Where a customer-generator supplies all or part of the customer-generator's own load and desires Company to provide service for that load, the customer-generator must contract for such service, otherwise Company has no obligation to supply the non-firm service.

Terms and Conditions – Residential Rate Specific Terms and Conditions

Power Requirement

Current

Single-phase power service used for domestic purposes will be permitted under Residential Rate

RS when measured through the residential meter subject to the conditions set forth below:

Proposed

Single-phase power service used for domestic purposes will be permitted under Residential Rates RS, RTOD-Energy, and RTOD-Demand when measured through the residential meter subject to the conditions set forth below:

Terms and Conditions – Billing

Meter Readings and Bills

Proposed

As used in the entirety of this Tariff, "meter reading" and similar terms shall include data collected remotely from automated meter reading, automated meter infrastructure, advanced metering systems, and other electronic meter equipment or systems capable of delivering usage data to Company. A physical, manual reading of a meter is not required to constitute a "meter reading."

Terms and Conditions – Discontinuance of Service

Current

For fraudulent or illegal use of service. When Company discovers evidence that by fraudulent or illegal means Customer has obtained unauthorized service or has diverted the service for unauthorized use or has obtained service without same being properly measured, the service to Customer may be discontinued without notice. Within twenty-four (24) hours after such termination, Company shall send written notification to Customer of the reasons for such discontinuance of service and of Customer's right to challenge the termination by filing a formal complaint with the Public Service Commission of Kentucky. Company's right of termination is separate from and in addition to any other legal remedies which the utility may pursue for illegal use or theft of service. Company shall not be required to restore service until Customer has complied with all rules of Company and regulations of the Commission and Company has been reimbursed for the estimated amount of the service rendered and the cost to Company incurred by reason of the fraudulent use.

Proposed

For fraudulent or illegal use of service. When Company discovers evidence that by fraudulent or illegal means Customer has obtained unauthorized service or has diverted the service for unauthorized use or has obtained service without same being properly measured, the service to Customer may be discontinued without notice. Within twenty-four (24) hours after such termination, Company shall send written notification to Customer of the reasons for such discontinuance of service and of Customer's right to challenge the termination by filing a formal complaint with the Public Service Commission of Kentucky. Company's right of termination is separate from and in addition to any other legal remedies which the utility may pursue for illegal use or theft of service. Company shall not be required to restore service until Customer has complied with all rules of Company and regulations of the Commission and Company has been reimbursed for the estimated amount of the service rendered, and assessment of the charges under the Unauthorized Reconnection Charge provision of Special Charges, incurred by reason of the fraudulent use.

Adding Gas Supply Clause

Availability of Service

Current

Available, in accordance with the provisions of KRS 278.172, to any volunteer fire department qualifying for aid under KRS 95A.262. Service under this rate schedule is at the option of the customer with the customer determining whether service will be provided under this schedule or any other schedule applicable to this load. If an additional separate point of delivery is requested by a volunteer fire department qualifying for aid under KRS 95A.262 to provide gas for use in standby electric generation, customer shall be served under Standard Rate DGGS.

Proposed

Available, in accordance with the provisions of KRS 278.172, to any volunteer fire department qualifying for aid under KRS 95A.262. Service under this rate schedule is at the option of the customer with the customer determining whether service will be provided under this schedule or any other schedule applicable to this load. If an additional separate point of delivery is requested by a volunteer fire department qualifying for aid under KRS 95A.262 to provide gas for use in standby electric generation, customer shall be served under Standard Rate DGGS.

All existing and future installations of equipment for the purpose of providing gas for use in standby electric generation or personal vehicle fueling shall be reported by the Customer (or the Customer's Representative) to the Company in conjunction with the "Notice to Company of Changes in Customer's Load" set out in the Customer Responsibilities section of the Company's Terms and Conditions. Additionally, service for gas for use in standby electric generation and personal vehicle fueling shall be subject to the availability of adequate capacity on Company's gas system to perform such service without detriment to its other Customers.

Firm Commercial Gas Service - Rate CGS

	Current	Proposed
Basic Service Charge per delivery point per month if all of the customer's meters have a capacity < 5000 cf/hr:	$ 40.00	$ 60.00

Availability of Service

Current

This rate schedule is designed to make available to commercial and industrial customers quantities of natural gas that Company may from time to time have available for sale without impairment of service to customers served under other higher priority rate schedules, and which can be supplied from Company's existing distribution system, subject to the special conditions hereinafter set forth.

Proposed

This rate schedule is designed to make available to commercial and industrial customers quantities of natural gas that Company may from time to time have available for sale without impairment of service to customers served under other higher priority rate schedules, and which can be supplied from Company's existing distribution system, subject to the provisions of this rate schedule.

Special Terms and Conditions

Added the following: Service under this rate schedule will be furnished under Company's Terms and Conditions applicable hereto, to the extent that such Terms and Conditions are not in conflict, nor inconsistent, with the specific provisions hereof.

Terms and Conditions

Removed this section.

PROPOSED NEW STANDARD RATE SGSS
Substitute Gas Sales Service

Applicability: Required for any commercial or industrial customer (as defined in Rates CGS and IGS) physically connected to the facilities of any other provider (including the Customer itself) of natural gas or other gaseous fuels. If such Customer desires to continue to receive natural gas service from Company and/or declines to allow Company to remove Company's facilities previously used to provide natural gas service to Customer, then Customer shall be obligated to take service under Rate SGSS.
Company shall not be obligated to make modifications or additions to its gas system to serve loads under this rate schedule. Company may decline to serve customers using gas to generate electricity in standby or other applications under this rate schedule.

Proposed Rates
For commercial customers, the following charges shall apply:

Basic Service Charge per month:	$285.00 per delivery point
Plus a Demand Charge:	$6.27 per Mcf of Monthly Billing Demand
Plus a Distribution Charge:	$0.3767 per Mcf delivered

For industrial customers, the following charges shall apply:

Basic Service Charge per month:	$750.00 per delivery point
Plus a Demand Charge:	$10.90 per Mcf of Monthly Billing Demand
Plus a Distribution Charge:	$0.2992 per Mcf delivered

Monthly Billing Demand is the greater of (1) the Maximum Daily Quantity ("MDQ"), or (2) the highest daily volume of gas delivered during the current month or the previous eleven (11) monthly billing periods. MDQ is the quantity of firm daily gas Company is obligated to provide; all service in excess of MDQ is interruptible. Customer and Company may agree on MDQ; absent agreement, MDQ is the highest daily volume used by Customer during the twelve (12) months prior to the date that Customer began receiving natural gas from another supplier with which Customer is physically connected; if that is not available, MDQ is the Customer's average daily use for the highest month's gas use in the twelve (12) months prior to the date that Customer began receiving natural gas from another supplier with which Customer is physically connected; MDQ cannot exceed 5,000 Mcf/day. The maximum hourly volume that Company shall be obligated to deliver to Customer shall not exceed 1/16th of MDQ.

Minimum Bill: All charges under the rate schedule, including, but not limited to, the basic service charge, the monthly demand charge, any volumetric charges, and any adjustment clauses.

Customer responsible for costs of necessary facilities: Customer will need to provide at its own expense or reimburse Company for certain facilities described in the proposed tariff sheets, including remote metering equipment and the cost of its installation, backflow protection devices and/or flow control equipment as may be required in sole discretion of Company, any modifications of Customer's piping in order to facilitate the installation and operation of such remote metering or other facilities determined to be necessary by Company, and any electric and telephone service needed for remote metering.

Contract Required for Service: Service under Rate SGSS may require a written contract between Customer and Company setting forth specific arrangements. The minimum term for service shall be for a period of one (1) year, but Company may require that a contract be executed for a longer initial term when deemed necessary.

Numerous conforming text changes have been made throughout the tariff by inserting SGSS in sections including Demand Side Management Adjustment Clause and Terms and Conditions.

Firm Transportation Service (Transportation Only) Rate FT

	Current	Proposed
Administrative Charge per delivery point per month:	$550.00	$550.00
Distribution Charge Per Mcf	$ 0.4302	$ 0.4428
Utilization Charges for		
Daily Imbalances:		
Daily Demand Charge	$ 0.1608	$ 0.1608
Daily Storage Charge	0.1833	0.2785
Utilization Charge Per Mcf	$ 0.3441	$ 0.4393

Availability of Service

Current

Transportation service hereunder will be subject to the terms and conditions herein set forth and to the availability of adequate capacity on Company's system to perform such service without detriment to its other customers.

Proposed

Transportation service hereunder will be subject to the provisions herein set forth and to the availability of adequate capacity on Company's system to perform such service without detriment to its other customers.

Adjustment Clauses

Adding Gas Line Tracker

Special Terms and Conditions

Added the following:

1. Service under this rate schedule will be furnished under Company's Terms and Conditions applicable hereto, to the extent that such Terms and Conditions are not in conflict, nor inconsistent, with the specific provisions hereof. 4. The maximum hourly volume that the Company shall be obligated to deliver shall not exceed $1/24^{th}$ of the MDQ. 10. Customer shall enter into a Website Subscriber Agreement if Customer desires to access telemetry data.

Terms and Conditions

PROPOSED NEW STANDARD RATE LGDS
Local Gas Delivery Service

Applicability: Available to any party contracting with Company to provide firm transportation service of local gas (including landfill gas, bio-gas, synthetic gas, and locally produced natural gas). Customer shall request Company to utilize its system to transport, by displacement, such local gas to the Delivery Point. Company shall not be required to install any facilities of any kind to serve a Customer under Rate LGDS, but may do so at Customer's expense. Company shall not be obligated to extend its mains to facilitate service. Company's "Gas Main Extension Rules" shall not apply to Rate LGDS.

Company and Customer shall enter into an Interconnect Facility Agreement covering matters related to the Interconnect Facility, including, but not limited to, any cost reimbursement provisions. Company shall own and operate the Interconnect Facility, such Interconnect Facility being designed and constructed according to Company's specifications. Company shall own and install facilities downstream of the Interconnect Facility required to connect the Interconnect Facility to Company's mainline gas system. Company shall be reimbursed by Customer for the costs of such downstream facilities and their installation as well as the costs to construct, operate, and maintain the Interconnect Facility. Customer may be required by Company to provide adequate surety to cover the costs incurred by Company related to either the Interconnect Facility or the related downstream facilities. The outlet of the Interconnect Facility shall be the Receipt Point.

Customer must warrant that all gas transported under Rate LGDS shall be consumed within the Commonwealth of Kentucky. Absent that warrant, Company's transportation service shall be deemed interstate service and may only be provided pursuant to authorization from the Federal Energy Regulatory Commission ("FERC") and subject to the terms and conditions of Company's Statement of Operating Conditions as filed with FERC. Customer shall not be allowed to combine interstate services with intrastate services. Only one service, either interstate service or intrastate service, shall apply to a Receipt Point.

Character of Service: Transportation service under Rate LGDS is firm from the Receipt Point to the Delivery Point. The Delivery Point shall be a pool operating under either Rider PS-TS-2 or Rider PS-FT. Company's sole obligation hereunder is to redeliver Customer's gas from the Receipt Point to the Delivery Point. Company will provide service to meet imbalances only on an as-available basis.

Company shall not be obligated to deliver gas to the Delivery Point in excess of the Maximum Daily Quantity ("MDQ"). Customer and Company shall mutually agree to establish the level of the MDQ; provided, however, that the MDQ shall not be less than 50 Mcf/day. Company's obligation to provide firm natural gas transportation service shall be limited to the MDQ.

Proposed Rates

Administrative Charge per month: $550.00 per Receipt Point

Plus a Basic Service Charge per month: $1,310.00 per Receipt Point

Plus a Demand Charge: $2.57 per Mcf of Monthly Billing Demand

Plus a Distribution Charge: $0.0388 per Mcf of Net Nominated Volumes at the Delivery Point

The Monthly Billing Demand shall be the greater of (1) the MDQ, or (2) the highest daily volume of gas delivered to the Delivery Point during the current month or the previous eleven (11) monthly billing periods.

MDQ, Nominations, and Nominated Volumes: The MDQ shall represent the maximum volume which Customer shall be entitled to nominate and Company shall be obligated to deliver to the Delivery Point.

As further described below, Customer shall specify to Company the daily volumes of gas to be received at the Receipt Point (the "Gross Nominated Volume"). From such Gross Nominated Volume shall be deducted an allowance for Company's system average LAUFG expressed as a percentage and based on historical levels. Effective November 1, 2016, such LAUFG percentage is 2.69%. Such LAUFG percentage shall be revised annually each November 1 with notice provided to Customer at least thirty (30) days prior to such November 1.

Local Gas Flow Orders: Company shall have the right to issue a Local Gas Flow Order ("LGFO"). Customer shall be responsible for complying with the directives contained in the LGFO. Unauthorized under-deliveries or over-deliveries during the effectiveness of an LGFO shall be subject to an LGFO Charge per Mcf for each Mcf of unauthorized under-deliveries or over-deliveries, as applicable. Customer shall be subject to the LGFO Charge on the day for which the LGFO was violated, plus the applicable Utilization Charge for Daily Imbalances ("UCDI") charges and any other charges under Rate LGDS for such unauthorized under-deliveries or over-deliveries that occur. The LGFO Charge per Mcf shall be equal to $15.00 plus the higher of either (a) the daily mid-point price posted in "Platts Gas Daily" for Texas Gas Zone 1 adjusted for Fuel Retention applicable to deliveries to Zone 4 under Texas Gas Transmission, LLC's Rate NNS plus the Commodity Charge and any surcharges applicable to deliveries to Zone 4 under Texas Gas Transmission, LLC's Rate NNS for the day on which the LGFO was violated, or (b) the daily mid-point price posted in "Platts Gas Daily" for Lebanon-Hub adjusted for Fuel Retention applicable to deliveries to Zone 4 under Texas Gas Transmission, LLC's Rate NNS plus the Commodity Charge and any surcharges applicable to deliveries to Zone 4 under Texas Gas Transmission, LLC's Rate NNS for the day on which the LGFO was violated. Such LGFO Charge shall be in addition to any other charges under Rate LGDS.

Imbalances: Company shall calculate on a daily and monthly basis Customer's imbalance resulting from the difference between Customer's Gross Nominated Volume in Mcf for receipt by Company at the Receipt Point and the Metered Receipts of gas in Mcf from Customer at the Receipt Point based on a formula described in detail in the proposed tariff.

The Utilization Charge for Daily Imbalances is the sum of the following:

Daily Demand Charge: $0.1608 per Mcf

Daily Storage Charge:	0.2785
Utilization Charge for Daily Imbalances:	$0.4393 per Mcf

Note: The Daily Demand Charge may change with each filing of the GSCC.

These charges are in addition to any other charges under Rate LGDS. The Utilization Charge for Daily Imbalances will not be applied to daily imbalances which do not exceed the +/- 5% unless an LGFO has been issued. If an LGFO has been issued, the Utilization Charge for Daily Imbalances shall apply to daily imbalances which exceed 0% for customers in violation of the LGFO directive. Customers not in violation of the LGFO directive, will continue to be assessed the Utilization Charge for Daily Imbalances on volumes which exceed the 5% daily tolerance. Company shall not have an obligation to provide balancing service for any volumes of gas under this proposed schedule.

Cash-Out Provision for Monthly Imbalances: Over- and under-deliveries of gas are cashed out on a monthly basis pursuant to a formula described in detail in the proposed tariff.

Remote metering: Customer shall reimburse Company for the cost of installing remote metering equipment, including any modifications to Company facilities required in order to facilitate the functioning of the remote metering.

Gas Quality: The proposed rate schedule sets forth detailed gas quality specifications which any gas delivered by Customer under Rate LGDS must meet before being accepted by Company into its gas system.

Creditworthiness: Company may require Customer to maintain an irrevocable letter of credit, cash prepayment, or such other financial instrument satisfactory to Company ("credit support") to assure Customer's performance of its obligations. The amount of the credit support shall not exceed two twelfths (2/12) of Customer's estimated annual bill.

Contract required: Service under Rate LGDS shall be performed under a written contract between Customer and Company, which shall be for a period of one (1) year or through the following October 31, whichever period is shorter. Company may require that a contract be executed for a longer initial term when deemed necessary by the size of MDQ or other special circumstances. After the initial term, service hereunder shall extend from year to year (from November 1 through October 31, the Contract Year.

Sales tax: Customer hereby agrees to reimburse Company for all Kentucky sales tax, if any, assessed on the charges of Rate LGDS.

Company has made numerous conforming text changes throughout the tariff inserting LGDS in places including Terms and Conditions.

RIDER TS-2
Gas Transportation Service/Firm Balancing Service Rider

Current Rate

Administrative Charge: $550.00 per Delivery Point per month.

	CGS	IGS	AAGS

RIDER PS-TS-2

Pooling Service Rider to Rider TS-2

	Current	Proposed
PS-TS-2 Pool Administrative Charge:	$75.00	$75.00

Special Terms and Conditions

Removed requirement of surety bond as an acceptable financial instrument.

Added that Pool Manager shall enter into a Website Subscriber Agreement if Pool Manager desires to access telemetry data.

Pooling Service Rider to Rate FT - Rider PS-FT

	Current	Proposed
PS-FT Pool Administrative Charge:	$75.00	$75.00

Special Terms and Conditions

Removed requirement of surety bond as an acceptable financial instrument.

Added that Pool Manager shall enter into a Website Subscriber Agreement if Pool Manager desires to access telemetry data.

Excess Facilities – Rider EF

Customer shall pay for excess facilities by:	**Current**	**Proposed**
(a) Making a monthly Excess Facilities charge payment equal to the installed cost of the excess facilities times the following percentage:		
Percentage with No Contribution-in-Aid-of-Construction	1.24%	1.24%
(b) Making a one-time Contribution-in-Aid-of-Construction equal to the installed cost of the excess facilities plus a monthly Excess Facilities Charge payment equal to the installed cost of the excess facilities times the following percentage:		
Percentage with Contribution-in-Aid-of-Construction	0.47%	0.47%

Natural Gas Vehicle Service - Rider NGV

Availability of Service

Current

Applicable to municipal, utility, corporate and other fleet operators and public fueling stations meeting the qualifications of, and served under, either Rate IGS or Rate FT for the sole purpose of providing compressed natural gas for use as a fuel in vehicular internal combustion engines. Availability of gas service under this rate schedule shall be determined by Company on a case-by-case basis, which determination shall be within Company's sole discretion. Company shall not be obligated to make modifications or additions to its gas system to serve loads under this Rider.

Service provided under this Rider shall be separately metered. Service for any use of natural gas other than the compression of natural gas for vehicle fuel, such as space heating, water heating, or any direct processing or boiler fuel use, is not permitted under this Rider or through the meter through which service under this Rider is provided.

Proposed

Applicable to municipal, utility, corporate and other fleet operators and public fueling stations meeting the qualifications of, and served under, either Rate IGS or Rate FT for the sole purpose of providing natural gas for use as a fuel in vehicular internal combustion engines. Availability of gas service under this rate schedule shall be determined by Company on a case-by-case basis, which determination shall be within Company's sole discretion. Company shall not be obligated to make modifications or additions to its gas system to serve loads under this Rider.

Service provided under this Rider shall be separately metered. Service for any use of natural gas other than as natural gas for vehicle fuel, such as space heating, water heating, or any direct processing or boiler fuel use, is not permitted under this Rider or through the meter through which service under this Rider is provided.

Special Terms and Conditions

Added the following: 1. Service will be furnished under Company's Terms and Conditions applicable hereto, to the extent that such Terms and Conditions are not in conflict, nor inconsistent, with the specific provisions hereof. 4. Customer shall be solely responsible for the reporting and payment of all applicable federal and state motor fuel taxes including, but not limited to, any federal special fuel excise tax and any state motor fuel tax.

Terms and Conditions

Removed this section.

Gas Line Tracker – Adjustment Clause GLT

Applicability:

Current: Applicable to all customers receiving service under the Company's Rate Schedules RGS, VFD, CGS, IGS, AAGS, and DGGS.

Proposed: Applicable to all customers receiving service under the Company's Rate Schedules RGS, VFD, CGS, IGS, AAGS, FT, SGSS, DGGS, and LGDS.

GLT Program Factors:

Current: All customers receiving service under rate schedules RGS, VFD, CGS, IGS, AAGS, and DGGS are assessed an adjustment to their applicable rate schedule that enables the Company to recover the costs associated with the GLT program. After the Company replaces a gas service riser or a gas service line under this program, it assumes ownership and responsibility for the plant and equipment. The allocation of the program cost to customers will be in proportion to their relative base revenue share approved in Case No. 2014-00372.

A filing to update the projected program costs is submitted annually at least two (2) months prior to the beginning of the effective period. The filing reflects the anticipated impact on the Company's revenue requirements of net plant additions expected during the upcoming year. After the completion of a plan year, the Company submits a balancing adjustment to true up the actual costs with the projected program costs for the preceding year, effective with the first billing cycle on or after the effective date of the change.

Proposed: After the Company replaces a gas service riser or a gas service line under this program, it will assume ownership and responsibility for the plant and equipment. The allocation of the program cost to customers will be in proportion to their relative base revenue share approved in the Company's most recent general rate case.

A filing to update the projected program costs will be submitted annually. The filing will reflect the anticipated impact on the Company's revenue requirements of net plant additions expected during the current year. At the same time, the Company will submit a balancing adjustment to true up the actual costs with the projected program costs for the preceding year. Such adjustment to the GLT will become effective for services rendered on and after the first day of the following month after the effective date of such change.

Rates

		Proposed	
	Current	Distribution Projects ($/delivery point)	Transmission Projects ($/Ccf)
RGS-Residential Gas Service	$ 5.14	$ 0.84	$ 0.00067
VFD-Volunteer Fire Department Service	$ 5.14	$ 0.84	$ 0.00067
CGS-Commercial Gas Service	$ 27.41	$ 4.26	$ 0.00051
IGS-Industrial Gas Service	$ 259.54	$ 48.86	$ 0.00020
AAGS-As Available Gas Service	$ 2,838.87	$ 48.86	$ 0.00020
SGSS – Substitute Gas Sales Service	N/A	$ 4.26	$ 0.00051
DGGS – Distributed Generation Gas Service	$ 0.00	$ 48.86	$ 0.00020
FT – Firm Transportation Service	N/A	N/A	$ 0.00003
LGDS – Local Gas Delivery Service	N/A	N/A	$ 0.00003

Note that the decrease between the current rates and the proposed Distribution Projects rates do not reflect reduced Gas Line Program costs; rather, LG&E is proposing to incorporate into its gas rate base revenue requirement a significant portion of Gas Line Program costs and to recover those costs going forward through increased Basic Service Charges for affected rate schedules.

LG&E proposes to add a Transmission Projects charge to Rider GLT to recover costs associated with its proposed Transmission Pipeline Modernization Program ("TPMP"). Rate FT will now be subject to Rider GLT charges because the TPMP will benefit customers using gas transmission facilities, not just those using gas distribution facilities.

Demand-Side Management Cost Recovery Mechanism – Adjustment Clause DSM

Availability of Service

Current

This schedule is mandatory to Residential Gas Service Rate RGS, Volunteer Fire Department Service Rate VFD, Firm Commercial Gas Service Rate CGS, Firm Industrial Gas Service Rate IGS, As-Available Gas Service Rate AAGS, and Firm Transportation Rate FT.

Proposed

This schedule is mandatory to Residential Gas Service Rate RGS, Volunteer Fire Department Service Rate VFD, Firm Commercial Gas Service Rate CGS, Firm Industrial Gas Service Rate IGS, As-Available Gas Service Rate AAGS, Substitute Gas Sales Service Rate SGSS, and Firm Transportation Rate FT.

Weather Normalization Adjustment Clause – Adjustment Clause WNA

Current

The sales to Residential and Commercial Customers under Rate Schedules RGS and CGS shall be increased or decreased monthly by an amount hereinafter described as the Weather Normalization Adjustment (WNA).

Proposed

Applicable

The sales to Residential Customers, Volunteer Fire Departments, and Commercial Customers under Rate Schedules RGS, VFD, and CGS shall be increased or decreased monthly by an amount hereinafter described as the WNA.

Determination of WNA

Current

Weather normalized volumes shall be utilized during the November through April billing periods to calculate the non-gas portion of the bills of all heating Customers served under Rate Schedules RGS and CGS. During the remainder of the year, May through October, the bills shall be computed based on actual consumption.

Weather Normalization Adjustment will be calculated using the following formula:

WNA = [(Actual Mcf - Base Load Mcf) * (Normal Degree Days/Actual Degree Days)]

Each Customer's base load will be determined individually, and will be recomputed annually. Rates used in the computation of the WNA shall be determined based on the applicable base rate charge as set forth on the RGS and CGS Rate Schedules.

Proposed

Weather normalized volumes shall be utilized during the November through April billing periods to calculate the applicable Distribution Charges for Customers served under Rate Schedules RGS, VFD and CGS. During the remainder of the year, May through October, the bills shall be computed based on actual consumption.

WNA will be calculated using the following formula:

WNA = [(Actual Mcf - Base Load Mcf) * (Normal Degree Days/Actual Degree Days)]

Each Customer's base load will be determined individually, and will be recomputed annually. Rates used in the computation of the WNA shall be determined based on the applicable Distribution Charge as set forth on the RGS, VFD, and CGS Rate Schedules.

Returned Payment Charge

Current Rate $10.00
Proposed Rate $10.00

Meter Test Charge

Current Rate $90.00
Proposed Rate $90.00

Disconnect/Reconnect Service Charge

Current Rate $28.00
Proposed Rate $28.00

Current

A charge of $28.00 will be made to cover disconnection and reconnection of gas service when discontinued for non-payment of bills or for violation of Company's Terms and Conditions, such charge to be made before reconnection is effected. If both gas and electric services are reconnected at the same time, the total charge for both services shall be $28.00. No charge will be made for customers qualifying for service reconnection pursuant to 807 KAR 5:006, Section 16, Winter Hardship Reconnection.

Customers under Gas Rates RGS, CGS, IGS, and AAGS may request and be granted temporary suspension of gas service. In the event of such temporary suspension, Company will make a charge of $28.00 to cover disconnection and reconnection of gas service, such charge to be made before reconnection is effected. If both gas and electric services are reconnected at the same time, the total charge for both services shall be $28.00. Customers taking service under Riders TS-2, GMPS, and EF shall not be eligible for such temporary suspension of service.

Proposed

A charge of $28.00 will be made to cover disconnection and reconnection of gas service when discontinued for non payment of bills or for violation of Company's Terms and Conditions, such charge to be made before reconnection is effected. If both gas and electric services are reconnected at the same time, the total charge for both services shall be $28.00. No charge will be made for customers qualifying for service reconnection pursuant to 807 KAR 5:006, Section 16, Winter Hardship Reconnection.

Customers under Rate Schedules RGS, VFD, CGS, IGS, and AAGS may request and be granted temporary suspension of gas service. In the event of such temporary suspension, Company will make a charge of $28.00 to cover disconnection and reconnection of gas service, such charge to be made before reconnection is effected. If both gas and electric services are reconnected at the same time, the total charge for both services shall be $28.00. Customers taking service under Riders TS-2, GMPS, and EF shall not be eligible for such temporary suspension of service.

Inspection Charge
Additional Trip Charge When More Than Two are Necessary
Applicable to Rate FT, Rider TS-2, and Rider GMPS

Current Rate $150.00
Proposed Rate $150.00

Unauthorized Reconnect Charge

Proposed

When the Company determines that Customer has tampered with a meter, reconnected service without authorization from Company that previously had been disconnected by Company, or connected service without authorization from Company, then the following charges shall be assessed for each instance of such tampering or unauthorized reconnection or connection of service:

1. A charge of $70.00 for tampering or an unauthorized connection or reconnection that does not require the replacement of the meter;
2. A charge of $132.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a meter.

Customer Deposits

Current Rate

For Customers Served Under
Residential Gas Service Rate RGS $100.00
(For Combination Gas and Electric Residential Customers,
the total deposit would be $260.00)
For Non-Residential Gas Customers, the deposit will be no more than 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly.

Proposed Rate

For Customers Served Under
Residential Gas Service Rate RGS $100.00
(For Combination Gas and Electric Residential Customers,
the total deposit would be $260.00)
For Non-Residential Gas Customers, the deposit will be no more than 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly.

Late Payment Charge

Current Rate

If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month's charges for customers served under the following Standard Rate Schedules: RGS, VFD, CGS, and IGS.
If full payment is not received by the due date of the bill, a 1% late payment charge will be assessed on the current month's charges for customers served under the following Standard Rate Schedules: AAGS, FT, and DGGS.

Proposed Rate

If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month's charges for customers served under the following Standard Rate Schedules: RGS, VFD, CGS, IGS, and SGSS.
If full payment is not received by the due date of the bill, a 1% late payment charge will be assessed on the current month's charges for customers served under the following Standard Rate Schedules: AAGS, FT, DGGS and LGDS.

Home Energy Assistance Program Adjustment Clause HEA

Rate

Current

$0.25 per meter per month.

Proposed

$0.25 per month.

Terms and Conditions – Customer Bill of Rights

Current

You have the right to participate in equal, budget payment plans for your natural gas and electric service.

Proposed

You have the right to participate in equal, budget payment plans for your natural gas and electric service, unless any rate or rider under which you take service explicitly states otherwise.

Terms and Conditions – General

Company Terms and Conditions

Current

In addition to the rules and regulations of the Commission, all gas service supplied by Company shall be in accordance with these Terms and Conditions which shall constitute a part of all applications and contracts for service.

Proposed

In addition to the rules and regulations of the Commission, all gas service supplied by Company shall be in accordance with these Terms and Conditions to the extent that such Terms and Conditions are not in conflict, nor inconsistent, with the specific provisions in each rate schedule and which shall constitute a part of all applications and contracts for service.

Terms and Conditions – Customer Responsibilities

Exclusive Service on Installation Connected

Current

Gas service shall not be used for purposes other than as set forth in customer's application or contract.

Company shall not be obligated to provide natural gas or natural gas service under any standard natural gas rate schedule on a standby, back-up, supplemental or other basis to any Customer that is physically connected to the facilities of any other provider of natural gas service, such other providers to include, but not be limited to, another natural gas local distribution company, public, private, or municipal; a producer, gatherer, or transmitter of natural gas; an interstate or intrastate natural gas pipeline; or any other entity (including the Customer itself acting in any one or more of these roles) that provides natural gas or natural gas service to residential, commercial, industrial, public authority, or any other type of customers which might otherwise receive natural gas from Company. Company and Customer may mutually agree to enter into a special contract for standby, back-up, supplemental or other service subject to the approval of the Kentucky Public Service Commission.

Proposed

Gas service shall not be used for purposes other than as set forth in customer's application or contract.

Company shall not be obligated to provide natural gas or natural gas service under any standard natural gas rate schedule on a standby, back-up, supplemental or other basis to any Customer that is physically connected to the facilities of any other provider of natural gas service, such other providers to include, but not be limited to, another natural gas local distribution company, public, private, or municipal; a producer, gatherer, or transmitter of natural gas; an interstate or intrastate natural gas pipeline; or any other entity (including the Customer itself acting in any one or more of these roles) that provides natural gas or natural gas service to residential, commercial, industrial, public authority, or any other type of customers which might otherwise receive natural gas from Company. In the event that such Customer desires to continue to receive natural gas service from Company and/or declines to allow Company to remove Company's facilities hitherto used to provide natural gas service to Customer, then Customer shall be obligated to take service under Rate SGSS.

Terms and Conditions – Company Responsibilities

Metering

Current

The gas used will be measured by a meter or meters to be furnished and installed by Company at its expense and all bills will be calculated upon the registration of said meters. When service is supplied by Company at more than one delivery point on the same premises, each delivery point will be metered and billed separately on the rate applicable. Meters include all measuring instruments. Meters will be located outside whenever possible. Otherwise, meters will be located as near as possible to the service entrance and on the ground floor of the building, in a clean, dry, safe and easily accessible place, free from vibration, agreed to by Company.

Proposed

The gas used will be measured by a meter or meters to be furnished and installed by Company at its expense and all bills will be calculated upon the registration of said meters. Company has the right to install any meter or meters it deems in its sole discretion to be necessary or prudent to serve any customer, including without limitation a digital, automated-meter-reading, automated meter infrastructure, or advanced-metering-systems meter or meters. When service is supplied by Company at more than one delivery point on the same premises, each delivery point will be metered and billed separately on the rate applicable. Meters include all measuring instruments. Meters will be located outside whenever possible. Otherwise, meters will be located as near as possible to the service entrance and on the ground floor of the building, in a clean, dry, safe and easily accessible place, free from vibration, agreed to by Company.

Terms and Conditions – Character of Service

Heating Value

Current

Company will normally supply natural gas having a heating value of approximately 1,000 Btu per cubic foot or as is otherwise supplied by the interstate pipeline(s) from which Company takes natural gas service. All gas received into the system of Company shall meet either of the applicable quality standards of the interstate pipeline delivering natural gas to Company or the lowest standard if there is more than one pipeline. Company reserves the right to refuse to accept gas from any entity whose gas does not meet those minimum standards. When it is necessary to supplement the supply of natural gas, Company reserves the right, at its discretion, to supplement its supply of natural gas with a mixture of vaporized liquefied petroleum gas and air.

Proposed

Company will normally supply natural gas having a heating value of approximately 1,000 Btu per cubic foot. All gas received into the system of Company from interstate pipelines shall meet the applicable quality standards of the respective interstate pipeline delivering natural gas to Company. All gas received into the system of Company from sources other than an interstate pipeline shall meet the quality standards prescribed in Local Gas Delivery Service Rate LGDS. When it is necessary to supplement the supply of natural gas, Company reserves the right, at its discretion, to supplement its supply of natural gas with a mixture of vaporized liquefied petroleum gas and air.

Terms and Conditions – Billing

Meter Reading and Bills

Proposed

As used in the entirety of this Tariff, "meter reading" and similar terms shall include data collected remotely from automated meter reading, automated meter infrastructure, advanced metering systems, and other electronic meter equipment or systems capable of delivering usage data to Company. A physical, manual reading of a meter is not required to constitute a "meter reading."

Terms and Conditions – Deposits

General

Current

5) The General Terms and Conditions regarding Deposits set forth above shall not apply to, and shall be superseded by, the deposit requirements set forth in Section 3 of the Special Terms and Conditions contained in Standard Rate Rider PS-TS-2 (Sheet No. 59.5), Standard Rate Rider PS-TS (Sheet No. 60.1), and Standard Rate Rider PS-FT (Sheet No. 61.1).

Proposed

5) The General Terms and Conditions regarding Deposits set forth above shall not apply to, and shall be superseded by, the requirements set forth in Section 3 of the Special Terms and Conditions

contained in Standard Rate Rider PS-TS-2 (Sheet No. 59.7), Standard Rate Rider PS-FT (Sheet No. 61.2), and the CREDITWORTHINESS section of Rate LGDS (Sheet No. 36.11).

Louisville Gas and Electric Company also proposes to change the text of the following electric tariffs: Residential Service Rate RS, Residential Time-of-Day Energy Service Rate RTOD-Energy, Residential Time-of-Day Demand Service Rate RTOD-Demand, Volunteer Fire Department Service Rate VFD, General Service Rate GS, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, Retail Transmission Service Rate RTS, Fluctuating Load Service Rate FLS, Lighting Service Rate LS, Restricted Lighting Service Rate RLS, Traffic Energy Service Rate TE, Special Charges, Curtailable Service Rider CSR, Temporary/Seasonal Service Rider TS, Economic Development Rider EDR, Environmental Cost Recovery Surcharge ECR, Home Energy Assistance Program Adjustment Clause HEA, and the Terms and Conditions.

Louisville Gas and Electric Company also proposes to change the text of the following gas tariffs: Residential Gas Service Rate RGS, Volunteer Fire Department Service Rate VFD, Firm Commercial Gas Service Rate CGS, Firm Industrial Gas Service Rate IGS, As-Available Gas Service Rate AAGS, Firm Transportation Service Rate FT, Distributed Generation Gas Service Rate DGGS, Special Charges, Gas Transportation Service/Firm Balancing Service Rider TS-2, Gas Meter Pulse Service Rider GMPS, Pooling Service Rider PS-TS-2, Pooling Service Rate PS-FT, Natural Gas Vehicle Service Rider NGV, Gas Line Tracker GLT, Demand Side Management Cost Recovery Mechanism DSM, Weather Normalization Adjustment Clause Mechanism WNA, Home Energy Assistance Adjustment Clause HEA, and the Terms and Conditions.

Complete copies of the proposed tariffs containing the text changes and proposed rates may be obtained by contacting Louisville Gas and Electric Company at P. O. Box 32010, Louisville, Kentucky, 502-589-1444 or 1-800-331-7370, or by visiting Louisville Gas and Electric Company's website at www.lge-ku.com.

The foregoing rates reflect a proposed annual increase in electric revenues of approximately 8.5% and gas revenues of approximately 4.2% to Louisville Gas and Electric Company.

The estimated amount of the annual change and the average monthly bill to which the proposed electric rates will apply for each electric customer class is as follows:

Electric Rate Class	**Average Monthly Usage (kWh)**	**Annual $ Increase**	**Annual % Increase**	**Monthly Bill $ Increase**	**Monthly Bill% Increase**
Residential	957	42,126,429	9.54	9.65	9.54
Residential Time-of-Day	949	5,306	9.53	8.90	9.53
General Service	2,502	12,180,705	7.15	22.44	7.15
Power Service	58,692	12,665,684	7.14	364.44	7.14
Time-of-Day Secondary	242,209	5,698,088	6.75	1,283.35	6.75
Time-of-Day Primary	1,460,258	10,385,231	8.22	8,203.18	8.22
Retail Transmission	7,356,472	5,824,465	8.45	37,336.31	8.45
Fluctuating Load	No customers are currently served under this rate schedule.				
Outdoor Lights	98	1,920,228	8.21	1.85	8.21
Lighting Energy	1,675	0	0.00	0.00	0.00
Traffic Energy	286	20,580	6.76	1.89	6.76
PSA (presently CTAC)	N/A	0	0.00	0.00	0.00
Rider - CSR	N/A	1,920,271	44.30	53,340.86	44.30

The estimated amount of the annual change and the average monthly bill to which the proposed gas rates will apply for each gas customer class is as follows:

Gas Rate Class	Average Monthly Usage (Mcf)	Annual $ Increase	Annual % Increase	Monthly Bill $ Increase	Monthly Bill% Increase
Residential	5.5	10,631,026	4.96	2.99	4.96
Commercial	33.9	3,141,835	3.48	10.50	3.48
Industrial	609.4	417	0.00	0.13	0.00
As-Available	5,334.9	(71,575)	(6.65)	(994.10)	(6.65)
Firm Transportation	14,057.0	155,155	2.00	177.12	2.00
Distributed Generation	0.6	1,288	18.29	107.34	18.29
Substitute Gas Sales	247.5	41,306	215.03	3,442.20	215.03

The Company is seeking inclusion of two new projects in the Gas Line Tracker. The first is the TPMP referred to above. The second is the Gas Service Line Replacement Program. The estimated average monthly bill impact of the two new projects proposed for the Gas Line Tracker on each applicable rate schedule is as follows:

Year/ Effect	Rates RGS/VFD	Rate CGS/SGSS	Rate IGS/AAGS/DGGS	Rate FT/LGDS
2017				
$ Increase	$0.04	$0.17	$1.24	$3.67
% Increase	0.06%	0.06%	0.03%	0.04%
2018				
$ Increase	$0.31	$1.54	$19.70	$33.14
% Increase	0.52%	0.51%	0.54%	0.37%
2019				
$ Increase	$1.25	$6.15	$78.48	$137.90
% Increase	2.07%	2.04%	2.14%	1.55%

Notice is further given that a person may examine this application at the offices of Louisville Gas and Electric Company located at 820 West Broadway, Louisville, Kentucky, and may also be examined at Louisville Gas and Electric Company's website at www.lge-ku.com. A person may also examine this application at the Public Service Commission's offices located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or through the commission's Web site at http://psc.ky.gov.

Comments regarding the application may be submitted to the Public Service Commission, by mail to Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, or by sending an email to the Commission's Public Information Officer at psc.info@ky.gov. All comments should reference Case No. 2016-00371.

The rates contained in this notice are the rates proposed by Louisville Gas and Electric Company, but the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice. A person may submit a timely written request for intervention to the Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, establishing the grounds for the request including the status and interest of the party. If the commission does not receive a written request for intervention within thirty (30) days of initial publication or mailing of the notice, the commission may take final action on the application.

General Statement

NOTICE TO CUSTOMERS OF
LOUISVILLE GAS AND ELECTRIC COMPANY

PLEASE TAKE NOTICE that, in a November 23, 2016 Application, Louisville Gas and Electric Company ("LG&E") is seeking approval by the Kentucky Public Service Commission of an adjustment of its electric and gas rates and charges to become effective on and after January 1, 2017.

The proposed rates reflect a proposed annual increase in electric revenues of approximately 8.5% and gas revenues of approximately 4.2% to LG&E.

The estimated amount of the annual change and the average monthly bill to which the proposed electric rates will apply for each electric customer class are as follows:

Electric Rate Class	Average Usage (kWh)	Annual $ Increase	Annual % Increase	Monthly Bill $ Increase	Monthly Bill % Increase
Residential	957	42,126,429	9.54	9.65	9.54
Residential Time-of-Day Energy	949	5,306	9.53	8.90	9.53
General Service	2,502	12,180,705	7.15	22.44	7.15
Power Service	58,692	12,665,684	7.14	364.44	7.14
Time-of-Day Secondary	242,209	5,698,088	6.75	1,283.35	6.75
Time-of-Day Primary	1,460,258	10,385,231	8.22	8,203.18	8.22
Retail Transmission	7,356,472	5,824,465	8.45	37,336.31	8.45
Fluctuating Load	No customers are currently served under this rate schedule.				
Outdoor Lights	98	1,920,228	8.21	1.85	8.21
Lighting Energy	1,675	0	0.00	0.00	0.00
Traffic Energy	286	20,580	6.76	1.89	6.76
PSA (presently CTAC)	N/A	0	0.00	0.00	0.00
Rider – CSR	N/A	1,920,271	44.30	53,340.86	44.30

The estimated amount of the annual change and the average monthly bill to which the proposed gas rates will apply for each gas customer class is as follows:

Gas Rate Class	Average Usage (Mcf)	Annual $ Increase	Annual % Increase	Mthly Bill $ Increase	Mthly Bill % Increase
Residential	5.5	10,631,026	4.96	2.99	4.96
Commercial	33.9	3,141,835	3.48	10.50	3.48
Industrial	609.4	417	0.00	0.13	0.00
As-Available	5,334.9	(71,575)	(6.65)	(994.10)	(6.65)
Firm Transportation	14,057.0	155,155	2.00	177.12	2.00
Distributed Generation	0.6	1,288	18.29	107.34	18.29
Substitute Gas Sales	247.5	41,306	215.03	3,442.20	215.03

The Company is seeking inclusion of two new projects in the Gas Line Tracker. The estimated average monthly bill impact of the two new projects proposed for the Gas Line Tracker on each applicable rate schedule is as follows:

Year/Effect	Rates RGS/VFD	Rates CGS/SGSS	Rates IGS/AAGS/DGGS	Rates FT/LGDS
2017				
$ Increase	$0.04	$0.17	$1.24	$3.67
% Increase	0.06%	0.06%	0.03%	0.04%

LG&E is also proposing changes in the text of some of its rate schedules and other tariff provisions, including its terms and conditions for electric or gas service. Complete copies of the proposed tariffs containing the proposed text changes and rates may be obtained by contacting, Louisville Gas and Electric Company at 220 West Main Street, Louisville, Kentucky, 40202, 502-589-1444 or 1-800-331-7370, or by visiting LG&E's website at www.lge-ku.com.

Notice is further given that a person may examine this application at the offices of LG&E located at 820 West Broadway, Louisville, Kentucky, and may also be examined at LG&E's website at www.lge-ku.com. A person may also examine this application at the Public Service Commission's offices located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or through the commission's Web site at http://psc.ky.gov.

Comments regarding the application may be submitted to the Public Service Commission, by mail to Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, or by sending an email to the Commission's Public Information Officer at psc.info@ky.gov. All comments should reference Case No. 2016-00371.

The rates contained in this notice are the rates proposed by LG&E, but the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice. A person may submit a timely written request for intervention to the Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, establishing the grounds for the request including the status and interest of the party. If the commission does not receive a written request for intervention within thirty (30) days of initial publication or mailing of the notice, the commission may take final action on the application.

A copy of the Notice of Filing and the proposed tariff, once filed, shall also be available for public inspection on LG&E's website at www.lge-ku.com, or through the Public Service Commission's website at http://psc.ky.gov.

Filing Requirement
807 KAR 5:001 Section 16(2)
Sponsoring Witness: Robert M. Conroy

Description of Filing Requirement:

Notice of Intent. Utilities with gross annual revenues greater than $5,000,000 shall notify the Commission in writing of its intent to file a rate application at least thirty (30) days, but not more than sixty (60) days, prior to filing its application.

(a) The notice of intent shall state if the rate application will be supported by a historical test period or a fully forecasted test period.

(b) Upon filing the notice of intent, an application may be made to the commission for permission to use an abbreviated form of newspaper notice of proposed rate increases provided the notice includes a coupon that may be used to obtain a copy from the applicant of the full schedule of increases or rate changes.

(c) Upon filing the notice of intent with the commission, the applicant shall mail to the Attorney General's Office of Rate Intervention at a copy of the notice of intent or send by electronic mail in a portable document format, to rateintervention@ag.ky.gov.

RE: ***Application of Louisville Gas and Electric Company for an Adjustment of Its Electric and Gas Rates and for Certificates of Public Convenience and Necessity* – Case No. 2016-00371**

Dear Dr. Mathews:

Please take notice that Louisville Gas and Electric Company ("LG&E") intends to file on or after November 23, 2016, an application for a general adjustment in its electric and gas rates, including changes to its electric and gas tariffs, and for Certificates of Public Convenience and Necessity. This application will be supported by a fully forecasted test period ending June 30, 2018.

LG&E has contemporaneously filed a Notice of Election of Use of Electronic Filing Procedures for this proceeding. Please assign this matter a case number and style and advise us of same so that it can be incorporated in the application and supporting testimony before filing with the Commission.

Sincerely,

Robert M. Conroy

RE: ***Application of Louisville Gas and Electric Company for an Adjustment of Its Electric and Gas Rates and for Certificates of Public Convenience and Necessity* – Case No. 2016-00371**

Dear Dr. Mathews:

Enclosed please find and accept a notice of election of use of electronic filing procedures in accordance with 807 KAR 5:001, Section 8. Louisville Gas and Electric Company intends to file on or after November 23, 2016, an application for a general adjustment in its electric and gas rates, including changes to its electric and gas tariffs, and Certificates of Public Convenience and Necessity.

Should you have any questions regarding the enclosed, please do not hesitate to contact me.

Sincerely,

Christopher M. Garrett

Christopher M. Garrett

Executive Director, Office of the Attorney General
Rate Intervention Division (via electronic mail)

RECEIVED
Notice of Election to Use Electronic Filing Procedures
Revised June 2014
OCT 21 2016
PUBLIC SERVICE
COMMISSION

NOTICE OF ELECTION OF USE OF ELECTRONIC FILING PROCEDURES
(Complete All Shaded Areas and Check Applicable Boxes)

In accordance with 807 KAR 5:001, Section 8, Louisville Gas and Electric Company gives notice of its intent to file an application for Adjustment of Electric and Gas Rates and CPCNs with the Public Service Commission no later than December 1, 2016 and to use the electronic filing procedures set forth in that regulation.

Louisville Gas and Electric Company further states that:

	Yes	No
1. It requests that the Public Service Commission assign a case number to the intended application and advise it of that number as soon as possible;	[X]	[ ]
2. It or its authorized representatives have registered with the Public Service Commission and are authorized to make electronic filings with the Public Service Commission;	[X]	[ ]
3. Neither it nor its authorized representatives have registered with the Public Service Commission for authorization to make electronic filings but will do so no later than seven days before the date of its filing of its application for rate adjustment;	[ ]	[X]
4. It or its authorized agents possess the facilities to receive electronic transmissions;	[X]	[ ]

5. The following persons are authorized to make filings on its behalf and to receive electronic service of Public Service Commission orders and any pleadings filed by any party or the Public Service Commission Staff:

Name	Electronic Mail Address
Robert M. Conroy	robert.conroy@lge-ku.com
Allyson K. Sturgeon	allyson.sturgeon@lge-ku.com
Kendrick Riggs	kendrick.riggs@skofirm.com

	Yes	No
6. It and its authorized representatives listed above have read and understand the procedures for electronic filing set forth in 807 KAR 5:001 and will fully comply with those procedures unless the Public Service Commission directs otherwise.	[X]	[ ]

Signed Robert M. Conroy

Name: Robert Conroy
Title: Vice President, State Regulation and Rates
Address: 220 West Main Street

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(6)(a)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

The financial data for the forecasted period shall be presented in the form of pro forma adjustments to the base period.

Response:

The financial data for the forecasted period is presented in the form of pro forma adjustments to the base period.

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(6)(b)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

Forecasted adjustments shall be limited to the twelve (12) months immediately following the suspension period.

Response:

Forecasted adjustments have been limited to the twelve (12) months immediately following the suspension period.

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(6)(c)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

Capitalization and net investment rate base shall be based on a thirteen (13) month average for the forecasted period.

Response:

Capitalization and net investment rate base are based on a thirteen (13) month average for the forecasted period.

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(6)(d)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

After an application based on a forecasted test period is filed, there shall be no revisions to the forecast, except for the correction of mathematical errors, unless the revisions reflect statutory or regulatory enactments that could not, with reasonable diligence, have been included in the forecast on the date it was filed. There shall be no revisions filed within thirty (30) days of a scheduled hearing on the rate application.

Response:

LG&E acknowledges this requirement.

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(6)(e)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

The commission may require the utility to prepare an alternative forecast based on a reasonable number of changes in the variables, assumptions, and other factors used as the basis for the utility's forecast.

Response:

LG&E acknowledges this requirement.

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(6)(f)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

The utility shall provide a reconciliation of the rate base and capital used to determine its revenue requirements.

Response:

See attached.

Financial Forecast Modeling Process

Table of Contents

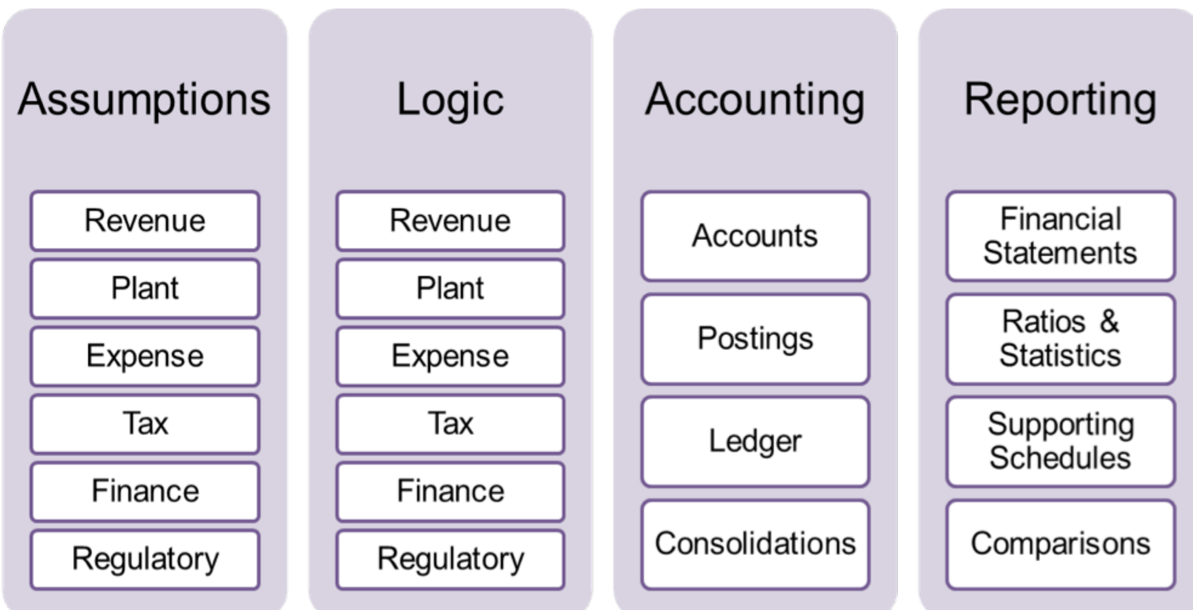
1. General

Introduction

The Financial Planning & Analysis group develops the five-year Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") and LG&E and KU Energy LLC ("LKE" or collectively "the Companies") business plan. The business plan is developed using the financial planning system, UIPlanner, an iterative model, which incorporates numerous inputs from the business as well as various formulas, algorithms and set logic. The business plan includes the projected five-year income statements, balance sheets and cash flows for the Companies.

UIPlanner (UI)

UI allows the company to manage all of the assumptions in the business plan, integrates the business logic, utilizes built in accounting controls, and produces robust analyses and reports.



[1]

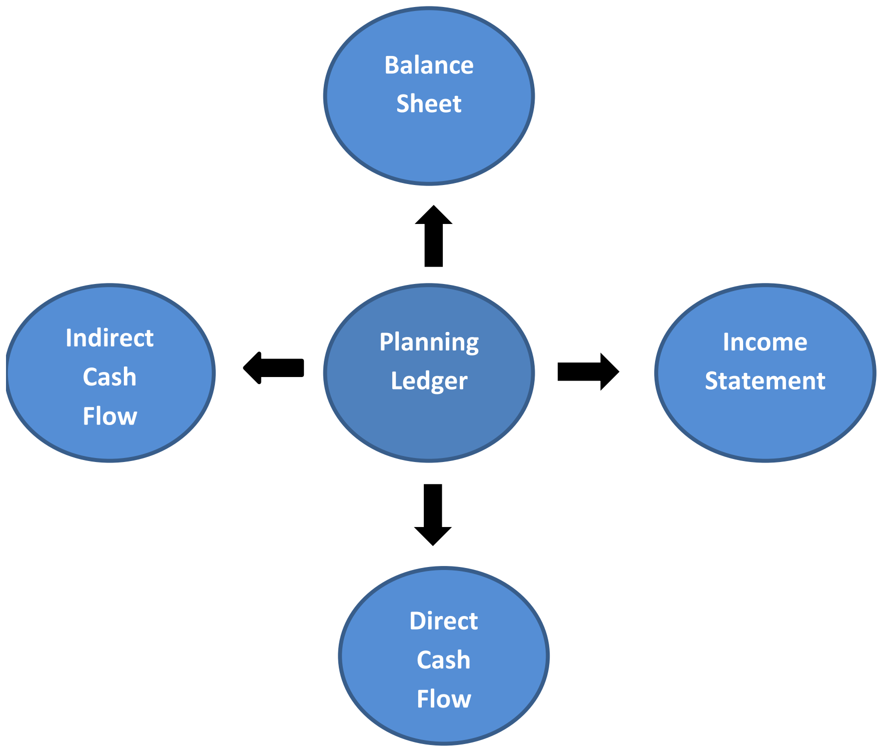
Planning assumptions are managed in UI. UI is superior to an Excel based model because it allows for sharing assumptions in a common database. UI tracks changes to assumptions and maintains a record of who made the change and when.

UI has built-in accounting capabilities, which function identical to a general ledger (see Planning Ledger flow chart below). Double-entry accounting of debits and credits is developed in UI to maintain integrity of financial statements. If a posting is not entered in UI or if one side of the debit/credit is missing, UI will produce an error message before it will produce a financial statement. Ledger accounts are organized with a configurable roll-up structure. UI also allows for combining several accounts to a summary account for consistent and concise formatting in

[1] http://utilitiesinternational.com/uiplanner-software/planning/

the production of financial statements. These summary accounts are rolled up into a high-level area (asset, direct cash, expense, indirect cash, liability, or revenue). Each account in the ledger is also associated with an indirect cash flow account which can be customized to generate a detailed cash flow statement.

Planning Ledger Flow Chart



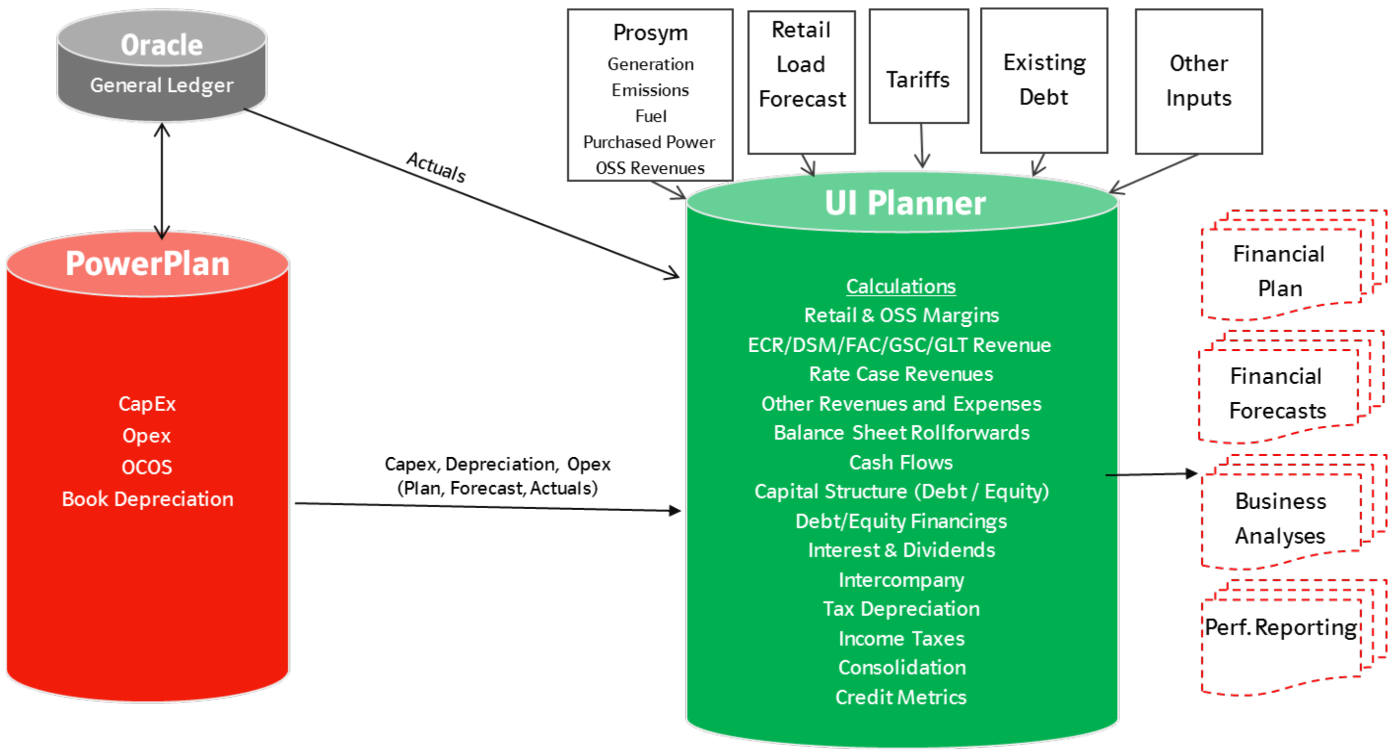
Each month actual balances are imported from the Oracle General Ledger (GL) to update UI with the latest balances and to compare the budget and revised forecast to actuals. The actuals imported into UI are compared to the trial balance in Oracle monthly to ensure completeness and accuracy.

Data in UI is entered via edit time data and housed within "cases". A collection of cases is grouped to create a "scenario". For example, the "2017 Business Plan" is a scenario in UI. After a scenario runs through the iterative process in UI, users can view the Financial Statements and other various reports in UI.

Security is specific by user in UI. When data assumptions are entered, the person entering the assumptions is tracked within UI for auditing purposes. Only certain users have the ability to edit data entry and logic assumptions. In addition, when a scenario, such as the business plan, is finalized, the scenario is locked so no further changes can be made. Only certain users have the ability to lock and unlock scenarios and cases. Logic from a case and/or scenario can be copied and utilized in additional what-if analyses. UI allows for creating and managing multiple scenarios with various planning assumptions and business logic in a transparent and efficient manner.

See the Financial Planning Software Flow Diagram below, detailing which systems provide data and other forms of inputs to UI to create the financial plan, forecast, business analysis and other management reports. This document summarizes the systems used to produce the business plan.

Financial Planning Software Flow Diagram



Budgeting Overview

LKE uses a "bottom up" budgeting approach. The process begins with the various business units preparing detailed budgets for their individual areas of responsibility, consisting of expense items, certain types of LOB managed revenues, and capital spending. The budgets prepared by the business units are reviewed and approved by LKE management. The LKE Officers ultimately approve the LKE consolidated annual budget. If any changes occur during the review and approval process, the changes are communicated to the appropriate line of business (LOB), and each LOB submits a revised budget through the same review and approval process.

Each year, LKE prepares a five-year forecast of operating revenues and expenses, which is the starting point for preparing the annual budget and the five-year business plan. Each business unit is required to create its own five-year capital and operation and maintenance (O&M) expense plan to produce an all-inclusive operating plan which is presented for review by the Officers. The five-year capital and O&M plan is developed and accumulated in PowerPlan, the Company’s corporate budgeting application. These details from PowerPlan are uploaded into the financial planning system – UI.

2. <u>Revenue and Load Forecast</u>

Retail Revenue

In order to calculate revenues, UI logic uses the load forecast and the tariffs that need to be applied to the forecast. For energy, UI multiplies megawatt hours times the energy tariff. For demand, UI calculates base, intermediate and peak demand revenue by multiplying the megawatt or kilovolt-ampere (kVA) times the demand tariff for base, intermediate and peak demand. For customer revenue, UI multiplies the number of customer times the customer charge. For base fuel revenues, UI multiplies the base fuel rate times the megawatt hour sales by jurisdiction.

The first step in preparing the operating revenues is to obtain an energy, demand and customer forecast of the projected electric and gas sales. The load forecasts are calculated on a yearly basis for each tariff. See the Annual Electric Sales and Demand Forecast Process Document, the Annual Natural Gas Volume Forecast Process Document, the Annual Natural Gas Sendout Process and associated presentations, for detailed descriptions of the assumptions and methodology used in developing the electricity and gas load forecast. The following information is uploaded into UI:

- Energy forecast for each month and year, by tariff
- Demand forecast by month and year, by tariff
- Customer count by month and year, by tariff
- Base fuel revenues forecast by month and year

Allocators are used to convert the load from tariff rate to revenue class in UI. The allocators are supplied by the Sales Analysis and Forecasting group. The previous calendar year actuals data is utilized to calculate the allocators. The calculation divides the amount of energy, demand, or customer count by revenue class by tariff divided by the total energy, demand, or customer count respectively for the entire tariff. The tariffs are entered into UI from the tariff book based on the last rate case. UI then calculates energy, demand and customer revenues by revenue class. The revenues are then posted to the income statement.

Transmission Revenue

External Transmission revenue is imported into UI from an excel spreadsheet prepared by the Transmission Policy and Tariffs department. The projected external transmission amounts are calculated as follows:

1. Network Service (the forecast multiplied by the associated rates)
    a. The volumetric forecasts are provided by the customer for 2017-2026.
    b. Volumetric forecasts are based on the summer and winter peaks provided and interpolated over a twelve month period.
    c. For the 2017 BP, the transmission rates for June 1, 2017 through May 31, 2023 were forecasted based on Attachment O of the OATT

2. Point to Point Service (Service request multiplied by the associated rates)
   a. Long term service – is based on the original transmission request, these volumes remain fixed until their expiration unless there was newer information which indicated these long term reservations would be rolled over.
   b. Short-term firm service– is projected based on annual historical revenue.
   c. For the 2017 BP, the transmission rates for June 1, 2017 through May 31, 2023 were forecasted based on Attachment O of the OATT.

The projected intercompany transmission revenue is imported into UI from PowerPlan.

The transmission rates are documented in the LG&E and KU Open Access Transmission Tariff, which is reviewed and approved by the FERC. The projected load is applied to the appropriate transmission rates to calculate the transmission revenue.

Rate Case impacts

Projected timing of filings based on financial projections are every two years for Kentucky and Virginia jurisdictions and every year for FERC Formula Rate true up.

Revenue requirements calculated in UI using expected ROE based on past rate case settlements.

Miscellaneous Revenue

Miscellaneous revenue is comprised of:

- Forfeited discounts and late payment charges
- Reconnect, gas meter and inspection charges and temporary service charges
- Rent from electric and gas property
- Other Electric and Gas revenues which include Coal resale revenues
- Solar Share Subscriptions/Capacity Charges/Energy Credits
- Solar REC revenues
- Electric Vehicle Charging Station revenues

For most of the above items, the miscellaneous revenue is calculated by utilizing the historical trends and applying an inflation factor to the next five years, which is then uploaded into UI.

The historic trend is based on the most recent three years of data. The most recent three years was selected as the sample period due to the extreme outliers occurring before that period. Three years gave an appropriate distribution of data to evaluate the account activity.

An inflation factor of 2% was utilized. The 2% is reasonable based on the average of the two-year and three-year CAGRs of the account data. Accounts with extreme outliers were excluded. An account was determined to have an outlier if the account activity varied more than 50% from one year to the next. A 2% inflation factor provided a reasonable trend for the years in the BP.

The billing of the Louisville Water Company to provide standby service at one of their pumping stations is charged every January per the contract. It is a long-term contractual amount, which assumes no escalation from one year to the next. This account was excluded from the historical trend and escalation factor analysis.

For KU, the Cable TV Attachments and the Rent received from pole attachments, property, and equipment such as transformers accounts utilize the most recent year of data and are then escalated 2%. Rent from Fiber Optic is a fixed amount yearly. No escalation is assumed and the revenue is budgeted each January.

For LG&E, the Cable TV Attachments and the Rent received from pole attachments, property, and equipment such as transformers, and Rent from Fiber Optic accounts utilize the most recent year of data and are then escalated 2%.

A coal sale is essentially revenue derived from the transportation of coal for a third party. The Company does not purchase the coal or take possession of it; the Company utilizes an existing barge contract to transport the customer's coal. The revenues are based on the contract with the customer, which incorporates costs of the barging, trucking, labor hours, maintenance, plus the profit. The Company has a contract through June 2017, past June 2017, there is a negotiated price. There is no escalation factor.

Electric Vehicle Charging Station Rental revenues during the 2017 BP were supplied from the Smart Grid Strategy group. The revenues were matched to the capital plan from customer service.

Solar RECs were calculated utilizing the forecasted generation from Gen Planning and multiplied by a rate of $12 per MWh. One MWh of generation equals one REC. The price was obtained from the Manager of Trading.

Solar Share Program budgeted revenues were obtained from Customer Services and based on their approved capital plan which has an eight phase build schedule.

3. <u>Mechanisms</u>

Background

The Kentucky Public Service Commission has adopted a series of regulatory mechanisms that reduce regulatory lag and provide for timely recovery of and a return on, in some instances, prudently incurred costs. The following represents an overview of certain key mechanisms and assumptions reflected in the business plan.

Environmental Cost Recovery (ECR)

The Utilities are entitled to recovery of operating costs and recovery of and a return on capital costs of complying with Federal Clean Air Act with a two-month lag. The first step is to calculate the total revenue requirement which involves determination of environmental rate base and operating expenses for each KPSC approved ECR project.

Within UI the revenue requirement for ECR is calculated using the following:

- The logic calculates a monthly ending rate base by adding ECR capital expenditures from the capital plan to the previous months' ending rate base; subtracting ECR depreciation for the period and increase/decrease in ECR deferred taxes calculated within UI. A return on the ending rate base is calculated using a weighted average cost of capital computed within UI using weighted average cost of debt and allowed return on equity;
- ECR Depreciation and O&M is then added to the return on rate base to calculate a total revenue requirement;
- A jurisdictional factor is computed within UI using a ratio of KY retail to total revenue and applied to the total revenue requirement to calculate a jurisdictionalized ECR Revenue Requirement;
- The model then deducts any ECR revenue recovered within the base rates to generate a net ECR revenue.

Demand Side Management (DSM)

DSM provides for concurrent recovery of DSM costs and provides incentive for implementing DSM programs, including lost revenue.

In UI, there are four components for DSM revenue:

- DSM expense as imported from PowerPlan within the Cost of Sales import
- DSM incentive revenue as calculated in UI on the eligible portion of programs
- DSM Lost sales revenue as calculated in UI using the imported lost sales volume and rates from the DSM Energy Efficiency model
- DSM Capital revenue requirement is calculated in UI by adding the capital spend imported from PowerPlan to the previous month's ending DSM rate base, adjusted for depreciation, an increase/decrease in deferred taxes. A return on the DSM rate base is

calculated using a weighted average cost of capital computed within UI using weighted average cost of debt and allowed return on equity. In addition, the depreciation and O&M expenses are added to the return on the DSM rate base to calculate the total DSM Capital Revenue Requirement.

- DSM expense, incentive revenue, and lost sales revenues are added to the capital revenue requirement to calculate the total DSM revenue requirement.

Gas Line Tracker (GLT)

Currently the GLT provides for recovery of costs associated with replacing customer service risers, replacing and installing service lines, leak mitigation, and main replacements. In addition to these items, the budget has incorporated the steel gas service line program and the transmission pipeline modernization, which the Company is requesting approval to include in the GLT mechanism.

The GLT revenue requirement is calculated in UI using the following:

- The rate base is rolled forward for identified GLT projects using capital spend and in service dates per PowerPlan as well as the calculated deferred income taxes;
- The rate of return on rate base is computed within UI using weighted average cost of debt and allowed rate of return on equity.
- GLT Depreciation, Property Tax and O&M are then added to the return on rate base to calculate a total revenue requirement;

Fuel Adjustment Clause (FAC)

The FAC mechanism allows for near-real time recovery of allowed fuel expenses.

Total fuel expense incurred consists of all generation and purchased power costs. For FAC purposes, total recoverable fuel expense includes total incurred expense reduced by the following components: non-energy components of purchased power expense; substitute generation or purchased power costs during forced outages; coal burned for OSS electric generation, company use, and unrecoverable intercompany sales. The total recoverable fuel expenses is then compared to the base fuel revenues. The over/under is booked to The Fuel Adjustment Clause.

Mechanism Revenue Calculations

For all mechanisms, except for the GLT, the total mechanism revenue requirement is divided by the total forecasted megawatt hours by electric rate code associated with each mechanism. These values are applied as a dollar per megawatt hour to calculate the revenue by electric rate code.

For GLT, the total mechanism revenue requirement is allocated to the customer class associated with GLT based on the class allocation percentages from the most recent filing.

The revenues from all mechanisms are recorded to the income statement as revenues from customers.

4. <u>Generation Forecast, Off-System Sales (OSS) and Other Cost of Sales (COS)</u>

The PROSYM application is used to calculate generation and OSS. See the annual Plan Generation Forecast Process Document and related presentations, for a detailed description of the assumptions and methodology used to calculate these inputs.

The projected data includes fuel burn, generation, purchase power, emissions, and OSS levels from an hourly dispatch model. Imported into UI is a monthly, by unit, volumes, revenues and / costs associated with off system sales, purchased power, emissions, generation, and fuel burn for the planning period.

OSS

Included in the previous rate case settlement was an OSS Tracker which results in sharing the OSS margins on a 75 percent - 25 percent basis, with 75 percent of the OSS margins being credited to customers via the Fuel Adjustment Clause.

Power Purchase Agreement

Power purchase agreement costs are based on the contracts set with the third party power producer. The amounts per the contracts are imported into UI, which is recorded on the income statement as the purchased power cost. The information uploaded into UI by month and year includes the following costs:

- Capacity and demand payments
- Energy payments, and
- Firm gas transport costs, if applicable

UI logic ensures the power purchase cost reflects the recovery of the energy and firm gas transport costs through the fuel adjustment clause and the capacity and demand cost through base rates.

Other Cost of sales (COS)

OCOS inputs come from PowerPlan and PROSYM. Off system sales, purchased power, and fuel related costs come from PROSYM, as noted above. Emissions, mechanism (DSM, ECR, ECR, GSC, and GLT), and transmission related costs come from PowerPlan.

Other electric cost of sales includes variable production consumables used by the power plants in the generation of electricity. For coal units, this includes the cost of operating environmental controls and the cost of controlling coal combustion residuals. This includes:

  - Limestone – SO_2 emission control for flue gas desulfurization (FGD) systems
  - Ammonia – NO_X emission control for selective catalytic reduction (SCR) systems
  - Hydrated Lime – SO_3 emission control for sorbent injection systems
  - Powder Activated Carbon – Hg emission control for pulse jet fabric filter systems

The individual power plant's budget coordinator, in coordination with the operations leadership team at the plant, calculates the costs. This is a function of the usage rates for the consumables utilized by each individual operating unit. This is multiplied by the unit price determined by fleet wide contracts with suppliers. Planned outages and forecasted generation levels by year are included in these assumptions for each unit.

The calculation for these consumables includes the following inputs and calculations:

Unit Price	Usage Rate	Unit Production	Conversion	Total Projected Cost
$/ton (lbs.)	lbs. /hour	MWH's by unit	$/MWH	Total $ by month and year

These costs are loaded into PowerPlan under the appropriate FERC account and then uploaded into UI and incorporated into the Income Statement.

The cost of sales items related to fuel burn, emissions and purchased power are reflected in the Cost of Electric Sales section of the Income Statement.

Gas Supply

Gas supply costs are calculated by using the gas load forecast priced out at contracted rates and market prices for open/indexed positions.

5. Operations & Maintenance (O&M) (Non-fuel)

Operations and Maintenance expenses are included as part of the Income Statement and reflect the labor and nonlabor expenditures incurred and charged to the appropriate FERC account and company location. The budget is developed in a "bottoms up" approach and is reviewed and approved by several levels of management before being entered into PowerPlan for consolidation. This information is then uploaded to UI for review and approval.

Labor Cost

The Company's current labor base is obtained from PeopleSoft annually in May. The PeopleSoft data is exported to excel where the wage increases, vacation hours, personal days, and sick time are manually added. The adjusted data is imported into PowerPlan with the labor forecast being available by mid-May. The forecast includes full-time and part-time regular employees, summarized by employee type and expenditure organization.

Updates to the forecast in PowerPlan are due in early June. This updated data is used to calculate employee benefit costs (also referred to as 'burdens' - which include costs such as pension, savings plan, medical, dental, and payroll taxes) , which will be added to the forecast by mid-June. The labor forecast is not finalized at this time and changes can be made, as required.

Non-labor Expenses

The management teams and budget coordinators throughout the lines of business areas prepare the budget for non-labor O&M expenses at the same time as the labor budget. These expenses are budgeted to the appropriate FERC account.

Planned changes in costs within accounts can be specifically escalated according to contracted changes and other volume based assumptions or expected changes in primary cost categories such as generation facilities, outages, workforce plan changes, demand-side management, and environmental costs.

- The labor rates are subject to possible adjustment pursuant to union negotiations. The rate increase assumptions are based on annual benchmarking studies performed.
- Non-labor expenses contain a general inflationary increase for assumed growth in expenses not specifically tied to contracts or fixed amounts.

6. Property Tax

Property taxes are estimated annually based on net book asset values as of December 31 of the previous year and includes several current asset balances such as; fuel inventory and materials and supplies. The expense accrual is spread evenly over twelve months while cash payments are based on historic trends, which normally results in large cash payments during the fourth quarter of a calendar year. Property tax data is imported into UI by FERC account by utility.

The primary source of data used to calculate the estimates is within the UI report labeled “KY Plant Account” report from UI Planner. The plant account assignment determines the property classification (real estate, manufacturing machinery, other tangible) and then the appropriate tax rates are applied to those balances. State and local tax rates are based on prior year settlements with an assumed increase to local tax rates of two percent per year. Property taxes related to rate mechanisms are calculated separately and manually adjusted in UI.

7. Other Income Statement Items

Other income and expense items not included above include:

- Donations – annual budget is approved by Senior Officers based on planned commitments and in support of Community and Corporate Responsibility initiatives
- Employee Recognition costs (non-safety related) – based on detailed review of historical and projected expenses for employee recognition programs under each business unit
- Non-Utility Revenues and Expenses – based on detailed review of historical and projected items, including contracted based amounts and projected increases
- Interest income and dividends received – primarily interest received which is based on the interest income from temporary cash investments. The interest rate is obtained from the Treasury department and UI calculates the monthly expected interest income based on the temporary cash investment balance.

8. Taxes

Current and Deferred Income Taxes

Income taxes are calculated using several schedules within UI. The calculation starts by utilizing the monthly pretax book income per UI's income statement. Pretax book income is then adjusted by permanent and temporary book/tax differences to derive taxable income. The book/tax differences are primarily pulled from multiple sources within UI, which include;

- tax depreciation,
- book depreciation,
- regulatory asset & liability movement,
- pensions/post-retirements,
- capitalized interest, and
- Section 199, etc.

Other book/tax differences are manually input into UI. Taxable income is multiplied by the statutory tax rates to determine current tax expense. Quarterly tax payments are derived based on current tax expense.

Deferred taxes are calculated within UI by using the temporary book/tax differences used in the current tax calculation and applying the statutory tax rates. Adjustments to deferred tax expense are made for excess deferred taxes and a basis reduction due to the Trimble County 2 investment tax credit (ITC). Additionally, the ITC amortization is manually entered into UI based on ITC amortization schedules maintained by the Tax department.

9. Capital / Utility Plant

Background

Each line of business develops a five-year Capital plan by individual project that includes the start date, the timing of expected spend projections and the in service date for each project. The Capital plan is entered into and maintained in PowerPlan.

The Senior Officers approve the Capital plan each year. The Capital plan is presented to the Senior Officers for approval by a subcommittee referred to as the Resource Allocation Committee ("RAC"). The RAC includes leaders from multiple business lines so that Capital decisions are made based on priorities of the company as a whole.

In order to import the capital budget into UI, Financial Planning receives an excel file from PowerPlan containing monthly capital construction expenditures (CWIP) and cost of removal (RWIP) by utility. There are categories in the model used to separate mechanism capital (ECR, DSM, GLT) from non-mechanism capital.

10. Closings to Plant in Service and Depreciation

After Capital Spending is booked to CWIP on the balance sheet, UI gets an import from PowerPlan by Plant account to determine additions to Plant in Service.

UI also imports a Depreciation forecast that is done based on capital plan, including property classifications and in service dates, and approved depreciation rates.

The approved depreciation rates are from the latest depreciation study, which are broken into life, salvage, and cost of removal per depreciation group. The rates are annual, so they are divided by 12 and multiplied by the monthly plant in service ending balances. The depreciation group to which an asset belongs is determined by the location and plant account selected at the time the capital project is setup in PowerPlan.

The plant in service ending balance for the most recent month of actuals is pulled out of PowerPlan. The ending balance of each forecast month is calculated as the beginning plant in service balance plus any capital additions placed in service for the month minus any asset retirements for the month. We use a half-month convention for additions and retirements. In the first month of an addition or retirement to plant in service, we divide the normal depreciation amount by two. This is done to average out the spend since the addition or retirement does not always occur on day one of the month.

The additions to plant in service are based on the capital forecast and the estimated in service dates on those assets. If the asset is already in service and additional money is spent on those assets, it is put in plant in service in that same month of spend. If the asset is not yet in service and spend occurs, it is held in CWIP until the month of the estimated in-service date in PowerPlan, on which date the entire CWIP balance is moved to plant in service.

11. Dividends, Debt and Equity

Dividends:

LG&E and KU pay dividends to its parent, LKE, on a quarterly basis. The dividend has historically been calculated in the model using a payout assumption equal to 65 percent of the previous quarter's net income. This percentage may be revised to maintain a balanced capital structure. Equity contributions from the parent may also be received by LG&E and KU to maintain the desired capital structure.

Capital Structure:

LG&E and KU (the "Utilities") strive to maintain a ratio of 53 percent equity and 47 percent debt. Within UI, the debt balancing and equity ratio targeting logic is different on the quarter versus non-quarter months. Equity ratio targeting reviews the capitalization ratios and rebalances it every quarter to 53 percent equity and 47 percent debt. The Utilities Parent (LKE) serves as the medium to move cash from the utilities to parent or from the parent to the utilities to maintain this ratio. Cash balancing logic looks at the cash needs and calculates how to fund those needs. It is important to note that UI limits cash balances at the utilities to $5 million unless short-term debt is zero and there is positive cash flow from operating and investing operations.

The following information is entered into UI for each individual debt issuance: company, issue date, interest rate, first interest payment date, issue amount, and retirement date. These debt issuance properties are entered and maintained in UI under the Edit Attributes module. The attributes in the business plan are compiled to create a case, which is used to run the Business Plan scenario.

On the non- quarter months, UI calculates cash needs from operating and investing operations and issues debt equal to cash shortage. Short-term debt in the form of commercial paper is issued first until it reaches a maximum as prescribed by the Treasury department (typically $300 million by utility) The utilities each have approved commercial paper programs of $350 million and FERC has approved short-term debt of up to $500 million for each utility. However, the utilities need to maintain liquidity for emergencies and to support certain floating rate tax-exempt bonds. Therefore, the Companies have a general modeling limit of $300 million on the commercial paper balances. The maximum can be changed after discussions with Treasury and the CFO. Once the maximum short-term debt is reached, long-term debt is issued in increments of $250 million or more and the balancing starts again the next month. The $250 million minimum is used because at that size the bonds are index-eligible and more attractive to investors, which results in a lower interest rate.

On the quarter months, the model balances equity and debt to a 53:47 ratio over multiple iterations. While performing the debt: equity targeting, UI issues only short-term debt to fund cash needs from operating and investing activities. The model is monitored to make sure that short-term debt balances are always within the acceptable limits. Similarly, to the non-quarter months, once the maximum short-term debt is reached, long-term debt is issued in increments of $250 million or more. Capital contributions in the form of equity from LKE are used to maintain the proper equity: debt ratios. LKE receives capital contributions from PPL to fund the utilities cash needs.

All short-term rates and interest on cash balances are based on a spread to the three-month LIBOR. The spread is based on current market issuances for similarly rated companies. For long-term debt, the rates are based on a spread to the US treasury rates (five-year, ten-year, thirty-year, etc.). The long-term debt spreads are also based on current levels for similarly rated entities and projected changes in those spreads for forecast periods. The forward curve as of a selected date is used to determine future LIBOR and US treasury rates.

12. Pension & Postretirement

Plan assumptions are evaluated by Senior Financial officers and Human Resources associates and the independent actuary. These assumptions are approved on an annual basis, barring any events requiring an interim re-measurement.

During the first half of the year, the independent actuary delivers a projection of estimated Plan funding, pension expense and pension liability for the five-year plan based on management's assumptions. These assumptions include the annual discount rate, the expected return on plan assets, the expected wage increase, the annual mortality rate table, funding policy and other assumptions as needed. The actuary's projections also incorporate the 15 year amortization of gains and losses as agreed in the 2014/2015 Kentucky rate case.

The projected pension and postretirement costs received from the actuary such as the service cost, interest cost, return on plan assets, and amortizations of prior service cost, transition, and (gain)/loss are summarized by company and by program offering. These amounts are used to update the annual budget by reflecting changes to the balance sheet for the revised liability projections and the pension cost used when calculating the employee burden rates by company. The pension burden rates are included in the O&M and Capital budgets entered into PowerPlan. These amounts are spread by month consistent with the timing of the labor budget.

Pension funding is assumed to occur annually in January while postretirement funding is assumed quarterly with the 401(h) portion of the funding occurring all in the second quarter.

13. Other Balance Sheet assumptions

a. Balances

The annual August balances from the balance sheet were the starting point for this forecast. The amounts were imported to UI from Oracle General Ledger (GL). A detailed and thorough balancing process is also done to ensure all details from Oracle translate appropriately into UI.

b. Cash

As noted above minimum cash balances are set each year at $5 million per utility. This is based on discussion with Treasury and if UI determines insufficient cash balances based on the projected activity short-term debt is issued.

c. Accounts Receivable and Unbilled Revenue

The monthly balances are based on forecasted revenues from customers and projected days of sales in receivables based on historical trends.

d. Fuels, materials and supplies (M&S)

Fuel inventory balances are developed based on targeted inventory levels for each generation plant. PROSYM is utilized to determine the amount of purchases needed to achieve the targeted inventory levels. Price assumptions for coal purchases utilize existing contract information as well as the assumed cost of coal that will be contracted in the future.

Natural Gas Inventory: Storage inventory levels are set within storage operating parameters in order to achieve maximum deliverability needed to meet winter season requirements. Price assumptions for gas purchases reflect forecasted gas prices and estimated pipeline transport costs.

Materials and supplies inventory is based on the annual August balance and is adjusted for disposals.

e. Prepayments affecting the balance sheet include insurance, IT contracts, PSC Fees, and TVA fees. For insurance, the amortization of the balance/expense begins at the start of the policy and continues through the term of the policy. For IT contracts, the estimated balances are amortized monthly over the period of services. For the PSC fees, and TVA fees, we receive a bill for the current year. The out years of the budget are escalated at an appropriate rate and the yearly cost is amortized over twelve months.

f. Unamortized debt expenses

For each bond issued, the Company incurs debt issuance costs, which are amortized over the period required by GAAP, generally the life of the debt issued. Additional financing costs that require amortization are unamortized loss on reacquired or remarketed debt, which is the expense that remains to be amortized when a debt instrument is remarketed/refinanced/repurchased. The financing costs are amortized over the life of the replacement debt. Amortized financing costs are calculated in excel for future periods and input into UI. The amortization expense flows to the income statement under interest expense. The unamortized financing costs are found on the balance sheet under other non-current assets and the unamortized loss on reacquired or remarketed debt are found on the balance sheet under regulatory assets.

g. Regulatory Assets and Liabilities

Adjustments to the regulatory assets and liabilities are obtained from schedules produced by the Company's Accounting Department, reflecting amortization rates previously approved by the Commission on existing line items and line of business proponent estimates for proposed line items. These schedules include storm costs, rate case expenses, MISO exit fees, interest rate swaps, deferred income taxes, etc.

Unrecognized pension and post-retirement costs are amortized as part of the monthly expense projections discussed earlier.

UI performs calculations for regulatory assets and liabilities associated with the various rate mechanisms to address regulatory lag issues and under/over recoveries. The amortization of interest rate swap regulatory liabilities and assets are performed using UI logic.

h. Asset retirement obligations (ARO)

The calculation of accretion expense is performed in an automated fashion within the PowerPlan Fixed Asset System. Accretion expense is calculated by taking the beginning ARO liability balance multiplied by the discount rate for each ARO.

Annual Electric Sales & Demand Forecast Process

PPL companies

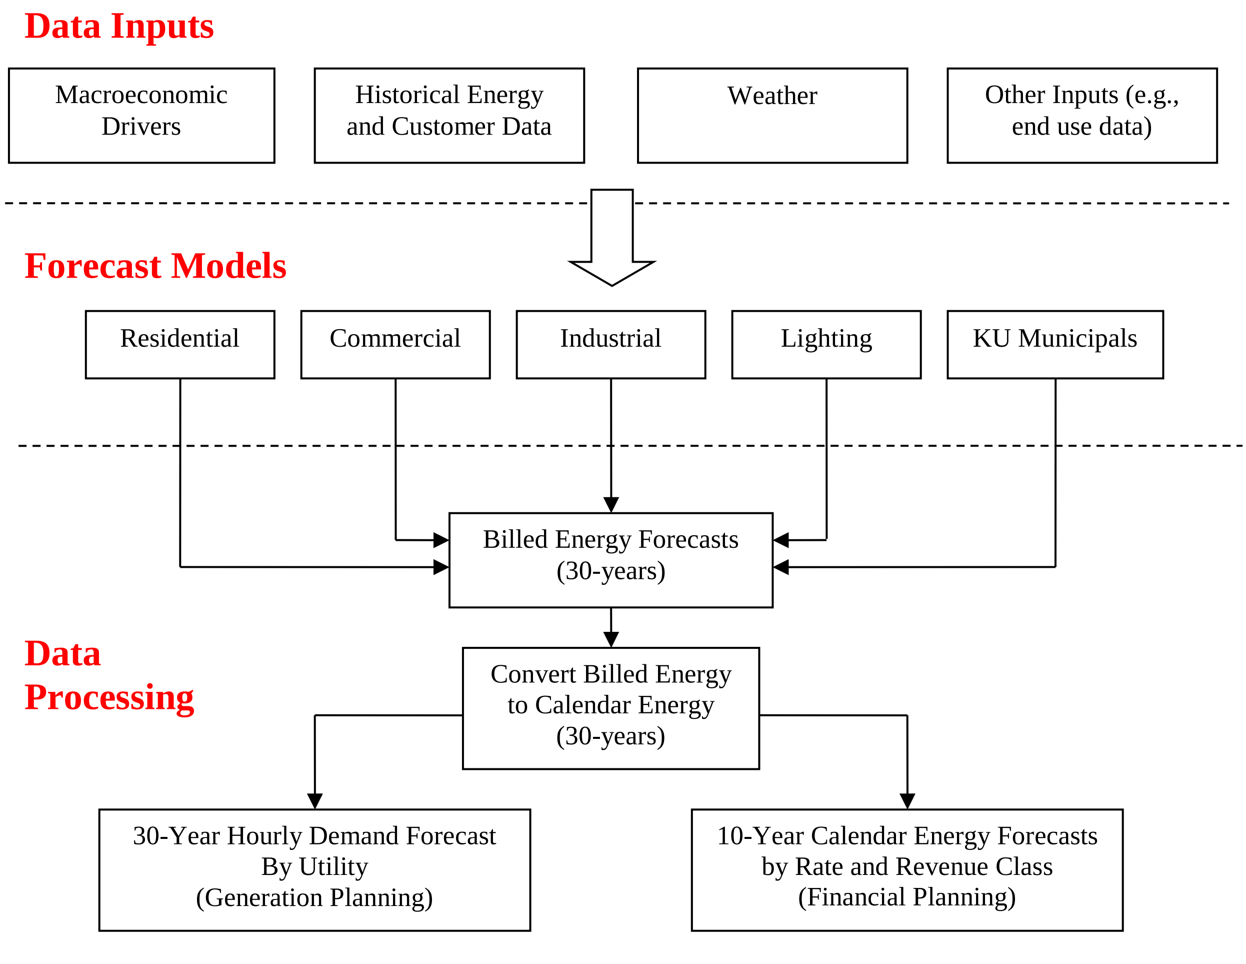
Sales Analysis & Forecasting
September 2016

Table of Contents

1. Introduction

The Sales Analysis & Forecasting group develops the annual Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") (collectively "the Companies") sales and demand forecasts. These forecasts serve as foundational inputs for the Generation Planning department's annual Generation Forecast and the Financial Planning department's annual Business Plan. This document summarizes the processes used to produce the annual sales and demand forecasts. The forecast process can be divided into three parts (see Figure 1).

Figure 1 – Load Forecasting Process Diagram



The first part of the forecast process involves gathering and processing input data. The following are key inputs to the forecast process:

- Macroeconomic data
- Historical energy and customer data
- Weather data

- Other data, including billing cycle forecasts, class-level electricity price series, and residential appliance shares and efficiencies.

The input data is used to specify various forecast models. Generally, each model is used to forecast energy sales for a group of customers with homogeneous energy-use patterns within the same, or similar, tariff rates.

Most of the forecast models produce energy forecasts on a monthly billed basis.[1] In the third part of the forecast process, energy data from the forecast models is processed to meet the needs of forecast end users. The monthly billed energy forecasts must first be converted to calendar month (or "as-used") forecasts. The billed and calendar sales forecasts are allocated by rate and revenue class for the Financial Planning department.[2] In addition, a forecast of hourly energy requirements is developed for the Generation Planning department.[3]

The final part of the forecast process includes validating and documenting the forecast results. To ensure results are reasonable, the new forecast is compared to (i) the previous forecast and (ii) weather-normalized actual sales for the comparable period in prior years. Each of these steps is discussed in more detail in the following sections.

[1] All customers are assigned to one of 20 billing cycles. A billing cycle determines what time of the month a customer's meter is read. Because most billing cycles do not coincide precisely with the boundaries of calendar months, most customers' monthly bills will include energy that was consumed in multiple calendar months. The energy on customers' bills is referred to as "billed" energy.
[2] Rate class defines the tariff assigned to each customer meter while Revenue class is a higher level grouping; a Revenue class consists of one or more rate classes.
[3] Energy requirements are equal to sales plus transmission and distribution losses.

2. Input Data

Table 1 provides a summary of data inputs. The sections that follow describe key processes used to prepare the data for use in the forecast process.

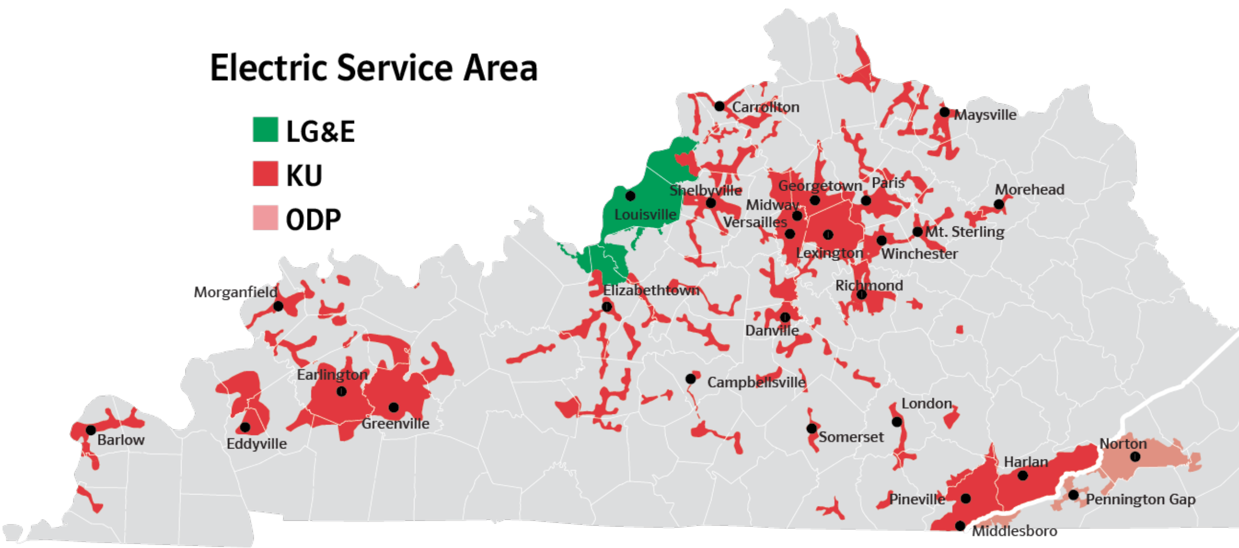
Table 1 – Summary of Forecast Data Inputs

Data	***Source***	***Format***
State Macroeconomic and Demographic Drivers (e.g., Employment, Wages, Households, Population)	IHS Global Insight, Kentucky Data Center	Annual or Quarterly by County – History and Forecast
National Macroeconomic Drivers	IHS Global Insight	Annual or Quarterly – History and Forecast
Personal Income	IHS Global Insight	Annual by County
Weather	NOAA	Daily HDD/CDD Data by Weather Station – History
Bill Cycle Schedule	Revenue Accounting	Monthly Collection Dates – History and Forecast
Appliance Saturations/Efficiencies	EIA, 2010 LG&E/KU Residential Customer Survey	Annual – History and Forecast
Structural Variables (e.g., dwelling size, age, and type)	EIA, 2010 LG&E/KU Residential Customer Survey	Annual – History and Forecast
Elasticities of Demand	EIA / Historical Trend	Annual – History
Billed Sales History	CCS Billing System	LG&E, KU and ODP – Monthly by Rate Group
Number of Customers History	CCS Billing System	LG&E, KU and ODP – Monthly by Rate Group

2.1 Service Territory-Specific Macroeconomic Forecasts

IHS Global Insight produces forecasts of macroeconomic drivers by county. With an understanding of the counties that make up each service territory, this data can be used to create service territory-specific forecasts of macroeconomic drivers. Figure 2 contains a map of the LG&E and KU/ODP electric service territories.

Figure 2 – LG&E and KU/ODP Service Territory Map



Two counties make up the majority of the LG&E service territory, while KU serves customers in parts of over 70 counties; ODP's service territory includes parts of five counties in southwestern Virginia.[4] Service territory-specific macroeconomic forecasts are created by aggregating the applicable county-specific forecasts for the counties in LG&E, KU, and ODP service territories.

2.2 Software Tools

The following software packages are used in the forecast process:

- Microsoft Office: Excel, PowerPoint, Access
- SAS
- R
- Itron Metrix ND
- @Risk

2.3 Processing of Weather Data

Weather is a key explanatory variable in the electric forecast models. The weather dataset from the National Oceanic & Atmospheric Administration's (NOAA) National Climatic Data Center (NCDC) contains temperatures (maximum, minimum, and average), heating degree days (HDD), and cooling degree days (CDD) for each day and weather station over the past 20+ years. This data is used to create a historical weather series by billing month and a forecast of "normal" weather by billing month.[5] Each of these processes is summarized below.

[4] Appendix A contains a list of the counties in each service territory.
[5] "Normal" weather is defined as the average weather over a 20-year historical period. The Companies do not attempt to forecast any trends in weather.

2.3.1 Historical Weather by Billing Month

The methodology used to create the historical weather series by billing month consists of the following steps:

1. Using the historical daily weather data from the NCDC, sum the HDD and CDD values by billing cycle.[6] Each historical billing month consists of 20 cycles. The Companies' historical meter reading schedule contains the beginning and ending date for each billing cycle.
2. Average the billing cycle total HDDs and CDDs by billing month.

2.3.2 Normal Weather Forecast by Billing Month

The methodology used to produce the forecast of normal weather by billing month includes the production of a daily forecast of normal weather. The methodology used to develop the daily forecast (summarized in Steps 2-5) is consistent with the methodology used by the NCDC to create its daily normal weather forecast.[7] The following steps are used to create the forecast of normal weather by billing month:

1. Compute the forecast of normal monthly weather by *calendar* month by averaging monthly degree-day values over the period of history upon which the normal forecast is based. The normal weather forecast is based on the most recent 20-year historical period. Therefore, the normal HDD value for January is the average of the 20 January HDD values in this period.
2. Compute "unsmoothed" daily normal weather values by averaging temperature, HDDs, and CDDs by calendar day. The unsmoothed normal temperature for January 1, for example, is computed as the average of the 20 January 1 temperatures in the historical period. This process excludes February 29.
3. Smooth the daily values using a 30-day moving average centered about the desired day. The "smoothed" normal temperature for January 1, for example, is computed as the average of the unsmoothed daily normal temperatures between December 16 and January 15.
4. Manually adjust the integer values in Step 3 so that the following criteria are met:
    a. The monthly average temperature – computed by averaging the daily temperatures by month and rounding to the nearest integer – should match the normal monthly temperatures in Step 1.
    b. The sum of the daily HDDs and CDDs by month should match the normal monthly HDDs and CDDs in Step 1.
    c. The daily temperatures and CDDs should be monotonically increasing from winter to summer and monotonically decreasing from summer to winter. The daily HDD series should follow a reverse trend.

   These criteria ensure the daily normal series is consistent with the monthly normal series.
5. The Companies' forecasted meter reading schedule contains the beginning and ending date for each billing cycle through the end of the forecast period. In this step, sum the HDD and CDD values by billing cycle. Use the February 28 weather data as a proxy for February 29 when billing cycles include leap days.
6. Average the billing cycle totals by billing month.

[6] Weather data in the electric forecast is taken from the weather stations at the Bowman Field Airport (LOU) in Louisville, Bluegrass Field Airport (LEX) in Lexington, and Tri-Cities Airport in Tennessee.
[7] The NCDC derives daily normal values by applying a cubic spline to a specially prepared series of the monthly normal values.

3. Forecast Models

The Companies' energy forecast is comprised of multiple forecast models. All models forecast sales and the number of customers on a monthly basis. These forecasts are discussed in detail in the following sections.

3.1 Residential Forecast

The Residential forecast is comprised of three classes: KU Residential, LG&E Residential, and ODP Residential. The Residential forecast includes all customers on the Residential Service (RS) and Volunteer Fire Department (VFD) rate schedules. Residential sales are forecasted for each company as the product of a customer forecast and a use-per-customer forecast.

3.1.1 Residential Customer Forecast

The number of residential customers is forecasted by company as a function of the number of forecasted households or forecasted population in the service territory. Household and population data by county and Metropolitan Statistical Area (MSA) is available from IHS Global Insight and the Kentucky Data Center.

3.1.2 Residential Use-per-Customer Forecast

Average use-per-customer is forecast using a Statistically-Adjusted End-Use (SAE) Model. Such a model combines an econometric model – that relates monthly sales to various explanatory variables such as weather and economic conditions – with traditional end-use modeling. The SAE approach defines energy use as a function of energy used by heating equipment, cooling equipment, and other equipment.

$$\text{Use-per-Customer} = a1*XHeat + a2*XCool + a3*XOther$$

The heating, cooling and other components (i.e., the X variables) are based on various input variables including weather (heating and cooling degree days), appliance saturations, efficiencies, and economic and demographic variables such as income, population, members per household and electricity prices. Once the historical profile of these explanatory variables has been established, a regression model is specified to identify the statistical relationship between changes in these variables and changes in the dependent variable, use-per-customer. A complete summary of this model is contained in Appendix A to Itron's Residential SAE Update; this appendix is attached as Appendix B.

3.2 Commercial Forecast

The Commercial forecast is comprised of the following models: KU General Service, KU Commercial, KU All-Electric Schools, LG&E General Service, LG&E Commercial, ODP General Service, ODP Commercial, ODP Schools and ODP Municipal Pumping. Each of these rate classes is forecasted separately on a monthly basis over the forecast period. The period of historical data used in the models varies based on each rate class's history.

3.2.1 KU, LG&E, and ODP General Service

The general service forecasts include all customers on the General Service (GS) rate and are comprised of two separate forecasts: a sales forecast and a customer forecast. The former employs a Statistically-Adjusted End-Use model (SAE), which defines energy use as a function of energy used by heating equipment, cooling equipment, and other equipment. A complete summary of this model is contained in Appendix A to Itron's Commercial SAE Update; this appendix is attached as Appendix C.

The customer forecasts are a function of household or population growth since, historically, they are highly correlated.

3.2.2 KU Commercial

The KU Commercial forecast includes all customers on the PS Secondary and TOD Secondary rates. Sales to PS Secondary customers are modeled as a function of heating and cooling degree days, Retail and Wholesale Employment indices, and binary variables which account for anomalies in the historical data.

3.2.3 KU All-Electric Schools (AES)

The KU All-Electric Schools forecast includes all customers on the All-Electric School rate schedule. KU AES sales are modeled as a function of the number of KU households, weather, and binary variables to account for anomalies in the historical data.

3.2.4 LG&E Commercial

The LG&E Commercial forecast includes all customers on the CPS Primary, CPS Secondary, CTOD-Primary, and CTOD-Secondary rate schedules. The Primary and Secondary rates are forecasted separately to capture similar energy usage patterns and levels. LG&E Commercial sales are forecast in total as a function of weather, specific economic drivers, the number of customers, and other binary variables to account for anomalies in the historical data.

3.2.5 LG&E Special Contracts

The LG&E Special Contracts forecast includes Louisville Water Company and Fort Knox. These customers are forecasted individually, based on information and feedback from the customers and major account representatives.

3.2.6 ODP Commercial

The ODP Commercial forecast includes all customers on the PS Secondary and TOD Secondary rates. Sales to PS Secondary customers are modeled as a function of heating and cooling degree days, specific economic drivers, and binary variables which account for anomalies in the historical data.

3.2.7 ODP Schools

The ODP Schools forecast includes all customers on the School Service (SS) rate schedule. Sales to the ODP schools are modeled as a function of the number of households, weather, and binary variables.

3.2.8 ODP Municipal Pumping

The ODP municipal pumping forecast consists of customers on the Water Pumping Service rate schedule. ODP municipal pumping sales are forecasted using a trend model based on recent sales.

3.3 Lighting Forecast

The Lighting forecast is comprised of the following rate classes: LG&E LES and TES, KU LES and TES, and unmetered Street Lighting for each company. All lighting-related energy is forecasted using a trend model based on recent sales.

3.4 Industrial Forecast

A relatively small number of customers in an industrial rate can make up a significant portion of the total sales for that rate. Furthermore, any expansion or reduction in operations by the larger industrial customers can significantly impact the Companies' load forecast. Therefore, the Companies work directly with the largest industrial customers (Major Accounts) to develop their forecasts. The large individually forecasted customers are removed from the historical energy sales data by rate, while the remaining customers are forecasted using econometric models described below. The total rate forecast is the combination of the individually forecasted customers and the customers forecasted using econometric models.

3.4.1 KU Industrial Forecast

The KU industrial forecast is comprised of three forecast models. The forecast models are aggregated by rate codes by voltage level.

3.4.1.1 Primary

The PS Primary, TOD Primary, and LTOD Primary rates are forecasted together, then allocated into individual rate forecasts using historical sales ratios. The Primary forecast includes all customers that take service at the primary distribution voltage. Sales to Primary customers are modeled as a function of an industry-weighted Industrial Production Index and weather.

3.4.1.2 Retail Transmission Service

The RTS forecast includes all retail customers previously on a Transmission-level rate. Since a large component is sales to Mine Power customers, the Wood-MacKenzie forecast of Eastern and Western Kentucky coal production is used as a driver. In recent years, the demand for lower sulfur eastern Kentucky coal has declined while the demand for higher sulfur western Kentucky coal has increased. Therefore, two mining forecasts are developed to more accurately reflect this trend. The two forecasts are combined to form the final KU RTS forecast.

3.4.1.3 Fluctuating Load Service

The FLS forecast includes one customer, the North American Stainless Arc Furnace. The FLS forecast is developed based on discussions with the customer.

3.4.2 LG&E Industrial Forecast

The LG&E industrial forecast consists of three forecast models: Industrial Primary (Power Service and Time of Day), Industrial Secondary (Power Service and Time of Day), and Retail Transmission Service. Each of these rate classes is forecasted separately with specific economic drivers and weather.

3.4.2.1 Industrial Primary (Power Service and Time of Day)

The Industrial Primary forecast includes all customers on Industrial Primary rates. Monthly sales are modeled as a function of an industry-weighted Industrial Production Index, number of customers, and weather.

3.4.2.2 Industrial Secondary (Power Service and Time of Day)

The Industrial Secondary forecast includes all customers on Industrial secondary rates. Monthly sales are modeled as a function of an industry-weighted Industrial Production Index, number of customers, and weather.

3.4.2.3 Retail Transmission Service

The RTS rate consists of both individually forecasted major accounts and smaller customers. The major accounts customer forecasts are developed with input from the major account managers and customer input. The remaining smaller customer forecasts are developed using a trend model based on recent sales.

3.4.3 ODP Industrial Forecast

The ODP industrial forecast is a combined forecast of PS Primary, TOD Primary, and RTS rates. Industrial sales are forecasted as a function of the Eastern Kentucky Wood-MacKenzie index, number of customers, and weather.

3.5 KU Municipal Forecast

KU municipal forecasts are provided by various consultants for different cities. These forecasts are reviewed for consistency and compared to historical sales and trends. Questions or concerns regarding the forecasts are sent to the municipal customers and their consultants, if applicable. Any subsequent revisions received from the municipal customers are incorporated into the forecasts.

3.6 Billed Demand Forecast

The Billed Demand forecasts are based on historical demand factors, where the demand factor is the billed demand volume divided by the billed sales volume. The historical demand factor is then multiplied by the sales forecast for rates that have billed demand components.

4. Data Processing

The Companies' customers are assigned to one of 20 billing cycles. Because most billing cycles do not coincide directly with the boundaries of calendar months, most customers' monthly bills will include energy that was consumed in multiple calendar months. The energy on customers' bills is referred to as "billed" energy. Most historical sales data is recorded on a billed basis. As a result, most energy forecasts are produced initially on a billed basis. To meet the needs of the forecast end users, the billed energy must be further processed. The following processes are discussed in more detail in the following sections:

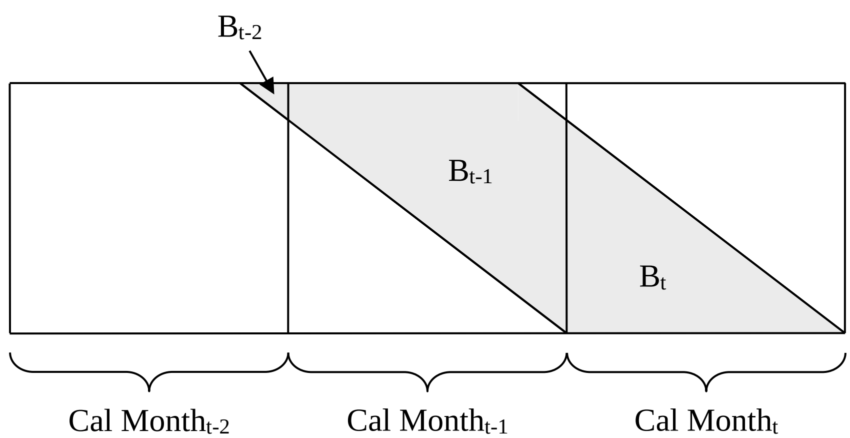
1. Billed-to-Calendar Energy Conversion
2. Rate Code and Revenue Class Allocation
3. Hourly Energy Requirements Forecast

4.1 Billed-to-Calendar Energy Conversion

Since the billed volumes for most forecast classes do not coincide directly with the boundaries of calendar months, most class forecast volumes must be converted from a billed to calendar basis. Forecasts for the following rate classes do not have to be converted from a billed to calendar basis: LG&E Special Contracts, KU FLS and KU municipals. The customers in these forecast classes are billed on a calendar-month basis.

