| Company For A Certificate Of Public Convenience | ) |
| And Necessity To Construct A 138 kV             | ) |
| Transmission Line And Associated Facilities     | ) |
| In Pike And Floyd Counties (Enterprise Park     | ) |
| Economic and Area Improvements Project)         | ) |

Case No. 2018-00209

# KENTUCKY POWER COMPANY

# **RESPONSES TO**

# COMMISSION STAFF'S FIRST SET OF DATA REQUEST

October 2018

## **REQUEST**

Staff 1-1 Describe how notice was provided to each property owner required to receive notice pursuant to Commission regulations ; state specifically whether notice was sent to addresses listed in the Property Valuation Administrator (PVA) records for each county. If notice for any such property was not sent to the address listed in the PVA records, explain how and why it was determined that notice should be sent to a different address for each such property.

# **RESPONSE**

The identity of landowners to whom notice was to be provided as required by the Commission's regulations, and their contact information, initially was gathered from the records of the Floyd County Property Valuation Administrator and the Pike County Property Valuation Administrator. This information was amended or verified to the extent possible through subsequent investigation involving direct contact with individual landowners, field research, and review of the documents of record on file with the respective county court clerks. Notice was provided by mailings to the property owners of record in the offices of the two property valuation administrators, except where subsequent investigation revealed the records were incomplete or erroneous.

Please see the following page for information regarding the address to which the required notice was mailed. The absence of an entry in the "notes" column indicates that the indicated address to which the notice was mailed was obtained from the records of the appropriate property valuation administrator. An entry in the "notes" column indicates that the indicated address to which the notice was mailed was based on further investigation.

Witness:

Ranie K. Wohnhas

# **REQUEST**

Staff 1-2 Refer to the Application, paragraph 6, regarding the announced tenants at the Kentucky Enterprise Industrial Park. Provide the estimated peak load for Silverliner.

# **RESPONSE**

The current estimated peak load for Silverliner is 350-400kW.

#### **REQUEST**

Staff 1-3 Refer to the Application, paragraph 21, which provides estimated costs to construct the proposed transmission line and related infrastructure (Project). Provide a schedule that details the following costs , and include each amount by electric plant account:

a. \$19.9 million for transmission line work including right-of-way acquisition;

b. \$12.5 million for improvements to be made by Kentucky Power at the new substation;

c. \$0.7 million for the retirement of the Fords Branch 46 kV Substation;

d. \$0.5 million of the Cedar Creek 138/69/46 kV Substation upgrade.

e. Identify and explain any changes in the above costs due to the changes outlined in the Supplemental Testimony of Michael G. Lasslo (Lasslo Supplemental Testimony).

#### **RESPONSE**

a. Please see KPCO\_R\_KPSC\_1\_3a\_Attachment 1.pdf for the requested information.

b. Please see KPCO\_R\_KPSC\_1\_3b\_Attachment 1.pdf for the requested information.

c. Please see KPCO\_R\_KPSC\_1\_3c\_Attachment 1.pdf for the requested information.

d. Please see KPCO\_R\_KPSC\_1\_3d\_Attachment 1.pdf for the requested information.

e. The Company does not anticipate an increase in the cost estimate, which includes a contingency, as a result of the minor re-route described in the supplemental testimony of Mr. Lasslo. The route was modified to avoid geotechnical issues that were discovered during surveys and that would have increased the cost of the transmission line. The additional assets needed for the minor re-route can be absorbed through contingencies contained in the original estimate.

Witness: Michael G. Lasslo Ranie K. Wohnhas

Case No. 2018-00209 Commission Staff's First Set of Data Requests Order Dated September 18, 2018 Item No. 3d Attachment 1 Page 1 of 1

# **REQUEST**

Staff 1-4

Provide the manner through which Kentucky Power will finance the construction of this project.

