LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2016-00371

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 1

Responding Witness: William S. Seelye / John P. Malloy / Robert M. Conroy

Q-1. Regarding the AMS Program please respond:

- a. Please provide the average rate class cost increase per customer (bill impact) of the employing AMS (smart) meters.
- b. Will the added cost be fully recovered in the customer charge? If not, please explain.
- c. Please provide the installed cost of an AMS meter for a typical 3-phase school (50 to 1000 KW) account(s).
- d. With the installation of the AMS meters how will the billing usage data be retrieved and processed differently from existing procedures.
- e. Are the existing smart meters in place under the DSM-EE (Enernoc) Program functionally equivalent to the proposed AMS meters? If not, please explain in detail the differences.
- f. Please confirm that the employment of the AMS meters will permit coincident demand billing. If not, please explain.
- g. With full employment of the AMS meters in a rate class does the Company plan to implement coincident demand billing. If not, please explain.
- h. Please provide a detail explanation of how the cost of the AMS meters is allocated or assigned to rate case in Mr. Seelye's cost of service studies.
- i. Please provide the Company's schedule for installing the AMS meters by rate class.
- j. Does the Company believe public schools subject to KRS 160.325 are better positioned currently to derive the benefits described by Mr. Malloy in his testimony than residential and other commercial customers of similar size?

- k. Will the Company commit to install the AMS meters first on public school accounts to facilitate the intent of the General Assembly codified in KRS 160.325.

A-1.

- a. The Company has not performed the requested analysis.
- b. Yes. Meter costs are customer related costs allocated to customer charges in the cost of service. See also the response to KIUC 1-84.
- c. Company estimates an installed cost for the described 3-phase service to be \$262. This cost includes the unit price of the meter as well as labor to install it but it does not include the corresponding infrastructure required to enable its functionality or the back-office overhead to schedule and manage the installation.
- d. Today the billing register value is retrieved manually by a meter reader on a monthly basis. In most cases this involves manually keying the register reading into a handheld device that captures the information and communicates it back to the Company billing system to be processed and validated before ultimately being billed to the corresponding customer. With AMS, meters will remotely communicate register readings over the air on a daily basis. When a customer's billing window occurs the proposed Meter Data Management System (MDMS) will pass the billing read to existing billing system at which point it will process the bill for the customer.

In addition to the billing reads the AMS meters will also communicate interval usage information; better informing customers of their usage patterns.

- e. The DSM-EE (Enernoc) Program is not functionally equivalent to the proposed AMS meters. The DSM-EE Program mentioned is a demand response offering for large commercial customers. The offering does not utilize "smart meters" with remote communications, rather the electronic meters have pulse outputs from the electric meter which feed an energy management system that features a host of functionality including automated load management reductions not included with AMS.
- f. Confirmed.
- g. The Company does not presently have a plan to implement such billing upon full deployment of AMS. Implementing such billing could only occur following Commission approval in a base-rate case; the Company has not proposed such billing in this proceeding. However, with the implementation of AMS, the Company does plan to evaluate other rate alternatives.

- h. See the response to KIUC 1-84.
- i. The Company has not developed a schedule for installing the AMS meters by rate class, rather the deployment will be done geographically as AMS communications infrastructure allows. See Section 8.1 of Exhibit JPM-1 for Company's proposed deployment schedule.
- j. The Company believes all customers are positioned to derive benefits described by Mr. Malloy in his testimony.
- k. At page 30 of his testimony, Mr. Malloy states: "Customers who desire to have an AMS meter installed ahead of the full deployment schedule for their area will be able to contact the Companies and request an accelerated installation, which requests the Companies will accommodate to the extent reasonable and feasible." Therefore, although the Company cannot commit to install AMS meters at public schools before installing them anywhere else, the Company will, to the extent reasonable and feasible, accommodate the requests of individual schools to accelerate AMS deployment to those schools.

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 2

Responding Witness: Robert M. Conroy

- Q-2. With regard to Mr. Conroy's testimony at page 20 please list or describe the types of situations he envisions would not be metered. Please describe any such situation that are currently not metered?
- A-2. See the response to PSC 2-74.

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 3

Responding Witness: John P. Malloy

- Q-3. Please confirm the Company will continue the demand response (ENERNOC) program.
- A-3. The Company confirms that it will continue the commercial demand response program (ENERNOC) through December 2018 when all DSM programing approval ends.

Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 4

Responding Witness: Robert M. Conroy

- Q-4. When does the Company expect to convert non-demand rates to a time-of -day structure?
- A-4. The Company continues to review options for rate design and has not at this time made a determination what types of rate structure will be offered in the future. See also the response to AG 1-383.

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 5

Responding Witness: Robert M. Conroy

- Q-5. Has the Company considered upon installation of the AMS meters converting to conjugative meter reading and billing for single sites where there are multiple metering points?
- A-5. This response assumes the request was about converting to conjunctive meter reading and billing.

