

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF KENTUCKY UTILITIES)	
COMPANY FOR AN ADJUSTMENT OF ITS)	CASE NO.
ELECTRIC RATES AND FOR CERTIFICATES)	2016-00370
OF PUBLIC CONVENIENCE AND NECESSITY)	

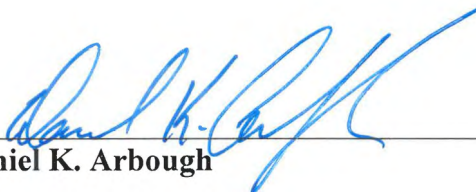

RESPONSE OF
KENTUCKY UTILITIES COMPANY
TO
FIRST REQUEST FOR INFORMATION OF
KENTUCKY SCHOOL BOARDS ASSOCIATION (KSBA)
DATED JANUARY 11, 2017

FILED: JANUARY 25, 2017

VERIFICATION

COMMONWEALTH OF KENTUCKY)
) SS:
COUNTY OF JEFFERSON)

The undersigned, **Daniel K. Arbough**, being duly sworn, deposes and says that he is Treasurer for Louisville Gas and Electric Company and Kentucky Utilities Company and an employee of LG&E and KU Services Company, and that he has personal knowledge of the matters set forth in the responses for which he is identified as the witness, and the answers contained therein are true and correct to the best of his information, knowledge and belief.

Daniel K. Arbough

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 25th day of January 2017.

Notary Public (SEAL)

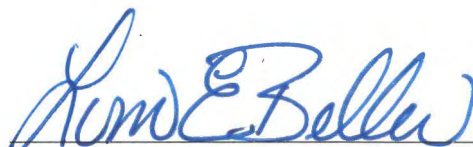

My Commission Expires:

JUDY SCHOOLER
Notary Public, State at Large, KY
My commission expires July 11, 2018
Notary ID # 512743

VERIFICATION

COMMONWEALTH OF KENTUCKY)
) SS:
COUNTY OF JEFFERSON)

The undersigned, **Lonnie E. Bellar**, being duly sworn, deposes and says that he is Senior Vice President – Operations for Louisville Gas and Electric Company and Kentucky Utilities Company and an employee of LG&E and KU Services Company, and that he has personal knowledge of the matters set forth in the responses for which he is identified as the witness, and the answers contained therein are true and correct to the best of his information, knowledge and belief.

Lonnie E. Bellar

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 25th day of January 2017.

Notary Public (SEAL)

My Commission Expires:

JUDY SCHOOLER
Notary Public, State at Large, KY
~~My commission expires July 11, 2018~~
Notary ID # 512743

VERIFICATION

COMMONWEALTH OF KENTUCKY)
) SS:
COUNTY OF JEFFERSON)

The undersigned, **Robert M. Conroy**, being duly sworn, deposes and says that he is Vice President – State Regulation and Rates for Louisville Gas and Electric Company and Kentucky Utilities Company, an employee of LG&E and KU Services Company, and that he has personal knowledge of the matters set forth in the responses for which he is identified as the witness, and the answers contained therein are true and correct to the best of his information, knowledge and belief.

Robert M. Conroy

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 23rd day of January 2017.

Notary Public (SEAL)

My Commission Expires:

SUSAN M. WATKINS
Notary Public, State at Large, KY
My Commission Expires Mar. 19, 2017
Notary ID # 485723

VERIFICATION

COMMONWEALTH OF KENTUCKY)
) SS:
COUNTY OF JEFFERSON)

The undersigned, **Christopher M. Garrett**, being duly sworn, deposes and says that he is Director – Rates for Kentucky Utilities Company and Louisville Gas and Electric Company and an employee of LG&E and KU Services Company, that he has personal knowledge of the matters set forth in the responses for which he is identified as the witness, and the answers contained therein are true and correct to the best of his information, knowledge and belief.

Christopher M. Garrett

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 25th day of January 2017.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 1

Responding Witness: William S. Seelye / John P. Malloy / Robert M. Conroy

Q-1. Regarding the AMS Program please respond:

- a. Please provide the average rate class cost increase per customer (bill impact) of the employing AMS (smart) meters.
- b. Will the added cost be fully recovered in the customer charge? If not, please explain.
- c. Please provide the installed cost of an AMS meter for a typical 3-phase school (50 to 1000 KW) account(s).
- d. With the installation of the AMS meters how will the billing usage data be retrieved and processed differently from existing procedures.
- e. Are the existing smart meters in place under the DSM-EE (Enernoc) Program functionally equivalent to the proposed AMS meters? If not, please explain in detail the differences.
- f. Please confirm that the employment of the AMS meters will permit coincident demand billing. If not, please explain.
- g. With full employment of the AMS meters in a rate class does the Company plan to implement coincident demand billing. If not, please explain.
- h. Please provide a detail explanation of how the cost of the AMS meters is allocated or assigned to rate case in Mr. Seelye's cost of service studies.
- i. Please provide the Company's schedule for installing the AMS meters by rate class.
- j. Does the Company believe public schools subject to KRS 160.325 are better positioned currently to derive the benefits described by Mr. Malloy in his testimony than residential and other commercial customers of similar size?

- k. Will the Company commit to install the AMS meters first on public school accounts to facilitate the intent of the General Assembly codified in KRS 160.325.

A-1.

- a. The Company has not performed the requested analysis.
- b. Yes. Meter costs are customer related costs allocated to customer charges in the cost of service. See also the response to KIUC 1-85.
- c. Company estimates an installed cost for the described 3-phase service to be \$262. This cost includes the unit price of the meter as well as labor to install it but it does not include the corresponding infrastructure required to enable its functionality or the back-office overhead to schedule and manage the installation.
- d. Today the billing register value is retrieved manually by a meter reader on a monthly basis. In most cases this involves manually keying the register reading into a handheld device that captures the information and communicates it back to the Company billing system to be processed and validated before ultimately being billed to the corresponding customer. With AMS, meters will remotely communicate register readings over the air on a daily basis. When a customer's billing window occurs the proposed Meter Data Management System (MDMS) will pass the billing read to existing billing system at which point it will process the bill for the customer.

In addition to the billing reads the AMS meters will also communicate interval usage information; better informing customers of their usage patterns.

- e. The DSM-EE (Enernoc) Program is not functionally equivalent to the proposed AMS meters. The DSM-EE Program mentioned is a demand response offering for large commercial customers. The offering does not utilize "smart meters" with remote communications, rather the electronic meters have pulse outputs from the electric meter which feed an energy management system that features a host of functionality including automated load management reductions not included with AMS.
- f. Confirmed.
- g. The Company does not presently have a plan to implement such billing upon full deployment of AMS. Implementing such billing could only occur following Commission approval in a base-rate case; the Company has not proposed such billing in this proceeding. However, with the implementation of AMS, the Company does plan to evaluate other rate alternatives.

- h. See the response to KIUC 1-85.
- i. The Company has not developed a schedule for installing the AMS meters by rate class, rather the deployment will be done geographically as AMS communications infrastructure allows. See Section 8.1 of Exhibit JPM-1 for Company's proposed deployment schedule.
- j. The Company believes all customers are positioned to derive benefits described by Mr. Malloy in his testimony.
- k. At page 30 of his testimony, Mr. Malloy states: "Customers who desire to have an AMS meter installed ahead of the full deployment schedule for their area will be able to contact the Companies and request an accelerated installation, which requests the Companies will accommodate to the extent reasonable and feasible." Therefore, although the Company cannot commit to install AMS meters at public schools before installing them anywhere else, the Company will, to the extent reasonable and feasible, accommodate the requests of individual schools to accelerate AMS deployment to those schools.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 2

Responding Witness: Robert M. Conroy

- Q-2. With regard to Mr. Conroy's testimony at page 20 please list or describe the types of situations he envisions would not be metered. Please describe any such situation that are currently not metered?
- A-2. See the response to PSC 2-68.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 3

Responding Witness: John P. Malloy

- Q-3. Please confirm the Company will continue the demand response (ENERNOC) program.
- A-3. The Company confirms that it will continue the commercial demand response program (ENERNOC) through December 2018 when all DSM programming approval ends.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 4

Responding Witness: Robert M. Conroy

- Q-4. When does the Company expect to convert non-demand rates to a time-of -day structure?
- A-4. The Company continues to review options for rate design and has not at this time made a determination what types of rate structure will be offered in the future. See also the response to AG 1-358.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 5

Responding Witness: Robert M. Conroy

- Q-5. Has the Company considered upon installation of the AMS meters converting to conjugative meter reading and billing for single sites where there are multiple metering points?
- A-5. This response assumes the request was about converting to conjunctive meter reading and billing.