The shaded area in Figure 3 represents a typical billing month (B). Area B_t represents the volumes in the billing month that were consumed in the current calendar month (time = t). Area B_{t-1} represents the volumes in the billing month that were consumed in the previous calendar month (time = t-1). Area B_{t-2} represent the volumes in the billing month that were consumed in the calendar month two months prior to the current month (time = t-2).[8]

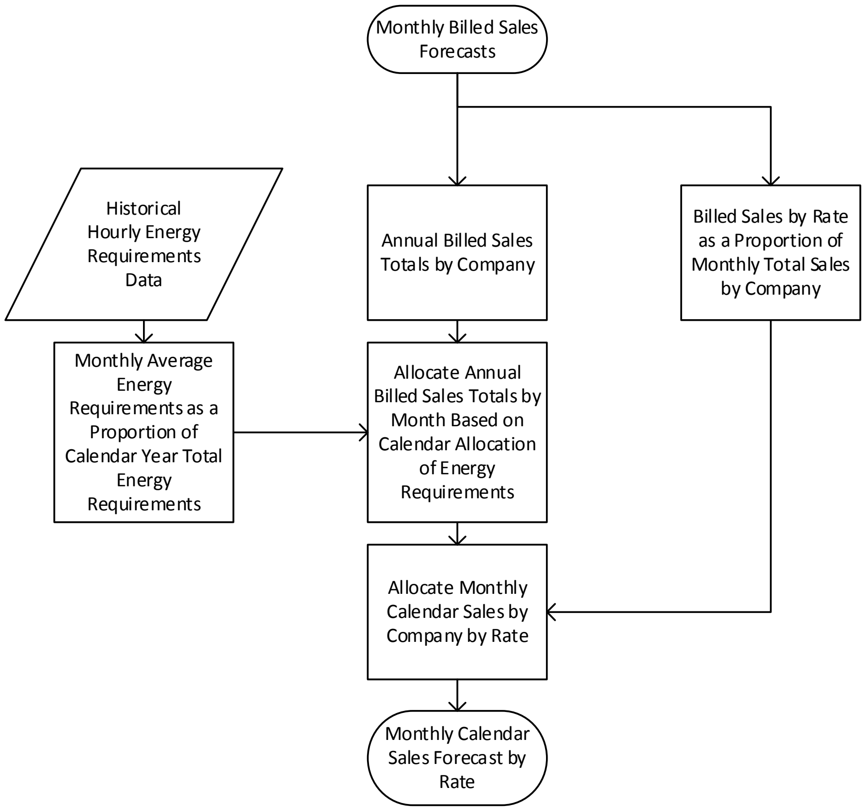
Figure 3 – Billed and Calendar Energy



Using historical hourly energy requirements data by company (KU/ODP, LG&E) to obtain calendar monthly allocation ratios, the annual billed sales forecasts (by company) are allocated into months using the calendar monthly allocation ratios. This yields monthly calendar sales forecasts by company. These monthly calendar sales by company are then allocated into rate classes using the ratio of billed sales by rate to total billed sales. Figure 4 shows a diagram of the process.

[8] Not all billing months include volumes that were consumed in the calendar month two months prior to the current month.

Figure 4 – Billed-to-Calendar Allocation



4.2 Rate-to-Revenue Class Allocation

To meet revenue forecasting requirements, the billed and calendar energy forecasts, which are initially developed by rate class, must be allocated to revenue classes. Revenue class is a higher level grouping; all rate classes are allocated to one or more of the following revenue classes (see Appendix D):

- Residential
- Commercial
- Industrial
- Public Authority
- Wholesale
- Lighting

This information is used by the Financial Planning department to develop a forecast of revenues for the planning period. Billed and calendar forecasts are allocated by rate and revenue class using a set of monthly allocation ratios. These ratios are derived based on historical sales data from CCS for energy, demand, and customers by rate class and revenue class.

4.3 Hourly Energy Requirements Forecast

The hourly energy requirements forecast is developed from the final sales forecasts. The Generation Planning department uses the hourly energy requirements forecast to develop resource expansion plans and a forecast of generation production costs. The following steps are used to create the hourly energy requirements forecast:

1. For each company and month, add an estimate for system losses to the sum of calendar sales to compute monthly calendar energy requirements.
2. For each company and for every month except the peak month (August), compute an average normalized load duration curve based on ten years of historical hourly energy requirements. For the peak month, the process is similar except the year with the lowest load factor and the years with the five highest load factors are excluded from the average. By focusing the average on some of the lower load factors, the resulting peak demand for each company (computed in step 3) will reflect a "summer" peak demand and not an average peak demand for the month of August. Because the summer peak could occur in any summer month, the average summer peak demand is higher than the average peak demand in August.
3. For each company and month, multiply each value in the normalized load duration curve by monthly energy requirements to produce hourly demands.
4. For each company and month, order the hourly demands chronologically based on load patterns in "reference months." The reference months (a) capture the calendar attributes of the forecast month in question (i.e., the pattern of weekdays and weekends over the month) and (b) maintain the historic relationship of (approximate) peak coincidence between the two companies.
5. For each month and hour, add the chronological load curves to produce an hourly energy requirements forecast for the combined companies.

Appendix B: Residential SAE Modeling Framework

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions. Econometric models are well suited to identifying historical trends and to projecting these trends into the future. In contrast, end-use models are able to identify and isolate the end-use factors that are driving energy use. By incorporating end-use structure into an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to this approach.

- The equipment efficiency and saturation trends, dwelling square footage, and thermal integrity changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast. This provides a strong bridge between the two forecasts.
- By explicitly incorporating trends in equipment saturations, equipment efficiency, dwelling square footage, and thermal integrity levels, it is easier to explain changes in usage levels and changes in weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects. By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be incorporated into the final model.

This section describes this approach, the associated supporting SAE spreadsheets, and the *MetrixND* project files that are used in the implementation. The main source of the SAE spreadsheets is the 2015 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

Statistically Adjusted End-Use Modeling Framework

The statistically adjusted end-use modeling framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$), and other equipment ($Other_{y,m}$). Formally,

$$\mathrm{USE}_{y,m} = \mathrm{Heat}_{y,m} + \mathrm{Cool}_{y,m} + \mathrm{Other}_{y,m} \tag{1}$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$\mathrm{USE}_{m} = a + b_1 \times \mathrm{XHeat}_{m} + b_2 \times \mathrm{XCool}_{m} + b_3 \times \mathrm{XOther}_{m} + \varepsilon_{m} \tag{2}$$

$XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, dwelling data, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

Constructing XHeat

As represented in the SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days
- Heating equipment saturation levels
- Heating equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier. That is,

$$XHeat_{y,m} = HeatIndex_{y,m} \times HeatUse_{y,m} \tag{3}$$

Where:

- $XHeat_{y,m}$ is estimated heating energy use in year (y) and month (m)
- $HeatIndex_{y,m}$ is the monthly index of heating equipment
- $HeatUse_{y,m}$ is the monthly usage multiplier

The heating equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Given a set of fixed weights, the index will change over time with changes in equipment saturations (*Sat*), operating efficiencies (*Eff*), building structural index (*StructuralIndex*), and energy prices. Formally, the equipment index is defined as:

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \tag{4}$$

The *StructuralIndex* is constructed by combining the EIA's building shell efficiency index trends with surface area estimates, and then it is indexed to the 2009 value:

$$StructuralIndex_y = \frac{BuildingShellEfficiencyIndex_y \times SurfaceArea_y}{BuildingShellEfficiencyIndex_{09} \times SurfaceArea_{09}} \tag{5}$$

The *StructuralIndex* is defined on the *StructuralVars* tab of the SAE spreadsheets. Surface area is derived to account for roof and wall area of a standard dwelling based on the regional average square footage data obtained from EIA. The relationship between the square footage and surface area is constructed assuming an aspect ratio of 0.75 and an average of 25% two-story and 75% single-story. Given these assumptions, the approximate linear relationship for surface area is:

$$SurfaceArea_y = 892 + 1.44 \times Footage_y \tag{6}$$

In Equation 4, 2009 is used as a base year for normalizing the index. As a result, the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times HeatShare_{09}^{Type} \qquad (7)$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *HeatIndex* value in 2009 will be equal to estimated annual heating intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For electric heating equipment, the SAE spreadsheets contain two equipment types: electric resistance furnaces/room units and electric space heating heat pumps. Examples of weights for these two equipment types for the U.S. are given in Table 1.

Table 1: Electric Space Heating Equipment Weights

Equipment Type	Weight (kWh)
Electric Resistance Furnace/Room units	767
Electric Space Heating Heat Pump	127

Data for the equipment saturation and efficiency trends are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for electric space heating heat pumps are given in terms of Heating Seasonal Performance Factor [BTU/Wh], and the efficiencies for electric furnaces and room units are estimated as 100%, which is equivalent to 3.41 BTU/Wh.

Price Impacts. In the 2007 version of the SAE models and thereafter, the Heat Index has been extended to account for the long-run impact of electric and natural gas prices. Since the Heat Index represents changes in the stock of space heating equipment, the price impacts are modeled to play themselves out over a 10-year horizon. To introduce price effects, the Heat Index as defined by

Equation 4 above is multiplied by a 10-year moving-average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities. Formally,

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \times \left(TenYearMovingAverageElectricPrice_{y,m}\right)^{\phi} \times \left(TenYearMovingAverageGasPrice_{y,m}\right)^{\gamma} \tag{8}$$

Since the trends in the Structural index (the equipment saturations and efficiency levels) are provided exogenously by the EIA, the price impacts are introduced in a multiplicative form. As a result, the long-run change in the Heat Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels relative to what was contained in the base EIA long-term forecast.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, prices, and billing days. The estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{WgtHDD_{y,m}}{HDD_{09}}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.25} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.20} \times \left(\frac{ElecPrice_{y,m}}{ElecPrice_{09,7}}\right)^{\lambda} \times \left(\frac{GasPrice_{y,m}}{GasPrice_{09,7}}\right)^{\kappa} \tag{9}$$

Where:

- *BDays* is the number of billing days in year (y) and month (m), these values are normalized by 30.5 which is the average number of billing days
- *WgtHDD* is the weighted number of heating degree days in year (y) and month (m). This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month.
- *HDD* is the annual heating degree days for 2009
- *HHSize* is average household size in a year (y)
- *Income* is average real income per household in year (y)
- *ElecPrice* is the average real price of electricity in month (m) and year (y)
- *GasPrice* is the average real price of natural gas in month (m) and year (y)

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and heating degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in the economic drivers, as transformed through the end-use elasticity parameters. The price impacts captured by the Usage equation represent short-term price response.

Constructing XCool

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days
- Cooling equipment saturation levels
- Cooling equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_y \times CoolUse_{y,m} \tag{10}$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year (y) and month (m)
- $CoolIndex_y$ is an index of cooling equipment
- $CoolUse_{y,m}$ is the monthly usage multiplier

As with heating, the cooling equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Formally, the cooling equipment index is defined as:

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \Big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \Big/ Eff_{09}^{Type} \right)} \qquad (11)$$

Data values in 2009 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times CoolShare_{09}^{Type} \qquad (12)$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *CoolIndex* value in 2009 will be equal to estimated annual cooling intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For cooling equipment, the SAE spreadsheets contain three equipment types: central air conditioning, space cooling heat pump, and room air conditioning. Examples of weights for these three equipment types for the U.S. are given in Table 2.

Table 2: Space Cooling Equipment Weights

Equipment Type	Weight (kWh)
Central Air Conditioning	1,219
Space Cooling Heat Pump	240
Room Air Conditioning	177

The equipment saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for space cooling heat pumps and central air conditioning (A/C) units are given in terms of Seasonal Energy Efficiency Ratio [BTU/Wh], and room A/C units efficiencies are given in terms of Energy Efficiency Ratio [BTU/Wh].

Price Impacts. In the 2007 SAE models and thereafter, the Cool Index has been extended to account for changes in electric and natural gas prices. Since the Cool Index represents changes in the stock of space heating equipment, it is anticipated that the impact of prices will be long-term in nature. The Cool Index as defined Equation 11 above is then multiplied by a 10-year moving average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities. Formally,

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \Big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \Big/ Eff_{09}^{Type} \right)} \times \left(TenYearMovingAverageElectricPrice_{y,m}\right)^{\phi} \times \left(TenYearMovingAverageGasPrice_{y,m}\right)^{\gamma} \tag{13}$$

Since the trends in the Structural index, equipment saturations and efficiency levels are provided exogenously by the EIA, price impacts are introduced in a multiplicative form. The long-run change in the Cool Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels. Without a detailed end-use model, it is not possible to isolate the price impact on any one of these concepts.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, and prices. The estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{WgtCDD_{y,m}}{CDD_{09}}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.25} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.20} \times \left(\frac{ElecPrice_{y,m}}{ElecPrice_{09}}\right)^{\lambda} \times \left(\frac{GasPrice_{y,m}}{GasPrice_{09}}\right)^{\kappa} \tag{14}$$

Where:

- *WgtCDD* is the weighted number of cooling degree days in year (y) and month (m). This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2009.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in the economic driver changes.

Constructing XOther

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Appliance and equipment saturation levels
- Appliance efficiency levels
- Average number of days in the billing cycle for each month
- Average household size, real income, and real prices

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherEqpIndex_{y,m} \times OtherUse_{y,m} \tag{15}$$

The first term on the right hand side of this expression ($OtherEqpIndex_y$) embodies information about appliance saturation and efficiency levels and monthly usage multipliers. The second term (*OtherUse*) captures the impact of changes in prices, income, household size, and number of billing-days on appliance utilization.

End-use indices are constructed in the SAE models. A separate end-use index is constructed for each end-use equipment type using the following function form.

$$ApplianceIndex_{y,m} = Weight^{Type} \times \frac{\left(Sat_y^{Type} \Big/ \frac{1}{UEC_y^{Type}} \right)}{\left(Sat_{09}^{Type} \Big/ \frac{1}{UEC_{09}^{Type}} \right)} \times MoMult_m^{Type} \times \tag{16}$$
$$(TenYearMovingAverageElectric\Pr ice)^{\lambda} \times (TenYearMovingAverageGas\Pr ice)^{\kappa}$$

Where:

- *Weight* is the weight for each appliance type
- *Sat* represents the fraction of households, who own an appliance type
- $MoMult_m$ is a monthly multiplier for the appliance type in month (m)
- *Eff* is the average operating efficiency the appliance
- *UEC* is the unit energy consumption for appliances

This index combines information about trends in saturation levels and efficiency levels for the main appliance categories with monthly multipliers for lighting, water heating, and refrigeration.

The appliance saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets.

Further monthly variation is introduced by multiplying by usage factors that cut across all end uses, constructed as follows:

$$ApplianceUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.46} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.10} \times \left(\frac{ElecPrice_{y,m}}{ElecPrice_{09}}\right)^{\phi} \times \left(\frac{GasPrice_{y,m}}{GasPrice_{09}}\right)^{\lambda} \quad (17)$$

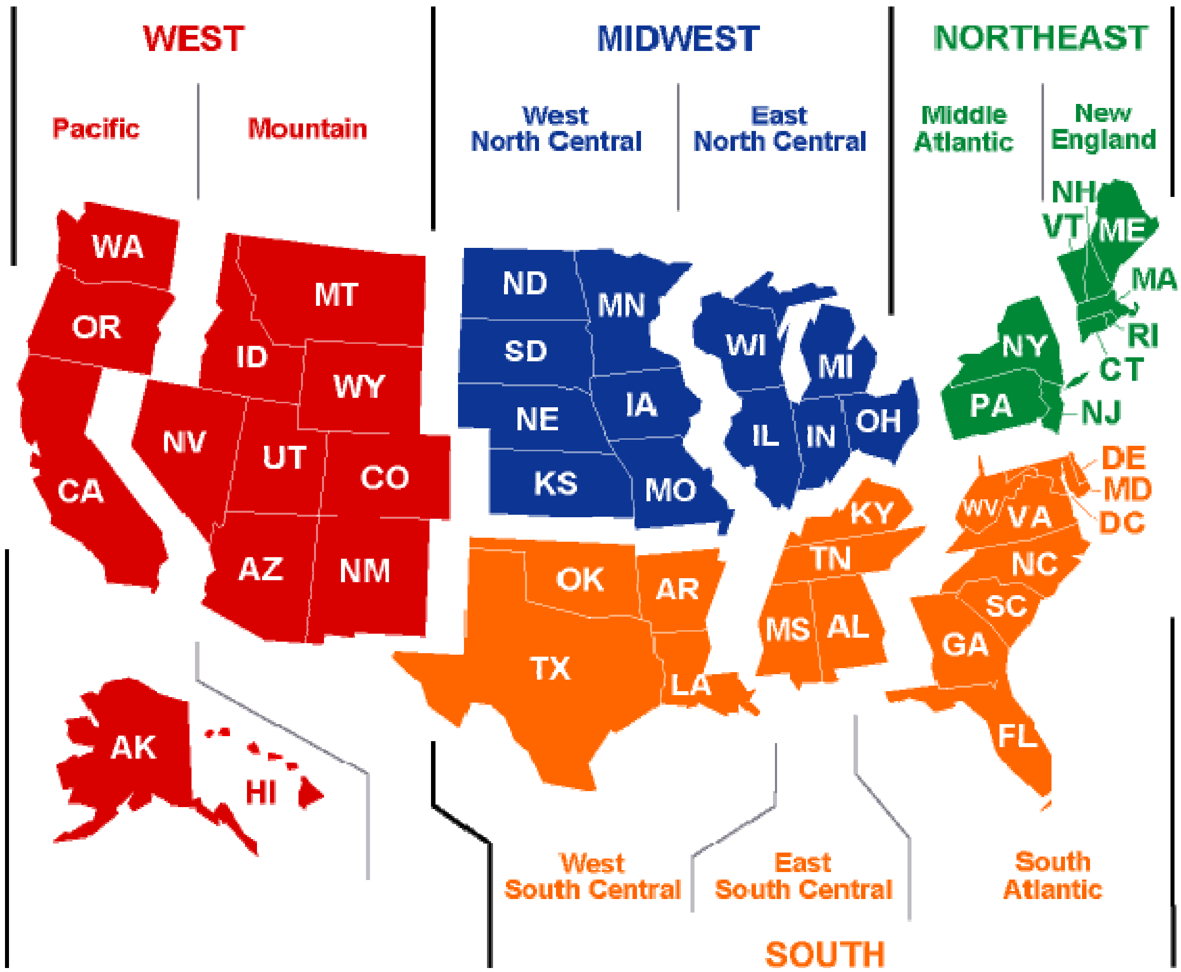
The index for other uses is derived then by summing across the appliances:

$$OtherEqpIndex_{y,m} = \sum_k ApplianceIndex_{y,m} \times ApplianceUse_{y,m} \quad (18)$$

Supporting Spreadsheets and MetrixND Project Files

The SAE approach described above has been implemented for each of the nine Census Divisions. A mapping of states to Census Divisions is presented in Figure 18. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 3.

Figure 18: Mapping of States to Census Divisions



Source: http://www.eia.doe.gov/emeu/reps/maps/us_census.html

Table 3: List of SAE Files

Spreadsheet	*MetrixND* Project File
NewEngland.xls	SAE_NewEngland.ndm
MiddleAtlantic.xls	SAE_MiddleAtlantic.ndm
EastNorthCentral.xls	SAE_EastNorthCentral.ndm
WestNorthCentral.xls	SAE_WestNorthCentral.ndm
SouthAtlantic.xls	SAE_SouthAltantic.ndm
EastSouthCentral.xls	SAE_EastSouthCentral.ndm
WestSouthCentral.xls	SAE_WestSouthCentral.ndm
Mountain.xls	SAE_Mountain.ndm
Pacific.xls	SAE_Pacific.ndm

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The *MetrixND* project files are linked to the data in these spreadsheets. In these project files, the end-use *Usage* variables are constructed and the SAE model is estimated.

Each of the nine SAE spreadsheets contains the following tabs.

- **Definitions -** Contains equipment, end use, worksheet, and Census Division definitions.
- **Intensities -** Calculates the annual equipment indices.
- **Shares -** Contains historical and forecasted equipment shares. The default forecasted values are provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **Efficiencies -** Contains historical and forecasted equipment efficiency trends. The forecasted values are based on projections provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **StructuralVars -** Contains historical and forecasted square footage, number of households, building shell efficiency index, and calculation of structural variable. The forecasted values are based on projections provided by the EIA.
- **Calibration -** This tab contains calculations of the base year *Intensity* values used to weight the equipment indices.
- **EIAData -** Contains the raw forecasted data provided by the EIA.
- **MonthlyMults -** Contains monthly multipliers that are used to spread the annual equipment indices across the months.
- **EV -** Worksheet for incorporating electric vehicle (EV) impacts.
- **PV -** Worksheet for incorporating photovoltaic battery (PV) impacts.

The *MetrixND* Project files are linked to the *AnnualIndices*, *ShareUEC*, and *MonthlyMults* tabs in the spreadsheets. Sales, economic, price and weather information for the Census Division is provided in the linkless data table *UtilityData*. In this way, utility specific data and the equipment indices are brought into the project file. The *MetrixND* project files contain the objects described below.

Parameter Tables

- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use. There are five types of elasticities included on this table.

  - Economic variable elasticities
  - Short-term own price elasticities
  - Short-term cross price elasticities
  - Long-term own price elasticities

- Long-term cross price elasticities

The short-term price elasticities drive the end-use usage equations. The long-term price elasticities drive the Heat, Cool and other appliance indices. The combined price impact is an aggregation of the short and long-term price elasticities. As such, the long-term price elasticities are input as incremental price impact. That is, the long-term price elasticity is the difference between the overall price impact and the short-term price elasticity.

Data Tables

- **AnnualEquipmentIndices.** This data table is linked to the *AnnualIndices* tab for heating and cooling indices, and *ShareUEC* tab for water heating, lighting, and appliances in the SAE spreadsheet.
- **UtilityData.** This is a linkless data table that contains sales, price, economic and weather data specific to a given Census Division.
- **MonthlyMults.** This data table is linked to the corresponding tab in the SAE spreadsheet.

Transformation Tables

- **EconTrans.** This transformation table is used to compute the average usage, and household size, household income, and price indices used in the usage equations.
- **WeatherTrans.** This transformation table is used to compute the HDD and CDD indices used in the usage equations.
- **ResidentialVars.** This transformation table is used to compute the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model.
- **BinaryVars.** This transformation table is used to compute the calendar binary variables that could be required in the regression model.
- **AnnualFcst.** This transformation table is used to compute the annual historical and forecast sales and annual change in sales.
- **EndUseFcst.** This transformation table is used to compute the monthly sales forecasts by end uses.

Models

- **ResModel:** This is the Statistically Adjusted End-Use Model.

Steps to Customize the Files for Your Service Territory

The files that are included in this package contain regional data. If you have more accurate data for your service territory, you are encouraged to tailor the spreadsheets with that information. This section describes the steps needed to customize the files.

Minimum Customization

- Save the *MetrixND* project file and the spreadsheet into the same folder
- Select the spreadsheet and *MetrixND* project file from the appropriate Census Division
- Open the spreadsheet and navigate to the *Calibration* tab
- In cell "B8", replace base year Census Division use-per-customer with observed use-per-customer for your service territory
- Save the spreadsheet and open the *MetrixND* project file
- Click on the *Update All Links* button on the *Menu* bar
- Review the model results

Customizing the End-use Share Paths

In addition to the minimum steps listed above, you can install your own share history and forecasts. To do this, navigate to the *Share* tab in the spreadsheet and paste in the values for your region. Make sure that base year shares on the *Calibration* tab reflect changes on the *Shares* tab.

Customizing the End-use Efficiency Paths

Finally, you can override the end-use efficiency paths that are contained on the *Efficiencies* tab of the spreadsheet.

Appendix A:
Commercial Statistically Adjusted End-Use Model

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions. From a forecasting perspective, econometric models are well suited to identifying historical trends and to projecting these trends into the future. In contrast, end-use models are able to identify the end-use factors driving energy use. By incorporating end-use structure into an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to the SAE approach.

- The equipment efficiency trends and saturation changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast, thereby providing a strong bridge between the two forecasts.
- By explicitly introducing trends in equipment saturations and efficiency levels, SAE models can explain changes in usage levels and weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects. By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be built into the final model.

This document describes this approach, the associated supporting Commercial SAE spreadsheets, and *MetrixND* project files that are used in the implementation. The source for the commercial SAE spreadsheets is the 2015 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

1.3 Commercial Statistically Adjusted End-Use Model Framework

The commercial statistically adjusted end-use model framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$) and other equipment ($Other_{y,m}$). Formally,

$$USE_{y,m} = Heat_{y,m} + Cool_{y,m} + \text{Other}_{y,m} \quad (1)$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$USE_m = a + b_1 \times XHeat_m + b_2 \times XCool_m + b_3 \times XOther_m + \varepsilon_m \quad (2)$$

Here, $XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

Constructing XHeat

As represented in the Commercial SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days,
- Heating equipment saturation levels,
- Heating equipment operating efficiencies,
- Average number of days in the billing cycle for each month, and
- Commercial output and energy price.

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier. That is,

$$XHeat_{y,m} = HeatIndex_y \times HeatUse_{y,m} \quad (3)$$

Where

- $XHeat_{y,m}$ is estimated heating energy use in year y and month m,
- $HeatIndex_y$ is the annual index of heating equipment, and
- $HeatUse_{y,m}$ is the monthly usage multiplier.

The heating equipment index is composed of electric space heating equipment saturation levels normalized by operating efficiency levels. The index will change over time with changes in heating equipment saturations (*HeatShare*) and operating efficiencies (*Eff*). Formally, the equipment index is defined as:

$$HeatIndex_y = HeatSales_{04} \times \frac{\left(HeatShare_y \big/ Eff_y \right)}{\left(HeatShare_{04} \big/ Eff_{04} \right)} \tag{4}$$

In this expression, 2004 is used as a base year for normalizing the index. The ratio on the right is equal to 1.0 in 2004. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2004 level. This will be counteracted by higher efficiency levels, which will drive the index downward. Base year space heating sales are defined as follows.

$$HeatSales_{04} = \left(\frac{kWh}{Sqft} \right)_{Heating} \times \left(\frac{CommercialSales_{04}}{\sum_e kWh \big/ Sqft_e} \right) \tag{5}$$

Here, base-year sales for space heating is the product of the average space heating intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space heating sales value is defined on the *BaseYrInput* tab. The resulting $HeatIndex_y$ value in 2004 will be equal to the estimated annual heating sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, commercial level economic activity, prices and billing days. Using the COMMEND default elasticity parameters, the estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5} \right) \times \left(\frac{WgtHDD_{y,m}}{HDD_{04}} \right) \times \left(\frac{Output_y}{Output_{04}} \right)^{0.20} \times \left(\frac{Price_{y,m}}{Price_{04}} \right)^{-0.18} \tag{6}$$

Where

- *BDays* is the number of billing days in year *y* and month *m*, these values are normalized by 30.5, which is the average number of billing days
- *WgtHDD* is the weighted number of heating degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month
- *HDD* is the annual heating degree days for 2004,
- *Output* is a real commercial output driver in year *y*,

- *Price* is the average real price of electricity in month *m* and year *y*,

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2004). The first two terms, which involve billing days and heating degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in commercial output and prices, as transformed through the end-use elasticity parameters. For example, if the real price of electricity goes up 10% relative to the base year value, the price term will contribute a multiplier of about .98 (computed as 1.10 to the -0.18 power).

Constructing XCool

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days,
- Cooling equipment saturation levels,
- Cooling equipment operating efficiencies,
- Average number of days in the billing cycle for each month, and
- Commercial output and energy price.

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_y \times CoolUse_{y,m} \tag{7}$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year *y* and month *m*,
- $CoolIndex_y$ is an index of cooling equipment, and
- $CoolUse_{y,m}$ is the monthly usage multiplier.

As with heating, the cooling equipment index depends on equipment saturation levels (*CoolShare*) normalized by operating efficiency levels (*Eff*). Formally, the cooling equipment index is defined as:

$$CoolIndex_y = CoolSales_{04} \times \frac{\left(CoolShare_y \big/ Eff_y \right)}{\left(CoolShare_{04} \big/ Eff_{04} \right)} \tag{8}$$

Data values in 2004 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2004. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2004 level. This will be counteracted by higher efficiency levels, which will drive the index downward. Estimates of base year cooling sales are defined as follows.

$$CoolSales_{04} = \left(\frac{kWh}{Sqft}\right)_{Cooling} \times \left(\frac{CommercialSales_{04}}{\sum_{e} kWh/Sqft_{e}}\right) \qquad (9)$$

Here, base-year sales for space cooling is the product of the average space cooling intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space cooling sales value is defined on the *BaseYrInput* tab. The resulting *CoolIndex* value in 2004 will be equal to the estimated annual cooling sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, economic activity levels and prices. Using the COMMEND default parameters, the estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{WgtCDD_{y,m}}{CDD_{04}}\right) \times \left(\frac{Output_{y}}{Output_{04}}\right)^{0.20} \times \left(\frac{Price_{y,m}}{Price_{04}}\right)^{-0.18} \qquad (10)$$

Where

- *WgtCDD* is the weighted number of cooling degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2004.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2004). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in commercial output and prices.

Constructing XOther

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Equipment saturation levels,
- Equipment efficiency levels,
- Average number of days in the billing cycle for each month, and
- Real commercial output and real prices.

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherIndex_{y,m} \times OtherUse_{y,m} \tag{11}$$

The second term on the right hand side of this expression embodies information about equipment saturation levels and efficiency levels. The equipment index for other uses is defined as follows:

$$OtherIndex_{y,m} = \sum_{Type} Weight_{04}^{Type} \times \left(\frac{Share_{y}^{Type} \big/ Eff_{y}^{Type}}{Share_{04}^{Type} \big/ Eff_{04}^{Type}} \right) \tag{12}$$

Where

- *Weight* is the weight for each equipment type,
- *Share* represents the fraction of floor stock with an equipment type, and
- *Eff* is the average operating efficiency.

This index combines information about trends in saturation levels and efficiency levels for the main equipment categories. The weights are defined as follows.

$$Weight_{04}^{Type} = \left(\frac{kWh}{Sqft} \right)_{Type} \times \left(\frac{CommercialSales_{04}}{\sum_{e} kWh \big/ Sqft_{e}} \right) \tag{13}$$

Further monthly variation is introduced by multiplying by usage factors that cut across all end uses, constructed as follows:

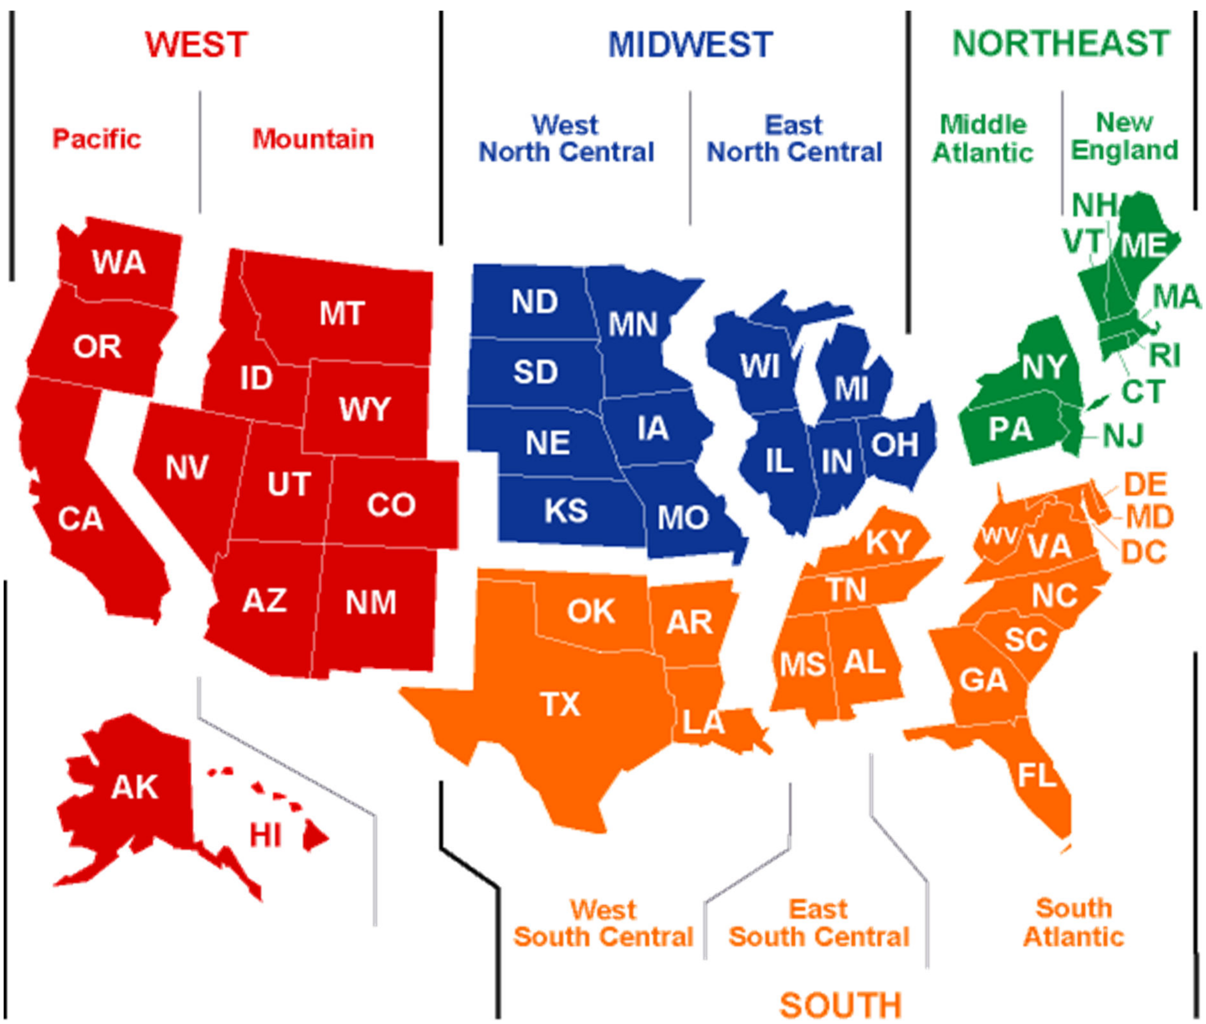
$$OtherUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{Output_y}{Output_{04}}\right)^{0.20} \times \left(\frac{Price_{y.m}}{Price_{04}}\right)^{-0.18} \quad (14)$$

In this expression, the elasticities on output and real price are computed from the COMMEND default values.

1.4 Supporting Spreadsheets and *MetrixND* Project Files

The SAE approach described above has been implemented for each of the nine census divisions. A mapping of states to census divisions is presented in Figure 1. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 1.

Figure 1: Mapping of States to Census Divisions*



*Map Source: http://www.eia.gov/consumption/manufacturing/maps.cfm

Table 1: List of SAE Files

Spreadsheets	*MetrixND* Project Files
NewEnglandCom.xls	NewEnglandCom.ndm
MiddleAtlanticCom.xls	MiddleAtlanticCom.ndm
EastNorthCentralCom.xls	EastNorthCentralCom.ndm
WestNorthCentralCom.xls	WestNorthCentralCom.ndm
SouthAtlanticCom.xls	SouthAltanticCom.ndm
EastSouthCentralCom.xls	EastSouthCentralCom.ndm
WestSouthCentralCom.xls	WestSouthCentralCom.ndm
MountainCom.xls	MountainCom.ndm
PacificCom.xls	PacificCom.ndm

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The data from these spreadsheets are linked to the *MetrixND* project files. In these project files, the end-use *Usage* variables (Equations 6, 10, and 14 above) are constructed and the SAE model is estimated.

The nine spreadsheets contain the following tabs.

- **BaseYrInput.** This tab contains base year Census Division intensities by end-use and building type as well as default building type weights. It also contains functionality for changing the weights to reflect utility service territory.
- **Efficiency.** This tab contains historical and forecasted end-use equipment efficiency trends. The forecasted values are based on projections provided by the EIA.
- **Shares.** This tab contains historical and forecasted end-use saturations. The procedure by which these are calculated is explained in the text above.
- **ShareEff.** This tab is used for the calculation of the annual equipment indices.
- **AnnualIndices.** This tab contains the annual *Heat*, *Cool* and *Other* equipment indices.
- **Intensity.** This tab contains the annual intensity (kWh/sqft) projections by end-use.
- **FloorSpace.** This tab contains the annual floor space (sqft) projections by end-use.
- **PV.** This tab is used to incorporate the impact of photovoltaic batteries into the forecast.

The *MetrixND* project files contain the following objects.

Parameter Tables

- **Parameters.** This parameter table includes the values of the annual HDD and CDD in 2004 used to calculate the *Usage* variables for each end-use.
- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use.

Data Tables

- **AnnualIndices.** This data table is linked to the *AnnualIndices* tab in the Commercial SAE spreadsheet and contains sales-adjusted commercial SAE indices.
- **Intensity.** This data table is linked to the *Intensity* tab in the Commercial SAE spreadsheet.
- **FloorSpace.** This data table links to *FloorSpace* tab in the Commercial SAE spreadsheet.
- **UtilityData.** This linkless data table contains Census Division level data. It can be populated with utility-specific data.

Transformation Tables

- **EconTrans.** This transformation table is used to compute the output and price indices used in the usage equations.
- **WeatherTrans.** This transformation table is used to compute the HDD and CDD indices used in the usage equations.
- **CommercialVars.** This transformation table is used to compute the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model. Structural variables based on the intensity/floor space combination are also calculated here.
- **BinaryVars.** This transformation table is used to compute the calendar binary variables that could be required in the regression model.
- **AnnualFcst.** This transformation table is used to compute the annual historical and forecast sales and annual change in sales.
- **EndUseFcst.** This transformation table breaks the forecast down into its heating, cooling and other components.

Models

- **ComSAE:** The commercial SAE model (energy forecast driven by end-use indices, price, and output projections).
- **ComStruct:** Simple stock model (energy forecast driven by end-use energy intensities, and square footage).

Structural headwinds may lead to declining US electricity growth

- Morgan Stanley forecasts US electricity consumption to decrease by ~0.3% annually over the next decade
  - *Forecast risk skewed to the downside given the potential for efficiency breakthroughs and / or incremental government regulations*
  - *GDP, population, computing, and electric vehicles provide the most upside*
- 0.3% CAGR 2015-2040 residential sales (EIA)
  - *Reduced from 0.5% in previous AEO*
- 0.54% CAGR in electricity sales through 2035 (PIRA)
  - *Reduced from 0.83% in previous forecast*

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
C. Page 3 of 24
Sinclair

Greater anticipated end-use efficiencies drive reductions in PIRA electricity sales forecast

- LED Lighting
  - *Costs have fallen 90% since 2008; efficiency expected to double by 2025.*
  - *DOE forecasts 48% market share by 2020 and 84% in 2030, up from 2% in 2013. This would reduce lighting consumption by 15% in 2020 and 40% in 2030.*
- Space Cooling
  - *New standard for commercial rooftop air conditioners in 2018 expected to cut consumption by 30%.*

Annual Natural Gas Volume Forecast Process

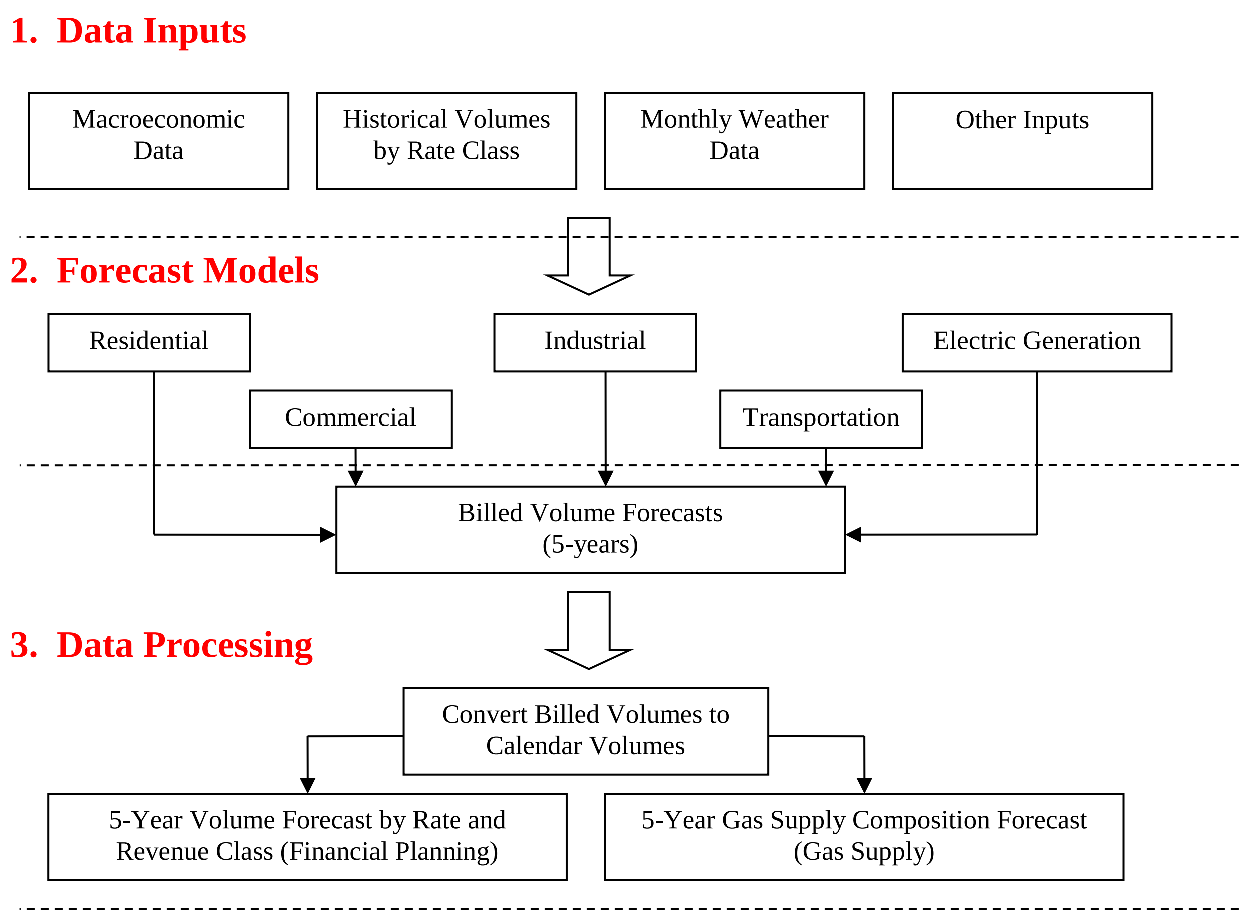
Sales Analysis & Forecasting
September 2016

Table of Contents

1 Introduction

The Sales Analysis & Forecasting group annually develops the natural gas sales and transportation forecasts for the Louisville Gas & Electric Company (LG&E). LG&E natural gas customers can broadly be classified as either sales customers or transportation customers. Furthermore, sales customers can be further divided into firm and interruptible customers. LG&E must procure gas for firm sales customers, but it has no obligation to procure gas for interruptible (AAGS) sales customers. Sales customers are grouped by residential, industrial, and commercial gas service rates. Transportation customers are large industrial and commercial customers on LG&E's distribution system who contract for their own gas supply and use the company's pipeline system to deliver gas from an interstate pipeline connection point with LG&E to their facility. These forecasts are an input to the company's revenue and gas supply expense forecast. This document describes the processes used to produce the annual volume forecasts. The forecast process can be divided into three parts (see Figure 1).

Figure 1 – Natural Gas Volume Forecast Process Diagram



The first part of the forecast process involves gathering and processing input data. The following are key inputs to the forecast process:

- Macroeconomic data
- Historical gas sales and customer data

- Weather data
- Other data, including billing cycle forecasts and residential heating appliance shares and efficiencies.

The input data is used to specify various forecast models. LG&E's natural gas volumes are forecasted by rate class as each model is used to forecast sales for a group of customers with homogeneous usage patterns within the same, or similar, tariff rates.

Most of the forecast models produce volume forecasts on a monthly billed basis.[1] In the third part of the forecast process, gas volume data from the forecast models is processed to meet the needs of the forecast end users. The monthly billed energy forecasts must first be converted to calendar month forecasts. The billed and calendar sales forecasts are allocated by rate and revenue class for the Financial Planning department.[2] In addition, the calendar forecasts are used to produce the Gas Supply Composition Forecast.

The final part of the forecast process includes validating and documenting the forecast results. To ensure the results are reasonable, the new forecast is compared to (i) the previous forecast and (ii) weather-normalized actual sales for the comparable period in prior years. Each of these steps is discussed in more detail in the following sections.

[1] All customers are assigned to one of 20 billing cycles. A billing cycle determines what time of the month a customer's meter is read. Because most billing cycles do not coincide precisely with the boundaries of calendar months, most customers' monthly bills will include energy that was consumed in multiple calendar months. The energy on customers' bills is referred to as "billed" energy.
[2] Rate class defines the tariff assigned to each customer meter while Revenue class is a higher level grouping; a Revenue class consists of one or more rate classes.

2 Input Data

Table 1 provides a summary of the data inputs. The sections that follow describe key processes used to prepare the data for use in the forecast process.

Table 1 – Volume Forecast Data Inputs

Data	***Source***	***Format***
State Macroeconomic Data (Employment, Wages)	IHS Global Insight	Annual or Quarterly by County – History and Forecast

Commercial End-Use Data	EIA, LG&E Commercial End-Use Survey	Appliance Saturations
Billed Sales History by Rate Class	CCS Billing System	Monthly
Number of Customers History by Rate Class	CCS Billing System	Monthly
Individual Customer Usage History	CCS Billing System	Monthly
Forecasts of Gas Used by Electric Generation	Generation Planning	Monthly

2.1 Service Area-Specific Macroeconomic Forecasts

LG&E's natural gas service area includes all or portions of 17 Kentucky counties.[3] IHS Global Insight produces forecasts of macroeconomic drivers by county and industry. Service area-specific macroeconomic forecasts are created by aggregating the county-specific forecasts for the counties in LG&E's service area.

2.2 Software Tools

The following software packages are used in the forecast process:

- Microsoft Office: Excel, PowerPoint, Access
- SAS
- R
- Itron Metrix ND

2.3 Billed Usage History

Historical billed usage volumes for all retail customers are taken from the LG&E Customer Care System (CCS). The LG&E Billed Transport Report contains historical usage volumes for all transportation customers. Transportation customers nominate – on a daily basis – the amount of gas they expect to consume. A daily or monthly "imbalance" is computed as the difference between the amount of natural gas actually consumed and the amount of natural gas nominated.

For several classes, a significant portion of the total gas usage is made up of gas consumed by heating appliances (e.g., gas furnaces and gas water heaters). Heating appliance usage is a function of appliance efficiencies and the weather. As appliance efficiencies improve over time, the average use-per-customer – for a given class and temperature – will decline in the absence of customers' behavioral changes.

The heating appliances that consume the most natural gas are the gas furnace and gas water heater. Total usage and efficiency data for these appliances are provided by the US Energy Information Administration (EIA) and are used as inputs into some of the forecast models.

2.4 Processing of Weather Data

Weather is a key explanatory variable in the gas forecast models. The weather dataset from the National Oceanic & Atmospheric Administration's (NOAA) National Climatic Data Center (NCDC) contains temperatures (maximum, minimum, and average), heating degree days (HDD), and cooling degree days (CDD) for each day and weather station over the past 30 years. This data and the Company's meter reading schedule are used to create (a) a historical weather series by billing month and (b) a forecast of "normal" weather by billing month.[4] Each of these processes is summarized below.

[3] LG&E is the only gas utility serving Bullitt, Henry, Larue, Meade, Nelson, Oldham, Spencer and Trimble counties. LG&E also serves parts of Barren, Green, Hardin, Hart, Jefferson, Marion, Metcalfe, Shelby and Washington counties.
[4] "Normal" weather is defined as the average weather over a historical period. The Companies do not attempt to forecast any trends in weather.

2.4.1 Historical Weather by Billing Month

The methodology used to create the historical weather series by billing month consists of the following steps:

1. Using the historical daily weather data from the NCDC, sum the HDD and CDD values by billing cycle.[5] Each historical billing month consists of 20 cycles. The Company's historical meter reading schedule contains the beginning and ending date for each billing cycle.
2. Average the billing cycle total HDDs and CDDs by billing month.

2.4.2 Normal Weather Forecast by Billing Month

The methodology used to produce the forecast of normal weather by billing month includes the production of a daily forecast of normal weather. The methodology used to develop the daily forecast (summarized in Steps 2-5) is consistent with the methodology used by the NCDC to create its daily normal weather forecast.[6] The following steps are used to create the forecast of normal weather by billing month:

1. Compute the forecast of monthly weather by *calendar* month by averaging the monthly degree-day values and over the period of history upon which the normal forecast is based. The normal weather forecast is based on the most recent 30-year historical period. Therefore, the normal HDD value for January is the average of the 30 January HDD values in this period.
2. Compute "unsmoothed" daily normal weather values by averaging temperature, HDDs, and CDDs by calendar day. The unsmoothed normal temperature for January 1, for example, is computed as the average of the 30 January 1 temperatures in the historical period. This process excludes February 29.
3. Smooth the daily values using a 30-day moving average centered about the desired day. The "smoothed" normal temperature for January 1, for example, is computed as the average of the unsmoothed daily normal temperatures between December 16 and January 15.
4. Manually adjust the integer values in Step 3 so that the following criteria are met:
   a. The monthly average temperature – computed by averaging the daily temperatures by month and rounding to the nearest integer – should match the normal monthly temperatures in Step 1.
   b. The sum of the daily HDDs and CDDs by month should match the normal monthly HDDs and CDDs in Step 1.
   c. The daily temperatures and CDDs should be monotonically increasing from winter to summer and monotonically decreasing from summer to winter. The daily HDD series should follow a reverse trend.

   These criteria ensure the daily normal series is consistent with the monthly normal series.
5. The Company's forecasted meter reading schedule contains the beginning and ending date for each billing cycle through the end of the forecast period. In this step, sum the HDD and CDD values by billing cycle. Use the February 28 weather data as a proxy for February 29 when billing cycles include leap days.
6. Average the billing cycle totals by billing month.

[5] Weather data in the gas forecast is taken from the weather station at Standiford Field Airport (SDF) in Louisville.
[6] The NCDC derives daily normal values by applying a cubic spline to a specially prepared series of the monthly normal values.

2.5 Forecasts of Gas Used by Electric Generation

Effective May 1, 2008, LG&E and KU's electric generation business entered into a special contract ("Electric Generation Special Contract") with LG&E's gas distribution business for gas sales and transportation services. Under the contract, the Cane Run and Mill Creek generating stations are served as a firm sales customer and the Paddy's Run generating station is served as a transportation customer. Since September 2014, Cane Run has taken gas directly from Texas Gas at a new interconnection point built for the Cane Run natural gas combined cycle plant and is no longer served by the LG&E Gas Business.

The forecasts of gas used by each of the aforementioned generating stations are provided by the Generation Planning group. In addition, the Generation Planning group provides a forecast of gas used by the Zorn generating station, which is also served via the LG&E gas distribution system (but not as a part of the Electric Generation Special Contract).

From a revenue accounting perspective, the gas consumed by the Mill Creek station is accounted for in a separate Interdepartmental Sales revenue class. The gas consumed by the Paddy's Run station is accounted for in the Interdepartmental Transport revenue class. The gas consumed by the Zorn station is considered Company Use and is recorded in the utility financial reports as part of gas 'Used in Electric Generation.'

3 Forecast Models

LG&E natural gas customers can broadly be classified as either sales customers or transportation customers. Sales customers include customers on the residential, industrial, and commercial gas service rates. Transportation customers are large industrial and commercial customers on LG&E's distribution system who contract for their own gas supply. Each forecast is discussed in detail in the following sections.

3.1 Residential Forecast

The residential forecast consists of all customers on the Residential Gas Service (RGS) rate schedule. The RGS class accounts for approximately half of the total volume forecast. RGS sales are forecasted as the product of a customer forecast and a use-per-customer forecast.

3.1.1 Residential Gas Service (RGS) Customer Forecast

The RGS customer forecast is modeled as a function of the number of forecasted households in the LG&E service territory. Household and population data by county and Metropolitan Statistical Area (MSA) are available from IHS Global Insight and the Kentucky Data Center.

3.1.2 Residential Gas Service (RGS) Use-per-Customer Forecast

The RGS use-per-customer forecast is developed using a Statistically-Adjusted End-Use (SAE) model (similar to what is used to forecast residential electric sales). Such a model combines an econometric model – that relates monthly sales to various explanatory variables such as weather and economic conditions – with traditional end-use modeling. For natural gas, the SAE approach defines energy use as a function of energy used by heating equipment and other natural-gas fueled equipment.

$$\text{Use-per-Customer} = a_1\text{*XHeat} + a_2\text{*XOther}$$

The heating and other components (the X variables) are based on various input variables including weather (heating and cooling degree days), appliance saturations, efficiencies, and economic and demographic variables such as income, population, members per household and the gas supply cost. In addition, certain binary variables may be added to compensate for anomalies in the data or other events. Once the historical profile of these explanatory variables has been established, a regression model is specified to identify the statistical relationship between changes in these variables and changes in the dependent variable, use-per-customer. A discussion of each of these components and the methodology used to develop them is contained in Appendix A.

3.2 Commercial Forecast

The commercial forecast is comprised of customers on the Firm Commercial Gas Service (CGS) and Commercial As-Available Gas Service (CAAGS) rate schedules. Given the unique characteristics of these classes, each class is modeled separately. CGS volumes are forecasted as the product of a customer forecast and a use-per-customer forecast.

3.2.1 Firm Commercial Gas Service (CGS) Customer Forecast

The CGS customer forecast is modeled based on its own historical trend independent of the number of RGS customers.

3.2.2 Firm Commercial Gas Service (CGS) Use-per-Customer Forecast

Similar to the RGS use-per-customer forecast, the CGS volume forecast is developed using an SAE model. Such a model combines an econometric model – that relates monthly sales to various explanatory variables such as weather and economic conditions – with traditional end-use modeling. The SAE approach defines energy use as a function of energy used by heating equipment, cooling equipment, and other equipment.

$$\text{Use-per-Customer} = \text{a1*XHeat} + \text{a2*XOther}$$

The heating and other components (the X variables) are based on various input variables including weather (heating and cooling degree days), appliance saturations, efficiencies, and economic and demographic variables such as income, population, members per household and the gas supply cost. Once the historical profile of these explanatory variables is established, a regression model is specified to identify the statistical relationship between changes in these variables and changes in the dependent variable (volumes). A discussion of each of these components and the methodology used to develop them is contained in Appendix B.

3.2.3 Commercial As-Available Gas Service (CAAGS) Forecast

CAAGS sales are forecasted as a portion of total As-Available gas sales. The forecast of CAAGS volumes is modeled as a function of weather, natural gas prices, and number of customers.

3.3 Industrial Forecast

The industrial revenue class is comprised of customers on the Firm Industrial Gas Service (IGS) and Industrial As-Available Gas Service (IAAGS) rate schedules.

3.3.1 Firm Industrial Gas Service (IGS) Forecast

IGS volumes are forecasted in total as a function of natural gas prices, number of customers, and a rate-specific industrial production index.

3.3.2 Industrial As-Available Gas Service (IAAGS) Forecast

IAAGS sales are forecasted as a portion of total As-Available gas sales. The forecast of IAAGS volumes are modeled as a function of weather, natural gas prices, and number of customers.

3.4 Interdepartmental Sales Forecast

The interdepartmental sales forecasts consist of gas used by the Mill Creek generating station. The forecast of gas used by these stations is based on usage over the last twelve months in conjunction with the Generation Planning group.

3.5 Firm Transportation Forecast

The firm transportation forecast consists of special contract customers and customers on the Firm Transportation Service (FT) rate schedule. The firm transportation revenue class consists of the company's largest natural gas customers. For forecasting purposes, the largest commercial and industrial customers in this class are forecasted separately. These forecasts are developed by the Sales Analysis & Forecasting department with input from Major Account representatives to make sure the underlying assumptions and forecasted volumes are reasonable.

3.5.1 Industrial Special Contract (ISP) Forecast

LG&E has one industrial special contract gas customer. The inputs to this forecast are provided by the Major Accounts department.

3.5.2 Industrial Firm Transportation (IFT) Forecast

The largest customers in the IFT class make up about two-thirds of the class's total usage and are forecasted with direct input from account managers. Volumes for the other customers are forecasted in total as a function of heating degree days, gas supply cost, industrial production indices, and binary variables to account for anomalies in the data.

3.5.3 Commercial Firm Transportation (CFT) Forecast

CFT volumes are forecasted as a function of heating degree days, economic indices, and binary variables to account for anomalies in the data.

3.6 Rider TS-2 Transportation Forecast

The TS-2 transportation forecast consists of commercial and industrial customers with a Gas Transportation Service (TS-2) rider. The rate forecast is the sum of projections for individual customers that are expected to be on the rate in any given period.

3.7 Interdepartmental Transport Forecast

The interdepartmental transport forecast consists of gas used by the Paddy's Run generating station. The forecast of gas used by this station is provided by the Generation Planning group.

4 Data Processing

The models discussed in the preceding section produce forecasts on a "billed" basis. All customers are assigned to one of 20 billing cycles. A billing cycle determines what time of the month, generally, a customer's meter is read. The volumes on customers' bills are referred to as "billed" volumes. If a customer's billing cycle does not coincide directly with the boundaries of calendar months, that customer's bill will include volumes from multiple calendar months.

In this part of the forecast process, the billed forecast data is processed to meet the needs of the forecast's end users. First, the billed forecasts are converted from a billed basis to a calendar month basis. Then, the calendar forecasts are allocated by rate and revenue class for use by the Financial Planning Department. In addition, the calendar forecasts are used – along with forecasts of gas losses and gas used by company-owned facilities and generating assets – to produce the Gas Supply Composition Forecast. Each of these processes is discussed in the following sections.

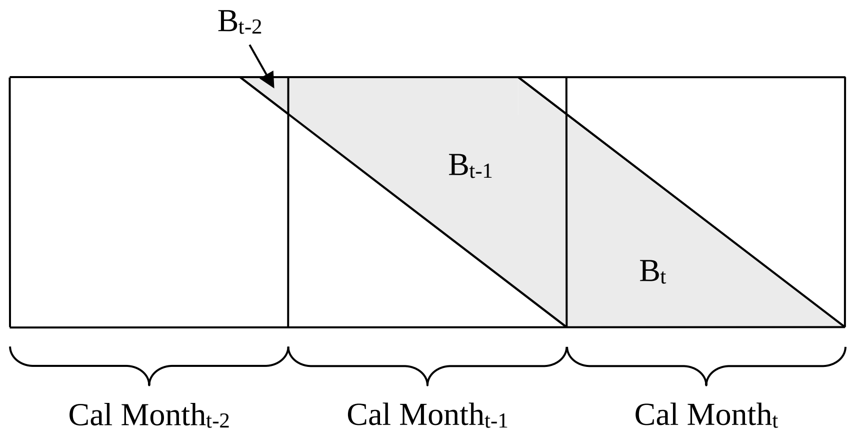
4.1 Billed-to-Calendar Conversion

The following forecasts must be converted from a billed to calendar basis: RGS, CGS, and IGS. The remaining forecasts are billed at the end of each calendar month; thus, their "billed" volumes are already stated on a "calendar month" basis and a billed-to-calendar conversion is not necessary.

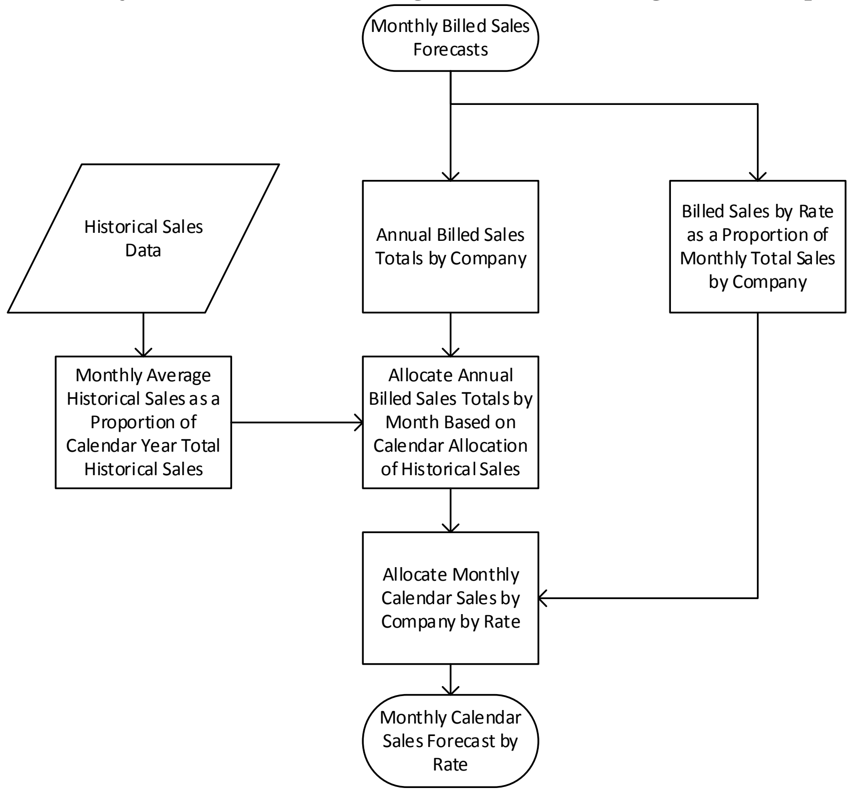
The shaded area in Figure 2 represents a typical billing month (B). Area B_t represents the volumes in the billing month that were consumed in the current calendar month (time = t). Area B_{t-1} represents the volumes in the billing month that were consumed in the previous calendar month (time = t-1). Area B_{t-2} represent the volumes in the billing month that were consumed in the calendar month two months prior to the current month (time = t-2).[7] In this process, ratios of historical monthly calendar sales by revenue class to annual monthly calendar sales by revenue class are developed to allocate forecasted billed sales to calendar sales.

[7] Not all billing months include volumes that were consumed in the calendar month two months prior to the current month.

Figure 2 – Billed and Calendar Energy



Using historical calendar data to obtain monthly allocation ratios, the annual billed sales forecasts are allocated into months using the monthly allocation ratios. This yields monthly calendar sales forecasts. These monthly calendar sales are then allocated into rate categories (i.e., tariffs) using the ratio of billed sales by rate to total sales. Figure 3 shows a diagram of the process.



4.2 Rate-to-Revenue Class Allocation

To meet revenue forecasting requirements, the billed and calendar volume forecasts, which are initially developed by rate class, must be allocated to revenue classes. Revenue class is a higher level grouping; all rate classes are allocated to one or more of the following revenue classes (see Appendix C):

- Residential
- Commercial
- Industrial
- Interdepartmental
- Transport

This information is used by the Financial Planning department to develop a forecast of revenues for the planning period. Billed and calendar forecasts are allocated to revenue classes using a set of monthly allocation ratios. These ratios are derived based on historical sales data from CCS for gas volumes and customers.

4.3 Customer Forecasts

The customer forecasts are used in the company's revenue forecast to compute revenue from customer charges.

The customer charge for the CGS and IGS rate plans varies based on the capacity of the customer's meter – whether it's less than or greater than 5,000 cf/hr. Therefore, information from CCS is used to segment the total number of CGS and IGS customers into these two meter capacity categories.

Appendix B: Residential SAE Modeling Framework

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions. Econometric models are well suited to identifying historical trends and to projecting these trends into the future. In contrast, end-use models are able to identify and isolate the end-use factors that are driving energy use. By incorporating end-use structure into an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to this approach.

- The equipment efficiency and saturation trends, dwelling square footage, and thermal integrity changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast. This provides a strong bridge between the two forecasts.
- By explicitly incorporating trends in equipment saturations, equipment efficiency, dwelling square footage, and thermal integrity levels, it is easier to explain changes in usage levels and changes in weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects. By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be incorporated into the final model.

This section describes this approach, the associated supporting SAE spreadsheets, and the *MetrixND* project files that are used in the implementation. The main source of the SAE spreadsheets is the 2015 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

Statistically Adjusted End-Use Modeling Framework

The statistically adjusted end-use modeling framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$), and other equipment ($Other_{y,m}$). Formally,

$$\mathrm{USE}_{y,m} = \mathrm{Heat}_{y,m} + \mathrm{Cool}_{y,m} + \mathrm{Other}_{y,m} \tag{1}$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$\mathrm{USE}_{m} = a + b_1 \times \mathrm{XHeat}_{m} + b_2 \times \mathrm{XCool}_{m} + b_3 \times \mathrm{XOther}_{m} + \varepsilon_{m} \tag{2}$$

$XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, dwelling data, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

Constructing XHeat

As represented in the SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days
- Heating equipment saturation levels
- Heating equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier. That is,

$$XHeat_{y,m} = HeatIndex_{y,m} \times HeatUse_{y,m} \tag{3}$$

Where:

- $XHeat_{y,m}$ is estimated heating energy use in year (y) and month (m)
- $HeatIndex_{y,m}$ is the monthly index of heating equipment
- $HeatUse_{y,m}$ is the monthly usage multiplier

The heating equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Given a set of fixed weights, the index will change over time with changes in equipment saturations (*Sat*), operating efficiencies (*Eff*), building structural index (*StructuralIndex*), and energy prices. Formally, the equipment index is defined as:

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \tag{4}$$

The *StructuralIndex* is constructed by combining the EIA's building shell efficiency index trends with surface area estimates, and then it is indexed to the 2009 value:

$$StructuralIndex_y = \frac{BuildingShellEfficiencyIndex_y \times SurfaceArea_y}{BuildingShellEfficiencyIndex_{09} \times SurfaceArea_{09}} \tag{5}$$

The *StructuralIndex* is defined on the *StructuralVars* tab of the SAE spreadsheets. Surface area is derived to account for roof and wall area of a standard dwelling based on the regional average square footage data obtained from EIA. The relationship between the square footage and surface area is constructed assuming an aspect ratio of 0.75 and an average of 25% two-story and 75% single-story. Given these assumptions, the approximate linear relationship for surface area is:

$$SurfaceArea_y = 892 + 1.44 \times Footage_y \tag{6}$$

In Equation 4, 2009 is used as a base year for normalizing the index. As a result, the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times HeatShare_{09}^{Type} \tag{7}$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *HeatIndex* value in 2009 will be equal to estimated annual heating intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For electric heating equipment, the SAE spreadsheets contain two equipment types: electric resistance furnaces/room units and electric space heating heat pumps. Examples of weights for these two equipment types for the U.S. are given in Table 1.

Table 1: Electric Space Heating Equipment Weights

Equipment Type	Weight (kWh)
Electric Resistance Furnace/Room units	767
Electric Space Heating Heat Pump	127

Data for the equipment saturation and efficiency trends are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for electric space heating heat pumps are given in terms of Heating Seasonal Performance Factor [BTU/Wh], and the efficiencies for electric furnaces and room units are estimated as 100%, which is equivalent to 3.41 BTU/Wh.

Price Impacts. In the 2007 version of the SAE models and thereafter, the Heat Index has been extended to account for the long-run impact of electric and natural gas prices. Since the Heat Index represents changes in the stock of space heating equipment, the price impacts are modeled to play themselves out over a 10-year horizon. To introduce price effects, the Heat Index as defined by

Equation 4 above is multiplied by a 10-year moving-average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities. Formally,

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \times \left(TenYearMovingAverageElectric\Pr ice_{y,m}\right)^{\phi} \times \left(TenYearMovingAverageGas\Pr ice_{y,m}\right)^{\gamma} \tag{8}$$

Since the trends in the Structural index (the equipment saturations and efficiency levels) are provided exogenously by the EIA, the price impacts are introduced in a multiplicative form. As a result, the long-run change in the Heat Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels relative to what was contained in the base EIA long-term forecast.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, prices, and billing days. The estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{WgtHDD_{y,m}}{HDD_{09}}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.25} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.20} \times \left(\frac{Elec\Pr ice_{y,m}}{Elec\Pr ice_{09,7}}\right)^{\lambda} \times \left(\frac{Gas\Pr ice_{y,m}}{Gas\Pr ice_{09,7}}\right)^{\kappa} \tag{9}$$

Where:

- *BDays* is the number of billing days in year (y) and month (m), these values are normalized by 30.5 which is the average number of billing days
- *WgtHDD* is the weighted number of heating degree days in year (y) and month (m). This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month.
- *HDD* is the annual heating degree days for 2009
- *HHSize* is average household size in a year (y)
- *Income* is average real income per household in year (y)
- *ElecPrice* is the average real price of electricity in month (m) and year (y)
- *GasPrice* is the average real price of natural gas in month (m) and year (y)

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and heating degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in the economic drivers, as transformed through the end-use elasticity parameters. The price impacts captured by the Usage equation represent short-term price response.

Constructing XCool

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days
- Cooling equipment saturation levels
- Cooling equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_{y} \times CoolUse_{y,m} \qquad (10)$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year (y) and month (m)
- $CoolIndex_y$ is an index of cooling equipment
- $CoolUse_{y,m}$ is the monthly usage multiplier

As with heating, the cooling equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Formally, the cooling equipment index is defined as:

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \tag{11}$$

Data values in 2009 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times CoolShare_{09}^{Type} \tag{12}$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *CoolIndex* value in 2009 will be equal to estimated annual cooling intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For cooling equipment, the SAE spreadsheets contain three equipment types: central air conditioning, space cooling heat pump, and room air conditioning. Examples of weights for these three equipment types for the U.S. are given in Table 2.

Table 2: Space Cooling Equipment Weights

Equipment Type	Weight (kWh)
Central Air Conditioning	1,219
Space Cooling Heat Pump	240
Room Air Conditioning	177

The equipment saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for space cooling heat pumps and central air conditioning (A/C) units are given in terms of Seasonal Energy Efficiency Ratio [BTU/Wh], and room A/C units efficiencies are given in terms of Energy Efficiency Ratio [BTU/Wh].

Price Impacts. In the 2007 SAE models and thereafter, the Cool Index has been extended to account for changes in electric and natural gas prices. Since the Cool Index represents changes in the stock of space heating equipment, it is anticipated that the impact of prices will be long-term in nature. The Cool Index as defined Equation 11 above is then multiplied by a 10-year moving average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities. Formally,

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left(Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left(Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \times \left(TenYearMovingAverageElectricPrice_{y,m}\right)^{\phi} \times \left(TenYearMovingAverageGasPrice_{y,m}\right)^{\gamma} \tag{13}$$

Since the trends in the Structural index, equipment saturations and efficiency levels are provided exogenously by the EIA, price impacts are introduced in a multiplicative form. The long-run change in the Cool Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels. Without a detailed end-use model, it is not possible to isolate the price impact on any one of these concepts.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, and prices. The estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{WgtCDD_{y,m}}{CDD_{09}}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.25} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.20} \times \left(\frac{ElecPrice_{y,m}}{ElecPrice_{09}}\right)^{\lambda} \times \left(\frac{GasPrice_{y,m}}{GasPrice_{09}}\right)^{\kappa} \tag{14}$$

Where:

- *WgtCDD* is the weighted number of cooling degree days in year (*y*) and month (*m*). This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2009.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in the economic driver changes.

Constructing XOther

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Appliance and equipment saturation levels
- Appliance efficiency levels
- Average number of days in the billing cycle for each month
- Average household size, real income, and real prices

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherEqpIndex_{y,m} \times OtherUse_{y,m} \qquad (15)$$

The first term on the right hand side of this expression ($OtherEqpIndex_y$) embodies information about appliance saturation and efficiency levels and monthly usage multipliers. The second term (*OtherUse*) captures the impact of changes in prices, income, household size, and number of billing-days on appliance utilization.

End-use indices are constructed in the SAE models. A separate end-use index is constructed for each end-use equipment type using the following function form.

$$ApplianceIndex_{y,m} = Weight^{Type} \times \frac{\left(Sat_y^{Type} \Big/ \frac{1}{UEC_y^{Type}} \right)}{\left(Sat_{09}^{Type} \Big/ \frac{1}{UEC_{09}^{Type}} \right)} \times MoMult_m^{Type} \times \qquad (16)$$

$$(TenYearMovingAverageElectric\Pr ice)^{\lambda} \times (TenYearMovingAverageGas\Pr ice)^{\kappa}$$

Where:

- *Weight* is the weight for each appliance type
- *Sat* represents the fraction of households, who own an appliance type
- $MoMult_m$ is a monthly multiplier for the appliance type in month (m)
- *Eff* is the average operating efficiency the appliance
- *UEC* is the unit energy consumption for appliances

This index combines information about trends in saturation levels and efficiency levels for the main appliance categories with monthly multipliers for lighting, water heating, and refrigeration.

The appliance saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets.

Further monthly variation is introduced by multiplying by usage factors that cut across all end uses, constructed as follows:

$$ApplianceUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.46} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.10} \times \left(\frac{ElecPrice_{y,m}}{ElecPrice_{09}}\right)^{\phi} \times \left(\frac{GasPrice_{y,m}}{GasPrice_{09}}\right)^{\lambda} \tag{17}$$

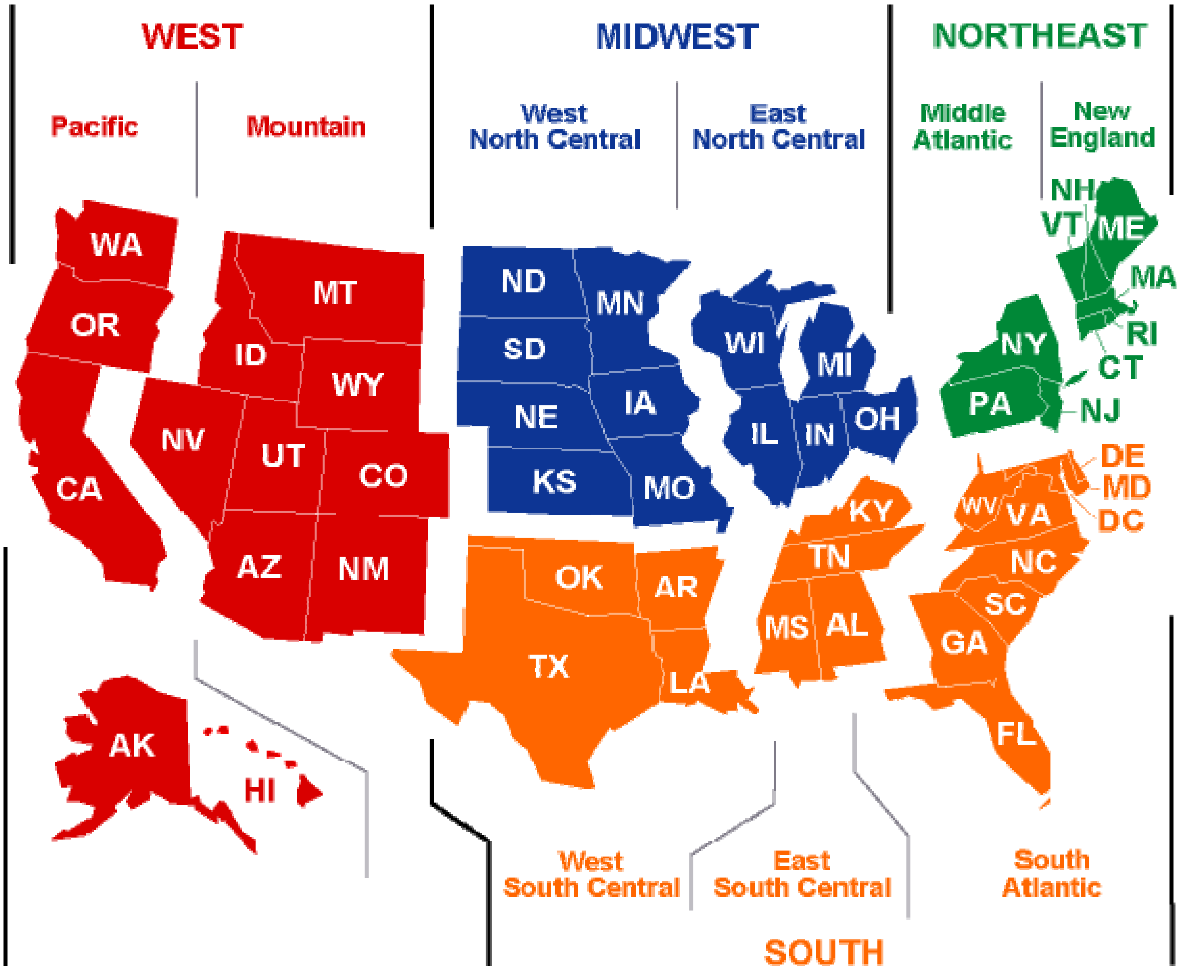
The index for other uses is derived then by summing across the appliances:

$$OtherEqpIndex_{y,m} = \sum_k ApplianceIndex_{y,m} \times ApplianceUse_{y,m} \tag{18}$$

Supporting Spreadsheets and MetrixND Project Files

The SAE approach described above has been implemented for each of the nine Census Divisions. A mapping of states to Census Divisions is presented in Figure 18. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 3.

Figure 18: Mapping of States to Census Divisions



Source: http://www.eia.doe.gov/emeu/reps/maps/us_census.html

Table 3: List of SAE Files

Spreadsheet	*MetrixND* Project File
NewEngland.xls	SAE_NewEngland.ndm
MiddleAtlantic.xls	SAE_MiddleAtlantic.ndm
EastNorthCentral.xls	SAE_EastNorthCentral.ndm
WestNorthCentral.xls	SAE_WestNorthCentral.ndm
SouthAtlantic.xls	SAE_SouthAltantic.ndm
EastSouthCentral.xls	SAE_EastSouthCentral.ndm
WestSouthCentral.xls	SAE_WestSouthCentral.ndm
Mountain.xls	SAE_Mountain.ndm
Pacific.xls	SAE_Pacific.ndm

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The *MetrixND* project files are linked to the data in these spreadsheets. In these project files, the end-use *Usage* variables are constructed and the SAE model is estimated.

Each of the nine SAE spreadsheets contains the following tabs.

- **Definitions -** Contains equipment, end use, worksheet, and Census Division definitions.
- **Intensities -** Calculates the annual equipment indices.
- **Shares -** Contains historical and forecasted equipment shares. The default forecasted values are provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **Efficiencies -** Contains historical and forecasted equipment efficiency trends. The forecasted values are based on projections provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **StructuralVars -** Contains historical and forecasted square footage, number of households, building shell efficiency index, and calculation of structural variable. The forecasted values are based on projections provided by the EIA.
- **Calibration -** This tab contains calculations of the base year *Intensity* values used to weight the equipment indices.
- **EIAData -** Contains the raw forecasted data provided by the EIA.
- **MonthlyMults -** Contains monthly multipliers that are used to spread the annual equipment indices across the months.
- **EV -** Worksheet for incorporating electric vehicle (EV) impacts.
- **PV -** Worksheet for incorporating photovoltaic battery (PV) impacts.

The *MetrixND* Project files are linked to the *AnnualIndices*, *ShareUEC*, and *MonthlyMults* tabs in the spreadsheets. Sales, economic, price and weather information for the Census Division is provided in the linkless data table *UtilityData*. In this way, utility specific data and the equipment indices are brought into the project file. The *MetrixND* project files contain the objects described below.

Parameter Tables

- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use. There are five types of elasticities included on this table.

  - Economic variable elasticities
  - Short-term own price elasticities
  - Short-term cross price elasticities
  - Long-term own price elasticities

- Long-term cross price elasticities

The short-term price elasticities drive the end-use usage equations. The long-term price elasticities drive the Heat, Cool and other appliance indices. The combined price impact is an aggregation of the short and long-term price elasticities. As such, the long-term price elasticities are input as incremental price impact. That is, the long-term price elasticity is the difference between the overall price impact and the short-term price elasticity.

Data Tables

- **AnnualEquipmentIndices.** This data table is linked to the *AnnualIndices* tab for heating and cooling indices, and *ShareUEC* tab for water heating, lighting, and appliances in the SAE spreadsheet.
- **UtilityData.** This is a linkless data table that contains sales, price, economic and weather data specific to a given Census Division.
- **MonthlyMults.** This data table is linked to the corresponding tab in the SAE spreadsheet.

Transformation Tables

- **EconTrans.** This transformation table is used to compute the average usage, and household size, household income, and price indices used in the usage equations.
- **WeatherTrans.** This transformation table is used to compute the HDD and CDD indices used in the usage equations.
- **ResidentialVars.** This transformation table is used to compute the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model.
- **BinaryVars.** This transformation table is used to compute the calendar binary variables that could be required in the regression model.
- **AnnualFcst.** This transformation table is used to compute the annual historical and forecast sales and annual change in sales.
- **EndUseFcst.** This transformation table is used to compute the monthly sales forecasts by end uses.

Models

- **ResModel:** This is the Statistically Adjusted End-Use Model.

Steps to Customize the Files for Your Service Territory

The files that are included in this package contain regional data. If you have more accurate data for your service territory, you are encouraged to tailor the spreadsheets with that information. This section describes the steps needed to customize the files.

Minimum Customization

- Save the *MetrixND* project file and the spreadsheet into the same folder
- Select the spreadsheet and *MetrixND* project file from the appropriate Census Division
- Open the spreadsheet and navigate to the *Calibration* tab
- In cell "B8", replace base year Census Division use-per-customer with observed use-per-customer for your service territory
- Save the spreadsheet and open the *MetrixND* project file
- Click on the *Update All Links* button on the *Menu* bar
- Review the model results

Customizing the End-use Share Paths

In addition to the minimum steps listed above, you can install your own share history and forecasts. To do this, navigate to the *Share* tab in the spreadsheet and paste in the values for your region. Make sure that base year shares on the *Calibration* tab reflect changes on the *Shares* tab.

Customizing the End-use Efficiency Paths

Finally, you can override the end-use efficiency paths that are contained on the *Efficiencies* tab of the spreadsheet.

Appendix A:
Commercial Statistically Adjusted End-Use Model

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions. From a forecasting perspective, econometric models are well suited to identifying historical trends and to projecting these trends into the future. In contrast, end-use models are able to identify the end-use factors driving energy use. By incorporating end-use structure into an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to the SAE approach.

- The equipment efficiency trends and saturation changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast, thereby providing a strong bridge between the two forecasts.
- By explicitly introducing trends in equipment saturations and efficiency levels, SAE models can explain changes in usage levels and weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects. By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be built into the final model.

This document describes this approach, the associated supporting Commercial SAE spreadsheets, and *MetrixND* project files that are used in the implementation. The source for the commercial SAE spreadsheets is the 2015 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

1.3 Commercial Statistically Adjusted End-Use Model Framework

The commercial statistically adjusted end-use model framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$) and other equipment ($Other_{y,m}$). Formally,

$$USE_{y,m} = Heat_{y,m} + Cool_{y,m} + \mathrm{Other}_{y,m} \quad (1)$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$USE_m = a + b_1 \times XHeat_m + b_2 \times XCool_m + b_3 \times XOther_m + \varepsilon_m \qquad (2)$$

Here, $XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

Constructing XHeat

As represented in the Commercial SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days,
- Heating equipment saturation levels,
- Heating equipment operating efficiencies,
- Average number of days in the billing cycle for each month, and
- Commercial output and energy price.

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier. That is,

$$XHeat_{y,m} = HeatIndex_y \times HeatUse_{y,m} \qquad (3)$$

Where

- $XHeat_{y,m}$ is estimated heating energy use in year y and month m,
- $HeatIndex_y$ is the annual index of heating equipment, and
- $HeatUse_{y,m}$ is the monthly usage multiplier.

The heating equipment index is composed of electric space heating equipment saturation levels normalized by operating efficiency levels. The index will change over time with changes in heating equipment saturations (*HeatShare*) and operating efficiencies (*Eff*). Formally, the equipment index is defined as:

$$HeatIndex_y = HeatSales_{04} \times \frac{\left(HeatShare_y / Eff_y \right)}{\left(HeatShare_{04} / Eff_{04} \right)} \tag{4}$$

In this expression, 2004 is used as a base year for normalizing the index. The ratio on the right is equal to 1.0 in 2004. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2004 level. This will be counteracted by higher efficiency levels, which will drive the index downward. Base year space heating sales are defined as follows.

$$HeatSales_{04} = \left(\frac{kWh}{Sqft} \right)_{Heating} \times \left(\frac{CommercialSales_{04}}{\sum_e kWh / Sqft_e} \right) \tag{5}$$

Here, base-year sales for space heating is the product of the average space heating intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space heating sales value is defined on the *BaseYrInput* tab. The resulting $HeatIndex_y$ value in 2004 will be equal to the estimated annual heating sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, commercial level economic activity, prices and billing days. Using the COMMEND default elasticity parameters, the estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5} \right) \times \left(\frac{WgtHDD_{y,m}}{HDD_{04}} \right) \times \left(\frac{Output_y}{Output_{04}} \right)^{0.20} \times \left(\frac{Price_{y,m}}{Price_{04}} \right)^{-0.18} \tag{6}$$

Where

- *BDays* is the number of billing days in year *y* and month *m*, these values are normalized by 30.5, which is the average number of billing days
- *WgtHDD* is the weighted number of heating degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month
- *HDD* is the annual heating degree days for 2004,
- *Output* is a real commercial output driver in year *y*,

- *Price* is the average real price of electricity in month *m* and year *y*,

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2004). The first two terms, which involve billing days and heating degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in commercial output and prices, as transformed through the end-use elasticity parameters. For example, if the real price of electricity goes up 10% relative to the base year value, the price term will contribute a multiplier of about .98 (computed as 1.10 to the -0.18 power).

Constructing XCool

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days,
- Cooling equipment saturation levels,
- Cooling equipment operating efficiencies,
- Average number of days in the billing cycle for each month, and
- Commercial output and energy price.

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_y \times CoolUse_{y,m} \tag{7}$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year *y* and month *m*,
- $CoolIndex_y$ is an index of cooling equipment, and
- $CoolUse_{y,m}$ is the monthly usage multiplier.

As with heating, the cooling equipment index depends on equipment saturation levels (*CoolShare*) normalized by operating efficiency levels (*Eff*). Formally, the cooling equipment index is defined as:

$$CoolIndex_y = CoolSales_{04} \times \frac{\left(CoolShare_y / Eff_y \right)}{\left(CoolShare_{04} / Eff_{04} \right)} \tag{8}$$

Data values in 2004 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2004. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2004 level. This will be counteracted by higher efficiency levels, which will drive the index downward. Estimates of base year cooling sales are defined as follows.

$$CoolSales_{04} = \left(\frac{kWh}{Sqft}\right)_{Cooling} \times \left(\frac{CommercialSales_{04}}{\sum_e kWh/Sqft_e}\right) \tag{9}$$

Here, base-year sales for space cooling is the product of the average space cooling intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space cooling sales value is defined on the *BaseYrInput* tab. The resulting *CoolIndex* value in 2004 will be equal to the estimated annual cooling sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, economic activity levels and prices. Using the COMMEND default parameters, the estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{WgtCDD_{y,m}}{CDD_{04}}\right) \times \left(\frac{Output_y}{Output_{04}}\right)^{0.20} \times \left(\frac{Price_{y,m}}{Price_{04}}\right)^{-0.18} \tag{10}$$

Where

- *WgtCDD* is the weighted number of cooling degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2004.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2004). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in commercial output and prices.

Constructing XOther

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Equipment saturation levels,
- Equipment efficiency levels,
- Average number of days in the billing cycle for each month, and
- Real commercial output and real prices.

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherIndex_{y,m} \times OtherUse_{y,m} \tag{11}$$

The second term on the right hand side of this expression embodies information about equipment saturation levels and efficiency levels. The equipment index for other uses is defined as follows:

$$OtherIndex_{y,m} = \sum_{Type} Weight_{04}^{Type} \times \left(\frac{Share_{y}^{Type} / Eff_{y}^{Type}}{Share_{04}^{Type} / Eff_{04}^{Type}} \right) \tag{12}$$

Where

- *Weight* is the weight for each equipment type,
- *Share* represents the fraction of floor stock with an equipment type, and
- *Eff* is the average operating efficiency.

This index combines information about trends in saturation levels and efficiency levels for the main equipment categories. The weights are defined as follows.

$$Weight_{04}^{Type} = \left(\frac{kWh}{Sqft} \right)_{Type} \times \left(\frac{CommercialSales_{04}}{\sum_{e} kWh / Sqft_{e}} \right) \tag{13}$$

Further monthly variation is introduced by multiplying by usage factors that cut across all end uses, constructed as follows:

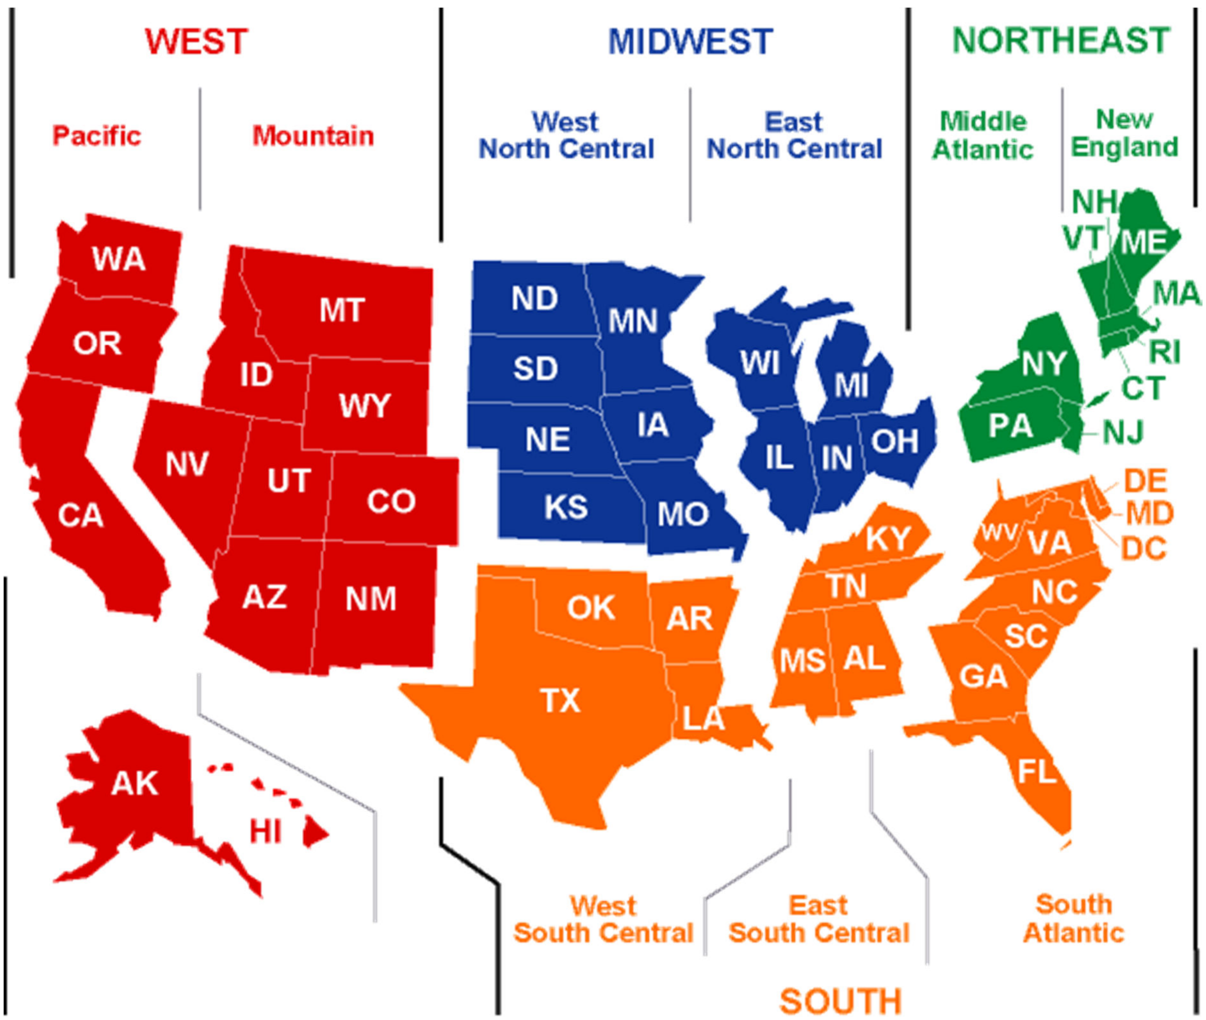
$$OtherUse_{y,m} = \left(\frac{BDays_{y,m}}{30.5}\right) \times \left(\frac{Output_y}{Output_{04}}\right)^{0.20} \times \left(\frac{Price_{y.m}}{Price_{04}}\right)^{-0.18} \tag{14}$$

In this expression, the elasticities on output and real price are computed from the COMMEND default values.

1.4 Supporting Spreadsheets and *MetrixND* Project Files

The SAE approach described above has been implemented for each of the nine census divisions. A mapping of states to census divisions is presented in Figure 1. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 1.

Figure 1: Mapping of States to Census Divisions*



*Map Source: http://www.eia.gov/consumption/manufacturing/maps.cfm

Table 1: List of SAE Files

Spreadsheets	*MetrixND* Project Files
NewEnglandCom.xls	NewEnglandCom.ndm
MiddleAtlanticCom.xls	MiddleAtlanticCom.ndm
EastNorthCentralCom.xls	EastNorthCentralCom.ndm
WestNorthCentralCom.xls	WestNorthCentralCom.ndm
SouthAtlanticCom.xls	SouthAltanticCom.ndm
EastSouthCentralCom.xls	EastSouthCentralCom.ndm
WestSouthCentralCom.xls	WestSouthCentralCom.ndm
MountainCom.xls	MountainCom.ndm
PacificCom.xls	PacificCom.ndm

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The data from these spreadsheets are linked to the *MetrixND* project files. In these project files, the end-use *Usage* variables (Equations 6, 10, and 14 above) are constructed and the SAE model is estimated.

The nine spreadsheets contain the following tabs.

- **BaseYrInput.** This tab contains base year Census Division intensities by end-use and building type as well as default building type weights. It also contains functionality for changing the weights to reflect utility service territory.
- **Efficiency.** This tab contains historical and forecasted end-use equipment efficiency trends. The forecasted values are based on projections provided by the EIA.
- **Shares.** This tab contains historical and forecasted end-use saturations. The procedure by which these are calculated is explained in the text above.
- **ShareEff.** This tab is used for the calculation of the annual equipment indices.
- **AnnualIndices.** This tab contains the annual *Heat*, *Cool* and *Other* equipment indices.
- **Intensity.** This tab contains the annual intensity (kWh/sqft) projections by end-use.
- **FloorSpace.** This tab contains the annual floor space (sqft) projections by end-use.
- **PV.** This tab is used to incorporate the impact of photovoltaic batteries into the forecast.

The *MetrixND* project files contain the following objects.

Parameter Tables

- **Parameters.** This parameter table includes the values of the annual HDD and CDD in 2004 used to calculate the *Usage* variables for each end-use.
- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use.

Data Tables

- **AnnualIndices.** This data table is linked to the *AnnualIndices* tab in the Commercial SAE spreadsheet and contains sales-adjusted commercial SAE indices.
- **Intensity.** This data table is linked to the *Intensity* tab in the Commercial SAE spreadsheet.
- **FloorSpace.** This data table links to *FloorSpace* tab in the Commercial SAE spreadsheet.
- **UtilityData.** This linkless data table contains Census Division level data. It can be populated with utility-specific data.

Transformation Tables

- **EconTrans.** This transformation table is used to compute the output and price indices used in the usage equations.
- **WeatherTrans.** This transformation table is used to compute the HDD and CDD indices used in the usage equations.
- **CommercialVars.** This transformation table is used to compute the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model. Structural variables based on the intensity/floor space combination are also calculated here.
- **BinaryVars.** This transformation table is used to compute the calendar binary variables that could be required in the regression model.
- **AnnualFcst.** This transformation table is used to compute the annual historical and forecast sales and annual change in sales.
- **EndUseFcst.** This transformation table breaks the forecast down into its heating, cooling and other components.

Models

- **ComSAE:** The commercial SAE model (energy forecast driven by end-use indices, price, and output projections).
- **ComStruct:** Simple stock model (energy forecast driven by end-use energy intensities, and square footage).

Annual Natural Gas Sendout Process

LG&E®

Sales Analysis & Forecasting
September 2016

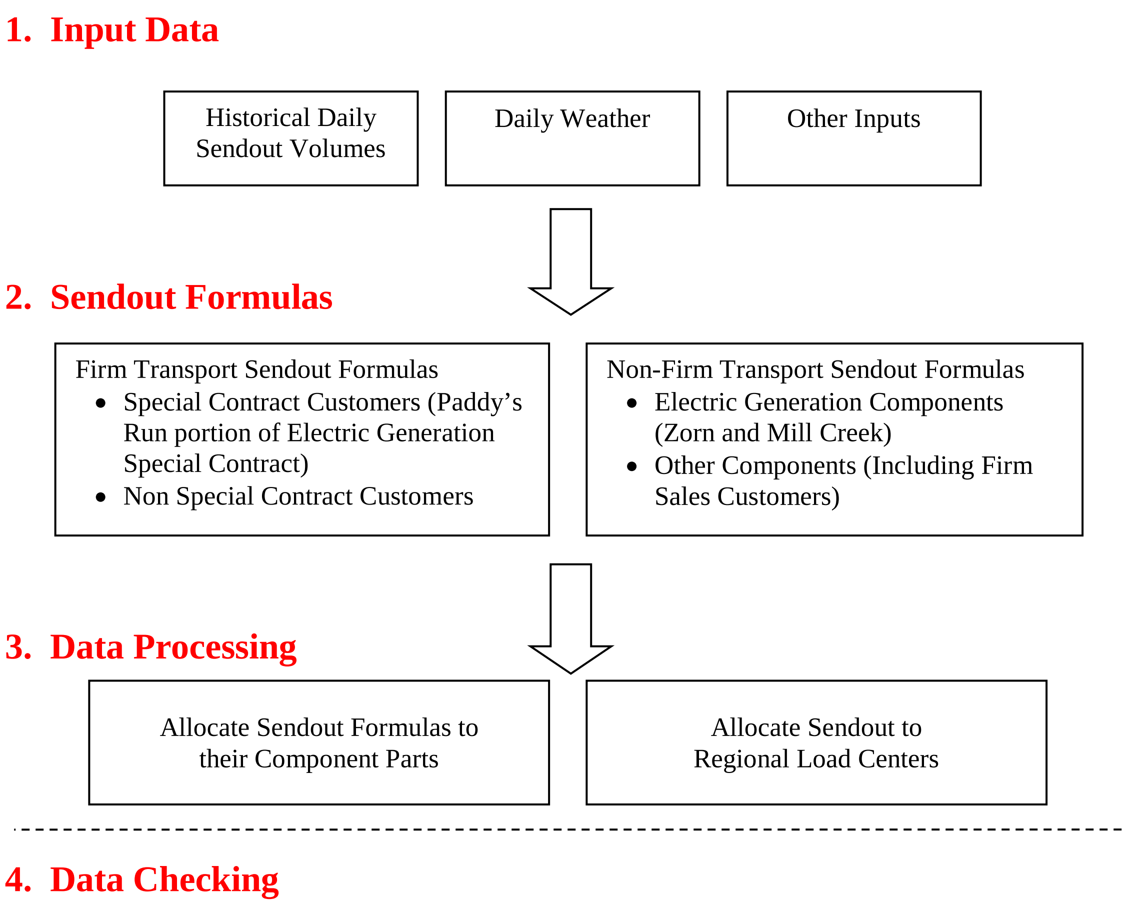
Table of Contents

1 Introduction

The Gas Supply Department forecasts daily sendout (DSO) as a part of its gas supply planning process. Each year, Sales Analysis & Forecasting provides daily sendout formulas to the Gas Supply Department. Like the volume forecast, the production of the sendout formulas can be divided into four parts (see Figure 1). In the first part of the process, input data is gathered and prepared for use in the subsequent parts. The following data items are key inputs to the production of the daily sendout formulas:

- Historical daily gas sendout volumes
- Daily weather data
- Other data including gas used by company-owned facilities and Generation Planning's forecast of gas used by Zorn, Mill Creek and Paddy's Run.

Figure 1 –Sendout Formula Process Diagram



DSO is recorded for the total system and for Firm Transportation (FT) customers. FT customers include special contract customers and non-special contract customers. One of the FT special contract customers is the Paddy's Run portion of the Electric Generation Special Contract. The difference between total DSO and FT sendout is "NonFT" sendout. NonFT sendout includes sales to retail customers, electric generation uses, other company uses, and losses. Electric generation uses include gas used by Zorn and Mill Creek. Since September 2014, Cane Run has been served by Texas Gas and is no longer served by the LG&E Gas Business. In the second part of the process, sendout formulas are produced for NonFT and FT sendout. Then, in the third part of the process, the NonFT and FT sendout formula parameters are allocated to their component parts.

The final part of the process is data checking. Every step in the production of the sendout formulas is checked before proceeding to the next step.

2 Input Data

Table 1 provides a summary of the data inputs used to produce the sendout formulas. The sections to follow describe the key processes used to prepare the data for use in this process.

Table 1 – Data Inputs for Production of DSO Formulas

Data	**Source**	**Format**
Historical DSO Volumes	Gas Supply (Monthly DSO Variance Report)	Daily Volumes (Total Sendout Excluding Gas Used by Electric Generating Stations and FT Sendout)
Historical Daily Average Temperatures	Gas Supply (Monthly DSO Variance Report)	Daily Temperatures
Other Company Uses	Louisville Gas & Electric Company Distribution of MCF Sendout	Monthly Reports
Forecasted Volumes for Zorn, Mill Creek, and Paddy's Run Generation Units	Generation Planning	Monthly
Monthly Normal Weather Forecast	Sales Analysis & Forecasting	Monthly HDD/CDDs
Daily Normal Weather Forecast	Sales Analysis & Forecasting	Daily HDD/CDDs
Design Weather	Gas Supply	Daily HDDs

2.1 Historical DSO Volumes

LG&E delivers natural gas to customers each day by re-delivering natural gas received from interstate pipelines. Additionally, gas may be withdrawn from company-owned storage facilities to meet system requirements. The total amount of gas delivered into the system on a daily basis is the total daily sendout (DSO).

DSO is recorded for the total system and for Firm Transportation (FT) customers. FT customers include special contract customers and non-special contract customers. The FT special contract customer is the Paddy's Run portion of the Electric Generation Special Contract. The difference between the total system DSO and FT sendout is "NonFT" sendout. In addition to sales to retail customers, NonFT sendout includes gas used by company-owned generating assets, other company uses, and losses. Electric generation uses include gas used by Zorn and Mill Creek. Table 2 contains a complete list of the FT and NonFT sendout components.

Table 2 – FT and NonFT Sendout Components

2.2 Historical Daily Weather Data

The historical daily weather series used in the production of the DSO formulas is supplied by the Gas Supply Department and is based on a Gas Day that begins and ends at 10:00 AM (vs. 12:00 AM).

2.3 Daily Normal Weather Forecast

A daily normal weather forecast is used to produce a forecast of DSO under normal weather conditions. The daily normal weather forecast is based on thirty years of historical weather data.

3 Sendout Formulas

The monthly sendout formulas provided to the Gas Supply Department are in the format requested by the Gas Supply Department and include the following parameters.

Table 3 – Sendout Formula Parameters

Parameter	**Description**
BL_{wknd}	Weekend base load usage (Mcf).
BL_{wkdy}	Weekday base load usage (Mcf).
BP_1	1st HDD breakpoint.
BP_2	2nd HDD breakpoint.
BP_3	3rd HDD breakpoint.
BP_4*	4th HDD breakpoint.
T_1	1st temperature coefficient.
T_2	2nd temperature coefficient.
T_3	3rd temperature coefficient.
T_4*	4th temperature coefficient.

*Applicable for the January and February sendout formulas only.

The 4th breakpoint and coefficient were added to the January and February formulas to account for extreme temperatures experienced during 2014. The following equations are used to compute DSO for a given month and usage type. The "max" function returns the largest value in a set of values (e.g., max(20, 0) = 20).

If the current day is a weekend day,

$$DSO = BL_{wknd} + \max(HDD\text{-}BP_1, 0)*T_1 + \max(HDD\text{-}BP_2, 0)*T_2 + \max(HDD\text{-}BP_3, 0)*T_3 + \max(HDD\text{-}BP_4, 0)*T_4$$

Else,

$$DSO = BL_{wkdy} + \max(HDD\text{-}BP_1, 0)*T_1 + \max(HDD\text{-}BP_2, 0)*T_2 + \max(HDD\text{-}BP_3, 0)*T_3 + \max(HDD\text{-}BP_4, 0)*T_4$$

$$HDD = \max(65\text{-Average Gas Day Temperature}, 0)$$

The weekend and weekday base load parameters include gas used for water heating, which is a function of ground water temperatures. As ground water temperatures decrease, the monthly base load parameters would be expected to increase. The HDD breakpoint parameters are points along the DSO line where the slope changes. The temperature coefficients define the slope of the DSO line between breakpoints.

An important decision in the formula specification process is selecting the period of history over which the sendout formulas are specified. The primary objective in making this decision is to select a period of history with a representative set of high and low temperatures. Generally, daily observations from two historical months – approximately 60 daily observations in total – are used to estimate the DSO coefficients for each month. Daily observations from other months are incorporated when temperatures in more recent months are not representative.

The following sections summarize the processes used to specify the NonFT and FT sendout formulas. Formula parameters are ultimately developed for every component of NonFT and FT sendout in Table 2 and every month in the 5-year forecast period.

3.1 DSO Formula Specification

The process used to specify NonFT and FT sendout formula coefficients differs for the winter and summer months.

3.1.1 Winter DSO Formula Specification

For the winter months, SAS and R software was used to optimize the formula coefficients based on historical DSO volumes and historical daily average temperatures. DSO formulas are used in inventory planning. Optimizing formula coefficients is an iterative process with feedback from other groups aimed at minimizing forecast errors, particularly under extreme weather scenarios.

3.1.2 Summer DSO Formula Specification

Since there is little, if any, weather-sensitive load in the summer months, the summer formula coefficients are specified by simply averaging weekday and weekend loads by month.

3.2 Reasonability Checks

Once the summer and winter formulas are specified, the formulas are reviewed to make sure the following criteria are met:

1. The relationships between the weekend and weekday base load parameters in the winter months and the differences between base load parameters from one month to the next should be consistent with history. The latter is somewhat subjective for the winter months due to the lack of historical sendout observations under zero HDD weather conditions. Some insights about these relationships can be obtained by comparing historical weekend and weekday loads by month and HDD.
2. For a winter month, the forecasted usage in the DSO formula should be upward sloping. In theory, the heating response during the winter months should resemble an “S” curve. The heating response is staggered as temperatures initially begin to get cooler. Then, the response becomes consistent as all customers are heating their homes. At some point, however, the heating response begins to taper off as some customers reach their maximum heating capacity.

3.3 Formula Specification Under Design Weather Conditions

Specifying the sendout formulas under design weather conditions with an “ordinary least squares” approach may not be possible due to the lack of recent historical sendout observations under peak design weather conditions. If recent sendout data under peak design weather conditions is not available, an analysis would be conducted using historical sendout data to produce reasonable estimates for peak sendout. The following guidelines were followed when estimating these values:

1. Ideally, the peak estimate for a given month should be based on previous observations in that month under peak weather conditions.
2. More recent observations are better than less recent observations. However, due to special circumstances, some historical observations should not be incorporated in the analysis. For example, the observed sendout on Christmas Eve of 2004 – which was very cold – may not be a good reference point because the day was a holiday.
3. In the absence of comparable historical data for a given month, a reasonable peak estimate may be derived based on historical observations in an adjacent month.

4. In some cases, it may make sense to use the assumed base load usage to compute an implied use-per-HDD value for a historical observation. Then, an estimate of peak sendout can be computed based on the peak HDD value (i.e., peak sendout = base load + use-per-HDD*peak HDD).

Once the peak estimates are determined, the final temperature coefficient may need to be adjusted so that the formula's sendout prediction under peak weather conditions will match the estimate.

4 Data Processing

After the NonFT and FT DSO formulas are specified, the formula parameters are allocated to their component parts and to regional load centers.

4.1 Allocate Sendout Formulas to their Component Parts

The FT sendout formulas are allocated between (a) Paddy's Run's portion of the Electric Generation Special Contract and (b) other FT customers. The formula parameters for Paddy's Run's portion of the Electric Generation Special Contract are based on volume forecasts provided by the Generation Planning group. Consumption at Paddy's Run is assumed to be constant throughout the month (with no variations based on weather or the day of week).

The process used to allocate NonFT sendout to its component parts considers gas used for electric generation, company uses, and losses differently from the other NonFT components. Each of these items is discussed in the following sections.

4.1.1 Gas Used for Electric Generation

A separate set of NonFT sendout formulas is developed for (a) Zorn and (b) Cane Run and Mill Creek. Consumption at each of these generation stations is assumed to be constant throughout the month (with no variations based on weather or the day of week).

