

**COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION**

**IN THE MATTER OF THE ADJUSTMENT
OF NATURAL GAS RATES OF DUKE ENERGY KENTUCKY, INC.**

CASE NO. 2018-00261

FILING REQUIREMENTS

VOLUME 13

Duke Energy Kentucky, Inc.
Case No. 2018-00261
Forecasted Test Period Filing Requirements
Table of Contents

Vol. #	Tab #	Filing Requirement	Description	Sponsoring Witness
1	1	KRS 278.180	30 days' notice of rates to PSC.	Amy B. Spiller
1	2	807 KAR 5:001 Section 7(1)	The original and 10 copies of application plus copy for anyone named as interested party.	Amy B. Spiller
1	3	807 KAR 5:001 Section 12(2)	<p>(a) Amount and kinds of stock authorized.</p> <p>(b) Amount and kinds of stock issued and outstanding.</p> <p>(c) Terms of preference of preferred stock whether cumulative or participating, or on dividends or assets or otherwise.</p> <p>(d) Brief description of each mortgage on property of applicant, giving date of execution, name of mortgagor, name of mortgagee, or trustee, amount of indebtedness authorized to be secured thereby, and the amount of indebtedness actually secured, together with any sinking fund provisions.</p> <p>(e) Amount of bonds authorized, and amount issued, giving the name of the public utility which issued the same, describing each class separately, and giving date of issue, face value, rate of interest, date of maturity and how secured, together with amount of interest paid thereon during the last fiscal year.</p> <p>(f) Each note outstanding, giving date of issue, amount, date of maturity, rate of interest, in whose favor, together with amount of interest paid thereon during the last fiscal year.</p> <p>(g) Other indebtedness, giving same by classes and describing security, if any, with a brief statement of the devolution or assumption of any portion of such indebtedness upon or by person or corporation if the original liability has been transferred, together with amount of interest paid thereon during the last fiscal year.</p> <p>(h) Rate and amount of dividends paid during the five (5) previous fiscal years, and the amount of capital stock on which dividends were paid each year.</p> <p>(i) Detailed income statement and balance sheet.</p>	Robert H. "Beau" Pratt Michael Covington
1	4	807 KAR 5:001 Section 14(1)	Full name, mailing address, and electronic mail address of applicant and reference to the particular provision of law requiring PSC approval.	Amy B. Spiller
1	5	807 KAR 5:001 Section 14(2)	If a corporation, the applicant shall identify in the application the state in which it is incorporated and the date of its incorporation, attest that it is currently in good standing in the state in which it is incorporated, and, if it is not a Kentucky corporation, state if it is authorized to transact business in Kentucky.	Amy B. Spiller

1	6	807 KAR 5:001 Section 14(3)	If a limited liability company, the applicant shall identify in the application the state in which it is organized and the date on which it was organized, attest that it is in good standing in the state in which it is organized, and, if it is not a Kentucky limited liability company, state if it is authorized to transact business in Kentucky.	Amy B. Spiller
1	7	807 KAR 5:001 Section 14(4)	If the applicant is a limited partnership, a certified copy of its limited partnership agreement and all amendments, if any, shall be annexed to the application, or a written statement attesting that its partnership agreement and all amendments have been filed with the commission in a prior proceeding and referencing the case number of the prior proceeding.	Amy B. Spiller
1	8	807 KAR 5:001 Section 16 (1)(b)(1)	Reason adjustment is required.	Amy B. Spiller William Don Wathen, Jr.
1	9	807 KAR 5:001 Section 16 (1)(b)(2)	Certified copy of certificate of assumed name required by KRS 365.015 or statement that certificate not necessary.	Amy B. Spiller
1	10	807 KAR 5:001 Section 16 (1)(b)(3)	New or revised tariff sheets, if applicable in a format that complies with 807 KAR 5:011 with an effective date not less than thirty (30) days from the date the application is filed	Bruce L. Sailors
1	11	807 KAR 5:001 Section 16 (1)(b)(4)	Proposed tariff changes shown by present and proposed tariffs in comparative form or by indicating additions in italics or by underscoring and striking over deletions in current tariff.	Bruce L. Sailors
1	12	807 KAR 5:001 Section 16 (1)(b)(5)	A statement that notice has been given in compliance with Section 17 of this administrative regulation with a copy of the notice.	Amy B. Spiller
1	13	807 KAR 5:001 Section 16(2)	If gross annual revenues exceed \$5,000,000, written notice of intent filed at least 30 days, but not more than 60 days prior to application. Notice shall state whether application will be supported by historical or fully forecasted test period.	Amy B. Spiller
1	14	807 KAR 5:001 Section 16(3)	Notice given pursuant to Section 17 of this administrative regulation shall satisfy the requirements of 807 KAR 5:051, Section 2.	Amy B. Spiller
1	15	807 KAR 5:001 Section 16(6)(a)	The financial data for the forecasted period shall be presented in the form of pro forma adjustments to the base period.	Robert H. "Beau" Pratt
1	16	807 KAR 5:001 Section 16(6)(b)	Forecasted adjustments shall be limited to the twelve (12) months immediately following the suspension period.	Sarah E. Lawler Cynthia S. Lee Robert H. "Beau" Pratt
1	17	807 KAR 5:001 Section 16(6)(c)	Capitalization and net investment rate base shall be based on a thirteen (13) month average for the forecasted period.	Sarah E. Lawler
1	18	807 KAR 5:001 Section 16(6)(d)	After an application based on a forecasted test period is filed, there shall be no revisions to the forecast, except for the correction of mathematical errors, unless the revisions reflect statutory or regulatory enactments that could not, with reasonable diligence, have been included in the forecast on the date it was filed. There shall be no revisions filed within thirty (30) days of a scheduled hearing on the rate application.	Robert H. "Beau" Pratt

1	19	807 KAR 5:001 Section 16(6)(e)	The commission may require the utility to prepare an alternative forecast based on a reasonable number of changes in the variables, assumptions, and other factors used as the basis for the utility's forecast.	Robert H. "Beau" Pratt
1	20	807 KAR 5:001 Section 16(6)(f)	The utility shall provide a reconciliation of the rate base and capital used to determine its revenue requirements.	Sarah E. Lawler
1	21	807 KAR 5:001 Section 16(7)(a)	Prepared testimony of each witness supporting its application including testimony from chief officer in charge of Kentucky operations on the existing programs to achieve improvements in efficiency and productivity, including an explanation of the purpose of the program.	All Witnesses
1	22	807 KAR 5:001 Section 16(7)(b)	Most recent capital construction budget containing at minimum 3 year forecast of construction expenditures.	Robert H. "Beau" Pratt Gary J. Hebbeler
1	23	807 KAR 5:001 Section 16(7)(c)	Complete description, which may be in prefiled testimony form, of all factors used to prepare forecast period. All econometric models, variables, assumptions, escalation factors, contingency provisions, and changes in activity levels shall be quantified, explained, and properly supported.	Robert H. "Beau" Pratt
1	24	807 KAR 5:001 Section 16(7)(d)	Annual and monthly budget for the 12 months preceding filing date, base period and forecasted period.	Robert H. "Beau" Pratt
1	25	807 KAR 5:001 Section 16(7)(e)	Attestation signed by utility's chief officer in charge of Kentucky operations providing: 1. That forecast is reasonable, reliable, made in good faith and that all basic assumptions used have been identified and justified; and 2. That forecast contains same assumptions and methodologies used in forecast prepared for use by management, or an identification and explanation for any differences; and 3. That productivity and efficiency gains are included in the forecast.	Amy B. Spiller
1	26	807 KAR 5:001 Section 16(7)(f)	For each major construction project constituting 5% or more of annual construction budget within 3 year forecast, following information shall be filed: 1. Date project began or estimated starting date; 2. Estimated completion date; 3. Total estimated cost of construction by year exclusive and inclusive of Allowance for Funds Used During construction ("AFUDC") or Interest During construction Credit; and 4. Most recent available total costs incurred exclusive and inclusive of AFUDC or Interest During Construction Credit.	Robert H. "Beau" Pratt Gary J. Hebbeler
1	27	807 KAR 5:001 Section 16(7)(g)	For all construction projects constituting less than 5% of annual construction budget within 3 year forecast, file aggregate of information requested in paragraph (f) 3 and 4 of this subsection.	Robert H. "Beau" Pratt Gary J. Hebbeler

1	28	807 KAR 5:001 Section 16(7)(h)	Financial forecast for each of 3 forecasted years included in capital construction budget supported by underlying assumptions made in projecting results of operations and including the following information: 1. Operating income statement (exclusive of dividends per share or earnings per share); 2. Balance sheet; 3. Statement of cash flows; 4. Revenue requirements necessary to support the forecasted rate of return; 5. Load forecast including energy and demand (electric); 6. Access line forecast (telephone); 7. Mix of generation (electric); 8. Mix of gas supply (gas); 9. Employee level; 10. Labor cost changes; 11. Capital structure requirements; 12. Rate base; 13. Gallons of water projected to be sold (water); 14. Customer forecast (gas, water); 15. MCF sales forecasts (gas); 16. Toll and access forecast of number of calls and number of minutes (telephone); and 17. A detailed explanation of any other information provided.	Robert H. "Beau" Pratt Gary J. Hebbeler Benjamin Passty
1	29	807 KAR 5:001 Section 16(7)(i)	Most recent FERC or FCC audit reports.	Michael Covington
1	30	807 KAR 5:001 Section 16(7)(j)	Prospectuses of most recent stock or bond offerings.	Robert H. "Beau" Pratt
1	31	807 KAR 5:001 Section 16(7)(k)	Most recent FERC Form 1 (electric), FERC Form 2 (gas), or PSC Form T (telephone).	Michael Covington
2	32	807 KAR 5:001 Section 16(7)(l)	Annual report to shareholders or members and statistical supplements for the most recent 2 years prior to application filing date.	Robert H. "Beau" Pratt
3	33	807 KAR 5:001 Section 16(7)(m)	Current chart of accounts if more detailed than Uniform System of Accounts charts.	Michael Covington
3	34	807 KAR 5:001 Section 16(7)(n)	Latest 12 months of the monthly managerial reports providing financial results of operations in comparison to forecast.	Michael Covington
3	35	807 KAR 5:001 Section 16(7)(o)	Complete monthly budget variance reports, with narrative explanations, for the 12 months prior to base period, each month of base period, and subsequent months, as available.	Michael Covington Robert H. "Beau" Pratt
3-11	36	807 KAR 5:001 Section 16(7)(p)	SEC's annual report for most recent 2 years, Form 10-Ks and any Form 8-Ks issued during prior 2 years and any Form 10-Qs issued during past 6 quarters.	Michael Covington
11	37	807 KAR 5:001 Section 16(7)(q)	Independent auditor's annual opinion report, with any written communication which indicates the existence of a material weakness in internal controls.	Michael Covington
11	38	807 KAR 5:001 Section 16(7)(r)	Quarterly reports to the stockholders for the most recent 5 quarters.	Robert H. "Beau" Pratt

11	39	807 KAR 5:001 Section 16(7)(s)	Summary of latest depreciation study with schedules itemized by major plant accounts, except that telecommunications utilities adopting PSC's average depreciation rates shall identify current and base period depreciation rates used by major plant accounts. If information has been filed in another PSC case, refer to that case's number and style.	John J. Spanos
11	40	807 KAR 5:001 Section 16(7)(t)	List all commercial or in-house computer software, programs, and models used to develop schedules and work papers associated with application. Include each software, program, or model; its use; identify the supplier of each; briefly describe software, program, or model; specifications for computer hardware and operating system required to run program	Sarah E. Lawler
11	41	807 KAR 5:001 Section 16(7)(u)	If utility had any amounts charged or allocated to it by affiliate or general or home office or paid any monies to affiliate or general or home office during the base period or during previous 3 calendar years, file: 1. Detailed description of method of calculation and amounts allocated or charged to utility by affiliate or general or home office for each allocation or payment; 2. method and amounts allocated during base period and method and estimated amounts to be allocated during forecasted test period; 3. Explain how allocator for both base and forecasted test period was determined; and 4. All facts relied upon, including other regulatory approval, to demonstrate that each amount charged, allocated or paid during base period is reasonable.	Jeffrey R. Setser
11	42	807 KAR 5:001 Section 16(7)(v)	If gas, electric or water utility with annual gross revenues greater than \$5,000,000, cost of service study based on methodology generally accepted in industry and based on current and reliable data from single time period.	James E. Ziolkowski
11	43	807 KAR 5:001 Section 16(7)(w)	Local exchange carriers with fewer than 50,000 access lines need not file cost of service studies, except as specifically directed by PSC. Local exchange carriers with more than 50,000 access lines shall file: 1. Jurisdictional separations study consistent with Part 36 of the FCC's rules and regulations; and 2. Service specific cost studies supporting pricing of services generating annual revenue greater than \$1,000,000 except local exchange access: a. Based on current and reliable data from single time period; and b. Using generally recognized fully allocated, embedded, or incremental cost principles.	N/A
11	44	807 KAR 5:001 Section 16(8)(a)	Jurisdictional financial summary for both base and forecasted periods detailing how utility derived amount of requested revenue increase.	Sarah E. Lawler

11	45	807 KAR 5:001 Section 16(8)(b)	Jurisdictional rate base summary for both base and forecasted periods with supporting schedules which include detailed analyses of each component of the rate base.	Sarah E. Lawler Cynthia S. Lee Robert H. "Beau" Pratt John R. Panizza James E. Ziolkowski Michael Covington
11	46	807 KAR 5:001 Section 16(8)(c)	Jurisdictional operating income summary for both base and forecasted periods with supporting schedules which provide breakdowns by major account group and by individual account.	Sarah E. Lawler
11	47	807 KAR 5:001 Section 16(8)(d)	Summary of jurisdictional adjustments to operating income by major account with supporting schedules for individual adjustments and jurisdictional factors.	Sarah E. Lawler Cynthia S. Lee Robert H. "Beau" Pratt James E. Ziolkowski
11	48	807 KAR 5:001 Section 16(8)(e)	Jurisdictional federal and state income tax summary for both base and forecasted periods with all supporting schedules of the various components of jurisdictional income taxes.	John R. Panizza
11	49	807 KAR 5:001 Section 16(8)(f)	Summary schedules for both base and forecasted periods (utility may also provide summary segregating items it proposes to recover in rates) of organization membership dues; initiation fees; expenditures for country club; charitable contributions; marketing, sales, and advertising; professional services; civic and political activities; employee parties and outings; employee gifts; and rate cases.	Sarah E. Lawler
11	50	807 KAR 5:001 Section 16(8)(g)	Analyses of payroll costs including schedules for wages and salaries, employee benefits, payroll taxes, straight time and overtime hours, and executive compensation by title.	Sarah E. Lawler Renee H. Metzler
11	51	807 KAR 5:001 Section 16(8)(h)	Computation of gross revenue conversion factor for forecasted period.	Sarah E. Lawler
11	52	807 KAR 5:001 Section 16(8)(i)	Comparative income statements (exclusive of dividends per share or earnings per share), revenue statistics and sales statistics for 5 calendar years prior to application filing date, base period, forecasted period, and 2 calendar years beyond forecast period.	Michael Covington Robert H. "Beau" Pratt
11	53	807 KAR 5:001 Section 16(8)(j)	Cost of capital summary for both base and forecasted periods with supporting schedules providing details on each component of the capital structure.	Robert H. "Beau" Pratt
11	54	807 KAR 5:001 Section 16(8)(k)	Comparative financial data and earnings measures for the 10 most recent calendar years, base period, and forecast period.	Cynthia S. Lee Robert H. "Beau" Pratt Michael Covington
11	55	807 KAR 5:001 Section 16(8)(l)	Narrative description and explanation of all proposed tariff changes.	Bruce L. Sailors
11	56	807 KAR 5:001 Section 16(8)(m)	Revenue summary for both base and forecasted periods with supporting schedules which provide detailed billing analyses for all customer classes.	Bruce L. Sailors
11	57	807 KAR 5:001 Section 16(8)(n)	Typical bill comparison under present and proposed rates for all customer classes.	Bruce L. Sailors
11	58	807 KAR 5:001 Section 16(9)	The commission shall notify the applicant of any deficiencies in the application within thirty (30) days of the application's submission. An application shall not be accepted for filing until the utility has cured all noted deficiencies.	William Don Wathen, Jr.

11	59	807 KAR 5:001 Section (17)(1)	<p>(1) Public postings.</p> <p>(a) A utility shall post at its place of business a copy of the notice no later than the date the application is submitted to the commission.</p> <p>(b) A utility that maintains a Web site shall, within five (5) business days of the date the application is submitted to the commission, post on its Web sites:</p> <ol style="list-style-type: none"> 1. A copy of the public notice; and 2. A hyperlink to the location on the commission's Web site where the case documents are available. <p>(c) The information required in paragraphs (a) and (b) of this subsection shall not be removed until the commission issues a final decision on the application.</p>	Amy B. Spiller
11	60	807 KAR 5:001 Section 17(2)	<p>(2) Customer Notice.</p> <p>(a) If a utility has twenty (20) or fewer customers, the utility shall mail a written notice to each customer no later than the date on which the application is submitted to the commission.</p> <p>(b) If a utility has more than twenty (20) customers, it shall provide notice by:</p> <ol style="list-style-type: none"> 1. Including notice with customer bills mailed no later than the date the application is submitted to the commission; 2. Mailing a written notice to each customer no later than the date the application is submitted to the commission; 3. Publishing notice once a week for three (3) consecutive weeks in a prominent manner in a newspaper of general circulation in the utility's service area, the first publication to be made no later than the date the application is submitted to the commission; or 4. Publishing notice in a trade publication or newsletter delivered to all customers no later than the date the application is submitted to the commission. <p>(c) A utility that provides service in more than one (1) county may use a combination of the notice methods listed in paragraph (b) of this subsection.</p>	Amy B. Spiller

11	61	807 KAR 5:001 Section 17(3)	<p>(3) Proof of Notice. A utility shall file with the commission no later than forty-five (45) days from the date the application was initially submitted to the commission:</p> <p>(a) If notice is mailed to its customers, an affidavit from an authorized representative of the utility verifying the contents of the notice, that notice was mailed to all customers, and the date of the mailing;</p> <p>(b) If notice is published in a newspaper of general circulation in the utility's service area, an affidavit from the publisher verifying the contents of the notice, that the notice was published, and the dates of the notice's publication; or</p> <p>(c) If notice is published in a trade publication or newsletter delivered to all customers, an affidavit from an authorized representative of the utility verifying the contents of the notice, the mailing of the trade publication or newsletter, that notice was included in the publication or newsletter, and the date of mailing.</p>	Amy B. Spiller
----	----	--------------------------------	--	----------------

11	62	807 KAR 5:001 Section 17(4)	<p>(4) Notice Content. Each notice issued in accordance with this section shall contain:</p> <p>(a) The proposed effective date and the date the proposed rates are expected to be filed with the commission;</p> <p>(b) The present rates and proposed rates for each customer classification to which the proposed rates will apply;</p> <p>(c) The amount of the change requested in both dollar amounts and percentage change for each customer classification to which the proposed rates will apply;</p> <p>(d) The amount of the average usage and the effect upon the average bill for each customer classification to which the proposed rates will apply, except for local exchange companies, which shall include the effect upon the average bill for each customer classification for the proposed rate change in basic local service;</p> <p>(e) A statement that a person may examine this application at the offices of (utility name) located at (utility address);</p> <p>(f) A statement that a person may examine this application at the commission's offices located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or through the commission's Web site at http://psc.ky.gov;</p> <p>(g) A statement that comments regarding the application may be submitted to the Public Service Commission through its Web site or by mail to Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602;</p> <p>(h) A statement that the rates contained in this notice are the rates proposed by (utility name) but that the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice;</p> <p>(i) A statement that a person may submit a timely written request for intervention to the Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, establishing the grounds for the request including the status and interest of the party; and</p> <p>(j) A statement that if the commission does not receive a written request for intervention within thirty (30) days of initial publication or mailing of the notice, the commission may take final action on the application.</p>	Bruce L. Sailors
11	63	807 KAR 5:001 Section 17(5)	(5) Abbreviated form of notice. Upon written request, the commission may grant a utility permission to use an abbreviated form of published notice of the proposed rates, provided the notice includes a coupon that may be used to obtain all the required information. ABS-3 - Duke Energy Midwest Fastrack June 2017 Update

I. INTRODUCTION

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Amy B. Spiller, and my business address is 139 East Fourth Street,
3 Cincinnati, Ohio 45202.

4 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5 A. I am employed by Duke Energy Business Services LLC (DEBS), as State
6 President of Duke Energy Kentucky, Inc., (Duke Energy Kentucky or the
7 Company) and its parent, Duke Energy Ohio, Inc. (Duke Energy Ohio). DEBS
8 provides various administrative and other services to Duke Energy Kentucky and
9 other affiliated companies of Duke Energy Corporation (Duke Energy).

10 **Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND**
11 **PROFESSIONAL EXPERIENCE.**

12 A. I received a bachelor's degree in economics and management from Albion
13 College in Michigan and a law degree from Wake Forest University in Winston-
14 Salem, N.C. Following law school, I spent two years working for Business Laws,
15 Inc., a legal publishing company in northeast Ohio. Then, from 1993 to 2003, I
16 rose from associate to partner at Wilson & Markesbery Co., L.P.A., a small
17 insurance defense law firm in Cincinnati, Ohio.

