**BEFORE THE PUBLIC SERVICE COMMISSION**

**In The Matter Of:**

**THE APPLICATION OF KENTUCKY )  
UTILITIES COMPANY FOR AN ORDER )  
AUTHORIZING THE ISSUANCE OF )  
SECURITIES AND THE ASSUMPTION )  
OF OBLIGATIONS )**

**CASE NO. 2016-00082**

**VERIFIED APPLICATION**

Kentucky Utilities Company (“KU” or the “Company”) hereby requests, pursuant to KRS 278.300, that the Commission authorize KU to incur debt in the form of First Mortgage Bonds in order to refinance the series of outstanding pollution control debt as described herein. In support of this Application, KU states as follows:

1. The Company’s full name is Kentucky Utilities Company. The post office address of the Company is One Quality Street, Lexington, Kentucky 40507. KU was incorporated in Kentucky on August 17, 1912, and in Virginia on November 26, 1991 (and effective as of December 1, 1991), and is in good standing in both Kentucky and Virginia. Copies of KU’s good standing certificates from the Kentucky Secretary of State and the Virginia State Corporation Commission are attached as Exhibit 1. KU is a utility as defined by KRS 278.010(3)(a), and as of December 31, 2015, provides retail electric service to approximately 518,000 customers in seventy-seven counties in Kentucky, approximately 28,000 customers in 5 counties in Virginia, and fewer than 10 customers in one county in Tennessee. A description of KU’s properties is set out in Exhibit 2 to this Application.

2. In Case No. 2008-00132 (*In the Matter of: Application of Kentucky Utilities Company for an Order Authorizing the Issuance of Securities and the Assumption of Obligations*), KU sought and received approval to take certain actions to mitigate the impact of credit downgrades of bond insurance companies that had issued bond insurance in connection with a total of eight (8) series of the Company's variable rate pollution control debt. Case No. 2008-00132, Order dated June 17, 2008. Those credit downgrades were the result of the bond insurers' diversification into insuring riskier types of debt, such as securities backed by subprime home mortgages.

3. Subsequently, KU has undertaken various actions pursuant to the authority granted in Case No. 2008-00132, and currently has only one (1) series of pollution control debt impacted by bond insurance which it seeks to refinance.<sup>1</sup> The structure of the series is such that the interest rates have been set based on a formula (200% of commercial paper rates) in the indenture that has allowed the Company and its customers to benefit from extremely low interest rates that averaged .25% in 2015. However, the Federal Reserve has begun to raise short-term interest rates and has signaled that it intends to continue to do so. As the Federal Reserve increases rates, the interest rates on the current bonds will increase at twice the rate of the Federal Reserve changes. KU believes that other interest rate modes or structures can reduce this interest rate volatility and lower costs in the long-term. KU has also determined that the series of the impacted debt may be eligible for extension of maturities, thus extending the opportunity for low cost tax-exempt financing. Therefore, KU seeks authority to refinance the series of outstanding pollution control debt, both to reduce the magnitude of the interest rate risk (while

---

<sup>1</sup> In addition to the series addressed in this Application, KU's Trimble County, Kentucky Environmental Facilities Revenue Refunding Bonds, 2007 Series A and Carroll County, Kentucky Environmental Facilities Revenue Refunding Bonds, 2007 Series A are also covered by bond insurance. However, because those bonds are currently in long-term interest rate mode, the impact of the failed bond insurance is less, and KU is not seeking to refinance those series at this time.

also terminating small ongoing insurance premiums and administrative costs associated with the bond insurance) and to extend the availability of this tax exempt financing.

The series of pollution control debt that KU seeks authority to refinance is:

**Carroll County, Kentucky Pollution Control Revenue Bonds, 2002 Series C**

4. KU's obligations in connection with the Carroll County, Kentucky Pollution Control Revenue Bonds, 2002 Series C ("Carroll County 2002 Series C Bonds" or "Outstanding Bonds") were authorized by the Commission by Order dated August 6, 2002, in Case No. 2002-00231 (*In the Matter of: Application of Kentucky Utilities Company for an Order Authorizing the Issuance of Securities and the Assumption of Obligations*). Proceeds were used to provide funds to refinance the Carroll County, Kentucky Pollution Control Revenue Bonds, 1992 Series A. KU's obligations in connection with those bonds were authorized by the Commission by Order dated July 24, 1992, in Case No. 92-249. Proceeds from these were used to provide financing for a portion of the costs of the acquisition, construction, and installation of certain air and water pollution control facilities and solid waste disposal facilities at KU's Ghent generating station.