4.1.2 Company Uses

Company uses – as a component of the NonFT sendout formula – include compressor station usage, city gate usage, and gas used by company-owned facilities. In the non-winter months, these company uses are only reported on a quarterly basis. Since the gas is actually used throughout the year, the quarterly usage was reallocated to its component months per the guidance of the Gas Control department. This redistribution results in use that is more likely during normal weather.

4.1.3 Gas Lost and Unaccounted For

"Lost and unaccounted for gas" (LAUF) includes fixed gas losses (resulting from leaks on the gas distribution system) and metering losses. Metering losses exist because the gas meters for residential and commercial customers are designed to measure gas at a constant temperature of 60 degrees Fahrenheit. In the winter months – when the temperature is less than 60 degrees and the density of gas is greater – metering losses are positive (i.e., customers actually consume more gas than the meter indicates). In the summer months, metering losses are negative.

The forecast of fixed losses – as the name suggests – is constant at 65,000 Mcf per month or 2,137 Mcf per day. The forecast of LAUF is based on a model developed by the Prime Group ("Prime Model"). This model estimates the temperature of gas – and ultimately the density of gas – for a given month as a function of the current and previous two months temperatures. Then, the model computes the percentage difference between the density of gas at the estimated temperature and the density of gas at 60 degrees.

Metering losses are computed by multiplying the base load and weather-sensitive portions of "net sendout" by this percentage. Net sendout is the gas delivered to customers without temperature-compensating meters. The base load portion of net sendout is computed by subtracting the sum of company uses and fixed losses from the base load portion of NonFT sendout. The weather-sensitive portion of net sendout is equal to the weather-sensitive portion of NonFT sendout.

4.1.4 Other NonFT Components

NonFT sendout (like FT sendout) is comprised of base load and weather-sensitive volumes. Gas used for electric generation, company uses, fixed losses, and the base load portion of metering losses make up a portion of the NonFT base load volumes. The weather-sensitive portion of metering losses makes up a portion of the NonFT weather-sensitive volumes. The remaining portions of the NonFT base load and weather-sensitive volumes must be allocated to the sales components of sendout (RGS, CGS, IGS, AAGS, Commercial TS-2, and Industrial TS-2 sales). To complete this process, the volume forecast for each sales class and month is broken into base load and weather-sensitive sales components. These components provide the basis for allocating the NonFT formula parameters to their component parts and are derived based on class-specific assumptions regarding the class's sensitivity to ground water temperatures and ambient air temperatures. The Distributed Generation (DGGS) component of NonFT is based on contracted volumes.

4.2 Regional Load Center Allocation

NonFT and FT sendout formula parameters are also allocated to two regional load centers: East and West. Each regional spreadsheet has the flexibility to define months by season (winter or summer) and to allow a change in the allocation percent by season.

5 Data Checking

The production of the sendout formula parameters involves a large amount of data and calculations. For this reason, every aspect of the process must be checked for errors. The criteria for checking the key aspects of the process have been discussed in each section of this report.

Forecast Summary

- Economy: Louisville economic indicators remain positive and growth in the Commonwealth as a whole is expected to stay close to 2 percent.
  - *Louisville MSA real gross metro product is expected to increase at 2.6 percent during the second half of 2016 and 2017 according to IHS.*
  - *Louisville MSA unemployment has remained consistent at close to 4.5 percent since early 2015*
  - *Louisville MSA private single-family housing starts are up 15 percent on a rolling 12-month basis.*

- 3% decrease in sales forecast compared to 2016 Plan driven by Residential and Industrial.
- Residential customer forecast higher than 2016 Plan but still with growth of 0.2%. Commercial customers largely consistent with 2016 Plan.
- Major Accounts: 2.5 % decrease in the Major Account forecast compared to 2016 Plan driven by American Synthetic and Ford.

Large Customer Highlights

- *Jim Beam volume in 2017 is expected to be 94% (318,000 MCF) higher than the 2017 BP as a result of production boom putting their use close to infrastructure constraints*
- *Maker's Mark added capacity and increased production in late 2015 expected to continue . Volume for 2017 is expected to be 42% (95,000 MCF) higher than the 2016 BP*
- *American Synthetic expected to be 52% (390,500 MCF) lower than the 2016 BP from less energy intensive processes due to changing chemical formulas*
- *Reynolds Foil expected to be 79% (108,000 MCF) higher than the 2016 BP as gas use has reverted to levels prior to investments on their electric side*
- *JBS Swift, Baptist Healthcare, Carriage House, and Zeochem are now individually forecasted*
- *BASF and Sypris no longer individually forecasted as their gas use is no longer among the highest users*

Annual Generation Forecast Process

PPL companies

Generation Planning & Analysis
2016

Table of Contents

1 Introduction

The Generation Planning group prepares an annual generation and off-system sales ("OSS") forecast for Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") (collectively "the Companies"). This forecast provides the basis for – among other things – the Companies' forecasts of fuel costs, generation-related variable operating and maintenance costs, economy purchased power, and OSS margin. This document summarizes the process used to prepare the generation forecast.

2 Production Cost Model

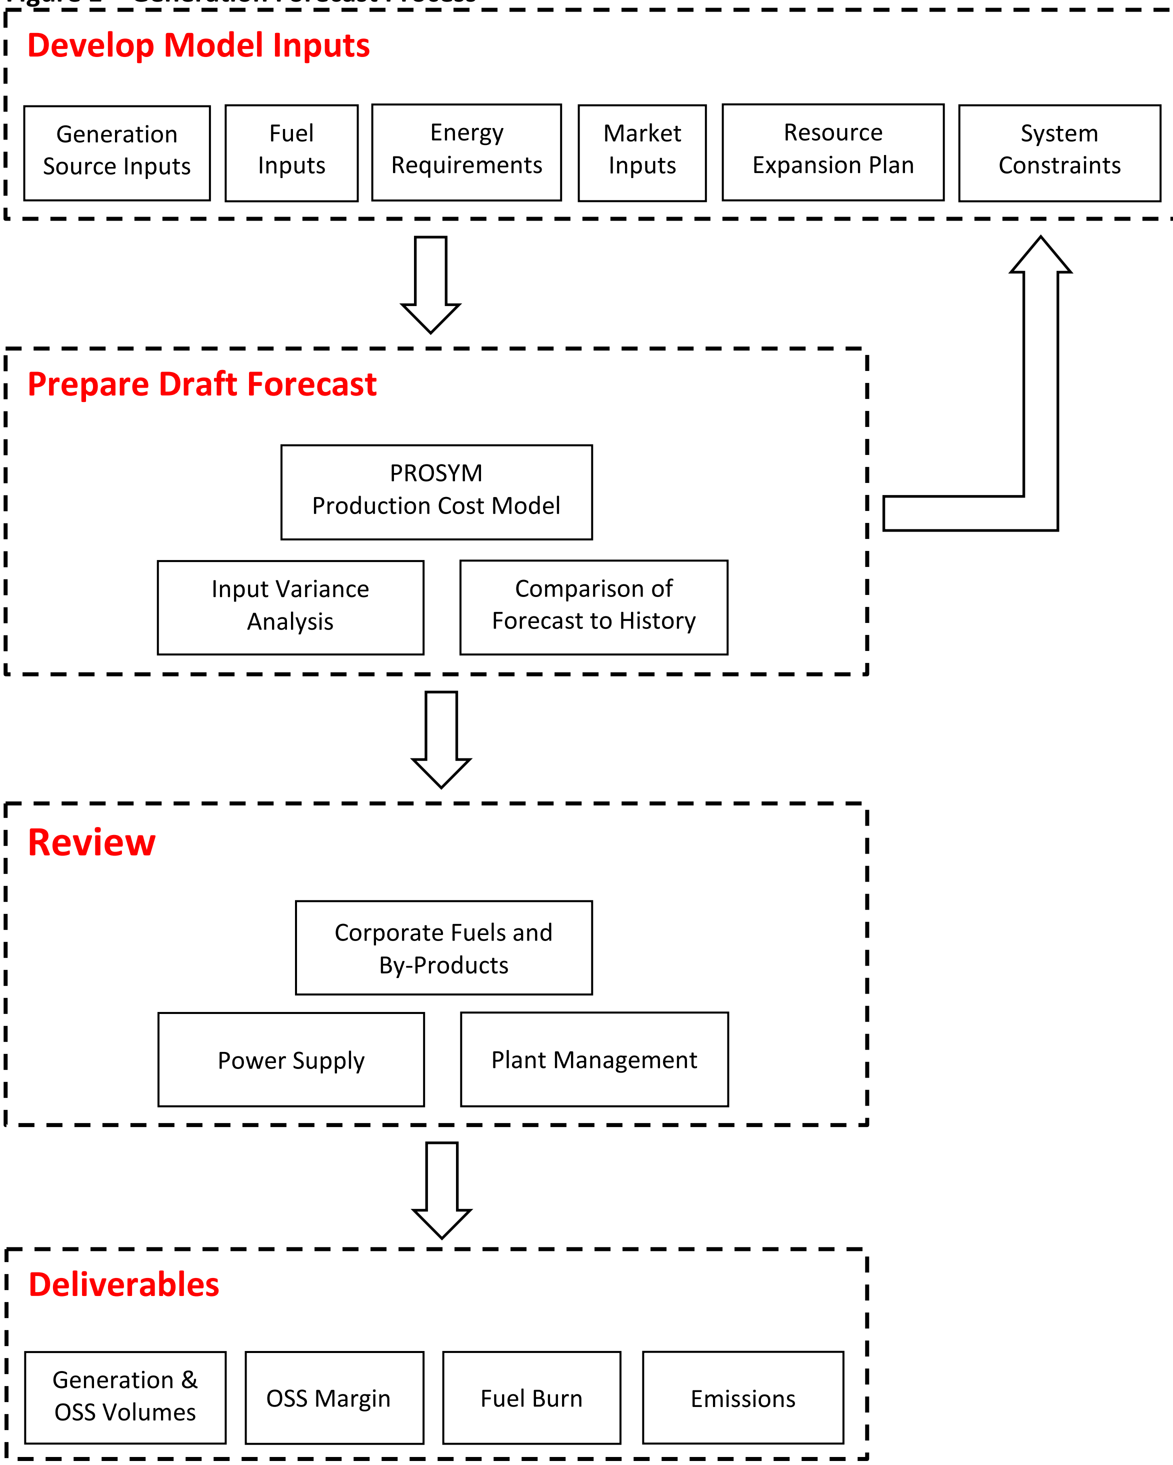
The Companies' generation forecast is developed using ABB's PROSYM, a proprietary production cost model. PROSYM is a chronological simulation engine that optimizes unit commitment and economic dispatch to meet the load for an interconnected electric system, considering the reserve requirements and other aspects of the electric system. PROSYM is a proven production cost model that has been used by utilities throughout the United States for decades.

In addition to PROSYM, SAS, Microsoft Access, and Microsoft Excel are used to process and analyze forecast results. Presentations containing forecast assumptions and results are prepared using Microsoft PowerPoint.

3 Process Overview

Figure 1 provides an overview of the process used to develop the Companies' generation forecast. In the first part of the process, model inputs are developed. Then, the model inputs are loaded into PROSYM and a draft generation forecast is prepared. PROSYM is a complex model, so extensive review takes place to ensure that the inputs are correctly loaded into the model and that the model results are reasonable. An input variance analysis evaluates the impact of changing each input or group of related inputs to ensure that the associated output changes are reasonable. Then, various elements of the generation forecast are compared to historical trends for reasonableness. If the forecast results are not deemed reasonable, the applicable model inputs are adjusted and the process is repeated. In the third part of the process, the results of the forecast are reviewed by other departments. This review process ensures that the forecast considers feedback from a broad range of perspectives. After all parties are satisfied with the results, the generation forecast is finalized and distributed to the groups who use the forecast to prepare financial budgets. Each part of this process is discussed further in the following sections.

Figure 1 – Generation Forecast Process



3.1 Develop Model Inputs

The first part of the process used to develop the Companies' generation forecast involves developing and vetting model inputs. Well-vetted inputs are essential to a good forecast. Wherever possible (and applicable), model inputs are initially developed based on an analysis of historical data. Then, these inputs are reviewed with plant management for reasonableness. Model inputs are adjusted when historical trends are not expected to continue in the future. Table 1 lists the six main categories of model inputs along with the inputs in each category. Each of these categories is discussed further in the following sections.

Table 1 - Key Inputs to the Generation Forecast

Input Category	**Inputs**
Generation Source Inputs	Minimum and maximum capacity, heat rate, emission rates, variable operating and maintenance cost, operating limits, unit availability, company allocation
Fuel Inputs	Coal prices, natural gas prices, oil prices, other fuel-related inputs
Energy Requirements	Hourly energy requirements
Market Inputs	Electricity prices, emission allowance prices, off-system sales and purchase limits, off-system sales and purchase price thresholds
Expansion Plan Inputs	Timing and type of expansion plan units
System Constraints	Transmission constraints, spinning reserve requirements, off-system sales constraints, dispatch order rules

3.1.1 Generation Source Inputs

The generation sources modeled in PROSYM include the Companies' existing sources of generation as well as future generation sources planned to meet customers' growing demand for energy. Generation sources include generating units owned by the Companies, power purchase agreements with other power producers, and the capacity associated with the Companies' curtailable service rider ("CSR") customers.

Generation source inputs define the operating characteristics of the generation sources. These inputs include the source's minimum and maximum capacity, heat rate, emission rates, variable operating and maintenance cost, operating limits, equivalent forced outage rate, and ownership ratio. Each of these inputs is discussed further in the following sections.

3.1.1.1 Minimum and Maximum Capacity

The minimum and maximum capacity (or output) is specified for each generation source as a megawatt ("MW") value for the summer, winter, fall, and spring seasons. Capacity inputs are specified based on an analysis of historical data and unit rating tests but rarely change materially from forecast to forecast.

3.1.1.2 Heat Rate

The heat rate specifies the amount of fuel required to produce a megawatt-hour ("MWh") of electricity. Where applicable, a heat rate curve is specified for each generation source for the summer, winter, fall, and spring seasons. The heat rate curves are specified based on an analysis of historical data and heat rate tests performed by the plants.

3.1.1.3 Emission Rates

Where applicable, PROSYM models the emissions of sulfur dioxide ("SO_2"), nitrogen oxides ("NO_x"), mercury ("Hg"), and carbon dioxide ("CO_2") for each generation source:

- SO_2 Emissions: For coal units, SO_2 emissions are modeled as a function of the unit's SO_2 removal rate and the sulfur content of the fuel. The SO_2 removal rate for each coal unit ranges between

90% and 99%, depending on the vintage of the unit's flue-gas desulfurization ("FGD") equipment.[1] The SO_2 removal rate is specified based on an analysis of historical data and updated in the forecast period for units being retrofitted with new or upgraded FGD equipment. The sulfur content of the fuel is provided by the Corporate Fuels and By-Products group. For gas units, SO_2 emissions are modeled as a function of an average SO_2 emission rate (specified in lb/MMBtu). The SO_2 emission rate for gas units is estimated by the unit manufacturer.

- NO_x Emissions: For coal units, NO_x emissions are modeled as a function of a NO_x emission curve (specified in lb/MMBtu). NO_x emissions vary with the unit's output and are lower for units retrofitted with selective catalytic reduction ("SCR") equipment. The NO_x emission curve is specified based on an analysis of historical data in conjunction with performance expectations associated with the timing of catalyst replacement. For gas units, NO_x emissions are modeled as a function of an average emission rate (also specified in lb/MMBtu) estimated by the unit manufacturer.
- Hg Emissions: For coal units, Hg emissions are modeled as a function of the unit's average Hg emission rate (specified in lb/MMBtu). Average Hg emission rates are based on engineering estimates and vary depending on whether the unit is retrofitted with a fabric filter baghouse or sorbent injection controls.
- CO_2 Emissions: CO_2 emissions are modeled as a function of the unit's average CO_2 emission rate (specified in lb/MMBtu). Average CO_2 emission rates are dependent on the type of fuel burned in the unit and are based on engineering estimates.

3.1.1.4 Variable Operating and Maintenance Cost

Variable operating and maintenance ("O&M") costs include all non-fuel costs that are incurred when operating the generation source. For coal units, variable O&M includes the cost of operating environmental controls. For Cane Run 7, variable O&M includes the cost of its long-term program contract ("LTPC"), which is paid quarterly based on the number of starts and operating hours for the unit. The Companies do not have similar LTPCs in place for their simple-cycle combustion turbines ("SCCTs"); the cost of major maintenance is considered in unit commitment and dispatch decisions but is not modeled as a component of production costs.

3.1.1.5 Operating Limits

The following operating limits are modeled in PROYSM for each generation source. Each of these inputs is specified based on an analysis of historical data.

- Minimum Down-Time: Minimum down-time is the minimum number of hours after coming offline that a generation source must remain offline before it can be brought back online.
- Minimum Up-Time: Minimum up-time is the minimum number of hours after coming online that a generation source must remain on-line before it can be taken offline for economic reasons.
- Ramp-Up Rate: Ramp-up rate is the rate (specified in MW/hour) at which a generation source can increase its output.
- Ramp-Down Rate: Ramp-down rate is the rate (specified in MW/hour) at which a generation source can decrease its output.

3.1.1.6 Unit Availability

The following unit availability inputs are modeled in PROSYM for each source. These inputs determine the extent a source is available for operation.

[1] Brown Units 1-3 share the same FGD.

- Planned Maintenance Schedule: The planned maintenance schedule specifies the timing and duration of planned maintenance events. The schedule is developed with input from plant management, Generation Dispatch, and Project Engineering, such that the outages will have the least economic and reliability impact to customers.
- Equivalent Unplanned Outage Rate ("EUOR"): EUOR inputs determine the amount of time the generation source is unavailable due either to a forced outage or maintenance outage. EUOR inputs are specified based on an analysis of historical data.

3.1.1.7 Company Allocation

The energy and capacity for all generation sources modeled in PROSYM are either wholly or jointly allocated to LG&E and/or KU. For each generation source, the Companies' allocation is specified in PROSYM to facilitate the process of creating generation and other forecasts by company as well as forecasting the After-the-Fact Billing process used to calculate the Fuel Adjustment Clause.

3.1.2 Fuel Inputs

Each thermal generation source is associated with one or more fuel forecasts for startup and for online operation. The fuel inputs in PROSYM specify the cost of fuel, the fuel's heat content, the quantity of fuel required for startup, and – for generation sources where the fuel price is a blend of multiple fuel forecasts – the blend ratio of each fuel forecast. For coal, the fuel inputs also include the fuel's SO_2 content.

3.1.2.1 Coal Prices

A forecast of delivered coal prices is developed for each station by the Corporate Fuels and By-products group. These forecasts reflect the cost of the Companies' contracted coal volumes, the assumed cost of coal that will be contracted in the future, and the cost of transporting fuel from mines to the stations. Based on the coal burn forecast by unit, the Corporate Fuels and By-Products group calculates the target coal purchase tonnage needed each year to maintain desired inventory levels while meeting the forecasted coal burn. The forecasted price per MMBtu for each coal type is the result of computing the weighted average of coal already under contract and the market price of coal. In the first year of the forecast, the market price is the average of coal bids received, but not under contract. In subsequent years, the market price is the weighted average of coal bids received and the forecast from an independent third party consultant, Wood Mackenzie. Beyond the 5th year, prices are increased at the yearly growth rate reflected in the Energy Information Administration's latest Annual Energy Outlook for "All Coals, Minemouth" nominal price forecast.

3.1.2.2 Natural Gas Prices

A forecast of Henry Hub natural gas prices is developed as a starting point for undelivered gas. The initial years of the Henry Hub price forecast reflect monthly forward market prices from NYMEX as of a specific recent quote date, which reflects a current view of forward prices at the time the forecast is prepared. In the subsequent years, the market prices are blended with the EIA's price forecast published in its most recent Annual Energy Outlook. The Henry Hub forward market prices are then adjusted to local delivered prices to KU and LG&E units using an average annual loss factor and a variable O&M charge per MMBtu that also adjusts for average assumed basis differentials. For each station that uses natural gas for startup or online operations, a forecast of delivered natural gas prices is developed by adding transportation costs and a cost for pipeline losses to the forecast of Henry Hub prices.

3.1.2.3 Oil Prices

A forecast of delivered oil prices is developed for coal units that use fuel oil for startup and for SCCTs that can use fuel oil for online operation as an alternative to natural gas. The fuel oil price forecast consists of market prices in the short term that are then interpolated to a long-term forecast. The Companies' delivered price forecast first uses NYMEX New York Harbor #2 fuel oil monthly contract settled prices as far out in time as there is some market liquidity.

Long-term #2 fuel oil prices are developed by applying the historical relationship between New York Harbor #2 fuel oil and West Texas Intermediate ("WTI") oil prices to forecasted WTI prices derived from IHS Global Insight's latest 30-year macro forecast. To integrate the two forecast periods, the short-term market-based fuel oil price forecast is interpolated to the long-term regression-based price forecast. The forecasted #2 fuel oil prices are then multiplied by the average ratio of the Companies' fuel purchase price to the New York Harbor #2 fuel oil price to arrive at the Companies' delivered fuel oil purchase price forecast.

3.1.2.4 Other Fuel-Related Inputs

Other fuel inputs include the fuel blend ratio, the quantity of startup fuel, the fuel's heat content, and fuel's SO_2 content.

- Fuel Blend Ratio – Trimble County 2 burns a blend of Illinois Basin coal and Powder River Basin coals. Since the prices of these coals are specified in separate forecasts in PROSYM, the fuel blend ratio determines the weighting that is used to compute the price of coal for Trimble County 2.
- Quantity of Startup Fuel – For each generating unit, the startup fuel quantity is the amount of fuel required to start the unit. These inputs are specified based on an analysis of historical data with input from plant management.
- Heat Content and SO_2 Content – Fuel heat and SO_2 contents are provided by the Corporate Fuels and By-products group.

3.1.3 Energy Requirements

PROSYM simulates the dispatch of the Companies' generating units to meet hourly energy requirements. The forecast of hourly energy requirements, which consists of native load sales and transmission and distribution losses, is developed by the Sales Analysis and Forecasting group. See the Annual Electric Sales & Demand Forecast Process document for a discussion of the process used to develop the Companies' forecast of hourly energy requirements.

3.1.4 Market Inputs

Market inputs define the market in which the Companies operate. These inputs include spot hourly wholesale electricity prices, emission allowance prices, hourly OSS and economy purchase limits, and OSS and economy purchase price threshold values. Together, these inputs determine when the model should make economy purchases or OSS. Each of the market inputs is discussed in the following sections.

3.1.4.1 Electricity Prices

A forecast of spot hourly electricity prices is developed to model the Companies' interactions with the electricity market. The Companies buy and sell electricity primarily with PJM through the PJM-South Import ("PJM-SI") interface / pricing point which is used in the planning process to represent the electricity market.[2] In the initial years, monthly forward market prices for PJM West Hub ("PJM-WH")[3] quoted by Intercontinental Exchange as of a specific recent quote date are used as a basis for developing an hourly forecast of PJM-SI prices, reflecting the most current view of forward prices at the time the forecast was prepared.[4] In the subsequent years, the market prices are interpolated to a long-term PJM-WH forecast developed using EPIS's AuroraXMP software, a proprietary electricity market model. Monthly PJM-SI prices are derived by applying seasonal discount factors by peak type to the PJM-WH prices. The discount factors are based on historical ratios between actual PJM-SI and PJM-WH prices.

Monthly average PJM-SI prices are shaped to daily average prices by peak type by maintaining a correlation between the Companies' forecasted daily average energy and the forecasted daily average electricity price in each month. This relationship serves as a proxy for the correlation between the daily load level in the PJM market and the corresponding daily average electricity price. The daily average prices are derived by multiplying the forecasted monthly average prices (by peak type) by a daily weighting that reflects the correlated variances between forecasted daily vs. average monthly loads and forecasted daily vs. average electricity prices, based on historical observations. Hourly prices are then derived by multiplying the daily prices by hourly price multipliers that reflect the historical average ratio of hourly prices to daily prices by month and by peak type.

3.1.4.2 Emission Allowance Prices

The dispatch cost for each unit includes the unit's fuel cost, variable O&M costs, and the cost of emission allowances. Emission allowance price forecasts are developed for SO_2, seasonal NO_x, and annual NO_x emissions allowances. Initial prices reflect market prices as of a specific recent quote date for allowances under the Cross-State Air Pollution Rule. Longer-term prices reflect those in IHS Energy's long-term planning scenario. No CO_2 emission allowance price assumptions are made for the Clean Power Plan because of the uncertainty regarding its legal standing and state-level implementation.

3.1.4.3 Hourly Off-System Sales and Purchase Limits

The OSS and purchase limit inputs determine the maximum quantity (in MW) of OSS and economy purchases that can be made in any given hour. Since the volatility of available transmission capacity cannot be modeled in PROSYM, limits on hourly OSS and economy purchases are used to align the volume of modeled OSS and economy purchase transactions with recent historical experience. OSS and economy purchase limits are developed to coincide with the 95th percentile of the distribution of historical hourly OSS and economy purchase volumes.

3.1.4.4 Off-System Sales and Purchase Price Thresholds

When making an OSS or economy purchase, the Companies incur various costs related to the transaction. These costs are referred to as OSS and purchase "thresholds." OSS and purchase thresholds include the cost of transmission and transmission losses, independent system operator

[2] The Companies also transact electricity with counterparties other than PJM. The Companies model PJM as a representative market, considering liquidity and availability of market data.
[3] The PJM market is used as a proxy for all markets available to the Companies because most of the Companies' off-system sales and purchases are expected to be transacted with the PJM market.
[4] The quoted "off-peak wrap" forward prices for PJM-WH are split into off-peak (7x8) and weekend (2x16) peak types using historical ratios.

balancing charges, and a risk premium the Companies' Power Supply group uses to manage the uncertainty that exists between real-time prices and aggregated hourly (or settled) prices.

3.1.5 Resource Expansion Plan Inputs

The expansion plan inputs specify the timing and type of generation sources planned to be added to the Companies' generation portfolio to meet customers' growing need for energy and capacity. These generation sources can take the form of new generating units or power purchase agreements with a third-party provider. Generation source inputs are discussed in Section 3.1.1.

3.1.6 System Constraints

PROSYM enables the user to model a variety of physical constraints that exist within the Companies' transmission system and generation portfolio. These constraints are discussed in the following sections.

3.1.6.1 Transmission Constraints

The Companies' transmission and distribution system is designed to deliver electricity from generation sources to load under a variety of circumstances. Despite the flexibility that is afforded the Companies, some constraints can occur in real time. For example, at least one generating unit at the Brown Station must be operating in moderate to high load scenarios to support adequate voltage in the Lexington area. Furthermore, there are limits to the energy that can flow between LG&E and KU. PROSYM models these and other transmission constraints.

3.1.6.2 Spinning Reserve Requirements

As a NERC balancing area, the Companies are required to carry contingency reserves to ensure the reliability of the grid. To meet these obligations in a least-cost manner, the Companies entered into a reserve sharing agreement with TVA. By sharing reserves with TVA, the Companies are able to reduce the amount of contingency reserves they need to carry. In the current plan, the Companies need to maintain 245 MW of contingency reserves at all times. In addition, the Companies typically carry approximately 150 MW of regulating reserves to follow load fluctuations in real time. PROSYM models these reserve requirements.

3.1.6.3 Off-System Sale Constraints

As a general rule, because hourly market prices can fluctuate, potential OSS margins from SCCTs do not justify the wear and tear associated with starting a unit in anticipation of potential OSS margins. Therefore, the Companies' SCCTs are generally only committed to meet customers' need for peak energy. For this reason, a constraint is modeled in PROSYM that reduces OSS by limiting modeled OSS when SCCTs are operating, which results in a proportion of OSS from SCCTs in line with historical volumes.

3.1.6.4 Dispatch Order Rules

Dispatch order rules determine the order in which different types of generation sources are dispatched. The majority of generation sources are dispatched economically. However, the Companies' CSR customers are not curtailed until all other company-owned sources have been exhausted. Likewise, the Companies' reserve sharing agreement gives the Companies limited and temporary access to emergency reserves that can only be dispatched after all other resources have been exhausted. The dispatch order rules enable the Companies to model these constraints.

3.2 Prepare Draft Generation Forecast

In the second part of the process used to develop the Companies' generation forecast, model inputs are loaded into PROSYM and PROSYM is used to prepare a draft generation forecast. PROSYM is a complex model, so extensive review takes place to ensure that the inputs are correctly loaded and that the model results are reasonable. An input variance analysis evaluates the impact of changing each input or group of related inputs to ensure that the associated output changes are reasonable. Then, various elements of the generation forecast are compared to historical trends for reasonableness. The input variance analysis and comparison of the forecast to history are discussed in more detail in the following sections.

3.2.1 Input Variance Analysis

The process of performing an input variance analysis begins with the previous year's generation forecast and is completed in steps. As each input or group of inputs is updated, PROSYM is used to create a new forecast. A comparison of forecast results in each step reveals the impact of changing one input (or group of related inputs). The comparison of forecast results for each step includes a comparison of native load production costs, OSS margin, generation volumes, unit capacity factors, fuel burn, and other factors. In most cases, the change from the previous year's forecast to the current year's forecast is explained primarily by a limited number of factors. Despite this fact, the impact of all input changes is evaluated carefully. If the impact of a change is not deemed reasonable, the model inputs are adjusted and the process is repeated.

3.2.2 Comparison of Forecast to History

The goal of the generation forecasting process is to produce the most accurate forecast possible. In addition to the input variance analysis, numerous elements of the forecast are compared to historical trends to further assess the reasonableness of the forecast. In many cases, the forecast should be consistent with historical trends. When this is not the case, it is important to ensure that forecasted deviations from historical trends are reasonable. The following is a sample of forecast elements that are compared to historical data.

- Annual/monthly/hourly generation by generation source
- Annual/monthly fuel burn by generation source
- Annual startup fuel by generation source
- Annual SCCT starts/run hours
- Annual/monthly/hourly OSS volumes by peak type
- Annual/monthly/hourly OSS margin by peak type
- Annual/monthly/hourly economy purchase volumes by peak type
- Annual SO_2/NO_x emissions
- Annual/monthly capacity factor by generation source
- Annual/monthly intercompany transaction volumes
- Annual/monthly dispatch order

3.3 Review

In the third part of the process used to develop the Companies' generation forecast, the results of the forecast are reviewed by other departments. This review process ensures that the forecast considers feedback from a broad range of perspectives.

The following groups are primary consumers of the forecast results and review various elements of the forecast to help ensure that the results are reasonable:

- Corporate Fuels and By-products: The Corporate Fuels and By-Products group reviews the fuel burn forecast by generating station and fuel type.

- Power Supply: The Power Supply group reviews the forecasts of OSS margin, OSS volumes, and economy purchase volumes by peak type.
- Plant Management: Plant managers review the forecasts of generation by station and fuel type.

3.4 Deliverables

After forecast reviews are completed, the forecast deliverables are distributed to the groups within the company who use the forecast to prepare financial budgets. The following is a list of key deliverables:

- Generation Forecast
- Fuel Burn Forecast
- Fuel Expense Forecast
- OSS Margin Forecast
- Emissions Forecast

2017 Plan Summary

- Compared to the 2016 Plan, native load production costs ($/MWh) are notably lower in the 2017 Plan; OSS contribution is lower in 2017-2018 and higher in 2019-2021
  - *Lower fuel and market electricity prices drive differences in production costs throughout planning period and in OSS through 2018*
  - *Higher OSS margins after 2018 attributed to better aligning OSS modeling with AFB*

Native Load Production Costs ($/MWh)	2017	2018	2019	2020	2021	CAGR
2016 Plan	26.84	26.95	27.94	28.42	29.65	2.5%
2017 Plan	24.05	23.76	24.16	24.45	25.46	1.4%

OSS Contribution (100%, $M)	2017	2018	2019	2020	2021
2016 Plan	3.2	3.0	3.4	3.2	2.3
2017 Plan	1.7	2.2	3.6	4.4	4.7

Forecasted native load production costs continue pattern of Plan over Plan declines

Key Changes in Planning Assumptions & Inputs vs. 2016 Plan

- Commodity prices are lower in 2017-2021
  - *Coal prices are 7-12% lower*
  - *Natural gas prices are 9-18% lower*
  - *Electricity prices are 13-17% lower*

- Native load energy requirements are lower (starting at 1.9% lower in 2017 and growing to 3.0% lower in 2021)
  - *Absent unit retirements, no need for new capacity throughout the 30-year forecast period*

- Variable O&M forecast is lower at Trimble, Mill Creek, and Ghent

- NOx emission rates updated to target CSAPR II compliance

CSAPR II Compliance (Ozone Season NOx)

- CSAPR Update Rule (CSAPR II)
  - *Proposed Nov. 2015; expected final Q3 2016; effective 2017*
  - *Further restricts ozone season NOx (~30% lower for KY)*
  - *Further restrictions on banking*
- Expect 2017 allocations to slightly exceed emissions
- 2017 projections:
  - *Starting bank: 7,726 tons*
  - *Allocations: 8,074 tons*
  - *Emissions: 7,948 tons*
  - *Allowance Price: $600/ton*
- Requires management of SCR operation, dispatch, and emissions allowances
- Developing risk management plan to minimize compliance costs

Key Risks and Uncertainties

- Compliance plan for effluent guidelines
- Final resolution of Clean Power Plan (CPP) litigation
  — *Likely no impact to generation in 5-year Plan horizon*
  — *Likely impact to generation dispatch and/or resource planning beyond 5-year Plan horizon*
- Landfill capacity
  — *Trimble County landfill permitting on track*
  — *Next phase of Mill Creek landfill expected to be deferred through increased beneficial use*
- Jefferson County NAAQS attainment status

Key Takeaways

- Lower native load costs yields lower costs for ratepayers
  - *Production cost savings of $110-170M per year vs. 2016 Plan*
- Changes in gas prices could significantly alter CR7's utilization
- Load growth is flat; absent unit retirements, no need for new capacity
- CSAPR II compliance plan appears manageable through collaborative effort

2017 Plan – Assumptions

- Modeled EFOR assumptions are based on historical EFOR values ('target' EFORs will continue to be the basis for KPI reporting)
  - *CR7 modeled EFOR in 2017 decreased from 5.0% to 3.0%*
  - *CR7 modeled MOR increased to 5.9% (previously not modeled)*
  - *TC2 modeled EFOR in 2017 increased from 6.0% to 7.6%*
- NOx emission rates and SCR operation reflect changes to enable CSAPR II compliance
- Expansion plan:
  - *Target reserve margin: 16-21%*
  - *Bluegrass PPA (165 MW): May 2015 – April 2019*
  - *No expansion units planned at this time*
- Trimble County 1 & 2 start fuel changes from oil to gas (TC2 in spring 2017; TC1 in fall 2019)
- Cane Run 7 Long-Term Service Agreement (LTSA) is the greater of $771/hour or $22,330/start (2015$)

2017 Plan – Assumptions

- Spinning reserve requirements:
  - *Contingency: Spinning 245 MW (100 MW of 245 MW is supplemental - supplied by quick-start units)*
  - *75 MW regulating*
  - *75 MW NAS*
- Turbine overhaul schedule:
  - *2017: TC1*
  - *2018: GH3, TC2, BR2, MC2*
  - *2019: GH2, MC3, MC1*
  - *2020: BR3*
  - *2021: GH4*
- CT Modeling
  - *Paddy's Run 11-13 were historically unavailable in winter due to insufficient gas pressure; beginning fall 2016, the Paddy's Run units will be available year-round following the completion of the new pipeline project*
  - *Forecast reflects cost of CT maintenance in dispatch considerations*
  - *Forecast reflects run hour limits due to environmental constraints*

PPL companies

2017 Plan – Assumptions

- Market electricity prices
  - *Consistent with July-approved prices*
  - *Hourly prices are correlated with forecasted load shape*
  - *Winter premium adjusted out of Jan/Feb pricing*

- Revised OSS modeling constraints to be more consistent with history
  - *Model does not allow off-system sales while Paddy's Run or Brown CTs are generating (relaxed constraint to allow OSS while Trimble CTs on; better reflects OSS with low coal/gas price spreads)*
  - *OSS limited to 400 MW/hr in peak period, 350 MW/hr in weekend period, and 150 MW/hr in off-peak period*

- Revised purchase modeling constraints to be more consistent with history
  - *Promoted dispatch order of purchases during off-peak hours*
  - *Hourly purchases limited to 200 MW/hr in all peak periods based on historical transmission constraints*

Mercury O&M decreases largely attributed to increased knowledge and experience with baghouse operation; BR1 increase is related to more accurate allocation of costs at the station

CCR at Mill Creek and Trimble County

- Mill Creek
  - *Current beneficial use contracts of 380K tons/year*
  - *Proposed contracts with temporary dewatering system allow for additional 450K tons/year*
  - *Proposed contracts will extend Phase I landfill capacity from 2026 to 2029; continuation of these contracts in the long term would extend to 2036*

- Trimble County
  - *Current beneficial use contracts of 200K tons/year*
  - *Expect new landfill permitting complete in 2016 and in service by 2019*

Maintenance changes largely attributed to Mill Creek and Trimble County 2

Maintenance-Weeks

*Coal + CR7 Only

Notes:

Acceleration of turbine overhauls for Mill Creek 1 and 2 (from 2021 to 2019, and 2020 to 2018, respectively) and addition of outage weeks at Mill Creek 4 in 2018 are to accommodate conversion of bottom ash systems from wet to dry.

Increases at Trimble County 2 in 2017 and 2021 are related to waterwall repair.

Power Generation

2017 Business Plan

September 2016

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 1 of 246
Blake, Thompson

Table of Contents

Plan Highlights

- Major investment and integration of environmental compliance – Coal Combustion Residuals (CCR), pond closures and Effluent water Limit Guidelines (ELG)
- Generation forecast assumes continued trend of high Natural Gas Combined Cycle (NGCC) production levels based on current projections for gas prices in first three years of the plan; NGCC production levels taper off later in the plan as gas prices increase
- Increased resource needs to meet and maintain compliance with incremental regulatory requirements – begin staffing to meet ELG in 2018
- There are no planned coal plant retirements for the plan period

LG&E KU
PPL companies

Major Assumptions

1. Regulatory

The 2017 Business Plan (2017 BP) covers 2017-2021 completely, and in the case of Power Generation and Project Engineering, known projects that extend to 2026.

1.1 The State of Kentucky remains regulated throughout the plan period and the Environmental Cost Recovery (ECR) and Fuel Adjustment Clause (FAC) remain in place.
1.2 Target Reserve Margin Range of 16% - 21%.
1.3 Reserve sharing under the TVA Reserve Sharing Agreement is 245 MW's.
1.4 LG&E and KU remain committed to burning less expensive, higher sulfur fuels, which continues to trend toward higher chlorine fuels.
1.5 Of the twelve municipal utilities served by KU, nine provided termination notices. Combined with the departure of Benham, this will be a reduction of 325 MW by May, 2019.

2. Proposed or Expected New Environmental Regulations for Air and Water

2.1 The Cross State Air Pollution Rules (CSAPR) were reinstated with Phase I in 2015-2016 and Phase II in 2017. EPA is now referring to it as "Transport Rule".
- The US EPA has provided accounts with Transport Rule allocations through 2016.
- LKE System Transport Rule allocations at similar levels as prior CAIR (Clean Air Interstate Rule) allocations.
- A penalty of allowances surrendered by each utility with NOX emissions over 18% of Annual Allocation and 21% of Ozone Season Allocation (Assurance Levels) IF the State exceeds its "assurance level".
  - *Penalty of 2 allowances for every 1 ton of emissions (2:1) over the "assurance levels"*
- "CSAPR Update Rule" (CSAPR II) was proposed by EPA December 3, 2015
  - *Keeps existing CSAPR rules except banking*
  - *Allows banking including existing CSAPR bank*
  - *Various levels of restrictions proposed on use of banked 2015-2016 allowances (i.e. 2:1, 4:1)*
  - *Replaces existing CSAPR Ozone Season allocations beginning 2017 for Company by (~ 30% reduction from existing allocations)*

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 4 of 246
Blake, Thompson

LG&E KU PPL companies

Major Assumptions

2. <u>Proposed or Expected New Environmental Regulations for Air and Water (Cont.)</u>

2.2 The final National Ambient Air Quality Standards (NAAQS) rules have been issued, with one hour standards in place for NO_x and SO_2. The final attainment designations for the short term NO_x standard have been delayed for up to three years due to inadequate monitoring. An area near Mill Creek has been designated non-attainment based on the new short term SO_2 standards. Compliance requirements must be in place by October 2018.

- **Based on attainment modeling, LG&E has proposed a rolling 30-day mass standard (tons/30days) of emissions in total from units 1-4 based on 0.17 lbs SO2/mmBtu with each unit at maximum load. during the entire 30-day period (MC units currently well below this limit with the new Wet FGD's).**
- **APCD has indicated they are in favor of the proposed standard.**
- **APCD still working with other contributing entity near Mill Creek to establish their limit.**

2.3 The EPA issued its revised rule on PM NAAQS on December 14, 2012.

- **The 1997 annual Particular Matter standard for $(PM)_{2.5}$ of 15 ug/M^3 was lowered to 12ug/M^3.**
  - **Initial designations of 1997 NAAQS placed Jefferson and Bullitt as non-attainment.**
  - **A re-designation request to "Attainment/Unclassifiable" of 1997 NAAQS is in the works by APCD and KDAQ.**
  - **Jefferson County designation for 2012 NAAQS has been revised to "unclassifiable / attainment" until further monitoring data is available (by end of 2016).**
  - **The recent modifications at Gallagher Station, the shutting down of Cane Run 4, 5, and 6, and the baghouses, scrubbers, and dry sorbent injection systems at Mill Creek should establish attainment mitigate future concerns in Jefferson County.**

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.4 The EPA issued a final revision of the 8-hour Ozone NAAQS in October of 2015

- 2008 NAAQS = 75 ppb (remains in effect); Revised 2015 NAAQS = 70 ppb
- For 2008 NAAQS
  - Northern Ky / Cincinnati area “Marginal Non-Attainment” ; remainder of Ky is “Unclassifiable / Attainment”
- For 2015 NAAQS
  - Designation to be based on 2014-2016 data
  - Initial data (2013 – 2015) indicates “Attainment”
  - Likely Case: Additional improvements expected due to coal unit shutdowns and additional SO_2 and PM controls sufficiently mitigates ground level ozone
  - Worst Case: Local Non-Attainment driving need for SCRs on coal-fired units that significantly contribute to non-attainment (Mill Creek Units 1 & 2 and Ghent 2 do not have SCR’s, and they are not included in 2017 BP).
  - The SIP revision process will target attainment by 2021 – 2037 depending on level of non-attainment.

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.5 Final Clean Power Plan – "Existing Source Performance Standards" (ESPS) regulation was published in Federal Register on October 23, 2015

- ***Final rule assumed performance based on "Regional" capability***
- ***Changed Kentucky's proposed interim limit on CO2 emissions from 1,844 to 1,509 lb CO2/MWh(net) beginning 2022 (proposed rule began interim compliance in 2020)***
- ***Changed Kentucky's proposed final (2030) limit on CO2 emissions from 1,763 to 1,286 lb CO2/MWh(net)***
- ***Mass based targets were defined for each state in the final rule.***
- ***States can propose either rate or mass-based plans***
- ***Trading program and banking allowed with mass cap***
- ***Applicable to "existing sources" that commenced construction prior to January 7, 2014 (when NAPS for GHG emissions was proposed); however, limits utilization of new sources as well***
- ***Designed by EPA to shift generation away from combustion sources to renewable sources***
- ***Final rule contained concepts and reductions not included in proposed rule***
- ***Highly litigated. Supreme Court stayed the rule on February 9, 2016 pending determination by US Court of Appeals for DC Circuit Court***

NOTE - THE RESULT OF LITIGATION MAY ALTER SOME OR ALL OF THE ABOVE COMPONENTS

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 7 of 246
Blake, Thompson

PPL companies

Major Assumptions

2. Proposed or Expected New Environmental Regulations for Air and Water (Cont.)

2.6 Effluent water guideline draft proposal was issued April 19, 2013, with the final rule issued September 30, 2015.

- **The ELG rule requires implementation as soon as possible after 2018 but must be implemented no later than December 2023. A mercury discharge limit of 51 ppt for all four remaining coal-fired stations as part of new state KPDES permit requirements will likely require LKE to be ahead of the EPA timeline specifically for mercury.**
- **The ELG Projects estimated in-service dates are 2021 for Mill Creek and Trimble County, and 2022 for Brown and Ghent.**

Major Assumptions

3. Expansion/Capacity

3.1 No capacity additions or retirements are in the plan through 2021.

3.2 Reserve margin purchases through use of Bluegrass 3 are 165 MW between May 1, 2015 and April 30, 2019.

- Bluegrass 3 is available for dispatch the same as the LKE owned CT's.

3.3 The two Ohio Falls units still to be rehabilitated (the other six are complete) continue to have the following scheduled mechanical completion dates.

- Unit 4 (Fall, 2016).
- Unit 8 (Fall, 2017).

3.4 Black start additions (for system restoration purposes only) will take place in 2017.

- Trimble County Site October, 2017 in-service.
- Cane Run Site October, 2017 in-service.
- Neither unit will be counted as generation capacity.

Major Assumptions

4. Coal Combustion Residuals (CCR's)

4.1 EPA finalized the CCR rule on December 19, 2014 (published in the Federal Register on April 17, 2015).

- Maintained the non-hazardous designation of CCRs.
- Does not require the immediate closure of unlined CCR impoundments but instead lists several criteria that must be met to continue operation. Some of those criteria include:
  - Siting requirements (wetlands, karst, water table …)
  - Dam safety factors
  - Groundwater monitoring and statistical evaluation
  - Flood control system
- Requires development of:
  - Emergency action plans
  - Fugitive dust control plan
  - Inspection programs
  - Public available internet site for placement of operating data
- Current landfill construction projects meet the requirements of the rule.
- Expect unlined CCR ponds to stop receiving waste and start closure process in 2019 (because of groundwater criteria).
- Congress is working on a separate (but similar) bi-partisan CCR bill which would usurp the EPA rule if passed through both chambers and signed by President (still a long shot).

Major Assumptions

4. Coal Combustion Residuals (CCR's) (Cont.)

- Pond Closures under the CCR Pond Closure Rule by year are as follows:
  - 2016: Cane Run Storm Water Pond, Cane Run Clearwell Pond.
  - 2017: Mill Creek Runoff Pond and Emergency Pond.
  - 2018: Mill Creek Clearwell Pond and Dead Storage Pond.
  - 2019: Green River Main Ash Pond, ATB2 and SO2 Pond, Ghent Reclaim, Ghent Secondary Pond, Pineville Ash Pond, and Tyrone Ash Pond.
  - 2020: Ghent Gypsum Stack and Brown Aux Pond.
  - 2021: Mill Creek Ash Pond.
  - 2022: Ghent ATB #2, Trimble County BAP and GSP and Ghent ATB #1.
  - In the year that each pond is closed, it will also be retired from the property accounting perspective.
  - Monitoring wells are added for all ponds and landfills affected by the CCR Rule.

Major Assumptions

4. Coal Combustion Residuals (CCR) (Cont.)

4.2 Trimble County Landfill and Transport.

- The projected in-service date for the transport and treatment system is July, 2018.
- The projected in-service date for Landfill Phase 1A is Q3, 2018.
  - The DWM landfill permit is anticipated to be December, 2016.
  - Litigation of permit is likely; however, the construction spend will continue as planned unless court issues a stay of the permit.
  - Construction period of 1.5 years.

4.3 A new Mill Creek landfill will be in-service by December 31, 2022, with a new gypsum dewatering facility in place by December 31, 2018, to support increased off-site beneficial reuse marketing of gypsum.

4.4 The Cane Run Landfill will be covered in 2016 and closed in Q2, 2017.

4.5 The Cane Run Ash Pond Cap & Closure project will be completed in Q2, 2017.

4.6 All CCR Capital Projects use an annual escalation rate of 4.0%.

4.7 The pond closure projects assume that existing CCR materials from each plant can be beneficially used to fill in each pond, similar to Cane Run. If that is not allowed by rule, the estimated cost of having to instead procure top soil and clay is an additional $180M.

Major Assumptions

5. Operational and Other

5.1 The next turbine overhauls by unit are as follows:

- **2016 : None scheduled.**
- **2017: Trimble 1.**
- **2018: Ghent 3, Mill Creek 2, Trimble 2 (HP rotor and IP rotors), Brown 2.**
- **2019: Ghent 2, Mill Creek 1, Mill Creek 3, Trimble 2 (both LP rotors).**
- **2020: Brown 3, Trimble 2 (Generator).**
- **2021: Ghent 4.**

Major Assumptions

5. Operational and Other (Cont.)

5.2 Targets for percentage hedged of the minimum projected coal requirement in the 2017 Business Plan (by the end of 2016) are as follows:

- Year | Coal

Year		Coal
1	2017	95%-100%.
2	2018	80%-90%.
3	2019	40%-90%.
4	2020	30%-70%.
5	2021	10%-50%.
6	2022	0%-30%.

- Targets for CR7 natural gas are the minimum projected CR7 requirement in the 2017 BP (by the end of 2016) are as follows:
  - *2017* *10-50%*
  - *2018* *0-30%*
  - *2019* *0-10%*

5.3 Based on forecasted coal prices, the competition between coal units and CR7 occurs for natural gas prices between \$3.50 and \$5.00 per MMBTU. CR7 natural gas usage varies from a minimum of 15BCF to a maximum of 36 BCF. This can change coal burn by 1.4 million tons per year.

Major Assumptions

5. Operational and Other (Cont.)

5.4 Combustion turbine outages in the plan:

- Dollars are split between O&M and capital based on the estimated scope of work that is reconditioning (expense – approximately 10%) vs. new parts (capital – approximately 90%).
- For the second set of Trimble CT hot gas path inspections, the schedule is one unit in 2016, two units in 2017, two units in 2018, and one unit in 2019.
- This order may change in conjunction with the majors and rotor inspections during this plan. Currently, the majors and rotor inspections are just outside of the 5-year planning window,
- Brown C inspections by unit are as follows:
  - Unit 5 in 2017.
  - Unit 6 in 2018.
  - Unit 11 in 2018.
  - Unit 7 in 2020.
  - Unit 8 in 2020.
  - Unit 9 in 2024.
  - Unit 10 in 2026.
- The expiration date for the Brown 6 and 7 Long-Term Services Agreements (LTSA) is October 1, 2016 based on the 13-year criteria.
- The CT component outages for Cane Run 7 are a Combustion Inspection May, 2017, Hot Gas Path Inspection (HGPI) October, 2019, Combustion Inspection March, 2022, and a major in 2023 (HGPI and turbine overhaul).
  - Cane Run 7 CT’s are covered under a signed LTSA.
  - The turbine/generator overhaul will be a generator minor in 2017, a turbine minor in 2018, a turbine/generator medium in 2020, a turbine/generator minor in 2023, and a major outside of the 10-year window.

Major Assumptions

5. Operational and Other (Cont.)

5.5 Complete demolition of Paddy's Run Coal Plant will take place 2016-2017.

5.6 Complete demolition of Cane Run Coal Plant will be 2017-2019.

5.7 Complete demolition of Green River will be 2017-2019.

5.8 Complete demolition of Pineville Station will be 2018-2019.

5.9 Complete demolition of Tyrone Station will be 2018-2019.

5.10 Complete demolition of Canal Station will be 2021-2022.

5.11 The prosym run dated August 10, 2016 is the official generation forecast for the 2017 Business Plan.

2015-2021 Annual O&M Expenses ($000)

Plan Risks/Sensitivities

- Any subsequent changes to approved or proposed environmental regulations will impact the investment, construction and implementation of new systems and resources needed in this plan
- Generation dispatch for the plan years is based on current view of regulations and assumptions on pricing for gas supply and allowances which is subject to significant changes to unit cost profiles and maintenance schedules if changes occur
- Expansion of generating capacity and other generation changes consistent with approved integrated resource plan must be balanced with efforts to address transmission system load requirements. Additionally, the timing of retired coal and new Combined Combustion Gas Turbine (CCGT) availability will be critical
- Integration of additional CCR equipment, pond closures and dry landfill conversions will be on an aggressive schedule with potential to impact outage schedules.

Appendix

Operational Performance

Key Performance Indicators

KPI	2015 Actual	2016 Forecast*	2017 Plan	2018 Plan	2019 Plan	2020 Plan	2021 Plan
Generation (Twh)[1]	33.6	34.0	34.5	34.5	34.6	33.7	33.3
EAF (Steam)	82.3%	85.4%	85.2%	83.9%	84.1%	86.0%	86.2%

Table of Contents

Plan Highlights

Electric Distribution's Business Plan provides for continued emphasis on the Company's core values of safety and customer satisfaction. Plan funding will continue to provide for safe, reliable, resilient and low cost electric service for customers, with priority given to the following:

- Employee, business partner and public safety
- Transfer of knowledge to new employees as retirements accelerate
- System enhancements to meet existing and future customer loads
- Electric system automation, hardening and protection to improve service reliability and system resiliency
- Technology advancements to enhance business processes, improve operational efficiencies and enhance communications with customers
- Asset replacements to address aging infrastructure
- Construction projects to serve new customers and satisfy customer requested projects
- Maintenance, inspections and operations programs which assure regulatory compliance and operational performance

Plan Highlights

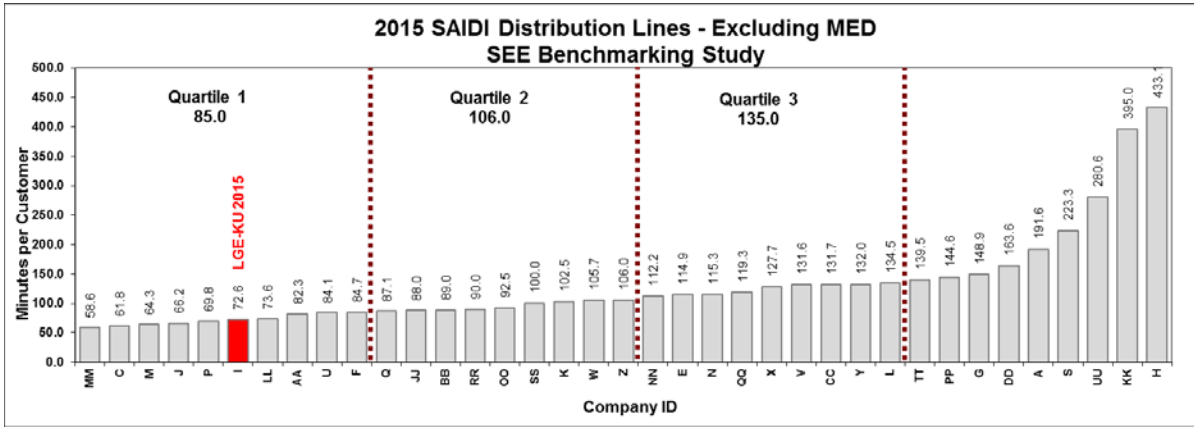
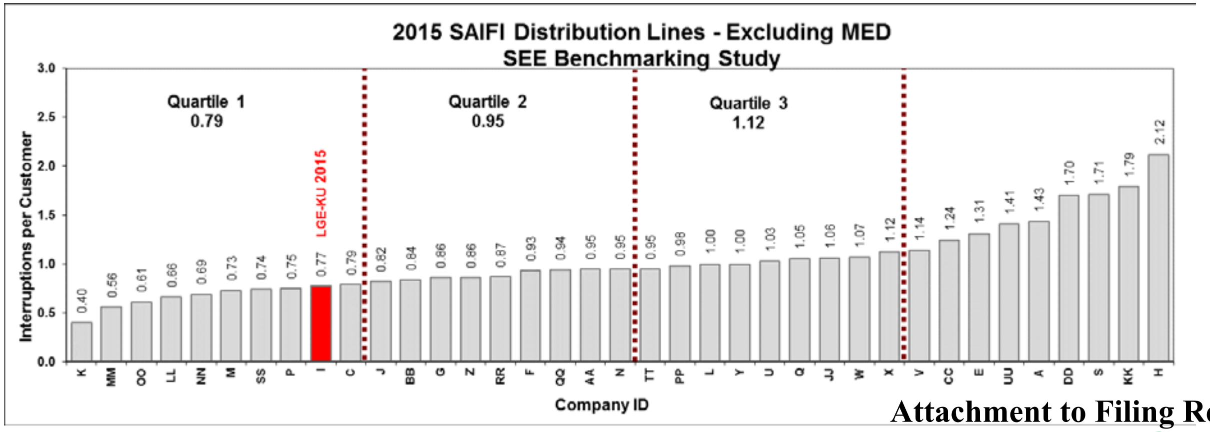
Reliability Performance





PPL companies

Plan Highlights

- Safety and Wellness
  - *Continue commitment to employees, business partners and public safety*
  - *Focus on incident prevention plans and critical danger zones*
  - *Support the transfer of safety knowledge from seasoned to new employees*
  - *Ensure a comprehensive safety/technical training plan is in place for all employees*
  - *Maintain industry leading performance*
  - *Benchmark and implement industry best practices*
  - *Continue to improve motor vehicle safety*
  - *Promote wellness initiatives as an aspect of safety to ensure employees are in optimal physical condition to prevent work related illnesses and injuries*

Plan Highlights

- Customer Experience
  - *Respond effectively and efficiently to customer requests for service*
  - *Invest in system reliability and contingency to meet increasing customer expectations respective to service availability*
  - *Invest in aging infrastructure to continue long term service reliability*
  - *Advance grid intelligence to meet evolving customer expectations*
  - *Respond to outage events in a timely and effective manner, and continue to improve on the accuracy, timeliness, and provision of estimated restoration times*
  - *Build on technology which enhances business processes, reduces cycle times, and expands communications with customers*
  - *Focus on portraying a professional and positive customer image*
  - *Satisfy customer capacity needs*

Plan Highlights

- OPEX
  - — *On target in 2016 to achieve 8&4 approved forecast.*
  - — *Compounded Annual Growth Rate (CAGR) from 2016-2021 is 3.4% in total, 3.0% without storms and 2.3% without storms and line clearing.*
  - — *Over the 15 year period, CAGR from 2007-2021 is 2.6% in total, 2.2% without storms and 1.7% without storms and line clearing.*
  - — *Major Initiatives:*
    - Line Clearance, Hazard Tree Program and Emerald Ash Borer Mitigation
    - Regulatory Inspection and Maintenance Programs
    - System Trouble and Storm Response
  - — *Major Financial Risks:*
    - Nondiscretionary OPEX Work (preventing allocation of labor to prudent capital initiatives)
    - Storm Damages that Exceeds the 10 Year Average
    - Accelerated Demise of Ash Trees

Plan Highlights

- Capital
  - — *On target in 2016 to achieve 8&4 approved forecast.*
  - — *Continued focus on critical capital investments related to connecting new customers, meeting customer demand, enhancing system reliability and resiliency, replacing aging infrastructure, and repairing the system.*
  - — *Major Initiatives:*
    - System expansion to serve new customers
    - Major substation and circuit enhancements to meet demand
    - Distribution reliability and resiliency programs including Distribution Automation, Circuits Identified for Improvement (CIFI), and N-1 Distribution Transformers
    - Aging Infrastructure Replacement (AIR) including the Pole Inspection and Treatment Program (PITP), Paper Insulated Lead Cable (PILC) Replacement, and Substation Exit Cable Replacement.
    - Information Technology Investments including purchase and deployment of a Distribution Management System, and GIS Replacement
    - Make Ready Pole Replacements for Major 3rd Party Pole Attachment Projects
    - Construction of a consolidated Distribution Control Center (DCC) Facility at Simpsonville

Major Assumptions

— *Reliability investments over plan period will continue to target improvement in key reliability metrics and system resiliency:*

- Continuation of targeted system hardening and reliability improvement projects based on circuit reliability performance and specific customer interruption frequencies – $55.8M
- Implementation of Distribution Automation – $98.2M
- Advancement of the N-1 Distribution Transformer Program – $47.8M

— *Maintenance and repair blankets will continue to be funded based on historical trends and projected work volumes.*

— *The Pole Inspection and Treatment Program will continue through the plan period.*

Major Assumptions

- Louisville Downtown Network Paper Insulated Lead Cable (PILC) replacement
- Substation legacy equipment replacement
- LG&E substation underground exit cables replacement
- Overhead lines rear easement hardening

— *LG&E escalation assumed at 5% (2% growth and 3% material/labor increases).*

— *KU escalation assumed at 3% (0% growth and 3% material/labor increases).*

— *Funding included for known major customer expansions/additions.*

Major Assumptions

- Plan includes $10 million for proposed construction of a combined Distribution Control Center at the Simpsonville Transmission Control Center site.
- Incremental headcount proposed to:
  - *Implement and support Distribution Automation and N-1 Distribution Transformer programs*
  - *Advance hire key technical positions to facilitate knowledge transfer for projected retirements*

1) 2016 Forecast is YTD August.
2) Measures the time between the approved inspection and the connection to the customer.
3) Measures the duration from once the call is received to when we are onsite to assess / repair.
4) Measures the time frame between the first call and arrival time for emergency calls on Blue Sky Days only.
5) 2016 Forecast is YTD August. Measures the percentage that service is restored on or before the ERT.

Gas Distribution Operations

2017 Business Plan

September 2016

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 52 of 246
Blake, Thompson

Table of Contents

Plan Highlights

- Funding levels within the proposed plan were established with the following priorities in mind:
  - Employee, contractor and public safety
  - Regulatory compliance
  - Enhanced customer service
  - Gas system reliability
  - Asset replacement to ensure reliable and safe service
  - System enhancements to meet customer needs
  - Technology to increase efficiencies and enhance customer experience
  - Capital investments for gas riser and service line ownership

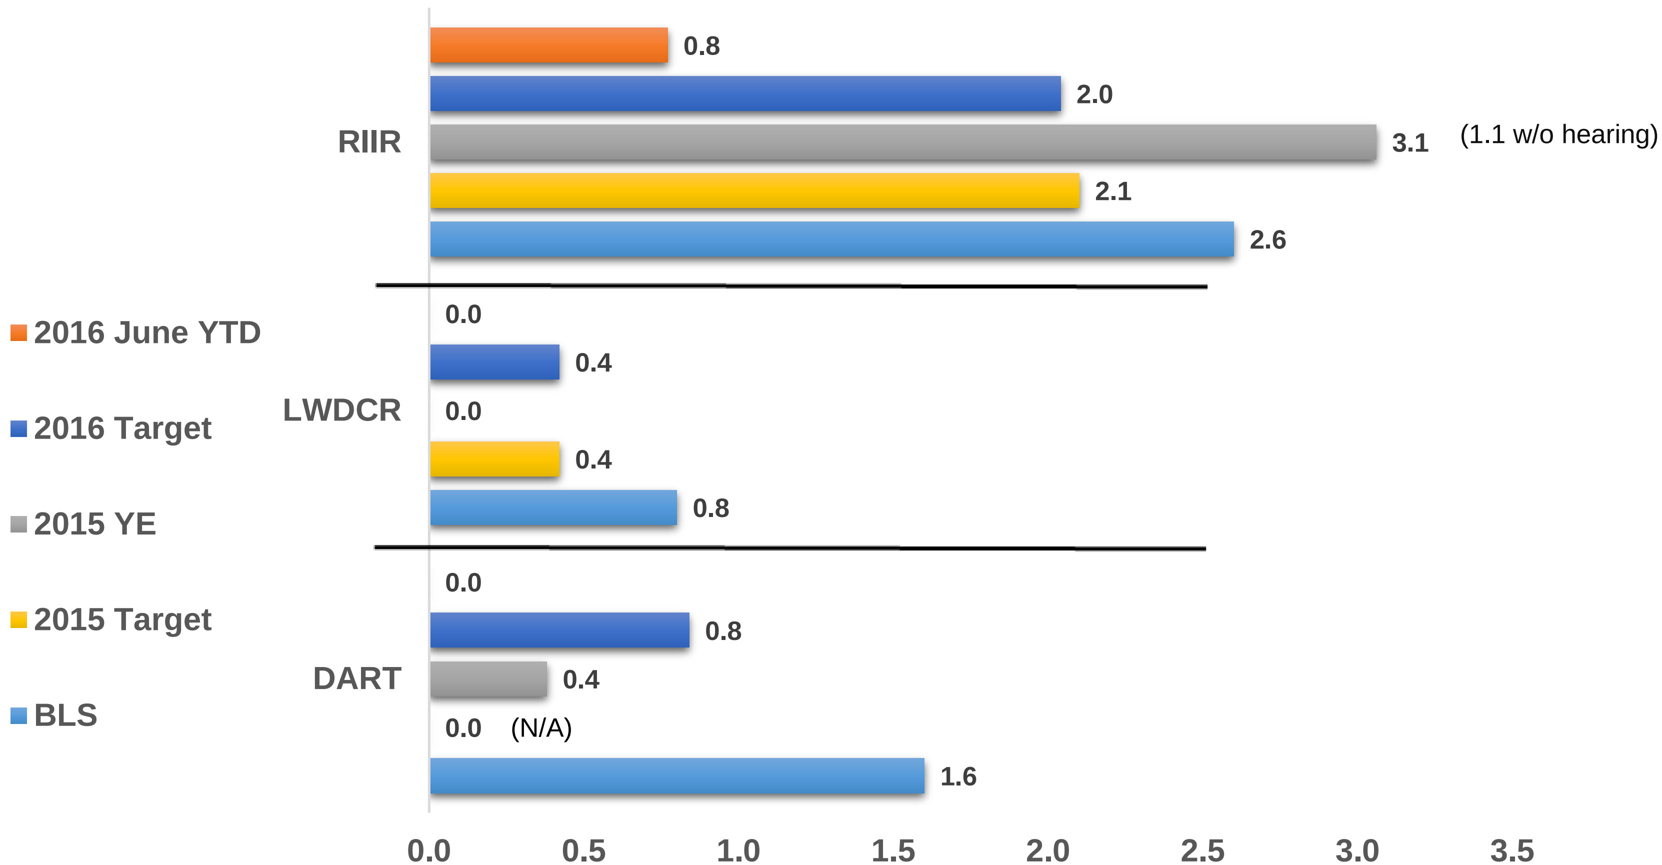
Safety Performance - Gas



Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 55 of 246
Blake_Thompson

LG&E KU
PPL companies

Plan Highlights

- Safety and Wellness
  - *Continuously strive to improve employee safety performance*
  - *Improve gas system safety thru effective: Distribution Integrity, Transmission Integrity, Public Awareness, Damage Prevention and Gas Control Room Management programs*
  - *Maintain strong safety partnerships with business partners*
  - *Enhanced public safety thru customer communications, asset replacement*
  - *Continuation of motor vehicle safety initiatives*
  - *Identify, share, and capitalize on industry best practices*
  - *Mock drills, leak detection training, and emergency response improvements*
  - *Promote wellness initiatives as an aspect of safety to ensure employees are in optimal physical condition to prevent work related illnesses and injuries*

Plan Highlights

- Customer Experience
  - *Meet customer expectations for new service requests*
  - *Promptly address customer service issues*
  - *Identify customer service improvement opportunities*
  - *Invest in aging infrastructure to ensure reliable and safe service*
  - *Promote professional and positive corporate image to customers*
  - *Restore customer service outages quickly and efficiently*
  - *Meet customer capacity needs*
  - *Implement technology to enhance customer service*
  - *Proactively communicate with customers*

PPL companies

Plan Highlights

- Reliability, Infrastructure and Regulatory Compliance
  - *Investments in infrastructure to meet customer needs*
  - *Investment in aging infrastructure to improve safety, reliability and performance*
  - *Effectively manage gas distribution and transmission integrity management regulatory programs*
  - *Provide reliable gas supplies thru investments in:*
    - Gas regulation/measurement facilities
    - Gas transmission system
    - Gas compressor stations
    - Gas storage fields
    - Distribution infrastructure upgrades

PPL companies

Plan Highlights

- Workforce Development
  - *Headcount plan that addresses high number of expected retirements*
  - *Identification of pre-hires for critical job positions*
  - *Knowledge transfer to new employees*
  - *Support of employee continuing education initiatives*
  - *Job aid development to reinforce On-the-Job Training and promote consistent work practices across operational groups*
  - *Internal and external training opportunities*
  - *Mobile computing technologies supporting training*
  - *Participation in trade school internship program*

Plan Highlights

- OPEX
  - — *On target in 2016 to achieve 8&4 approved forecast.*
  - — *Compounded Annual Growth Rate (CAGR) from 2016-2021 is 3.2%.*
  - — *Major Initiatives:*
    - Regulatory Compliance
    - Implement key headcount additions
    - In-line inspection of pipelines
  - — *Major Financial Risks:*
    - Regulatory Uncertainty including MAOP validation and gas storage integrity requirements
    - Line locating costs due to fiber projects and general construction increases
- Cost of Sales
  - — *On target in 2016 to achieve 8&4 approved forecast.*
  - — *Compounded Annual Growth Rate (CAGR) from 2016-2021 is 3.7%.*
  - — *Major Initiatives:*
    - Gas Main & Riser Replacement Programs
  - — *Major Financial Risks:*
    - Regulatory Uncertainty including MAOP validation requirements

Plan Highlights

- Capital
  - — *On target in 2016 to achieve 8&4 approved forecast.*
  - — *Major Capital Initiatives:*
    - Reliability / Asset Replacement
    - Gas Leak Mitigation
    - Customer Service Ownership and Service Riser Replacement Programs
    - Steel Service Line Replacement Program
    - Transmission Line Replacement Project
    - Compressor Station and System Enhancements
    - Storage Well Replacement Program
    - Transmission/Distribution Integrity Management Programs
    - Distribution System Reinforcements

Gas Delivered by Class in Bcf

Class	2016	2017	2018	2019	2020	2021
Residential	20.094	19.650	19.438	19.279	19.227	18.946
Commercial	10.360	10.224	10.166	10.068	9.963	9.790
Industrial	1.616	1.695	1.739	1.789	1.845	1.903
Transportation	13.764	12.997	13.045	13.107	13.160	13.122
Total	45.834	44.566	44.388	44.243	44.195	43.761

Major Assumptions

Major Assumptions

- *Require operators to validate MAOPs of gas transmission pipelines.*
- *Expand pipeline integrity requirements beyond high consequence areas.*
- *Expand operator qualification requirements to construction activities.*
- *Require continuous improvement for distribution system integrity.*
- *Require development of gas storage integrity programs.*

- *Forecasted Design Day for 2017 is expected to increase to 679,000 Mcf/day from 674,000 Mcf/day estimated in the prior BP. During the current 5-year planning period, the forecasted Design Day is expected to gradually decrease to 671,000 Mcf/day.*
- *Gas storage operating risk is addressed through staffing plan and reliability enhancement projects.*
- *Main replacement and gas riser projects will address infrastructure vulnerable to cold weather issues.*

Table of Contents

Plan Highlights

Customer focus is a core value at LG&E and KU. Customer Services strives to provide safe, reliable, and reasonable cost service to our customers, improving the quality of life in the areas we serve. Additionally, we are committed to enhancing our relationship with our customers by delivering positive experiences that create value and build trust.

•Funding levels within the proposed plan are established with the following priorities in mind:

- Employee and public safety including compliance with industry regulatory requirements
- Continuing Energy Efficiency programs and services for our customers
- Implementation of AMS
- Maintaining operational performance levels
- Investing in technology to enhance customer experience
- Facility improvements based on Master Facility Plan
- Managing “best in class” bad debt expense

PPL companies

- Safety and Wellness
  - *Maintain industry leading performance*
  - *Enhance operational effectiveness within the COO organization*
  - *Support the transfer of safety knowledge from seasoned to new employees*
  - *Ensure a comprehensive safety/technical training plan is in place for all employees*
  - *Continue to improve workforce, business partners and public safety*
  - *Continue to improve motor vehicle safety*
  - *Identify, share and capitalize on industry best practices*
  - *Promote wellness initiatives as an aspect of safety to ensure employees are in optimal physical condition to prevent work related illnesses and injuries*

- Customer Experience
  - *Advance corporate-wide "Customer Experience" strategy/initiative*
  - *Continue tracking new Customer Satisfaction Index in parallel to Top Two Box score on Company's residential satisfaction study*
  - *Continue investments in enhanced customer contact channels and the migration to a Corporate "Unified Communications" platform*
  - *Enhance our "Customer Advocacy" role through partnerships with customer focus groups*
  - *Continue commitment to corporate citizenship and community involvement*
  - *Continue to deliver the current portfolio of customer energy efficiency programs, including customer education on the need for energy efficiency*
  - *Advance our understanding of customer behavior while gaining insight into customer needs*

LG&E KU PPL companies

- OPEX
  - *On target in 2016 to achieve 8&4 approved forecast.*
  - *Compounded Annual Growth Rate (CAGR) from 2016-2021 (excluding clearing costs moved to Customer Services in 2017) is 1.8% in total and 1.4% without bad debt.*
  - *Major Initiatives:*
    - Customer Experience Strategy
    - Right of Way and Facility Services Document Preservation Program
    - SAP Upgrade Project
    - Full-Scale AMS Implementation, inclusive of OPEX savings
  - *Major Financial Risks:*
    - Customer Hardship and Uncollectible Accounts
    - Industry Regulatory Uncertainty

- Cost of Sales
  - — *On target in 2016 to achieve 8&4 approved forecast.*
  - — *Compounded Annual Growth Rate (CAGR) from 2016-2021 is 3.9%.*
  - — *Major Initiatives:*
    - Energy Efficiency Continuance
- Capital
  - — *On target in 2016 to achieve 8&4 approved forecast.*
  - — *Major Capital Initiatives:*
    - Full-Scale AMS Implementation
    - Energy Efficiency Programs and Services
    - Master Facility Plan Implementation
    - Gas and Electric Meters
    - SAP Upgrade Project (Capital in IT's Budget)

- AMS: The Company is implementing full scale deployment of advanced meters across the LG&E, KU, and ODP service territories beginning in July 2017 and completing on or before December 31, 2019 at a cost of $350M ($319.7M Capital, $30.3M O&M) with the following scope:
  - *Exchange 418k electric meters in LG&E territory*
  - *Exchange 561k electric meters in KU and ODP territory*
  - *Install remove telemetering equipment on 322k gas meters in LG&E territory*
  - *Deploy RF Mesh infrastructure to enable AMS RF communications network across all company territories*
  - *Update existing meter head-end to support full system volume of endpoints*
  - *Install and integrate Meter Data Management System (MDMS), Meter Asset Management (MAM), and Meter Operations Center (MOC)*
  - *Establish online portal access for customers to review usage information*

Major Assumptions

- *Costs have been included in 2017 BP, as well as associated savings benefits in Field Services and Meter Reading areas*
- *6 incremental employees are assumed to start in 2016 and early 2017.*
- *Any regulatory and internal approvals can be achieved to meet the 2017-2019 implementation schedule.*
- *Certain regulatory approvals could enhance AMS savings but are not included in the plan or reflected in the O&M savings.*
- *No regulatory and legislative action to mandate smart meter / smart grid occurs during the planning period.*

- Bad debt expense is based on .23% of projected revenues for LG&E and .35% of projected revenues for KU through the planning period.
- SAP Upgrade project in-service date is mid-2017.
  - *For the SAP Upgrade project, 26 additional FTE's are required from 2016-2018 (14 replacing employees on the project and 12 additional employees in the back office).*
- Solar fields are built starting in 2017 – 3 in 2017, 3 in 2018 and 2 in 2019.
- Energy Efficiency projects and education will continue to be an area of focus.
- The DSM budget dollars are based on the current approved levels through December 2018. 2019-2021 dollars are based upon continuing DSM at its currently level of program offerings, demand, and energy savings.
  - *Avoided cost of capacity remains consistent with historical levels. If this changes, it may affect the amount of DSM that we can economically offer.*

Transmission

2017 Business Plan

September 2016

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 107 of 246
Blake, Thompson

Table of Contents

Plan Highlights

1. The 2017-2021 Transmission Business Plan will continue a strong culture of safety, performance, and regulatory compliance, with a focus on improving system reliability, resiliency and asset condition at a fair and reasonable cost.
2. Improve and sustain high reliability performance by reducing outage frequency and duration through analysis of historical performance and implementation of targeted improvement programs:
   i. Prioritized installation of sectionalizing circuit breakers and remotely controlled line switches to reduce exposure of customers to outages and speed restoration time for customers when outages occur.
   ii. Detailed assessments of lines needing improvement to identify and implement actions to reduce outages
   iii. Enhanced vegetation management programs including identification and removal of hazard trees, cycle based clearing of transmission line corridors, and widening of maintained areas around targeted lines.
   iv. Targeted replacement of assets based on age, condition and performance criteria to include wood structures, insulators, static lines, certain underground lines, relays, control houses, circuit breakers and other equipment.
3. Transmission line and substation projects approved by the Independent Transmission Organization (ITO) driven by NERC planning standards and LKE system planning guidelines to ensure electric grid adequacy to reliably serve forecasted customer demand.
4. Transmission line extensions to serve new distribution substations for retail customers.
5. Initiatives related to cyber security protection, the Energy Management System and compliance with NERC requirements.
6. Security initiatives including the protection of critical facilities from physical attacks and vandalism.
7. Resiliency initiatives to improve recoverability from catastrophic events.
8. Workforce improvements including increased engineering and project management to support reliability programs and to improve balance between contractors and employees.

Plan Highlights

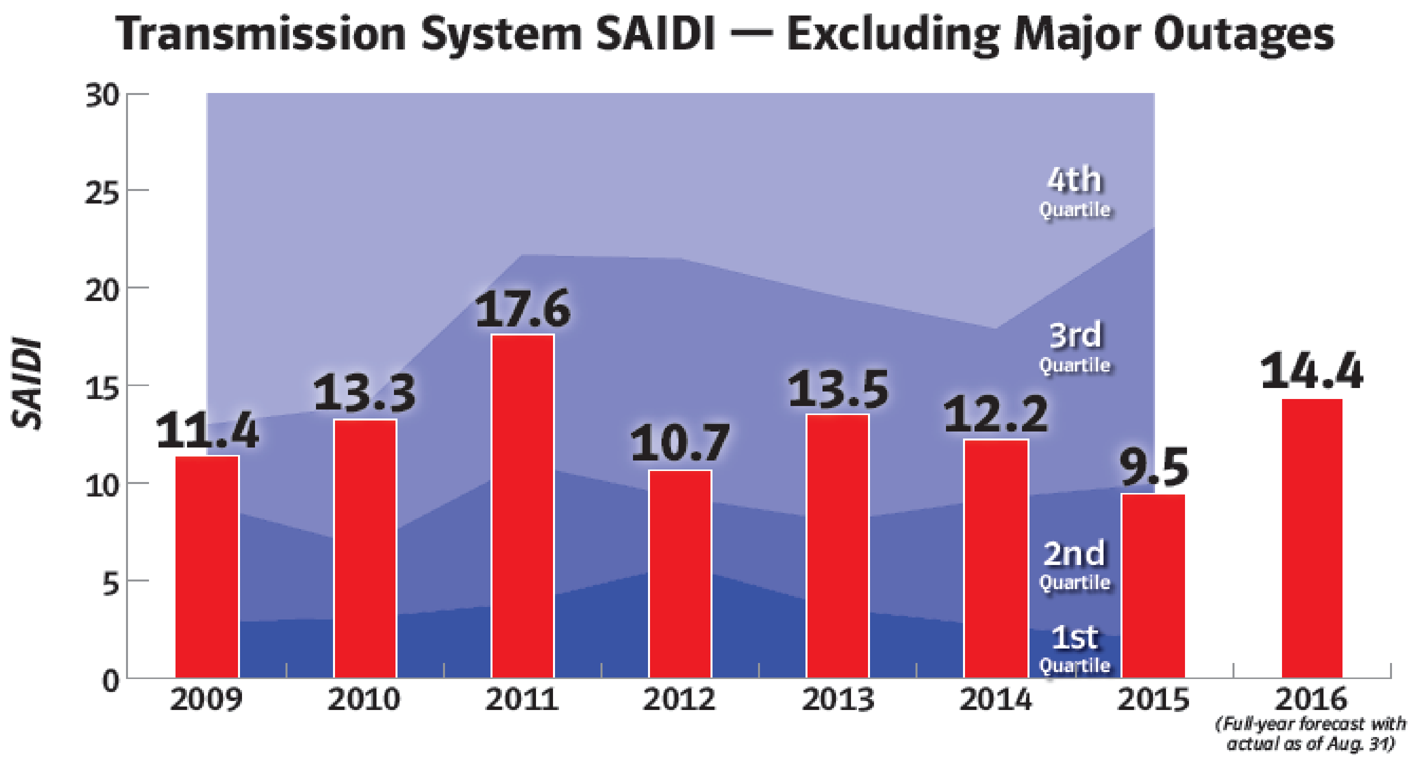
Historical Reliability Performance



Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 112 of 246
Blake, Thompson

LG&E KU PPL companies

Major Assumptions

Reliability, Operations and Asset Management:

1. The strategy to improve reliability is based on historical performance and addressing line segments on a prioritized basis:
   i. Segmenting circuits with breakers and switches to reduce customer exposure from sustained outages and improve restoration time.
   ii. Rebuilding/restoring certain line segments based on performance and condition.
   iii. Enhanced vegetation clearing will reduce sustained and momentary outages:
      - Line clearing will transition from a largely inspection based program to a 5 year maintenance cycle for all lines 69kV and higher.
      - A hazard tree identification and removal program.
2. Enhanced transmission asset management will effectively improve and maintain high performance and reliability of the assets over time:
   i. Structure, cross arm and insulator replacements based on condition determined by detailed inspections.
   ii. Static wire replacements based on age and lightning performance.
   iii. Control house and related protection and control replacements based on age, condition and performance.
   iv. Circuit breaker replacements based on age, condition and maintainability.
   v. Transmission switch maintenance to include routine inspections and operation will reduce outages and ensure operability.
   vi. Extend life of tower and substation structural steel through condition assessment and enhanced maintenance including corrosion prevention and control.
   vii. Optimize asset lifecycle of substation equipment including circuit breakers and transformers through diagnostics.
3. Storm damage costs are based on a 10 year average.

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 113 of 246
Blake Thompson

LG&E KU
PPL companies

Major Assumptions

Transmission Expansion Plan (TEP) and Native Load:

1. Projects are based on the most recent customer demand forecasts and it is assumed that the Independent Transmission Organization (ITO) will approve the 2017 TEP without significant revisions.

2. A new, 12.5 mile 345kV line will be required by summer 2021 between Trimble County substation and Clifty Creek substation due to increased external power flows.

3. The TEP includes funding for rating increases to certain transmission lines based on estimates. Detailed costs will be developed after surveying and subsequent analyses are completed.

4. No funding needed to accommodate new long term, firm transmission service requests that have not already been requested or studied.

5. Connection costs for native load are coordinated with the Electric Distribution planning requirements.

6. The Clean Power Plan will not result in significant transmission improvements during the plan period.

Major Assumptions

Regulatory and Compliance:

1. The verification of line ratings on all lines above 100kV will be complete and ongoing LiDAR surveys of these lines will continue on a 6 year cycle to coincide with regulatory inspections. Ongoing inspections will not result in material expenditures.

2. FERC will approve the proposed geomagnetic disturbance (GMD) standard without significant revisions and the required assessment of the system for impact from a GMD disturbance will not result in risks requiring material expenditures to mitigate.

3. Additional revisions to NERC Reliability standards will not require material incremental expenditures beyond what is funded in this plan.

4. One substation is within scope of the 2015 CIP- 014 requirement for substation physical security. It is assumed that NERC will not modify CIP-014 during the plan period.

5. Regional and interregional planning processes as required by FERC Order 1000 will not result in material capital or O&M expenditures.

Major Assumptions

Open Access Transmission Tariff (OATT) Revenue and Cost of Sales:

1. OATT transmission revenues are based on the following:

   i. Customer provided load forecasts have been evaluated and adjusted, based on historical performance, to reflect their expected coincident peak billing amount.

   ii. OATT rate forecast is based on 2015 FERC Form 1 data, the FERC approved rate formula, and 2017 Business Plan projections, including O&M and capital.

   iii. [redacted] will renew 104 MWs of point-to-point transmission service for the term August 2017 – September 2022. It is assumed that [redacted] will retire [redacted] Unit #1 in 2019 and not renew the remaining 156 MWs of current long term point-to-point service.

2. Cost of Sales assume the following:

   i. MISO transmission rates for 2017-2021 are adjusted at the same annual rate of change as the forecasted LG&E/KU OATT transmission rates.

   ii. Cost of credits for wholesale customers eligible for de-pancaked rates are based on Transmission Service Requests submitted by these customers – 20 MWs for 2017-2018, 200 MWs starting in May 2019, and 300 MWs in May 2022.

   iii. TranServ will continue as the ITO service provider at costs based on the existing agreement.

   iv. TVA will remain as the Reliability Coordinator (RC) at costs based on the existing agreement.

Plan Risks

1. Revised regulations may materially increase investments and expenses.
2. Regional changes to the transmission grid topology, location and mix of generation resources, the Clean Power Plan, and other factors may result in power flows that drive the need for significant additional infrastructure investments.
3. Detailed study of the need and alternatives to the Trimble County to Clifty Creek 345kV line could result in other alternatives including elimination or delay of the project.
4. System conditions (weather, external grid configuration and loop flows, generation status, etc.) may delay or alter outages required to complete construction.
5. BES LiDAR surveying could result in additional required capital projects to resolve issues identified.

Generation Services

2017 Business Plan

September 2016

Table of Contents

- Plan Highlights
- Major Assumptions
- Financial Performance
  - *Operating Expense – O&M for Combined Utility*
  - *Headcount*
- Plan Risks
- Appendix

Plan Highlights

- New CIP compliance requirements are addressed
- Continued CCR activities are included in the plan
- No new programs or support for ELG have been included
- R&D consolidation of the EPRI programs will continue to be a challenge as other departments request services but are unable to supply funding
- All other existing programs within Generation Services will continue but expanding services and new services are impacted by labor prioritization
- Funding for 5 contractors included

Major Assumptions

- Environmental rules such as CCR, ELG and MATS will increase demand for support for the Generation Services team
- Analysis demands on System Lab may increase (environmental regulations)
- CIP versions 5 and 6 will be in effect at all generating stations and Legacy rules will continue to require more stringent test protocols
- The new SharePoint site has been implemented and will continue to be integrated throughout the fleet. The site has been developed as an essential tool and provides the site users real time data, financial analysis, reports and training information for every day usage
- Increased emphasis on Equipment Reliability (data analytics), Predictive Maintenance techniques and Welding Quality Management

Plan Risks

- CIP changes over the course of the plan may be more stringent than anticipated and require a more aggressive implementation strategy
- New environmental requirements regarding Clean Power Plan were not contemplated in this plan
- CCR regulatory inspections will challenge the current civil staff and the support of the generating fleet
- Laboratory testing for new environmental rules will increase during the plan

Plan Highlights

- Construction of Generation Training Facility at Trimble County Station, $1M CAPEX
- Expansion of EDO and GDO Training Facilities, $0.5M CAPEX

Major Assumptions

- Continue to improve upon safety targets
- Continue implementation of Guide to Safety Excellence
- Generation Training Facility will be in service by 4th Qtr 2017
- Headcount remains flat (31 Employees, 2 Contractors)
- EDO/GDO Training center renovations, simulators & Training yard expansion

Table of Contents

Plan Highlights

- The 2017 General Counsel budget is under expectation by $0.4 million due to savings captured in Outside Counsel.
- Outside Counsel is 25% of the overall General Counsel budget. Current projections in the plan are consistent with historical spend. To meet expectation, previously included estimates for potential incremental outside counsel of $700k was eliminated from the 2017 budget.
- Headcount will increase by 3 from the 2016 forecast and will then remain flat through the remainder of the plan.

Major Assumptions

- Compliance
  - * *No significant changes in roles played by Compliance Department.*
  - * *Among the drivers for a change in required role could be changes in expectations in role from PPL perspective, new interpretation of current regulation, significant new or revised regulatory requirements, or increased demand for support from the business teams to reduce regulatory risks.*

LG&E KU PPL companies

Major Assumptions

- Communications
  * *This budget assumes we can maintain a positive trend in relation to our customer service ratings.*
  * *Similarly, this budget assumes we can continue to close customer satisfaction gap between LG&E and KU through targeted communications, advertising and increased sponsorship activation unless there are unforeseen circumstances.*

Major Assumptions

- Corporate Responsibility and Community Affairs
  - * *Negative community response, if any, in aftermath of rate case filing does not necessitate extraordinary community investment response.*
  - * *Criticism and scrutiny from environmental groups does not escalate dramatically.*
  - * *Relationships with Louisville Metro Council members do not deteriorate significantly.*
  - * *No significant deterioration in customer satisfaction ratings from low income customers.*
  - * *Our corporate-wide sustainability program responsibilities do not increase.*

Major Assumptions

- Environmental
  - * *EPA does not add or change MATS compliance requirements.*
  - * *The ash pond closure requirements are not materially changed from our 2016 ECR Plan.*
  - * *Kentucky Division of Water (DOW) agrees with our KPDES/ELG permitting and implementation schedule.*
  - * *Compliance with Kentucky's new Startup, Shutdown and Malfunction requirements are attainable.*
  - * *No new significant NOx reduction requirements either under CSAPR or a Section 126 petition.*
  - * *No major delay in obtaining permits needed to construct landfills.*

Major Assumptions

- Federal Regulation & Policy
  - * *Generally routine pace of rulemaking or policy initiatives from FERC. It is assumed that there will be a slightly lower level of new, major policy initiatives in 2017, since there will be a new commission composition following the presidential election.*
  - * *Continued moderate engagement by the Company in EEI or other industry group activities.*
  - * *No targeted initiative by Company to influence a particular policy matter.*
  - * *No other major developments at FERC or other forums (including Clean Power Plan) that will dictate fundamentally different resource needs for FR&P.*

Major Assumptions

- Legal
  - * *Hourly rates of outside providers will not materially increase.*
  - * *No significant unexpected developments in pending regulatory or litigation matters.*
  - * *No unanticipated material regulatory or litigation claims arise.*
  - * *One anticipated litigation matter will be avoided or delayed.*

LG&E KU PPL companies

Plan Risks

- Compliance

  * *Headcount needs could increase if support required by other groups increases. The most likely cause for this would be enhanced expectations due to changes in the PPL overall compliance program. However, demand for support could come from changes in regulatory requirements or increased demand for support from the business teams to reduce regulatory risks.*

Plan Risks

- Communications
  - * *Continued increases in customer bills could potentially result in lower customer satisfaction levels.*
  - * *Environmental opposition to the CCR rule could result in litigation and adverse media exposure.*
  - * *Changing workforce could result in lower community support and brand allegiance.*

Plan Risks

- Corporate Responsibility and Community Affairs
  - * *Adverse weather and/or natural disasters may necessitate new levels of assistance for agencies addressing the needs of our challenged customers.*
  - * *Unfavorable legal or regulatory result may require focused community relations strategy.*

Plan Risks

- Environmental

  * *Inability to beneficially use CCR materials in the closure of ash ponds.*
  * *MATs compliance requires additional controls or monitoring equipment.*
  * *Implementation of new wastewater discharge standards (ELG) require additional resources.*
  * *Inability to obtain construction or operating permits (e.g. landfill) in a timely manner.*
  * *CPP remains in effect without delaying the compliance dates.*
  * *Greater than predicted increases in Title V Emission Fees.*

    ** From 2011-2015, the average yearly increase was 11%.*

LG&E KU PPL companies

Plan Risks

- Federal Regulation & Policy
  - * *New FERC chairman and/or new commissioners set aggressive agenda for major policy initiatives in which the Company must engage.*
  - * *Particular regulations and policies that affect issues critical to the company are initiated (e.g., RTO membership, certain manifestations of federal/state jurisdictional questions).*

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 188 of 246
Blake, Thompson

Plan Risks

- Legal
  - * *Reduced Outside Counsel budget by potential incremental needs of $700k to meet expectation, therefore existing budget does not allocate funds for material contingencies, and is particularly tight for 2017 so that surrender of funds during the year is highly unlikely absent material favorable developments resulting in savings.*
  - * *Litigation against the Company under CCR Rule, Clean Power Plan and other environmental rules is likely to develop and require significant resources not covered in present budget.*
  - * *The Company could become involved in a significant unanticipated legal dispute.*
  - * *Unanticipated shift in timing of key steps in legal matters could shift expenses from one year to next.*

Table of Contents

Plan Highlights

- Total OPEX reduction of $1.2 million over 2017-2020 relative to the 2016 HR Business Plan
- Headcount remains flat for the plan
- The plan provides sufficient resources for HR to execute its mission of attracting, developing and retaining employees to meet business needs.

Major Assumptions

- We will continue to see high levels of retirements – over 130 in 2016 with as many projected for each year of the plan.
- We will continue to see a significant volume of open positions in each year of the plan (over 300 filled in current year).
- We will continue to see significant internal movement to roles with increasing responsibility (over 285 promotions in 2016).
- We will continue to see changes in the health insurance market that will impact company costs.
- Upcoming union negotiations will be routine.

Table of Contents

Plan Highlights

- The 2017 Information Technology O&M budget submitted for the 2017 Business Plan is $59.2 million.
- IT headcount remains flat throughout the plan years.
- Outside services for the current business plan increases in 2018 due to the addition of 4 resident contractors to support Telecom Infrastructure and Dev and Support - Work Management groups for the DA project.
- The plan assumes a consolidated IT Infrastructure and Operations department across Kentucky and Pennsylvania.
- The plan includes a GIS assessment for $500k in 2017 and an Oracle assessment for $700k in 2017.

PPL companies

Plan Highlights

- The 2017 Information Technology Capital budget is $49 million, which is $800k higher than the 2016 Business Plan.
  - *The increase is primarily due to the addition of the Mobile Dispatch Replacement project and shifting a portion of the Design Tool Upgrade (WIM) project from 2016 into 2017. This increase was largely offset by reductions in Infrastructure capital projects.*
- Business demand for technology continues to drive an increase in IT Capital and O&M.

Major Assumptions

- Major Initiatives
  - *Roughly 54% of the 5 year capital plan (approximately $106M) represents 17 major initiatives (including $21M for SAP, $15M for GIS and $15M for Tech Refresh).*
  - *All costs (capital and O&M) for AMS is included in the Customer Services business plan.*

- Safety & Regulatory
  - *Increased regulatory scrutiny at FERC, NERC and SERC as it relates to Critical Infrastructure Protection (CIP) and cybersecurity will drive the need for increased spending for both labor and information technology solutions to meet compliance requirements.*

Major Assumptions

- Business Reliance on Technology
  - *Business reliance on information technology services to conduct day to day operations continues to expand. Due to increased regulatory requirements, more business processes are moving towards automation.*
  - *This trend means the reliability and availability of information technology services is critically important to the business. There is little tolerance for almost any kind of system outage. This leads to an increased focus on planned and automated testing activities for all major system changes.*
  - *Increased reliance on technology is leading to increased storage, maintenance and support costs which are reflected in the plan.*

Major Assumptions

- Customer Experience
  - *As our primary interface with our customers, maintaining the CCS system is critical to meet customer and business expectations. This includes release upgrades to the SAP applications and hardware refresh and expansion.*
  - *Efforts to support the customer experience initiative continue with capital projects such as call center technology improvements.*
  - *Expansion of green energy technologies will require enhancements to the CCS system.*

Major Assumptions

- Cybersecurity Threats
  - *IT Security threats and data protection issues continue to increase. These threats are becoming even more sophisticated and difficult to overcome. Continued investment in protective and preventive measures to reduce these threats are required and included in the plan.*

- Advances in New Technologies
  - *Continuing to leverage mobile technologies will be a major differentiator for productivity and customer satisfaction.*
  - *Plans include working closely with the business to determine which of these technologies can deliver the greatest benefit.*

Plan Risks

- The assessment of resource requirements will continue and may lead to the need for additional resources as evaluation continues and we gain more understanding of CIP V5.

- Acquiring skilled IT Security and Infrastructure resources will continue to be a challenge for us and the rest of the industry.

- Approximately 53 FTEs are at risk to capital labor for 2017 and 47 for 2018 to 2020; $7.8m for 2017 and $6.8m from 2018 to the end of the plan. Any subsequent changes to the capital plan may adversely impact O&M.

- Project assessments and software maintenance contract renewals for significant systems costs may be materially higher than planned (e.g., Oracle and GIS).

Plan Risks

- Changes in vendor pricing models to subscriptions for hardware/software maintenance agreements could lead to increased O&M.
- Funding for system rationalization is not included in the plan. While planned work may be reprioritized, some work will be incremental.
- Changes in industry regulatory requirements may lead to an increase in capital and O&M costs.
- 2017 BP spend does not include unplanned business initiatives that may have an impact on IT O&M.
- Loss of knowledge related to increased level of employee retirements.

Plan Highlights

- CFO group is designed to meet the overall objectives of the Company in the most cost effective manner possible.
  - *Functions include accounting, financial reporting, regulatory reporting, tax, payroll, financing, cash management, investor relations, forecasting & budgeting, financial planning & analysis, insurance, pensions, rates, state regulatory affairs, audit services and supply chain.*
- CFO budget is below expectation each year.
- Headcount will decrease by one compared to the 2016 forecast and will remain flat throughout the plan.
  - *Labor represents 45% of the CFO 2017BP O&M expenses.*
- Insurance premiums have been moved from Corporate to CFO budget as that is the group responsible for managing these costs.
  - *Insurance represents 40% of the CFO 2017BP O&M expenses.*

PPL companies

Major Assumptions

- Projected insurance premium increases are based on renegotiated rates and increase for amount of property placed in service.
- Audit fees are based on negotiated rates with firms and expected incremental work (e.g., consent letters for financings)
- Bank Fees, excluding rating agency fees, are projected to increase at 1% annually based on recent experience.
- Supply chain will be responsible for joint IT procurement for KY and PA; joint related costs will be allocated based on total network users cost allocation methodology.

2015-2021 Annual O&M Expenses ($000)

PPL companies

Plan Risks

- An increased focus on IT security and other technical areas may require increased use of external resources for related audits.
- Integration of primary system changes within planning window and their impact on existing processes (PowerPlan, Volts replacement, Oracle, etc.).
- Maintaining flat staffing levels allow for limited resources available for special projects.
- Higher level of employee retirements during plan period place greater emphasis on knowledge transfer and effective timing of staffing changes.
- The level of rate increases for insurance premiums are at historically low levels and creates a level of risk regarding future premiums.

Blake, Thompson

Table of Contents

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 236 of 246
Blake Thompson

Major Assumptions

- Benefits for 2017 based on 3,591 full-time, 80 co-ops/interns, and 20 part-time regular employees (as of 12/31/17)
  - *Full-time actual headcount at July 31, 2016 is 3,477.*
  - *Benefits for each year based on the respective year's headcount, ranging as high as 3,615 full-time in July, 2018.*
- Pension based on actuarial calculations based on the RP-2014 mortality table and MP-2015 projection scale, assumptions, and rate case settlement;
  - 15 year amortization period used, for LG&E and KU jurisdictional.
    - Double corridor used for Virginia, FERC and Capital Corp. charges from LKS.
    - Discount rate is assumed to be 4.42% for the Non-Union plan and 4.34% for the Union plan, which reflects the April 30, 2016 BondLink results plus 25 basis points for both plans for measurement date December 31, 2016 and beyond.
    - Service cost is assumed to remain constant (0.00% growth).

Major Assumptions

- The projection for medical will remain flat to the 2016 Budget and adjusted for incremental headcount. This matches the company portion of the 4/4/50% sharing relationship with employees.
  - *As a point of reference, actual medical/dental expenses from 2010-2015 averaged a 3.7% annual increase.*
- Amortization of regulatory assets will continue through plan periods based on KPSC orders.
- Incentive expenses based on:
  - *Financial, team, and customer service goals at 100%.*
  - *Individual effectiveness at 120%.*
    - *The past three years have averaged 119%.*
- IMEA/IMPA portion included in Corporate is the credit that covers the same burden types that hit Corporate. The balance of IMEA/IMPA is in Power Production.
- Insurance Expense (moved to CFO) and Facilities Expense (moved to Customer Services) are removed from Corporate beginning January 1, 2017.

2015-2021 Annual O&M Expenses ($000)

Plan Risks

- The largest plan risk by far is pension expense.
- The second largest risk is medical expense, but it is partially mitigated by the 4/4/50 sharing relationship.

2014-2021 – Amortization of Regulatory Assets Detail

DESCRIPTION	
Winter 2009 Ice Storm:	Original reg asset total = $101,075,150, amortized monthly over 10 years, from August 2010 - July 2020
	LGE: 43%, beginning balance = $43.7M (electric) and $167.7k (gas) -- $2.6M per year
	KU: 57%, beginning balance = $57.2M -- $3.3M per year
2009 Wind Storm:	Original reg asset total = $25,735,849, amortized monthly over 10 years, from August 2010 - July 2020
	LGE: 91%, beginning balance = $23.5M -- $1.4M per year
	KU: 9%, beginning balance = $2.2M -- $128k per year
CMRG:	Original reg asset total = $2,000,000, amortized over 10 years, from August 2010 - July 2010
	LGE: 49%, beginning balance = $975.6k -- $97.5k per year
	KU: 51%, beginning balance = $1.02M -- $102k per year
Summer Storm:	Original reg asset total = $8,052,125, amortized monthly over 5 years, from January 2013 - December 2017
	LGE: 100%, $389k per year
Virginia Mountain Storm:	Original reg asset total = $5,041,670, originally amortized over 5 years, from November 2011 - October 2016
	In Feb 2016, after the Rate Case, the amortization period was extended an additional 14 months to Dec 2017.
	KU: 100%, $1.2M per year
Wachovia Swap Termination:	Original reg asset total = $9,303,396, amortized over 24.75 years, from August 2010 - July 2013 (assumption was new calc would begin in month 37 after next rate case)
	LGE: 100%, 80% electric/20% gas, $258,476 per year
	As a result of the 2012 Rate Case, the amortization for this reg asset was revised to 22.33 years, from January 2013 - April 2035
	LGE: 100%, 79% electric/21% gas, $388,659 per year
MISO Exit Fee:	Per S Cummins: Combined balance as of 6/30/15 = $1,186,796.17, amortized over 2 years from July 2015 - June 2017
	LGE: Total = $521,544.17, $260,772.09 per year
	KU: Total = $665,252.00, $332,626 per year

Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(7)(e)
Sponsoring Witness: Victor A. Staffieri

Description of Filing Requirement:

A statement of attestation signed by the utility's chief officer in charge of Kentucky operations, which shall provide:

1. *That the forecast is reasonable, reliable, made in good faith, and that all basic assumptions used in the forecast have been identified and justified;*
2. *That the forecast contains the same assumptions and methodologies as used in the forecast prepared for use by management, or an identification and explanation for differences that exist, if applicable; and*
3. *That productivity and efficiency gains are included in the forecast.*

Response:

See attached.

STATEMENT OF ATTESTATION SIGNED BY THE UTILITY'S CHIEF OFFICER IN CHARGE OF KENTUCKY OPERATIONS

1. The forecast presented in this rate application is reasonable, reliable, made in good faith, and all basic assumptions used in the forecast have been identified and justified;

2. The forecast contains the same assumptions and methodologies as used in the forecast prepared for use by management, except for the differences that have been identified and explained in the filing requirements and schedules thereto; and

3. Productivity and efficiency gains are included in the forecast.

VICTOR A. STAFFIERI
Chairman of the Board, Chief Executive Officer and
President of Louisville Gas and Electric Company
and Kentucky Utilities Company

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 15 day of November 2016.

NOTARY PUBLIC (SEAL)

My Commission Expires:

June 21, 2018

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(7)(f)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

For each major construction project that constitutes five (5) percent or more of the annual construction budget within the three (3) year forecast, the following information shall be filed:

1. *The date the project was started or estimated starting date;*
2. *The estimated completion date;*
3. *The total estimated cost of construction by year exclusive and inclusive of allowance for funds used during construction ("AFUDC") or interest during construction credit; and*
4. *The most recent available total costs incurred exclusive and inclusive of AFUDC or interest during construction credit.*

Response:

See attached.

Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(7)(g)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

For all construction projects that constitute less than five (5) percent of the annual construction budget within the three (3) year forecast, the utility shall file an aggregate of the information requested in paragraph (f)3 and 4 of this subsection.

Response:

See LG&E's response to Filing Requirement 807 KAR 5:001 Section 16(7)(f) [Tab No. 19].

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(7)(h)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

A financial forecast corresponding to each of the three (3) forecasted years included in the capital construction budget. The financial forecast shall be supported by the underlying assumptions made in projecting the results of operations and shall include the following information:

Response:

See LG&E's responses to Tab Nos. 22-38.

Docket No. FA12-12-000
October 9, 2014

PPL Corporation
Attention: Robert J. Grey
Executive Vice President, General Counsel and Secretary
Two North Ninth St.
Allentown, PA 18101

Dear Mr. Grey:

1. The Division of Audits and Accounting within the Office of Enforcement (OE) has completed an audit of PPL Corporation (PPL), including its service companies and associated companies. The purpose of the audit was to evaluate the companies' compliance with Federal Energy Regulatory Commission (Commission): (1) cross-subsidization restrictions on affiliate transactions under 18 C.F.R. pt. 35; (2) accounting, recordkeeping, and reporting requirements under 18 C.F.R. pt. 366; (3) Uniform System of Accounts (USofA) for centralized service companies under 18 C.F.R. pt. 367; (4) preservation of records requirements for holding and service companies under 18 C.F.R. pt. 368; and (5) FERC Form No. 60 annual report requirements under 18 C.F.R. pt. 369.

The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies under 18 C.F.R. pt. 101 and the applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorization in Docket No. EC10-77-000.

Moreover, the audit evaluated Kentucky Utilities Company (KU) and Louisville Gas and Electric Company's (LG&E) compliance with their transmission cost-of-service formula rate schedule included as Attachment O of KU and LG&E's Open Access Transmission Tariff (OATT) and PPL Electric Utilities Corporation's compliance with its transmission cost of service formula rate schedule included as Attachment H-8-G of PJM Interconnection, L.L.C.'s OATT. The audit covered the period from January 1, 2010 through December 31, 2011. The enclosed audit report explains our audit findings and recommendations.

2. On September 26, 2014, PPL agreed with the findings and accepted the recommendations contained in the audit report. PPL stated it has already undertaken some corrective actions, as observed in the audit report.

3. In addition, PPL also provided descriptions of the planned corrective actions it will take to comply with the audit report recommendations and provided target completion dates. The appendix to the audit report includes a copy of PPL's response. I hereby approve the audit report.

4. PPL should submit its implementation plan within 30 days of this letter and make quarterly submissions to DAA describing the progress made to comply with the recommendations. As indicated in the audit report, these submissions should be made no later than 30 days after the end of each calendar quarter, beginning with the first quarter after this audit report is issued, and continuing until all corrective actions are completed.

5. The Commission delegated the authority to act on this matter to the Director of OE under 18 C.F.R. section 375.311 (2013). This letter order constitutes final agency action. PPL may file a request for rehearing with the Commission within 30 days of the date of this order under 18 C.F.R. section 385.713 (2013).

6. This letter order is without prejudice to the Commission's right to require hereafter any adjustments it may consider proper from additional information that may come to its attention. In addition, any instance of non-compliance not addressed herein or that may occur in the future may also be subject to investigation and appropriate remedies.

7. I appreciate the courtesies extended to the auditors. If you have any questions, please contact Mr. Bryan K. Craig, Director and Chief Accountant, Division of Audits and Accounting at (202) 502-8741.

Sincerely,

Larry D. Gasteiger
Acting Director
Office of Enforcement

Docket No. FA12-12-000
October 9, 2014

Office of Enforcement
Division of Audits and Accounting

TABLE OF CONTENTS

I. Executive Summary

A. Overview

The Division of Audits and Accounting (DAA) within the Office of Enforcement has completed an audit of PPL Corporation (PPL), including its service and associated companies. The audit was commenced to evaluate compliance with the Federal Energy Regulatory Commission's (FERC or the Commission): (1) cross-subsidization restrictions on affiliate transactions;[1] (2) accounting, recordkeeping, and reporting requirements;[2] (3) Uniform System of Accounts (USofA) for centralized service companies;[3] (4) preservation of records requirements for holding and service companies;[4] and (5) FERC Form No. 60 annual report requirements.[5]

The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies under 18 C.F.R. pt. 101 and applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorization in Docket No. EC10-77-000. Lastly, the audit evaluated Kentucky Utilities Company (KU) and Louisville Gas and Electric Company's (LG&E) compliance with their transmission cost-of-service formula rate schedule included as Attachment O of KU and LG&E's Open Access Transmission Tariff (OATT) and PPL Electric Utilities Corporation's (PPL Electric) compliance with its transmission cost-of-service formula rate schedule included as Attachment H-8-G of PJM Interconnection, L.L.C.'s (PJM) OATT. The audit covered the period from January 1, 2010 through December 31, 2011.

Based on audit staff examination of KU, LG&E, and PPL Electric's accounting and formula rate calculations, audit staff identified numerous areas of substantial non-compliance with various Commission requirements. The level of non-compliance and the seriousness of these matters uncovered during the audit resulted in excessive formula rate billings to wholesale transmission customers. Audit staff is very concerned that the lack of sufficient oversight of PPL's accounting and formula rate policies that impact rate recovery have contributed to erroneous and excessive formula rate billings to wholesale

[5] *Id.* pt. 369.

transmission customers. Audit staff is also concerned that wholesale transmission customers would have continued to pay excessive amounts through formula rate billings had these areas of non-compliance gone undetected by audit staff. However, audit staff is encouraged by PPL's: (1) cooperation throughout the entire audit process and (2) swift and comprehensive implementation plan to correct these serious breaches of compliance with Commission requirements during and after the audit fieldwork. These areas of non-compliance are reflected in the compliance findings summarized in section C below and in full in section IV.

