ATTORNEY FOR KSBA

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2016-00371

Response to Commission Staff's Request For Information To The Kentucky School Boards Association

Question No. 1

Responding Witness: Ronald Willhite

1. Refer to the Testimony of Ronald L. Willhite ("Willhite Testimony"), page 5, lines 38-39. State the number of schools served under rate schedule PS-Secondary and under rate schedule TODS.

Response:

KSBA does not maintain individual public school account utility data. Based on data provided by each of the six school districts who receive LGE service there are currently 111 PS-Secondary and 5 TODS public P – 12 learning center and support accounts.

For purposes of his testimony Mr. Willhite uses the term “school” consistent with his understanding of the Company’s use wherein each metered P - 12 learning center and support account is considered a customer. Because of the configuration of each P – 12 learning center service may be provided under multiple accounts. For example, there may be a separately metered main building, building addition, annex, auditorium or gym. Please see KSBA’s Response to the Company’s Question No. 10 for a list of the public school accounts.

Each district has other smaller ancillary electric service accounts such as sports fields, bus garages, central offices, pumps, portable units, signs, maintenance buildings and outdoor lighting. These accounts for the most part are typically served on Rates GS and PS.

Mr. Willhite is proposing implementation of RATE P – 12 PUBLIC SCHOOL Power Service and RATE P – 12 PUBLIC SCHOOL Time of Day Service for the learning center and support accounts with average kw loads greater than 50 kw. In addition, any sports field not presently served on Rate GS would be served on a

sports field rider to either rate Schedule PS or the proposed RATE P – 12 PUBLIC SCHOOL. Alternatively, the Availability Clause in Rate GS could be modified to permit service to sports fields.

All remaining public school accounts would be served on applicable rates.

LOUISVILLE GAS AND ELECTRIC COMPANY

CASE NO. 2016-00371

**Response to Commission Staff's Request For Information
To The Kentucky School Boards Association**

Question No. 3

Responding Witness: Ronald Willhite

3. Refer to the Willhite Testimony, RLW Exhibits 2 and 3. Explain how each rate on the tariffs was developed.

Response:

The basic service and energy rates are the current charges.

Billing units for FY2016 were provided by affected public school districts and accumulated for Rates PS – Secondary and TODS as recorded from actual bills. Using the determined excessive revenues of \$3,100,000 the change in the current demand charges were reduced by the per unit reduction (\$6.741 for PS-Secondary and \$2.132 for TODS) necessary to produce the \$3,100,000 reduction for current Rate PS - Secondary and TODS. The TODP demand charges were determined by reducing the secondary charges by \$.50 and then converting to a kva charge at a .9 power factor.

Please see Att #3 KSBA_Staff COSS LGE Bill DET Summary.