18 I joined Cinergy Corp., (Cinergy) in 2003 as an associate general counsel,
19 focusing on litigation matters. In 2008, following the 2006 merger between
20 Cinergy and Duke Energy, I was promoted to deputy general counsel, assuming
21 responsibility relative to Duke Energy's strategic planning in Ohio and Kentucky.
22 I was also responsible for advancing Duke Energy's rate and regulatory initiatives

1 before the Public Utilities Commission of Ohio and the Kentucky Public Service
2 Commission (Commission). In January of this year, I was named Vice President
3 of Government and Community Affairs for Duke Energy Ohio, where I was
4 responsible for managing state government and regulatory policies, strategies, and
5 relationships affecting Duke Energy Ohio's interests and those of our Ohio
6 customers. On June 1, 2018, I was named to my current position of State
7 President, Duke Energy Ohio and Duke Energy Kentucky.

8 **Q. PLEASE DESCRIBE YOUR DUTIES AS STATE PRESIDENT, DUKE**
9 **ENERGY KENTUCKY.**

10 A. As State President, Duke Energy Kentucky, I am responsible for ensuring that our
11 customers continue to have access to safe, reliable, adequate, reasonable, and
12 affordable electric and natural gas service and that these services are provided in
13 accordance with applicable federal and state laws and regulations. I am also
14 involved in external efforts relating to governmental and regulatory affairs,
15 interacting with state and community leaders and regulators on matters relevant to
16 Duke Energy Kentucky's business and presence in the Commonwealth. Finally, I
17 am responsible for the Company's community relations and economic
18 development efforts, as well as Duke Energy's charitable contributions in the
19 Northern Kentucky/Greater Cincinnati region.

20 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY**
21 **PUBLIC SERVICE COMMISSION?**

22 A. No.

1 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THESE**
2 **PROCEEDINGS?**

3 A. My testimony provides an overview of Duke Energy Kentucky's natural gas
4 business operations and community involvement in our northern Kentucky
5 service territory. I discuss Duke Energy Kentucky's levels of customer
6 satisfaction and how the constructive regulatory treatment sought in these
7 proceedings will enable the Company to meet our customers' expectations of safe,
8 reliable, adequate, reasonable, and affordable natural gas service. I then discuss
9 the major developments since the Company's last natural gas base rate case, Case
10 No. 2009-00202 (2009 Rate Case), including, but not limited to, the
11 implementation and success of our accelerated service replacement program
12 (ASRP), and the Company's deployment of advanced metering infrastructure
13 (AMI) and automated meter reading (AMR) devices for natural gas service.

14 I next provide an overview of Duke Energy Kentucky's need for an
15 increase in natural gas rates and the reasonableness of this request. In this regard,
16 I also address the Company's proposals to implement a new cost recovery
17 mechanism for weather normalization adjustments (WNA) to the Company's
18 rates. I also introduce the other witnesses who testify on the Company's behalf
19 and, in doing so; provide an overview of their testimony.

20 I sponsor several Filing Requirements (FR), including those required
21 under 807 KAR 5:001: FR 14(1) through FR 14(4), FR 16(1)(b)(1), FR
22 16(1)(b)(2), FR 16(1)(b)(5), FR 16(2), and FR 16(3). I discuss the existing
23 programs to achieve improvements in efficiency and productivity and the purpose

1 of each program, as required by FR 16(7)(a). I provide the management statement
2 of attestation, required by FR 16(7)(e), concerning the forecasted financial data.
3 Finally, I sponsor the affidavit in support of the notice requirements under FR
4 17(1) through (3).

II. OVERVIEW OF KENTUCKY OPERATIONS

A. COMPANY OVERVIEW

5 **Q. PLEASE DESCRIBE DUKE ENERGY KENTUCKY'S UTILITY**
6 **OPERATIONS IN NORTHERN KENTUCKY.**

7 A. Duke Energy Kentucky provides natural gas service to approximately 99,500
8 customers in Bracken, Boone, Campbell, Gallatin, Grant, Kenton, and Pendleton
9 counties in northern Kentucky.¹ The Company owns, operates, and maintains
10 approximately 1,453 miles of gas mains on our natural gas distribution system.

11 Duke Energy Kentucky's natural gas customer classes include
12 approximately 92,000 residential customers, 6,500 commercial customers, and
13 just over 200 industrial customers. Additionally, the Company provides service to
14 numerous public authorities, as well as firm and interruptible transportation
15 customers. Although not heavily industrialized, our relatively densely populated
16 territory consists of a diverse mix of commercial and industrial customers that
17 includes automotive suppliers, food production, transportation, colleges and
18 universities, manufacturing and retail, and health care providers.

19 The Company's local operations as it relates to natural gas utility service
20 are as follows:

¹ Duke Energy Kentucky also provides electric service to approximately 146,000 customers in Boone, Campbell, Gallatin, Grant, Kenton, and Pendleton counties.

- 1 • Cincinnati, Ohio – the headquarters for Duke Energy Kentucky, the
2 Queens Gate meter testing facility, and Kellogg Avenue Resource
3 Center
- 4 • Monroe, Ohio - Todhunter Resource Center
- 5 • Monford Heights, Ohio - Resource Center
- 6 • Erlanger, Kentucky – Duke Energy Kentucky’s construction and
7 maintenance facility
- 8 • Covington, Kentucky – Duke Energy Kentucky’s meter reading
9 operations

10 From these locations, Duke Energy Kentucky directs the planning,
11 construction, operation, and maintenance of our natural gas transmission and
12 distribution systems.

13 **Q. PLEASE PROVIDE AN OVERVIEW OF THE DUKE ENERGY**
14 **CORPORATE AND BUSINESS STRUCTURE.**

15 A. Duke Energy is one of the largest utility companies in the United States. Through
16 a series of mergers and acquisitions, including the 2006 merger with Cinergy, the
17 2012 merger with Progress Energy, and the more recent merger with Piedmont
18 Natural Gas Company (Piedmont), Duke Energy now serves approximately 7.4
19 million electric customers and over 1.5 million natural gas customers,
20 representing a population of over 24 million in seven states, comprising
21 Kentucky, Ohio, Indiana, Florida, North Carolina, South Carolina, and Tennessee.

22 **Q. PLEASE DESCRIBE HOW BEING A PART OF THE DUKE ENERGY**
23 **FAMILY OF COMPANIES ASSISTS DUKE ENERGY KENTUCKY IN**
24 **PROVIDING SAFE, RELIABLE, ADEQUATE, REASONABLE, AND**
25 **AFFORDABLE NATURAL GAS SERVICE TO ITS KENTUCKY**
26 **CUSTOMERS.**

1 A. As further explained by Duke Energy Kentucky witness Jeffrey R. Setser, Duke
2 Energy Kentucky is a party to multiple Commission-approved affiliate service
3 agreements that provide the Company with access to a vast level of resources,
4 experience, and expertise beyond what Duke Energy Kentucky could achieve as a
5 stand-alone utility.² These various agreements include, among other things, a
6 service company/operating company agreement and an operating company
7 agreement. Under the former, Duke Energy Kentucky and, by extension, our
8 customers, benefit from the defined pool of expert services of attorneys,
9 accountants, engineers, customer service representatives, and other professionals
10 whose time and cost is shared among all utility affiliates within Duke Energy.
11 Under the latter agreement, Duke Energy Kentucky and our customers benefit
12 from the services provided by affiliated utility companies that furnish natural gas
13 and electric service in seven states.

14 The recent merger with Piedmont brought additional operational
15 experience from the natural gas industry. The Duke Energy Gas Operations team
16 now consists of many legacy Piedmont leaders who have industry-leading
17 experience in safely managing natural gas systems. In addition to the Kentucky
18 and Ohio natural gas operations, the Duke Energy natural gas system now
19 consists of 22,000 miles of distribution line and nearly 3,000 miles of
20 transmission lines in North Carolina, South Carolina, and Tennessee.

² The Commission approved these services agreements in Case No. 2005-00228, involving the Duke Energy/Cinergy merger, again in Case No. 2011-00124 involving the merger between Duke Energy and Progress Energy, and most recently in Case No. 2016-00312 to incorporate Piedmont as an affiliate party to these agreements.

1 Consequently, Duke Energy Kentucky’s customers have access to
2 resources, including a highly trained and dedicated workforce from multiple
3 jurisdictions that are familiar with the Company’s systems and are experienced in
4 the safe operation of the Company’s utility infrastructure, thereby enabling the
5 continued and efficient operation of Duke Energy Kentucky’s natural gas utility
6 system. Pursuant to Commission-approved service agreements, Duke Energy
7 Kentucky is allocated only a portion of these costs. Although this structure affords
8 significant benefit to our customers, it is not a structure with which they have
9 reason to take notice. Indeed, the legal entity structure and relationships discussed
10 above are essentially invisible to and seamless for our Kentucky customers, who
11 receive all of their utility services from Duke Energy Kentucky. This corporate
12 structure is designed such that our Kentucky customers will continue to receive
13 safe, reliable, adequate, reasonable and affordable natural gas service without
14 regard to corporate structure or organization.

B. COMMUNITY ENGAGEMENT

15 **Q. PLEASE GIVE AN OVERVIEW OF DUKE ENERGY KENTUCKY’S**
16 **ECONOMIC DEVELOPMENT ACTIVITIES.**

17 A. Duke Energy Kentucky embraces its responsibility to promote economic
18 development in the communities in which we do business. We appreciate that
19 access to affordable, reliable utility service is a critical factor in a company’s
20 decision about where to locate or expand its facilities and Duke Energy Kentucky
21 is well positioned to meet our customers’ energy needs and attract job-creating
22 industry and capital investment to our service territory. However, business clients

1 need more than reliable utility service. They also need readily available building
2 sites, access to state and local incentives, flexible workforce training programs,
3 and proximity to a community of customers and business partners. Duke Energy
4 Kentucky assists in meeting these needs through our partnerships with our local
5 communities and the Commonwealth of Kentucky.

6 In 2017, Site Selection magazine named Duke Energy to its Top 10
7 Utilities in Site Selection for North America for the nineteenth consecutive year.
8 Additionally, Site Selection recognized Duke Energy's "Site Readiness" program
9 as a best practice. This program is designed to improve large tracts of industrial
10 land in the service territory, moving them closer to being "fully marketable." In
11 collaboration with local economic development organizations, Duke Energy
12 offers funding to local communities that have taken advantage of the program and
13 spent dollars improving participant sites. In addition to this successful program,
14 our economic development team collaborates with local, regional, and state
15 economic development professionals in attracting new business and jobs to our
16 communities, whether in the field of manufacturing, logistics, distribution, or
17 professional services.

18 Duke Energy Kentucky's strategic partnerships and board memberships
19 with local and regional economic development efforts such as the Regional
20 Economic Development Initiative (REDI) Cincinnati and Northern Kentucky Tri-
21 ED, combined with Duke Energy Kentucky's competitive rates, have resulted in a
22 number of economic development successes in northern Kentucky.

1 We estimate that our cooperative efforts, along with those of state and
2 local economic development officials, have contributed to the creation of nearly
3 21,000 northern Kentucky jobs and more than \$3 billion of capital investment in
4 northern Kentucky since 2006.

5 Duke Energy Kentucky's employees have actively served on several
6 boards and committees of organizations in the community that promote economic
7 development in the region. Some of these organizations include:

- 8 • Catalytic Funding Corp. of Northern Kentucky
- 9 • GROW NKY
- 10 • Northern Kentucky Tri-ED
- 11 • Northern Kentucky Chamber of Commerce
- 12 • Kentucky Chamber of Commerce
- 13 • Kentucky Association of Economic Development
- 14 • NKY Regional Alliance
- 15 • Horizon Community Funds of Northern Kentucky
- 16 • REDI
- 17 • Cintrifuse
- 18 • Cincinnati USA Regional Chamber of Commerce
- 19 • Cincinnati Business Committee, Economic Development
- 20 • Cincinnati Center City Development Corporation
- 21 • Greater Cincinnati Chinese Chamber of Commerce

22 **Q. DESCRIBE DUKE ENERGY KENTUCKY'S CHARITABLE GIVING**
23 **PHILOSOPHY.**

1 A. Duke Energy Kentucky has made good corporate citizenship a priority by giving
2 back to the communities we serve. Since 2009, Duke Energy Kentucky and the
3 Duke Energy Foundation have contributed approximately \$4 million in
4 shareholder dollars to Kentucky charitable organizations. But our contributions
5 are not only financial in nature. Rather, consistent with the culture of Duke
6 Energy, our employees and retirees and their families regularly give back to our
7 communities by volunteering their time. Indeed, during 2017 alone, we had
8 fifteen volunteer events in Kentucky where employees and retirees and their
9 families volunteered over 700 hours of their time.

10 **Q. DESCRIBE THE METHODS EMPLOYED BY DUKE ENERGY**
11 **KENTUCKY TO ENGAGE WITH CUSTOMERS.**

12 A. Our customers depend on the services we provide to power their lives. Moreover,
13 in this very diverse and dynamic environment, it is important that our customers
14 are able to engage with Duke Energy Kentucky via a variety of platforms.
15 Consequently, customers have opportunities to interact with the Company through
16 various customer service channels both directly and remotely. These programs
17 include:

- 18 • Focus Groups for small/medium businesses
- 19 • Contact Centers
- 20 • Business Service Center
- 21 • Pay Agents
- 22 • Automated Phone Service
- 23 • Enhanced Web Functionality for Online Services

1 **Q. DO CUSTOMERS HAVE OPTIONS FOR BOTH MANAGING AND**
2 **PAYING THEIR BILLS?**

3 A. Yes. Duke Energy Kentucky has a number of programs designed to allow
4 customers to conveniently manage their bills:

- 5 • Budget Billing
- 6 • Adjusted Due Date
- 7 • Extended Payment Agreements
- 8 • Home Energy Assistance

9 Although customers are able to pay their bills using the United States
10 Postal Service, they also have other options. The Company offers a number of
11 convenient bill payment options, which include:

- 12 • Speedpay
- 13 • e-bill
- 14 • Payment Advantage

C. CUSTOMER SATISFACTION

15 **Q. HOW DOES DUKE ENERGY KENTUCKY MEASURE PERFORMANCE**
16 **FOR PROVIDING HIGH QUALITY CUSTOMER SERVICE?**

17 A. Duke Energy Kentucky strives to consistently provide high quality customer
18 service. We currently measure customer satisfaction performance through two
19 primary tools: the annual J.D. Power Natural Gas Utility Residential Customer
20 Satisfaction Study (J.D. Power Study) and Duke Energy's proprietary transaction
21 survey – Fastrack.

1 **Q. PLEASE DESCRIBE THE J.D. POWER STUDIES AND DUKE ENERGY**
2 **KENTUCKY'S PERFORMANCE UNDER THOSE STUDIES.**

3 A. J.D. Power is a well-known measure of consumer opinion and customer
4 satisfaction in many key industries. J.D. Power annually surveys natural gas
5 utilities' residential customers regarding their overall satisfaction with their
6 utility, as well as key areas of their relationship. Duke Energy Midwest (Kentucky
7 and Ohio) participates in these annual natural gas utility studies.

8 The J.D. Power Study calculates overall customer satisfaction based on six
9 performance areas: (1) safety and reliability; (2) billing and payment; (3) price
10 and value; (4) corporate citizenship; (5) communications; and (6) customer
11 service. J.D. Power published the results for Waves 1-3 of its 2018 Customer
12 Satisfaction Study on June 5, 2018.³ Attachment ABS-1 is an excerpt from this
13 recent publication that provides a relevant summary of residential customer
14 satisfaction for the country's 84 midsize and large natural gas utilities.

15 Although the results indicate that our overall satisfaction is below the
16 industry average in the Midwest Region, Duke Energy Midwest is a top quartile
17 performer in Field Customer Service and is above the industry average in other
18 categories. These other categories are efforts to help customers reduce their bills
19 and involvement in local charities and civic organizations. The results indicate
20 that Duke Energy has a number of strengths compared to our peers nationally and

³ The 2018 J.D. Power Gas Utility Residential Customer Satisfaction Study is comprised of four waves of interviews: 1) September/October 2017; 2) December 2017/January 2018; 3) March/April 2018; and 4) June/July 2018. The June/July 2018 wave of results will be released on or about September 11, 2018.

1 will prompt us to continue focusing on areas where we are not above the industry
2 average.

3 **Q. PLEASE DESCRIBE FAST TRACK AND THE COMPANY'S FASTRACK**
4 **PERFORMANCE.**

5 A. In addition to the independent J.D. Power Study, our internal customer
6 satisfaction measurements continue to reflect strong performance in meeting the
7 needs of our customers. Through Fastrack, Duke Energy's proprietary transaction
8 study, we regularly survey residential customers who have had a recent service
9 interaction with Duke Energy Kentucky.

10 Fastrack is administered to a random sample of customers roughly 24-48
11 hours after these customers have a service interaction/experience with the
12 Company. Customers respond to this live phone interview and provide ratings on
13 their overall satisfaction, as well as ratings on each part of their end-to-end
14 experience. Two key processes are measured by these surveys, reflecting the
15 majority of natural gas interactions customers have with Duke Energy Kentucky:
16 (1) service initiation requests (requests to turn on or transfer service); and (2)
17 billing issues (billing inquiries/requests/complaints). The results of these surveys
18 enable Duke Energy Kentucky to identify what aspects of the customer journey
19 are working well and what aspects could be enhanced to better the customer
20 experience. These surveys are conducted daily (except Sundays and major
21 holidays) throughout the year by an independent research firm – Bellomy
22 Research. Since 2014, we have accumulated over 3,000 Duke Energy Kentucky
23 survey responses, which represent the “voice” of our Kentucky customers.

1 The results are expressed on the basis of the percentage of respondents
2 who are highly satisfied and the percentage who are least satisfied. Using a
3 ranking system of zero to ten, customers who rated the Company an eight or
4 higher are considered to be highly satisfied and those who rated the Company at a
5 four or below are considered to be least satisfied. Attachments ABS-2 and ABS-3
6 are copies of the Q-1 Duke Energy Midwest Fastrack Quarterly Report and the
7 Duke Energy Midwest Fastrack June 2018 Update, respectively.

8 Duke Energy Kentucky's customer satisfaction scores indicate that overall
9 customer satisfaction is relatively high and either steady or improving. Through
10 the first six months of 2018, customers provided the following ratings:

- 11 • **Service Initiation (Natural gas):** 91 percent of Duke Energy
12 Kentucky residential customers were highly satisfied with their overall
13 Service Initiation experience; and
- 14 • **Billing Questions/Requests/Complaints:** 84 percent of Duke Energy
15 Kentucky residential customers were highly satisfied with their overall
16 Billing experience.

17 These surveys also indicate that our customers want timely gas service
18 initiation and better communication to keep them informed. While 91 percent of
19 our Kentucky customers are highly satisfied with service initiation, according to
20 customer comments, we have room for improvement on timely appointment
21 windows and better communication to prevent multiple call backs.

**D. DEVELOPMENTS SINCE THE COMPANY'S
LAST NATURAL GAS RATE CASE**

1 **Q. PLEASE SUMMARIZE THE SIGNIFICANT OPERATIONAL**
2 **DEVELOPMENTS THAT HAVE OCCURRED SINCE THE 2009 RATE**
3 **CASE.**

4 A. With the 2009 Rate Case, Duke Energy Kentucky completed our Accelerated
5 Main Replacement Program, the first in the state to begin such a program and the
6 first to complete the program. In 2016, the Company implemented our ASRP to
7 methodically replace pre-1971, steel and other metallic unprotected services
8 (main-to-curb and curb-to-meter) that remained on the Company's natural gas
9 delivery system. With the Application in these proceedings, the Company is
10 concluding our ASRP initiative, having completed the program both ahead of
11 schedule and under initial cost projections.

12 In July of 2012, Duke Energy completed its merger with Progress Energy.
13 This combination has expanded Duke Energy Kentucky's access to, and the
14 availability of, resources and expertise and resulted in the implementation of best
15 practices. The positive attributes of this merger are reflected in annual reports
16 filed with the Commission.

17 In October 2016, Duke Energy completed its merger with Piedmont,
18 further expanding its resource base and expertise in the area of natural gas
19 delivery. Duke Energy Kentucky now benefits from a larger pool of natural gas
20 expertise, which enhances our ability to provide safe, reliable, adequate,
21 reasonable, and affordable natural gas service.

1 **Q. PLEASE SUMMARIZE THE SIGNIFICANT NATURAL GAS**
2 **INVESTMENTS THE COMPANY HAS MADE SINCE THE 2009 RATE**
3 **CASE.**

4 A. Duke Energy Kentucky continues to make prudent operational decisions and
5 investments in our natural gas delivery system. In 2016, Duke Energy Kentucky
6 commenced construction of our Big Bone natural gas pipeline-a new, twelve-inch
7 natural gas pipeline. This pipeline spans approximately ten miles, from Walton to
8 Big Bone, Kentucky, and was needed in response to load growth and from a
9 system reliability standpoint. The Company has recently completed construction
10 of and placed this pipeline into service.

11 More recently, the Company received approval and commenced
12 deployment of an AMI/AMR metering system. This deployment will provide the
13 platform for the Company to provide better communication with our customers
14 regarding their usage. Duke Energy Kentucky witness Gary Hebbeler discusses
15 these investments in greater detail in his direct testimony.