B. Transmission Formula Rate

KU and LG&E

KU and LG&E operate their system as a single, integrated, and coordinated transmission system and provide transmission service under the terms of their shared joint OATT. KU and LG&E adopted a formula rate for transmission service under schedule 7 (covering long-term firm and short-term firm point-to-point transmission service), schedule 8 (covering non-firm point-to-point transmission service), and schedule 9 (covering network integration service). The formula rate also provides for recovery of their Independent Transmission Organization and Reliability Coordinator costs.

The formula rate is in Attachment O to KU and LG&E's OATT. KU and LG&E are not required to file an annual informational or compliance filing for their wholesale transmission cost-of-service formula rate. Rather, KU and LG&E post the formula rate on OASIS by May 1, effective June 1, each year. All amounts in the formula rate are based on actual amounts. There are no over/under-collections, refunds, additional billings, projections, or estimates in the formula rate.

The transmission formula rate calculation is prepared in an Excel spreadsheet that primarily uses FERC Form No. 1 data. Each input item is identified within the spreadsheet, KU and LG&E's FERC Form No. 1 data are entered in the input section of the spreadsheet, and they are combined to calculate the final combined OATT rates. Sources of the data used to prepare the transmission formula rate are the KU and LG&E FERC Form No. 1s for the calendar year. Specific pages and line numbers are in the data entry section of the formula spreadsheet to help identify correct data points. After initial data entry is completed, separate teams in the accounting and transmission groups review the formula inputs and results to ensure data accuracy. The Rates and Regulatory (Rates) group maintains the spreadsheet where the formula rate is calculated. The Rates group enters data from the FERC Form No. 1, which allows formula rates to be calculated in the spreadsheet.

PPL Electric

PPL Electric is a member of PJM. PJM directs the operation of PPL Electric's transmission facilities, and transmission service over these facilities is provided under the PJM OATT. PPL Electric's annual transmission revenue requirement (ATRR) and annual transmission rates are set forth in Attachment H-8G to PJM's OATT, and the formula rate implementation protocols (Protocols) for the ATRR and rates are set forth in Attachment H-8H to PJM's OATT. The Protocols describe the process in which PPL Electric will account for certain inputs, updates to the formula, annual review procedures, and formal challenge procedures.

PPL Electric's ATRR established point-to-point transmission rates to the PPL Group Zone and Network Integration Transmission Service (NITS) rates in the PPL Group Zone. PPL Electric's ATRR is based on actual costs for transmission service for the preceding calendar year and based on associated FERC Form No. 1 data. PPL Electric is allowed to include the cost of weighted, capital additions projected for the current year, as well as projected CWIP for its transmission incentive project, Susquehanna-Roseland. PPL Electric also has a true-up mechanism through which deviations from actual costs will be addressed.

The ATRR produced by PPL Electric's approved formula rate is the sum of return on rate base, operation and maintenance expense, administrative and general expense, depreciation expense, taxes other than income tax, and income taxes, less any applicable revenue credits. PPL Electric's formula rate components are based on FERC Form No. 1 data and/or supporting documentation for data not otherwise available in the FERC Form No. 1. PPL Electric's Regulatory Compliance group manages the formula rate filing process, while other groups such as Transmission Expansion, Office of General Counsel, and Taxes provide data and various exhibits supporting some components. PPL Electric's formula rate filing is submitted to the Commission as an informational filing, due annually on or before May 15 of each year.

C. Summary of Compliance Findings

Audit staff's compliance findings are summarized below. Details are in section IV of this report. Audit staff identified the following areas of noncompliance:

- PPL Electric improperly accounted for its investment in PPL Receivables Corporation under the consolidated method of accounting instead of using the equity method of accounting, as required by the Commission. As a result of using the consolidated method instead of the equity method of accounting, PPL Electric erroneously included certain amounts in its formula rate billings to wholesale transmission customers.

- PPL Electric improperly accounted for overpayments of its current year's estimated Federal and state income taxes in Account 165, Prepayments.

- PPL Electric improperly accounted for manufactured gas plant remediation expenses in Account 930.2, Miscellaneous General Expenses. These expenses should have been accounted for so that no amounts would be recovered from wholesale transmission customers since these costs were not associated with obligations related to wholesale transmission customers. As a result of the incorrect accounting, these expenses were improperly included in the formula rate computation.

- KU and LG&E neither sought nor received Commission approval to recover asset retirement obligation costs in their transmission formula rate.

- KU did not remove all amounts from its formula rate calculations associated with its Virginia distribution utility plant facilities, as required by the Commission.

- KU and LG&E improperly accounted for cost of removal on physical assets related to asset retirement obligations.

- PPL's three franchised public utilities (KU, LG&E, and PPL Electric) incorrectly included some transaction-related costs related to PPL's merger with E.ON U.S. in formula rate billings to wholesale power and transmission customers.

- KU's method of computing Allowance for Funds Used During Construction (AFUDC) on Construction Work In Progress (CWIP) was deficient by compounding AFUDC monthly instead of semi-annually, including unrealized losses in its common equity balance used to calculate AFUDC, and using an incorrect balance for the common equity component.

- KU and LG&E's formula rate Attachment O included multiple inaccurate line references.

- FERC Form No. 60 filings that PPL Services Corporation (PPL Services) and LG&E and KU Services Company (LKS) made contained several reporting errors relating to account misclassifications, supporting schedule discrepancies, and the reporting of convenience payments.

D. Summary of Recommendations

Audit staff's recommendations to remedy the findings are summarized below. Detailed recommendations are in section IV. To address the areas of noncompliance, audit staff recommends the following:

1. PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

2. PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

3. PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.

4. PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

5. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

6. PPL Electric should reclassify Federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account 146, Accounts Receivable from Associated Companies, or Account 143, Other Accounts Receivable, as appropriate.

7. PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

8. PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

9. PPL Electric should revise procedures to appropriately determine its tax accrual amount.

10. PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

11. For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

12. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

13. PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.

14. PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

15. PPL Electric should determine the amount of manufactured gas plant remediation costs recovered through its formula rate.

16. For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

17. PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

18. LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

19. LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

20. For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under section 35.19a of the Commission's regulations.

21. LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

22. For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under section 35.19a of the Commission's regulations.

23. LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

24. For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

25. LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

26. PPL Electric, LG&E, and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

27. PPL Electric, LG&E, and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

28. PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under section 35.19a of the Commission's regulations for LG&E and KU.

29. KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

30. LG&E and KU should develop and implement controls to ensure accurate and complete line references.

31. LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

32. LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

33. LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

E. Compliance and Implementation of Recommendations

Audit staff further recommends that PPL:

- Submit its plans for implementing audit staff's recommendations for audit staff's review. PPL should submit these plans to audit staff within 30 days after this final audit report is issued.

- Submit all correcting entries to the Division of Audits and Accounting within 30 days after this final audit report is issued, including all correcting entries affecting the books for its associated franchised public utilities.

- Submit quarterly reports to the Division of Audits and Accounting describing PPL's progress in completing each corrective action recommended in this final audit report. PPL should make quarterly filings no later than 30 days after the end of each calendar quarter, beginning with the first quarter after the final audit report in this docket is issued, and continuing until PPL completes all recommended corrective actions.

- Submit copies of any written policies and procedures developed in response to recommendations in the final audit report. These policies and procedures should be submitted for audit staff review in the first quarterly filing after PPL completes these products.

II. Background Information

A. Description of PPL Corporation System

Headquartered in Allentown, PA, PPL is a public utility holding company with public utility and nonutility subsidiaries in the United States. PPL controls or owns approximately 19,000 megawatts of generating capacity in the United States, sells energy in U.S. markets, and delivers electricity and natural gas to about 10 million customers in the United States. PPL also owns a regulated distribution company in the United Kingdom that serves 7.8 million customers in Wales, and southwest and central England. During the audit period, PPL was the parent of three Commission-jurisdictional franchised public utilities (FPUs): PPL Electric, LG&E, and KU.[6]

PPL Electric delivers electricity to 1.4 million customers in eastern and central Pennsylvania, and owns transmission facilities within PJM's balancing authority area. PPL Electric does not have captive wholesale or retail customers, but is the default supplier for retail customers within its service area. LG&E is a public utility that owns and operates electric generation, transmission, and distribution facilities, as well as natural gas distribution, transmission, and storage facilities, in Kentucky and Indiana. LG&E serves 397,000 electric customers. KU is a public utility that owns and operates electric generation, transmission, and distribution facilities in Kentucky, with limited operations in Tennessee and Virginia. KU serves 516,000 electric customers in Kentucky and 30,000 electric customers in Virginia.

PPL's two centralized service company subsidiaries (LKS and PPL Services) provide a variety of services to PPL, affiliated FPUs, and other affiliates.

LKS provides a variety of administrative, management, engineering, construction, environmental, and support services to affiliated entities, including KU and LG&E, at cost. LKS was formed as a Kentucky corporation on June 2, 2000 and commenced operations as a service company on January 1, 2001. Following the repeal of the Public Utility Holding Company Act (PUHCA) of 1935 and the enactment of PUHCA 2005, LKS transitioned, effective January 1, 2008, to the Commission's USofA for centralized service companies under part 367. LKS is a wholly owned subsidiary of LG&E and KU Energy LLC (LKE), which in turn is a wholly owned subsidiary of PPL. LKS became an indirect, wholly owned subsidiary of PPL when PPL acquired all of the limited liability company's interest of LKE from E.ON U.S. LLC (E.ON U.S.) on November 1, 2010.

[6] The term franchised public utility means a public utility with a franchised service obligation under state law.

PPL Services, a Delaware corporation, is a wholly owned subsidiary of PPL. PPL Services also provides various administrative services at cost to affiliated entities, including LKS and PPL Electric. PPL Services was formed as a corporate entity on February 14, 2000 as a PPL subsidiary. When PPL Services was formed, PPL was a single state exempt holding company under PUHCA 1935, so PPL Services was not subject to regulation as a centralized service company. PPL remained a single state exempt holding company after PUHCA 2005 was passed. On October 26, 2010, the Commission issued an order under section 203 of the Federal Power Act (FPA), authorizing PPL's acquisition of E.ON U.S. As a result of the acquisition of E.ON U.S., PPL derived more than 13 percent of its public utility company revenues from outside of a single state. After the acquisition, PPL notified the Commission that it no longer qualified for the waiver from applicable accounting, record retention, and reporting requirements under part 366 of the Commission's regulations as a single state holding company and notified the Commission it no longer sought to maintain its waiver as a single state holding company. Due to the acquisition of E.ON U.S. and PPL's change in status under PUHCA 2005, PPL Services fell under regulation as a centralized service company under PUHCA 2005 on November 1, 2010. The basic organizational structure of PPL Services has not changed significantly since it was formed in 2000.

B. Non-Power Goods and Services

LKS and PPL Services are the centralized service companies within PPL's holding company system that provide business support services to PPL, affiliated FPUs, and other subsidiaries. During the audit period, the service companies had service agreements between themselves and the FPUs. Under these agreements, the service companies provided administrative and professional services to PPL, its associated public utilities, and other PPL nonregulated operating companies "at-cost." Specifically, these administrative and professional services included, among others, corporate audit services, environmental management services, facilities management, financial accounting and reporting services, human resources, IT support, tax services, and legal services. Also, affiliated companies provided PPL's FPUs with other non-power goods and services. Such services were provided under agreements for mutual assistance, gas transportation services, insurance services, third-party services, data hosting, and intercompany billing support.

C. Service Company Accounting Systems

Cost accumulation and tracking at PPL Services is accomplished using two systems: PeopleSoft Project Costing (Project Costing) and PowerPlant. Project Costing is the system where projects are created and serves as the repository for amounts from various subsystems, such as payroll, accounts payable, and inventory. PPL Services tracks expenses by project. These can either be expense or capital projects. The Commission account for applicable costs is assigned as part of this Project Costing. PowerPlant contains plant records for PPL Services and serves as the database for its property records. PowerPlant data fields are updated by a nightly interface with PeopleSoft. Any capital projects established in PowerPlant are reviewed for proper accounting set up by the Asset Management group, which is part of the Controller's department. PowerPlant calculates depreciation expense as well as any capitalized interest. At month end, PowerPlant creates journal entries that are interfaced back to the PeopleSoft general ledger. PowerPlant is used exclusively for accumulating costs for capital projects.

Classification of accounts is maintained by the Corporate Accounting department in the Shared Accounting Services group and conforms to the requirements of the USofA. The classification also establishes accounting requirements as applicable to transactions occurring under normal circumstances in the ordinary course of business. The general ledger records and maintains activity and balances for direct and indirect costs. The general ledger also runs a monthly process to allocate indirect service company costs recorded, by category, from the service company to various PPL business lines as defined by the Financial Planning group. Also, the Financial Planning group created manual journal entries, and reviewed and approved direct cost allocations from the service company to the various business lines.

LKS cost accumulation and tracking is accomplished using Oracle products. Transactions affecting LKS post to the Oracle general ledger and originate from spreadsheet journal entries and mass allocations generated within the Oracle general ledger module, and from the subsidiary systems' Oracle Project Accounting, Oracle Payables, Oracle Purchasing, PowerPlant, the VOLTS timekeeping system, and the Transportation Resource Management System.

LKS uses the Oracle Project Accounting (Project Accounting) module to capture and accumulate direct and indirect costs. Projects have been created for each associated company, which receives charges with tasks designated to record income statement charges for direct and indirect labor, and for direct and indirect nonlabor. Charges from LKS to projects with tasks set up to balance sheet accounts on associated companies are designated as direct. Labor burdens are designated as indirect, consistent with the treatment on the FERC Form No. 1. LKS employees record their time through the timekeeping system to the appropriate direct or indirect labor tasks, and the labor is interfaced to Project Accounting and the general ledger. Nonlabor charges are recorded to appropriate direct or indirect nonlabor tasks via coding on purchase orders, disbursement requests, purchasing cards, or expense reports. After employees' labor charged to associated companies is interfaced from Project Accounting and posted to the general ledger, an Oracle process calculates burden components on this labor. This process debits direct burden accounts for all labor, including indirect labor. Another Oracle process then moves burden amounts from direct burden accounts to indirect burden accounts.

D. Cost Allocation Methods

The service companies directly and indirectly charge costs to affiliates. Directly charged costs are identifiable and charged entirely to the appropriate affiliate, while indirectly charged costs require application of different cost allocation methodologies to determine charges. These methodologies are based on several factors such as number of employees, number of transactions, number of customers, or occupied square footage. In general, the service companies charge costs to affiliates in one of three ways:

- Costs for services performed for an affiliate are directly charged to the affiliate.
- Costs for services performed for two or more affiliates are distributed among and charged to the affiliates, using methods determined on a cost-causation basis consistent with the type of work performed and based on an allocation method.
- Costs for general services, which are applicable to all affiliates or a class or classes of affiliates, are allocated among or charged to such affiliates by application of one or more cost allocation methods.

LKS reported approximately $296 million in service costs for 2011. Moreover, LKS directly charged some 47 percent and allocated 53 percent of costs to affiliates with respect to non-power goods and services it provided. KU and LG&E received about 88 percent of the service company's charges during 2011. LKS neither directly charged nor allocated any costs to PPL Electric during 2011. LKS directly charged or allocated costs to affiliates using 18 different allocation methods.

PPL Services reported approximately $400 million in service costs for 2011. Moreover, it directly charged some 59 percent and allocated 41 percent of costs to affiliates with respect to non-power goods and services it provided. PPL Electric received about 36 percent of the service company's charges during 2011. PPL Services neither directly charged nor allocated any costs to KU or LG&E during 2011. PPL Services directly charged or allocated costs to affiliates using 11 different allocation methods.

E. Internal Audit Role and Reporting

PPL's Internal Audit department is divided into three branches: PPL Audit Services, Special Projects, and LKE Audit Services. The executive director of the Internal Audit department reports functionally to the Audit Committee of the Board of Directors and reports administratively to the Chairman/President/CEO. Most of these staffers have Certified Public Accountant and/or Certified Internal Auditor professional certifications.

The Internal Audit department uses and complies with the Institute of Internal Auditors' International Standards for the Professional Practice of Internal Auditing. Each quarter, the Internal Audit department prepares a report for the PPL Audit Committee that addresses key risk areas assessed during the quarter, a summary of audit results, a summary of significant or material control deficiencies, audit performance measures, and a summary of select in-progress audits. Each year, the Internal Audit department also reports to the PPL Audit Committee on overall control environment, Sarbanes-Oxley section 404 compliance, audit organization and qualifications, budget and expenditures, annual audit plans, and the Internal Audit department's charter. The Internal Audit department did not perform any work that directly related to the scope areas in this audit.

F. Acquisition of E.ON U.S.

On November 1, 2010, PPL purchased E.ON U.S., the parent company of Kentucky's two major utilities, KU and LG&E, for $7.625 billion from German utility firm E.ON AG. On October 25, 2010, the Commission issued an order approving this acquisition of all issued and outstanding limited liability company interests of E.ON U.S.[7] As a result of the transaction, E.ON U.S. became a direct, wholly owned subsidiary of PPL, and E.ON U.S.'s subsidiaries, including KU and LG&E, became indirect, wholly owned subsidiaries of PPL. In its Merger Order approving the transaction, the Commission required that transmission and wholesale customers be held harmless from costs related to the transaction for five years to the extent that such costs would exceed savings related to the transaction.

[7] *PPL Corporation*, 133 FERC ¶ 61,083 (2010) (Merger Order).

III. Introduction

A. Objectives

The audit's objectives were to determine whether PPL and its associated companies complied with: (1) Commission cross-subsidization restrictions on affiliate transactions; (2) accounting, recordkeeping, and reporting requirements; (3) the USofA for centralized service companies; (4) Commission preservation of records requirements for holding companies and service companies; and (5) FERC Form No. 60 Annual Report requirements. The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies and applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorizations in Docket No. EC10-77-000. Lastly, audit staff examined KU, LG&E, and PPL Electric's compliance with their transmission cost-of-service formula rate schedules within the respective OATTs. The audit covered January 1, 2010 through December 31, 2011.

B. Scope and Methodology

To address overall audit objectives, audit staff:

- Identified standards and criteria used to evaluate compliance with each audit scope area. They included Commission rules, regulations, letter orders, and other requirements for holding and service companies, and Commission accounting regulations for jurisdictional public utilities.

- Reviewed FERC-65, Notification of Holding Company Status, and FERC Form No. 60 Annual Reports to ensure filed information was reliable, accurate, and complete.

- Reviewed publicly available materials to understand PPL's operations, including select filings to the SEC (Forms 10-K and 10-Q), FERC Form Nos. 1 and 60 filings, prior audits, and other filings with the Commission.

- Conferred with officials from the Pennsylvania, Kentucky, Virginia, and Tennessee public utility commissions, which have jurisdiction over PPL's FPUs.

- Conducted site visits to corporate headquarters in Allentown, PA, and Louisville, KY. The visits enabled audit staff to understand PPL's structure, activities, functions, systems, and the processes used in its operations. While on site, audit staff reviewed and tested supporting details for PPL's allocation methods; interviewed PPL staff responsible for accounting, financial reporting, record retention, cost allocations, and PPL's compliance program; sampled select supporting documents to ensure the service companies' accounting complied with Commission accounting regulations; sampled select supporting documents to ensure that billings and associated public utilities' accounting for these billings complied with Commission accounting regulations; and tested compliance with preservation of records requirements.

- Conducted interviews, teleconferences, and met with PPL employees to discuss processes, procedures, operations, and observations.

- Discussed data responses with PPL employees, and clarified and supplemented data responses with more information on areas of specific concern.

- Reviewed relevant audit reports and working papers of the Internal Audit department and external audit firm Ernst & Young LLP.

- Conferred with other Commission staff on various compliance issues to ensure audit findings would be consistent with Commission precedent and policy. For example, audit staff spoke with staff from other divisions within the Office of Enforcement, and with technical and legal staff from other Commission offices, including the Office of Energy Market Regulation and the Office of General Counsel.

Audit staff performed several specific actions to evaluate compliance with all relevant requirements relating to audit objectives. A summary of these actions includes:

Cross-subsidization Restrictions

To evaluate compliance with Commission cross-subsidization restrictions on affiliate transactions, audit staff:

- Reviewed policies, procedures, and practices related to the sale of non-power goods and services.

- Interviewed PPL employees, particularly those who account and report transfers of non-power goods and services.

- Reviewed and tested pricing mechanisms for non-power goods and services the FPUs provided to and received from each other, service companies, and other nonutility affiliates.

- Sampled charges and payments to determine accurate pricing for the sale of goods and services.

Accounting, Recordkeeping, and Financial Reporting

To evaluate compliance with Commission accounting, recordkeeping, and financial reporting regulations, audit staff:

- Reviewed FERC Form No. 60 Annual Report filings, Notification of Holding Company Status – FERC-65 filings, and the public utilities' FERC Form No. 1 reports. Audit staff also verified select, electronically filed information reported on the FERC Form No. 60 filings with supporting books and records to ensure reported information was accurate and complete.

- Compared select information in the FERC Form No. 1s with the FERC Form No. 60s to ensure information was reported accurately and consistently. Also, audit staff reviewed page 429 of the FERC Form No. 1s, which included non-power goods and services transactions for each FPU.

- Reviewed, sampled, analyzed, and tested select centralized service company accounting data.

- Sampled FPUs' accounting for select costs received from the centralized service companies.

Cost Allocation and Billings

To evaluate service company cost allocation methodologies and billings, audit staff:

- Identified cost allocation methods used, and identified and reviewed new allocation methods to facilitate our review of the service companies' cost allocation methods and costs the service companies billed to PPL's FPUs. Also, audit staff reviewed and tested billings and supporting details behind select allocation methods.

Preservation of Records

To evaluate compliance with Commission preservation of records requirements, audit staff:

- Interviewed PPL employees responsible for retaining records for the service companies.

- Requested and tested select records to ensure their retention.

Merger and Acquisition Authorizations Compliance Review

To evaluate compliance with conditions of the Commission's Merger Order, audit staff:

- Reviewed PPL's applications and related Commission filings and orders to understand the terms, conditions, and context of the merger and acquisition request, and identify commitments made in applicable orders.

- Examined procedures and controls for compliance with "hold harmless" provisions the Commission established in its merger and acquisition order. This included a review of accounting filings for recovery of transaction-related costs, controls for compliance oversight, and rates to ensure cost recoveries were appropriate.

- Discussed the merger with state public utility commissions that regulate PPL to understand their merger oversight and any concerns related to the post-merger company.

- Evaluated PPL's implementation process to ensure compliance with the merger's hold harmless provisions, requiring PPL to hold wholesale power and transmission customers harmless for five years from merger costs that may exceed merger-related savings.

- Interviewed employees involved in merger costs and synergy savings tracking.

- Tested certain amounts recorded as merger costs and synergy savings to determine appropriate classification and the level of support maintained.

Transmission Formula Rate

To evaluate each FPU's compliance with its respective formula rates, audit staff:

- Evaluated PPL Electric's compliance with its transmission cost-of-service formula rate in Attachment H-8G and the related Protocols set forth in Attachment H-8H to PJM's OATT, and KU and LG&E's compliance with their transmission cost-of-service formula rate in Attachment O to their joint OATT, including filings containing inputs to the formula rate.

- Reviewed initial and all subsequent Commission orders accepting the formula rate, including orders approving related settlements and PPL filings. Determined the level of functionalization, derivation of allocation factors, return on equity, rate base, accumulated depreciation, and other expenses. Reviewed background information about specific cost treatment, deferrals, cost caps, disallowances, and other matters disclosed as part of approving the derivation of the formula rate.

- Evaluated processes, procedures, and controls used to prepare and review the formula rate and annual updates, true-ups, or informational filings associated with the formula rate.

- Reviewed formula rate mechanics (forward-looking, historical, true-up, and informational filings), including a comprehensive overview of the formula rate mechanism the company provided.

- Evaluated the FERC Form No. 1 reporting processes and procedures to ensure accurate and complete reporting. As part of this evaluation, audit staff reconciled FERC Form No. 1 data with formula rate calculations and reviewed all discrepancies.

- Reviewed the FERC Form Nos. 1 and 3-Q, including related notes to financial statements to identify major accounting matters. Audit staff highlighted significant notes to understand financial statement and formula rate implications, and identified underlying accounting entries for these significant accounting matters.

- Determined whether the FPUs' accounting for significant matters impacted the formula rate calculation.

- Evaluated whether PPL's FPUs applied formula rate inputs in compliance with rate approval orders.

- Reconciled formula rate inputs derived from the FERC Form No. 1 to FPU books and records. Evaluated compliance with the USofA for the inputs under review, including all related guidance and accounting releases and accounting treatment of input items.

- Evaluated various accounts incorporated into cost-of-service formula rates and compliance with relevant accounting regulations in the UsofA.

Besides these actions, audit staff reviewed PPL's regulatory compliance program. Audit staff assessed the program for audit scope areas consistent with prior Commission orders and policy statements. Specifically, audit staff:

- Reviewed PPL's regulatory compliance program structure, including its authority and responsibilities for overseeing corporate compliance and the delegation of compliance responsibilities.

- Reviewed the Internal Audit department structure, including its chain-of-command and access to the Board of Directors through its Audit Committee to assess the effectiveness and independence of the audit function.

- Interviewed PPL executives, managers, and operational employees to evaluate their knowledge and application of the compliance program.

IV. Findings and Recommendations

1. Long-Term Investment in Subsidiary

PPL Electric improperly accounted for its investment in PPL Receivables under the consolidated method of accounting instead of using the equity method of accounting, as required by the Commission. As a result of using the consolidated method instead of the equity method of accounting, PPL Electric erroneously included certain amounts in its formula rate billings to wholesale transmission customers.

Pertinent Guidance

On February 1, 1973, the Commission issued Order No. 469 to amend the requirements of the Uniform System of Accounts to adopt the equity method of accounting for long-term investments in subsidiaries.[8]

18 C.F.R. pt. 101, Account 123.1, Investment in Subsidiary Companies, states:

> A. This account shall include the cost of investments in securities issued or assumed by subsidiary companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement plus the equity in undistributed earnings or losses of such subsidiary companies since acquisition. This account shall be credited with any dividends declared by such subsidiaries.

18 C.F.R. pt. 101, Account 418.1, Equity in Earnings of Subsidiary Companies, states:

> This account shall include the utility's equity in the earnings or losses of subsidiary companies for the year.

Instructions to the schedule on page 224 of the FERC Form No. 1, Investments in Subsidiary Companies (Account 123.1), require in part:

> 1. Report below investments in Accounts 123.1, Investments in Subsidiary Companies.

[8] *Revisions in the Uniform System of Accounts, and Annual Report Forms No. 1 and No. 2 to Adopt the Equity Method of Accounting for Long-Term Investments in Subsidiaries*, Order No. 469, 49 FPC 326 (1973), *rehearing denied*, 49 FPC 1028 (1973).

3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.

PJM Interconnection L.L.C., FERC Electric Tariff, Attachment H-8H, sections I, III.B states, in part:

> I.H "Material Accounting Change" means any (i) change in PPL Electric's accounting policies and practices, or (ii) change in PPL Electric's inter-corporate cost allocation policies or practices from those policies and/or practices in effect for the Rate Year upon which the immediately preceding Annual Update was based, which change causes a result under the Formula Rate difference than the result under the Formula Rate as calculated without such change.
>
> III.B. (2) The Annual Transmission Revenue Requirement shall be based on PPL Electric's books and records which reflect data properly recorded in: PPL Electric's FERC Form No. 1 to the extent the Formula Rate specifies the FERC Form No. 1 data as the input source; and The Commission's Uniform System of Accounts, as each exists as of the last day of the preceding calendar year.
>
> III.B. (3)(b) The Annual Update shall provide notice of Material Accounting Changes, which may incorporate by reference applicable disclosure statements filed with the SEC.

Background

Since 1973, the Commission has adopted the equity method of accounting for long-term investments in subsidiaries. Under the equity method of accounting, the investment in subsidiaries is recorded in Account 123.1, Investment in Subsidiary Companies (Major Only).[9] This account is increased or decreased based on a utility's proportionate share of subsidiary earnings regardless of whether such earnings were paid out as dividends to that utility. Although the Commission adopted the equity method of accounting for long-term investment in subsidiaries, it maintained its policy for ratemaking purposes that undistributed earnings of the subsidiary are to be excluded from the equity portion of the jurisdictional company capital structure in determining the rate of return.

[9] *Id*.

PPL Electric has three investments in the following subsidiary companies: CEP Commerce, LLC (CEP Commerce), CEP Lending, Inc. (CEP Lending), and PPL Receivables Corporation (PPL Receivables). PPL Electric has full control of these entities through 100 percent ownership of direct voting rights. CEP Commerce is the parent of CEP Lending, a company formed to make intercompany loans to all of PPL affiliates. PPL informed audit staff that PPL Receivables was formed to serve only the financing needs of PPL Electric. PPL Receivables is a special purpose entity whose sole purpose is to buy eligible accounts receivable and unbilled revenue from PPL Electric to secure asset-backed commercial paper from a third party.

Audit staff examined PPL Electric's accounting for its long-term investment in subsidiaries and found that it used the equity method of accounting to account for its long-term investment in CEP Commerce and CEP Lending. Conversely, it used the consolidated method of accounting to account for its long-term investment in PPL Receivables since its inception in 2004.

PPL Electric used various income statement and balance sheet accounts to record its long-term investment in PPL Receivables under the consolidated method of accounting. During the course of the audit fieldwork, PPL Electric filed its 2012 FERC Form No. 1 as required by Commission regulations.[10] On page 450.1 of the refiled 2012 FERC Form No. 1, PPL Electric disclosed the accounting impact if it had followed the Commission's approved method of accounting for subsidiary investments, which was the equity method of accounting. In addition, audit staff noted that some of these accounts and associated amounts flowed through the formula rate billings to transmission customers.

Audit staff determined that PPL Electric appropriately accounted for its long-term investment in CEP Commerce and CEP Lending using the equity method of accounting. However, PPL Electric did not properly account for its long-term investment in PPL Receivables based on the equity method of accounting, as required by Commission accounting regulations. The Commission's accounting regulations require that long-term investments in subsidiaries be recorded in Accounts 123.1 and 418.1, Equity in Earnings of Subsidiary Companies. Also, PPL Electric should not have included certain amounts in formula rate billings to wholesale transmission customers associated with using the consolidated method of accounting for PPL Receivables. Lastly, audit staff did not find sufficient evidence demonstrating that PPL Electric provided notification to its customers that it was using an accounting method not prescribed by the Commission to account for its long-term investment in PPL Receivables using the consolidated versus the equity method of accounting.

[10] 18 C.F.R. section 141.1.

Since PPL Electric neither sought nor received retroactive relief to use the consolidated method of accounting for its subsidiary investment in PPL Receivables, it must refund amounts erroneously included in formula rate billings to transmission customers since 2004.

Recommendations

We recommend that:

1. PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

2. PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

3. PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.

4. PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

5. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

2. Tax Overpayments

PPL Electric improperly accounted for overpayments of its 2010 and 2011 estimated Federal and state income tax liability in Account 165, Prepayments.

Pertinent Guidance

18 C.F.R. pt. 101, Account 236(A) (B), Taxes Accrued, states:

> A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under account 165, Prepayments.
>
> B. If accruals for taxes are found to be insufficient or excessive, correction therefore shall be made through current tax accruals.

Background

Audit staff reviewed PPL Electric's taxes and related procedures to understand why PPL Electric characterized taxes as prepaid. Specifically, audit staff asked PPL Electric to explain: (1) the calculation of its estimated Federal and state income tax liability each year; (2) the procedures for determining its estimated and actual Federal and state income tax liability; and (3) the documentation supporting its estimated and actual Federal and state income tax liability and Federal and state income tax prepayment determinations for 2010 and 2011.

PPL Electric determined its estimated Federal and state income tax liability each month by applying the applicable Federal and state income tax rates to its estimated taxable income. When quarterly income tax payments exceeded the estimated income tax liability, PPL Electric considered the income tax overpayment as a prepayment and then recorded this amount in Account 165. PPL Electric paid estimated Federal and state income taxes in four quarterly installments based on its estimated annualized taxable income.

Based on the examination of tax information, audit staff found that PPL Electric recorded Federal and state income tax overpayment amounts in Account 165 that were refunded to PPL Electric for tax years ending 2010 and 2011. Specifically, PPL Electric received refunds amounting to $59,843,908 and $17,272,745 for tax years 2010 and 2011, respectively. Thus, PPL Electric did not reduce any future year's tax liability by the 2010 and 2011 income tax overpayments.

While Account 165 of the Commission's accounting regulations allows the prepayment of income taxes to be recorded therein, Account 236 requires that such prepayments must be applicable to periods subsequent to the date of the balance sheet. Further, the Commission has defined prepayments included in Account 165 as expenses for a service or a supply paid in advance that will be consumed or used in future accounting periods, such as rent and insurance.[11] Audit staff believes PPL Electric's treatment of income tax overpayments as a prepayment is not consistent with the requirements of Account 165 or other Commission requirements because these monies were refunded and not used to pay PPL Electric's income tax obligations in advance.

PPL Electric included the income tax overpayments recorded in Account 165 in its formula rate as a component of rate base. Under the PJM OATT, PPL Electric is allowed to include prepaid amounts recorded to Account 165, Prepayments, as an item in the derivation of its rate base calculated in its formula rates. Prepayments, which represent amounts paid in advance for a good or service, are included as an adjustment to rate base and serve as an added benefit to transmission owners for costs essential to their operations but are prepaid, like insurance premiums. PPL Electric's prepayment input was the product of its applicable prepayment balance and its wages and salaries allocation factor. In conformance with notes to PPL Electric's formula rate, it can only include prepayments for its electric operations.

Because PPL Electric elected not to apply the income tax overpayments to future tax obligations, it should not have been reclassifying excess tax payments in Account 236 to Account 165. Audit staff is aware that PPL Electric engaged in this accounting practice during and prior to the audit period. Also, PPL Electric should not have recovered amounts for its overpayment of income taxes through its formula rate. For amounts determined to be potential refunds and not used to pay PPL Electric's tax obligations in advance, PPL Electric should reclassify state income tax prepayments to Account 143, Other Accounts Receivable, and Federal income tax prepayments to Account 146, Accounts Receivable from Associated Companies.

[11] *Entergy Services, Inc.*, Opinion No. 505, 130 FERC ¶ 61,023, at P 190 (2010).

Recommendations

We recommend that:

6. PPL Electric should reclassify Federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account146, Accounts Receivable from Associated Companies or Account 143, Other Accounts Receivable, as appropriate.

7. PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

8. PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

9. PPL Electric should revise procedures to appropriately determine its tax accrual amount.

10. PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

11. For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

12. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric’s wholesale transmission customers.

3. Manufactured Gas Plant Obligations

PPL Electric improperly accounted for manufactured gas plant remediation expenses in Account 930.2, Miscellaneous General Expenses. As a result of the incorrect accounting, these expenses were improperly included in the formula rate computation. These expenses should have been treated such that no amounts would be recovered from wholesale transmission customers since these costs were not associated with providing service to wholesale transmission customers.

Pertinent Guidance

18 C.F.R. pt. 101, Account 242, Miscellaneous Current and Accrued Liabilities, states:

> This account shall include the amount of all other current and accrued liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

18 C.F.R. pt. 101, Account 253, Other Deferred Credits, states:

> This account shall include advance billings and receipts and other deferred credit items, not provided for elsewhere, including amounts which cannot be entirely cleared or disposed of until additional information has been received.

18 C.F.R. pt. 101, Account 426.5, Other Deductions, states:

> This account shall include other miscellaneous expenses which are nonoperating in nature, but which are properly deductible before determining total income before interest charges.

18 C.F.R. pt. 101, Account 930.2, Miscellaneous General Expense, states:

> This account shall include the cost of labor and expenses incurred in connection with the general management of the utility not provided for elsewhere.

Background

PPL Electric incurred manufactured gas plant (MGP) environmental obligations to clean up contaminated sites in conjunction with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. This act imposed joint and several liability for cleaning up contamination caused by hazardous substances. PPL Electric estimated its liability for MGP environmental remediation to be $3,874,758 and $696,010 in 2010 and 2011, respectively. PPL Electric accounted for the MGP environmental remediation contingencies by debiting Account 930.2, and crediting Account 242 or Account 253, as appropriate.

PPL Electric represented that it included the environmental remediation obligations related to the MGPs in Account 930.2 because the environmental costs could not be identified with a specific business line. Consistent with PPL Electric's accounting policy, when a specific business line cannot be identified, either due to contamination that related to the purchase of property or related to former operation of facilities no longer in service, the costs are recorded in Account 930.2.

Audit staff believes that PPL Electric's accounting for its MGP environmental obligations was not consistent with the Commission's accounting regulations because such obligations should not have been included in Accounts 930.2. Audit staff also noted that these costs were not related to providing service to wholesale transmission customers. Therefore, under the Commission's accounting regulations, PPL Electric should have accounted for the MGP environmental obligations by debiting the appropriate nonutility expense account, not a transmission or administrative and general expense account tied to the transmission formula rate, and crediting Account 242 or Account 253, as appropriate.

For ratemaking purposes, PPL Electric included amounts in Account 930.2 in formula rate determinations. The formula rate template permits PPL Electric to recover costs recorded in this account through the application of the transmission wages and salaries allocator. The transmission wages and salaries allocator is the ratio of transmission wages expense to total wages expense less administrative and general wages expense. The application of this allocation factor allowed PPL Electric to recover transmission-related costs recorded in Account 930.2.

As part of the examination of Account 930.2, audit staff determined that in 2010 and 2011 PPL Electric recorded $3,874,758 and $696,010, respectively, of MGP environmental remediation costs in this account and subsequently included these amounts in formula rate determinations. In addition, audit staff noted that PPL Electric recorded these MGP environmental obligations in Account 930.2 for years prior to the audit period. PPL Electric represented to audit staff that these amounts were related to its former MGPs, which include Brodhead Creek, Columbia Gas Plant, Milton Gas Plant, Mt. Joy Gas Plant, and Shamokin Gas Plant. These MGPs were owned by Pennsylvania Power and Light Company, to which PPL Electric is the successor. However, these MGPs are no longer reflected on PPL Electric's books. The MGPs were not used in PPL Electric's wholesale transmission operations. Rather, they were historically used to produce a low Btu gas that was distributed to the Pennsylvania Power and Light Company's retail gas utility customers during the earlier years of the company's operations, when it was both a natural gas and electric utility.

PPL Electric should amend its accounting policy for MGP environmental obligations to record such contingencies by debiting the appropriate nonoperating expense account and crediting Account 242 or Account 253, as appropriate. PPL Electric should also refrain from including these costs in formula rate determinations, since these costs were not associated with providing service to wholesale transmission customers.

Recommendations

We recommend that:

13. PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.

14. PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

15. PPL Electric should determine the amount of manufactured gas plant remediation expenses recovered through its formula rate.

16. For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

17. PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

4. Asset Retirement Obligation

KU and LG&E neither sought nor received Commission approval to recover asset retirement obligation costs in their transmission formula rate.

Pertinent Guidance

Order No. 631 states:

> However, public utilities, licensees, and natural gas companies with formula rate tariffs must not include any cost components related to asset retirement obligations in their formula rate billing tariffs for automatic recovery in their billing determinations without obtaining Commission approval. [12]

Order No. 631 goes on to say:

> The Commission finds that the issue of whether, and to what extent, a particular asset retirement cost must be recovered through jurisdictional rates should be addressed on a case-by-case basis in the individual rate change filed by public utilities, licensees, and natural gas companies. To ensure that all rate base amounts related to asset retirement obligations can be identified and excluded from the rate base calculation in a rate change filing, the Commission adds sections 35.18 and 154.315 to its rate change filing requirements. These new regulations require that public utilities, licensees, and natural gas companies who have recorded an asset retirement obligation on their books in accordance with this rule must, as part of any initial rate filing or general rate change filing, provide a schedule identifying all cost components related to the asset retirement obligation that are included in the book balances of all accounts reflected in the cost of service computation supporting the proposed rates. In addition, the regulations require that all asset retirement obligations related rate base items be removed from the rate base computation through an adjustment. If the public utility, licensee, or natural gas company is seeking recovery of an asset retirement obligation in rates, it must also provide a detailed study supporting the amounts proposed to be collected in rates. If the public utility, licensee, or natural gas company is not seeking

[12] *Accounting, Financial Reporting, and Rate Filing Requirements for Asset Retirement Obligations*, Order No. 631, 103 FERC ¶ 61,021, at P 60 (2003).

> recovery of the asset retirement obligation in rates, then it must remove all asset retirement obligation related cost components from its cost of service.[13]

Section 35.18 of the Commission's regulations specifically states:

> (a) A public utility that files a rate schedule, tariff or service agreement under section 35.12 or section 35.13 and has recorded an asset retirement obligation on its books must provide a schedule, as part of the supporting work papers, identifying all cost components related to the asset retirement obligations that are included in the book balances of all accounts reflected in the cost of service computation supporting the proposed rates. However, all cost components related to asset retirement obligations that would impact the calculation of rate base, such as electric plant and related accumulated depreciation and accumulated deferred income taxes, may not be reflected in rates and must be removed from the rate base calculation through a single adjustment.
>
> (b) A public utility seeking to recover nonrate base costs related to asset retirement costs in rates must provide, with its filing under section 35.12 or section 35.13, a detailed study supporting the amounts proposed to be collected in rates.
>
> (c) A public utility that has recorded asset retirement obligations on its books, but is not seeking recovery of the asset retirement costs in rates, must remove all asset-retirement-obligations-related cost components from the cost of service supporting its proposed rates.[14]

18 C.F.R. pt. 101, Account 182.3, Other Regulatory Assets, states, in part:

> When specific identification of the particular source of a regulatory asset cannot be made, such as in plant phase-ins, rate moderation plans, or rate levelization plans, account 407.4, Regulatory credits, shall be credited.

[13] *Id.* P 62.

[14] 18 C.F.R. section 35.18 (2012).

Background

KU and LG&E recorded liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with a separate asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased to reflect changes in the obligation due to the passage of time through the recognition of accretion expense.

General Instruction 25 of part 101 of the USofA defines an asset retirement obligation (ARO) as:

> A liability for the legal obligation associated with the retirement of a tangible long-lived asset that a company is required to settle as a result of an existing or enacted law, statute, ordinance, or written or oral contract or by legal construction of a contract under the doctrine of promissory estoppel.[15]

KU and LG&E initially recorded the ARO by debiting Account 101, Electric Plant in Service, and crediting Account 230, Asset Retirement Obligation. These AROs were for obligations associated with ash ponds, chemical storage, asbestos, coal storage, environmental ponds, and other operational matters.

To record the depreciation on the ARO assets, KU and LG&E debited Account 403.1, Depreciation Expense for Asset Retirement Costs, and credited Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. This depreciation is calculated on a straight line basis over a life dictated by the settlement date of the ARO liability.

For accretion expense, KU and LG&E debited Account 411.10, Accretion Expense, and credited Account 230. The accretion expense recognizes the increase in the cost of removing an asset over its useful life.

Lastly, to defer the total depreciation on ARO costs and accretion on ARO liabilities, KU and LG&E debited Account 182.3, Other Regulatory Assets, and credited Account 407.4, Regulatory Credits. Account instructions to Account 182.3 would require KU and LG&E to credit Account 407.4, Regulatory Credits, when "specific identification of the particular source of a regulatory asset cannot be made." However, in this case, the particular source of the regulatory asset can be specifically identified as the depreciation initially recorded in Account 403.1 and the accretion initially recorded in Account 411.10. Therefore, KU and LG&E should have credited Accounts 403.1 and

[15] 18 C.F.R. pt. 101, General Instruction 25.

411.10 rather than Account 407.4. Audit staff understands that amounts deferred in Account 182.3 may have been included in depreciation expense recorded in Account 403.1 and previously collected from wholesale power and transmission customers. Due to these being previously collected, KU and LG&E overstated the regulatory asset recorded in Account 182.3. However, audit staff will not require KU and LG&E to reduce the regulatory asset to the extent KU and LG&E make refunds for the amounts previously collected.

Although KU and LG&E recorded the ARO assets and liability in Accounts 101 and 230, respectively, it included in rate base only the amounts recorded in Account 101 resulting in an increase in rate base. By not decreasing rate base by the amount recorded in Account 230, KU and LG&E overstated amounts included in rate base. Also, KU and LG&E flowed through the effects of the depreciation of the ARO assets recorded in Accounts 403.1 and 108 in the formula rate.

It is audit staff's understanding that ARO costs were included in LG&E and KU's formula rate calculation since inception of the formula rate. Based on Commission requirements, audit staff believes no aspect of the ARO should have been included in formula rate billings to wholesale power and transmission customers, absent KU and LG&E seeking approval from the Commission to include ARO amounts in formula rate determinations. This would have afforded the Commission the opportunity to request further information regarding KU and LG&E's accounting and the impacts of including ARO amounts to determine the annual revenue requirement. KU and LG&E should refund amounts previously collected from wholesale power and transmission customers related to their ARO obligations.

Recommendation

We recommend that:

18. LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

19. LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

20. For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under section 35.19a of the Commission's regulations.

5. Virginia Distribution Utility Plant Costs

KU did not remove all amounts from its formula rate calculations associated with its Virginia distribution utility plant facilities, as required by the Commission.

Pertinent Guidance

The March 17, 2006 Commission order accepting KU and LG&E's attachment O formula rate stated:

> We accept the attachment O rate formula for use in Applicants' stand-alone OATT, subject to revision. We agree with Applicants that the proposed rate formula represents an appropriate rate methodology for inclusion in Applicants' stand-alone OATT. However, Applicants must exclude the cost of certain facilities in Virginia that the Commission has found to serve a distribution function and not a transmission function. [16]

Note M of Attachment O requires KU to remove transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until FERC Form No. 1 balances are adjusted to reflect application of seven-factor test).[17]

[16] *Louisville Gas and Electric Company, et al.*, 114 FERC ¶ 61,282 at P198, (2006) (Citing *Louisville Gas & Electric Co*., 109 FERC ¶ 61,330 at P 8-9 (2004) (order affirming Presiding Judge's finding that certain facilities in Virginia that perform a distribution function must be excluded from the formula rates used in an interconnection agreement and transmission service agreement between Applicants and East Kentucky Coop.), *order denying reh'g*, 111 FERC ¶ 61,323 at P 50 (2005)).

[17] FERC uses a seven-factor test to determine whether an electric facility is distribution or transmission. FERC will give deference to state commission determinations, but that is limited by the expectation that the state follows the seven-factor test: (1) Local distribution facilities are normally in close proximity to retail customers; (2) local distribution facilities are primarily radial in character; (3) power flows into local distribution systems; it rarely, if ever, flows out; (4) when power enters a local distribution system, it is not reconsigned or transported onto some other market; (5) power entering a local distribution system is consumed in a comparatively restricted geographic area; (6) meters are based at the transmission/local distribution interface to measure flows into the local distribution system; and (7) local distribution systems will be of reduced voltage. Order No. 888, FERC Stats. & Regs. ¶ 31,036 at 31,771, 31,981 (1996).

Background

KU's transmission facilities in southwestern Virginia consist of 22 miles of 500-kV lines, 44 miles of 161-kV lines, 8 miles of 138-kV lines, 114 miles of 69-kV lines, and 5 transmission substations.

In a March 2004 initial decision, an administrative law judge determined that these Virginia transmission facilities serve a distribution function and not a transmission function, and, therefore, KU must eliminate the cost of these facilities from the transmission rates it charges.[18] In December 2004, the Commission affirmed the administrative law judge's finding that these Virginia transmission facilities serve a distribution function and not a transmission function and stated that the costs of these facilities must be eliminated from the rates charged.[19] In the March 2006 order that conditionally approved KU's withdrawal from Midwest Independent Transmission System Operator, Inc. (MISO), the Commission again required KU to "exclude the cost of certain facilities in Virginia that the Commission has found to serve a distribution function and not a transmission function."[20]

During a review of the transmission formula rate calculation, audit staff determined that KU did not comply with Note M of Attachment O, which requires KU to remove transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test. KU acknowledged that its Virginia transmission facilities were state-jurisdictional, and KU should have removed the Gross Plant in Service cost of its Virginia transmission facilities and associated depreciation in the calculation of the Transmission Plant Allocator of Attachment O, in conformity with Note M of Attachment O.

Audit staff determined that, by not complying with Note M, KU did not remove certain expenses related to these Virginia distribution plant facilities from formula rate determinations. This includes not only amounts included in the calculation of rate base, return, depreciation, and income taxes that are allocated directly using the transmission plant allocator, but also amounts or expenses, such as accumulated deferred income taxes, operation and maintenance expenses, administrative and general expenses, or taxes other than income taxes that are allocated using other allocators (based on net or gross plant balances, wages and salaries, transmission operation and maintenance expenses,

[18] *Louisville Gas & Electric Co*., 106 FERC ¶ 63,039, at P 64 (2004), *aff'd*. 109 FERC ¶ 61,330 at P 8 (2004), reh'g denied, 111 FERC ¶ 61,323.

[19] *Louisville Gas & Electric Co.*, 109 FERC ¶ 61,330 (2004).

[20] *Louisville Gas & Electric Co*., 114 FERC ¶ 61,282, at P 197 (2006).

etc.) that indirectly incorporate the transmission plant allocator. This resulted in KU erroneously collecting amounts from wholesale power and transmission customers since it did not remove all costs associated with the Virginia distribution plant facilities from formula rate determinations.

Recommendations

We recommend that:

21. LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

22. For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under section 35.19a of the Commission's regulations.

6. Accounting for Cost of Removal

KU and LG&E improperly accounted for cost of removal on physical assets with legal asset retirement obligations.

Pertinent Guidance

18 C.F.R. pt. 101, Account 108, Accumulated Provision for Depreciation of Electric Utility plant (Major Only), states, in part:

> A. This account shall be credited with the following:
>
> (1) Amounts charged to account 403, Depreciation expense, or to clearing accounts for current depreciation expense for electric plant in service.
>
> (2) Amounts charged to account 403.1, Depreciation expense for asset retirement costs, for current depreciation expense related to asset retirement costs in electric plant in service in a separate subaccount.

E. The utility is restricted in its use of the accumulated provision of depreciation to the purposes set forth above. It shall not transfer any portion of this account … or make any other use thereof without authorization by the Commission.

Background

Audit staff examined KU and LG&E's cost of removal accounting for physical assets with legal asset retirement obligations, such as ash ponds, landfills, and coal storage facilities. KU and LG&E booked the cost of removal related to these assets by debiting Account 403, Depreciation Expense, and crediting Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. KU and LG&E then reclassified these amounts to a regulatory liability account by debiting Account 108 and crediting Account 254, Other Regulatory Liabilities. Once KU and LG&E retired the asset and settled the ARO, KU and LG&E debited Account 254 and credited Account 108.

While KU and LG&E received state commission guidance from the Kentucky Public Service Commission that approved this accounting treatment, such approval does not dictate how this transaction should be accounted for under the Commission's accounting regulations. Under the Commission's accounting regulations, cost of removal is typically factored in the depreciation rate, and depreciation expense is accounted for in Accounts 403 and 108. According to the instructions to Account 108, amounts recorded herein must not be transferred to any other account absent of approval from the Commission. KU and LG&E did not seek nor receive approval from the Commission to transfer any amounts from Account 108. By transferring amounts initially recorded in Account 108 to Account 254, KU and LG&E did not follow the instructions for Account 108. For rate purposes, Account 108 is typically used to reduce rate base while amounts recorded in Account 254 are typically not used in the formula rate calculations. Since KU and LG&E removed these amounts from Account 108, it erroneously overstated rate base used to determine formula rate billings to transmission customers. Audit staff is aware that this accounting practice was used for years prior to the audit period.

Recommendations

We recommend that:

23. LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

24. For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

25. LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

7. Merger Costs

PPL's three franchised public utilities (KU, LG&E, and PPL Electric) incorrectly included some transaction-related costs related to PPL's merger with E.ON U.S. in formula rate billings to wholesale power and transmission customers.[21]

Pertinent Guidance

The October 25, 2010 Commission order approving the merger of PPL and E.ON U.S., LLC stated:

> With respect to transaction-related costs, we accept Applicants' commitment to hold transmission and wholesale customers harmless from costs related to the transaction for a period of five years to the extent that such costs exceed savings related to the transaction, which we interpret to include all transaction-related costs, not only costs related to consummating the transaction.
>
> If Applicants seek to recover transaction-related costs through their wholesale power or transmission rates they must submit a compliance filing that details how they are satisfying the hold harmless requirement. If Applicants seek to recover transaction-related costs in an existing formula rate that allows for such recovery, then that compliance filing must be filed in the section 205 docket in which the formula rate was approved by the Commission, as well as in the instant section 203 docket. We also note that, if Applicants seek to recover transaction-related costs in a filing whereby they are proposing a new rate (either a new formula rate or a new stated rate), then that filing must be made in a new section 205 docket as well as in the instant section 203 docket. The Commission will notice such filings for public comment. In such filings, Applicants must: specifically identify the transaction-related costs they are seeking to recover, and (2) demonstrate that those costs are exceeded by the savings produced by the transaction, in addition to any requirements associated with filings made under section 205. Such a hold

[21] KU sells wholesale power to certain municipal utilities under long-term agreements that established cost-based wholesale power rates based on a formula rate. Moreover, PPL Electric, LG&E, and KU provide transmission service at formula rates.

> harmless commitment will protect customers' wholesale power and transmission rates from being adversely affected by the proposed transaction. [22]

Background

On June 28, 2010, PPL filed an application seeking authorization under sections 203(a)(1)(A), 203(a)(1)(B), and 203(a)(2) of the FPA for a proposed transaction in which PPL would acquire all of the issued and outstanding limited liability company interests of E.ON U.S. from E.ON AG's indirect, wholly owned subsidiary, E.ON U.S. Investments Corp. PPL sought to acquire E.ON U.S. for a purchase price of $7.625 billion, comprised of $2.062 billion in cash (subject to adjustment), the repayment of outstanding debt of E.ON U.S., LG&E, and KU estimated at $4.638 billion, and the assumption of $925 million in tax-exempt bonds of LG&E and KU. On October 25, 2010, the Commission issued an order approving the transaction under Docket No. EC10-77-000. [23] Audit staff evaluated PPL and its FPU subsidiaries for compliance with the conditions of this order. Besides reviewing Commission orders and company filings, understanding processes and procedures, and interviewing company staff, audit staff reviewed and tested compliance with the order's various provisions, such as verifying that the transaction did not result in any: (1) transfer of jurisdictional facilities between affiliated entities; (2) any securities issued for the benefit of any affiliated entity or in any new pledge or encumbrance of assets of an affiliated entity; or (3) any new affiliate contracts between affiliated entities. Audit staff also verified that all purchase accounting adjustment amounts were removed from account balances reported in the FERC Form No. 1.

Audit staff also evaluated compliance with the order's hold harmless provision, which required PPL to "hold transmission and wholesale customers harmless from costs related to the transaction for a period of five years to the extent that such costs exceed savings related to the transaction, which we interpret to include all transaction-related costs, not only costs related to consummating the transaction."

PPL properly excluded most of its transaction-related costs from formula rate billings to wholesale power and transmission customers, which included legal fees, consulting expenses, third-party costs, and internal labor costs. PPL had controls and procedures in place to hold harmless wholesale power and transmission customers, such as: payroll and time-reporting controls, communications from appropriate groups on how to charge certain costs, and supervisory review and approval of nonpayroll charges.

[22] *PPL Corporation*, 133 FERC ¶ 61,083, at PP 26-27 (2010).

[23] *Id.* P 1.

However, audit staff identified a small amount of transaction-related costs that flowed through to the formula rate billings.

In our review of transaction-related costs, audit staff determined that PPL's two service companies (PPL Services and LKS) allocated the most transaction-related costs to PPL ($113 million), LG&E & KU Capital ($32 million), and PPL Strategic Development ($1 million). These three entities held $146 million of the approximately $150 million in total transaction-related costs incurred during the audit period. The remaining $4 million of transaction-related costs were allocated to 12 other PPL entities, including PPL's 3 franchised public utilities, KU, LG&E, and PPL Electric, which are in bold in the table below. This table shows transaction costs allocated to each entity:

PPL Entity	Total Transaction Costs
1. PPL Corporation	$113,164,077
2. LG&E and KU Capital	$32,133,630
3. PPL Strategic Development	$1,262,186
4. PPL Global, LLC	$734,575
5. PPL Susquehanna LLC	$573,396
6. PPL Energy Services Holdings, LLC	$301,957
7. PPL Energy Plus, LLC	$298,902
8. PPL Generation LLC	$257,975
9. PPL Brunner Island, LLC	$222,337
10. PPL Montour LLC	$194,040
11. PPL Electric	**$163,329**
12. Louisville Gas & Electric	**$108,981**
13. Kentucky Utilities	**$95,060**
14. PPL Martins Creek, LLC	$58,814
15. PPL University Park, LLC	$24,408
Total	**$149,593,668**

In summary, PPL's three FPUs, KU, LG&E, and PPL Electric, were allocated approximately $367,000 in transaction-related costs, and they included approximately $329,229 of these costs in their wholesale power and transmission formula rate calculations. These costs consisted primarily of legal fees, consulting fees, wages of PPL staff in different departments, office supplies, and general and administrative expenses. These transaction-related costs included costs that were incurred before PPL filed its merger application with the Commission, during the transaction, and after the transaction was consummated. The Merger Order defines costs related to the transaction as "all transaction-related costs, not only costs related to consummating the transaction." The Merger Order also states, "If Applicants seek to recover transaction-related costs through their wholesale power or transmission rates they must submit a compliance filing that details how they are satisfying the hold harmless requirement. If Applicants seek to recover transaction-related costs in an existing formula rate that allows for such recovery, then that compliance filing must be filed in the section 205 docket in which the formula rate was approved by the Commission, as well as in the instant section 203 docket." PPL made no such filing to seek recovery for these costs.

Recommendations

We recommend that:

26. PPL Electric, LG&E, and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

27. PPL Electric, LG&E, and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

28. PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under section 35.19a of the Commission's regulations for LG&E and KU.

8. Allowance for Funds Used During Construction

KU's method of computing AFUDC on CWIP was deficient by compounding AFUDC monthly instead of semi-annually, including unrealized losses in its common equity balance used to calculate AFUDC, and using an incorrect balance for the common equity component.

Pertinent Guidance

AFUDC allows a company to recover its debt and equity costs used for funding construction. In Federal Power Commission's (FPC) Order No. 561, the Commission's predecessor agency, the FPC established a uniform formula for determining maximum rates to use for computing AFUDC.[24] The order states:

> The balances of long-term debt, preferred stock, and common equity for use in the formula for the current year will be the balances in such accounts at the end of the prior year; the cost rates for long-term debt and preferred stock will be the effective weighted average cost of such capital. The average short-term debt balances and related cost and the average construction work in progress balance will be estimated for the current year. We shall require, however, that public utilities and natural gas companies monitor their actual experience and adjust to actual at year-end if a significant deviation from the estimate should occur. For this purpose we shall consider a significant deviation to exist if the gross AFUDC rate exceeds by more than one-quarter of a percentage point (25 basis points) the rate that is derived from the formula by use of actual 13 monthly balances of construction work in progress and the actual weighted average cost and balances for short-term debt outstanding during the year.

On frequency of compounding of the AFUDC base, Order No. 561 states:

> We believe that a monthly compounding of AFUDC may result in excessive amounts capitalized since cash outlays for interest and dividends are not normally made on a monthly basis. We shall

[24] *Order Adopting Amendment to Uniform System of Accounts for Public Utilities and Licensees and for Natural Gas Companies*, Order No. 561, 57 FPC 608 (1977), *Order On Reh'g and Clarification*, Order 561-A, 59 FPC 1340 (1977), *further clarified*, 2 FERC ¶ 61,050 (1978).

> therefore permit compounding but no more frequently than semiannually.

18 C.F.R. pt. 101, Electric Plant Instruction 3 (17), Allowance for Funds Used During Construction, states in part:

> (a) Includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds.
>
> (b) The rates shall be determined annually. The balances for long-term debt, preferred stock and common equity shall be the actual book balances as of the end of the prior year … the short-term debt balances and related cost and the average balance for construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment, and fabrication shall be estimated for the current year with appropriate adjustments as actual data becomes available.

18 C.F.R. pt. 101, General Instruction 23 (C), Accounting for Other Comprehensive Income, states:

> (c) When it is probable that an item of other comprehensive income will be included in the development of cost-of-service rates in subsequent periods, that amount of unrealized losses or gains will be recorded in Accounts 182.3 or 254 as appropriate.

Background

AFUDC includes the net cost for the period borrowed funds were used for construction and a reasonable rate on other funds. KU recorded the balances below in Account 419.1, Allowance for Other Funds Used During Construction, and Account 432, Allowance for Borrowed Funds Used During Construction – Credit, during the audit period:

Year	Account 419.1	Account 432
2010	$521,152	$968,597
2011	$42,662	$12,955

Audit staff evaluated KU's AFUDC base and rate calculations, and the application of these calculations, to determine the accrual of AFUDC on CWIP for select construction projects. This evaluation identified several deficiencies with KU's AFUDC calculation methodology.

1. *AFUDC Compounded Monthly* – KU improperly compounded its AFUDC on a monthly basis. The Commission allows for compounding of AFUDC no more frequently than semi-annually.

2. *Unrealized Losses* – KU incorrectly included unrealized losses from Account 219, Accumulated Other Comprehensive Income (AOCI), in the common equity component of the AFUDC rate calculation. Specifically, KU recorded unrealized losses for its 20 percent ownership of Electric Energy, Inc.'s AOCI, which consisted of the unfunded portion of its pension and postretirement obligations. KU recorded Account 219 balances of ($2,854) and ($467,077) in 2010 and 2011, respectively. Accounting treatment for these unrealized losses was a debit to Account 219 and a credit to Account 123, Investment in Associated Companies (Major Only). Since these losses are unrealized and not used in determining KU's retained earnings, these amounts should not impact the amount of retained earnings used to calculate the AFUDC rate. Therefore, Account 219 should not be in the common equity component of the AFUDC calculation. However, it is appropriate for KU to include losses in determining the AFUDC rate once these amounts are realized, and enter retained earnings.

3. *Common Equity Balance* – KU input the wrong balance as the common equity component to its AFUDC calculation. For its 2010 AFUDC calculation, KU input the long-term debt amount of $1,648,779,405, instead of the common equity amount of $1,951,966,344, as found in the 2009 KU FERC Form No. 1 on line 16(c).

During the 2010 and 2011 years, KU accrued an aggregate amount of $1,545,366 in total AFUDC. Due to the above errors, this amount understated the correct actual amount, which was $1,550,647. The errors included overstatement effects of $290 and $305, due to the monthly compounding and inclusion of AOCI balance errors, respectively, offset by an understatement effect of $5,876 due to the common equity input error.

Recommendations

We recommend that:

29. KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

9. Formula Rate Line References

KU and LG&E's formula rate Attachment O included multiple inaccurate line references.

Pertinent Guidance

Attachment O (Transmission Formula Rate) of KU and LG&E's OATT required formula rate inputs derived from FERC Form No. 1 amounts.

Background

During our review, audit staff determined that KU and LG&E's formula rate Attachment O included multiple inaccurate line references. Specifically, audit staff identified these incorrect line references:

Formula Rate Component	Att. O Reference	FERC Form No. 1 Line Item
Gross Plant in Service - Production	206.46g	205.46g
Gross Plant in Service - Transmission	206.58g	207.58g
Gross Plant in Service - Distribution	206.75g	207.75g
Gross Plant in Service - General & Intangible	206.5g and 206.90g	205.5g and 207.99g
Accumulated Depreciation - General & Intangible	219.27c	219.28c and 200.21c
Land Held For Future Use	214xd	Must specify line number
Materials & Supplies	227.8c and 227.15c	227.8c and 227.16c
O&M - Transmission	321.100b	321.112
O&M - Account 565	321.88b	321.96b
Depreciation Expense - General	336.10f	336.1f and 336.10f
Payroll Taxes	263i	Must specify line number
Highway and Vehicle Taxes	263i	Must specify line number
Property Taxes	263i	Must specify line number
Gross Receipts Taxes	263i	Must specify line number
Other Taxes	263i	Must specify line number
Wages & Salaries - Production	354.18b	354.20b
Wages & Salaries - Transmission	354.19b	354.21b
Wages & Salaries - Distribution	354.20b	354.23b
Wages & Salaries - Other	354.21, 22, 23b	354.24, 25, 27b
Proprietary Capital	112.15d	112.16d
Long term debt	112.18c-21c	112.18c-23c
Preferred Stock	112.3d	112.3c
Sales for Resale	311xh	Must specify page/line/column

Also, audit staff determined that KU and LG&E can improve the transparency of their formula rate calculations by better presenting all manual adjustments and purchase accounting adjustments that impact balances reported within Attachment O.

Recommendations

We recommend that:

30. LG&E and KU should develop and implement controls to ensure accurate and complete line references.

31. LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

10. FERC Form No. 60 Reporting

FERC Form No. 60 filings that PPL Services and LKS made contained several reporting errors relating to account misclassifications, supporting schedule discrepancies, and the reporting of convenience payments.

Pertinent Guidance

In 2006, centralized service companies became subject to the requirements of PUHCA 2005, which are incorporated into the Commission regulations in 18 C.F.R. pts. 366-369. The FERC Form No. 60 has specific reporting instructions for preparation of individual schedules and pages of the report. Regulations applicable to FERC Form No. 60 reporting by centralized service companies are:

18 C.F.R. section 366.23(a)(1), FERC Form No. 60, annual reports of centralized service companies, states, in part, "Every report must be submitted on the FERC Form No. 60 then in effect and must be prepared in accordance with the instructions incorporated into that form."

18 C.F.R. section 369(2)(ii), FERC Form No. 60, annual report of centralized service company, states in part, "The annual report in effect must be filed with the Commission as prescribed in Section 385.2011 of this chapter and as indicated in the General Instructions set out in the form, and must be properly completed and verified."

Background

Audit staff analyzed the FERC Form No. 60 filings made by PPL's two service companies – PPL Services and LKS. This analysis identified these reporting errors:

<u>900 Series Account Misclassifications</u>

PPL Services misclassified amounts reported on its 2010 FERC Form No. 60 for Accounts 920, Administrative and General Salaries, 921, Office Supplies and Expenses, and 923, Outside Services Employed. Specifically, PPL Services over-reported Account 920 by approximately $7 million, over-reported Account 921 by approximately $5 million, and under-reported Account 923 by approximately $12 million.

<u>Accounts 457.1, Regional Transmission Service Revenues, and 457.2, Miscellaneous Revenues, Reporting</u>

In its 2010 FERC Form No. 60, which reported only November and December 2010, PPL Services reported total billings of $67,368,843 on Schedule XVII – Analysis of Billing-Associate Companies. PPL Services then provided supporting documentation for total billings for November and December 2010 that totaled $68,300,671. This resulted in a variance of $931,828.

LKS identified adjustments in February 2010 for $138,642.20 and September 2010 for $1,426,588.45 in Account 457.1. For both months, both revenue and expenses were understated.

These errors occurred for various reasons, including administrative oversight, limited review procedures, and the absence of appropriate verification procedures.

<u>Convenience Payments</u>

Service companies report convenience payments on Schedule V of its FERC Form No. 60. Specifically, instruction 2 of Schedule V states:

> *If the service company has provided accommodation or convenience payments for associate companies, provide in a separate footnote a listing of total payments for each associate company.*

Audit staff reviewed convenience payment data from LKS. During this review, audit staff learned that some convenience payments, amounting to $252,448, were reflected on the 2010 income statement. These payments were recorded in Account 923, and were identified as having convenience payment expenditure types in error. Also, additional expenses, amounting to $1,570, were reflected as 2010 convenience payments and should not have been. Convenience payments should be charged only to balance sheet accounts and not income statement accounts. Therefore, these amounts were recorded in error. These errors caused no financial impact as they were included in both revenue and expense on the service company's income statement.

These errors were due to human error involving misclassification and improper recording of expenses. To address them, LKS developed and implemented a procedure to determine if convenience payments had been modified to use a more detailed review of transactions to be disclosed.

Recommendations

We recommend that:

32. LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

33. LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

V. Other Matters

Formula Rate Recovery of Intangible Plant

KU and LG&E's formula rate under Attachment O of its joint OATT included templates for calculating rate base and cost-of-service components used to determine transmission formula rate billings. As relevant here, the Attachment O formula rate included a FERC Form No. 1 line reference for gross intangible plant in service. However, the Attachment O formula rate did not include a FERC Form No. 1 line reference for accumulated amortization related to intangible plant. Also, the Attachment O formula rate did not include a FERC Form No. 1 line reference for amortization expense of intangible plant. When KU and LG&E withdrew from MISO and began recovering their transmission revenue requirement under their joint OATT in March 2006, they adopted a formula rate that is substantially the same formula rate template in Attachment O to the MISO OATT, and carried over the same omissions related to intangible plant.

In October 2011, MISO and its transmission owners filed revisions to portions of the Attachment O formula rate, under FPA section 205**,** to clarify inclusion of intangible plant in the calculation of Attachment O revenue requirements under Docket No. ER12-297-000. The filing parties proposed to clarify the inclusion of intangible plant by adding the appropriate FERC Form No. 1 reference to intangible plant for the line item that contains accumulated depreciation on general and intangible plant. The filing parties also proposed to add the language "and Amortization" to the column heading for "Depreciation Expense" and add the language "and Intangible" to the line item for "General" depreciation and amortization expense. Finally, the filing parties proposed to add the appropriate FERC Form No. 1 reference for amortization expense of intangible plant. On December 21, 2011, the Commission accepted MISO's submittal for filing.

During audit fieldwork, audit staff pointed out that KU and LG&E's formula rate under its joint OATT continues to have omissions related to intangible plant that were identified and corrected in Docket No. ER12-297-000. Since KU and LG&E now recover their cost of service based on a formula rate substantially the same as the MISO formula rate, they should have made a filing with the Commission under FPA section 205, similar to what MISO and its transmission owners did in ER12-297-000, to address the proper recovery of intangible plant.

Specifically, in calculating the revenue requirement for the transmission formula rate, KU and LG&E included intangible plant assets recorded in Accounts 301, Organization, 302, Franchise and Consents, and 303, Miscellaneous Intangible Plant, as components of its rate base. However, KU and LG&E did not reduce any of these amounts by any related corresponding amortization recorded in Account 111, Accumulated Provision for Amortization of Electric Plant.

Recommendation

We recommend that:

LG&E and KU submit a filing with the Commission under FPA section 205 to adopt the revisions for intangible plant MISO proposed in Docket No. ER12-297-000 and incorporate them into KU and LG&E's formula rate template under their joint OATT.

Re: PPL Corporation, Docket No. FA12-12-000
Comments on Draft Audit Report

Dear Mr. Craig:

PPL Corporation ("PPL") appreciates this opportunity to comment on the September 11, 2014 Draft Audit Report provided to PPL by the Division of Audits and Accounting of the Office of Enforcement of the Federal Energy Regulatory Commission ("DAA") relating to an audit conducted in the above-referenced docket (the "Draft Audit Report"). PPL agrees with the findings and accepts the recommendations contained in the Draft Audit Report.

In many cases, PPL already has completed implementation or begun implementation of corrective measures related to the audit findings. Attachment A to this letter explains the corrective actions taken or planned, and provides actual or target completion dates for these actions.

PPL wishes to thank DAA personnel involved in the audit for their professionalism and courtesy.

Sincerely,

Vincent Sorgi

Attachment

Attachment A

I. Draft Audit Report Section IV. Findings and Recommendation

1. ***Long-Term Investment in Subsidiary***

Recommendation 1 - PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

Corrective Action: On May 15, 2014, PPL Electric filed its 2014 Annual Update with the Federal Energy Regulatory Commission ("Commission") in Docket No. ER09-1148 pursuant to the Formula Rate Implementation Protocols of its Open Access Transmission Tariff. The Commission publicly posted the filing on its eLibrary system the same day. Therein, PPL Electric explained that it changed its method of accounting for the activities of its subsidiary PPL Receivables Corporation from the consolidated method of accounting to the equity method of accounting in accordance with the Commission's regulations and that the changes affected PPL Electric's 2009 through 2013 Rate Years, given that the formula rate was first implemented on November 1, 2008. PPL Electric served the 2014 Annual Update on all parties to the docket on May 15, 2014, and provided a copy to its Regional Transmission Organization, PJM Interconnection, L.L.C. ("PJM") for posting on the PJM website. This action is completed.

Recommendation 2 - PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

Corrective Action 1: By November 30, 2014, PPL Electric will finalize its policy related to the differences in FERC and Securities and Exchange Commission ("SEC") reporting. Included in this policy will be a discussion of the accounting for investments in subsidiaries using the equity method of accounting and recording those investments in Account 123.1, Investment in Subsidiary Companies, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

Corrective Action 2: In December 2013, PPL Electric implemented a new methodology that involves reviewing and cataloging electric industry-wide FERC Audit Report findings to ensure that PPL Electric appropriately reflects the accounting for similar transactions identified in such audit findings. The associated database is updated quarterly.

Corrective Action 3: On November 8, 2013, PPL Corporation modified its Journal Entry policy and procedures to specifically state that the impact on rate making mechanisms be considered for all journal entries affecting the domestic regulated utilities within the PPL family of companies.

Corrective Action 4: PPL Electric, together with PPL Services, will establish enhanced senior management-level procedures for on-going communication and oversight of company analysis and implementation of FERC developments related to accounting procedures and transmission formula rate calculations. This is expected to be completed within 90 days of the issuance of a final audit report.

Recommendation 3 - PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.

Corrective Action 1: By November 30, 2014, PPL Electric will finalize its policy related to the differences in FERC and SEC reporting. Included in this policy will be a discussion of the accounting for investments in subsidiaries using the equity method of accounting and recording those investments in Account 123.1, Investment in Subsidiary Companies, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

Corrective Action 2: PPL Electric has modified its reporting of PPL Receivables in FERC Form 1 to use the equity method of accounting. PPL Electric utilizes the FERC Form 1 as the basis for its formula rate inputs. By reporting PPL Receivables using the equity method, PPL Electric will no longer include PPL Receivables' operating activities in the formula rate calculation.

Recommendation 4 - PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the costs to properly account for PPL Receivables Corporation using the equity versus consolidated method of accounting recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

Recommendation 5 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

2. ***Tax Overpayments***

Recommendation 6 - PPL Electric should reclassify federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account 146, Accounts Receivable from Associated Companies or Account 143, Other Accounts Receivable, as appropriate.

Corrective Action: PPL Electric reclassified federal and state income tax overpayments to the appropriate receivable accounts for the 2011 and 2012 balance sheets and for supporting pages of the 2012 FERC Form I Restatement filed on October 29, 2013. PPL Electric also reclassified federal and state income tax overpayments to the appropriate receivable accounts for rate years 2009-2013 and refunded the reduction in the revenue requirement, with interest, that resulted from including overpayments as receivables rather than prepayments as explained in the 2014 Annual Update filed with the Commission in May 15, 2014.

Recommendation 7 - PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

Corrective Action: PPL Electric will submit correcting entries to DAA within 30 days of the date of the issuance of the final audit report.

Recommendation 8 - PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

Corrective Action 1: PPL Electric revised procedural documentation to explain the accounting of federal and state income tax overpayments on November 25, 2013. PPL Electric also implemented an automated process that will no longer reclassify federal and state income tax overpayments to Account 165, which began with the December 31, 2013 accounting close.

Corrective Action 2: In addition, as this is an area where FERC accounting differs from SEC accounting, the policy relating to differences in FERC and SEC reporting that is referenced in Corrective Action 1 of Recommendation 2 will make reference to this issue. That policy will be completed by November 30, 2014.

Recommendation 9 - PPL Electric should revise procedures to appropriately determine its tax accrual amount.

Corrective Action: PPL Electric has revised its procedures to properly reclassify income tax overpayments, determined through its accrual and payment process, recorded in Account 236 to either Account 143 or Account 146. See corrective action to Recommendation 8.

Recommendation 10 - PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

Corrective Action: PPL Electric has completed this as part of the corrective actions discussed in response to Recommendation 6 above.

Recommendation 11 - For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the costs incorrectly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

Recommendation 12 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

3. *Manufactured Gas Plant Obligations*

Recommendation 13 - PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.

68660035v5

Corrective Action: As referenced in Corrective Action 1 of Recommendation 2, PPL Electric will finalize its policy related to the differences in FERC and SEC reporting by November 30, 2014. Included in this policy is a discussion of the recording of manufactured gas site remediation expenses to Account 426.5, Other Deductions, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

Recommendation 14 - PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

Corrective Action: PPL Electric provided notice of its accounting change relating to Manufactured Gas Plant costs in its 2014 Annual Update filed with the Commission on May 15, 2014 and will refrain on an ongoing basis from including these costs in its formula rate determinations based on the Division of Audits and Accounting's view that such costs were not incurred in providing service to wholesale transmission customers.

Recommendation 15 - PPL Electric should determine the amount of manufactured gas plant remediation expenses recovered through its formula rate.

Corrective Action: In September 2014, PPL Electric provided to DAA as Attachment 19 the amount of MGP environmental remediation expenses recovered through PPL Electric's transmission formula rate.

Recommendation 16 - For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the manufactured gas plant remediation expenses improperly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

Recommendation 17 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

4. *Asset Retirement Obligation*

Recommendation 18 - LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing relating to the recovery of asset retirement obligations within 90 days of the issuance of a final audit report.

Recommendation 19 - LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including ARO costs, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations, including ARO costs, (through a then-current date) within 60 days following issuance of a final audit report. Thereafter, LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing rate impacts for any final or remaining period of ARO cost recovery within 60 days following effectiveness of new rates pursuant to the FPA section 205 proceeding.

Recommendation 20 - For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under § 35.19a of the Commission's regulations.

Corrective Action: LG&E and KU will refund or credit to ratepayers amounts inappropriately recovered through the transmission formula rate during such period due to recovering asset retirement obligation costs with interest, and anticipate that they will do so within 30 days of each applicable final Commission order accepting the respective refund reports filed in response to Recommendation 19.

5. *Virginia Distribution Utility Plant Costs*

Recommendation 21 - LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (with interest through June 2014) regarding the consolidated anticipated audit findings, including Virginia distribution plant costs, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations, including Virginia distribution plant costs, (through a then-current date) within 60 days following issuance of a final audit report.

Recommendation 22 - For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under § 35.19a of the Commission's regulations.

Corrective Action: In connection with LG&E and KU's 2012 Annual Update for rates effective in the 2012 rate year which began on June 1, 2013 and ended on May 31, 2014, LG&E and KU corrected the inputs for Virginia plant so that costs associated with Virginia distribution utility plant no longer would flow through the formula rate. LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate during such period associated with Virginia plant distribution costs with interest and anticipate that they will do so within 30 days of each applicable final Commission order accepting the refund report filed in response to Recommendation 21.

6. *Accounting for Cost of Removal*

Recommendation 23 - LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

Corrective Action: As part of the August 2013 accounting close, LG&E and KU corrected their accounting entries for cost of removal. Effective with

LG&E and KU's 2013 Annual Update for rates effective in the 2013 rate year which began on June 1, 2014 and ends on May 31, 2015, LG&E and KU's formula rate no longer included rate impacts from such cost of removal accounting. LG&E and KU will file such correcting entries showing the reversal of amounts from Account 254 within 30 days of the issuance of the final audit report.

Recommendation 24 - For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

Corrective Action: LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate during such period due to cost of removal with interest and anticipate that they will do so within 30 days of each applicable final Commission order accepting the refund report filed in response to Recommendation 25.

Recommendation 25 - LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including cost of removal, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations including cost of removal (through a then-current date) within 60 days following issuance of a final audit report.

7. ***Merger Costs***

Recommendation 26 - PPL Electric, LG&E and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

Corrective Action 1: PPL Corporation made organizational changes in 2011 to create PPL Strategic Development, LLC for the Strategic Development group, the group that coordinates merger and acquisition ("M&A") activities and bears the costs of these activities. This organizational change has made it easier to direct M&A charges to the proper business unit and thereby exclude them from the regulated entities.

Corrective Action 2: PPL Services has improved communications among the Strategic Development group, Office of General Counsel, the Financial

Department and other appropriate groups within PPL Corporation in an effort to establish proper accounting for M&A projects at the onset of such projects by:

a) Reviewing the FERC audit with budget coordinators and reemphasizing the need for stronger controls and accurate accounting for costs associated with Strategic Development acquisition and divesture activities. (completed December 2012).
b) Drafting and reviewing with budget coordinators the proposed Accounting Policy and Procedures for Costs Associated with Acquisitions and Divestures. (completed April 2014).
c) Issuing an email communication to budget coordinators instructing them how to charge transaction and transition costs related to the spinoff of PPL Corporation Supply Segment. (completed June 2014).
d) Conducting meetings with key individuals for the purpose of discussing and reviewing issues related to proper charging of PPL Corporation Supply Segment spinoff costs. (completed July and August, 2014).
e) Issuing the Accounting Policy and Procedures for Costs Associated with Acquisitions and Divestures and communicating said issuance to all budget coordinators. (completed August 2014).
f) Developing and issuing a message to all PPL Corporation supervisors to emphasize the importance of properly capturing all costs related to the spinoff of PPL Corporation Supply Segment. (completed September 2014).

Corrective Action 3: As of August 2014, PPL Services' Financial and Accounting Departments developed an accounting policy/procedure related to M&A activities and included it with other accounting policies and procedures on the Controller's Department Accounting Policies and Procedures intranet web site.

Corrective Action 4: PPL Services will include a summary of the M&A accounting policy in the Cost Allocation Manual during the next update by December 31, 2014.

Corrective Action 5: Commencing with LG&E and KU's 2013 Annual Update for rates effective in the 2013 rate year which began on June 1, 2014 and ends on May 31, 2015, LG&E and KU no longer included rate impacts from such transaction-related costs.

Corrective Action 6: During September 2013, LG&E and KU modified their Regulatory Compliance accounting policy to provide additional guidance on merger costs. Examples of merger transaction and transition costs were included in this accounting policy.

Corrective Action 7: During September 2013, LG&E and KU updated its "Merger Transaction and Transition Cost" accounting treatment guidance on the Company's intranet site with information regarding how merger transaction and transition costs are to be handled.

Recommendation 27 - PPL Electric, LG&E and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

Corrective Action 1: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including transaction-related costs, and certain rate under-billings to DAA. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations regarding transaction-related costs (through a then-current date) within 60 days following issuance of a final audit report.

Corrective Action 2: In September 2014, PPL Electric provided DAA with Attachment 1 that identifies the rate impact of recovering transaction-related costs through PPL Electric's transmission formula rate.

Recommendation 28 - PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under § 35.19a of the Commission's regulations for LG&E and KU.

Corrective Action 1: LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate due to such transaction-related costs, with interest, and anticipate that they will do so within 30 days of each applicable final Commission order accepting the respective refund report filed in response to Recommendation 27.

Corrective Action 2: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the transaction-related costs improperly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

8. ***Allowance for Funds Used During Construction***

Recommendation 29 - KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

Corrective Action 1: Beginning with the February 2012 accounting close, KU modified its PowerPlant fixed asset accounting system to properly account for AFUDC. The PowerPlant automated AFUDC calculation was updated to compound interest semiannually rather than monthly.

Corrective Action 2:
During August 2012, KU finalized modifications to its AFUDC accounting policy and procedures to record AFUDC in accordance with Electric Plant Instruction 3(17) and Federal Power Commission Order 561.

9. ***Formula Rate Line References***

Recommendation 30 - LG&E and KU should develop and implement controls to ensure accurate and complete line references.

Corrective Action: During 2012 and 2013, LG&E and KU developed and implemented, enhanced controls and procedures for the transmission formula rate template to ensure appropriate references going forward, similar to Sarbanes-Oxley–level controls. LG&E and KU strengthened spreadsheet controls on the formula rate template, such as password protection, increased automation and protection for calculations, clearly labeled input data entry, and increased internal cross-check features. LG&E and KU implemented written process documentation and a narrative for the controls describing the specific procedures and responsibilities for calculating and reviewing the transmission formula rate relating to calculation performed by its Rates Department, reviews performed by its Rates, Accounting, and Transmission Departments and sign-off at the senior management level prior to posting.

Recommendation 31 - LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing(s) relating to incorrect formula rate line references within 90 days of the issuance of a final audit report.

10. FERC Form No. 60 Reporting

Recommendation 32 - LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

Corrective Action 1: In March 2012, during preparation for the 2012 Form 60 filing, LG&E and KU developed a query within its Oracle financial system to better identify and capture LKS intercompany transactions that should be distinguished as convenience payments. Further enhancements were made to this query throughout 2013 to improve the efficiency of the query and to reduce manual adjustments to identify the convenience payments. In January and February 2013 LG&E and KU set up additional expenditure types within Oracle to also aid in identifying convenience payments.

Corrective Action 2: In November 2012, LG&E and KU developed a document to further educate employees on the identification of convenience payments. This document, along with a decision tree, has been shared with all employees via their intranet site.

Corrective Action 3: PPL Services implemented an automated process in 2012, using delivered allocation functionality in its general ledger software. The automated process performs the reclassification among Accounts 920, 921 and 923 based on cost type. The automated process mirrors the manual reclassification journal entries reflected in the 2011 FERC Form 60. As an additional control for PPL Services, beginning in 2012, the cost types in accounts 920, 921, and 923 are reviewed on a monthly basis to ensure that amounts are appropriately classified in these accounts.

Corrective Action 4: PPL Services developed written procedures for the preparation of Form 60. Prior to the filing of the 2013 Form 60 which occurred on April 30, 2014, Corporate Audit Services reviewed the process for preparing PPL Services' Form 60, the procedures used to allocate cost in the 2013 Form 60, and the completeness and accuracy of the 2013 Form 60. Management has requested Corporate Audit Services to include a review of the Form 60 in its audit plan.

Recommendation 33 - LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

Corrective Action 1: LKS will refile the 2010 FERC Form No. 60 within 90 days of the date the final audit report is issued.

Corrective Action 2: PPL Services will refile the 2010 FERC Form No. 60 within 90 days of the date the final audit report is issued.

II. **Draft Audit Report Section V. Other Matters**

Formula Rate Recovery of Intangible Plant

Recommendation - LG&E and KU submit a filing with the Commission under FPA section 205 to adopt the revisions for intangible plant MISO proposed in Docket No. ER12-297-000 and incorporate them into KU and LG&E's formula rate template under their joint OATT.

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing(s) adopting revisions for intangible plant as proposed by MISO and incorporating those changes into the formula rate template under their joint OATT within 90 days of the issuance of a final audit report.

NEW ISSUE

Subject to the conditions and exceptions set forth under the heading "Tax Treatment," Bond Counsel is of the opinion that, under current law, interest on the Bonds offered hereby will be excludable from the gross income of the recipients thereof for federal income tax purposes, except that no opinion will be expressed regarding such exclusion from gross income with respect to any Bond during any period in which it is held by a "substantial user" or a "related person" of the Project as such terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "Code"). Interest on the Bonds will be an item of tax preference in determining alternative minimum taxable income for individuals and corporations under the Code. Such interest may be subject to certain federal income taxes imposed on certain corporations, including imposition of the branch profits tax on a portion of such interest. Bond Counsel is further of the opinion that interest on the Bonds will be excludable from the gross income of the recipients thereof for Kentucky income tax purposes and that, under current law, the principal of the Bonds will be exempt from ad valorem taxes in Kentucky. Issuance of the Bonds is subject to receipt of a favorable tax opinion of Bond Counsel as of the date of delivery of the Bonds. See "Tax Treatment" herein.

$125,000,000
County of Trimble, Kentucky
Pollution Control Revenue Refunding Bonds, 2016 Series A, Due September 1, 2044 (Louisville Gas and Electric Company Project)

Dated: Date of Original Issuance

The County of Trimble, Kentucky, Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project) (the "Bonds") will be special and limited obligations of the County of Trimble, Kentucky (the "Issuer"), payable by the Issuer solely from and secured by payments to be received by the Issuer pursuant to a Loan Agreement with Louisville Gas and Electric Company (the "Company"), except as payable from proceeds of such Bonds or investment earnings thereon. The Bonds will not constitute general obligations of the Issuer or a charge against the general credit or taxing powers thereof or of the Commonwealth of Kentucky or any other political subdivision of Kentucky.

Principal of, and interest on, the Bonds are further secured by the delivery to U.S. Bank National Association, as Trustee, of First Mortgage Bonds of

LOUISVILLE GAS AND ELECTRIC COMPANY

From and after the date of the issuance and delivery of the Bonds, the Bonds will bear interest at a Weekly Rate, determined by the Remarketing Agent, J.P. Morgan Securities LLC, in accordance with the Indenture, payable on the first Business Day of each calendar month. The interest rate period, interest rate and interest rate mode will be subject to change under certain conditions, as described in this Official Statement. The Bonds will be subject to optional redemption, extraordinary optional redemption and mandatory redemption following a determination of taxability prior to maturity, as described in this Official Statement. The Bonds are subject to optional purchase on the demand of the owner and to mandatory purchase on any date on which the Bonds are converted to a different Interest Rate Mode, in each case as described in this Official Statement.

PRICE: 100%

The Bonds, when issued, will be registered in the name of Cede & Co., as registered owner and nominee for The Depository Trust Company ("DTC"), New York, New York. DTC will act as securities depository. Purchases of beneficial ownership interests in the Bonds will be made in book-entry only form in denominations of $100,000 and multiples thereof. Purchasers will not receive certificates representing their beneficial interests in the Bonds. See the information contained under the heading "Summary of the Bonds — Book-Entry-Only System" in this Official Statement. The principal or redemption price of and interest on the Bonds will be paid by U.S. Bank National Association, as Trustee, to Cede & Co., as long as Cede & Co. is the registered owner of the Bonds. Disbursement of such payments to the DTC Participants is the responsibility of DTC, and disbursement of such payments to the purchasers of beneficial ownership interests is the responsibility of DTC's Direct and Indirect Participants, as more fully described herein.

Liquidity to pay the purchase price of the Bonds that are tendered and not remarketed will be provided by the Company. It is not anticipated that a liquidity or credit facility will be provided by any other party. Prospective purchasers of the Bonds should rely solely on the ability of the Company to provide for the purchase of the Bonds that are tendered and not remarketed. The failure of the Company to pay the purchase price of any Bond tendered by the holder thereof and not remarketed is an Event of Default under the Indenture.

The Bonds are offered when, as and if issued and received by the Underwriter, subject to prior sale, withdrawal or modification of the offer without notice, and to the approval of legality by Stoll Keenon Ogden PLLC, Louisville, Kentucky, as Bond Counsel and upon satisfaction of certain conditions. Certain legal matters will be passed upon for the Company by its counsel, Jones Day, Chicago, Illinois and Gerald A. Reynolds, General Counsel, Chief Compliance Officer and Corporate Secretary of the Company, for the Issuer by its County Attorney, and for the Underwriter by its counsel, McGuireWoods LLP, Chicago, Illinois. It is expected that the Bonds will be available for delivery to DTC in New York, New York on or about September 15, 2016.

J.P. Morgan

September 7, 2016

The Bonds are exempt from registration under the Securities Act of 1933, as amended.

No dealer, broker, salesman or other person has been authorized by the Issuer, the Company or the Underwriter to give any information or to make any representation with respect to the Bonds, other than those contained in this Official Statement, and, if given or made, such other information or representation must not be relied upon as having been authorized by any of the foregoing. The Underwriter has provided the following sentence for inclusion in this Official Statement. The Underwriter has reviewed the information in this Official Statement in accordance with, and as part of, its responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriter does not guarantee the completeness of such information. The information and expressions of opinion in this Official Statement are subject to change without notice and neither the delivery of this Official Statement nor any sale made hereunder shall, under any circumstances, create any implication that there has been no change in the affairs of the parties referred to above since the date hereof.

In connection with the offering of the Bonds, the Underwriter may over-allot or effect transactions which stabilize or maintain the market prices of such Bonds at levels above those which might otherwise prevail in the open market. Such stabilizing, if commenced, may be discontinued at any time.

IN MAKING AN INVESTMENT DECISION, INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE TERMS OF THE OFFERING, INCLUDING THE MERITS AND RISKS INVOLVED. THESE SECURITIES HAVE NOT BEEN RECOMMENDED BY ANY FEDERAL OR STATE SECURITIES COMMISSION OR REGULATORY AUTHORITY. FURTHERMORE, THE FOREGOING AUTHORITIES HAVE NOT CONFIRMED THE ACCURACY OR DETERMINED THE ADEQUACY OF THIS DOCUMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

TABLE OF CONTENTS

OFFICIAL STATEMENT

$125,000,000
County of Trimble, Kentucky
Pollution Control Revenue Refunding Bonds,
2016 Series A, Due September 1, 2044
(Louisville Gas and Electric
Company Project)

Introductory Statement

This Official Statement, including the cover page and Appendices, is provided to furnish information in connection with the offer and sale by the County of Trimble, Kentucky (the "Issuer") of its Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project), in the aggregate principal amount of $125,000,000 (the "Bonds") to be issued pursuant to an Indenture of Trust dated as of September 1, 2016 (the "Indenture") between the Issuer and U.S. Bank National Association (the "Trustee"), as Trustee, Paying Agent and Bond Registrar.

Pursuant to a Loan Agreement by and between Louisville Gas and Electric Company (the "Company") and the Issuer, dated as of September 1, 2016, (the "Loan Agreement"), proceeds from the sale of the Bonds, other than accrued interest, if any, paid by the initial purchasers thereof, will be loaned by the Issuer to the Company.

The proceeds of the Bonds (other than any accrued interest) will be applied in full, together with other moneys made available by the Company, to pay and discharge (i) $83,335,000 in outstanding principal amount of "County of Trimble, Kentucky, Pollution Control Revenue Bonds, 2000 Series A (Louisville Gas and Electric Company Project)," dated August 9, 2000 (the "2000 Bonds") and (ii) $41,665,000 in outstanding principal amount of "County of Trimble, Kentucky, Pollution Control Revenue Bonds, 2002 Series A (Louisville Gas and Electric Company Project)," dated October 23, 2002 (the "2002 Bonds" and, collectively with the 2000 Bonds, the "Prior Bonds"), previously issued by the Issuer to refinance certain pollution control facilities (the "Project") owned by the Company. For information regarding the pollution control facilities, see "The Project."

It is a condition to the Underwriter's obligation to purchase the Bonds that the Company irrevocably instruct the trustees in respect of the Prior Bonds, on or prior to the date of issuance of the Bonds, to call the Prior Bonds for redemption.

The Company will repay the loan under the Loan Agreement by making payments to the Trustee in sufficient amounts to pay the principal or redemption price of and interest on the Bonds and will further agree under the Loan Agreement to make payments of the purchase price of the Bonds tendered for purchase to the extent funds are not otherwise available under the Indenture. See "Summary of the Loan Agreement — General." Pursuant to the Indenture, the Issuer's rights under the Loan Agreement (other than with respect to certain rights to indemnification, reimbursement, notice and payment of expenses) will be assigned to the Trustee as security for the Bonds.

For the purpose of further securing the Bonds, the Company will issue and deliver to the Trustee a series of the Company's First Mortgage Bonds, Collateral Series 2016TCA (the "First Mortgage Bonds"). The principal amount, maturity date and interest rate (or method of determining interest rates) of such First Mortgage Bonds will correspond to the principal amount, maturity date and interest rate (or method of determining interest rates) of the Bonds. The First Mortgage Bonds will only be payable, and interest thereon will only accrue, as described herein. See "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds" and "Summary of the First Mortgage Bonds and the First Mortgage Indenture." The First Mortgage Bonds will not provide a direct source of liquidity to pay the purchase price of Bonds tendered for purchase in accordance with the Indenture.

The First Mortgage Bonds will be issued under, and will be secured by, the Company's Indenture, dated as of October 1, 2010, as previously supplemented and as to be supplemented by a supplemental indenture to be dated as of September 1, 2016 relating to the Bonds (the "First Mortgage Supplemental Indenture" and the Indenture, as so supplemented, the "First Mortgage Indenture"), between the Company and The Bank of New York Mellon, as trustee (the "First Mortgage Trustee").

The Company is a wholly-owned subsidiary of LG&E and KU Energy LLC and an indirect wholly-owned subsidiary of PPL Corporation. The Company's obligations under the Loan Agreement are solely its own, and not those of any of its affiliates. None of PPL Corporation or the Company's other affiliates will be obligated to make any payments due under the Loan Agreement or First Mortgage Bonds or any other payments of principal, interest, redemption price or purchase price of the Bonds.

The Bonds will be special and limited obligations of the Issuer, and the Issuer's obligation to pay the principal or redemption price of and interest on, and purchase price of, the Bonds will be limited solely to the revenues and other amounts received by the Trustee under the Indenture pursuant to the Loan Agreement, including amounts payable on the First Mortgage Bonds. The Bonds will not constitute an indebtedness, general obligation or pledge of the faith and credit or taxing power of the Issuer, the Commonwealth of Kentucky or any political subdivision thereof.

J.P. Morgan Securities LLC will be appointed in accordance with the Indenture to serve as Remarketing Agent for the Bonds. The Remarketing Agent may resign or be removed and a successor Remarketing Agent may be appointed in accordance with the terms of the Indenture and the Remarketing Agreement for the Bonds between the Remarketing Agent and the Company.

Brief descriptions of the Company, the Issuer, the Bonds, the Loan Agreement, the Indenture, the First Mortgage Bonds and the First Mortgage Indenture are included in this Official Statement. Such descriptions and information do not purport to be complete, comprehensive or definitive and are not to be construed as a representation or a guaranty of completeness. All references in this Official Statement to the documents are qualified in their entirety by reference to such documents, and references in this Official Statement to the Bonds are qualified in their entirety by reference to the definitive form of the Bonds included in the Indenture. Copies of the Loan Agreement and the Indenture will be available for inspection at the principal corporate trust office of the Trustee and, until the issuance of the Bonds, may be obtained from the Underwriter. The First Mortgage Indenture (including the form of the First Mortgage Bonds) is available for inspection at the office of the Company in Louisville, Kentucky, and at the corporate trust office of the First Mortgage Trustee, in Pittsburgh, Pennsylvania. Certain information relating to The Depository Trust Company ("DTC") and the book-entry-only system has been furnished by DTC. Appendix A to this Official Statement and all information contained under the headings "The Project" and "Use of Proceeds" has been furnished by the Company. The Issuer, Bond Counsel and the Remarketing Agent assume no responsibility for the accuracy or completeness of such Appendix A or such information. The Underwriter has reviewed the information in Appendix A to this Official Statement in accordance with, and as part of, its responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriter does not guarantee the completeness of such Appendix A or such information. Appendix B to this Official Statement contains the proposed form of opinion of Bond Counsel to be delivered in connection with the issuance and delivery of the Bonds.

This Official Statement only describes the terms and provisions applicable to the Bonds while accruing interest at the Weekly Rate. In the event of a remarketing of the Bonds on or after a Conversion, a supplement to this Official Statement or a new reoffering circular will be prepared describing the new terms and provisions then applicable to such Bonds.

The Issuer

The Issuer is a public body corporate and politic duly created and existing as a county and political subdivision under the Constitution and laws of the Commonwealth of Kentucky. The Issuer is authorized by Sections 103.200 to 103.285, inclusive, of the Kentucky Revised Statutes (collectively, the "Act") to (a) issue the Bonds to pay and discharge the Prior Bonds, (b) lend the proceeds from the sale of the Bonds to the Company for such purpose and (c) enter into and perform its obligations under the Loan Agreement and the Indenture. The Issuer, through its legislative body, the Fiscal Court, has adopted one or more ordinances authorizing the issuance of the Bonds and the execution and delivery of the related documents.

THE BONDS WILL BE SPECIAL AND LIMITED OBLIGATIONS PAYABLE SOLELY AND ONLY FROM CERTAIN SOURCES, INCLUDING AMOUNTS TO BE RECEIVED BY OR ON BEHALF OF THE ISSUER UNDER THE LOAN AGREEMENT, INCLUDING AMOUNTS PAYABLE ON THE FIRST MORTGAGE BONDS. THE BONDS WILL NOT CONSTITUTE AN INDEBTEDNESS, GENERAL OBLIGATION OR PLEDGE OF THE FAITH AND CREDIT OR TAXING POWER OF THE ISSUER, THE COMMONWEALTH OF KENTUCKY OR ANY POLITICAL SUBDIVISION THEREOF, AND WILL NOT GIVE RISE TO A PECUNIARY LIABILITY OF THE ISSUER OR A CHARGE AGAINST ITS GENERAL CREDIT OR TAXING POWERS.

The Project

The Project being refinanced with the Bonds has been completed and is the property of the Company, subject to the lien of the First Mortgage Indenture. The Project consists of certain air and water pollution control facilities of the Company at the Company's Trimble County Generating Station located in Trimble County, Kentucky (the "Generating Station"), which facilities are an integral component of the comprehensive system of air and water pollution control and solid waste disposal facilities at the Generating Station (the "Project").

The Department for Natural Resources and Environmental Protection of the Commonwealth of Kentucky (now the Energy and Environment Cabinet), the agency exercising jurisdiction with respect to the Project, has certified that the Project, as designed (which includes the facilities constituting the Project), is in furtherance of the purposes of abating and controlling atmospheric and water pollutants or contaminants, as applicable.

Use of Proceeds

The proceeds from the sale of the Bonds (other than any accrued interest) will be used, together with funds to be provided by the Company, to pay and discharge at a redemption price of 100% of the principal amount thereof, plus accrued interest, all of the outstanding Prior Bonds, on the date of the issuance of the Bonds. The Prior Bonds currently bear interest at an auction rate and mature on August 1, 2030 and October 1, 2032. For the twelve months ended June 30, 2016, the weighted average interest rate on the Prior Bonds was 0.486%.

Summary of the Bonds

General

The Bonds will be issued in the aggregate principal amount set forth on the cover page of this Official Statement. The Bonds will mature as to principal on September 1, 2044. The Bonds are also subject to redemption prior to maturity as described in this Official Statement.

The Bonds will bear interest at a Weekly Rate, and interest will be payable on the first Business Day of each calendar month, until a Conversion to another Interest Rate Mode is specified by the Company or until the redemption or maturity of the Bonds. The permitted Interest Rate Modes for the Bonds are (i) the Flexible Rate, (ii) the Daily Rate, (iii) the Weekly Rate, (iv) the Semi-Annual Rate, (v) the Annual Rate, (vi) the Long Term Rate, (vii) the LIBOR Index Rate and (viii) the SIFMA-Based Term Rate.

This Official Statement only describes the terms and provisions applicable to the Bonds while accruing interest at the Weekly Rate. In the event of a remarketing of the Bonds on or after a Conversion to another Interest Rate Mode, a supplement to this Official Statement or a new reoffering circular will be prepared describing the new terms and provisions then applicable to such Bonds.

During each Weekly Rate Period, the interest rate for the Bonds will be the rate established by the Remarketing Agent no later than 4:00 p.m. (New York City time) on the day preceding such Weekly Rate Period or, if such day is not a Business Day, on the next preceding Business Day, as the minimum rate of interest necessary, in the judgment of the Remarketing Agent taking into account then Prevailing Market Conditions (as defined below), and assuming that all Bonds are then available for sale, to enable the Remarketing Agent to sell the Bonds on such first day at a price equal to the principal amount thereof, plus accrued interest, if any, thereon; provided that the interest rate or rates borne by any Bonds may not exceed the lesser of (i) the maximum interest rate permitted by applicable law or (ii) 12% per annum. If for any reason the interest rate for the Bonds is not determined by the Remarketing Agent, except as described below under "Conversion of Interest Rate Modes — Cancellation of Conversion of Interest Rate Mode," the interest rate for the next succeeding interest rate period will be the interest rate in effect for the Bonds for the preceding interest rate period.

Interest on the Bonds will be computed on the basis of a year of 365 or 366 days, as appropriate, and paid for the actual number of days elapsed. Interest payable on any Interest Payment Date will be payable to the registered owner of the Bond as of the Record Date for such payment. The Record Date will be the close of business on the Business Day immediately preceding each Interest Payment Date.

The Bonds initially will be issued solely in book-entry-only form through DTC (or its nominee, Cede & Co.). So long as the Bonds are held in the book-entry-only system, DTC or its nominee will be the registered owner or holder of the Bonds for all purposes of the Indenture, the Bonds and this Official Statement. See "Book-Entry-Only System" below. Individual purchases of book-entry interests in the Bonds will be made in book-entry-only form in denominations of $100,000 and multiples thereof.

So long as the Bonds are held in book-entry-only form, the principal or redemption price of and interest on, and purchase price of, the Bonds will be payable by the Trustee, as paying agent (the "Paying Agent"), through the facilities of DTC (or a successor depository).

Bonds may be transferred or exchanged for an equal total amount of Bonds of other authorized denominations upon surrender of such Bonds at the designated office of the Trustee, as bond registrar (the "Bond Registrar"), accompanied by a written instrument of transfer or authorization for exchange in form and with guaranty of signature satisfactory to the Bond Registrar, duly executed by the registered owner or the owner's duly authorized attorney. Except as provided in the Indenture, the Bond Registrar will not be required to register the transfer or exchange of any Bond (i) during the fifteen days before any mailing of a notice of redemption of Bonds, (ii) after such Bond has been called for redemption or (iii) for which a registered owner has submitted a demand for purchase (see "Purchases of Bonds — Purchases of Bonds on Demand of Owner" below), or which has been purchased (see "Purchases of Bonds — Payment of Purchase Price" below). Registration of transfers and exchanges will be made without charge to the registered owners of Bonds, except that the Bond Registrar may require any registered owner requesting registration of transfer or exchange to pay any required tax or governmental charge.

Certain Definitions

As used herein, each of the following terms will have the meaning indicated:

"*Beneficial Owner*" means the person in whose name a Bond is recorded as such by the respective systems of DTC and each Participant (as defined herein) or the registered holder of such Bond if such Bond is not then registered in the name of Cede & Co.

"*Business Day*" means any day other than (i) a Saturday or Sunday or legal holiday or a day on which banking institutions in the city in which the designated office of the Trustee, the Bond Registrar, the Tender Agent, the Paying Agent, the Company or the Remarketing Agent is located are authorized by law or executive order to close or (ii) a day on which the New York Stock Exchange is closed.

"*Conversion*" means any conversion from time to time in accordance with the terms of the Indenture of the Bonds from one Interest Rate Mode to another Interest Rate Mode.

"*Conversion Date*" means initially the date of original issuance of the Bonds, and thereafter means the date on which any Conversion becomes effective.

"*Interest Payment Date*" means the first Business Day of each calendar month and any Conversion Date (including the date of a failed Conversion). In any case, the final Interest Payment Date will be the maturity date of the Bonds.

"*Interest Rate Mode*" means the Flexible Rate, the Daily Rate, the Weekly Rate, the Semi-Annual Rate, the Annual Rate, the Long Term Rate, the LIBOR Index Rate and the SIFMA-Based Term Rate.

"*Prevailing Market Conditions*" means, without limitation, the following factors: existing short-term or long-term market rates for securities, the interest on which is excluded from gross income for federal income tax purposes; indexes of such short-term or long-term rates and the existing market supply and demand for securities bearing such short-term or long-term rates; existing yield curves for short-term or long-term securities for obligations of credit quality comparable to the Bonds, the interest on which is excluded from gross income for federal income tax purposes; general economic conditions; industry economic and financial conditions that may affect or be relevant to the Bonds; and such other facts, circumstances and conditions as the Remarketing Agent, in its sole discretion, determines to be relevant.

"*Purchase Date*" means any date on which Bonds are to be purchased on the demand of the registered owners thereof or are subject to mandatory purchase as described in the Indenture.

"*Weekly Rate Period*" means the period beginning on, and including, the date of issuance of the Bonds, and ending on, and including, the next Wednesday, and thereafter the period beginning on, and including, each Thursday and ending on, and including, the earliest of the next Wednesday, the day preceding the Conversion to a different Interest Rate Mode or the maturity of the Bonds.

Conversion of Interest Rate Modes

The Interest Rate Mode for the Bonds is subject to Conversion from time to time, in whole but not in part, on the dates specified below at the option of the Company, upon notice from the Bond Registrar to the registered owners of the Bonds, as described below. With any notice of Conversion, the Company must also deliver to the Bond Registrar an opinion of Bond Counsel stating that such Conversion is authorized or permitted by the Act and is authorized by the Indenture and will not adversely affect the exclusion from gross income of interest on the Bonds for federal income tax purposes, other than a Conversion from the Weekly Rate Period to the Daily Rate Period.

Any Conversion of the Interest Rate Mode for the Bonds must be in compliance with the following conditions: (i) the Conversion Date must be a date on which the Bonds are subject to optional redemption (see "Redemptions — Optional Redemption" below); provided that any Conversion from the Weekly Rate Period to the Daily Rate Period must be on a Thursday; (ii) if the proposed Conversion Date would not be an Interest Payment Date but for the Conversion, the Conversion Date must be a Business Day; and (iii) after a determination is made requiring mandatory redemption of all Bonds pursuant to the Indenture (see "Redemptions" below), no change in the Interest Rate Mode may be made prior to such mandatory redemption.