No, KU has not considered installing conjunctive meters and billing for any single customer site, but has studied conjunctive demand billing. The Company does not object to conjunctive metering as long as it is implemented in a cost-based and equitable manner and as long as customers under a properly designed system reimburse the Company for any additional metering, billing, and other administrative costs involved in providing the service. This type of setup will also require a properly structured conjunctive demand rate that would consist of a distribution and transmission demand charge that would be applied to the customer's maximum demand at each delivery point and production demand charge that would be applied to the customer's demand determined either on an aggregated or individual customer basis at the time of the Company's system peak.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 6

Responding Witness: William S. Seelye

- Q-6. Please provide the Company's billing analysis used to conclude implementing a 100% base demand ratchet in Rate Schedules TODS and TODP is revenue neutral to the company.
- A-6. See Schedule M-2.3 of Section 16(8)(m) of the Filing Requirements.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 7

Responding Witness: William S. Seelye

Q-7. What consideration did the Company give to the impact on existing Rate TOD customers from increasing the base demand ratchet to 100% and provide any analysis performed to determine the impact on existing customers?

A-7. See the responses to PSC 2-87 and KIUC 1-95.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 8

Responding Witness: William S. Seelye

- Q-8. Provide copies of the rate schedules Mr. Seelye lists in his testimony at pages 29 and 30 where ratchets apply.
- A-8. The Company is proposing a 100% ratchet to Rates TODS, TODP, RTS and FLS. The rate schedules are shown in Schedule 16(1)(b)(3) and Schedule 16(1)(b)(4) of the Company's Filing Requirements.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 9

Responding Witness: Robert M. Conroy / William S. Seelye

- Q-9. Does the Company agree that a KW charge penalizes customers when applied to a NCP compared to a class or system CP?
- A-9. A kW charge applied to an NCP demand does not automatically penalize a customer compared to a kW charge applied to a class or system CP demand. The relative billings between the two scenarios will depend on the individual customer's load characteristics. Additionally, it would not be appropriate to recover the costs associated with transmission and distribution plant through a CP demand charge. Those assets are not sized based on system CP demands. With the implementation of AMS, the Company will be exploring the use of multi-part rates that could include a combination CP and NCP demand charges or time-differentiated demand charges for customers currently taking service under Rates PS or AES. However, no determinations on future rate designs have been made at this time. See response to PSC 2-84(b)(1).

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 10

Responding Witness: William S. Seelye

Q-10. Please provide for each rate class the unit cost component sheets similar to Rate RS provided in Exhibit-WSS-2.

A-10. See attachment to PSC 2-98(b).

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 11

Responding Witness: William S. Seelye

- Q-11. Please clarify what Mr. Seelye at page 56 of his testimony is referring to as the LED “fixture”.
- A-11. A “fixture” is the lighting component of the street or security light as distinguished from the pole on which the fixture is attached. It typically includes the housing for the light, the bulb, the ballast or control regulator, the photo cell, and sometimes a diffuser or an arm.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 12

Responding Witness: John P. Malloy

Q-12. Please describe the process for a customer to convert existing lights to LED and possible costs for such conversions?

A-12. The process is initiated by the customer contacting the Company to inquire about converting existing lights to LED. The Company will review the customer's request to determine if the customer has met their contractual obligation and the terms and conditions of the applicable tariff (see below). If the customer has not met these obligations, a lump sum fee will be charged. Customers deciding to convert their lights will be contacted by a Company representative to identify lights to be converted and plan the conversion.

Standard Rates: Lighting Service and Restricted Lighting Service

TERM OF CONTRACT

For a fixed term of not less than five (5) years and for such time thereafter until terminated by either party giving thirty (30) days prior written notice to the other when additional facilities are required. Cancellation by Customer prior to the initial five-year term will require Customer to pay to Company a lump sum equal to the monthly charge times the number of months remaining on the original five (5) year term.

Standard Rate: Lighting Service

TERMS AND CONDITIONS

6. If Customer requests the removal of an existing lighting system, including, but not limited to, fixtures, poles, or other supporting facilities that were in service less than twenty years, and requests installation of replacement lighting within 5 years of removal, Customer agrees to pay to Company its cost of labor to install the replacement facilities.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 13

Responding Witness: Robert M. Conroy / William S. Seelye

- Q-13. With the rapid decline being experienced in the cost of LED fixtures as suppliers respond to market conditions of increased suppliers and users please explain how the Company will adjust the proposed rates to reflect the cost reductions.
- A-13. The Company will continue to monitor the cost of LED lights, just as it does all lighting types, and take any changes in costs into account in future rate case filings.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 14

Responding Witness: John K. Wolfe / William S. Seelye

- Q-14. Does the Company concur that LED maintenance costs are less than existing HPS, Mercury Vapor and Metal Halide technologies? If so, please explain how this is recognized in the proposed rate design. If not, please explain.
- A-14. No. The rates for lighting applications include the carrying charges, distribution energy costs, and operation and maintenance expenses. The current maintenance cost included in the LED rate codes exceeds the maintenance cost included in the rate codes of HPS, Mercury Vapor, and Metal Halide lights.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 15

Responding Witness: John K. Wolfe

Q-15. Will the Company consider providing LED outside lighting that can be set on timers and/or remotely controlled to facilitate dark-campus energy management?

A-15. Yes.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 16

Responding Witness: William S. Seelye

- Q-16. Please provide copies all calculations, work papers and any other supporting documents including but not limited to load research reports used to develop the Allocation Factor Tables in Exhibits WSS-18 (Exhibit -WSS-23 LGE) and Exhibit-WSS-19 (Exhibit –WSS-24 LGE).
- A-16. See the attachment to PSC 2-97 and Schedule M-2.2 and M-2.3 of the Application section 16(8)(m) (Tab 66 of Filing Requirements).

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 17

Responding Witness: David S. Sinclair

Q-17. Please provide copies of all available peak day load profiles for any school accounts recorded in the last five years and include the rate schedule for each account. (Note: To avoid disclosing confidential and propriety information please provide only the load profile data and attendant rate schedule.)

A-17. See attached.

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 18

Responding Witness: David S. Sinclair

Q-18. Please provide copies of all available peak day load profiles for rate schedules GS, AES (KU), PS-sec and TODS recorded in the last five years and include the rate schedule for each account. (Note: To avoid disclosing confidential and propriety information please provide only the load profile data and attendant rate schedule.)

A-18. See attached.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 19

Responding Witness: William S. Seelye

Q-19. Please provide a copy of all class loss factors used in the development of Exhibits-WSS- 18 (Exhibit-WSS-23 LGE) and Exhibit-WSS-19 (Exhibit-WSS-24 LGE) and any supporting studies and documentation.

A-19.

Rate Schedule	Energy Loss Factor	Demand Loss Factor
Residential Service	6.602%	7.833%
General Service	6.602%	7.833%
All Electric Schools	6.602%	7.833%
PS Primary	4.255%	5.772%
PS Secondary	6.602%	7.833%
TOD Primary	4.255%	5.772%
TOD Secondary	6.602%	7.833%
RTS	2.221%	2.728%
FLS	2.221%	2.728%
Unmetered Lighting	6.602%	7.833%
Traffic Energy	6.602%	7.833%
Lighting Energy	6.602%	7.833%

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 20

Responding Witness: David S. Sinclair

Q-20. Please provide load profiles for each monthly peak day as listed on the 2015 FERC Form 1 page 401b provided in Tab 41 for each company.

A-20. See attached.

