Company's actual effective tax rates were as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Actual effective tax rate	40.6%	39.6%	40.1%	38.8%

Included in 2013 are discrete items including $3,274 of tax benefits recorded in the first quarter of 2013 associated with an entity reorganization within the Company's Market-Based Operations segment that allowed for the utilization of state net operating loss carryforwards and the release of a valuation allowance.

Current deferred tax assets increased in 2014 due to the expected utilization of certain tax attributes within the next 12 months.

Note 9: Pension and Other Postretirement Benefits

The following table provides the components of net periodic benefit costs:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Components of net periodic pension benefit cost				
Service cost	$ 7,943	$ 9,468	$ 23,830	$ 28,404
Interest cost	19,163	17,024	57,489	51,072
Expected return on plan assets	(23,709)	(22,108)	(71,128)	(66,322)
Amortization of:				
Prior service cost (credit)	181	181	543	543
Actuarial (gain) loss	(33)	9,293	(98)	27,878
Net periodic pension benefit cost	$ 3,545	$ 13,858	$ 10,636	$ 41,575
Components of net periodic other postretirement benefit cost				
Service cost	$ 2,764	$ 3,820	$ 8,293	$ 11,461
Interest cost	7,152	7,175	21,454	21,525
Expected return on plan assets	(6,875)	(7,571)	(20,625)	(22,713)
Amortization of:				
Prior service cost (credit)	(548)	(548)	(1,642)	(1,642)
Actuarial (gain) loss	(20)	2,782	(60)	8,346
Net periodic other postretirement benefit cost	$ 2,473	$ 5,658	$ 7,420	$ 16,977

The Company contributed $26,680 to its defined benefit pension plans in the first nine months of 2014 and expects to contribute $10,785 during the balance of 2014. In addition, the Company contributed $9,103 for the funding of its other postretirement plans in the first nine months of 2014 and expects to contribute $3,034 during the balance of 2014.

Note 10: Commitments and Contingencies

The Company is routinely involved in legal actions incident to the normal conduct of its business. At September 30, 2014, the Company has accrued approximately $3,200 as probable costs and it is reasonably possible that additional losses could range up to $31,100 for these matters. For certain matters, the Company is unable to estimate possible losses. The Company believes that damages or settlements recovered by plaintiffs in such claims or actions, if any, will not have a material adverse effect on the Company’s results of operations, financial position or cash flows, individually or in the aggregate.

The Company enters into agreements for the provision of services to water and wastewater facilities for the United States military, municipalities and other customers. The Company’s military services agreements expire between 2051 and 2064 and have remaining performance commitments as measured by estimated remaining contract revenue of $2,580,231 at September 30, 2014. The military contracts are subject to customary termination provisions held by the U.S. Federal Government prior to the agreed upon contract expiration. The Company’s Operations and Maintenance agreements with municipalities and other customers expire between 2015 and 2048 and have remaining performance commitments as measured by estimated remaining contract revenue of $882,176 at September 30, 2014. Some of the Company’s long-term contracts to operate and maintain a municipality’s, federal government’s or other party’s water or wastewater treatment and delivery facilities include responsibility for certain maintenance for some of those facilities, in exchange for an annual fee. Unless specifically required to perform certain maintenance activities, the maintenance costs are recognized when the maintenance is performed.

On October 13, 2014, the Company and the Utility Workers Union of America AFL-CIO entered into a settlement agreement designed to resolve a dispute between the Company and most of the labor unions which represent employees in the Regulated Businesses (the “Unions’) regarding the Company’s national benefit agreements. Among other things, the settlement agreement provides for a new 2014-2018 National Benefits Agreement that will be in effect generally until July 31, 2018. In addition, the Company agreed to make a $10 million lump-sum payment, to be distributed in accordance with procedures set forth in the settlement agreement among eligible employees represented by the Unions and affected by implementation of the Company’s last, best and final offer effective January 1, 2011. The majority of the distributions are expected to be used to reimburse employees for medical claims which were incurred during the relevant period and will be funded by the Group Insurance Plan for American Water Works Company, Inc. and Its Designated Subsidiaries and Affiliates - Active Employees VEBA (the “VEBA Trust”), to which the Company previously has made contributions. Therefore, amounts funded out of the VEBA Trust will not have an impact on our results of operations. The Unions approved the settlement agreement on October 30, 2014 and National Labor Relations Board (the “NLRB”) approved the settlement agreement on October 31, 2014. The NLRB advised the Company that it will dismiss its petition for enforcement filed in the United States Court of Appeals for the Seventh Circuit and close the case after the Company has substantially complied with its obligations under the settlement agreement to make the lump sum payment and to post a notice to empolyees agreeable to the Company and acceptable to the NLRB.

Note 11: Environmental Matters

The Company's water and wastewater operations are subject to federal, state, local and foreign requirements relating to environmental protection, and as such, the Company periodically becomes subject to environmental claims in the normal course of business. Environmental expenditures that relate to current operations or provide a future benefit are expensed or capitalized as appropriate. Remediation costs that relate to an existing condition caused by past operations are accrued, on an undiscounted basis, when it is probable that these costs will be incurred and can be reasonably estimated. Remediation costs accrued amounted to $2,200 and $3,300 at September 30, 2014 and December 31, 2013, respectively. The accrual relates to a conservation agreement entered into by a subsidiary of the Company with the National Oceanic and Atmospheric Administration ("NOAA") requiring the Company to, among other provisions, implement certain measures to protect the steelhead trout and its habitat in the Carmel River watershed in the state of California. The Company has agreed to pay $1,100 annually from 2010 through 2016. The Company pursues recovery of incurred costs through all appropriate means, including regulatory recovery through customer rates. The Company's regulatory assets at September 30, 2014 and December 31, 2013 include $7,791 and $8,027, respectively, related to the NOAA agreement.

Note 12: Earnings per Common Share

Earnings per share is calculated using the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security. The Company has participating securities related to restricted stock units, granted under the Company's 2007 Omnibus Equity Compensation Plan, that earn dividend equivalents on an equal basis with common shares. In applying the two-class method, undistributed earnings are allocated to both common shares and participating securities.

The following is a reconciliation of the Company's income from continuing operations, income (loss) from discontinued operations and net income and weighted-average common shares outstanding for calculating basic earnings per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Basic	**2014**	**2013**	**2014**	**2013**
Income from continuing operations	$ 156,608	$ 149,909	$ 335,895	$ 309,723
Income (loss) from discontinued operations, net of tax	(4,423)	756	(6,288)	(152)
Net income	152,185	150,665	329,607	309,571
Less: Distributed earnings to common shareholders	55,664	50,007	161,439	99,929
Less: Distributed earnings to participating securities	17	19	49	41
Undistributed earnings	96,504	100,639	168,119	209,601
Undistributed earnings allocated to common shareholders	96,478	100,598	168,070	209,520
Undistributed earnings allocated to participating securities	26	41	49	81
Total income from continuing operations available to common shareholders, basic	$ 156,565	$ 149,849	$ 335,797	$ 309,601
Total income available to common shareholders, basic	$ 152,142	$ 150,605	$ 329,509	$ 309,449
Weighted-average common shares outstanding, basic	178,992	177,965	178,800	177,671
Basic earnings per share: (a)				
Income from continuing operations	$ 0.87	$ 0.84	$ 1.88	$ 1.74
Income (loss) from discontinued operations, net of tax	$ (0.02)	$ 0.00	$ (0.04)	$ (0.00)
Net income	$ 0.85	$ 0.85	$ 1.84	$ 1.74

(a) Earnings per share amounts are computed independently for income from continuing operations, income (loss) from discontinued operations and net income. As a result, the sum of per-share amounts from continuing operations and discontinued operations may not equal the total per-share amount for net income.

Diluted earnings per common share is based on the weighted-average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents related to the restricted stock units, stock options, and employee stock purchase plan. The dilutive effect of the common stock equivalents is calculated using the treasury stock method and expected proceeds on vesting of the restricted stock units, exercise of the stock options and purchases under the employee stock purchase plan.

The following is a reconciliation of the Company's income from continuing operations, income (loss) from discontinued operations and net income and weighted-average common shares outstanding for calculating diluted earnings per share:

	Three Months Ended September 30,		Nine Months Ended September 30,	
Diluted	**2014**	**2013**	**2014**	**2013**
Total income from continuing operations available to common shareholders, basic	$ 156,565	$ 149,849	$ 335,797	$ 309,601
Income (loss) from discontinued operations, net of tax	(4,423)	756	(6,288)	(152)
Total income available to common shareholders, basic	152,142	150,605	329,509	309,449
Undistributed earnings for participating securities	26	41	49	81
Total income from continuing operations available to common shareholders, diluted	$ 156,591	$ 149,890	$ 335,846	$ 309,682
Total income available to common shareholders, diluted	$ 152,168	$ 150,646	$ 329,558	$ 309,530
Weighted-average common shares outstanding, basic	178,992	177,965	178,800	177,671
Common stock equivalents:				
Restricted stock units	497	502	460	473
Stock options	458	685	462	760
Employee stock purchase plan	1	2	1	2
Weighted-average common shares outstanding, diluted	179,948	179,154	179,723	178,906
Diluted earnings per share (a)				
Income from continuing operations	$ 0.87	$ 0.84	$ 1.87	$ 1.73
Income (loss) from discontinued operations, net of tax	$ (0.02)	$ 0.00	$ (0.03)	$ (0.00)
Net income	$ 0.85	$ 0.84	$ 1.83	$ 1.73

(a) Earnings per share amounts are computed independently for income from continuing operations, income (loss) from discontinued operations and net income. As a result, the sum of per-share amounts from continuing operations and discontinued operations may not equal the total per-share amount for net income.

The following potentially dilutive common stock equivalents were not included in the earnings per share calculations because they were anti-dilutive:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	**2013**	**2014**	**2013**
Stock options	49	330	334	330
Restricted stock units where certain performance conditions were not met	53	88	53	89

Note 13: Fair Value of Assets and Liabilities

Fair Value of Financial Instruments

The Company used the following methods and assumptions to estimate its fair value disclosures for financial instruments:

Current assets and current liabilities—The carrying amounts reported in the accompanying Consolidated Balance Sheets for current assets and current liabilities, including revolving credit debt, due to the short-term maturities and variable interest rates, approximate their fair values.

Preferred stock with mandatory redemption requirements and long-term debt—The fair values of preferred stock with mandatory redemption requirements and long-term debt are categorized within the fair value hierarchy based on the inputs that are used to value each instrument. The fair value of long-term debt classified as Level 1 is calculated using quoted prices in active markets. Level 2 instruments are valued using observable inputs and Level 3 instruments are valued using observable and unobservable inputs. The fair values of instruments classified as Level 2 and 3 are determined by a valuation model that is based on a conventional discounted cash flow methodology and utilizes assumptions of current market rates. As a majority of the Company's debts do not trade in active markets, the Company calculated a base yield curve using a risk-free rate (a U.S. Treasury securities yield curve) plus a credit spread that is based on the following two factors: an average of the Company's own publicly-traded debt securities and the current market rates for U.S. Utility A- debt securities. The Company used these yield curve assumptions to derive a base yield for the Level 2 and Level 3 securities. Additionally, the Company adjusted the base yield for specific features of the debt securities including call features, coupon tax treatment and collateral for the Level 3 instruments.

The carrying amounts (including fair value adjustments previously recognized in acquisition purchase accounting) and fair values of the financial instruments are as follows:

		At Fair Value as of September 30, 2014			
Recurring Fair Value Measures	**Carrying Amount**	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 17,608	$ 0	$ 0	$ 22,255	$ 22,255
Long-term debt (excluding capital lease obligations)	5,611,294	2,901,707	1,479,866	2,096,293	6,477,866

		At Fair Value as of December 31, 2013			
Recurring Fair Value Measures	**Carrying Amount**	**Level 1**	**Level 2**	**Level 3**	**Total**
Preferred stock with mandatory redemption requirements	$ 18,827	$ 0	$ 0	$ 22,795	$ 22,795
Long-term debt (excluding capital lease obligations)	5,224,492	2,263,355	1,462,404	2,057,506	5,783,265

Included in the long-term debt carrying amount above is a fair value adjustment related to the Company's interest rate swap fair value hedge, which is classified as Level 2 within the fair value hierarchy.

Recurring Fair Value Measurements

The following table presents assets and liabilities measured and recorded at fair value on a recurring basis and their level within the fair value hierarchy as of September 30, 2014 and December 31, 2013, respectively:

	At Fair Value as of September 30, 2014			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets				
Restricted funds	$ 37,283	$ 0	$ 0	$ 37,283
Rabbi trust investments	0	666	0	666
Deposits	1,318	0	0	1,318
Mark-to-market derivative asset	0	3,515	0	3,515
Total assets	38,601	4,181	0	42,782
Liabilities				
Deferred compensation obligation	0	11,548	0	11,548
Mark-to-market derivative liability	0	1,068	0	1,068
Total liabilities	0	12,616	0	12,616
Total net assets (liabilities)	$ 38,601	$ (8,435)	$ 0	$ 30,166

	At Fair Value as of December 31, 2013			
Recurring Fair Value Measures	**Level 1**	**Level 2**	**Level 3**	**Total**
Assets				
Restricted funds	$ 29,259	$ 0	$ 0	$ 29,259
Rabbi trust investments	0	444	0	444
Deposits	1,901	0	0	1,901
Mark-to-market derivative asset	0	4,776	0	4,776
Total assets	31,160	5,220	0	36,380
Liabilities				
Deferred compensation obligation	0	11,928	0	11,928
Mark-to-market derivative liability	0	1,276	0	1,276
Total liabilities	0	13,204	0	13,204
Total net assets (liabilities)	$ 31,160	$ (7,984)	$ 0	$ 23,176

Restricted funds—The Company's restricted funds primarily represent proceeds received from financings for the construction and capital improvement of facilities and from customers for future services under operations and maintenance projects. The proceeds of these financings are held in escrow until the designated expenditures are incurred.

Rabbi trust investments—The Company's rabbi trust investments consist primarily of fixed income investments from which supplemental executive retirement plan benefits are paid. The Company includes these assets in other long-term assets.

Deposits—Deposits include escrow funds and certain other deposits held in trust. The Company includes cash deposits in other current assets.

Deferred compensation obligations—The Company's deferred compensation plans allow participants to defer certain cash compensation into notional investment accounts. The Company includes such plans in other long-term liabilities. The value of the Company's deferred compensation obligations is based on the market value of the participants' notional investment accounts. The notional investments are comprised primarily of mutual funds, which are based on observable market prices.

Mark-to-market derivative asset and liability—The Company utilizes fixed-to-floating interest-rate swaps, typically designated as fair-value hedges, to achieve a targeted level of variable-rate debt as a percentage of total debt. The Company also employs derivative financial instruments in the form of variable-to-fixed interest rate swaps, classified as economic hedges, in order to fix the interest cost on some of its variable-rate debt. The Company uses a calculation of future cash inflows and estimated future outflows, which are discounted, to determine the current fair value. Additional inputs to the present value calculation include the contract terms, counterparty credit risk, interest rates and market volatility.

Note 14: Segment Information

The Company has two operating segments that are also the Company's two reportable segments, referred to as Regulated Businesses and Market-Based Operations. The following table includes the Company's summarized segment information:

As of or for the Three Months Ended September 30, 2014

	Regulated Businesses	Market-Based Operations	Other	Consolidated
Net operating revenues	$ 753,701	$ 96,980	$ (4,512)	$ 846,169
Depreciation and amortization	99,120	1,447	6,222	106,789
Total operating expenses, net	434,912	79,915	(5,943)	508,884
Income from continuing operations before income taxes	258,539	17,634	(12,360)	263,813

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements included in this Form 10-Q, other than statements of historical fact, may constitute forward-looking statements. Forward-looking statements can be identified by the use of words such as “may,” “should,” “will,” “could,” “estimates,” “predicts,” “potential,” “continue,” “anticipates,” “believes,” “plans,” “expects,” “future” and “intends” and similar expressions. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance to differ from those projected in the forward-looking statements. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control and difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Factors that could cause or contribute to differences in results and outcomes from those in our forward-looking statements include, without limitation, those items discussed in the “Risk Factors” section or other sections in the Company’s annual report on Form 10-K (“Form 10-K”) for the year ended December 31, 2013 filed with the Securities and Exchange Commission (“SEC”). We undertake no obligation, other than as required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

General

American Water Works Company, Inc. (herein referred to as “American Water” or the “Company”) is the largest investor-owned United States water and wastewater utility company, as measured both by operating revenue and population served. Our primary business involves the ownership of water and wastewater utilities that provide water and wastewater services to residential, commercial, industrial and other customers. Our Regulated Businesses that provide these services are generally subject to economic regulation by state regulatory agencies (“PUCs”) in the states in which they operate. We report the results of these businesses in our Regulated Businesses segment. We also provide services that are not subject to economic regulation by the PUCs. We report the results of these businesses in our Market-Based Operations segment. For further description of our businesses see Item 1, “Business,” in our Form 10-K for the year ended December 31, 2013.

You should read the following discussion in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Quarterly Report on Form 10-Q and in our Form 10-K for the year ended December 31, 2013.

Overview

Financial Results. For the three months ended September 30, 2014, we reported net income of $152.2 million, or diluted earnings per share (“EPS”) of $0.85, compared to $150.7 million, or diluted EPS of $0.84, for the comparable period in 2013. Income from continuing operations was $156.6 million, or $0.87 per diluted share for the third quarter of 2014 compared to $149.9 million, or $0.84 per diluted share for the third quarter of 2013.

For the nine months ended September 30, 2014, we reported net income of $329.6 million, or diluted EPS of $1.83 compared to $309.6 million, or diluted EPS of $1.73, for the comparable period in 2013. Income from continuing operations was $335.9 million, or $1.87 per diluted share for the nine months ended September 30, 2014 compared to $309.7 million, or $1.73 per diluted share for the nine months ended September 30, 2013.

The increase in income from continuing operations for the three months ended September 30, 2014 compared to the same period in 2013 was due to favorable operating results from our Regulated Business segment due to higher revenues and lower operating expenses, partially offset by milder weather in the third quarter of 2014 compared to last year and the 2013 impact of retroactive price redeterminations for one of our military contracts in the Market-Based Operations. The increase in income from continuing operations for the nine months ended September 30, 2014 compared to the same period in 2013 was the result of favorable operating results from our Regulated Business segment reflecting higher revenue and lower operations and maintenance (“O&M”) expenses partially offset by higher depreciation expenses and higher costs resulting from the Freedom Industries chemical spill in West Virginia. Also contributing to the overall increase in income from continuing operations was lower interest expense for the both the three and nine month periods ended September 30, 2014 compared to the same periods in the prior year.

During the third quarter of 2014, management was involved in discussions to sell our Terratec line of business, which is part of our Market-Based Operations segment. The sale is expected to close in the fourth quarter of 2014. The financial results of this entity have been reflected as discontinued operations for all periods presented. All financial information in this Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) reflects continuing operations, unless otherwise noted.

For 2014, our goals include actively addressing regulatory lag and promoting constructive regulatory frameworks, continuing to improve our regulated operation and maintenance ("O&M") efficiency ratio, making efficient use of our capital and expanding both our Regulated Businesses segment through focused acquisitions and/or organic growth and our Market-Based Operations segment through core growth, expanding markets and new offerings. In addition, we will continue to focus on our customer service by achieving established customer satisfaction and service quality targets. Regarding environmental sustainability, we are committed to maximizing our protection of the environment, reducing our carbon and waste footprints and water lost through leakage. The progress that we have made in the nine months of 2014 with respect to certain of these objectives is described below.

Promoting Constructive Regulatory Frameworks. On July 1, 2014, annualized revenues of $7.4 million resulting from infrastructure charges in our New Jersey subsidiary became effective.

In July 2014, a settlement with the Office of Ratepayer Advocates and other interveners was reached in our general rate case in California. The settlement, if approved, would provide $13.6 million in additional annualized revenues for 2015. The settlement also provides for escalation and attrition adjustments in 2016 and 2017 of $5.0 million and $6.3 million, respectively. The agreement is pending regulatory approval and is subject to change.

On September 2, 2014, our Missouri subsidiary filed for additional annualized revenues from infrastructure charges in the amount of $8.5 million.

The table below provides further details of annualized revenues, assuming a constant volume, resulting from rate authorizations granted in 2014:

	Annualized Rate Increases Granted	
	For the three months ended September 30, 2014	For the nine months ended September 30, 2014
	(In millions)	
State		
General Rate Cases		
New York	$ —	$ 1.2
Iowa	—	3.8
Total General Rate cases	$ —	$ 5.0
Infrastructure charges		
New York	$ —	$ 1.8
New Jersey	7.4	17.5
Missouri	—	3.7
Illinois	—	2.1
Tennessee	—	0.5
Total Infrastructure charges	$ 7.4	$ 25.6

On October 29, 2014, our Tennessee subsidiary filed for additional annualized revenue from infrastructure charges in the amount of $2.6 million.

As of October 31, 2014, we are awaiting final orders for general rate cases in Indiana and California, requesting additional annualized revenue of approximately $44.5 million, adjusted for the potential California settlement discussed above. There is no assurance that all or any portion, of these requests will be granted.

On October 22, 2014, the New Jersey Board of Public Utilities issued an order on the Consolidated Tax Adjustment ("CTA") in New Jersey. Historically, the CTA allocated a portion of our consolidated losses since 1991 as a reduction to utility rate base. The order reaffirmed the continued use of a CTA as a deduction to utility rate base; however, it approved changes in methodology, two of which are significant for our New Jersey subsidiary. First, the "look-back" period was limited to the most recent five calendar years rather than to 1991. Second, the consolidated losses will be allocated 25% to customers and 75% to the company rather than customers receiving 100% allocation. The Order is subject to a 45 day appeal period.

Continuing Improvement in O&M Efficiency Ratio for our Regulated Businesses. Our O&M efficiency ratio (a non-GAAP measure) is calculated on our Regulated Businesses' operations and is defined as operation and maintenance expense divided by operating revenues where both O&M and operating revenues are adjusted to eliminate the impact of purchased water. We also exclude the allocable portion of non-O&M support services costs, mainly depreciation and general taxes that are reflected in the Regulated Businesses segment as O&M costs but for consolidated financial reporting purposes are categorized within other line items in the

Statement of Operations. Our O&M efficiency ratio was 32.6% for the three months ended September 30, 2014, compared to 35.3% for the three months ended September 30, 2013. Our O&M efficiency ratio was 36.9% for the nine months ended September 30, 2014, compared to 38.5% for the nine months ended September 30, 2013. The improvement in our 2014 O&M efficiency ratio for the three months ended September 30, 2014 was primarily attributable to an increase in Regulated Businesses' revenue and a decrease in our Regulated Businesses O&M compared to the same period in 2013. For the nine months ended September 30, 2014, the improvement was primarily attributable to the increase in our Regulated Businesses' revenue compared to the same period in 2013.

We evaluate our operating performance using this measure because management believes it is a direct measure of the efficiency of our Regulated Businesses' operations. This information is intended to enhance an investor's overall understanding of our operating performance. The O&M efficiency ratio is not a measure defined under GAAP and may not be comparable to other companies' operating measures and should not be used in place of the GAAP information provided elsewhere in this report. The following table provides a reconciliation that compares O&M and operating revenues, as determined in accordance with GAAP, to those amounts utilized in the calculation of our O&M efficiency ratio for the three and nine months ended September 30, 2014 as compared to the same periods in 2013:

Regulated O&M Efficiency Ratio (a Non-GAAP Measure):

	For the three months ended September 30,		**For the nine months ended September 30,**	
	2014	**2013**	**2014**	**2013**
	(In thousands)			
Total O&M	$ 341,348	$ 337,674	$ 1,004,377	$ 962,853
Less:				
O&M—Market-Based Operations	77,401	59,682	204,460	172,684
O&M—Other	(14,329)	(14,618)	(40,307)	(43,674)
Total Regulated O&M	278,276	292,610	840,224	833,843
Less:				
Regulated purchased water expense	33,674	33,956	93,332	84,759
Allocation of internal O&M	9,936	7,988	29,472	26,132
Adjusted Regulated O&M (a)	$ 234,666	$ 250,666	$ 717,420	$ 722,952
Total Operating Revenues	$ 846,169	$ 822,190	$ 2,279,950	$ 2,172,694
Less:				
Operating revenues—Market-Based Operations	96,980	83,558	253,857	221,751
Operating revenues—Other	(4,512)	(4,459)	(13,353)	(13,282)
Total Regulated operating revenues	753,701	743,091	2,039,446	1,964,225
Less: Regulated purchased water expense*	33,674	33,956	93,332	84,759
Adjusted Regulated operating revenues (b)	$ 720,027	$ 709,135	$ 1,946,114	$ 1,879,466
Regulated O&M efficiency ratio (a)/(b)	32.6%	35.3%	36.9%	38.5%

* Calculation assumes purchased water revenues are equal to purchased water expenses.

Making Efficient Use of Capital. We made capital investments of approximately $313.7 million and $701.6 million during the three months and nine months ended September 30, 2014, respectively. Of this total year-to-date investment, approximately $695.4 million was for Company-funded capital improvements with the remaining $6.2 million for the acquisition of regulated water and/or wastewater systems. For the full-year of 2014, we estimate our total capital plan to be $1.0 billion, most of which will be allocated to upgrading our infrastructure and systems and we estimate up to an additional $15 million for acquisitions and strategic investment purposes.

Expanding Markets and Developing New Offerings. During the nine months ended September 30, 2014, our Regulated Businesses completed the purchase of five regulated water systems, one regulated wastewater system and three regulated water and wastewater systems. These acquisitions added approximately 2,100 water customers and 1,600 wastewater customers to our regulated operations. Also, as previously announced, in January 2014, our Military Services Group within our Market-Based Operations segment was awarded a contract for ownership, operation and maintenance of the water and wastewater systems at Hill Air Force Base in Utah. In August 2014, our Military Services Group was awarded a contract for ownership, operation and maintenance of the water and wastewater systems at Picatinny Arsenal in New Jersey. Additionally, during the nine months ended September 30, 2014, our Homeowner Services Group ("HOS") expanded its water and sewer line protection programs into Arkansas, Louisiana, Maine, Minnesota, New Hampshire, Oklahoma, Vermont and Wyoming.

Other Matters.

West Virginia Freedom Industries Chemical Spill. As noted in the Form 10-K for the year ended December 31, 2013, on January 9, 2014, a chemical storage tank owned by Freedom Industries, Inc. leaked 4-methylcyclohexane methanol, or MCHM, and PPH/DiPHH, a mix of polyglycol ethers, into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant in Charleston, West Virginia. As a result of this event, income before income taxes was reduced by $0.5 million and $11.4 million for the three and nine months ended September 30, 2014, respectively.

See Part II, Item 1, "Legal Proceedings" in this report for information regarding litigation and an investigation by the Public Service Commission of West Virginia relating to the Freedom Industries chemical spill. The Company and WVAWC believe that WVAWC has responded appropriately to, and has no responsibility for, the Freedom Industries chemical spill, and the Company, WVAWC and other Company-affiliated entities named in any of the lawsuits have valid, meritorious defenses to the lawsuits. The Company, WVAWC and the other Company affiliates intend to vigorously contest the lawsuits. Nevertheless, an adverse outcome in one or more of the lawsuits could have a material adverse effect on the Company's financial condition, results of operations, cash flows, liquidity and reputation. Moreover, WVAWC and the Company are unable to predict the outcome of the ongoing government investigations or any legislative initiatives that might affect water utility operations.

Labor Dispute Regarding National Benefits Agreement. The Company's Form 10-Q for the quarter ended June 30, 2014 describes a dispute between the Company and most of the labor unions representing employees in the Regulated Businesses (the "Unions") regarding the Company's national benefits agreement. On October 13, 2014, the Company and the Utility Workers Union of America AFL-CIO entered into a settlement agreement designed to resolve the dispute between the Company and the Unions. Among other things, the settlement agreement provides for a new 2014-2018 National Benefits Agreement that will be in effect generally until July 31, 2018. In addition, the Company agreed to make a $10 million lump-sum payment, to be distributed in accordance with procedures set forth in the settlement agreement among eligible employees represented by the Unions and affected by implementation of the Company's last, best and final offer effective January 1, 2011. The majority of the distributions are expected to be used to reimburse employees for medical claims arising during the relevant period and will be funded by the Group Insurance Plan for American Water Works Company, Inc. and Its Designated Subsidiaries and Affiliates - Active Employees VEBA (the "VEBA Trust"), to which the Company previously has made contributions. Therefore, amounts funded out of the VEBA Trust will not have an impact on earnings. The Unions approved the settlement agreement on October 30, 2014 and the National Labor Relations Board (the "NLRB") approved the settlement agreement on October 31, 2014. The NLRB advised the Company that it will dismiss its petition for enforcement filed in the United States Court of Appeals for the Seventh Circuit and close the case after the Company has substantially complied with its obligations under the settlement agreement to make the lump sum payment and to post a notice to employees agreeable to the Company and acceptable to the NLRB.

Consolidated Results of Operations and Changes from Prior Periods

The following is a discussion of the consolidated results of operations for the three and nine months ended September 30, 2014 compared to the three and nine months ended September 30, 2013:

Three Months Ended September 30, 2014 Compared to Three Months Ended September 30, 2013

Operating revenues. Consolidated operating revenues for the quarter increased $24.0 million, or 2.9%, compared to the same quarter last year. The increase is the result of higher revenues in our Regulated Businesses segment of $10.6 million, which is mainly attributable to rate increases, incremental revenues from surcharges, balancing accounts and acquisitions, partially offset by reduced consumption in 2014 compared to 2013, which we believe is the result of cooler and wetter weather conditions in 2014. Also, contributing to the higher revenues was a $13.4 million increase in our Market-Based Operations segment primarily due to incremental revenue from our military contracts as a result of increased construction type projects at Fort Polk as well as contract growth in our HOS. For further information, see the respective “Operating Revenues” discussions within the “Segment Results.”

Operation and maintenance. Consolidated O&M increased by $3.7 million, or 1.1%, compared to the same period in 2013. The increase is primarily due to higher O&M costs in our Market-Based Operations segment of $17.7 million, principally due to increased activity under our military contracts, corresponding with the increased revenue. This increase was largely offset by a $14.3 million decrease in O&M costs for our Regulated Businesses segment primarily due to lower production costs and lower employee-related costs. For further discussions on the changes in our Regulated and Market-Based segments’ O&M, see the respective “Operation and Maintenance” discussions within the “Segment Results.”

Depreciation and amortization. Depreciation and amortization expense increased by $4.3 million, or 4.2%, principally as a result of additional utility plant placed in service, including our Customer Information and Enterprise Asset Management systems that went into service during the second and fourth quarters of 2013.

General Taxes: General taxes increased $2.7 million or 4.7% due to higher property tax assessments in Pennsylvania and Kentucky.