## **RESPONSE**

Kentucky Power will construct, own, and finance 100 percent of the Project except for the six 138 kV circuit breakers (3000A 40 kA) arranged in a ring bus configuration in the Kewanee 138 kV Substation that will be owned 100 percent by Kentucky Transco. The Company anticipates that with Kentucky Transco assuming 100 percent economic responsibility for the six 138 kV Kewanee Substation circuit breakers, Kentucky Power will be able to fund through its normal operating cash flow and other internally generated funds the cost of the Project components of which it will own 100 percent . The cost associated with the Project components to be owned 100 percent by Kentucky Power does not involve sufficient capital outlay to affect the existing financial condition of Kentucky Power. Please also see the direct testimony of Mr. Wohnhas on page 20 and paragraph 21 of the application.

# **REQUEST**

Staff 1-5Provide the net book value , by electric plant account, for the Fords<br/>Branch 46 kV Substation and other plant that is to be retired as a result of<br/>the Project.

# **RESPONSE**

Please see KPCO\_R\_KPSC\_1\_5\_Attachment1.pdf for requested information.

## **REQUEST**

| Staff 1-6 | Refer to the Application, paragraph 22, which provides the annual operating cost of \$16,000 and the projected annual additional ad valorem tax of \$229,000 resulting from the Project. |
|-----------|--|
|           | a. Provide a breakdown of the operating cost by electric plant expense account.  |
|           | b. Provide a schedule showing the calculation of the \$229,000 in projected annual additional ad valorem tax resulting from the Project.   |
|           | c. Identify and explain any changes in the above costs due to the changes outlined in the Lass.lo Supplemental Testimony.  |

# **RESPONSE**

The Company inadvertently provided annual operating and ad valorem tax costs from another filing in its initial filing for Enterprise Park. Paragraph 22 of the application and page 20 of Mr. Wohnhas' testimony should reflect the correct estimated annual operating cost of \$12,500 and the correct estimated additional ad valorem tax of \$359,200. The answers below reflect the corrected estimates.

a. The estimated annual operating cost will be captured in account 571.

b. Please see KPCO\_R\_KPSC\_1\_6b\_Attachment 1.pdf. for the requested information.

c. The Company does not anticipate any changes to the estimated annual operating cost or the additional ad valorem tax resulting from the changes outlined in Mr. Lasslo's supplemental testimony.

etirement of Ford's Branch: \$1,236,424 represents the 2018 reported NBV of the substation prior to retirement. This represents the taxable value that would be eliminated post-retirement. While this substation is located in Pikeville, the city would see negligable tax impact as substation equipment is considered "manufacturing machinery" and is only taxed at the state level.

## **REQUEST**

Staff 1-7Refer to the Direct Testimony of Ranie K. Wohnhas, page 6, regarding<br/>the AEP Transmission Company, Inc.'s (Kentucky Transco) partial<br/>ownership of the Kewanee 138 kV Substation.

a. Provide the value of the estimated ownership share that Kentucky Transco will have in the project.

b. Provide the amount of financing that Kentucky Transco will contribute to the project.

c. Confirm that this is the first project in which Kentucky Power and Kentucky Transco have shared ownership of a project. If this cannot be confirmed, provide a list of all shared-ownership projects between Kentucky Power and Kentucky Transco.

d. Explain why it is beneficial to share ownership of the Kewanee 138 kV Substation.

e. Provide a cost-benefit analysis resulting from shared ownership of a project.

#### RESPONSE

a. There will be no joint ownership by Kentucky Transco and Kentucky Power of the individual components of the Kewanee 138 kV Substation. Kentucky Transco will own 100 percent of the six 138 kV circuit breakers (3000A 40 kA) arranged in a ring bus configuration at the Kewanee 138 kV Substation. Kentucky Power will have no ownership of, or investment in, the six 138 kV Kewanee Substation circuit breakers to be owned by Kentucky Transco.

The Kentucky Transco's investment in the six 138 kV circuit breakers (3000A 40 kA) arranged in a ring bus configuration at the Kewanee 138 kV Substation will be reflected only on Kentucky Transco's books.

The remaining components comprising the Kewanee 138 KV Substation, as well as the remainder of the Project itself, including the transmission line, transmission line structures, associated work in connection with the Cedar Creek 138/69/46 kV Substation upgrade and the retirement of the Fords Branch 46 kV Substation, will be owned 100 percent by Kentucky Power.