Q20 - LGE Monthly Peaks

Year	Month	Megawatts	Day of Month	HourEnding
2015	January	1,976	8	900
2015	February	1,967	20	800
2015	March	1,724	6	900
2015	April	1,527	9	1600
2015	May	2,043	7	1700
2015	June	2,488	23	1600
2015	July	2,594	29	1600
2015	August	2,484	3	1700
2015	September	2,443	4	1600
2015	October	1,827	7	1700
2015	November	1,570	23	800
2015	December	1,577	18	1900

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 21

Responding Witness: Valerie L. Scott

Q-21. What are rate refunds for 2014 and 2015 Blake Schedule I-1?

A-21. The rate refunds on Blake Schedule I-1 for 2014 and 2015 relate to the FERC jurisdictional municipal customers, please see Docket No. ER13-2428.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 22

Responding Witness: Valerie L. Scott

Q-22. Please provide a copy of FERC Form 1 page 401b for the years 2013 through 2015.

A-22. See attached.

Name of Respondent Kentucky Utilities Company		This Report Is: (1) <input checked="" type="checkbox"/> An Original (2) <input type="checkbox"/> A Resubmission		Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2013/Q4	
MONTHLY PEAKS AND OUTPUT						
<p>1. Report the monthly peak load and energy output. If the respondent has two or more power which are not physically integrated, furnish the required information for each non- integrated system.</p> <p>2. Report in column (b) by month the system's output in Megawatt hours for each month.</p> <p>3. Report in column (c) by month the non-requirements sales for resale. Include in the monthly amounts any energy losses associated with the sales.</p> <p>4. Report in column (d) by month the system's monthly maximum megawatt load (60 minute integration) associated with the system.</p> <p>5. Report in column (e) and (f) the specified information for each monthly peak load reported in column (d).</p>						
NAME OF SYSTEM:

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 23

Responding Witness: David S. Sinclair

Q-23. Please provide the Company system peaks in the Form 1 page 401 format and hourly profiles in Excel format for each peak day shown for the years 2015 and 2016.

A-23. See the attachment being provided in Excel format.

The attachment is being provided in a separate file in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 24

Responding Witness: David S. Sinclair

Q-24. Please provide the combined LGE-KU monthly system peaks in the Form 1 page 401 format and hourly profiles in Excel format for each peak day shown for the years 2015 and 2016.

A-24. See the attachment being provided in Excel format.

The attachment is being provided in a separate file in Excel format.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 25

Responding Witness: Daniel K. Arbough / Counsel

Q-25. Please provide the Company's current estimate of expected amount and percentage revenues increases to be passed through the ECR, DSM and FAC mechanisms for the next five years.

A-25. See the Company's objection filed on January 20, 2017. Without waiver of the objection, for the purpose of establishing base rates in this proceeding, the effects of the mechanisms are removed from the determination of the revenue requirement in this proceeding. For the five-year business plan, the Company does not calculate the ECR, DSM and FAC mechanism revenues by rate schedule in the detailed manner that occurs with the determination of the actual monthly billing factor. The business plan contains a projection of the revenue requirement for each of the mechanisms in total for the Company. The table below represents the revenue projections for ECR, DSM and FAC. Four years of projections have been provided consistent with the filing requirement Section 16(8)(k), which provides revenue projections through 2020.

	2017	2018	2019	2020
ECR Tracker Revenue	\$ 54,524,502	\$ 82,753,520	\$ 108,990,929	\$ 119,641,752
ECR Percentage Change		51.8%	31.7%	9.8%
DSM Revenue	\$ 26,049,451	\$ 25,997,565	\$ 26,884,200	\$ 28,548,898
DSM Percentage Change		-0.2%	3.4%	6.2%
FAC Revenue	\$ (56,117,800)	\$ (59,724,568)	\$ (50,296,691)	\$ (44,679,740)
FAC Percentage Change		-6.4%	15.8%	11.2%

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 26

Responding Witness: Daniel K. Arbough

Q-26. With regard to Garrett Schedule D-1 page 7 of 8 line 124:

- a. What function will the employees who were charging time to capital projects perform going forward?
- b. Provide the dollar amount for these employees included in the adjustment.

A-26.

- a. One of the largest uses of Capital Labor in the Information Technology department in 2017 will be the SAP Upgrade project, which is expected to conclude in 2017. The IT employees who are no longer charging Capital will be performing system support, ongoing operational maintenance and small enhancements needed as a result of the SAP project and other Capital investments in the recent years.
- b. See the response to PSC 2-32(a).

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 27

Responding Witness: William S. Seelye

- Q-27. Please explain how the solar project tax credits per Garrett Schedule D-1 page 8 of 8 are assigned to classes in Exhibit-WSS-18 (Exhibit-WSS-23 LGE) and Exhibit-WSS-19 (Exhibit- WSS-24 LGE).
- A-27. Solar investment tax credits are assigned to the rate classes in the same manner as income taxes.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 28

Responding Witness: David S. Sinclair / Daniel K. Arbough

- Q-28. With regard to Garrett Schedule D-1 page 1 please explain the decrease in commercial bill determinants and the decrease for each rate class.
- A-28. See the response to PSC 2-14 and Exhibit DSS-2, which provides a comparison of KU electric customers, billing demand, and energy by rate classes for the base period versus the test period.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 29

Responding Witness: Christopher M. Garrett

- Q-29. With regard to Garrett Schedule D-1 page 3 (LGE pages 3-4) lines 51 and 61 please provide the amounts not offset by the FAC pro forma adjustment.
- A-29. The entire variance in line 51 is offset by the FAC pro forma adjustment. The amount not offset in line 61 by the FAC pro forma adjustment is \$498,553 attributable to purchase power demand costs.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 30

Responding Witness: Lonnie E. Bellar

- Q-30. With regard to Garrett Schedule D-1 please provide a reconciliation of all accounting reclassifications such as shown on page 3 line 53.
- A-30. The adjustments to the base period shown on schedule D-1 are not considered accounting reclassifications. In regards to line 53, the description is referencing a misallocation in the forecasted test year in which costs related to the jointly owned Cane Run 7 unit were allocated to the affiliate company on an incorrect FERC account basis. The costs in total were correctly allocated to Kentucky Utilities Company. The table below shows all the misallocations by FERC account related to Cane Run 7 that show a zero impact on the utility in total.

FERC	Adjustments to base period	Description
546	\$ (223,013)	Account understated
549	153,798	Account overstated
551	(157,645)	Account understated
553	(253,701)	Account understated
554	480,561	Account overstated
Net	<u>\$ -</u>	

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 31

Responding Witness: Lonnie E. Bellar

- Q-31. With regard to Garrett Schedule D-1 Page 4 Line 73 please explain and provide calculations quantifying the “depancaking” adjustment.
- A-31. Depancaking expenses are related to the 2006 settlement agreement in which the Company withdrew from the Midcontinent ISO (“MISO”) and as a result is required, for certain customers, (1) to forgive transmission charges for energy sales by those customers into MISO and (2) to provide credits for MISO transmission charges for energy purchases by those customers from MISO.

Below is the calculation of the depancaking adjustment:

\$'s	Base	Test	Adjustment
KU Jurisdictional			
KMPA	\$3,565,878	\$3,989,276	\$423,397
OMU	\$1,420,273	\$1,530,064	\$109,791
Former Municipals	\$101,708	\$638,805	\$537,097
Total Depancaking			<u>\$1,070,285</u>

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 32

Responding Witness: Daniel K. Arbough

Q-32. With regard to Garrett Schedule D-1 Page 8 please provide a separation of the depreciation expense adjustment from the proposed new depreciation rates by the existing and new plant for the test period.

A-32. See response to PSC 2-34.

	<u>Depreciation Expense</u>
Base Period Ended 2/28/2017	185,928,880
Forecast Period Ended 6/30/2018	<u>228,062,837</u>
Change (Period over Period) - Fav / (Unfav)	(42,133,957)
<i>Increased Rates Related Variance</i>	(33,840,703)
<i>Increased Plant in-service Related Variance</i>	(8,293,254)

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 32

Responding Witness: William S. Seelye

Q-32. Please explain how solar costs are allocated to rate classes in Exhibit-WSS-18 (Exhibits – WSS-23 LGE) and Exhibits-WSS-19 (Exhibit –WSS-24 LGE).