Other income (expenses). Other expenses decreased by $1.4 million, or 1.9%, compared to the same period in the prior year. The change is primarily due to a reduction in interest expense resulting from interest savings as a result of our 2013 refinancings.

Provision for income taxes. Our consolidated provision for income taxes increased $8.8 million, or 9.0%, to $107.2 million for the three months ended September 30, 2014. The effective tax rates for the three months ended September 30, 2014 and 2013 were 40.6% and 39.6%, respectively. Included in the three months ended September 30, 2014 were $2.1 million of discrete tax items associated with uncertain tax positions.

Loss from discontinued operations, net of tax. As noted above, the financial results of our Terratec line of business within our Market-Based segment has been classified as discontinued operations for all periods presented. The increase in loss from discontinued operations, net of tax is primarily related to costs associated with the pending sale and an income tax valuation allowance and lower operating result for the quarter.

Nine Months Ended September 30, 2014 Compared to Nine Months Ended September 30, 2013

Operating revenues. Consolidated operating revenues increased $107.3 million, or 4.9%. The increase is the result of higher revenues in our Regulated Businesses segment of $75.2 million, mainly attributable to rate increases, incremental revenues from surcharges and balancing accounts, partially offset by reduced consumption in 2014, mainly due to the cooler and wetter weather in 2014 compared to 2013. Also contributing to the higher revenues was a $32.1 million increase in our Market-Based Operations segment primarily due to incremental revenue from our military contracts as a result of increased construction type projects, with the largest increases at Forts Polk and Leavenworth, and contract growth in our HOS. For further information, see the respective “Operating Revenues” discussions within the “Segment Results.”

Operation and maintenance. Consolidated O&M increased by $41.5 million, or 4.3%. The increase is primarily due to higher O&M costs in our Regulated Businesses segment of $6.4 million, principally due to increased production costs, uncollectible expense, maintenance expense and costs associated with the Freedom Industries chemical spill in West Virginia, partially offset by lower employee-related costs. The increase in our Market-Based Operations segment of $31.8 million was mainly from incremental costs related to increased activity under our military contracts, corresponding with the increased revenue. For further discussions on the changes in our Regulated Businesses and Market-Based Operations segments’ O&M, see the respective “Operation and Maintenance” discussions within the “Segment Results.”

Depreciation and amortization. Depreciation and amortization expense increased by $15.4 million, or 5.1%, principally as a result of additional utility plant placed in service, including our Customer Information and Enterprise Asset Management systems that were placed into service during the second and fourth quarters of 2013.

Other income (expenses). Other expenses decreased by $5.6 million, or 2.5% . The change is primarily due to a reduction in interest expense resulting from interest savings as a result of our 2013 refinancings, offset by a reduction in AFUDC which is mainly attributable to our Customer Information and Enterprise Asset Management systems being placed into service in the second and fourth quarters of 2013.

Provision for income taxes. Our consolidated provision for income taxes increased $28.4 million, or 14.5%. The effective tax rates for the nine months ended September 30, 2014 and 2013 were 40.1% and 38.8%, respectively. Included in the nine months ended September 30, 2014 were $2.0 million of discrete tax items associated with uncertain tax positions. The 2013 rate included a $3.3 million tax benefit associated with a legal structure reorganization in our Market-Based Operations segment. This strategic restructuring allowed us to utilize state net operating loss carryforwards prior to their expiration.

Loss from discontinued operations, net of tax. As noted above, the financial results of our Terratec line of business within our Market-Based segment has been classified as discontinued operations for all periods presented. The increase in loss from discontinued operations, net of tax is primarily related to costs associated with the pending sale and an income tax valuation allowance and lower operating results.

Segment Results

We have two operating segments that are also our reportable segments: the Regulated Businesses and the Market-Based Operations. We evaluate the performance of our segments and allocate resources based on several factors, with the primary measure being income before income taxes.

Regulated Businesses Segment

The following table summarizes certain financial information for our Regulated Businesses for the periods indicated:

	For the three months ended September 30,			For the nine months ended September 30,		
	2014	2013	Increase (Decrease)	2014	2013	Increase (Decrease)
			(In thousands)			
Operating revenues	$ 753,701	$ 743,091	$ 10,610	$ 2,039,446	$ 1,964,225	$ 75,221
Operation and maintenance expense	278,276	292,610	(14,334)	840,224	833,843	6,381
Operating expenses, net	434,912	442,231	(7,319)	1,302,298	1,277,264	25,034
Income from continuing operations before income taxes	258,539	240,977	17,562	555,985	509,765	46,220

Operating revenues. Our primary business involves the ownership of water and wastewater utilities that provide services to residential, commercial, industrial and other customers. This business generally is subject to PUC economic regulation, and our results of operations are impacted significantly by rates authorized by the PUCs in the states in which we operate.

Operating revenues increased by $10.6 million, or 1.4%, for the quarter ended September 30, 2014, as compared to the same period in 2013. The increase in revenues is principally due to incremental revenues of approximately $23.0 million of rate increases resulting from rate authorizations for a number of our operating companies. Additionally, revenue increased by $1.8 million due to increased surcharges and balancing accounts and approximately $3.7 million of incremental revenues attributable to acquisitions. The most significant contributor to the increase in revenues from acquisitions was Dale Service Corporation (“Dale”), which was acquired by our Virginia subsidiary in the fourth quarter of 2013. Partially offsetting these increases was a decrease in revenues of approximately $18.7 million as a result of lower demand, of which a large portion is believed to be the result of cooler and wetter weather this year compared to last year.

Operating revenues increased by $75.2 million, or 3.8%, for the nine months ended September 30, 2014, as compared to the same period in 2013. The increase in revenues is principally due to incremental revenues of approximately $63.7 million attributable to rate increases from rate authorizations for a number of our operating companies partially offset by a reduction in consumption levels of approximately $11.5 million. As previously mentioned, we believe a large portion of this consumption decrease is the result of cooler and wetter weather this year compared to last year. Additionally, revenue increased by $10.2 million due to increased surcharges and balancing accounts and approximately $10.5 million as a result of 2013 acquisitions. The most significant contributor to the increase in revenues from acquisitions was Dale.

The following table provides information regarding the Regulated Businesses' for the periods indicated:

	For the three months ended September 30,							
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	Operating Revenues (dollars in thousands)				Billed Water Sales Volume (gallons in millions)

Wastewater service revenues	69,721	60,955	8,766	14.4%				
Other revenues	37,644	34,480	3,164	9.2%				
	$2,039,446	$1,964,225	$ 75,221	3.8%				

Water Services – Water service operating revenues for the three months ended September 30, 2014 totaled $717.3 million, a $7.3 million increase, or 1.0%, over the same period of 2013. For the nine months ended September 30, 2014, these revenues increased $63.3 million, or 3.4%, compared to the nine months ended September 30, 2013. As described above, the increases for both the three and nine months ended September 30, 2014 are primarily due to rate increases, incremental revenues associated with surcharges and amortization of balancing accounts and recent acquisitions. Also, it should be noted that the mix between billed revenues and unbilled revenues for the three and nine months ended September 30, 2014, as compared to the same periods in 2013, has changed. This change is principally the result of the implementation of our Customer Information System ("CIS") as part of Phase II of our business transformation project. At December 31, 2013, unbilled revenues were significantly higher than historical levels due to billing delays in certain accounts. During the first quarter of 2014, we addressed a majority of these delayed billings. Therefore, as a result, the change in unbilled water revenue for the three and nine-month periods ended September 30, 2014, compared to the same periods in 2013, decreased by $15.4 million and $36.4 million, respectively, with corresponding increases in billed revenues.

Wastewater services – Our subsidiaries provide wastewater services in eleven states. Revenues from these services increased $2.3 million, or 11.3%, and $8.8 million, or 14.4%, for the three and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. The increase is primarily attributable to the Dale acquisition in the fourth quarter of 2013.

Other revenues – Other revenues, which include such items as reconnection charges, initial application service fees, certain rental revenues, revenue collection services for others and similar items, increased $1.0 million, or 8.2%, and $3.2 million, or 9.2%, for the three and nine months ended September 30, 2014, respectively. The increase for the three months ended September 30, 2014 is principally due to the additional surcharge revenues. The nine-month period increase is primarily due to $2.4 million in insurance proceeds for business interruption as a result of Hurricane Sandy in addition to an increase in late payment fees.

Operation and maintenance expense. Operation and maintenance expense decreased $14.3 million, or 4.9%, and increased $6.4 million, or 0.8%, for the three and nine months ended September 30, 2014, respectively, compared to the same periods in 2013.

The following table provides information regarding operation and maintenance expense for the three and nine months ended September 30, 2014 and 2013, by major expense category:

	For the three months ended September 30,				For the nine months ended September 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Production costs	$ 79,455	$ 82,093	$ (2,638)	(3.2%)	$ 222,855	$ 207,698	$ 15,157	7.3%
Employee-related costs	106,672	114,127	(7,455)	(6.5%)	321,452	342,611	(21,159)	(6.2%)
Operating supplies and services	53,204	54,215	(1,011)	(1.9%)	163,460	163,998	(538)	(0.3%)
Maintenance materials and supplies	15,421	15,357	64	0.4%	53,581	47,733	5,848	12.3%
Customer billing and accounting	15,420	16,193	(773)	(4.8%)	44,707	38,380	6,327	16.5%
Other	8,104	10,625	(2,521)	(23.7%)	34,169	33,423	746	2.2%
Total	$ 278,276	$ 292,610	$ (14,334)	(4.9%)	$ 840,224	$ 833,843	$ 6,381	0.8%

Production costs by major expense type were as follows:

	For the three months ended September 30,				For the nine months ended September 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Purchased Water	$ 33,674	$ 33,956	$ (282)	(0.8%)	$ 93,332	$ 84,759	$ 8,573	10.1%
Fuel and Power	25,890	25,990	(100)	(0.4%)	71,025	66,227	4,798	7.2%
Chemicals	12,521	15,063	(2,542)	(16.9%)	35,316	36,997	(1,681)	(4.5%)
Waste Disposal	7,370	7,084	286	4.0%	23,182	19,715	3,467	17.6%
Total	$ 79,455	$ 82,093	$ (2,638)	(3.2%)	$ 222,855	$ 207,698	$ 15,157	7.3%

Production costs decreased by $2.6 million, or 3.2%, for the three months ended September 30, 2014 and increased by $15.1 million, or 7.3%, for the nine months ended September 30, 2014. The decrease for the three month period was primarily due to a $1.8 million reversal of chemical expense resulting from a favorable litigation settlement. The increase for the nine month period was primarily due to increases in purchased water, fuel and power costs and waste disposal. Partially offsetting these increases was a decrease in chemicals due to the credit discussed above. The purchased water increases principally reflect increased prices in our California subsidiary. Fuel and power costs increased due to increased customer demand and higher supplier prices in several of our operating facilities as well as incremental costs as a result of the Dale acquisition in the fourth quarter of 2013. The increase in waste disposal costs for both the three and nine month periods was principally due to an increase in the amount allowed by a cost recovery mechanism in one of our operating companies and the Dale acquisition. Also contributing to the nine month increase was incremental costs associated with the Freedom Industries chemical spill in West Virginia.

The following table provides information with respect to components of employee-related costs for the three and nine months ended September 30, 2014 and 2013:

	For the three months ended September 30,				For the nine months ended September 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Salaries and wages	$ 81,456	$ 81,211	$ 245	0.3%	$ 245,107	$ 241,617	$ 3,490	1.4%
Pensions	6,648	11,976	(5,328)	(44.5%)	20,268	36,604	(16,336)	(44.6%)
Group insurance	13,759	16,636	(2,877)	(17.3%)	41,889	50,283	(8,394)	(16.7%)
Other benefits	4,809	4,304	505	11.7%	14,188	14,107	81	0.6%
Total	$ 106,672	$ 114,127	$ (7,455)	(6.5%)	$ 321,452	$ 342,611	$ (21,159)	(6.2%)

The overall decrease in employee-related costs for the three and nine months ended September 30, 2014, compared to the same periods in 2013, was primarily due to a reduction in pension costs and postretirement benefit costs (which is included in group insurance expenses). These decreases are principally due to the change in assumptions used for the discount rate, which in turn resulted in decreased contributions. The decrease in contributions occurred principally at those of our regulated operating companies whose costs are recovered based on our funding policy, which is to fund at least the minimum amount required by the Employee Retirement Income Security Act of 1974. Partially offsetting these decreases was an increase in salaries and wages expense for the three and nine months ended September 30, 2014, compared to the same periods in 2013. For the three month period, the increase is the result of annual wage and overtime expense increases offset by higher capitalization rates as a result of increased capital projects. For the nine month period, the increase is the result of annual wage increases and increased overtime expense attributable to an increased number of main breaks as a result of the harsh winter weather conditions, offset by a reduction in incentive compensation due to a lower than expected payout for the 2013 incentive period as well as higher capitalization rates as a result of increased capital projects.

Maintenance materials and supplies, which include preventive maintenance and emergency repair costs, remained relatively unchanged for the three months ended September 30, 2014 compared to the same period in 2013. The increase of $5.8 million, or 12.3%, for the nine months ended September 30, 2014, compared to the same period in 2013, is primarily due to an increase in tank painting costs in one of our subsidiaries and increases in paving, backfilling and other repair costs, most of which are from the higher than normal main breaks in the first quarter of 2014 due to the abnormally harsh winter weather conditions experienced throughout our operating areas.

Customer billing and accounting expenses, which include uncollectible accounts expense, postage and other customer related expenses, decreased by $0.8 million, or 4.8%, for the three months ended September 30, 2014 and increased by $6.3 million, or 16.5%, for the nine months ended September 30, 2014. The increase for the nine-month period is primarily due to incremental uncollectible expense associated with an increase in customer accounts receivable attributable to the overall aging of receivables as well as rate increases. We believe the aging of our receivables is the result of temporary changes made in our collection process with the implementation of our new Customer Information System in 2013. As such we anticipate uncollectible expense will continue to be higher this year.

Other operation and maintenance expense includes casualty and liability insurance premiums and regulatory costs. The decrease in these costs for the three months ended September 30, 2014 compared to the prior year period was primarily driven by lower regulatory expenses as well as lower casualty insurance costs, as a result of historical claims experience, and retroactive premium adjustments. The increase for the nine-month period ended September 30, 2014 compared to the nine months ended September 30, 2013 was primarily due to an increase in our expected retroactive premiums, principally due to incremental claims associated with the Freedom Industries chemical spill in West Virginia, net of favorable forecasted experience for already existing claims. These retroactive premiums are based upon current facts and circumstances with respect to outstanding claims and are subject to change as the claims mature. The increase in insurance costs is partially offset by lower regulatory expenses in one of our operating subsidiaries compared to the same period in the prior year.

Operating expenses. The decrease in operating expenses, for the three and nine months ended September 30, 2014, is principally due to the decreases in operation and maintenance expense explained above and higher depreciation and amortization expense of $4.5 million and $16.1 million for the three and nine months ended September 30, 2014, respectively. The increase in depreciation and amortization is primarily due to additional utility plant placed in service, including CIS and our Enterprise Asset Management system.

Market-Based Operations

The following table provides financial information for our Market-Based Operations segment for the periods indicated:

	For the three months ended September 30,			For the nine months ended September 30,		
	2014	2013	Increase (Decrease)	2014	2013	Increase (Decrease)
	(In thousands)					
Operating revenues	$ 96,980	$ 83,558	$ 13,422	$ 253,857	$ 221,751	$ 32,106
Operation and maintenance expense	77,401	59,682	17,719	204,460	172,684	31,776
Operating expenses, net	79,915	62,957	16,958	212,075	181,526	30,549
Income from continuing operations before income taxes	17,634	21,457	(3,823)	43,593	42,570	1,023

Operating revenues. Revenues for the three and nine months ended September 30, 2014 increased $13.4 million and $32.1 million, respectively, compared to the same periods in 2013, as a result of incremental revenues in our Contract Operations Group (“ConOp”) and HOS lines of business. For the three and nine months ended September 30, 2014, our ConOp revenue increased $9.9

million and $19.8 million, respectively. These increases are primarily related to additional revenues from capital project activities associated with our military contracts. Partially offsetting these incremental revenues were the effects of retroactive price redeterminations for several of our military contracts which increased revenues by $3.4 million and $5.7 million for the three and nine months ended September 30, 2013, respectively. Other decreases in revenues in the 2014 periods compared to the prior year periods include terminated municipal and industrial operations and maintenance contracts. HOS revenues increased $3.5 million and $12.6 million for the three and nine months ended September 30, 2014, respectively. These increases were principally the result of contract growth, mainly through our New York City contracts, as well as expansion into other geographic areas and price increases for certain existing customers.

Operation and maintenance. Operation and maintenance expense increased $17.7 million, or 29.7%, and $31.8 million, or 18.4% for the three and nine months ended September 30, 2014, respectively.

The following table provides information regarding categories of operation and maintenance expense for the periods indicated:

	For the three months ended September 30,				For the nine months ended September 30,			
	2014	2013	Increase (Decrease)	Percentage	2014	2013	Increase (Decrease)	Percentage
	(Dollars in thousands)							
Production costs	$ 8,511	$ 9,333	$ (822)	(8.8%)	$ 26,372	$ 27,803	$ (1,431)	(5.1%)
Employee-related costs	15,993	14,673	1,320	9.0%	45,069	44,162	907	2.1%
Operating supplies and services	38,836	24,757	14,079	56.9%	93,518	67,611	25,907	38.3%
Maintenance materials and supplies	12,443	9,778	2,665	27.3%	34,753	30,161	4,592	15.2%
Other	1,618	1,141	477	41.8%	4,748	2,947	1,801	61.1%
Total	$ 77,401	$ 59,682	$ 17,719	29.7%	$ 204,460	$ 172,684	$ 31,776	18.4%

As noted in the table above, the primary factor contributing to the overall increase was an increase in operating supplies and services. This increase is mainly attributable to the increase in construction project activities under our military contracts and corresponds with the incremental revenues. Additionally, included in the three and nine months ended September 30, 2013 was the release of $3.8 million in loss contract reserves due to the resolution of certain outstanding issues and uncertainties. The increase in maintenance materials and supplies increased primarily due to higher HOS repair costs, which is attributable to new contracts.

Operating expense. The changes in operating expenses for the three and nine months ended September 30, 2014, compared to the same periods in 2013, are primarily due to the variances in the operation and maintenance expense explained above.

Liquidity and Capital Resources

For a general overview of our sources and uses of capital resources, see the introductory discussion under “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources,” contained in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2013.

We rely on our revolving credit facility, the capital markets and our cash flows from operations to fulfill our short-term liquidity needs, to issue letters of credit and to support our commercial paper program. We fund liquidity needs for capital investment, working capital and other financial commitments through cash flows from operations, public and private debt offerings, commercial paper markets and, to the extent necessary, our revolving credit facility. We regularly evaluate the capital markets and closely monitor the financial condition of the financial institutions with contractual commitments in the revolving credit facility.

In order to meet our short-term liquidity needs, we, through AWCC, our financing subsidiary, issue commercial paper, which is supported by the revolving credit facility. The revolving credit facility is also used, to a limited extent, to support our issuance of letters of credit and, from time to time, for direct borrowings. As of September 30, 2014, AWCC had no outstanding borrowings and $39.7 million of outstanding letters of credit under the revolving credit facility. As of September 30, 2014, AWCC had $1.2 billion available under the credit facility that we can use to fulfill our short-term liquidity needs, to issue letters of credit and support our $314.0 million outstanding commercial paper. We can provide no assurances that our lenders will meet their existing commitments or that we will be able to access the commercial paper or loan markets in the future on terms acceptable to us or at all.

Cash Flows from Operating Activities

Cash flows from operating activities primarily result from the sale of water and wastewater services and, due to the seasonality of demand, are generally greater during the third quarter of each fiscal year. Cash flows from continuing operating activities for the nine months ended September 30, 2014 were $840.9 million compared to $688.5 million for the nine months ended September 30, 2013.

The following table provides a summary of the major items affecting our cash flows from continuing operating activities for the nine months ended September 30, 2014 and 2013:

	Nine Months Ended September 30, 2014	Nine Months Ended September 30, 2013
	(In thousands)	
Net income	$ 329,607	$ 309,571
Add (subtract):		
Non-cash activities (1)	576,381	561,285
Changes in working capital (2)	(29,303)	(104,643)
Pension and postretirement healthcare contributions	(35,783)	(77,664)
Net cash flows provided by continuing operations	$ 840,902	$ 688,549

(1) Includes depreciation and amortization, provision for deferred income taxes, amortization of deferred investment tax credits, provision for losses on accounts receivable, allowance for other funds used during construction, (gain) loss on asset dispositions and purchases, pension and non-pension postretirement benefits expense, stock-based compensation expense and other non-cash items. Details of each component can be found in the Consolidated Statements of Cash Flows.

(2) Changes in working capital include changes to receivables and unbilled revenue, taxes receivable (including income taxes), other current assets, accounts payable, taxes accrued (including income taxes), interest accrued, change in book overdraft and other current liabilities.

The increase in cash flows from operating activities during the nine months ended September 30, 2014 as compared to the same period in 2013 reflects higher net income adjusted for non-cash activities, changes in working capital and a reduction in pension and postretirement benefit contributions. The increase in working capital for the nine months ended September 30, 2014 compared to the same period in the prior year is principally the result of increased processing of payments, accounts payable and accrued expenses in the first quarter of 2013, which was attributed to delays in payment of vendor invoices in the latter portion of 2012 as a result of the implementation of Phase I of our business transformation project.

Our working capital needs are primarily limited to funding the increase in our customer accounts receivable and unbilled revenues which is mainly associated with the revenue increase as a result of rate increases in our Regulated Businesses segment. We address this timing issue through the aforementioned liquidity funding mechanisms. Our cash collections for our Regulated Businesses' accounts receivable, some of which were unbilled as December 31, 2013, has showed improvement during 2014 compared to the second half of 2013. In the second half of 2013, the rate of cash collections, particularly in those states in which we implemented CIS in the second quarter of 2013, were slower than historical payment patterns. We believe this degradation in cash collections to be a result of certain process decisions, made as part of the CIS implementation, including the manual validation of bills prior to mailing to customers and decreased collection efforts. Therefore, we believe this situation to be only temporary in nature. Although cash collections increased during the first nine months of 2014, there are no assurances that the rate of cash collections will continue or be consistent with previous historical collection patterns.

Cash Flows from Investing Activities

The following table provides information regarding cash flows used in investing activities of continuing operations for the periods indicated:

	Nine Months Ended September 30, 2014	Nine Months Ended September 30, 2013
	(In thousands)	
Net capital expenditures	$ (664,859)	$ (664,975)
Proceeds from sale of assets and securities	804	749
Acquisitions	(6,053)	(16,554)
Other investing activities, net (1)	(51,221)	(38,300)
Net cash flows used in investing activities of continuing operations	$ (721,329)	$ (719,080)

(1) Includes removal costs from property, plant and equipment retirements, net and net funds released.

Cash Flows from Financing Activities

Our financing activities, primarily focused on funding construction expenditures, include the issuance of long-term and short-term debt, primarily through AWCC. We intend to access the capital markets on a regular basis, subject to market conditions. In addition, new infrastructure may be financed with customer advances (net of refunds) and contributions in aid of construction (net of refunds).

As previously noted, AWCC is a wholly-owned finance subsidiary of American Water Works Company, Inc. (the "parent company"). Based on the needs of our regulated subsidiaries and the parent company, AWCC borrows in the capital markets and then, through intercompany loans, provides proceeds of those borrowings to the regulated subsidiaries and the parent company. The regulated subsidiaries and the parent company are obligated to pay to AWCC their respective portion of principal and interest in the amount required to enable AWCC to meet its debt service obligations. Because the parent company borrowings are not a source of capital for the Company's regulated subsidiaries, the Company is not able to recover the interest charges on parent company debt through regulated water and wastewater rates.

We intend to utilize commercial paper for short-term liquidity, as commercial paper borrowings have historically been a more flexible and lower cost option. However, if necessary, we utilize our credit facility to complement our borrowings in the commercial paper market. In the event of disruptions in the money market sector of the debt capital markets, borrowings under our revolving credit facility may be more efficient and a lower cost alternative to commercial paper.

The following table provides information on long-term debt that was issued during the first nine months of 2014:

Company	Type	Rate	Maturity	Amount (In thousands)
American Water Capital Corp. (1)	Senior notes—fixed rate	3.40%-4.30%	2025-2042	$ 500,000
Other subsidiaries (2)	Private activity bonds and government funded debt—fixed rate	0.00%-5.00%	2031-2033	10,474
Total issuances				$ 510,474

(1) On August 14, 2014, AWCC closed on senior fixed rate notes. Proceeds used to refinance commercial paper borrowings and to finance redemptions of long-term debt.

(2) Proceeds from the above issuance, which were initially kept in trust, were received from New Jersey Environmental Infrastructure Trust and will be used to fund certain specific projects. The proceeds are held in trust pending our certification that we have incurred qualifying expenditures. These issuances have been presented as non-cash in the accompanying Consolidated Statements of Cash Flows. Subsequent releases of the funds will be reflected as net funds released in the cash flows from investing activities section of the Consolidated Statements of Cash Flows.

In addition to the above issuance, we also assumed $1.7 million of debt as a result of an acquisition.

The following long-term debt was retired through sinking fund provisions or payment at maturity during the first nine months of 2014:

Company	Type	Rate	Maturity	Amount (In thousands)
American Water Capital Corp.	Private activity bonds and government funded debt—fixed rate	6.00%-6.75%	2014-2031	$ 77,760
American Water Capital Corp.	Senior notes—fixed rate	6.00%	2039	9
Other subsidiaries (1)	Private activity bonds and government funded debt—fixed rate	0.00%-5.25%	2014-2041	60,165
Other subsidiaries	Mandatorily redeemable preferred stock	8.49%	2036	1,200
Other subsidiaries	Capital lease payments			20
Total retirements and redemptions				$ 139,154

(1) Includes $1.2 million of non-cash defeasance via the use of restricted funds.

In September 2014, AWCC issued a notice of redemption for $23.3 million of outstanding 6.25% Senior Notes with an original maturity of 2032. These notes will be retired on November 1, 2014. Also, in September, our New York subsidiary issued a notice of redemption for 4.9% notes with an original maturity of 2034. These notes were retired on October 1, 2014. Lastly, on October 9, 2014, we issued a notice of redemption for $59.6 million of outstanding 6.00% Senior Notes with an original maturity date of 2039. These notes will be retired on December 1, 2014.

From time to time, and as market conditions warrant, we may engage in additional long-term debt retirements via tender offers, open market repurchases or other transactions.

Credit Facilities and Short-Term Debt

Short-term debt balance, consisting of commercial paper, net of discount, amounted to $314.0 million at September 30, 2014.

The following table provides information as of September 30, 2014 regarding letters of credit sub-limits under our revolving credit facility and available funds under the revolving credit facility, as well as outstanding amounts of commercial paper and borrowings under our revolving credit facility.

	Credit Facility Commitment	Available Credit Facility Capacity	Letter of Credit Sub-limit	Available Letter of Credit Capacity	Outstanding Commercial Paper (Net of Discount)	Credit Line Borrowings
	(In thousands)					
September 30, 2014	$ 1,250,000	$ 1,210,337	$ 150,000	$ 110,337	$ 313,979	$ —

The weighted-average interest rate on short-term borrowings for the three months ended September 30, 2014 and 2013 was approximately 0.29% and 0.33%, respectively, and 0.29% and 0.36% for the nine months ended September 30, 2014 and 2013, respectively.

Capital Structure

The following table provides information regarding our capital structure for the periods presented:

	At September 30, 2014	At December 31, 2013
Total common stockholders' equity	45%	45%
Long-term debt and redeemable preferred stock at redemption value	51%	49%
Short-term debt and current portion of long-term debt	4%	6%
	100%	100%

Debt Covenants

Our debt agreements contain financial and non-financial covenants. To the extent that we are not in compliance, we, or our subsidiaries, may be restricted in the ability to pay dividends, issue new debt or access our revolving credit facility. For two of our smaller operating companies, we have informed our counterparties that we will provide only unaudited financial information at the subsidiary level, which resulted in technical non-compliance with certain of their reporting requirements. We do not believe this change will materially impact us. Our failure to comply with restrictive covenants under our credit facility could accelerate repayment obligations. Our long-term debt indentures contain a number of covenants that, among other things, limit the Company from issuing debt secured by the Company's assets, subject to certain exceptions.

Certain long-term notes and the revolving credit facility require us to maintain a ratio of consolidated debt to consolidated capitalization (as defined in the relevant documents) of not more than 0.70 to 1.00. As of September 30, 2014, our ratio was 0.55 to 1.00 and therefore we were in compliance with the covenant.

Security Ratings

Our access to the capital markets, including the commercial paper market, and respective financing costs in those markets, is directly affected by securities ratings of the entity that is accessing the capital markets. We primarily access the capital markets, including the commercial paper market, through AWCC. However, we have also issued debt through our regulated subsidiaries, primarily in the form of tax exempt securities or borrowings under state revolving funds, to lower our overall cost of debt.

The following table shows the Company's securities ratings as of September 30, 2014:

Securities	Moody's Investors Service	Standard & Poor's Ratings Service
Senior unsecured debt	Baa1	A-
Commercial paper	P2	A2

A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency, and each rating should be evaluated independently of any other rating. Security ratings are highly dependent upon our ability to generate cash flows in an amount sufficient to service our debt and meet our investment plans. We can provide no assurances that our ability to generate cash flows is sufficient to maintain our existing ratings. None of our borrowings are subject to default or prepayment if a downgrading of these security ratings, although such a downgrading could increase fees and interest charges under our credit facility.

As part of the normal course of business, we routinely enter into contracts for the purchase and sale of water, energy, fuels and other services. These contracts either contain express provisions or otherwise permit us and our counterparties to demand adequate assurance of future performance when there are reasonable grounds for doing so. In accordance with the contracts and applicable contract law, if our debt is downgraded by a credit rating agency, especially if such downgrade is to a level below investment grade, it is possible that a counterparty would attempt to reference such a downgrade as a basis for making a demand for adequate assurance of future performance, which could include a demand that we provide collateral to secure our obligations. We do not expect that our posting of collateral would have a material adverse impact on our results of operations, financial position or cash flows.

Dividends

Our board of directors’ practice has been to distribute to our shareholders a portion of our net cash provided by operating activities as regular quarterly dividends, rather than retaining that cash for other purposes. Since the dividends on our common stock are not cumulative, only declared dividends will be paid.

On March 3, 2014, we made a cash dividend payment of $0.28 per share to all shareholders of record as of February 3, 2014. On June 2, 2014 and September 2, 2014, we made quarterly cash dividend payments of $0.31 per share to all shareholders of record as of May 12, 2014 and August 11, 2014, respectively.

