Assumptions / Notes / Comments / Explanations

the green tabbed worksheets are Finrep retrieval models for the historical data at the account-subaccount level of detail

the dark purple tabbed worksheets are Finrep retrieval models for the FY2019 budget data at the functional group level

the pink tabbed worksheets combine the historical months and budgeted months for use in forecasting the remaining months
- functional budgeted totals are distributed to account-subaccounts in the same proportion as the historical months
- the forecasted months are based on the corresponding month 12 months prior, some of which are historical and some are budgeted
  - Labor is grown by 3%
  - Benefits is calculated as a proportion of Labor, based on ratios formed from data of historical months
- The FERC account is stripped out so a table can be formed of values by FERC account for import to the revenue requirement model.