The Bond Registrar will notify each registered owner of the Conversion by first class mail at least 15 days before each Conversion Date. The notice will state those matters required to be set forth therein under the Indenture.

Notwithstanding the foregoing, no Conversion will occur if (A) the Remarketing Agent has not determined the initial interest rate for the new Interest Rate Mode in accordance with the terms of the Indenture, (B) the Bonds that are to be purchased are not remarketed or sold by the Remarketing Agent, or (C) the Bond Registrar receives written notice from Bond Counsel prior to the opening of business on the effective date of Conversion to the effect that the opinion of such Bond Counsel required under the Indenture has been rescinded. If such Conversion fails to occur, the Bonds will remain in the Weekly Rate (with the first period adjusted in length so that the last day of such period will be a Wednesday) at the rate determined by the Remarketing Agent on the failed Conversion Date. If the proposed Conversion of Bonds fails as described herein, any mandatory purchase of such Bonds will remain effective.

Purchases of Bonds

Purchases of Bonds on Demand of Owner. Any Bond will be purchased on the demand of the registered owner thereof on any Business Day during a Weekly Rate Period at a purchase price equal to the principal amount thereof plus accrued interest, if any, to the Purchase Date upon written notice to the Tender Agent at its designated office at or before 5:00 p.m. (New York City time) on a Business Day not later than the seventh day prior to the Purchase Date.

Notwithstanding the foregoing, there will be no purchase of (a) a portion of any Bond unless the portion to be purchased and the portion to be retained each will be in an authorized denomination or (b) any Bond upon the demand of the registered owner if an Event of Default under the Indenture with respect to the payment of principal of, interest on, or purchase price of, the Bonds has occurred and is continuing.

Any written notice delivered to the Tender Agent by an owner demanding the purchase of Bonds must (A) be delivered by the time and dates specified above, (B) state the number and principal amount (or portion thereof) of such Bond to be purchased, (C) state the Purchase Date on which such Bond is to be purchased, (D) irrevocably request such purchase and state that the owner agrees to deliver such Bond, duly endorsed in blank for transfer, with all signatures guaranteed, to the Tender Agent at or prior to 12:00 noon (New York City time) on such Purchase Date.

If the Bonds are in the book-entry-only system, demands for purchase may be made by Beneficial Owners only through such Beneficial Owner's Direct Participant (as defined under the heading "Book-Entry-Only System"). If the Bonds are in certificated form, demands for purchase may be made only by registered owners.

Mandatory Purchase of Bonds. The Bonds will be subject to mandatory purchase at a purchase price equal to the principal amount thereof on each Conversion Date. Such tender and purchase will be required even if the Conversion is canceled pursuant to the Indenture.

Notice to owners of a mandatory purchase of Bonds on a Conversion Date will be given by the Bond Registrar, together with the notice of such Conversion, by first class mail at least 15 days before each Conversion Date. The notice of mandatory purchase will state those matters required to be set forth therein under the Indenture.

Remarketing and Purchase of Bonds. The Indenture provides that, subject to the terms of a Remarketing Agreement with the Company, the Remarketing Agent will use its commercially reasonable best efforts to remarket Bonds purchased upon demand of the owners thereof and, unless otherwise instructed by the Company, upon mandatory purchase, provided that Bonds will not be remarketed upon the occurrence and continuance of certain Events of Default under the Indenture, except in the sole discretion of the Remarketing Agent. Each such sale will be at a price equal to the principal amount thereof, plus interest accrued to the date of sale. The Remarketing Agent, the Trustee, the Paying Agent, the Bond Registrar or the Tender Agent each may purchase any Bonds offered for sale for its own account.

The purchase price of Bonds tendered for purchase will be paid by the Tender Agent from moneys derived from the remarketing of such Bonds by the Remarketing Agent and, if such remarketing proceeds are insufficient, from moneys made available by the Company.

The Company is obligated to purchase any Bonds tendered for purchase to the extent such Bonds have not been remarketed. Any such purchases by the Company will not result in the extinguishment of the purchased Bonds. The Company currently maintains lines of credit or other liquidity facilities in amounts determined by it to be sufficient to meet its current needs and expects to continue to maintain such lines of credit or other liquidity facilities from time to time to the extent determined by it to be necessary to meet its then-current needs. The Trustee, any Paying Agent, the Tender Agent and the owners of the Bonds have no right to draw under any line of credit or other liquidity facility maintained by the Company. There is no provision in the Indenture or the Loan Agreement requiring the Company to maintain such financing arrangements which may be discontinued at any time without notice. The First Mortgage Bonds are not intended to provide a direct source of liquidity to pay the purchase price of Bonds tendered for purchase pursuant to the Indenture.

Any deficiency in purchase price payments resulting from the Remarketing Agent's failure to deliver remarketing proceeds of all Bonds with respect to which the Remarketing Agent notified the Tender Agent were remarketed will not result in an Event of Default under the Indenture until the opening of business on the next succeeding Business Day unless the Company fails to provide sufficient funds to pay such purchase price by the opening of business on such next succeeding Business Day. If sufficient funds are not available for the purchase of all tendered Bonds, no purchase of Bonds will be consummated, but failure to consummate such purchase will not be deemed to be an Event of Default under the Indenture if sufficient funds have been provided in a timely manner by the Company to the Tender Agent for such purpose.

Payment of Purchase Price. Payment of the purchase price of any Bond will be payable (and delivery of a replacement Bond in exchange for the portion of any Bond not purchased if such Bond is purchased in part will be made) on the Purchase Date upon delivery of such Bond to the Tender Agent on such Purchase Date; provided that such Bond must be delivered to the Tender Agent at or prior to 12:00 noon (New York City time). If the date of such purchase is not a Business Day, the purchase price will be payable on the next succeeding Business Day. When a book-entry-only system is in effect, the requirement for physical delivery of the Bonds will be deemed satisfied when the ownership rights in the Bonds are transferred by Direct Participants on the records of DTC to the participant account of the Tender Agent.

Any Bond delivered for payment of the purchase price must be accompanied by an instrument of transfer thereof in form satisfactory to the Tender Agent executed in blank by the registered owner thereof and with all signatures guaranteed. The Tender Agent may refuse to accept delivery of any Bond for which an instrument of transfer satisfactory to it has not been provided and has no obligation to pay the purchase price of such Bond until a satisfactory instrument is delivered.

If the registered owner of any Bond (or portion thereof) that is subject to purchase pursuant to the Indenture fails to deliver such Bond with an appropriate instrument of transfer to the Tender Agent for purchase on the Purchase Date, and if the Tender Agent is in receipt of the purchase price therefor, such Bond (or portion thereof) nevertheless will be deemed purchased on the Purchase Date thereof. Any owner who so fails to deliver such Bond for purchase on (or before) the Purchase Date will have no further rights thereunder, except the right to receive the purchase price thereof from those moneys deposited with the Tender Agent in the Purchase Fund pursuant to the Indenture upon presentation and surrender of such Bond to the Tender Agent properly endorsed for transfer in blank with all signatures guaranteed.

Special Considerations Relating to the Purchase and Remarketing of the Bonds

The Remarketing Agent is Paid by the Company. The Remarketing Agent's responsibilities include determining the interest rate from time to time and remarketing Bonds that are optionally or mandatorily tendered by the owners thereof (subject, in each case, to the terms of the Remarketing Agreement), all as further described in this Official Statement. The Remarketing Agent has been appointed by the Company and is paid by the Company for its services. As a result, the interests of the Remarketing Agent may differ from those of existing holders and potential purchasers of Bonds.

The Remarketing Agent Routinely Purchases Bonds for its Own Account. The Remarketing Agent acts as remarketing agent for a variety of variable rate demand obligations and, in its sole discretion, routinely purchases such obligations for its own account in order to achieve a successful remarketing of the obligations (i.e., because there are otherwise not enough buyers to purchase the obligations) or for other reasons. The Remarketing Agent is permitted, but not obligated, to purchase tendered Bonds for its own account and, if it does so, it may cease doing so at any time without notice. The Remarketing Agent may also make a market in the Bonds by routinely purchasing and selling Bonds other than in connection with an optional or mandatory tender and remarketing. Such purchases and sales may be at or below par. However, the Remarketing Agent is not required to make a market in the Bonds. The Remarketing Agent may also sell any Bonds it has purchased to one or more affiliated investment vehicles for collective ownership or enter into derivative arrangements with affiliates or others in order to reduce its exposure to the Bonds. The purchase of Bonds by the Remarketing Agent may create the appearance that there is greater third party demand for the Bonds in the market than is actually the case. The practices described above also may result in fewer Bonds being tendered in a remarketing.

Bonds May be Offered at Different Prices on Any Date Including an Interest Rate Determination Date. Pursuant to the Indenture, the Remarketing Agent is required to determine the applicable rate of interest that, in its judgment, is the minimum rate necessary, based on Prevailing Market Conditions, and assuming that all Bonds are then available for sale, for the Remarketing Agent to sell the Bonds on the day the rate is set at their principal amount (without regard to accrued interest). The interest rate will reflect, among other factors, the level of market demand for the Bonds (including whether the Remarketing Agent is willing to purchase Bonds for its own account). The Indenture requires that the Remarketing Agent use its commercially reasonable best efforts to sell tendered Bonds at par, plus accrued interest, if any. There may or may not be Bonds tendered and remarketed on a day that the interest rate on the Bonds is set, the Remarketing Agent may or may not be able to remarket any Bonds tendered for purchase on such date at par and the Remarketing Agent may sell Bonds at varying prices to different investors on such date or any other date. The Remarketing Agent is not obligated to advise purchasers in a remarketing if it does not have third-party buyers for all of the Bonds at the remarketing price.

Secondary Market Transactions. In the event the Remarketing Agent owns any Bonds for its own account, it may, in its sole discretion in a secondary market transaction outside the tender process, offer such Bonds on any date, including the day that the interest rate on the Bonds is set, at a discount to par to some investors.

The Ability to Sell the Bonds other than through the Tender Process May Be Limited. The Remarketing Agent may buy and sell Bonds other than in connection with the tender and remarketing process. However, it is not obligated to do so and may cease doing so at any time without notice and may require holders that wish to tender their Bonds to do so through the Trustee with appropriate notice. Thus, investors who purchase the Bonds, whether in a remarketing or otherwise, should not assume that they will be able to sell their Bonds other than by tendering the Bonds in accordance with the tender process set forth in the Indenture.

Under Certain Circumstances, the Remarketing Agent May Be Removed, Resign or Cease Remarketing the Bonds, Without a Successor Being Named. Under certain circumstances, the Remarketing Agent may be removed or have the ability to resign or cease its remarketing efforts, without a successor having been named, subject to the terms of the Remarketing Agreement and the Indenture.

Redemptions

Optional Redemption. The Bonds will be subject to redemption at the option of the Issuer, upon the written direction of the Company, in whole or in part, at a redemption price of 100% of the principal amount thereof, plus interest accrued, if any, to the redemption date, on any Business Day.

Extraordinary Optional Redemption in Whole. The Bonds may be redeemed by the Issuer in whole at any time at 100% of the principal amount thereof plus accrued interest to the redemption date upon the exercise by the Company of an option under the Loan Agreement to prepay the loan if any of the following events occur within 180 days preceding the giving of written notice by the Company to the Trustee of such election:

(i) if in the judgment of the Company, unreasonable burdens or excessive liabilities have been imposed upon the Company after the issuance of the Bonds with respect to the Project or the operation thereof, including without limitation federal, state or other ad valorem property, income or other taxes not imposed on the date of the Loan Agreement, other than ad valorem taxes levied upon privately owned property used for the same general purpose as the Project;

(ii) if the Project or a portion thereof or other property of the Company in connection with which the Project is used has been damaged or destroyed to such an extent so as, in the judgment of the Company, to render the Project or other property of the Company in connection with which the Project is used unsatisfactory to the Company for its intended use, and such condition continues for a period of six months;

(iii) there has occurred condemnation of all or substantially all of the Project or the taking by eminent domain of such use or control of the Project or other property of the Company in connection with which the Project is used so as, in the judgment of the Company, to render the Project or such other property of the Company unsatisfactory to the Company for its intended use;

(iv) in the event changes, which the Company cannot reasonably control, in the economic availability of materials, supplies, labor, equipment or other properties or things necessary for the efficient operation of the Generating Station have occurred, which, in the judgment of the Company, render the continued operation of such Generating Station or any generating unit at such station uneconomical; or changes in circumstances after the issuance of the Bonds, including but not limited to changes in clean air or other air and water pollution control requirements or solid waste disposal requirements, have occurred such that the Company determines that use of the Project is no longer required or desirable;

(v) the Loan Agreement has become void or unenforceable or impossible of performance by reason of any changes in the Constitution of the Commonwealth of Kentucky or the Constitution of the United States of America or by reason of legislative or administrative action (whether state or federal) or any final decree, judgment or order of any court or administrative body, whether state or federal; or

(vi) a final order or decree of any court or administrative body after the issuance of the Bonds requires the Company to cease a substantial part of its operation at the Generating Station to such extent that the Company will be prevented from carrying on its normal operations at such Generating Station for a period of six months.

Extraordinary Optional Redemption in Whole or in Part. The Bonds are also subject to redemption in whole or in part at 100% of the principal amount thereof plus accrued interest to the redemption date at the option of the Company in an amount not to exceed the net proceeds received from insurance or any condemnation award received by the Issuer, the Company or the First Mortgage Trustee in the event of damage, destruction or condemnation of all or a portion of the Project, subject to compliance with the terms of the First Mortgage Indenture and receipt of an opinion of Bond Counsel that such redemption will not adversely affect the exclusion of interest on any of the Bonds from gross income for federal income tax purposes. See "Summary of the Loan Agreement — Maintenance; Damage, Destruction and Condemnation." Such redemption must occur on a date on which the Bonds are otherwise subject to optional redemption as described above.

Mandatory Redemption; Determination of Taxability. The Bonds are required to be redeemed by the Issuer, in whole, or in such part as described below, at a redemption price equal to 100% of the principal amount thereof, without redemption premium, plus accrued interest, if any, to the redemption date, within 180 days following a "Determination of Taxability." As used herein, a "Determination of Taxability" means the receipt by the Trustee of written notice from a current or former registered owner of a Bond or from the Company or the Issuer of (i) the issuance of a published or private ruling or a technical advice memorandum by the Internal Revenue Service in which the Company participated or has been given the opportunity to participate, and which ruling or memorandum the Company, in its discretion, does not contest or from which no further right of administrative or judicial review or appeal exists, or (ii) a final determination from which no further right of appeal exists of any court of competent jurisdiction in the United States in a proceeding in which the Company has participated or has been a party, or has been given the opportunity to participate or be a party, in each case, to the effect that as a result of a failure by the Company to perform or observe any covenant or agreement or the inaccuracy of any representation contained in the Loan Agreement or any other agreement or certificate delivered in connection with the Bonds, the interest on the Bonds is included in the gross income of the owners thereof for federal income tax purposes, other than with respect to a person who is a "substantial user" or a "related person" of a substantial user of the Project within the meaning of Section 147 of the Internal Revenue Code of 1986, as amended (the "Code"); provided, however, that no such Determination of Taxability will be considered to exist as a result of the Trustee receiving notice from a current or former registered owner of a Bond or from the Issuer unless (i) the Issuer or the registered owner or former registered owner of the Bond involved in such proceeding or action (A) gives the Company and the Trustee prompt notice of the commencement thereof, and (B) (if the Company agrees to pay all expenses in connection therewith) offers the Company the opportunity to control unconditionally the defense thereof, and (ii) either (A) the Company does not agree within 30 days of receipt of such offer to pay such expenses and liabilities and to control such defense, or (B) the Company will exhaust or choose not to exhaust all available proceedings for the contest, review, appeal or rehearing of such decree, judgment or action which the Company determines to be appropriate. No Determination of Taxability described above will result from the inclusion of interest on any Bond in the computation of minimum or indirect taxes. All of the Bonds are required to be redeemed upon a Determination of Taxability as described above unless, in the opinion of Bond Counsel, redemption of a portion of such Bonds would have the result that interest payable on the remaining Bonds outstanding after the redemption would not be so included in any such gross income.

In the event any of the Issuer, the Company or the Trustee has been put on notice or becomes aware of the existence or pendency of any inquiry, audit or other proceedings relating to the Bonds being conducted by the Internal Revenue Service, the party so put on notice is required to give immediate written notice to the other parties of such matters. Promptly upon learning of the occurrence of a Determination of Taxability (whether or not the same is being contested), or any of the events described above, the Company is required to give notice thereof to the Trustee and the Issuer.

If the Internal Revenue Service or a court of competent jurisdiction determines that the interest paid or to be paid on any Bond (except to a "substantial user" of the Project or a "related person" within the meaning of Section 147(a) of the Code) is or was includable in the gross income of the recipient for federal income tax purposes for reasons other than as a result of a failure by the Company to perform or observe any of its covenants, agreements or representations in the Loan Agreement or any other agreement or certificate delivered in connection therewith, the Bonds are not subject to redemption. In such circumstances, Bondholders would continue to hold their Bonds, receiving principal and interest at the applicable rate as and when due, but would be required to include such interest payments in gross income for federal income tax purposes. Also, if the lien of the Indenture is discharged or defeased prior to the occurrence of a final Determination of Taxability, Bonds will not be redeemed as described herein.

General Redemption Terms. Notice of redemption will be given by mailing a redemption notice conforming to the provisions and requirements of the Indenture by first class mail to the registered owners of the Bonds to be redeemed not less than 15 days prior to the redemption date. Any notice mailed as provided in the Indenture will be conclusively presumed to have been given, irrespective of whether the owner receives the notice. Failure to give any such notice by mailing or any defect therein in respect of any Bond will not affect the validity of any proceedings for the redemption of any other Bond. No further interest will accrue on the principal of any Bond called for redemption after the redemption date if funds sufficient for such redemption have been deposited with the Paying Agent as of the redemption date. If the provisions for discharging the Indenture set forth below under the heading "Summary of the Indenture — Discharge of Indenture" have not been complied with, any redemption notice may state that it is conditional on there being sufficient moneys to pay the full redemption price for the Bonds to be redeemed and that if sufficient funds have not been received by the Trustee by the opening of business on the redemption date, such notice shall be of no effect. So long as the Bonds are held in book-entry-only form, all redemption notices will be sent only to Cede & Co.

Security

Payment of the principal or redemption price of and interest on the Bonds will be secured by an assignment by the Issuer to the Trustee of the Issuer's interest in and to the Loan Agreement and all payments to be made pursuant thereto (other than certain indemnification and expense payments). Pursuant to the Loan Agreement, the Company will agree to pay, among other things, amounts sufficient to pay the aggregate principal amount or redemption price of the Bonds, together with interest thereon as and when the same become due. The Company further will agree to make payments of the purchase price of the Bonds tendered for purchase to the extent that funds are not otherwise available therefor under the provisions of the Indenture.

The payment of the principal or redemption price of and interest on the Bonds will be further secured by the First Mortgage Bonds. The principal amount of the First Mortgage Bonds will equal the principal amount of the Bonds. If the Bonds become immediately due and payable as a result of a default in payment of the principal or redemption price of or interest on the Bonds, or a default in payment of the purchase price of such Bonds, due to an event of default under the Loan Agreement and upon receipt by the First Mortgage Trustee of a written demand from the Trustee for redemption of the First Mortgage Bonds ("Redemption Demand"), or if all first mortgage bonds outstanding under the First Mortgage Indenture shall have become immediately due and payable, such First Mortgage Bonds will begin to bear interest at the same interest rate or rates borne by the Bonds and the principal of such First Mortgage Bonds, together with interest accrued thereon from the last date or dates to which interest on the Bonds has been paid in full, will be payable in accordance with the Supplemental Indenture. See "Summary of the First Mortgage Bonds and the First Mortgage Indenture."

The First Mortgage Bonds are not intended to provide a direct source of liquidity to pay the purchase price of Bonds tendered for purchase in accordance with the Indenture. The Company is not required under the Loan Agreement or Indenture to provide any letter of credit or liquidity support for the Bonds. The First Mortgage Bonds are secured by a lien on certain property owned by the Company. In certain circumstances, the Company is permitted to reduce the aggregate principal amount of its First Mortgage Bonds held by the Trustee, but in no event to an amount lower than the aggregate outstanding principal amount of the Bonds.

Book-Entry-Only System

Portions of the following information concerning DTC and DTC's book-entry-only system have been obtained from DTC. The Issuer, the Company and the Underwriter make no representation as to the accuracy of such information.

Initially, DTC will act as securities depository for the Bonds and the Bonds initially will be issued solely in book-entry-only form to be held under DTC's book-entry-only system, registered in the name of Cede & Co. (DTC's partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully registered bond in the aggregate principal amount of the Bonds will be deposited with DTC.

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934 (the "Exchange Act"). DTC holds and provides asset servicing for U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants" and, together with "Direct Participants," "Participants"). The DTC Rules applicable to its Participants are on file with the SEC. More information about DTC can be found at www.dtcc.com.

Purchases of the Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the Bonds on DTC's records. The ownership interest of each actual purchaser of each Bond ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners, however, are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Bonds, except in the event that use of the book-entry only system for the Bonds is discontinued.

To facilitate subsequent transfers, all Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. or such other name as may be requested by an authorized representative of DTC. The deposit of Bonds with DTC and their registration in the name of Cede & Co. or such other nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial

Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption notices shall be sent to DTC. If fewer than all of the Bonds are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Bonds unless authorized by a Direct Participant in accordance with DTC's Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the Issuer as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Principal and interest payments on the Bonds will be made to Cede & Co. or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts, upon DTC's receipt of funds and corresponding detail information from the Issuer or the Trustee on the payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC nor its nominee, the Trustee, the Company or the Issuer, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the Issuer or the Trustee, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

A Beneficial Owner may give notice to elect to have its Bonds purchased or tendered, through its Participant, to the Tender Agent, and will effect delivery of such Bonds by causing the Direct Participant to transfer the Participant's interest in the Bonds on DTC's records to the Tender Agent. The requirement for physical delivery of Bonds in connection with a demand for purchase or a mandatory purchase will be deemed satisfied when the ownership rights in the Bonds are transferred by Direct Participants on DTC's records and followed by a book-entry credit of tendered Bonds to the Tender Agent's DTC account.

DTC may discontinue providing its services as securities depository with respect to the Bonds at any time by giving reasonable notice to the Issuer, the Company, the Tender Agent and the Trustee, or the Issuer, at the request of the Company, may decide to discontinue use of the system of book-entry-only transfers through DTC (or a successor securities depository for the Bonds). Under such circumstances, in the event that a successor securities depository is not obtained, bond certificates are required to be delivered as described in the Indenture (see "— Revision of Book-Entry-Only System; Replacement Bonds" below). The Beneficial Owner, upon registration of certificates held in the Beneficial Owner's name, will become the registered owner of the Bonds.

So long as Cede & Co. is the registered owner of the Bonds, as nominee of DTC, references herein to the registered owners of the Bonds will mean Cede & Co. and will not mean the Beneficial Owners. Under the Indenture, payments made by the Trustee to DTC or its nominee will satisfy the Issuer's obligations under the Indenture and the Company's obligations under the Loan Agreement and the First Mortgage Bonds, to the extent of the payments so made. Beneficial Owners will not be, and will not be considered by the Issuer or the Trustee to be, and will not have any rights as, owners of Bonds under the Indenture.

The Trustee and the Issuer, so long as a book-entry-only system is used for the Bonds, will send any notice of redemption or of proposed document amendments requiring consent of registered owners and any other notices required by the document (including notices of Conversion and mandatory purchase) to be sent to registered owners only to DTC (or any successor securities depository) or its nominee. Any failure of DTC to advise any Direct Participant, or of any Direct Participant or Indirect Participant to notify the Beneficial Owner, of any such notice and its content or effect will not affect the validity of the redemption of the Bonds called for redemption, the document amendment, the Conversion, the mandatory purchase or any other action premised on that notice.

The Issuer, the Company, the Trustee and the Underwriter cannot and do not give any assurances that DTC will distribute payments on the Bonds made to DTC or its nominee as the registered owner or any redemption or other notices, to the Participants, or that the Participants or others will distribute such payments or notices to the Beneficial Owners, or that they will do so on a timely basis, or that DTC will serve and act in the manner described in this Official Statement.

THE ISSUER, THE COMPANY, THE UNDERWRITER, THE REMARKETING AGENT AND THE TRUSTEE WILL HAVE NO RESPONSIBILITY OR OBLIGATION TO ANY DIRECT PARTICIPANT, INDIRECT PARTICIPANT OR ANY BENEFICIAL OWNER OR ANY OTHER PERSON NOT SHOWN ON THE REGISTRATION BOOKS OF THE TRUSTEE AS BEING A REGISTERED OWNER WITH RESPECT TO: (1) THE ACCURACY OF ANY RECORDS MAINTAINED BY DTC OR ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT; (2) THE PAYMENT OF ANY AMOUNT DUE BY DTC TO ANY DIRECT PARTICIPANT OR BY ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT TO ANY BENEFICIAL OWNER IN RESPECT OF THE PRINCIPAL AMOUNT OR REDEMPTION OR PURCHASE PRICE OF OR INTEREST ON THE BONDS; (3) THE DELIVERY OF ANY NOTICE BY DTC TO ANY DIRECT PARTICIPANT OR BY ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT TO ANY BENEFICIAL OWNER WHICH IS REQUIRED OR PERMITTED TO BE GIVEN TO REGISTERED OWNERS UNDER THE TERMS OF THE INDENTURE; (4) THE SELECTION OF THE BENEFICIAL OWNERS TO RECEIVE PAYMENT IN THE EVENT OF ANY PARTIAL REDEMPTION OF THE BONDS; OR (5) ANY CONSENT GIVEN OR OTHER ACTION TAKEN BY DTC AS REGISTERED OWNER.

Revision of Book-Entry-Only System; Replacement Bonds

In the event that DTC determines not to continue as securities depository or is removed by the Issuer, at the direction of the Company, as securities depository, the Issuer, at the direction of the Company, may appoint a successor securities depository reasonably acceptable to the Trustee. If the Issuer does not or is unable to appoint a successor securities depository, the Issuer will issue and the Trustee will authenticate and deliver fully registered Bonds, in authorized denominations, to the assignees of DTC or their nominees.

In the event that the book-entry-only system is discontinued, the following provisions will apply. The Bonds may be issued in denominations of $100,000 and multiples thereof. Bonds may be transferred or exchanged for an equal total amount of Bonds of other authorized denominations upon surrender of such Bonds at the designated office of the Bond Registrar, accompanied by a written instrument of transfer or authorization for exchange in form and with guaranty of signature satisfactory to the Bond Registrar, duly executed by the registered owner or the owner's duly authorized attorney. Except as provided in the Indenture, the Bond Registrar will not be required to register the transfer or exchange of any Bond during the fifteen days before any mailing of a notice of redemption, after such Bond has been called for redemption in whole or in part, or after such Bond has been tendered or deemed tendered for optional or mandatory purchase as described under "Purchases of Bonds." Registration of transfers and exchanges will be made without charge to the owners of Bonds, except that the Bond Registrar may require any owner requesting registration of transfer or exchange to pay any required tax or governmental charge.

Summary of the Loan Agreement

The following, in addition to the provisions contained elsewhere in this Official Statement, is a brief description of certain provisions of the Loan Agreement. This description is only a summary and does not purport to be complete and definitive. Reference is made to the Loan Agreement , for the detailed provisions thereof.

General

The term of the Loan Agreement will commence as of its date and end on the earliest to occur of September 1, 2044, or the date on which all of the Bonds have been fully paid or provision has been made for such payment pursuant to the Indenture. See "Summary of the Indenture — Discharge of Indenture."

The Company will agree to repay the loan pursuant to the Loan Agreement by making timely payments to the Trustee in sufficient amounts to pay the principal or redemption price of and interest required to be paid on the Bonds on each date upon which any such payments are due. The Company will also agree to pay (a) the agreed upon fees and expenses of the Trustee, the Bond Registrar, the Tender Agent and the Paying Agent and all other amounts which may be payable to the Trustee, the Bond Registrar, the Paying Agent and the Tender Agent, as may be applicable, under the Indenture, (b) the expenses in connection with any redemption of the Bonds and (c) the reasonable expenses of the Issuer.

The Company will covenant and agree with the Issuer that it will cause the purchase of tendered Bonds that are not remarketed in accordance with the Indenture and, to that end, the Company will cause funds to be made available to the Tender Agent at the times and in the manner required to effect such purchases in accordance with the Indenture (see "Summary of the Bonds — Purchases of Bonds — Remarketing and Purchase of Bonds").

All payments to be made by the Company to the Issuer pursuant to the Loan Agreement (except the fees and reasonable out-of-pocket expenses of the Issuer, the Trustee, the Paying Agent, the Bond Registrar and the Tender Agent, and amounts related to indemnification) will be assigned by the Issuer to the Trustee, and the Company will pay such amounts directly to the Trustee. The obligations of the Company to make the payments pursuant to the Loan Agreement are absolute and unconditional.

Maintenance of Tax Exemption

The Company and the Issuer will agree not to take any action that would result in the interest paid on the Bonds being included in gross income of any Bondholder (other than a holder who is a "substantial user" of the Project or a "related person" within the meaning of Section 147(a) of the Code) for federal income tax purposes or that adversely affects the validity of the Bonds.

Issuance and Delivery of First Mortgage Bonds

For the purpose of providing security for the Bonds, the Company will execute and deliver to the Trustee the First Mortgage Bonds on the date of issuance of the Bonds. The principal amount of the First Mortgage Bonds executed and delivered to the Trustee will equal the aggregate principal amount of the

Bonds. If the Bonds become immediately due and payable as a result of a default in payment of the principal or redemption price of or interest on the Bonds, or a default in payment of the purchase price of such Bonds, due to an event of default under the Loan Agreement and upon receipt by the First Mortgage Trustee of a Redemption Demand, or if all first mortgage bonds outstanding under the First Mortgage Indenture shall have become immediately due and payable, such First Mortgage Bonds will then bear interest at the same interest rate or rates borne by the Bonds and the principal of such First Mortgage Bonds, together with interest accrued thereon from the last date to which interest on the Bonds shall have been paid in full, will then be payable. See, however, "Summary of the Indenture — Waiver of Events of Default."

Upon payment of the principal or redemption price of and interest on any of the Bonds, and the surrender to and cancellation thereof by the Trustee, or upon provision for the payment thereof having been made in accordance with the Indenture, First Mortgage Bonds with corresponding principal amounts equal to the aggregate principal amount of the Bonds so surrendered and canceled or for the payment of which provision has been made, will be surrendered by the Trustee to the First Mortgage Trustee and will be canceled by the First Mortgage Trustee. The First Mortgage Bonds will be registered in the name of the Trustee and will be non transferable, except to effect transfers to any successor trustee under the Indenture.

Payment of Taxes

The Company will agree to pay certain taxes and other governmental charges that may be lawfully assessed, levied or charged against or with respect to the Project (see, however, subparagraph (i) under the heading "Summary of the Bonds — Redemptions — Extraordinary Optional Redemption in Whole"). The Company may contest such taxes or other governmental charges unless the security provided by the Indenture would be materially endangered.

Maintenance; Damage, Destruction and Condemnation

So long as any Bonds are outstanding, the Company will maintain, preserve and keep the Project or cause the Project to be maintained, preserved and kept in good repair, working order and condition and will make or cause to be made all proper repairs, replacements and renewals necessary to continue to constitute the Project as air and water pollution control and abatement facilities under Section 103(b)(4)(F) of the Internal Revenue Code of 1954, as amended. However, the Company will have no obligation to maintain, preserve, keep, repair, replace or renew any portion of the Project, the maintenance, preservation, keeping, repair, replacement or renewal of which becomes uneconomical to the Company because of certain events, including damage or destruction by a cause not within the Company's control, condemnation of the Project, change in government standards and regulations, economic or other obsolescence or termination of operation of generating facilities to the Project.

The Company, at its own expense, may remodel the Project or make substitutions, modifications and improvements to the Project as it deems desirable, which remodeling, substitutions, modifications and improvements are deemed, under the terms of the Loan Agreement to be a part of the Project. The Company may not, however, change or alter the basic nature of the Project or cause it to lose its status under Section 103(b)(4)(F) of the Internal Revenue Code of 1954, as amended.

If, prior to the payment of all Bonds outstanding, the Project or any portion thereof is destroyed, damaged or taken by the exercise of the power of eminent domain and the Issuer, the Company or the First Mortgage Trustee receives net proceeds from insurance or a condemnation award in connection therewith, the Company must, subject to the requirements of the First Mortgage Indenture, (i) cause such net proceeds to be used to repair or restore the Project or (ii) take any other action, including the redemption of the Bonds in whole or in part at their principal amount, which, by the opinion of Bond Counsel, will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes. See "Summary of the Bonds — Redemptions — Extraordinary Optional Redemption in Whole or in Part."

Project Insurance

The Company will insure the Project in accordance with the provisions of the First Mortgage Indenture.

Assignment, Merger and Release of Obligations of the Company

The Company may assign the Loan Agreement, pursuant to an opinion of Bond Counsel that such assignment will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes, without obtaining the consent of either the Issuer or the Trustee. Such assignment, however, will not relieve the Company from primary liability for any of its obligations under the Loan Agreement and performance and observance of the other covenants and agreements to be performed by the Company. The Company may dispose of all or substantially all of its assets or consolidate with or merge into another entity, provided the acquirer of the Company's assets or the entity with which it will consolidate with or merge into is a corporation or other business organization organized and existing under the laws of the United States of America or one of the states of the United States of America or the District of Columbia, is qualified and admitted to do business in the Commonwealth of Kentucky, and assumes in writing all of the obligations and covenants of the Company under the Loan Agreement and delivers a copy of such assumption to the Issuer and the Trustee.

Release and Indemnification Covenant

The Company will indemnify and hold the Issuer harmless against any expense or liability incurred, including attorneys' fees, resulting from any loss or damage to property or any injury to or death of any person occurring on or about or resulting from any defect in the Project or from any action commenced in connection with the financing thereof.

Events of Default

Each of the following events constitutes an "Event of Default" under the Loan Agreement:

(1) failure by the Company to pay the amounts required for payment of the principal of, including purchase price for tendered Bonds and redemption and acceleration prices, and interest accrued, on the Bonds, at the times specified therein taking into account any periods of grace provided in the Indenture and the Bonds for the applicable payment of interest on the Bonds (see "Summary of the Indenture — Defaults and Remedies"), and such failure shall cause an event of default under the Indenture;

(2) failure by the Company to observe and perform any covenant, condition or agreement on its part to be observed or performed, other than as referred to in paragraph (1) above, for a period of 30 days after written notice by the Issuer or Trustee, subject to extension by the Issuer and the Trustee, provided, however, that if such failure is capable of being corrected, but cannot be corrected in such 30-day period, the Issuer and the Trustee will not unreasonably withhold their

consent to an extension of such time if corrective action with respect thereto is instituted within such period and is being diligently pursued;

(3) certain events of bankruptcy, dissolution, liquidation, reorganization or insolvency of the Company;

(4) the occurrence of an Event of Default under the Indenture; or

(5) all first mortgage bonds outstanding under the First Mortgage Indenture, if not already due, shall have become immediately due and payable, whether by declaration or otherwise, and such acceleration shall not have been rescinded by the First Mortgage Trustee;

Under the Loan Agreement, certain of the Company's obligations (other than the Company's obligations, among others, (i) not to permit any action which would result in interest paid on the Bonds being included in gross income for federal and Kentucky income taxes, (ii) to execute and deliver the First Mortgage Bonds to the Trustee on or before the date of issuance of the Bonds in an amount equal to the principal amount of the Bonds; (iii) to maintain its corporate existence and good standing, and to neither dispose of all or substantially all of its assets or consolidate with or merge into another entity unless certain provisions of the Loan Agreement are satisfied; and (iv) to make loan payments and certain other payments under the provisions of the Loan Agreement) may he suspended if by reason of force majeure (as defined in the Loan Agreement) the Company is unable to carry out such obligations.

Remedies

Upon the happening and continuance of an Event of Default under the Loan Agreement, the Trustee, on behalf of the Issuer, may, among other things, take whatever action at law or in equity may appear necessary or desirable to collect the amounts then due and thereafter to become due, or to enforce performance and observance of any obligation, agreement or covenant of the Company, under the Loan Agreement, including any remedies available in respect of the First Mortgage Bonds.

In the event of a default in payment of the principal or redemption price of or interest on the Bonds and the acceleration of the maturity date of the Bonds (to the extent not already due and payable) as a consequence of such Event of Default, the Trustee may demand redemption of the First Mortgage Bonds. See "Summary of the First Mortgage Bonds and the First Mortgage Indenture" and "Summary of the Indenture — Defaults and Remedies." Any amounts collected upon the happening of any such Event of Default must be applied in accordance with the Indenture or, if the Bonds have been fully paid (or provision for payment thereof bas been made in accordance with the Indenture) and all other liabilities of the Company accrued under the Indenture and the Loan Agreement have been paid or satisfied, made available to the Company.

Options to Prepay; Obligation to Prepay

The Company may prepay the loan pursuant to the Loan Agreement, in whole or in part, on certain dates, at the prepayment prices as shown under the headings "Summary of the Bonds — Redemptions — Optional Redemption," "Extraordinary Optional Redemption in Whole" and "Extraordinary Optional Redemption in Whole or in Part." Upon the occurrence of the event described under the beading "Summary of the Bonds — Redemptions — Mandatory Redemption; Determination of Taxability," the Company will be obligated to prepay the loan in an aggregate amount sufficient to redeem the required principal amount of the Bonds.

In each instance, the loan prepayment price must be a sum sufficient, together with other funds deposited with the Trustee and available for such purpose, to redeem the requisite amount of the Bonds at a price equal to 100% of the principal amount plus accrued interest to the redemption date, and to pay all reasonable and necessary fees and expenses of the Trustee, the Paying Agent, the Bond Registrar and the Tender Agent and all other liabilities of the Company under the Loan Agreement accrued to the redemption date.

Amendments and Modifications

No alteration, amendment, change, supplement or modification of the Loan Agreement is permissible without the written consent of the Trustee. The Issuer and the Trustee may, however, without the consent of or notice to any Bondholders, enter into any alteration, amendment, change, supplement or modification of the Loan Agreement (i) which may be required by the provisions of the Loan Agreement or the Indenture, (ii) for the purpose of curing any ambiguity or formal defect or omission, (iii) in connection with any modification or change necessary to conform the Loan Agreement with changes and modifications in the Indenture or (iv) in connection with any other change which, in the judgment of the Trustee, does not adversely affect the Trustee or the Bondholders. Except for such alterations, amendments, changes, supplements or modifications, the Loan Agreement may be altered, amended, changed, supplemented or modified only with the consent of the Bondholders holding a majority in principal amount of the Bonds then outstanding (see "Summary of the Indenture — Supplemental Indentures" for an explanation of the procedures necessary for Bondholder consent); provided, however, that the approval of the Bondholders holding 100% in principal amount of the Bonds then outstanding is necessary to effectuate an alteration, amendment, change, supplement or modification with respect to the Loan Agreement of the type described in clauses (i) through (iv) of the first sentence of the third paragraph of "Summary of the Indenture — Supplemental Indentures."

Summary of the First Mortgage Bonds and the First Mortgage Indenture

The following, in addition to the provisions contained elsewhere in this Official Statement, is a brief description of certain provisions of the First Mortgage Bonds and the First Mortgage Indenture. This description is only a summary and does not purport to be complete and definitive. Reference is made to the First Mortgage Indenture and to the form of the First Mortgage Bonds for the detailed provisions thereof.

General

In connection with the issuance of the Bonds, the First Mortgage Bonds will be issued in a principal amount equal to the principal amount of the Bonds and will constitute a new series of first mortgage bonds under the First Mortgage Indenture (see "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds"). The statements herein made (being for the most part summaries of certain provisions of the First Mortgage Indenture) are subject to the detailed provisions of the First Mortgage Indenture, which is incorporated herein by this reference. Words or phrases italicized are defined in the First Mortgage Indenture.

The First Mortgage Bonds will mature on the same date and bear interest at the same rate or rates as the Bonds; however, the principal of and interest on the First Mortgage Bonds will not be payable other than upon the occurrence of an event of default under the Loan Agreement. If the Bonds become immediately due and payable as a result of a default in payment of the principal or redemption price of or interest on the Bonds, or a default in payment of the purchase price of such Bonds, due to an event of default under the Loan Agreement, and if all first mortgage bonds outstanding under the First Mortgage Indenture shall not have become immediately due and payable following an event of default under the First Mortgage Indenture, the Company will be obligated to redeem the First Mortgage Bonds upon receipt by the First Mortgage Trustee of a Redemption Demand from the Trustee for redemption, at a redemption price equal to the principal amount thereof plus accrued interest at the rates borne by the Bonds from the last date to which interest on the Bonds has been paid.

The First Mortgage Bonds at all times will be in fully registered form registered in the name of the Trustee, will be non negotiable, and will be non transferable except to any successor trustee under the Indenture. Upon payment and cancellation of Bonds by the Trustee or the Paying Agent (other than any Bond or portion thereof that was canceled by the Trustee or the Paying Agent and for which one or more Bonds were delivered and authenticated pursuant to the Indenture), whether at maturity, by redemption or otherwise, or upon provision for the payment of the Bonds having been made in accordance with the Indenture, an equal principal amount of First Mortgage Bonds will be deemed fully paid and the obligations of the Company thereunder will cease.

Security; Lien of the First Mortgage Indenture

General. Except as described below under this heading and under "— Issuance of Additional First Mortgage Bonds," and subject to the exceptions described under "— Satisfaction and Discharge," all first mortgage bonds issued under the First Mortgage Indenture, including the First Mortgage Bonds, will be secured, equally and ratably, by the lien of the First Mortgage Indenture, which constitutes, subject to *permitted liens* and exclusions as described below, a first mortgage lien on substantially all of the Company's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage, transportation and distribution of natural gas (other than property duly released from the lien of the First Mortgage Indenture in accordance with the provisions thereof and other than *excepted property*, as described below). Property that is subject to the lien of the First Mortgage Indenture is referred to below as "Mortgaged Property."

The Company may obtain the release of property from the lien of the First Mortgage Indenture from time to time, upon the bases provided for such release in the First Mortgage Indenture. See "— Release of Property."

The Company may enter into supplemental indentures with the First Mortgage Trustee, without the consent of the holders of the first mortgage bonds, in order to subject additional property (including property that would otherwise be excepted from such lien) to the lien of the First Mortgage Indenture. This property would constitute *property additions* and would be available as a basis for the issuance of additional first mortgage bonds. See "— Issuance of Additional First Mortgage Bonds."

The First Mortgage Indenture provides that after-acquired property (other than *excepted property*) will be subject to the lien of the First Mortgage Indenture. However, in the case of consolidation or merger (whether or not the Company is the surviving company) or transfer of the Mortgaged Property as or substantially as an entirety, the First Mortgage Indenture will not be required to be a lien upon any of the properties either owned or subsequently acquired by the successor company except properties acquired from the Company in or as a result of such transfer, as well as improvements, extensions and additions (as defined in the First Mortgage Indenture) to such properties and renewals, replacements and substitutions of or for any part or parts thereof. See "— Consolidation, Merger and Conveyance of Assets as an Entirety."

Excepted Property. The lien of the First Mortgage Indenture does not cover, among other things, the following types of property: property located outside of Kentucky and not specifically subjected or required to be subjected to the lien of the First Mortgage Indenture; property not used by the Company in its electric generation, transmission and distribution business or its natural gas storage, transportation and distribution business; cash and securities not paid, deposited or held under the First Mortgage Indenture or required so to be; contracts, leases and other agreements of all kinds, contract rights, bills, notes and other instruments, revenues, accounts receivable, claims, demands and judgments; governmental and other licenses, permits, franchises, consents and allowances; intellectual property rights and other general intangibles; vehicles, movable equipment, aircraft and vessels; all goods, stock in trade, wares, merchandise and inventory held for the purpose of sale or lease in the ordinary course of business; materials, supplies, inventory and other personal property consumable in the operation of the Company's business; fuel; tools and equipment; furniture and furnishings; computers and data processing, telecommunications and other facilities used primarily for administrative or clerical purposes or otherwise not used in connection with the operation or maintenance of electric generation, transmission and distribution facilities or natural gas storage, transportation and distribution facilities; coal, ore, gas, oil and other minerals and timber rights; electric energy and capacity, gas, steam, water and other products generated, produced, manufactured, purchased or otherwise acquired; real property and facilities used primarily for the production or gathering of natural gas; property which has been released from the lien of the First Mortgage Indenture; and leasehold interests. Property of the Company not covered by the lien of the First Mortgage Indenture is referred to herein as excepted property. Properties held by any of the Company's subsidiaries, as well as properties leased from others, would not be subject to the lien of the First Mortgage Indenture.

Permitted Liens. The lien of the First Mortgage Indenture is subject to permitted liens described in the First Mortgage Indenture. Such permitted liens include liens existing at the execution date of the First Mortgage Indenture, purchase money liens and other liens placed or otherwise existing on property acquired by the Company after the execution date of the First Mortgage Indenture at the time the Company acquires it, tax liens and other governmental charges which are not delinquent or which are being contested in good faith, mechanics', construction and materialmen's liens, certain judgment liens, easements, reservations and rights of others (including governmental entities) in, and defects of title to, the Company's property, certain leases and leasehold interests, liens to secure public obligations, rights of others to take minerals, timber, electric energy or capacity, gas, water, steam or other products produced by the Company or by others on the Company's property, rights and interests of persons other than the Company arising out of agreements relating to the common ownership or joint use of property, and liens on the interests of such persons in such property and liens which have been bonded or for which other security arrangements have been made.

The First Mortgage Indenture also provides that the First Mortgage Trustee will have a lien, prior to the lien on behalf of the holders of the first mortgage bonds, including the First Mortgage Bonds, upon the Mortgaged Property as security for the Company's payment of its reasonable compensation and expenses and for indemnity against certain liabilities. Any such lien would be a permitted lien under the First Mortgage Indenture.

Issuance of Additional First Mortgage Bonds

The maximum principal amount of first mortgage bonds that may be authenticated and delivered under the First Mortgage Indenture is subject to the issuance restrictions described below; provided, however, that the maximum principal amount of first mortgage bonds outstanding at any one time shall not exceed One Quintillion Dollars ($1,000,000,000,000,000,000), which amount may be changed by supplemental indenture. As of June 30, 2016, first mortgage bonds in an aggregate principal amount of $1,659,304,000 were outstanding under the First Mortgage Indenture, of which $574,304,000 were issued to secure the Company's payment obligations with respect to its outstanding pollution control and environmental facilities revenue bonds, including the Bonds.

First mortgage bonds of any series may be issued from time to time on the basis of, and in an aggregate principal amount not exceeding:

- 66 2/3% of the *cost* or *fair value* to the Company (whichever is less) of *property additions* (as described below) which do not constitute *funded property* (generally, *property additions* which have been made the basis of the authentication and delivery of first mortgage bonds, the release of Mortgaged Property or the withdrawal of cash, which have been substituted for retired *funded property* or which have been used for other specified purposes) after certain deductions and additions, primarily including adjustments to offset property retirements;

- the aggregate principal amount of *retired securities* (as described below); or

- an amount of cash deposited with the First Mortgage Trustee.

Property additions generally include any property which is owned by the Company and is subject to the lien of the First Mortgage Indenture except (with certain exceptions) goodwill, going concern value rights or intangible property, or any property the acquisition or construction of which is properly chargeable to one of the Company's operating expense accounts in accordance with U.S. generally accepted accounting principles.

Retired securities means, generally, first mortgage bonds which are no longer outstanding under the First Mortgage Indenture, which have not been retired by the application of *funded cash* and which have not been used as the basis for the authentication and delivery of first mortgage bonds, the release of property or the withdrawal of cash.

At June 30, 2016, approximately $1.3 billion of *property additions* and $250 million of *retired securities* were available to be used as the basis for the authentication and delivery of first mortgage bonds. The Company intends to issue the First Mortgage Bonds on the basis of *retired securities*.

Release of Property

Unless an *event of default* has occurred and is continuing, the Company may obtain the release from the lien of the First Mortgage Indenture of any Mortgaged Property, except for cash held by the First Mortgage Trustee, upon delivery to the First Mortgage Trustee of an amount in cash equal to the amount, if any, by which sixty-six and two-thirds percent (66-2/3%) of the cost of the property to be released (or, if less, the *fair value* to the Company of such property at the time it became *funded property*) exceeds the aggregate of:

- an amount equal to 66 2/3% of the aggregate principal amount of obligations secured by *purchase money liens* upon the property to be released and delivered to the First Mortgage Trustee;

- an amount equal to 66 2/3% of the *cost* or *fair value* to the Company (whichever is less) of certified *property additions* not constituting *funded property* after certain deductions and additions, primarily including adjustments to offset property retirements (except that such adjustments need not be made if such *property additions* were acquired or made within the 90-day period preceding the release);

- the aggregate principal amount of first mortgage bonds the Company would be entitled to issue on the basis of *retired securities* (with such entitlement being waived by operation of such release);

- the aggregate principal amount of first mortgage bonds delivered to the First Mortgage Trustee (with such first mortgage bonds to be canceled by the First Mortgage Trustee);

- any amount of cash and/or an amount equal to 66 2/3% of the aggregate principal amount of obligations secured by *purchase money liens* upon the property released that is delivered to the trustee or other holder of a lien prior to the lien of the First Mortgage Indenture, subject to certain limitations described in the First Mortgage Indenture; and

- any taxes and expenses incidental to any sale, exchange, dedication or other disposition of the property to be released.

As used in the First Mortgage Indenture, the term *purchase money lien* means, generally, a lien on the property being released which is retained by the transferor of such property or granted to one or more other persons in connection with the transfer or release thereof, or granted to or held by a trustee or agent for any such persons, and may include liens which cover property in addition to the property being released and/or which secure indebtedness in addition to indebtedness to the transferor of such property.

Unless an *event of default* has occurred and is continuing, property which is not *funded property* may generally be released from the lien of the First Mortgage Indenture without depositing any cash or property with the First Mortgage Trustee as long as (a) the aggregate amount of *cost* or *fair value* to the Company (whichever is less) of all *property additions* which do not constitute *funded property* (excluding the property to be released) after certain deductions and additions, primarily including adjustments to offset property retirements, is not less than zero or (b) the *cost* or *fair value* (whichever is less) of property to be released does not exceed the aggregate amount of the cost or fair value to the Company (whichever is less) of *property additions* acquired or made within the 90-day period preceding the release.

The First Mortgage Indenture provides simplified procedures for the release of minor properties and property taken by eminent domain, and provides for dispositions of certain obsolete property and grants or surrender of certain rights without any release or consent by the First Mortgage Trustee.

If the Company retains any interest in any property released from the lien of the First Mortgage Indenture, the First Mortgage Indenture will not become a lien on such property or such interest therein or any improvements, extensions or additions to such property or renewals, replacements or substitutions of or for such property or any part or parts thereof.

Withdrawal of Cash

Unless an *event of default* has occurred and is continuing, and subject to certain limitations, cash held by the First Mortgage Trustee may, generally, (1) be withdrawn by the Company (a) to the extent of sixty-six and two-thirds percent (66-2/3%) of the *cost* or *fair value* to the Company (whichever is less) of *property additions* not constituting *funded property*, after certain deductions and additions, primarily including adjustments to offset retirements (except that such adjustments need not be made if such *property additions* were acquired or made within the 90-day period preceding the withdrawal) or (b) in an amount equal to the aggregate principal amount of first mortgage bonds that the Company would be entitled to issue on the basis of *retired securities* (with the entitlement to such issuance being waived by operation of such withdrawal) or (c) in an amount equal to the aggregate principal amount of any outstanding first mortgage bonds delivered to the First Mortgage Trustee; or (2) upon the Company's request, be applied to (a) the purchase of first mortgage bonds in a manner and at a price approved by the Company or (b) the payment (or provision for payment) at stated maturity of any first mortgage bonds or the redemption (or provision for payment) of any first mortgage bonds which are redeemable; provided, however, that cash deposited with the First Mortgage Trustee as the basis for the authentication and delivery of first mortgage bonds may, in addition, be withdrawn in an amount not exceeding the aggregate principal amount of cash delivered to the First Mortgage Trustee for such purpose.

Events of Default

An "event of default" occurs under the First Mortgage Indenture if

- the Company does not pay any interest on any first mortgage bonds within 30 days of the due date;
- the Company does not pay principal or premium, if any, on any first mortgage bonds on the due date;
- the Company remains in breach of any other covenant (excluding covenants specifically dealt with elsewhere in this section) in respect of any first mortgage bonds for 90 days after the Company receives a written notice of default stating the Company is in breach and requiring remedy of the breach; the notice must be sent by either the First Mortgage Trustee or holders of 25% of the principal amount of outstanding first mortgage bonds; the First Mortgage Trustee or such holders can agree to extend the 90-day period and such an agreement to extend will be automatically deemed to occur if the Company initiates corrective action within such 90 day period and the Company is diligently pursuing such action to correct the default; or
- the Company files for bankruptcy or certain other events in bankruptcy, insolvency, receivership or reorganization occur.

Remedies

Acceleration of Maturity. If an event of default occurs and is continuing, then either the First Mortgage Trustee or the holders of not less than 25% in principal amount of the outstanding first mortgage bonds may declare the principal amount of all of the first mortgage bonds to be due and payable immediately.

Rescission of Acceleration. After the declaration of acceleration has been made and before the First Mortgage Trustee has obtained a judgment or decree for payment of the money due, such declaration and its consequences will be rescinded and annulled, if

- the Company pays or deposits with the First Mortgage Trustee a sum sufficient to pay:
    - all overdue interest;
    - the principal of and premium, if any, which have become due otherwise than by such declaration of acceleration and interest thereon;
    - interest on overdue interest to the extent lawful; and
    - all amounts due to the First Mortgage Trustee under the First Mortgage Indenture; and

- all *events of default*, other than the nonpayment of the principal which has become due solely by such declaration of acceleration, have been cured or waived as provided in the First Mortgage Indenture.

For more information as to waiver of defaults, see "— Waiver of Default and of Compliance" below.

Appointment of Receiver and Other Remedies. Subject to the First Mortgage Indenture, under certain circumstances and to the extent permitted by law, if an *event of default* occurs and is continuing, the First Mortgage Trustee has the power to appoint a receiver of the Mortgaged Property, and is entitled to all other remedies available to mortgagees and secured parties under the Uniform Commercial Code or any other applicable law.

Control by Holders; Limitations. Subject to the First Mortgage Indenture, if an *event of default* occurs and is continuing, the holders of a majority in principal amount of the outstanding first mortgage bonds will have the right to

- direct the time, method and place of conducting any proceeding for any remedy available to the First Mortgage Trustee, or

- exercise any trust or power conferred on the First Mortgage Trustee.

The rights of holders to make direction are subject to the following limitations:

- the holders' directions may not conflict with any law or the First Mortgage Indenture; and

- the holders' directions may not involve the First Mortgage Trustee in personal liability where the First Mortgage Trustee believes indemnity is not adequate.

The First Mortgage Trustee may also take any other action it deems proper which is not inconsistent with the holders' direction.

In addition, the First Mortgage Indenture provides that no holder of any first mortgage bond will have any right to institute any proceeding, judicial or otherwise, with respect to the First Mortgage Indenture for the appointment of a receiver or for any other remedy thereunder unless

- that holder has previously given the First Mortgage Trustee written notice of a continuing *event of default*;

- the holders of 25% in aggregate principal amount of the outstanding first mortgage bonds have made written request to the First Mortgage Trustee to institute proceedings in respect of that *event of default* and have offered the First Mortgage Trustee reasonable indemnity against costs, expenses and liabilities incurred in complying with such request; and

- for 60 days after receipt of such notice, request and offer of indemnity, the First Mortgage Trustee has failed to institute any such proceeding and no direction inconsistent with such request has been given to the First Mortgage Trustee during such 60-day period by the holders of a majority in aggregate principal amount of outstanding first mortgage bonds.

Furthermore, no holder of first mortgage bonds will be entitled to institute any such action if and to the extent that such action would disturb or prejudice the rights of other holders of first mortgage bonds.

However, each holder of first mortgage bonds has an absolute and unconditional right to receive payment when due and to bring a suit to enforce that right.

Notice of Default. The First Mortgage Trustee is required to give the holders of the first mortgage bonds notice of any default under the First Mortgage Indenture to the extent required by the Trust Indenture Act, unless such default has been cured or waived; except that in the case of an *event of default* of the character specified in the third bullet point under "— Events of Default" (regarding a breach of certain covenants continuing for 90 days after the receipt of a written notice of default), no such notice shall be given to such holders until at least 60 days after the occurrence thereof. The Trust Indenture Act currently permits the First Mortgage Trustee to withhold notices of default (except for certain payment defaults) if the First Mortgage Trustee in good faith determines the withholding of such notice to be in the interests of the holders of the first mortgage bonds.

The Company will furnish the First Mortgage Trustee with an annual statement as to its compliance with the conditions and covenants in the First Mortgage Indenture.

Waiver of Default and of Compliance. The holders of a majority in aggregate principal amount of the outstanding first mortgage bonds may waive, on behalf of the holders of all outstanding first mortgage bonds, any past default under the First Mortgage Indenture, except a default in the payment of principal, premium or interest, or with respect to compliance with certain provisions of the First Mortgage Indenture that cannot be amended without the consent of the holder of each outstanding first mortgage bond affected.

Compliance with certain covenants in the First Mortgage Indenture or otherwise provided with respect to first mortgage bonds may be waived by the holders of a majority in aggregate principal amount of the affected first mortgage bonds, considered as one class.

Consolidation, Merger and Conveyance of Assets as an Entirety

Subject to the provisions described below, the Company has agreed to preserve its corporate existence.

The Company has agreed not to consolidate with or merge with or into any other entity or convey, transfer or lease the Mortgaged Property as or substantially as an entirety to any entity unless

- the entity formed by such consolidation or into which the Company merges, or the entity which acquires or which leases the Mortgaged Property substantially as an entirety, is an entity organized and existing under the laws of the United States of America or any State or Territory thereof or the District of Columbia; and
    - expressly assumes, by supplemental indenture, the due and punctual payment of the principal of, and premium and interest on, all the outstanding first mortgage bonds and the performance of all of the Company's covenants under the First Mortgage Indenture; and
    - such entity confirms the lien of the First Mortgage Indenture on the Mortgaged Property; and

- in the case of a lease, such lease is made expressly subject to termination by (i) the Company or by the First Mortgage Trustee and (ii) the purchaser of the property so leased at any sale thereof, at any time during the continuance of an *event of default*; and

- immediately after giving effect to such transaction, no *event of default*, and no event which after notice or lapse of time or both would become an *event of default*, will have occurred and be continuing.

In the case of the conveyance or other transfer of the Mortgaged Property as or substantially as an entirety to any other person, upon the satisfaction of all the conditions described above the Company would be released and discharged from all obligations under the First Mortgage Indenture and on the first mortgage bonds then outstanding unless the Company elects to waive such release and discharge.

The First Mortgage Indenture does not prevent or restrict:

- any consolidation or merger after the consummation of which the Company would be the surviving or resulting entity; or

- any conveyance or other transfer, or lease, of any part of the Mortgaged Property which does not constitute the entirety or substantially the entirety thereof.

If following a conveyance or other transfer, or lease, of any part of the Mortgaged Property, the fair value of the Mortgaged Property retained by the Company exceeds an amount equal to three-halves (3/2) of the aggregate principal amount of all outstanding first mortgage bonds, then the part of the Mortgaged Property so conveyed, transferred or leased shall be deemed not to constitute the entirety or substantially the entirety of the Mortgaged Property. This fair value will be determined within 90 days of the conveyance or transfer by an independent expert that the Company selects and that is approved by the First Mortgage Trustee.

Modification of First Mortgage Indenture

Without Holder Consent. Without the consent of any holders of first mortgage bonds, the Company and the First Mortgage Trustee may enter into one or more supplemental indentures for any of the following purposes:

- to evidence the succession of another entity to the Company;

- to add one or more covenants or other provisions for the benefit of the holders of all or any series or tranche of first mortgage bonds, or to surrender any right or power conferred upon the Company;

- to correct or amplify the description of any property at any time subject to the lien of the First Mortgage Indenture; or to better assure, convey and confirm unto the First Mortgage Trustee any property subject or required to be subjected to the lien of the First Mortgage Indenture; or to subject to the lien of the First Mortgage Indenture additional property (including property of others), to specify any additional Permitted Liens with respect to such additional property and to modify the provisions in the First Mortgage Indenture for dispositions of certain types of property without release in order to specify any additional items with respect to such additional property;

- to add any additional *events of default*, which may be stated to remain in effect only so long as the first mortgage bonds of any one more particular series remains outstanding;
- to change or eliminate any provision of the First Mortgage Indenture or to add any new provision to the First Mortgage Indenture that does not adversely affect the interests of the holders in any material respect;
- to establish the form or terms of any series or tranche of first mortgage bonds;
- to provide for the issuance of bearer securities;
- to evidence and provide for the acceptance of appointment of a successor First Mortgage Trustee or by a co-trustee or separate trustee;
- to provide for the procedures required to permit the utilization of a noncertificated system of registration for any series or tranche of first mortgage bonds;
- to change any place or places where
    - the Company may pay principal, premium and interest,
    - first mortgage bonds may be surrendered for transfer or exchange, and
    - notices and demands to or upon the Company may be served;
- to amend and restate the First Mortgage Indenture as originally executed, and as amended from time to time, with such additions, deletions and other changes that do not adversely affect the interest of the holders in any material respect;
- to cure any ambiguity, defect or inconsistency or to make any other changes that do not adversely affect the interests of the holders in any material respect; or
- to increase or decrease the maximum principal amount of first mortgage bonds that may be outstanding at any time.

In addition, if the Trust Indenture Act is amended after the date of the First Mortgage Indenture so as to require changes to the First Mortgage Indenture or so as to permit changes to, or the elimination of, provisions which, at the date of the First Mortgage Indenture or at any time thereafter, were required by the Trust Indenture Act to be contained in the First Mortgage Indenture, the First Mortgage Indenture will be deemed to have been amended so as to conform to such amendment or to effect such changes or elimination, and the Company and the First Mortgage Trustee may, without the consent of any holders, enter into one or more supplemental indentures to effect or evidence such amendment.

With Holder Consent. Except as provided above, the consent of the holders of at least a majority in aggregate principal amount of the first mortgage bonds of all outstanding series, considered as one class, is generally required for the purpose of adding to, or changing or eliminating any of the provisions of, the First Mortgage Indenture pursuant to a supplemental indenture. However, if less than all of the series of outstanding first mortgage bonds are directly affected by a proposed supplemental indenture, then such proposal only requires the consent of the holders of a majority in aggregate principal amount of the outstanding first mortgage bonds of all directly affected series, considered as one class. Moreover, if the first mortgage bonds of any series have been issued in more than one tranche and if the proposed supplemental indenture directly affects the rights of the holders of first mortgage bonds of one or more, but less than all, of such tranches, then such proposal only requires the consent of the holders of a majority in aggregate principal amount of the outstanding first mortgage bonds of all directly affected tranches, considered as one class.

However, no amendment or modification may, without the consent of the holder of each outstanding first mortgage bond directly affected thereby:

- change the stated maturity of the principal or interest on any first mortgage bond (other than pursuant to the terms thereof), or reduce the principal amount, interest or premium payable (or the method of calculating such rates) or change the currency in which any first mortgage bond is payable, or impair the right to bring suit to enforce any payment;

- create any lien (not otherwise permitted by the First Mortgage Indenture) ranking prior to the lien of the First Mortgage Indenture with respect to all or substantially all of the Mortgaged Property, or terminate the lien of the First Mortgage Indenture on all or substantially all of the Mortgaged Property (other than in accordance with the terms of the First Mortgage Indenture), or deprive any holder of the benefits of the security of the lien of the First Mortgage Indenture;

- reduce the percentages of holders whose consent is required for any supplemental indenture or waiver of compliance with any provision of the First Mortgage Indenture or of any default thereunder and its consequences, or reduce the requirements for quorum and voting under the First Mortgage Indenture; or

- modify certain of the provisions of the First Mortgage Indenture relating to supplemental indentures, waivers of certain covenants and waivers of past defaults with respect to first mortgage bonds.

A supplemental indenture which changes, modifies or eliminates any provision of the First Mortgage Indenture expressly included solely for the benefit of holders of first mortgage bonds of one or more particular series or tranches will be deemed not to affect the rights under the First Mortgage Indenture of the holders of first mortgage bonds of any other series or tranche.

Satisfaction and Discharge

Any first mortgage bonds or any portion thereof will be deemed to have been paid and no longer outstanding for purposes of the First Mortgage Indenture and, at the Company's election, the Company's entire indebtedness with respect to those securities will be satisfied and discharged, if there shall have been irrevocably deposited with the First Mortgage Trustee or any Paying Agent (other than the Company), in trust:

- money sufficient, or

- in the case of a deposit made prior to the maturity of such first mortgage bonds, non-redeemable *eligible obligations* (as defined in the First Mortgage Indenture) sufficient, or

- a combination of the items listed in the preceding two bullet points, which in total are sufficient, to pay when due the principal of, and any premium, and interest due and to become due on such first mortgage bonds or portions of such first mortgage bonds on and prior to their maturity.

The Company's right to cause its entire indebtedness in respect of the first mortgage bonds of any series to be deemed to be satisfied and discharged as described above will be subject to the satisfaction of any conditions specified in the instrument creating such series.

The First Mortgage Indenture will be deemed satisfied and discharged when no first mortgage bonds remain outstanding and when the Company has paid all other sums payable by it under the First Mortgage Indenture.

All moneys the Company pays to the First Mortgage Trustee or any Paying Agent on First Mortgage Bonds that remain unclaimed at the end of two years after payments have become due may be paid to or upon the Company's order. Thereafter, the holder of such First Mortgage Bond may look only to the Company for payment.

Duties of the First Mortgage Trustee; Resignation and Removal of the First Mortgage Trustee; Deemed Resignation

The First Mortgage Trustee will have, and will be subject to, all the duties and responsibilities specified with respect to an indenture trustee under the Trust Indenture Act. Subject to these provisions, the First Mortgage Trustee will be under no obligation to exercise any of the powers vested in it by the First Mortgage Indenture at the request of any holder of first mortgage bonds, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred thereby. The First Mortgage Trustee will not be required to expend or risk its own funds or otherwise incur financial liability in the performance of its duties if the First Mortgage Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

The First Mortgage Trustee may resign at any time by giving written notice to the Company.

The First Mortgage Trustee may also be removed by act of the holders of a majority in principal amount of the then outstanding first mortgage bonds.

No resignation or removal of the First Mortgage Trustee and no appointment of a successor trustee will become effective until the acceptance of appointment by a successor trustee in accordance with the requirements of the First Mortgage Indenture.

Under certain circumstances, the Company may appoint a successor trustee and if the successor accepts, the First Mortgage Trustee will be deemed to have resigned.

Evidence to be Furnished to the First Mortgage Trustee

Compliance with First Mortgage Indenture provisions is evidenced by written statements of the Company's officers or persons selected or paid by the Company. In certain cases, opinions of counsel and certifications of an engineer, accountant, appraiser or other expert (who in some cases must be independent) must be furnished. In addition, the First Mortgage Indenture requires the Company to give to the First Mortgage Trustee, not less than annually, a brief statement as to the Company's compliance with the conditions and covenants under the First Mortgage Indenture.

Miscellaneous Provisions

The First Mortgage Indenture provides that certain first mortgage bonds, including those for which payment or redemption money has been deposited or set aside in trust as described under "— Satisfaction and Discharge" above, will not be deemed to be "outstanding" in determining whether the holders of the requisite principal amount of the outstanding first mortgage bonds have given or taken any demand, direction, consent or other action under the First Mortgage Indenture as of any date, or are present at a meeting of holders for quorum purposes.

The Company will be entitled to set any day as a record date for the purpose of determining the holders of outstanding first mortgage bonds of any series entitled to give or take any demand, direction, consent or other action under the First Mortgage Indenture, in the manner and subject to the limitations provided in the First Mortgage Indenture. In certain circumstances, the First Mortgage Trustee also will be entitled to set a record date for action by holders. If such a record date is set for any action to be taken by holders of particular first mortgage bonds, such action may be taken only by persons who are holders of such first mortgage bonds on the record date.

Governing Law

The First Mortgage Indenture and the first mortgage bonds provide that they are to be governed by and construed in accordance with the laws of the State of New York except where the Trust Indenture Act is applicable or where otherwise required by law. The effectiveness of the lien of the First Mortgage Indenture, and the perfection and priority thereof, will be governed by Kentucky law.

Summary of the Indenture

The following, in addition to the provisions contained elsewhere in this Official Statement, is a brief description of certain provisions of the Indenture. This description is only a summary and does not purport to be complete and definitive. Reference is made to the Indenture for the detailed provisions thereof.

Security

Pursuant to the Indenture, the Issuer will assign and pledge to the Trustee its interest in and to the Loan Agreement, including payments and other amounts due the Issuer thereunder, together with all moneys, property and securities from time to time held by the Trustee under the Indenture (with certain exceptions, including moneys held in or earnings on the Rebate Fund and the Purchase Fund).

The Bonds will be further secured by the First Mortgage Bonds to be delivered to the Trustee (see "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds"). The First Mortgage Bonds will be registered in the name of the Trustee and will be nontransferable, except to effect a transfer to any successor trustee. The Bonds will not be directly secured by the Project (although the Project is subject to the lien of the First Mortgage Indenture).

No Pecuniary Liability of the Issuer

No provision, covenant or agreement contained in the Indenture or in the Loan Agreement, nor any breach thereof, will constitute or give rise to any pecuniary liability of the Issuer or any charge upon any of its assets or its general credit or taxing powers. The Issuer has not obligated itself by making the covenants, agreements or provisions contained in the Indenture or in the Loan Agreement, except with respect to the application of the amounts assigned to payment of the principal or redemption price of and interest on the Bonds.

The Bond Fund

The payments to be made by the Company pursuant to the Loan Agreement to the Issuer and certain other amounts specified in the Indenture will be deposited into a Bond Fund established pursuant to the Indenture (the "Bond Fund") and will be maintained in trust by the Trustee. Moneys in the Bond Fund will be used solely and only for the payment of the principal or redemption price of and interest on the Bonds, and for the payment of the reasonable fees and expenses to which the Trustee, Bond Registrar, Tender Agent, Authenticating Agent, any Paying Agent and the Issuer are entitled pursuant to the Indenture or the Loan Agreement. Any moneys held in the Bond Fund will be invested by the Trustee at the specific written direction of the Company in certain Governmental Obligations, investment-grade corporate obligations and other investments permitted under the Indenture.

The Prior Bond Funds

The proceeds from the issuance of the Bonds will be deposited by the Trustee in (i) the County of Trimble, Kentucky, Pollution Control Revenue Bond Fund, 2000 Series A (Louisville Gas and Electric Company Project) and (ii) the County of Trimble, Kentucky, Pollution Control Revenue Bond Fund, 2002 Series A (Louisville Gas and Electric Company Project), in each case in an amount adequate to pay, together with other moneys to be provided by the Company, all principal of and accrued interest on the respective issue of the Prior Bonds to become due and payable on their scheduled redemption dates.

The Rebate Fund

A Rebate Fund has been created by the Indenture (the "Rebate Fund") and will be maintained as a separate fund free and clear of the lien of the Indenture. The Issuer, the Trustee and the Company have agreed to comply with all rebate requirements of the Code and, in particular, the Company has agreed that if necessary, it will deposit in the Rebate Fund any such amount as is required under the Code. However, the Issuer, the Trustee and the Company may disregard the Rebate Fund provisions to the extent that they receive an opinion of Bond Counsel that such failure to comply will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes.

Discharge of Indenture

When all the Bonds and all fees and charges accrued and to accrue of the Trustee and the Paying Agent have been paid or provided for, and when proper notice has been given to the Bondholders or the Trustee that the proper amounts have been so paid or provided for, and if the Issuer is not in default in any other respect under the Indenture, the Indenture will become null and void. The Bonds will be deemed to have been paid and discharged when there have been irrevocably deposited with the Trustee moneys sufficient to pay the principal or redemption price of and accrued interest on such Bonds to the due date (whether such date be by reason of maturity or upon redemption) or, in lieu thereof, Governmental Obligations have been deposited which mature in such amounts and at such times as will provide the funds necessary to so pay such Bonds, and when all reasonable and necessary fees and expenses of the Trustee, the Tender Agent, the Authenticating Agent, the Bond Registrar and the Paying Agent have been paid or provided for.

Surrender of First Mortgage Bonds

Upon payment of any principal or redemption price of and interest on any of the Bonds which reduces the principal amount of Bonds outstanding, or upon provision for the payment thereof having been made in accordance with the Indenture (see "Discharge of Indenture" above), First Mortgage Bonds in a principal amount equal to the principal amount of the Bonds so paid, or for the payment of which such provision has been made, shall be surrendered by the Trustee to the First Mortgage Trustee. The First Mortgage Bonds so surrendered shall be deemed fully paid and the obligations of the Company thereunder terminated.

Defaults and Remedies

Each of the following events constitutes an "Event of Default" under the Indenture:

(a) failure to make due and punctual payment of any installment of interest on any Bond within a period of one Business Day from the due date;

(b) failure to make due and punctual payment of the principal of, or premium, if any, on any Bond on the due date, whether at the stated maturity thereof, or upon proceedings for redemption, or upon the maturity thereof by declaration or if payment of the purchase price of any Bond required to be purchased pursuant to the Indenture is not made when such payment has become due and payable, provided that no Event of Default has occurred in respect of failure to receive such purchase price for any Bond if the Company has made the payment at the opening of business on the next Business Day as described in the last paragraph under "Summary of the Bonds — Purchases of Bonds — Remarketing and Purchase of Bonds" above;

(c) failure of the Issuer to perform or observe any other of the covenants, agreements or conditions in the Indenture or in the Bonds which failure continues for a period of 30 days after written notice by the Trustee or by the registered owners holding not less than 25% in aggregate principal amount of all Bonds outstanding, provided, however, that if such failure is capable of being cured, but cannot be cured in such 30-day period, it will not constitute an Event of Default under the Indenture if corrective action in respect of such failure is instituted within such 30-day period and is being diligently pursued;

(d) the occurrence of an "Event of Default" under the Loan Agreement (see "Summary of the Loan Agreement — Events of Default"); or

(e) all first mortgage bonds outstanding under the First Mortgage Indenture, if not already due, shall have become immediately due and payable, whether by declaration or otherwise, and such acceleration shall not have been rescinded by the First Mortgage Trustee.

Upon the occurrence of an Event of Default under the Indenture, the Trustee may, and upon the written request of the registered owners holding not less than 25% in aggregate principal amount of Bonds then outstanding and upon receipt of indemnity reasonably satisfactory to it, must: (i) enforce each and every right granted to the Trustee as a holder of the First Mortgage Bonds (see "Summary of the First Mortgage Bonds and the First Mortgage Indenture"), (ii) declare the principal of all Bonds and interest accrued thereon to be immediately due and payable and (iii) declare all payments under the Loan Agreement to be immediately due and payable and enforce each and every other right granted to the Issuer under the Loan Agreement for the benefit of the Bondholders. Interest on the Bonds will cease to accrue on the date of issuance of a declaration of acceleration of payment of the principal and interest on the Bonds.

In exercising such rights, the Trustee will take any action that, in the judgment of the Trustee, would best serve the interests of the registered owners, taking into account the security and remedies afforded to holders of first mortgage bonds under the First Mortgage Indenture. Upon the occurrence of an Event of Default under the Indenture, the Trustee may also proceed to pursue any available remedy by suit at law or in equity to enforce the payment of the principal or redemption price of and interest on the Bonds then outstanding.

If an Event of Default under the Indenture shall occur and be continuing and the maturity date of the Bonds has been accelerated (to the extent the Bonds are not already due and payable) as a consequence of such event of default, the Trustee may, and upon the written request of the registered owners holding not less than 25% in principal amount of all Bonds then outstanding and upon receipt of indemnity satisfactory to it shall, exercise such rights as it shall possess under the First Mortgage Indenture as a holder of the First Mortgage Bonds and shall also issue a Redemption Demand for such First Mortgage Bonds to the First Mortgage Trustee.

If the Trustee recovers any moneys following an Event of Default, unless the principal of the Bonds has been declared due and payable, all such moneys will be applied in the following order: (i) to the payment of the fees, expenses, liabilities and advances incurred or made by the Trustee and the Paying Agent and the payment of any sums due and payable to the United States pursuant to Section 148(f) of the Code, (ii) to the payment of all interest then due on the Bonds, and (iii) to the payment of unpaid principal and premium, if any, of the Bonds. If the principal of the Bonds has become due or has been accelerated, such moneys will be applied in the following order: (i) to the payment of the fees, expenses, liabilities and advances incurred or made by the Trustee and the Paying Agent and (ii) to the payment of principal of and interest then due and unpaid on the Bonds.

No Bondholder may institute any suit or proceeding in equity or at law for the enforcement of the Indenture unless an Event of Default has occurred of which the Trustee has been notified or is deemed to have notice, and registered owners holding not less than 25% in aggregate principal amount of Bonds then outstanding have made written request to the Trustee to proceed to exercise the powers granted under the Indenture or to institute such action in their own name and the Trustee fails or refuses to exercise its powers within a reasonable time after receipt of indemnity satisfactory to it.

Any judgment against the Issuer pursuant to the exercise of rights under the Indenture will be enforceable only against specific assigned payments, funds and accounts under the Indenture in the hands of the Trustee. No deficiency judgment will be authorized against the general credit of the Issuer.

Waiver of Events of Default

Except as provided below, the Trustee may in its discretion waive any Event of Default under the Indenture and will do so upon the written request of the registered owners holding a majority in principal amount of all Bonds then outstanding. If, after the principal of all Bonds then outstanding have been declared to be due and payable as a result of a default under the Indenture and prior to any judgment or decree for the appointment of a receiver or for the payment of the moneys due has been obtained or entered, (i) the Company causes to be deposited with the Trustee a sum sufficient to pay all matured installments of interest upon all Bonds and the principal of and premium, if any, on any and all Bonds which would become due otherwise than by reason of such declaration (with interest thereon as provided in the Indenture) and the expenses of the Trustee in connection with such default and (ii) all Events of Default under the Indenture (other than nonpayment of the principal of Bonds due by said declaration) have been remedied, then such Event of Default will be deemed waived and such declaration and its consequences rescinded and annulled by the Trustee. Such waiver, rescission and annulment will be binding upon all Bondholders. No such waiver, rescission and annulment will extend to or affect any subsequent Event of Default or impair any right or remedy consequent thereon.

Upon any waiver or rescission as described above or any discontinuance or abandonment of proceedings under the Indenture, the Trustee shall immediately rescind in writing any Redemption Demand of First Mortgage Bonds previously given to the First Mortgage Trustee. The rescission under the First Mortgage Indenture of a declaration that all first mortgage bonds outstanding under the First Mortgage Indenture are immediately due and payable shall also constitute a waiver of an Event of Default described in paragraph (e) under the subheading "Defaults and Remedies" above and a waiver and rescission of its consequences, provided that no such waiver or rescission shall extend to or affect any subsequent or other default or impair any right consequent thereon.

Notwithstanding the foregoing, nothing in the Indenture will affect the right of a registered owner to enforce the payment of principal or redemption price of and interest on the Bonds after the maturity thereof.

Voting of First Mortgage Bonds Held by Trustee

The Indenture provides that the Trustee, as the holder of the First Mortgage Bonds, will be required to attend such meeting or meetings of bondholders under the First Mortgage Indenture or, at its option, deliver its proxy in connection therewith, as relate to matters with respect to which it, as such holder, is entitled to vote or consent. The Trustee, either at any such meeting or meetings or otherwise when the consent of the holders of the First Mortgage Bonds is sought without a meeting, will be required to vote all First Mortgage Bonds then held by it, or consent with respect thereto, proportionately with the vote or consent of the holders of all other securities of the Company then outstanding under the First Mortgage Indenture eligible to vote or consent, as evidenced by, and as to be delivered to the Trustee, a certificate signed by the temporary chairman, the temporary secretary, the permanent chairman, the permanent secretary, or an inspector of votes at any meeting or meetings of security holders under the First Mortgage Indenture, or by the First Mortgage Trustee in the case of consents of such security holders which are sought without a meeting, which states what the signer thereof reasonably believes are the proportionate votes or consents of the holders of all securities (other than the First Mortgage Bonds) outstanding under the First Mortgage Indenture and counted for the purposes of determining whether such security holders have approved or consented to the matter put before them; provided, however, that the Trustee shall not so vote in favor of, or so consent to, any amendment or modification of the First Mortgage Indenture, which, if it were an amendment or modification of the Indenture, would require the consent of the Bondholders as described in the third paragraph under the heading "Summary of the Indenture – Supplemental Indenture," without the prior consent and approval of Bondholders which would be so required; provided further that as a condition to the Trustee voting or giving such consent, the Trustee shall have received a certificate of a Company representative or an opinion of counsel, at its election, stating that such voting or consent is authorized or permitted by the Indenture.

Supplemental Indentures

The Issuer and the Trustee may enter into indentures supplemental to the Indenture as shall not be inconsistent with the terms and provisions of the Indenture, without the consent of or notice to the Bondholders, in order (i) to cure any ambiguity or formal defect or omission in the Indenture, (ii) to grant to or confer upon the Trustee, as may lawfully be granted, additional rights, remedies, powers or authorities for the benefit of the Bondholders, (iii) to subject to the Indenture additional revenues, properties or collateral, (iv) to permit qualification of the Indenture under any federal statute or state blue sky law, (v) to add additional covenants and agreements of the Issuer for the protection of the Bondholders or to surrender or limit any rights, powers or authorities reserved to or conferred upon the

Issuer, (vi) to make any other modification or change to the Indenture which, in the sole judgment of the Trustee, does not adversely affect the Trustee or any Bondholder, (vii) to make other amendments not otherwise permitted by (i), (ii), (iii), (iv) or (v) of this paragraph to provisions relating to federal income tax matters under the Code or other relevant provisions if, in the opinion of Bond Counsel, those amendments would not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes, (viii) to make any modification or change to the Indenture necessary to provide liquidity or credit support for the Bonds, including any modifications necessary to upgrade or maintain the then applicable ratings on the Bonds or (ix) to permit the issuance of the Bonds in other than book-entry-only form or to provide changes to or for the book-entry system.

Notwithstanding the foregoing, the Company, with the consent of the Trustee, may at any time further secure the Bonds by means of a letter of credit, other credit facility or other guarantee or collateral.

Exclusive of supplemental indentures for the purposes set forth in the preceding two paragraphs, the consent of registered owners holding a majority in aggregate principal amount of all Bonds then outstanding is required to approve any supplemental indenture, except no such supplemental indenture may permit, without the consent of all of the registered owners of the Bonds then outstanding, (i) an extension of the maturity of the principal of or the interest on any Bond issued under the Indenture or a reduction in the principal amount of any Bond or the rate of interest or time of redemption or redemption premium thereon, (ii) a privilege or priority of any Bond or Bonds over any other Bond or Bonds, (iii) a reduction in the aggregate principal amount of the Bonds required for consent to such supplemental indenture or (iv) the deprivation of any registered owners of the lien of the Indenture.

If at any time the Issuer requests the Trustee to enter into any supplemental indenture requiring the consent of the registered owners of the Bonds, the Trustee, upon being satisfactorily indemnified with respect to expenses, must notify all such registered owners. Such notice must set forth the nature of the proposed supplemental indenture and must state that copies thereof are on file at the designated office of the Trustee for inspection. If, within sixty days (or such longer period as prescribed by the Issuer or the Company) following the giving of such notice, the registered owners holding the requisite amount of the Bonds outstanding have consented to the execution thereof, no Bondholder will have any right to object or question the execution thereof.

No supplemental indenture will become effective unless the Company consents to the execution and delivery of such supplemental indenture. The Company will be deemed to have consented to the execution and delivery of any supplemental indenture if the Trustee does not receive a notice of protest or objection signed by the Company on or before 4:30 p.m., local time in the city in which the designated office of the Trustee is located, on the fifteenth day after the mailing to the Company of a notice of the proposed changes and a copy of the proposed supplemental indenture.

Enforceability of Remedies

The remedies available to the Trustee, the Issuer and the owners upon an Event of Default under the Loan Agreement, the Indenture or the First Mortgage Indenture are in many respects dependent upon judicial actions which are often subject to discretion and delay. Under existing constitutional and statutory law and judicial decisions, the remedies specified by the Loan Agreement, the Indenture and the First Mortgage Indenture may not be readily available or may be limited. The various legal opinions to be delivered concurrently with the delivery of the Bonds will be qualified as to the enforceability of the various legal instruments by limitations imposed by principles of equity, bankruptcy, reorganization, insolvency, moratorium or other similar laws affecting the rights of creditors generally.

Tax Treatment

In the opinion of Bond Counsel, under existing law, including current statutes, regulations, administrative rulings and official interpretations, subject to the qualifications and exceptions set forth below, interest on the Bonds will be excluded from the gross income of the recipients thereof for federal income tax purposes, except that no opinion will be expressed regarding such exclusion from gross income with respect to any Bond during any period in which it is held by a "substantial user" of the Project or a "related person" as such terms are used in Section 147(a) of the Code. Interest on the Bonds will be an item of tax preference in determining alternative minimum taxable income for individuals and corporations under the Code. It is Bond Counsel's further opinion that, subject to the assumptions stated in the preceding sentence, (i) interest on the Bonds will be excluded from gross income of the owners thereof for Kentucky income tax purposes and (ii) the Bonds will be exempt from all ad valorem taxes in Kentucky.

The opinion of Bond Counsel assumes and is conditioned on the payment and discharge of all of the Prior Bonds on or before the 90th day following the date of issuance of the Bonds. The Company has agreed (i) to apply all of the proceeds of the bonds to the payment and discharge of the Prior Bonds within 90 days following the date of issuance of the Bonds, (ii) to provide additional funds necessary, on or prior to a day within 90 days following the date of issuance of the Bonds, to defease and discharge the Prior Bonds on such day and (iii) to give irrevocable instructions on the date of issuance of the Bonds to the trustee in respect of the Prior Bonds directing the redemption of the Prior Bonds.

The opinion of Bond Counsel as to the excludability of interest from gross income for federal income tax purposes will be based upon and will assume the accuracy of certain representations of facts and circumstances, including with respect to the Project, which are within the knowledge of the Company and compliance by the Company with certain covenants and undertakings set forth in the proceedings authorizing the Bonds which are intended to assure that the Bonds are and will remain obligations the interest on which is not includable in gross income of the recipients thereof under the law in effect on the date of such opinion. Bond Counsel will not independently verify the accuracy of the certifications and representations made by the Company and the Issuer. On the date of the opinion and subsequent to the original delivery of the Bonds, such representations of facts and circumstances must be accurate and such covenants and undertakings must continue to be complied with in order that interest on the Bonds be and remain excludable from gross income of the recipients thereof for federal income tax purposes under existing law. Bond Counsel will express no opinion (i) regarding the exclusion of interest on any Bond from gross income for federal income tax purposes on or after the date on which any change, including any interest rate conversion, permitted by the documents other than with the approval of Bond Counsel is taken which adversely affects the tax treatment of the Bonds or (ii) as to the treatment for purposes of federal income taxation of interest on the Bonds upon a Determination of Taxability.

The Code prescribes a number of qualifications and conditions for the interest on state and local government obligations to be and to remain excluded from gross income for federal income tax purposes, some of which, including provisions for potential payments by the Issuer to the federal government, require future or continued compliance after issuance of the Bonds in order for the interest to be and to continue to be so excluded from the date of issuance. Noncompliance with certain of these requirements by the Company or the Issuer with respect to the Bonds could cause the interest on the Bonds to be included in gross income for federal income tax purposes and to be subject to federal income taxation retroactively to the date of their issuance. The Company and the Issuer will each covenant to take all actions required of each to assure that the interest on the Bonds will be and remain excluded from gross income for federal income tax purposes, and not to take any actions that would adversely affect that exclusion.

The opinion of Bond Counsel as to the exclusion of interest on the Bonds from gross income for federal income tax purposes and federal tax treatment of interest on the Bonds will be subject to the following exceptions and qualifications:

(a) The Code also provides for a "branch profits tax" which subjects to tax, at a rate of 30%, the effectively connected earnings and profits of a foreign corporation which engages in a United States trade or business. Interest on the Bonds would be includable in the amount of effectively connected earnings and profits and thus would increase the branch profits tax liability.

(b) The Code also provides that passive investment income, including interest on the Bonds, may be subject to taxation for any S corporation with Subchapter C earnings and profits at the close of its taxable year if greater than 25% of its gross receipts is passive investment income.

Except as stated above, Bond Counsel will express no opinion as to any federal or Kentucky tax consequences resulting from the receipt of interest on the Bonds.

Owners of the Bonds should be aware that the ownership of the Bonds may result in collateral federal income tax consequences. For instance, the Code provides that property and casualty insurance companies will be required to reduce their loss reserve deductions by 15% of the tax-exempt interest received on certain obligations, such as the Bonds, acquired after August 7, 1986. (For purposes of the immediately preceding sentence, a portion of dividends paid to an affiliated insurance company may be treated as tax-exempt interest.) The Code further provides for the disallowance of any deduction for interest expenses incurred by banks and certain other financial institutions allocable to carrying certain tax-exempt obligations, such as the Bonds, acquired after August 7, 1986. The Code also provides that, with respect to taxpayers other than such financial institutions, such taxpayers will be unable to deduct any portion of the interest expenses incurred or continued to purchase or carry the Bonds. The Code also provides, with respect to individuals, that interest on tax-exempt obligations, including the Bonds, is included in modified adjusted gross income for purposes of determining the taxability of social security and railroad retirement benefits. Furthermore, the earned income tax credit is not allowed for individuals with an aggregate amount of disqualified income within the meaning of Section 32 of the Code, which exceeds $2,200. Interest on the Bonds will be taken into account in the calculation of disqualified income. Prospective purchasers of the Bonds should consult their own tax advisors regarding such matters and any other tax consequences of holding the Bonds.

From time to time, there are legislative proposals in Congress which, if enacted, could alter or amend one or more of the federal tax matters referred to above or could adversely affect the market value of the Bonds. It cannot be predicted whether or in what form any such proposal might be enacted or whether, if enacted, it would apply to obligations (such as the Bonds) issued prior to enactment.

A draft of the opinion of Bond Counsel relating to the Bonds in substantially the form in which it is expected to be delivered on the date of issuance of the Bonds is attached as Appendix B to this Official Statement.

Legal Matters

Certain legal matters incident to the authorization, issuance and sale by the Issuer of the Bonds are subject to the approving opinion of Bond Counsel. Bond Counsel has in the past, and may in the future, act as counsel to the Company with respect to certain matters. Certain legal matters will be passed upon for the Issuer by its County Attorney. Certain legal matters will be passed upon for the Company by Jones Day, Chicago, Illinois, and Gerald A. Reynolds, General Counsel, Chief Compliance Officer and

Corporate Secretary for the Company. Certain legal matters will be passed upon for the Underwriter by its counsel, McGuireWoods LLP, Chicago, Illinois.

Underwriting

J.P. Morgan Securities LLC (the "Underwriter") has agreed, subject to the terms of the bond purchase agreement between the Issuer and the Underwriter, to purchase the Bonds from the Issuer at the public offering price set forth on the cover page of this Official Statement. The Underwriter is committed to purchase all the Bonds if any Bonds are purchased. In connection with the underwriting of the Bonds, the Underwriter will be paid by the Company a fee in the amount of $312,500, which excludes reimbursement for certain reasonable out-of-pocket expenses.

The Underwriter may offer and sell the Bonds to certain dealers and others at prices lower than the public offering price set forth on the cover page of this Official Statement. After the Bonds are released for sale to the public, the public offering price and other selling terms may from time to time be varied by the Underwriter.

In connection with the offering of the Bonds, the Underwriter may over-allot or effect transactions that stabilize or maintain the market prices of such Bonds at levels above those that might otherwise prevail in the open market. Such stabilizing, if commenced, may be discontinued at any time.

Pursuant to an Inducement Letter, the Company has agreed to indemnify the Underwriter and the Issuer against certain civil liabilities, including liabilities under the federal securities laws, or contribute to payments that the Underwriter or the Issuer may be required to make in respect thereof.

J.P. Morgan Securities LLC (or its affiliates), the Underwriter of the Bonds, serves as the auction broker-dealer for the 2000 Bonds and owns a substantial portion of the 2000 Bonds that will be refunded with the proceeds of the Bonds.

J.P. Morgan Securities LLC and its affiliates together comprise a full service financial institution engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage activities. Such activities may involve or relate to assets, securities and/or instruments of the Issuer and/or the Company or its affiliates (whether directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with (or that are otherwise involved with transactions by) the Issuer and/or the Company. J.P. Morgan Securities LLC and its affiliates may have, from time to time, engaged, and may in the future engage, in transactions with, and performed and may in the future perform, various investment banking services for the Issuer and/or the Company for which they received or will receive customary fees and expenses. Under certain circumstances, J.P. Morgan Securities LLC and its affiliates may have certain creditor and/or other rights against the Issuer and/or the Company and any affiliates thereof in connection with such transactions and/or services. In addition, J.P. Morgan Securities LLC and its affiliates may currently have and may in the future have investment and commercial banking, trust and other relationships with parties that may relate to assets of, or be involved in the issuance of securities and/or instruments by, the Issuer and/or the Company and any affiliates thereof. J.P. Morgan Securities LLC and its affiliates also may communicate independent investment recommendations, market advice or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and at any time may hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

Continuing Disclosure

Because the Bonds will be special and limited obligations of the Issuer, the Issuer is not an "obligated person" for purposes of Rule 15c2-12 (the "Rule") promulgated by the SEC under the Exchange Act, and does not have any continuing obligations thereunder. Accordingly, the Issuer will not provide any continuing disclosure information with respect to the Bonds or the Issuer.

In order to enable the Underwriter to comply with the requirements of the Rule, the Company will covenant in a continuing disclosure undertaking agreement to be delivered to the Trustee for the benefit of the holders of the Bonds (the "Continuing Disclosure Agreement") to provide certain continuing disclosure for the benefit of the holders of the Bonds. Under its Continuing Disclosure Agreement, the Company will covenant to take the following actions:

(i) The Company will provide to the Municipal Securities Rulemaking Board ("MSRB") (in electronic format) (a) annual financial information of the type set forth in Appendix A to this Official Statement (including any information incorporated by reference in Appendix A) and (b) audited financial statements prepared in accordance with generally accepted accounting principles, in each case not later than 120 days after the end of the Company's fiscal year.

(ii) The Company will file in a timely manner not in excess of 10 business days after the occurrence of the event with the MSRB notice of the occurrence of any of the following events (if applicable) with respect to the Bonds: (a) principal and interest payment delinquencies; (b) non-payment related defaults, if material; (c) any unscheduled draws on debt service reserves reflecting financial difficulties; (d) unscheduled draws on credit enhancement facilities reflecting financial difficulties; (e) substitution of credit or liquidity providers, or their failure to perform; (f) adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701-TEB) or other material notices or determinations with respect to the tax status of the Bonds, or other material events affecting the tax status of the Bonds; (g) modifications to rights of the holders of the Bonds, if material; (b) the giving of notice of optional or unscheduled redemption of any Bonds, if material, and tender offers; (i) defeasance of the Bonds or any portion thereof; (j) release, substitution, or sale of property securing repayment of the Bonds, if material; (k) rating changes; (l) bankruptcy, insolvency, receivership or similar event of the Company; (m) the consummation of a merger, consolidation or acquisition involving the Company, or the sale of all or substantially all of the assets of the Company, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material; and (n) appointment of a successor or additional trustee or a change of name of a trustee, if material.

(iii) The Company will file in a timely manner with the MSRB notice of a failure by the Company to file any of the information referred to in paragraph (i) above hy the due date.

The Company may amend its Continuing Disclosure Agreement (and the Trustee shall agree to any amendment so requested by the Company that does not change the duties of the Trustee thereunder) or waive any provision thereof, but only with a change in circumstances that arises from a change in legal requirements, change in law, or change in the nature or status of the Company with respect to the Bonds or the type of business conducted by the Company; provided that the undertaking, as amended or following such waiver, would have complied with the requirements of the Rule on the date of issuance of the Bonds, after taking into account any amendments to the Rule as well as any change in circumstances, and the amendment or waiver does not materially impair the interests of the holders of the Bonds to which such undertaking relates, in the opinion of the Trustee or counsel expert in federal securities laws acceptable to both the Company and the Trustee, or is approved by the Beneficial Owners of a majority in aggregate principal amount of the outstanding Bonds. The Company acknowledges that its undertakings pursuant to the Rule described under this heading are intended to be for the benefit of the holders of the Bonds and shall be enforceable by the holders of those Bonds or by the Trustee on behalf of such holders. Any breach by the Company of these undertakings pursuant to the Rule will not constitute an event of default under the Indenture, the Loan Agreement or the Bonds.

The Company is a party to continuing disclosure agreements with respect to nine series of pollution control bonds. The MSRB's Electronic Municipal Market Access ("EMMA") website reflects that, within the past five years, for two series of such bonds, the Company's 2011 annual financial statements were timely posted, but to outdated CUSIP numbers. The 2011 annual financial statements were re-posted to the correct CUSIP numbers for those series in May 2012. With respect to both series of bonds, the Company also failed to file on the MSRB's EMMA website in a timely manner a notice of the Company's failure to file such 2011 financial statements in accordance with the applicable continuing disclosure agreements. The Company has subsequently made all of these corrective filings. The Company's 2011 annual financial statements had been filed with the SEC on February 28, 2012. The Company has had, and continues to have, procedures in place in order to make material event notices and financial statement filings on an ongoing basis.

This Official Statement has been duly approved, executed and delivered by the County Judge/Executive of the Issuer, on behalf of the Issuer. However, the Issuer has not and does not assume any responsibility as to the accuracy or completeness of any of the information in this Official Statement except for information furnished by the Issuer under the heading "The Issuer."

COUNTY OF TRIMBLE, KENTUCKY

APPENDIX A

THE COMPANY

Louisville Gas and Electric Company (the "Company"), incorporated in Kentucky in 1913, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the storage, distribution and sale of natural gas. As of December 31, 2015, the Company provides electric service to approximately 403,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in nine counties and provides natural gas service to approximately 322,000 customers in its electric service area and eight additional counties in Kentucky. The Company's coal-fired electric generating stations, all equipped with systems to reduce sulphur dioxide emissions, produce most of the Company's electricity. The remainder is generated by a natural gas combined cycle combustion turbine, a hydroelectric power plant and natural gas and oil fueled combustion turbines. Underground natural gas storage fields help the Company provide economical and reliable natural gas service to customers.

The Company is a wholly-owned subsidiary of LG&E and KU Energy LLC and an indirect wholly-owned subsidiary of PPL Corporation. The Company's affiliate, Kentucky Utilities Company ("KU"), is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. The Company's obligations under the Loan Agreement are solely its own, and not those of any of its affiliates. None of KU, PPL Corporation or the Company's other affiliates will be obligated to make any payment on the Loan Agreement or the Bonds.

The Company's executive offices are located at 220 West Main Street, Louisville, Kentucky 40202, telephone: (502) 627-2000.

The information above concerning the Company is only a summary and does not purport to be comprehensive. Additional information regarding the Company, including audited financial statements, is available in the documents listed under the heading "Documents Incorporated by Reference," which documents are incorporated by reference herein.

Selected Financial Data
(Dollars in millions)

	Six Months Ended June 30, 2016	Six Months Ended June 30, 2015	Year Ended December 31, 2015	Year Ended December 31, 2014	Year Ended December 31, 2013
Operating revenues	$ 709	$ 770	$ 1,444	$ 1,533	$ 1,410
Operating income	$ 195	$ 171	$ 362	$ 324	$ 293
Net income	$ 96	$ 88	$ 185	$ 169	$ 163
Total assets[1]	$ 6,157	$ 5,721	$ 6,068	$ 5,654	$ 4,923
Long-term debt obligations (including amounts due within one year)[1]	$ 1,642	$ 1,346	$ 1,642	$ 1,345	$ 1,345
Ratio of earnings to fixed charges[2]	5.2	6.1	5.9	6.3	8.1

Capitalization:

	June 30, 2016	% of Capitalization
Long-term debt and notes payable	$ 1,752	42%
Common equity	2,412	58%
Total capitalization	$ 4,164	100%

(1) Effective December 31, 2015, LG&E retrospectively adopted accounting guidance to simplify the presentation of debt issuance costs. The guidance requires certain debt issuance costs to be presented on the balance sheet as a direct deduction from the carrying amount of the associated debt liability. As a result, all periods reported in the December 31, 2015 Form 10-K reflected the retrospective adoption of this guidance. Amounts reported in the table above for June 30, 2015 and December 31, 2013, also reflect retrospective reclassifications from other noncurrent assets to long-term debt of $7 million and $8 million, respectively.

Additionally, effective October 1, 2015, LG&E retrospectively adopted accounting guidance to simplify the presentation of deferred taxes which requires that deferred tax assets and deferred tax liabilities be classified as noncurrent on the balance sheet. As a result, all periods reported in the December 31, 2015 Form 10-K reflected the retrospective adoption of this guidance. Amounts reported in the table above for June 30, 2015 and December 31, 2013, also reflect retrospective reclassifications from other current assets to noncurrent deferred tax liabilities of $17 million and $3 million, respectively.

(2) For purposes of this ratio, "Earnings" consist of earnings (as defined below) from continuing operations plus fixed charges. Fixed charges consist of all interest on indebtedness, amortization of debt discount and expense and the portion of rental expense that represents an imputed interest component. Earnings from continuing operations consist of income before taxes and the mark-to-market impact of derivative instruments.

The selected financial data presented above for the three fiscal years ended December 31, 2015, and as of December 31 for each of those years, have been derived from the Company's audited financial statements. The selected financial data presented above for the six months ended June 30, 2016 and 2015 have been derived from the Company's unaudited financial statements for the six months ended June 30, 2016 and 2015. The Company's audited financial statements for the three fiscal years ended December 31, 2015, and as of December 31 for each of those years, are included in the Company's Form 10-K for the year ended December 31, 2015 incorporated by reference herein. The Company's unaudited financial statements for the six months ended June 30, 2016 are included in the Company's Form 10-Q for the quarter ended June 30, 2016 incorporated by reference herein. "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Form 10-K for the year ended December 31, 2015 and "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Form 10-Q for the quarter ended June 30, 2016, as well as the Combined Notes to Financial Statements as of December 31, 2015, 2014 and 2013 and the Combined Notes to Condensed Financial Statements (Unaudited) as of June 30, 2016 and December 31, 2015 and for the six-month periods ended June 30, 2016 and 2015, should be read in conjunction with the above information. Ernst & Young LLP audited the Company's financial statements for the three fiscal years ended December 31, 2015.

Risk Factors

Investing in the Bonds involves risk. Please see the risk factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2015, which is incorporated by reference in this Appendix A. Before making an investment decision, you should carefully consider these risks as well as the other information contained or incorporated by reference in this Appendix A. Risks and uncertainties not presently known to the Company or that the Company currently deems immaterial may also impair its business operations, its financial results and the value of the Bonds.

Available Information

The Company is subject to the information requirements of the Securities Exchange Act of 1934, as amended, and, accordingly, files reports and other information with the Securities and Exchange Commission (the "SEC"). Such reports and other information on file can be inspected and copied at the public reference facilities of the SEC, currently at 100 F Street, N.E., Room 1580, Washington, D.C. 20549; or from the SEC's Web Site (http://www.sec.gov). Please call the SEC at 1-800-SEC-0330 for further information on the public reference room.

Documents Incorporated by Reference

The following documents, as filed by the Company with the SEC, are incorporated herein by reference:

1. Form 10-K Annual Report of the Company for the year ended December 31, 2015;

2. Form 10-Q Quarterly Reports of the Company for the quarters ended March 31, 2016 and June 30, 2016; and

3. Form 8-K Current Reports filed with the SEC on January 12, 2016, February 3, 2016, and June 17, 2016.

All documents filed by the Company with the SEC pursuant to Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 subsequent to the date of this Official Statement and prior to the termination of the offering of the Bonds shall be deemed to be incorporated by reference in this Appendix and to be made a part hereof from their respective dates of filing. Any statement contained in a document incorporated or deemed to be incorporated by reference in this Official Statement shall be deemed to be modified or superseded for purposes of this Official Statement to the extent that a statement contained in this Official Statement or in any other subsequently filed document which also is or is deemed to be incorporated by reference in this Official Statement modifies or supersedes such statement. Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Official Statement.

The Company hereby undertakes to provide without charge to each person (including any beneficial owner) to whom a copy of this Official Statement has been delivered, on the written or oral request of any such person, a copy of any or all of the documents referred to above which have been or may be incorporated in this Official Statement by reference, other than certain exhibits to such documents. Requests for such copies should be directed to Treasurer, Louisville Gas and Electric Company, 220 West Main Street, Louisville, Kentucky 40202, telephone: (502) 627-2000.

APPENDIX B

(FORM OF OPINION OF BOND COUNSEL)

____, 2016

Re: **$125,000,000 County of Trimble, Kentucky, Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project)**

We hereby certify that we have examined certified copies of the proceedings of record of the County of Trimble, Kentucky (the "**County**"), acting by and through its Fiscal Court as its duly authorized governing body, preliminary to and in connection with the issuance by the County of its Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project), dated their date of issuance, in the aggregate principal amount of $125,000,000 (the "**2016 Series A Bonds**"). The 2016 Series A Bonds are issued under the provisions of Sections 103.200 to 103.285, inclusive, of the Kentucky Revised Statutes (the "**Act**"), for the purpose of providing funds which will be used, with other funds provided by Louisville Gas and Electric Company (the "**Company**") for the current refunding of (i) $83,335,000 aggregate principal amount of the County's Pollution Control Revenue Bonds, 2000 Series A (Louisville Gas and Electric Company Project), dated August 9, 2000 (the "**Refunded 2000 Series A Bonds**"), and (ii) $41,665,000 aggregate principal amount of the County's Pollution Control Revenue Bonds, 2002 Series A (Louisville Gas and Electric Company Project), dated October 23, 2002 (the "**Refunded 2002 Series A Bonds**", and collectively with the Refunded 2000 Series A Bonds, the "**Refunded Bonds**"), which were issued for the purpose of currently refunding a portion of the costs of construction of air and water pollution control facilities serving certain electric generating units of the Company located in Trimble County, Kentucky (the "**Project**"), as provided by the Act.

The 2016 Series A Bonds mature on September 1, 2044 and bear interest initially at the Weekly Rate, as defined in the Indenture, hereinafter described, subject to change as provided in such Indenture. The 2016 Series A Bonds will be subject to optional and mandatory redemption prior to maturity at the times, in the manner, and upon the terms set forth in the 2016 Series A Bonds. From such examination of the proceedings of the Fiscal Court of the County referred to above and from an examination of the Act, we are of the opinion that the County is duly authorized and empowered to issue the 2016 Series A Bonds under the laws of the Commonwealth of Kentucky now in force.

We have examined an executed counterpart of a certain Loan Agreement, dated as of September 1, 2016 (the "**Loan Agreement**"), by and between the County and the Company and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Loan Agreement, pursuant to which the County has agreed to issue the 2016 Series A Bonds and to lend the proceeds thereof to the Company to provide funds to pay and discharge, with other funds provided by the Company, the Refunded Bonds. The Company has agreed to make loan payments to the Trustee at times and in amounts fully adequate to pay maturing principal of, interest on, and redemption premium, if any, on the 2016 Series A Bonds as same become due and payable. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Loan Agreement; that the Loan Agreement has been duly authorized, executed, and delivered by the County; and that the Loan Agreement is a legal, valid, and binding obligation of the County, enforceable in accordance with its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency, or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

We have also examined an executed counterpart of a certain Indenture of Trust, dated as of September 1, 2016 (the "**Indenture**"), by and between the County and U.S. Bank National Association, as trustee (the "**Trustee**"), securing the 2016 Series A Bonds and setting forth the covenants and undertakings of the County in connection with the 2016 Series A Bonds and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Indenture. Pursuant to the Indenture, certain of the County's rights under the Loan Agreement, including the right to receive payments thereunder, and all moneys and securities held by the Trustee in accordance with the Indenture (except moneys and securities in the Rebate Fund created thereby) have been assigned to the Trustee, as security for the holders of the 2016 Series A Bonds. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Indenture; that the Indenture has been duly authorized, executed, and delivered by the County; and that the Indenture is a legal, valid, and binding obligation upon the parties thereto according to its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency, or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

In our opinion the 2016 Series A Bonds have been validly authorized, executed, and issued in accordance with the laws of the Commonwealth of Kentucky now in full force and effect, and constitute legal, valid, and binding special and limited obligations of the County entitled to the benefit of the security provided by the Indenture and enforceable in accordance with their terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency, or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought. The 2016 Series A Bonds are payable by the County solely and only from payments and other amounts derived from the Loan Agreement and as provided in the Indenture.