Please see KPCO\_R\_KPSC\_1\_7a\_Attachment 1.pdf for the costs associated with Kentucky Transco's 100 percent ownership of the six 138 kV Kewanee Substation circuit breakers and Kentucky Power's 100 percent ownership of the remaining Project components.

KPSC\_1\_7 (Cont'd)

b. See the Company's response to KPSC 1-7(a). There is no joint ownership by Kentucky Transco and Kentucky Power of any Kewanee 138 kV Station component or of the remainder of the Project, including the transmission line and structures. Kentucky Transco will bear 100 percent of the cost of the six 138 kV Kewanee Substation circuit breakers to be financed and owned by Kentucky Transco. Kentucky Transco will not provide Kentucky Power Company with any financing of, or investment in, the remaining portions of the Project, all of which will be financed and owned 100 percent by Kentucky Power.

c. The statement cannot be confirmed. Please see the Company's response to KPSC 1-7(a). There is no joint ownership by Kentucky Transco and Kentucky Power of any Kewanee 138 kV Station component, or of the remainder of the Project, including the transmission line and structures.

Information regarding the projects where Kentucky Power and Kentucky Transco separately and independently have owned 100 percent of individual project assets is attached as KPCO\_R\_KPSC\_1\_7c\_Attachment 1pdf.

d. Please see the Company's response to KPSC 1-7(a). There is no joint ownership by Kentucky Transco and Kentucky Power of any Kewanee 138 kV Station component, or of the remainder of the Project, including the transmission line and structures.

Kentucky Power is facing increasing capital investment demands. Currently, it has pending before this Commission three applications for certificates of public convenience and necessity, including this proceeding, to construct transmission facilities. These projects are required to meet PJM Baseline Project requirements as well as to provide the electric infrastructure needed to support critical economic development projects including Braidy Industries, Inc. and Ener-Blu. In addition, Kentucky Power anticipates seeking authority to construct additional transmission projects, including an anticipated filing during the first quarter of 2019 for Phase 2 of the EastPark 138 kV transmission line project. These capital projects, as well as other common capital projects, will place increased demand on Kentucky Power's free cash flow.

Moody's Investors Service on March 21, 2018 issued a report maintaining the Company's Baa2 credit rating, but revising its credit outlook for the Company from stable to negative. The Moody's website indicates that a negative outlook indicates a higher likelihood of a credit rating change over the medium term.[1] Moody's website also indicates that historically, approximately one-third of issuers assigned a negative outlook have been downgraded within 18 months of the assignment of a negative outlook. The recent assignment of a negative outlook by Moody's underscores the importance of maintaining, or preferably improving, Kentucky Power's credit metrics, particularly its ratio of cash flow from operations (excluding changes in working capital) to the Company's debt.

Kentucky Transco was formed to help mitigate the adverse effect of heavy transmission investment demands on the Company's credit metrics by assuming legal and economic

KPSC\_1\_7 (Cont'd)

responsibility for transmission-related projects, or, as is the case here, with 100 percent ownership of discrete portions of transmission projects. Doing so will not only relieve the "stress" such capital spending places on Kentucky Power's credit metrics, it frees up additional borrowing capacity for non-transmission projects.

In evaluating the Company's capital investment program prior to filing its application in this case, Kentucky Power determined that Kentucky Transco's 100 percent ownership of the six 138 kV circuit breakers (3000A 40 kA) arranged in a ring bus configuration in the Kewanee 138 kV Substation, and and its assumption of economic responsibility for the associated \$3.5M cost, will aid the Company's cash flow and credit metrics.

e. Please see the Company's response to KPSC 1-7(a). There is no joint ownership by Kentucky Transco and Kentucky Power of any Kewanee 138 kV Station component, or of the remainder of the Project, including the transmission line and structures. Kentucky Power has not performed a formal cost-benefit analysis. The reasons for, and benefits accruing from, Kentucky Transco's ownership of 100 percent of the six 138 kV circuit breakers (3000A 40 kA) arranged in a ring bus configuration in the Kewanee 138 kV Substation are provided in the Company's response to subsection d. above.