To permit our shareholders to take advantage of 2012 tax rates, the cash dividend payment that would have historically been paid in March 2013 was paid in December 2012. On June 3, 2013 and September 3, 2013, we made cash dividend payments of $0.28 per share to all shareholders of record as of May 24, 2013 and August 19, 2013, respectively.

On September 19, 2014 our board of directors declared a quarterly cash dividend payment of $0.31 per share payable on December 1, 2014 to all shareholders of record as of November 10, 2014.

Market Risk

There have been no significant changes to our market risk since December 31, 2013. For a discussion of our exposure to market risk, refer to Part II, Item 7A. “Quantitative and Qualitative Disclosures about Market Risk,” contained in our Form 10-K for the year ended December 31, 2013.

Application of Critical Accounting Policies and Estimates

Our financial condition, results of operations and cash flows are impacted by the methods, assumptions and estimates used in the application of critical accounting policies. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies and Estimates,” in our Form 10-K for the year ended December 31, 2013 for a discussion of our critical accounting policies.

Recent Accounting Pronouncements

See Part I, Item 1 – Financial Statements (Unaudited) – Note 2 – New Accounting Pronouncements in this Quarterly Report on Form 10-Q for a discussion of new accounting standards recently adopted or pending adoption.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are subject to market risks in the normal course of business, including changes in interest rates and equity prices. For further discussion of market risks see "Market Risk" in Part I, Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

American Water Works Company, Inc. maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 ("the Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our management, including the Chief Executive Officer and the Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) of the Exchange Act) as of September 30, 2014 pursuant to 15d-15(e) under the Exchange Act.

Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of September 30, 2014, our disclosure controls and procedures were effective at a reasonable level of assurance. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the three months ended September 30, 2014, that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The following information updates and amends the information provided in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 (the "Form 10-K") in Part I, Item 3, "Legal Proceedings," and in the Forms 10-Q for the quarters ended March 31, 2014 (the “First Quarter 2014 Form 10-Q”) and June 30, 2014 (the “Second Quarter 2014 Form 10-Q”), in each case in Part II, Item 1, "Legal Proceedings."

Alternative Water Supply in Lieu of Carmel River Diversions

The Form 10-K describes the Complaint for Declaratory Relief filed by California-American Water Company ("CAWC") against the Marina Coast Water District ("MCWD") and the Monterey County Water Resources Agency ("MCWRA"), which, following a transfer of the case, continued before the San Francisco County Superior Court. The Complaint for Declaratory Relief seeks a determination by the Court as to whether certain agreements related to the now-abandoned Regional Desalination Project (the “RDP Agreements”) are void as a result of the alleged conflict of interest of a former director of MCWRA (described in the Form 10-K), or remained valid. As noted in the First Quarter 2014 Form 10-Q, the former director entered a plea of no contest to, among other things, a felony violation of California Government Code section 1090 (“Section 1090”), which precludes public officials from being financially interested in any contract made by them in their official capacity. As also described in the First Quarter 2014 Form 10-Q, the Court ruled that CAWC's action was barred by the statute of limitations, but that MCWRA was subject to a longer statute of limitations under California Government Code section 1092(b), which invalidates contracts made in violation of Section 1090. As further described in the First Quarter 2014 Form 10-Q, MCWRA filed a Cross-Complaint against MCWD, contending that the RDP Agreements were void as a result of the former director's conduct and financial interest in the agreements.

On August 8, 2014, MCWRA filed a motion for summary judgment against MCWD with regard to both MCWRA's Cross-Complaint and the causes of action in MCWD's Cross-Complaint, which was filed on November 21, 2012 and was described in the Form 10-K. On November 3, 2014, the Court denied MCWRA’s motion with regard to MCWRA's Cross-Complaint, and granted the motion with regard to all but two counts in MCWD’s Cross-Complaint. The remaining issues in MCWD’s Cross-Complaint to be addressed by the Court pertain to the question of whether certain of the agreements involve financing obligations and, therefore, are subject to a 60 day statute of limitations that would preclude MCWRA’s Section 1090 action with regard to those agreements; the Court indicated that its earlier rulings in this matter did not address the contracts separately and, therefore, did not address these issues. A trial on the matter is scheduled for December 1-5, 2014.

The Form 10-K also describes CAWC's application with the California Public Utilities Commission ("CPUC") for approval of the Monterey Peninsula Water Supply Project (the "New Project"). The New Project includes a desalination plant north of the City of Marina with slant wells and related infrastructure proposed to be located on property owned by Lonestar California, Inc., Cemex, Inc., Cemex Construction Materials Pacific, LLC, RMC Pacific Materials LLC and/or affiliated entities (collectively, "Cemex").

A preliminary step to building the desalination plant is the installation by CAWC of a temporary test well to confirm the suitability of the property on which permanent intake wells will be located to draw water from under Monterey Bay. In CAWC's settlement agreements with 15 other parties that have intervened in the CPUC proceedings related to the New Project (described in the Form 10-K), the parties agreed that the preferred location to build a temporary test well is the Cemex property. Accordingly, beginning in 2012, CAWC commenced negotiations with Cemex to enable CAWC's purchase of a temporary easement for a test well and an option for a permanent easement for production wells if they were determined to be feasible. However, on September 4, 2014, the City of Marina denied CAWC's application for a coastal development permit to complete the test well. CAWC has appealed the City of Marina's decision to the California Coastal Commission (the "Coastal Commission") to secure approval to complete the test well. Nevertheless, Cemex has advised CAWC that it will no longer negotiate with regard to the easements unless and until CAWC secures approvals from the Coastal Commission. In response, on September 19, 2014, CAWC commenced litigation in the Monterey County Superior Court against Cemex. The litigation currently relates to CAWC's Complaint in Eminent Domain (the “Compliant”), seeking a condemnation of temporary easement that will enable CAWC to construct a temporary test well; CAWC's Ex Parte Application for Order Granting Prejudgment Possession (the "Application"), which would enable CAWC to possess a temporary easement prior to adjudication of the Complaint in Eminent Domain and CAWC's Verified Petition for Immediate Order Permitting Entry Onto Property Pursuant to Code of Civil Procedure Section 1245.010 (the "Petition") (essentially, an alternative action to the Complaint in Eminent Domain and the Application). Among other things, CAWC asserts that as a result of protocol agreed to with the U.S. Fish and Wildlife Service to protect the federally endangered snowy plower, and based on the birds' migratory habits, drilling for a test well must occur between October and February, and failure to timely obtain possession of the test well site will delay the New Project by a year. In addition, CAWC asserted that in order to obtain a coastal development permit from the Coastal Commission, it must demonstrate that it has a legal interest (i.e., the temporary easement) in the Cemex property.

In response to CAWC’s filings, Cemex and, by virtue of its filing of a Motion for Leave to Intervene, MCWD made several filings in opposition to the Complaint, the Application and the Petition. In addition to the allegations of Cemex and MCWD described below, each of Cemex and MCWD also made additional allegations, including some allegations similar to those made by the other.

Cemex has asserted a number of affirmative defenses to the Complaint, including an allegation that CAWC has failed to meaningfully investigate alternative public and private sites for the intake wells for the proposed desalination plant; the construction and operation of the test well will result in unnecessary and reasonable interference with Cemex's sand mining operations; and CAWC has not obtained certain required government approvals to construct the test well. In its opposition to the Application, Cemex's assertions include a claim that an emergency justifying an ex parte order does not exist because CAWC does not have the legal right to begin construction in 2014 even it were to gain a temporary easement. With regard to the Petition, Cemex has asserted, among other things, that CAWC seeks an order that is not permissible under the relevant California statutes, which Cemex claims permits only brief and innocuous rights of entry and not what it alleges is a taking of property by CAWC.

As noted above, MCWD has filed a Motion for Leave to Intervene in the actions related to the Cemex property. In the motion and other related filings, MCWD asserts that it supplies water to residents in the Marina and Ord Community service areas and pumps all of its water supply from groundwater wells situated in the Salinas Valley Groundwater Basin, which includes the Cemex property. MCWD further alleges that CAWC’s pumping from the proposed test well will impact MCWD's water rights and its ability to serve its customers. In addition, MCWD alleges that a portion of the Cemex property is subject to an agreement, to which MCWD is a party, that limits groundwater extraction from the property and that CAWC has failed to prove that the proposed use of the Cemex property is a compatible or more necessary use than MCWD’s use of the property.

CAWC has filed an opposition to MCWD's Motion for Leave to Intervene asserting, among other things, that CAWC is not seeking to use the Cemex property to pump any potable groundwater from the Salinas Valley Groundwater Basin; a primary purpose of the test well is to confirm that CAWC will draw over 96 percent seawater, and that any incidental amounts of highly salt-contaminated, "brackish" (non-potable) water will not have a material impact on any currently used water sources; the agreement relied on by MCWD has nothing to do with the easement sought by CAWC nor with the seawater CAWC seeks to pump from under the basin; MCWD has no property interest in the specific property sought to be taken, does not meet the statutory standards for permissive intervention, and has no direct interest in the easement CAWC seeks to condemn. In other responsive pleadings, CAWC challenged assertions made by Cemex and MCWD, while also characterizing them as collateral attacks that are not relevant to applicable eminent domain law; CAWC argued that the sole issue before the Court is whether CAWC has satisfied the procedural requirements of applicable eminent domain law to acquire a temporary easement over the Cemex property, which CAWC asserts it has done. A hearing on MCWD’s Motion for Leave to Intervene and on CAWC’s Application and Petition is scheduled for November 7, 2014.

The Form 10-K also references settlement agreements with a number of intervenors in CPUC proceedings with respect to the New Project. As noted in the Form 10-K, the settlement agreements will not take effect until, among other things, the CPUC certifies an environmental impact report for the proposed New Project and approves the settlement agreements. The report is now expected to be issued in the third quarter of 2015.

Water Treatment Residuals Disposal Matters

The Form 10-K describes CAWC's determination and self-reporting to the Sacramento County Environmental Management Department ("SCEMD") that it may have improperly disposed of water treatment residuals that are viewed as hazardous under California law from its Isleton treatment plant before July 2013.

After CAWC self-reported the possible violations, SCEMD conducted an extensive series of facility inspections during the third and fourth quarters of 2013. On September 19, 2014, SCEMD issued an Administrative Enforcement Order to CAWC, which, following negotiations between CAWC and SCEMD, was amended on October 21, 2014. The Amended Administrative Enforcement Order cited 14 violations of the California Health and Safety Code at CAWC's Isleton and Parksite (Sacramento) treatment plants. With regard to the Isleton plant, SCEMD found that CAWC failed to properly characterize some water treatment residuals, and consequentially improperly disposed of those materials and failed to comply with various other requirements that would have been triggered if the waste was properly characterized. With respect to the Parksite plant, SCEMD cited miscellaneous violations related to improper characterization, storage and handling of waste, as well as administrative deficiencies related to training and record keeping.

On October 24, 2014, CAWC and SCEMD entered into an Amended Stipulation and Order (the “Order”), which constitutes settlement of the violations cited by SCEMD. Under the Order, CAWC agreed to pay a penalty of $461,000 within 10 business days following the parties’ execution of the Order and to submit current and/or corrected Hazardous Materials Business Plans within 30 days following the parties’ execution of the Order for all CAWC sites in Sacramento County for which a current and/or corrected Hazardous Materials Business Plan was not on file with SCEMD.

West Virginia Elk River Chemical Spill

The Form 10-K and Forms 10-Q address, among other things, litigation relating to leakage of two substances from a chemical storage tank owned by Freedom Industries, Inc. into the Elk River near the West Virginia-American Water Company ("WVAWC") treatment plant intake in Charleston, West Virginia (the “Elk River Chemical Spill”). Among the actions described in the Second Quarter 2014 Form 10-Q is the consolidated class action complaint filed in the United States District Court for the Southern District of West Virginia against multiple individuals and corporate entities, including WVAWC, American Water Works Service Company, Inc. and the Company (collectively, the “American Water Defendants”). On September 5, 2014 and October 27, 2014, the Court entered scheduling orders, setting a schedule for discovery and class certification motions, culminating in a class certification hearing to be held on September 25, 2015. A trial date has not yet been set.

The Court has not yet acted upon the American Water Defendants’ motions to dismiss.

As also described in the Second Quarter 2014 Form 10-Q, on May 21, 2014, the Public Service Commission of West Virginia (the “PSC”) issued an Order initiating a General Investigation into certain issues relating to WVAWC's response to the Elk River Chemical Spill. Three parties have intervened in the proceeding, including the Consumer Advocate Division of the PSC and two attorney-sponsored groups, including one sponsored by some of the plaintiffs’ counsel involved in the civil litigation described above. WVAWC is subject to discovery from PSC staff and the intervenors as part of the General Investigation. Several disputes have arisen between the WVAWC and the intervenors regarding, among other things, the scope of the discovery and the maintenance of confidentiality with regard to certain WVAWC emergency planning documents. In order to address these disputes, the PSC extended the final hearing date to February 10-12, 2015.

Labor Dispute Regarding National Benefits Agreement

The Company’s Form 10-Q for the quarter ended June 30, 2014 describes a dispute between the Company and most of the labor unions which represent employees in the Regulated Businesses (the “Unions”) regarding the Company’s national benefits agreement. On October 13, 2014, the Company and the Utility Workers Union of America AFL-CIO entered into a settlement agreement designed to resolve the dispute between the Company and the Unions. Among other things, the settlement agreement provides for a new 2014-2018 National Benefits Agreement that will be in effect generally until July 31, 2018. In addition, the Company agreed to make a $10 million lump-sum payment, to be distributed in accordance with procedures set forth in the settlement agreement among eligible employees represented by the Unions and affected by implementation of the Company’s last, best and final offer effective January 1, 2011. The majority of the distributions are expected to be used to reimburse employees for medical claims which were incurred during the relevant period and will be funded by the Group Insurance Plan for American Water Works Company, Inc. and Its Designated Subsidiaries and Affiliates - Active Employees VEBA (the “VEBA Trust”), to which the Company previously has made contributions. Therefore, amounts funded out of the VEBA Trust will not have an impact on earnings. The Unions approved the settlement agreement on October 30, 2014 and the National Labor Relations Board (the “NLRB”) approved the settlement agreement on October 31, 2014. The NLRB advised the Company that it will dismiss its petition for enforcement filed in the United States Court of Appeals for the Seventh Circuit and close the case after the Company has substantially complied with its obligations under the settlement agreement to make the lump sum payment and to post a notice to employees agreeable to the Company and acceptable to the NLRB.

ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in the “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2013, and our other public filings, which could materially affect our business, financial condition or future results. There have been no material changes from risk factors previously disclosed in “Risk Factors” in the Company’s Form 10-K for the year ended December 31, 2013.

Section 2: EX-31.1 (EX-31.1)

Exhibit 31.1

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

(Pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended,
as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002)

I, Susan N. Story, certify that:

1. I have reviewed this quarterly report on Form 10-Q of American Water Works Company, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the consolidated financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant’s other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

> a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
>
> b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
>
> c) evaluated the effectiveness of the registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
>
> d) disclosed in this report any change in the registrant’s internal control over financial reporting that occurred during the registrant’s most recent fiscal quarter (the registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant’s internal control over financial reporting; and

5. The registrant’s other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant’s auditors and the audit committee of the registrant’s board of directors (or persons performing the equivalent functions):

> a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant’s ability to record, process, summarize and report financial information; and
>
> b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant’s internal control over financial reporting.

Item 7.01 Regulation FD Disclosure

On January 20, 2015, American Water Works Company, Inc.'s utility subsidiary, California-American Water Company ("CAWC"), announced a one-year extension in its Cost of Capital filing with the California Public Utilities Commission (the "CPUC").

CAWC, along with three other Class A water companies (California Water Service Company, Golden State Water Company, and San Jose Water Company) has reached an agreement with the CPUC to defer the next cost of capital application to March 31, 2016, having met the requirements put forth by the Executive Director of the CPUC. As part of the conditional approval, the four water companies agreed to forgo any adjustment to their authorized cost of capital in 2016, including any change that would otherwise have applied due to the water cost of capital adjustment mechanism. The result is that CAWC's current authorized cost of capital of 8.41% will continue in effect through December 31, 2016.

The information furnished pursuant to Item 7.01 of this Current Report shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or otherwise subject to the liabilities of that section, nor shall it be incorporated by reference into future filings by the Company under the Securities Act of 1933, as amended, or under the Securities Exchange Act of 1934, as amended, unless the Company expressly sets forth in such future filing that such information is to be considered "filed" or incorporated by reference therein.

Forward-Looking Statements

Certain statements in this presentation including, without limitation, 2015 earnings guidance and estimated revenues from rate cases and other government agency authorizations, are forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are predictions based on American Water's current expectations and assumptions regarding future events. Actual results could differ materially because of factors such as the decisions of governmental and regulatory bodies, including decisions to raise or lower rates; the timeliness of regulatory commissions' actions concerning rates and other matters; changes in laws, governmental regulations and policies, including environmental, health and water quality, and public utility regulations and policies; potential costs and liabilities of American Water for environmental matters associated with the operations of Keystone Clearwater Solutions, LLC; the outcome of litigation and government action including with respect to the Freedom Industries chemical spill in West Virginia; weather conditions, patterns or events or natural disasters, including drought or abnormally high rainfall, strong winds, coastal and intercoastal flooding, earthquakes, landslides, hurricanes and tornadoes, and cooler than normal temperatures; changes in customer demand for, and patterns of use of, water, such as may result from conservation efforts; its ability to appropriately maintain current infrastructure, including its technology systems, and manage the expansion of its business; its ability to obtain permits and other approvals for projects; changes in its capital requirements; its ability to control operating expenses and to achieve efficiencies in its operations; the intentional or unintentional acts of a third party, including contamination of its water supplies and attacks on its computer systems; its ability to obtain adequate and cost-effective supplies of chemicals, electricity, fuel, water and other raw materials that are needed for its operations; its ability to successfully acquire and integrate water and wastewater systems that are complementary to its operations; its ability to successfully expand its business, including concession arrangements and agreements for provision of water services in shale regions for exploration and production; cost overruns relating to improvements or the expansion of its operations; changes in general economic, business and financial market conditions; access to sufficient capital on satisfactory terms; fluctuations in interest rates; the effect of restrictive covenants or changes to credit ratings on its current or future debt that could increase its financing costs or affect its ability to borrow, make payments on debt or pay dividends; fluctuations in the value of benefit plan assets and liabilities that could increase financing costs and funding requirements; the ability to utilize its U.S. and state net operating loss carryforwards; migration of customers into or out of its service territories and the condemnation of its systems by municipalities using the power of eminent domain; difficulty in obtaining insurance at acceptable rates and on acceptable terms and conditions; its ability to retain and attract qualified employees; labor actions including work stoppages and strikes; the incurrence of impairment charges related to American Water's goodwill or other assets; and civil disturbance, terrorist threats or acts, or public apprehension about future disturbances or terrorist threats or acts.

For further information regarding risks and uncertainties associated with American Water's business, please refer to American Water's annual and quarterly SEC filings. The company undertakes no duty to update any forward-looking statement, except as otherwise required by the federal securities laws.

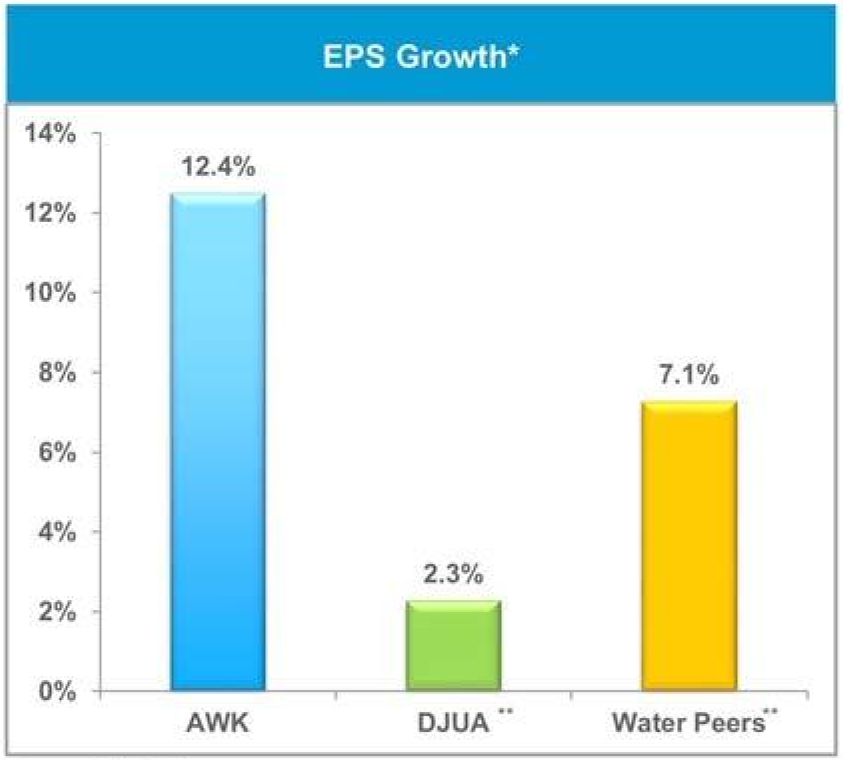
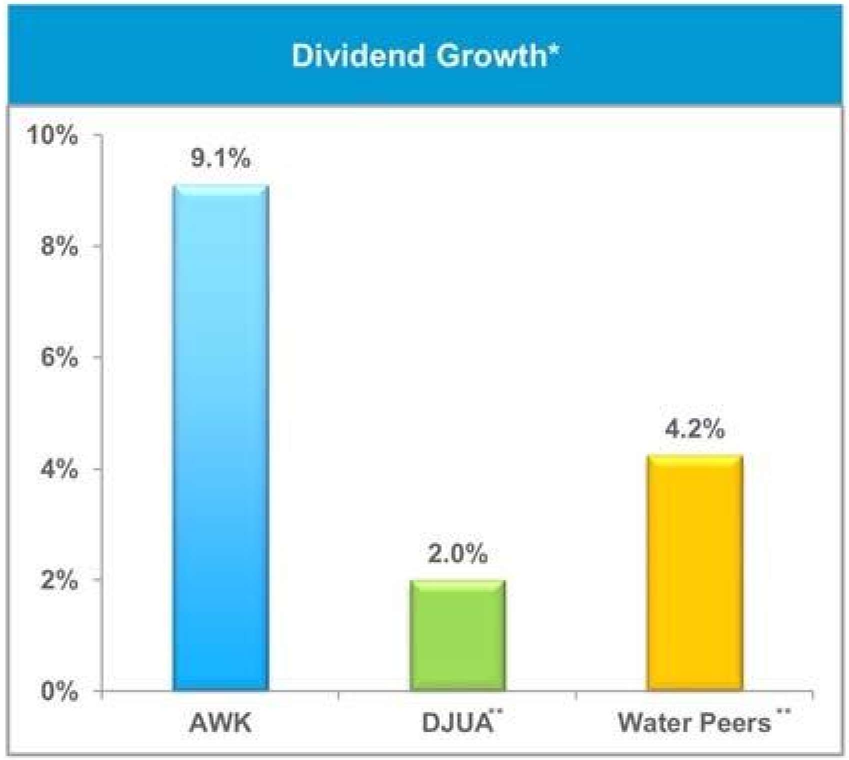
Utility Markets Today

Demonstrated Superior Performance vs Peers: 2010-2015

Results in Leading Total Shareholder Returns





Source: Factset

*2015 EPS and dividends are based on year-to-date actuals through September 30 plus fourth quarter Factset consensus estimates.

**DJUA includes: AEP , AES , AWK , CNP , D , DUK , ED , EIX , EXC , FE , NEE , NI , PCG , PEG , SO. Water peers include: AWR , ARTNA, CTWS , CWT , MSEX, SJW , WTR , YORW.

AMERICAN WATER

Leading Total Shareholder Return

$100 investment in AWK 5 years ago, would be worth over $260 today.

AMERICAN WATER

Why American Water?

		AWK
Growth	EPS growth 7-10%, over next 5 years*	✓ Top quartile
	Multi-decade investment needs	✓ Clear line of sight
	Fragmented market	✓ Water & wastewater
People & Business Model	Strong local presence and national scale	✓ Personalized economies of scale
	Regulatory expertise	✓ Seasoned state leaders
	Strong record of execution	✓ 2010-2015 EPS CAGR of 12.4%
	Broad and diversified experience	✓ Multi-utility backgrounds
	Strong bench strength	✓ Robust succession planning
Risk Profile	Smooth regulated capital deployment	✓ Flexible and sustainable
	Absence of federal economic regulation	✓ Unlike electrics and gas
	Geographic diversity	✓ Most diverse utility
	Market-based complementary businesses	✓ Regulated-like
Financial Strength	Dividend growth	✓ Top quartile
	Strong credit ratings/access to capital	✓ Top quartile
	Greater than $10 billion market cap	✓ Only water utility >$10B
	Strong cash flows	✓ No need to issue equity**

*Anchored from 2014, adjusted EPS
**Under normal operating conditions

Top-quartile Growth → Low Risk → Strong Financials → Best People → AWK

December 2015

AMERICAN WATER

Our Future: EPS Growth Target of 7-10% from 2016 – 2020

Our Regulated Business Remains the Foundation

- **Great investment opportunity**
- **Outstanding execution**
- **Best people in the industry**

**Anchored from adjusted FY 2014.*

Combined **200 Years** of regulated water utility experience!

Critical Need for Investments

- By 2020, 44% of U.S. pipe infrastructure to be classified as poor, very poor, or life elapsed…
  … We replace about 350 miles of pipe each year
- In USA 2 trillion gallons of treated water is lost each year…
  … Our water loss is 20% vs. industry average 25%
- 900 billion gallons of untreated sewage is discharged every year…
  …Invested $175M in wastewater infrastructure since 2010
- Nationwide $1 trillion is required in water and wastewater systems over the next 20 years…
  … Multi-decade investment need

Our **48,000 miles** of pipe would stretch around the world twice

AMERICAN WATER

Enabling Growth and Consolidation: Eight States

PENNSYLVANIA AMERICAN WATER

Act 11:

- HB 1294, Effective Feb 14, 2012
- Single tariff for water and wastewater
- Enables inclusion of wastewater rates into overall rates

NEW JERSEY AMERICAN WATER

Water Infrastructure Protection Act:

- S-2412, Effective Feb 5, 2015
- Streamlines the approval process for sales (no ballot question required)
- Third party appraisal for valuing water and wastewater assets

INDIANA AMERICAN WATER

Distressed Utility Acquisition Bill:

- House Enrolled Act 1319, Effective July 1, 2015
- Enables regulatory authority to approve purchase price cost differential recovery associated with troubled (distressed) utilities

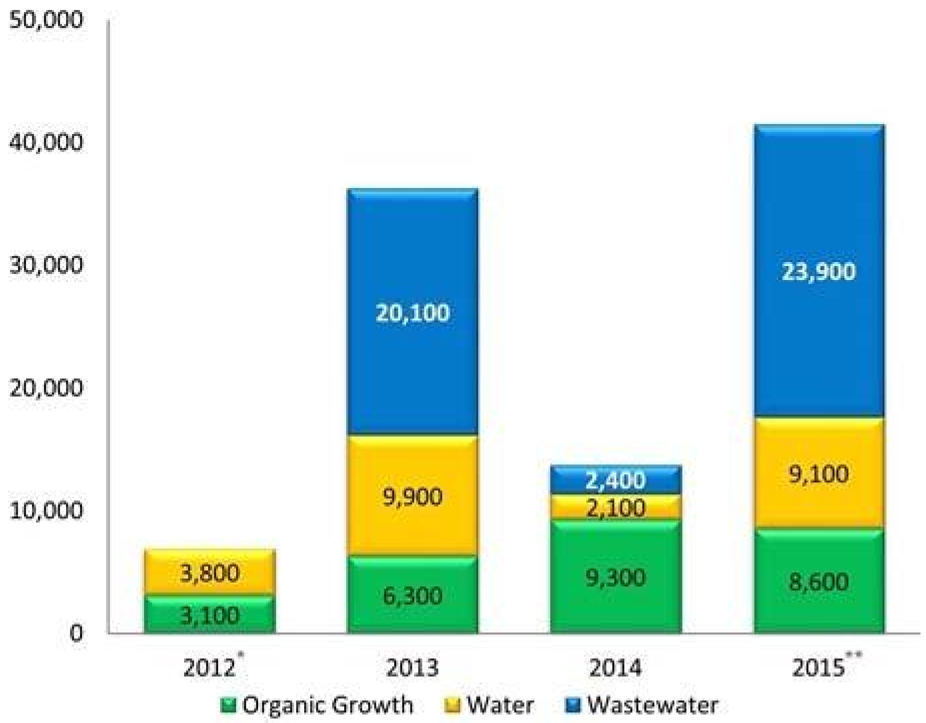
Other States With Similar Acquisition Adjustments:

CALIFORNIA AMERICAN WATER
ILLINOIS AMERICAN WATER
KENTUCKY AMERICAN WATER
MISSOURI AMERICAN WATER
VIRGINIA AMERICAN WATER

Since 2010, 5 states have added new legislation supporting industry consolidation

AMERICAN WATER

Adding Customers Through Acquisitions and Organic Growth



State	Approximate Customer Connections
Target A	31,000
Target B	20,000
Target C	19,000
Target D	12,500
Target E	12,500
Target F	11,000

Of 3.26 million customers, 3.10 million are water only

* Excludes acquisition of New York.

** 2015 Organic Growth calculated based on actual organic growth through September 30 plus historical three year trending analysis for the final quarter of 2015. 2015 acquisitions are based on transactions closed, as well as signed agreements that are pending regulatory action in 2015 and 2016.