In our opinion, under existing laws, including current statutes, regulations, administrative rulings, and official interpretations by the Internal Revenue Service, subject to the exceptions and qualifications contained in the succeeding paragraphs, (i) interest on the 2016 Series A Bonds is excluded from the gross income of the recipients thereof for federal income tax purposes, except that no opinion is expressed regarding such exclusion from gross income with respect to any 2016 Series A Bond during any period in which it is held by a "substantial user" of the Project or a "related person," as such terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "Code"); and (ii) interest on the 2016 Series A Bonds is a separate item of tax preference in determining alternative minimum taxable income for individuals and corporations under the Code. In arriving at this opinion, we have relied upon representations, factual statements, and certifications of the Company with respect to certain material facts which are solely within the Company's knowledge in reaching our conclusion, among other things, that all of the proceeds of the Refunded 2002 Series C Bonds were used to refinance air and water pollution control facilities qualified for financing under Section 103(b)(4)(F) of the Internal Revenue Code of 1954, as amended, and Section 1312(a) of the Tax Reform Act of 1986. Further, in arriving at the opinion set forth in this paragraph as to the exclusion from gross income of interest on the 2016 Series A Bonds, we have assumed and this opinion is conditioned on, the accuracy of and continuing compliance by the Company and the County with representations and covenants set forth in the Loan Agreement and the Indenture which are intended to assure compliance with certain tax-exempt interest provisions of the Code. Such representations and covenants must be accurate and must be complied with after the issuance of the 2016 Series A Bonds in order that interest on the 2016 Series A Bonds be excluded from gross income for federal income tax purposes. Failure to comply with certain of such representations and covenants in respect of the 2016 Series A Bonds after the issuance of the 2016 Series A Bonds could cause the interest thereon to be included in gross income for federal income tax purposes retroactively to the date of issuance of the 2016 Series A Bonds. We express no opinion (i) regarding the exclusion of interest on any 2016 Series A Bond from gross income for federal income tax purposes on or after the date on which any change, including any interest rate conversion, permitted by the documents (other than with approval of this firm) is taken which adversely affects the tax treatment of the 2016 Series A Bonds; or (ii) as to the treatment for purposes of federal income taxation of interest on the 2016 Series A Bonds upon a Determination of Taxability. We are further of the opinion that interest on the 2016 Series A Bonds is excluded from gross income of the recipients thereof for Kentucky income tax purposes and that the 2016 Series A Bonds are exempt from ad valorem taxation by the Commonwealth of Kentucky and all political subdivisions thereof.

Our opinion as to the exclusion of interest on the 2016 Series A Bonds from gross income for federal income tax purposes and federal tax treatment of interest on the 2016 Series A Bonds is further subject to the following exceptions and qualifications:

(a) The Code provides for a "branch profits tax" which subjects to tax, at a rate of 30%, the effectively connected earnings and profits of a foreign corporation which engages in a United States trade or business. Interest on the 2016 Series A Bonds would be includable in the amount of effectively connected earnings and profits and thus would increase the branch profits tax liability.

(b) The Code also provides that passive investment income, including interest on the 2016 Series A Bonds, may be subject to taxation for any S corporation with Subchapter C earnings and profits at the close of its taxable year if greater than 25% of its gross receipts is passive investment income.

Except as stated above, we express no opinion as to any federal or Kentucky tax consequences resulting from the receipt of interest on the 2016 Series A Bonds.

Holders of the 2016 Series A Bonds should be aware that the ownership of the 2016 Series A Bonds may result in collateral federal income tax consequences. For instance, the Code provides that, for taxable years beginning after December 31, 1986, property and casualty insurance companies will be required to reduce their loss reserve deductions by 15% of the tax-exempt interest received on certain obligations, such as the 2016 Series A Bonds, acquired after August 7, 1986. (For purposes of the immediately preceding sentence, a portion of dividends paid to an affiliated insurance company may be treated as tax-exempt interest.) The Code further provides for the disallowance of any deduction for interest expenses incurred by banks and certain other financial institutions allocable to carrying certain tax-exempt obligations, such as the 2016 Series A Bonds, acquired after August 7, 1986. The Code also provides that, with respect to taxpayers other than such financial institutions, such taxpayers will be unable to deduct any portion of the interest expenses incurred or continued to purchase or carry the 2016 Series A Bonds. The Code also provides, with respect to individuals, that interest on tax-exempt obligations, including the 2016 Series A Bonds, is included in modified adjusted gross income for purposes of determining the taxability of social security and railroad retirement benefits. Furthermore, the earned income credit is not allowed for individuals with an aggregate amount of disqualified income within the meaning of Section 32 of the Code, which exceeds $2,200. Interest on the 2016 Series A Bonds will be taken into account in the calculation of disqualified income.

We have received opinions of Gerald A. Reynolds, General Counsel, Chief Compliance Officer, and Corporate Secretary of the Company and Jones Day, Chicago, Illinois, counsel to the Company, of even date herewith. In rendering this opinion, we have relied upon said opinions with respect to the matters therein. We have also received an opinion of even date herewith of Hon. Crystal L. Heinz, County Attorney of Trimble County, Kentucky, and relied upon said opinion with respect to the matters therein. The opinions are in forms satisfactory to us as to both scope and content.

We express no opinion as to the title to, the description of, or the existence or priority of any liens, charges, or encumbrances on the Project.

In rendering the foregoing opinions, we are passing upon only those matters specifically set forth in such opinions and are not passing upon the investment quality of the 2016 Series A Bonds or the accuracy or completeness of any statements made in connection with any offer or sale thereof. The opinions herein are expressed as of the date hereof and we assume no obligation to supplement or update such opinions to reflect any facts or circumstances that may hereafter come to our attention or any changes in law that may hereafter occur.

We are members of the Bar of the Commonwealth of Kentucky and do not purport to be experts on the laws of any jurisdiction other than the Commonwealth of Kentucky and the United States of America, and we express no opinion as to the laws of any jurisdiction other than those specified.

Respectfully submitted,

Filing Requirement
807 KAR 5:001 Section 16(7)(k)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

The most recent Federal Energy Regulatory Commission Form 1 (electric), Federal Energy Regulatory Commission Form 2 (gas), or Public Service Commission Form T (telephone).

Response:

LG&E's most recent FERC Form 1 and KPSC Annual Report for Major Natural Gas Companies for the year ended December 31, 2015, are attached. Please note that by a FERC Order dated July 12, 2007 in FERC Docket No. CP07-232-000, LG&E was granted a Section (7) exemption by the FERC under the Natural Gas Act, and as a part of that exemption LG&E was granted "a waiver of reporting and accounting requirements," which includes the filing of Form 2 with the FERC. In addition, on February 15, 2008, the Public Service Commission issued an order granting LG&E's request to cease the annual filing of the FERC Form 2. In lieu of filing a FERC Form 2 with the Public Service Commission, LG&E was ordered to file a paper copy of the annual report information that it files with the Public Service Commission electronically, and include with such copy a paper copy of the notes to its financial statements that LG&E had previously filed as part of its FERC Form 2.

Dear Mr. Blake,

Enclosed please find copies of our manually signed reports on the regulatory-basis financial statements of Louisville Gas and Electric Company and Kentucky Utilities Company as of December 31, 2015 and 2014, and for the years then ended. Please retain this letter and the enclosures in your files as evidence of our authorization to include the attached reports in the 2015 Annual Form 1 filed with the Federal Energy Regulatory Commission.

If you have any questions regarding the form or use of this report, please call me.

Regards,

Ritu Furlan

Report of Independent Auditors

To the Board of Directors and Stockholder of Louisville Gas and Electric Company:

We have audited the accompanying financial statements of Louisville Gas and Electric Company, which comprise the comparative balance sheet as of December 31, 2015 and 2014, and the related statements of income, retained earnings and cash flows for the years then ended and the related notes to the financial statements, included on pages 110 through 123.66 in the Federal Energy Regulatory Commission ("FERC") Form No. 1.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with the financial reporting provisions of the FERC as set forth in its applicable Uniform System of Accounts and published accounting releases described in Note 1; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Louisville Gas and Electric Company at December 31, 2015 and 2014, and its revenue and expenses and its cash flows for the years then ended on the basis of the financial reporting provisions of the FERC as set forth in its applicable Uniform System of Accounts and published accounting releases described in Note 1.

Regulatory Basis of Accounting

As described in Note 1 to the financial statements, the financial statements have been prepared by Louisville Gas and Electric Company on the basis of the financial reporting provisions of the FERC as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a basis of accounting other than U.S. generally accepted accounting principles, to meet the requirements of the FERC. Our opinion is not modified with respect to this matter.

Restriction on Use

Our report is intended solely for the information and use of the FERC and is not intended to be and should not be used by anyone other than this specified party.

INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

GENERAL INFORMATION

I. Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q)is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

(1) one million megawatt hours of total annual sales,
(2) 100 megawatt hours of annual sales for resale,
(3) 500 megawatt hours of annual power exchanges delivered, or
(4) 500 megawatt hours of annual wheeling for others (deliveries plus losses).

III. What and Where to Submit

(a) Submit FERC Forms 1 and 3-Q electronically through the forms submission software. Retain one copy of each report for your files. Any electronic submission must be created by using the forms submission software provided free by the Commission at its web site: http://www.ferc.gov/docs-filing/eforms/form-1/elec-subm-soft.asp. The software is used to submit the electronic filing to the Commission via the Internet.

(b) The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

(c) Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:

Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

(d) For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

a) Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

b) Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

Reference Schedules	Pages
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

e) The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of _____ for the year ended on which we have reported separately under date of ___________ , we have also reviewed schedules ___________________of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases."

The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(f) Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. To further that effort, new selections, "Annual Report to Stockholders," and "CPA Certification Statement" have been added to the dropdown "pick list" from which companies must choose when eFiling. Further instructions are found on the Commission's website at http://www.ferc.gov/help/how-to.asp.

(g) Federal, State and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from http://www.ferc.gov/docs-filing/eforms/form-1/form-1.pdf and http://www.ferc.gov/docs-filing/eforms.asp#3Q-gas .

IV. When to Submit:

FERC Forms 1 and 3-Q must be filed by the following schedule:

a) FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and

b) FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

V. Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,144 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 150 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

GENERAL INSTRUCTIONS

I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.

II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

III Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

V. Enter the month, day, and year for all dates. Use customary abbreviations. **The "Date of Report" included in the header of each page is to be completed only for resubmissions** (see VII. below).

VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

VII For any resubmissions, submit the electronic filing using the form submission software only. Please explain the reason for the resubmission in a footnote to the data field.

VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and" firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and “firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

(3) ’Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

(4) 'Person' means an individual or a corporation;

(5) 'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

(7) 'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power; ......

(11) "project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

(a) To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development -costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the -proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports salt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

General Penalties

The Commission may assess up to $1 million per day per violation of its rules and regulations. *See* FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Kent W. Blake, Chief Financial Officer
220 West Main Street
Louisville, KY 40202

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Kentucky July 2, 1913

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Respondent furnishes electric and natural gas services in Metro Louisville and adjacent territory in Kentucky.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

Name of Respondent Louisville Gas and Electric Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report *(Mo, Da, Yr)* / /	Year/Period of Report End of 2015/Q4

CONTROL OVER RESPONDENT

1. If any corporation, business trust, or similar organization or a combination of such organizations jointly held control over the repondent at the end of the year, state name of controlling corporation or organization, manner in which control was held, and extent of control. If control was in a holding company organization, show the chain of ownership or control to the main parent company or organization. If control was held by a trustee(s), state name of trustee(s), name of beneficiary or beneficiearies for whom trust was maintained, and purpose of the trust.

Louisville Gas and Electric Company (LG&E) is a wholly-owned subsidiary of LG&E and KU Energy LLC (LKE). LKE is a wholly-owned subsidiary of PPL Corporation (PPL), based in Allentown, PA.

Name of Respondent Louisville Gas and Electric Company	This Report Is: (1) [X] An Original (2) [ ] A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report End of 2015/Q4

OFFICERS

1. Report below the name, title and salary for each executive officer whose salary is $50,000 or more. An "executive officer" of a respondent includes its president, secretary, treasurer, and vice president in charge of a principal business unit, division or function (such as sales, administration or finance), and any other person who performs similar policy making functions.
2. If a change was made during the year in the incumbent of any position, show name and total remuneration of the previous incumbent, and the date the change in incumbency was made.

INFORMATION ON FORMULA RATES
Formula Rate Variances

1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1.
2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1.
3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts.
4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

FOOTNOTE DATA

Schedule Page: 1062 Line No.: 2 Column: b

Transmission Operation and Maintenance expenses exclude the amortization of certain regulatory assets approved by the KPSC only.

Name of Respondent	This Report Is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

IMPORTANT CHANGES DURING THE QUARTER/YEAR

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.
2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.
3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.
4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.
5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.
7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.
8. State the estimated annual effect and nature of any important wage scale changes during the year.
9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Page 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
11. (Reserved.)
12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.
13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.
14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)

1. None.

2. None.

3. On June 23, 2015, LG&E and KU completed an early termination and repurchase transaction under an existing joint lease regarding two 146 MW combustion turbine generating units located at the E.W. Brown Station (Brown Units 6 & 7) operated and maintained by LG&E and KU. The early termination and repurchase transaction occurred pursuant to provisions in such lease. LG&E and KU received FERC authorization in FERC Docket No. EC15-78-000. Per Docket No. EC15-78-000, the termination and repurchase transaction did not involve any accounting entries for LG&E.

4. None of a material nature.

5. None.

6. LG&E received FERC authorization in FERC Docket No. ES15-67-000 for up to $500 million in the form of money pool debt, commercial paper or any other type of short-term loan through November 30, 2017. LG&E's money pool balance was zero at December 31, 2015, and December 31, 2014. LG&E's commercial paper program limit is $350 million as of April 30, 2013. As of December 31, 2015, and December 31, 2014, the outstanding commercial paper balance is $142 million and $264 million, respectively.

   On September 28, 2015, LG&E issued $550 million of first mortgage bonds of which $300 million was issued at an interest rate of 3.30% and will be due October 1, 2025, and $250 million was issued at an interest rate of 4.375% and will be due October 1, 2045. These bonds were issued pursuant to a Kentucky Public Service Commission Order in Case No. 2014-00089 dated June 16, 2014, and amended July 1, 2014.

   LG&E has a revolving credit facility totaling $500 million. The facility was approved by the Kentucky Public Service Commission Order, Case No. 2010-00205 on September 30, 2010. There were no borrowings outstanding under this facility at December 31, 2015, and December 31, 2014. On January 29, 2016, LG&E amended this revolving credit facility to extend the termination date from July 28, 2019, to December 31, 2020. The extension was approved by the Kentucky Public Service Commission Order, Case No. 2015-00138 on July 2, 2015.

7. None.

8. During the first quarter of 2015, exempt and non-exempt employees received routine wage increases in accordance with annual salary reviews. As outlined in the IBEW Local 2100 contract, union employees received a negotiated 2.5% wage increase effective November 9, 2015.

9. See Notes 4 and 10 of Notes to Financial Statements on page 123.

10. None.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)

11. N/A

12. See Notes to Financial Statements on page 123.

13. On January 15, 2015, S. Bradford Rives, Chief Administrative Officer and a member of the Board of Directors, announced his retirement, effective March 13, 2015. Kent W. Blake, Chief Financial Officer, was appointed to the Board of Directors effective March 25, 2015.

    On November 9, 2015, Michael S. Beer, Vice President-Federal Regulation and Policy, announced his retirement effective December 31, 2015.

    On December 14, 2015, Paul Gregory Thomas, Vice President-Electric Distribution, announced his retirement effective March 1, 2016, and John K. Wolfe was named Vice President-Electric Distribution effective March 1, 2016.

    On December 29, 2015, Edwin R. Staton, Vice President-State Regulation and Rates, announced his retirement effective February 1, 2016, and Robert M. Conroy was named Vice President-State Regulation and Rates effective February 1, 2016.

    On February 1, 2016, Paula H. Pottinger, Senior Vice President-Human Resources, announced her retirement effective April 1, 2016, and Gregory J. Meiman was named Vice President-Human Resources effective February 1, 2016.

14. LG&E is a participant in a cash pooling arrangement, but its proprietary capital ratio is above 30 percent.

STATEMENT OF INCOME

Quarterly
1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable
5. Do not report fourth quarter data in columns (e) and (f)
6. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility columnin a similar manner to a utility department. Spread the amount(s) over lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
7. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

STATEMENT OF INCOME FOR THE YEAR (Continued)

9. Use page 122 for important notes regarding the statement of income for any account thereof.
10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
11 Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purches, and a summary of the adjustments made to balance sheet, income, and expense accounts.
12. If any notes appearing in the report to stokholders are applicable to the Statement of Income, such notes may be included at page 122.
13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

STATEMENT OF RETAINED EARNINGS

1. Do not report Lines 49-53 on the quarterly version.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, year to date, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436 - 439 inclusive). Show the contra primary account affected in column (b)
4. State the purpose and amount of each reservation or appropriation of retained earnings.
5. List first account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, include them on pages 122-123.

NOTES TO FINANCIAL STATEMENTS

1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Cormmission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.
7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.
8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred.
9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

NOTES TO FINANCIAL STATEMENTS (Continued)

GLOSSARY OF TERMS AND ABBREVIATIONS

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE - LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides services to LKE and its subsidiaries.

PPL - PPL Corporation, the parent holding company of PPL Services, LKE and other subsidiaries.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides administrative, management and support services to PPL and its subsidiaries.

Other terms and abbreviations

401(h) account(s) - A sub account established within a qualified pension trust to provide for the payment of retiree medical costs.

AFUDC - Allowance for Funds Used During Construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

ARO - asset retirement obligation.

BSER - Best System of Emission Reduction. The degree of emission reduction that EPA determines has been adequately demonstrated when taking into account the cost of achieving such reduction and any non-air quality health and environmental impact and energy requirements.

Cane Run Unit 7 - a natural gas combined-cycle generating unit in Kentucky, jointly owned by LG&E and KU, with a capacity of 642 MW (141 MW and 501 MW to LG&E and KU).

CCR(s) - Coal Combustion Residual(s). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

Clean Water Act - federal legislation enacted to address certain environmental issues relating to water quality including effluent discharges, cooling water intake, and dredge and fill activities.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

CPCN - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facility for furnishing of utility service to the public.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of costs and revenues lost by implementing DSM programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

EBPB - Employee Benefit Plan Board. The administrator of PPL's U.S. qualified retirement plans, which is charged with the fiduciary responsibility to oversee and manage those plans and the investments associated with those plans.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and by-products from the production of energy from coal.

ELG(s) - Effluent Limitation Guidelines, regulations promulgated by the EPA.

EPA - Environmental Protection Agency, a U.S. government agency.

FERC - Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

GAAP - Generally Accepted Accounting Principles in the U.S.

GHG - greenhouse gas(es).

GLT - Gas Line Tracker. The KPSC approved mechanism for LG&E's recovery of costs associated with gas service lines, gas risers, leak mitigation, and gas main replacements. Rate recovery became effective January 1, 2013.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

kWh - kilowatt hour, basic unit of electrical energy.

LG&E 2010 Mortgage Indenture - LG&E's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as supplemented.

LIBOR - London Interbank Offered Rate.

NOTES TO FINANCIAL STATEMENTS (Continued)

MATS - Mercury and Air Toxics Standards, regulations promulgated by the EPA.

MW - megawatt, one thousand kilowatts.

NAAQS - National Ambient Air Quality Standards periodically adopted pursuant to the Clean Air Act.

NERC - North American Electric Reliability Corporation.

NGCC - Natural gas-fired combined-cycle generating plant.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

NSR - The new source review provisions of the Clean Air Act that impose stringent emission control requirements on new and modified sources of air emissions that result in emission increases beyond thresholds allowed by the Clean Air Act.

OCI - other comprehensive income or loss.

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined summer rating capacities of 2,120 MW.

PP&E - property, plant and equipment.

RCRA - Resource Conservation and Recovery Act of 1976.

RFC - Reliability*First* Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

SCRs - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gas.

Scrubber - an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SERC - SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

Superfund - federal environmental statute that addresses remediation of contaminated sites; states also have

NOTES TO FINANCIAL STATEMENTS (Continued)

similar statues.

VEBA - Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

Volumetric risk - the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

As permitted by the FERC for the Year Ended December 31, 2015 Form 1, the Notes to Financial Statements set forth below are principally from the Respondent's SEC Form 10-K for the Year Ended December 31, 2015, which was filed with the SEC on February 19, 2016. Accordingly, these Notes do not reflect updated information since this filing date.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

General

Capitalized terms and abbreviations appearing in the notes to financial statements are defined in the glossary. Dollars are in millions unless otherwise noted.

Presentation

The accompanying financial statements are prepared on the regulatory basis of accounting in accordance with the requirements of the FERC, which is a comprehensive basis of accounting other than GAAP. The significant differences between GAAP and FERC reporting are as follows:

(a) Certain cost of removal obligations are recorded in accumulated depreciation for FERC reporting and recorded in regulatory liabilities for GAAP reporting;
(b) Long-term and short-term bonds are recorded in total in the long-term debt section for FERC reporting and are presented separately in current liabilities for the short-term portion and in long-term debt for the long-term portion for GAAP reporting;
(c) Deferred taxes are shown gross for FERC reporting in the Balance Sheet (a deferred asset and a deferred liability are recorded), but for GAAP reporting the deferred taxes are netted together and recorded as a net asset or net liability;
(d) Utility plant acquired before November 1, 2010 is stated at cost for FERC reporting and was restated to net fair value as of November 1, 2010, for GAAP reporting;
(e) Long-term and short-term regulatory assets are presented together in deferred debits for FERC reporting. For GAAP reporting, short-term regulatory assets are presented in current assets and long-term regulatory assets are presented in other noncurrent assets; and
(f) Long-term and short-term regulatory liabilities are presented together in deferred credits for FERC reporting. For GAAP reporting, short-term regulatory liabilities are presented in current liabilities and long-term regulatory liabilities are presented in deferred credits and other noncurrent liabilities.
(g) Deferred financing costs are classified as assets for FERC reporting. For GAAP reporting, such costs are classified as contra-liabilities and are presented together with long-term debts.

Business and Consolidation

LG&E is engaged in the generation, transmission, distribution and sale of electricity. LG&E also engages in the distribution and sale of natural gas.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

LG&E has no controlling interest in any Variable Interest Entities (VIEs). All other investments are carried at cost or fair value.

LG&E's financial statements include its share of any undivided interests in jointly owned facilities, as well as its share of the related operating costs of those facilities. See Note 9 for additional information.

Regulation

LG&E is a cost-based rate-regulated utility for which rates are set by regulators to enable LG&E to recover the costs of providing electric or gas service and to provide a reasonable return to its shareholder. Base rates are generally established based on a future test period. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and regulatory liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 4 for additional details regarding regulatory matters.

Accounting Records

LG&E's system of accounts is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." LG&E continuously assesses potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals for environmental remediation are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless realization is assured.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Changes in Classification

The classification of certain amounts in the 2014 financial statements have been changed to conform to the current presentation. These reclassifications did not affect LG&E's net income or equity.

Price Risk Management

Interest rate contracts are used to hedge exposure to change in the fair value of debt instruments and to hedge exposures to variability in expected cash flows associated with existing floating-rate debt instruments or forecasted fixed-rate issuances of debt. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain contracts may not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, markets are periodically assessed to determine whether market mechanisms have evolved that would facilitate net settlement. Certain derivative contracts may be excluded from the requirements of derivative accounting treatment because NPNS has been elected. These contracts are accounted for using accrual accounting. Contracts that have been classified as derivative contracts are reflected on the Balance Sheets at fair value. The portion of derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while the portion of derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent Liabilities." LG&E considers intra-month transactions to be spot activity, which is not accounted for as a derivative.

Processes exist that allow for subsequent review and validation of the contract information as it relates to interest rate derivatives. The accounting department provides the treasury department with guidelines on appropriate accounting classifications for various contract types and strategies. Examples of accounting guidelines provided to the treasury department staff include, but are not limited to:

- Transactions to lock in an interest rate prior to a debt issuance can be designated as cash flow hedges, to the extent the forecasted debt issuances remain probable of occurring.

- Derivative transactions may be marked to fair value through regulatory assets/liabilities if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps that are included in customer rates.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the classification of the hedged items.

LG&E has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

See Notes 12 and 13 for additional information on derivatives.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Revenue

Revenue Recognition

Operating revenues are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' meters are read and bills are rendered throughout the month, rather than all meters being read and bills rendered at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by the estimated average cents per kWh. Any difference between estimated and actual revenues is adjusted the following month.

Accounts Receivable

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts.

Allowance for Doubtful Accounts

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs, the age of the receivable, counterparty creditworthiness and economic conditions. Specific events, such as bankruptcies, are also considered. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when it is known they will be received.

The changes in the allowance for doubtful accounts at December 31 were:

		Additions			
	Balance at Beginning of Period	Charged to Income	Charged to Other Accounts (a)	Deductions (b)	Balance at End of Period
2015	$ 2	$ 2	$ -	$ 3	$ 1
2014	2	5	(1)	4	2

(a) Primarily related to capital projects, thus the provision was recorded as an adjustment to construction work in progress.
(b) Primarily related to uncollectible accounts written off.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Cash

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

Fair Value Measurements

LG&E values certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities, investments in securities in defined benefit plans, and cash and cash equivalents. LG&E uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

LG&E classifies fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

• **Level 1** - quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

• **Level 2** - inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.

• **Level 3** - unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, LG&E's assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

Short-term Investments

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Short-term investments" ("Other current assets" if not significant) on the Balance Sheets.

Cost Method Investment

LG&E has an investment in OVEC, which is accounted for using the cost method. The investment is recorded in "Other noncurrent assets" on the Balance Sheets. LG&E and 11 other electric utilities are equity owners of OVEC. OVEC's power is currently supplied to LG&E and 12 other companies affiliated with the various owners. LG&E owns 5.63% of OVEC's common stock. Pursuant to a power purchase agreement, LG&E is contractually entitled to its ownership percentage of OVEC's output, which is approximately 120 MW.

LG&E's investment in OVEC is not significant. The direct exposure to loss as a result of LG&E's involvement with OVEC is generally limited to the value of its investment; however, LG&E is conditionally responsible for a pro-rata share of certain OVEC obligations. As part of PPL's acquisition of LKE, the value of the power purchase contract was recorded as an intangible asset with an offsetting regulatory liability, both of which are being amortized using the units-of-production method until March 2026, the expiration date of the agreement. See Notes 10 and 14 for additional discussion of the power purchase agreement.

Long-Lived and Intangible Assets

Property, Plant and Equipment

PP&E is recorded at original cost, unless impaired. PP&E acquired in business combinations is recorded at fair value at the time of acquisition, which establishes its original cost. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost for constructed assets includes material, labor, contractor costs, certain overheads and financing costs, where applicable. The cost of repairs and minor replacements are charged to expense as incurred. LG&E records costs associated with planned major maintenance projects in the period in which the costs are incurred. No costs associated with planned major maintenance projects are accrued in advance of the period in which the work is performed. LG&E accrues costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. See "Asset Retirement Obligations" below and Note 4 for additional information.

LG&E does not record AFUDC as a return is provided on construction work in progress.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. LG&E's weighted-average rates of depreciation for regulated utility plant were 3.65% and 4.05% at December 31, 2015 and 2014.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to obtain an initial license and renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, LG&E considers the expected use of the asset; the expected useful life of other assets to which the useful life of the intangible asset may relate; legal, regulatory, or contractual provisions that may limit the useful life; the company's historical experience as evidence of its ability to support renewal or extension; the effects of obsolescence, demand, competition, and other economic factors; and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

LG&E accounts for emission allowances as intangible assets. LG&E is allocated emission allowances by states based on its generation facilities' historical emissions experience, and have purchased emission allowances generally when it is expected that additional allowances will be needed. The carrying value of allocated emission allowances is initially recorded at zero value and purchased allowances are initially recorded based on their purchase price. When consumed or sold, emission allowances are removed from the Balance Sheet at their weighted-average carrying value. Since the economic benefits of emission allowances are not diminished until they are consumed, emission allowances are not amortized; rather, they are expensed when consumed or a gain or loss is recognized when sold. Such expense is included in "Fuel" on the Statements of Income. Gains and losses on the sale of emission allowances are included in "Other operation and maintenance" on the Statements of Income.

Asset Impairment (Excluding Investments)

LG&E reviews long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable.

A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

LG&E reviews goodwill for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment in circumstances when a portion of goodwill has been allocated to a business to be disposed. LG&E is a single reporting unit.

LG&E may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a two-step quantitative test. If the qualitative evaluation (referred to as "step zero") is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step quantitative impairment test is not necessary. However, the quantitative impairment test is required if management concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the step zero assessment.

If the carrying amount of the reporting unit, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

LG&E elected to bypass step zero and quantitatively tested its goodwill for impairment in the fourth quarter of 2015 and no impairment was recognized.

Asset Retirement Obligations

LG&E records liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased through the recognition of accretion expense to reflect changes in the obligation due to the passage of time. The accretion and depreciation expenses recorded by LG&E are recorded as a regulatory asset, such that there is no earnings impact.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset. See Note 15 for additional information on AROs.

Compensation and Benefits

Defined Benefits

LG&E sponsors and participates in various defined benefit pension and other postretirement plans. The plans LG&E participates in are sponsored by LG&E and LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of certain plans to LG&E based on its participation in those plans. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

LG&E and LKE use an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 4 for a discussion of the regulatory treatment of defined benefit costs and Note 8 for a discussion of defined benefits.

Taxes

Income Taxes

LG&E is included in PPL’s consolidated U.S. federal income tax return.

Significant management judgment is required in developing LG&E’s provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and valuation allowances on deferred tax assets.

Significant management judgment is also required to determine the amount of benefit to be recognized in relation to an uncertain tax position. LG&E uses a two-step process to evaluate tax positions. The first step requires LG&E to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires LG&E to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact LG&E's financial statements in future periods.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

LG&E records valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. LG&E considers the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If LG&E determines that it is able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if LG&E determines that it is not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made.

LG&E defers investment tax credits when the credits are utilized and amortize the deferred amounts over the average lives of the related assets.

LG&E recognizes interest and penalties in "Income Taxes" on its Statements of Income.

LG&E's provision for deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheets in noncurrent "Regulatory assets" or "Regulatory liabilities."

LG&E's income tax provision is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Tax benefits are not shared between companies. LG&E is only entitled to tax benefits that it generated. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. LG&E's intercompany tax receivables were $4 million and $74 million at December 31, 2015 and 2014.

Taxes, Other Than Income

LG&E presents sales taxes in "Other current liabilities" on the Balance Sheets. These taxes are not reflected on the Statements of Income. See Note 3 for details on taxes included in "Taxes, other than income" on the Statements of Income.

Other

Leases

LG&E evaluates whether arrangements entered into contain leases for accounting purposes. See Note 7 for

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

additional information.

Fuel, Materials and Supplies

Fuel, natural gas stored underground and materials and supplies are valued at the lower of cost or net realizable value using the average cost method. Fuel costs for electric generation are charged to expense as used. Natural gas supply costs are charged to expense as delivered to the distribution system. See Note 4 for further discussion of the fuel adjustment clause and gas supply clause.

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31.

	2015	2014
Fuel	$ 71	$ 66
Natural gas stored underground (a)	42	54
Materials and supplies	38	42
Total	$ 151	$ 162

(a) The majority of natural gas stored underground is held to serve retail customers.

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 10 for further discussion of recorded and unrecorded guarantees.

New Accounting Guidance Adopted

Fair Value Measurement for Investments in Certain Entities that Calculate Net Asset Value per Share

Effective December 31, 2015, LG&E retrospectively adopted accounting guidance that removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using net asset value per share and the requirement to make certain disclosures for all investments that are eligible to be measured using net asset value per share.

The adoption of this guidance resulted in LG&E no longer categorizing investments for which fair value is measured using net asset value per share in the fair value hierarchy, and did not have a significant impact on LG&E. See Note 8 for additional information.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Presentation of Debt Issuance Costs

Effective December 31, 2015, LG&E retrospectively adopted accounting guidance to simplify the presentation of debt issuance costs. The guidance requires certain debt issuance costs to be presented on the Balance Sheet as a direct deduction from the carrying amount of the associated debt liability.

The adoption of this guidance required LG&E to reclassify debt issuance costs not associated with a line of credit from noncurrent assets to Long-term debt, and did not have a significant impact. See Note 5 for additional information.

Balance Sheet Classification of Deferred Taxes

Effective October 1, 2015, LG&E retrospectively adopted accounting guidance to simplify the presentation of deferred taxes which requires that deferred tax assets and deferred tax liabilities be classified as noncurrent on the Balance Sheet.

The adoption of this guidance required LG&E to reclassify deferred tax assets and deferred tax liabilities from current to noncurrent on the Balance Sheet, and did not have a significant impact. LG&E did not have any current deferred tax assets and liabilities on the Balance Sheet as of December 31, 2014.

2. Preferred Securities

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2015 or 2014.

3. Income and Other Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes and the tax effects of net operating loss and tax credit carryforwards. Net deferred tax assets have been recognized based on management's estimates of future taxable income.

LG&E's provision for deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Significant components of LG&E's deferred income tax assets and liabilities at December 31 were as follows:

	2015	2014
Deferred Tax Assets		
Federal loss carryforwards (a)	$ 76	$ -
Regulatory liabilities	38	51
Deferred investment tax credits	13	14
Income taxes due to customers	17	18
Derivative liability	18	32
Other	15	9
Total deferred tax assets	177	124
Deferred Tax Liabilities		
Plant - net	896	698
Regulatory assets	75	90
Accrued pension costs	28	28
Other	7	8
Total deferred tax liabilities	1,006	824
Net deferred tax liability	$ 829	$ 700

(a) Increase in Federal loss carryforwards primarily relates to the extension of bonus depreciation.

LG&E expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

At December 31, 2015, LG&E had $218 million of federal net operating loss carryforwards that expire in 2035, $1 million of federal credit carryforwards that expire from 2031 to 2035 and $2 million of state credit carryforwards that expire in 2022.

	2015	2014
Taxes, other than income		
Property and other	$ 28	$ 25
Total	$ 28	$ 25

Unrecognized Tax Benefits

LG&E's income tax provision is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Based on this tax sharing agreement, LG&E indirectly files tax returns in two major tax jurisdictions. With few exceptions, at December 31, 2015, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

U.S. (federal)	2011 and prior
Kentucky (state)	2010 and prior

4. Utility Rate Regulation

Regulatory Assets and Liabilities

LG&E reflects the effects of regulatory actions in the financial statements for its cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the Balance Sheet date.

LG&E is subject to the jurisdiction of the KPSC and FERC.

LG&E's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

other means. As such, LG&E generally earns a return on regulatory assets.

As a result of purchase accounting requirements, certain fair value amounts related to contracts that had favorable or unfavorable terms relative to market were recorded on the Balance Sheet with an offsetting regulatory asset or liability. LG&E recovers in customer rates the cost of coal contracts, power purchases and emission allowances. As a result, management believes the regulatory assets and liabilities created to offset the fair value amounts at LKE's acquisition date meet the recognition criteria established by existing accounting guidance and eliminate any rate-making impact of the fair value adjustments. LG&E's customer rates will continue to reflect the original contracted prices for these contracts.

NOTES TO FINANCIAL STATEMENTS (Continued)

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory Matters."

Defined Benefit Plans

Defined benefit plan regulatory assets represent the portion of unrecognized transition obligation, prior service cost and net actuarial gains and losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices and generally, are amortized over the average remaining service lives of plan participants. These regulatory assets are adjusted at least annually or whenever the funded status of defined benefit plans is re-measured. Of the regulatory asset balances recorded, costs of $19 million are expected to be amortized into net periodic defined benefit costs in 2016 in accordance with LG&E's pension accounting policy.

As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between pension cost calculated in accordance with LG&E's pension accounting policy and pension cost calculated using a 15 year amortization period for actuarial gains and losses is recorded as a regulatory asset. As of December 31, 2015, the balance was $6 million. Of the costs expected to be amortized into net periodic defined benefit costs in 2016, $6 million is expected to be recorded as a regulatory asset in 2016.

Storm Costs

LG&E has the ability to request from the KPSC, the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer such costs for regulatory accounting and reporting purposes. Once such authority is granted, LG&E can request recovery of those expenses in a base rate case and begin amortizing the costs when recovery starts. LG&E's regulatory assets for storm costs are being amortized through various dates ending in 2020.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2035.

Environmental Cost Recovery

Kentucky law permits LG&E to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Clean Air Act and those federal, state or local environmental requirements which apply to coal combustion wastes and by-products from coal-fired electric generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, LG&E was authorized to earn a 10% return on equity for all its existing ECR plans. The ECR regulatory asset or liability represents the amount that has been under- or

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

over-recovered due to timing or adjustments to the mechanism and is typically recovered within 12 months.

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and variances between actual and expected costs from prior periods are adjusted quarterly in LG&E's rates, subject to approval by the KPSC. The gas supply clause includes a separate natural gas procurement incentive mechanism, which allows LG&E's rates to be adjusted annually to share variances between actual costs and market indices between the shareholders and the customers during each performance-based rate year (12 months ending October 31). The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are typically recovered within 18 months.

Fuel Adjustment Clauses

LG&E's retail electric rates contain a fuel adjustment clause, whereby variances in the cost of fuel to generate electricity, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel adjustment clause and, to the extent appropriate, reestablish the fuel charge included in base rates. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered within 12 months.

Demand Side Management

LG&E's DSM program consists of energy efficiency programs which are intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. LG&E's rates contain a DSM provision which includes a rate recovery mechanism that provides for concurrent recovery of DSM costs and incentives, and allows for the recovery of DSM revenues from lost sales associated with the DSM programs. Additionally, LG&E earns an approved return on equity for capital expenditures associated with the residential and commercial load management/demand conservation programs. The cost of DSM programs is assigned only to the class or classes of customers that benefit from the programs.

Interest Rate Swaps

Periodically, LG&E has entered into forward-starting interest rate swaps to hedge forecasted debt issuance with PPL that have terms identical to forward-starting swaps entered into by PPL with third parties. Net realized gains and losses on all of these swaps are probable of recovery through regulated rates; as such, any gains and losses on these derivatives are included in regulatory assets or liabilities and will be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt at the time the underlying hedged interest expense is recorded. In September 2015, first mortgage bonds totaling $550 million were issued and all outstanding forward-starting interest rate swaps were terminated. Net cash settlements of $44 million were paid on the swaps that were terminated. Net realized losses on these terminated swaps will be recovered through regulated rates. As such, the net settlements were recorded in regulatory assets and are being recognized in

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

"Interest Expense" on the Statements of Income over the life of the new debt that matures in 2025 and 2045. There were no forward starting interest rate swaps outstanding at December 31, 2015. See Note 13 for additional information related to the forward-starting interest rate swaps.

Net cash settlements of $43 million were received on forward starting interest rate swaps that were terminated in 2013. Net realized gains on these terminated swaps will be returned through regulated rates. As such, the net settlements were recorded as regulatory liabilities and are being recognized in "Interest Expense" on the Statements of Income over the life of the associated debt that matures in 2043.

In addition to the terminated forward starting interest rate swaps, realized amounts associated with LG&E's other interest rate swaps, including a terminated swap contract from 2008, are recoverable through rates based on an order from the KPSC, LG&E's unrealized losses and gains are recorded as a regulatory asset or liability until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the terms of the associated debt, which matures through 2033. Amortization of the gain or loss related to the 2008 terminated swap contract is to be recovered through 2035.

AROs

The accretion and depreciation expenses related to LG&E's AROs are recorded as a regulatory asset, such that there is no earnings impact. When an asset with an ARO is retired, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

Gas Line Tracker

The GLT authorizes LG&E to recover its incremental operating expenses, depreciation, property taxes, and its cost of capital including a return on equity for capital associated with the five year gas service riser, leak mitigation and customer service line ownership programs. As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, LG&E is authorized to earn a 10% return on equity for the GLT mechanism. As part of this program, LG&E makes necessary repairs and assumes ownership of natural gas lines. LG&E annually files projected costs in October to become effective on the first billing cycle in January. After the completion of a plan year, LG&E submits a balancing adjustment filing to the KPSC to amend rates charged for the differences between the actual costs and actual GLT charges for the preceding year. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to these timing differences.

Coal Contracts

As a result of purchase accounting associated with PPL's acquisition of LKE, LG&E's coal contracts were recorded at fair value on the Balance Sheet with offsets to regulatory assets for those contracts with unfavorable terms relative to current market prices and offsets to regulatory liabilities for those contracts with favorable terms relative to current market prices. These regulatory assets and liabilities are being amortized over the same terms as the related contracts, which expire at various times through 2016.

	(1) X An Original	(Mo, Da, Yr)	
Louisville Gas and Electric Company	(2) __ A Resubmission	/ /	2015/Q4
NOTES TO FINANCIAL STATEMENTS (Continued)			

Power Purchase Agreement - OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, the fair value of the OVEC power purchase agreement was recorded on the Balance Sheet with offsets to regulatory liabilities. The regulatory liabilities are being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition.

Regulatory Liability Associated with Net Deferred Tax Assets

LG&E's regulatory liabilities associated with net deferred tax assets represent the future revenue impact from the reversal of deferred income taxes required primarily for unamortized investment tax credits. These regulatory liabilities are recognized when the offsetting deferred tax assets are recognized.

Regulatory Matters

Rate Case Proceedings

On June 30, 2015, the KPSC approved a rate case settlement agreement providing for increases in the annual revenue requirements associated with base gas rates of $7 million. The annual revenue requirement associated with base electricity rates was not changed. Although the settlement did not establish a specific return on equity with respect to the base rates, an authorized 10% return on equity will be utilized in the ECR and GLT mechanisms. The settlement also provides regulatory asset treatment for the difference between pension expense calculated in accordance with LG&E’s pension accounting policy and pension expense using a 15 year amortization period for actuarial gains and losses. The new rates and all elements of the settlement became effective July 1, 2015.

KPSC Landfill Proceedings

On May 22, 2015, LG&E and KU filed an application with the KPSC for a declaratory order that the existing CPCN and ECR approvals regarding the initial phases of construction and rate recovery of the landfill for management of CCRs at the Trimble County Station remain in effect. The current design of the proposed landfill provides for construction in substantially the same location as originally proposed with approximately the same storage capacity and expected useful life. On May 20, 2015, the owner of an underground limestone mine filed a complaint with the KPSC requesting it to revoke the CPCN for the Trimble County landfill and limit recovery of costs for the Ghent Station landfill on the grounds that, as a result of cost increases, the proposed landfill no longer constitutes the least cost alternative for CCR management. The KPSC has initiated its own investigation, consolidated the proceedings, and ordered an accelerated procedural schedule. The KPSC conducted a hearing on the matter in September 2015. On December 15, 2015, the KPSC issued an order affirming LG&E and KU's existing CPCN and ECR authority for Phase 1 of the Trimble County and Ghent landfills and related facilities, and that the landfills are the least cost options for disposing of the combustion wastes. Additionally, the order requires LG&E and KU to file a CPCN prior to constructing Phases 2 and 3 at the Ghent landfill and Phases 2 through 4 at the Trimble County landfill. The order also requires LG&E and KU to submit status update reports every three months on Phase 1 of Trimble County landfill. Phase 1 of construction at Trimble County will commence after the required state permits are obtained. Phase 1 of the

Ghent landfill was completed in December 2014.

CPCN and ECR Filing

On January 29, 2016, LG&E submitted an application to the KPSC for CPCNs and for ECR rate treatment regarding upcoming environmental construction projects relating to the EPA's regulations addressing the handling of coal combustion byproducts and MATS. The construction projects are expected to begin in 2016 and continue through 2023 and are estimated to cost LG&E approximately $316 million. The application requests an authorized 10% return on equity with respect to LG&E's ECR mechanism consistent with the 2014 Kentucky rate case approved in June 2015.

5. Financing Activities

Credit Arrangements and Short-term Debt

LG&E maintains a credit facility to enhance liquidity, provide credit support and provide a backstop to commercial paper programs. The amounts borrowed below are recorded as "Short-term debt" on the Balance Sheets. The following credit facility was in place at:

	December 31, 2015				
	Expiration Date	Capacity	Borrowed	Letters of Credit and Commercial Paper Issued	Unused Capacity
Syndicated Credit Facility (a) (b)	July 2019	$ 500	-	$ 142	$ 358

	December 31, 2014	
	Borrowed	Letters of Credit and Commercial Paper Issued
Syndicated Credit Facility (a) (b)	-	$ 264

(a) LG&E pays customary fees under its facility and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.
(b) The facilities contain a financial covenant requiring debt to total capitalization not to exceed 70% as calculated in accordance with the facility and other customary covenants. Additionally, as it relates to the syndicated credit facility and subject to certain conditions, LG&E may request up to a $100 million increase in its facility's capacity.

In January 2016, the expiration date for LG&E’s syndicated credit facility expiring in July 2019 was extended to December 2020.

Total Long-term Debt, noncurrent			$ 1,617

			December 31, 2014
First Mortgage Bonds (a) (b)	2.85%	2015 - 2043	$ 1,359
Total Long-term Debt Before Adjustments			1,359
Other			
Fair market value adjustments			(1)
Unamortized discount			(5)
Unamortized debt issuance costs			(8)
Total Long-term Debt			1,345
Less current portion of Long-term Debt			250
Total Long-term Debt, noncurrent			$ 1,095

(a) LG&E's first mortgage bonds are secured by the lien of the LG&E 2010 Mortgage Indenture which creates a lien, subject to certain exceptions and exclusions, on substantially all of LG&E's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $4.2 billion and $3.7 billion at December 31, 2015 and 2014.

(b) Includes LG&E's series of first mortgage bonds that were issued to the respective trustees of tax-exempt revenue bonds to secure its respective obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amounts, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. These first mortgage bonds were issued under the LG&E 2010 Mortgage Indenture and are secured as noted in (a)

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

above. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E. The related revenue bond documents allow LG&E to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2015, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a term rate mode totaled $391 million. At December 31, 2015, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a variable rate mode totaled $183 million.

Several series of the tax-exempt revenue bonds are insured by monoline bond insurers whose ratings were reduced due to exposures relating to insurance of sub-prime mortgages. Of the bonds outstanding, $135 million are in the form of insured auction rate securities, wherein interest rates are reset either weekly or every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. During 2008, interest rates increased, and LG&E experienced failed auctions when there were insufficient bids for the bonds. When a failed auction occurs, the interest rate is set pursuant to a formula stipulated in the indenture. As noted above, the instruments governing these auction rate bonds permit LG&E to convert the bonds to other interest rate modes.

Certain of the variable rate tax-exempt revenue bonds totaling $23 million at December 31, 2015, are subject to tender for purchase by LG&E at the option of the holder and to mandatory tender for purchase by LG&E upon the occurrence of certain events.

(c) The table reflects principal maturities only, based on stated maturities or earlier put dates.

None of the outstanding debt securities noted above have sinking fund requirements. The aggregate maturities of long-term debt, based on stated maturities or earlier put dates, for the periods 2016 through 2020 and thereafter are as follows:

2016	$	25
2017		194
2018		98
2019		40
2020		-
Thereafter		1,302
Total	$	1,659

In September 2015, LG&E issued $300 million of 3.30% First Mortgage Bonds due 2025 and $250 million of 4.375% First Mortgage Bonds due 2045. LG&E received proceeds of $298 million and $248 million, net of discounts and underwriting fees, which were used to repay short-term debt, to repay 1.625% First Mortgage Bonds that matured in November 2015 and for general corporate purposes.

NOTES TO FINANCIAL STATEMENTS (Continued)

Legal Separateness

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of LKE are each separate legal entities. These subsidiaries are not liable for the debts of LKE. Accordingly, creditors of LKE may not satisfy their debts from the assets of LKE’s subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, LKE is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of its subsidiaries may not satisfy their debts from the assets of LKE (or its other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions and Related Restrictions

LKE primarily relies on dividends from its subsidiaries to fund its distributions to PPL. LG&E is subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E believes, however, that this statutory restriction, as applied to its circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. In February 2012, LG&E petitioned the FERC requesting authorization to pay dividends in the future based on retained earnings balances calculated without giving effect to the impact of purchase accounting adjustments for the acquisition of LKE by PPL. In May 2012, FERC approved the petitions with the further condition that LG&E may not pay dividends if such payment would cause its adjusted equity ratio to fall below 30% of total capitalization. Accordingly, at December 31, 2015, net assets of $1.1 billion were restricted for purposes of paying dividends to LKE, and net assets of $1.2 billion were available for payment of dividends to LKE. LG&E believes it will not be required to change its current dividend practices as a result of the foregoing requirement. Orders from the KPSC require LG&E to obtain prior consent or approval before lending amounts to PPL or LKE.

6. Acquisitions, Development and Divestitures

From time to time, LG&E evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with, modify or terminate the projects. Any resulting transactions may impact future financial results.

Development

Capacity Needs

The Cane Run Unit 7 NGCC was put into commercial operation on June 19, 2015. As a result and to meet more stringent EPA regulations, LG&E retired one coal-fired generating unit at the Cane Run plant in March 2015 and retired the remaining two coal-fired generating units at the plant in June 2015. LG&E incurred costs of $11 million directly related to these retirements including inventory write-downs and separation benefits. However, there were no gains or losses on the retirement of these units.

In December 2014, a final order was issued by the KPSC approving the request to construct a 10 MW solar generation facility at E.W. Brown. LG&E and KU began construction activities in the fourth quarter of 2015 and project the plant to be placed into commercial operation by June 2016 at a cost of approximately $30 million.

7. Leases

LG&E has entered into various agreements for the lease of office space, vehicles, land, gas storage and other equipment.

Rent - Operating Leases

Rent expense for operating leases was $12 million and $7 million for the years ended December 31, 2015 and 2014.

Total future minimum rental payments for all operating leases are estimated to be:

2016	$	14
2017		14
2018		13
2019		7
2020		4
Thereafter		10
Total	$	62

8. Retirement and Postemployment Benefits

Defined Benefits

LG&E sponsors and participates in non-contributory defined benefit pension plans. These plans are applicable to the majority of LG&E employees. The plan LG&E participates in is sponsored by LKE. LG&E is allocated a portion of the funded status and costs of the plan sponsored by LKE based on its participation in the plan, which

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

management believes is reasonable. LG&E’s and LKE’s defined benefit pension plans were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above the standard matching contributions to their savings plans.

The majority of employees are eligible for certain health care and life insurance benefits upon retirement through a contributory plan sponsored by LKE. Postretirement health benefits may be paid from 401(h) accounts established as part of the LKE plan within the PPL Services Corporation Master Trust, funded VEBA trusts and company funds.

The following table provides the components of net periodic defined benefit costs for LG&E's pension benefit plan for the years ended December 31.

	Pension Benefits	
	2015	2014
Net periodic defined benefit costs (credits):		
Service cost	$ 1	$ 1
Interest cost	14	15
Expected return on plan assets	(20)	(19)
Amortization of:		
Prior service cost (credit)	3	2
Actuarial (gain) loss (a)	11	6
Net periodic defined benefit costs (credits)	$ 9	$ 5
Other Changes in Plan Assets and Benefit Obligations Recognized in Regulatory Assets - Gross:		
Net (gain) loss	$ 8	$ 14
Prior service cost (credit)	10	9
Amortization of:		
Prior service (cost) credit	(3)	(2)
Actuarial gain (loss)	(11)	(6)
Total recognized in regulatory assets	4	15
Total recognized in net periodic benefit costs and regulatory assets	$ 13	$ 20

(a) As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between actuarial (gain)/loss calculated in accordance with LG&E's pension accounting policy and actuarial (gain)/loss calculated using a 15 year amortization period was $3 million.

For the pension plan sponsored by LG&E, the estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2016 are $12 million ($5 million amortization of prior service cost and $7 million amortization of actuarial loss). For the pension plan LG&E participates in, the estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2016 are $7 million ($2 million

NOTES TO FINANCIAL STATEMENTS (Continued)

amortization of prior service cost and $5 million amortization of actuarial loss). For the other postretirement plan LG&E participates in, the estimated amount to be amortized from regulatory assets into net periodic defined benefit costs in 2016 is $1 million (amortization of prior service cost).

As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between net periodic defined benefit costs calculated in accordance with LG&E's pension accounting policy and the net periodic defined benefit costs calculated using a 15 year amortization period for gains and losses is recorded as a regulatory asset. For the pension plan sponsored by LG&E, of the costs expected to be amortized into net periodic defined benefit costs in 2016, $4 million is expected to be recorded as a regulatory asset. For the pension plan LG&E participates in, of the costs expected to be amortized into net periodic defined benefit costs in 2016, $2 million is expected to be recorded as a regulatory asset.

The net periodic defined benefit costs charged to operating expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for LG&E's pension benefits were $7 million and $3 million in 2015 and 2014. Allocations to LG&E for net periodic defined benefit costs charged to operating expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for pension benefits were $5 million and $2 million in 2015 and 2014. Allocations to LG&E for net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction work in progress and other non-expense accounts, for other postretirement benefits were $4 million in both 2015 and 2014. These allocated amounts are based on LG&E's participation in those plans, which management believes is reasonable.

For the pension plan sponsored by LG&E, of the costs charged to operating expense or regulatory assets, excluding amounts charged to construction and other non-expense accounts, $2 million was recorded as regulatory assets during 2015 representing the difference between net periodic defined benefit costs under the pension accounting policy and using a 15 year amortization period for gains and losses. An additional $2 million was recorded as a regulatory asset for this difference for the pension plan in which LG&E participates during 2015.

LKE and LG&E adopted the new mortality tables issued by the Society of Actuaries in October 2014 (RP-2014 base tables) for their defined benefit pension plans and LKE's other postretirement benefit plan at December 31, 2014 and 2015. In addition, LKE and LG&E updated the basis for estimating projected mortality improvements and selected the IRS BB-2D two-dimensional improvement scales on a generational basis for all their defined benefit pension plans and LKE's other postretirement benefit plan. These new mortality assumptions reflect the recognition of both improved life expectancies and the expectation of continuing improvements in life expectancies. The use of the new base tables and improvement scale resulted in an increase to LG&E's defined benefit pension obligation, an increase to future expense and a decrease in funded status. The use of the new base tables and improvement scale also resulted in an increased allocation from LKE to LG&E for defined benefit pension and other postretirement benefit obligations and future expense and a decrease in allocated funded status.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used in the valuation of the benefit obligations at December 31.

	Pension Benefits	
	2015	**2014**
Discount rate	4.49%	4.20%

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used to determine the net periodic defined benefit costs for the years ended December 31.

	Pension Benefits	
	2015	**2014**
Discount rate	4.20%	5.13%
Expected return on plan assets (a)	7.00%	7.10%

(a) The expected long-term rates of return for pension and other postretirement benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. Each plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The funded status of LG&E's plan at December 31 was as follows:

	Pension Benefits	
	2015	**2014**
Change in Benefit Obligation		
Benefit Obligation, beginning of period	$ 331	$ 291
Service cost	1	1
Interest cost	14	15
Plan amendments (a)	10	9
Actuarial (gain) loss	(15)	36
Gross benefits paid (b)	(15)	(21)
Benefit Obligation, end of period	$ 326	$ 331
Change in Plan Assets		
Plan assets at fair value, beginning of period	301	281
Actual return on plan assets	(2)	41
Employer contributions	13	-
Gross benefits paid (b)	(15)	(21)
Plan assets at fair value, end of period	297	301
Funded Status, end of period	$ (29)	$ (30)
Amounts recognized in the Balance Sheets consist of:		
Noncurrent liability	(29)	(30)
Net amount recognized, end of period	$ (29)	$ (30)
Amounts recognized in regulatory assets (pre-tax) consists of:		
Prior service cost (credit)	$ 29	$ 22
Net actuarial (gain) loss	95	98
Total	$ 124	$ 120
Total accumulated benefit obligation for defined benefit pension plan	$ 326	$ 330

(a) The plan was amended in December 2015 allowing terminated vested participants to elect to receive their accrued pension benefit as a one-time lump-sum payment effective January 1, 2016. The projected benefit obligation increased by $10 million as a result of the amendment.

The plan was amended in December 2014 to enhance the early retirement factors for all plan participants retiring on or after January 1, 2015. The projected benefit obligation increased by $9 million as a result of

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

the amendment.

(b) LG&E's pension plan offered a limited-time program in 2014 during which terminated vested participants could elect to receive their accrued pension benefit as a one-time lump-sum payment. The gross benefits paid includes $8 million of lump-sum cash payments made to terminated vested participants in 2014 in connection with this offering.

LG&E's pension plan had projected and accumulated benefit obligations in excess of plan assets at December 31, 2015 and 2014.

In addition to the plan it sponsors, LG&E is allocated a portion of the funded status and costs of certain defined benefit plans sponsored by LKE based on its participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retired employees are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to LG&E for pension benefits resulted in a liability of $26 million and $27 million at December 31, 2015 and 2014. Allocations to LG&E for other postretirement benefits resulted in a liability of $77 million and $85 million at December 31, 2015 and 2014.

Plan Assets - Pension Plans

The pension plans sponsored by LKE and LG&E are invested in the PPL Services Corporation Master Trust (the Master Trust) that also includes 401(h) accounts that are restricted for certain other postretirement benefit obligations of PPL and LKE. The investment strategy for the Master Trust is to achieve a risk-adjusted return on a mix of assets that, in combination with LG&E's funding policy, will ensure that sufficient assets are available to provide long-term growth and liquidity for benefit payments, while also managing the duration of the assets to complement the duration of the liabilities. The Master Trust benefits from a wide diversification of asset types, investment fund strategies and external investment fund managers, and therefore has no significant concentration of risk.

The investment policy of the Master Trust outlines investment objectives and defines the responsibilities of the EBPB, external investment managers, investment advisor and trustee and custodian. The investment policy is reviewed annually by PPL's Board of Directors.

The EBPB created a risk management framework around the trust assets and pension liabilities. This framework considers the trust assets as being composed of three sub-portfolios: growth, immunizing and liquidity portfolios. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities, generally with long durations, and derivative positions. The immunizing portfolio is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

Target allocation ranges have been developed for each portfolio on a plan basis based on input from external consultants with a goal of limiting funded status volatility. The EBPB monitors the investments in each portfolio on a plan basis, and seeks to obtain a target portfolio that emphasizes reduction of risk of loss from market volatility. In pursuing that goal, the EBPB establishes revised guidelines from time to time. EBPB

NOTES TO FINANCIAL STATEMENTS (Continued)

investment guidelines as of the end of 2015 are presented below.

The asset allocation for the trust and the target allocation by portfolio at December 31 are as follows:

	Percentage of Trust Assets 2015 (a)	2015 Target Asset Allocation (a) Weighted Average
Growth Portfolio	**51%**	**50%**
Equity securities	25%	
Debt securities (b)	13%	
Alternative investments	13%	
Immunizing Portfolio	**47%**	**48%**
Debt securities (b)	42%	
Derivatives	5%	
Liquidity Portfolio	**2%**	**2%**
Total	100%	100%

	Percentage of Trust Assets 2014
Growth Portfolio	**51%**
Equity securities	26%
Debt securities (b)	13%
Alternative investments	12%
Immunizing Portfolio	**47%**
Debt securities (b)	44%
Derivatives	3%
Liquidity Portfolio	**2%**
Total	100%

(a) Allocations exclude consideration of a group annuity contract held by the LG&E and KU Retirement Plan.
(b) Includes commingled debt funds, which are treated as debt securities for asset allocation purposes.

LG&E's and LKE's pension plan assets are invested solely in the Master Trust, which is fully disclosed below. The fair value of LG&E's plan's assets of $297 million and $301 million at December 31, 2015 and 2014 represents an interest of approximately 9% and 6% in the Master Trust. The fair value of LKE's plans assets of $1.3 billion at December 31, 2015 and 2014 represents an interest of approximately 40% and 28% in the Master Trust.

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2014 is as follows:

	Corporate debt	Insurance contracts	Total
Balance at beginning of period	$ 23	$ 37	$ 60
Actual return on plan assets			
Relating to assets still held			
at the reporting date	(1)	1	-
Relating to assets sold			
during the period	(1)	-	(1)
Purchases, sales and settlements	-	(5)	(5)
Balance at end of period	$ 21	$ 33	$ 54

The fair value measurements of cash and cash equivalents are based on the amounts on deposit.

The market approach is used to measure fair value of equity securities. The fair value measurements of equity securities (excluding commingled funds), which are generally classified as Level 1, are based on quoted prices in active markets. These securities represent actively and passively managed investments that are managed against various equity indices and exchange traded funds (ETFs).

Investments in commingled equity and debt funds are categorized as equity securities. Investments in commingled equity funds include funds that invest in U.S. and international equity securities. Investments in commingled debt funds include funds that invest in a diversified portfolio of emerging market debt obligations, as well as funds that invest in investment grade long-duration fixed-income securities.

The fair value measurements of debt securities are generally based on evaluations that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences. The fair value of debt securities is generally measured using a market approach, including the use of pricing models which incorporate observable inputs. Common inputs include benchmark yields, relevant trade data, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as payment data, future predicted cash flows, collateral performance and new issue data. For the Master Trust, these securities represent investments in securities issued by U.S. Treasury and U.S. government sponsored agencies; investments securitized by residential mortgages, auto loans, credit cards and other pooled loans; investments in investment grade and non-investment grade bonds issued by U.S. companies across several industries; investments in debt securities issued by foreign governments and corporations.

Investments in commodities represent ownership interest of a commingled fund that is invested in a portfolio of exchange-traded futures and forward contracts in commodities to obtain broad exposure to all principal groups in the global commodity markets, including energies, agriculture and metals (both precious and industrial) using proprietary commodity trading strategies. Redemptions can be made the 15th calendar day and the last calendar day of the month with a specified notification period. The fund's fair value is based upon a value as calculated by the fund's administrator.

Investments in real estate represent an investment in a partnership whose purpose is to manage investments in core U.S. real estate properties diversified geographically and across major property types (e.g., office, industrial, retail, etc.). The manager is focused on properties with high occupancy rates with quality tenants. This results in a focus on high income and stable cash flows with appreciation being a secondary factor. Core real estate generally has a lower degree of leverage when compared with more speculative real estate investing strategies. The partnership has limitations on the amounts that may be redeemed based on available cash to fund redemptions. Additionally, the general partner may decline to accept redemptions when necessary to avoid adverse consequences for the partnership, including legal and tax implications, among others. The fair value of the investment is based upon a partnership unit value.

Investments in private equity represent interests in partnerships in multiple early-stage venture capital funds and private equity fund of funds that use a number of diverse investment strategies. Four of the partnerships have limited lives of ten years, while the fifth has a life of 15 years, after which liquidating distributions will be received. Prior to the end of each partnership's life, the investment cannot be redeemed with the partnership; however, the interest may be sold to other parties, subject to the general partner's approval. The Master Trust has unfunded commitments of $27 million that may be required during the lives of the partnerships. Fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Investments in hedge funds represent investments in three hedge fund of funds. Hedge funds seek a return utilizing a number of diverse investment strategies. The strategies, when combined aim to reduce volatility and risk while attempting to deliver positive returns under most market conditions. Major investment strategies for the hedge fund of funds include long/short equity, market neutral, distressed debt, and relative value. Generally, shares may be redeemed within 60 to 95 days with prior written notice. The funds are subject to short term lockups and have limitations on the amount that may be withdrawn based on a percentage of the total net asset value of the fund, among other restrictions. All withdrawals are subject to the general partner's approval. The fair value for two of the funds has been estimated using the net asset value per share and the third fund's fair

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

The fair value measurements of derivative instruments utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. These securities primarily represent investments in interest rate swaps and swaptions (the option to enter into an interest rate swap) which are valued based on the swap details, such as swap curves, notional amount, index and term of index, reset frequency, volatility and payer/receiver credit ratings.

Insurance contracts, classified as Level 3, represent an investment in an immediate participation guaranteed group annuity contract. The fair value is based on contract value, which represents cost plus interest income less distributions for benefit payments and administrative expenses.

Plan Assets - Other Postretirement Benefit Plans

LKE's other postretirement benefit plan is invested primarily in a 401(h) account, as disclosed in the PPL Services Corporation Master Trust, with insignificant amounts invested in money market funds within VEBA trusts for liquidity.

Expected Cash Flows - Defined Benefit Plans

LG&E's defined benefit pension plan has the option to utilize available prior year credit balances to meet current and future contribution requirements. However, LG&E contributed $7 million to its pension plan in January 2016. LG&E also contributed $5 million to LKE’s pension plan on behalf of LG&E employees in January 2016.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid by the plan for LG&E retirees.

	LG&E Sponsored Pensions	Allocated from LKE Pension Plan
2016	$ 23	$ 15
2017	25	15
2018	24	16
2019	25	16
2020	25	16
2020-2025	111	84

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report

NOTES TO FINANCIAL STATEMENTS (Continued)

Savings Plans

Substantially all employees of LG&E are eligible to participate in deferred savings plans (401(k)s). Employer contributions to the plans were $5 million each in 2015 and 2014.

9. Jointly Owned Facilities

At December 31, 2015 and 2014, the Balance Sheets reflect the owned interests in the facilities listed below.

	Ownership Interest	Electric Plant	Accumulated Depreciation	Construction Work in Progress
December 31, 2015				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 12	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	47	10	1
Trimble County Unit 1	75.00%	399	44	6
Trimble County Unit 2	14.25%	210	28	12
Trimble County Units 5-6	29.00%	29	6	-
Trimble County Units 7-10	37.00%	71	14	-
Cane Run Unit 7	22.00%	115	1	1
E.W. Brown Solar Unit	39.00%	-	-	4
December 31, 2014				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 10	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	47	7	-
Trimble County Unit 1	75.00%	309	51	59
Trimble County Unit 2	14.25%	205	23	15
Trimble County Units 5-6	29.00%	29	5	-
Trimble County Units 7-10	37.00%	70	11	-
Cane Run Unit 7	22.00%	-	-	113

LG&E provides its own funding for its share of each of the above facilities. LG&E receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

10. Commitments and Contingencies

Energy Purchases Commitments

LG&E enters into purchase contracts to supply the coal and natural gas requirements for generation facilities and LG&E's gas supply operations. These contracts include the following commitments:

Contract Type	Maximum Maturity Date
Coal	2022
Coal Transportation and Fleeting Services	2024
Natural Gas Storage and Transporation	2024
Natural Gas Transportation	2026

LG&E has a power purchase agreement with OVEC expiring in June 2040. See "Guarantees and Other Assurances" below for information on the OVEC power purchase contract. Future obligations for power purchases from OVEC are unconditional demand payments, comprised of annual minimum debt service payments, as well as contractually required reimbursement of plant operating, maintenance and other expenses are projected as follows:

2016	$	18
2017		19
2018		19
2019		19
2020		20
Thereafter		435
	$	530

In addition, LG&E had total energy purchases under the OVEC power purchase agreement of $15 million and $17 million for the years ended December 31, 2015 and 2014.

Legal Matters

LG&E is involved in legal proceedings, claims and litigation in the ordinary course of business. LG&E cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Cane Run Environmental Claims

In December 2013, six residents, on behalf of themselves and others similarly situated, filed a class action complaint against LG&E and PPL in the U.S. District Court for the Western District of Kentucky alleging

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

violations of the Clean Air Act and RCRA. In addition, these plaintiffs assert common law claims of nuisance, trespass and negligence. These plaintiffs seek injunctive relief and civil penalties, plus costs and attorney fees, for the alleged statutory violations. Under the common law claims, these plaintiffs seek monetary compensation and punitive damages for property damage and diminished property values for a class consisting of residents within four miles of the plant. In their individual capacities, these plaintiffs seek compensation for alleged adverse health effects. In response to a motion to dismiss filed by LG&E and PPL, in July 2014, the court dismissed the plaintiffs' RCRA claims and all but one Clean Air Act claim, but declined to dismiss their common law tort claims. Upon motion of LG&E and PPL, the district court certified for appellate review the issue of whether the state common law claims are preempted by federal statute. In December 2014, the U.S. Court of Appeals for the Sixth Circuit issued an order granting appellate review regarding the above matter. Oral argument before the Sixth Circuit was held in August 2015. In November 2015, the Sixth Circuit issued an opinion affirming the District Court's ruling that plaintiffs' state law claims are not preempted by the Clean Air Act and remanding the matter to the District Court for further proceedings. Certain discovery matters are currently before the District Court. LG&E cannot predict the outcome of this matter. LG&E retired one coal-fired unit at the Cane Run plant in March 2015 and the remaining two coal-fired units at the plant in June 2015.

Mill Creek Environmental Claims

In May 2014, the Sierra Club filed a citizen suit against LG&E in the U.S. District Court for the Western District of Kentucky for alleged violations of the Clean Water Act. The Sierra Club alleges that various discharges at the Mill Creek plant constitute violations of the plant's water discharge permit. The Sierra Club seeks civil penalties, injunctive relief, costs and attorney's fees. In August 2015, the Court denied cross-motions for summary judgment filed by both parties and directed the parties to proceed with discovery. Discovery proceedings are underway and the parties have also conducted limited settlement discussions in the matter. LG&E cannot predict the outcome of this matter or the potential impact on the operations of the Mill Creek plant, including increased capital or operating costs, if any, but believes the plant is operating in compliance with the permits.

Trimble County Unit 2 Air Permit

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the Trimble County Unit 2 baseload coal-fired generating unit, but the agency upheld the permit in an order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which, in January 2010, were incorporated into a final revised permit issued by the Kentucky Division for Air Quality. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, LG&E cannot predict the outcome of this matter or the potential impact on the operations of the Trimble County plant, including increased capital or operating costs, if any.

Trimble County Water Discharge Permit

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Kentucky Energy and Environment Cabinet (KEEC) challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the KEEC issued a final order upholding the permit which was subsequently appealed by the environmental groups. In September 2013, the Franklin Circuit Court reversed the KEEC order upholding the permit and remanded the permit to the agency for further proceedings. LG&E and the KEEC appealed the order to the Kentucky Court of Appeals. In July 2015, the Court of Appeals upheld the lower court ruling. LG&E and the KEEC have moved for discretionary review by the Kentucky Supreme Court. On February 10, 2016, the Kentucky Supreme Court issued an order granting discretionary review. LG&E is unable to predict the outcome of this matter or the potential impact on the operations of the Trimble County plant, including increased capital or operating costs, if any.

Regulatory Issues

See Note 4 for information on regulatory matters related to utility rate regulation.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties of up to $1 million per day, per violation, for certain violations.

LG&E monitors its compliance with the Reliability Standards and continues to self-report or self-log potential violations of certain applicable reliability requirements and submit accompanying mitigation plans, as required. The resolution of a small number of potential violations is pending. Any Regional Reliability Entity (including RFC or SERC) determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing its programs to ensure compliance with the Reliability Standards, certain other instances of potential non-compliance may be identified from time to time. LG&E cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

Environmental Matters

Due to the environmental issues discussed below or other environmental matters, it may be necessary for LG&E to modify, curtail, replace or cease operation of certain facilities or performance of certain operations to comply with statutes, regulations and other requirements of regulatory bodies or courts. In addition, legal challenges to new environmental permits or rules add to the uncertainty of estimating the future cost of these permits and rules.

LG&E is entitled to recover, through the ECR mechanism, certain costs of complying with the Clean Air Act, as

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

amended, and those federal, state or local environmental requirements applicable to coal combustion wastes and by-products from facilities that generate electricity from coal in accordance with approved compliance plans. Costs not covered by the ECR mechanism are subject to rate recovery before the KPSC or the FERC. LG&E can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

Air

The Clean Air Act, which regulates air pollutants from mobile and stationary sources, has a significant impact on the operation of fossil fuel plants. The Clean Air Act requires the EPA periodically to review and establish concentration levels in the ambient air for six criteria pollutants to protect public health and welfare. These concentration levels are known as NAAQS. The six criteria pollutants are carbon monoxide, lead, nitrogen dioxide, ozone, particulate matter and sulfur dioxide.

Federal environmental regulations of these criteria pollutants require states to adopt implementation plans, known as state implementation plans, for certain pollutants, which detail how the state will attain the standards that are mandated by the relevant law or regulation. Each state identifies the areas within its boundaries that meet the NAAQS (attainment areas) and those that do not (non-attainment areas), and must develop a state implementation plan both to bring non-attainment areas into compliance with the NAAQS and to maintain good air quality in attainment areas. In addition, for attainment of ozone and fine particulates standards, states in the eastern portion of the country, including Kentucky, are subject to a regional program developed by the EPA known as the Cross-State Air Pollution Rule. The NAAQS, future revisions to the NAAQS and state implementation plans implementing them, or future revisions to regional programs, may require installation of additional pollution controls, the costs of which LG&E believes are subject to cost recovery.

Although LG&E does not currently anticipate significant costs to comply with these programs, changes in market or operating conditions could result in different costs than anticipated.

National Ambient Air Quality Standards (NAAQS)

Under the Clean Air Act, the EPA is required to reassess the NAAQS for certain air pollutants on a five-year schedule. In 2008, the EPA revised the NAAQS for ozone and proposed to further strengthen the standard in November 2014. The EPA released a new ozone standard on October 1, 2015. The states and EPA will determine attainment with the new ozone standard through review of relevant ambient air monitoring data, with attainment or nonattainment designations scheduled no later than October 2017. States are also obligated to address interstate transport issues associated with new ozone standards through the establishment of "good neighbor" state implementation plans for those states that are found to contribute significantly to another states' non-attainment. States that are not in the ozone transport region, including Kentucky, are working together to evaluate further nitrogen oxide reductions from fossil-fueled plants with SCRs. The nature and timing of any additional reductions resulting from these evaluations cannot be predicted at this time.

In 2010, the EPA finalized revised NAAQS for sulfur dioxide and required states to identify areas that meet those standards and areas that are in "non-attainment". In July 2013, the EPA finalized non-attainment designations for parts of the country, including part of Jefferson County in Kentucky. Attainment must be

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

achieved by 2018. LG&E anticipates that certain previously required compliance measures, such as upgraded or new sulfur dioxide scrubbers at certain plants and the retirement of coal-fired generating units at LG&E's Cane Run plant, will help to achieve compliance with the new sulfur dioxide and ozone standards. If additional reductions are required, the costs could be significant.

Mercury and Air Toxics Standards (MATS)

In February 2012, the EPA finalized the MATS rule requiring reductions of mercury and other hazardous air pollutants from fossil-fuel fired power plants, with an effective date of April 16, 2012. The MATS rule was challenged by industry groups and states and was upheld by the U.S. Court of Appeals for the D. C. Circuit Court (D.C. Circuit Court) in April 2014. A group of states subsequently petitioned the U.S. Supreme Court (Supreme Court) to review this decision and in June 2015, the Supreme Court held that the EPA failed to properly consider costs when deciding to regulate hazardous air emissions from power plants under MATS. The Court remanded the matter to the D.C. Circuit Court, which in December 2015 remanded the rule to EPA without vacating it. EPA has proposed a supplemental finding regarding costs of the rule and has announced that it intends to make a final determination in 2016. The EPA's MATS rule remains in effect during the pendency of the ongoing proceedings.

LG&E has installed significant controls in connection with the MATS rule and in conjunction with compliance with other environmental requirements, including fabric-filter baghouses, upgraded scrubbers or chemical additive systems for which appropriate KPSC authorization and/or ECR treatment has been received. LG&E is currently seeking KPSC approval for a compliance plan providing for installation of additional MATS-related controls, the cost of which is currently estimated at $5 million. LG&E cannot predict the outcome of the MATS rule or its potential impact, if any, on plant operations, rate treatment or future capital or operating needs. See Note 4 for additional information.

New Source Review (NSR)

The NSR litigation brought by EPA, states and environmental groups against coal-fired generating plants in past years continues to proceed through the courts. Although none of this litigation directly involves LG&E, it can influence the permitting of large capital projects at LG&E's power plants, the costs of which cannot presently be determined but could be significant.

Climate Change

There is continuing momentum to address climate change. Most recently, in December 2015, 195 nations, including the U.S., signed the Paris Agreement on Climate which establishes a comprehensive framework for the reduction of GHG emissions from both developed and developing nations. Although the agreement does not establish binding reduction requirements, it requires each nation to prepare, communicate, and maintain GHG reduction commitments. Based on EPA's Clean Power Plan described below, the U.S. has committed to an initial reduction target of 26% to 28% below 2005 levels by 2025.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The EPA's Rules under Section 111 of the Clean Air Act

As further described below, the EPA finalized rules imposing greenhouse gas emission standards for both new and existing power plants. The EPA has also issued a proposed federal implementation plan that would apply to any states that fail to submit an acceptable state implementation plan under these rules. The EPA's authority to promulgate these regulations under Section 111 of the Clean Air Act has been challenged in the D.C. Circuit Court by several states and industry groups. On February 9, 2016, the Supreme Court stayed the rule for existing plants (the Clean Power Plan) pending the D.C. Circuit Court's review and subsequent review by the Supreme Court if a writ of certiorari is filed and granted.

The EPA's rule for new power plants imposes separate emission standards for coal and natural gas units based on the application of different technologies. The coal standard is based on the application of partial carbon capture and sequestration technology, but because this technology is not presently commercially available, the rule effectively precludes the construction of new coal-fired plants. The standard for NGCC power plants is the same as the EPA proposed in 2012 and is not continuously achievable. The preclusion of new coal-fired plants and the compliance difficulties posed for new natural gas-fired plants could have a significant industry-wide impact.

The EPA's Clean Power Plan

The EPA's rule for existing power plants, referred to as the Clean Power Plan, was published in the Federal Register in October 2015. The Clean Power Plan contains state-specific rate-based and mass-based reduction goals and guidelines for the development, submission and implementation of state implementation plans to achieve the state goals. State-specific goals were calculated from 2012 data by applying EPA's broad interpretation and definition of the BSER, resulting in the most stringent targets to be met in 2030, with interim targets to be met beginning in 2022. The EPA believes it has offered some flexibility to the states as to how their compliance plans can be crafted, including the option to use a rate-based approach (limit emissions per megawatt hour) or a mass-based approach (limit total tons of emissions per year), and the option to demonstrate compliance through emissions trading and multi-state collaborations. Under the rate-based approach, Kentucky would need to make a 41% reduction from its 2012 emissions rate and under a mass-based approach it would need to make a 36% reduction. These reductions are significantly greater than initially proposed and present significant challenges to the state. If the Clean Power Plan is ultimately upheld and Kentucky fails to develop an approvable implementation plan by the applicable deadline, the EPA would impose a federal implementation plan that could be more stringent than what the state plan might provide. Depending on the provisions of the Kentucky implementation plan, LG&E may need to modify its current portfolio of generating assets during the next decade and/or participate in an allowance trading program.

LG&E is participating in the ongoing regulatory processes at the state and federal level in an effort to provide input into the state or federal implementation plan that will govern reductions in Kentucky. Various states, industry groups, and individual companies including LKE have filed petitions for reconsideration with EPA and petitions for review with the D.C. Circuit Court challenging the Clean Power Plan. LG&E cannot predict the outcome of this matter or the potential impact, if any, on plant operations, or future capital or operating needs. LG&E believes that the costs, which could be significant, would be subject to cost recovery.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

In April 2014, the Kentucky General Assembly passed legislation which limits the measures that the Kentucky Energy and Environment Cabinet may consider in setting performance standards to comply with the EPA's regulations governing GHG emissions from existing sources. The legislation provides that such state GHG performance standards shall be based on emission reductions, efficiency measures, and other improvements available at each power plant, rather than renewable energy, end-use energy efficiency, fuel switching and re-dispatch. These statutory restrictions may make it more difficult for Kentucky to achieve the GHG reduction levels that the EPA has established for Kentucky.

<u>Water/Waste</u>

Coal Combustion Residuals (CCRs)

On April 17, 2015, the EPA published its final rule regulating CCRs. CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. The rule became effective on October 19, 2015. It imposes extensive new requirements, including location restrictions, design and operating standards, groundwater monitoring and corrective action requirements, and closure and post-closure care requirements on CCR impoundments and landfills that are located on active power plants and not closed. Under the rule, the EPA will regulate CCRs as non-hazardous under Subtitle D of RCRA and allow beneficial use of CCRs, with some restrictions. The rule's requirements for covered CCR impoundments and landfills include implementation of groundwater monitoring and commencement or completion of closure activities generally between three and ten years from certain triggering events. This self-implementing rule requires posting of compliance documentation on a publicly accessible website and is enforceable solely through citizen suits. LG&E is also subject to state rules applicable to CCR management which may potentially be modified to reflect some or all requirements of the federal rule.

LG&E is currently pursuing KPSC approval for a compliance plan providing for closure of impoundments at the Mill Creek and Trimble County stations, and construction of process water management facilities at those plants. LG&E currently estimate the cost of these CCR compliance measures at $311 million. See Note 4 for additional information.

In connection with the final CCR rule, LG&E recorded increases to existing AROs during 2015. See Note 15 for additional information. Further increases to AROs or changes to current capital plans or to operating costs may be required as estimates are refined based on closure developments, groundwater monitoring results, and regulatory or legal proceedings. Costs relating to this rule are subject to rate recovery.

Clean Water Act

Regulations under the federal Clean Water Act dictate permitting and mitigation requirements for many of LG&E's construction projects. Many of those requirements relate to power plant operations, including requirements related to the treatment of pollutants in effluents prior to discharge, the temperature of effluent discharges and the location, design and construction of cooling water intake structures at generating facilities, standards intended to protect aquatic organisms by reducing capture in the screens attached to cooling water intake structures (impingement) at generating facilities and the water volume brought into the facilities (entrainment). The requirements could impose significant costs which are subject to rate recovery.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4
NOTES TO FINANCIAL STATEMENTS (Continued)			

Effluent Limitations Guidelines (ELGs)

On September 30, 2015, the EPA released its final effluent limitations guidelines for wastewater discharge permits for new and existing steam electric generating facilities. The rule provides strict technology-based discharge limitations for control of pollutants in scrubber wastewater, fly ash and bottom ash transport water, mercury control wastewater, gasification wastewater, and combustion residual leachate. The new guidelines require deployment of additional control technologies providing physical, chemical, and biological treatment of wastewaters. The guidelines also mandate operational changes including "no discharge" requirements for fly ash and bottom ash transport waters and mercury control wastewaters. The implementation date for individual generating stations will be determined by the states on a case-by-case basis according to criteria provided by the EPA, but the requirements of the rule must be fully implemented no later than 2023. It has not been decided how Kentucky intends to integrate the ELGs into its routine permit renewal process. LG&E continues to assess the requirements of this complex rule to determine available compliance strategies. LG&E is unable to fully estimate compliance costs or timing at this time although certain preliminary estimates are included in current capital forecasts, for applicable periods. Costs to comply with ELGs or other discharge limits, which are expected to be significant, are subject to rate recovery.

Clean Water Act Section 316(b)

The EPA's final 316(b) rule for existing facilities became effective in October 2014, and regulates cooling water intake structures and their impact on aquatic organisms. States are allowed broad discretion to make site-specific determinations under the rule. The rule requires existing facilities to choose between several options to reduce the impact to aquatic organisms that become trapped against water intake screens (impingement) and to determine the intake structure's impact on aquatic organisms pulled through a plant's cooling water system (entrainment). Plants equipped with closed-cycle cooling, an acceptable option, would likely not incur substantial costs. Once-through systems would likely require additional technology to comply with the rule. Mill Creek Unit 1 is the only unit expected to be impacted. LG&E is evaluating compliance strategies but do not presently expect the compliance costs, which are subject to rate recovery, to be significant.

Waters of the United States (WOTUS)

The U.S. Court of Appeals for the Sixth Circuit has issued a stay of EPA's rule on the definition of WOTUS pending the court's review of the rule. The effect of the stay is that the WOTUS rule is not currently in effect anywhere in the United States. The ultimate outcome of the court's review of the rule remains uncertain. LG&E does not expect the rule to have a significant impact on its operations.

Other Issues

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxic Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all or some PCB-containing equipment. The EPA has postponed the release of the revised regulations to March 2016. LG&E cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on its facilities, but the costs could be significant.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Superfund and Other Remediation

LG&E is investigating, responding to agency inquiries, remediating, or have completed the remediation of, several sites that were not addressed under a regulatory program such as Superfund, but for which LG&E may be liable for remediation. These include a number of former coal gas manufacturing plants previously owned or operated or currently owned by predecessors or affiliates of LG&E. To date, the costs of these sites have not been significant.

There are additional sites, formerly owned or operated by LG&E predecessors or affiliates. LG&E lacks information on the conditions of such additional sites and are therefore unable to estimate any potential liability it may have or a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require LG&E to take more extensive assessment and remedial actions at former coal gas manufacturing plants. LG&E cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, LG&E undertakes remedial action in response to notices of violations, spills or other releases at various on-site and off-site locations, negotiate with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiate with property owners and other third parties alleging impacts from LG&E's operations and undertake similar actions necessary to resolve environmental matters that arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on LG&E's operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in significant additional costs. Insurance policies maintained by LG&E may be applicable to certain of the costs or other obligations related to these matters but the amount of insurance coverage or reimbursement cannot be estimated or assured.

Other

Guarantees and Other Assurances

In the normal course of business, LG&E enters into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

Pursuant to the OVEC power purchase contract, LG&E is obligated to pay for its share of OVEC's excess debt service, post-retirement and decommissioning costs, as well as any shortfall from amounts currently included within a demand charge designed and currently expected to cover these costs over the term of the contract. LG&E's proportionate share of OVEC's outstanding debt was $86 million at December 31, 2015. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchases, Energy Sales and Other Commitments" above for additional information on the OVEC power purchase contract.

LG&E provides other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, including LG&E, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of $225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

Wholesale Sales and Purchases

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail customers and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost plus any split savings. Savings realized from such intercompany transactions are shared equally between both companies. The volume of energy each company has to sell to the other is dependent on its retail customers' needs and its available generation.

Support Costs

LKS provides LG&E with administrative, management and support services. The costs of these services are charged to LG&E as direct support costs. General costs that cannot be directly attributed to a specific LKE subsidiary are allocated and charged to LG&E and other subsidiaries as indirect support costs. LKS bases its indirect allocations on the subsidiaries' number of employees, total assets, revenues, number of customers and/or other statistical information.

LKS charged LG&E $155 million and $140 million for the years ended December 31, 2015 and 2014, including amounts applied to accounts that are further distributed between capital and expense on LG&E’s books, based on methods that are believed to be reasonable.

In addition to the charges for services noted above, LKS makes payments on behalf of LG&E for fuel purchases and other costs for products or services provided by third parties. LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E are reimbursed through LKS.

Intercompany Derivatives

Periodically, LG&E enters into forward-starting interest rate swaps with PPL. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties. See Note 13 for additional information on intercompany derivatives.

Other

See Note 1 for discussions regarding the intercompany tax sharing agreement. See Note 8 for discussions regarding intercompany allocations associated with defined benefits.

12. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. During 2015 and 2014, there were no transfers between Level 1 and Level 2. See Note 1 for information on the levels in the fair value hierarchy.

Price risk management liabilities:				
Interest rate swaps	$ 81	$ -	$ 81	$ -
Total price risk management liabilities	$ 81	$ -	$ 81	$ -

(a) Included in "Other noncurrent assets" on the Balance Sheets. Represents cash collateral posted to offset the exposure with counterparties related to certain interest rate swaps under master netting arrangements that are not offset.

Price Risk Management Assets/Liabilities - Interest Rate Swaps

To manage interest rate risk, LG&E uses interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3.

Financial Instruments Not Recorded at Fair Value

The carrying amounts of long-term debt on the Balance Sheets and their estimated fair values are set forth below. The fair values were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates, which incorporate LG&E's credit risk. Long-term debt is classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	December 31, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt	$ 1,642	$ 1,704	$ 1,345	$ 1,455

The carrying value of short-term debt, when outstanding, approximates fair value due to the variable interest rates associated with the short-term debt and is classified as Level 2.

13. Derivative Instruments and Hedging Activities

Risk Management Objectives

PPL has a risk management policy approved by the Board of Directors to manage market risk associated with commodities and interest rates on debt issuances (including price, liquidity and volumetric risk), and credit risk (including non-performance risk and payment default risk). The Risk Management Committee, comprised of senior management and chaired by the Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions, verification of risk and transaction limits and the coordination and reporting of the Enterprise Risk Management (ERM) program.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts and swaps are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of the contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected.

The following summarizes the market risks that affect LG&E. These risks are significantly mitigated due to recovery mechanisms in place.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Interest rate risk

- LG&E is exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt, and utilizes forward starting interest rate swaps to hedge changes in benchmark interest rates, when appropriate, in connection with future debt issuances.

- LG&E is exposed to interest rate risk associated with debt securities and derivatives held by defined benefit plans.

Commodity price risk

- LG&E's rates include certain mechanisms for fuel, natural gas supply and fuel-related expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses.

Equity securities price risk

- LG&E is exposed to equity securities price risk associated with defined benefit plans. This risk is significantly mitigated due to recovery mechanisms in place.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

In the event a supplier of LG&E defaults on its obligation, LG&E would be required to seek replacement power or replacement fuel in the market. In general, subject to regulatory review or other processes, appropriate incremental costs incurred by LG&E would be recoverable from customers through applicable rate mechanisms, thus mitigating its financial risk.

LG&E has credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. LG&E may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

Master Netting Arrangements

Net derivative positions on the Balance Sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

LG&E had no obligation to return cash collateral under master netting arrangements at December 31, 2015 and

2014.

LG&E posted $9 million and $21 million of cash collateral under master netting arrangements at December 31, 2015 and 2014.

See "Offsetting Derivative Instruments" below for a summary of derivative positions presented in the Balance Sheets where a right of setoff exists under these arrangements.

Interest Rate Risk

LG&E issues debt to finance its operations, which exposes it to interest rate risk. Various financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of the debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under LG&E's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges

Periodically, LG&E enters into forward-starting interest rate swaps with PPL that have terms identical to forward-starting swaps entered into by PPL with third parties. It is probable that realized gains and losses on all of these swaps will be recoverable through regulated rates; as such, any gains and losses on these derivatives are included in regulatory assets or liabilities and will be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt at the time the underlying hedged interest expense is recorded. In September 2015, LG&E issued first mortgage bonds totaling $550 million and all outstanding forward-starting interest rate swaps were terminated. Net cash settlements of $44 million were paid on the swaps that were terminated. The settlements are included in "Regulatory assets" (noncurrent) on the Balance Sheet and "Cash Flows from Operating Activities" on the Statements of Cash Flows.

Economic Activity

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statement of Income at the time the underlying hedged interest expense is recorded. At December 31, 2015, LG&E held contracts with a notional amount of $179 million that range in maturity through 2033.

Accounting and Reporting

All derivative instruments are recorded at fair value on the Balance Sheets as an asset or liability unless NPNS is elected. Changes in the fair value of derivatives not designated as NPNS are recognized currently in earnings unless specific hedge accounting criteria are met and designated as such, except for the changes in fair values of

Derivative Instruments	Location of Gain (Loss)	2015	2014
Interest rate swaps	Regulatory assets - noncurrent	$ 1	$ (12)

Offsetting Derivative Instruments

LG&E enters into agreements pursuant to which it purchases or sells certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to set off amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

LG&E has elected not to offset derivative assets and liabilities and not to offset net derivative positions against

NOTES TO FINANCIAL STATEMENTS (Continued)

the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The table below summarizes the derivative positions presented in the Balance Sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

	Liabilities			
		Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Pledged	Net
December 31, 2015				
Treasury derivatives	$ 47	$ -	$ 9	$ 38
December 31, 2014				
Treasury derivatives	$ 81	$ -	$ 20	$ 61

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in LG&E’s credit ratings. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade, and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding LG&E’s performance obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

At December 31, 2015, derivative contracts in a net liability position that contain credit risk-related contingent features, collateral posted on those positions and the related effect of a decrease in credit ratings below investment grade are summarized as follows:

Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent features	$	28
Aggregate fair value of collateral posted on these derivative instruments		9
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)		19

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

14. Other Intangible Assets

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2015		December 31, 2014	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Coal contracts (a)	$ 124	$ 116	$ 124	$ 98
Land and transmission rights	7	1	7	1
Emission allowances (b)	1	-	1	-
OVEC power purchase agreement (c)	87	29	87	23
Total subject to amortization	$ 219	$ 146	$ 219	$ 122

(a) Gross carrying amount represents the fair value at the acquisition date of coal contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 4 for additional information.
(b) Emission allowances are expensed when consumed or sold; therefore, there is no accumulated amortization.
(c) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to this contract, which is being amortized over the same period as the intangible asset, eliminating any income statement impact. See Note 4 for additional information.

Current intangible assets are included in "Other current assets" on the Balance Sheets. Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Amortization expense was as follows:

	2015	2014
Intangible assets with regulatory offset	$ 24	$ 23

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2016	2017	2018	2019	2020
Intangible assets with regulatory offset	$ 14	$ 6	$ 6	$ 6	$ 6

15. Asset Retirement Obligations

LG&E's AROs are primarily related to the final retirement of assets associated with generating units. LG&E also has AROs related to natural gas mains and wells. LG&E's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. LG&E's accretion and depreciation expense are recorded as a regulatory asset, such that there is no earnings impact.

The changes in the carrying amounts of AROs were as follows.

	2015	2014
ARO at beginning of period	$ 74	$ 74
Accretion expense	5	4
Obligations incurred	3	-
Changes in estimated cash flow or settlement date	98	1
Obligations settled	(5)	(5)
ARO at end of period	175	74

LG&E recorded increases of $89 million to the existing AROs during 2015 as a result of an engineering study that was performed, in connection with the final CCR rule, providing clarity on projected CCR closure costs and revisions in the timing and amounts of future expected cash flows. Further increases to AROs or changes to current capital plans or to operating costs may be required as estimates of future cash flows are refined based on closure developments, groundwater monitoring results and regulatory or legal proceedings. In 2014, AROs were revalued primarily due to updates in the estimated cash flows for ash ponds based on updated cost estimates.

As of December 31, 2015, LG&E had $25 million of the ARO balances classified as current liabilities. These

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

current liabilities are primarily related to CCR closure costs expected to be incurred in 2016. As of December 31, 2014, substantially all of the ARO balances are classified as noncurrent liabilities.

See Note 10 for information on the final CCR rule and Note 6 for information on the rate recovery applications with the KPSC.

16. New Accounting Guidance Pending Adoption

Accounting for Revenue from Contracts with Customers

In May 2014, the Financial Accounting Standards Board (FASB) issued accounting guidance that establishes a comprehensive new model for the recognition of revenue from contracts with customers. This model is based on the core principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

For public business entities, this guidance can be applied using either a full retrospective or modified retrospective transition method, beginning in annual reporting periods after December 15, 2017 and interim periods within those years. Public business entities may early adopt this guidance in annual reporting periods beginning after December 15, 2016. LG&E expects to adopt this guidance effective January 1, 2018.

LG&E is currently assessing the impact of adopting this guidance, as well as the transition method it will use.

17. Notes to Statement of Cash Flows

Supplemental disclosures of cash flow information

	December 31, 2015	December 31, 2014
Cash paid (received) during the period for:		
Income taxes	$ (81)	$ 65
Interest on borrowed money	40	38
Other cash paid for interest	8	8

18. Notes to Statement of Income for the Year

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106) (Continued)

distributions of these tentative classifications in columns (c) and (d), including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.

7. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.

8. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.

9. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date

ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 11, column (c), and that reported for electric plant in service, pages 204-207, column 9d), excluding retirements of non-depreciable property.
3. The provisions of Account 108 in the Uniform System of accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

Section A. Balances and Changes During Year

Line No.	Item (a)	Total (c+d+e) (b)	Electric Plant in Service (c)	Electric Plant Held for Future Use (d)	Electric Plant Leased to Others (e)

INVESTMENTS IN SUBSIDIARY COMPANIES (Account 123.1)

1. Report below investments in Accounts 123.1, investments in Subsidiary Companies.
2. Provide a subheading for each company and List there under the information called for below. Sub - TOTAL by company and give a TOTAL in columns (e),(f),(g) and (h)
(a) Investment in Securities - List and describe each security owned. For bonds give also principal amount, date of issue, maturity and interest rate.
(b) Investment Advances - Report separately the amounts of loans or investment advances which are subject to repayment, but which are not subject to current settlement. With respect to each advance show whether the advance is a note or open account. List each note giving date of issuance, maturity date, and specifying whether note is a renewal.
3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.

Line No.	Description of Investment (a)	Date Acquired (b)	Date Of Maturity (c)	Amount of Investment at Beginning of Year (d)

CAPITAL STOCKS (Account 201 and 204) (Continued)

3. Give particulars (details) concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.
4. The identification of each class of preferred stock should show the dividend rate and whether the dividends are cumulative or non-cumulative.
5. State in a footnote if any capital stock which has been nominally issued is nominally outstanding at end of year.
Give particulars (details) in column (a) of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledgee and purposes of pledge.

OTHER PAID-IN CAPITAL (Accounts 208-211, inc.)

Report below the balance at the end of the year and the information specified below for the respective other paid-in capital accounts. Provide a subheading for each account and show a total for the account, as well as total of all accounts for reconciliation with balance sheet, Page 112. Add more columns for any account if deemed necessary. Explain changes made in any account during the year and give the accounting entries effecting such change.
(a) Donations Received from Stockholders (Account 208)-State amount and give brief explanation of the origin and purpose of each donation.
(b) Reduction in Par or Stated value of Capital Stock (Account 209): State amount and give brief explanation of the capital change which gave rise to amounts reported under this caption including identification with the class and series of stock to which related.
(c) Gain on Resale or Cancellation of Reacquired Capital Stock (Account 210): Report balance at beginning of year, credits, debits, and balance at end of year with a designation of the nature of each credit and debit identified by the class and series of stock to which related.
(d) Miscellaneous Paid-in Capital (Account 211)-Classify amounts included in this account according to captions which, together with brief explanations, disclose the general nature of the transactions which gave rise to the reported amounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224)

1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.
2. In column (a), for new issues, give Commission authorization numbers and dates.
3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.
5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.
6. In column (b) show the principal amount of bonds or other long-term debt originally issued.
7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224) (Continued)

10. Identify separate undisposed amounts applicable to issues which were redeemed in prior years.
11. Explain any debits and credits other than debited to Account 428, Amortization and Expense, or credited to Account 429, Premium on Debt - Credit.
12. In a footnote, give explanatory (details) for Accounts 223 and 224 of net changes during the year. With respect to long-term advances, show for each company: (a) principal advanced during year, (b) interest added to principal amount, and (c) principle repaid during year. Give Commission authorization numbers and dates.
13. If the respondent has pledged any of its long-term debt securities give particulars (details) in a footnote including name of pledgee and purpose of the pledge.
14. If the respondent has any long-term debt securities which have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.
15. If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest expense in column (i). Explain in a footnote any difference between the total of column (i) and the total of Account 427, interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.
16. Give particulars (details) concerning any long-term debt authorized by a regulatory commission but not yet issued.

LONG-TERM DEBT (Account 221, 222, 223 and 224)

1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.
2. In column (a), for new issues, give Commission authorization numbers and dates.
3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.
5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.
6. In column (b) show the principal amount of bonds or other long-term debt originally issued.
7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

FOOTNOTE DATA

Schedule Page: 256 Line No.: 1 Column: a

Per instruction 9 concerning the treatment of unamortized debt expense, premium or discount, original debt premiums and expenses are being amortized over the lives of the related issues and remarketing expenses are being amortized through the put dates of the remarketed bonds.

Schedule Page: 256 Line No.: 2 Column: a

Pollution control series bonds are obligations of LG&E, issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates LG&E to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds.

Schedule Page: 256 Line No.: 16 Column: a

As of December 31, 2015, the company had in effect four interest-rate swap agreements to hedge its exposure to tax exempt rates related to Pollution Control Bonds, Variable Rate Series. The Company’s position under the swap agreements are to pay a fixed rate and receive a variable rate based on the Securities Industry and Financial Markets Association Index or London Interbank Offered Rate (LIBOR). The specifics for each swap agreement related to notional amounts, maturity dates, payable and receivable positions are as follows:

Notional Amount	Maturity	Payable	Receivable
$83,335,000	11/01/2020	Fixed 5.495%	SIFMA Index
$32,000,000	10/01/2033	Fixed 3.657%	68% of 1 mo LIBOR
$32,000,000	10/01/2033	Fixed 3.645%	68% of 1 mo LIBOR
$32,000,000	10/01/2033	Fixed 3.695%	68% of 1 mo LIBOR

By Order in Case No. 2014-00082 on June 16, 2014, LG&E was authorized by the KPSC to issue First Mortgage Bonds in aggregate principal amount of up to $550 million and enter into hedging agreements to lock in interest rates for debt to be issued in 2015. LG&E entered into hedging agreements totaling $500 million for the two bonds and in September 2015 when the debt was issued, the swaps were settled at a loss of $43,688,302. The loss is being amortized over the life of the debt to which it relates.

Schedule Page: 256 Line No.: 18 Column: a

Proceeds from LG&E’s First Mortgage Bonds issued in 2010 were used to repay the loans from a PPL subsidiary and for general corporate purposes. Proceeds from LG&E's First Mortgage Bonds issued in 2013 were used for capital expenditures and general corporate purposes. Proceeds from LG&E’s First Mortgage Bonds issued in 2015 were used to pay maturing debt, pay down short term debt, and general corporate purposes. The first mortgage bonds were issued at a discount.

As of December 31, 2015, all of the Company’s long-term debt is collateralized by a first mortgage lien on substantially all of the assets of the Company in Kentucky.

Schedule Page: 256 Line No.: 25 Column: a

By Order in Case No. 2014-00082 on June 16, 2014, LG&E was authorized by the KPSC to issue First Mortgage Bonds in aggregate principal amount of up to $550 million and enter into hedging agreements to lock in interest rates for debt to be issued in 2015. LG&E entered into hedging agreements totaling $300 million for the 10 year bond and $250 million for the 30 year bond. Debt was issued in September 2015, totaling $300 million in 10 year First Mortgage Bonds and $250 million in 30 year First Mortgage Bonds. The swaps were settled at a loss of $14,076,899 related to the $300 million, 10 year First Mortgage Bonds.

Schedule Page: 256 Line No.: 27 Column: a

By Order in Case No. 2014-00082 on June 16, 2014, LG&E was authorized by the KPSC to issue First Mortgage Bonds in aggregate principal amount of up to $550 million and enter into hedging agreements to lock in interest rates for debt to be issued in 2015. LG&E entered into hedging agreements totaling $300 million for the 10 year bond and $250 million for

FOOTNOTE DATA

the 30 year bond. Debt was issued in September 2015, totaling $300 million in 10 year First Mortgage Bonds and $250 million in 30 year First Mortgage Bonds. The swaps were settled at a loss of $29,611,403 related to the $250 million, 30 year First Mortgage Bonds.

Schedule Page: 256.1 Line No.: 5 Column: a

LG&E did not have long-term notes with associated companies in 2015.

Schedule Page: 256.1 Line No.: 8 Column: a

Upon completion of the acquisition by PPL, push-down accounting was used, resulting in adjustments to certain of the Company’s assets and liabilities to reflect their estimated fair values on the acquisition date.

The Trimble County 2007 Series A pollution control bond, listed below, was fair valued and continues to be amortized as a result of the PPL acquisition:

Bond Issue	(221) Principal	(224) Fair Value Adjustment	Total Purchase Accounting
Trimble County 2007 Series A, due 6/1/2033, 4.600%	$60,000,000	($2,062,667)	$57,937,333

The purchase accounting adjustment was recorded to Other Long-Term Debt Account (224). Amortization is recorded to Interest on Long-Term Debt Account (427).

RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be field, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.
3. A substitute page, designed to meet a particular need of a company, may be used as Long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR

1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual, or estimated amounts of such taxes are know, show the amounts in a footnote and designate whether estimated or actual amounts.
2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.) Enter the amounts in both columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.
3. Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b)amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Continued)

5. If any tax (exclude Federal and State income taxes)- covers more then one year, show the required information separately for each tax year, identifying the year in column (a).
6. Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment in a foot- note. Designate debit adjustments by parentheses.
7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.
8. Report in columns (i) through (l) how the taxes were distributed. Report in column (I) only the amounts charged to Accounts 408.1 and 409.1 pertaining to electric operations. Report in column (l) the amounts charged to Accounts 408.1 and 109.1 pertaining to other utility departments and amounts charged to Accounts 408.2 and 409.2. Also shown in column (l) the taxes charged to utility plant or other balance sheet accounts.
9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

ELECTRIC OPERATING REVENUES (Account 400)

1. The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.
2. Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The -average number of customers means the average of twelve figures at the close of each month.
4. If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
5. Disclose amounts of $250,000 or greater in a footnote for accounts 451, 456, and 457.2.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

SALES FOR RESALE (Account 447)

1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
LF - for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401,iine 24.
10. Footnote entries as required and provide explanations following all required data.

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401,iine 24.
10. Footnote entries as required and provide explanations following all required data.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

ELECTRIC OPERATION AND MAINTENANCE EXPENSES

If the amount for previous year is not derived from previously reported figures, explain in footnote.

Line No.	Account (a)	Amount for Current Year (b)	Amount for Previous Year (c)
1	1. POWER PRODUCTION EXPENSES		
2	A. Steam Power Generation		
3	Operation		
4	(500) Operation Supervision and Engineering	7,778,894	4,111,669
5	(501) Fuel	293,363,305	375,211,977
6	(502) Steam Expenses	24,037,462	35,380,222
7	(503) Steam from Other Sources		
8	(Less) (504) Steam Transferred-Cr.	5,774	
9	(505) Electric Expenses	1,656,803	812,391
10	(506) Miscellaneous Steam Power Expenses	16,389,656	19,494,262
11	(507) Rents	41,154	46,200
12	(509) Allowances	4,471	301,609
13	TOTAL Operation (Enter Total of Lines 4 thru 12)	343,265,971	435,358,330
14	Maintenance		
15	(510) Maintenance Supervision and Engineering	3,346,838	2,157,291
16	(511) Maintenance of Structures	2,753,377	2,770,754
17	(512) Maintenance of Boiler Plant	38,558,839	40,957,440
18	(513) Maintenance of Electric Plant	5,973,295	9,454,232
19	(514) Maintenance of Miscellaneous Steam Plant	9,599,669	1,762,911
20	TOTAL Maintenance (Enter Total of Lines 15 thru 19)	60,232,018	57,102,628
21	TOTAL Power Production Expenses-Steam Power (Entr Tot lines 13 & 20)	403,497,989	492,460,958
22	B. Nuclear Power Generation		
23	Operation		
24	(517) Operation Supervision and Engineering		
25	(518) Fuel		
26	(519) Coolants and Water		
27	(520) Steam Expenses		
28	(521) Steam from Other Sources		
29	(Less) (522) Steam Transferred-Cr.		
30	(523) Electric Expenses		
31	(524) Miscellaneous Nuclear Power Expenses		
32	(525) Rents		
33	TOTAL Operation (Enter Total of lines 24 thru 32)		
34	Maintenance		
35	(528) Maintenance Supervision and Engineering		
36	(529) Maintenance of Structures		
37	(530) Maintenance of Reactor Plant Equipment		
38	(531) Maintenance of Electric Plant		
39	(532) Maintenance of Miscellaneous Nuclear Plant		
40	TOTAL Maintenance (Enter Total of lines 35 thru 39)		
41	TOTAL Power Production Expenses-Nuc. Power (Entr tot lines 33 & 40)		
42	C. Hydraulic Power Generation		
43	Operation		
44	(535) Operation Supervision and Engineering	124,513	128,162
45	(536) Water for Power	39,039	39,019
46	(537) Hydraulic Expenses		
47	(538) Electric Expenses	267,947	273,236
48	(539) Miscellaneous Hydraulic Power Generation Expenses	199,153	157,807
49	(540) Rents	477,265	430,474
50	TOTAL Operation (Enter Total of Lines 44 thru 49)	1,107,917	1,028,698
51	C. Hydraulic Power Generation (Continued)		
52	Maintenance		
53	(541) Mainentance Supervision and Engineering		
54	(542) Maintenance of Structures	317,142	407,273
55	(543) Maintenance of Reservoirs, Dams, and Waterways	200,701	123,800
56	(544) Maintenance of Electric Plant	337,879	357,056
57	(545) Maintenance of Miscellaneous Hydraulic Plant	35,117	
58	TOTAL Maintenance (Enter Total of lines 53 thru 57)	890,839	888,129
59	TOTAL Power Production Expenses-Hydraulic Power (tot of lines 50 & 58)	1,998,756	1,916,827

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

PURCHASED POWER (Account 555)
(Including power exchanges)

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

PURCHASED POWER(Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.
9. Footnote entries as required and provide explanations following all required data.

MegaWatt Hours Purchased (g)	POWER EXCHANGES: MegaWatt Hours Received (h)	POWER EXCHANGES: MegaWatt Hours Delivered (i)	COST/SETTLEMENT OF POWER: Demand Charges ($) (j)	COST/SETTLEMENT OF POWER: Energy Charges ($) (k)	COST/SETTLEMENT OF POWER: Other Charges ($) (l)	COST/SETTLEMENT OF POWER: Total (j+k+l) of Settlement ($) (m)	Line No.

TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1)
(Including transactions referred to as 'wheeling')

1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).
3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c)
4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456)(Continued)
(Including transactions reffered to as 'wheeling')

5. In column (e), identify the FERC Rate Schedule or Tariff Number, On separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (d), is provided.
6. Report receipt and delivery locations for all single contract path, "point to point" transmission service. In column (f), report the designation for the substation, or other appropriate identification for where energy was received as specified in the contract. In column (g) report the designation for the substation, or other appropriate identification for where energy was delivered as specified in the contract.
7. Report in column (h) the number of megawatts of billing demand that is specified in the firm transmission service contract. Demand reported in column (h) must be in megawatts. Footnote any demand not stated on a megawatts basis and explain.
8. Report in column (i) and (j) the total megawatthours received and delivered.

Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1)
(Including transactions referred to as 'wheeling')

1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).
3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c)
4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)
(Including transactions referred to as "wheeling")

1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.
3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations. OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to- Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.
4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.
5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
6. Enter "TOTAL" in column (a) as the last line.
7. Footnote entries and provide explanations following all required data.

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Account 403, 404, 405)
(Except amortization of aquisition adjustments)

1. Report in section A for the year the amounts for : (b) Depreciation Expense (Account 403; (c) Depreciation Expense for Asset Retirement Costs (Account 403.1; (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).
2. Report in Section 8 the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.
3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.
Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.
In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.
For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification Listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.
4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R, D & D) project initiated, continued or concluded during the year. Report also support given to others during the year for jointly-sponsored projects.(Identify recipient regardless of affiliation.) For any R, D & D work carried with others, show separately the respondent's cost for the year and cost chargeable to others (See definition of research, development, and demonstration in Uniform System of Accounts).
2. Indicate in column (a) the applicable classification, as shown below:

Classifications:
A. Electric R, D & D Performed Internally:
(1) Generation
a. hydroelectric
i. Recreation fish and wildlife
ii Other hydroelectric
b. Fossil-fuel steam
c. Internal combustion or gas turbine
d. Nuclear
e. Unconventional generation
f. Siting and heat rejection
(2) Transmission
a. Overhead
b. Underground
(3) Distribution
(4) Regional Transmission and Market Operation
(5) Environment (other than equipment)
(6) Other (Classify and include items in excess of $50,000.)
(7) Total Cost Incurred
B. Electric, R, D & D Performed Externally:
(1) Research Support to the electrical Research Council or the Electric Power Research Institute

Line No.	Classification (a)	Description (b)

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES (Continued)

(2) Research Support to Edison Electric Institute
(3) Research Support to Nuclear Power Groups
(4) Research Support to Others (Classify)
(5) Total Cost Incurred

3. Include in column (c) all R, D & D items performed internally and in column (d) those items performed outside the company costing $50,000 or more, briefly describing the specific area of R, D & D (such as safety, corrosion control, pollution, automation, measurement, insulation, type of appliance, etc.). Group items under $50,000 by classifications and indicate the number of items grouped. Under Other, (A (6) and B (4)) classify items by type of R, D & D activity.
4. Show in column (e) the account number charged with expenses during the year or the account to which amounts were capitalized during the year, listing Account 107, Construction Work in Progress, first. Show in column (f) the amounts related to the account charged in column (e)
5. Show in column (g) the total unamortized accumulating of costs of projects. This total must equal the balance in Account 188, Research, Development, and Demonstration Expenditures, Outstanding at the end of the year.
6. If costs have not been segregated for R, D &D activities or projects, submit estimates for columns (c), (d), and (f) with such amounts identified by "Est."
7. Report separately research and related testing facilities operated by the respondent.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

COMMON UTILITY PLANT AND EXPENSES

1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.
2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.
3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

(1) See attached sheet, page 356.1.

(2) See attached sheet, page 356.1.

(3) Depreciation - Electric $8,373,267; Gas $3,588,543. Amortization - Electric $7,464,986; Gas $3,199,280.

Common Utility expense accounts are not maintained but such expenses are allocated to Electric and Gas Departments as follows:

Customer Accounts Expenses (excluding for uncollectable accounts)

Allocated between departments based on average number of customers served by each department for the year ending December 31, 2014.

Customer Service and Informational Expenses

Allocated between departments based on gross revenues from ultimate consumers by departments for the twelve month period.

Administrative and General Expenses

The administrative and general expenses are allocated based on general measures of cost causation.

(4) The property original cost studies made pursuant to the Uniform System of Accounts included a separate classification for Common Utility Plant. Orders were issued in connection with such studies by Public Service Commission of Kentucky on September 16, 1941, and January 5, 1945, and the Federal Power Commission on December 15, 1944.

	Electric 70%	Gas 30%	Balance End of Year
Balance at end of year	$ 96,876,366	$ 41,518,443	$ 138,394,809

(1) Common plant consists of land, structures and equipment of a general nature used by all departments not specifically assignable to one department, and includes offices, storerooms, communication, transportation and work equipment, etc.

(2) Based on estimated usage by departments.

BLANK

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

PURCHASES AND SALES OF ANCILLARY SERVICES

Report the amounts for each type of ancillary service shown in column (a) for the year as specified in Order No. 888 and defined in the respondents Open Access Transmission Tariff.

In columns for usage, report usage-related billing determinant and the unit of measure.

(1) On line 1 columns (b), (c), (d), (e), (f) and (g) report the amount of ancillary services purchased and sold during the year.

(2) On line 2 columns (b) (c), (d), (e), (f), and (g) report the amount of reactive supply and voltage control services purchased and sold during the year.

(3) On line 3 columns (b) (c), (d), (e), (f), and (g) report the amount of regulation and frequency response services purchased and sold during the year.

(4) On line 4 columns (b), (c), (d), (e), (f), and (g) report the amount of energy imbalance services purchased and sold during the year.

(5) On lines 5 and 6, columns (b), (c), (d), (e), (f), and (g) report the amount of operating reserve spinning and supplement services purchased and sold during the period.

(6) On line 7 columns (b), (c), (d), (e), (f), and (g) report the total amount of all other types ancillary services purchased or sold during the year. Include in a footnote and specify the amount for each type of other ancillary service provided.

MONTHLY TRANSMISSION SYSTEM PEAK LOAD

(1) Report the monthly peak load on the respondent's transmission system. If the respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.
(2) Report on Column (b) by month the transmission system's peak load.
(3) Report on Columns (c) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).
(4) Report on Columns (e) through (j) by month the system' monthly maximum megawatt load by statistical classifications. See General Instruction for the definition of each statistical classification.

MONTHLY PEAKS AND OUTPUT

1. Report the monthly peak load and energy output. If the respondent has two or more power which are not physically integrated, furnish the required information for each non- integrated system.
2. Report in column (b) by month the system's output in Megawatt hours for each month.
3. Report in column (c) by month the non-requirements sales for resale. Include in the monthly amounts any energy losses associated with the sales.
4. Report in column (d) by month the system's monthly maximum megawatt load (60 minute integration) associated with the system.
5. Report in column (e) and (f) the specified information for each monthly peak load reported in column (d).

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Report data for plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant. 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct. 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20. 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)*(Continued)*

9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses. 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants. 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant. 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

FOOTNOTE DATA

Schedule Page: 402 Line No.: -1 Column: c

Cane Run Steam Unit 6 was retired in March 2015 and Cane Run Steam Units 4 and 5 were retired in June 2015.

Schedule Page: 403 Line No.: -1 Column: d

Partnership Expenses included in Column d:

Line No.: 19	Production Expenses: Oper, Supv & Engr	$ (546,011)
Line No.: 20	Fuel	(25,959,015)
Line No.: 22	Steam Expenses	(899,519)
Line No.: 25	Electric Expenses	(273,285)
Line No.: 26	Misc Steam Power Expenses	(1,284,964)
Line No.: 27	Rents	65
Line No.: 28	Allowances	(1,346)
Line No.: 29	Maintenance Supervision and Engineering	(199,211)
Line No.: 30	Maintenance of Structures	(274,561)
Line No.: 31	Maintenance of Boiler Plant	(3,168,835)
Line No.: 32	Maintenance of Electric Plant	(611,949)
Line No.: 33	Maintenance of Misc Steam Plant	(221,616)
Line No.: 34	Total Production Expenses	(33,440,247)

Total Power Production Expenses per Schedule Page: 402-403, Sum of Line No.: 34, Column: b-f	$ 483,062,378
EKPC - Oldham Co. Unit 3 Agreement Fuel Expenses	3,514,459
IMEA-IMPA Partnership Expenses	(33,440,247)
Total Power Production Expenses per Schedule Page: 320-321, Sum of Line No.: 21 & 74, Column: b	$ 453,136,590

Schedule Page: 403 Line No.: 1 Column: d

The Nameplate Rating for Trimble County Steam Unit 1 represents 75% ownership of the 566 MW unit. The Nameplate Rating for Trimble County Steam Unit 2 represents 14.25% ownership of the 838 MW unit. The remaining percentages of Units 1 and 2 are owned by KU, IMEA and IMPA.

Schedule Page: 403 Line No.: 5 Column: f

The Nameplate Rating for Paddy's Run represents 100% ownership of Unit 11, a 16 MW unit, and Unit 12, a 33 MW unit, and 53% ownership of Unit 13, a 178 MW unit, for LG&E. The remaining percentage of Unit 13 is owned by KU.

Schedule Page: 403 Line No.: 11 Column: e

Employees at the Cane Run Plant include those assigned to the steam plant, the Cane Run CT site and the Cane Run NGCC during the year and are reflected in the Cane Run NGCC statistics. The Cane Run Steam plant was retired in 2015.

Schedule Page: 403 Line No.: 11 Column: f

No production/operation employees are directly assigned to Paddy's Run turbines. Employees from the Cane Run Plant operate and maintain the Paddy's Run turbines.

Schedule Page: 402.1 Line No.: 5 Column: c

The Nameplate Rating for Brown CT represents 53% ownership of unit 5, a 123 MW unit, and 38% ownership of units 6 and 7, which are 177 MW each, for LG&E. The remaining percentages of units 5, 6 and 7 are owned by KU.

Schedule Page: 403.1 Line No.: 5 Column: d

The Nameplate Rating for Trimble County CT represents 29% ownership of units 5 and 6, and 37% ownership of units 7, 8, 9 and 10 for LG&E. The remaining percentages for units 5, 6, 7, 8, 9 and 10 are owned by KU. Total Nameplate Ratings for these units are 199 MW per unit.

Schedule Page: 403.1 Line No.: 5 Column: e

The Nameplate Rating for Cane Run NGCC represents 22% ownership of Unit 7, a 808 MW unit. The remaining percentage of Unit 7 is owned by KU.

Schedule Page: 402.1 Line No.: 11 Column: b

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

FOOTNOTE DATA

No production/operation employees are directly assigned to the Zorn station. Employees from the Cane Run Plant maintain the Zorn station. Zorn station is peak load only and is automatically operated.

Schedule Page: 402.1 Line No.: 11 Column: c

Employees at the Brown plant include those assigned to the steam plant and the Brown CT site and are reflected in the Brown steam plant statistics.

Schedule Page: 403.1 Line No.: 11 Column: d

Employees at the Trimble County plant include those assigned to the steam plant and the Trimble County CT site and are reflected in the Trimble County steam plant statistics.

Schedule Page: 403.1 Line No.: 11 Column: e

Employees at the Cane Run Plant include those assigned to the steam plant, the Cane Run CT site and the Cane Run NGCC during the year and are reflected in the Cane Run NGCC statistics. The Cane Run Steam plant was retired in 2015.

HYDROELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Large plants are hydro plants of 10,000 Kw or more of installed capacity (name plate ratings)
2. If any plant is leased, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. If licensed project, give project number.
3. If net peak demand for 60 minutes is not available, give that which is available specifying period.
4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.

Line No.	Item (a)	FERC Licensed Project No. 289 Plant Name: Ohio Falls (b)	FERC Licensed Project No. 0 Plant Name: (c)
1	Kind of Plant (Run-of-River or Storage)	Run-of-River

TRANSMISSION LINE STATISTICS

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
3. Report data by individual lines for all voltages if so required by a State commission.
4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

TRANSMISSION LINE STATISTICS (Continued)

7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)
8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

TRANSMISSION LINE STATISTICS (Continued)

7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)
8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

TRANSMISSION LINE STATISTICS

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
3. Report data by individual lines for all voltages if so required by a State commission.
4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

Line No.	DESIGNATION		VOLTAGE (KV) (Indicate where other than 60 cycle, 3 phase)		Type of Supporting Structure	LENGTH (Pole miles) (In the case of underground lines report circuit miles)		Number Of Circuits

TRANSMISSION LINES ADDED DURING YEAR

1. Report below the information called for concerning Transmission lines added or altered during the year. It is not necessary to report minor revisions of lines.
2. Provide separate subheadings for overhead and under- ground construction and show each transmission line separately. If actual costs of competed construction are not readily available for reporting columns (l) to (o), it is permissible to report in these columns the

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVa except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

SUBSTATIONS (Continued)

5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2015/Q4

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVa except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

Line No.	Name and Location of Substation (a)	Character of Substation (b)	VOLTAGE (In MVa) Primary (c)	Secondary (d)	Tertiary (e)

SUBSTATIONS (Continued)

5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES

1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies.
2. The reporting threshold for reporting purposes is $250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general".
3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.

Costs between Louisville Gas and Electric Company and Kentucky Utilities Company are charged directly and are not allocated.

LG&E and KU Services Company (LKS) will allocate the costs of service among the affiliated companies using one of several methods that most accurately distributes the costs. The method of cost allocation varies based on the department rendering the service. Any of the methods may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes in the business, but are generally determined annually. The assignment methods used by LKS are as follows:

Contract Ratio – Based on the sum of the physical amount (i.e. tons of coal, mmbtu of natural gas) of the contract for coal and natural gas fuel burned for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Departmental Charge Ratio – A specific LKS department ratio based upon various factors. The departmental charge ratio typically applies to indirectly attributable costs such as departmental administrative, support, and/or material and supply costs that benefit more than one affiliate and that require allocation using general measures of cost causation. Methods for assignment are department-specific depending on the type of service being performed and are documented and monitored by the Budget Coordinators for each department. The numerator and denominator vary by department. The ratio is based upon various factors such as labor hours, labor dollars, departmental or entity headcount, capital

FOOTNOTE DATA

expenditures, operations and maintenance costs, retail energy sales, charitable contributions, generating plant sites, average allocation of direct reports, net book value of utility plant, total line of business assets, electric capital expenditures, substation assets and transformer assets. These ratios are calculated on an annual basis. Any changes in these ratios will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in any of these ratios from that used in the prior year.

Electric Peak Load Ratio – Based on the sum of the monthly electric maximum system demands for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Generation Ratio – Based on the annual forecast of megawatt hours, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Non-Fuel Material and Services Expenditures – Based on non-fuel material and services expenditures, net of reimbursements, for the immediately preceding twelve consecutive calendar months. The numerator is equal to such expenditures for a specific entity and/or line-of-business as appropriate and the denominator is equal to such expenditures for all applicable entities. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Customers Ratio – Based on the number of retail electric and/or gas customers. This ratio will be determined based on the actual number of customers at the end of the previous calendar year. In some cases, the ratio may be calculated based on the type of customer class being served (i.e. Residential, Commercial or Industrial). The numerator is the total number of each Company’s retail customers. The denominator is the total number of retail customers for both LG&E and KU. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Employees Ratio – Based on the number of employees benefiting from the performance of a service. This ratio will be determined based on actual counts of applicable employees at the end of the previous calendar year. A two-step assignment methodology is utilized to properly allocate LKS employee costs to the proper legal entity. The numerator for the first step of this ratio is the total number of employees for each specific company, and the denominator is the total number of employees for all companies in which an allocator is assigned (i.e. LG&E, KU and LKS). For the second step, the ratio of LKS to total employees will then be allocated to the other companies (LG&E, KU and LKC) based on each company’s ratio of labor dollars to total labor dollars. LKC has no employees, but non-utility related labor is charged to it. In some cases, the ratio may be calculated based on the number of employees at a specific location for the first step with the ratio of LKS to total employees being allocated based on labor hours of the employees at the specific location. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Meters Ratio – Based on the number or types of meters being utilized by customer classes within the system for the immediately preceding twelve consecutive calendar

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

FOOTNOTE DATA

months. The numerator is equal to the number of meters for each utility and the denominator is equal to the total meters for KU and LG&E. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Transactions Ratio – Based on the number of transactions occurring in the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. The Controller's organization is responsible for maintaining and monitoring specific product/service methodology documentation for actual transactions related to LKS billings. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Revenue Ratio – Based on the sum of the revenue for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Revenue, Total Assets and Number of Employees Ratio – Based on an average of the revenue, total assets and number of employees ratios. The numerator is the sum of Revenue Ratio, Total Assets Ratio and Number of Employees Ratio for the specific company. The denominator is three – the number of ratios being averaged. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Assets Ratio – Based on the total assets at year-end for the preceding year. In the event of joint is the total assets for each specific company at the end of the preceding year. The denominator is the sum of total assets for each company in which an allocator is assigned (LG&E, KU and LKC). This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Utility Plant Assets Ratio – Based on the total utility plant assets at year-end for the preceding year, the numerator of which is for an operating company and the denominator of which is for all operating companies. In the event of joint ownership of a specific asset, ownership percentages are utilized to assign costs. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Transmission Ratio –The Transmission Coordination Agreement (TCA) provides "the contractual basis for the coordinated planning, operation, and maintenance of the combined" LG&E and KU transmission system. Pursuant to the terms of the TCA, LG&E/KU "operate their transmission systems as a single control area." The TCA establishes cost and revenue allocations between LG&E and KU. The Transmission Ratio is based upon Schedule A (Allocation of Operating Expenses of the Transmission System Operator) of the TCA. Transmission System Operator Company allocation percentages are calculated during June of each year to be effective July 1st of each year using the previous year's summation of the Transmission Peak Demands as found in FERC Form 1 for Kentucky Utilities Company (KU) and Louisville Gas & Electric Company (LG&E) page 400 line 17(b).

Transportation Resource Management System Chargeback Ratio – Based on the costs associated with providing and operating transportation fleet for all affiliated companies including

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

FOOTNOTE DATA

developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles. Such rates are applied based on the specific equipment employment and the measured usage of services by the various company entities. This ratio is calculated monthly based on the actual transportation charges from the previous month. The numerator is the department labor charged to a specific company. The denominator is the total labor costs for the specific department. The ratio is then multiplied by the total transportation costs to determine the amount charged to each company.

Ownership Percentages – Based on the contractual ownership percentages of jointly-owned generating units, information technology, facilities and other capital projects. This ratio is updated as a result of a new jointly-owned capital projects and is based on the benefit to the respective company. The numerator is the specific company’s forecasted usage. The denominator is the total forecasted usage of all respective companies.

22200500 Louisville Gas and Electric Company 01/01/2015 - 12/31/2015

Important Changes During the Year (Ref Page: 108)

	Explain
Give particulars concerning the matters indicated below.	
1. Changes in and important additions to franchise rights:	None.
2. Acquisition of ownership in other companies by reorganization, merger or consolidation with other companies:	None.
3. Purchase or sale of an operating unit or system:	On June 23, 2015, LG&E and KU completed an early termination and repurchase transaction under an existing joint lease regarding two 146 MW combustion turbine generating units located at the E.W. Brown Station (Brown Units 6 & 7) operated and maintained by LG&E and KU. The early termination and repurchase transaction occurred pursuant to provisions in such lease. LG&E and KU received FERC authorization in FERC Docket No. EC15-78-000. Per Docket No. EC15-78-000, the termination and repurchase transaction did not involve any accounting entries for LG&E.
4. Important leaseholds (other than leaseholds for natural gas lands) thant have been accquired or given assigned or surrendered:	None of a material nature.
5. Important extension or reduction of transmission or distribution system:	None.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees.	LG&E received FERC authorization in FERC Docket No. ES15-67-000 for up to $500 million in the form of money pool debt, commercial paper or any other type of short-term loan through November 30, 2017. LG&E's money pool balance was zero at December 31, 2015, and December 31, 2014. LG&E's commercial paper program limit is $350 million as of April 30, 2013. As of December 31, 2015, and December 31, 2014, the outstanding commercial paper balance is $142 million and $264 million, respectively. On September 28, 2015, LG&E issued $550 million of first mortgage bonds of which $300 million was issued at an interest rate of 3.30% and will be due October 1, 2025, and $250 million was issued at an interest rate of 4.375% and will be due October 1, 2045. These bonds were issued pursuant to a Kentucky Public Service Commission Order in Case No. 2014-00089 dated June 16, 2014, and amended July 1, 2014. LG&E has a revolving credit facility totaling $500 million. The facility was approved by the Kentucky Public Service Commission Order, Case No. 2010-00205 on September 30, 2010. There were no borrowings outstanding under this facility at December 31, 2015, and December 31, 2014. On January 29, 2016, LG&E amended this revolving credit facility to extend the termination date from July 28, 2019, to December 31, 2020. The extension was approved by the Kentucky Public Service Commission Order, Case No. 2015-00138 on July 2, 2015.
7. Changes in articles of incoporation or amendments to charter: Explain the nature and purpose of such changes or amendments.	None.
8. State the estimated annual effect and nature of any important wage scale changes during the year.	During the first quarter of 2015, exempt and non-exempt employees received routine wage increases in accordance with annual salary reviews. As outlined in the IBEW Local 2100 contract, union employees received a negotiated 2.5% wage increase effective November 9, 2015.
9. State briefly the status of any materially important legal proceedings pending at the end of the year and the results.	See Notes 4 and 8 of Notes to Financial Statements on page 123.
10. Describe briefly any materially important transactions not disclosed elsewhere in this report in which an officer, director, or associated company was a party or had a material interest.	None.
11. Estimated increase or decrease in annual revenues caused by important rate changes.	On June 30, 2015, LG&E received authorization in Kentucky Public Service Commission Order, Case No. 2014-00372 to increase base rate revenues by $7 million for services rendered on and after July 1, 2015.

General Description of Construction Overhead Procedure - Components of Formulat (Ref Page: 218)

	Amount (b)	Capitalization Ration (Percent) (c)	Cost Rate Percentage (d)
Please include all notes requested for construction overhead with the hard copy.			
Uppercase Vars (S,D,P,C,W) fall under Amount (b) column			
Lowercase Vars (s,d,p,c) fall under Cost Rate Percentage (d) column			
1. Components of Formula (Derived from actual book balances and actual cost rates)			
Average Short-Term Debt (Var S)			
Short-Term Interest (Var s)			
Long Term Debt (Vars D and d)			
Preferred Stock (Vars P and p)			
Common Equity (Vars C and c)			
Total Capitalization			
Average Construction Work in Progress Balance (Var W)			
2. Gross Rate for Borrowed Funds s(S/W) + d[(D/(D+P+C))(1-(S/W)]			
3. Rate for Other Funds [1-(S/W)][p(P/D+P+C)) + c(C/(D+P+C))]			
4. Weighted Average Rate Actually Used for the Year:			
a. Rate for Borrowed Funds			
b. Rate for Other Funds			

LOCAL ENGINEERING:

Salaries and expenses of Gas Distribution Operations personnel engaged in construction work, but not assignable to a particular capital project, are charged to engineering clearing projects. Examples of such charges are: work with the construction budget, cost of estimating, construction work, preparation of field reports, conferences on construction matters, and general supervision of construction projects.

Each month, the costs accumulated in these clearing projects are allocated to specific capital projects owned by Gas Distribution based on the monthly spend by project.
The labor and expenses of engineers and other personnel who are directly assigned to a particular capital project are charged to that project.

SERVICE CONTRACT CHARGES:

These expenses are charged directly to construction and other projects based on service performed.

EMPLOYEE BENEFITS:

Vacation, holiday, sick and other off-duty payments, medical, dental, group life insurance, long-term disability, 401(k), retirement income account and pension costs, are charged to construction by applying overhead rates to direct labor.

ADMINISTRATIVE AND GENERAL EXPENSES:

The allocation of administrative and general expenses to construction is based on a study of the estimated time engaged in construction activities by persons and departments charging time to FERC Account 920. The administrative and general salaries and expenses (FERC Account 920-921) applicable to construction are allocated to all construction projects on the basis of total direct costs.

Note:

ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION (AFUDC):

LG&E does not capitalize AFUDC for gas utility plant.

Other Losses (Specify)	
Sales and Transports	1,663,786
36. Total Unaccounted For	2,101,009
Total Deliveries and Unaccounted For For (Line 28 and 36)	62,472,106

Note:
Gas purchases include volumes recorded in Natural Gas Transmission Line Purchases (803).

Transportation gas is reported on the following lines:
Gas of Others Received for Distribution – 14,372,297 Mcf
Deliveries of Gas Transported for Others – 1,934,902 Mcf
Deliveries of Gas Distributed for Others – 12,175,233 Mcf

Other Gas Withdrawn from Storage represents net withdrawal of gas from storage recorded in Gas Withdrawn from Storage--Debit (808.1).

Other Gas Delivered to Storage represents net deliveries of gas to storage recorded in Gas Delivered to Storage--Credit (808.2).

NOTES TO FINANCIAL STATEMENTS (Continued)

GLOSSARY OF TERMS AND ABBREVIATIONS

KU **-** Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E **-** Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE **-** LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS **-** LG&E and KU Services Company, a subsidiary of LKE that provides services to LKE and its subsidiaries.

PPL **-** PPL Corporation, the parent holding company of PPL Services, LKE and other subsidiaries.

PPL Services **-** PPL Services Corporation, a subsidiary of PPL that provides administrative, management and support services to PPL and its subsidiaries.

Other terms and abbreviations

401(h) account(s) **-** A sub account established within a qualified pension trust to provide for the payment of retiree medical costs.

AFUDC **-** Allowance for Funds Used During Construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

ARO **-** asset retirement obligation.

BSER **-** Best System of Emission Reduction. The degree of emission reduction that EPA determines has been adequately demonstrated when taking into account the cost of achieving such reduction and any non-air quality health and environmental impact and energy requirements.

Cane Run Unit 7 **-** a natural gas combined-cycle generating unit in Kentucky, jointly owned by LG&E and KU, with a capacity of 642 MW (141 MW and 501 MW to LG&E and KU).

CCR(s) **-** Coal Combustion Residual(s). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act **-** federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

Clean Water Act **-** federal legislation enacted to address certain environmental issues relating to water quality including effluent discharges, cooling water intake, and dredge and fill activities.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

CPCN **-** Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facility for furnishing of utility service to the public.

DSM **-** Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM plans proposed by any utility under its jurisdiction. Proposed DSM mechanisms may seek full recovery of costs and revenues lost by implementing DSM programs and/or incentives designed to provide financial rewards to the utility for implementing cost-effective DSM programs. The cost of such programs shall be assigned only to the class or classes of customers which benefit from the programs.

EBPB **-** Employee Benefit Plan Board. The administrator of PPL's U.S. qualified retirement plans, which is charged with the fiduciary responsibility to oversee and manage those plans and the investments associated with those plans.

ECR **-** Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and by-products from the production of energy from coal.

ELG(s) **-** Effluent Limitation Guidelines, regulations promulgated by the EPA.

EPA **-** Environmental Protection Agency, a U.S. government agency.

FERC **-** Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

GAAP **-** Generally Accepted Accounting Principles in the U.S.

GHG **-** greenhouse gas(es).

GLT **-** Gas Line Tracker. The KPSC approved mechanism for LG&E's recovery of costs associated with gas service lines, gas risers, leak mitigation, and gas main replacements. Rate recovery became effective January 1, 2013.

KPSC **-** Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

kWh **-** kilowatt hour, basic unit of electrical energy.

LG&E 2010 Mortgage Indenture **-** LG&E's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as supplemented.

LIBOR **-** London Interbank Offered Rate.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

MATS **-** Mercury and Air Toxics Standards, regulations promulgated by the EPA.

MW **-** megawatt, one thousand kilowatts.

NAAQS **-** National Ambient Air Quality Standards periodically adopted pursuant to the Clean Air Act.

NERC **-** North American Electric Reliability Corporation.

NGCC **-** Natural gas-fired combined-cycle generating plant.

NPNS **-** the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

NSR **-** The new source review provisions of the Clean Air Act that impose stringent emission control requirements on new and modified sources of air emissions that result in emission increases beyond thresholds allowed by the Clean Air Act.

OCI **-** other comprehensive income or loss.

OVEC **-** Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LKE indirectly owns an 8.13% interest (consists of LG&E's 5.63% and KU's 2.50% interests), which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined summer rating capacities of 2,120 MW.

PP&E **-** property, plant and equipment.

RCRA **-** Resource Conservation and Recovery Act of 1976.

RFC **-** Reliability*First* Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

SCRs **-** selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gas.

Scrubber **-** an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC **-** the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SERC **-** SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

Superfund **-** federal environmental statute that addresses remediation of contaminated sites; states also have similar statues.

VEBA **-** Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

Volumetric risk **-** the risk that the actual load volumes provided under full-requirement sales contracts could vary significantly from forecasted volumes.

NOTES TO FINANCIAL STATEMENTS (Continued)

As permitted by the FERC for the Year Ended December 31, 2015 Form 1, the Notes to Financial Statements set forth below are principally from the Respondent's SEC Form 10-K for the Year Ended December 31, 2015, which was filed with the SEC on February 19, 2016. Accordingly, these Notes do not reflect updated information since this filing date.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

General

Capitalized terms and abbreviations appearing in the notes to financial statements are defined in the glossary. Dollars are in millions unless otherwise noted.

Presentation

The accompanying financial statements are prepared on the regulatory basis of accounting in accordance with the requirements of the FERC, which is a comprehensive basis of accounting other than GAAP. The significant differences between GAAP and FERC reporting are as follows:

(a) Certain cost of removal obligations are recorded in accumulated depreciation for FERC reporting and recorded in regulatory liabilities for GAAP reporting;
(b) Long-term and short-term bonds are recorded in total in the long-term debt section for FERC reporting and are presented separately in current liabilities for the short-term portion and in long-term debt for the long-term portion for GAAP reporting;
(c) Deferred taxes are shown gross for FERC reporting in the Balance Sheet (a deferred asset and a deferred liability are recorded), but for GAAP reporting the deferred taxes are netted together and recorded as a net asset or net liability;
(d) Utility plant acquired before November 1, 2010 is stated at cost for FERC reporting and was restated to net fair value as of November 1, 2010, for GAAP reporting;
(e) Long-term and short-term regulatory assets are presented together in deferred debits for FERC reporting. For GAAP reporting, short-term regulatory assets are presented in current assets and long-term regulatory assets are presented in other noncurrent assets; and
(f) Long-term and short-term regulatory liabilities are presented together in deferred credits for FERC reporting. For GAAP reporting, short-term regulatory liabilities are presented in current liabilities and long-term regulatory liabilities are presented in deferred credits and other noncurrent liabilities.
(g) Deferred financing costs are classified as assets for FERC reporting. For GAAP reporting, such costs are classified as contra-liabilities and are presented together with long-term debts.

Business and Consolidation

LG&E is engaged in the generation, transmission, distribution and sale of electricity. LG&E also engages in the distribution and sale of natural gas.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

LG&E has no controlling interest in any Variable Interest Entities (VIEs). All other investments are carried at cost or fair value.

LG&E's financial statements include its share of any undivided interests in jointly owned facilities, as well as its share of the related operating costs of those facilities. See Note 9 for additional information.

Regulation

LG&E is a cost-based rate-regulated utility for which rates are set by regulators to enable LG&E to recover the costs of providing electric or gas service and to provide a reasonable return to its shareholder. Base rates are generally established based on a future test period. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and regulatory liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 4 for additional details regarding regulatory matters.

Accounting Records

LG&E's system of accounts is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." LG&E continuously assesses potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals for environmental remediation are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless realization is assured.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Changes in Classification

The classification of certain amounts in the 2014 financial statements have been changed to conform to the current presentation. These reclassifications did not affect LG&E’s net income or equity.

Price Risk Management

Interest rate contracts are used to hedge exposure to change in the fair value of debt instruments and to hedge exposures to variability in expected cash flows associated with existing floating-rate debt instruments or forecasted fixed-rate issuances of debt. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain contracts may not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, markets are periodically assessed to determine whether market mechanisms have evolved that would facilitate net settlement. Certain derivative contracts may be excluded from the requirements of derivative accounting treatment because NPNS has been elected. These contracts are accounted for using accrual accounting. Contracts that have been classified as derivative contracts are reflected on the Balance Sheets at fair value. The portion of derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while the portion of derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent Liabilities." LG&E considers intra-month transactions to be spot activity, which is not accounted for as a derivative.

Processes exist that allow for subsequent review and validation of the contract information as it relates to interest rate derivatives. The accounting department provides the treasury department with guidelines on appropriate accounting classifications for various contract types and strategies. Examples of accounting guidelines provided to the treasury department staff include, but are not limited to:

- Transactions to lock in an interest rate prior to a debt issuance can be designated as cash flow hedges, to the extent the forecasted debt issuances remain probable of occurring.

- Derivative transactions may be marked to fair value through regulatory assets/liabilities if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps that are included in customer rates.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the classification of the hedged items.

LG&E has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

See Notes 12 and 13 for additional information on derivatives.

NOTES TO FINANCIAL STATEMENTS (Continued)

Revenue

Revenue Recognition

Operating revenues are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' meters are read and bills are rendered throughout the month, rather than all meters being read and bills rendered at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by the estimated average cents per kWh. Any difference between estimated and actual revenues is adjusted the following month.

Accounts Receivable

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts.

Allowance for Doubtful Accounts

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs, the age of the receivable, counterparty creditworthiness and economic conditions. Specific events, such as bankruptcies, are also considered. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when it is known they will be received.

The changes in the allowance for doubtful accounts at December 31 were:

		Additions			
	Balance at Beginning of Period	Charged to Income	Charged to Other Accounts (a)	Deductions (b)	Balance at End of Period
2015	$ 2	$ 2	$ -	$ 3	$ 1
2014	2	5	(1)	4	2

(a) Primarily related to capital projects, thus the provision was recorded as an adjustment to construction work in progress.
(b) Primarily related to uncollectible accounts written off.

Cash

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

Fair Value Measurements

LG&E values certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities, investments in securities in defined benefit plans, and cash and cash equivalents. LG&E uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

LG&E classifies fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

• **Level 1 -** quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

• **Level 2 -** inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.

• **Level 3 -** unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, LG&E's assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

assets or for the liquidation of long-term debts, are classified as long-term.

Short-term Investments

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Short-term investments" ("Other current assets" if not significant) on the Balance Sheets.

Cost Method Investment

LG&E has an investment in OVEC, which is accounted for using the cost method. The investment is recorded in "Other noncurrent assets" on the Balance Sheets. LG&E and 11 other electric utilities are equity owners of OVEC. OVEC's power is currently supplied to LG&E and 12 other companies affiliated with the various owners. LG&E owns 5.63% of OVEC's common stock. Pursuant to a power purchase agreement, LG&E is contractually entitled to its ownership percentage of OVEC's output, which is approximately 120 MW.

LG&E's investment in OVEC is not significant. The direct exposure to loss as a result of LG&E's involvement with OVEC is generally limited to the value of its investment; however, LG&E is conditionally responsible for a pro-rata share of certain OVEC obligations. As part of PPL's acquisition of LKE, the value of the power purchase contract was recorded as an intangible asset with an offsetting regulatory liability, both of which are being amortized using the units-of-production method until March 2026, the expiration date of the agreement. See Notes 10 and 14 for additional discussion of the power purchase agreement.

Long-Lived and Intangible Assets

Property, Plant and Equipment

PP&E is recorded at original cost, unless impaired. PP&E acquired in business combinations is recorded at fair value at the time of acquisition, which establishes its original cost. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost for constructed assets includes material, labor, contractor costs, certain overheads and financing costs, where applicable. The cost of repairs and minor replacements are charged to expense as incurred. LG&E records costs associated with planned major maintenance projects in the period in which the costs are incurred. No costs associated with planned major maintenance projects are accrued in advance of the period in which the work is performed. LG&E accrues costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. See "Asset Retirement Obligations" below and Note 4 for additional information.

LG&E does not record AFUDC as a return is provided on construction work in progress.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. LG&E's weighted-average rates of depreciation for regulated utility plant were 3.65% and 4.05% at December 31, 2015 and 2014.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to obtain an initial license and renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, LG&E considers the expected use of the asset; the expected useful life of other assets to which the useful life of the intangible asset may relate; legal, regulatory, or contractual provisions that may limit the useful life; the company's historical experience as evidence of its ability to support renewal or extension; the effects of obsolescence, demand, competition, and other economic factors; and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

LG&E accounts for emission allowances as intangible assets. LG&E is allocated emission allowances by states based on its generation facilities' historical emissions experience, and have purchased emission allowances generally when it is expected that additional allowances will be needed. The carrying value of allocated emission allowances is initially recorded at zero value and purchased allowances are initially recorded based on their purchase price. When consumed or sold, emission allowances are removed from the Balance Sheet at their weighted-average carrying value. Since the economic benefits of emission allowances are not diminished until they are consumed, emission allowances are not amortized; rather, they are expensed when consumed or a gain or loss is recognized when sold. Such expense is included in "Fuel" on the Statements of Income. Gains and losses on the sale of emission allowances are included in "Other operation and maintenance" on the Statements of Income.

Asset Impairment (Excluding Investments)

LG&E reviews long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable.

A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

LG&E reviews goodwill for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment in circumstances when a portion of goodwill has been allocated to a business to be disposed. LG&E is a single reporting unit.

LG&E may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a two-step quantitative test. If the qualitative evaluation (referred to as "step zero") is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step quantitative impairment test is not necessary. However, the quantitative impairment test is required if management concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the step zero assessment.

If the carrying amount of the reporting unit, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

LG&E elected to bypass step zero and quantitatively tested its goodwill for impairment in the fourth quarter of 2015 and no impairment was recognized.

Asset Retirement Obligations

LG&E records liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased through the recognition of accretion expense to reflect changes in the obligation due to the passage of time. The accretion and depreciation expenses recorded by LG&E are recorded as a regulatory asset, such that there is no earnings impact.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset. See Note 15 for additional information on AROs.

NOTES TO FINANCIAL STATEMENTS (Continued)

Compensation and Benefits

Defined Benefits

LG&E sponsors and participates in various defined benefit pension and other postretirement plans. The plans LG&E participates in are sponsored by LG&E and LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of certain plans to LG&E based on its participation in those plans. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

LG&E and LKE use an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 4 for a discussion of the regulatory treatment of defined benefit costs and Note 8 for a discussion of defined benefits.

Taxes

Income Taxes

LG&E is included in PPL’s consolidated U.S. federal income tax return.

Significant management judgment is required in developing LG&E’s provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and valuation allowances on deferred tax assets.

Significant management judgment is also required to determine the amount of benefit to be recognized in relation to an uncertain tax position. LG&E uses a two-step process to evaluate tax positions. The first step requires LG&E to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires LG&E to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact LG&E's financial statements in future periods.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

LG&E records valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. LG&E considers the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If LG&E determines that it is able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if LG&E determines that it is not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made.

LG&E defers investment tax credits when the credits are utilized and amortize the deferred amounts over the average lives of the related assets.

LG&E recognizes interest and penalties in "Income Taxes" on its Statements of Income.

LG&E's provision for deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheets in noncurrent "Regulatory assets" or "Regulatory liabilities."

LG&E's income tax provision is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Tax benefits are not shared between companies. LG&E is only entitled to tax benefits that it generated. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. LG&E's intercompany tax receivables were $4 million and $74 million at December 31, 2015 and 2014.

Taxes, Other Than Income

LG&E presents sales taxes in "Other current liabilities" on the Balance Sheets. These taxes are not reflected on the Statements of Income. See Note 3 for details on taxes included in "Taxes, other than income" on the Statements of Income.

Other

Leases

LG&E evaluates whether arrangements entered into contain leases for accounting purposes. See Note 7 for additional information.

Fuel, Materials and Supplies

Fuel, natural gas stored underground and materials and supplies are valued at the lower of cost or net realizable value using the average cost method. Fuel costs for electric generation are charged to expense as used. Natural gas supply costs are charged to expense as delivered to the distribution system. See Note 4 for further discussion of the fuel adjustment clause and gas supply clause.

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31.

	2015	2014
Fuel	$ 71	$ 66
Natural gas stored underground (a)	42	54
Materials and supplies	38	42
Total	$ 151	$ 162

(a) The majority of natural gas stored underground is held to serve retail customers.

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 10 for further discussion of recorded and unrecorded guarantees.

New Accounting Guidance Adopted

Fair Value Measurement for Investments in Certain Entities that Calculate Net Asset Value per Share

Effective December 31, 2015, LG&E retrospectively adopted accounting guidance that removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using net asset value per share and the requirement to make certain disclosures for all investments that are eligible to be measured using net asset value per share.

The adoption of this guidance resulted in LG&E no longer categorizing investments for which fair value is measured using net asset value per share in the fair value hierarchy, and did not have a significant impact on LG&E. See Note 8 for additional information.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Presentation of Debt Issuance Costs

Effective December 31, 2015, LG&E retrospectively adopted accounting guidance to simplify the presentation of debt issuance costs. The guidance requires certain debt issuance costs to be presented on the Balance Sheet as a direct deduction from the carrying amount of the associated debt liability.

The adoption of this guidance required LG&E to reclassify debt issuance costs not associated with a line of credit from noncurrent assets to Long-term debt, and did not have a significant impact. See Note 5 for additional information.

Balance Sheet Classification of Deferred Taxes

Effective October 1, 2015, LG&E retrospectively adopted accounting guidance to simplify the presentation of deferred taxes which requires that deferred tax assets and deferred tax liabilities be classified as noncurrent on the Balance Sheet.

The adoption of this guidance required LG&E to reclassify deferred tax assets and deferred tax liabilities from current to noncurrent on the Balance Sheet, and did not have a significant impact. LG&E did not have any current deferred tax assets and liabilities on the Balance Sheet as of December 31, 2014.

2. Preferred Securities

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2015 or 2014.

3. Income and Other Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes and the tax effects of net operating loss and tax credit carryforwards. Net deferred tax assets have been recognized based on management's estimates of future taxable income.

LG&E’s provision for deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Significant components of LG&E's deferred income tax assets and liabilities at December 31 were as follows:

	2015	2014
Deferred Tax Assets		
Federal loss carryforwards (a)	$ 76	$ -
Regulatory liabilities	38	51
Deferred investment tax credits	13	14
Income taxes due to customers	17	18
Derivative liability	18	32
Other	15	9
Total deferred tax assets	177	124
Deferred Tax Liabilities		
Plant - net	896	698
Regulatory assets	75	90
Accrued pension costs	28	28
Other	7	8
Total deferred tax liabilities	1,006	824
Net deferred tax liability	$ 829	$ 700

(a) Increase in Federal loss carryforwards primarily relates to the extension of bonus depreciation.

LG&E expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

At December 31, 2015, LG&E had $218 million of federal net operating loss carryforwards that expire in 2035, $1 million of federal credit carryforwards that expire from 2031 to 2035 and $2 million of state credit carryforwards that expire in 2022.

Other	(1)	-
Total increase	9	8
Total income tax expense	$ 114	$ 103
Effective income tax rate	38.1%	37.9%

	2015	2014
Taxes, other than income		
Property and other	$ 28	$ 25
Total	$ 28	$ 25

Unrecognized Tax Benefits

LG&E’s income tax provision is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Based on this tax sharing agreement, LG&E indirectly files tax returns in two major tax jurisdictions. With few exceptions, at December 31, 2015, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

U.S. (federal)	2011 and prior
Kentucky (state)	2010 and prior

4. Utility Rate Regulation

Regulatory Assets and Liabilities

LG&E reflects the effects of regulatory actions in the financial statements for its cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the Balance Sheet date.

LG&E is subject to the jurisdiction of the KPSC and FERC.

LG&E's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

other means. As such, LG&E generally earns a return on regulatory assets.

As a result of purchase accounting requirements, certain fair value amounts related to contracts that had favorable or unfavorable terms relative to market were recorded on the Balance Sheet with an offsetting regulatory asset or liability. LG&E recovers in customer rates the cost of coal contracts, power purchases and emission allowances. As a result, management believes the regulatory assets and liabilities created to offset the fair value amounts at LKE's acquisition date meet the recognition criteria established by existing accounting guidance and eliminate any rate-making impact of the fair value adjustments. LG&E's customer rates will continue to reflect the original contracted prices for these contracts.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory Matters."

Defined Benefit Plans

Defined benefit plan regulatory assets represent the portion of unrecognized transition obligation, prior service cost and net actuarial gains and losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices and generally, are amortized over the average remaining service lives of plan participants. These regulatory assets are adjusted at least annually or whenever the funded status of defined benefit plans is re-measured. Of the regulatory asset balances recorded, costs of $19 million are expected to be amortized into net periodic defined benefit costs in 2016 in accordance with LG&E's pension accounting policy.

As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between pension cost calculated in accordance with LG&E's pension accounting policy and pension cost calculated using a 15 year amortization period for actuarial gains and losses is recorded as a regulatory asset. As of December 31, 2015, the balance was $6 million. Of the costs expected to be amortized into net periodic defined benefit costs in 2016, $6 million is expected to be recorded as a regulatory asset in 2016.

Storm Costs

LG&E has the ability to request from the KPSC, the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer such costs for regulatory accounting and reporting purposes. Once such authority is granted, LG&E can request recovery of those expenses in a base rate case and begin amortizing the costs when recovery starts. LG&E's regulatory assets for storm costs are being amortized through various dates ending in 2020.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2035.

Environmental Cost Recovery

Kentucky law permits LG&E to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Clean Air Act and those federal, state or local environmental requirements which apply to coal combustion wastes and by-products from coal-fired electric generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, LG&E was authorized to earn a 10% return on equity for all its existing ECR plans. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is typically recovered within 12 months.

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and variances between actual and expected costs from prior periods are adjusted quarterly in LG&E's rates, subject to approval by the KPSC. The gas supply clause includes a separate natural gas procurement incentive mechanism, which allows LG&E's rates to be adjusted annually to share variances between actual costs and market indices between the shareholders and the customers during each performance-based rate year (12 months ending October 31). The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are typically recovered within 18 months.

Fuel Adjustment Clauses

LG&E's retail electric rates contain a fuel adjustment clause, whereby variances in the cost of fuel to generate electricity, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel adjustment clause and, to the extent appropriate, reestablish the fuel charge included in base rates. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered within 12 months.

Demand Side Management

LG&E's DSM program consists of energy efficiency programs which are intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. LG&E's rates contain a DSM provision which includes a rate recovery mechanism that provides for concurrent recovery of DSM costs and incentives, and allows for the recovery of DSM revenues from lost sales associated with the DSM programs. Additionally, LG&E earns an approved return on equity for capital expenditures associated with the residential and commercial load management/demand conservation programs. The cost of DSM programs is assigned only to the class or classes of customers that benefit from the programs.

Interest Rate Swaps

Periodically, LG&E has entered into forward-starting interest rate swaps to hedge forecasted debt issuance with PPL that have terms identical to forward-starting swaps entered into by PPL with third parties. Net realized gains and losses on all of these swaps are probable of recovery through regulated rates; as such, any gains and losses on these derivatives are included in regulatory assets or liabilities and will be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt at the time the underlying hedged interest expense is recorded. In September 2015, first mortgage bonds totaling $550 million were issued and all outstanding forward-starting interest rate swaps were terminated. Net cash settlements of $44 million were paid on the swaps that were terminated. Net realized losses on these terminated swaps will be recovered through regulated rates. As such, the net settlements were recorded in regulatory assets and are being recognized in

"Interest Expense" on the Statements of Income over the life of the new debt that matures in 2025 and 2045. There were no forward starting interest rate swaps outstanding at December 31, 2015. See Note 13 for additional information related to the forward-starting interest rate swaps.

Net cash settlements of $43 million were received on forward starting interest rate swaps that were terminated in 2013. Net realized gains on these terminated swaps will be returned through regulated rates. As such, the net settlements were recorded as regulatory liabilities and are being recognized in "Interest Expense" on the Statements of Income over the life of the associated debt that matures in 2043.

In addition to the terminated forward starting interest rate swaps, realized amounts associated with LG&E's other interest rate swaps, including a terminated swap contract from 2008, are recoverable through rates based on an order from the KPSC, LG&E's unrealized losses and gains are recorded as a regulatory asset or liability until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the terms of the associated debt, which matures through 2033. Amortization of the gain or loss related to the 2008 terminated swap contract is to be recovered through 2035.

<u>AROs</u>

The accretion and depreciation expenses related to LG&E's AROs are recorded as a regulatory asset, such that there is no earnings impact. When an asset with an ARO is retired, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

<u>Gas Line Tracker</u>

The GLT authorizes LG&E to recover its incremental operating expenses, depreciation, property taxes, and its cost of capital including a return on equity for capital associated with the five year gas service riser, leak mitigation and customer service line ownership programs. As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, LG&E is authorized to earn a 10% return on equity for the GLT mechanism. As part of this program, LG&E makes necessary repairs and assumes ownership of natural gas lines. LG&E annually files projected costs in October to become effective on the first billing cycle in January. After the completion of a plan year, LG&E submits a balancing adjustment filing to the KPSC to amend rates charged for the differences between the actual costs and actual GLT charges for the preceding year. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to these timing differences.

<u>Coal Contracts</u>

As a result of purchase accounting associated with PPL's acquisition of LKE, LG&E's coal contracts were recorded at fair value on the Balance Sheet with offsets to regulatory assets for those contracts with unfavorable terms relative to current market prices and offsets to regulatory liabilities for those contracts with favorable terms relative to current market prices. These regulatory assets and liabilities are being amortized over the same terms as the related contracts, which expire at various times through 2016.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Power Purchase Agreement - OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, the fair value of the OVEC power purchase agreement was recorded on the Balance Sheet with offsets to regulatory liabilities. The regulatory liabilities are being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition.

Regulatory Liability Associated with Net Deferred Tax Assets

LG&E's regulatory liabilities associated with net deferred tax assets represent the future revenue impact from the reversal of deferred income taxes required primarily for unamortized investment tax credits. These regulatory liabilities are recognized when the offsetting deferred tax assets are recognized.

Regulatory Matters

Rate Case Proceedings

On June 30, 2015, the KPSC approved a rate case settlement agreement providing for increases in the annual revenue requirements associated with base gas rates of $7 million. The annual revenue requirement associated with base electricity rates was not changed. Although the settlement did not establish a specific return on equity with respect to the base rates, an authorized 10% return on equity will be utilized in the ECR and GLT mechanisms. The settlement also provides regulatory asset treatment for the difference between pension expense calculated in accordance with LG&E’s pension accounting policy and pension expense using a 15 year amortization period for actuarial gains and losses. The new rates and all elements of the settlement became effective July 1, 2015.

KPSC Landfill Proceedings

On May 22, 2015, LG&E and KU filed an application with the KPSC for a declaratory order that the existing CPCN and ECR approvals regarding the initial phases of construction and rate recovery of the landfill for management of CCRs at the Trimble County Station remain in effect. The current design of the proposed landfill provides for construction in substantially the same location as originally proposed with approximately the same storage capacity and expected useful life. On May 20, 2015, the owner of an underground limestone mine filed a complaint with the KPSC requesting it to revoke the CPCN for the Trimble County landfill and limit recovery of costs for the Ghent Station landfill on the grounds that, as a result of cost increases, the proposed landfill no longer constitutes the least cost alternative for CCR management. The KPSC has initiated its own investigation, consolidated the proceedings, and ordered an accelerated procedural schedule. The KPSC conducted a hearing on the matter in September 2015. On December 15, 2015, the KPSC issued an order affirming LG&E and KU's existing CPCN and ECR authority for Phase 1 of the Trimble County and Ghent landfills and related facilities, and that the landfills are the least cost options for disposing of the combustion wastes. Additionally, the order requires LG&E and KU to file a CPCN prior to constructing Phases 2 and 3 at the Ghent landfill and Phases 2 through 4 at the Trimble County landfill. The order also requires LG&E and KU to submit status update reports every three months on Phase 1 of Trimble County landfill. Phase 1 of construction at Trimble County will commence after the required state permits are obtained. Phase 1 of the

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Ghent landfill was completed in December 2014.

CPCN and ECR Filing

On January 29, 2016, LG&E submitted an application to the KPSC for CPCNs and for ECR rate treatment regarding upcoming environmental construction projects relating to the EPA's regulations addressing the handling of coal combustion byproducts and MATS. The construction projects are expected to begin in 2016 and continue through 2023 and are estimated to cost LG&E approximately $316 million. The application requests an authorized 10% return on equity with respect to LG&E's ECR mechanism consistent with the 2014 Kentucky rate case approved in June 2015.

5. Financing Activities

Credit Arrangements and Short-term Debt

LG&E maintains a credit facility to enhance liquidity, provide credit support and provide a backstop to commercial paper programs. The amounts borrowed below are recorded as "Short-term debt" on the Balance Sheets. The following credit facility was in place at:

	December 31, 2015				
	Expiration Date	Capacity	Borrowed	Letters of Credit and Commercial Paper Issued	Unused Capacity
Syndicated Credit Facility (a) (b)	July 2019	$ 500	-	$ 142	$ 358

	December 31, 2014	
	Borrowed	Letters of Credit and Commercial Paper Issued
Syndicated Credit Facility (a) (b)	-	$ 264

(a) LG&E pays customary fees under its facility and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.
(b) The facilities contain a financial covenant requiring debt to total capitalization not to exceed 70% as calculated in accordance with the facility and other customary covenants. Additionally, as it relates to the syndicated credit facility and subject to certain conditions, LG&E may request up to a $100 million increase in its facility's capacity.

In January 2016, the expiration date for LG&E’s syndicated credit facility expiring in July 2019 was extended to December 2020.

NOTES TO FINANCIAL STATEMENTS (Continued)

LG&E maintains a commercial paper program to provide an additional financing source to fund short-term liquidity needs, as necessary. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by LG&E's syndicated credit facility. The following commercial paper program was in place at:

December 31, 2015

Weighted - Average Interest Rate	Capacity	Commercial Paper Issuances	Unused Capacity
0.71%	$ 350	$ 142	$ 208

December 31, 2014

Weighted - Average Interest Rate	Commercial Paper Issuances
0.42%	$ 264

Long-term Debt

	Weighted - Average Rate	Maturities (c)	December 31, 2015
First Mortgage Bonds (a) (b)	3.36%	2016 - 2045	$ 1,659
Total Long-term Debt Before Adjustments			1,659
Other			
Fair market value adjustments			(1)
Unamortized discount			(4)
Unamortized debt issuance costs			(12)
Total Long-term Debt			1,642
Less current portion of Long-term Debt			25
Total Long-term Debt, noncurrent			$ 1,617

			December 31, 2014
First Mortgage Bonds (a) (b)	2.85%	2015 - 2043	$ 1,359
Total Long-term Debt Before Adjustments			1,359
Other			
Fair market value adjustments			(1)
Unamortized discount			(5)
Unamortized debt issuance costs			(8)
Total Long-term Debt			1,345
Less current portion of Long-term Debt			250
Total Long-term Debt, noncurrent			$ 1,095

(a) LG&E's first mortgage bonds are secured by the lien of the LG&E 2010 Mortgage Indenture which creates a lien, subject to certain exceptions and exclusions, on substantially all of LG&E's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $4.2 billion and $3.7 billion at December 31, 2015 and 2014.

(b) Includes LG&E's series of first mortgage bonds that were issued to the respective trustees of tax-exempt revenue bonds to secure its respective obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amounts, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. These first mortgage bonds were issued under the LG&E 2010 Mortgage Indenture and are secured as noted in (a) above. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E. The related revenue bond documents allow LG&E to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2015, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a term rate mode totaled $391 million. At December 31, 2015, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a variable rate mode totaled $183 million.

Several series of the tax-exempt revenue bonds are insured by monoline bond insurers whose ratings were reduced due to exposures relating to insurance of sub-prime mortgages. Of the bonds outstanding, $135 million are in the form of insured auction rate securities, wherein interest rates are reset either weekly or every 35 days via an auction process. Beginning in late 2007, the interest rates on these insured bonds began to increase due to investor concerns about the creditworthiness of the bond insurers. During 2008, interest rates increased, and LG&E experienced failed auctions when there were insufficient bids for the bonds. When a failed auction occurs, the interest rate is set pursuant to a formula stipulated in the indenture. As noted above, the instruments governing these auction rate bonds permit LG&E to convert the bonds to other interest rate modes.

Certain of the variable rate tax-exempt revenue bonds totaling $23 million at December 31, 2015, are subject to tender for purchase by LG&E at the option of the holder and to mandatory tender for purchase by LG&E upon the occurrence of certain events.

(c) The table reflects principal maturities only, based on stated maturities or earlier put dates.

None of the outstanding debt securities noted above have sinking fund requirements. The aggregate maturities of long-term debt, based on stated maturities or earlier put dates, for the periods 2016 through 2020 and thereafter are as follows:

2016	$	25
2017		194
2018		98
2019		40
2020		-
Thereafter		1,302
Total	$	1,659

In September 2015, LG&E issued $300 million of 3.30% First Mortgage Bonds due 2025 and $250 million of 4.375% First Mortgage Bonds due 2045. LG&E received proceeds of $298 million and $248 million, net of discounts and underwriting fees, which were used to repay short-term debt, to repay 1.625% First Mortgage Bonds that matured in November 2015 and for general corporate purposes.

Louisville Gas and Electric Company		/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Legal Separateness

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of LKE are each separate legal entities. These subsidiaries are not liable for the debts of LKE. Accordingly, creditors of LKE may not satisfy their debts from the assets of LKE's subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, LKE is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of its subsidiaries may not satisfy their debts from the assets of LKE (or its other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions and Related Restrictions

LKE primarily relies on dividends from its subsidiaries to fund its distributions to PPL. LG&E is subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E believes, however, that this statutory restriction, as applied to its circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. In February 2012, LG&E petitioned the FERC requesting authorization to pay dividends in the future based on retained earnings balances calculated without giving effect to the impact of purchase accounting adjustments for the acquisition of LKE by PPL. In May 2012, FERC approved the petitions with the further condition that LG&E may not pay dividends if such payment would cause its adjusted equity ratio to fall below 30% of total capitalization. Accordingly, at December 31, 2015, net assets of $1.1 billion were restricted for purposes of paying dividends to LKE, and net assets of $1.2 billion were available for payment of dividends to LKE. LG&E believes it will not be required to change its current dividend practices as a result of the foregoing requirement. Orders from the KPSC require LG&E to obtain prior consent or approval before lending amounts to PPL or LKE.

6. Acquisitions, Development and Divestitures

From time to time, LG&E evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with, modify or terminate the projects. Any resulting transactions may impact future financial results.

Development

Capacity Needs

The Cane Run Unit 7 NGCC was put into commercial operation on June 19, 2015. As a result and to meet more stringent EPA regulations, LG&E retired one coal-fired generating unit at the Cane Run plant in March 2015 and retired the remaining two coal-fired generating units at the plant in June 2015. LG&E incurred costs of $11 million directly related to these retirements including inventory write-downs and separation benefits. However, there were no gains or losses on the retirement of these units.

In December 2014, a final order was issued by the KPSC approving the request to construct a 10 MW solar generation facility at E.W. Brown. LG&E and KU began construction activities in the fourth quarter of 2015 and project the plant to be placed into commercial operation by June 2016 at a cost of approximately $30 million.

7. Leases

LG&E has entered into various agreements for the lease of office space, vehicles, land, gas storage and other equipment.

Rent - Operating Leases

Rent expense for operating leases was $12 million and $7 million for the years ended December 31, 2015 and 2014.

Total future minimum rental payments for all operating leases are estimated to be:

2016	$	14
2017		14
2018		13
2019		7
2020		4
Thereafter		10
Total	$	62

8. Retirement and Postemployment Benefits

Defined Benefits

LG&E sponsors and participates in non-contributory defined benefit pension plans. These plans are applicable to the majority of LG&E employees. The plan LG&E participates in is sponsored by LKE. LG&E is allocated a portion of the funded status and costs of the plan sponsored by LKE based on its participation in the plan, which

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

management believes is reasonable. LG&E's and LKE's defined benefit pension plans were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above the standard matching contributions to their savings plans.

The majority of employees are eligible for certain health care and life insurance benefits upon retirement through a contributory plan sponsored by LKE. Postretirement health benefits may be paid from 401(h) accounts established as part of the LKE plan within the PPL Services Corporation Master Trust, funded VEBA trusts and company funds.

The following table provides the components of net periodic defined benefit costs for LG&E's pension benefit plan for the years ended December 31.

	Pension Benefits	
	2015	2014
Net periodic defined benefit costs (credits):		
Service cost	$ 1	$ 1
Interest cost	14	15
Expected return on plan assets	(20)	(19)
Amortization of:		
Prior service cost (credit)	3	2
Actuarial (gain) loss (a)	11	6
Net periodic defined benefit costs (credits)	$ 9	$ 5
Other Changes in Plan Assets and Benefit Obligations Recognized in Regulatory Assets - Gross:		
Net (gain) loss	$ 8	$ 14
Prior service cost (credit)	10	9
Amortization of:		
Prior service (cost) credit	(3)	(2)
Actuarial gain (loss)	(11)	(6)
Total recognized in regulatory assets	4	15
Total recognized in net periodic benefit costs and regulatory assets	$ 13	$ 20

(a) As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between actuarial (gain)/loss calculated in accordance with LG&E's pension accounting policy and actuarial (gain)/loss calculated using a 15 year amortization period was $3 million.

For the pension plan sponsored by LG&E, the estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2016 are $12 million ($5 million amortization of prior service cost and $7 million amortization of actuarial loss). For the pension plan LG&E participates in, the estimated amounts to be amortized from regulatory assets into net periodic defined benefit costs in 2016 are $7 million ($2 million

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

amortization of prior service cost and $5 million amortization of actuarial loss). For the other postretirement plan LG&E participates in, the estimated amount to be amortized from regulatory assets into net periodic defined benefit costs in 2016 is $1 million (amortization of prior service cost).

As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between net periodic defined benefit costs calculated in accordance with LG&E's pension accounting policy and the net periodic defined benefit costs calculated using a 15 year amortization period for gains and losses is recorded as a regulatory asset. For the pension plan sponsored by LG&E, of the costs expected to be amortized into net periodic defined benefit costs in 2016, $4 million is expected to be recorded as a regulatory asset. For the pension plan LG&E participates in, of the costs expected to be amortized into net periodic defined benefit costs in 2016, $2 million is expected to be recorded as a regulatory asset.

The net periodic defined benefit costs charged to operating expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for LG&E’s pension benefits were $7 million and $3 million in 2015 and 2014. Allocations to LG&E for net periodic defined benefit costs charged to operating expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for pension benefits were $5 million and $2 million in 2015 and 2014. Allocations to LG&E for net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction work in progress and other non-expense accounts, for other postretirement benefits were $4 million in both 2015 and 2014. These allocated amounts are based on LG&E’s participation in those plans, which management believes is reasonable.

For the pension plan sponsored by LG&E, of the costs charged to operating expense or regulatory assets, excluding amounts charged to construction and other non-expense accounts, $2 million was recorded as regulatory assets during 2015 representing the difference between net periodic defined benefit costs under the pension accounting policy and using a 15 year amortization period for gains and losses. An additional $2 million was recorded as a regulatory asset for this difference for the pension plan in which LG&E participates during 2015.

LKE and LG&E adopted the new mortality tables issued by the Society of Actuaries in October 2014 (RP-2014 base tables) for their defined benefit pension plans and LKE’s other postretirement benefit plan at December 31, 2014 and 2015. In addition, LKE and LG&E updated the basis for estimating projected mortality improvements and selected the IRS BB-2D two-dimensional improvement scales on a generational basis for all their defined benefit pension plans and LKE’s other postretirement benefit plan. These new mortality assumptions reflect the recognition of both improved life expectancies and the expectation of continuing improvements in life expectancies. The use of the new base tables and improvement scale resulted in an increase to LG&E’s defined benefit pension obligation, an increase to future expense and a decrease in funded status. The use of the new base tables and improvement scale also resulted in an increased allocation from LKE to LG&E for defined benefit pension and other postretirement benefit obligations and future expense and a decrease in allocated funded status.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used in the valuation of the benefit obligations at December 31.

	Pension Benefits	
	2015	2014
Discount rate	4.49%	4.20%

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used to determine the net periodic defined benefit costs for the years ended December 31.

	Pension Benefits	
	2015	2014
Discount rate	4.20%	5.13%
Expected return on plan assets (a)	7.00%	7.10%

(a) The expected long-term rates of return for pension and other postretirement benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. Each plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The funded status of LG&E's plan at December 31 was as follows:

	Pension Benefits	
	2015	**2014**
Change in Benefit Obligation		
Benefit Obligation, beginning of period	$ 331	$ 291
Service cost	1	1
Interest cost	14	15
Plan amendments (a)	10	9
Actuarial (gain) loss	(15)	36
Gross benefits paid (b)	(15)	(21)
Benefit Obligation, end of period	$ 326	$ 331
Change in Plan Assets		
Plan assets at fair value, beginning of period	301	281
Actual return on plan assets	(2)	41
Employer contributions	13	-
Gross benefits paid (b)	(15)	(21)
Plan assets at fair value, end of period	297	301
Funded Status, end of period	$ (29)	$ (30)
Amounts recognized in the Balance Sheets consist of:		
Noncurrent liability	(29)	(30)
Net amount recognized, end of period	$ (29)	$ (30)
Amounts recognized in regulatory assets (pre-tax) consists of:		
Prior service cost (credit)	$ 29	$ 22
Net actuarial (gain) loss	95	98
Total	$ 124	$ 120
Total accumulated benefit obligation for defined benefit pension plan	$ 326	$ 330

(a) The plan was amended in December 2015 allowing terminated vested participants to elect to receive their accrued pension benefit as a one-time lump-sum payment effective January 1, 2016. The projected benefit obligation increased by $10 million as a result of the amendment.

The plan was amended in December 2014 to enhance the early retirement factors for all plan participants retiring on or after January 1, 2015. The projected benefit obligation increased by $9 million as a result of the amendment.

(b) LG&E's pension plan offered a limited-time program in 2014 during which terminated vested participants could elect to receive their accrued pension benefit as a one-time lump-sum payment. The gross benefits paid includes $8 million of lump-sum cash payments made to terminated vested participants in 2014 in connection with this offering.

LG&E's pension plan had projected and accumulated benefit obligations in excess of plan assets at December 31, 2015 and 2014.

In addition to the plan it sponsors, LG&E is allocated a portion of the funded status and costs of certain defined benefit plans sponsored by LKE based on its participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retired employees are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to LG&E for pension benefits resulted in a liability of $26 million and $27 million at December 31, 2015 and 2014. Allocations to LG&E for other postretirement benefits resulted in a liability of $77 million and $85 million at December 31, 2015 and 2014.

Plan Assets - Pension Plans

The pension plans sponsored by LKE and LG&E are invested in the PPL Services Corporation Master Trust (the Master Trust) that also includes 401(h) accounts that are restricted for certain other postretirement benefit obligations of PPL and LKE. The investment strategy for the Master Trust is to achieve a risk-adjusted return on a mix of assets that, in combination with LG&E's funding policy, will ensure that sufficient assets are available to provide long-term growth and liquidity for benefit payments, while also managing the duration of the assets to complement the duration of the liabilities. The Master Trust benefits from a wide diversification of asset types, investment fund strategies and external investment fund managers, and therefore has no significant concentration of risk.

The investment policy of the Master Trust outlines investment objectives and defines the responsibilities of the EBPB, external investment managers, investment advisor and trustee and custodian. The investment policy is reviewed annually by PPL's Board of Directors.

The EBPB created a risk management framework around the trust assets and pension liabilities. This framework considers the trust assets as being composed of three sub-portfolios: growth, immunizing and liquidity portfolios. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities, generally with long durations, and derivative positions. The immunizing portfolio is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

Target allocation ranges have been developed for each portfolio on a plan basis based on input from external consultants with a goal of limiting funded status volatility. The EBPB monitors the investments in each portfolio on a plan basis, and seeks to obtain a target portfolio that emphasizes reduction of risk of loss from market volatility. In pursuing that goal, the EBPB establishes revised guidelines from time to time. EBPB

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

investment guidelines as of the end of 2015 are presented below.

The asset allocation for the trust and the target allocation by portfolio at December 31 are as follows:

	Percentage of Trust Assets 2015 (a)	2015 Target Asset Allocation (a) Weighted Average
Growth Portfolio	**51%**	**50%**
Equity securities	25%	
Debt securities (b)	13%	
Alternative investments	13%	
Immunizing Portfolio	**47%**	**48%**
Debt securities (b)	42%	
Derivatives	5%	
Liquidity Portfolio	**2%**	**2%**
Total	100%	100%

	Percentage of Trust Assets 2014
Growth Portfolio	**51%**
Equity securities	26%
Debt securities (b)	13%
Alternative investments	12%
Immunizing Portfolio	**47%**
Debt securities (b)	44%
Derivatives	3%
Liquidity Portfolio	**2%**
Total	100%

(a) Allocations exclude consideration of a group annuity contract held by the LG&E and KU Retirement Plan.
(b) Includes commingled debt funds, which are treated as debt securities for asset allocation purposes.

LG&E’s and LKE’s pension plan assets are invested solely in the Master Trust, which is fully disclosed below. The fair value of LG&E’s plan's assets of $297 million and $301 million at December 31, 2015 and 2014 represents an interest of approximately 9% and 6% in the Master Trust. The fair value of LKE’s plans assets of $1.3 billion at December 31, 2015 and 2014 represents an interest of approximately 40% and 28% in the Master Trust.

(a) In accordance with accounting guidance certain investments that are measured at fair value using the net asset value per share (NAV), or its equivalent, practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.

(b) Receivables and payables represent amounts for investments sold/purchased but not yet settled along with interest and dividends earned but not yet received.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2015 is as follows:

	Corporate debt	Insurance contracts	Total
Balance at beginning of period	$ 21	$ 33	$ 54
Actual return on plan assets			
Relating to assets still held at the reporting date	-	2	2
Relating to assets sold during the period	(1)	-	(1)
Purchases, sales and settlements	(10)	(3)	(13)
Balance at end of period	$ 10	$ 32	$ 42

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2014 is as follows:

	Corporate debt	Insurance contracts	Total
Balance at beginning of period	$ 23	$ 37	$ 60
Actual return on plan assets			
Relating to assets still held at the reporting date	(1)	1	-
Relating to assets sold during the period	(1)	-	(1)
Purchases, sales and settlements	-	(5)	(5)
Balance at end of period	$ 21	$ 33	$ 54

The fair value measurements of cash and cash equivalents are based on the amounts on deposit.

The market approach is used to measure fair value of equity securities. The fair value measurements of equity securities (excluding commingled funds), which are generally classified as Level 1, are based on quoted prices in active markets. These securities represent actively and passively managed investments that are managed against various equity indices and exchange traded funds (ETFs).

Investments in commingled equity and debt funds are categorized as equity securities. Investments in commingled equity funds include funds that invest in U.S. and international equity securities. Investments in commingled debt funds include funds that invest in a diversified portfolio of emerging market debt obligations, as well as funds that invest in investment grade long-duration fixed-income securities.

The fair value measurements of debt securities are generally based on evaluations that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences. The fair value of debt securities is generally measured using a market approach,

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

including the use of pricing models which incorporate observable inputs. Common inputs include benchmark yields, relevant trade data, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as payment data, future predicted cash flows, collateral performance and new issue data. For the Master Trust, these securities represent investments in securities issued by U.S. Treasury and U.S. government sponsored agencies; investments securitized by residential mortgages, auto loans, credit cards and other pooled loans; investments in investment grade and non-investment grade bonds issued by U.S. companies across several industries; investments in debt securities issued by foreign governments and corporations.

Investments in commodities represent ownership interest of a commingled fund that is invested in a portfolio of exchange-traded futures and forward contracts in commodities to obtain broad exposure to all principal groups in the global commodity markets, including energies, agriculture and metals (both precious and industrial) using proprietary commodity trading strategies. Redemptions can be made the 15^{th} calendar day and the last calendar day of the month with a specified notification period. The fund's fair value is based upon a value as calculated by the fund's administrator.

Investments in real estate represent an investment in a partnership whose purpose is to manage investments in core U.S. real estate properties diversified geographically and across major property types (e.g., office, industrial, retail, etc.). The manager is focused on properties with high occupancy rates with quality tenants. This results in a focus on high income and stable cash flows with appreciation being a secondary factor. Core real estate generally has a lower degree of leverage when compared with more speculative real estate investing strategies. The partnership has limitations on the amounts that may be redeemed based on available cash to fund redemptions. Additionally, the general partner may decline to accept redemptions when necessary to avoid adverse consequences for the partnership, including legal and tax implications, among others. The fair value of the investment is based upon a partnership unit value.

Investments in private equity represent interests in partnerships in multiple early-stage venture capital funds and private equity fund of funds that use a number of diverse investment strategies. Four of the partnerships have limited lives of ten years, while the fifth has a life of 15 years, after which liquidating distributions will be received. Prior to the end of each partnership's life, the investment cannot be redeemed with the partnership; however, the interest may be sold to other parties, subject to the general partner's approval. The Master Trust has unfunded commitments of $27 million that may be required during the lives of the partnerships. Fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Investments in hedge funds represent investments in three hedge fund of funds. Hedge funds seek a return utilizing a number of diverse investment strategies. The strategies, when combined aim to reduce volatility and risk while attempting to deliver positive returns under most market conditions. Major investment strategies for the hedge fund of funds include long/short equity, market neutral, distressed debt, and relative value. Generally, shares may be redeemed within 60 to 95 days with prior written notice. The funds are subject to short term lockups and have limitations on the amount that may be withdrawn based on a percentage of the total net asset value of the fund, among other restrictions. All withdrawals are subject to the general partner's approval. The fair value for two of the funds has been estimated using the net asset value per share and the third fund's fair

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

The fair value measurements of derivative instruments utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. These securities primarily represent investments in interest rate swaps and swaptions (the option to enter into an interest rate swap) which are valued based on the swap details, such as swap curves, notional amount, index and term of index, reset frequency, volatility and payer/receiver credit ratings.

Insurance contracts, classified as Level 3, represent an investment in an immediate participation guaranteed group annuity contract. The fair value is based on contract value, which represents cost plus interest income less distributions for benefit payments and administrative expenses.

Plan Assets - Other Postretirement Benefit Plans

LKE's other postretirement benefit plan is invested primarily in a 401(h) account, as disclosed in the PPL Services Corporation Master Trust, with insignificant amounts invested in money market funds within VEBA trusts for liquidity.

Expected Cash Flows - Defined Benefit Plans

LG&E's defined benefit pension plan has the option to utilize available prior year credit balances to meet current and future contribution requirements. However, LG&E contributed $7 million to its pension plan in January 2016. LG&E also contributed $5 million to LKE’s pension plan on behalf of LG&E employees in January 2016.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid by the plan for LG&E retirees.

	LG&E Sponsored Pensions	Allocated from LKE Pension Plan
2016	$ 23	$ 15
2017	25	15
2018	24	16
2019	25	16
2020	25	16
2020-2025	111	84

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Savings Plans

Substantially all employees of LG&E are eligible to participate in deferred savings plans (401(k)s). Employer contributions to the plans were $5 million each in 2015 and 2014.

9. Jointly Owned Facilities

At December 31, 2015 and 2014, the Balance Sheets reflect the owned interests in the facilities listed below.

	Ownership Interest	Electric Plant	Accumulated Depreciation	Construction Work in Progress
December 31, 2015				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 12	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	47	10	1
Trimble County Unit 1	75.00%	399	44	6
Trimble County Unit 2	14.25%	210	28	12
Trimble County Units 5-6	29.00%	29	6	-
Trimble County Units 7-10	37.00%	71	14	-
Cane Run Unit 7	22.00%	115	1	1
E.W. Brown Solar Unit	39.00%	-	-	4
December 31, 2014				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 40	$ 10	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	47	7	-
Trimble County Unit 1	75.00%	309	51	59
Trimble County Unit 2	14.25%	205	23	15
Trimble County Units 5-6	29.00%	29	5	-
Trimble County Units 7-10	37.00%	70	11	-
Cane Run Unit 7	22.00%	-	-	113

LG&E provides its own funding for its share of each of the above facilities. LG&E receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

10. Commitments and Contingencies

Energy Purchases Commitments

LG&E enters into purchase contracts to supply the coal and natural gas requirements for generation facilities and LG&E's gas supply operations. These contracts include the following commitments:

Contract Type	Maximum Maturity Date
Coal	2022
Coal Transportation and Fleeting Services	2024
Natural Gas Storage and Transporation	2024
Natural Gas Transportation	2026

LG&E has a power purchase agreement with OVEC expiring in June 2040. See "Guarantees and Other Assurances" below for information on the OVEC power purchase contract. Future obligations for power purchases from OVEC are unconditional demand payments, comprised of annual minimum debt service payments, as well as contractually required reimbursement of plant operating, maintenance and other expenses are projected as follows:

2016	$	18
2017		19
2018		19
2019		19
2020		20
Thereafter		435
	$	530

In addition, LG&E had total energy purchases under the OVEC power purchase agreement of $15 million and $17 million for the years ended December 31, 2015 and 2014.

Legal Matters

LG&E is involved in legal proceedings, claims and litigation in the ordinary course of business. LG&E cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Cane Run Environmental Claims

In December 2013, six residents, on behalf of themselves and others similarly situated, filed a class action complaint against LG&E and PPL in the U.S. District Court for the Western District of Kentucky alleging

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

violations of the Clean Air Act and RCRA. In addition, these plaintiffs assert common law claims of nuisance, trespass and negligence. These plaintiffs seek injunctive relief and civil penalties, plus costs and attorney fees, for the alleged statutory violations. Under the common law claims, these plaintiffs seek monetary compensation and punitive damages for property damage and diminished property values for a class consisting of residents within four miles of the plant. In their individual capacities, these plaintiffs seek compensation for alleged adverse health effects. In response to a motion to dismiss filed by LG&E and PPL, in July 2014, the court dismissed the plaintiffs' RCRA claims and all but one Clean Air Act claim, but declined to dismiss their common law tort claims. Upon motion of LG&E and PPL, the district court certified for appellate review the issue of whether the state common law claims are preempted by federal statute. In December 2014, the U.S. Court of Appeals for the Sixth Circuit issued an order granting appellate review regarding the above matter. Oral argument before the Sixth Circuit was held in August 2015. In November 2015, the Sixth Circuit issued an opinion affirming the District Court's ruling that plaintiffs' state law claims are not preempted by the Clean Air Act and remanding the matter to the District Court for further proceedings. Certain discovery matters are currently before the District Court. LG&E cannot predict the outcome of this matter. LG&E retired one coal-fired unit at the Cane Run plant in March 2015 and the remaining two coal-fired units at the plant in June 2015.

Mill Creek Environmental Claims

In May 2014, the Sierra Club filed a citizen suit against LG&E in the U.S. District Court for the Western District of Kentucky for alleged violations of the Clean Water Act. The Sierra Club alleges that various discharges at the Mill Creek plant constitute violations of the plant's water discharge permit. The Sierra Club seeks civil penalties, injunctive relief, costs and attorney's fees. In August 2015, the Court denied cross-motions for summary judgment filed by both parties and directed the parties to proceed with discovery. Discovery proceedings are underway and the parties have also conducted limited settlement discussions in the matter. LG&E cannot predict the outcome of this matter or the potential impact on the operations of the Mill Creek plant, including increased capital or operating costs, if any, but believes the plant is operating in compliance with the permits.

Trimble County Unit 2 Air Permit

The Sierra Club and other environmental groups petitioned the Kentucky Environmental and Public Protection Cabinet to overturn the air permit issued for the Trimble County Unit 2 baseload coal-fired generating unit, but the agency upheld the permit in an order issued in September 2007. In response to subsequent petitions by environmental groups, the EPA ordered certain non-material changes to the permit which, in January 2010, were incorporated into a final revised permit issued by the Kentucky Division for Air Quality. In March 2010, the environmental groups petitioned the EPA to object to the revised state permit. Until the EPA issues a final ruling on the pending petition and all available appeals are exhausted, LG&E cannot predict the outcome of this matter or the potential impact on the operations of the Trimble County plant, including increased capital or operating costs, if any.

Trimble County Water Discharge Permit

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Kentucky Energy and Environment Cabinet (KEEC) challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the KEEC issued a final order upholding the permit which was subsequently appealed by the environmental groups. In September 2013, the Franklin Circuit Court reversed the KEEC order upholding the permit and remanded the permit to the agency for further proceedings. LG&E and the KEEC appealed the order to the Kentucky Court of Appeals. In July 2015, the Court of Appeals upheld the lower court ruling. LG&E and the KEEC have moved for discretionary review by the Kentucky Supreme Court. On February 10, 2016, the Kentucky Supreme Court issued an order granting discretionary review. LG&E is unable to predict the outcome of this matter or the potential impact on the operations of the Trimble County plant, including increased capital or operating costs, if any.

Regulatory Issues

See Note 4 for information on regulatory matters related to utility rate regulation.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk power system. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk power electricity system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties of up to $1 million per day, per violation, for certain violations.

LG&E monitors its compliance with the Reliability Standards and continues to self-report or self-log potential violations of certain applicable reliability requirements and submit accompanying mitigation plans, as required. The resolution of a small number of potential violations is pending. Any Regional Reliability Entity (including RFC or SERC) determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing its programs to ensure compliance with the Reliability Standards, certain other instances of potential non-compliance may be identified from time to time. LG&E cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

Environmental Matters

Due to the environmental issues discussed below or other environmental matters, it may be necessary for LG&E to modify, curtail, replace or cease operation of certain facilities or performance of certain operations to comply with statutes, regulations and other requirements of regulatory bodies or courts. In addition, legal challenges to new environmental permits or rules add to the uncertainty of estimating the future cost of these permits and rules.

LG&E is entitled to recover, through the ECR mechanism, certain costs of complying with the Clean Air Act, as

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

amended, and those federal, state or local environmental requirements applicable to coal combustion wastes and by-products from facilities that generate electricity from coal in accordance with approved compliance plans. Costs not covered by the ECR mechanism are subject to rate recovery before the KPSC or the FERC. LG&E can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

<u>Air</u>

The Clean Air Act, which regulates air pollutants from mobile and stationary sources, has a significant impact on the operation of fossil fuel plants. The Clean Air Act requires the EPA periodically to review and establish concentration levels in the ambient air for six criteria pollutants to protect public health and welfare. These concentration levels are known as NAAQS. The six criteria pollutants are carbon monoxide, lead, nitrogen dioxide, ozone, particulate matter and sulfur dioxide.

Federal environmental regulations of these criteria pollutants require states to adopt implementation plans, known as state implementation plans, for certain pollutants, which detail how the state will attain the standards that are mandated by the relevant law or regulation. Each state identifies the areas within its boundaries that meet the NAAQS (attainment areas) and those that do not (non-attainment areas), and must develop a state implementation plan both to bring non-attainment areas into compliance with the NAAQS and to maintain good air quality in attainment areas. In addition, for attainment of ozone and fine particulates standards, states in the eastern portion of the country, including Kentucky, are subject to a regional program developed by the EPA known as the Cross-State Air Pollution Rule. The NAAQS, future revisions to the NAAQS and state implementation plans implementing them, or future revisions to regional programs, may require installation of additional pollution controls, the costs of which LG&E believes are subject to cost recovery.

Although LG&E does not currently anticipate significant costs to comply with these programs, changes in market or operating conditions could result in different costs than anticipated.

National Ambient Air Quality Standards (NAAQS)

Under the Clean Air Act, the EPA is required to reassess the NAAQS for certain air pollutants on a five-year schedule. In 2008, the EPA revised the NAAQS for ozone and proposed to further strengthen the standard in November 2014. The EPA released a new ozone standard on October 1, 2015. The states and EPA will determine attainment with the new ozone standard through review of relevant ambient air monitoring data, with attainment or nonattainment designations scheduled no later than October 2017. States are also obligated to address interstate transport issues associated with new ozone standards through the establishment of "good neighbor" state implementation plans for those states that are found to contribute significantly to another states' non-attainment. States that are not in the ozone transport region, including Kentucky, are working together to evaluate further nitrogen oxide reductions from fossil-fueled plants with SCRs. The nature and timing of any additional reductions resulting from these evaluations cannot be predicted at this time.

In 2010, the EPA finalized revised NAAQS for sulfur dioxide and required states to identify areas that meet those standards and areas that are in "non-attainment". In July 2013, the EPA finalized non-attainment designations for parts of the country, including part of Jefferson County in Kentucky. Attainment must be

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

achieved by 2018. LG&E anticipates that certain previously required compliance measures, such as upgraded or new sulfur dioxide scrubbers at certain plants and the retirement of coal-fired generating units at LG&E's Cane Run plant, will help to achieve compliance with the new sulfur dioxide and ozone standards. If additional reductions are required, the costs could be significant.

Mercury and Air Toxics Standards (MATS)

In February 2012, the EPA finalized the MATS rule requiring reductions of mercury and other hazardous air pollutants from fossil-fuel fired power plants, with an effective date of April 16, 2012. The MATS rule was challenged by industry groups and states and was upheld by the U.S. Court of Appeals for the D. C. Circuit Court (D.C. Circuit Court) in April 2014. A group of states subsequently petitioned the U.S. Supreme Court (Supreme Court) to review this decision and in June 2015, the Supreme Court held that the EPA failed to properly consider costs when deciding to regulate hazardous air emissions from power plants under MATS. The Court remanded the matter to the D.C. Circuit Court, which in December 2015 remanded the rule to EPA without vacating it. EPA has proposed a supplemental finding regarding costs of the rule and has announced that it intends to make a final determination in 2016. The EPA's MATS rule remains in effect during the pendency of the ongoing proceedings.

LG&E has installed significant controls in connection with the MATS rule and in conjunction with compliance with other environmental requirements, including fabric-filter baghouses, upgraded scrubbers or chemical additive systems for which appropriate KPSC authorization and/or ECR treatment has been received. LG&E is currently seeking KPSC approval for a compliance plan providing for installation of additional MATS-related controls, the cost of which is currently estimated at $5 million. LG&E cannot predict the outcome of the MATS rule or its potential impact, if any, on plant operations, rate treatment or future capital or operating needs. See Note 4 for additional information.

New Source Review (NSR)

The NSR litigation brought by EPA, states and environmental groups against coal-fired generating plants in past years continues to proceed through the courts. Although none of this litigation directly involves LG&E, it can influence the permitting of large capital projects at LG&E's power plants, the costs of which cannot presently be determined but could be significant.

Climate Change

There is continuing momentum to address climate change. Most recently, in December 2015, 195 nations, including the U.S., signed the Paris Agreement on Climate which establishes a comprehensive framework for the reduction of GHG emissions from both developed and developing nations. Although the agreement does not establish binding reduction requirements, it requires each nation to prepare, communicate, and maintain GHG reduction commitments. Based on EPA's Clean Power Plan described below, the U.S. has committed to an initial reduction target of 26% to 28% below 2005 levels by 2025.

NOTES TO FINANCIAL STATEMENTS (Continued)

The EPA's Rules under Section 111 of the Clean Air Act

As further described below, the EPA finalized rules imposing greenhouse gas emission standards for both new and existing power plants. The EPA has also issued a proposed federal implementation plan that would apply to any states that fail to submit an acceptable state implementation plan under these rules. The EPA's authority to promulgate these regulations under Section 111 of the Clean Air Act has been challenged in the D.C. Circuit Court by several states and industry groups. On February 9, 2016, the Supreme Court stayed the rule for existing plants (the Clean Power Plan) pending the D.C. Circuit Court's review and subsequent review by the Supreme Court if a writ of certiorari is filed and granted.

The EPA's rule for new power plants imposes separate emission standards for coal and natural gas units based on the application of different technologies. The coal standard is based on the application of partial carbon capture and sequestration technology, but because this technology is not presently commercially available, the rule effectively precludes the construction of new coal-fired plants. The standard for NGCC power plants is the same as the EPA proposed in 2012 and is not continuously achievable. The preclusion of new coal-fired plants and the compliance difficulties posed for new natural gas-fired plants could have a significant industry-wide impact.

The EPA's Clean Power Plan

The EPA's rule for existing power plants, referred to as the Clean Power Plan, was published in the Federal Register in October 2015. The Clean Power Plan contains state-specific rate-based and mass-based reduction goals and guidelines for the development, submission and implementation of state implementation plans to achieve the state goals. State-specific goals were calculated from 2012 data by applying EPA's broad interpretation and definition of the BSER, resulting in the most stringent targets to be met in 2030, with interim targets to be met beginning in 2022. The EPA believes it has offered some flexibility to the states as to how their compliance plans can be crafted, including the option to use a rate-based approach (limit emissions per megawatt hour) or a mass-based approach (limit total tons of emissions per year), and the option to demonstrate compliance through emissions trading and multi-state collaborations. Under the rate-based approach, Kentucky would need to make a 41% reduction from its 2012 emissions rate and under a mass-based approach it would need to make a 36% reduction. These reductions are significantly greater than initially proposed and present significant challenges to the state. If the Clean Power Plan is ultimately upheld and Kentucky fails to develop an approvable implementation plan by the applicable deadline, the EPA would impose a federal implementation plan that could be more stringent than what the state plan might provide. Depending on the provisions of the Kentucky implementation plan, LG&E may need to modify its current portfolio of generating assets during the next decade and/or participate in an allowance trading program.

LG&E is participating in the ongoing regulatory processes at the state and federal level in an effort to provide input into the state or federal implementation plan that will govern reductions in Kentucky. Various states, industry groups, and individual companies including LKE have filed petitions for reconsideration with EPA and petitions for review with the D.C. Circuit Court challenging the Clean Power Plan. LG&E cannot predict the outcome of this matter or the potential impact, if any, on plant operations, or future capital or operating needs. LG&E believes that the costs, which could be significant, would be subject to cost recovery.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

In April 2014, the Kentucky General Assembly passed legislation which limits the measures that the Kentucky Energy and Environment Cabinet may consider in setting performance standards to comply with the EPA's regulations governing GHG emissions from existing sources. The legislation provides that such state GHG performance standards shall be based on emission reductions, efficiency measures, and other improvements available at each power plant, rather than renewable energy, end-use energy efficiency, fuel switching and re-dispatch. These statutory restrictions may make it more difficult for Kentucky to achieve the GHG reduction levels that the EPA has established for Kentucky.

<u>Water/Waste</u>

Coal Combustion Residuals (CCRs)

On April 17, 2015, the EPA published its final rule regulating CCRs. CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. The rule became effective on October 19, 2015. It imposes extensive new requirements, including location restrictions, design and operating standards, groundwater monitoring and corrective action requirements, and closure and post-closure care requirements on CCR impoundments and landfills that are located on active power plants and not closed. Under the rule, the EPA will regulate CCRs as non-hazardous under Subtitle D of RCRA and allow beneficial use of CCRs, with some restrictions. The rule's requirements for covered CCR impoundments and landfills include implementation of groundwater monitoring and commencement or completion of closure activities generally between three and ten years from certain triggering events. This self-implementing rule requires posting of compliance documentation on a publicly accessible website and is enforceable solely through citizen suits. LG&E is also subject to state rules applicable to CCR management which may potentially be modified to reflect some or all requirements of the federal rule.

LG&E is currently pursuing KPSC approval for a compliance plan providing for closure of impoundments at the Mill Creek and Trimble County stations, and construction of process water management facilities at those plants. LG&E currently estimate the cost of these CCR compliance measures at $311 million. See Note 4 for additional information.

In connection with the final CCR rule, LG&E recorded increases to existing AROs during 2015. See Note 15 for additional information. Further increases to AROs or changes to current capital plans or to operating costs may be required as estimates are refined based on closure developments, groundwater monitoring results, and regulatory or legal proceedings. Costs relating to this rule are subject to rate recovery.

Clean Water Act

Regulations under the federal Clean Water Act dictate permitting and mitigation requirements for many of LG&E's construction projects. Many of those requirements relate to power plant operations, including requirements related to the treatment of pollutants in effluents prior to discharge, the temperature of effluent discharges and the location, design and construction of cooling water intake structures at generating facilities, standards intended to protect aquatic organisms by reducing capture in the screens attached to cooling water intake structures (impingement) at generating facilities and the water volume brought into the facilities (entrainment). The requirements could impose significant costs which are subject to rate recovery.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Effluent Limitations Guidelines (ELGs)

On September 30, 2015, the EPA released its final effluent limitations guidelines for wastewater discharge permits for new and existing steam electric generating facilities. The rule provides strict technology-based discharge limitations for control of pollutants in scrubber wastewater, fly ash and bottom ash transport water, mercury control wastewater, gasification wastewater, and combustion residual leachate. The new guidelines require deployment of additional control technologies providing physical, chemical, and biological treatment of wastewaters. The guidelines also mandate operational changes including "no discharge" requirements for fly ash and bottom ash transport waters and mercury control wastewaters. The implementation date for individual generating stations will be determined by the states on a case-by-case basis according to criteria provided by the EPA, but the requirements of the rule must be fully implemented no later than 2023. It has not been decided how Kentucky intends to integrate the ELGs into its routine permit renewal process. LG&E continues to assess the requirements of this complex rule to determine available compliance strategies. LG&E is unable to fully estimate compliance costs or timing at this time although certain preliminary estimates are included in current capital forecasts, for applicable periods. Costs to comply with ELGs or other discharge limits, which are expected to be significant, are subject to rate recovery.

Clean Water Act Section 316(b)

The EPA's final 316(b) rule for existing facilities became effective in October 2014, and regulates cooling water intake structures and their impact on aquatic organisms. States are allowed broad discretion to make site-specific determinations under the rule. The rule requires existing facilities to choose between several options to reduce the impact to aquatic organisms that become trapped against water intake screens (impingement) and to determine the intake structure's impact on aquatic organisms pulled through a plant's cooling water system (entrainment). Plants equipped with closed-cycle cooling, an acceptable option, would likely not incur substantial costs. Once-through systems would likely require additional technology to comply with the rule. Mill Creek Unit 1 is the only unit expected to be impacted. LG&E is evaluating compliance strategies but do not presently expect the compliance costs, which are subject to rate recovery, to be significant.

Waters of the United States (WOTUS)

The U.S. Court of Appeals for the Sixth Circuit has issued a stay of EPA's rule on the definition of WOTUS pending the court's review of the rule. The effect of the stay is that the WOTUS rule is not currently in effect anywhere in the United States. The ultimate outcome of the court's review of the rule remains uncertain. LG&E does not expect the rule to have a significant impact on its operations.

Other Issues

The EPA is reassessing its polychlorinated biphenyls (PCB) regulations under the Toxic Substance Control Act, which currently allow certain PCB articles to remain in use. In April 2010, the EPA issued an Advanced Notice of Proposed Rulemaking for changes to these regulations. This rulemaking could lead to a phase-out of all or some PCB-containing equipment. The EPA has postponed the release of the revised regulations to March 2016. LG&E cannot predict at this time the outcome of these proposed EPA regulations and what impact, if any, they would have on its facilities, but the costs could be significant.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Superfund and Other Remediation

LG&E is investigating, responding to agency inquiries, remediating, or have completed the remediation of, several sites that were not addressed under a regulatory program such as Superfund, but for which LG&E may be liable for remediation. These include a number of former coal gas manufacturing plants previously owned or operated or currently owned by predecessors or affiliates of LG&E. To date, the costs of these sites have not been significant.

There are additional sites, formerly owned or operated by LG&E predecessors or affiliates. LG&E lacks information on the conditions of such additional sites and are therefore unable to estimate any potential liability it may have or a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require LG&E to take more extensive assessment and remedial actions at former coal gas manufacturing plants. LG&E cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, LG&E undertakes remedial action in response to notices of violations, spills or other releases at various on-site and off-site locations, negotiate with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiate with property owners and other third parties alleging impacts from LG&E's operations and undertake similar actions necessary to resolve environmental matters that arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on LG&E's operations.

Future cleanup or remediation work at sites currently under review, or at sites not currently identified, may result in significant additional costs. Insurance policies maintained by LG&E may be applicable to certain of the costs or other obligations related to these matters but the amount of insurance coverage or reimbursement cannot be estimated or assured.

Other

Guarantees and Other Assurances

In the normal course of business, LG&E enters into agreements that provide financial performance assurance to third parties on behalf of certain subsidiaries. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance the creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

Pursuant to the OVEC power purchase contract, LG&E is obligated to pay for its share of OVEC's excess debt service, post-retirement and decommissioning costs, as well as any shortfall from amounts currently included within a demand charge designed and currently expected to cover these costs over the term of the contract. LG&E's proportionate share of OVEC's outstanding debt was $86 million at December 31, 2015. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchases, Energy Sales and Other Commitments" above for additional information on the OVEC power purchase contract.

LG&E provides other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, including LG&E, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of $225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

11. Related Party Transactions

Wholesale Sales and Purchases

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E. When KU has excess generation capacity after serving its own retail customers and its generation cost is lower than that of LG&E, LG&E purchases electricity from KU. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost plus any split savings. Savings realized from such intercompany transactions are shared equally between both companies. The volume of energy each company has to sell to the other is dependent on its retail customers' needs and its available generation.

Support Costs

LKS provides LG&E with administrative, management and support services. The costs of these services are charged to LG&E as direct support costs. General costs that cannot be directly attributed to a specific LKE subsidiary are allocated and charged to LG&E and other subsidiaries as indirect support costs. LKS bases its indirect allocations on the subsidiaries' number of employees, total assets, revenues, number of customers and/or other statistical information.

LKS charged LG&E $155 million and $140 million for the years ended December 31, 2015 and 2014, including amounts applied to accounts that are further distributed between capital and expense on LG&E’s books, based on methods that are believed to be reasonable.

In addition to the charges for services noted above, LKS makes payments on behalf of LG&E for fuel purchases and other costs for products or services provided by third parties. LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overheads associated with union and hourly employees performing work for the other company, charges related to jointly-owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E are reimbursed through LKS.

Intercompany Derivatives

Periodically, LG&E enters into forward-starting interest rate swaps with PPL. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties. See Note 13 for additional information on intercompany derivatives.

Other

See Note 1 for discussions regarding the intercompany tax sharing agreement. See Note 8 for discussions regarding intercompany allocations associated with defined benefits.

12. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. During 2015 and 2014, there were no transfers between Level 1 and Level 2. See Note 1 for information on the levels in the fair value hierarchy.

(a) Included in "Other noncurrent assets" on the Balance Sheets. Represents cash collateral posted to offset the exposure with counterparties related to certain interest rate swaps under master netting arrangements that are not offset.

Price Risk Management Assets/Liabilities - Interest Rate Swaps

To manage interest rate risk, LG&E uses interest rate contracts such as forward-starting swaps, floating-to-fixed swaps and fixed-to-floating swaps. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3.

Financial Instruments Not Recorded at Fair Value

The carrying amounts of long-term debt on the Balance Sheets and their estimated fair values are set forth below. The fair values were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates, which incorporate LG&E's credit risk. Long-term debt is classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

	December 31, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term debt	$ 1,642	$ 1,704	$ 1,345	$ 1,455

The carrying value of short-term debt, when outstanding, approximates fair value due to the variable interest rates associated with the short-term debt and is classified as Level 2.

13. Derivative Instruments and Hedging Activities

Risk Management Objectives

PPL has a risk management policy approved by the Board of Directors to manage market risk associated with commodities and interest rates on debt issuances (including price, liquidity and volumetric risk), and credit risk (including non-performance risk and payment default risk). The Risk Management Committee, comprised of senior management and chaired by the Chief Risk Officer, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions, verification of risk and transaction limits and the coordination and reporting of the Enterprise Risk Management (ERM) program.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts and swaps are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of the contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected.

The following summarizes the market risks that affect LG&E. These risks are significantly mitigated due to recovery mechanisms in place.

Interest rate risk

- LG&E is exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt, and utilizes forward starting interest rate swaps to hedge changes in benchmark interest rates, when appropriate, in connection with future debt issuances.

- LG&E is exposed to interest rate risk associated with debt securities and derivatives held by defined benefit plans.

Commodity price risk

- LG&E's rates include certain mechanisms for fuel, natural gas supply and fuel-related expenses. These mechanisms generally provide for timely recovery of market price and volumetric fluctuations associated with these expenses.

Equity securities price risk

- LG&E is exposed to equity securities price risk associated with defined benefit plans. This risk is significantly mitigated due to recovery mechanisms in place.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

In the event a supplier of LG&E defaults on its obligation, LG&E would be required to seek replacement power or replacement fuel in the market. In general, subject to regulatory review or other processes, appropriate incremental costs incurred by LG&E would be recoverable from customers through applicable rate mechanisms, thus mitigating its financial risk.

LG&E has credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. LG&E may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

Master Netting Arrangements

Net derivative positions on the Balance Sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

LG&E had no obligation to return cash collateral under master netting arrangements at December 31, 2015 and

2014.

LG&E posted $9 million and $21 million of cash collateral under master netting arrangements at December 31, 2015 and 2014.

See "Offsetting Derivative Instruments" below for a summary of derivative positions presented in the Balance Sheets where a right of setoff exists under these arrangements.

Interest Rate Risk

LG&E issues debt to finance its operations, which exposes it to interest rate risk. Various financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in its debt portfolio, adjust the duration of the debt portfolio and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under LG&E's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates.

Cash Flow Hedges

Periodically, LG&E enters into forward-starting interest rate swaps with PPL that have terms identical to forward-starting swaps entered into by PPL with third parties. It is probable that realized gains and losses on all of these swaps will be recoverable through regulated rates; as such, any gains and losses on these derivatives are included in regulatory assets or liabilities and will be recognized in "Interest Expense" on the Statements of Income over the life of the underlying debt at the time the underlying hedged interest expense is recorded. In September 2015, LG&E issued first mortgage bonds totaling $550 million and all outstanding forward-starting interest rate swaps were terminated. Net cash settlements of $44 million were paid on the swaps that were terminated. The settlements are included in "Regulatory assets" (noncurrent) on the Balance Sheet and "Cash Flows from Operating Activities" on the Statements of Cash Flows.

Economic Activity

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including a terminated swap contract, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statement of Income at the time the underlying hedged interest expense is recorded. At December 31, 2015, LG&E held contracts with a notional amount of $179 million that range in maturity through 2033.

Accounting and Reporting

All derivative instruments are recorded at fair value on the Balance Sheets as an asset or liability unless NPNS is elected. Changes in the fair value of derivatives not designated as NPNS are recognized currently in earnings unless specific hedge accounting criteria are met and designated as such, except for the changes in fair values of

Interest rate swaps	Regulatory assets - noncurrent	$ 1	$ (12)

Offsetting Derivative Instruments

LG&E enters into agreements pursuant to which it purchases or sells certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to set off amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

LG&E has elected not to offset derivative assets and liabilities and not to offset net derivative positions against

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The table below summarizes the derivative positions presented in the Balance Sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged.

	Liabilities			
		Eligible for Offset		
	Gross	Derivative Instruments	Cash Collateral Pledged	Net
December 31, 2015				
Treasury derivatives	$ 47	$ -	$ 9	$ 38
December 31, 2014				
Treasury derivatives	$ 81	$ -	$ 20	$ 61

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in LG&E’s credit ratings. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade, and assuming no assignment to an investment grade affiliate were allowed, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding LG&E’s performance obligation under the contract. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	(Mo, Da, Yr) / /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

At December 31, 2015, derivative contracts in a net liability position that contain credit risk-related contingent features, collateral posted on those positions and the related effect of a decrease in credit ratings below investment grade are summarized as follows:

Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent features	$	28
Aggregate fair value of collateral posted on these derivative instruments		9
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)		19

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

14. Other Intangible Assets

The gross carrying amount and the accumulated amortization of other intangible assets were:

	December 31, 2015		December 31, 2014	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Coal contracts (a)	$ 124	$ 116	$ 124	$ 98
Land and transmission rights	7	1	7	1
Emission allowances (b)	1	-	1	-
OVEC power purchase agreement (c)	87	29	87	23
Total subject to amortization	$ 219	$ 146	$ 219	$ 122

(a) Gross carrying amount represents the fair value at the acquisition date of coal contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which is being amortized over the same period as the intangible assets, eliminating any income statement impact. See Note 4 for additional information.
(b) Emission allowances are expensed when consumed or sold; therefore, there is no accumulated amortization.
(c) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to this contract, which is being amortized over the same period as the intangible asset, eliminating any income statement impact. See Note 4 for additional information.

Current intangible assets are included in "Other current assets" on the Balance Sheets. Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Amortization expense was as follows:

	2015	2014
Intangible assets with regulatory offset	$ 24	$ 23

Amortization expense for each of the next five years, excluding consumption of emission allowances, is estimated to be:

	2016	2017	2018	2019	2020
Intangible assets with regulatory offset	$ 14	$ 6	$ 6	$ 6	$ 6

15. Asset Retirement Obligations

LG&E's AROs are primarily related to the final retirement of assets associated with generating units. LG&E also has AROs related to natural gas mains and wells. LG&E's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. LG&E's accretion and depreciation expense are recorded as a regulatory asset, such that there is no earnings impact.

The changes in the carrying amounts of AROs were as follows.

	2015	2014
ARO at beginning of period	$ 74	$ 74
Accretion expense	5	4
Obligations incurred	3	-
Changes in estimated cash flow or settlement date	98	1
Obligations settled	(5)	(5)
ARO at end of period	175	74

LG&E recorded increases of $89 million to the existing AROs during 2015 as a result of an engineering study that was performed, in connection with the final CCR rule, providing clarity on projected CCR closure costs and revisions in the timing and amounts of future expected cash flows. Further increases to AROs or changes to current capital plans or to operating costs may be required as estimates of future cash flows are refined based on closure developments, groundwater monitoring results and regulatory or legal proceedings. In 2014, AROs were revalued primarily due to updates in the estimated cash flows for ash ponds based on updated cost estimates.

As of December 31, 2015, LG&E had $25 million of the ARO balances classified as current liabilities. These

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

current liabilities are primarily related to CCR closure costs expected to be incurred in 2016. As of December 31, 2014, substantially all of the ARO balances are classified as noncurrent liabilities.

See Note 10 for information on the final CCR rule and Note 6 for information on the rate recovery applications with the KPSC.

16. New Accounting Guidance Pending Adoption

Accounting for Revenue from Contracts with Customers

In May 2014, the Financial Accounting Standards Board (FASB) issued accounting guidance that establishes a comprehensive new model for the recognition of revenue from contracts with customers. This model is based on the core principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

For public business entities, this guidance can be applied using either a full retrospective or modified retrospective transition method, beginning in annual reporting periods after December 15, 2017 and interim periods within those years. Public business entities may early adopt this guidance in annual reporting periods beginning after December 15, 2016. LG&E expects to adopt this guidance effective January 1, 2018.

LG&E is currently assessing the impact of adopting this guidance, as well as the transition method it will use.

17. Notes to Statement of Cash Flows

Supplemental disclosures of cash flow information

	December 31, 2015	December 31, 2014
Cash paid (received) during the period for:		
Income taxes	$ (81)	$ 65
Interest on borrowed money	40	38
Other cash paid for interest	8	8

18. Notes to Statement of Income for the Year

See page 115, line 6, column (g). Electric Utility Depreciation Expense includes $8 million applicable to Common Utility Plant apportioned to Electric Operations.

See page 115, line 6, column (i). Gas Utility Depreciation Expense $4 million applicable to Common Utility Plant apportioned to Gas Operations.

See page 115, line 8, column (g). Electric Utility Amortization and Depletion of Utility Plant includes $8 million applicable to Common Utility Plant apportioned to Electric Operations.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2015/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

See page 115, line 8, column (i). Gas Utility Amortization and Depletion of Utility Plant includes $3 million applicable to Common Utility Plant apportioned to Gas Operations.

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(7)(l)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

The annual report to shareholders or members and the statistical supplements covering the most recent two (2) years from the application filing date.

Response:

There are no annual reports to LG&E's shareholders during the period referenced. LG&E does not publish a statistical supplement.

Federal securities rules generally require the delivery of annual reports to public shareholders when requesting their vote via certain proxy solicitations. During the period in question, the common stock of LG&E has been wholly-owned by LG&E and KU Energy LLC, which is a wholly-owned subsidiary of PPL Corporation.

Copies of the audited annual financial statements and other financial information of LG&E relating to the period described are provided in Filing Requirement 807 KAR 5:001 Section 16(7)(p) [Tab No. 46].

Louisville Gas and Electric Company
Case No. 2016-00371
Forecasted Test Period Filing Requirements
(Forecast Test Year 12ME 6/30/18; Base Period 12ME 2/28/17)

Filing Requirement
807 KAR 5:001 Section 16(7)(o)
Sponsoring Witness: Kent W. Blake

Description of Filing Requirement:

Complete monthly budget variance reports, with narrative explanations, for the twelve (12) months immediately prior to the base period, each month of the base period, and any subsequent months, as they become available.

Response:

The Companies have only one monthly budget variance (performance) report used for management reporting to the CEO and executive officers. Beginning January 2016, this performance report includes separate income statement, balance sheet and other analyses for Kentucky Utilities Company and Louisville Gas and Electric Company. Prior to 2016, this report included combined information for LG&E and KU Energy LLC. Certain information responsive to this request is being provided under seal pursuant to a Petition for Confidential Protection.

See attached for the monthly reports for:

- The twelve months prior to the base period - March 2015 through February 2016.
- Each month of the base period - As of the date of the filing only the months of March 2016 through October 2016 are available. The Company will provide this data for the remaining periods requested in the upcoming months as it becomes available.

Variance Explanations

• YTD generation volumes and GWh sales were impacted by cold weather. Generation volumes were also impacted by excellent plant availability.

• Current month higher electric margins due to favorable demand and energy revenue and production expenses. Electric margins also include net true-up adjustments of $6 million including KU's supply contracts with certain municipalities and the impact of the bonus depreciation extension.