A-32. The cost of solar facilities is allocated on the same basis as fixed production costs.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 33

Responding Witness: Daniel K. Arbough

Q-33. With regard to Garrett Schedule D-1 pages 7 A&G acct 923 please list the outside services by provider, amount, project purpose and contract duration.

A-33. See response to AG 1-82 for a list of outside services over \$20,000 for the actuals period of the base period. See response to AG 1-90 for the list of legal services included in the test year. For the forecasted periods of the base and test year, we do not budget to that level of detail. See below for a list of budgeted costs by expenditure type.

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 37

Responding Witness: William S. Seelye

Q-37. Please provide the derivation of the fixed charge, energy and O&M rates used in Exhibit- WSS-4.

A-37. See the response to PSC 2-100.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 38

Responding Witness: William S. Seelye

Q-38. Explain the reasons for the difference in proposed customer charges for rates AES and GS as including the differences between single phase and three phase.

A-38. The difference in customer charges between rates GS and AES is due to the difference in service requirements between the customers in each class. GS customer requirements range from 5 to 50kW. Thus meters, services, and other distribution related equipment are sized appropriately to serve these GS customers based on these estimated maximum demands. By contrast, AES customer requirements range from 50 to 500kW. As customer load requirements increase, so does the cost of the fixed distribution infrastructure needed to serve that customer. This relationship holds true for both single and three phase customers. Thus, the fixed costs of the transformer, meter, service drop and other related distribution equipment are higher for AES than GS due to their higher demand requirements. Consequently, the AES customer charges for service are higher than those of GS customers.

KENTUCKY UTILITIES COMPANY

CASE NO. 2016-00370

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 39

Responding Witness: John K. Wolfe

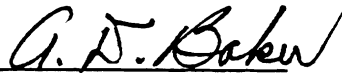

- Q-39. Please provide the Company's policy for the provision of secondary conductors for non- residential customers.
- a. Please confirm that KU provides the secondary conductor for single phase GS and AES service.
 - b. Please confirm AES served customers provide secondary conductor if needed similar to PS-secondary and TODS served customers.
- A-39. See attached. Specifically, a service is considered the last span of conductor or cable before the service point. Secondary is considered any low voltage conductor on the source side of the service.
- a. KU provides all secondary conductor for GS and AES for both overhead and underground conductors. KU provides overhead service conductors for overhead services and underground services to multi-meter service entrances and for underground services provided from overhead transformers.
 - b. The policies for both overhead and underground services for AES customers are the same as for PS and TODS customers.

INTRODUCTION

The general requirements presented in this Booklet are intended as a guide when considering underground electrical facilities for new subdivisions (URD), housing developments, commercial, and industrial installations, new and uprated services, conversion of existing lines and services and in residential (non-subdivision) applications. When requirements herein are met, Kentucky Utilities Company will furnish, install, own, operate, maintain, expand, enlarge, and replace the electric facilities required for a modern underground electric distribution system.

The basic policy of the Company is to provide service by the most direct, economical, and feasible route and in the most economical and practical manner. Any deviation is at the discretion of the Company. If the Company permits a deviation, the added cost will be borne by the party requesting it. The Company reserves the right to determine the KVA capacity of cables, switchgear, and transformer(s) required to provide adequate service to any customer or group of customers.

The Public Service Commission of Kentucky in a ruling on Administrative Case No. 146 established "Rules for New Residential Electric Underground Extensions" with the stated purpose to "formulate, for the State of Kentucky, uniform requirements for underground electrical supply systems in new subdivisions...". The residential portion of the Company's revised policy is in accord with the rules established by the Commission and has been accepted by it.

In order that an underground development may be properly planned, engineered, and installed, the Company's respective Division Engineering Department should be notified immediately following any underground inquiry and should participate in drafting the proposal. All underground proposals shall conform to usual engineering considerations and guidelines to insure the feasibility and practicality of each installation.

DEFINITIONS

Applicant - The developer, builder, customer or other person, partnership, association, corporation or governmental agency applying for the installation of an underground electric distribution system.

Builder-The person, partnership or corporation responsible for constructing any building or structure and requesting temporary or permanent underground service.

Building - A structure enclosed within exterior walls or fire walls, built, erected, and framed of component structural parts and designed for less than five family occupancy.

Commission - The Public Service Commission of Kentucky.

Company - The Kentucky Utilities Company.

Customer - First Applicant for permanent service and meter installation at any location.

Distribution System - Electric service facilities consisting of primary and secondary conductors, conduits, transformers, and necessary accessories and appurtenances for the furnishing of electric power at utilization voltage.

Mobile Home Development - A tract of land which is divided into ten or more contiguous lots for occupancy by mobile homes with an average centerline-to-centerline spacing not to exceed 50 feet.

Multiple-Occupancy Building - A structure enclosed within exterior walls or fire walls, built, erected, and framed of component structural parts and designed to contain five (5) or more individual dwelling units.

Service - Service cable along with necessary accessories and appurtenances with service length defined as being measured from the pad-mounted transformer or secondary pedestal or base of the pole (when fed from an overhead facility) to the structure at the point where the meter is located.

Subdivision - The tract of land which is divided into ten or more contiguous lots for the construction of new residential buildings, or the land on which is constructed two or more new multiple occupancy buildings.

Townhouse/Condominium - A building of special construction which shares a fire wall with adjacent similar structures, all of which are enclosed within exterior walls, which building is normally located on a narrow lot (approximate 25 foot width), which building and/or lot may be owned and treated as a dwelling unit separate from similar adjacent such units and which building requires an individual, ungrouped meter installation.

UNDERGROUND ELECTRIC DISTRIBUTION EXTENSION POLICY

GENERAL CONSIDERATIONS

All underground primary distribution facilities shall be 15 KV class, 95 KV BIL minimum. All underground primary, secondary, lighting, and service cables are to be installed in conduit.

In Residential Subdivisions, Company will install, own, operate, and maintain all of the underground primary and secondary electric system on the source side of its point of delivery. Company will install, own, operate, and maintain all of the underground Service facilities or Company will, as an option, allow Applicant (Builder/Customer) to install the conduit system complete with trench and backfill to connect with Company's facilities at Applicant's property (lot) line. Company will assume ownership, operation, and maintenance of Applicant-installed conduit system and will install, own, operate, and maintain its service cable system in this conduit. Primary and secondary systems include all primary cables, transformers, secondary cables, pedestals, connectors, and switching equipment, along with all conduits and transformer pads. The location of these systems shall be determined by Company. Appurtenances such as transformers, pedestal mounted terminals, switching equipment, and metering cabinets will be placed above ground. Company will determine the location of its meters and will furnish, install, and maintain them. Applicant (Builder/Customer) will install the meter base(s). The developer will provide as a part of their overall property development a trench system to Company's specifications for the installation of Company's primary and secondary conduits and service conduits to each property (lot) line and as part of its landscaping requirements will provide and install backfill to Company's specifications in this trench system.

In Commercial and Industrial Developments, Company will install, own, operate, and maintain the primary and secondary system on the source side of its point of delivery. The primary and secondary system includes all primary cables, transformers, secondary cables, pedestals, connectors and switching equipment. Applicant will furnish, install, own, and maintain the trench, the conduits, and transformer pads. The location of the primary and secondary system shall be determined by Company. Appurtenances such as transformers, pedestals, connectors, switching equipment, and metering cabinets will be placed above ground. Company will determine the location of its meters and will furnish, install, and maintain them. Applicant (Builder/Customer) will install the meter base(s).

In Residential (non-subdivision) applications, Company will install, own, operate, and maintain all of the underground primary and secondary electric system on the source side of its point of delivery. Company will install, own, operate, and maintain all of the underground Service facilities or Company will, as an option, allow Applicant (Builder/Customer) to install the conduit system complete with trench and backfill to connect with Company's facilities at Applicant's property (lot) line. Company will assume ownership, operation, and maintenance of Applicant installed conduit system and will install, own, operate, and maintain its service cable system in this conduit. Primary and secondary systems

include all primary cables, transformers, secondary cables, pedestals, connectors, and switching equipment, along with all conduits and transformer pads in the case of multiple lots only. The single lot or property Applicant will provide all primary conduit and transformer pads and will perform all trenching and backfilling to Company's specifications. The location of these systems shall be determined by Company. Appurtenances such as transformers, pedestal mounted terminals, switching equipment, and metering cabinets will be placed above ground. Company will determine the location of its meters and will furnish, install, and maintain them. Applicant (Builder/Customer) will install the meter base(s). Applicant (Builder/Customer) with multiple lots will provide, as a part of its overall property development, a trench system to Company's specifications, for the installation of Company's primary and secondary conduits, and as part of its landscaping requirements will provide and install backfill to Company's specifications in that trench system.