16 **Q. PLEASE BRIEFLY DISCUSS THE NEED FOR CONTINUING**
17 **INVESTMENTS IN THE DISTRIBUTION SYSTEM.**

18 A. Duke Energy Kentucky has regularly made prudent investments in our natural gas
19 delivery system, as needed for its continued safe, reliable, and efficient operation.
20 And, over the years, the system has evolved, consistent with applicable standards,
21 changes in technology, and, importantly, changes in our customers' expectations.
22 Our investments and the manner in which they are made have thus also evolved.
23 The Company continues to explore strategies and opportunities to make prudent

1 investments to improve not only the performance of our natural gas delivery
2 system, but also how we interact directly with our customers. These strategies
3 include examination of new operational technologies including but not limited to
4 in-line inspections, metering infrastructure, and additional communication
5 platforms.

6 **Q. DO ANY SUCH FUTURE INVESTMENTS COME TO MIND?**

7 A. Yes. Looking forward, Duke Energy Kentucky will be updating our existing
8 Customer Information System (CIS) to a new, state of the art system. This
9 software investment will occur over time and will be fully in service by 2022 as
10 part of a consolidated Duke Energy effort to modernize the customer experience
11 in all jurisdictions and provide greater flexibility and efficiency in meeting ever-
12 evolving customer expectations. Duke Energy Kentucky's current CIS' primary
13 function, as designed, was to use the aggregated usage data for simple billing
14 purposes for each individual meter. The utility industry, however, is not now
15 limited to such simplistic transactions as customers desire more information to
16 better understand and control their energy consumption.

17 Advanced meters and associated components, for example, have the
18 capability of recording more frequent and detailed usage data. This data, in turn,
19 can create personalized opportunities for customers according to their preferences,
20 whether in the form of rate options or other usage-related services. Duke Energy
21 Kentucky intends to continue transforming our natural gas utility service in order
22 to position our customers to have more control, convenience, and information as
23 well as flexible billing options. A more robust and capable CIS is necessary to

1 enable the Company to meet customer expectations for greater convenience,
2 control, transparency, and access to information.

3 **Q. HAVE THERE BEEN ANY LEGAL OR REGULATORY CHANGES**
4 **SINCE THE 2009 RATE CASE THAT HAVE IMPACTED THE COST OF**
5 **PROVIDING UTILITY SERVICE?**

6 A. Yes. There have been at least two significant developments since 2009 that
7 impact the Company's cost of providing natural gas distribution service. First, as
8 a result of the Tax Act and Jobs Creation Act of 2017 (TCJA), the corporate
9 income tax rate for companies such as Duke Energy Kentucky was reduced from
10 35 percent to 21 percent. The TCJA also resulted in other changes that will be
11 discussed more fully in the direct testimony of Company witnesses, Mr. John
12 Panizza and Mr. William Don Wathen Jr. Generally, the impact of the TCJA will
13 be to reduce the Company's revenue requirement, at least for the foreseeable
14 future.

15 The second major legal or regulatory action involves new rules
16 promulgated by the Pipeline and Hazardous Materials Safety Administration
17 (PHMSA). As discussed in the direct testimony of Company witness Hebbeler,
18 since the 2009 Rate Case, the Company has implemented both distribution and
19 transmission integrity management programs in compliance with these PHMSA
20 regulations.

21 **Q. ARE THERE ANY TRENDS THAT HAVE IMPACTED THE**
22 **COMPANY'S ABILITY TO RECOVER ITS COST OF SERVICE?**

1 A. Yes. Customer behavior and technology advances have served to reduce the
2 average consumption of most customers. Although industrial load has been steady
3 to higher, typical residential and commercial customers have reduced their
4 average consumption since our last natural gas base rate case. As further
5 explained by Mr. Wathen, a decline in volumetric sales has contributed to the
6 Company's inability to recover its costs of service.

7 **Q. NOTWITHSTANDING THE CHANGES YOU PREVIOUSLY**
8 **MENTIONED, DO YOU BELIEVE DUKE ENERGY KENTUCKY**
9 **SUCCESSFULLY MANAGED ITS COSTS OF PROVIDING SERVICE TO**
10 **CUSTOMERS SINCE ITS 2009 RATE CASE?**

11 A. Yes. Duke Energy Kentucky has proven itself successful and capable of
12 implementing initiatives to manage its costs to serve. Since the 2009 Rate Case,
13 Duke Energy Kentucky has been part of two significant utility mergers that have
14 enabled the Company to implement best practices and to find opportunities to
15 operate more efficiently.

16 Despite these best efforts, the Company can no longer continue to operate
17 at the current level without seeking an increase in base natural gas rates. The
18 Company is entering into a period where, due to our aging system, changes in
19 customer consumption levels, and changes in laws, we must make additional
20 investments in our natural gas delivery system to continue to provide reasonable
21 and adequate service and to have the opportunity to earn a fair and reasonable
22 return.

III. OVERVIEW OF DUKE ENERGY KENTUCKY'S RATE CASE

1 **Q. PLEASE EXPLAIN WHY DUKE ENERGY KENTUCKY PROPOSES TO**
2 **INCREASE RETAIL NATURAL GAS RATES.**

3 A. Duke Energy Kentucky's natural gas base rates were last updated almost a decade
4 ago and, today, those rates are not sufficient to cover our costs of service and do
5 not provide an opportunity to earn a fair rate of return on investments. Duke
6 Energy Kentucky also needs to reflect the changes in costs of service related to
7 capital investments and the operations and maintenance of our natural gas
8 infrastructure. Although the Company has added customers over time, our
9 customers are using significantly less gas today than just a few years ago.
10 Consequently, the growth in the numbers of customers, albeit positive, has not
11 offset the loss due to volumetric sales or increases in costs. These factors have
12 prompted the Company to propose new rates, as reflected in these proceedings.

13 **Q. PLEASE GENERALLY DESCRIBE DUKE ENERGY KENTUCKY'S**
14 **PROPOSED NATURAL GAS RATE INCREASE.**

15 A. Duke Energy Kentucky proposes to increase our natural gas base rates in order to
16 increase annual base natural gas rate revenues by approximately \$10.5 million.
17 This increase is primarily driven by investments in plant in service that have
18 occurred since the 2009 Rate Case and that are forecasted to be completed during
19 the proposed test period. The Company is also seeking to recover, through
20 amortization, a regulatory asset related to pipeline integrity work previously
21 authorized for deferral by this Commission and is also proposing to establish the
22 return component of our overall cost of service using the more common rate base

1 approach rather than using allocated capitalization. Additionally, the Company is
2 also proposing to implement a WNA mechanism to enable the Company to
3 mitigate the impact of weather on customers' natural gas rates.

4 This rate increase is necessary in order to allow Duke Energy Kentucky to
5 recover its costs for providing reliable natural gas service and have the
6 opportunity to earn a fair return on its capital investments.

7 **Q. WHAT TEST PERIOD IS THE COMPANY USING IN THESE**
8 **PROCEEDINGS?**

9 A. Duke Energy Kentucky is using a forecasted test period that spans the twelve
10 months beginning April 1, 2019, and ending March 31, 2020. Duke Energy
11 Kentucky witness Robert "Beau" Pratt explains how the Company determined the
12 basis for the forecasted test period.

13 **Q. PLEASE BRIEFLY DESCRIBE THE COMPANY'S PROPOSAL TO USE**
14 **THE RATE BASE METHOD TO ESTABLISH RATES.**

15 A. Through his direct testimony, Company witness Wathen discusses this proposal in
16 greater detail and, as such, I only briefly mention it here. Historically, the
17 Company's natural gas base rates have been determined with reference to a return
18 on capitalization. Although this methodology may have been appropriate in the
19 past, another methodology is more common today. Specifically, and as evident in
20 other Duke Energy jurisdictions, a return-on-rate base approach provides a
21 transparent and effective way to establish base rates.

22 **Q. PLEASE FURTHER DESCRIBE THE COMPANY'S PROPOSAL TO**
23 **IMPLEMENT A WNA MECHANISM.**

1 A. Our customers' bills include a volumetric component that fluctuates with usage.
2 Changes in weather influence usage and, therefore, monthly volumetric charges.
3 These weather changes, which cannot be controlled or fully predicted, necessarily
4 impose volatility on our customers' bills, month over month. A WNA mechanism
5 will mitigate the impact of weather volatility on customer bills, as well as the
6 corresponding impact on the Company's earnings, in a fair and equitable manner.
7 Duke Energy Kentucky's proposed WNA mechanism will be applicable to
8 customers served under Rate Schedules Residential Service (RS) and General
9 Service (GS).

IV. INTRODUCTION OF WITNESSES

10 **Q. PLEASE INTRODUCE THE OTHER WITNESSES IN THESE**
11 **PROCEEDINGS.**

12 A. I identify below the other individuals who will present testimony on behalf of
13 Duke Energy Kentucky, as well as the subject matters of their respective
14 testimony:

- 15 • Tyler Barbare, Director, Gas Technical Field Operations, discusses the
16 Company's proposal to align its natural gas meter testing process to
17 the depreciable life of the AMI/AMR modules connected to the natural
18 gas meters.
- 19 • Michael Covington, Director, Natural Gas Utilities and Infrastructure,
20 offers testimony regarding the Company's accounting policies and the
21 accounting treatment requested in these proceedings.

- 1 • Gary Hebbeler, Vice President, Natural Gas Operations; provides an
2 overview of the natural gas operations for both Duke Energy and Duke
3 Energy Kentucky. Mr. Hebbeler also discusses the Company’s safety
4 and integrity initiatives and the major investments since the 2009 Rate
5 Case.
- 6 • Sarah E. Lawler, Director Rates, and Regulatory Planning, provides
7 testimony supporting Duke Energy Kentucky’s overall revenue
8 requirement for the test period and certain adjustments to the test
9 period financial data.
- 10 • Cynthia S. Lee, Director, Asset Accounting, offers testimony on Duke
11 Energy Kentucky’s capital accounting processes and sponsors certain
12 accounting information used for the test period financial data.
- 13 • Renee Metzler, Managing Director Retirement, supports the
14 Company’s compensation and benefits programs.
- 15 • Roger A. Morin, PhD, Principal, Utility Research International, offers
16 testimony on Duke Energy Kentucky’s requested rate of return.
- 17 • John Panizza, Director, Tax Operations, addresses the Company’s tax
18 expense in the test period revenue requirement.
- 19 • Benjamin Walter Bohdan Passty, Ph.D., Lead Load Forecasting
20 Analyst, performed and supports the Company’s natural gas load
21 forecast.
- 22 • Robert (“Beau”) H. Pratt, Director, Regional Financial Forecasting,
23 presents testimony regarding Duke Energy Kentucky’s credit ratings,

- 1 financial objectives, cash requirements, and capital structure, as well
2 as Duke Energy Kentucky's budgeting and forecasting processes.
- 3 • Bruce L. Sailors, Pricing and Regulatory Solutions Manager, offers
4 testimony as to rate design and tariff language.
 - 5 • Jeffrey R. Setser, Director of Allocations and Reporting, supports the
6 Company's various service agreements and associated allocations.
 - 7 • John J. Spanos, Gannet Fleming Valuation and Rate Consultants, LLC,
8 provides testimony on Duke Energy Kentucky's latest depreciation
9 study.
 - 10 • William Don Wathen Jr., Director, Rates and Regulatory Strategy,
11 Ohio and Kentucky, provides a more detailed overview of the filing
12 including support for the Company's proposed WNA.
 - 13 • James E. Ziolkowski, Director, Rates and Regulatory Planning,
14 provides testimony regarding Duke Energy Kentucky's cost of service
15 study.

V. **ATTACHMENTS SPONSORED BY WITNESS**

16 **Q. PLEASE DESCRIBE FR 14(1) THROUGH FR 14(4).**

17 A. These filing requirements provide for the Company to seek proposed new rates
18 through a written Application addressing various matters, including the full name,
19 address, and electronic mail address of the Company and set forth the facts upon
20 which the Application is based, with a request for the order, authorization,
21 permission, or certificate desired and a reference to the particular law requiring or
22 providing the same. FR 14(2) applies to Duke Energy Kentucky because it is a

1 corporation, registered to do business, and is in good standing in the
2 Commonwealth of Kentucky. The Application submitted in these proceedings
3 includes this information and was prepared at my direction. FR 14(3) and FR
4 14(4) are not applicable to Duke Energy Kentucky because it is neither a limited
5 liability company nor a limited partnership.

6 **Q. PLEASE DESCRIBE FR 16(1)(b)(1).**

7 A. FR 16(1)(b)(1) is a statement for the reason for the adjustment. As I explained
8 above and as further explained by Mr. Wathen, the Company is proposing new
9 natural gas base rates because the present rates reflect the cost of service from the
10 2009 Rate Case, which is no longer sufficient to enable the Company to furnish
11 safe, reliable, adequate, reasonable, and affordable service. Duke Energy
12 Kentucky also needs to reflect the costs of service related to capital investments
13 and the operation and maintenance of our natural gas delivery system that have
14 occurred since 2010. The load growth on Duke Energy Kentucky's system has
15 been relatively slow and has not significantly offset these increased costs.

16 **Q. PLEASE DESCRIBE FR 16(1)(b)(2).**

17 A. FR 16(1)(b)(2) is the certificate of assumed name. Duke Energy Kentucky's
18 actual legal name is "Duke Energy Kentucky, Inc." The Company has filed for
19 the assumed name of "Duke Energy." The certificate of assumed name is
20 provided with our filing.

1 **Q. PLEASE DESCRIBE FR 16(1)(b)(5).**

2 A. FR 16(1)(b)(5) is a statement that customer notice has been given in accordance
3 with the Commission's rules. The Company is publishing notice in accordance
4 with the Commission's regulations.

5 **Q. PLEASE DESCRIBE FR 16(2).**

6 A. FR 16(2) is the notice of intent submitted to the Commission at least thirty, but no
7 more than sixty, days prior to filing the Application. The notice was filed on
8 August 2, 2017, at my direction.

9 **Q. PLEASE DESCRIBE FR 16(3).**

10 A. FR 16(3) states that notice given in accordance with 807 KAR 5:001 Section 7
11 will satisfy notice requirements of 807 KAR 5:051, Section 2. The Company
12 provided notice to customers in accordance with 807 KAR 5:001 Section 7.

13 **Q. PLEASE DESCRIBE FR 16(7)(a)**

14 A. FR 16(7)(a) is a statement of attestation from me, the utility's chief officer in
15 charge of Kentucky operations on the existing programs to achieve improvements
16 in efficiency and productivity, including an explanation of the purpose of each
17 program. The efficiency and productivity benefits that have resulted from these
18 programs have occurred over time and thus are reflected in the Company's
19 budgets included in the forecasted test period in these proceedings. These
20 programs are described below:

- 21 • Duke/Progress merger: In July 2012, Duke Energy and Progress
22 Energy closed their merger. Duke Energy Kentucky has benefitted
23 from the implementation of best practices and through the access to

1 additional resources and expertise from its sister electric utilities in
2 five other jurisdictions. The Company has benefitted from the
3 economies of scale that naturally arise from being a part of a combined
4 corporation with a market capitalization of more than \$52.1 billion.

- 5 • The ASRP, which I discussed previously and for which Mr. Hebbeler
6 provides further detail. The various mergers that have occurred over
7 the last several years which have resulted in numerous efficiencies and
8 implementation of best practices. Duke Energy Kentucky regularly
9 reports on these to the Commission through regular filings.
- 10 • The Gas Transmission and Distribution Integrity Management
11 Programs, which are designed to enhance the safety and reliability of
12 Duke Energy Kentucky's gas distribution service by establishing a
13 systematic plan to perform periodic safety assessments and
14 maintenance activities in response to new federal pipeline safety
15 legislation, as discussed in more detail by Mr. Hebbeler.
- 16 • The sewer line inspection program, which is a program designed to
17 check potential high-risk gas main installations along sewer lines as a
18 result of local sewer districts not maintaining accurate records of the
19 location and depths of their systems. The Company inspects gas main
20 installations that are likely to have experienced a breach based upon
21 premises structure elevation and main line sewer location and depth in
22 relation to the street.

- 1 • Duke Energy Kentucky has historically offered Demand Side
2 Management (DSM) programs that provide energy efficiency services
3 to gas and electric customers. Currently there are four programs that
4 provide benefits for gas customers. These programs include: (1)
5 Residential Conservation and Energy Education (RCEE) (Low-Income
6 Weatherization) program; (2) the Residential Home Energy House
7 Call (HEHC) program; (3) Energy Efficient Web Site program; and (4)
8 the Residential Comprehensive Energy Education program (NEED).
9 These programs offer direct benefits to customers through energy
10 efficiency education, energy use audits, and even home
11 weatherization. Although some of these programs are currently
12 suspended by order of the Commission, Duke Energy Kentucky is
13 hopeful that we can continue to provide these important services to
14 customers going forward.
- 15 • AMI/AMR technology: Duke Energy Kentucky began deploying AMI
16 technology, as I discussed earlier in my testimony. We expect this to
17 ultimately improve customer service and reduce our costs related to
18 meter reading, customer service calls, and call center operations.

19 **Q. PLEASE DESCRIBE FR 16(7)(e).**

20 A. FR 16(7)(e) is a statement of attestation signed by me, the utility's chief officer in
21 charge of Kentucky operations, that the forecast is reasonable, reliable, made in
22 good faith and that all basic assumptions used in the forecast have been identified
23 and justified and the forecast contains the same assumptions and methodologies

1 as used in the forecast for use by management and an explanation for differences
2 that exist, if applicable, and that productivity and efficiency gains are included.

3 **Q. PLEASE DESCRIBE FR 17(1)**

4 A. FR 17(1) relates to public postings. Duke Energy Kentucky will post a copy of the
5 notice and Application at our place of business and will also make available on
6 the Company's website a copy of the public notice and a hyperlink to the
7 Commission's website where the case documents will be available.

8 **Q. PLEASE DESCRIBE FR 17(2).**

9 A. FR 17(2) is the customer notice.

10 **Q. PLEASE DESCRIBE FR 17(3).**

11 A. FR 17(3) includes the method of notice. Duke Energy Kentucky has published
12 notice in newspapers of general circulation. Company witness Sailors supports FR
13 17(4), which describes required content of the notice. Duke Energy Kentucky has
14 included all content listed in FR 17(4) in its notice.

VI. CONCLUSION

15 **Q. WERE FR 14(1), FR 14(2), 14(3), 14(4), FR 16(1)(b)(1), FR 16(1)(b)(2), FR**
16 **16(1)(b)(5), FR 16(2), FR 16(3), FR 16(7)(a), FR 16(7)(e), FR 17(1), FR 17(2),**
17 **AND FR 17(3) PREPARED BY YOU OR UNDER YOUR SUPERVISION?**

18 A. Yes.

19 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

20 A. Yes.

VERIFICATION

March 2018 Update

Fastrack Description

The Process

Fastrack Description The Score Question

"All things considered, how satisfied were you with Duke Energy handling your recent service request, where 10 is completely satisfied and 0 is not at all satisfied?"

$$\text{Fastrack Score} = \frac{\text{\# of customers rating the score question '8, 9, 10'}}{\text{TOTAL customers interviewed}}$$

Example

If there are 10 total interviews:

- ❖ 1 rated the score question '5'
- ❖ 3 rated the score question '8'
- ❖ 2 rated the score question '9'
- ❖ 4 rated the score question '10'

$$\text{The Fastrack Score would} = \frac{(3+2+4)}{10} = 90$$

June 2018 Update

Fastrack Description

The Process

Fastrack Description The Score Question

“All things considered, how satisfied were you with Duke Energy handling your recent service request, where 10 is completely satisfied and 0 is not at all satisfied?”

$$\text{Fastrack Score} = \frac{\text{\# of customers rating the score question '8, 9, 10'}}{\text{TOTAL customers interviewed}}$$

Example

If there are 10 total interviews:

- ❖ 1 rated the score question '5'
- ❖ 3 rated the score question '8'
- ❖ 2 rated the score question '9'
- ❖ 4 rated the score question '10'

$$\text{The Fastrack Score would} = \frac{(3+2+4)}{10} = 90$$

TB-1 Meter Testing Analysis

I. INTRODUCTION AND PURPOSE

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Tyler A. Barbare and my business address is 4720 Piedmont Row
3 Drive, Charlotte, North Carolina 28210.

4 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5 A. I am employed by Piedmont Natural Gas Company Inc. (Piedmont), as Director
6 of Gas Technical Field Operations. Piedmont provides various administrative and
7 other services to Duke Energy Kentucky, Inc. (Duke Energy Kentucky), and other
8 affiliated companies of Duke Energy Corporation (Duke Energy).

9 **Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND**
10 **PROFESSIONAL EXPERIENCE.**

11 A. I started my career with Piedmont Natural Gas as a Meter Reader in 1998. In the
12 summer of 1999, I was promoted to a Service Tech and my duties included
13 installation of new residential and commercial meter sets, inspection of natural
14 gas fired equipment venting installations, gas piping and regulators based on code
15 requirements in South Carolina. In 2001, I transferred to the Measurement
16 Department and performed Industrial Meter Repair duties. In this role I tested,
17 repaired and installed Large Volume Meter Sets at commercial and industrial
18 facilities in South Carolina and North Carolina. I also learned how to install,
19 troubleshoot and repair electronic equipment such as electronic correctors,
20 SCADA monitoring equipment and setup reliefs and regulators based on
21 engineering design and customer pressure requirements. In 2003, I was promoted
22 to Telemetry Specialist in which I tested large regulator stations, wired up

1 Remote Terminal Unit panels, installed telecommunications equipment and
2 worked closely with Gas Control. Also, during this time I attended ITT Technical
3 College in Greenville, South Carolina where I earned a Bachelor of Science
4 Degree in Electronics Engineering during the spring of 2005.