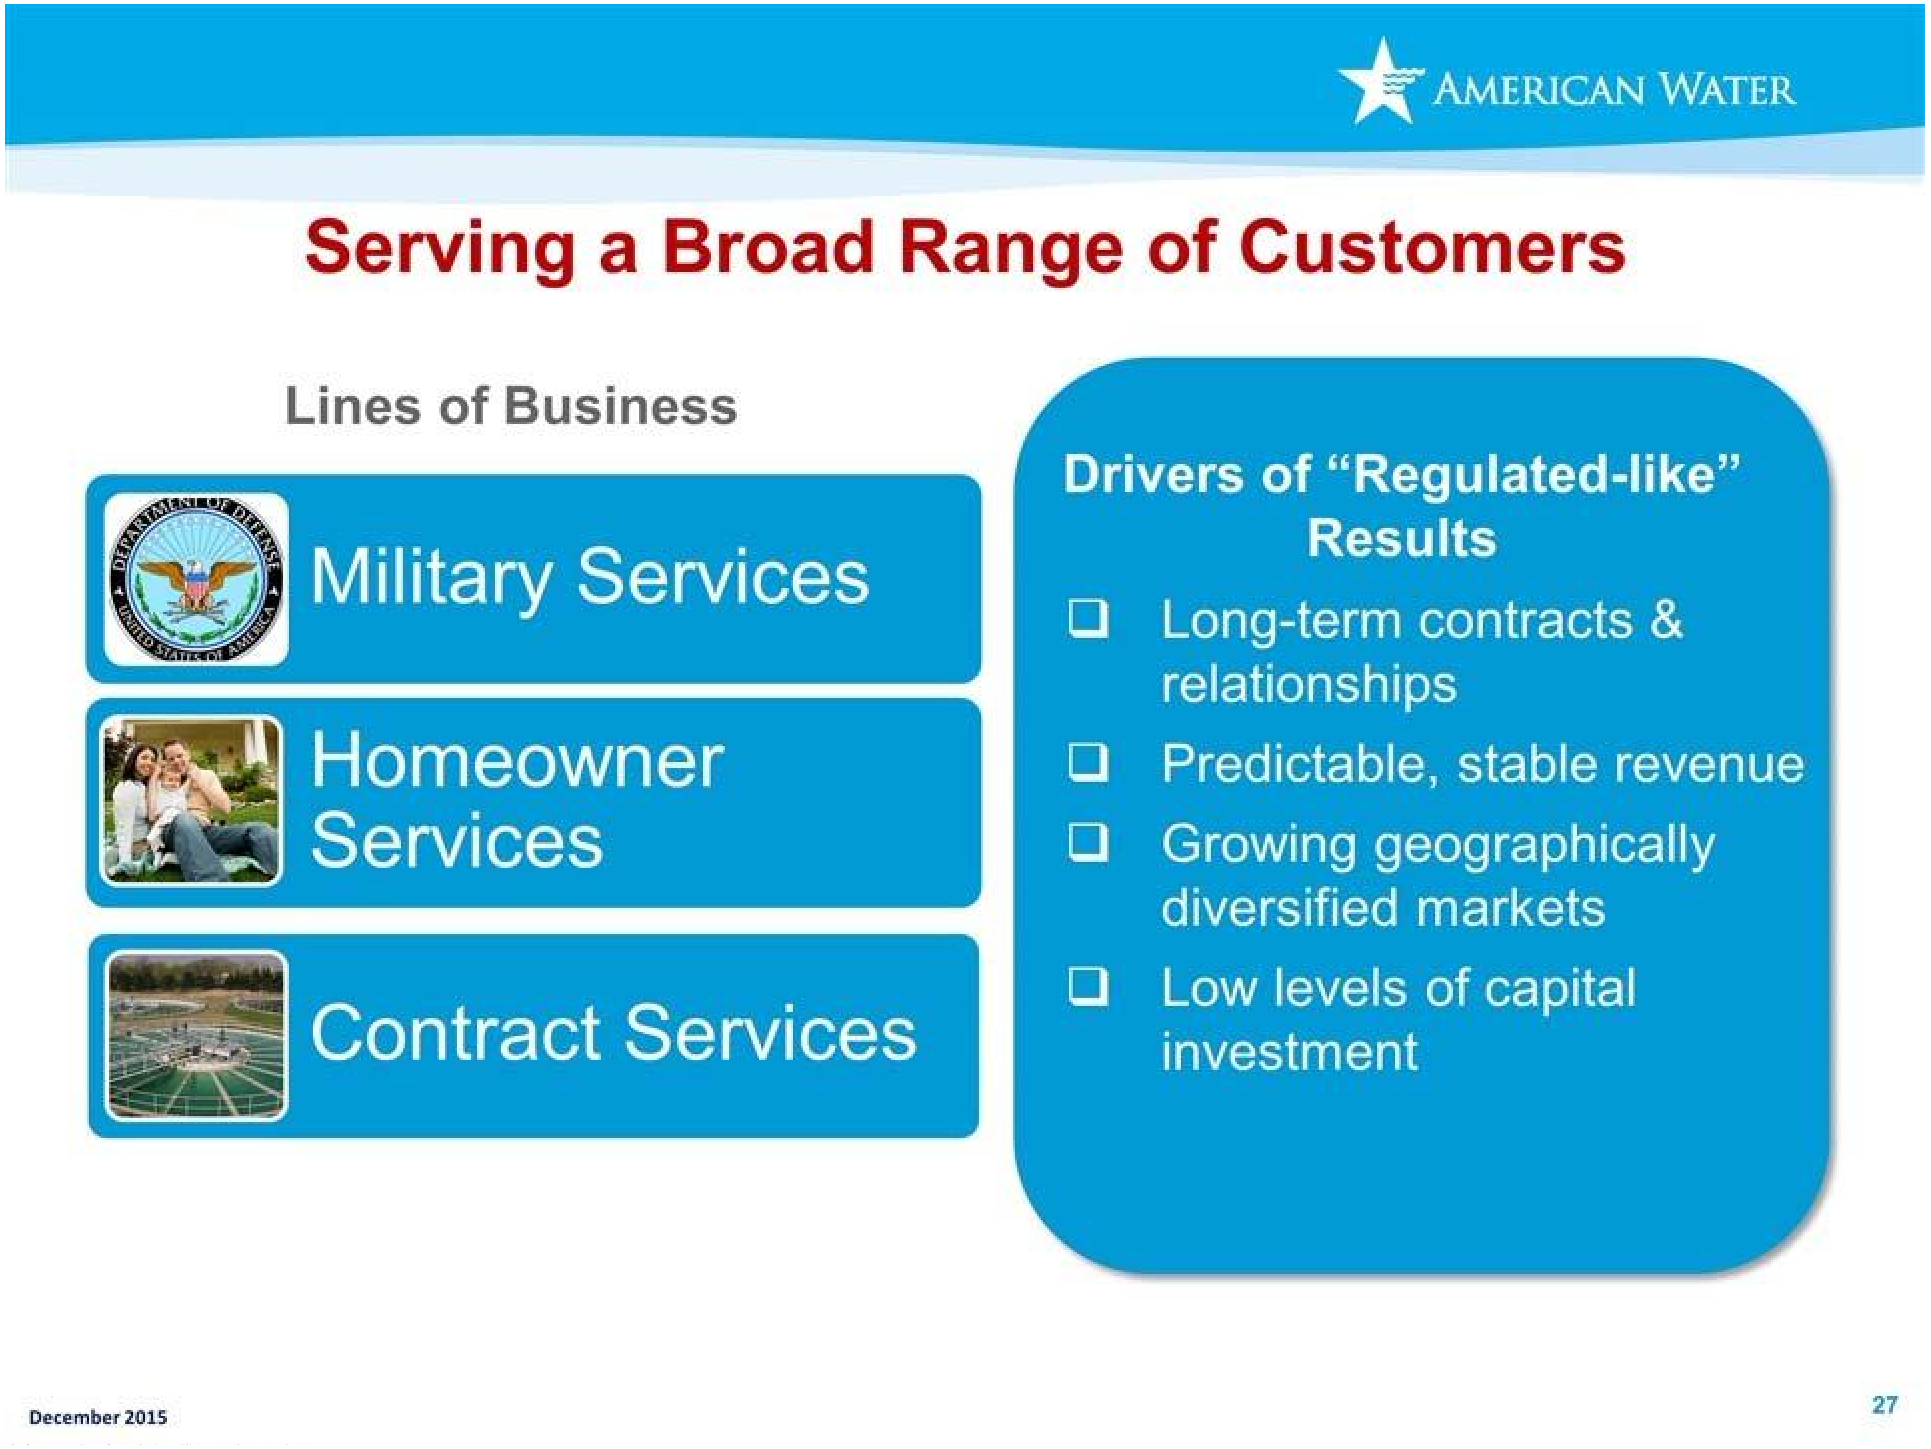
AWE Strengthens American Water

Financially:

- Accelerates growth by leveraging our core skills outside of our regulated footprint
- Regulated-like risk profile

Culturally:

- Increases customer satisfaction
- Develops new expertise that can benefit the regulated business
- Nurtures competitive-minded talent
- Builds the brand



Serving a Broad Range of Customers

Lines of Business

- Military Services
- Homeowner Services
- Contract Services

Drivers of "Regulated-like" Results

- ☐ Long-term contracts & relationships
- ☐ Predictable, stable revenue
- ☐ Growing geographically diversified markets
- ☐ Low levels of capital investment

AMERICAN WATER

Military Services Group
Utility Privatization on U.S. Military Bases

Regulated Business Similarities:

- Water & wastewater operations and capital improvements
- 50-year contract term
- Predictable revenue (not consumption based)
- Periodic price adjustments with defined rules
- Geographic diversity

DEPARTMENT OF DEFENSE
UNITED STATES OF AMERICA

Business Status:

- One customer = clear focus on their unique needs
- 12 contracts – most of any provider
- Growing - 33 new opportunities in next 10 years
- 4 AWWA Director awards for water system optimization
- 300 employees – 22% US Veterans
- Transitioning Vandenberg AFB
- Supporting customer with energy reduction projects

Military Services Historical Growth

Shale Introduction

Ned Wehler

CEO, Keystone Clearwater

Other

Shale (~1%)

AWE (1-2%)

Regulated Acquisitions (1-2%)

Regulated Investment – CapEx (4-6%)

Market Overview – Decades of Exploration and Production Opportunities

- Well completion technology is water enabled and water dependent
- Appalachian Basin – a still rising resource - Utica potential and proven Marcellus
- American Water-Keystone Clearwater – ideally positioned for decades of sustained business

AMERICAN WATER

Market Analysis – Short Term and Long-Term Prospects

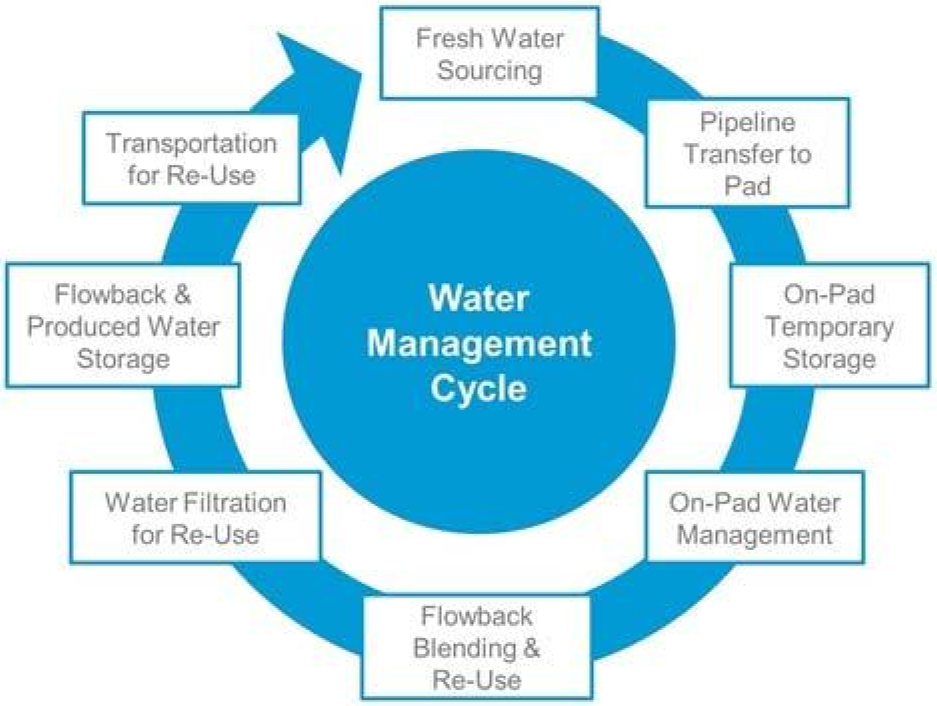
- **Short Term – 2016 Outlook**
  - 20-30% lower completion activity
  - constrained takeaway capacity
  - drawdown of excess storage
  - El Nino pattern
  - water infrastructure build-out

- **Long Term – 2017 and Beyond**
  - 10-20% gain in completion activity
  - new takeaway capacity
  - demand increases – power burn, LNG, lowest cost gas [Appalachian-basin]
  - gas prices inching up

Water Supply, Transfer, Filtration, Re-Use & Storage; Pipeline Construction, and Transport Solutions

AMERICAN WATER

Complete Water Sourcing and Transfer Services



Services include:

- Water Sourcing
- Pipeline Construction
- Water and Equipment Hauling
- Water Transfer
- Water System Operation & Maintenance
- Water Storage Solutions
- Design/Build/Own/Operate
- Served 20 customers at July 2015 close
  - Added 7 new customers since July

Our Competitive Advantage

Core Focus		What Does It Mean for the Customer?
Total Water Management Solution	→	Vertical integration saves customers time and expense while providing one-stop shopping
Appalachian Basin Expertise	→	Senior management has developed technical and environmental knowledge and experience in the Appalachian Basin for over 30 years
Technical Knowledge to Handle Complex Projects	→	Keystone's unique regulatory and engineering experience consistently leads to on-time, on-budget projects despite complex terrain and other challenges
Low Cost Provider	→	Bundled services and premier technology allow Keystone to offer competitive pricing while maintaining strong margins
Strong Reputation	→	2015 Awards – 1) Northeast Water Management Company of the Year and 2) second straight year as Central Pennsylvania Business Journal's "Fastest Growing Company"

Strategy for Growth

Penetration in existing markets	Our customer base allows for wallet share gain and expanded services
Expansion of customer base	Pursuing 20+ identified new customers
Design, build own & operate	Capital constrained E&P producers are receptive to Keystone expanding into an ownership role of main transmission lines

Risks and Risk Mitigation

Risks

1. Revenue and margin volatility
2. Declining completion counts
3. Large integrated pipeline infrastructure deals

Mitigation Strategy

1. 5-year contracts + variable cost + customer additions
2. Design-Build-Own-Operate solutions w/contracts of 5 years plus
3. Broaden/diversify services to maintenance and treatment

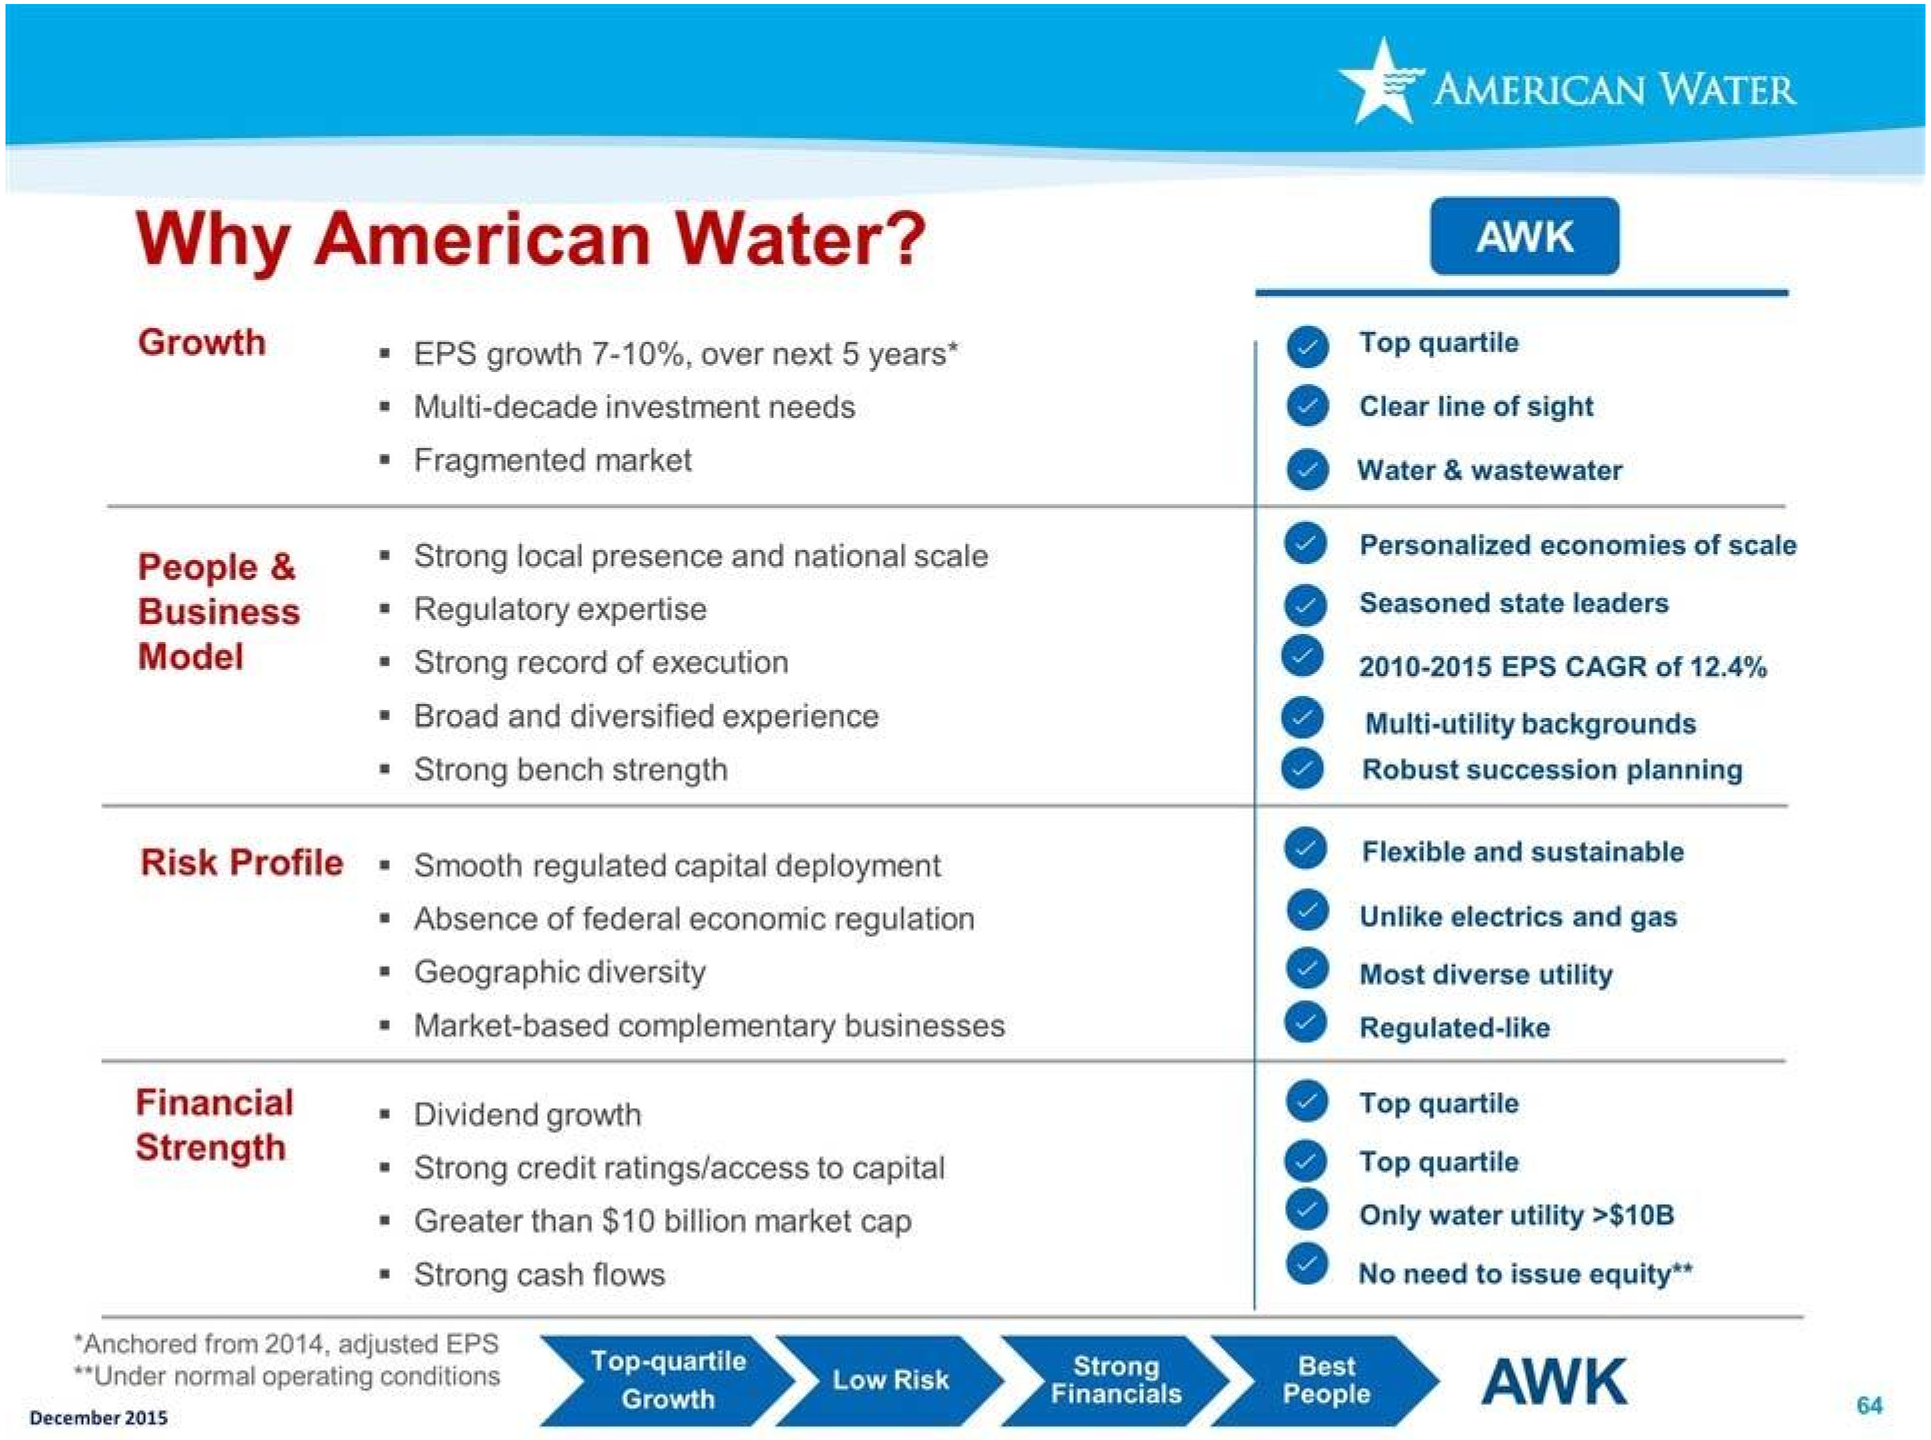
Targets:

- ✓ Grow EPS long term at 7-10%…
  … Regulated investments will be the foundation
- ✓ Increase dividends in line with earnings…
  … Payout ratio between 50-60% of earnings
- ✓ Maintain our conservative risk profile…
  … Market based businesses not more than 15-20% of earnings
- ✓ Deliver leading total shareholder returns
  … Combined EPS and dividend growth

Susan Story
President and Chief Executive Officer

In Summary



AMERICAN WATER

Why American Water?

		AWK
Growth	EPS growth 7-10%, over next 5 years*	✓ Top quartile
	Multi-decade investment needs	✓ Clear line of sight
	Fragmented market	✓ Water & wastewater
People & Business Model	Strong local presence and national scale	✓ Personalized economies of scale
	Regulatory expertise	✓ Seasoned state leaders
	Strong record of execution	✓ 2010-2015 EPS CAGR of 12.4%
	Broad and diversified experience	✓ Multi-utility backgrounds
	Strong bench strength	✓ Robust succession planning
Risk Profile	Smooth regulated capital deployment	✓ Flexible and sustainable
	Absence of federal economic regulation	✓ Unlike electrics and gas
	Geographic diversity	✓ Most diverse utility
	Market-based complementary businesses	✓ Regulated-like
Financial Strength	Dividend growth	✓ Top quartile
	Strong credit ratings/access to capital	✓ Top quartile
	Greater than $10 billion market cap	✓ Only water utility >$10B
	Strong cash flows	✓ No need to issue equity**

*Anchored from 2014, adjusted EPS
**Under normal operating conditions

AMERICAN WATER ANNOUNCES 2016 EARNINGS GUIDANCE

- **2016 diluted earnings per share from continuing operations estimated to be in the range of $2.75 to $2.85.**
- **2015 diluted earnings per share from continuing operations estimated to be in the range of $2.60 to $2.65.**

VOORHEES, N.J., Dec. 14, 2015 – American Water Works Company, Inc. (NYSE: AWK), the largest publicly traded U.S. water and wastewater utility company, today announced its earnings guidance for 2016 and reaffirmed its expected earnings range for the year ending December 31, 2015.

American Water estimates its 2016 earnings from continuing operations to be in the range of $2.75 to $2.85 per diluted share.

“The 2016 guidance is based on the continued execution of our strategic goals,” said Susan Story, president and CEO of American Water. “We will continue to focus on providing safe, clean, affordable and reliable water services for our customers by prudently investing much needed capital for infrastructure replacement, and by managing our costs to reduce the impact on our customers’ bills. We will grow our business strategically to create value for all of our stakeholders and achieve long-term success.”

The company reaffirmed its 2015 expected earnings from continuing operations to be in the range of $2.60 to $2.65 per diluted share, based on the company’s performance year-to-date.

“Our ability to deliver on our strategies and goals starts and ends with the outstanding dedication and performance of our employees,” said Story. “Highlights of our achievements this year include our success in growth with seven completed regulated acquisitions to date and the addition of our 12th military base contract, approximately $1.2 billion in planned capital investment into our systems, and continued gains in efficiency and cost management,” said Story.

American Water will host an Investor Day presentation and audio webcast with investors, analysts and other interested parties on Dec. 15 at The Westin New York at Times Square. In addition to Story, presentations will be made by Linda Sullivan, senior vice president and chief financial officer; Walter Lynch, president and chief operating officer of regulated operations; Sharon Cameron, president of American Water Enterprises; and Ned Wehler, CEO of Keystone Clearwater Solutions. The live webcast will be accessible to the public from 8 a.m. to approximately 12 p.m. Eastern Time, and posted on the Investor Relations page of the company's website at www.amwater.com for 30 days. Presentation slides that will be used in conjunction with the conference are also available online at http://ir.amwater.com.

The company's earnings forecasts are subject to numerous risks and uncertainties, including, without limitation, those described under "Forward-Looking Statements" below and under "Risk Factors" in its annual and quarterly reports filed with the Securities and Exchange Commission (SEC).

About American Water

Founded in 1886, American Water (NYSE: AWK) is the largest and most geographically diverse publicly traded U.S. water and wastewater utility company. With headquarters in Voorhees, N.J., the company employs 6,800 dedicated professionals who provide regulated and market-based drinking water, wastewater and other related services to an estimated 15 million people in 47 states and Ontario, Canada. More information can be found at www.amwater.com.

Cautionary Statement Concerning Forward-Looking Statements

Certain statements in this press release including, without limitation, 2015 and 2016 earnings guidance and other statements regarding its future financial and operating results, are forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are predictions based on American Water's current expectations and assumptions regarding future events. Actual results could differ materially because of factors such as the decisions of governmental and regulatory bodies, including decisions to raise or lower rates; the timeliness of regulatory commissions' actions concerning rates and other matters; changes in laws, governmental regulations and policies, including environmental, health and water quality, and public utility regulations and policies; potential costs and liabilities of American Water for environmental matters associated with the operations of Keystone Clearwater Solutions; the outcome of litigation and government action including with respect to the Freedom Industries chemical spill in West Virginia; weather conditions, patterns or events or natural disasters, including drought or abnormally high rainfall, strong winds, coastal and intercoastal flooding, earthquakes, landslides, hurricanes and tornadoes, and cooler than normal temperatures; changes in customer demand for, and patterns of use of, water, such as may result from conservation efforts; its ability to appropriately maintain current infrastructure, including its technology systems, and manage the expansion of its business; its ability to obtain permits and other approvals for projects; changes in its capital requirements; its ability to control operating expenses and to achieve efficiencies in its operations; the intentional or unintentional acts of a third party, including contamination of its water supplies and attacks on its computer systems; its ability to obtain adequate and cost-effective supplies of chemicals, electricity, fuel, water and other raw materials that are needed for its operations; its ability to successfully acquire and integrate water and wastewater systems that are complementary to its operations; its ability to successfully expand its business, including concession arrangements and agreements for provision of water services in shale regions for exploration and production; cost overruns relating to improvements or the expansion of its operations; changes in general economic, business and financial market conditions; access to sufficient capital on satisfactory terms; fluctuations in interest rates; the effect of restrictive covenants or changes to credit ratings on its current or future debt that could increase its financing costs or affect its ability to borrow, make payments on debt or pay dividends; fluctuations in the value of benefit plan assets and liabilities that could increase financing costs and funding requirements; the ability to utilize its U.S. and state net operating loss carryforwards; migration of customers into or out of its service territories and the condemnation of its systems by municipalities using the power of eminent domain; difficulty in obtaining insurance at acceptable rates and on acceptable terms and conditions; its ability to retain and attract qualified employees; labor actions including work stoppages and strikes; the incurrence of impairment charges related to American Water’s goodwill or other assets; and civil disturbances, terrorist threats or acts, or public apprehension about future disturbances or terrorist threats or acts.

For further information regarding risks and uncertainties associated with American Water’s businesses, please refer to American Water’s annual and quarterly SEC filings. The company undertakes no duty to update any forward-looking statement, except as otherwise required by the federal securities laws.

Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

On November 11, 2014, American Water Works Company, Inc. and American Water Works Service Company, Inc. (collectively, the “Company”) entered into an agreement with Kellye L. Walker, the Company’s Senior Vice President, General Counsel and Secretary, relating to Ms. Walker’s separation from the Company. Under the agreement, Ms. Walker’s employment with the Company will terminate on January 6, 2015 and she will receive (i) a severance payment of $612,250, payable over the 12 month period following the termination of her employment, and (ii) a payment of $318,125, payable over the six month period following the termination of her employment, for consulting services Ms. Walker has agreed to provide over the six month period. Ms. Walker also will receive, over the 18 month period following the termination of her employment, reimbursement of COBRA premiums that she pays for continued health insurance coverage under the Company’s health plans, reduced by amounts she would have been required to pay as an employee of the Company. The agreement also provides that Ms. Walker will receive a payout under the Company’s 2014 Annual Incentive Plan based upon the product of her target award amount times the corporate multiplier that is approved by the Board of Directors based on the Company’s performance (which, in all material respects, is the same methodology as was used to determine her award under the 2013 Annual Incentive Plan). In addition, Ms. Walker’s benefits under the Company’s 401(k) plan and nonqualified deferred compensation plan, and entitlements under her equity awards, will be determined in accordance with their respective terms, which are not affected by the agreement. Ms. Walker will be subject to a confidentiality covenant and will provide a general release to the Company.

AMERICAN WATER REPORTS SOLID THIRD QUARTER 2014 RESULTS; ACHIEVES GROWTH

- **Operating revenues: increased 2.9 percent for the quarter to $846.2 million.**
- **Income from continuing operations: rose 4.5 percent for the quarter to $156.6 million, or $0.87 per diluted common share, despite the estimated adverse impact of cooler and milder weather during the quarter of approximately $0.04-$0.06 per diluted share. Excluding the midpoint of this impact, income from continuing operations for the quarter was $0.92 per diluted share (a non-GAAP financial measure).**
- **Growth: completed four acquisitions, adding approximately 2,200 customers to regulated footprint; following referendum victories this week, announced pending acquisitions in New Jersey, Missouri and Indiana with 19,000 customers, along with 6,000 new customers in other pending acquisitions; and was awarded its 11th military base contract.**
- **Guidance: narrowed annual adjusted earnings guidance from continuing operations (a non-GAAP financial measure) to be in the range of $2.38 to $2.44 per share, not adjusted for the adverse weather impact of approximately $0.04-$0.06 per share. Adjusted guidance does exclude the impact of the Freedom Industries chemical spill in West Virginia of approximately $0.04 per share.**

VOORHEES, N.J., Nov. 5, 2014 – American Water Works Company, Inc. (NYSE: AWK), the largest publicly traded U.S. water and wastewater utility company, today reported solid results for the third quarter of 2014.

“Despite significantly cooler temperatures across many of our service areas, we were still able to deliver solid results in the third quarter, with increases in revenues, income and EPS,” said Susan Story, president and CEO of American Water. “Additionally, we achieved continued growth in both our regulated and market-based operations, completing several acquisitions and announcing our 11th military base contract. We also had some exciting news this week, as the residents of Haddonfield, N.J., Arnold, Mo., and Russiaville, Ind., voted strongly in favor of the sale of their communities’ water and/or wastewater assets to American Water. We are honored they put their vote of confidence in our company to bring to them clean, safe, reliable and affordable water and water services, and we look forward to welcoming our newest 19,000 customers in the near future. Year to date, we have added approximately 3,700 customers on closed acquisitions and at this time, have 25,000 additional customers in pending acquisitions.”

Continuing Operations

For the three months ended Sept. 30, 2014, the company reported income from continuing operations of $156.6 million, or $0.87 per diluted common share, compared to income of $149.9 million, or $0.84 per diluted common share, in the same quarter last year. For the nine months ended Sept. 30, 2014, income from continuing operations was $335.9 million, or $1.87 per diluted common share, compared to $309.7 million, or $1.73 per diluted common share, for the same period last year.

The increase in income from continuing operations for the quarter was due to higher revenues and lower operating expenses in the Regulated Business. This increase was partially offset by cooler weather during the quarter. The increase in income from continuing operations for the nine months ended Sept. 30, 2014, was due to higher revenue, and lower interest and labor-related expense in the Regulated Business. The increase was offset by higher depreciation and costs resulting from the Freedom Industries chemical spill in West Virginia, as well as the third quarter 2014 weather impacts.

The company’s capital investments during the first nine months of 2014 totaled approximately $701.6 million. The company anticipates investing approximately $1.0 billion in 2014, with the majority allocated to upgrading its water and wastewater systems to ensure reliable service to customers.

Regulated Operations

For the three months ended Sept. 30, 2014, American Water’s Regulated Businesses’ revenues increased by $10.6 million, or 1.4 percent, as compared to the same quarter in 2013. Operating revenues increased by $75.2 million, or 3.8 percent, for the nine months ended Sept. 30, 2014, as compared to the same period in 2013. The increase in revenues was primarily due to rate authorizations and infrastructure and other surcharges, as well as incremental revenues resulting from acquisitions, most of which occurred in 2013. The increases were partially offset by reduced consumption levels due to cooler temperatures in the third quarter of 2014.

The Regulated Businesses’ operation and maintenance (O&M) expense decreased $14.3 million, or 4.9 percent, for the three months ended Sept. 30, 2014, and increased $6.4 million, or 0.8 percent, for the nine months ended Sept. 30, 2014, compared to the same periods in 2013. The decreases were mainly due to lower production and labor-related costs during the quarter, as compared to the same period in 2013. The increased costs over the nine-month period were mainly due to increased production costs, higher uncollectible expense and the impact of the Freedom Industries chemical spill in West Virginia, partially offset by lower labor-related costs.

The regulated entities showed continued improvement in the O&M efficiency ratio (a non-GAAP measure). The company’s focus on operational efficiencies assist in making these investments more affordable for customers. For the 12 months ended Sept. 30, 2014, the adjusted O&M efficiency ratio was 36.8 percent, compared to 40.1 percent for the previous 12-month period.

The company continued to make needed upgrades to its water and wastewater infrastructure to ensure reliability of service for customers. Rate adjustments and infrastructure surcharge authorizations allow recovery of that investment. On July 1, 2014, additional annualized revenue of $7.4 million in infrastructure charges became effective in New Jersey. Also in July, a settlement was reached with the Office of Ratepayer Advocates (ORA) regarding the company’s general rate case in California, which, if approved, would provide $13.6 million in additional annualized revenues for the first year of a three-year rate case cycle. The agreement is pending regulatory approval and is subject to change. Subsequent to the quarter, the company filed for $8.5 million and $2.6 million in additional revenues from infrastructure surcharges in Missouri and Tennessee, respectively.

As of Oct. 31, 2014, the company was awaiting final orders for general rate cases in Indiana and California, requesting approximately $44.5 million in total additional revenues, as adjusted for the ORA settlement agreement. The extent to which requested rate increases will be granted by the applicable regulatory agencies will vary. All annualized revenue amounts are based on current usage.

The company continued to execute its regulated growth strategy during the quarter. American Water completed four acquisitions, adding approximately 2,200 customers to its regulated footprint. On Nov. 4, voters in three communities – Haddonfield, N.J., Arnold, Mo., and Russiaville, Ind. – approved referendums for the sale of their water and/or wastewater assets to American Water. Following regulatory approval and financial close, these three acquisitions will add approximately 19,000 customers to the company’s regulated footprint. These, along with several additional pending acquisitions that are awaiting regulatory approval and/or financial close, will total approximately 25,000 customers.

Market-Based Operations

The company’s Market-Based Operations’ revenues increased by $13.4 million, or 16.1 percent, and $32.1 million, or 14.5 percent, for the three and nine months through Sept. 30, 2014, respectively. The increase was mainly due to additional revenues resulting from growth in the homeowner services business and incremental capital projects in the company’s military services group. This increase was partially offset by decreases in revenue from discontinued municipal and industrial contracts, as well as additional price redeterminations for some military contracts that occurred in 2013.

The Market-Based Businesses’ O&M expense increased $17.7 million, or 29.7 percent, and $31.8 million, or 18.4 percent, for the three and nine months ended Sept. 30, 2014, respectively. Higher costs were primarily due to an increase in operating supplies and services attributable to construction project activities for military contracts. Also included in the three and nine months ended Sept. 30, 2013 was the release of $3.8 million in loss contract reserves.

American Water's Market-Based Businesses' footprint also continued to grow. In August, the company announced that its military services group was awarded a contract for ownership, operation and maintenance of the water and the wastewater systems at Picatinny Arsenal, N.J. The award is estimated at a gross amount of approximately $297 million over a 50-year period.

"American Water is honored and privileged to provide our servicemen and -women and their families with safe, clean, reliable water and wastewater services on 11 military installations across the country for the next five decades and beyond," said Story. "Our performance in serving our military has received several national recognitions, including two Partnership for Safe Water Directors Award distinctions for distribution system optimization at Fort Leavenworth and Scott Air Force Base, and, most recently, a prestigious Federal Energy and Water Management Award for a water-energy grid balance project we participated in at Fort Meade."

The company's homeowner services business, American Water Resources, recently expanded its service offerings into New Hampshire. In addition, American Water Resources recently received notification from the Orlando Utilities Commission of its intent to award the company an exclusive home warranty protection agreement for its 260,000 customers, pending contract negotiations.

Discontinued Operations

On Oct. 31, 2014, the company entered into an agreement to sell Terratec Environmental Ltd., a Canadian-based provider of residuals management services that is part of the Market-Based Operations segment. This transaction is a result of the company's decision to exit the Class B biosolids business so it can focus on the Class A biosolids business. The loss on sale and results of operations of the company have been classified as discontinued operations and represent a loss from discontinued operations of $0.02 and $0.03 per diluted share for the three- and nine-month periods ended Sept. 30, 2014, respectively.

Quarterly Dividend

On Sept. 19, 2014, American Water's Board of Directors declared a quarterly cash dividend payment of $0.31 per share, payable on Dec. 1, 2014, to all shareholders of record as of Nov. 10, 2014.

On July 30, 2014, American Water's Board of Directors declared a quarterly cash dividend payment of $0.31 per share, which was paid on Sept. 2, 2014, to all shareholders of record as of Aug. 11, 2014.

2014 Earnings Guidance

American Water has narrowed annual adjusted earnings guidance from continuing operations (a non-GAAP financial measure) to be in the range of $2.38 to $2.44 per share, not adjusted for the adverse weather impact of approximately $0.04-$0.06 per share. Adjusted guidance does exclude the impact of the Freedom Industries chemical spill in West Virginia of approximately $0.04 per share. The company's earnings forecasts are subject to numerous risks and uncertainties, including, without limitation, those described under "Forward-Looking Statements" below and under "Risk Factors" in its annual and quarterly reports filed with the SEC.

Non-GAAP Financial Measures

This press release includes a presentation adjusted income from continuing operations and adjusted earnings per share (EPS) from continuing operations. These items are derived from American Water's consolidated financial information but are not presented in its financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP). Adjusted income from continuing operations and adjusted EPS from continuing operations are defined, respectively, as GAAP income from continuing operations and GAAP diluted earnings per common share from continuing operations excluding the one-time impact of the Freedom Industries chemical spill in West Virginia and the estimated impact of weather in the third quarter of 2014. These items constitute "non-GAAP financial measures" under Securities and Exchange Commission (SEC) rules. These non-GAAP financial measures supplement the company's GAAP disclosures and should not be considered an alternative to the GAAP measure.

Management believes that this adjustment provides the company and its investors with an indication of American Water's baseline performance excluding items that are not considered to be reflective of ongoing results. Management does not intend results excluding the adjustment to represent results as defined by GAAP, and the reader should not consider it as an alternative measurement calculated in accordance with GAAP, or as an indicator of the company's performance. Accordingly, the measurements have limitations depending on their use.

This press release also includes a presentation of adjusted O&M efficiency ratio, which excludes from its calculation estimated purchased water revenues and purchased water expenses, the allocable portion of non-O&M support services costs, mainly depreciation and general taxes, and the impact of the Freedom Industries chemical spill as well as the estimated impact of weather in the third quarter of 2014. This item is derived from American Water's consolidated financial information but is not presented in its financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP). The item constitutes a "non-GAAP financial measure" under Securities and Exchange Commission (SEC) rules. This non-GAAP financial measure supplements the company's GAAP disclosures and should not be considered an alternative to the GAAP measure.

Management believes that the presentation of this measure is useful to investors because it provides a means of evaluating the company's operating performance without giving effect to estimated purchased water revenues and purchased water expenses as well as the allocable portion of non-O&M support services costs, mainly depreciation and general taxes, and the impact of the Freedom Industries chemical spill and weather during the quarter, which involve items that are not reflective of management's ability to increase efficiency of the company's regulated operations. In preparing operating plans, budgets and forecasts, and in assessing historical performance, management relies, in part, on trends in the company's historical results, exclusive of estimated revenues and expenses related to purchased water and the allocable portion of non-O&M support services costs.

Set forth below are tables that reconcile the non-GAAP financial measures to the most directly comparable GAAP financial measures.

Third Quarter 2014 Earnings Conference Call

The third quarter 2014 earnings conference call will take place on Thursday, Nov. 6, 2014, at 9 a.m. Eastern Time. Interested parties may listen over the Internet by logging on to the Investor Relations page of the company's website at www.amwater.com.

Following the earnings conference call, an audio archive of the call will be available through Nov. 14, 2014, by dialing 1-412-317-0088 for U.S. and international callers. The access code for replay is 10053559. The online archive of the webcast will be available through Dec. 6, 2014, by accessing the Investor Relations page of the company's website located at www.amwater.com.

About American Water

Founded in 1886, American Water (NYSE: AWK) is the largest publicly traded U.S. water and wastewater utility company. With headquarters in Voorhees, N.J., the company employs approximately 6,600 dedicated professionals who provide drinking water, wastewater and other related services to an estimated 14 million people in more than 40 states and parts of Canada. More information can be found at www.amwater.com.

Cautionary Statement Concerning Forward-Looking Statements

Certain statements in this press release including, without limitation, 2014 earnings guidance and estimated revenues from rate cases and other government agency authorizations, are forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are predictions based on American Water's current expectations and assumptions regarding future events. Actual results could differ materially because of factors such as the decisions of governmental and regulatory bodies, including decisions to raise or lower rates; the timeliness of regulatory commissions' actions concerning rates; changes in laws, governmental regulations and policies, including environmental, health and water quality, and public utility regulations and policies; the outcome of litigation and government action related to the Freedom Industries chemical spill in West Virginia; weather conditions, patterns or events, including drought or abnormally high rainfall, strong winds and coastal, intercoastal flooding and cooler than normal temperatures; changes in customer demand for, and patterns of use of, water, such as may result from conservation efforts; its ability to appropriately maintain current infrastructure and manage the expansion of its business; its ability to obtain permits and other approvals for projects; changes in its capital requirements; its ability to control operating expenses and to achieve efficiencies in its operations; its ability to obtain adequate and cost-effective supplies of chemicals, electricity, fuel, water and other raw materials that are needed for its operations; its ability to successfully acquire and integrate water and wastewater systems that are complementary to its operations; its ability to successfully expand its business, including, concession arrangements and agreements for the provision of water services to facilitate hydraulic fracking in shale regions; cost overruns relating to improvements or the expansion of its operations; changes in general economic, business and financial market conditions; access to sufficient capital on satisfactory terms; fluctuations in interest rates; the effect of restrictive covenants or changes to credit ratings on the company's current or future debt that could increase its financing costs or affect its ability to borrow, make payments on debt or pay dividends; fluctuations in the value of benefit plan assets and liabilities that could increase financing costs and funding requirements; migration of customers into or out of its service territories; difficulty in obtaining insurance at acceptable rates and on acceptable terms and conditions; its ability to retain and attract qualified employees; labor actions including work stoppages and strikes; the incurrence of impairment charges; and civil disturbance, terrorist threats or acts, or public apprehension about future disturbances or terrorist threats or acts.

For further information regarding risks and uncertainties associated with American Water's business, please refer to American Water's annual and quarterly SEC filings. The company undertakes no duty to update any forward-looking statement.

AMERICAN WATER REPORTS STRONG THIRD QUARTER 2015 RESULTS

- **Diluted earnings per share from continuing operations increased 10.3 percent over the third quarter 2014.**
- **Revenue increased 5.9 percent to $896.2 million compared to the same period last year.**
- **Company narrows 2015 earnings guidance from continuing operations to a range of $2.60 to $2.65 per diluted share.**

VOORHEES, N.J., Nov. 4, 2015 – American Water Works Company, Inc. (NYSE: AWK) today reported results for the three months ended Sept. 30, 2015.

“We continued to execute our strategies during the first nine months of 2015,” said Susan Story, president and CEO of American Water. “We invested in our water and wastewater systems to provide safe, clean and reliable service to our customers. We balanced that investment with improved efficiencies to keep our services affordable, and increased our customer base through regulated acquisitions and organic growth.

“In our Market-Based Businesses, we added our 12th military installation, continued to grow our homeowner services’ business and completed our acquisition of Keystone Clearwater Solutions, a water services provider to the Marcellus and Utica Shale in the Appalachian basin.

“These efforts resulted in increases to earnings per share and revenues for the third quarter, and demonstrate our progress toward achieving our long-term plan of growing earnings per share by seven to 10 percent through 2019,” said Story.

For the third quarter 2015, the company reported income from continuing operations of $173.9 million, or 96 cents per diluted common share (“diluted share”), compared to 87 cents per diluted share in the third quarter of 2014, a 10.3 percent increase. For the first nine months of 2015, the company reported income from continuing operations of $377.0 million, or $2.09 per diluted share, compared to $1.87 per diluted share for the first nine months of 2014, an 11.8 percent increase. Diluted earnings per share (EPS) from continuing operations, excluding costs related to the Freedom

Industries chemical spill in 2014 (a non-GAAP financial measure), increased 9.4 percent compared to $1.91 for the nine months ended Sept. 30, 2014.

The Regulated Businesses continue to be the major contributor to earnings and experienced strong growth for the quarter and year-to-date through September, driven by infrastructure investment coupled with lower operating and maintenance expenses from the company's continued focus on operational efficiencies. The Market-Based Businesses also reported higher earnings growth for the quarter and year-to-date through September as it continued growth through its Military Services and Homeowner Services lines of business.

Net income including discontinued operations was 96 cents per diluted share for the quarter and $2.09 per diluted share year-to-date Sept. 30, 2015, compared to 85 cents per diluted share for the third quarter 2014, and $1.83 per diluted share for the nine months ended Sept. 30, 2014. Revenues were $896.2 million for the third quarter 2015, and $2,376.4 million year-to-date Sept. 30, 2015, compared to $846.2 million for the third quarter 2014, and $2,280.0 million for the nine months ended Sept. 30, 2014.

Year-to-date Sept. 30, 2015, the company made capital investments of approximately $970 million, including $793 million to replace and improve infrastructure for continued reliable service to customers, $44 million for regulated acquisitions and $133 million to acquire Keystone

Clearwater Solutions (“Keystone”). American Water plans to invest $1.3 to $1.4 billion in 2015, with almost $1.2 billion of this total to improve water and wastewater systems.

Regulated Businesses

For the third quarter, revenues for the Regulated Businesses segment totaled $780.7 million, an increase of $27.0 million, or 3.6 percent, compared to the same period last year. For the nine months ended Sept. 30, 2015, revenues totaled $2.1 billion, an increase of $43.5 million, or 2.1 percent, compared to the same period last year. The increases for both periods were primarily due to mild weather in 2014, as well as 2015 rate increases and surcharges in recognition of system improvements to better serve customers.

The operations and maintenance (O&M) expense decreased $1.2 million, or 0.4 percent, for the quarter and $26.6 million, or 3.2 percent, for the nine months ended Sept. 30, 2015 compared to same periods last year. The decrease for nine months ended Sept. 30, 2015, was mainly due to incremental costs in 2014 associated with the Freedom Industries chemical spill in West Virginia, and the company’s continued cost management efforts.

For the 12-month period ended Sept. 30, 2015, the adjusted O&M efficiency ratio (a non-GAAP measure) improved to 35.8 percent, compared to 36.8 percent for the 12-month period ended Sept. 30, 2014. By reducing O&M expense as a proportion of revenue, American Water is able to make investments in needed capital improvements without significantly impacting customer bills.

As of Sept. 30, 2015, the company was awarded approximately $58.5 million in additional annualized revenues from general rate cases and infrastructure charges for the year. American Water is currently awaiting final orders and/or proposed settlements for general rate cases in three jurisdictions, requesting $69.5 million in total additional revenues. The extent to which requested rate increases will be granted by the applicable regulatory agencies will vary.

American Water’s Regulated Businesses completed several acquisitions during the quarter adding 846 customers to its existing footprint. Year-to-date the company added 19,167 customers from acquisitions and currently has 16 pending acquisition agreements in several jurisdictions that if approved and completed will add approximately 13,326 customers to the company’s customer base.

Market-Based Businesses

For the third quarter of 2015, the Market-Based Businesses revenues totaled $120.4 million, an increase of $23.4 million, or 24.1 percent, compared to the same period last year. For the nine months ended Sept. 30, 2015, Market-Based revenues totaled $307.8 million, an increase of $54.0 million, or 21.3 percent, compared to the same period in 2014. The increases in both periods were primarily due to additional revenues in Military Services from increased construction activity and the addition of two bases in the second half of 2014, higher revenues in Homeowner Services from contract growth, primarily in New York City, and the Keystone acquisition.

The O&M expense increased by $21.0 million, or 27.1 percent, for the quarter and $48.0 million, or 23.5 percent, for the nine months ended Sept. 30, 2015, compared to same periods last year. The increases were driven by contract growth in the military and homeowner services business lines, as well as military construction project activities and the Keystone acquisition.

American Water continues to grow its Market-Based Businesses. Effective July 8, 2015, the company completed its acquisition of a 95 percent equity interest in Keystone. The company established Keystone under a holding company separate from its existing utility subsidiaries and American Water Enterprises entity, which owns the company’s military, contract, and homeowner services lines of business. The financial results of Keystone have been included in Market-Based Businesses, which also includes American Water Enterprises.

In September, Military Services was awarded a contract for the water and wastewater systems at Vandenberg Air Force Base in California. The award revenue is estimated at $298 million over a 50-year period.

“American Water is very proud to provide our servicemen and -women and their families on 12 military installations across the country with high quality, reliable water and wastewater services,” said Story. “We believe our strong performance record in both operating and improving the water and wastewater systems efficiently and effectively is a significant factor to our being awarded more military contracts than any other water utility company. In fact, American Water has received several national recognitions for our efforts, including the Partnership for Safe Water Award for Distribution System Optimization at four of the bases we serve. These awards recognize our efforts to go above and beyond what is required when it comes to water quality for the men and women and their families who serve all of us so courageously every day.”

The company’s homeowner services business also continued to expand, with a total of approximately 1.6 million contracts and about 800,000 customers enrolled in its service warranty programs. The company also received a notice of intent to award an exclusive contract with Georgetown County Water and Sewer District in South Carolina, pending contract negotiations, to offer programs to its 22,000 eligible homeowners.

Quarterly Dividend

On Oct. 30, 2015, American Water’s board of directors declared a quarterly cash dividend payment of $0.34 per share of common stock, payable on Dec. 1, 2015, to all shareholders of record as of Nov. 9, 2015.

On June 1, 2015 American Water's board of directors declared a quarterly cash dividend of $0.34 per share of common stock, paid Sept. 1, 2015, to all shareholders of record as of Aug. 10, 2015.

2015 Earnings Guidance

American Water narrowed its 2015 earnings guidance from continuing operations to be in the range of $2.60 to $2.65 per diluted share. The company's earnings forecasts are subject to numerous risks and uncertainties, including, without limitation, those described under "Forward-Looking Statements" below and under "Risk Factors" in its annual and quarterly reports filed with the Securities and Exchange Commission (SEC).

Non-GAAP Financial Measures

This press release includes a presentation of adjusted EPS from continuing operations. This item is derived from American Water's consolidated financial information but is not presented in its financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP). Adjusted EPS from continuing operations is defined as GAAP diluted earnings per common share from continuing operations excluding the one-time impact of the Freedom Industries chemical spill in West Virginia in 2014. This item constitutes a "non-GAAP financial measure" under SEC rules. This non-GAAP financial measure supplements and should be read in conjunction with the company's GAAP disclosures and should not be considered an alternative to the GAAP measure.

Management believes that this adjustment provides the company and its investors with an indication of American Water's baseline performance excluding items that are not considered to be reflective of ongoing results. Management does not intend results excluding the adjustment to represent results as defined by GAAP, and the reader should not consider it as an alternative measurement calculated in accordance with GAAP, or as an indicator of the company's performance. Accordingly, the measurements have limitations depending on their use.

This press release also includes a presentation of adjusted O&M efficiency ratio, which excludes from its calculation estimated purchased water revenues and purchased water expenses, and the allocable portion of non-O&M support services costs, mainly depreciation and general taxes, and the impact of the Freedom Industries chemical spill as well as the estimated impact of weather. This item is derived from American Water's consolidated financial information but is not presented in its financial statements prepared in accordance with GAAP. The item constitutes a "non-GAAP financial measure" under SEC rules. This non-GAAP financial measure supplements and should be read in conjunction with the company's GAAP disclosures and should not be considered an alternative to the GAAP measure.

Management believes that the presentation of this measure is useful to investors because it provides a means of evaluating the company's operating performance without giving effect to estimated purchased water revenues and purchased water expenses as well as the allocable portion of non-O&M support services costs, mainly depreciation and general taxes, and the impact of the Freedom Industries chemical spill and weather, which involve items that are not reflective of management's ability to increase efficiency of the company's regulated operations. In preparing operating plans, budgets and forecasts, and in assessing historical performance, management relies, in part, on trends in the company's historical results, exclusive of estimated revenues and expenses related to purchased water and the allocable portion of non-O&M support services costs.

Set forth at the end of this release are tables that reconcile each non-GAAP financial measure to the most directly comparable GAAP financial measure.

2015 Third Quarter Earnings Conference Call

The 2015 third quarter earnings conference call will take place on Thursday, Nov. 5, 2015, at 9 a.m. Eastern Time. Interested parties may listen over the Internet by logging on to the Investor Relations page of the company's website at www.amwater.com. Presentation slides that will be used in conjunction with the earnings conference call are also available online at http://ir.amwater.com.

Following the earnings conference call, an audio archive of the call will be available through Nov. 12, 2015, by dialing 412-317-0088 for U.S. and international callers. The access code for replay is 10074632**.** The online archive of the webcast will be available through Dec. 7, 2015, by accessing the Investor Relations page of the company's website located at www.amwater.com.

About American Water

Founded in 1886, American Water (NYSE: AWK) is the largest and most geographically diversified publicly traded U.S. water and wastewater utility company. With headquarters in Voorhees, N.J., the company employs 6,800 dedicated professionals who provide regulated and market-based drinking water, wastewater and other related services to an estimated 15 million people in 47 states and Ontario, Canada. More information can be found at www.amwater.com.

Cautionary Statement Concerning Forward-Looking Statements

Certain statements in this press release including, without limitation, 2015 earnings guidance and estimated revenues from rate cases and other government agency authorizations, are forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are predictions based on American Water's current expectations and assumptions regarding future events. Actual results could differ materially because of factors such as the decisions of governmental and regulatory bodies, including decisions to raise or lower rates; the timeliness of regulatory commissions' actions concerning rates and other matters; changes in laws, governmental regulations and policies, including environmental, health and water quality, and public utility regulations and policies; potential costs and liabilities of American Water for environmental matters associated with Keystone's operations; the outcome of litigation and government action including with respect to the Freedom Industries chemical spill in West Virginia; weather conditions, patterns or events or natural disasters, including drought or abnormally high rainfall, strong winds, coastal and intercoastal flooding, earthquakes, landslides, hurricanes and tornadoes, and cooler than normal temperatures; changes in customer demand for, and patterns of use of, water, such as may result from conservation efforts; its ability to appropriately maintain current infrastructure, including its technology systems, and manage the expansion of its business; its ability to obtain permits and other approvals for projects; changes in its capital requirements; its ability to control operating expenses and to achieve efficiencies in its operations; the intentional or unintentional acts of a third party, including contamination of its water supplies and attacks on its computer systems; its ability to obtain adequate and cost-effective supplies of chemicals, electricity, fuel, water and other raw materials that are needed for its operations; its ability to successfully acquire and integrate water and wastewater systems that are complementary to its operations; its ability to successfully expand its business, including concession arrangements and agreements for provision of water services in shale regions for exploration and production; cost overruns relating to improvements or the expansion of its operations; changes in general economic, business and financial market conditions; access to sufficient capital on satisfactory terms; fluctuations in interest rates; the effect of restrictive covenants or changes to credit ratings on its current or future debt that could increase its financing costs or affect its ability to borrow, make payments on debt or pay dividends; fluctuations in the value of benefit plan assets and liabilities that could increase financing costs and funding requirements; the ability to utilize its U.S. and state net operating loss carryforwards; migration of customers into or out of its service territories and the condemnation of its systems by municipalities using the power of eminent domain; difficulty in obtaining insurance at acceptable rates and on acceptable terms and conditions; its ability to retain and attract qualified employees; labor actions including work stoppages and strikes; the incurrence of impairment charges related to American Water's goodwill or other assets; and civil disturbance, terrorist threats or acts, or public apprehension about future disturbances or terrorist threats or acts.

For further information regarding risks and uncertainties associated with American Water's businesses, please refer to American Water's annual and quarterly SEC filings. The company undertakes no duty to update any forward-looking statement, except as otherwise required by the federal securities laws.

Item 8.01. Other Events.

At its public meeting on September 11, 2015, the New Jersey Board of Public Utilities (the "NJBPU") announced its approval of a stipulation of settlement signed by the parties (the "Settlement") with respect to a petition filed by New Jersey-American Water Company, Inc. ("NJAW"), a wholly owned subsidiary of American Water Works Company, Inc., to provide for an annual increase in NJAW's water and wastewater rates by approximately $22 million and was based on a return on equity of 9.75%. The new rates will become effective for water and wastewater services rendered by NJAW on and after September 21, 2015.

A copy of a press release issued by NJAW, including a fact sheet attached thereto outlining specific additional information related to the Settlement, is attached as Exhibit 99.1 hereto.

New Jersey American Water Granted New Rates by New Jersey Board of Public Utilities

Cost of Water Service Remains Less Than a Penny a Gallon; Sewer Rates Formula Also Adjusted to Provide Relief to Some Customers

VOORHEES (September 11, 2015) The New Jersey Board of Public Utilities (BPU) today approved new water and wastewater rates for New Jersey American Water, effective September 21, 2015.

The new rates represent a $22 million annual increase in water and wastewater revenues for New Jersey American Water.

The cost of water service for the company's customers remains less than a penny a gallon. The average bill for a customer using 6,000 gallons of water per month will rise from $51.82 to $53.41, an approximate three percent increase.

Since New Jersey American Water's last rate adjustment in May of 2012, the company has invested more than $775 million to replace and upgrade approximately 160 miles of water infrastructure to improve uninterrupted access to high-quality, reliable water service for its customers. During the same period, the company has lowered its operating expenses by more than $19 million. Those cost reductions supported more than $125 million of infrastructure investment with no impact on customers' bills.

"New Jersey American Water's proactive infrastructure replacement demonstrates our commitment to providing our customers with outstanding water and wastewater services," said William Varley, president of New Jersey American Water. "We're meeting the challenge of replacing or upgrading thousands of miles of aging infrastructure while decreasing our operating costs. Compared to the cost of other household utilities, water service is an excellent value."

The new rates will also result in some New Jersey American Water sewer customers seeing no increase or, in some cases, a decrease in wastewater rates. The BPU has accepted the company's proposal that wastewater rates be recalculated to lessen the impact that outdoor water use has on wastewater bills.

In addition, the BPU approved New Jersey American Water's request to modify its Low Income Payment Program (LIPP). Customers enrolled in the program, who also receive Social Security or are enrolled in Medicare, will be exempt from the monthly distribution system improvement charge. LIPP enrollees had previously only been exempt from paying the monthly fixed service charge.

After filing for the rate increase in January 2015, New Jersey American Water's request underwent extensive public and regulatory scrutiny. The ratemaking process required a lengthy and detailed review by the staff of the BPU, the New Jersey Division of Rate Counsel, the Office of Administrative Law, and more than a dozen interested groups, some of whom the state of New Jersey granted full intervener status in the proceedings. The process also included several public hearings for customer input before an Administrative Law Judge.

