COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF KENTUCKY- )
AMERICAN WATER COMPANY ) CASE NO.
FOR AN ADJUSTMENT OF RATES ) 2015-00418

DIRECT TESTIMONY OF MALCOLM J. RATCHFORD
ON BEHALF OF CAC

* * * * *

Comes the Community Action Council for Lexington-Fayette, Bourbon, Harrison and
Nicholas Counties, Inc. (CAC), by counsel, and hereby tenders the Direct Testimony of Malcolm
J. Ratchford in support of its position in this matter:

Respectfully submitted,

COUNSEL FOR CAC
Q: Please indicate your name, address and describe your current position and professional background.

A: My name is Malcolm J. Ratchford and I have served as Executive Director of Community Action Council for Lexington-Fayette, Bourbon, Harrison, and Nicholas Counties (“the Council”) since 2013. The Council operates 32 neighborhood and community centers, child development centers in six counties, and Administrative and Support Services offices located at 710 W. High Street in Lexington, Ky.

I have worked in the Community Action Network for nearly 20 years. Before my appointment as Executive Director, I held the position of Senior Manager for Neighborhood and Community Services for the Council. In that position, I implemented self-sufficiency programs for the low-income populations of the areas we serve.

I graduated from the University of Kentucky with a Masters degree in Family Studies, Early Childhood Education and hold a Bachelors degree in History Pre-Law from Talladega College.

As Executive Director, I have participated in other cases before the Kentucky Public Service Commission on behalf of utility customers with low-incomes. Based upon my experience at the Council and within the Community Action Network, I am well-informed of the issues and concerns of the low-income populations for which we are advocating in this matter.

Q: Please describe the purpose of your testimony.

A: The purpose of my testimony is to state the position of Community Action Council with respect to the proposed Kentucky American Water Company rate increase and to provide information in support of my position. In summary, we do not believe that a rate increase, as currently proposed by KAWC, is a reasonable or appropriate expectation for customers with low-income as poverty levels remain high.
My testimony will provide a perspective that represents issues that should be given full consideration in rendering a decision on this case. I am an advocate on behalf of customers with low-income. Community Action Council is a low-income advocacy and services organization.

Q: Please describe the organization of Community Action Council and give a brief description of its activities.

A: Community Action Council was established in 1965 as a not-for-profit community action agency of the Commonwealth of Kentucky. The Council is the designated community action agency for Lexington-Fayette, Bourbon, Harrison, and Nicholas counties in Central Kentucky. The Council’s governance includes a Board of Directors representing low-income, public and private sectors of the community. Its mission is “Community Action Council prevents, reduces and eliminates poverty among individuals, families and communities through direct services and advocacy.”

There are approximately 280 employees operating and administering the Council’s primary programs and services including:

- self-sufficiency
- early childhood development/school readiness programs
- homeless programs
- volunteer programs
- youth development
- transportation services
- housing
- energy assistance and conservation programs
- emergency assistance
- adult education and employment assistance
- community outreach and referrals.

Although the Council’s core service territory includes Lexington-Fayette, Bourbon, Harrison and Nicholas counties, the Council also provides services in other Kentucky counties. For example, the Council administers the WinterCare Energy Fund providing services across most of the state; child development services extend into Scott and Madison counties; the Retired and Senior
Volunteer Program extends into Jessamine County. The Columbia Gas Energy Assistance Program and WarmWise program and Kentucky Utilities’ Home Energy Assistance Program and WeCare Program each provide services throughout the service territory of their respective utilities.

The Council is uniquely positioned to speak on behalf of low-income populations with utility-related problems as staff members have extensive contact with and knowledge of this population. Additionally, Council staff members are able to help participants access other Council assistance programs as well as other community resources to address the multiple obstacles and barriers that most low-income households face. This comprehensive approach provides greater stability and self-sufficiency to these households, supporting a family’s ability to afford necessities such as utility service.

Q: Please describe in detail the Council’s programs and services, especially those which partner with public utilities.

A: The Council creates opportunities for individuals and families to become self-sufficient members of the community, and serves the low-income population through advocacy, service delivery and community involvement.

The Council operates **Head Start, Early Head Start, Migrant Head Start** and last year we began a new Early Head Start and Community Child-Care partnership program called **Partnering for Excellence**.

The organization also operates several housing programs, including five **Continuum of Care** projects funded by the Department for Housing and Urban Development and a brand new **Emergency Family Shelter** in Lexington. Another housing program offered is **Tenant Based Rental Assistance (TBRA)**, which provides rental assistance to Section 8-eligible households throughout the Council’s service area.
To support economic independence, the Council offers a Financial Fitness consumer education program; PREPared Workshops, which offer participants job readiness skills and customer service training; and tax preparation and education for thousands of households on the Earned Income Tax Credit (EITC).