5 In 2009, I was promoted to Measurement Supervisor in South Carolina. I
6 served four years in that role and then relocated to Nashville, Tennessee in 2013.
7 While working in Nashville, I performed Measurement Supervisor duties for nine
8 months and my Measurement and Regulation team supported a new twenty-inch
9 transmission pipeline installation project. In the spring of 2014, I was named both
10 Operations and Maintenance Manager and Spartanburg Resource Center
11 Operations Site Manager for Piedmont Natural Gas Southern Zone which includes
12 South Carolina, Hickory North Carolina and Spruce Pine, North Carolina. In
13 2017, I was promoted to Director, Gas Technical Field Operations supporting the
14 natural gas operations in Kentucky, Ohio, Tennessee, North Carolina and South
15 Carolina.

16 **Q. PLEASE DESCRIBE YOUR DUTIES AS DIRECTOR OF GAS**
17 **TECHNICAL FIELD OPERATIONS.**

18 A. As Director of Gas Technical Field Operations, I am responsible for ensuring the
19 highest level of safety as my team performs their required job responsibilities. My
20 duties include maintaining an operator qualified work force, oversight of the Gas
21 Measurement Center Meter Testing Facility and working collaboratively with
22 various functions within Duke Energy's Natural Gas Operations, including

1 engineering, system planning, major projects, and distribution/construction to
2 provide excellent customer service.

3 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY**
4 **PUBLIC UTILITIES COMMISSION?**

5 A. No.

6 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**
7 **PROCEEDING?**

8 A. The purpose of my testimony is to support Duke Energy Kentucky's request for a
9 waiver pursuant to KRS 278.210 and 807 KAR 5:022 Section 8(5) to amend its
10 natural gas meter testing schedule for positive-displacement meters with rated
11 capacity up to and including 500 cubic feet per hour from a 10-year testing
12 parameter to a 15-year schedule. The purpose of this waiver is to align the testing
13 timeline with the useful/depreciable life of the natural gas advanced metering
14 infrastructure/automated meter reading modules (AMI/AMR) approved as part of
15 Case No. 2016-152 (AMI Deployment Case).

II. DISCUSSION

16 **Q. PLEASE DESCRIBE DUKE ENERGY KENTUCKY'S CURRENT**
17 **NATURAL GAS METER TESTING TIMING PROTOCOL FOR**
18 **RESIDENTIAL METERS.**

19 A. Currently, Duke Energy Kentucky follows 807 KAR 5:022 Section 8(5) testing
20 protocols, which provides the following for testing of natural gas meters:

21 (5) Periodic tests.

1 (a) Periodic tests of all meters shall be made according to the following
2 schedule based on rated capacities. Rated meter capacity is defined as the
3 capacity of the meter at five-tenths (0.5) of one (1) inch water column
4 differential for diaphragm meters and as specified by the manufacturer for
5 all other meters.

6 1. Positive-displacement meters, with rated capacity up to and
7 including 500 cubic feet per hour, shall be tested at least once
8 every ten (10) years.

9 2. Positive-displacement meters, with rated capacity above 500 cubic
10 feet per hour, up to and including 1,500 cubic feet per hour, shall
11 be tested at least once every five (5) years.

12 3. Positive-displacement meters above 1,500 cubic feet per hour shall
13 be tested at least once every year.

14 Duke Energy Kentucky's residential natural gas meters generally fall into the first
15 category (Category 1 Meters) set forth under the rule and thereby are tested at
16 least once every 10-years. In order to achieve this 10-year requirement for natural
17 gas meters, Duke Energy Kentucky amended its practices several years ago to
18 strive to test these meters within the ninth year so as not to exceed the 10-year
19 threshold. The next largest group of meters Duke Energy Kentucky has installed
20 at customer premises would fall into the second category (Category 2 Meters) set
21 forth under the rule above and are tested at least once every five years. Duke
22 Energy has very few meters that would fall into the third category (Category 3
23 Meters) which are tested at least once a year.

1 **Q. PLEASE EXPLAIN HOW DUKE ENERGY KENTUCKY TESTS THE**
2 **ACCURACY OF ITS NATURAL GAS METERS?**

3 A. In accordance with Commission regulations, Duke Energy Kentucky removes the
4 meter from the customer's premise and brings the meter back to the Company's
5 testing facility to conduct the accuracy test in a temperature-controlled
6 environment. When the Company removes a meter for testing, a new meter must
7 be set in its place to continue natural gas service to the customer's premise. This
8 means that the typical residential customer receives a new natural gas meter
9 approximately every 10 years.

10 Once the meter is brought back to the testing facility, it is placed in the
11 environment of the testing equipment for a minimum of five (5) hours to ensure
12 that the meter's accuracy will not be adversely impacted by any changes in
13 temperature. The meter is then connected to the testing equipment and tested in
14 accordance with industry standard methodology in compliance with Commission
15 regulations. Under Kentucky's regulations any meter that is found to have a meter
16 error of two percent or less, fast or slow, is considered to be accurate.

17 The meter is connected to a calibrated SNAP Prover for accuracy testing.
18 The test consists of a measured amount of air pulled through the meter under
19 vacuum for several minutes. This test is performed using the "Check" and "Open"
20 methodology which uses two different levels of volume at half an inch of water
21 column differential. The low volume test, or "Check" is at 20 percent of the
22 meter's rated capacity. The high volume test or "Open" is at 100 percent of the
23 meter's rated capacity. If the results of that test shows the meter is accurate within

1 the established tolerance levels, the testing is complete and the meter is found to
2 be accurate. If the meter test falls outside of the acceptable accuracy tolerance
3 range, the Open and Check tests are performed two additional times. The average
4 of these three tests is then used to determine the accuracy of the meter.

5 **Q. DOES DUKE ENERGY KENTUCKY RE-DEPLOY METERS AFTER**
6 **TESTING?**

7 A. Category 3 Meters are generally refurbished and re-deployed. Category 1 and
8 Category 2 Meters are not redeployed. The Category 1 and 2 Meters are
9 diaphragm meters and the Company generally disposes of these category of
10 meters after completing the testing. This is because the costs to refurbish, repair,
11 store, and redeploy a once-used diaphragm meter were determined to exceed the
12 costs of simply purchasing a new meter. Category 3 Meters are larger rotary
13 meters and are more costly to purchase. When Duke Energy Kentucky removes
14 the Category 1 and 2 Meters from service we will attempt to sell them to a third
15 party for potential future use if there is a market for that type of meter. For those
16 meters that cannot be resold, the Company will scrap the meter for recycling. Any
17 revenues received through this recycling or third party sales are credited against
18 (reducing) the overall meter plant accounts. This is a more cost-efficient process
19 than having to refurbish, repaint, store, and redeploy all meters.

20 **Q. PLEASE BRIEFLY DESCRIBE THE PROCESS AND ESTIMATED**
21 **COSTS FOR REFURBISHING A CATEGORY 1 METER.**

22 A. Refurbishing a Category 1 Meter requires cleaning and replacement of parts. The
23 meter is then tested again for accuracy and additional adjustments are made if

1 necessary. The meter is repeatedly tested and adjusted until it is determined to be
2 accurate. A hydro test is then performed to ensure repairs and adjustment did not
3 result in any leaks. Under this hydro test, the AMI/AMR module is removed, the
4 meter is submerged in a tank of water and air is pumped into the meter to ensure
5 there are no leaks. Once the meter passes the test and is dried, the AMI/AMR
6 module is reattached and the meter is painted. The meter information is updated in
7 the Company's meter tracking system. All of the testing, repairs, and data entry
8 takes time. In a best case scenario, if the meter requires little adjustment and
9 immediately passes all tests, at least one hour of labor is required per meter to
10 complete the refurbishment process. More time may be required depending upon
11 the number of adjustments. The Company will then have to store the meter until it
12 can be redeployed in the field. The estimated, fully loaded labor costs per meter
13 for the refurbishment of a typical meter is approximately \$115.80. This does not
14 include any additional costs for replacement parts, materials, or storage if
15 refurbishment were to occur. Conversely, purchasing a new Itron Category 1
16 Meter with an AMI or AMR module installed costs approximately \$105.00 or
17 \$102.00, respectfully.

18 **Q. PLEASE EXPLAIN DUKE ENERGY KENTUCKY'S REQUEST FOR A**
19 **WAIVER TO SWITCH TO A FIFTEEN (15) YEAR TESTING CYCLE**
20 **FOR ITS CATEGORY 1 METERS.**

21 A. The desire to switch to a 15-year testing cycle for Category 1 Meters is driven by
22 the Company's addition of AMI/AMR modules to its natural gas meters. As I
23 understand, the Commission approved the Company's deployment of AMI/AMR

1 modules in the AMI Deployment Case. For Duke Energy Kentucky's
2 combination electric and gas customers (combination customers), the technology
3 consists of an AMI electric meter and an AMI gas module attached to their
4 existing gas meter. Usage data from the gas modules will be collected through
5 nearby electric AMI meters and transmitted to the Company. In areas where Duke
6 Energy Kentucky only provides gas service (gas-only customers) the Company
7 does not have the electric AMI infrastructure in place to support communications
8 for a gas AMI solution. The technology for these customers is an AMR gas
9 module that is attached to their existing gas meters. The Company reads the AMR
10 gas modules remotely by driving past the customer's premise.

11 As part of the AMI Deployment Case, the Commission approved a 15-
12 year depreciable life for those AMI/AMR modules. This was based in part, upon
13 the estimated 13-20 year battery life of those modules and the Company's
14 experience in other jurisdictions with the useful life of such modules. As the
15 Company explained in that case, the actual battery life will depend upon the data
16 transmission, programming mode, and firmware downloads. In other words, the
17 more the meters are used and data is transferred, the shorter the lifespan of the
18 battery. Under the current 10-year testing cycle, the Company believes it is
19 unlikely that these modules will last through two complete 10-year meter-testing
20 cycles because of how the devices will be used and amount of data transferred.

21 As part of its AMI/AMR deployment, Duke Energy Kentucky is
22 purchasing the modules and installing them on existing meters. Going forward,
23 Duke Energy Kentucky will be purchasing these meters with the modules already

1 installed. This is a less expensive alternative than continuing to purchase separate
2 modules to install ad hoc upon failure or end of life of the original modules.

3 The Company originally proposed to depreciate the AMI/AMR modules
4 over 10-years in its AMI Case so to align the life of the modules with the meter
5 testing cycle. This was to avoid the incremental cost of having to implement a
6 program to replace the devices every 15-years or upon battery failure. Instead the
7 company could address the issue of the misaligned module life as part of the 10-
8 year testing protocol.

9 With a 15-year depreciable (and likely similar useful) life of these
10 modules, it is economically efficient for customers that the Company move its
11 meter testing to a 15-year cycle so as to take advantage of the full AMI/AMR
12 module life and not incur AMI/AMR module replacement costs before the end of
13 the useful life of the module. Moreover, if the Company were to continue with its
14 current 10 year meter testing it would require extra handling of the AMI/AMR
15 module in order to remove the modules and install on another meter. This extra
16 handling could increase the risk of damage of the module.

17 **Q. DOES MOVING TO A FIFTEEN-YEAR TESTING CYCLE CREATE A**
18 **CONCERN FOR ACCURACY OF THE NATURAL GAS METERS AND**
19 **CUSTOMER BILLS?**

20 A. No.

21 **Q. PLEASE EXPLAIN.**

22 A. The Company examined a sample size of Category 1 natural gas meters from the
23 Ohio and Kentucky service territories that were more than ten years between

1 meter accuracy tests and determined that the vast majority of meters tested
2 remained within the accuracy tolerances and that the incremental number of
3 meters that did not pass the accuracy test was immaterial. It should be noted that
4 Ohio does not have a meter change-out/testing program like that of Kentucky.
5 Attachment TB-1 is a spreadsheet detailing the results.

6 **Q. HOW DID THE COMPANY PERFORM THIS ANALYSIS?**

7 A. To perform this analysis, the Company examined the Category 1 Meter accuracy
8 testing results for both Kentucky and Ohio for the period between 2007 and 2016.
9 Because the period included multiple types of residential natural gas meters, some
10 of which were of a type that are no longer in use, Duke Energy Kentucky filtered
11 the results to only include the type of natural gas meters that are currently being
12 installed by the Company. Put another way, obsolete meter types were eliminated
13 from the survey. This resulted in a total sample size of 73,215 total Category 1
14 Meters that were tested between 2007 and 2016. Of those meters, the Company
15 further filtered the results into the categories of years between meter tests. The
16 Company then focused its analysis to only include those meters that were
17 functional upon testing, registering a test result. This resulted in a sample size of
18 70,653. The Company then examined the number of meters that went ten years or
19 more between tests. This produced a sample size of approximately 10,623
20 Category 1 Meters having ten or more years between accuracy tests. The
21 Company then considered Kentucky's meter accuracy threshold in 807 KAR
22 5:006 Section 11 whereby meters that register more than 2 percent fast or slow are
23 considered inaccurate.

1 **Q. PLEASE EXPLAIN THE RESULTS OF THIS ANALYSIS.**

2 A. The analysis shows that of the total 10,623 Category 1 residential natural gas
3 meters that went more than ten years between accuracy tests, only 151 meters or
4 1.42 percent of the meters were found to have registered outside the 2 percent
5 threshold tolerance in terms of slowness. Similarly, there were 275 meters that
6 registered outside the tolerances for running fast. This is approximately 2.59
7 percent of the total number of meters tested. Put another way, approximately 96
8 percent of all meters that were tested at intervals greater than ten years were
9 determined accurate. These results strongly support the Company's position that a
10 change in the testing cycle will not create a concern of accuracy of natural gas
11 meters or customer billings.

12 **Q. DOES MOVING TO A FIFTEEN-YEAR METER TESTING CYCLE**
13 **CREATE ANY SAFETY CONCERNS?**

14 A. No. The Company will continue to perform all required inspections in compliance
15 with all Federal and Kentucky Regulations. For example, the Company will
16 continue to perform inspections, at intervals not to exceed the periodic meter test
17 intervals, on the individual residential customer service regulators, vents, and
18 relief valve vents for operable condition in accordance with 807 KAR 5:006
19 Section 25(5)(b). The Company currently inspects curb boxes annually in full
20 compliance with 807 KAR 5:006 Section 25(5)(c) and will continue to do so. The
21 Company also continues to perform all inspections required under CFR 49 CFR
22 Part 192.

1 **Q. IS MOVING TO A FIFTEEN-YEAR METER TESTING CYCLE**
2 **BENEFICIAL TO CUSTOMERS?**

3 A. Yes. Moving to a 15-year meter testing cycle would be beneficial to Kentucky
4 customers because it would increase customer satisfaction by reducing
5 inconvenience, avoid costs the Company will incur under the current conditions,
6 and potentially reduce costs going forward.

7 Moving to a longer testing cycle should improve customer satisfaction in
8 that it reduces the inconvenience of meter testing to customers by reducing the
9 frequency of the tests. Customers must be present in order for their gas meter to
10 be removed (for testing) and replaced with a new gas meter. The customer must
11 set a four-hour appointment window and be available during the entire four-hour
12 period. Experience shows that customers often reschedule or forget about these
13 testing appointments causing delays in the Company performing these tests.
14 Moving to a 15-year testing cycle will lessen the frequency that customers will
15 need to make appointments over the course of their time as a Duke Energy
16 Kentucky customer.

17 Adjusting the residential natural gas meter-testing requirement to a 15-
18 year cycle will also allow the Company to avoid increased costs created due to the
19 misalignment between the current 10-year testing cycle and the 15-year
20 depreciable/useful life of the AMI/AMR modules. Unless this is changed, the
21 Company will find itself facing increased costs for deploying a meter technician
22 to the same premises more often to either service the AMI/AMR modules
23 between testing cycles (assuming the AMI/AMR device can be removed and

1 reattached to the new meter on site during the meter change out for testing) or
2 disposing of the AMI/AMR devices after the initial 10 years when meters are
3 replaced.

4 The Company will first deploy personnel to the customer's premises to
5 test the meter after 10 years to replace/test the natural gas meter, and then five
6 years later, deploy additional personnel to exchange the AMI/AMR module on the
7 meter. Then, within the next 5 to 8 years, sometime before the next meter testing
8 deadline, the Company would send personnel to the premises to proactively
9 replace the AMI/AMR device to avoid losing the ability to communicate with the
10 meter upon device failure. Finally, the technician would return again to the
11 premises prior to the 10 year testing deadline, to test/replace the meter, thereby
12 increasing costs. Adding these extra steps to service the modules results in
13 incremental costs.

14 Further, as I previously described, the AMI/AMR module is attached
15 directly to the natural gas meter. Under testing protocol, the meter, including the
16 AMI/AMR device is removed from the premises and transported to the
17 Company's facility for testing. This presents a risk of damage to the AMI/AMR
18 module during meter removal and transport of the meter back to the Company's
19 testing facility.

20 Along with improving the overall customer experience through less
21 premises visits, this waiver proposal will serve to avoid additional costs if the
22 Company has to deploy personnel multiple times in a meter testing cycle for
23 testing, module replacement and further meter testing.

III. CONCLUSION

1 **Q. WAS ATTACHMENT TB-1 PREPARED AT YOUR DIRECTION AND**
2 **UNDER YOUR CONTROL?**

3 A. Yes.

4 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

5 A. Yes.

	<u>PAGE</u>
I. INTRODUCTION AND PURPOSE	1
II. OVERVIEW OF DUKE ENERGY KENTUCKY'S ACCOUNTING RECORDS.....	3
III. SCHEDULES AND FILING REQUIREMENTS SPONSORED BY WITNESS	4
IV. CONCLUSION	6

I. INTRODUCTION AND PURPOSE

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Michael Covington and my business address is 4720 Piedmont Row
3 Drive, Charlotte, North Carolina 28210.

4 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5 A. I am employed by Duke Energy Business Services LLC (DEBS), as Director, Gas
6 Utilities & Infrastructure Accounting. DEBS provides various administrative and
7 other services to Duke Energy Kentucky, Inc. (Duke Energy Kentucky or Company)
8 and other affiliated companies of Duke Energy Corporation (Duke Energy).

9 **Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND**
10 **PROFESSIONAL EXPERIENCE.**

11 A. I earned a Bachelor of Science degree in accounting from the University of North
12 Carolina at Charlotte in 1981, a Master's Degree in Ministry from the Southern
13 Wesleyan University in 2006, and a Master's Degree in Practical Theology from
14 Wesley Seminary at Indiana Wesleyan University in 2016. I am a Certified Public
15 Accountant in the state of North Carolina and a member of the American Institute
16 of Certified Public Accountants and the North Carolina Association of Certified
17 Public Accountants. My professional work experience began in 1981 with Duke
18 Energy as a Financial Analyst in the Corporate Controller's department and
19 assumed my first management role in March of 1990. While at Duke Energy, I
20 have held various positions of increasing responsibility in a number of areas
21 including the Corporate Controller's department, Corporate Treasury, Corporate
22 Planning and Duke's unregulated generation subsidiary. Following the merger

1 between Duke Energy Corp and Piedmont Corporation in 2016, I assumed my
2 current position as the Director, Gas Utilities and Infrastructure Accounting.

3 **Q. PLEASE DESCRIBE YOUR RESPONSIBILITIES AS DIRECTOR, GAS**
4 **UTILITIES AND INFRASTRUCTURE ACCOUNTING.**

5 A. I am responsible for the books of account and reporting the financial position and
6 the results for the Gas Segment within Duke Energy including Duke Energy
7 Kentucky's gas operations as well as Duke Energy Ohio's gas operations,
8 Piedmont Natural Gas and various gas pipeline development projects within the
9 segment.

10 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY**
11 **PUBLIC SERVICE COMMISSION?**

12 A. No.

13 **Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY IN THIS**
14 **PROCEEDING?**

15 A. My testimony in this proceeding addresses the various capital and operating
16 expenditures and accounting adjustments to Duke Energy Kentucky's books of
17 account in support of Duke Energy Kentucky's application in this proceeding. I
18 sponsor the historic data in Schedule B-8 provided in satisfaction of Filing
19 Requirement FR 16(8)(b); and Filing Requirements FR 12(2)(i), FR 16(7)(i), FR
20 16(7)(k), FR 16(7)(m), FR 16(7)(n), FR 16(7)(o), FR 16(7)(p), and FR 16(7)(q).
21 Finally, I also sponsor the historic data on Schedules I-1 through I-5 in response
22 to FR 16(8)(i), and Schedule K in response to FR 16(8)(k).

**II. OVERVIEW OF DUKE ENERGY KENTUCKY'S
ACCOUNTING RECORDS**

1 **Q. ARE YOU FAMILIAR WITH THE ACCOUNTING PROCEDURES AND**
2 **BOOKS OF ACCOUNT OF DUKE ENERGY KENTUCKY?**

3 A. Yes. The books of account for Duke Energy Kentucky's regulated business follow
4 the Uniform System of Accounts prescribed by the Federal Energy Regulatory
5 Commission (FERC).

6 **Q. ARE THE BOOKS OF ACCOUNT FOR THE NATURAL GAS BUSINESS**
7 **OF DUKE ENERGY KENTUCKY PREPARED AT YOUR DIRECTION**
8 **AND UNDER YOUR SUPERVISION?**

9 A. Yes.

10 **Q. ARE THE CAPITAL AND OPERATING EXPENDITURES**
11 **REPRESENTED ON DUKE ENERGY KENTUCKY'S BOOKS OF**
12 **ACCOUNT ACCURATE AND REASONABLE?**

13 A. Yes. Duke Energy Kentucky has various budgeting, planning, and review
14 procedures in place to establish and monitor the capital and operating budgets, as
15 well as actual expenditures. The system of internal accounting controls provides
16 reasonable assurance that all transactions are executed in accordance with
17 management's authorization and are recorded properly.

18 The system of internal accounting controls is annually reviewed, tested,
19 and documented by Duke Energy Kentucky to provide reasonable assurance that
20 amounts recorded on the books and records of the Company are accurate and
21 proper. In addition, independent certified public accountants perform an annual
22 audit to provide assurance that internal accounting controls are operating

1 effectively and that Duke Energy Kentucky's financial statements are materially
2 accurate. Duke Energy Kentucky will continue recording deferrals, per normal
3 regulatory accounting standards, for riders that are subject to being trued-up. Over-
4 or under-recovery of costs are flowed through riders such as the gas cost adjustment
5 clause; the Company records the amounts to be trued-up in future periods as
6 regulatory assets or regulatory liabilities.

III. SCHEDULES AND FILING REQUIREMENTS
SPONSORED BY WITNESS

7 **Q. PLEASE DESCRIBE B-8.**

8 A. Schedule B-8 contains the Comparative Balance Sheets for Duke Energy
9 Kentucky for the most recent five calendar years, the base period and the forecasted
10 period.

11 **Q. PLEASE DESCRIBE FR 12(2)(i).**

12 A. FR 12(2)(i) consists of Duke Energy Kentucky's detailed income statement and
13 balance sheet for the period ended June 30, 2018.

14 **Q. PLEASE DESCRIBE FR 16(7)(i).**

15 A. FR 16(7)(i) consists of the Company's most recent Federal Energy Regulatory
16 Commission (FERC) audit report, reporting the results of the Company's last
17 FERC audit.

18 **Q. PLEASE DESCRIBE FR 16(7)(k).**

19 A. FR 16(7)(k) consists of Duke Energy Kentucky's most recent FERC Form 1 and
20 FERC Form 2.

21 **Q. PLEASE DESCRIBE FR 16(7)(m).**

22 A. FR 16(7)(m) consists of Duke Energy Kentucky's current chart of accounts.

1 **Q. PLEASE DESCRIBE FR 16(7)(n).**

2 A. FR 16(7)(n) consists of the latest twelve months of the monthly management
3 reports providing financial results of the Company's operations in comparison to
4 the forecast.

5 **Q. PLEASE DESCRIBE FR 16(7)(o).**

6 A. FR 16(7)(o) consists of management's monthly budget variance reports for Duke
7 Energy Kentucky gas operations.

8 **Q. PLEASE DESCRIBE FR 16(7)(p).**

9 A. FR 16(7)(p) consists of Duke Energy's most recent Form 10-K and Form 8-K as
10 well as those forms for the last two years. Additionally, the Company is
11 submitting copies of its Form 10-Qs that were filed during the past six quarters.

12 **Q. PLEASE DESCRIBE FR 16(7)(q).**

13 A. FR 16(7)(q) consists of the independent auditor's annual opinion report for Duke
14 Energy Kentucky. The auditor did not note any material weaknesses in internal
15 controls.

16 **Q. PLEASE DESCRIBE THE INFORMATION YOU SUPPORT IN
17 RESPONSE TO FR 16(8)(i), SCHEDULES I-1 THROUGH I-5.**

18 A. Schedule I-1 contains comparative income statements for the Company.
19 Schedules I-2.1 through I-5 contains comparative revenue and sales statistical
20 information as required by the Commission's filing requirements. I support the
21 historic information contained on these schedules.

1 **Q. PLEASE DESCRIBE THE INFORMATION YOU SUPPORT IN**
2 **RESPONSE TO FR 16(8)(k), THE “K” SCHEDULES.**

3 A. The information I support in response to FR 16(8)(k) consists of the Consolidated
4 Condensed Income Statement and other Comparative Financial Data as presented
5 on pages 2, 4 and 5 of Schedule K for Duke Energy Kentucky. I provided this
6 information to Mr. Pratt for his use in preparation of the forecast.

IV. CONCLUSION

7 **Q. WAS THE INFORMATION YOU SPONSORED IN SCHEDULES B-8, I-1,**
8 **I-2.1, I-3, I-4, I-5 AND K AS WELL AS FR 12(2)(i), FR 16(7)(i), FR 16(7)(k),**
9 **FR 16(7)(m), FR 16(7)(n), FR 16(7)(o), FR 16(7)(p), FR 16(7)(q), FR16(8)(i),**
10 **AND FR 16(8)(k) PREPARED BY YOU OR UNDER YOUR DIRECTION**
11 **AND SUPERVISION?**

12 A. Yes.

13 **Q. IS THE INFORMATION YOU SPONSORED IN THOSE SCHEDULES**
14 **AND FILING REQUIREMENTS ACCURATE TO THE BEST OF YOUR**
15 **KNOWLEDGE AND BELIEF?**

16 A. Yes.

17 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

18 A. Yes.

IX. CONCLUSION	31

I. INTRODUCTION AND PURPOSE

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Gary J. Hebbeler and my business address is 139 East 4th Street,
3 Cincinnati, Ohio 45202.

4 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5 A. I am employed by Duke Energy Business Services LLC (DEBS) as Vice
6 President, Gas Operations. DEBS provides various administrative and other
7 services to Duke Energy Kentucky, Inc. (Duke Energy Kentucky or the
8 Company) and other affiliated companies of Duke Energy Corporation (Duke
9 Energy).

10 **Q. PLEASE BRIEFLY SUMMARIZE YOUR EDUCATIONAL**
11 **BACKGROUND AND PROFESSIONAL EXPERIENCE.**

12 A. I began working for The Cincinnati Gas & Electric Company (CG&E), now
13 known as Duke Energy Ohio, Inc. (Duke Energy Ohio) in 1987, as an engineer in
14 the Gas Engineering Department. I initially worked as a project engineer. I was
15 responsible for designing gas mains and water lines; coordinating projects with
16 governmental agencies and consulting firms; calculating pipe capacity and stress
17 calculations on pipes; and evaluating company paving standards and designs. I
18 worked for CG&E, and later for Cinergy Services, Inc., until 1998. I was Vice
19 President for Michels Concrete Construction, Inc. during 1998 and returned to
20 Cinergy Corp.'s Gas Engineering Department in 1999. In 2000, I was promoted to
21 Manager, Contractor Construction. In this position, I helped design the
22 Accelerated Main Replacement Program (AMRP). I also managed the

1 construction activities for replacing the cast iron/bare steel pipe under the AMRP.
2 In 2002, I was promoted to Manager, Gas Engineering. I was responsible for
3 managing the engineering activities and the capital expenditures for Gas
4 Operations in Duke Energy Ohio's and Duke Energy Kentucky's gas distribution
5 systems. In 2006, I was promoted to General Manager, Gas Engineering. In
6 addition to responsibilities for gas engineering activities and capital expenditures,
7 I was responsible for construction activities for the AMRP, street improvements,
8 pressure improvements and major projects for Gas Operations in Duke Energy
9 Ohio's and Duke Energy Kentucky's gas distribution systems. In 2010, I was
10 promoted to General Manager, Gas Field and System Operations, where I was
11 responsible for managing the construction, installation, operation and
12 maintenance of the natural gas delivery systems for both Duke Energy Kentucky
13 and Duke Energy Ohio. In 2017, I assumed my current position of Vice President,
14 Gas Operations for the Duke Energy Natural Gas Business Unit.

15 **Q. PLEASE SUMMARIZE YOUR RESPONSIBILITIES AS VICE**
16 **PRESIDENT, GAS OPERATIONS FOR THE NATURAL GAS BUSINESS**
17 **UNIT.**

18 A. I direct the day-to-day natural gas operations for Distribution Construction, Field
19 Operations, and Technical Field Operations of Duke Energy Kentucky and four
20 other jurisdictions across the Natural Gas Business Unit including Duke Energy
21 Kentucky's parent, Duke Energy Ohio. In this role, I am responsible for
22 maintaining the integrity of the system and providing safe, reliable, adequate,
23 reasonable, and affordable natural gas service. I am responsible for the

1 construction, measurement and regulation, and operations and maintenance of the
2 natural gas delivery system.

3 **Q. HAVE YOU EVER TESTIFIED BEFORE THE KENTUCKY PUBLIC**
4 **SERVICE COMMISSION?**

5 A. Yes. I have previously testified before this and other state commissions.

6 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**
7 **PROCEEDING?**

8 A. The purpose of my testimony is to provide an overview of Duke Energy's Natural
9 Gas Business Unit and Duke Energy Kentucky's natural gas utility operations. I
10 also discuss the major safety, reliability and efficiency initiatives for the
11 Company's natural gas operations. In doing so, I discuss the progress of and
12 changes to Duke Energy Kentucky's safety initiatives: the Integrity Management
13 Program, and the Distribution Integrity Management Program. I discuss the major
14 investments in Duke Energy Kentucky's natural gas operations since the
15 Company's last general gas rate case, including, but not limited to, Duke Energy
16 Kentucky's Accelerated Service Replacement Program (ASRP). I support Duke
17 Energy Kentucky's request to discontinue the ASRP and place all of the
18 associated investment into rate base.

19 I support the operation and maintenance (O&M), purchased fuel mixture
20 information and purchased gas expense for the base period and the forecasted test
21 period. I discuss how the gas capital expenditure budget is prepared and I support
22 the gas capital budget, including retirements, supplied to Mr. Pratt for his
23 preparation of the Company's forecast. I also sponsor and support Filing

1 Requirements (FR) 16(7)(b), FR 16(7)(f) and FR 16(7)(g). Finally, I sponsor
2 Filing Requirement (FR) 16(7)(h)(8), which provides the mix of gas supply
3 utilized in the financial forecast, and the O&M information relied on by Mr. Pratt.

II. DUKE ENERGY'S GAS OPERATIONS BUSINESS UNIT

4 **Q. PLEASE DESCRIBE DUKE ENERGY'S NATURAL GAS BUSINESS**
5 **UNIT.**

6 A. The Natural Gas Business Unit is responsible for ensuring safe, reliable, adequate,
7 reasonable, and affordable natural gas service to Duke Energy Kentucky's
8 customers and that these services are provided in accordance with applicable
9 federal and state laws and regulations. The Natural Gas Business Unit is designed
10 to maintain and expand customer-centered strategies and support models, and to
11 enable organic growth by focusing on the customer and core values. This is
12 accomplished through engaging and enabling our workforce by establishing clear
13 metric driven accountabilities, facilitating people development, linking workforce
14 strategies to our goals of safe, reliable, adequate, reasonable and affordable
15 service. The Natural Gas Business Unit employs approximately 1,950 individuals
16 who manage the day-to-day operations of the Kentucky, Ohio, Tennessee, North
17 Carolina, and South Carolina businesses. Additionally, the Natural Gas Business
18 Unit has approximately 2,500 contract employees to assist in our mission.

1 Duke Energy's Natural Gas Business Unit is organized into four major
2 segments which are further defined by function within each segment. The four
3 major segments of the Natural Gas Business Unit are Utility Operations,
4 Commercial Operations, Ventures and Business Development, and Public Affairs,
5 Rates, & Regulatory.

**A. NATURAL GAS BUSINESS UNIT'S UTILITY
OPERATIONS SEGMENT**

6 **Q. PLEASE DISCUSS THE NATURAL GAS BUSINESS UNIT'S UTILITY
7 OPERATIONS SEGMENT.**

8 A. Utility Operations is responsible for safe and reliable natural gas delivery, safe
9 work execution, investment prioritization, and compliance at an affordable cost.
10 Utility Operations is defined by five functions: Pipeline Operations, Asset
11 Management/Engineering, Major Projects, Operations, and Operation Support.

12 **Q. PLEASE DESCRIBE THE NATURAL GAS BUSINESS UNIT'S PIPELINE
13 OPERATIONS FUNCTION.**

14 A. Pipeline Operations is responsible for gas control operations and emergency
15 response for the natural gas network, including transmission and distribution
16 systems, and the safe and reliable delivery of natural gas into the system. This
17 team provides oversight of gas control, maintenance of SCADA applications,
18 coordination of SCADA activities, and operations and maintenance of all
19 compression, Liquefied Natural Gas (LNG) and propane peaking facilities.

20 **Q. PLEASE DESCRIBE THE NATURAL GAS BUSINESS UNIT'S ASSET
21 MANAGEMENT AND ENGINEERING FUNCTION.**

22 A. The Asset Management and Engineering function is responsible for investment

1 prioritization and compliance, which enables the business unit to gain O&M and
2 capital efficiency while reducing risk. This team provides risk analysis of
3 investments and repository and focus on records and data. They also facilitate the
4 upkeep of standards, reporting, and regulatory audits, optimize long term
5 planning, and provide a central engineering organization of technical skill.

6 **Q. PLEASE DESCRIBE THE NATURAL GAS BUSINESS UNIT'S MAJOR**
7 **PROJECTS FUNCTION.**

8 A. Major Projects is responsible for project management, implementation and PMO
9 activities on the natural gas transmission pipeline, facilities, privatization,
10 compression and liquefied natural gas infrastructure.

11 **Q. PLEASE DESCRIBE THE NATURAL GAS BUSINESS UNIT'S**
12 **OPERATIONS FUNCTION.**

13 A. Operations is responsible for distribution construction, operations and
14 maintenance, fabrication/welding, and measurement and regulation. This team
15 provides the appropriate level of project and contractor management for the
16 construction of the distribution system that align with industry standards. In
17 addition, this team provides singular accountability on work planning and system
18 matters from central direction and ensures regional collaboration while meeting
19 all compliance standards.

20 **Q. PLEASE DESCRIBE THE OPERATIONS SUPPORT FUNCTION.**

21 A. Operations Support is responsible for work and resource planning and
22 management to ensure performance and continuous improvement. This team
23 provides overall support to core gas functions. This team manages distribution

1 resource performance, scheduling/dispatch, work management, technical training,
2 operator qualification, continuous improvement, quality assurance and quality
3 control, application and configuration support activities. It is also responsible for
4 IT and Non-IT project governance.

**B. NATURAL GAS BUSINESS UNIT'S COMMERCIAL OPERATIONS
SEGMENT**

5 **Q. PLEASE DISCUSS THE NATURAL GAS BUSINESS UNIT'S**
6 **COMMERCIAL OPERATIONS SEGMENT AND MAJOR FUNCTIONS.**

7 A. Commercial Operations is responsible for emergency response, field customer
8 service, natural gas supply and optimization, customer growth and retention,
9 account management, and economic development across all residential,
10 commercial and industrial customers. Commercial Operations is currently defined
11 by three major functions: Field Customer Service, Gas Supply Optimization, and
12 Gas Sales and Delivery.

13 **Q. PLEASE DESCRIBE THE FIELD CUSTOMER SERVICE FUNCTION.**

14 A. Field Customer Service is responsible for planning, scheduling, controlling and
15 managing field customer service activities to meet or exceed customer
16 expectations and maintain compliance while meeting financial targets without
17 jeopardizing safety. Field Customer Service activities include providing first
18 responder resources to natural gas emergencies, serving as customer facing field
19 technicians, and performing compliance work on above ground appurtenances.
20 Examples of work performed at the request of customers includes turning on/off
21 natural gas service at the meter, transferring service from one customer to another
22 (also known as succession requests), and setting meters for new customers.

1 Examples of compliance work performed include leak survey of designated
2 buildings and meter age changes.

3 In addition, customer satisfaction is monitored and measured using
4 surveys at various levels (transaction, employee, company levels). Customer
5 feedback is also gathered and utilized to support efforts to continuously improve
6 customer satisfaction.

7 **Q. PLEASE DESCRIBE THE GAS SUPPLY OPTIMIZATION FUNCTION.**

8 A. The Gas Supply Optimization Function is responsible for Pipeline Services, Gas
9 Scheduling, and Gas Trading. The Pipeline Services division is responsible for all
10 aspects of Duke Energy Kentucky's pipeline management including capacity
11 planning, forecasting, oversight of Federal activities, and management of third
12 party shipper business on the Duke Energy Kentucky system. As the name
13 implies, the Gas Scheduling group is responsible for all physical wholesale
14 natural gas sales and purchases for Duke Energy Kentucky as well as city gate
15 operations. Finally, Gas Trading procures physical natural gas supply to meet
16 customers' demands, ensure storage optimal storage levels to meet current and
17 forecasted demand, and when not needed, optimizes pipeline, storage and supply
18 assets.

19 **Q. PLEASE DESCRIBE THE GAS SALES AND DELIVERY SERVICES**
20 **FUNCTION.**

21 A. Gas Sales and Delivery Services is primarily responsible for driving customer
22 growth through system expansion projects designed to serve new construction
23 residential and commercial markets in addition to existing homes and businesses

1 desiring to convert to natural gas from alternative fuel sources. Gas Sales and
2 Delivery Services is also responsible for initiating and administering projects and
3 contracts to serve large industrial end users and gas-fired power generation
4 facilities across the Company's footprint as well as contracts for off-system
5 natural gas deliveries to directly connected municipal customers.

**C. NATURAL GAS BUSINESS UNIT'S VENTURES AND BUSINESS
DEVELOPMENT SEGMENT**

6 **Q. PLEASE DISCUSS THE NATURAL GAS BUSINESS UNIT VENTURES
7 AND BUSINESS DEVELOPMENT SEGMENT.**

8 A. Ventures and Business Development is responsible for investment prioritization
9 and performance, grow midstream ventures, and manage the KO Transmission
10 Pipeline business. Ventures and Business Development is defined by four major
11 functions; Midstream Development, Asset Management and Investment,
12 Compressed Natural Gas for motor fuels (CNG), and Investment and Strategic
13 Planning.

14 **Q. PLEASE BRIEFLY DESCRIBE THE MIDSTREAM DEVELOPMENT
15 FUNCTION.**

16 A. Midstream Development is responsible for sourcing and evaluating commercial
17 investment opportunities including mergers and acquisitions.

18 **Q. PLEASE BRIEFLY DESCRIBE THE ASSET MANAGEMENT AND
19 INVESTMENT FUNCTION.**

20 A. The Asset Management and Investment Function is responsible for managing
21 current projects and for operating commercial joint venture assets.

1 **Q. PLEASE BRIEFLY DESCRIBE THE CNG FOR MOTOR VEHICLES**
2 **FUNCTION.**

3 A. The CNG Function is responsible for the safe operation of all CNG stations and
4 commercial contracts for supplying private CNG stations. The CNG Function
5 currently operates and maintains eleven CNG public filling stations in the Duke
6 Energy's North Carolina, South Carolina and Tennessee jurisdictions.

7 **Q. PLEASE BRIEFLY DESCRIBE THE INVESTMENT AND STRATEGIC**
8 **PLANNING FUNCTION.**

9 A. The Investment and Strategic Planning Function is responsible for performing all
10 financial analysis, budgets and forecasts for the Ventures and Business
11 Development Segment.

D. NATURAL GAS BUSINESS UNIT'S PUBLIC AFFAIRS, RATES, AND
REGULATORY SEGMENT

12 **Q. PLEASE DISCUSS THE NATURAL GAS BUSINESS UNIT'S PUBLIC**
13 **AFFAIRS, RATES, AND REGULATORY RESPONSIBILITIES.**

14 A. Public Affairs, Rates, and Regulatory responsibilities are to enhance community
15 relations, provide regulatory reporting, and rate case preparation. These activities
16 for Kentucky and Ohio are supported by the President of Duke Energy Kentucky
17 and Duke Energy Ohio.

III. DUKE ENERGY KENTUCKY'S LOCAL NATURAL GAS UTILITY
OPERATIONS

18 **Q. PLEASE DESCRIBE DUKE ENERGY KENTUCKY'S LOCAL NATURAL**
19 **GAS OPERATIONS.**

20 A. Duke Energy Kentucky serves a relatively densely populated territory that, though

1 not heavily industrialized, consists of a diverse mix of industrial customers. Duke
2 Energy Kentucky currently provides natural gas distribution service to customers
3 in Boone, Campbell, Gallatin, Grant, Kenton and Pendleton counties in northern
4 Kentucky. Duke Energy Kentucky has approximately 1,453 miles of gas mains on
5 its natural gas distribution system. There are approximately 170 employees in
6 Duke Energy Kentucky's and Duke Energy Ohio's Gas Operations Department,
7 many of whom perform services for Duke Energy Kentucky. The capital
8 expenditures for Duke Energy Kentucky's Gas Operations in 2017 were
9 approximately \$50 million.