New Jersey American Water, a wholly owned subsidiary of American Water (NYSE: AWK) is the largest investor-owned water utility in the state, providing high-quality and reliable water and/or wastewater services to approximately 2.5 million people. Founded in 1886, American Water is the largest and most geographically diverse publicly traded U.S. water and wastewater utility company. With headquarters in Voorhees, N.J., the company employs more than 6,800 dedicated professionals who provide drinking water, wastewater and other related services to approximately 15 million people in 47 states, as well as parts of Canada. More information can be found by visiting www.amwater.com.

Ladies and Gentlemen:

1. American Water Capital Corp., a Delaware corporation (the “**Company**”), proposes, subject to the terms and conditions stated herein, to issue and sell to the underwriters named in Schedule I hereto (the “**Underwriters**”), for whom you (the “**Representatives**”) are acting as representatives, (a) an aggregate of $300,000,000 principal amount of the Company’s 3.400% Senior Notes due 2025 (the “**2025 Notes**”) and (b) an aggregate of $200,000,000 principal amount of the Company’s 4.300% Senior Notes due 2042 (the “**2042 Notes**” and, together with the 2025 Notes, the “**Securities**”).

2. The Company previously entered into a support agreement with American Water Works Company, Inc., a Delaware corporation (the “**Parent**”), dated June 22, 2000 and amended as of July 26, 2000 (as such agreement may be hereinafter amended, modified or supplemented from time to time in accordance with the terms and provisions thereof, the “**Support Agreement**”). Pursuant to the Support Agreement, the Parent has agreed, among other things,

to provide funds to the Company if it is unable to make timely payment of principal of and premium, if any, and interest on Debt (as defined in the Support Agreement) issued by the Company.

3. The Company and the Parent, jointly and severally, represent and warrant to, and agree with, each of the Underwriters that:

(a) An "automatic shelf registration statement" as defined under Rule 405 under the Securities Act of 1933, as amended (the "**Act**"), on Form S-3 (File Nos. 333-181155 and 333-181155-01) in respect of the Securities has been filed with the Securities and Exchange Commission (the "**Commission**") not earlier than three years prior to the date hereof; such registration statement, and any post-effective amendment thereto, each in a form heretofore delivered to the Representatives, became effective on filing; and no stop order suspending the effectiveness of such registration statement or any part thereof has been issued and, to the Parent's or the Company's knowledge, no proceeding for that purpose has been initiated or threatened by the Commission, and no notice of objection of the Commission to the use of such registration statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Act has been received by the Parent or the Company (the base prospectus filed as part of such registration statement, in the form in which it has most recently been filed with the Commission on or prior to the date of this Agreement, is hereinafter called the "**Basic Prospectus**"; any preliminary prospectus (including any preliminary prospectus supplement) relating to the Securities filed with the Commission pursuant to Rule 424(b) under the Act is hereinafter called a "**Preliminary Prospectus**"; the various parts of such registration statement, including all exhibits thereto but excluding the Form T-1 and including any prospectus supplement relating to the Securities that is filed with the Commission and deemed by virtue of Rule 430B to be part of such registration statement, each as amended at the time such part of the registration statement became effective, are hereinafter collectively called the "**Registration Statement**"; the Basic Prospectus, as amended and supplemented immediately prior to the Applicable Time (as defined in Section 3(c) hereof), is hereinafter called the "**Pricing Prospectus**"; the form of the final prospectus relating to the Securities filed with the Commission pursuant to Rule 424(b) under the Act in accordance with Section 7(a) hereof is hereinafter called the "**Prospectus**"; any reference herein to the Basic Prospectus, the Pricing Prospectus, any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the Act, as of the date of such prospectus; any reference to any amendment or supplement to the Basic Prospectus, any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include any post-effective amendment to the Registration Statement, any prospectus supplement relating to the Securities filed with the Commission pursuant to Rule 424(b) under the Act and any documents filed under the Securities Exchange Act of 1934, as amended (the "**Exchange Act**"), and incorporated therein, in each case after the date of the Basic Prospectus, such Preliminary Prospectus, or the Prospectus, as the case may be; any reference to any amendment to the Registration Statement shall be deemed to refer to and include any annual report of the Company filed pursuant to Section 13(a) or 15(d) of the Exchange Act after the effective date of the Registration Statement that is incorporated by reference in the Registration Statement; and any "issuer free writing prospectus" as defined in Rule 433 under the Act relating to the Securities is hereinafter called an "**Issuer Free Writing Prospectus**");

(b) No order preventing or suspending the use of any Preliminary Prospectus or any Issuer Free Writing Prospectus has been issued by the Commission. Each Preliminary Prospectus, at the time of filing thereof, conformed in all material respects to the requirements of the Act and the Trust Indenture Act of 1939, as amended (the "**Trust Indenture Act**"), and the rules and regulations of the Commission thereunder, and did not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; *provided*, *however*, that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with information furnished in writing to the Company by the Representatives expressly for use therein (the "**Underwriter Information**");

(c) For the purposes of this Agreement, the "**Applicable Time**" is 4:25 p.m. (Eastern time) on the date of this Agreement. The Pricing Prospectus, as supplemented by the final term sheet prepared and filed pursuant to Section 7(a) hereof, taken together (collectively, the "**Pricing Disclosure Package**"), as of the Applicable Time, did not include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; and each Issuer Free Writing Prospectus listed on Schedule II hereto does not conflict with the information contained in the Registration Statement, the Pricing Prospectus or the Prospectus and each such Issuer Free Writing Prospectus, as supplemented by and taken together with the Pricing Disclosure Package as of the Applicable Time, did not include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; *provided, however,* that the representations and warranties in this clause (c) shall not apply to statements or omissions made in an Issuer Free Writing Prospectus in reliance upon and in conformity with the Underwriter Information;

(d) The documents incorporated by reference in the Pricing Prospectus and the Prospectus, when they became effective or were filed with the Commission, as the case may be, conformed in all material respects to the requirements of the Act or the Exchange Act, as applicable, and the rules and regulations of the Commission thereunder, and none of such documents contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein not misleading; any further documents so filed and incorporated by reference in the Prospectus or any further amendment or supplement thereto, when such documents become effective or are filed with the Commission, as the case may be, will conform in all material respects to the requirements of the Act or the Exchange Act, as applicable, and the rules and regulations of the Commission thereunder and will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; *provided, however,* that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with the Underwriter Information;

(e) The interactive data in eXtensible Business Reporting Language filed as exhibits to the reports included or incorporated by reference in the Registration Statement, the Pricing Disclosure Package and the Prospectus fairly presents the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto;

(f) (i) The Registration Statement conforms, and the Prospectus and any further amendments or supplements to the Registration Statement and the Prospectus will conform, in all material respects to the requirements of the Act and the Trust Indenture Act and the rules and regulations of the Commission thereunder and (ii) the Registration Statement and the Prospectus and any further amendments or supplements to the Registration Statement and the Prospectus do not and will not, as of the applicable effective date as to each part of the Registration Statement and as of the applicable filing date as to the Prospectus and any amendment or supplement thereto, contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; *provided, however*, that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with the Underwriter Information;

(g) None of the Parent, the Company or any of the Parent's other subsidiaries has sustained since the date of the latest audited financial statements included or incorporated by reference in the Pricing Prospectus any material loss or interference with its business from fire, explosion, flood or other calamity, whether or not covered by insurance, or from any labor dispute or court or governmental action, order or decree, otherwise than as set forth or contemplated in the Pricing Prospectus; and, since the respective dates as of which information is given in the Registration Statement and the Pricing Prospectus, there has not been any change in the capital stock or increase in long-term debt of the Parent, the Company or any of the Parent's other subsidiaries or any material adverse change, or any development involving a prospective material adverse change, in or affecting the general affairs, management, financial position, stockholders' equity or results of operations of the Parent, the Company and the Parent's other subsidiaries, taken as a whole, otherwise than as set forth or contemplated in the Pricing Prospectus;

(h) The Parent, the Company and each of the Parent's other subsidiaries have good and marketable title in fee simple to all real property and good and marketable title to all personal property owned by them, in each case free and clear of all liens, encumbrances and defects except such as are described in the Pricing Prospectus or such as do not affect the value of such property and do not interfere with the use made and proposed to be made of such property by the Parent, the Company and each of the Parent's other subsidiaries except, in each case, as would not, individually or in the aggregate, have a material adverse effect on the financial condition, stockholders' equity, properties or results of operations of the Parent, the Company and the Parent's other subsidiaries, taken as a whole (a "**Material Adverse Effect**"); and any real property and buildings held under lease by the Parent, the Company and each of the Parent's other subsidiaries are held by them under valid, subsisting and enforceable leases with such exceptions as are not material and do not interfere with the use made and proposed to be made of such property and buildings by the Parent, the Company and each of the Parent's other subsidiaries, otherwise than as set forth or contemplated in the Pricing Prospectus or as would not, individually or in the aggregate, have a Material Adverse Effect;

(i) Each of the Parent and the Company has been duly incorporated and is validly existing as a corporation in good standing under the laws of Delaware, with power and authority (corporate and other) to own its properties and conduct its business as described in the Pricing Prospectus, and has been duly qualified as a foreign corporation for the transaction of business and is in good standing under the laws of each other jurisdiction in which it owns or leases properties or conducts any business so as to require such qualification, except where the failure to be so qualified or in good standing would not, individually or in the aggregate, have a Material Adverse Effect; and each subsidiary of the Parent listed on Schedule IV hereto (each a "**Significant Subsidiary**") has been duly incorporated and is validly existing as a corporation in good standing under the laws of its jurisdiction of incorporation, except where the failure to be in good standing would not, individually or in the aggregate, have a Material Adverse Effect;

(j) All of the issued shares of capital stock of the Parent and the Company have been duly and validly authorized and issued and are fully paid and non-assessable; and all of the issued shares of capital stock of each Significant Subsidiary have been duly and validly authorized and issued, are fully paid and non-assessable and (except for directors' qualifying shares and except as otherwise set forth in the Pricing Prospectus) are owned directly or indirectly by the Parent, free and clear of all liens, encumbrances, equities or claims, except for liens, encumbrances, equities or claims that would not, individually or in the aggregate, have a Material Adverse Effect;

(k) This Agreement has been duly authorized, executed and delivered by each of the Company and the Parent; the Securities have been duly authorized and, when issued and delivered pursuant to this Agreement, will have been duly executed, authenticated, issued and delivered and will constitute valid and legally binding obligations of the Company entitled to the benefits provided by the indenture, dated as of December 4, 2009, between the Company and Wells Fargo Bank, National Association, as Trustee (the "**Trustee**") as amended (the "**Indenture**"), under which they are to be issued; the Indenture has been duly authorized, executed and delivered by the Company and duly qualified under the Trust Indenture Act and constitutes a valid and legally binding instrument, enforceable in accordance with its terms, subject, as to enforcement, to bankruptcy, insolvency, reorganization and other laws of general applicability relating to or affecting creditors' rights and to general equity principles; the Support Agreement has been duly authorized, executed and delivered by the Parent and the Company and constitutes a valid and legally binding instrument, enforceable in accordance with its terms, subject, as to enforcement, to bankruptcy, insolvency, reorganization and other laws of general applicability relating to or affecting creditors' rights and to general equity principles; and the Securities, the Indenture and the Support Agreement will conform to the descriptions thereof in the Pricing Prospectus and the Prospectus and will be in substantially the form previously delivered to you;

(l) None of the transactions contemplated by this Agreement (including, without limitation, the use of the proceeds from the sale of the Securities) will violate or result in a violation of Section 7 of the Exchange Act, or any regulation promulgated thereunder, including, without limitation, Regulations T, U, and X of the Board of Governors of the Federal Reserve System;

(m) The issue and sale of the Securities and the compliance by the Parent and the Company with all of the provisions of the Securities, the Indenture, the Support Agreement and this Agreement and the consummation of the transactions herein and therein contemplated (i) will not conflict with or result in a breach or violation of any of the terms or provisions of, or constitute a default under, any indenture, mortgage, deed of trust, loan agreement or other agreement or instrument to which the Parent, the Company or any of the Parent's other subsidiaries is a party or by which the Parent, the Company or any of the Parent's other subsidiaries is bound or to which any of the property or assets of the Parent, the Company or any of the Parent's other subsidiaries is subject, and (ii) will not result in any violation of (A) the provisions of the Certificate of Incorporation or the By-laws, as amended, of the Company or the Restated Certificate of Incorporation or the Amended and Restated By-laws of the Parent or (B) any statute or any order, rule or regulation of any court or governmental agency or body having jurisdiction over the Parent, the Company or any of the Parent's other subsidiaries or any of their properties, except in the case of clauses (i) and (ii)(B) for any conflict, breach, violation or default that would not, individually or in the aggregate, have a Material Adverse Effect or impair the ability of the Parent or the Company to consummate the transactions contemplated by this Agreement; and no consent, approval, authorization, order, registration or qualification of or with any such court or governmental agency or body is required for the issue and sale of the Securities or the consummation by the Parent or the Company of the transactions contemplated by this Agreement, the Indenture, or the Support Agreement, except (i) the registration under the Act of the Securities, (ii) such consents, approvals, authorizations, orders, registrations or qualifications as may be required under state securities or Blue Sky laws in connection with the purchase and distribution of the Securities by the Underwriters and (iii) such consents, approvals, authorizations, orders, registrations or qualifications that have already been obtained or the failure of which to obtain would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect or impair the ability of the Parent or the Company to consummate the transactions contemplated by this Agreement;

(n) None of the Parent, the Company or any of the Parent’s other subsidiaries is (A) in violation of its Certificate of Incorporation or By-laws, as amended, in the case of the Company, or its Restated Certificate of Incorporation or Amended and Restated By-laws, in the case of the Parent, or similar organizational documents, in the case of the Parent’s other subsidiaries, or (B) in default in the performance or observance of any material obligation, agreement, covenant or condition contained in any indenture, mortgage, deed of trust, loan agreement, lease or other agreement or instrument to which it is a party or by which it or any of its properties may be bound, except in the case of clause (A) (with respect to subsidiaries of the Parent other than the Company and the Significant Subsidiaries) and clause (B), for violations or defaults that would not, individually or in the aggregate, have a Material Adverse Effect;

(o) The statements set forth in the Pricing Prospectus and Prospectus under the caption “Description of the Notes”, insofar as they purport to constitute a summary of the terms of the Securities, under the caption “Underwriting”, insofar as they purport to describe the provisions of the documents described therein, under the caption “Certain United States Federal Income Tax Considerations”, and in the Company’s most recent Annual Report on Form 10-K under the captions “Item 1A, Risk Factors—Risks Related to Our Industry and Business—Our utility operations are subject to extensive economic regulations. Decisions by state PUCs and other regulatory agencies can significantly affect our business and results of operations”; and “Item 1, Business—Our Regulated Businesses—Regulation—Economic Regulation”, insofar as they purport to describe the provisions of the laws and documents referred to therein, are accurate, complete and fair in all material respects;

(p) Other than as set forth in the Pricing Prospectus, there are no legal or governmental proceedings pending to which the Parent, the Company or any of the Parent’s other subsidiaries is a party or of which any property of the Parent, the Company or any of the Parent’s other subsidiaries is the subject which would reasonably be expected to, individually or in the aggregate, have a Material Adverse Effect; and, to the best of the Company’s and the Parent’s knowledge, no such proceedings are threatened or contemplated by governmental authorities or threatened by others;

(q) Neither the Parent nor the Company is or, after giving effect to the offering and sale of the Securities and the application of the proceeds thereof, will be an “investment company”, as such term is defined in the Investment Company Act of 1940, as amended (the “**Investment Company Act**”);

(r) (A) (i) At the time of filing the Registration Statement, (ii) at the time of the most recent amendment thereto for the purposes of complying with Section 10(a)(3) of the Act (whether such amendment was by post-effective amendment, incorporated report filed pursuant to Section 13 or 15 (d) of the Exchange Act or form of prospectus), and (iii) at the time the Parent or the Company or any person acting on the Parent’s or the Company’s behalf (within the meaning, for this clause only, of Rule 163(c) under the Act) made any offer relating to the Securities in reliance on the exemption of Rule 163 under the Act, the Parent and the Company were each a “well-known seasoned issuer” as defined in Rule 405 under the Act; and (B) at the earliest time after the filing of the Registration Statement that the Parent or the Company or another offering participant made a bona fide offer (within the meaning of Rule 164(h)(2) under the Act) of the Securities, neither the Parent nor the Company was an “ineligible issuer” as defined in Rule 405 under the Act;

(s) PricewaterhouseCoopers LLP, which has certified certain financial statements of the Parent and its subsidiaries, is an independent registered public accounting firm with respect to the Parent and its subsidiaries as required by the Act and the rules and regulations of the Commission thereunder;

(t) Except as disclosed in the Pricing Prospectus, the Parent maintains a system of internal controls over financial reporting (as such term is defined in Rule 13a-15(f) under the Exchange Act) that complies in all material respects with the requirements of the Exchange Act and has been designed by the Parent’s principal executive officer and principal financial officer, or under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Except as disclosed in the Pricing Prospectus, the Parent’s internal controls over financial reporting are effective and the Parent is not aware of any material weaknesses in its internal controls over financial reporting;

(u) Except as disclosed in the Pricing Prospectus, since the date of the latest audited financial statements included or incorporated by reference in the Pricing Prospectus, there has been no change in the Parent’s internal controls over financial reporting that has materially affected, or is reasonably likely to materially affect, the Parent’s internal controls over financial reporting;

(v) The Parent maintains disclosure controls and procedures (as such term is defined in Rule 13a-15(e) under the Exchange Act) that comply in all material respects with the requirements of the Exchange Act; such disclosure controls and procedures have been designed to ensure that material information relating to the Parent, the Company and each of the Parent’s other subsidiaries is made known to the Parent’s principal executive officer and principal financial officer by others within those entities; and, except as disclosed in the Pricing Prospectus, such disclosure controls and procedures are effective;

(w) The Parent, the Company and each of the Parent’s other subsidiaries possess all permits, licenses, franchises, authorizations, registrations, qualifications and approvals of governmental or regulatory authorities as may be required of them to own their properties and conduct their businesses in the manner described in the Pricing Prospectus (collectively, “**Permits**”), except where the failure to possess such Permits would not, individually or in the aggregate, have a Material Adverse Effect; and the Parent, the Company and each of the Parent’s other subsidiaries have fulfilled and performed all of their obligations with respect to such Permits required to have been performed, and no event has occurred which allows or, after notice or lapse of time or both, would allow revocation or termination thereof or result in any other material impairment of the rights of the holder of any such Permit, except, in each case, as disclosed in the Pricing Prospectus or would not, individually or in the aggregate, have a Material Adverse Effect;

(x) To the Parent’s and the Company’s knowledge, the Parent, the Company and each of the Parent’s other subsidiaries own, possess or have the right to employ sufficient patents, patent rights, licenses, inventions, copyrights, know how (including trade secrets and other unpatented and/or unpatentable proprietary or confidential information, software, systems or procedures), trademarks, service marks and trade names, inventions, computer programs, technical data and information (collectively, the “**Intellectual Property Rights**”) reasonably necessary to conduct their businesses as now conducted, except where the failure to own, possess or have the right would not, individually or in the aggregate, have a Material Adverse Effect. None of the Parent, the Company or any of the Parent’s other subsidiaries has received any notice of infringement or conflict with asserted rights of others with respect to any of the Intellectual Property Rights, whether or not arising from transactions in the ordinary course of business, except for such infringements or conflicts that would not, individually or in the aggregate, have a Material Adverse Effect. To the Parent’s and the Company’s knowledge, the use of the Intellectual Property Rights in connection with the business and operations of the Parent, the Company and each of the Parent’s other subsidiaries does not infringe on the rights of any person;

(y) Except as disclosed in the Pricing Prospectus, none of the Parent, the Company or any of the Parent’s other subsidiaries (i) is in violation of any law, statute, or any rule, regulation, decision or order of any governmental agency or body or any court relating to the use, disposal or release of hazardous or toxic substances or relating to the protection or restoration of the environment or human exposure to hazardous or toxic substances (collectively, “**Environmental Laws**”), (ii) owns or operates any real property which, to the

Parent’s or the Company’s knowledge, is contaminated with any substance that is regulated under any Environmental Laws, (iii) is, to the Parent’s or the Company’s knowledge, liable for any off-site disposal or contamination pursuant to any Environmental Laws, or (iv) has received any written notice of any claim under any Environmental Laws, and the Parent and the Company are not aware of any pending investigation which could reasonably be expected to lead to such a claim, in the case of clauses (i), (ii), (iii) and (iv), which could, individually or in the aggregate, have a Material Adverse Effect;

(z) The Parent, the Company and each of the Parent’s other subsidiaries are insured by insurers of recognized financial responsibility against such losses and risks and in such amounts as are, in management’s judgment, prudent and customary in the businesses in which they are engaged; within the past five years, none of the Parent, the Company or any such subsidiary has been refused any insurance coverage sought or applied for; and none of the Parent, the Company or any such other subsidiary has any reason to believe that it will not be able to renew its existing insurance coverage as and when such coverage expires or to obtain similar coverage from similar insurers as may be necessary to continue its business at a cost that would not, individually or in the aggregate, have a Material Adverse Effect, except, in each case, as set forth in or contemplated in the Pricing Prospectus;

(aa) Neither the Parent nor the Company has taken or will take, directly or indirectly, any action which is designed to or which has constituted or which might reasonably be expected to cause or result in stabilization or manipulation of the price of any security of the Company to facilitate the sale or resale of the Securities;

(bb) The Parent is in compliance in all material respects with all provisions of the Sarbanes-Oxley Act of 2002 that are effective and applicable to the Parent as of the date hereof;

(cc) The Parent, the Company and each of the Parent’s other subsidiaries have filed all federal, state and foreign tax returns, or has filed for extensions of the due dates of such returns, required to be filed and have paid all taxes shown as due thereon except where the failure to so file such returns would not, individually or in the aggregate, have a Material Adverse Effect; and other than tax deficiencies which the Parent, the Company or any of the Parent’s other subsidiaries is contesting in good faith and for which the Parent, the Company or any of the Parent’s other subsidiaries has provided adequate reserves, there is no tax deficiency that has been asserted in writing against the Parent, the Company or any of the Parent’s other subsidiaries that would, individually or in the aggregate, have a Material Adverse Effect; and the United States federal income tax returns of the Parent, the Company and each of the Parent’s other subsidiaries through the fiscal year ended December 31, 2010 have been settled and no assessment in connection therewith has been made against the Parent, the Company or any of the Parent’s other subsidiaries that would, individually or in the aggregate, have a Material Adverse Effect; and (dd) Except as disclosed in the Pricing Prospectus, none of the following events has occurred or exists: (i) a failure to fulfill the obligations, if any, under the minimum funding standards of Section 302 of the United States Employee Retirement Income Security Act of 1974, as amended (“**ERISA**”), and the regulations and published interpretations thereunder with respect to a Plan, determined without regard to any waiver of such obligations or extension of any amortization period; (ii) an audit or investigation by the Internal Revenue Service, the U.S. Department of Labor, the Pension Benefit Guaranty Corporation or any other federal or state governmental agency or any foreign regulatory agency with respect to the employment or compensation of employees by any of the Parent, the Company or any of the Parent’s other subsidiaries that could, individually or in the aggregate, have a Material Adverse Effect; or (iii) any breach of any contractual obligation, or any violation of law or applicable qualification standards, with respect to the employment or compensation of employees by the Parent, the Company or any of the Parent’s other subsidiaries, in the case of clauses (i), (ii) and (iii), that could, individually or in the aggregate, have a Material Adverse Effect. Except as disclosed in the Pricing Prospectus, none of the following events has occurred or is reasonably likely to occur: (i) an increase in the aggregate amount of contributions required to be made to all Plans in the current fiscal year of the Parent, the Company and each of the Parent’s other subsidiaries compared to the amount of such contributions made in the most recently completed fiscal year of the Parent, the Company and each of the Parent’s other subsidiaries; (ii) an increase in the “accumulated post-retirement benefit obligations” (within the meaning of Statement of Financial Accounting Standards 106) of the Parent, the Company and each of the Parent’s other subsidiaries compared to the amount of such obligations in the most recently completed fiscal year of the Parent, the Company and each of the Parent’s other subsidiaries; (iii) any event or condition giving rise to a liability under Title IV of ERISA; or (iv) the filing of a claim by one or more employees or former employees of the Parent, the Company or any of the Parent’s other subsidiaries related to their employment, in the case of clauses (i), (ii), (iii) and (iv), that could, individually or in the aggregate, have a Material Adverse Effect. For purposes of this paragraph, the term “**Plan**” means a plan (within the meaning of Section 3(3) of ERISA) subject to Title IV of ERISA with respect to which the Parent, the Company or any of the Parent’s other subsidiaries may have any liability.

Any certificate signed by any authorized officer of the Parent or the Company and delivered to the Representatives or counsel for the Underwriters in connection with the offering of the Securities shall be deemed a representation and warranty by the Parent and the Company, as to matters covered thereby, to each Underwriter.

4. Subject to the terms and conditions herein set forth, the Company agrees to issue and sell to each of the Underwriters, and each of the

Underwriters agrees, severally and not jointly, to purchase from the Company, (a) at a purchase price of 99.217% of the principal amount thereof, including accrued interest**,** if any, from August 14, 2014 to the Time of Delivery (as defined in Section 6(a)), the principal amount of the 2025 Notes set forth opposite the name of such Underwriter in Schedule I hereto and (b) at a purchase price of 98.714% of the principal amount thereof, including accrued interest from June 1, 2014 to the Time of Delivery, the principal amount of the 2042 Notes set forth opposite the name of such Underwriter in Schedule I hereto.

5. Upon the authorization by the Company of the release of the Securities, the several Underwriters propose to offer the Securities for sale upon the terms and conditions set forth in the Prospectus.

6. (a) Each series of Securities to be purchased by each Underwriter hereunder will be represented by one or more definitive global securities in book-entry form which will be deposited by or on behalf of the Company with The Depository Trust Company ("**DTC**") or its designated custodian. The Company will deliver the Securities to the Representatives, for the account of the Underwriters, against payment by or on behalf of the Underwriters of the purchase price therefor by wire transfer of Federal (same day) funds, by causing DTC to credit the Securities to the account of the Representatives at DTC. The Company will cause forms of the certificates representing the Securities to be made available to the Representatives for checking at least twenty-four hours prior to the Time of Delivery hereunder at the office of Sullivan & Cromwell LLP, 125 Broad Street, New York, New York 10004 (the "**Closing Location**"). The time and date of such delivery and payment shall be 9:30 a.m., Eastern time, on August 14, 2014 or such other time and date as the Representatives and the Company may agree upon in writing. Such time and date is herein called the "**Time of Delivery**".

(b) The documents to be delivered at the Time of Delivery by or on behalf of the parties hereto pursuant to Section 10 hereof, including the cross receipt for the Securities and any additional documents requested by the Underwriters pursuant to Section 10 hereof, will be delivered at the Closing Location, and the Securities will be delivered through the facilities of DTC, all at the Time of Delivery. A meeting will be held at the Closing Location at 2:00 p.m., Eastern time, on the New York Business Day next preceding the Time of Delivery, at which meeting the final drafts of the documents to be delivered pursuant to the preceding sentence will be available for review by the parties hereto. For the purposes of this Agreement, "**New York Business Day**" shall mean each Monday, Tuesday, Wednesday, Thursday and Friday which is not a day on which banking institutions in New York City are generally authorized or obligated by law or executive order to close.