Other programs include senior volunteerism projects Retired and Senior Volunteer Program (RSVP) and the Foster Grandparents Program (FGP).

The Council also operates a number of utility assistance programs in partnership with local utilities, public and private funding sources, and other community action agencies across the state. These programs are described below.

In 1983, Community Action Council initiated, with Kentucky Utilities, the establishment of the WinterCare Energy Fund. The Council has provided administrative services, financial management and marketing support for the Fund since that time. The Council has also managed the federal LIHEAP program (Low-Income Home Energy Assistance Program) serving low-income customers in Fayette, Bourbon, Harrison and Nicholas counties since its inception.

Since 1978, the Council has operated the Federal Weatherization Assistance Program designed to help low-income individuals and families conserve energy. The Council operates several additional weatherization and furnace replacement programs including Kentucky Utilities’ WeCare and Columbia Gas of Kentucky’s WarmWise high-efficiency furnace replacement program for their customers with low-income.

The Council administers a utility-funded energy subsidy program serving 2,000 low-income households in partnership with the Columbia Gas of Kentucky Energy Assistance Program (EAP) and the network of community action agencies serving the Columbia Gas service territory.
The Council implemented and administers the **Kentucky Utilities Home Energy Assistance (HEA) Program**, which serves 2,700 KU customers whose primary heat source is KU electricity by providing regular monthly subsidies throughout the winter and summer peak usage months.

The Council’s **Summer Cooling** program serves customers who are severely ill or who have a disability with the provision and installation of air conditioners.

**Q: Please describe the low-income population in the Kentucky American Water Company service territory.**

**A:** Based on Census data and customer counts provided by KAWC in response to CAC’s First Request for Information, the following chart provides poverty status by county for KAWC service counties. The chart shows an estimated number of KAWC low-income customers based on the poverty rate by county. All poverty rates used are the most recent county-level data available from the U.S. Census 2010-2014 five-year estimates.

Census Data indicates that there are approximately 21,730 KAWC customers in poverty throughout its service territory. The percent of KAWC customers who are in poverty, according to these estimates, is 18.7 percent of the total customer base of 116,256. It’s important to note here that these figures represent only 100% of the Federal Poverty Guideline. This guideline is an outdated measure even according to the Federal officials who issue it. In recognition of this
inaccurate capture of the number of people living in poverty in the United States, many assistance programs – including the Company’s Help to Others program – actually serve families at higher incomes, such as 150 percent of the federal poverty guidelines. Were it possible to calculate using these thresholds, it is highly likely that a substantially larger percentage of the Company’s customers would be living in poverty.

The Census Bureau uses income and family size as the basis for determining poverty. Poverty and need affordability is an economic equation of income versus basic needs of a family depending on the size of a family. Families in poverty, based on the limits of their income, cannot meet their basic needs. Their expenses, as a family, exceed their revenues. Water services are not only a basic need, but a survival need.

Q: Describe other challenges faced by customers with low-incomes.

A: Low income households, as all households, require food, shelter, medication, and heat and electricity. The stress of the rising costs and rate increases associated with these basic needs, stretches the resources of a family living in poverty beyond what it can sustain.

Food security is another issue that impacts many low-income families. According to the United States Department of Agriculture Economic Research Service (USDA ERS), 14.0 percent of households in America reported having low or very low food security in 2014. This means that nearly 17.4 million households in America lacked the resources to access enough healthy and nutritious foods for all members of the family to enjoy an active and healthy life. Of these 17.4 million households, 6.9 million reported very low food security, meaning that the normal eating habits of at least one member of the household were disrupted or reduced due to lack of resources. In other words, in 5.6 percent of American households, at least one person went hungry at some point in 2014 because they could not access the food that they needed. In Kentucky, the picture of food insecurity is even more harrowing. During the three-year period
2012-2014, 17.5 percent of all households in Kentucky reported low or very low food security. 7.0 percent of Kentucky households, or more than 128,000 households, had very low food insecurity, meaning that at least one person experienced hunger at some point during the year. Families with low-income may face a number of barriers in providing enough food to feed their families, such as lack of access to transportation, distance to food retailers, and rising food costs. The rising cost of food is a reality for us all, but for households with low-income, the increased cost of food is a very serious burden.

These challenges faced by low-income customers illustrate how a rate increase as large as that proposed by KAWC coupled with other basic need expenses can and will affect families with low-income in complex ways.

