DUKE ENERGY KENTUCKY, INC.'S ANNUAL PROGRAM REPORTING

I. Introduction

In its Order in Case No. 2016-00152 entered on May 25, 2017, the Kentucky Public Service Commission (Commission) approved a Stipulation entered into between Duke Energy Kentucky, Inc. (Duke Energy Kentucky or Company) and the Attorney General in Duke Energy Kentucky's Advanced Metering Infrastructure (AMI) or Metering Upgrade Certificate for Public Convenience and Necessity (CPCN) case, subject to certain Commission modifications.¹ Section 8 of the Stipulation reads:

“During deployment, and for three years following completion of deployment, Duke Energy Kentucky agrees to provide annual reporting to the Attorney General and the Commission regarding the development and implementation of products and services designed to engage Duke Energy Kentucky's customers around energy consumption. This annual reporting shall include, but is not limited to, the

P.S.C., May 25, 2017).

development of Company portal enhancements, flexible billing programs, and other payment programs. The Company commits to making a monthly usage alert program as described on page 10 of Company witness Weintraub' s testimony in this Case as soon as practicable following completion of deployment.”²

Pursuant to Section 8 of the Stipulation Duke Energy Kentucky plans to provide its annual programs, products and services report. The Company began its AMI deployment in August 2017. This report reflects data through the end of June 2021.

II. Usage Awareness

Usage alerts are available for Duke Energy Kentucky electric service customers. These alerts require customers to have a certified smart meter and an email address on file with the Company. Eligible customers are automatically enrolled in the program and are sent an email notification half-way through their billing cycle each month. This email shows the customer’s actual electricity cost to date and projected electricity costs through the end of their billing cycle, based on their current electricity consumption and rate schedule. It also contains a breakdown of estimated usage to date by major appliance (e.g., HVAC, refrigeration, lighting, etc.) based on the customer’s usage, general appliance usage patterns, weather data, and details provided by the customer in their Home Profile.

Customers also have the option to enroll in budget alerts. Budget alerts allow customers to set their desired electricity budget and are notified via emails and/or text messages when they reach 75% and 100% of that amount. As of June 30, 2021, there were 128,402 Duke Energy Kentucky customers enrolled in the usage alert program and 2,085,032 alerts had been sent to customers.

² *Stipulation and Recommendation*, at p.12-13.

Additionally, Duke Energy Kentucky is currently providing all customers who have smart meters, with data access functionality similar to the Green Button Download My Data functionality.

III. Flexible Billing Programs

Prepaid Advantage is a prepaid energy program that gives customers an enhanced payment choice, such as prepaying for their power in smaller amounts, while allowing them to avoid deposits and reconnect fees. The Prepaid Advantage solution for Kentucky is currently dependent on the deployment of a new Customer Information System, as the Company looks to leverage IT developments for potential faster deployment.

IV. Other Programs, Products and Services

Pick Your Own Due Date is a program that allows customers to choose a due date that best meets their personal needs and income stream. The program is available to Duke Energy Kentucky customers that have a certified smart meter and it allows customers to choose a new due date one time per year. As of June 30, 2021, there are 4,213 Duke Energy Kentucky customers enrolled in the program.

Duke Energy Kentucky also launched the Duke Energy App available for Android users in the Google App store and available for IOS users in the App Store. This platform allows customers to review usage details while also providing a new method to pay their bills.

V. Conclusion

The Company will continue to provide updates in compliance with the Commission-approved Stipulation.

Respectfully submitted,

/s/ Rocco D'Ascenzo