5. The following table shows (i) the initial public offering price, (ii) proceeds to KU from the sale, and (iii) KU's expenses associated with the sale of the Carroll County 2002 Series C Bonds:

<u>Public Offering Price</u>	<u>Proceeds</u>	<u>Expenses</u>
\$96,000,000	\$96,000,000	\$2,181,000

The Carroll County 2002 Series C Bonds are subject to redemption upon the direction of KU at a redemption price of 100% of the principal amount thereof, together with accrued interest to the redemption date. The Carroll County 2002 Series C Bonds are potentially eligible for extension of maturity.

6. The Company requests authority to assume certain obligations under various agreements in principal amounts not to exceed the Public Offering Price of the Outstanding Bonds discussed in paragraphs 4 through 5 preceding, which may be refunded, in connection with the proposed issuance of one or more new series of Carroll County, Kentucky Environmental Facilities Refunding Revenue Bonds (the “Carroll County Refunding Bonds”), to be appropriately designated. Carroll County has authority to issue the Carroll County Refunding Bonds and to carry out the transactions contemplated herein pursuant to the provisions of the Industrial Building Revenue Code Act, Sections 103.200 to 103.285, inclusive of the Kentucky Revised Statutes. The proceeds of the Carroll County Refunding Bonds would be loaned to KU by Carroll County in one or more transactions to provide funds to repurchase, redeem and discharge a corresponding amount of the Outstanding Bonds, within ninety (90) days of issuance of the corresponding Carroll County Refunding Bonds.

7. KU anticipates that the refinancing will involve KU’s First Mortgage Bonds, (as hereinafter defined) issued to collateralize and secure the Carroll County Refunding Bonds. The structure and documentation for the issuance of KU’s First Mortgage Bonds and related agreements would be similar to the structure and documentation of other pollution control financings of KU approved by this Commission involving KU’s First Mortgage Bonds, including the Outstanding Bonds. KU’s First Mortgage Bonds would be issued in like amount to the Carroll County Refunding Bonds and will be used to secure its payment obligations with respect to the Loan Agreements, as defined below. KU therefore requests authority to issue one or more series of its First Mortgage Bonds, Pollution Control Series (collectively, the “First Mortgage Bonds”) in an aggregate principal amount not to exceed the full amount of the Carroll County Refunding Bonds.

8. The First Mortgage Bonds would be delivered to a corporate trustee under one or more indentures of trust between Carroll County and such trustee (“Trustee”) in connection with the reissuance and sale by Carroll County of the Carroll County Refunding Bonds. The First Mortgage Bonds would be held by the Trustee in securing the payment of the Carroll County Refunding Bonds and payment by KU of all sums payable by KU as discussed below. The First Mortgage Bonds would be issued pursuant to one or more supplemental indentures, each of which would be a supplement to the Indenture, dated as of October 1, 2010 between KU and The Bank of New York Mellon as Trustee, as heretofore amended and supplemented. The First Mortgage Bonds would have a maturity date corresponding to the Carroll County Refunding Bonds, not to exceed 30 years from date of issuance.

9. In connection with the Carroll County Refunding Bonds, KU would assume certain obligations under one or more loan agreements with Carroll County and may enter into one or more guaranty agreements, or similar undertakings guaranteeing repayment of all or any part of the obligations under one or more series of the Carroll County Refunding Bonds for the benefit of the holders of such bonds.

10. The Carroll County Refunding Bonds would be issued pursuant to one or more indentures (each a “County Indenture”), between Carroll County and the Trustee under such County Indentures, as applicable. The proceeds from the sale of the Carroll County Refunding Bonds would be loaned to KU pursuant to one or more loan agreements between KU and Carroll County (the “Loan Agreements”).

11. The payments to be made by KU under the Loan Agreements for one or more series of Carroll County Refunding Bonds, together with other funds available for the purpose, would be required to be sufficient to pay the principal and interest on such Carroll County

Refunding Bonds. The Loan Agreement(s) and the payments to be made by KU pursuant thereto will be assigned to the Trustee(s) to secure the payment of the principal and interest on the related Carroll County Refunding Bonds. Upon issuance of a series of Carroll County Refunding Bonds, KU may issue one or more guarantees (collectively, the "Guarantees"), in favor of the Trustee(s) guaranteeing repayment of all or any part of the obligations under such Carroll County Refunding Bonds for the benefit of the holders of such Carroll County Refunding Bonds.

12. The Carroll County Refunding Bonds would be sold in one or more underwritten public offerings, negotiated sales, or private placement transactions utilizing the proper documentation. The price, maturity date(s), interest rate(s), and the redemption provisions and other terms and provisions of each series of Carroll County Refunding Bonds (including, in the event all or a portion of the Carroll County Refunding Bonds initially bear a variable rate of interest, the method for determining the interest rate) would be determined on the basis of negotiations between KU and Carroll County, and the purchasers of such bonds. However, the amount of compensation to be paid to underwriters for their services would not exceed three-quarters of one percent (.75%) of the principal amount of the Carroll County Refunding Bonds of each series to be sold. Based upon past experience with similar financings, KU estimates that issuance costs, excluding underwriting fees, would be approximately \$400,000.

13. Because of the historical spread between long-term fixed interest rates and short-term rates, all or a portion of the Carroll County Refunding Bonds may be issued initially with an interest rate that fluctuates on a weekly, monthly or other basis, as determined from time to time by KU. KU would reserve the option to convert from time to time any variable rate Carroll County Refunding Bonds at a later date to other interest rate modes, including a fixed rate of

interest. Carroll County Refunding Bonds that bear interest at a variable rate (the “Variable Rate Pollution Control Refunding Bonds”) also may be issued subject to tender by the holders thereof for redemption or purchase. In order to provide funds to pay the purchase price of such tendered Variable Rate Pollution Control Refunding Bonds, KU would enter into one or more Remarketing Agreements with one or more remarketing agents whereby the remarketing agent would use its best efforts to remarket such tendered Variable Rate Pollution Control Refunding Bonds to other purchasers at a price equal to the purchase price of such Variable Rate Pollution Control Refunding Bonds, which will be 100% of the par amount of such Variable Rate Pollution Control Refunding Bonds. Thus, to the extent Variable Rate Pollution Control Refunding Bonds are issued, the documentation will be similar to previous bonds that were issued with a variable interest rate, except that based on market developments, KU does not currently anticipate that auction mode bonds would be issued. However, subject to market conditions KU may utilize new variable interest rate modes not previously used for its bonds, but which are not uncommon in industry practice, such as those based on Securities Industry and Financial Markets Association (“SIFMA”) rates plus a credit spread.

14. Also, in the event that Variable Rate Pollution Control Refunding Bonds are issued, KU may enter into one or more liquidity facilities (the “Current Facility”) with a bank or banks to be selected by KU (the “Bank”). The Current Facility would be a credit agreement designed to provide KU the ability to borrow funds with which to make payments with respect to any Variable Rate Pollution Control Refunding Bonds that have been tendered for purchase and are not remarketed. KU would be obligated to repay any amounts borrowed under the Current Facility. The Current Facility may be pledged for the payment of the Variable Rate Pollution Control Refunding Bonds or to constitute security thereof. The Current Facility may consist in

whole or in part of such liquidity facilities. Pursuant to the Current Facility, KU may be required to execute and deliver to the Bank a note (the "Current Facility Note") evidencing KU's obligation to repay any borrowings owed to the Bank under the Current Facility.

15. In order to obtain terms and conditions more favorable to KU than those provided in the Current Facility or to provide for additional liquidity or credit support to enhance the marketability of the Variable Rate Pollution Control Refunding Bonds, KU may desire to be able to replace the Current Facility with (or to initially use) one or more substitute liquidity support and/or credit support facilities (the instruments providing the liquidity support and/or credit support and any subsequent replacement support facility thereof, including any replacement facility which would replace a replacement facility, are hereinafter referred to as a "Facility") with one or more banks, or other financial institutions to be selected by KU from time to time (each such financial institution hereinafter referred to as a "Facility Provider"). A Facility may be in the nature of a letter of credit, revolving credit agreement, standby credit agreement, bond purchase agreement, or other similar arrangement designed to provide liquidity and/or credit support for the Variable Rate Pollution Control Refunding Bonds. In the event the Variable Rate Pollution Control Refunding Bonds are converted to bear interest at a fixed rate to maturity, the Current Facility (if not already replaced or terminated) or, if applicable, the Facility (unless earlier terminated) may be terminated in whole or in part following the date of conversion of such series of Variable Rate Pollution Control Refunding Bonds. The estimated cost of the financing shown in paragraph 12 does not include expenses incurred for entering into any Facility; however, the impact on the overall cost of the financing would be approximately 75 basis points.

16. In connection with any Facility, KU may enter into one or more credit or similar agreements (“Credit Agreements”) with the Facility Provider or providers of such Facility, which would document the obligation of KU to reimburse or repay the subject Facility Providers for amounts advanced by the Facility Providers under the particular Facility. Depending on the exact nature of a Facility, KU may be required to execute and deliver to the subject Facility Provider a promissory note (each such note hereinafter referred to as a “Facility Note”) evidencing KU’s repayment obligations to the Facility Provider under the related Credit Agreement; and the Trustee under the County Indenture for the Variable Rate Pollution Control Refunding Bonds may be authorized, upon the terms set forth in such County Indenture and any Credit Agreement, to draw upon the Facility for the purpose of paying the purchase price of Variable Rate Pollution Control Refunding Bonds tendered or required to be tendered for purchase in accordance with the terms of the County Indenture which are not remarketed by the remarketing agent as provided in the remarketing agreement and/or for the purpose of paying accrued interest on the Variable Rate Pollution Control Refunding Bonds when due and paying principal, whether at maturity, on redemption, acceleration or otherwise.

17. In connection with the issuance of the Carroll County Refunding Bonds, KU may enter into one or more interest rate hedging agreements (including an interest rate cap, swap, collar or similar agreement, collectively the “Hedging Facility”) with a bank or financial institution (the “Counterparty”). The Hedging Facility would be an interest rate agreement designed to allow KU to actively manage and limit its exposure to variable interest rates or to lower its overall borrowing costs on any fixed rate Carroll County Refunding Bonds. The Hedging Facility will set forth the specific terms for which KU will agree to pay the Counterparty payments and/or fees for limiting its exposure to interest rates or lowering its fixed

rate borrowing costs, and the other terms and conditions of any rights or obligations thereunder. The estimated cost of the financing does not include the costs of any Hedging Facility which would be determined at the time of the hedge. However, based on current market conditions, the cost of a 3-year hedge would be approximately 26 basis points.

18. The terms of each Facility, each Credit Agreement, each Facility Note and each Hedging Facility would be negotiated by KU with the respective Bank, Facility Provider or Counterparty, and would be the most favorable terms that can be negotiated by KU. The aggregate outstanding principal amount of the obligations of KU at any time under the Loan Agreements, and the Credit Facilities and related notes set forth in the immediately preceding sentence will not exceed the original aggregate principal amount of the Outstanding Bonds that are refunded plus accrued but unpaid interest, and in the case of a letter of credit facility, interest for an additional 45 days, and premium, if any, on such bonds.

19. No contracts have been made for the disposition of any of the securities which KU proposes to issue, or for the proceeds of such sale.

20. Attached as Exhibit 3 to this Application is a description of the redemption provisions for the Outstanding Bonds.

21. KU shall, as soon as reasonably practicable after the issuance of any Carroll County Refunding Bonds referred to herein, file with the Commission a statement setting forth the date or dates of issuance of the securities, the price paid therefore, the interest rate(s) (and, if applicable, their method of determination), and all fees and expenses, including underwriting discounts or commissions or other compensation, involved in the issuance and distribution.

22. Exhibit 4 to this Application contains the financial exhibit required by 807 KAR 5:001, Section 18(2)(a), as described by 807 KAR 5:001, Section 12. It also contains information required by 807 KAR 5:001, Section 18(2)(b).

23. Exhibit 5 to this Application consists of net present value analyses of the proposed refinancing, based on current market conditions.

24. A certified copy of KU's Board of Directors resolution authorizing the assumption of obligations under the Loan Agreements, and all transactions related thereto and discussed in this Application, will be filed as a supplement to this Application.

25. Other requirements of the Commission's regulation regarding this application, 807 KAR 5:001, Section 18, including (1)(c) regarding the amount and kind of notes, etc., (1)(d) regarding the use to be made of the proceeds, and (1)(f) regarding the obligations being refunded have been supplied in the extensive discussion above in paragraphs 3 through 21 of this Application.

**WHEREFORE**, Kentucky Utilities Company respectfully requests that the Commission enter its Order authorizing it to issue securities and to execute, deliver and perform the obligations of KU under the Loan Agreements, and any Remarketing Agreements, and Credit Agreements and the various Current Facility, Facility and Hedging Facility arrangements and other documents and related guarantees or notes set forth in this application. Kentucky Utilities Company further requests that the Order of the Commission specifically include provisions stating:

1. KU is authorized to issue its First Mortgage Bonds in one or more series and at one or more times and to execute, deliver and perform its obligations under the Loan Agreements with Carroll County, Kentucky and under any notes, guarantees, remarketing agreements,

hedging agreements, credit agreements and such other agreements and documents as set forth in its application, and to perform the transactions contemplated by all such agreements, including, but not limited to, borrowings or advances, and the related repayment or reimbursement obligations, under the Loan Agreements, Current Facilities and Facilities and Credit Facilities, all as described in this Application.

2. The proceeds from the transactions authorized herein shall be used only for the lawful purposes set out in the application.

3. KU shall agree only to such terms and prices that are consistent with the parameters set out in its application.

4. KU shall, within 30 days from the date of issuance, file with the Commission a statement setting forth the date or dates of issuance of the securities authorized herein, the price paid, the interest rate or rates, and all fees and expenses, including underwriting discounts or commissions, or other compensation, involved in the issuance and distribution thereof.