Q. Please describe how the proposed rate increase will affect low-income people.

A: KAWC stated in its response to CAC’s First Request for Information that the current average total monthly usage for residential customers is 4,130 gallons per month. In its Application Exhibit 37, Schedule N, KAWC states that the current rate for residential customers is $33.69 based on average consumption of 4000 gallons per month and the proposed increase would change the average residential monthly rate to $39.58, resulting in a 17.48% increase.

This proposed rate increase is the fourth increase sought by KAWC since 2008. In its rate cases filed in 2008, 2010 and 2012, average residential water rates increased 16.56%, 28.01%, and 10.85%, respectively, according to KAWC’s response to the Attorney General’s First Request for Information, Question 98.

The impact on negotiating basic needs increases with every rate increase. With the widening of the affordability gap as a result of the outcome of this case, families will be forced to make further choices about which basic needs to satisfy. The stress of stretching resources will continue to act as a barrier to increasing opportunity and reaching self-sufficiency. For those
who have made strides in increasing their incomes, they will have to take two or three steps back, and some back to where they started in the income versus basic needs equation. The rate increase will create a barrier, but it may also create a situation where relief agencies cannot provide meaningful assistance.

This proposed increase is too large and cannot be afforded by those with limited or fixed incomes. This is evident in that at current rates and fees, the affordability gap already exists. I am encouraging KAWC and the Commission to reconsider the increase set forth in this filing.

Q. Are resources for water service assistance sufficient to meet the needs of the population in the Kentucky American Water Company service territory? Please discuss.

A: No, resources are not sufficient to meet the needs of the population, and the resources that exist are becoming less effective with each approved rate increase. Unlike energy assistance, for which federal LIHEAP funding, local public and private funding, and utility-supported programs are available, there are few options available to households needing assistance with their water bill. The Council has access to only a few thousand dollars in private donor funds that could be used each year for water assistance and these funds must serve the needs of all of the organization’s nearly 30,000 annual program participants. No significant resource is available beyond the Company’s Help To Others Program, which has seen a leveling off of contributions by the Company over the last five years, as well as a significant decrease in customer contributions, as seen in the data in the table below provided by KAWC in its Response to CAC’s First Information Request.

Q. What do you propose the solution in this case?

A: Regardless of the size of the increase in rates, people with low-income already experience an affordability gap. While asking for the Company’s rate increase proposal to be denied in full or in part, I am encouraging Kentucky American Water Company and the Commission to restructure the Company’s rates to reflect customer usage. A graduated or tiered rate structure, which provides an initial amount of water at free or very low cost and then increases as consumption levels increase would benefit all customers – especially those on low or fixed-incomes – by giving them more control over their monthly water costs. These rates would determine a minimum amount of life-sustaining water a household needs, which the customers would receive at a free or substantially reduced rate. A next tier of consumption would cost more followed by third or more tiers at which the cost increases in proportion to usage. While such a rate structure is favorable for all customers as a way to control costs and incentivize conservation, it is especially preferable for customers with low-income because of the impossible decisions they often face when choosing whether to pay for housing, medicine, food and other basic necessities. With graduated rates, the customer has the opportunity to exert some control over the water bill.
As an alternative, I urge KAWC to pursue authority to offer a low-income rate.

Q. What is your position regarding Kentucky American Water Company’s responsibility to its low-income customers?

A. Kentucky American Water Company has a responsibility to its low-income customers to make water affordable. KAWC’s low-income customers cannot shop around for a better deal and cannot choose to go without water, as it is a life-sustaining resource.

Q. In summary, please state your position regarding Kentucky American Water Company’s proposed rate increase and your recommendations regarding the same.

A: The proposed water rate increase is too great and will negatively affect the ability of low-income customers to pay for this essential service. The Commission should deny the request or substantially reduce the requested increase. Without additional means of support like changes in rate structure, rate discounts or a substantial increase in assistance funds, the affordability gap will widen.

Does this end your direct testimony?

Yes
CERTIFICATE OF SERVICE

I hereby certify that CAC’s May 9, 2016 electronic filing is a true and accurate copy of Direct Testimony of Malcolm J. Ratchford on Behalf of CAC and cover letter to be filed in paper medium; that the electronic filing has been transmitted to the Commission on May 9, 2016; that an original and one copy of the filing will be delivered to the Commission on May 9, 2016; that there are currently no parties excused from participation by electronic service; and that, on May 9, 2016, electronic mail notification of the electronic filing is provided to the Commission and the following:
