Gwen Pinson Executive Director Public Service Commission 211 Sower Blvd. Frankfort, KY 40601

Re: Atmos Energy Corporation: Case No. 2018-00281

Dear Ms. Pinson:

Atmos Energy Corporation submits its completed responses to the Commission's Post Hearing Data Requests and responses to the Attorney General's Post Hearing Data Requests. Responses to the remaining items will be submitted on or before April 23.

I certify that the electronic filing is a complete and accurate copy of the original documents to be filed in this matter, which will be filed within two days of this submission and that there are currently no parties in this proceeding that the Commission has excused from participation by electronic means.

If you have any questions about this matter, please contact me.

Very truly yours,

John N. Hughes

And

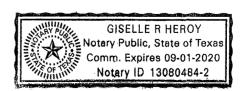

Mark R. Hutchinson Wilson, Hutchinson and Littlepage 611 Frederica St. Owensboro, KY 42301 270 926 5011 randy@whplawfirm.com

My Commission Expires:

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-01 Page 1 of 1

REQUEST:

Provide the number of Atmos staff that have been added to manage the larger capital project expenditures.

RESPONSE:

From an overall perspective, from 2010 to 2018, Atmos Energy has actually decreased the overall number of staff/headcount within the state of Kentucky including roles in service, construction, supervision, and operations support. However, we agree that several positions have been shifted towards the growing effort in support of capital investment and infrastructure modernization. These roles include additional roles related to contract inspection, project design, review of as-built drawings and records, and mapping of these facilities into our GIS system. Specifically, we have added:

- (2) Engineers
- (2) GIS Specialists
- (1) Project Specialist

Respondents: Greg Smith and Josh Densman

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-02 Page 1 of 1

REQUEST:

Provide the total monetary amount of each project listed in Atmos's response to Commission Staff's Third Request for Information (Staff's Third Request) Item 27, Attachment 1.

RESPONSE:

Please see Excel column O of Attachment 1 for total monetary amount of each project listed in the Company's response to Staff DR No. 3-27.

ATTACHMENT:

ATTACHMENT 1 - Atmos Energy Corporation, Staff Post-Hearing_1-02_Att1 - FY19 Capital Budget.xls, 11 Pages.

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-03 Page 1 of 1

REQUEST:

Explain whether any of the current or proposed construction projects are expansion projects designed to serve new Atmos customers.

RESPONSE:

The Company budgeted \$4,758,929 within the Growth budget category for FY 2019 as listed in responses to Staff 3-27 and 5-02. The majority of these dollars are within town-level 'functional' accounts. These functional accounts are dollars budgeted related to the installation of new service lines and/or new meters for that specific service area.

Additionally, the Company has projects labeled as 'system improvement' that are required to address existing capacity issues due to long-term incremental growth within existing systems. Please see Attachment 1 for a list of these projects.

ATTACHMENT:

ATTACHMENT 1 - Atmos Energy Corporation, Staff Post-Hearing_1-03_Att1 - FY 2019 Capital Budget.xlsx, 1 Page.

Respondent: Greg Smith

Boothfield Rd. is fed off a farm tap regulator station.		Daviess

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-04 Page 1 of 1

REQUEST:

If Atmos does have expansion projects designed to serve new Atmos customers then provide a description of each of the current or proposed construction project(s).

RESPONSE:

Please see the Company's response and attachment to Staff Post-Hearing DR No. 1-03.

Respondent: Greg Smith

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-07 Page 1 of 1

REQUEST:

Identify and explain any changes in capital expenditures related to the pipeline replacement program (PRP) since the last rate case, Case No. 2017-00349, and provide a schedule of the estimated cost, by category, necessary to complete the PRP.

RESPONSE:

As noted within testimony, Atmos Energy is committed to completing the remaining 188 miles of bare steel replacement by 2027. We will manage within the specified \$28M budget and adjust the exact annual replacement miles based on the cost of individual projects scheduled for each year. As discussed during the hearing, the average cost/mile of replacement will vary based on the overall types of facilities being replaced (size, pressure, location). As noted in Attachment 1 to the Company's response to Staff Post-Hearing DR No. 1-03 in Case No. 2017-00349, the average cost per mile of replacement did rise significantly for 2017 and 2018 due to the fact that two large projects involved replacement of high pressure steel lines that did not follow public roads/utility easements and required the purchase of approximately 300 temporary and permanent private easements for construction.

- Marion-Fredonia (23 miles)
- Springfield-Calvary (15 miles)

These types of linear, cross-country pipe replacement projects drove up our average cost per mile metric close to \$1.2M/mile. However, work being performed this year (2019) is more typical of bare steel replacement within our distribution systems and is forecasted to return to a more typical \$600k/mile rate.