7. Each of the Parent and the Company, jointly and severally, agrees with each of the Underwriters:

(a) To prepare the Prospectus in a form approved by the Representatives and to file such Prospectus pursuant to Rule 424(b) under the Act not later than the Commission's close of business on the second business day following the execution and delivery of this Agreement and to make no further amendment or any supplement to the Registration Statement, the Basic Prospectus or the Prospectus prior to the Time of Delivery without the consent of the Representatives promptly after reasonable notice thereof (which consent shall not be unreasonably withheld); to advise the Representatives, promptly after it receives notice thereof, of the time when any amendment to the Registration Statement has been filed or becomes effective or any amendment or supplement to the Prospectus has been filed and to furnish the Representatives with copies thereof; to prepare a final term sheet, containing solely a description of the Securities, in a form substantially consistent with Schedule III hereto and to file such term sheet pursuant to Rule 433(d) under the Act within the time required by such Rule; to file promptly all other material required to be filed by the Company with the Commission pursuant to Rule 433(d) under the Act; to file promptly all reports and any definitive proxy or information statements required to be filed by the Parent or the Company with the Commission pursuant to Section 13(a), 13(c), 14 or 15(d) of the Exchange Act subsequent to the date of the Prospectus and for so long as the delivery of a prospectus (or in lieu thereof, the notice referred to in Rule 173(a) under the Act) is required in connection with the offering or sale of the Securities; to advise the Representatives, promptly after it receives notice thereof, of the issuance by the Commission of any stop order or of any order preventing or suspending the use of any Preliminary Prospectus or other prospectus in respect of the Securities, of any notice of objection of the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Act, of the suspension of the qualification of the Securities for offering or sale in any jurisdiction, of the initiation or threatening of any proceeding for any such purpose, or of any request by the Commission for the amending or supplementing of the Registration Statement or the Prospectus or for additional information; and, in the event of the issuance of any stop order or of any order preventing or suspending the use of any Preliminary Prospectus or other prospectus or suspending any such qualification, to promptly use its best efforts to obtain the withdrawal of such order; and in the event of any such issuance of a notice of objection, promptly to take such steps including, without limitation, amending the Registration Statement or filing a new registration statement, at its own expense, as may be necessary to permit offers and sales of the Securities by the Underwriters (references herein to the Registration Statement shall include any such amendment or new registration statement);

(b) If by the third anniversary (the "**Renewal Deadline**") of the initial effective date of the Registration Statement, any of the Securities remain unsold by the Underwriters, the Parent will file, if it has not already done so and is eligible to do so, a new automatic shelf registration statement relating to the Securities, in a form satisfactory to the Representatives. If at the Renewal Deadline the Parent is no longer eligible to file an automatic shelf registration statement, the Parent will, if it has not already done so, file a new shelf registration statement relating to the Securities, in a form satisfactory to the Representatives and will use its best efforts to cause such registration statement to be declared effective within 180 days after the Renewal Deadline. The Parent will take all other action necessary or appropriate to permit the public offering and sale of the Securities to continue as contemplated in the expired registration statement relating to the Securities. References herein to the Registration Statement shall include such new automatic shelf registration statement or such new shelf registration statement, as the case may be;

(c) Promptly from time to time to take such action as the Representatives may reasonably request to qualify the Securities for offering and sale under the securities laws of such U.S. jurisdictions as the Representatives may request and to comply with such laws so as to permit the continuance of sales and dealings therein in such jurisdictions for as long as may be necessary to complete the distribution of the Securities, provided that in connection therewith neither the Parent nor the Company shall be required to qualify as a foreign corporation or to file a general consent to service of process or subject itself to taxation for doing business in any jurisdiction;

(d) To use reasonable efforts to furnish to the Underwriters as soon as practicable after the date of this Agreement but no later than 5:30 p.m., Eastern time, on the second New York Business Day immediately succeeding the date of this Agreement and from time to time, with printed and electronic copies of the Prospectus in such quantities as the Representatives may reasonably request, and, if the delivery of a prospectus (or in lieu thereof, the notice referred to in Rule 173(a) under the Act) is, based on advice of counsel, required at any time during the period from the time of issue of the Prospectus until the expiration of nine months after the time of issue of the Prospectus in connection with the offering or sale of the Securities and if at such time any event shall have occurred as a result of which the Prospectus as then amended or supplemented would include an untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made when such Prospectus (or in lieu thereof, the notice referred to in Rule 173(a) under the Act) is delivered, not misleading, or, if for any other reason it shall be necessary during such same period to amend or supplement the Prospectus or to file under the Exchange Act any document incorporated by reference in the Prospectus in order to comply with the Act or the Exchange Act, to notify the Representatives and upon the request of the Representatives to file such document and to prepare and furnish without charge to each Underwriter and to any dealer in securities as many printed and electronic copies as the Representatives may from time to time reasonably request of an amended Prospectus or a supplement to the Prospectus which will correct such statement or omission or effect such compliance; and in case any Underwriter is required to deliver a prospectus (or in lieu thereof, the notice referred to in Rule 173(a) under the Act) in connection with sales of any of the Securities at any time nine months or more after the time of issue of the Prospectus, upon the request of the Representatives but at the expense of such Underwriter, to prepare and deliver to such Underwriter as many printed and electronic copies as the Representatives may request of an amended or supplemented Prospectus complying with Section 10(a)(3) of the Act;

(e) To make generally available to its securityholders as soon as practicable, but in any event not later than sixteen months after the effective date of the Registration Statement (as defined in Rule 158(c) under the Act), an earnings statement of the Parent and its subsidiaries (which need not be audited) complying with Section 11(a) of the Act and the rules and regulations of the Commission thereunder (including, at the option of the Parent, Rule 158);

(f) During the period beginning from the date hereof and continuing until the Time of Delivery, not to offer, sell, contract to sell, or otherwise dispose of, except as provided hereunder, any securities of the Parent or the Company that are substantially similar to the Securities without the Representatives' prior written consent;

(g) To take all reasonable action necessary to enable Standard & Poor's Ratings Service, a division of McGraw Hill, Inc., and Moody's Investors Service Inc. to provide their respective credit ratings of the Securities;

(h) During a period of three years from the effective date of the Registration Statement, to furnish to the holders of the Securities as soon as practicable after the end of each fiscal year an annual report (including a balance sheet and statements of income, stockholders' equity and cash flows of the Parent and its consolidated subsidiaries certified by independent public accountants) and, as soon as practicable after the end of each of the first three quarters of each fiscal year (beginning with the fiscal quarter ending after the effective date of the Registration Statement), to make available to the holders of the Securities consolidated summary financial information of the Parent and its subsidiaries for such quarter in reasonable detail; *provided, however*, that the Parent and the Company may satisfy the requirements of this subsection by making any such reports, communications or information available on its web site or by filing such information with the Commission via EDGAR or any successor filing system thereto;

(i) During a period of three years from the effective date of the Registration Statement, to furnish to the Representatives copies of all reports or other communications (financial or other) furnished to the holders of the Securities, and to deliver to the Representatives as soon as they are available, copies of any reports and financial statements furnished to or filed with the Commission or any national securities exchange on which any class of securities of the Parent or the Company is listed, *provided*, *however*, that the Parent and the Company may satisfy the requirements of this subsection by making any such reports, communications or information available on its web site or by filing such information with the Commission via EDGAR or any successor filing system thereto;

(j) To use the net proceeds received by it from the sale of the Securities pursuant to this Agreement in the manner specified in the Pricing Prospectus under the caption “Use of Proceeds”;

(k) To pay the required Commission filing fees relating to the Securities within the time required by Rule 456(b)(1) under the Act without regard to the proviso therein and otherwise in accordance with Rules 456(b) and 457(r) under the Act; and

(l) Upon request of any Underwriter, to furnish, or cause to be furnished, to such Underwriter an electronic version of the Parent’s trademarks, servicemarks and corporate logo for use on the website, if any, operated by such Underwriter for the purpose of facilitating the on-line offering of the Securities (the “**License**”); *provided*, *however*, that the License shall be used solely for the purpose described above, is granted without any fee and may not be assigned or transferred.

8. (a) (i) Each of the Parent and the Company represents and agrees that, other than the final term sheet in a form substantially consistent with Schedule III hereto and filed pursuant to Section 7(a) hereof, without the prior written consent of the Representatives, it has not made and will not make any offer relating to the Securities that would constitute a “free writing prospectus” as defined in Rule 405 under the Act; (ii) each Underwriter represents and agrees that, without the prior written consent of the Company, other than one or more term sheets relating to the Securities substantially consistent with Schedule III hereto, containing no “issuer information” (as defined in Rule 433(h)(2) under the Act) that was not included in the Preliminary Prospectus or Pricing Prospectus, it has not made and will not make any offer relating to the Securities that would constitute a free writing prospectus; and (iii) any such free writing prospectus the use of which has been consented to by the Company and the Representatives is listed on Schedule II hereto;

(b) The Company has complied and will comply with the requirements of Rule 433 under the Act applicable to any Issuer Free Writing Prospectus, including timely filing with the Commission or retention where required and legending; and the Company represents that it has satisfied and agrees that it will satisfy the conditions under Rule 433 under the Act to avoid a requirement to file with the Commission any electronic road show; and

(c) The Company agrees that if at any time following issuance of an Issuer Free Writing Prospectus any event occurred or occurs as a result of which such Issuer Free Writing Prospectus would conflict with the information in the Registration Statement, the Pricing Prospectus or the Prospectus or, when taken together with the Pricing Prospectus, would include an untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances then prevailing, not misleading, the Company will give prompt notice thereof to the Representatives and, if requested by the Representatives, will prepare and furnish without charge to each Underwriter an Issuer Free Writing Prospectus or other document which will correct such conflict, statement or omission; *provided, however,* that this representation and warranty shall not apply to any statements or omissions in an Issuer Free Writing Prospectus made in reliance upon and in conformity with the Underwriter Information.

9. Each of the Parent and the Company covenants and agrees with the several Underwriters that the Parent and the Company will pay or cause to be paid the following: (i) the fees, disbursements and expenses of the Parent's and the Company's counsel and accountants in connection with the registration of the Securities under the Act and all other expenses in connection with the preparation, printing, reproduction and filing of the Registration Statement, the Basic Prospectus, any Preliminary Prospectus, any Issuer Free Writing Prospectus and the Prospectus and amendments and supplements thereto and the mailing and delivering of copies thereof to the Underwriters and dealers; (ii) the cost of printing or producing any agreement among Underwriters, this Agreement, the Indenture, the Support Agreement, any Blue Sky survey, closing documents (including any compilations thereof) and any other documents in connection with the offering, purchase, sale and delivery of the Securities; (iii) all expenses in connection with the qualification of the Securities for offering and sale under state securities laws as provided in Section 7(c) hereof, including the fees and disbursements of counsel for the Underwriters in connection with such qualification and in connection with any Blue Sky survey; (iv) any fees charged by securities rating services for rating the Securities; (v) the cost of preparing the Securities; (vi) the fees and expenses of the Trustee and any agent of the Trustee and the fees and disbursements of counsel for the Trustee in connection with the Indenture, the Securities and the Support Agreement; and (vii) all other costs and expenses incident to the performance of its obligations hereunder which are not otherwise specifically provided for in this Section; *provided, however,* that reimbursements to the Underwriters, if any, shall be limited to expenses actually incurred and *provided further* that in the case of clause (iii), the Parent and the Company shall not be requested to cover expenses of counsel for the Underwriters in excess of $5,000 in the aggregate.

10. The obligations of the Underwriters hereunder shall be subject, in their discretion, to the condition that all representations and warranties and other statements of the Parent and the Company herein are, at and as of the Time of Delivery, true and correct, the condition that the Parent and the Company shall have performed all of their obligations hereunder theretofore to be performed, and the following additional conditions:

(a) The Prospectus shall have been filed with the Commission pursuant to Rule 424(b) under the Act within the applicable time period prescribed for such filing by the rules and regulations under the Act and in accordance with Section 7(a) hereof; the final term sheet in a form substantially consistent with Schedule III hereto, and any other material required to be filed by the Company pursuant to Rule 433(d) under the Act, shall have been filed with the Commission within the applicable time period prescribed for such filing by Rule 433; no stop order suspending the effectiveness of the Registration Statement or any part thereof shall have been issued and no proceeding for that purpose shall have been initiated or threatened by the Commission and no notice of objection of the Commission to the use of the Registration Statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Act shall have been received; no stop order suspending or preventing the use of the Prospectus or any Issuer Free Writing Prospectus shall have been initiated or threatened by the Commission; and all requests for additional information on the part of the Commission shall have been complied with to the reasonable satisfaction of the Representatives;

(b) Sullivan & Cromwell LLP, counsel for the Underwriters, shall have furnished to the Representatives such written opinions, dated the Time of Delivery, in form and substance satisfactory to the Representatives, and such counsel shall have received such papers and information as they may reasonably request to enable them to pass upon such matters;

(c) Morgan, Lewis & Bockius LLP, counsel for the Company, shall have furnished to the Representatives their written opinion and 10b-5 statement, each dated the Time of Delivery, in the form attached as Annex IIA and B hereto;

(d) Thomas S. Wyatt, Vice President and Secretary of the Company, shall have furnished to the Representatives his written opinion, dated the Time of Delivery, in the form attached as Annex III hereto;

(e) (i) On the date of this Agreement, (ii) on the effective date of any post-effective amendment to the Registration Statement filed subsequent to the date of this Agreement and (iii) at the Time of Delivery, PricewaterhouseCoopers LLP shall have furnished to the Representatives a letter or letters, dated the respective dates of delivery thereof, in form and substance satisfactory to the Representatives, to the effect set forth in Annex I hereto;

(f) (i) None of the Parent, the Company or any of the Parent’s other subsidiaries shall have sustained since the date of the latest audited financial statements included or incorporated by reference in the Pricing Prospectus any loss or interference with its business from fire, explosion, flood or other calamity, whether or not covered by insurance, or from any labor dispute or court or governmental action, order or decree, otherwise than as set forth or contemplated in the Pricing Prospectus, and (ii) since the respective dates as of which information is given in the Pricing Prospectus there shall not have been any change in the capital stock or increase in long-term debt of the Parent, the Company or any of the Parent's other subsidiaries or any change, or any development involving a prospective change, in or affecting the general affairs, management, financial position, stockholders' equity or results of operations of the Parent, the Company and the Parent's other subsidiaries, otherwise than as set forth or contemplated in the Pricing Prospectus, the effect of which, in any such case described in clause (i) or (ii), is in the judgment of the Representatives so material and adverse as to make it impracticable or inadvisable to proceed with the public offering or the delivery of the Securities on the terms and in the manner contemplated in the Prospectus;

(g) On or after the Applicable Time (i) no downgrading shall have occurred in the rating accorded the Parent's or the Company's debt securities by any "nationally recognized statistical rating organization", as that term is defined by the Commission pursuant to Section 3(a)(62) of the Exchange Act, and (ii) no such organization shall have publicly announced that it has under surveillance or review, with possible negative implications, its rating of any of the Parent's or the Company's debt securities;

(h) On or after the Applicable Time there shall not have occurred any of the following: (i) a suspension or material limitation in trading in securities generally on the New York Stock Exchange; (ii) a suspension or material limitation in trading in the Parent's or the Company's securities on the New York Stock Exchange; (iii) a general moratorium on commercial banking activities declared by Federal or New York State authorities or a material disruption in commercial banking or securities settlement or clearance services in the United States; (iv) the outbreak or escalation of hostilities involving the United States or the declaration by the United States of a national emergency or war; or (v) the occurrence of any other calamity or crisis or any change in financial, political or economic conditions in the United States or elsewhere, if the effect of any such event specified in clause (iv) or (v) in the judgment of the Representatives makes it impracticable or inadvisable to proceed with the public offering or the delivery of the Securities on the terms and in the manner contemplated in the Prospectus; and

(i) Each of the Parent and the Company shall have furnished or caused to be furnished to the Representatives at the Time of Delivery certificates of officers of the Parent and the Company reasonably satisfactory to the Representatives as to the accuracy of the representations and warranties of the Parent and the Company, respectively, herein at and as of the Time of Delivery, as to the performance by the Parent and the Company of all their respective obligations hereunder to be performed at or prior to the Time of Delivery, as to the matters set forth in subsections (a), (f) and (g) of this Section and as to such other matters as the Representatives may reasonably request.

11. (a) The Parent and the Company will, jointly and severally, indemnify and hold harmless each Underwriter against any losses, claims,

damages or liabilities, joint or several, to which such Underwriter may become subject, under the Act or otherwise, insofar as such losses, claims, damages or liabilities (or actions in respect thereof) arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in the Registration Statement, the Basic Prospectus, any Preliminary Prospectus, the Pricing Prospectus, the Pricing Disclosure Package or the Prospectus, or any amendment or supplement thereto, any Issuer Free Writing Prospectus or any "issuer information" filed or required to be filed pursuant to Rule 433(d) under the Act, or arise out of or are based upon the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading, and will reimburse each Underwriter for any legal or other expenses reasonably incurred by such Underwriter in connection with investigating or defending any such action or claim as such expenses are incurred; *provided*, *however*, that the Parent and the Company shall not be liable in any such case to the extent that any such loss, claim, damage or liability arises out of or is based upon an untrue statement or alleged untrue statement or omission or alleged omission made in the Registration Statement, the Basic Prospectus, any Preliminary Prospectus, the Pricing Prospectus, the Pricing Disclosure Package or the Prospectus, or any amendment or supplement thereto, or any Issuer Free Writing Prospectus, in reliance upon and in conformity with the Underwriter Information.

(b) Each Underwriter will indemnify and hold harmless the Parent and the Company against any losses, claims, damages or liabilities to which the Parent or the Company may become subject, under the Act or otherwise, insofar as such losses, claims, damages or liabilities (or actions in respect thereof) arise out of or are based upon an untrue statement or alleged untrue statement of a material fact contained in the Registration Statement, the Basic Prospectus, any Preliminary Prospectus, the Pricing Prospectus, the Pricing Disclosure Package or the Prospectus, or any amendment or supplement thereto, or any Issuer Free Writing Prospectus, or arise out of or are based upon the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading, in each case to the extent, but only to the extent, that such untrue statement or alleged untrue statement or omission or alleged omission was made in the Registration Statement, the Basic Prospectus, any Preliminary Prospectus, the Pricing Prospectus, the Pricing Disclosure Package or the Prospectus, or any amendment or supplement thereto, or any Issuer Free Writing Prospectus, in reliance upon and in conformity with the Underwriter Information; and will reimburse the Parent and the Company for any legal or other expenses reasonably incurred by the Parent or the Company in connection with investigating or defending any such action or claim as such expenses are incurred.

(c) Promptly after receipt by an indemnified party under subsection (a) or (b) above of notice of the commencement of any action, such indemnified party shall, if a claim in respect thereof is to be made against the indemnifying party under such subsection, notify the indemnifying party in writing of the commencement thereof; but the omission so to notify the indemnifying party shall not relieve it from any liability which it may have to any indemnified party otherwise than under such subsection. In case any such action shall be brought against any indemnified party and it shall notify the indemnifying party of the commencement thereof, the indemnifying party shall be entitled to participate therein and, to the extent that it shall wish, jointly with any other indemnifying party similarly notified, to assume the defense thereof, with counsel reasonably satisfactory to such indemnified party (who shall not, except with the consent of the indemnified party, be counsel to the indemnifying party), and, after notice from the indemnifying party to such indemnified party of its election so to assume the defense thereof, the indemnifying party shall not be liable to such indemnified party under such subsection for any legal expenses of other counsel or any other expenses, in each case subsequently incurred by such indemnified party, in connection with the defense thereof other than reasonable costs of investigation. Notwithstanding the indemnifying party's election to appoint counsel to represent the indemnified party in an action, the indemnified party shall have the right to employ one separate counsel, and the indemnifying party shall bear the reasonable fees, costs and expenses of such separate firm (in addition to one local counsel in each jurisdiction) if (i) the use of counsel chosen by the indemnifying party to represent the indemnified party would present such counsel with a conflict of interest, (ii) in an action where both the indemnifying and the indemnified party are actual or potential defendants, the indemnified party shall have reasonably concluded that there are actual or potential conflicting interests between the indemnifying party and the indemnified party, including situations in which there may be one or more legal defenses available to it and/or other indemnified parties which are different from or additional to those available to the indemnifying party, (iii) the indemnifying party shall not have employed counsel reasonably satisfactory to the indemnified party to represent the indemnified party within a reasonable time after notice of the institution of such action or (iv) the indemnifying party shall authorize the indemnified party to employ separate counsel at the expense of the indemnifying party. No indemnifying party shall, without the written consent of the indemnified party, effect the settlement or compromise of, or consent to the entry of any judgment with respect to, any pending or threatened action or claim in respect of which indemnification or contribution may be sought hereunder (whether or not the indemnified party is an actual or potential party to such action or claim) unless such settlement, compromise or judgment (i) includes an unconditional release of the indemnified party from all liability arising out of such action or claim and (ii) does not include a statement as to or an admission of fault, culpability or a failure to act, by or on behalf of any indemnified party. No indemnified party shall, without the written consent of the indemnifying party (such consent not to be unreasonably withheld), effect the settlement or compromise of, or consent to the entry of any judgment with respect to, any pending or threatened action or claim in respect of which indemnification or contribution may be sought hereunder.

(d) If the indemnification provided for in this Section 11 is unavailable to or insufficient to hold harmless an indemnified party under subsection (a) or (b) above in respect of any losses, claims, damages or liabilities (or actions in respect thereof) referred to therein, then each indemnifying party shall contribute to the amount paid or payable by such indemnified party as a result of such losses, claims, damages or liabilities (or actions in respect thereof) in such proportion as is appropriate to reflect the relative benefits received by the Parent and the Company on the one hand and the Underwriters on the other from the offering of the Securities. If, however, the allocation provided by the immediately preceding sentence is not permitted by applicable law or if the indemnified party failed to give the notice required under subsection (c) above, then each indemnifying party shall contribute to such amount paid or payable by such indemnified party in such proportion as is appropriate to reflect not only such relative benefits but also the relative fault of the Parent and the Company on the one hand and the Underwriters on the other in connection with the statements or omissions which resulted in such losses, claims, damages or liabilities (or actions in respect thereof), as well as any other relevant equitable considerations. The relative benefits received by the Parent and the Company on the one hand and the Underwriters on the other shall be deemed to be in the same proportion as the total net proceeds from the offering (before deducting expenses) received by the Parent and the Company bear to the total underwriting discounts and commissions received by the Underwriters, in each case as set forth on the cover page of the Prospectus. The relative fault shall be determined by reference to, among other things, whether the untrue or alleged untrue statement of a material fact or the omission or alleged omission to state a material fact relates to information supplied by the Parent or the Company on the one hand or the Underwriter Information on the other and the parties' relative intent, knowledge, access to information and opportunity to correct or prevent such statement or omission. The Parent, the Company, and the Underwriters agree that it would not be just and equitable if contributions pursuant to this subsection (d) were determined by pro rata allocation (even if the Underwriters were treated as one entity for such purpose) or by any other method of allocation which does not take account of the equitable considerations referred to above in this subsection (d). The amount paid or payable by an indemnified party as a result of the losses, claims, damages or liabilities (or actions in respect thereof) referred to above in this subsection (d) shall be deemed to include any legal or other expenses reasonably incurred by such indemnified party in connection with investigating or defending any such action or claim. Notwithstanding the provisions of this subsection (d), no Underwriter shall be required to contribute any amount in excess of the amount by which the total price at which the Securities underwritten by it and distributed to the public were offered to the public exceeds the amount of any damages which such Underwriter has otherwise been required to pay by reason of such untrue or alleged untrue statement or omission or alleged omission. No person guilty of fraudulent misrepresentation (within the meaning of Section 11(f) of the Act) shall be entitled to contribution from any person who was not guilty of such fraudulent misrepresentation. The Underwriters' obligations in this subsection (d) to contribute are several in proportion to their respective underwriting obligations and not joint.

(e) The obligations of the Parent and the Company under this Section 11 shall be in addition to any liability which the Parent and the Company may otherwise have and shall extend, upon the same terms and conditions, to the directors, officers, employees and agents of each Underwriter and each person, if any, who controls any Underwriter within the meaning of the Act and each broker-dealer affiliate of any Underwriter; and the obligations of the Underwriters under this Section 11 shall be in addition to any liability which the respective Underwriters may otherwise have and shall extend, upon the same terms and conditions, to each officer, director and employee of the Parent and the Company and to each person, if any, who controls the Parent or the Company within the meaning of the Act.

12. (a) If any Underwriter shall default in its obligation to purchase the Securities which it has agreed to purchase hereunder, the Representatives may in their discretion arrange for any of the Representatives or another party or other parties to purchase such Securities on the terms contained herein. If within thirty six hours after such default by any Underwriter the Representatives do not arrange for the purchase of such Securities, then the Company shall be entitled to a further period of thirty six hours within which to procure another party or other parties satisfactory to the Representatives to purchase such Securities on such terms. In the event that, within the respective prescribed periods, the Representatives notify the Company that they have so arranged for the purchase of such Securities, or the Company notifies the Representatives that it has so arranged for the purchase of such Securities, the Representatives or the Company shall have the right to postpone the Time of Delivery for a period of not more than seven days, in order to effect whatever changes may thereby be made necessary in the Registration Statement or the Prospectus, or in any other documents or arrangements, and the Company agrees to prepare promptly any amendments to the Registration Statement or the Prospectus which in the opinion of the Representatives may thereby be made necessary. The term “Underwriter” as used in this Agreement shall include any person substituted under this Section with like effect as if such person had originally been a party to this Agreement with respect to such Securities.

(b) If, after giving effect to any arrangements for the purchase of the Securities of a defaulting Underwriter or Underwriters by the Representatives and the Company as provided in subsection (a) above, the aggregate principal amount of such Securities which remains unpurchased does not exceed one eleventh of the aggregate principal amount of all the Securities, then the Company shall have the right to require each non-defaulting Underwriter to purchase the principal amount of Securities which such Underwriter agreed to purchase hereunder at such Time of Delivery and, in addition, to require each non-defaulting Underwriter to purchase its pro rata share (based on the principal amount of Securities which such Underwriter agreed to purchase hereunder) of the Securities of such defaulting Underwriter or Underwriters for which such arrangements have not been made; but nothing herein shall relieve a defaulting Underwriter from liability for its default.

(c) If, after giving effect to any arrangements for the purchase of the Securities of a defaulting Underwriter or Underwriters by the Representatives and the Company as provided in subsection (a) above, the aggregate principal amount of Securities which remains unpurchased exceeds one eleventh of the aggregate principal amount of all the Securities, or if the Company shall not exercise the right described in subsection (b) above to require non-defaulting Underwriters to purchase Securities of a defaulting Underwriter or Underwriters, then this Agreement shall thereupon terminate, without liability on the part of any non-defaulting Underwriter or the Company, except for the expenses to be borne by the Company and the Underwriters as provided in Section 9 hereof and the indemnity and contribution agreements in Section 11 hereof; but nothing herein shall relieve a defaulting Underwriter from liability for its default.

13. The respective indemnities, agreements, representations, warranties and other statements of the Parent, the Company and the several Underwriters, as set forth in this Agreement or made by or on behalf of them, respectively, pursuant to this Agreement, shall remain in full force and effect, regardless of any investigation (or any statement as to the results thereof) made by or on behalf of any Underwriter or any controlling person of any Underwriter, the Parent or the Company, or any officer or director or controlling person of the Parent or the Company and shall survive delivery of and payment for the Securities.

14. If for any reason, other than a default by the Underwriters in their obligation to purchase the Securities, any Securities are not delivered by or on behalf of the Company as provided herein, the Company will reimburse the Underwriters through the Representatives for all reasonable expenses approved in writing by the Representatives, including reasonable fees and disbursements of counsel, incurred by the Underwriters in making preparations for the purchase, sale and delivery of the Securities not so delivered, but the Parent and the Company shall then be under no further liability to the Underwriters except as provided in Sections 9 and 11 hereof.

15. In all dealings hereunder, the Representatives shall act on behalf of each of the Underwriters, and the parties hereto shall be entitled to act and rely upon any statement, request, notice or agreement on behalf of any Underwriter made or given by the Representatives jointly.

16. All statements, requests, notices and agreements hereunder shall be in writing, and if to the Underwriters shall be delivered or sent by mail or facsimile transmission to the Representatives in care of: Merrill Lynch, Pierce, Fenner & Smith Incorporated, 50 Rockefeller Plaza, NY1-050-12-01, New York, NY 10020, Facsimile: (646) 855-5958, Attention: High Grade Transaction

Management/Legal; RBC Capital Markets, LLC, Three World Financial Center, 200 Vesey Street, New York, NY 10281; RBS Securities Inc., 600 Washington Blvd, Stamford, CT 06901, Attention: Debt Capital Markets/Syndicate; Fax: 203-873-4534; and TD Securities (USA) LLC, 31 W. 52nd St., 20th Fl., New York, NY 10019; and if to the Parent or the Company shall be delivered or sent by mail or facsimile transmission to the address of the Company set forth in the Registration Statement, Attention: Secretary. Any such statements, requests, notices or agreements shall take effect upon receipt thereof. In accordance with the requirements of the USA Patriot Act (Title III of Pub. L. 107-56 (signed into law October 26, 2001)), the Underwriters are required to obtain, verify and record information that identifies their respective clients, including the Parent and the Company, which information may include the name and address of their respective clients, as well as other information that will allow the Underwriters to properly identify their respective clients.

17. This Agreement shall be binding upon, and inure solely to the benefit of, the Underwriters, the Parent and the Company and, to the extent provided in Sections 11 and 13 hereof, the officers and directors of the Parent and the Company and each person who controls the Parent and the Company or any Underwriter, and their respective heirs, executors, administrators, successors and assigns, and no other person shall acquire or have any right under or by virtue of this Agreement. No purchaser of any of the Securities from any Underwriter shall be deemed a successor or assign by reason merely of such purchase.

18. Time shall be of the essence of this Agreement. As used herein, the term “**business day**” shall mean any day when the Commission’s office in Washington, D.C. is open for business.

19. The Parent and the Company acknowledge and agree that (i) the purchase and sale of the Securities pursuant to this Agreement is an arm’s-length commercial transaction between the Parent and the Company, on the one hand, and the several Underwriters, on the other, (ii) in connection therewith and with the process leading to such transaction each Underwriter is acting solely as a principal and not the agent or fiduciary of the Parent or the Company, (iii) no Underwriter has assumed an advisory or fiduciary responsibility in favor of the Parent or the Company with respect to the offering contemplated hereby or the process leading thereto (irrespective of whether such Underwriter has advised or is currently advising the Parent or the Company) or any other obligation to the Parent or the Company except the obligations expressly set forth in this Agreement and (iv) the Parent and the Company have consulted their own legal and financial advisors to the extent they deemed appropriate. The Parent and the Company agree that they will not claim that the Underwriters, or any of them, has rendered advisory services of any nature or respect, or owes a fiduciary or similar duty to the Parent or the Company, in connection with such transaction or the process leading thereto.

20. This Agreement supersedes all prior agreements and understandings (whether written or oral) between the Parent, the Company and the Underwriters, or any of them, with respect to the subject matter hereof.

21. This Agreement shall be governed by and construed in accordance with the laws of the State of New York.

22. The Parent, the Company and each of the Underwriters hereby irrevocably waive, to the fullest extent permitted by applicable law, any and all right to trial by jury in any legal proceeding arising out of or relating to this Agreement or the transactions contemplated hereby.

23. This Agreement may be executed by any one or more of the parties hereto in any number of counterparts, each of which shall be deemed to be an original, but all such counterparts shall together constitute one and the same instrument.

24. Notwithstanding anything herein to the contrary, each of the Parent and the Company are authorized to disclose to any persons the tax treatment and tax structure of the potential transaction and all materials of any kind (including tax opinions and other tax analyses) provided to the Parent and the Company relating to that treatment and structure, without the Underwriters imposing any limitation of any kind. However, any information relating to the tax treatment and tax structure shall remain confidential (and the foregoing sentence shall not apply) to the extent necessary to enable any person to comply with securities laws. For this purpose, “tax treatment” means U.S. Federal and State income tax treatment, and “tax structure” is limited to any facts that may be relevant to that treatment.

If the foregoing is in accordance with your understanding, please sign and return to us five counterparts hereof, and upon the acceptance hereof by you, on behalf of each of the Underwriters, this letter and such acceptance hereof shall constitute a binding agreement between each of the Underwriters, the Parent and the Company.

Very truly yours,

Exhibit 4.1

AMERICAN WATER CAPITAL CORP.

OFFICERS' CERTIFICATE

AUGUST 14, 2014

3.400% SENIOR NOTES DUE 2025

PURSUANT TO SECTIONS 102 AND 301 OF THE INDENTURE IDENTIFIED BELOW

The undersigned officers of American Water Capital Corp., a Delaware corporation (the "Company"), acting pursuant to an authorization contained in the unanimous written consent, dated August 11, 2014, of the Board of Directors of the Company (the "Board Resolutions"), and Sections 102 and 301 of the Indenture, dated as of December 4, 2009 (the "Indenture", and unless otherwise defined herein, capitalized terms shall have the meanings ascribed to them therein), between the Company and Wells Fargo Bank, National Association, as Trustee, do hereby certify as follows:

1) There is hereby established under the Indenture the following series of debt securities of the Company, and the terms of such series (the "Series") are as follows:
    a) The Series shall be known and designated as the "3.400% Senior Notes due 2025" of the Company (the "Securities").
    b) The terms of the Securities are as set forth in Annex A hereto.
    c) The Securities shall be redeemable at the option of the Company as specified and subject to the limitations set forth in Annex A hereto.
    d) The Securities shall not be entitled to the benefits of any sinking fund or analogous provisions.
    e) The Securities shall be subject to defeasance as specified and subject to the limitations set forth in Annex A hereto.
    f) The Securities will be issued in the form of one or more fully registered Global Securities which are exchangeable from time to time for fully registered certificated securities in accordance with the terms of the Indenture.
    g) The Company will not pay additional amounts on the Securities held by a non-U.S. person in respect of taxes or similar charges withheld or deducted.
2) The undersigned have read the provisions of the Indenture relating to the authentication and delivery of securities thereunder, including Sections 201, 301 and 303 thereof and the definitions relating thereto;

3) The undersigned have read the Board Resolutions authorizing the issuance of the Securities and the taking of any action by such officers of the Company in connection therewith, and have made such investigation or examination as is necessary, in the opinion of the undersigned, to enable him or her to express an informed opinion as to whether the covenants and conditions precedent to the action to be taken by the Trustee in authenticating and delivering Securities under the Indenture have been complied with;

4) In the opinion of the undersigned, such covenants and conditions precedent have been complied with; and

5) The Securities are “Debt” under the Support Agreement, dated June 22, 2000 and amended as of July 26, 2000, between American Water Works Company, Inc. and the Company.