10 Duke Energy Kentucky purchases and delivers natural gas to
11 approximately 99,500 customers.

12 **Q. PLEASE SUMMARIZE HOW DUKE ENERGY KENTUCKY PROCURES**
13 **NATURAL GAS.**

14 A. During the 2017/2018 winter period, Duke Energy Kentucky purchased nearly all
15 of its gas supply under firm supply contracts with established marketers and
16 producers, who manage diversified natural gas supply and energy portfolios.
17 These firm agreements are composed of a base supply component, which assures
18 a continuous supply designed to meet minimum customer demands, and a swing
19 supply component. Swing supply provides Duke Energy Kentucky flexibility to
20 accommodate daily temperature-sensitive fluctuations in customer demand. Duke
21 Energy Kentucky sources its gas through a competitive bidding process to enable
22 it to obtain the optimal mix of suppliers and prices for its customers. The small
23 remaining portion of Duke Energy Kentucky's 2017/2018 gas supply was

1 obtained from the daily and monthly markets.

2 Duke Energy Kentucky contracts with interstate pipeline's for firm
3 transportation and storage services. During 2017, Duke Energy Kentucky
4 contracted for firm transportation and storage services with Columbia Gas
5 Transmission Corporation (Columbia Gas). Duke Energy Kentucky also
6 contracted for firm transportation service from Tennessee Gas Pipeline Company
7 (Tennessee Pipeline), Columbia Gulf Transmission Corporation (Columbia Gulf),
8 Texas Gas Transmission Company and KO Transmission Corporation. This
9 diverse group of interstate pipeline companies allows Duke Energy Kentucky to
10 negotiate lower transportation rates than it otherwise would be able to obtain from
11 a smaller group of transportation providers.

12 The Company's gas procurement policies and practices have traditionally
13 resulted in some of the most competitive gas cost adjustment (GCA) rates in the
14 Commonwealth. Using techniques such as "expected value analysis" and *Monte*
15 *Carlo* simulation, Duke Energy Kentucky has successfully made the transition
16 from being a pre-Order 636¹ pipeline-supply dependent customer to an
17 independent, aggressive buyer managing a diversified gas commodity and
18 pipeline services portfolio.

19 Duke Energy Kentucky has used asset management agreements, where the
20 Company has contracted with a third-party, to manage Duke Energy Kentucky's
21 gas supply contracts, interstate pipeline transportation contracts and storage gas in
22 exchange for a monthly fee that the asset manager credits to Duke Energy

¹ Docket No. RD91-11-000 In Re Pipeline Service Obligations and Revisions to Regulations Governing Self-Implementing Transportation Under Part 284 of the Commission's Regulations. (FERC Order No. 636).

1 Kentucky. This fee, which Duke Energy Kentucky flows through 100 percent to
2 customers through the monthly GCA, allows Duke Energy Kentucky to optimize
3 the value of these assets. Additionally, Duke Energy Kentucky revises its GCA
4 price monthly in order to send accurate price signals to its customers, which the
5 Commission approved in an order dated November 6, 2003, in Case No. 2003-
6 00386.

7 **Q. WHAT STEPS HAS DUKE ENERGY KENTUCKY TAKEN TO HELP**
8 **ASSURE THAT NATURAL GAS COSTS ARE REASONABLE?**

9 A. Duke Energy Kentucky utilizes a “Best Cost” approach to purchasing gas. This
10 approach involves five components: the price of gas, the security of gas supply,
11 the flexibility of gas supply, gas deliverability, and supplier relationships. Duke
12 Energy Kentucky has taken a number of steps to manage its gas costs consistent
13 with its best cost policy including active participation at FERC, restructuring of
14 supply and capacity contracts to adjust to market conditions, and the utilizing an
15 asset manager to promote more efficient use of its system and of its capacity and
16 commodity rights.

17 Additionally, the Company offers various bill management and payment
18 options to assist customers with managing their Duke Energy Kentucky bills.
19 Company witness Amy B. Spiller describes these options in her testimony.

IV. SYSTEM SAFETY, INTEGRITY, RELIABILITY
AND EFFICIENCY INITIATIVES

20 **Q. PLEASE IDENTIFY THE REGULATIONS THAT DRIVE DUKE**
21 **ENERGY KENTUCKY’S DISTRIBUTION AND TRANSMISSION**
22 **INTEGRITY MANAGEMENT INITIATIVES.**

1 A. Local natural gas distribution companies are required by regulations imposed by
2 the federal government to ensure that infrastructure is fit for service. These
3 regulations apply to operators' infrastructure, including service lines per 49
4 C.F.R. 192.1007, as well as the totality of 49 C.F.R. Chapter 192. Section
5 192.1007 is the DIMP and the definition of service line is explained in 49 C.F.R.
6 192.3 The DIMP is part of the Pipeline Safety Regulations, CFR Part 192,
7 administered by PHMSA.

8 CFR 192 Subpart P – Gas Distribution Pipeline Integrity Management
9 defines the required Integrity Management Program as “an overall approach by an
10 operator to ensure the integrity of its gas distribution system.”

11 CFR 192 Subpart O – Gas Transmission Pipeline Integrity Management
12 states that “an operator of a covered pipeline segment must develop and follow a
13 written integrity management program that contains all the elements described in
14 §192.911 and that addresses the risks on each covered transmission pipeline
15 segment.”

16 **Q. WHY IS DISTRIBUTION AND TRANSMISSION INTEGRITY**
17 **MANAGEMENT IMPORTANT?**

18 A. As stated previously, integrity management is an overall approach to ensure the
19 integrity (*i.e.*, safety) of the gas distribution and transmission system. These
20 regulations impose upon the Company an obligation to continuously evaluate the
21 reliability of its natural gas distribution and transmission system and to maintain
22 and improve its safety and performance.

1 **Q. PLEASE DESCRIBE DUKE ENERGY KENTUCKY'S CURRENT DIMP.**

2 A. Duke Energy Kentucky's DIMP is summarized in a written document that meets
3 all the requirements of CFR 192 Subpart P – Gas Distribution Pipeline Integrity
4 Management and follows the following seven elements outlined in the regulation:

- 5 1) Knowledge of the gas distribution system;
- 6 2) Identify threats;
- 7 3) Evaluate and rank risk;
- 8 4) Identify and implement measures to address risks;
- 9 5) Measure performance, monitor results, and evaluate effectiveness;
- 10 6) Periodic evaluation and improvement; and
- 11 7) Report results.

12 These elements support the basis of the DIMP and provide direction in evaluating
13 initiatives to reduce risks in the distribution system.

14 **Q. PLEASE EXPLAIN HOW DUKE ENERGY KENTUCKY IDENTIFIES,**
15 **DESIGNS, PRIORITIZES, AND IMPLEMENTS PROJECTS BASED ON**
16 **ITS DIMP.**

17 A. Duke Energy Kentucky identifies, evaluates, and ranks risks in its distribution
18 system and prioritizes measures to address these risks based on a relative risk
19 model that takes into consideration threats to the system as defined in CFR
20 192.1007, which include corrosion, natural forces, excavation damage, material,
21 weld or joint failure, incorrect operation, and other concerns that would threaten
22 the integrity of the pipeline. The method used to determine the risk in Duke
23 Energy Kentucky's distribution system is based on the relative risk associated

1 with repaired leaks. This risk is then aggregated for the entire system. The model
2 is configured to utilize consequence values and a probability of one for each
3 individual leak repair. Risk is calculated for each repair along with the inclusion
4 of facility and location data. Individual leak risk is then summed up to develop
5 risk scores at a system level. Threats with the highest total risk scores are then
6 reviewed to determine appropriate measures to reduce and/or eliminate the risk.

7 **Q. PLEASE DESCRIBE GAS OPERATIONS' MAJOR DISTRIBUTION**
8 **INTEGRITY, SAFETY AND RELIABILITY INITIATIVES.**

9 A. All of the activities within Gas Operations incorporate safety and reliability
10 considerations. Safety and reliability are organizational responsibilities and not
11 the purview of any one part of the organization. For example, the Gas Resources
12 group purchases gas that meets current pipeline quality standards. Gas
13 Engineering designs and installs the Duke Energy Kentucky's natural gas system
14 in accordance with applicable safety codes promulgated in Title 49 of the Code of
15 Federal Regulations. Gas Field and System Operations follows PHMSA and
16 Commission safety regulations when installing, operating, and maintaining
17 transmission and distribution facilities. This deliberate focus on safety and
18 reliability is also demonstrated by Gas Operations, including our individual
19 functional groups and is evidenced by the Company's exemplary safety record for
20 natural gas distribution service in the Commonwealth.

21 In addition to these daily safety measures, Gas Operations is constantly
22 exploring opportunities for implementation of programs that focus on safety and
23 reliability, all of which are relevant to these proceedings. The first such program

1 was Duke Energy Kentucky's very successful accelerated main replacement
2 program (AMRP), which was designed to replace the Company's cast iron and
3 bare steel mains and associated services on an accelerated basis. The AMRP
4 significantly reduced leak repairs on Duke Energy Kentucky's gas distribution
5 system and the costs associated with such repairs. Duke Energy Kentucky was the
6 first natural gas utility to implement such a program and operated the program
7 such that it was completed on schedule. Duke Energy Kentucky maintained a
8 replacement rate that allowed it to complete the program by 2010, as originally
9 anticipated. Additionally, Duke Energy Kentucky efficiently managed the
10 program by awarding the construction contracts for the AMRP through an annual
11 bidding process. This allowed Duke Energy Kentucky to reduce the program
12 costs.

13 The second, major program is the Accelerated Riser Replacement Program
14 (RRP), which was designed to replace certain types of service head adapter-style
15 risers that have been associated with riser leaks. The RRP was completed in 2012.

16 The third major program is the ASRP. The ASRP, like its predecessor
17 AMRP, was designed to replace out of date and aging natural gas delivery service
18 line (main to curb and curb to meter) infrastructure that has a high likelihood of
19 developing leaks or even failure. By installing new and current industry standard
20 facilities, the ASRP improves safety and reliability of the gas delivery system. As
21 a component to the ASRP, the Company assumes ownership of these services
22 replaced. Rider ASRP was implemented in 2016 as a five-year program. Duke
23 Energy Kentucky has worked diligently at managing the costs of this program and

1 anticipates its completion within the forecasted test period in this proceeding. As
2 a result, the Company is seeking to end the associated Rider with implementation
3 of new base natural gas rates.

4 Finally, Duke Energy Kentucky has been focused on Pipeline Integrity
5 Management, which is a comprehensive, risk-based approach to managing
6 pipeline safety that is required for both transmission and distribution systems.
7 Again, integrity management requires the entire organization's focus.

8 **Q. PLEASE EXPLAIN THE TRANSMISSION INTEGRITY MANAGEMENT**
9 **PROGRAM (TIMP).**

10 A. Duke Energy Kentucky's TIMP is summarized in a written document that meets
11 all the requirements of CFR 192 Subpart O – Gas Transmission Pipeline Integrity
12 Management. TIMP consists of seven main steps:

- 13 1) High Consequence Area (HCA) identification;
- 14 2) Data integration;
- 15 3) Risk analysis;
- 16 4) Assessment;
- 17 5) Repair;
- 18 6) Minimize risk; and
- 19 7) Improve.

20 As a whole, this is a continuous evaluation and assessment process. As stated in
21 49 CFR 192, "An operator's initial integrity management program begins with a
22 framework and evolves into a more detailed and comprehensive integrity
23 management program, as information is gained and incorporated into the

1 program. An operator must make continual improvements to its program.”

2 PHMSA emphasizes the importance of the operator’s management
3 responsibility to fully understand and acknowledge the implications of these
4 program evaluations and to take the necessary steps to address deficiencies and
5 make continuous program improvements. Program evaluation is one of the key
6 required program elements established in the Integrity Management rules.
7 Additionally, operator senior management is required to certify the TIMP
8 performance information submitted annually to PHMSA.

9 Recently, Duke Energy Kentucky performed a major TIMP review using
10 an outside consultant. This included a review of plans and procedures, as well as
11 documentation supporting the implementation of the program. Based on this
12 review, Duke Energy Kentucky is implementing a strategy to enhance the overall
13 effectiveness of its TIMP. This program targets the following areas: 1) Inline
14 Inspection (ILI) and pressure testing techniques, and 2) MAOP verification.

15 **Q. PLEASE DESCRIBE GAS OPERATIONS’ MAJOR TRANSMISSION**
16 **INTEGRITY, SAFETY AND RELIABILITY INITIATIVES.**

17 A. Currently, Duke Energy Kentucky uses direct assessment techniques as the
18 primary method of integrity assessments. The data collected from these methods
19 are limited and do not cover all potential threats. Increasing the percent of ILI and
20 pressure test assessment methods to align with known threats provides more data
21 for detecting defects and is a requirement of federal regulations and prudent
22 operations. An ILI/Hydrotest capability study was recently completed which will
23 aid in determining how to retrofit existing pipelines for ILI is necessary.

1 In compliance with Pipeline Safety Act of 2011 (Public Law 112-90), to
2 maintain the integrity of its natural gas delivery system, and to ensure that it
3 continues to operate the system at the appropriate MAOP, Duke Energy Kentucky
4 conducted a very thorough segment-by-segment review for all transmission
5 pipelines and facilities. Gaps were identified in records that are used to support
6 MAOP's for the pipelines that resulted in pressures being adjusted and projects
7 developed to bring the system back to full operating pressure. Pressure testing of
8 some existing transmission pipeline segments must be performed in order to
9 provide traceable, verifiable, and complete documentation to support all MAOP
10 pursuant to CFR Title 49 Part 192.619 and 192.501. This was specifically
11 emphasized in the Pipeline Safety, Regulatory Certainty, and Job Creation Act of
12 2011 passed by Congress on December 13, 2011, in response to the gas pipeline
13 incident that occurred in San Bruno, California in 2010. In addition, pressure
14 testing addresses the requirement in CFR Title 49 Part 192, Subpart O, which
15 covers Transmission Integrity Management, to assess unstable manufacturing and
16 construction defects. Using the data from the review, Duke Energy Kentucky has
17 developed work plans for addressing each segment with inadequate records. The
18 verification process includes developing a plan segment by segment, ranking the
19 importance of each segment, planning a schedule for the work to be conducted
20 based on importance and resource logistics, and execution of the work. During
21 this work, no major interruptions are planned to service to Duke Energy Kentucky
22 customers and the Company will be doing due-diligence to inform stakeholders of
23 the work.

1 **Q. HOW HAS GAS OPERATIONS PERFORMED ON ITS MAJOR SAFETY**
2 **AND RELIABILITY MEASURES?**

3 A. Duke Energy's Gas Operations in Kentucky and Ohio have consistently
4 performed as a leader in safety. Duke Energy was honored as an industry leader in
5 employee safety having received the AGA Safety Achievement Award for
6 achieving the lowest DART (Days Away, Restricted, or Transferred) incident rate
7 twice since 2013.

8 Gas Operations' major safety and reliability measures are leaks repaired
9 for its gas distribution system. Duke Energy Kentucky's number of service
10 corrosion leaks repaired has declined significantly with the program implemented,
11 from a recent peak in 2014 to an approximate 71 percent reduction in 2017. The
12 Company's safety and reliability programs have resulted in a significant reduction
13 in the number of system damages due to excavation. For example, in 2011, the
14 Company experienced approximately 6.69 damages per thousand locates. In 2017,
15 this number has been reduced to 1.79.

16 **Q. PLEASE DISCUSS THE COMPANY'S EFFICIENT MANAGEMENT OF**
17 **ITS GAS OPERATIONS BUSINESS.**

18 A. Duke Energy Kentucky has aggressively investigated and, where justified,
19 implemented new products, technologies, and work methods to increase our
20 productivity. Duke Energy Kentucky and Ohio participate in the AGA's Gas
21 Utility Operations Best Practices Benchmarking Program. In this program, gas
22 distribution companies from the United States and Canada routinely benchmark
23 three to five distribution operations topics each year. Duke Energy Kentucky has

1 implemented process improvements and utilized new technology, materials, and
2 equipment as a result of what it has learned through participating in this program.

3 Similarly, Duke Energy Kentucky shares its practices with the other
4 participating AGA members. As a result of this information exchange, Duke
5 Energy's Gas Operations was recognized as a unique performer due to the AMRP
6 and was selected to present at the AGA's Distribution Best Practices Roundtable
7 for Main and Service Replacements in both 2007 and 2010. In addition, Duke
8 Energy's Gas Operations was selected to present at the AGA's Best Practices
9 Roundtable for Leak Management in 2011, based on Duke Energy Gas
10 Operations' top quartile performance in the following areas: (1) jurisdictional
11 leaks found by leak survey per total jurisdictional leaks reported; (2) total leak
12 survey cost per mile of mains and services surveyed; (3) service repair labor hours
13 per service leak repaired; and (4) leak repair total cost per leak repaired.

14 Duke Energy was again selected to present at the AGA's Gas Utility
15 Operations Best Practices Roundtable for Leak Management in 2014, based on
16 Duke Energy top quartile performance in 2013 the following areas: (1)
17 jurisdictional leaks found by leak survey; (2) number of open leaks at the end of
18 the year per 1000 miles of mains and services; (3) number of open leaks at the end
19 of the year per 1000 customers; (4) average age at year end of Grade II leaks in
20 calendar days; and (5) percent of services surveyed in 2013. Duke Energy was
21 also selected in 2014 to present at the AGA's Best Practices Roundtable for
22 Damage Prevention, Marking and Locating for improvements made in our
23 damage prevention program since the previous benchmark in 2011.

1 The Company also participates in the AGA Peer to Peer review program.
2 This voluntary safety initiative is for local natural gas utilities throughout North
3 America. The National AGA Peer Review Program is a peer-to-peer safety and
4 operational practices review program that allows AGA member companies to
5 observe their peers, share leading practices and identify opportunities to better
6 serve customers and communities.

V. OTHER MAJOR INFRASTRUCTURE CAPITAL INVESTMENTS

7 **Q. PLEASE BRIEFLY DESCRIBE THE STATUS OF DUKE ENERGY**
8 **KENTUCKY'S ASRP.**

9 A. As I previously described, Duke Energy Kentucky implemented the ASRP
10 following Commission approval in 2016. Since that time, Duke Energy Kentucky
11 has successfully replaced approximately 6,345 services under this program,
12 resulting in a safer and more reliable natural gas delivery system. The Company
13 anticipates needing to replace approximately 5,229 additional qualifying services
14 under the program. The Company has successfully managed its costs and is
15 projected to finish the program in 2019, slightly ahead of the initial contemplated
16 schedule, and well under the initial projected costs of \$50 million. The Company
17 is projecting the final costs of the ASRP to be approximately \$42.3 million.

18 **Q. WHAT IS DUKE ENERGY KENTUCKY REQUESTING WITH RESPECT**
19 **TO THE ASRP AS PART OF THIS PROCEEDING?**

20 A. Duke Energy Kentucky is scheduled to complete its ASRP project during the test
21 period of in this case. The Company is thus requesting to discontinue to Rider
22 ASRP mechanism effective with new base rates and subject to any final necessary

1 true-up required for the balance of Rider ASRP revenue requirement collections
2 and the effective date of new rates in this case.

3 **Q. OTHER THAN THE ASRP, HAS THE COMPANY MADE ANY OTHER**
4 **SIGNIFICANT INVESTMENTS SINCE ITS LAST NATURAL GAS**
5 **GENERAL RATE CASE?**

6 A. Yes. The Company is continually making prudent investments in its system to
7 fulfill our mission of providing safe, reliable, adequate, reasonable, and affordable
8 natural gas service. The major investments that have occurred since the
9 Company's last natural gas rate case include the completion of our Big Bone
10 Natural Gas pipeline and the advanced metering infrastructure upgrade for natural
11 gas.

12 **Q. PLEASE BRIEFLY DESCRIBE THE BIG BONE PIPELINE PROJECT.**

13 A. In 2016, Duke Energy Kentucky received Commission authorization to
14 commence construction of a new, approximate nine and a half-mile in length,
15 twelve-inch steel natural gas pipeline at the southern end of the Company's
16 natural gas delivery system. This new pipeline enables the flow of natural gas
17 from west to east across the lower central part of the Company's service territory.
18 Additionally, the Company received authorization to construct a 4,000 feet, eight-
19 inch pipeline to serve our Richwood distribution system. The project required two
20 pressure regulating stations. The station at Richwood Church Road was designed
21 to reduce the pressure to sixty pounds per square inch gauge (psig) for the
22 Richwood distribution system. The east regulating station will provide over
23 pressurization for another of the Company's pipelines, the AM-03.

1 Additionally, the Company is anticipating completion of its advanced
2 natural gas metering infrastructure by the end of 2018. The primary driver of this
3 deployment was through the Company's electric operations. However, because
4 Duke Energy Kentucky is a combination natural gas and electric utility and relies
5 upon the same metering personnel for reading electric and natural gas meters, it
6 was reasonable to upgrade the natural gas metering technology at the same time
7 as the electric.

8 **Q. WHY WAS THE BIG BONE PIPELINE PROJECT NEEDED?**

9 A. The Project adds needed supply and improved reliability in the central portion of
10 the Company's natural gas delivery system in an area that is seeing growth.
11 Although Duke Energy Kentucky has been able to meet customer needs with safe
12 and reliable natural gas service, the Company must properly time its infrastructure
13 investments to respond to anticipated needs of our customers, improve the system
14 integrity, and to alleviate stresses to the overall distribution system. The project
15 was necessary to respond to the needs of our customers and maintain existing
16 levels of quality service and enhance reliability. This new pipeline provides
17 additional reliability to Duke Energy Kentucky's natural gas delivery system by
18 connecting two existing north-south pipelines with another west-east pipeline at
19 the central part of the Company's service territory. The project allows additional
20 natural gas pipeline capacity in areas of the service territory that are close to
21 capacity. This area is experiencing low pressure in times of high consumption and
22 the new pipeline will alleviate this pressure issue by increasing access to supply.