No, LG&E has not considered installing conjunctive meters and billing for any single customer site, but has studied conjunctive demand billing. The Company does not object to conjunctive metering as long as it is implemented in a cost-based and equitable manner and as long as customers under a properly designed system reimburse the Company for any additional metering, billing, and other administrative costs involved in providing the service. This type of setup will also require a properly structured conjunctive demand rate that would consist of a distribution and transmission demand charge that would be applied to the customer's maximum demand at each delivery point and production demand charge that would be applied to the customer's demand determined either on an aggregated or individual customer basis at the time of the Company's system peak.

Question No. 6

Responding Witness: William S. Seelye

- Q-6. Please provide the Company's billing analysis used to conclude implementing a 100% base demand ratchet in Rate Schedules TODS and TODP is revenue neutral to the company.
- A-6. See Schedule M-2.3-E of Section 16(8)(m) of the Filing Requirements.

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 7

Responding Witness: William S. Seelye

- Q-7. What consideration did the Company give to the impact on existing Rate TOD customers from increasing the base demand ratchet to 100% and provide any analysis performed to determine the impact on existing customers?
- A-7. See the responses to PSC 2-95 and KIUC 1-94.

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 8

Responding Witness: William S. Seelye

- Q-8. Provide copies of the rate schedules Mr. Seelye lists in his testimony at pages 29 and 30 where ratchets apply.
- A-8. The Company is proposing a 100% ratchet to Rates TODS, TODP, RTS and FLS. The rate schedules are shown in Schedule 16(1)(b)(3) and Schedule 16(1)(b)(4) of the Company's Filing Requirements.

CASE NO. 2016-00371

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 9

Responding Witness: Robert M. Conroy / William S. Seelye

- Q-9. Does the Company agree that a KW charge penalizes customers when applied to a NCP compared to a class or system CP?
- A-9. A kW charge applied to an NCP demand does not automatically penalize a customer compared to a kW charge applied to a class or system CP demand. The relative billings between the two scenarios will depend on the individual customer's load characteristics. Additionally, it would not be appropriate to recover the costs associated with transmission and distribution plant through a CP demand charge. Those assets are not sized based on system CP demands. With the implementation of AMS, the Company will be exploring the use of multi-part rates that could include a combination CP and NCP demand charges or time-differentiated demand charges for customers currently taking service under Rates PS. However, no determinations on future rate designs have been made at this time. See response to PSC 2-92(b)(1).

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 11

Responding Witness: William S. Seelye

- Q-11. Please clarify what Mr. Seelye at page 56 of his testimony is referring to as the LED “fixture”.
- A-11. A “fixture” is the lighting component of the street or security light as distinguished from the pole on which the fixture is attached. It typically includes the housing for the light, the bulb, the ballast or control regulator, the photo cell, and sometimes a diffuser or an arm.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2016-00371

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 12

Responding Witness: John P. Malloy

Q-12. Please describe the process for a customer to convert existing lights to LED and possible costs for such conversions?

A-12. The process is initiated by the customer contacting the Company to inquire about converting existing lights to LED. The Company will review the customer's request to determine if customer has met their contractual obligation and the terms and conditions of the applicable tariff (see below). If the customer has not met these obligations, a lump sum fee will be charged. Customers deciding to convert their lights will be contacted by a Company representative to identify lights to be converted and plan the conversion.

Standard Rates: Lighting Service and Restricted Lighting Service

TERM OF CONTRACT

For a fixed term of not less than five (5) years and for such time thereafter until terminated by either party giving thirty (30) days prior written notice to the other when additional facilities are required. Cancellation by Customer prior to the initial five-year term will require Customer to pay to Company a lump sum equal to the monthly charge times the number of months remaining on the original five (5) year term.

Standard Rate: Lighting Service

TERMS AND CONDITIONS

6. If Customer requests the removal of an existing lighting system, including, but not limited to, fixtures, poles, or other supporting facilities that were in service less than twenty years, and requests installation of replacement lighting within 5 years of removal, Customer agrees to pay to Company its cost of labor to install the replacement facilities.

Question No. 13

Responding Witness: Robert M. Conroy / William S. Seelye

- Q-13. With the rapid decline being experienced in the cost of LED fixtures as suppliers respond to market conditions of increased suppliers and users please explain how the Company will adjust the proposed rates to reflect the cost reductions.
- A-13. The Company will continue to monitor the cost of LED lights, just as it does all lighting types, and take any changes in costs into account in future rate case filings.

**Response to First Request for Information of
Kentucky School Boards Association (KSBA)
Dated January 11, 2017**

Question No. 14

Responding Witness: John K. Wolfe / William S. Seelye

- Q-14. Does the Company concur that LED maintenance costs are less than existing HPS, Mercury Vapor and Metal Halide technologies? If so, please explain how this is recognized in the proposed rate design. If not, please explain.
- A-14. No. The rates for lighting applications include the carrying charges, distribution energy costs, and operation and maintenance expenses. The current maintenance cost included in the majority of the LED rate codes exceeds the maintenance cost included in the rate codes of the HPS, Mercury Vapor, and Metal Halide lights.