• YTD higher electric margins due to a combination of favorable weather and plant/system performance resulting in $22 million from favorable demand and energy revenue and production expenses, $3 million in ECR revenues and $3 million from the sale of excess generation. Electric margins also include net true-up adjustments of $6 million including KU's supply contracts with certain municipalities and the impact of the bonus depreciation extension.

• YTD lower O&M due to $2 million of labor and benefit savings, $1 million of lower outside services due to timing of consulting services and contract support, $1 million timing for maintenance changes and $1 million lower uncollectible accounts.

• Seven environmental events have occurred YTD. The events were a result of SO2, NOx, and CO exceedances at Mill Creek and Trimble County. All events were short timeframe limits which were exceeded and were all due to equipment malfunctions.

Major Developments

• The service territories experienced a rare March snow storm which brought nearly a foot of snow to most of Kentucky with some areas reaching two feet. Near record cold temperatures followed the storm, however, LKE's electric and gas systems performed well and successfully managed the increased demand. KU and the Combined Utilities' system established new all-time March peak loads, and all-time March total daily energy usage records were also set for LG&E, KU and the Combined Utilities' system.

• There has been significant activity in the Kentucky rate case as the discovery phase of the case is complete. Intervening parties filed testimony on March 6 and public meetings were also held in Louisville and Lexington.

• LKE has achieved additional construction milestones on its Cane Run 7 project as both combustion turbines completed first fire and initial synchronization. LG&E also retired Cane Run 6 to help facilitate transmission work for the new plant site. In addition, Ghent 1 fabric filter baghouse construction and Mill Creek 1 and 2 FGD and fabric filter baghouses, are all progressing with tie-in outages. Ghent 1 represents an eleven-week outage and Mill Creek 1 and 2 are engaged in eight-week outages.

• The 2015 Kentucky General Assembly session concluded in March as lawmakers passed legislation on such issues as heroin, dating violence, and a gas tax. A bill encouraging community-based energy efficiency passed both chambers, however, it has no adverse impact on the Company or its energy efficiency programs. Perennially-offered bills seeking to impose a Renewable Portfolio Standard, prohibit utilities from recovering franchise fees on bills, and prohibit customer disconnection for failure to pay during winter months, all failed to gain a committee hearing.

Significant Future Events

• The execution of LKE's construction plan continues in 2015. The commissioning activities for Cane Run 7 have positioned the project to likely begin commercial operations during the second quarter. Site work for Brown Solar is also expected to commence in the second quarter as responses for the EPC contract are currently under review. The Trimble County 1 and Brown 3 fabric filter EPC contracts are underway as planned with tie-in outages projected for October.

• The Company will file its rebuttal rate case testimony on April 14th, followed by settlement discussions on April 16-17th. The public evidentiary hearing is also set to begin April 21st.

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.
(3) The possible violation issue for YTD Actual is believed to be minimal risk.

Combined KU and LG&E ROE Mar 2015

KU and LG&E Combined

Reconciliation of Allowed Return to

2015 Regulatory Return and

Book ROE from Ongoing Operations (12 months ended March 2015)

Allowed Return [1]		10.28%	
Adjustments (net of tax):			
Change in capitalization - non ECR	-1.85%		Growth in non-ECR capitalization (rate base) between rate cases does not earn a return
Change in ROE from average mechanism rate base growth	0.00%		Mechanisms have a real-time return
Change in weighted cost of debt	-0.25%		Additional borrowings offset by favorable rates
Change in margins	2.35%		Primarily new rates since last rate cases
Change in allowed expenses	-1.34%		Inflationary increases
		-1.08%	
Actual Regulated ROE		9.20%	

(1) Based on the most recent base rate filings with test years ending 3/31/12 KPSC, 12/31/13 FERC, 12/31/12 VA.

Variance Explanations

• Higher combined SAIFI and SAIDI due to greater amount of storms than expected.

• Current month lower GwH residential sales due to warmer than expected weather.

• YTD higher margins due to a combination of favorable weather and plant/system performance resulting in $19 million from favorable demand and energy revenue and production expenses, $6 million in ECR revenues and $3 million from the sale of excess generation. Margins also include net true-up adjustments of $6 million including KU's supply contracts with certain municipalities and the impact of the bonus depreciation extension.

• Current month lower O&M due to timing of $12 million in closure costs for the Cane Run steam units, $2 million due to timing for maintenance outages and $1 million lower labor and burden costs.

• YTD lower O&M due to timing of $12 million in closure costs for the Cane Run steam units, as costs budgeted for Q2 are now expected to be incurred in Q3, $3 million lower labor and burden costs, $3 million due to timing for maintenance outages, $1 million in uncollectible accounts and $1 million in material and consulting costs.

• Seven environmental events have occurred YTD. The events were a result of SO2, NOx, and CO exceedances at Mill Creek and Trimble County. All events were short timeframe limits which were exceeded and were all due to equipment malfunctions.

Major Developments

• LG&E and KU reached a unanimous settlement agreement with all of the parties in the base rate cases before the KPSC. Settlement discussions occurred on April 16-20, followed by the public evidentiary hearing on April 21. The agreement reflects a $125 million electric base rate increase for KU, and a $7 million gas base rate increase for LG&E. The proposed settlement does not establish a return on equity ("ROE") with respect to base rates; however, it does specify a 10 percent ROE to be utilized in LKE's environmental cost recovery and gas line tracker mechanisms. The agreed terms also include deferred cost recovery for a portion of pension and Green River costs. The settlement agreement remains subject to KPSC approval with a final order expected in the second quarter. If approved, the new rates will become effective July 1.

• Cane Run 7 continues to reach milestones in the commissioning process with both combustion turbines achieving full load operation. In addition, the steam turbine generator has been synchronized and has reached full load in a 1 on 1 configuration (only one combustion turbine in service to supply steam).

• The tie-in outages for the new wet flue gas desulfurization system and baghouses on Mill Creek units 1 and 2 have been completed as planned. In addition, the Ghent 1 baghouse tie-in outage was concluded ahead of schedule.

• LG&E and KU executed a four-year transportation agreement with Texas Gas for service related to the Bluegrass power purchase agreement. This represented the last condition precedent to the contract beginning on May 1. The agreement includes 165MWs of additional capacity from May 1, 2015 through April 30, 2019.

• The on-site portion of the SERC audit examining LKE's compliance with the NERC 693 Reliability Standards was completed in mid-April. SERC was complimentary of LKE's overall compliance culture, and indicated that there were no findings of any issues related to the audited requirements.

Significant Future Events

• The execution of LKE's construction plan continues in 2015. Cane Run 7 is expected to begin commercial operations during the second quarter. The Ghent 2, Trimble County 1 and Brown 3 fabric filter EPC contracts are underway as planned with tie-in outages projected for October. Site excavation work for the Brown Solar project has begun and the bid for the EPC contract will be issued in the second quarter.

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.
(3) The possible violation issue for YTD Actual is believed to be minimal risk.

Income Statement: Actual vs. Budget and Forecast (Month) — April 2015

($ Millions)

	MTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 198	$ 208	$ (11)	Due to lower energy volumes offset by lower fuel costs as shown below.

NERC Possible Violations[(3)]	0	1	2	1	N/A	7

Variance Explanations

• Current month lower SAIDI due to favorable weather conditions.

• Current month higher margins of $3 million in retail electric volumes (primarily residential) due to favorable weather and $3 million in ECR margins.

• YTD higher margins due to a combination of favorable weather and plant/system performance resulting in $24 million from favorable demand and energy revenue and $3 million from the sale of excess generation. ECR margins up $12 million with spending levels ahead of budget year to date.

• YTD lower capital expenditures due primarily due to delayed timing of Cane Run 7 spending of $16 million and $13 million in timing changes for the Ohio Falls Redevelopment project to later this year and the Trimble County Ignite Fuel project shifting to 2016. That lower spending was partially offset by the expected increase in environmental capital expenditures of $13 million.

• Current month lower O&M due to $2 million in lower labor and burden costs, $2 million lower other materials and consulting costs and $1 million due to lower storm restoration costs.

• YTD lower O&M due to timing of $10 million in closure costs for the Cane Run steam units, $5 million lower labor and burden costs, $3 million due to timing for maintenance outages, $6 million in lower materials and consulting costs and $1 million in uncollectible accounts.

• Nine environmental events have occurred YTD. Eight of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, a sulfuric acid spill occurred during May at Ghent.

Major Developments

• A historic milestone occurred as Cane Run 7 began commercial operation on June 19th. This marks the end of a construction period that saw more than 600 construction employees working on the project at its peak; an incident rate of 0.37, which is 90 percent better than the average for construction companies; and zero lost time incidents. The 640 MW facility is the state's first natural gas combined-cycle plant.

• The FERC audit examining LKE's transmission formula rates was completed in late May. Total additional billings (revenue) as a result of the audit were offset by refunds identified by LKE, resulting in an unfavorable net impact of only $0.5 million.

• Kentucky's gubernatorial race delivered a thrilling primary as Republican Matt Bevin finished with a razor-thin 83-vote lead over Agriculture Commissioner James Comer. Comer requested a recanvass which confirmed the results. Bevin will face Jack Conway in November's general election which assures that for the first time in 60 years, Kentucky will elect a governor from Louisville. In the race for attorney general, Democrat Andy Beshear was unopposed in the primary, while Whitney Westerfield defeated Michael Hogan for the Republican nomination.

Significant Future Events

• A final order on the rate case is still expected by the end of June.

• The execution of LKE's construction plan continues in 2015. The Ghent 2, Trimble County 1 and Brown 3 fabric filter EPC contracts are underway as planned with tie-in outages projected for October. Site excavation work for the Brown Solar project has begun and bids for the EPC contract were due on June 18.

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.
(3) The possible violation issues for YTD Actual is believed to be minimal risk.

NERC Possible Violations[3]	3	2	5	3	N/A	7

Variance Explanations

• YTD higher margins due to a combination of favorable weather and plant/system performance resulting in $22 million from favorable demand and energy revenue and $3 million from the sale of excess generation. ECR margins up $15 million with higher spending levels and DSM margins up $2 million due to higher lost sales revenue.

• Current month lower capital expenditures of $14 million due primarily to milestone shifts for the environmental air project at Trimble County, a credit related to liquidated damages for Cane Run 7 and delays in landfill construction for phase 1B at the Ghent Landfill.

• YTD lower capital expenditures of $39 million due primarily to decreased spend and test energy budgeted but not used at Cane Run, timing changes for the Ohio Falls Redevelopment project to later this year and the Trimble County Ignite Fuel project shifting to 2016. That lower spending was partially offset by higher spend on air compliance projects at Mill Creek.

• YTD lower O&M due to $7 million of lower labor and benefit costs, $6 million in lower materials and outside services, $4 million due to the timing of maintenance outages, $3 million of lower uncollectible accounts and $1 million of lower storm restoration costs.

• Twelve environmental events have occurred YTD. Ten of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, there was a sulfuric acid spill that occurred during May at Ghent and a oil spill into the Ohio River at Mill Creek in June due to equipment failure.

Major Developments

• As part of the commissioning process for the new Cane Run 7 combined cycle unit, LG&E retired the remaining Cane Run 4 and 5 steam units in June. Cane Run 6 was retired in March of this year to help facilitate transmission work for the new plant.

• The KPSC issued final orders in the LG&E and KU rate cases, approving the unanimous settlement agreement reached in April. The new rates were put into effect July 1. In addition to the Kentucky rate cases, Old Dominion Power, KU's operational unit in Virginia, also filed a request with the Virginia State Corporation Commission for an increase of $7.2 million (approximately 10 percent) in its base rates. If approved, the new rates will become effective April 1, 2016.

• LKE was recently honored with multiple awards from external organizations covering a variety of disciplines. LKE's communication initiatives continue to flourish as LKE earned 16 awards in various categories at the 2015 Better Communications Competition, surpassing its own record and all other utilities for the most awards. Most notably, the Company was recognized with the prestigious "Communicator of the Year" award for the second year in a row. In addition to LKE's communication achievements, LKE has recently earned a top-10 finish in the medium-sized category of Benchmark Portal's annual Top 100 Call Center Contest. This marks the second time in three years LKE has earned the distinction.

• The month of June resulted in very stormy weather conditions in Kentucky which has continued into July with almost daily storm activity. The system and our team have responded well in maintaining and restoring service in a timely and safe manner. LKE avoided significant outage events or system damage, with only 60,000 weather related customer outages occurring during the month.

Significant Future Events

• The Virginia State Corporation Commission Staff is expected to be on-site in late July for the audit related to the rate case discovery. The audit is consistent with past practice and our anticipated timeline.

• The execution of LKE's construction plan continues in 2015. The Ghent 2, Trimble County 1 and Brown 3 fabric filter EPC contracts are progressing well with tie-in outages on schedule for October. Mill Creek 3 wet flue gas desulfurization system and fabric filter EPC work is also well underway for mid-2016 completion. Lastly, site excavation work for the Brown Solar project has begun and bids for the EPC contract are under evaluation.

[1] Excludes goodwill and other purchase accounting adjustments.
[2] Net of cost recovery mechanisms.
[3] The possible violation issues for YTD Actual is believed to be minimal risk.

Income Statement: Actual vs. Budget (YTD) — June 2015

($ Millions)

	YTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 1,427	$ 1,409	$ 18	See Electric Margin variance explanation below.
Gas Revenues	188	200	(13)	See Gas Supply Expenses explanation below.
Total Revenues	1,615	1,610	5	
Cost of Sales:				
Fuel Electric Costs	470	482	12	Due to lower commodity costs primarily related to natural gas.
Gas Supply Expenses	98	110	13	Due to lower net purchases of $9 million and timing of pipeline demand charges of $5 million partially offset by less gas to storage activity of $3 million.
Purchased Power	26	30	4	
Other Electric Cost	62	72	10	Due to lower ECR expense of $5 million, scrubber reactant expense of $3 million and DSM expense of $2 million.
Total Cost of Sales	656	694	39	
Gross Margin:				
Electric Margin	869	825	44	Due to a combination of favorable weather and plant/system performance resulting in $22 million from favorable demand and energy revenue and $3 million from the sale of excess generation. ECR margins up $15 million with higher spending levels and DSM margins up $2 million due to higher lost sales revenue.
Gas Margin	90	90	(0)	
Total Gross Margin	959	915	44	
Operating Expenses:				
O&M	375	396	21	Due to $7 million of lower labor and benefit costs, $6 million in lower materials and outside services, $4 million due to the timing of maintenance outages, $3 million of lower uncollectible accounts and $1 million of lower storm restoration costs.
Depreciation & Amortization	173	178	5	Due to the timing of retirement and in service dates related to Cane Run units and other project completion updates.
Taxes, Other than Income	27	28	1	
Total Operating Expenses	575	601	27	
Other income (expense)	(1)	(4)	2	
EBIT	383	310	73	
Interest Expense	85	88	3	
Income from Ongoing Operations before income taxes	298	222	76	
Income Tax Expense	113	83	(30)	Due to higher pre-tax income.
Net Income (loss) from ongoing operations	**185**	**139**	**$ 46**	
Non Operating Income	(8)	-	(8)	Due to valuation allowance recorded for tax credits that will not be utilized as a result of the bonus depreciation extension.
Discontinued Operations	0	(0)	0	
Net Income (loss)	$ 177	$ 139	$ 38	
KY Regulated Financing Costs	(17)	(17)	(0)	
KY Regulated Net Income	$ 160	$ 122	$ 38	
Earnings Per Share	$ 0.25	$ 0.18	$ 0.07	

Note: Schedules may not sum due to rounding.

Income Statement: Forecast vs. Prior Forecast & Budget — June 2015

($ Millions)

Balance Sheet — June 2015

($ Millions)

	6/30/2015	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 13	$ 16	$ (2)	
Accounts Receivable (Trade)	378	418	(40)	Lower customer accounts receivable ($29m) and accrued utility revenue ($12m).
Inventory	249	256	(6)	
Deferred Income Taxes	42	16	26	Due to NOL utilization during the 1st half of 2016 of $20m and an intercompany transfer related to allocations from PPL of $5m.
Regulatory Assets Current	24	32	(8)	
Prepayments and other current assets	49	181	(132)	Primarily due to lower income tax receivable due to tax settlement from PPL which is budgeted in accrued taxes below.
Total Current Assets	756	919	(163)	
Property, Plant, and Equipment	11,033	10,899	134	
Intangible Assets	148	149	(0)	
Other Property and Investments	1	1	(0)	
Regulatory Assets Non Current	623	661	(38)	
Goodwill	997	997	0	
Other Long-term Assets	90	103	(13)	Primarily due to return of collateral as a result of update of credit rating from S&P ($12m).
Total Assets	**$ 13,648**	**$ 13,728**	**$ (80)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 353	$ 350	$ 4	Due to reclassification of retainage related to CR7 project from long-term to short-term of $38m partially offset by change in budgeted Accounts Payable for timing of payments ($42m).
Dividends Payable to Affiliated Companies	-	-	-	
Customer Deposits	52	52	(0)	
Derivative Liability	50	71	(21)	Due to higher than expected interest rates on interest rate swaps.
Accrued Taxes	59	195	(137)	See Prepayments and other current assets explanation above.
Regulatory Liabilities Current	27	12	14	Higher balance primarily due to timing related DSM programs of $9m and over-recovery of fuel costs during Q2 related to FAC of $4m.
Other Current Liabilities	139	138	0	
Total Current Liabilities	679	819	(139)	
Debt - Affiliated Company	59	61	(2)	
Debt [1]	5,128	5,208	(79)	
Total Debt	5,188	5,269	(81)	
Deferred Tax Liabilities	1,406	1,352	54	
Investment Tax Credit	129	129	0	
Accum Provision for Pension & Related Benefits	274	262	12	
Asset Retirement Obligation	437	281	156	Primarily due to revalued ARO's to reflect updates in the estimated cash flows for ash and environmental ponds of $162m as a result of the enactment of the Coal Combustion Residuals (CCR) Rule.
Regulatory Liabilities Non Current	951	943	8	
Derivative Liability	40	43	(3)	
Other Liabilities	215	268	(52)	Due to reclassification of retainage related to CR7 project from long-term to short-term ($38m), decrease in post-retirement liability due to roll forward of participant census data and VEBA contributions ($21m) partially offset by increased post-retirement and post-employment expense of $5m.
Total Deferred Credits and Other Liabilities	3,452	3,278	174	
Equity	4,329	4,363	(34)	
Total Liabilities and Equity	**$ 13,648**	**$ 13,728**	**$ (80)**	

[1] Includes all ST and LT debt. See Financing Activities page for details.
Note: Schedules may not sum due to rounding.

YTD	Actual	Budget	Variance	Comments
Net Income	177	139	38	Due to higher gross margin and lower O&M partially offset by higher taxes. See Income Statement.
Depreciation	201	205	(4)	
Deferred Income Taxes	145	107	38	Primarily due to the impact of the bonus depreciation extension partially offset by increased utilization of NOL's.
Other Balance Sheet Movements	91	111	(20)	Budget does not include non cash effect of regulatory over/under accrual adjustments.
Funds From Operations	**615**	**562**	**52**	
Changes in accounts receivables	25	(14)	39	Primarily due to a decrease in unbilled revenue and customer accounts receivable related to lower volumes driven by seasonality.
Changes in inventories	54	54	0	
Change in Accounts Payable	10	(64)	74	Budget does not remove the effect of the capital expenditures accrual which is reflected in actuals.
Change in Working Capital	**89**	**(24)**	**113**	
Operating Cash flow	**703**	**538**	**166**	
Capex	(630)	(602)	(29)

Combined KU and LG&E ROE June 2015

KU and LG&E Combined

Reconciliation of Allowed Return to

12 months ended Jun-2015 Regulatory Return

and ROE from Ongoing Operations

Allowed Return [1]		10.28%	
Adjustments (net of tax):			
Change in capitalization - non mechanism	-2.00%		Growth in non-mechanism capitalization (rate base) between rate cases does not earn a return
Change in ROE from average mechanism rate base growth	0.00%		Mechanisms have a real-time return
Change in weighted cost of debt	-0.25%		Additional borrowings offset by favorable rates
Change in margins	2.49%		Primarily new rates since last rate cases
Change in allowed expenses	-1.54%		Inflationary increases
		-1.30%	
Actual Regulated ROE		8.99%	

(1) Based on the most recent base rate filings with test years ending 3/31/12 KPSC, 12/31/13 FERC, 12/31/12 VA.

Environmental Events	3	0	15	8	N/A	9
NERC Possible Violations[(3)]	0	1	5	4	N/A	7

Variance Explanations

• Current month lower margins driven by mild weather resulting in lower sales volumes and $9 million lower demand and energy revenues.

•YTD higher margins due to a combination of favorable weather and plant/system performance earlier in the year resulting in $13 million favorable demand and energy revenue and $3 million from the sale of excess generation. ECR margins up $17 million with higher spending levels and other adjustments.

• Current month lower capital expenditures of $45 million due primarily to planned spending related to the Paddy's Run gas pipe line and Dix Dam leakage projects being moved to 2016 and milestone shifts for the environmental air projects at Ghent and Trimble County.

• YTD lower capital expenditures of $84 million due primarily to decreased spend and test energy budgeted but not used at Cane Run, timing changes for the Ohio Falls Redevelopment project to later this year and planned spending related to the Paddy's Run gas pipe line and Dix Dam leakage projects being moved to 2016.

• YTD lower O&M due to $11 million lower labor and burden costs, $6 million in lower materials and consulting costs, $4 million due to timing for maintenance outages and $3 million in uncollectible accounts partially offset by $1 million higher storm restoration costs.

• Fifteen environmental events have occurred YTD. Thirteen of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, there was a sulfuric acid spill that occurred during May at Ghent and a oil spill into the Ohio River at Mill Creek in June due to equipment failure.

Major Developments

• July marks the second consecutive month that LKE has responded to numerous severe weather events bringing strong winds and lightning. These conditions resulted in approximately 160,000 outages. At times, restoration efforts were further complicated by heat indexes above 100 degrees, and repeated downpours across the various service areas. The system and our team have responded well in maintaining and restoring service in a timely and safe manner.

• LKE is evaluating the impact of the EPA's Clean Power Plan which limits greenhouse gas emissions from power plants. The final emission limit for Kentucky to occur by 2030 is 31 percent below actual emissions (tons) in 2014, and 27 percent below the KY emission rate (pounds/mwh) in the proposed regulation. States must submit its individual compliance plans to meet the new goals by 2018.

Significant Future Events

• The discovery phase continues for the Virginia rate case with an informal hearing scheduled for December 14, 2015.

• The Ghent 2, Trimble County 1 and Brown 3 fabric filter EPC contracts are progressing well with tie-in outages on schedule for October. Mill Creek 3 wet flue gas desulfurization system and fabric filter EPC work is also well underway for mid-2016 completion. Lastly, site excavation work for the Brown Solar project continues and bids for the EPC contract are under evaluation.

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.
(3) The possible violation issues for YTD Actual is believed to be minimal risk.

Income Statement: Actual vs. Budget and Forecast (Month) — July 2015

Balance Sheet

July 2015

($ Millions)

	7/31/2015	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 12	$ 16	$ (4)	
Accounts Receivable (Trade)	398	418	(21)	
Inventory	252	258	(7)	
Deferred Income Taxes	42	16	26	Due to NOL utilization during the 1st half of 2016 of $20m and an intercompany transfer related to allocations from PPL of $5m.
Regulatory Assets Current	25	39	(14)	Due to lower balances related to GSC ($7 million) and FAC ($9 million) mechanisms partially offset by higher ECR balance ($3 million).
Prepayments and other current assets	45	185	(140)	Lower income tax receivable due to tax settlement from PPL which is budgeted in accrued taxes below.
Total Current Assets	774	933	(159)	
Property, Plant, and Equipment	11,072	10,983	89	
Intangible Assets	144	144	(0)	
Other Property and Investments	1	1	-	
Regulatory Assets Non Current	666	660	6	
Goodwill	997	997	-	
Other Long-term Assets	90	104	(14)	Primarily due to return of collateral as a result of update of credit rating from S&P ($12m).
Total Assets	**$ 13,744**	**$ 13,822**	**$ (78)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 326	$ 354	$ (28)	
Dividends Payable to Affiliated Companies	-	-	-	
Customer Deposits	51	52	(0)	
Derivative Liability	86	71	15	Due to lower than expected interest rates on interest rate swaps.
Accrued Taxes	89	229	(139)	See Prepayments and other current assets explanation above.
Regulatory Liabilities Current	30	12	18	Higher balance primarily due to timing related DSM programs of $10m and over-recovery of fuel costs related to FAC of $7m.
Other Current Liabilities	156	153	3	
Total Current Liabilities	740	871	(131)	
Debt - Affiliated Company	59	60	(1)	
Debt [(1)]	5,118	5,208	(90)	
Total Debt	5,177	5,268	(91)	
Deferred Tax Liabilities	1,406	1,352	54	
Investment Tax Credit	129	129	0	
Accum Provision for Pension & Related Benefits	276	263	13	
Asset Retirement Obligation	438	282	156	Primarily due to revalued ARO's to reflect updates in the estimated cash flows for planned pond closures of $162m as a result of the enactment of the Coal Combustion Residuals (CCR) Rule.
Regulatory Liabilities Non Current	946	936	10	
Derivative Liability	42	43	(1)	
Other Liabilities	218	268	(51)	Primarily due to reclassification of retainage related to CR7 project from long-term to short-term ($38m) and a decrease in post-retirement liability due to roll forward of participant census data and VEBA contributions ($21m).
Total Deferred Credits and Other Liabilities	3,455	3,274	181	
Equity	4,372	4,409	(37)	
Total Liabilities and Equity	**$ 13,744**	**$ 13,822**	**$ (78)**	

(1) Includes all ST and LT debt. See Financing Activities page for details.

Environmental Events	0	1	15	9	N/A	9
NERC Possible Violations[(3)]	1	1	6	5	N/A	7

Variance Explanations

• Current month lower margins driven by unseasonably mild weather leading to lower sales volumes resulting in $15 million lower retail electric base energy revenues.

•YTD higher margins primarily due to higher ECR margins of $17 million resulting from greater spending levels and other adjustments and $3 million from the sale of excess generation.

• YTD lower capital expenditures of $92 million due primarily to decreased spend and test energy budgeted but not used at Cane Run, delayed spending on several projects until later this year and planned timing shifts related to the Paddy's Run gas pipe line and Dix Dam leakage projects being moved to 2016.

• YTD lower O&M due to $15 million lower labor and burden costs, $5 million in lower materials and consulting costs, $4 million due to timing for maintenance outages, $3 million in lower uncollectible accounts and $2 million in lower other A&G expenses partially offset by $1 million higher storm restoration costs.

• Fifteen environmental events have occurred YTD. Thirteen of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, there was a sulfuric acid spill that occurred during May at Ghent and a oil spill into the Ohio River at Mill Creek in June due to equipment failure.

Major Developments

• In both Louisville and Lexington, August 2015 ranked as the third coolest in the past 20 years driving retail electric sales volumes for LG&E and KU down 9% below budget.

• Upon completion of the competitive bid process, the Company awarded the Brown Solar Facility EPC contract to AMEC and expect to execute the contract in late September. AMEC is also the contractor for the Trimble County 1 and Brown 3 baghouse projects. The 10 MW project will be the largest utility scale solar PV facility in Kentucky, and is expected to be in service before the end of 2016.

• KU filed a settlement agreement with FERC to resolve the 2013 rate case with the departing municipal customers. The rate formulas are identical to those agreed to with the two remaining municipal customers except for ROE, using 10.25% instead of 10%. One small issue related to an interruptible provision and credit for one of the departing municipals remains open and will proceed to litigation.

Significant Future Events

• The discovery phase continues for the Virginia rate case with an informal hearing scheduled for December 14, 2015.

• The Ghent 2, Trimble County 1 and Brown 3 fabric filter EPC contracts are progressing well with tie-in outages on schedule for October. Mill Creek 3 wet flue gas desulfurization system and fabric filter EPC work is also well underway for mid-2016 completion. Lastly, site prep and soil excavation for the Brown Solar project is nearing completion.

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.
(3) The possible violation issues for YTD Actual is believed to be minimal risk.

Income Statement: Actual vs. Budget (YTD) — August 2015

($ Millions)

	YTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 1,954	$ 1,997	$ (43)	Due to lower volumes and prices driven by unseasonably mild weather.
Gas Revenues	212	226	(14)	See Gas Supply Expenses explanation below.
Total Revenues	2,166	2,224	(58)	
Cost of Sales:				
Fuel Electric Costs	630	675	45	Due to a combination of lower volumes and lower commodity costs for natural gas.
Gas Supply Expenses	105	118	13	Due to lower net purchases of $17 million, timing of net exchange gas of $4 million and timing of pipeline demand charges of $2 million partially offset by less gas to storage activity of $9 million.
Purchased Power	36	42	6	Lower purchased power due to mild weather.
Other Electric Cost	87	101	14	Due to lower ECR expense of $7 million, scrubber reactant expense of $5 million and DSM expense of $3 million.
Total Cost of Sales	858	935	78	
Gross Margin:				
Electric Margin	1,202	1,180	21	Primarily due to higher ECR margins of $17 million resulting from greater spending levels and other adjustments and $3 million from the sale of excess generation.
Gas Margin	107	108	(1)	
Total Gross Margin	1,309	1,289	20	
Operating Expenses:				
O&M	488	517	29	Lower O&M due to $15 million lower labor and burden costs, $5 million in lower materials and consulting costs, $4 million due to timing for maintenance outages, $3 million in lower uncollectible accounts and $2 million in lower other A&G expenses partially offset by $1 million higher storm restoration costs.
Depreciation & Amortization	231	237	6	Lower depreciation expense primarily due to the timing of retirement and in service dates related to Cane Run units and other project completion updates.
Taxes, Other than Income	36	37	1	
Total Operating Expenses	754	791	37	
Other income (expense)	(3)	(5)	1	
EBIT	551	493	58	
Interest Expense	113	117	3	
Income from Ongoing Operations before income taxes	438	376	62	
Income Tax Expense	166	142	(23)	Due to higher pre-tax income.
Net Income (loss) from ongoing operations	**272**	**234**	**$ 38**	
Non Operating Income	(8)	-	(8)	Due to valuation allowance recorded for tax credits that will not be utilized as a result of the bonus depreciation extension.
Discontinued Operations	0	(0)	0	
Net Income (loss)	$ 264	$ 234	$ 31	
KY Regulated Financing Costs	(23)	$ (23)	(0)	
KY Regulated Net Income	$ 241	$ 211	$ 30

Balance Sheet

August 2015

($ Millions)

	8/31/2015	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 26	$ 16	$ 10	Due to timing of cash receipts.
Accounts Receivable (Trade)	396	424	(28)	
Inventory	258	262	(3)	
Deferred Income Taxes	44	16	29	Due to NOL utilization during the 1st half of 2016 of $20m and an intercompany transfer related to allocations from PPL of $5m.
Regulatory Assets Current	26	43	(17)	Due to lower balances related to GSC ($6 million) and FAC ($11 million) mechanisms.
Prepayments and other current assets	41	183	(142)	Primarily related to lower income tax receivable due to tax settlement from PPL which is budgeted in accrued taxes below.
Total Current Assets	793	944	(151)	
Property, Plant, and Equipment	11,122	11,041	82	
Intangible Assets	140	140	(0)	
Other Property and Investments	1	1	-	
Regulatory Assets Non Current	668	658	9	
Goodwill	997	997	-	
Other Long-term Assets	91	104	(13)	Primarily due to return of collateral as a result of update of credit rating from S&P ($12m).
Total Assets	**$ 13,812**	**$ 13,886**	**$ (74)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 296	$ 355	$ (59)	Decreases in project engineering accruals ($57m).
Dividends Payable to Affiliated Companies	48	-	48	Dividend payable $48m issued to PPL based on Q2 2015 net income.
Customer Deposits	51	52	(1)	
Derivative Liability	87	71	15	Due to lower than expected interest rates on interest rate swaps.
Accrued Taxes	159	264	(105)	Due to income tax settlement (see Prepayments and other current assets explanation above) partially offset by 2014 tax return true-ups of $39m.
Regulatory Liabilities Current	29	12	17	Higher balance primarily due to timing related DSM programs of $9m and over-recovery of fuel costs related to FAC of $7m.
Other Current Liabilities	160	167	(6)	
Total Current Liabilities	830	920	(90)	
Debt - Affiliated Company	60	60	1	
Debt [1]	5,139	5,177	(38)	
Total Debt	5,199	5,236	(37)	
Deferred Tax Liabilities	1,371	1,352	19	
Investment Tax Credit	129	129	0	
Accum Provision for Pension & Related Benefits	274	264	10	
Asset Retirement Obligation	439	283	156	Primarily due to revalued ARO's to reflect updates in the estimated cash flows for planned pond closures of $162m as a result of the enactment of the Coal Combustion Residuals (CCR) Rule.
Regulatory Liabilities Non Current	942	931	12	
Derivative Liability	42	43	(1)	
Other Liabilities	217	269	(52)	Primarily due to reclassification of retainage related to CR7 project from long-term to short-term ($38m) and a decrease in post-retirement liability due to roll forward of participant census data and VEBA contributions ($21m).
Total Deferred Credits and Other Liabilities	3,414	3,271	142	
Equity	4,369	4,458	(89)	
Total Liabilities and Equity	**$ 13,812**	**$ 13,886**	**$ (74)**	

[1] Includes all ST and LT debt. See Financing Activities page for details.

Variance Explanations

• Current month lower margins due to a combination of lower residential sales volumes resulting in $3 million lower retail electric base energy revenues and $3 million lower DSM revenues.

•YTD higher margins primarily due to higher ECR margins of $17 million resulting from greater spending levels and other adjustments, $3 million from the sale of excess generation, $3 million from lower cost of production margin expenses and $3 million from higher transmission revenues partially offset by $8 million lower retail electric base energy and demand revenues, $2 million lower DSM revenues and $2 million lower gas margins.

•Current month lower capital expenditures of $15 million primarily due to permitting delays or timing shifts at Trimble County and Ghent, respectively, related to environmental projects.

• YTD lower capital expenditures of $106 million due primarily to decreased spend and test energy budgeted but not used at Cane Run, delayed spending on several projects until later this year and planned timing shifts related to the Paddy's Run gas pipe line and Dix Dam leakage projects being moved to 2016.

• YTD lower O&M due to $18 million lower labor and burden costs, $4 million due to timing and other savings for maintenance outages, $3 million in lower materials and consulting costs, $3 million in lower uncollectible accounts and $3 million in lower other expenses.

• Fifteen environmental events have occurred YTD. Thirteen of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, there was a sulfuric acid spill that occurred during May at Ghent and a oil spill into the Ohio River at Mill Creek in June due to equipment failure.

Major Developments

• Green River Units 3 and 4 were officially retired just before midnight on September 30. This marks the completion of LKE's plan to retire 800 MW of coal-fired generation. Tyrone Station was retired in 2013, and Cane Run Units 4,5, and 6 were retired earlier this year. All associated operating and shutdown costs between July 1, 2015, and the plant's retirement have been recorded as a regulatory asset to be recovered over a 3-year period pursuant to KU's rate case order.

• LG&E priced $550 million and KU priced $500 million of first mortgage bonds on September 21. LG&E issued $300 million of 10-year bonds at 3.30% and $250 million of 30-year bonds at 4.375%. KU issued $250 million of 10-year bonds and $250 million of 30-year bonds at the same levels as LG&E. There was strong demand for the bonds and pricing was very tight to treasuries. Proceeds will be used to fund maturing first mortgage bonds and other general corporate purposes.

• On September 25, 2015, an electrician working for KBR, Inc. was fatally injured while performing work on the environmental air compliance project at KU's Ghent Generating Station. The worker was operating an aerial work platform and moved the platform into a position which pinned him between the platform's control panel and a beam approximately twenty-five feet off the ground. Work was immediately shut down at the site, and comprehensive safety meetings were initiated for all employees at the location. No co-workers witnessed the incident. The incident investigation is ongoing. As you know, we take our commitment to safety very seriously, and a loss like this is felt throughout our workforce and among our business partners.

• Brown Unit 3 and Ghent Unit 2 have started outages to facilitate the tie-in of their baghouse projects. Trimble County Unit 1 is also expected to start its outage in mid-October. These tie-in outages signify the final stages involved in the completion of the 2011 ECR Plans, with the exception of the Mill Creek 3 wet flue gas scrubber and baghouse project, which is progressing toward an April 2016 tie-in outage. Site prep and soil excavation for the Brown Solar project has also been completed.

• J.D. Power released its '2015 Gas Utility Residential Customer Satisfaction Study'. LG&E and Duke Energy tied for the second highest score (668) among 14 companies in the Midwest Midsize Segment. The results were particularly impressive in light of our base rate case and the potentially disruptive construction activity associated with our replacement programs.

Significant Future Events

• The discovery phase continues for the Virginia rate case with an informal hearing scheduled for December 14, 2015.

• Construction of the Brown Solar project is expected to take place over the next six months with mobilization beginning in November. The facility is expected to be commercially operational by late spring of 2016.

[1] Full year forecast amount shown represents target.
[2] Excludes goodwill and other purchase accounting adjustments.
[3] Net of cost recovery mechanisms.
[4] The possible violation issues for YTD Actual is believed to be minimal risk.

Total Gross Margin	1,470	1,456	14	
Operating Expenses:				
O&M	548	580	32	Lower O&M due to $18 million lower labor and burden costs, $4 million due to timing and other savings for maintenance outages, $3 million in lower materials and consulting costs, $3 million in lower uncollectible accounts and $3 million in lower other expenses.
Depreciation & Amortization	259	267	8	Lower depreciation primarily due to the timing of retirement and in service dates related to Cane Run units as well as other project completion updates.
Taxes, Other than Income	40	42	2	
Total Operating Expenses	847	888	41	
Other income (expense)	(4)	(5)	1	
EBIT	619	563	56	
Interest Expense	128	131	3	
Income from Ongoing Operations before income taxes	491	432	59	
Income Tax Expense	186	163	(23)	Due to higher pre-tax income.
Net Income (loss) from ongoing operations	**305**	**269**	**$ 36**	
Non Operating Income	(8)	-	(8)	Due to valuation allowance recorded for tax credits that will not be utilized as a result of the bonus depreciation extension.
Discontinued Operations	0	(0)	0	
Net Income (loss)	$ 297	$ 268	$ 29	
KY Regulated Financing Costs	(25)	$ (25)	(0)	
KY Regulated Net Income	$ 272	$ 243	$ 29	
Earnings Per Share	$ 0.41	$ 0.36	$ 0.05

Income Statement: Forecast vs. Prior Forecast & Budget — September 2015

($ Millions)

	Full Year				Full Year			
	Q3 Forecast	Q2 Forecast	Variance	Comments	Q3 Forecast	Budget	Variance	Comments
Revenues:								
Electric Revenues	$ 2,873	$ 2,941	$ (68)	Due to lower fuel cost recoveries as shown below, along with lower than budgeted base energy revenues primarily during this summer. Remaining forecast also includes potential load and weather uncertainty.	$ 2,873	$ 2,976	$ (103)	Due to lower fuel cost recoveries as shown below, along with a difference in the budgeted distribution of rate case revenue versus actual tariffs for demand and energy revenues. Lastly, the forecast also includes potential load and weather uncertainty.
Gas Revenues	323	328	(5)		323	340	(17)	See Gas Supply Expense explanation below.
Total Revenues	3,196	3,269	(72)		3,196	3,317	(120)	
Cost of Sales:								
Fuel Electric Costs	911	960	49	Due to a combination of lower volumes for coal and lower commodity costs for natural gas.	911	980	69	Due to a combination of lower volumes for coal and lower commodity costs for natural gas.
Gas Supply Expenses	160	164	4		160	175	16	Due to lower GSC of $18 million partially offset by higher GLT expense of $3 million.
Purchased Power	54	57	3		54	66	12	Lower purchased power due to mild weather.
Other Electric Cost	137	143	6		137	156	19	Due to lower ECR expense of $12 million and scrubber reactant expense of $7 million.
Total Cost of Sales	1,261	1,323	62		1,261	1,377	116	
Gross Margin:								
Electric Margin	1,772	1,781	(10)	Primarily related to lower Electric Revenues. See explanation above.	1,772	1,774	(3)	
Gas Margin	164	164	(0)		164	165	(1)	
Total Gross Margin	1,935	1,945	(10)		1,935	1,939	(4)	
Operating Expenses:								
O&M	745	750	5		745	767	22	Lower O&M due to $15 million lower labor and burden costs, $6 million due to timing and other savings for maintenance outages and $7 million in lower other expenses partially offset by $7 million in higher materials and consulting costs.
Depreciation & Amortization	345	350	5		345	356	11	Due to the timing of retirement and in service dates related to Cane Run units and other project completion updates.
Taxes, Other than Income	54	54	0		54	55	2

KU and LG&E Combined

Reconciliation of Allowed Return to

12 months ended Sep-2015 Regulatory Return

and ROE from Ongoing Operations

Allowed Return [(1)]		10.23%	
Adjustments (net of tax):			
Change in capitalization - non mechanism	-2.13%		Growth in non-mechanism capitalization (rate base) between rate cases does not earn a return
Change in ROE from average mechanism rate base growth	0.00%		Mechanisms have a real-time return
Change in weighted cost of debt	-0.25%		Additional borrowings offset by favorable rates
Change in margins	3.27%		Primarily new rates based on last rate cases
Change in allowed expenses	-1.60%		Inflationary increases
		-0.72%	
Actual Regulated ROE		9.51%	

(1) Based on the most recent base rate filings with test years ending 6/30/16 KPSC, 12/31/13 FERC, 12/31/12 VA.

Note: The allowed return is a blended rate of the previous authorized ROE of 10.25% before 7/1/15 and from the settlement for TYE 6/30/16 which did not provide a specific return on equity with respect to base rates; however, the average customer's monthly bill will reflect an authorized 10 percent return on equity investment related to the environmental cost recovery mechanism and the gas line tracker mechanism.

Variance Explanations

• YTD higher margins primarily due to higher ECR margins of $18 million resulting from greater spending levels and other adjustments, $4 million from lower cost of production margin expenses, $3 million from the sale of excess generation and $3 million from higher transmission revenues partially offset by $16 million lower retail electric base service, energy and demand revenues and $3 million lower DSM revenues.

• Current month higher capital expenditures of $13 million primarily due to electric distribution projects related to new business, reliability and repair and replacement of equipment as well as other transmission and environmental projects.

• YTD lower capital expenditures of $93 million due primarily to decreased spend and test energy budgeted but not used at Cane Run and timing shifts related to the Paddy's Run gas pipe line, Dix Dam leakage project and environmental projects at Ghent and Trimble County. Remaining Q4 capital projections include increased spending as a result of earlier timing delays for several environmental, plant outage and system reliability projects that will bring overall spend levels closer to the original budget.

• YTD lower O&M due to $19 million lower labor and burden costs, inclusive of regulatory accounting changes from the KY rate case, $4 million due to timing and other savings for maintenance outages, $5 million in lower materials and consulting costs, $3 million in lower uncollectible accounts and $5 million in lower other expenses.

• Fifteen environmental events have occurred YTD. Thirteen of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, there was a sulfuric acid spill that occurred during May at Ghent and a oil spill into the Ohio River at Mill Creek in June due to equipment failure.

Major Developments

• LG&E and KU improved its position in the third quarter Residential Customer Satisfaction survey as it moved from third place to second place. LG&E and KU achieved a “top two box” score of 57 percent which represents its highest score since 2010. The Company's score also ranks only slightly below top performer MidAmerican's score of 60 percent.

• The Sixth Circuit Court of Appeals issued its opinion finding that the state tort claims (seeking compensatory damages) in the Cane Run lawsuit are not preempted by the Clean Air Act. As a result, this matter has been sent back to the United States District Court for further proceedings on those claims. We are evaluating the possibility of further appeals or going back to district court to challenge class certification.

•LG&E and KU have signed on to a proposed settlement among all parties in the dispute among MISO, SPP and other regional parties relating to power flows and other effects on neighboring transmission systems of MISO's Midwest and South interconnection practices. Pursuant to the settlement, MISO will agree to specified MW limits on such flows, compensate affected systems for certain flows in excess of such limits, and implement other coordination steps. The agreement initially covers a 2014-2021 period. Depending on actual MISO usage, LG&E and KU may receive approximately $6M in net present value of payments during the agreement's term, and also see a reduction in certain transmission planning/reliability uncertainties related to MISO's former practices. The settlement is subject to FERC approval.

•Chairman David Armstrong resigned from the KPSC in October 2015. Armstrong joined the KPSC in 2008, and had been serving beyond the June 30, 2015 expiration of his term. Governor Steve Beshear appointed Vice Chairman James Gardner to Chairman, and Commissioner Daniel Logsdon to Vice Chairman, respectively. Both appointments are subject to senate confirmation when the Kentucky General Assembly reconvenes in January 2016. A vacancy remains on the three-member Commission.

Significant Future Events

• Regarding its Virginia rate case, the Company is currently engaged in the discovery process and a settlement conference with VSCC Staff is scheduled for November 23, 2015. A public hearing has also been scheduled for December 14, 2015. Subject to regulatory review and approval, new rates would become effective April 1, 2016.

• Construction of the Brown Solar project is expected to take place over the next six months with mobilization beginning in November. The facility is expected to be commercially operational by late spring of 2016.

(1) Full year forecast amount shown represents target.
(2) Excludes goodwill and other purchase accounting adjustments.
(3) Net of cost recovery mechanisms.
(4) The possible violation issues for YTD Actual is believed to be minimal risk.

Gas Supply Expenses	160	164	4		160	175	16	Due to lower GSC of $18 million partially offset by higher GLT expense of $3 million.
Purchased Power	54	57	3		54	66	12	Lower purchased power due to mild weather.
Other Electric Cost	137	143	6		137	156	19	Due to lower ECR expense of $12 million and scrubber reactant expense of $7 million.
Total Cost of Sales	1,261	1,323	62		1,261	1,377	116	
Gross Margin:								
Electric Margin	1,771	1,781	(10)	Primarily related to lower Electric Revenues. See explanation above.	1,771	1,774	(3)	
Gas Margin	164	164	(0)		164	165	(1)	
Total Gross Margin	1,935	1,945	(10)		1,935	1,939	(4)	
Operating Expenses:								
O&M	745	750	5		745	767	22	Lower O&M due to $15 million lower labor and burden costs, $6 million due to timing and other savings for maintenance outages and $7 million in lower other expenses partially offset by $7 million in higher materials and consulting costs.
Depreciation & Amortization	346	350	4		346	356	10	Due to the timing of retirement and in service dates related to Cane Run units and other project completion updates.
Taxes, Other than Income	54	54	0		54	55	2	
Total Operating Expenses	1,145	1,154	9		1,145	1,179	34	
Other income (expense)	(5)	(4)	(1)		(5)	(6)	1	
EBIT	785	788	(3)		785	754	30	
Interest Expense	182	184	2		182	186	5	
Income from Ongoing Operations before income taxes	603	604	(1)		603	568	35	
Income Tax Expense	228	229	1		228	215	(13)	Due to higher pre-tax income.
Net Income (loss) from ongoing operations	**375**	**$ 375**	**$ 0**		**$ 375**	**$ 353**	**$ 22**	
Non Operating Income	(12)	(8)	(4)	Due to valuation allowance recorded for tax credits that will not be utilized as a result of the bonus depreciation extension.	(12)	-	(12)	Due to valuation allowance recorded for tax credits that will not be utilized as a result of the bonus depreciation extension.
Discontinued Operations	0	0	0		0	(0)	0	
Net Income (loss)	$ 363	$ 367	$ (4)		$ 363	$ 353	$ 10	
KY Regulated Financing Costs	(33)	(33)	-		(33)	(33)	-	
KY Regulated Net Income	$ 330	$ 333	$ (4)		$ 330	$ 320	$ 10	
Earnings Per Share	$ 0.49	$ 0.49	$ (0.01)		$ 0.49	$ 0.47	$ 0.01

Environmental Events	0	0	15	9	N/A	9
NERC Possible Violations[4]	0	0	7	7	N/A	7

Variance Explanations

• Current month lower margins driven by warmer than normal weather resulting in $6 million lower retail electric energy and demand revenues which were partially offset by $2 million higher gas margins.

• YTD lower O&M due to $20 million lower labor and burden costs, including the deferred cost recovery of certain pension and operating expenses as a result of the rate case settlement, $7 million due to timing and other savings for maintenance outages, $3 million in lower uncollectible accounts, $2 million in lower materials and consulting costs and $2 million in lower other expenses.

• Fifteen environmental events have occurred YTD. Thirteen of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, there was a sulfuric acid spill that occurred during May at Ghent and a oil spill into the Ohio River at Mill Creek in June due to equipment failure.

Major Developments

• The Company reached a settlement in KU's Virginia rate case. The settlement provides for an annual revenue increase of approximately $6 million (77% of the original request). Upon regulatory approval, rates will be effective February 15, 2016, nearly two months earlier than would have been possible absent a settlement. While a "black box" settlement with no stated return on equity, the settlement provides for an ROE range of 9.5% to 10.5% for annual financial filings and earnings tests.

• The new baghouses for Brown Unit 3 and Ghent Unit 2 were placed into service.

• LG&E and KU have taken another step in the solar market with the intent of offering business and industrial customers individual, renewable generation facilities. The Utilities issued a request for information ("RFI") to contractors with expertise in solar generation design and construction. The RFI will provide facts about the vendors' services, representative costs, and experience so that the Utilities can develop offerings to support their customers' desire for solar energy. LG&E and KU will own and operate the facilities, which will likely range in size from 30 kilowatts to 5 megawatts with each project subject to approval by the KPSC.

• LG&E and KU filed requests with the KPSC to allow the Companies to own and operate electric vehicle charging stations within its service territories. Each utility is requesting approval to install 10 charging stations at different locations for public access. LG&E and KU are also seeking approval to offer business customers an option to host the stations under a five-year commitment. Under the proposed filing, the entire cost of the charging stations, including maintenance, installation and energy usage, will be paid by those who request the stations or the users of the charging service. Currently, there are about 30 public charging stations in Kentucky, 19 of which are located in LKE service territories.

Significant Future Events

• The Trimble County Unit 1 baghouse is scheduled to be in-service by the end of December.

• Construction of the Brown Solar project is underway and the facility is expected to be commercially operational by late spring of 2016.

(1) Full year forecast amount shown represents target.
(2) Excludes goodwill and other purchase accounting adjustments.
(3) Net of cost recovery mechanisms.
(4) The possible violation issues for YTD Actual is believed to be minimal risk.

Variance Explanations

• Current month lower margins driven by warmer than normal weather resulting in $17 million lower retail electric energy revenues.

• YTD lower margins primarily due to $39 million lower net retail electric base revenues and $4 million lower DSM net revenues offset by higher ECR margins of $17 million resulting from earlier timing of spend and other adjustments, $5 million from lower cost of production margin expenses, $3 million from the sale of excess generation and $3 million from higher transmission revenues.

• The current month capital expenditure variance reflects a catch-up of spending on certain projects.

• YTD lower O&M due to $19 million lower labor and burden costs, including the deferred cost recovery of certain pension and operating expenses as a result of the rate case settlement, $6 million favorable maintenance and outage expenses, $3 million in lower uncollectible accounts and $2 million in lower materials and consulting costs.

• Sixteen environmental events occurred during 2015. Thirteen of the events were a result of SO2, NOx, CO and mercury exceedances at Mill Creek and Trimble County. These events were short timeframe limits which were exceeded and were all due to equipment malfunctions. In addition, there was a sulfuric acid spill that occurred at Ghent and two oil spills into the Ohio River; one at Mill Creek due to equipment failure and the second at Ohio Falls during maintenance work.

Major Developments

• The Company received an Order from the KPSC reaffirming the CPCN approvals to build a new on-site special waste landfill at the Trimble County Station and to continue with the special waste landfill project as planned at the Ghent Generating Station. The Order resolves a complaint filed by Sterling Ventures LLC requesting that the KPSC revoke previous CPCNs for our on-site landfills and instead use Sterling Ventures' underground limestone mine for beneficial use of our coal combustion residuals ("CCR"). The KPSC agreed with LKE's position that the Company's location and site designs for the projects previously approved by the KPSC continue to represent the least-cost feasible option for our customers, and that the Sterling site would not meet the new beneficial use aspects of the EPA's CCR regulations. While the state is still working on final environmental permits needed to construct the landfill itself, the Company has the necessary permits to begin construction of the CCR treatment facility. Once the EPC contract negotiations are completed and signed by the selected contractor in early 2016, the project will begin.

• The new baghouse for Trimble County 1 ("TC1") was placed into service in December. With TC1 in service, all baghouse projects to date (9) in the Mercury and Air Toxics Standards ("MATS") compliance program have been placed in service on or ahead of schedule, with the final project scheduled to be placed in service Q2 2016.

• Both Louisville and Lexington recorded its warmest December in more than a century. Temperatures averaged 49 degrees for the month, surpassed only by December 1889, when the average temperatures slightly topped 50 degrees.

• Through the Company's 2015 annual charitable-giving campaign, Power of One, LKE donated nearly $1.8 million for Metro United Way, Fund for the Arts and Crusade for Children. This marks the ninth year in a row in which employees have raised more than $1 million, and it represents the highest amount ever pledged in the history of the campaign.

Significant Future Events

• The Mill Creek 3 baghouse construction is progressing toward an April 2016 tie-in outage. The unit will be restarted during June 2016 in compliance with the MATS rule.

• Construction of the Brown Solar project is underway and the facility is expected to be commercially operational by late spring of 2016.

(1) Excludes goodwill and other purchase accounting adjustments.
(2) Net of cost recovery mechanisms.
(3) The possible violation issues for YTD Actual is believed to be minimal risk.

**Current year month and YTD amounts shown for environmental events were revised to reflect updated information.

Income Statement: Actual vs. Budget (Month) — December 2015

Income Statement: Actual vs. Budget (YTD) — December 2015

($ Millions)

	YTD Actual	YTD Budget	YTD Variance	Comments
Revenues:				
Electric Revenues	$ 2,817	$ 2,976	$ (160)	Due to lower volumes driven by unfavorable weather.
Gas Revenues	303	340	(38)	See Gas Supply Expenses explanation below.
Total Revenues	3,119	3,317	(197)	
Cost of Sales:				
Fuel Electric Costs	868	980	112	Primarily due to lower commodity costs related to lower fuel prices and lower volume usage due to decreased generation.
Gas Supply Expenses	138	175	37	Due to lower net purchases partially offset by less gas to storage activity.
Purchased Power	55	66	11	Lower purchased power due to mild weather.
Other Electric Cost	132	156	24	Primarily due to lower ECR expense of $14 million and scrubber reactant expense of $8 million.
Total Cost of Sales	1,194	1,377	184	
Gross Margin:				
Electric Margin	1,761	1,774	(13)	Primarily due to $39 million lower retail electric base service, energy and demand revenues and $4 million lower DSM revenues offset by higher ECR margins of $17 million resulting from earlier timing of spend and other adjustments, $5 million from lower cost of production margin expenses, $3 million from the sale of excess generation and $3 million from higher transmission revenues.
Gas Margin	164	165	(1)	
Total Gross Margin	1,926	1,939	(14)	
Operating Expenses:				
O&M	736	767	31	Lower O&M due to $19 million lower labor and burden costs, including the deferred cost recovery of certain pension and operating expenses as a result of the rate case settlement, $6 million favorable maintenance and outage expenses, $3 million in lower uncollectible accounts and $2 million in lower materials and consulting costs.
Depreciation & Amortization	344	356	12	Lower depreciation primarily due to the timing of retirement and in service dates related to Cane Run units as well as other project completion updates.
Taxes, Other than Income	53	55	2	
Total Operating Expenses	1,134	1,179	45	
Other income (expense)	(7)	(6)	(1)	
EBIT	784	754	30	
Interest Expense	181	186	6	Interest savings due to a combination of changes in short term debt balances and more favorable interest rates during the year.
Income from Ongoing Operations before income taxes	603	568	35	
Income Tax Expense	227	215	(12)	Due to higher pre-tax income.
Net Income (loss) from ongoing operations	**376**	**353**	**$ 23**	
Non Operating Income	(12)	-	(12)	Due to valuation allowance recorded for tax credits that will not be utilized as a result of the bonus depreciation extension.
Discontinued Operations	0	(0)	1	
Net Income (loss)	$ 364	$ 353	$ 11	
KY Regulated Financing Costs	(33)	$ (33)	(0)	
KY Regulated Net Income	$ 331	$ 320	$ 11	
Earnings Per Share - Ongoing	$ 0.51	$ 0.47	$ 0.03	

Note: Schedules may not sum due to rounding.

Balance Sheet

December 2015

($ Millions)

	12/31/2015	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 30	$ 17	$ 13	Primarily due to lower dividend payments and increased borrowing than assumed in budget.
Accounts Receivable (Trade)	362	417	(55)	Lower customer accounts receivable ($36m) and accrued utility revenue ($20m).
Inventory	298	289	10	
Deferred Income Taxes	-	16	(16)	Per new accounting guidance related to deferred tax presentation, the deferred tax asset balance was netted with the deferred tax liability balance. This methodology is not reflected in the budget.
Regulatory Assets Current	35	42	(7)	
Prepayments and other current assets	39	182	(144)	Primarily related to lower income tax receivable due to tax settlement from PPL which is budgeted in accrued taxes below ($136m).
Total Current Assets	764	963	(199)	
Property, Plant, and Equipment	11,404	11,209	195	
Intangible Assets	123	124	(0)	
Other Property and Investments	1	1	0	
Regulatory Assets Non Current	727	654	72	Primarily due to increase in deferred pension expense of $37m related to current year losses and plan amendments not budgeted and methodology change as a result of the 2014 rate case. Difference also attributable to ARO activity of $29m and loss related to forward starting swaps of $20m.
Goodwill	997	997	-	
Other Long-term Assets	74	107	(33)	Primarily due to the reclassification of debt issuance costs which are now included as a contra-liability with debt per new accounting guidance. This methodology is not reflected in the budget. To see adjusted budgeted debt balance please refer to the Financing Activities schedule.
Total Assets	**$ 14,090**	**$ 14,054**	**$ 36**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 271	$ 361	$ (91)	Decreases in project engineering accruals, retail natural gas purchases and gas prices, timing of coal receipts and payments and trade payables related to winding down of construction projects.
Dividends Payable to Affiliated Companies	-	-	-	
Customer Deposits	52	52	(0)	
Derivative Liability	5	71	(66)	Due to settlement of forward starting swaps with PPL.
Accrued Taxes	46	172	(126)	Primarily due to income tax settlement of $136m (see Prepayments and other current assets explanation above) and timing of federal payments made by LKE to PPL ($10m).
Regulatory Liabilities Current	32	12	20	Higher balance primarily due to over-recovery of fuel costs related to FAC of $14m.
Other Current Liabilities	218	164	54	Primarily related to reclassification of ARO's from noncurrent to current liability of $39m.
Total Current Liabilities	624	833	(209)	
Debt - Affiliated Company	454	446	8	
Debt [(1)]	4,952	4,934	18	
Total Debt	5,406	5,380	26	
Deferred Tax Liabilities	1,463	1,462	1	
Investment Tax Credit	128	128	0	
Accum Provision for Pension & Related Benefits	296	269	27	Primarily due to current year losses and plan amendments not budgeted of $38m partially offset by lower pension expense ($9m).
Asset Retirement Obligation	485	288	197	Due to revaluation of ARO's of $240m to reflect updates in the estimated cash flows for ash and environmental ponds primarily related to the enactment of the Coal Combustion Residuals (CCR) Rule partially offset by a reclassification of ARO from non-current to current liabilities of ($39m).
Regulatory Liabilities Non Current	923	911	12	
Derivative Liability	42	43	(1)	
Other Liabilities	205	257	(52)	Primarily due to reclassification of retainage related to CR7 project from long-term to short-term ($40m).
Total Deferred Credits and Other Liabilities	3,541	3,357	185	
Equity	4,518	4,484	34	
Total Liabilities and Equity	**$ 14,090**	**$ 14,054**	**$ 36**	

[(1)] Includes all ST and LT debt. See Financing Activities page for details.
Note: Schedules may not sum due to rounding.

YTD	Actual	Budget	Variance	Comments
Net Income	364	353	11	
Depreciation	409	416	(7)	
Deferred Income Taxes	236	214	22	Primarily due to the impact of the extension of bonus depreciation for years 2015 through 2019 and opting to take bonus depreciation at KU. This is largely offset by a change of NOL utilization to NOL addition.
Other Balance Sheet Movements	64	95	(32)	Budget does not include non cash effect of regulatory over/under accrual adjustments.
Funds From Operations	**1073**	**1078**	**(5)**	
Changes in accounts receivables	44	(13)	57	Primarily due to a decrease in unbilled revenue and customer accounts receivable related to lower volumes driven by seasonality.
Changes in inventories	6	23	(17)	Primarily due to lower commodity costs related to lower fuel prices and lower volume usage due to decreased generation.
Change in Accounts Payable	(60)	(43)	(17)	Budget does not remove the effect of the capital expenditures accrual which is reflected in actuals.
Change in Working Capital	**(10)**	**(33)**	**23**	
Operating Cash flow	**1063**	**1045**	**18**	
Capex	(1210)	(1125)	(85)	
Other Investing	7	0	7	Due to proceeds from key man life issuance.
Loans to Affiliates	0	0	0	
Investing Cash flow	**(1203)**	**(1125)**	**(78)**	
Dividends	(219)	(251)	32	Lower dividends due to increased cash needs at LKE.
Equity Infusion	125	130	(5)	
Net Borrowings	253	197	56	Higher capex payments.
Other	(10)	0	(10)	Debt issuance and credit facility costs.
Financing Cash flow	**149**	**76**	**73**	
Net increase (decrease) in cash	**9**	**(4)**	**13**

Combined KU and LG&E ROE — December 2015

KU and LG&E Combined

Reconciliation of Allowed Return to

12 months ended Dec-2015 Regulatory Return

and ROE from Ongoing Operations

Allowed Return [1]		10.14%	
Adjustments (net of tax):			
Change in capitalization - non mechanism	-0.83%		Growth in capitalization (rate base) between rate cases does not earn a return (1st half of year)
Change in ROE from average mechanism rate base growth	0.00%		Mechanisms have a real-time return
Change in weighted cost of debt	-0.02%		
Change in margins	0.79%		Primarily new rates based on last rate cases
Change in allowed expenses	-0.69%		Inflationary Increases
		-0.75%	
Actual Regulated ROE		9.39%	

(1) Based on the most recent base rate filings with test years ending 6/30/16 KPSC, 12/31/13 FERC, 12/31/12 VA.

Note: The allowed return is a blended rate of the previous authorized ROE of 10.25% before 7/1/15 and from the settlement for TYE 6/30/16 which did not provide a specific return on equity with respect to base rates; however, the average customer's monthly bill will reflect an authorized 10 percent return on equity investment related to the environmental cost recovery mechanism and the gas line tracker mechanism.

Major Developments

• LG&E and KU submitted to the Kentucky Public Service Commission (KPSC) Environmental Cost Recovery (ECR) filings for recovery of costs (approximately $1 billion) largely attributable to the EPA's Coal Combustion Residuals (CCR) rule. LG&E and KU also requested approval for Certificates of Public Convenience and Necessity from the KPSC for closure of CCR impoundments at all of the utilities' generating stations (active and inactive).

• The Virginia State Corporation Commission issued an Order approving the stipulation in the Virginia rate case without exception. The new rates were put into effect February 15.

• LG&E and KU has performed well in recent customer satisfaction surveys. LG&E and KU achieved first place in the 4Q 2015 Residential Customer Satisfaction Survey. In the J.D. Power 2016 Electric Utility Business Study, KU came in 2nd and LG&E finished 6th, respectively, in the Midwest Midsize segment. LG&E also ranked third among the Midwest region in the J.D. Power 2016 Gas Utility Business Study.

• LG&E and KU took the next step in our plan to offer small-scale solar arrays to business and industrial customers by issuing a request for proposal. This step follows the request for information process where the Company received 10 responses from local and national companies with expertise in solar generation design and construction. LG&E and KU will own and operate the individual solar facilities and each project will be subject to approval by the KPSC. The facilities will likely range in size from 30 kilowatts to 5 megawatts.

Significant Future Events

• The Mill Creek 3 baghouse construction is progressing toward an April 2016 tie-in outage. The unit will be restarted during June 2016 in compliance with the Mercury and Air Toxics Standards rule.

• Construction of the Brown Solar project is underway and the facility is expected to be commercially operational by late spring of 2016.

(1) Full year forecast amount shown represents target.

(2) Excludes goodwill and other purchase accounting adjustments.

(3) Net of cost recovery mechanisms.

(4) The possible violation issues for YTD Actual is believed to be minimal risk.

KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Variance Explanations

• Current month and YTD capital expenditures were lower, primarily due to the timing of Environmental Cost Recovery (ECR) spending on Environmental Air projects at Mill Creek.

Major Developments

• LKE continues its strong safety performance in 2016. Ohio Falls' employees achieved a significant milestone as they recently celebrated 10,000 days without a lost-time incident. The accomplishment was quite extraordinary considering the amount of major unit upgrades that have occurred during the period. EEI also presented a safety award to Distribution Operations employees in London, Kentucky, for over 250,000 hours without a lost work day.

• The Kentucky Public Service Commission (KPSC) issued procedural schedules in the Environmental Cost Recovery (ECR) plan proceedings and LG&E and KU will receive initial data requests in March.

Significant Future Events

• The Mill Creek 3 baghouse construction is progressing toward an April 2016 tie-in outage. The unit will be restarted during June 2016 in compliance with the Mercury and Air Toxics Standards (MATS) rule.

• Construction of the Brown Solar project is progressing and the facility is expected to be commercially operational by late spring of 2016.

• Regarding the ECR plan proceedings, intervenor testimony will be filed in May, and a formal hearing is expected in June.

(1) Full year forecast amount shown represents target.

(2) Excludes goodwill and other purchase accounting adjustments.

(3) Net of cost recovery mechanisms.

(4) The possible violation issues are believed to be minimal risk.

Debt / Capitalization	7.5%	40% - 50%	50% - 59%	59% - 67%

As of December 31, 2015	Senior Unsecured	Senior Secured	Commercial Paper
Issuer	Moody's	Moody's	Moody's
LKE	Baa1		
LG&E		A1	P-2
KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Variance Explanations

• Current month higher EFOR primarily due to main transformer failure and fire at Mill Creek.

• Current month lower margins primarily due to warmer than normal weather resulting in $10 million lower retail electric base energy and demand revenue and $2 million lower gas margins. March 2016 ranked as the 3rd warmest compared to the previous 30 years.

• YTD lower margins primarily due to warmer than normal weather during the month of March, resulting in lower YTD retail electric base energy and demand revenue of $12 million and $4 million lower gas margins. This was partially offset by $2 million lower cost of production.

• Current month and YTD capital expenditures were lower, primarily due to the timing of Environmental Cost Recovery (ECR) spending on Environmental Air projects at Mill Creek and Ghent.

Major Developments

• Mill Creek Unit 3 recently began its scheduled maintenance outage which includes the facilitation of the tie-in of its baghouse project. This marks the tenth and final baghouse in the MATS compliance program and the conclusion of the 2011 ECR Plans, which also included the completion of the Brown Phase 1 Landfill.

• LKE recently experienced a significant wind event with speeds between 35-60 mph over eight hours. 30,000 customers were affected with almost all customers restored within 24 hours. LKE also provided 57 contract resources to Duke Midwest and AEP-Virginia to assist in their restoration efforts.

Significant Future Events

• Construction of the Brown Solar project is progressing and the facility is expected to be commercially operational by late spring.

• Regarding the $1.0 billion ECR plan proceedings, intervenor testimony will be filed in May, and a formal hearing is expected in June.

(1) Full year forecast amount shown represents target.

(2) Excludes goodwill and other purchase accounting adjustments.

(3) Net of cost recovery mechanisms.

(4) The possible violation issues are believed to be minimal risk.

LKE	Baa1		
LG&E		A1	P-2
KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Balance Sheet - LKE Consolidated

March 2016

($ Millions)

	3/31/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 28	$ 14	$ 14	Budget included increased payments related to Accounts Payable and Capital Expenditures.
Accounts Receivable (Trade)	368	384	(16)	
Inventory	277	245	32	Higher actual due to lower than expected usage and higher than budgeted purchases.
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	17	53	(36)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates and decrease in the FAC balance due to lower costs of native fuel expense.
Prepayments and other current assets	36	37	(1)	
Total Current Assets	726	733	(7)	
Property, Plant, and Equipment	11,449	11,501	(52)	
Intangible Assets	117	113	4	
Other Property and Investments	1	1	-	
Regulatory Assets Non Current	744	733	11

Combined KU and LG&E ROE — March 2016

KU and LG&E Combined

Reconciliation of Allowed Return to

12 months ended Mar-2016 Regulatory Return

and ROE from Ongoing Operations

Allowed Return [1]		10.1%	
Adjustments (net of tax):			
Change in capitalization - non mechanism	-0.4%		Growth in capitalization (rate base) between rate cases does not earn a return
Change in ROE from average mechanism rate base growth	0.0%		Mechanisms have a real-time return
Change in weighted cost of debt	0.0%		Lower interest rate
Change in margins	-0.4%		Lower sales
Change in allowed expenses	-0.1%		Inflationary Increases
		-0.8%	
Actual Regulated ROE		9.3%	

(1) Based on the most recent base rate filings with test years ending 6/30/16 KPSC, 12/31/14 FERC, 12/31/14 VA.

Note: The allowed return is a blended rate of the previous authorized ROE of 10.25% before 7/1/15 and from the settlement for TYE 6/30/16 which did not provide a specific return on equity with respect to base rates; however, the average customer's monthly bill will reflect an authorized 10% return on equity investment related to the environmental cost recovery mechanism and the gas line tracker mechanism.

Variance Explanations

• YTD lower margins primarily due to warmer than normal weather during the first quarter, resulting in lower YTD retail electric base energy and demand revenue of $16 million and $3 million lower gas margins. This was partially offset by $2 million higher ECR margins.

• Current month capital expenditures were lower, primarily due to permitting delays related to CCR projects at Trimble County.

• YTD capital expenditures were lower, primarily due to the timing of Environmental Cost Recovery (ECR) spending on Environmental Air projects at Mill Creek and permitting delays related to CCR projects at Trimble County.

Major Developments

• LG&E and KU ranked second in its peer group in the first quarter 2016 Residential Customer Satisfaction survey with a “top two box” score of 59.4 percent.

The following represents KPSC items which were addressed during the month:

• Governor Matt Bevin has appointed Robert Cicero, a Florence businessman, to serve as a Commissioner on the KPSC. Cicero replaces Roger Thomas on the three-member Commission which allows for the quorum it needs to issue orders. His appointment is for the remainder of Thomas's term which expires on July 1, 2016. Cicero is also eligible for reappointment to a full four-year term. The KPSC has one vacancy for a Commissioner yet to be announced as well as an open Executive Director position.

• The KPSC approved plans for LG&E and KU to own and operate electric vehicle charging stations within its service territories. Each utility will install 10 charging stations at different locations for public access. The entire cost of the charging stations will be paid by those who request the stations or the users of the charging service.

• The KPSC also decided not to adopt any of the federal smart grid standards, however, it will allow utilities flexibility in deciding how to deploy these systems.

Significant Future Events

• The 2016 ECR Plan proceeding before the KPSC is continuing as planned. Public meetings will be held during May with a formal hearing scheduled for June 14.

• The Brown Solar and Mill Creek baghouse projects are expected to be completed in June.

(1) Full year forecast amount shown represents target.

(2) Excludes goodwill and other purchase accounting adjustments. Represents trailing twelve months.

(3) Net of cost recovery mechanisms.

(4) The possible violation issues are believed to be minimal risk.

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Variance Explanations

• Current month higher EFOR primarily due to generator bearing and rotor vibration issues on Trimble County Unit 2.

• YTD lower margins primarily due to warmer than normal weather during the first quarter, resulting in lower YTD retail electric base energy and demand revenue of $19 million and $3 million lower gas margins. This was partially offset by $2 million lower cost of production.

• YTD lower O&M primarily due to timing of plant maintenance, storm restoration and vegetation management.

• Current month capital expenditures were lower, primarily due to timing of Environmental Cost Recovery (ECR) spending related to CCR projects at Trimble County.

• YTD capital expenditures were lower, primarily due to the timing of ECR spending on Environmental Air projects at Mill Creek, permitting delays related to CCR projects at Trimble County and various other generation projects.

Major Developments

• LKE reached a unanimous settlement agreement in the ECR proceeding with the Attorney General and Kentucky Industrial Utility Customers. The agreement provides for full recovery of and on all projects in the filing through the ECR mechanism including the 10 percent return on equity established in the last base rate case. The settlement agreement was filed on June 13 with a public hearing at the KPSC on June 14. While the 10 percent return on equity was agreed to by all parties in the case, KPSC counsel and the Commissioners raised concerns during the hearing about the return on equity in light of lower returns awarded to utilities across the country. The Company provided supportive responses during the hearing and will reiterate its position in briefs to be filed later this month. An Order from the KPSC is expected around the end of July.

• LKE achieved two major construction milestones as the Brown Solar project and Mill Creek Unit 3 WFGD and baghouse projects were recently placed in service. The Brown Solar project has reached 10 MW on several occasions and Mill Creek Unit 3 represents the last major unit in the environmental air construction program.

• In FERC related litigation with the city of Paris, Administrative Law Judge H. Peter Young issued an Initial Decision ruling in KU's favor on all issues. Specifically, Judge Young ruled that KU's actions were consistent with the requirements of the existing agreement and were just, reasonable and not unduly discriminatory. Judge Young also agreed that KU acted properly by providing 60 days' notice of the proposed changes and rejected arguments that they constituted a termination of service that required three years notice. As a result of the ruling, KU will not be required to issue any refunds for capacity payments dating back to July 2014, as requested by Paris and FERC Trial Staff.

• LKE's interactive voice response (IVR) system has been honored as the best among combined utilities in the 2016 Energy Utility IVR Benchmark Report. LG&E and KU's wellness initiatives have also been recognized with two awards at the 2016 Worksite Wellness Conference.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms.

(3) The possible violation issues are believed to be minimal risk.

(4) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Income Statement: Actual vs. Budget (Month) - LKE Consolidated — May 2016

($ Millions)

	MTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 213	$ 231	$ (19)	Due to lower volumes driven by cooler than expected average temperatures and lower industrial sales volumes including the loss of [redacted]) as a customer.
Gas Revenues	16	17	(1)	
Total Revenues	228	248	(20)	
Cost of Sales:				
Fuel Electric Costs	56	69	13	Primarily due to lower commodity costs and lower volume usage due to decreased generation.

Income Statement: Actual vs. Budget (YTD) - LKE Consolidated May 2016

($ Millions)

	YTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 1,127	$ 1,212	$ (85)	Due to lower volumes driven by unfavorable weather.
Gas Revenues	154	181	(27)	See Gas Supply Expenses explanation below.
Total Revenues	1,281	1,393	(112)	
Cost of Sales:				
Fuel Electric Costs	309	367	58	Primarily due to lower commodity costs and lower volume usage due to decreased generation.
Gas Supply Expenses	68	93	24	Due to lower net purchases and lower gas prices.
Purchased Power	24	23	(1)	
Other Electric Cost	59	70	11	Due to lower ECR consumables expense and scrubber reactant expense.
Total Cost of Sales	460	551	92	
Gross Margin:				
Electric Margin	736	753	(17)	Lower margins primarily due to warmer than normal weather during the first quarter, resulting in lower YTD retail electric base energy and demand revenue of $19 million. This was partially offset by $2 million lower cost of production.
Gas Margin	85	89	(3)	
Total Gross Margin	821	842	(20)	
Operating Expenses:				
O&M	301	307	6	Lower O&M primarily due to timing of plant maintenance, storm restoration and vegetation management.
Depreciation & Amortization	145	149	4	
Taxes, Other than Income	23	23	0	
Total Operating Expenses	469	479	10	
Other income (expense)	(4)	(4)	(0)	
EBIT	348	358	(11)	
Interest Expense	88	90	3	
Income from Ongoing Operations before income taxes	260	268	(8)	
Income Tax Expense	98	102	4	
Net Income (loss) from ongoing operations	**162**	**166**	**$ (3)**	
Non Operating Income	-	-	-	
Discontinued Operations	0	(0)	0	
Net Income (loss)	$ 162	$ 165	$ (3)	
KY Regulated Financing Costs	(13)	$ (12)	(0)	
KY Regulated Net Income	$ 150	$ 153	$ (3)	
Earnings Per Share - Ongoing	$ 0.22	$ 0.22	$ (0.01)	

Note: Schedules may not sum due to rounding.

Income Statement: Actual vs. Budget (YTD) - LG&E

May 2016

($ Millions)

	YTD			
	Actual	**Budget**	**Variance**	**Comments**
Revenues:				
Electric Revenues	$ 438	$ 460	$ (22)	Primarily due to lower off system sales and FAC revenue which were offset by lower related fuel costs below.
Gas Revenues	154	181	(27)	See Gas Supply Expenses explanation below.
Total Revenues	592	641	(50)	
Cost of Sales:				
Fuel Electric Costs	121	139	17	Primarily due to lower commodity costs and lower volume usage due to decreased generation.
Gas Supply Expenses	68	93	24	Due to lower net purchases and lower gas prices.
Purchased Power	21	22	1	
Other Electric Cost	22	27	5	Due to lower ECR consumables expense and scrubber reactant expense.
Total Cost of Sales	233	280	47	
Gross Margin:				
Electric Margin	273	273	1	
Gas Margin	85	89	(3)	
Total Gross Margin	359	361	(3)	
Operating Expenses:				
O&M	133	138	4	
Depreciation & Amortization	59	60	2

KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Variance Explanations

• Current month higher EFOR primarily due to generator bearing vibration and rotor winding issues on Trimble County Unit 2.

• YTD lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $15 million and $3 million lower gas margins. This was partially offset by $2 million lower cost of production.

• YTD lower O&M primarily due to timing of plant maintenance, storm restoration, vegetation management and consulting services along with labor and burden savings.

• YTD capital expenditures were lower, primarily due to the timing of ECR spending on Environmental Air projects at Mill Creek, permitting delays related to CCR projects at Trimble County and various other generation projects.

Major Developments

• Republican Governor Matt Bevin appointed Michael J. Schmitt, a Paintsville attorney, to serve as Chairman of the KPSC. Schmitt has represented a number of clients in coal, oil and gas litigation over a period of 45 years. Schmitt replaces James W. Gardner, whose reappointment was not confirmed by the Senate in the 2016 General Assembly. Schmitt assumes the remainder of Gardner's term, which will expire July 1, 2019. Bevin also named Robert J. Cicero as Vice Chair. Cicero was appointed to Commissioner in April 2016. Both appointments are subject to Senate confirmation.

• There was significant storm activity which passed through LKE's service territories during June. The events affected about 45,000 customers, and produced 175 downed lines and 12 broken poles. Restoration efforts were performed without injury and completed within 24 hours.

• LG&E and KU won two awards from the Kentuckiana chapter of the American Heart Association. The Company won a Gold Award and the Fit-Friendly Worksite Community Innovation Award for the expanding wellness participation at Cane Run Generating Station.

Significant Future Events

• An Order from the KPSC regarding the ECR filing is expected around the end of July.

(1) Full year forecast amount shown represents target.

(2) Due to timing, full year forecasted amount will not tie to the amount reported in the Performance and Key Events Report.

(3) Net of cost recovery mechanisms.

(4) The possible violation issues are believed to be minimal risk.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Total Cost of Sales	301	365	64	
Gross Margin:				
Electric Margin	559	576	(16)	Primarily related to lower Electric Revenues. See explanation above.
Gas Margin	-	-	-	
Total Gross Margin	559	576	(16)	
Operating Expenses:				
O&M	184	190	6	Lower O&M primarily due to lower storm restoration, vegetation management and consulting services along with labor and burden savings.
Depreciation & Amortization	103	106	2	
Taxes, Other than Income	14	14	0	
Total Operating Expenses	301	310	9	
Other income (expense)	(2)	(2)	1	
EBIT	257	263	(7)	
Interest Expense	47	49	2	
Income from Ongoing Operations before income taxes	209	215	(5)	
Income Tax Expense	80	82	2	Lower income taxes primarily due to lower pre-tax income.
Net Income (loss) from ongoing operations	**130**	**133**	**$ (3)**	

Note: Schedules may not sum due to rounding.

Income Statement: Forecast vs. Budget - LKE Consolidated				June 2016
($ Millions)				
	Full Year			
	Q2 Forecast	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 2,901	$ 3,011	$ (110)	Due to lower volumes driven by unfavorable weather, along with lower fuel costs as shown below. In addition, an updated load forecast with lower volumes was included for the remainder of the year.
Gas Revenues	301	330	(29)	See Gas Supply Expenses explanation below.
Total Revenues	3,203	3,342	(139)	
Cost of Sales:				
Fuel Electric Costs	837	901	65	Primarily due to decreased generation as a result of mild weather and to lower commodity costs.
Gas Supply Expenses	130	155	25	Due to lower gas usage (mild weather) and prices as well as lower net purchases.
Purchased Power	57	58	0	
Other Electric Cost	162	182	20	Due to lower ECR expense (using less PAC and NALCO), mild weather and scrubber reactant expense.
Total Cost of Sales	1,187	1,296	110	
Gross Margin:				
Electric Margin	1,845	1,870	(25)	Primarily related to lower Electric Revenues. See explanation above.
Gas Margin	171	175	(5)	See Gas Supply Expenses explanation above.
Total Gross Margin	2,016	2,045	(30)	
Operating Expenses:				
O&M	717	731	14	Due to lower labor and burden costs, maintenance & outage savings, lower storm restoration & vegetation management, A&G expenses and consulting support.
Depreciation & Amortization	349	359	9	Due to increased auto-retirements not captured in the budget, along with revised in-service dates and final spend on completed projects.
Taxes, Other than Income	56	56	0	
Total Operating Expenses	1,122	1,146	24	
Other income (expense)	(8)	(7)	(1)	
EBIT	886	892	(6)	
Interest Expense	213	217	4.12	
Income from Ongoing Operations before income taxes	673	675	(2)	
Income Tax Expense	255	257	2	
Net Income (loss) from ongoing operations	**417**	**417**	**$ 0**	
Non Operating Income	-	-	-	
Discontinued Operations	0	(0)	0	
Net Income (loss)	$ 417	$ 417	$ 0	
KY Regulated Financing Costs	(30)	$ (30)	(0)	
KY Regulated Net Income	$ 387	$ 387	$ 0	
Earnings Per Share - Ongoing	$ 0.57	$ 0.57	$ (0.00)	

Note: Schedules may not sum due to rounding.

LG&E		A1	P-2
KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Balance Sheet - LKE Consolidated — June 2016

($ Millions)

	6/30/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 16	$ 14	$ 2	
Accounts Receivable (Trade)	367	381	(14)	
Inventory	279	257	22	
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	22	61	(39)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates and decrease in the FAC balance due to lower costs of native fuel expense.
Prepayments and other current assets	41	42	(1)	
Total Current Assets	725	756	(31)	
Property, Plant, and Equipment	11,541	11,654	(113)

ROE[4]	9.7%	9.8%	9.8%

Variance Explanations

• Current month higher EFOR primarily due to generator rotor winding and ID fan vibration issues on Trimble County Unit 2 and circulating water pipe and cooling tower failure on Ghent Unit 4.

• YTD lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $16 million and $4 million lower gas margins. This was partially offset by $2 million lower production costs and purchased power.

• MTD & YTD lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance, storm restoration, vegetation management and consulting services.

• MTD capital expenditures were lower, primarily due to lower than budgeted ECR spending on CCR projects.

• YTD capital expenditures were lower, primarily due to lower level of ECR spending on Environmental Air projects at Mill Creek, permitting delays related to CCR projects at Trimble County and timing related to Transmission projects.

Major Developments

• The KPSC issued an Order in the 2016 ECR proceeding which provides for full recovery of and on all projects in the filing through the ECR mechanism. The Order is consistent with the unanimous settlement agreement with the exception of authorizing a 9.8 percent rather than 10 percent ROE. Recovery of costs under this compliance plan will commence with bills rendered on and after August 31, 2016.

• KU won a J.D. Power award for customer satisfaction, ranking first among the mid-sized utilities in the Midwest region of the 2016 Electric Utility Residential Study, while LG&E finished close behind in fourth place. Both KU and LG&E improved their positions significantly. These results reflect our employees' continued focus on the customer experience.

• LKE filed an application with the KPSC to seek approval of a community solar program called "Solar Share". Environmental impact studies are underway at the proposed site near Simpsonville, Kentucky, and Solar Energy Solutions has completed an initial design of a 500 kW solar array (expandable to 4 MW).

• Talina Rose Mathews was recently appointed Executive Director of the KPSC. Mathews most recently served as Director of Member Services and Advocacy at the Organization of MISO States Inc. She brings a strong background in energy policy and previously held positions within various state agencies and at the KPSC.

• The Kentucky Division of Waste Management issued the draft permit for the Trimble County landfill. There is a 30 day comment period until September 12, and a public hearing has been scheduled for August 30. A final permit is expected later this year.

• Business First, the weekly business journal for Greater Louisville, recently announced LG&E and KU as the winner of the Healthiest Employer Award among businesses with 1,500-4,999 employees. LKE's robust wellness program includes initiatives such as the "Healthy for Life" program, health coaching, flu shots, and health fairs. The Company received the award in 2014 and was named a finalist in 2015.

(1) Full year forecast amount shown represents target.
(2) Net of cost recovery mechanisms.
(3) The possible violation issues are believed to be minimal risk.
(4) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Income Statement: Actual vs. Budget (YTD) - LKE Consolidated

July 2016

($ Millions)

	YTD Actual	YTD Budget	YTD Variance	Comments
Revenues:				
Electric Revenues	$ 1,656	$ 1,760	$ (103)	Due to lower volumes driven by unfavorable weather, FAC revenue from lower fuel costs (see below), and lower industrial volumes.
Gas Revenues	179	207	(28)	See Gas Supply Expenses explanation below.
Total Revenues	1,835	1,966	(131)	
Cost of Sales:				
Fuel Electric Costs	461	532	71	Primarily due to decreased generation as a result of mild weather and lower commodity costs.
Gas Supply Expenses	75	100	24	Due to lower gas usage (mild weather) and prices as well as lower net purchases.
Purchased Power	32	34	2	
Other Electric Cost	87	103	16	Due to lower coal generation and lower ECR consumables expense and scrubber reactant expense.
Total Cost of Sales	656	769	113	
Gross Margin:				
Electric Margin	1,076	1,091	(15)	Lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $16 million partially offset by $2 million lower production costs and purchased power.
Gas Margin	104	107	(4)	
Total Gross Margin	1,180	1,198	(18)	
Operating Expenses:				
O&M	411	426	15	Lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance, storm restoration, vegetation management and consulting services.
Depreciation & Amortization	203	208	5	Lower depreciation primarily due to revised auto-retirements functionality as well as other project completion and spending updates.
Taxes, Other than Income	33	33	0	
Total Operating Expenses	646	667	20	
Other income (expense)	(5)	(5)	(1)

As of December 31, 2015	Senior Unsecured	Senior Secured	Commercial Paper
Issuer	Moody's	Moody's	Moody's
LKE	Baa1		
LG&E		A1	P-2
KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Balance Sheet - LKE Consolidated

July 2016

($ Millions)

	7/31/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 17	$ 16	$ 1	
Accounts Receivable (Trade)	422	397	25	
Inventory	280	260	21	
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	20	64	(44)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates and decrease in the FAC balance due to lower costs of native fuel expense.
Prepayments and other current assets	46	46	(1)	
Total Current Assets	786	783	3	
Property, Plant, and Equipment	11,560	11,702	(142)	
Intangible Assets	108	99	9	
Other Property and Investments	1	1	(0)	
Regulatory Assets Non Current	772	742	31	
Goodwill	997	997	-	
Other Long-term Assets	79	81	(1)	
Total Assets	**$ 14,303**	**$ 14,405**	**$ (102)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 249	$ 274	$ (25)	
Dividends Payable to Affiliated Companies	-	-	-	
Customer Deposits	54	52	2	
Derivative Liability	6	5	1	
Accrued Taxes	68	109	(41)	Due to difference in assumption related to expected income tax extension settlement and budget did not reflect delayed timing of property tax payments that occurred in Q1.
Regulatory Liabilities Current	23	30	(7)	
Other Current Liabilities	220	210	10	
Total Current Liabilities	620	680	(60)	
Debt - Affiliated Company	543	400	143	Increase in affiliate debt due to payoff of $75m credit facility and other funding needs. Budget assumed pay down of affiliate debt balance in March 2016 and quarterly pay off of any cash needed for operations on non quarter months. The forecast does not assume any pay off of the short term debt with affiliate.
Debt [(1)]	4,840	4,947	(108)

Variance Explanations

• YTD lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $18 million, $4 million lower gas margins and $2 million lower retail rate mechanism revenue. This was partially offset by $5 million lower production costs and other margin components.

• Current month lower O&M primarily due to lower labor and burden costs along with savings in outside services.

• YTD lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance, storm restoration, vegetation management and outside services.

• Current month capital expenditures were lower, primarily due to lower than budgeted ECR spending on CCR projects.

• YTD capital expenditures were lower, primarily due to lower level of ECR spending on Environmental Air projects at Mill Creek, permitting delays related to CCR projects at Trimble County and timing related to Transmission projects.

Major Developments

• LG&E won another J.D. Power award for customer satisfaction, ranking first among the mid-sized utilities in the Midwest region of the 2016 Gas Utility Residential Study. This latest award follows KU's top ranking in the 2016 Electric Utility Residential Customer Satisfaction Study released in July.

• KU recently priced a refinancing for $96 million of pollution control bonds for three years at an interest rate of 1.05 percent. There was strong demand for the bonds from investors.

• LG&E and Louisville Metro entered into a 5 year gas franchise agreement that is renewable for up to a total of 20 years. Through the negotiation process, the parties agreed that the issue of cost recovery could be litigated, and in the interim, no payments will be paid. If LG&E's position and current practice that the franchise fee should be recovered as a line item on customer bills prevail, the fee will revert to zero. If Louisville Metro's position that the franchise fee should be socialized in base rates among all LG&E customers ultimately prevails, any amounts owing will be prospective only. LG&E has filed with the KPSC a motion for a Declaratory Order confirming its current practice to recover all franchise fees as a line item on the bill applicable to those in the accessing authorities jurisdiction.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms.

(3) The possible violation issues are believed to be minimal risk.

(4) Excludes goodwill and other purchase accounting adjustments.

Income Statement: Actual vs. Budget (YTD) - LKE Consolidated

August 2016

($ Millions)

	YTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 1,936	$ 2,052	$ (115)	Due to lower volumes driven by unfavorable weather, FAC revenue from lower fuel costs (see below), and lower industrial volumes.
Gas Revenues	191	219	(28)	See Gas Supply Expenses explanation below.
Total Revenues	2,128	2,271	(143)	
Cost of Sales:				
Fuel Electric Costs	541	621	80	Primarily due to decreased generation as a result of mild weather and lower commodity costs.
Gas Supply Expenses	79	103	24	Due to lower gas usage (mild weather) and prices as well as lower net purchases.
Purchased Power	37	39	2	
Other Electric Cost	103	120	18	Due to lower coal generation and lower ECR consumables expense and scrubber reactant expense.
Total Cost of Sales	759	884	124	
Gross Margin:				
Electric Margin	1,256	1,271	(15)	Lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $18 million and $2 million lower retail rate mechanism revenue. This was partially offset by $5 million lower production costs and other margin components.
Gas Margin	113	116	(4)	
Total Gross Margin	1,368	1,387	(19)	
Operating Expenses:				
O&M	468	487	20	Lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance, storm restoration, vegetation management and outside services.
Depreciation & Amortization	232	238	6	Lower depreciation primarily due to project completion and spending updates as well as higher level of retirements this year.
Taxes, Other than Income	38	38	(0)	
Total Operating Expenses	737	763	26	
Other income (expense)	(5)	(5)	(0)	
EBIT	626	619	6

Issuer	Moody's	Moody's	Moody's
LKE	Baa1		
LG&E		A1	P-2
KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Balance Sheet - LKE Consolidated

August 2016

($ Millions)

	8/31/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 18	$ 20	$ (3)	
Accounts Receivable (Trade)	424	404	19	
Inventory	282	261	21	
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	18	66	(48)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates and decrease in the FAC balance due to lower costs of native fuel expense.
Prepayments and other current assets	44	44	(0)	
Total Current Assets	785	796	(11)	
Property, Plant, and Equipment	11,575	11,744	(169)	
Intangible Assets	106	95	10	Amortization related to software classified as intangibles in budget versus PP&E in actuals.
Other Property and Investments	1	1	(0)	
Regulatory Assets Non Current	776	744	32	
Goodwill	997	997	-	
Other Long-term Assets	78	82	(3)	
Total Assets	**$ 14,318**	**$ 14,458**	**$ (140)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 232	$ 275	$ (43)	Due to decrease in accruals and lower coal purchases, partially offset by an increase in natural gas purchases.
Dividends Payable to Affiliated Companies	110	-	110	
Customer Deposits	54	52	3	
Derivative Liability	6	5	1	
Accrued Taxes	106	143	(37)	Due to difference in assumption related to expected income tax extension settlement and budget did not reflect delayed timing of property tax payments that occurred in Q1.
Regulatory Liabilities Current	27	30	(3)	
Other Current Liabilities	233	226	7	
Total Current Liabilities	768	731	37	
Debt - Affiliated Company	552	400	152	Increase in affiliate debt due to payoff of $75m credit facility and other funding needs. Budget assumed pay down of affiliate debt balance in March 2016 and quarterly pay off of any cash needed for operations on non quarter months. The forecast does not assume any pay off of the short term debt with affiliate.
Debt [(1)]	4,763	4,908	(144)

Variance Explanations

• YTD lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $19 million, $4 million lower gas margins and $4 million lower retail rate mechanism revenue. This was partially offset by $5 million lower production costs and other margin components.

• Current month lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance and outage expenses and outside services.

• YTD lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance, storm restoration, vegetation management, uncollectible accounts and outside services.

• Current month capital expenditures were lower, primarily due to lower than budgeted ECR spending on CCR projects.

• YTD capital expenditures were lower, primarily due to lower level of ECR spending on Environmental Air projects at Mill Creek, permitting delays related to CCR projects at Trimble County and timing related to the Cane Run Ash Pond closure and Blackstart projects.

Major Developments

• LKE was recognized as one of the Healthiest 100 Workplaces in the U.S. at the Corporate Wellness Conference in Washington D.C. The winners were honored for their commitment to employee health and exceptional corporate wellness programs. There were over 5,000 applicants and LKE [53rd] and Great River Energy [16th], a cooperative in Minnesota, were the only utilities to receive the award. This prestigious award follows several other wellness awards received earlier this year – a Healthiest Employer Award from *Business First* [a weekly business journal for Greater Louisville], and two awards from both the American Heart Association, and the Worksite Wellness Council of Louisville.

• LKE was also named a top utility in economic development by *Site Selection* magazine. As of September 30, 2016, LKE's efforts have assisted nearly 80 companies create approximately 5,310 jobs and invest over $1 billion in facility location or expansion projects in its service territories.

• LG&E recently priced $125 million of pollution control bonds at a variable rate of 0.90 percent with weekly reset. There was strong demand for the bonds from investors.

• LKE received the operating permit for Brown station's dry landfill allowing CCR material to be placed in the Phase 1 location.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms.

(3) The possible violation issues are believed to be minimal risk.

(4) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

LKE	Baa1		
LG&E		A1	P-2
KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Balance Sheet - LKE Consolidated — September 2016

($ Millions)

	9/30/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 11	$ 14	$ (3)	
Accounts Receivable (Trade)	394	374	20	
Inventory	292	272	20	
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	18	64	(46)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates and decrease in the FAC balance due to lower costs of native fuel expense.
Prepayments and other current assets	42	45	(3)	
Total Current Assets	757	769	(12)	
Property, Plant, and Equipment	11,477	11,784	(307)	
Intangible Assets	103	91	12	Amortization related to software classified as intangibles in budget versus PP&E in actuals.
Other Property and Investments	1	1	(0)	
Regulatory Assets Non Current	774	746	28	
Goodwill	997	997	-	
Other Long-term Assets	78	83	(4)	
Total Assets	**$ 14,187**	**$ 14,470**	**$ (283)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 225	$ 275	$ (50)	Primarily due to decrease in accruals partially offset by an increase in natural gas purchases.
Dividends Payable to Affiliated Companies	-	-	-	
Customer Deposits	55	52	3	
Derivative Liability	6	5	1	
Accrued Taxes	49	102	(53)	Due to difference in assumption related to expected income tax extension settlement and budget did not reflect delayed timing of property tax payments that occurred in Q1. In Q3, NOL addition and utilization were actualized causing accrued taxes to decrease by $16 mil ($-13 mil LGE, $-10 mil KU, +$7 mil LKE Other).
Regulatory Liabilities Current	26	30	(4)	
Other Current Liabilities	238	223	15	
Total Current Liabilities	599	687	(88)	
Debt - Affiliated Company	538	400	138	Increase in affiliate debt due to payoff of $75m credit facility and other funding needs. Budget assumed pay down of affiliate debt balance in March 2016 and quarterly pay off of any cash needed for operations on non quarter months. The forecast does not assume any pay off of the short term debt with affiliate. Prior years federal and state tax settlement generated $10.5 mil in cash at LKE Other.
Debt [1]	4,824	4,988	(164)	
Total Debt	5,362	5,388	(26)	
Deferred Tax Liabilities	1,673	1,641	33	
Investment Tax Credit	132	125	7	
Accum Provision for Pension & Related Benefits	242	269	(26)	Primarily due to additional pension contribution partially offset by roll forward of funded status, both of which are not included in budgeted amounts.
Asset Retirement Obligation	368	502	(134)	Primarily due to ARO revaluation to reflect updates in the estimated cash flows for ash and environmental ponds as a result of further engineering refinements to the design.
Regulatory Liabilities Non Current	911	866	45	
Derivative Liability	48	42	6	
Other Liabilities	180	193	(14)	
Total Deferred Credits and Other Liabilities	3,554	3,638	(84)	
Equity	4,672	4,758	(86)	
Total Liabilities and Equity	**$ 14,187**	**$ 14,470**	**$ (283)**	

[1] Includes all ST and LT debt. See Financing Activities page for details.
Note: Schedules may not sum due to rounding.

Balance Sheet - LG&E

September 2016

($ Millions)

	9/30/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 4	$ 5	$ (1)	
Accounts Receivable (Trade)	168	159	9	
Inventory	140	129	12	Higher actual due to lower than expected usage and higher than budgeted inventory levels.
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	6	25	(18)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates.
Prepayments and other current assets	46	34	12	Due to higher accounts receivable from affiliate related to charges for Trimble County CCR projects, inventory and fuel.
Total Current Assets	364	352	13	
Property, Plant, and Equipment	4,920	5,060	(140)	
Intangible Assets	6	(1)	7

Variance Explanations

• Current month lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $4 million and $2 million in lower gas margins and retail rate mechanism revenue.

• YTD lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $24 million, $4 million lower gas margins and $4 million lower retail rate mechanism revenue. This was partially offset by $5 million lower production costs and other margin components.

• Current month lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance and outage expenses and outside services.

• YTD lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance, storm restoration, vegetation management, uncollectible accounts and outside services.

• Current month capital expenditures were lower, primarily due to lower than budgeted ECR spending on CCR projects.

• YTD capital expenditures were lower, primarily due to lower level of ECR spending on Environmental Air projects at Mill Creek, permitting delays related to CCR projects at Trimble County and timing related to the Cane Run Ash Pond closure and Blackstart projects.

Major Developments

• On October 21, LG&E and KU filed "Notices of Intent" with the KPSC, indicating that the Company plans to file a request for base rate increases on November 23. A related press release was issued on November 1 and media coverage has been relatively fair and straight forward. The Company intends to seek increases in annual base rates of $94 million (8.5%) for LG&E Electric, $14 million (4.2%) for LG&E Gas, and $103 million (6.4%) for KU. The filings are based on a forecasted test year of July 1, 2017 through June 30, 2018, and a requested 10.23 percent ROE. If approved by the KPSC, new rates will be effective July 1, 2017.

• LKE received approval from the KPSC for its Solar Share community solar program. The site, near Simpsonville, Kentucky, is expandable to 4 MW, however, will be built in 500 KW sections based on customer interest.

• LKE deployed nearly 300 support personnel to three states to assist with recovery efforts during the aftermath of Hurricane Matthew.

• The Trimble County Landfill Project received Kentucky Division of Water's 401 Water Quality Certification, the first of three key environmental regulatory approvals needed to begin construction of the landfill. Two permits are still being processed by the KY Division of Waste Management and the Corps of Engineers.

• Yum! Brands became the first company in Louisville to partner with LG&E and KU in the deployment of electric vehicle ("EV") charging stations. In efforts to support employees and their lifestyles, Yum has provided an initial deployment of only one installation and are making it available to their employees/customers free of charge. LKE's new EV charging station program is being offered for commercial customers interested in hosting stations at their locations. LG&E and KU plan to install about 20 public charging stations across their service territories.

• Louisville Metro filed an amended complaint with the KPSC regarding the means by which LG&E would collect from customers the proposed gas franchise fee the city would charge LG&E. The KPSC had previously ruled that the city failed to establish a prima facie case in its original complaint. Regardless, the KPSC will ultimately rule on the substance of the matter either through this complaint proceeding or through LG&E's request for a declaratory order to which Louisville Metro has also filed a motion to dismiss.

Significant Future Events

• LG&E and KU will file a request for base rate increases on November 23, 2016.

(1) Full year forecast amount shown represents target.
(2) Net of cost recovery mechanisms.
(3) The possible violation issues are believed to be minimal risk.
(4) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Income Statement: Actual vs. Budget (YTD) - LKE Consolidated

October 2016

($ Millions)

	YTD			
	Actual	Budget	Variance	Comments
Revenues:				
Electric Revenues	$ 2,393	$ 2,527	$ (134)	Due to lower volumes driven by unfavorable weather, FAC revenue from lower fuel costs (see below), and industrial volumes.
Gas Revenues	221	251	(30)	See Gas Supply Expenses explanation below.
Total Revenues	2,614	2,778	(164)	
Cost of Sales:				
Fuel Electric Costs	668	757	90	Primarily due to lower commodity costs and decreased generation as a result of mild weather.
Gas Supply Expenses	88	114	26	Due to lower gas usage (mild weather) and prices as well as lower net purchases.
Purchased Power	46	49	2	
Other Electric Cost	132	151	19	Due to lower coal generation and lower ECR consumables expense and scrubber reactant expense.
Total Cost of Sales	935	1,070	136	
Gross Margin:				
Electric Margin	1,547	1,571	(24)	Lower margins primarily due to lower sales volumes resulting in lower retail electric base energy and demand revenue of $24 million and $4 million lower retail rate mechanism revenue. This was partially offset by $5 million lower production costs and other margin components.
Gas Margin	133	137	(4)	
Total Gross Margin	1,680	1,708	(28)	
Operating Expenses:				
O&M	579	614	35	Lower O&M primarily due to lower labor and burden costs along with savings in plant maintenance, storm restoration, vegetation management, uncollectible accounts and outside services.
Depreciation & Amortization	290	298	8	Lower depreciation primarily due to project completion and spending updates as well as higher level of retirements this year.
Taxes, Other than Income	47	47	(0)

Issuer	Moody's	Moody's	Moody's
LKE	Baa1		
LG&E		A1	P-2
KU		A1	P-2

Definitions

Issuers assessed **A** are judged to have upper-medium-grade intrinsic, or standalone, financial strength, and thus subject to low credit risk absent any possibility of extraordinary support from an affiliate or a government.

Obligations rated **Baa** are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Balance Sheet - LKE Consolidated — October 2016

($ Millions)

	10/31/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 16	$ 14	$ 1	
Accounts Receivable (Trade)	339	350	(11)	
Inventory	298	290	8	
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	21	66	(45)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates and decrease in the FAC balance due to lower costs of native fuel expense.
Prepayments and other current assets	40	42	(3)	
Total Current Assets	713	763	(50)	
Property, Plant, and Equipment	11,499	11,819	(320)	
Intangible Assets	101	87	14	Amortization related to software classified as intangibles in budget versus PP&E in actuals.
Other Property and Investments	1	1	(0)	
Regulatory Assets Non Current	771	748	23	
Goodwill	997	997	-	
Other Long-term Assets	79	83	(5)	
Total Assets	**$ 14,161**	**$ 14,499**	**$ (339)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 225	$ 278	$ (52)	Primarily due to decrease in accruals partially offset by an increase in natural gas purchases.
Dividends Payable to Affiliated Companies	-	-	-	
Customer Deposits	55	52	3	
Derivative Liability	6	5	1	
Accrued Taxes	48	98	(50)	Due to difference in assumption related to expected income tax extension settlement and budget did not reflect delayed timing of property tax payments that occurred in Q1. In Q3, NOL addition and utilization were actualized causing accrued taxes to decrease by $16 mil ($-13 mil LGE, $-10 mil KU, +$7 mil LKE Other).
Regulatory Liabilities Current	23	29	(6)	
Other Current Liabilities	231	235	(3)	
Total Current Liabilities	588	696	(109)	
Debt - Affiliated Company	553	404	149	Increase in affiliate debt due to payoff of $75m credit facility and other funding needs. Budget assumed pay down of affiliate debt balance in March 2016 and quarterly pay off of any cash needed for operations on non quarter months. The forecast does not assume any pay off of the short term debt with affiliate. Prior years federal and state tax settlement generated $10.5 mil in cash at LKE Other.
Debt [(1)]	4,777	4,986	(208)	
Total Debt	5,330	5,390	(60)	
Deferred Tax Liabilities	1,673	1,641	32	
Investment Tax Credit	132	125	7	
Accum Provision for Pension & Related Benefits	245	269	(24)	
Asset Retirement Obligation	366	504	(138)	Primarily due to ARO revaluation to reflect updates in the estimated cash flows for ash and environmental ponds as a result of further engineering refinements to the design.
Regulatory Liabilities Non Current	906	859	47	
Derivative Liability	44	42	2	
Other Liabilities	181	194	(13)	
Total Deferred Credits and Other Liabilities	3,548	3,634	(86)	
Equity	4,695	4,779	(84)	
Total Liabilities and Equity	**$ 14,161**	**$ 14,499**	**$ (339)**	

(1) Includes all ST and LT debt. See Financing Activities page for details.
Note: Schedules may not sum due to rounding.

Balance Sheet - LG&E

October 2016

($ Millions)

	10/31/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 5	$ 5	$ 0	
Accounts Receivable (Trade)	143	149	(5)	
Inventory	153	143	10	
Deferred Income Taxes	-	-	-	
Regulatory Assets Current	9	25	(16)	Primarily due to a decrease in the balance related to ECR as a result of an ECR roll-in to base rates.
Prepayments and other current assets	42	33	9	
Total Current Assets	353	354	(1)	
Property, Plant, and Equipment	4,935	5,081	(146)	
Intangible Assets	6	(1)	7

Regulatory Assets Non Current	431	417	14	
Goodwill	-	-	-	
Other Long-term Assets	20	19	1	
Total Assets	**$ 5,745**	**$ 5,871**	**$ (126)**	
Liabilities and Equity:				
Current Liabilities:				
Accounts Payable (Trade)	$ 153	$ 188	$ (35)	Primarily due to decrease in accruals partially offset by an increase in natural gas purchases.
Dividends Payable to Affiliated Companies	-	-	-	
Customer Deposits	26	25	1	
Derivative Liability	6	5	1	
Accrued Taxes	23	53	(29)	Due to difference in assumption related to expected income tax extension settlement and budget did not reflect delayed timing of property tax payments that occurred in Q1. Rebalancing NOL Addition in Q3 for the change in summer months income caused a $9 mil decrease in Accrued Taxes.
Regulatory Liabilities Current	6	13	(7)	
Other Current Liabilities	90	78	13	Primarily due to reclassification of ARO liability from long-term to current.
Total Current Liabilities	305	362	(57)	
Debt - Affiliated Company	38	-	38	Primarily due to increase in notes receivable from affiliate company for funds provided in money pool.
Debt [(1)]	1,730	1,819	(89)	
Total Debt	1,768	1,819	(51)	
Deferred Tax Liabilities	944	924	20	
Investment Tax Credit	37	34	3	
Accum Provision for Pension & Related Benefits	19	39	(20)	Primarily due to additional pension contribution partially offset by roll forward of funded status, both of which are not included in budgeted amounts.
Asset Retirement Obligation	106	154	(48)	Primarily due to ARO revaluation to reflect updates in the estimated cash flows for ash and environmental ponds as a result of further engineering refinements to the design and reclassification of a portion of ARO liability from long-term to current.
Regulatory Liabilities Non Current	365	343	22	
Derivative Liability	44	42	2	
Other Liabilities	86	89	(3)	
Total Deferred Credits and Other Liabilities	1,600	1,624	(24)	
Equity	2,072	2,066	6	
Total Liabilities and Equity	**$ 5,745**	**$ 5,871**	**$ (126)**	

[(1)] Includes all ST and LT debt.
Note: Schedules may not sum due to rounding.

Balance Sheet - KU

October 2016

($ Millions)

	10/31/2016	YTD Budget	Variance	Comments
Assets:				
Current Assets:				
Cash and Cash Equivalents	$ 10	$ 5	$ 5