1 **Q. PLEASE BRIEFLY SUMMARIZE THE METERING INFRASTRUCTURE**
2 **UPGRADE DEPLOYMENT AS IT RELATES TO NATURAL GAS**
3 **OPERATIONS.**

4 A. For Duke Energy Kentucky's combination electric and gas customers
5 (combination customers), the metering upgrade technology consists of an AMI
6 electric meter and an AMI gas module attached to their existing gas meter. Usage
7 data from these gas modules will be collected through nearby electric AMI
8 meters. In areas where Duke Energy Kentucky only provides gas service (gas-
9 only customers) the Company will not have the electric AMI infrastructure in
10 place to support communications for a gas AMI solution. The technology for
11 these customers is an AMR gas module attached to their existing gas meters. The
12 Company will read the AMR gas modules remotely by driving past the
13 customer's premise. With these technologies, the Company should not have to
14 enter the customer's home or property just to read a meter any longer.
15 Additionally, the fewer daily and monthly "truck rolls" will directly translate to
16 cost savings through a reduction in O&M expense related to meter reading that all
17 customers will eventually experience through Duke Energy Kentucky's rates.

VI. OPERATIONS AND MAINTENANCE BUDGET

18 **Q. PLEASE DISCUSS HOW DUKE ENERGY KENTUCKY'S**
19 **RESPONSIBILITY BUDGET WAS PREPARED FOR USE IN THE**
20 **COMPANY'S FORECASTED TEST PERIOD DATA.**

21 A. The responsibility budget is prepared by Gas Operations. Gas Operations prepares
22 a detailed monthly budget every year for O&M costs. Duke Energy Kentucky

1 reviews every aspect of Gas Operations' O&M activities by individual FERC
2 account. The Company then performs a historical analysis of the O&M accounts
3 and uses this as a starting point. The Company analyzes whether any unusual
4 conditions caused any category of O&M costs to be higher than normal and
5 adjusts estimates accordingly. Gas Operations also analyzes whether there are any
6 new O&M activities or requirements that will occur in future years that are not
7 reflected in previous years' costs.

8 For example, as I previously discussed, DIMP and TIMP compliance
9 requires a continuous reevaluation of system risks and the development of
10 programs and actions to address such risks. Duke Energy Kentucky has identified
11 additional DIMP and TIMP compliance work that will involve significant new
12 O&M costs. For such programs, we estimate the costs required for that particular
13 new O&M activity and we adjusted our estimate of O&M costs accordingly for
14 purposes of this case.

15 Detailed estimates of O&M costs were prepared for the 2018 annual
16 budget, which were provided to Mr. Pratt for his use in the preparation of the last
17 six months of the base period in this proceeding. The Company has identified
18 additional costs that will occur going forward that were not included in the budget
19 and a pro-forma adjustment to the test period revenue requirement was made as
20 discussed in the testimony of Company witness Sarah E. Lawler.

VII. CAPITAL EXPENDITURE BUDGET PROCESS

1 **Q. PLEASE GENERALLY DESCRIBE THE PROCESS FOLLOWED TO**
2 **DEVELOP DUKE ENERGY KENTUCKY'S GAS OPERATIONS**
3 **CAPITAL BUDGET FOR THE NEXT FIVE YEARS.**

4 A. Mr. Pratt supports this information in his direct testimony. Blanket projects
5 consist of customer growth projects, equipment replacement projects, government
6 mandated projects and capital expenditures associated with capital tools and
7 building upgrades. Customer growth projects involve new main installations
8 related to general growth in Duke Energy Kentucky's customer load. Prior-period
9 customer and load growth is used to estimate how much incremental
10 infrastructure will be required in future periods. Government mandated projects
11 consist of street improvement projects and other construction projects Duke
12 Energy Kentucky is required to undertake by permit.

13 We develop the blanket capital expenditure budget for these projects
14 through a qualitative and quantitative review of historical data. We use historical
15 average installation footage and determine whether any unusual factors existed
16 during any year for the historical data, such that the data for that year should be
17 discounted or a forecasted footage for the current year should be used. We then
18 prepare a five-year future look. We use specific cost projections related to a
19 particular project, to the extent that such information is available. For example,
20 government entities notify us about many street improvement projects well in
21 advance, and we prepare the capital budget for these items by incorporating the
22 projected cost for the known parameters of these projects.

1 Specific projects are larger projects that Duke Energy Kentucky can
2 identify in advance which are needed to maintain the integrity of the system,
3 strengthen infrastructure to meet design-day requirements, or are initiated by
4 governmental entities for public improvements. Integrity projects consist of
5 casing projects, corrosion control and general transmission and distribution
6 integrity projects required to maintain a safe pipeline system. These projects are
7 driven by prior-period O&M work done to inspect the system for safety and
8 reliability. System infrastructure projects are projected by computer modeling
9 when areas of the distribution system have deficient minimum pressure levels. We
10 budget for specific projects based on engineering cost estimating methods for
11 labor and material costs, based on the known scope for each project. The costs are
12 generated by historical costing data based on past projects and adjusting to current
13 resource and material trends.

14 The Company prepares a five-year forecast for these capital expenditures,
15 including retirements, each year. This information is used for the annual budget
16 and the five-year forecasts discussed by Mr. Pratt. Gas Operations is responsible
17 for preparing the capital expenditures budget (except for gas meters, information
18 technology and corporate initiatives) used by Mr. Pratt to develop the forecasted
19 test period financial data. I am also responsible for reviewing the capital
20 expenditure budget (except for gas meters, information technology and corporate
21 initiatives) for 2018, 2019 and 2020.

VIII. SCHEDULES SPONSORED BY WITNESS

1 **Q. WHAT PORTIONS OF THE COMPANY'S FILING REQUIREMENTS**
2 **16(7)(d) AND 16(7)(h)(8) DO YOU SPONSOR?**

3 A. I co-sponsor the O&M information used in filing requirement (FR) 16(7)(d),
4 which is the annual and monthly budget for the twelve months preceding the
5 filing date, and the monthly budget detail used in the preparation of the base and
6 the forecasted test period.

7 **Q. PLEASE EXPLAIN FR 16(7)(b).**

8 A. FR 16(7)(b) provides the budget for Duke Energy Kentucky's gas capital
9 expenditures for 2018, 2019 and 2020. Gas Operations provided, and I reviewed,
10 the underlying information for this filing requirement, to Mr. Pratt, using the
11 methodology I discussed earlier in my testimony. Mr. Pratt used this information
12 to prepare Duke Energy Kentucky's forecasted test period financial data.

13 **Q. PLEASE EXPLAIN FR 16(7)(f).**

14 A. FR 16(7)(f) requires the applicant to list all major construction projects, defined
15 as projects five percent or more of the annual construction budget within the
16 three-year forecast.

17 **Q. PLEASE EXPLAIN FR 16(7)(g).**

18 A. FR 16(7)(g) requires the applicant to list certain cost information, in aggregate
19 form, for all other construction projects not listed on FR 16(7)(f) within the three-
20 year forecast. Gas Operations provided, and I reviewed, the information for these
21 projects, using the methodology I discussed earlier in my testimony for preparing
22 the Gas Operations capital expenditure budget.

IX. CONCLUSION

1 **Q. WERE (FR) 16(7)(b), FR 16(7)(f), FR 16(7)(g), (FR) 16(7)(h)(8) AND THE**
2 **O&M PROVIDED TO MR. PRATT FOR (FR) 16(7)(d) OBTAINED OR**
3 **PREPARED BY YOU OR UNDER YOUR DIRECTION AND CONTROL?**

4 **A. Yes.**

5 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

6 **A. Yes.**

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

The Electronic Application of Duke)
Energy Kentucky, Inc., for: 1) An)
Adjustment of the Natural Gas Rates; 2)) Case No. 2018-00261
Approval of a Decoupling Mechanism; 3))
Approval of New Tariffs; and 4) All)

Relief.)

DIRECT TESTIMONY OF

SARAH E. LAWLER

ON BEHALF OF

DUKE ENERGY KENTUCKY, INC.

August 31, 2018

TABLE OF CONTENTS

	<u>PAGE</u>
I. INTRODUCTION AND PURPOSE	1
II. TEST PERIOD AND RATE BASE	3
III. FILING REQUIREMENTS SPONSORED BY WITNESS	4
IV. CONCLUSION	14

I. INTRODUCTION AND PURPOSE

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Sarah E. Lawler, and my business address is 139 East Fourth Street,
3 Cincinnati, Ohio 45202.

4 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5 A. I am employed by Duke Energy Business Services LLC (DEBS) as Director Rates
6 & Regulatory Planning. DEBS provides various administrative and other services
7 to Duke Energy Kentucky, Inc., (Duke Energy Kentucky or Company) and other
8 affiliated companies of Duke Energy Corporation (Duke Energy).

9 **Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND**
10 **PROFESSIONAL EXPERIENCE.**

11 A. I earned a Bachelor of Science in Accountancy from Miami University, Oxford,
12 Ohio in 1993. I am also a Certified Public Accountant.

13 I began my career in September 1993 with Coopers & Lybrand, L.L.P., as
14 an audit associate and progressed to a senior audit associate. In August 1997, I
15 moved to Kendle International Inc., where I held various positions in the
16 accounting department, ultimately being promoted to Corporate Controller. In
17 August 2003, I began working for Cinergy Corp., as External Reporting Manager,
18 where I was responsible for the company's Securities & Exchange Commission
19 (SEC) filings. In August 2005, I then moved into the role of Manager, Budgets &
20 Forecasts. In June 2006, following the merger between Cinergy Corp. and Duke
21 Energy, I became Manager, Financial Forecasting. In February 2015, I was

1 promoted to Utility Strategy Director, Midwest. In December 2017 I began in my
2 current role as Director, Rates and Regulatory Planning.

3 **Q. PLEASE DESCRIBE YOUR RESPONSIBILITIES AS DIRECTOR,**
4 **RATES AND REGULATORY PLANNING.**

5 A. I am responsible for the preparation of financial and accounting data used in retail
6 rate filings and various other rate recovery mechanisms for Duke Energy Kentucky
7 and Duke Energy Ohio, Inc.

8 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY**
9 **PUBLIC SERVICE COMMISSION?**

10 A. Yes.

11 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**
12 **PROCEEDING?**

13 A. I support the revenue requirement proposed by Duke Energy Kentucky. Toward that
14 end, I support various adjustments to the projected data for the forecasted test period
15 provided by Duke Energy Kentucky witness, Robert “Beau” Pratt. I also sponsor
16 Filing Requirements (FR) 16(6)(b), 16(6)(c), 16(6)(f) and 16(7)(t). I also sponsor the
17 following schedules: Schedule A in satisfaction of FR 16(8)(a) and Schedule B-1, in
18 response to FR 16(8)(b); Schedules C-1 through C-2.1 in compliance with FR
19 16(8)(c); Schedules D-1, D-2.15 through D-2.22, D-2.24, and D-2.26 in compliance
20 with FR 16(8)(d); Schedules F-1 through F-7 in compliance with FR 16(8)(f); and
21 Schedules G-1 and H in response to FR 16(8)(g) and FR16((8)(h), respectively.

II. TEST PERIOD AND RATE BASE

1 **Q. WHAT IS THE TEST PERIOD IN THIS PROCEEDING?**

2 A. The Company has elected to use a forecasted test period in this proceeding. The
3 forecasted test period reflects the twelve months ending March 31, 2020, adjusted
4 for known and measurable changes, and a base period of twelve months ending
5 November 30, 2018. The base period consists of six months of actual data,
6 through May 31, 2018, and the remaining six months consist of forecasted data.

7 **Q. HOW WERE THE RATE BASE AND CAPITALIZATION DETERMINED**
8 **IN THIS PROCEEDING?**

9 A. The Company determined rate base and capitalization using a thirteen-month
10 average for the forecasted test period ending March 31, 2020. The base period
11 rate base and capitalization represent end-of-period balances.

12 **Q. DID THE COMPANY FOLLOW THE COMMISSION'S GUIDELINES IN**
13 **DEVELOPING THE BASE AND FORECASTED TEST PERIOD DATA?**

14 A. Yes. Per the Commission's rules, 807 KAR 5:001, Section 16(7)(e)(2), "the forecast
15 contains the same assumptions and methodologies as used in the forecast period for
16 use by management." As described by Mr. Pratt, the base and forecasted test periods
17 were developed using the same methods applied in the Company's annual budgeting
18 process. The first six months of the base period are actual results and are taken from
19 the Company's books and records.

III. FILING REQUIREMENTS SPONSORED BY WITNESS

1 **Q. PLEASE DESCRIBE FR 16(6)(b).**

2 A. FR 16(6)(b) requires that the forecasted adjustments are limited to the twelve months
3 immediately following the suspension period.

4 **Q. PLEASE DESCRIBE FR 16(6)(c).**

5 A. FR 16(6)(c) requires that capitalization and net investment rate base are based on
6 a thirteen-month average for the forecasted test period, in this case, the twelve
7 months ending March 31, 2020.

8 **Q. PLEASE DESCRIBE FR 16(6)(f)**

9 A. FR 16(6)(f) contains a reconciliation of the capital and rate base used to determine
10 the revenue requirement in this case.

11 **Q. PLEASE DESCRIBE FR 16(7)(t)**

12 A. FR 16(7)(t) contains a list of all commercially available or in-house developed
13 computer software, programs, and models used in the development of the schedules
14 and workpapers associated with the filing of the utility's application.

15 **Q. PLEASE DESCRIBE SCHEDULE A.**

16 A. Schedule A is the overall financial summary for both the base period and the
17 forecasted period at present rates. Based on the filing in this proceeding, as adjusted,
18 the Company's gas operations are projected to earn a return on rate base of 4.66
19 percent for the forecasted test period, which is considerably less than the 7.181
20 percent return requested in this proceeding. In order to achieve the appropriate return
21 on rate base, Duke Energy Kentucky's base gas revenues must increase
22 \$10,542,199, as shown in Schedule A.

1 **Q. WHY IS THE COMPANY USING RATE BASE AS THE BASIS FOR**
2 **COMPUTING ITS REVENUE REQUIREMENT?**

3 A. The Company believes that using gas rate base to calculate the revenue requirement
4 is the simplest and most transparent method. The Company has previously used
5 jurisdictional capitalization but KRS 278.290 allows the Commission to use other
6 bases for this computation.

7 **Q. PLEASE DESCRIBE SCHEDULE B-1.**

8 A. Schedule B-1 is the jurisdictional rate base summary for both the base and
9 forecasted periods and is supported by various schedules in Section B of the
10 Company's filing. The plant in service, and reserve for accumulated depreciation
11 and amortization for the base and forecasted periods were summarized from
12 Schedules B-2, B-3, and B-3.2 as supported by Company witnesses Ms. Cynthia
13 S. Lee and Mr. Pratt. The working capital component was summarized from
14 Schedule B-5, as supported by Mr. Pratt, and other items of rate base were
15 obtained from Schedule B-6, as supported by Mr. John R. Panizza. The
16 jurisdictional gas rate base for the forecast period as contained in Schedule B-1 is
17 \$313,675,239.

18 **Q. PLEASE DESCRIBE SCHEDULE C-1.**

19 A. Schedule C-1 is a jurisdictional operating income summary for the forecasted period
20 ended March 31, 2020. This schedule includes the operating income summary at
21 both current and proposed rates. It assumes that the Commission allows the total
22 amount of the requested gas base revenue increase of \$10,542,199. The adjusted
23 operating results at current rates were summarized from Schedule C-2 and the

1 proposed increase was obtained from Schedule M. The revenue at proposed rates
2 was developed by adding the revenue increase to the operating revenues at current
3 rates. The related expenses and taxes on the proposed increase were added to the
4 current adjusted operating results to determine the jurisdictional *pro forma* amounts
5 and the corresponding rate of return. The rate base as shown on this schedule is
6 calculated on Schedule B-1.

7 **Q. PLEASE DESCRIBE SCHEDULE C-2.**

8 A. Schedule C-2 is a jurisdictional operating income statement to be used for
9 ratemaking purposes. In order to develop the forecasted test period that is
10 appropriate for ratemaking, a two-step process was required. First, as required by
11 807 KAR 5:001, Section 16(6)(a), it was necessary to show the adjustments
12 necessary to transform the financial data for the base period into the forecasted
13 period. Second, it was necessary to adjust the forecasted period data to reflect any
14 adjustments required to ensure that the revenues and expenses to be recovered in
15 rates are representative of the expected costs to serve Duke Energy Kentucky gas
16 customers on an ongoing basis.

17 Schedule C-2 starts with the unadjusted base period and shows the
18 adjustments required to extend the Company's income statement from the base
19 period to the forecasted period. The next column on the schedule summarizes the
20 adjustments to the unadjusted forecasted test period. These adjustments are
21 described below. Generally, they relate to costs that were not reflected in the
22 Company's forecasted data, or were reflected in the forecasted data but not allocable
23 to Duke Energy Kentucky's gas customers, or were made to reflect traditional

1 ratemaking methodology. The unadjusted operating results are summarized from
2 Schedule C-2.1. The adjusted amounts include the effects of the adjustments
3 summarized on Schedule D-1.

4 **Q. PLEASE DESCRIBE SCHEDULE C-2.1.**

5 A. Schedule C-2.1 sets forth the detail of total Company operating results for both the
6 base and forecasted periods. The operating results as shown in this Schedule C-2.1
7 are listed by account and are summarized on Schedule C-2.

8 **Q. PLEASE DESCRIBE SCHEDULE D-1.**

9 A. Schedule D-1 is a summary of the detailed adjustments to test period operating
10 revenues and operating expenses as set forth in Schedules D-2.1 through D-2.26.

11 **Q. WHY ARE ADJUSTMENTS TO THE BASE AND FORECASTED**
12 **PERIOD INFORMATION NECESSARY?**

13 A. The adjustments shown in Schedules D-2.1 through D-2.14 reflect the normal
14 budgetary changes that are expected to occur from the base period through the
15 forecasted period. Schedules D-2.1 through D-2.14, are sponsored by Mr. Pratt. The
16 remaining adjustments, shown in Schedules D-2.15 through D-2.26, present
17 adjustments to the forecasted period data needed to ensure that the correct level of
18 revenue and expense is included in rates at the proper ongoing level. Some costs,
19 although reflected in the normal forecasting process, are not recoverable from Duke
20 Energy Kentucky's gas customers. Other adjustments were made to reflect
21 traditional ratemaking methodology (e.g., amortizing a regulatory asset to reflect the
22 Commission's prior orders). The reflection of a proper cost level is necessary in
23 order to ensure that customers are not paying for more than the cost of providing

1 service and to give the Company a reasonable opportunity to earn its authorized
2 return. Ignoring appropriate adjustments to the test period used for setting rates puts
3 customers at risk for overpaying for service and puts the Company at risk for
4 potentially under-recovering its ongoing costs. Schedule D-2.23 is sponsored by Ms.
5 Lee. Schedule D-2.25 is sponsored by Mr. Pratt. Schedules D-2.15 through D-2.22,
6 D-2.24, and D-2.26 are discussed in my testimony below.

7 **Q. HOW ARE THE TAX EFFECTS OF THESE ADJUSTMENTS SHOWN ON**
8 **YOUR SCHEDULES?**

9 A. All applicable adjustments to taxes, including taxes other than income taxes and
10 state and federal income taxes resulting from the adjustments, described below, are
11 shown for each individual adjustment on Schedule D-1.

12 **Q. PLEASE DESCRIBE SCHEDULE D-2.15.**

13 A. Schedule D-2.15 is an adjustment for uncollectible expenses. The Company sells
14 all of its accounts receivable to an affiliate, Cinergy Receivables, L.L.C. (Cinergy
15 Receivables) at a discount. The discount is based on a formula that compensates
16 the purchasing company for the time value of money and reflects Duke Energy
17 Kentucky's net bad debt expense.

18 Since the short-term debt component of the Company's weighted-average
19 cost of capital calculation in Schedule J-1 includes the average balance of
20 receivables at the interest rate being paid to Cinergy Receivables, the adjustment
21 shown in Schedule D-2.15 ensures that there is no double recovery of the time
22 value of money in the uncollectible expense. Consequently, the time value of
23 money component of the discount being charged to Uncollectible Expense

1 (Account 904) is eliminated from the forecasted test period expenses. The
2 adjustment reduces test period expenses by \$588,781.

3 **Q. PLEASE DESCRIBE SCHEDULE D-2.16.**

4 A. The adjustment in Schedule D-2.16 is to amortize the projected cost of presenting
5 the instant case. Duke Energy Kentucky proposes to amortize these costs over
6 five years, which increases test period operating expenses by \$115,100.

7 **Q. PLEASE DESCRIBE SCHEDULE D-2.17.**

8 A. Schedule D-2.17 summarizes the Company's proposal for recovering the
9 amortization of a regulatory asset approved by the Commission. The regulatory
10 asset represents the cost associated with the Company's Integrity Management
11 program which was authorized by the Commission in Case No. 2016-00159. The
12 Company is proposing to amortize this expense over five years. The effect of this
13 adjustment on gas operations is an increase in test period operating expenses of
14 \$577,423.