Question No. 25

Responding Witness: Daniel K. Arbough / Counsel

Q-25. Please provide the Company's current estimate of expected amount and percentage revenues increases to be passed through the ECR, DSM and FAC mechanisms for the next five years.

A-25. See the Company's objection filed on January 20, 2017. Without waiver of the objection, for the purpose of establishing base rates in this proceeding, the effects of the mechanisms are removed from the determination of the revenue requirement in this proceeding. For the five-year business plan, the Company does not calculate the ECR, DSM and FAC mechanism revenues by rate schedule in the detailed manner that occurs with the determination of the actual monthly billing factor. The business plan contains a projection of the revenue requirement for each of the mechanisms in total for the Company. The table below represents the revenue projections for ECR, DSM and FAC. Four years of projections have been provided consistent with the filing requirement Section 16(8)(k), which provides revenue projections through 2020.

	2017	2018	2019	2020
ECR Revenue	\$ 73,877,667	\$ 98,230,276	\$110,337,482	\$120,874,607
ECR Percentage Change		33.0%	12.3%	9.5%
DSM Revenue - Electric	\$ 20,373,783	\$ 20,360,383	\$ 19,997,760	\$ 21,562,479
DSM Percentage Change - Electric		-0.1%	-1.8%	7.8%
DSM Revenue - Gas	\$ 4,676,840	\$ 5,929,461	\$ 6,175,185	\$ 7,137,312
DSM Percentage Change - Gas		26.8%	4.1%	15.6%
FAC Revenue	\$ (39,632,088)	\$ (44,976,480)	\$ (44,800,017)	\$ (43,558,146)
FAC Percentage Change		-13.5%	0.4%	2.8%

Question No. 26

Responding Witness: Daniel K. Arbough

Q-26. With regard to Garrett Schedule D-1 page 7 of 8 line 124:

- a. What function will the employees who were charging time to capital projects perform going forward?
- b. Provide the dollar amount for these employees included in the adjustment.

A-26.

- a. One of the largest uses of Capital Labor in the Information Technology department in 2017 will be the SAP Upgrade project, which is expected to conclude in 2017. The IT employees who are no longer charging Capital will be performing system support, ongoing operational maintenance and small enhancements needed as a result of the SAP project and other Capital investments in the recent years.
- b. See the response to PSC 2-23(a) and PSC 2-30(a).

Question No. 28

Responding Witness: David S. Sinclair / Daniel K. Arbough

Q-28. With regard to Garrett Schedule D-1 page 1 please explain the decrease in commercial bill determinants and the decrease for each rate class.

A-28. The decrease in LG&E commercial billing determinants is primarily due to lower projected demand volumes for these customers as described in Mr. Sinclair's direct testimony and lower projected fuel revenues. In addition, see Exhibit DSS-1, which provides a comparison of LG&E electric customers, billing demand, and energy by rate classes for the base period versus the test period. The table below indicates how the decrease was determined. It highlights the lower demand revenues and other items, which essentially offset one another.

Responding Witness: Christopher M. Garrett

- Q-29. With regard to Garrett Schedule D-1 page 3 (LGE pages 3-4) lines 51 and 61 please provide the amounts not offset by the FAC pro forma adjustment.
- A-29. The entire variance in line 51 is offset by the FAC pro forma adjustment. The amount not offset in line 61 by the FAC pro forma adjustment is \$2,841,095 attributable to purchase power demand costs.

Question No. 30

Responding Witness: Lonnie E. Bellar

Q-30. With regard to Garrett Schedule D-1 please provide a reconciliation of all accounting reclassifications such as shown on page 3 line 53.

A-30. The adjustments to the base period shown on schedule D-1 are not considered accounting reclassifications. In regards to line 53, the description is referencing a misallocation in the forecasted test year in which costs related to the jointly owned Cane Run 7 unit were allocated to the affiliate company on an incorrect FERC account basis. The costs in total were correctly allocated to Louisville Gas and Electric Company. The table below shows all the misallocations by FERC account related to Cane Run 7 that show a zero impact on the utility in total.

FERC	Adjustments to base period	Description

Question No. 31

Responding Witness: Lonnie E. Bellar

- Q-31. With regard to Garrett Schedule D-1 Page 4 Line 73 please explain and provide calculations quantifying the “depancaking” adjustment.
- A-31. Depancaking expenses are related to the 2006 settlement agreement in which the Company withdrew from the Midcontinent ISO (“MISO”) and as a result is required, for certain customers, (1) to forgive transmission charges for energy sales by those customers into MISO and (2) to provide credits for MISO transmission charges for energy purchases by those customers from MISO.

Below is the calculation of the depancaking adjustment:

\$'s	Base	Test	Adjustment
LG&E			
KMPA	\$2,364,734	\$2,279,496	-\$85,238
OMU	\$782,176	\$874,290	\$92,114
Former Municipals	\$58,388	\$365,019	\$306,631