Company requires, without cost to or condemnation by Company, suitable land rights (easements, etc.) be granted to it obligating Applicant (developer/Builder/Customer) and subsequent property owners to provide continuing access to its electric facilities for operation, maintenance, and replacement purposes and to prevent encroachment on these rights and/or substantial change in grade or elevation.

Company is responsible for repairs and replacements of its facilities unless such repairs or replacements result from an act or negligence of Applicant, the property owner or other party acting in their behalf, or as their contractor.

Three-phase primary mains or feeders required within a subdivision, to supply other local distribution or to serve individual three-phase loads, will be overhead. If underground mains or feeders are required by governmental authority or chosen by Applicant, Applicant will pay any additional cost for the underground.

Extension of Company's facilities from the boundary of the subdivision to its existing supply lines will be overhead. Upon request, such extension may be installed underground provided Applicant reimburses Company for any additional cost for underground.

The fees or charges indicated in these rules are based on the premise that Applicants will cooperate to the fullest extent with Company in an effort to keep the cost of construction and installation of the underground electric Distribution System as reasonable as possible. Company will install its primary and secondary system in the development according to the portion of the subdivision in which the developer has completed their work. Since many underground facilities for water, sewer, gas, electric, telephone, television, and street lighting may be required for the orderly construction of a new development, it is important that close coordination among all utility installers be maintained during the course of construction.

All electrical facilities shall be installed and constructed to comply with applicable codes and the rules and regulations of the Public Service Commission.

Nothing herein contained shall prevent Company and Applicant (Builder/Customer) from mutually agreeing to alternate fees or charges and/or methods of construction in the interest of seeking better and more economical installations of underground electric facilities.

Fees or charges should be paid at the time service is requested or installed.

I. RESIDENTIAL HOUSING DEVELOPMENTS

A. Subdivisions - Buildings with one to four dwelling units each.

1. General Policy (10 lots min.)

- a. The developer will provide as a part of its overall property development a trench system to Company's specifications for the installation of Company's primary and secondary conduits and service conduits to each property (lot) line, and as part of its landscaping requirements will provide and install backfill to Company's specifications in that trench system.
- b. Applicant (Builder/Customer) will pay to Company a fee of \$450.00 per Service for installation of the underground electric Service. Applicant will install riser conduit from trench to meter base including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company provided elbow from trench to meter base. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete with trench and backfill and to connect this conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench will remain the property and responsibility of Applicant (Builder/Customer).
- c. In the case of two or more meters per building, Company will extend a Service for the \$450 fee per Service to a connection point in a junction box or wireway trough provided by Applicant on the source side of the meters at a location approved by Company. Applicant will install riser conduit from trench to connection point in the junction box or wireway trough including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to connection point. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete with trench and backfill and to connect the conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system.

Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer).

2. Exceptions

Fees for the complete underground system owned by Company may be increased to cover added costs required by Applicant due to the following special conditions:

- a. Fewer than 10 lots to be served in a given subdivision or lots which average larger than 1/2 acre;
- b. Unusually rough terrain;
- c. Irregular layout of lots causing excessive circuitry;
- d. Meter at location other than specified by Company;
- e. Service entrance larger than 400 amps;
- f. Replacement of existing overhead facilities with underground;
- g. Voltage requirements other than single-phase, 120/240 volts;
- h. Townhouse/Condominium developments.

B. Subdivisions - Multiple-Occupancy Buildings - Five or more units.

1. General Policy (10 lots min.)

- a. The developer will provide as a part of its overall property development a trench system to Company's specifications for the installation of Company's primary and secondary conduits, and as part of its landscaping requirements will provide and install backfill to Company's specifications in that trench system.
- b. Applicant (Builder/Customer) will pay to Company a fee of \$450.00 per Service for installation of the underground electric Service. Applicant will install riser conduit from trench to meter base including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to meter base. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete with trench and backfill and to connect this conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its

Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer).

c. Installation of service conductors to multiple-occupancy buildings will be made as follows:

- 1) Where a separate meter is provided for each dwelling unit, Company will provide and install an underground service including trenching, conduit, backfill, and cables to the meter base or wireway trough for a fee of \$450.00 per Service. Company will specify the location and grouping of meters on an outside wall readily accessible and readable from the ground. Applicant will install the meter base(s) and any necessary trough wiring to the meter bases. Applicant will install riser conduit from trench to meter base or wireway trough including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to meter base or wireway trough. The Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete with trench and backfill and to connect this conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer).
- 2) In multiple-occupancy buildings where Applicant desires a single meter (and it is allowed by the Commission); Applicant will furnish, install, own, and maintain the trench and backfill, conduit, service conductors, and connectors from the transformer terminals. Company will furnish bolts and attach connectors to transformer terminals. Metering will be at the transformer terminals.

2. Exceptions

Fees for the complete underground system owned by Company may be increased to cover added costs required by Applicant due to the following special conditions:

- a. Unusually rough terrain;
- b. Unusual layout of development and excessive distance between buildings;
- c. Meter(s) at location(s) other than specified by Company;
- d. Replacement of existing overhead facilities with underground;
- e. Voltage requirements other than single-phase, 120/240 volts;
- f. Townhouse/condominium developments;
- g. High-rise or other developments requiring three-phase supply or primary voltage within buildings or vaults.

C. Mobile Home Developments - Underground Primary, Secondary and Services

1. General Policy

- a. Applicant (mobile home park developer-10 lots min.) will provide as a part of its overall property development, acceptable easements and a trench system to Company's specifications for the installation of Company's primary and secondary conduits and service conduits to each property (lot) line. Company will install the complete underground primary and secondary facilities. Applicant will, as part of its landscaping requirements, provide and install backfill to Company's specifications in that trench system. Applicant will pay to Company a fee of \$450.00 per Service for the construction of an underground Service system. Applicant will install riser conduit from trench to a combination meter service and disconnect device (meter pedestal) including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to meter pedestal. Company will, as an option, allow Applicant (developer) to install the service conduit system complete with trench and backfill and to connect this conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (developer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property

- and responsibility of Applicant (developer).
- b. Applicant will furnish and install for each mobile home, at a location mutually agreeable to Company and Applicant, a combination meter service and disconnect device (meter pedestal), the design and installation of which shall be subject to approval by Company, with the following features: (1) 200 amps main line current capacity; (2) a suitable socket for Company's meter mounted at a minimum height of 36"; (3) lugs for attaching Company's Al. service cables; (4) provisions for one, two or three 50 amp plug-in receptacles with associated protective breaker(s) or fuse(s); (5) provisions for attachment of mobile home owner's possible feeder assembly cable and for associated 100 amp, 150 amp or 200 amp main breaker; (6) provision for restriction of unauthorized access to Company's service cable lugs, meter, and meter connections through use of appropriate locks by Company; (7) locking arrangements for Company's use which are entirely separate from any locks or security measures required by Applicant or mobile home owner in connection with receptacles, breakers, feeder assembly cable terminations, etc. located on or within the device.
- c. One or more meter service and disconnect devices shall be rigidly mounted on a support which is acceptable to Company and shall be located and positioned as follows: (1) not more than forty feet from the centerline of Company's easement for the primary and/or secondary systems from which said pedestal, or group of pedestals are served; (2) so as to facilitate access thereto by Company's meter reading and service personnel but not within four feet of the edge of any street, road or driveway or within one foot of any regularly used walkway; (3) so that the mobile home to be supplied by that device may be attached to it by a cable not more than 36.5 feet long. Meter pedestal shall be solidly connected with minimum #6 Cu. to an 8 foot driven ground of either 5/8" copperweld rod or 3/4" galvanized pipe.
- d. Installation by Company of underground electric distribution facilities as set forth in Section I.C.1.a. above is available only to Applicants for (developers of) approved mobile home parks that will provide for semipermanent and nontransient type housing. All mobile homes to be located in said parks shall conform with the latest revised National Electrical Code and particularly are defined in Article 550-2 of the 1987 N.E.C. as

"A factory-assembled structure or structures equipped with the necessary service connections and made so as to be readily movable as a unit or units on its own running gear and designed to be used as a dwelling unit(s) without a permanent foundation". The average centerline-to-centerline spacing of the housing units shall not exceed 50 feet. Any other type of load (residential, commercial, etc.) within the boundaries of a mobile home park that is served with underground electric distribution facilities must be considered separate and distinct from this section and only under other sections of Company's Underground Electric Distribution Extension Policies, as applicable.