IN WITNESS WHEREOF, we have hereunto signed our names as of the date first written above.

ANNEX A

THIS SECURITY IS A GLOBAL SECURITY WITHIN THE MEANING OF THE INDENTURE HEREINAFTER REFERRED TO AND IS REGISTERED IN THE NAME OF A DEPOSITARY OR A NOMINEE THEREOF. THIS SECURITY MAY NOT BE EXCHANGED IN WHOLE OR IN PART FOR A SECURITY REGISTERED, AND NO TRANSFER OF THIS SECURITY IN WHOLE OR IN PART MAY BE REGISTERED, IN THE NAME OF ANY PERSON OTHER THAN SUCH DEPOSITARY OR A NOMINEE THEREOF, EXCEPT IN THE LIMITED CIRCUMSTANCES DESCRIBED IN THE INDENTURE.

UNLESS THIS CERTIFICATE IS PRESENTED BY AN AUTHORIZED REPRESENTATIVE OF THE DEPOSITORY TRUST COMPANY, A NEW YORK CORPORATION ("DTC"), TO THE COMPANY OR ITS AGENT FOR REGISTRATION OF TRANSFER, EXCHANGE OR PAYMENT, AND ANY CERTIFICATE ISSUED IS REGISTERED IN THE NAME OF CEDE & CO. OR IN SUCH OTHER NAME AS IS REQUESTED BY AN AUTHORIZED REPRESENTATIVE OF DTC (AND ANY PAYMENT IS MADE TO CEDE & CO. OR TO SUCH OTHER ENTITY AS IS REQUESTED BY AN AUTHORIZED REPRESENTATIVE OF DTC), ANY TRANSFER, PLEDGE OR OTHER USE HEREOF FOR VALUE OR OTHERWISE BY OR TO ANY PERSON IS WRONGFUL INASMUCH AS THE REGISTERED OWNER HEREOF, CEDE & CO., HAS AN INTEREST HEREIN.

American Water Capital Corp.

CUSIP No. 03040WAL9
ISIN No. US03040WAL90

No R. 1
$300,000,000

American Water Capital Corp., a corporation duly organized and existing under the laws of Delaware (herein called the "Company", which term includes any successor Person under the Indenture hereinafter referred to), for value received, hereby promises to pay to Cede & Co., or registered assigns, the principal sum of Three Hundred Million Dollars on March 1, 2025, and to pay interest thereon from the date of original issuance or from the most recent Interest Payment Date to which interest has been paid or as duly provided for semi-annually on March 1 and September 1, in arrears, commencing March 1, 2015, and on any earlier date of redemption, at the rate of 3.400% per annum, until the principal hereof is paid or made available for payment. Interest on this Security shall be computed assuming a 360-day year consisting of twelve 30-day months.

The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date shall, as provided in the Indenture, be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on the Regular Record Date for such interest, which shall be the close of business on the fifteenth day (whether or not a Business Day) next preceding such Interest Payment Date. Any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Security (or one or more Predecessor Securities) is registered at the close of business on a Special Record Date for the payment of such Defaulted Interest to be fixed by the Trustee, notice whereof shall be given to Holders of Securities of this series not less than 10 days prior to such Special Record

Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Securities of this series may be listed, and upon such notice as may be required by such exchange, all as more fully provided in said Indenture.

Payment of the principal of (and premium, if any) and any such interest on this Security will be made in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts (i) with respect to any Global Security, by wire transfer of immediately available funds to the accounts specified by the Holder of such Global Security or (ii) with respect to any certificated Security, by wire transfer of immediately available funds to the respective accounts specified by the Holders of such certificated Security or, if no such account is specified, by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register.

Reference is hereby made to the further provisions of this Security set forth on the reverse hereof, which further provisions shall for all purposes have the same effect as if set forth at this place.

Unless the certificate of authentication hereon has been executed by the Trustee referred to on the reverse hereof by manual signature, this Security shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed.

AMERICAN WATER CAPITAL CORP.

By ____________________________
William D. Rogers
Vice President and Treasurer

TRUSTEE'S CERTIFICATION OF AUTHENTICATION

This is one of the Securities of the series designated herein and referred to in the within-mentioned Indenture.

WELLS FARGO BANK, NATIONAL ASSOCIATION,
As Trustee

By ____________________________
Authorized Signatory

Dated:

This Security is one of a duly authorized issue of securities of the Company (herein called the "Securities"), issued and to be issued in one or more series under an Indenture, dated as of December 4, 2009 (herein called the "Indenture", which term shall have the meaning assigned to it in such instrument), between the Company and Wells Fargo Bank, National Association, as Trustee (herein called the "Trustee", which term includes any successor trustee under the Indenture), and reference is hereby made to the Indenture for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Securities and of the terms upon which the Securities are, and are to be, authenticated and delivered. This Security is one of the series designated on the face hereof.

The Company may from time to time, without the consent of the Holders, create and issue Additional Securities, so that each such further issue shall be consolidated and form a single series with the Outstanding Securities of this series.

All or a portion of the Securities may be redeemed at the option of the Company at any time or from time to time. The Redemption Price for the Securities to be redeemed on any redemption date prior to December 1, 2024 will be equal to the greater of the following amounts: (a) 100% of the principal amount of the Securities being redeemed on the redemption date; or (b) the sum of the present values of the remaining scheduled payments of principal and interest on the Securities being redeemed on that redemption date (not including any portion of any payments of interest accrued to the redemption date) discounted to the redemption date on a semiannual basis at the Adjusted Treasury Rate (as defined below) plus 15 basis points, as determined by the Reference Treasury Dealer (as defined below), plus, in each case, accrued and unpaid interest thereon to the redemption date. The Redemption Price for the Securities to be redeemed on any redemption date on or after December 1, 2024 will be equal to 100% of the principal amount of the Securities being redeemed on the redemption date plus accrued and unpaid interest thereon to the redemption date. Notwithstanding the foregoing, installments of interest on the Securities that are due and payable on Interest Payment Dates falling on or prior to a redemption date will be payable on the Interest Payment Date to the Holder of such Securities as of the close of business on the relevant Regular Record Date. The Redemption Price will be calculated on the basis of a 360-day year consisting of twelve 30-day months. Calculation of the Redemption Price will be made by the Company or on behalf of the Company by a person designated by the Company; provided that such calculation or the correctness thereof shall not be a duty or obligation of the Trustee.

The Company shall mail notice of any redemption at least 30 days but not more than 60 days before the redemption date to each Holder of the Securities to be redeemed and, if less than all of the Securities are to be redeemed, the particular Securities to be redeemed will be selected by the Trustee on a pro rata basis, by lot or in such manner as the Trustee shall deem appropriate and fair in accordance with DTC procedures. Unless the Company defaults in payment of the Redemption Price, on and after the redemption date, interest will cease to accrue on the Securities or portions thereof called for redemption.

"*Adjusted Treasury Rate*" means, with respect to any redemption date, the rate per annum equal to the semiannual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such redemption date.

"*Comparable Treasury Issue*" means the United States Treasury security selected by the Reference Treasury Dealer as having a maturity comparable to the remaining term of the Securities to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of such Security.

"*Comparable Treasury Price*" means, with respect to any redemption date, (A) the average of the Reference Treasury Dealer Quotations for such redemption date, after excluding the highest and lowest of such Reference Treasury Dealer Quotations, or (B) if the Company obtains fewer than four such Reference Treasury Dealer Quotations, the average of all such quotations, or (C) if only one Reference Treasury Dealer Quotation is received, such quotation.

"*Reference Treasury Dealer*" means (A) Merrill Lynch, Pierce, Fenner & Smith Incorporated, RBC Capital Markets, LLC, RBS Securities Inc. and TD Securities (USA) LLC, or their respective affiliates which are primary U.S. Government securities dealers in the United States (each, a "Primary Treasury Dealer"); provided, however, that if any of the foregoing shall cease to be a Primary Treasury Dealer, the Company shall substitute therefor another Primary Treasury Dealer; and (B) any other Primary Treasury Dealer(s) selected by the Company.

"*Reference Treasury Dealer Quotations*" means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the Company, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the Company by such Reference Treasury Dealer at 5:00 p.m. (New York City time) on the third Business Day preceding such redemption date.

In the event of redemption of this Security in part only, a new Security or Securities of this series and of like tenor for the unredeemed portion hereof will be issued in the name of the Holder hereof upon the cancellation hereof.

The Indenture contains provisions for defeasance at any time of the entire indebtedness of this Security or certain restrictive covenants and Events of Default with respect to this Security, in each case upon compliance with certain conditions set forth in the Indenture.

If an Event of Default with respect to Securities of this series shall occur and be continuing, the principal of the Securities of this series may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series to be affected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of a majority in principal amount of the Securities at the time Outstanding of each series to be affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Securities of each series at the time Outstanding, on behalf of the Holders of all Securities of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by the Holder of this Security shall be conclusive and binding upon such Holder and upon all future Holders of this Security and of any Security issued upon the registration of transfer hereof or in exchange herefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Security.

As provided in and subject to the provisions of the Indenture, the Holder of this Security shall not have the right to institute any proceeding with respect to the Indenture or for the appointment of a receiver or trustee or for any other remedy thereunder, unless such Holder shall have previously given the Trustee written notice of a continuing Event of Default with respect to the Securities of this series, the Holders of not less than 25% in principal amount of the Securities of this series at the time Outstanding shall have made written request to the Trustee to institute proceedings in respect of such Event of Default as Trustee and offered the Trustee reasonable indemnity, and the Trustee shall not have received from the Holders of a majority in principal amount of Securities of this series at the time Outstanding a direction inconsistent with such request, and shall have failed to institute any such proceeding, for 60 days after receipt of such notice, request and offer of indemnity. The foregoing shall not apply to any suit instituted by the Holder of this Security for the enforcement of any payment of principal hereof or any premium or interest hereon on or after the respective due dates expressed herein.

No reference herein to the Indenture and no provision of this Security or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and any premium and interest on this Security at the times, place and rate, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Security is registrable in the Security Register, upon surrender of this Security for registration of transfer at the office or agency of the Company in any place where the principal of and any premium and interest on this Security are payable, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Securities of this series and of like tenor, of authorized denominations and for the same aggregate principal amount, will be issued to the designated transferee or transferees.

The Securities of this series are issuable only in registered form without coupons in denominations of $1,000 and integral multiples of $1,000. As provided in the Indenture and subject to certain limitations therein set forth, Securities of this series are exchangeable for a like aggregate principal amount of Securities of this series and of like tenor of a different authorized denomination, as requested by the Holder surrendering the same.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Security for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Security is registered as the owner hereof for all purposes, whether or not this Security be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

All terms used in this Security which are defined in the Indenture shall have the meanings assigned to them in the Indenture.

THIS SECURITY SHALL BE GOVERNED BY AND CONSTRUED IN ACCORDANCE WITH THE LAW OF THE STATE OF NEW YORK, WITHOUT REGARD TO CONFLICTS OF LAWS PRINCIPLES THEREOF.

Section 4: EX-4.3 (EX-4.3)

Exhibit 4.3

AMERICAN WATER CAPITAL CORP.

OFFICERS' CERTIFICATE

AUGUST 14, 2014

4.300% SENIOR NOTES DUE 2042

PURSUANT TO SECTIONS 102 AND 301 OF THE INDENTURE IDENTIFIED BELOW

The undersigned officers of American Water Capital Corp., a Delaware corporation (the "Company"), pursuant to Sections 102 and 301 of the Indenture, dated as of December 4, 2009 (the "Indenture", and unless otherwise defined herein, capitalized terms shall have the meanings ascribed to them therein), between the Company and Wells Fargo Bank, National Association, as Trustee, do hereby certify as follows:

1) There is hereby authorized to be issued under the Indenture debt securities in the aggregate principal amount of $200,000,000 (the "Additional Securities") which shall constitute a further issuance of, and be consolidated to form a single series with, the $300,000,000 aggregate principal amount of the Company's "4.300% Senior Notes due 2042" that were previously issued on December 17, 2012;

2) The undersigned have read the provisions of the Indenture relating to the authentication and delivery of securities thereunder, including Sections 201, 301 and 303 thereof and the definitions relating thereto;

3) The undersigned have read the Board Resolutions authorizing the issuance of the Additional Securities and the taking of any action by such officers of the Company in connection therewith, and have made such investigation or examination as is necessary, in the opinion of the undersigned, to enable him or her to express an informed opinion as to whether the covenants and conditions precedent to the action to be taken by the Trustee in authenticating and delivering Additional Securities under the Indenture have been complied with;

4) In the opinion of the undersigned, such covenants and conditions precedent have been complied with; and

5) The Additional Securities are “Debt” under the Support Agreement, dated June 22, 2000 and amended as of July 26, 2000, between American Water Works Company, Inc. and the Company.

IN WITNESS WHEREOF, we have hereunto signed our names as of the date first written above.

COUNSELORS AT LAW

Exhibit 5

August 14, 2014

American Water Works Company, Inc.
American Water Capital Corp.
1025 Laurel Oak Road
Voorhees, New Jersey 08043

Ladies and Gentlemen:

We have acted as counsel to American Water Works Company, Inc., a Delaware corporation ("AWW"), and American Water Capital Corp., a Delaware corporation (the "Company"), in connection with the issuance by the Company of $300,000,000 aggregate principal amount of its 3.400% Senior Notes due 2025 and $200,000,000 aggregate principal amount of its 4.300% Senior Notes due 2042 (the "Notes"), issued under the Indenture, dated as of December 4, 2009 (the "Indenture"), between the Company and Wells Fargo Bank, National Association, as trustee (the "Trustee"), which Notes have the benefit of the Support Agreement, dated June 22, 2000, as amended July 26, 2000, between the Company and AWW.

We have participated in the preparation of or reviewed (1) the Registration Statement on Form S-3 (Registration Nos. 333-181155 and 333-181155-01) (the "Registration Statement"), which Registration Statement was filed jointly by the Company and AWW with the Securities and Exchange Commission ("Commission") under the Securities Act of 1933, as amended (the "Securities Act"); (2) the prospectus dated May 4, 2012, forming a part of the Registration Statement, as supplemented by a prospectus supplement dated August 11, 2014 relating to the Notes, both such prospectus and prospectus supplement filed pursuant to Rule 424(b) under the Securities Act; (3) the Indenture; (4) the Support Agreement; (5) the certificate of incorporation of the Company; (6) the amended bylaws of the Company; (7) the restated certificate of incorporation of AWW; (8) the amended and restated bylaws of AWW; and (9) such other corporate records, certificates and other documents (including a receipt executed on behalf of the Company acknowledging receipt of the purchase price for the Notes) and such questions of law as we have considered necessary or appropriate for the purposes of this opinion.

Based on the foregoing, we are of the opinion that the Notes and the Support Agreement, as it relates to the Notes, are legally issued, valid, and binding obligations of the Company and AWW, respectively, except as limited or affected by bankruptcy, insolvency, reorganization, receivership, moratorium, fraudulent conveyance or other laws affecting creditors' rights and remedies generally and general principles of equity.

In rendering the foregoing opinion, we have assumed that the certificates representing the Notes conform to specimens examined by us and that the Notes have been duly authenticated, in accordance with the Indenture, by the Trustee under the Indenture and that the signatures on all documents examined by us are genuine, assumptions which we have not independently verified.

We hereby consent to the filing of this opinion as an exhibit to a Current Report on Form 8-K to be filed by AWW on or about August 14, 2014 which will be incorporated by reference in the Registration Statement. In giving the foregoing consent, we do not thereby admit that we come within the category of persons whose consent is required under Section 7 of the Securities Act or the rules and regulations of the Commission thereunder.

This opinion is limited to the laws of the State of New York, the General Corporation Law of the State of Delaware and the federal laws of the United States insofar as they bear on matters covered hereby.

Very truly yours,

/s/ Morgan, Lewis & Bockius LLP

Total fixed charges	320,729	339,697	335,831	327,124	323,436	154,384
Total fixed charges and preferred dividends	320,838	340,076	336,202	327,382	323,467	154,384
Ratio of earnings to combined fixed charges and preferred dividends (2)	—	2.26	2.50	2.93	2.87	2.91

For purposes of calculating the ratio of earnings to fixed charges, earnings consists of income (loss) from continuing operations before income taxes including the effect of allowance for funds used during construction, which we refer to as AFUDC, plus fixed charges. Fixed charges consist of interest expense, amortization of debt issuance costs, and a portion of rent expense that management believes is representative of the interest component of rental expense. Fixed charges have not been reduced for the effect of AFUDC. In addition, we had no preferred stock outstanding for any period presented, and accordingly, the ratio of earnings to combined fixed charges and preferred stock dividends is the same as the ratio of earnings to fixed charges.

---

(1) Represents the amount of pre-tax earnings required to cover the dividends associated with preferred stock without mandatory redemption requirements.
(2) For the year ended December 31, 2009 earnings were insufficient to cover fixed charges and there was a deficiency of $106.3 million.

AMERICAN WATER CAPITAL CORP.

COMPUTATION OF RATIO OF EARNINGS TO FIXED CHARGES AND PREFERRED STOCK DIVIDENDS

	Twelve Months ended December 31,					Six Months Ended June 30,
	2009	2010	2011	2012	2013	2014
Income (loss) from continuing operations before income taxes	$ —	$ —	$ —	$ —	$ —	$ —
Fixed Charges:						
Interest, dividends on mandatory redeemable preferred shares and amortization of debt discount and expenses and premium on all indebtedness	201,033	206,011	211,982	213,835	225,511	105,403
Total fixed charges	201,033	206,011	211,982	213,835	225,511	105,403
Income from continuing operations plus fixed charges	201,033	206,011	211,982	213,835	225,511	105,403
Total fixed charges	201,033	206,011	211,982	213,835	225,511	105,403
Total fixed charges and preferred dividends	201,033	206,011	211,982	213,835	225,511	105,403
Ratio of earnings to combined fixed charges and preferred dividends	1.00	1.00	1.00	1.00	1.00	1.00

For purposes of calculating the ratio of earnings to fixed charges, earnings consists of income (loss) from continuing operations before income taxes including the effect of allowance for funds used during construction, which we refer to as AFUDC, plus fixed charges. Fixed charges consist of interest expense, amortization of debt issuance costs, and a portion of rent expense that management believes is representative of the interest component of rental expense. Fixed charges have not been reduced for the effect of AFUDC. In addition, we had no preferred stock outstanding for any period presented, and accordingly, the ratio of earnings to combined fixed charges and preferred stock dividends is the same as the ratio of earnings to fixed charges.

Item 8.01. Other Events.

On August 13, 2015, American Water Capital Corp. ("AWCC"), a wholly owned subsidiary of American Water Works Company, Inc. ("American Water"), sold $225.0 million aggregate principal amount of its 3.400% Senior Notes due 2025 (the "New 2025 Notes") and $325.0 million aggregate principal amount of its 4.300% Senior Notes due 2045 (the "2045 Notes," and, together with the New 2025 Notes, the "Notes") pursuant to an Underwriting Agreement dated August 10, 2015, among AWCC and American Water, and J.P. Morgan Securities LLC, Mitsubishi UFJ Securities (USA) Inc., U.S. Bancorp Investments, Inc. and Wells Fargo Securities LLC, as representatives of the several underwriters named therein. AWCC previously issued on August 14, 2014 $300.0 million aggregate principal amount of 3.400% Senior Notes due 2025 (the "Original 2025 Notes," and together with the New 2025 Notes, the "2025 Notes"). After issuance of the New 2025 Notes, the outstanding principal amount of the 2025 Notes is $525.0 million. The New 2025 Notes have terms that are identical to the terms of the Original 2025 Notes and have the same CUSIP number and are fungible with the Original 2025 Notes. The Notes have the benefit of a support agreement from American Water (the "Support Agreement").

The Notes and the obligations of American Water represented by the Support Agreement were registered under the Securities Act of 1933, as amended, pursuant to a Registration Statement on Form S-3 (File Nos. 333-203949-01 and 333-203949). The 2045 Notes were sold at a price to the public of 98.684% of the principal amount thereof. The New 2025 Notes were sold at a price to the public of 99.667% of the principal amount thereof; in addition, AWCC received from the purchasers of the New 2025 Notes an amount equal to the interest accrued on the New 2025 Notes from March 1, 2015 to August 13, 2015. At the closing of the offering, the Company received, after deduction of underwriting discounts of 0.650% and 0.875% of the principal amount of the New 2025 Notes and the 2045 Notes, respectively, and before deduction of offering expenses (and not including accrued interest paid by the purchasers of the New 2025 Notes), net proceeds of approximately $540.7 million. AWCC intends to use such net proceeds to lend funds to American Water and its regulated operating subsidiaries, to finance certain redemptions and repayments of long-term debt and to fund the repayment of AWCC's commercial paper.

The Notes were issued pursuant to the Indenture, dated December 4, 2009, by and between AWCC and Wells Fargo Bank, National Association, as trustee, as supplemented by officers' certificates establishing the terms of the Original 2025 Notes and the 2045 Notes, and authorizing the further issuance of the New 2025 Notes.

This Current Report on Form 8-K is being filed to report the closing of the offering summarized herein and to include, as exhibits, certain documents executed in connection with the sale of the Notes.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.

Exhibit No.	Description of Exhibit
1.1*	Underwriting Agreement, dated August 10, 2015, by and among American Water, AWCC, J.P. Morgan Securities LLC, Mitsubishi UFJ Securities (USA) Inc., U.S. Bancorp Investments, Inc. and Wells Fargo Securities LLC, as representatives of the several underwriters named therein.

3.400% Senior Notes due 2025
4.300% Senior Notes due 2045

Support Agreement from American Water Works Company, Inc.

Underwriting Agreement

August 10, 2015

J.P. Morgan Securities LLC,
Mitsubishi UFJ Securities (USA), Inc.,
U.S. Bancorp Investments, Inc., and
Wells Fargo Securities, LLC,
As representatives of the several Underwriters
named in Schedule I hereto
c/o J.P. Morgan Securities LLC
383 Madison Avenue
New York, New York 10179

Ladies and Gentlemen:

1. American Water Capital Corp., a Delaware corporation (the “**Company**”), proposes, subject to the terms and conditions stated herein, to issue and sell to the underwriters named in Schedule I hereto (the “**Underwriters**”), for whom you (the “**Representatives**”) are acting as representatives, (a) an aggregate of $225,000,000 principal amount of the Company’s 3.400% Senior Notes due 2025 (the “**2025 Notes**”) and (b) an aggregate of $325,000,000 principal amount of the Company’s 4.300% Senior Notes due 2045 (the “**2045 Notes**” and, together with the 2025 Notes, the “**Securities**”).

2. The Company previously entered into a support agreement with American Water Works Company, Inc., a Delaware corporation (the “**Parent**”), dated June 22, 2000 and amended as of July 26, 2000 (as such agreement may be hereinafter amended, modified or supplemented from time to time in accordance with the terms and provisions thereof, the “**Support Agreement**”). Pursuant to the Support Agreement, the Parent has agreed, among other things, to provide funds to the Company if it is unable to make timely payment of principal of and premium, if any, and interest on Debt (as defined in the Support Agreement) issued by the Company.

3. The Company and the Parent, jointly and severally, represent and warrant to, and agree with, each of the Underwriters that:

(a) An “automatic shelf registration statement” as defined under Rule 405 under the Securities Act of 1933, as amended (the “**Act**”), on Form S-3 (File Nos. 333-203949 and 333-203949-01) in respect of the Securities has been filed with the Securities and Exchange Commission (the “**Commission**”) not earlier than three years prior to the date hereof; such registration statement, and any post-effective amendment thereto, each in a form heretofore delivered to the Representatives, became effective on filing; and no stop order suspending the effectiveness of such registration statement or any part thereof has been issued and, to the Parent’s or the Company’s knowledge, no proceeding for that purpose has been initiated or threatened by the Commission, and no notice of objection of the Commission to the use of such registration statement or any post-effective amendment thereto pursuant to Rule 401(g)(2) under the Act has been received by the Parent or the Company (the base prospectus filed as part of such registration statement, in the form in which it has most recently been filed with the Commission on or prior to the date of this Agreement, is hereinafter called the “**Basic Prospectus**”; any preliminary prospectus (including any preliminary prospectus supplement) relating to the Securities filed with the Commission pursuant to Rule 424(b) under the Act is hereinafter called a “**Preliminary Prospectus**”; the various parts of such registration statement, including all exhibits thereto but excluding the Form T-1 and including any prospectus supplement relating to the Securities that is filed with the Commission and deemed by virtue of Rule 430B to be part of such registration statement, each as amended at the time such part of the registration statement became effective, are hereinafter collectively called the “**Registration Statement**”; the Basic Prospectus, as amended and supplemented immediately prior to the Applicable Time (as defined in Section 3(c) hereof), is hereinafter called the “**Pricing Prospectus**”; the form of the final prospectus relating to the Securities filed with the Commission pursuant to Rule 424(b) under the Act in accordance with Section 7(a) hereof is hereinafter called the “**Prospectus**”; any reference herein to the Basic Prospectus, the Pricing Prospectus, any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include the documents incorporated by reference therein pursuant to Item 12 of Form S-3 under the Act, as of the date of such prospectus; any reference to any amendment or supplement to the Basic Prospectus, any Preliminary Prospectus or the Prospectus shall be deemed to refer to and include any post-effective amendment to the Registration Statement, any prospectus supplement relating to the Securities filed with the Commission pursuant to Rule 424(b) under the Act and any documents filed under the Securities Exchange Act of 1934, as amended (the “**Exchange Act**”), and incorporated therein, in each case after the date of the Basic Prospectus, such Preliminary Prospectus, or the Prospectus, as the case may be; any reference to any amendment to the Registration Statement shall be deemed to refer to and include any annual report of the Company filed pursuant to Section 13(a) or 15(d) of the Exchange Act after the effective date of the Registration Statement that is incorporated by reference in the Registration

Statement; and any “issuer free writing prospectus” as defined in Rule 433 under the Act relating to the Securities is hereinafter called an “**Issuer Free Writing Prospectus**”);

(b) No order preventing or suspending the use of any Preliminary Prospectus or any Issuer Free Writing Prospectus has been issued by the Commission. Each Preliminary Prospectus, at the time of filing thereof, conformed in all material respects to the requirements of the Act and the Trust Indenture Act of 1939, as amended (the “**Trust Indenture Act**”), and the rules and regulations of the Commission thereunder, and did not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein, in the light of the circumstances under which they were made, not misleading; *provided*, *however*, that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with information furnished in writing to the Company by the Representatives expressly for use therein (the “**Underwriter Information**”);

(c) For the purposes of this Agreement, the “**Applicable Time**” is 4:00 p.m. (Eastern time) on the date of this Agreement. The Pricing Prospectus, as supplemented by the final term sheet prepared and filed pursuant to Section 7(a) hereof, taken together (collectively, the “**Pricing Disclosure Package**”), as of the Applicable Time, did not include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; and each Issuer Free Writing Prospectus listed on Schedule II hereto does not conflict with the information contained in the Registration Statement, the Pricing Prospectus or the Prospectus and each such Issuer Free Writing Prospectus, as supplemented by and taken together with the Pricing Disclosure Package as of the Applicable Time, did not include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; *provided, however,* that the representations and warranties in this clause (c) shall not apply to statements or omissions made in an Issuer Free Writing Prospectus in reliance upon and in conformity with the Underwriter Information;

(d) The documents incorporated by reference in the Pricing Prospectus and the Prospectus, when they became effective or were filed with the Commission, as the case may be, conformed in all material respects to the requirements of the Act or the Exchange Act, as applicable, and the rules and regulations of the Commission thereunder, and none of such documents contained an untrue statement of a material fact or omitted to state a material fact required to be stated therein or necessary to make the statements therein not misleading; any further documents so filed and incorporated by reference in the Prospectus or any further amendment or supplement thereto, when such documents become effective or are filed with the Commission, as the case may be, will conform in all material respects to the requirements of the Act or the Exchange Act, as applicable, and the rules and regulations of the Commission thereunder and will not contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; *provided, however,* that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with the Underwriter Information;

(e) The interactive data in eXtensible Business Reporting Language filed as exhibits to the reports included or incorporated by reference in the Registration Statement, the Pricing Disclosure Package and the Prospectus fairly presents the information called for in all material respects and has been prepared in accordance with the Commission's rules and guidelines applicable thereto;

(f) (i) The Registration Statement conforms, and the Prospectus and any further amendments or supplements to the Registration Statement and the Prospectus will conform, in all material respects to the requirements of the Act and the Trust Indenture Act and the rules and regulations of the Commission thereunder and (ii) the Registration Statement and the Prospectus and any further amendments or supplements to the Registration Statement and the Prospectus do not and will not, as of the applicable effective date as to each part of the Registration Statement and as of the applicable filing date as to the Prospectus and any amendment or supplement thereto, contain an untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary to make the statements therein not misleading; *provided, however,* that this representation and warranty shall not apply to any statements or omissions made in reliance upon and in conformity with the Underwriter Information;

(g) (i) Since the date of the latest audited financial statements included or incorporated by reference in the Pricing Prospectus, (A) none of the Parent, the Company or any of the Parent's other subsidiaries has sustained any loss or interference with its business from fire, explosion, flood or other calamity, whether or not covered by insurance, or from any court or governmental action, order or decree, otherwise than as set forth or contemplated in the Pricing Prospectus, and, which could reasonably be expected to, in each case, individually or in the aggregate, have a material adverse effect on the financial condition, stockholders' equity, properties or results of operations of the Parent, the Company and the Parent's other subsidiaries, taken as a whole (a "**Material Adverse Effect**"); and (B) no labor dispute with the employees of the Parent, the Company or any of the Parent's other subsidiaries exists or, to the knowledge of the Company or the Parent, is imminent, which could reasonably be expected to result in a Material Adverse Effect; (ii) since the respective dates as of which information is given in the Registration Statement and the Pricing Prospectus, otherwise than as set forth or contemplated in the Pricing Prospectus, there has not been (A) any material decrease in the number of shares of outstanding capital stock of the Parent or increase in consolidated long-term debt of the