Since the beginning of our PRP program, our overall average cost of replacement has been approximately \$750k/mile. As noted previously, we do not have budget level estimates completed for projects more than 12-18 months prior to work being conducted. We do have bare steel projects identified within our five year plan; however, we utilize historical averages to forecast overall spend by region and work type for projects beyond this time line.

Respondent: Greg Smith

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-08 Page 1 of 1

REQUEST:

Provide the name of the collection agency that Atmos utilizes to collect repair costs from third party/contractors.

RESPONSE:

When required, the Company utilizes Professional Finance Company (PFC) for collection services.

Respondent: Josh Densman

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-09 Page 1 of 1

REQUEST:

Provide the fee that the collection agency charges Atmos to collect repair costs from third party/contractors.

RESPONSE:

The Company pays Professional Finance Company (PFC) a collection fee of 25% on amounts collected. No fee is paid to PFC if a collection attempt is unsuccessful.

Respondent: Josh Densman

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-10 Page 1 of 1

REQUEST:

Provide an organizational chart of the people at Atmos that make the decisions as to who is at fault for incidents of damage to underground utility facilities, including the job title.

RESPONSE:

First responders (Atmos Energy employees) investigate and gather information at the site of the damage when they are called to respond. This role/title varies based on the staff within each local operation. The information is documented and submitted on the Company's 'Third Party Damage Form' to the regional Damage Prevention Specialist/Technician. The information collected on this form is subsequently reviewed by a local Operations Supervisor who determines fault based on Kentucky statute KRS 367.4901 and 367.4917.

Respondents: Josh Densman and Greg Smith

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-11 Page 1 of 1

REQUEST:

Explain Atmos's specific process for determining who is at fault for incidents of damage to underground utility facilities.

RESPONSE:

Determination of fault is based on Kentucky Revised Statutes, specifically KRS 367.4901 through 367.4917 which covers Underground Damage Prevention Laws.

Respondent: Josh Densman

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-15 Page 1 of 1

REQUEST:

Explain whether Dr. James H. Vander Weide, Ph.D. (Dr. Vander Weide), used forecasted interest rates in the analysis filed in his testimony and rebuttal testimony.

RESPONSE:

Dr. Vander Weide used forecasted interest rates in: (1) his ex ante and his ex post risk premium analyses (see Vander Weide direct at p. 32 and p. 36; and (2) his historical and DCF-based CAPM methods (see Vander Weide direct at p. 39, Rebuttal Schedule 6, and p. 45, Rebuttal Schedule 8). Dr. Vander Weide did not use forecasted interest rates in his DCF analysis because interest rates are not an input variable in the DCF analysis.

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-16 Page 1 of 1

REQUEST:

Explain whether Dr. Vander Weide's forecast in his testimony and rebuttal testimony included rate increases throughout 2019.

RESPONSE:

The interest rate forecasts used in Dr. Vander Weide's direct and rebuttal testimonies were the most recent Value Line and Energy Information Administration ("EIA") long-term interest rate forecasts available at the time of his direct and rebuttal testimonies. The June 1, 2018, and November 30, 2018, Value Line Selection & Opinion forecasts that Dr. Vander Weide refers to in his direct and rebuttal testimonies are higher for the period 2019 than for the period 2018. Also see Table 1 provided in the Company's response to Staff Post-Hearing DR No. 1-17.

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-17 Page 1 of 1

REQUEST:

Due to the fact that there are no further projected interest rate increases for 2019, explain whether Dr. Vander Weide still supports the accuracy of his forecasts. Provide any updates to Dr. Vander Weide's cost of equity model.

RESPONSE:

Dr. Vander Weide does not agree with the premise of the data request that "there are no further projected interest rate increases for 2019." For example, the most recent Value Line forecast data for long-term Treasury bond and AAA-Corporate bond rates, published in the March 1, 2019, Selection & Opinion, are shown in the following table.

Table 1
Value Line Forecast Interest Rates, Value Line Selection & Opinion, March 1, 2019

	2018	2019	2020	2021	2022	2023
Aaa-rated Corporate	3.9%	4.2%	4.4%	4.4%	4.5%	4.5%
Long-term Treasury	3.1%	3.4%	3.6%	3.5%	3.5%	3.5%

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-21 Page 1 of 2

REQUEST:

Refer to the Rebuttal Testimony of Dr. Vander Weide, Exhibit JVW-R-1, Rebuttal Schedule 1, page 1 of 2. Provide an update to Rebuttal Schedule 1 that includes the first quarter of 2019.