2. Exceptions

Fees for the underground system owned by Company may be increased to cover added costs required by the Applicant due to the following special conditions:

- a. fewer than 10 lots to be served in a given development;
- b. average centerline-to-centerline spacing of mobile homes in excess of 50 feet;
- c. distance from centerline of Company's normal easement to meter service and disconnect device in excess of 40 feet;
- d. request for additional service of a different type and/or nature (residential, recreational, commercial, etc.) within the confines of the mobile home park;
- e. unusually rough terrain;
- f. irregular layout of lots;
- g. service entrance larger than 200 amps;
- h. replacement of existing overhead facilities with underground;
- i. voltage requirement other than single-phase, 120/240 volts.

D. Other Residential Housing

1. Townhouse/Condominium Developments

- a. The developer will provide, as a part of its overall property development acceptable easements including a trench system to Company's specifications, for the installation of Company's primary and secondary conduits and service conduits to each property (lot) line. The developer will, as part of its landscaping requirements, provide and install backfill to Company's specifications in that trench system. Applicant (Builder/Customer) will pay to Company a fee of \$450.00 per Service for the installation of an underground Service.

Applicant will install riser conduit from trench to meter base including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete with trench and backfill and to connect this conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer).

- b. Until sufficient operating history can be obtained, all such installations must be evaluated by the Division Engineering Department on an individual basis, considering each application as to size, layout, location, etc., in order to determine if additional fees are needed.

2. High-Rise and Other Unusual Developments

See Section II.B.

3. Residential (NON-Subdivision) Applications

- a. Applicant (Builder/Customer or subsequent owner) with single lot or property will provide, own, install, and maintain trench and backfill along with conduits and transformer pads for the underground primary system in accordance with Company specifications. Applicant will install all conduit including the rigid metal elbow at the bottom of the riser pole. Company will provide, install, own, and maintain complete riser pole conduit. Company will install, own, and maintain the primary cable and transformer(s). For extensions greater than 1000 feet refer to Company Rules and Regulations. In addition, Applicant (Builder/Customer) will pay to Company a fee of \$450.00 per Service for installation of the underground electric Service. Applicant will install riser conduit from trench to meter base including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to meter base. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit

system complete with trench and backfill and to connect this conduit system to Company's conduit facilities. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer). Suitable provision for Company's meter shall be made by Applicant in accordance with Company's general rules.

- b. Applicant (Builder/Customer) with more than 1 lot but less than 10 lots will provide as a part of their overall property development a trench system to Company's specifications for the installation of Company's primary and secondary conduits and service conduit to each property (lot) line and as part of its landscaping requirements will provide and install backfill to Company's specifications in that trench system. Applicant will pay to Company a fee of \$450.00 per Service for installation of the underground electric Service. Applicant will install riser conduit from trench to meter base including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to meter base. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete with trench and backfill and to connect this conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer). In the case of more than one meter per building, Company will extend service for a \$450.00 fee per Service to a connection point in a junction box or wireway trough provided

by Applicant on the source side of the meters at a location approved by Company. Applicant will install riser conduit from trench to connection point in a junction box or wireway trough including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to connection point. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete with trench and backfill and to connect this conduit system to Company's conduit facilities at Applicant's property (lot) line. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer).

c. Exceptions

Fees for the complete underground system owned by Company may be increased to cover added costs required by Applicant due to the following special conditions: lots which average larger than 1/2 acre; unusually rough terrain; irregular layout of lots causing excessive circuitry; meter at location other than specified by Company; service entrance larger than 400 amps; replacement of existing overhead facilities with underground; voltage requirements other than single-phase, 120/240 volts; townhouse/condominium developments.

E. Temporary or Construction Power Requirements

1. General Policy

- a. Applicant will furnish and install all material including support (stub) for meter and service attachment, switch-fuse assembly, grounding, and cable for connecting to transformer. See Standards Drawing No. A-2-12.0.
- b. Company will furnish meter base for installation by Applicant and will connect Applicant's cable to the transformer.

2. Charges

Company will make a charge to Applicant for construction service which includes the connecting and disconnecting of Applicant's cables to and from the pad-mount transformer as set out in the latest rate book revision. Each time Company is called out by Applicant to make either a connect or disconnect but is unable to do so due to lack of readiness by Applicant, a charge may be made in accordance with approved Company practice.

F. Applicant's Responsibilities

1. Pre-Construction Period - When Applicant has complied with the following requirements and given Company not less than 4 months written notice prior to the anticipated date of completion (i.e., ready for occupancy) of the first building in the development or on Applicant's property for non-subdivision customers, Company will have its facilities installed 30 days prior to the estimated completion date (subject to weather, ground conditions, availability of material and barring extraordinary or emergency circumstances beyond the control of Company).
 - a. Applicant (developer/Builder/Customer) shall furnish Company a plat of the development or survey print of the property showing streets and finalized lot lines for application of Company's easement requirements.
 - b. Applicant (developer/Builder/Customer) shall record in the county court clerk's office final plat of the development or provide appropriate easement which has been duly approved by the proper public authority or agency. The plat must show all easements and include a certificate thereon stipulating restrictions and ingress and egress rights to Company for access to its facilities at all times for maintenance and repairs. Any changes in the plat subsequent to Company's approval will be acknowledged to Company in writing, and approval of these changes must be secured from Company before recording the plat. Company may, at its option, require execution of its standard easement form in lieu of recorded plat on which easements are dedicated.
 - c. Applicant (developer/Builder/Customer) shall sign a letter of agreement or contract stating terms and conditions, including identification as to ownership and location of the development, number of lots, deed restrictions as to proper usage, arrangements for property development trenching and landscaping backfill, and the anticipated date of completion.
 - d. Applicant (developer/Builder/Customer) should pay the total Service fees prior to Company starting Service work.

2. Concerning Construction - Applicant will have the following responsibilities:
 - a. Before Company's construction can begin, Applicant will complete installation of sanitary and storm sewers in the construction area, make the area in which the underground distribution facilities are to be located accessible to Company's equipment, remove all obstructions from such area and stake to show property lines and final grade.
 - b. Applicant must establish to within six (6) inches the final grade prior to construction by Company of the conduit and cable routes. At pad-mounted equipment locations, final grade must be established before pads are set.
 - c. Applicant's property development easement trenching and landscaping backfill work must be closely coordinated with Company's schedule to install conduit, etc. for the mutual advantage and benefit of both parties, and must be done in accordance with Company's specifications with final acceptance by Company's inspector.
 - d. Applicant will in all cases be responsible for the restoration of the premises including items such as removal of rock fragments, seeding, sodding, paving, and replacement of plantings.

G. U.G. Service from O.H. Transformer or Secondary

1. General Policy

- a. In the case of a new service connection or the uprating of an existing inadequate service due to enlargement of Applicant's (Builder/Customer) service entrance, Applicant (Builder/Customer) will install meter base(s) at location specified by Company, and will pay to Company a fee of \$450.00 per Service for underground Service from an overhead system. This underground service includes all trenching, conduit, backfill, etc. to be provided by Company. Applicant will install riser conduit from trench to meter base including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to meter base. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete including rigid metal elbow at bottom of pole along with trench and backfill. Company will connect Applicant's conduit system to Company's riser pole conduit facilities. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system.

Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer). Company will provide, install, own, operate, and maintain complete riser pole conduit.

- b. In the case of more than one meter per building, Company will extend service for a \$450.00 fee per Service to a delivery point in a ganged meter base, junction box or wireway trough provided by Applicant (Builder/Customer) on the source side of the meters at a location approved by Company. Applicant will install riser conduit from trench to a delivery point in a ganged meter base, junction box or wireway trough including proper coupling arrangement for Company's conduit elbow or will install riser conduit and Company-provided elbow from trench to the delivery point. Company will, as an option, allow Applicant (Builder/Customer) to install the service conduit system complete, including rigid metal elbow, at bottom of pole along with trench and backfill. Company will connect Applicant's conduit system to Company's riser pole conduit facilities. Applicant (Builder/Customer) will, under this option, pay a base fee of \$40.00 per Service plus \$.20 per foot of Service cable to have Company install, own, operate, and maintain its Service cable system in Applicant-installed conduit system. Company will assume ownership, operation, and maintenance of Applicant-installed service conduit system. Applicant-installed riser conduit above the conduit elbow in the trench, will remain the property and responsibility of Applicant (Builder/Customer). Company will provide, install, own, operate, and maintain complete riser pole conduit.
- c. When an existing overhead service of adequate capacity and maximum 2/OA size is replaced with underground at Applicant's (Builder/Customer) request, a removal cost of \$35.00 in addition to the appropriate service installation fee noted above should be paid when the replacement Service is requested.
- d. No meter may be installed at the source end of underground Service owned by Company.

2. Exceptions

Fees for the complete underground Service owned by Company may be increased to cover added costs required by the Applicant due to the following special conditions:

- a. service entrance larger than 400 amps;
- b. voltage requirements other than single-phase, 120/240 volts;
- c. service length more than 150 feet;
- d. size of conductors beyond practical limits;
- e. other unusual circumstances.

II. Other Underground Service

A. Commercial and Industrial Developments

1. General Policy

It is Company's policy to provide service in the most economical manner. Each Applicant requesting commercial or industrial underground service will be required to provide facilities as set out below. An overhead vs. underground cost estimate is necessary where any of the required individual transformers are less than 300 KVA.

- a. For single meter secondary delivery installations, the following is applicable:

- 1) Applicant will furnish, install, own, and maintain all cables, connectors, conduits, and electric facilities on load side of delivery point, which is considered the transformer secondary terminals. In addition, Applicant will furnish, install, own, and maintain (1) the concrete pad for pad-mount transformer, (2) outside vault, or (3) primary conduits and vaults inside buildings, all in accordance with applicable codes and Company's specifications. Applicant will furnish, install, own, operate, and maintain all of the secondary conduits and primary conduits including the rigid metal elbow at the bottom of the riser pole. Applicant will also provide the trenching and backfilling for primary and secondary conduits outside buildings in accordance with Company specifications. Company will provide, install, own, operate, and maintain complete riser pole conduit. Suitable provision for Company's meter shall be made by Applicant in accordance with Company's general rules and Customer owned services located on source side of Company meter should be appropriately marked to avoid later confusion concerning ownership.

- 2) Company will install, own, and maintain the primary cable and transformer(s). Company will also furnish bolts and attach to the transformer terminals Applicant's service cables with connectors already installed.
- b. When supplying secondary service to multiple-metered buildings, or developments such as shopping centers, any underground portions outside the buildings will be handled as stated in Section II. A.1.a. on page 18, except that delivery point will be at location of the meters, meter banks, junction box or wireway trough, as determined by Company, instead of at the transformer terminals. Where Applicant furnishes trenching, backfilling, and furnishes, owns, and maintains complete conduit runs from the transformer pad to a meter base, junction box or wireway trough, all in accordance with Company's specifications and requirements, Company will provide and install the service cables from the transformer terminals to a meter base, junction box or wireway trough at no charge to Applicant. Company will specify the location and grouping of meters which must be on an outside wall readily accessible and readable from the ground. Company will further specify maximum length of service cable run to reasonable and practical limits commensurate with standard cable sizes and voltage drop limitations.
 - c. If Applicant wishes to have Company install an underground Service from overhead secondary or transformer, Applicant will provide all required trenching and backfilling and will furnish, install, own, and maintain complete conduit system from and including the rigid metal elbow at the bottom of the riser pole to the metering point. Applicant will also provide appropriate mounting for Company's meter and any needed protection for Company's cables, meter and associated metering equipment. Company will provide, install, own, operate, and maintain complete riser pole conduit. Applicant will reimburse Company for the additional costs, if any, of underground facilities in excess of comparable overhead facilities.
 - d. Where Applicant elects to own the primary underground cables and facilities, Company will determine the point of delivery and division of ownership, at which point the primary meter shall be installed.
 - e. All Company-supplied underground cables serving commercial or industrial loads shall be in conduit. All such conduit shall be owned, repaired or replaced by Applicant or subsequent property owner with exception of riser pole conduit.

2. Exceptions

- a. If requested, Company will perform trenching and backfilling, furnish conduits, and transformer pads for Applicant. Company will be reimbursed by Applicant for all costs incurred and Applicant or subsequent property owner will own, repair, and replace as may be required, all such conduits or pads.
- b. High-Rise or other developments requiring extensive distribution of primary voltage throughout the building, as opposed to a single vault in the basement or on the first floor, are excluded from the above policy and require individual consideration. See Section II.B.
- c. Each replacement of existing overhead facilities with underground is also a special case requiring individual consideration. See Section II.C. for determination of reimbursement.

B. High-Rise and Other Unusual Developments

1. General Policy

When the extension of primary voltage throughout the Building is required so as to serve offices, apartments, and other types of users metered individually:

- a. Company generally will install, own, and maintain all primary cables, transformers and meters, whether inside or outside of the building.
- b. The Builder generally will install, own, and maintain all other facilities necessary to accommodate Company's system. These facilities located inside the Building are to be installed in accordance with all applicable codes and Company specifications.

2. Limitations

All such installations must be evaluated by the Division Engineering Department on an individual basis, separately considering each application as to size and type of load, layout of building, location, etc. prior to submission of proposals to Applicant.

C. Replacement of Overhead Facilities with Underground

1. General Policy

Where requests are received by Company to replace small segments of existing overhead facilities with underground, Applicant (Builder/Customer) making such request will reimburse Company for its cost of construction with the amount of said reimbursement to be determined as follows (use work order estimate and Form KU6-34 to include all direct and indirect charges):

- a. the total cost of work to be approved (including new services);
- b. plus the installed cost of transformers and pads;
- c. plus labor cost of removal including services being removed;
- d. plus the maintenance costs including all costs associated with removal and/or transferring of PWO items;
- e. minus total salvage including any services removed which will be salvaged or junked in same manner as other conductor;
- f. minus salvaged equipment including transformers to be salvaged at purchase price less normal work order multiplier;
- g. minus betterments, etc.

This total is the net relocation cost to be paid in full by Applicant prior to beginning work. Work contributions in lieu of cash are acceptable for items such as ditching, backfilling, conduit, transformer pads, etc. at the value used in the estimate.

2. Limitations

Individual, single-phase overhead residential services up to a maximum size of 2/OA should be treated according to Section I.G.1.c. of this Policy.

III. TRANSFORMER CAPACITY LIMITS

Standard capacity of pad-mounted transformers shall be limited to 250 KVA for single-phase and 1000 KVA for three-phase installations requiring 208Y/120 or 240D/120 volt secondary and 3000 KVA for three-phase installations requiring 480Y/277 volt secondary.

IV. INFEASIBLE UNDERGROUND SERVICE

Company is not obligated to supply underground service when, in the judgment of Company, such service would be infeasible, impractical or contrary to good operating or engineering practice.

UNDERGROUND DISTRIBUTION
CONSTRUCTION PRACTICES AND PROCEDURES

I. LOCATION OF FACILITIES

A. Underground Residential Distribution (URD)

It is Company's general construction practice to locate its underground electric Distribution System, including pad-mount transformers, within a private easement or dedicated utility strip along the front, rear or side lot lines as dictated by the most economical means of construction to provide both reliable electric service and future accessibility to underground equipment. Where economically and practically feasible, a loop feed will be established. Care should be taken to not place transformers directly on or facing lot lines which could eventually hamper operation when fences are built. Company reserves the right to require an overhead feeder route through each URD area as system design dictates. This feeder may be placed underground, at Company's discretion, if requested and paid for by Customer.