15 **Q. PLEASE DESCRIBE SCHEDULE D-2.18.**

16 A. Interest synchronization is used to ensure that the revenue requirement reflects the
17 appropriate income tax effects for interest expense determined in the weighted-
18 average cost of capital. Schedule D-2.18 presents the calculation of the state and
19 federal income taxes on the interest cost included in the cost of capital. The
20 adjustment is calculated by first determining the debt portion of total gas rate
21 base. The rate base allocated to gas is multiplied by the long-term and short-term
22 debt percentage of total capital structure.

1 The result is then multiplied by the average cost of long-term and short-
2 term debt. The sum of these results represents the annualized gas interest cost
3 deductible for income tax purposes. From this annualized total, we subtract the
4 forecasted test period gas book interest to determine the gas interest expense
5 adjustment for income tax purposes. The effect of this adjustment on gas
6 operations is to increase test period federal income taxes by \$64,943 and to
7 increase test period state income taxes by \$16,168.

8 **Q. PLEASE DESCRIBE SCHEDULE D-2.19.**

9 A. Schedule D-2.19 reflects the elimination of revenues and expenses applicable to
10 gas operations devoted to other than Duke Energy Kentucky customers associated
11 with the propane storage cavern and related mixing facilities, odorization stations,
12 and various feeder lines.

13 The effect of this elimination is to reduce other revenue by \$514,092;
14 O&M expenses for production by \$382,795 and distribution by \$102,870;
15 property tax expense by \$44,738; state deferred taxes by \$11,312; and federal
16 deferred taxes by \$45,422. Depreciation expense applicable to these facilities is
17 not included in the annualized depreciation expense calculated on Schedule B-3.2,
18 as a result of the plant investment being excluded on Schedule B-2.1, and
19 therefore has been eliminated from the test period via Schedule D-2.23.

20 **Q. PLEASE DESCRIBE SCHEDULE D-2.20.**

21 A. Schedule D-2.20 summarizes the costs associated with ongoing integrity
22 management initiatives that have not been included within the forecasted test

1 period, as discussed in the testimony of Company witness Gary J. Hebbeler. This
2 adjustment results in an increase to test period operating expenses of \$1,065,488.

3 **Q. PLEASE DESCRIBE SCHEDULE D-2.21.**

4 A. Schedule D-2.21 summarizes the Company's proposal to credit customers for the
5 reduction in federal income taxes arising from the Tax Cuts and Jobs Act of 2017
6 (TCJA) in the Company's current Accelerated Services Replacement Program
7 Rider (Rider ASRP). The Rider ASRP in effect beginning January 2018 reflected
8 federal income taxes at a 35 percent federal income tax rate (FIT). Changing the
9 FIT to 21 percent would result in a \$171,902 decrease in the revenue requirement
10 currently being collected under Rider ASRP. The Company has proposed to
11 amortize this amount over five years and as a result, reduces test period operating
12 expenses by \$34,380.

13 **Q. PLEASE DESCRIBE SCHEDULE D-2.22.**

14 A. Schedule D-2.22 is an adjustment to eliminate miscellaneous expenses such as
15 community relations, advertising, donations, employee recognition, governmental
16 affairs, club dues and miscellaneous events expenses from the forecasted test
17 period. These adjustments were made in order to comply with the Commission's
18 orders in prior rate proceedings. The effect of the adjustment on gas operations is
19 a decrease in test period operating expenses of \$368,743.

20 **Q. PLEASE DESCRIBE SCHEDULE D-2.24.**

21 A. Schedule D-2.24 is an adjustment to eliminate unbilled revenue and gas costs
22 from the forecasted test period. The adjustment decreases revenue in the
23 forecasted test period by \$390,078 and decreases gas costs by \$80,549.

1 **Q. PLEASE DESCRIBE SCHEDULE D-2.26.**

2 A. Schedule D-2.26 is an adjustment to eliminate incentive compensation from the
3 forecasted test period to eliminate a portion of incentive compensation expense
4 included in the test period related to the achievement of financial goals. The
5 adjustment utilizes a methodology similar to the one adopted by the Commission
6 in Case No. 2017-00321 and removes incentive compensation included in the
7 forecasted test period tied to the achievement of financial goals of the Company.
8 The adjustment decreases incentive compensation expense in the forecasted test
9 period by \$277,270.

10 **Q. PLEASE DESCRIBE SCHEDULE F-1.**

11 A. Schedule F-1 sets forth the detail, by account, of Social and Service Club Dues for
12 both the base and unadjusted forecasted test periods. All amounts are either charged
13 below the line or have been removed from operating expenses on Schedule D-2.22
14 and, thus, not included in the forecasted test period revenue requirement.

15 **Q. PLEASE DESCRIBE SCHEDULE F-2.1.**

16 A. Schedule F-2.1 sets forth the detail, by account, of Charitable Contributions for both
17 the base period and unadjusted forecasted test periods. All amounts are charged
18 below the line and, thus, not included in the forecasted test period revenue
19 requirement.

20 **Q. PLEASE DESCRIBE SCHEDULE F-2.2.**

21 A. Schedule F-2.2 indicates that the Initiation Fees and Country Club expenses for the
22 base and forecasted test periods are included on Schedule F-1.

- 1 **Q. PLEASE DESCRIBE SCHEDULE F-2.3.**
- 2 A. Schedule F-2.3 sets forth the detail, by account of Employee Party, Outing, & Gift
3 Expense for both the base and forecasted test periods.
- 4 **Q. PLEASE DESCRIBE SCHEDULE F-3.**
- 5 A. Schedule F-3 sets forth the detail, by account, of Customer Service and
6 Informational Expense, Sales Expense and General Advertising Expense for both
7 the base and unadjusted forecasted test periods. Advertising costs included in
8 Account 913 have been removed from operating expenses on Schedule D-2.22 and,
9 thus, not included in the forecasted test period revenue requirement.
- 10 **Q. PLEASE DESCRIBE SCHEDULE F-4.**
- 11 A. Schedule F-4 sets forth additional details supporting advertising costs for both the
12 base and unadjusted forecasted test periods. As noted above, these costs are not
13 included in the forecasted test period revenue requirement.
- 14 **Q. PLEASE DESCRIBE SCHEDULE F-5.**
- 15 A. Schedule F-5 sets forth the detail of Professional Services Expenses for both the
16 base and forecasted test periods.
- 17 **Q. PLEASE DESCRIBE SCHEDULE F-6.**
- 18 A. Schedule F-6, entitled "Rate Case Expense," indicates the estimated expense of
19 presenting this case. The top half of this schedule details the estimated expense of
20 this proceeding. Also included is a comparison to the rate case expense in the
21 Company's last two rate case proceedings. The bottom half of this schedule shows
22 the amortization over a five-year period. This amount is included in expense through
23 the adjustment contained in Schedule D-2.16.

1 **Q. PLEASE DESCRIBE SCHEDULE F-7.**

2 A. Schedule F-7 sets forth Civic, Political and Related Expense for both the base and
3 unadjusted forecasted test periods. All amounts are charged below the line and, thus,
4 not included in the forecasted test period revenue requirement.

5 **Q. PLEASE DESCRIBE SCHEDULE G-1.**

6 A. Schedule G-1 contains a summary of all payroll costs and related benefits and taxes
7 included in gas O&M expense for both the base and forecasted test periods.

8 **Q. PLEASE DESCRIBE SCHEDULE H.**

9 A. Schedule H, entitled "Computation of Gross Revenue Conversion Factor," (GRCF)
10 sets forth the calculation of the GRCF. This is the factor, or multiplier, used to gross-
11 up the operating income deficiency to a revenue deficiency amount. It includes the
12 Kentucky Public Service Commission assessment, and state and federal income
13 taxes. The GRCF is included on Schedule A and is used to compute the calculated
14 revenue deficiency.

IV. CONCLUSION

15 **Q. WERE FR 16(6)(b), FR 16(6)(c), FR 16(6)(f), AND FR 16(7)(t),**
16 **SCHEDULES A, B-1, C-1 THROUGH C-2.1, D-1, D-2.15 THROUGH D-**
17 **2.22, D-2.24, AND D-2.26, F-1 THROUGH F-7, G-1 AND H PREPARED BY**
18 **YOU OR UNDER YOUR DIRECTION AND SUPERVISION?**

19 A. Yes.

20 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

21 A. Yes.

VERIFICATION

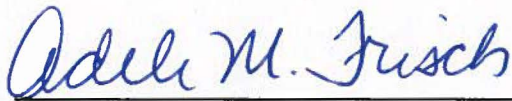

STATE OF OHIO)
) SS:
COUNTY OF HAMILTON)

The undersigned, Sarah E. Lawler, Director Rates & Regulatory Planning, being duly sworn, deposes and says that she has personal knowledge of the matters set forth in the foregoing testimony and that it is true and correct to the best of her knowledge, information and belief.

Sarah E. Lawler Affiant

Subscribed and sworn to before me by Sarah E. Lawler on this 30th day of AUGUST, 2018.

DIRECT TESTIMONY OF

CYNTHIA S. LEE

ON BEHALF OF

DUKE ENERGY KENTUCKY, INC.

August 31, 2018

TABLE OF CONTENTS

PAGE

I. INTRODUCTION AND PURPOSE1

II. SCHEDULES SPONSORED BY WITNESS3

III. INFORMATION PROVIDED TO OTHER WITNESSES.....7

IV. CONCLUSION.....8

I. INTRODUCTION AND PURPOSE

1 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2 A. My name is Cynthia S. Lee, and my business address is 550 South Tryon Street,
3 Charlotte, North Carolina 28202.

4 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

5 A. I am employed by Duke Energy Business Services LLC (DEBS), as Director,
6 Asset Accounting. DEBS provides various administrative and other services to
7 Duke Energy Kentucky, Inc., (Duke Energy Kentucky or Company) and other
8 affiliated companies of Duke Energy Corporation (Duke Energy).

9 **Q. PLEASE BRIEFLY DESCRIBE YOUR EDUCATION AND**
10 **PROFESSIONAL EXPERIENCE.**

11 A. I am a graduate of Rollins College, with a Bachelor of Arts degree in Economics,
12 and a graduate of The Johns Hopkins University, with a Master of Business
13 Administration. I am a Certified Public Accountant in the State of North Carolina.
14 I am also a member of the Edison Electric Institute Property Accounting and
15 Valuation Committee.

16 I began my employment with Duke Energy in 2002 in the Accounting
17 Department for Progress Energy Service Company, predecessor to what is now
18 DEBS. My responsibilities included oversight of financial reporting, general and
19 regulatory accounting and asset accounting. I transitioned into my current position
20 as the leader of the asset accounting group within Duke Energy's Regulated
21 Utilities business segment in February 2015.

1 **Q. PLEASE DESCRIBE YOUR RESPONSIBILITIES AS DIRECTOR, ASSET**
2 **ACCOUNTING.**

3 A. As Director, Asset Accounting, I have responsibility for the accounting activities
4 within Duke Energy's Electric and Gas Utilities and Infrastructure related to fixed
5 assets, including electric plant in service, construction work in progress (CWIP),
6 depreciation and asset retirement obligations, materials and supplies inventory,
7 and fuel (including both inventory and payment of fuel invoices) and emission
8 allowances.

9 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE KENTUCKY**
10 **PUBLIC SERVICE COMMISSION?**

11 A. Yes.

12 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**
13 **PROCEEDING?**

14 A. I am responsible for actual net plant in service and construction work in progress
15 contained in rate base and other actual plant-related items that Duke Energy
16 Kentucky witness, Mr. Robert "Beau" Pratt uses in his testimony. In particular, I
17 sponsor the following Schedules in satisfaction of Filing Requirements (FR)
18 16(8)(b): B-2, B-2.1, B-2.2, B-2.3, B-2.4, B-2.5, B-2.6, B-2.7, B-3, B-3.1, B-3.2,
19 and B-4. I sponsor the following Schedules in satisfaction of FR 16(8)(d): D-2.23
20 as well as the actual plant data on Schedule K page 1, and the composite
21 depreciation rates on Schedule K, both being in response to FR 16(8)(k). The
22 source and sponsor of the budgeted and projected data as shown on these
23 schedules is Mr. Pratt. The source and sponsor of the proposed depreciation and

1 amortization accrual rates used in these schedules, including the supporting
2 depreciation study, is Company witness Mr. John J. Spanos.

II. SCHEDULES SPONSORED BY WITNESS

3 **Q. PLEASE DESCRIBE THE INFORMATION CONTAINED IN THE**
4 **SECTION B SCHEDULES.**

5 A. The Section B schedules develop the Jurisdictional Net Plant In Service. The
6 schedules are based on the Company's budget records as of the end of the base
7 period (November 30, 2018) and the end of the forecast period (March 31, 2020).

8 **Q. PLEASE DESCRIBE SCHEDULE B-2.**

9 A. Schedule B-2 shows the plant in service including allocated common plant by major
10 property grouping for the base period and the 13-month average as of the plant
11 valuation date of March 31, 2020. The amount shown in the column labeled
12 "Adjusted Jurisdiction" on page 1 of 2, and "13-Month Average Adjusted
13 Jurisdiction" on page 2 of 2, represents plant in service that is deemed used and
14 useful in providing gas service to our Kentucky jurisdictional customers.

15 **Q. PLEASE DESCRIBE SCHEDULE B-2.1.**

16 A. Schedule B-2.1 consists of a further breakdown of Schedule B-2 by the Federal
17 Energy Regulatory Commission (FERC) and Company Account for each major
18 property grouping for the base period and the forecast period. The plant in service
19 investment shown in the column labeled "Adjusted Jurisdiction" on pages 1 through
20 6, and "13-Month Average Adjusted Jurisdiction" on pages 7 through 12, represents
21 electric plant in service including allocated common plant that is deemed used and
22 useful in providing gas service to the Company's Kentucky jurisdictional customers.

1 **Q. PLEASE DESCRIBE SCHEDULE B-2.2.**

2 A. Schedule B-2.2 shows proposed adjustments to plant in service for the base period
3 and the forecast period. The adjustments shown on this schedule are related to the
4 manufactured gas production plant, distribution plant and general plant and are
5 related to gas facilities devoted to other than Kentucky customers.

6 **Q. PLEASE DESCRIBE SCHEDULE B-2.3.**

7 A. Schedule B-2.3 shows gross additions, retirements and transfers by FERC and
8 Company Account for each major property grouping for the base period and the
9 forecast period.

10 **Q. PLEASE DESCRIBE SCHEDULE B-2.4.**

11 A. Schedule B-2.4 is entitled "Property Merged or Acquired" for the base period and
12 the forecast period. Duke Energy Kentucky projects that no property will be
13 merged or acquired during the forecast period, so no items appear in this schedule.

14 **Q. PLEASE DESCRIBE SCHEDULE B-2.5.**

15 A. Schedule B-2.5 is entitled "Leased Property" and provides data for the base period
16 and the forecast period. Duke Energy Kentucky leases for gas meters and regulators
17 end in June 2019. Duke Energy Kentucky also entered into a lease for a building on
18 Cox Road in Erlanger, Kentucky, in 2005 to house its gas and electric construction
19 and maintenance operations. Schedule B-2.5 contains the cost of gas meters and
20 regulators and the cost associated with the building lease prior to allocation. The
21 schedule also shows the monthly payment made for each of the leases.

1 **Q. PLEASE DESCRIBE SCHEDULE B-2.6.**

2 A. Schedule B-2.6 shows the property held for future use included in rate base for the
3 base period and forecast period. The Company has not included any property held
4 for future use in rate base.

5 **Q. PLEASE DESCRIBE SCHEDULE B-2.7.**

6 A. Schedule B-2.7 contains data on utility property excluded from rate base for the base
7 period and forecast period. There are no exclusions of utility property from rate
8 base.

9 **Q. PLEASE DESCRIBE SCHEDULE B-3.**

10 A. Schedule B-3 shows the total plant investment and Reserve for Accumulated
11 Depreciation and Amortization by FERC and Company Account grouping for the
12 base period and the forecast period. The amounts for the forecast period, on pages 5
13 through 8, are 13-month averages. The adjusted jurisdictional reserve in the last
14 column is applicable to the jurisdictional plant shown on Schedule B-2, "Adjusted
15 Jurisdiction" and "13-Month Average Adjusted Jurisdiction."

16 **Q. PLEASE DESCRIBE SCHEDULE B-3.1.**

17 A. Schedule B-3.1 shows adjustments to Accumulated Depreciation and Amortization
18 for the base period and the forecast period. The adjustments shown on this schedule
19 are the related accumulated depreciation balances for the adjustments to Plant in
20 Service shown on Schedule B-2.2, which is described above.

21 **Q. PLEASE DESCRIBE SCHEDULE B-3.2.**

22 A. Schedule B-3.2 lists the 13-month average jurisdictional plant investment and
23 reserve balance as of March 31, 2020, for each FERC and Company Account within

1 each major property grouping. It also shows the proposed depreciation and
2 amortization accrual rate, calculated annual depreciation and amortization expense,
3 percentage of net salvage value, average service life and curve form, as applicable
4 for each account. The calculated annual depreciation and amortization was
5 determined by multiplying the 13-month average adjusted jurisdictional plant
6 investment for the forecast period by the proposed depreciation and amortization
7 accrual rates.

8 With this filing, the Company proposes depreciation and amortization
9 accrual rates prepared in 2018 and sponsored by Mr. Spanos of Gannett Fleming,
10 Inc., who prepared the depreciation study. The account numbers referred to in the
11 depreciation study were those in effect in 2018 for Duke Energy Kentucky. The
12 Company requests that the Commission approve these new depreciation and
13 amortization accrual rates included in this filing and that the depreciation and
14 amortization accrual rates be effective April 1, 2019, corresponding with the
15 effective date of the natural gas rates established in this case.

16 **Q. PLEASE DESCRIBE SCHEDULE B-4.**

17 A. Schedule B-4 is a list of construction work in progress (CWIP) by major property
18 grouping. Duke Energy Kentucky is not requesting to include its investment in
19 CWIP in rate base.

1 **Q. PLEASE DESCRIBE SCHEDULE D-2.23**

2 A. Schedule D-2.23 reflects the adjustment to the forecasted period depreciation
3 expense to reflect annualized depreciation expense as calculated on Schedule B-3.2.
4 Schedule B-3.2 shows annual depreciation on 13-month average plant balance at
5 March 31, 2020, using the new proposed depreciation rates.

6 **Q. PLEASE DESCRIBE THE INFORMATION YOU SPONSOR IN**
7 **SCHEDULE K.**

8 A. I sponsor the actual plant data submitted on page 1 of Schedule K. This information
9 includes Plant in Service by major property grouping and Reserve for Accumulated
10 Depreciation and Amortization by utility service for the 13-month average forecast
11 period, for the base period and as of December 31 for each of the last ten years.
12 Plant held for future use and construction work in progress have also been provided
13 for the same periods. I also sponsor the composite depreciation rates shown on
14 Schedule K.

III. INFORMATION PROVIDED TO OTHER WITNESSES

15 **Q. DID YOU SUPPLY ANY INFORMATION TO OTHER WITNESSES FOR**
16 **THEIR USE IN THIS PROCEEDING?**

17 A. Yes, I provided Mr. Pratt with the actual net book value for the existing gas and
18 common plant for the period ending May 31, 2018, for his use in calculating the
19 forecasted financial data.

IV. CONCLUSION

1 **Q. WERE SCHEDULES B-2, B-2.1, B-2.2, B-2.3, B-2.4, B-2.5, B-2.6, B-2.7, B-3,**
2 **B-3.1, B-3.2, B-4, D-2.23, THE INFORMATION YOU PROVIDED ON**
3 **SCHEDULE K, AND THE INFORMATION YOU PROVIDED TO MR.**
4 **PRATT, (EXCLUDING THE BUDGET AND FORECAST NUMBERS**
5 **PREPARED BY MR. PRATT AND THE PROPOSED DEPRECIATION**
6 **AND AMORTIZATION ACCRUAL RATES AND SUPPORTING**
7 **DEPRECIATION STUDY PREPARED BY MR. SPANOS) PREPARED BY**
8 **YOU OR UNDER YOUR DIRECTION AND SUPERVISION?**

9 **A. Yes.**

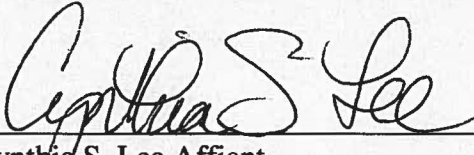

10 **Q. DOES THIS CONCLUDE YOUR PRE-FILED DIRECT TESTIMONY?**

11 **A. Yes.**

VERIFICATION

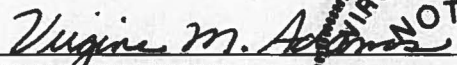

STATE OF NORTH CAROLINA)
) **SS:**
COUNTY OF MECKLENBURG)

The undersigned, Cynthia S. Lee, Director, Asset Accounting, being duly sworn, deposes and says that she has personal knowledge of the matters set forth in the foregoing testimony and that it is true and correct to the best of her knowledge, information and belief.

Cynthia S. Lee Affiant

Subscribed and sworn to before me by Cynthia S. Lee on this 8 day of August, 2018.

NOTARY PUBLIC

My Commission Expires:
October 2, 2021