B. Individual Underground Extension

Underground cables from an existing pole line, and associated above ground equipment, such as pad-mount transformers, new riser poles, necessary pole line extensions, etc., will be routed and located in the most direct, economical, and practical manner.

C. Transformers and Similar Equipment

1. Installation of equipment will be in accordance with all applicable codes and Company specifications. If pad-mounted oil-filled equipment is located adjacent to a Building, only solid, nonflammable walls without windows and doorways are allowed in the vicinity of the equipment. Doors of pad-mounted equipment must not be faced toward existing or anticipated walls or other permanent obstructions. Sufficient working area should be provided and maintained as follows: ten (10) foot minimum clearance in front of equipment doors and six (6) foot minimum clearance on the sides. The back of pad-mounted equipment should have the following minimum clearances to a Building wall(s) as directed by the State Fire Marshall: three (3) foot for transformers 75 KVA and less; fifteen (15) foot for transformers 76 thru 500 KVA; and twenty-five (25) foot for transformers 501 KVA and larger. In order to limit transmission of noise and vibration, concrete equipment pads should not be poured as part of the Building foundation or attached to it. In subdivision and residential areas, cables, transformers, and other devices should not be installed closer than one foot to a property line.

2. Pad-mounted equipment shall be located and positioned so as to afford maximum ventilation. In order to protect equipment from vehicular traffic and other moving objects, Applicant will provide appropriate guards or barriers as specified by Company.
3. Company accessibility for operation, maintenance, repair, and/or replacement must be assured by Applicant (Builder/Customer) at all times.

D. Metering

Meters shall not be installed within or attached to pad-mounted transformers, but shall normally be placed on Applicant's (Builder/Customer) Building at the point of service entrance. In some cases, metering transformers may be installed within the secondary compartment of the pad-mounted unit with the meter mounted on a separate support near the transformer. Residential meters are to be installed on outside of Building. All other meters should also be installed on outside of Building.

II. EASEMENTS AND ACCESS RIGHTS

Applicant must grant an adequate easement to Company for the installation, operation, and maintenance of all electrical facilities, including riser poles, cable runs for primaries, secondaries, secondary power pedestals, switchgear, and transformers including pads and/or vaults. Easements must grant Company ingress and egress rights to its facilities at all times for operation, maintenance, repair, and replacement and must be duly recorded in the proper county clerk's office. In lieu of signed easements for subdivision developments, a recorded final plat showing dedicated utility strips, with certificate of specified necessary rights, will be acceptable. Width of primary and secondary easements shall be a minimum of 20 feet and width of lighting easement shall be a minimum of 10 feet (may be split between adjacent properties). No structures, walls or obstacles are to be so located as to interfere with Company's ability to operate, repair, replace or maintain its facilities.

III. CONSTRUCTION PROCEDURES

For URD or general subdivision development, a final plat or appropriate document must have been submitted to and approved by the proper public agency. This plat should show final street and lot lines and easements or utility strips with certificate of utilities' rights. At the site, all lot lines along the main trenches should be accurately staked, and grade must be within six inches of final before construction starts. Company will furnish, deliver, and install on the development site all of the electrical primary, secondary, and Service facilities (except where Applicant chooses option to provide service conduit) including primary cables, secondary cables, Service cables, conduits, transformers, switches, pedestals, connection points, meters, etc. Applicant will provide all primary and secondary development trenching, and landscaping backfill for

Company's cables. Trenching shall be performed in a manner to allow the initial continuous installation of all main cables which may, in certain circumstances, start at different points. Constant care must be taken at all times during installation of cables to detect and prevent deformities and damage to insulation.

IV. STREET LIGHTING

Installation of a compatible lighting system, after all other underground facilities have been installed, roads paved, lawns seeded, and homes occupied, is usually a difficult and costly operation. Recognition of this problem initially, by preparing a preliminary lighting layout, will provide a basis for agreement between the City or developer and Company as to location and type of lighting desired for the underground system layout and design.

V. UNDERGROUND SYSTEM PROTECTION

Primary underground cables will be protected at the riser pole by a loadbreak (distinguishable by arc chute) cutout with a proper size fuse link and an overhead distribution class lightning arrester of the proper KV rating. All single-phase pad-mount transformers and all three-phase pad-mount transformers 500 KVA and below are purchased with weak link (protection against internal faults) and bayonet (protection against secondary external faults) fusing. Three-phase pad-mount transformers 750 KVA and larger are normally purchased with no fusing and are fused only at the riser pole. Dead-front MOV lightning arresters of the proper KV rating will be used at the normally open point of a looped underground system as follows: The source cable(s) feeding the transformer at the open point is/are protected by a "dead-front elbow" MOV arrester which is plugged onto the H2 primary bushing of the single-phase transformer or the H₁B primary bushings of the three-phase transformer as appropriate. The unloaded tie section of cable(s) should be kept energized and stood off on one bushing of a two-bushing portable feedthru. The tie cable(s) is/are then protected by utilizing a "dead-front elbow" MOV arrester on the remaining bushing of the portable feedthru. The feedthru(s) is/are mounted on a standoff bracket(s). Any unused primary bushings should always be capped off with a grounded insulated cap (Caution - Do not confuse a grounded insulated cap with a dust cover).

VI. JOINT CONSTRUCTION WITH TELEPHONE COMPANY/CABLE TV COMPANY

When it is considered mutually advantageous for the telephone, cable TV, and electric cables to occupy the same trench, special consideration must be given to the close coordination of this underground construction for minimum installed costs. Normally, 12 inches of horizontal or vertical separation is desired between telephone, cable TV, and electric cables; however, other variations of joint use may be worked out for the particular job by mutual agreement between the utilities provided there is no conflict with any pertinent code or regulatory commission rules and regulations. All utilities must agree to this type construction prior to installation.

VII. TEMPORARY OR CONSTRUCTION SERVICE

Temporary service can be made available for construction or other purposes at the established charge. See Standards Drawing No. A-2-12.0. Applicant (Builder/Customer) will provide the service support and sufficient cable to reach the transformer secondary terminals. Company will connect the cable to the transformer and provide the meter and base.

VIII. MAPS AND RECORDS

Accurate records and maps must be maintained of all easements and facilities as finally installed. Details of construction must include the length, size, and type of conductor, type of insulation, manufacturer, and location of all cables. Location, size, type, and manufacturer of all transformers, location of all primary sectionalizing points, and secondary pedestals or junction points must be shown. Proximity and crossings of other cables, pipes, and obstructions should be noted.

IX. MARKING CABLE LOCATIONS

Dig-ins are a serious problem in the operation of any underground system, and repairs are costly. Temporary flags and other appropriate markers should be used freely during the course of installation and area development.

X. URD SAFETY CONSIDERATIONS

The URD type of installation is quite different from an overhead system. Generally, it will be worked by crews who are more experienced on overhead systems. Equipment is different and clearances are much closer on URD systems. Types of terminations, switching, and protective devices vary widely among manufacturers, and changes in designs are frequent. The worker stands, kneels or lies directly on the ground or grounded surface. There are many dangers on both URD and overhead, but the exposure on a URD system is usually greater. Some exposures to which the worker must always be alert are:

- A. electric shock, especially from low voltage;
- B. insect bites and stings;
- C. snakes and varmints;
- D. allergies, such as poison oak and ivy;
- E. chemicals and gases in ditches and manholes;
- F. burns and explosions in confined areas;
- G. accidents from falls in open ditches, obstructions under foot, etc.;
- H. loop feeds.

Safety Rules - Strict compliance with Company's safety rules for operation and maintenance of U.G. and URD systems and OSHA Standards is required under all conditions. See Safety Rule Book Part III - Section 2, Pages 94 through 99 and Section 3, Pages 100 through 105 or latest revision. Also, see OSHA Standards 1926.950, 1926.954, and 1926.956 or latest revision.

Underground Policy Summary

Type of Service