RESPONSE:

The results of a discounted cash flow analysis for the proxy natural gas utilities using three-month average stock prices through March 31, 2019, are shown in the following table.

SUMMARY OF DISCOUNTED CASH FLOW ANALYSIS FOR NATURAL GAS UTILITIES

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-23 Page 1 of 1

REQUEST:

Explain why the Non-Residential Interruptible Sales Class is being heavily subsidized in Mr. Raab's cost-of-service studies.

RESPONSE:

The Company does not agree that the Non-Residential Interruptible Sales Class is "being heavily subsidized". The Non-Residential Interruptible Sales group, subject of this data request, is comprised of only 10 total customers consuming approximately 330,000 Mcf in the test year. A balanced view of class costs would warrant combining the Interruptible Sales group with the much larger Interruptible Transportation group. On a combined basis, the "Customer/Demand" study would produce an average class Rate of Return of 11.54%, a 1.45 Relative Rate of Return. By this viewpoint, the Non-Residential Interruptible Sales & Transportation classes are not being subsidized.

Please note that Mr. Raab sponsored the three versions of the Class Cost of Service studies (COSS) models filed in this Case; while it is Mr. Martin that is sponsoring the proposed rate design. As noted in Mr. Martin's Direct Testimony (on pages 12-13), in the design of proposed customer charges and distribution rates, Mr. Raab's CCOS was only one point of reference; other factors were considered.

Mr. Raab's Direct Testimony explains that the filing of multiple COSS complies with a previous request by the Kentucky Public Service Commission (on page 3). Mr. Raab also notes his preference for the "Customer/Demand" study among the three he filed.

Respondents: Mark Martin and Paul Raab

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-24 Page 1 of 1

REQUEST:

Explain why only 10.72 percent of the average increase needed for an equalized return is allocated to the Non-Residential Interruptible Sales Class.

RESPONSE:

As noted in Mr. Martin's Direct Testimony (on pages 12-13), in the design of proposed customer charges and distribution rates, Mr. Raab's CCOS was only one point of reference; other factors were considered.

Also note that Atmos Energy's rate structure applies the same customer charges and distribution rates for both the Interruptible Sales and Interruptible Transportation classes. Any adjustment to these rates will affect both of those classes. The Interruptible Sales Class consists of only 10 customers consuming approximately 330,000 Mcf in the test year. The Interruptible Transportation Class consists of 122 customers consuming approximately 7,560,000 Mcf in the Test Year. A balanced view of class costs would warrant combining the Interruptible Sales group with the much larger Interruptible Transportation group.

The Company's proposed rates did not dwell on the rather small set of customers in isolation in the Non-Residential Interruptible Sales group, but rather the total Interruptible Sales and Transportation classes. And, the Company's overall recommendation sought a generally uniform percentage increase to current rates (excluding gas costs) for all classes.

Respondent: Mark Martin

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-25 Page 1 of 1

REQUEST:

Explain whether Atmos's residential class is contributing to the subsidization of the Non-Residential Interruptible Sales Class.

RESPONSE:

The Company does not believe the Residential Class is contributing to "the subsidization of the Non-Residential Interruptible Sales Class". Note that the Non-Residential Interruptible Sales Class consists of only 10 customers. A balanced view of class costs would warrant combining the Interruptible Sales group with the much larger Interruptible Transportation group. With that context, it is debatable whether Interruptible services are being subsidized. For example, if the Customer/Demand study is used as a reference, Atmos Energy's residential class is being subsidized and therefore not contributing to the subsidization of any other classes.

Further, based on the difference between the "Average Revenue Increase Indicated" and the "Proposed Revenue Increase," shown on Exhibit PHR-5, Page 2 of 2, the Residential Sales class is, on average, not providing a subsidy to any class but is instead being subsidized by other classes.

Respondents: Paul Raab and Mark Martin

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-26 Page 1 of 1

REQUEST:

If Atmos's residential class is contributing to the subsidization of the Non-Residential Interruptible Sales Class then provide a revised Exhibit PHR-5 and a Revised Schedule M in which the amount of the residential subsidy to the Non-Residential Interruptible Sales Class is removed.

RESPONSE:

As indicated in the Company's response to Staff's Post-Hearing DR No. 1-25, the Company does not believe the Residential Class is contributing to the subsidization of the 10-customer Non-Residential Interruptible Sales Class.

Based on the difference between the "Average Revenue Increase Indicated" and the "Proposed Revenue Increase," shown on Exhibit PHR-5, Page 2 of 2, the Residential Sales class is, on average, not providing a subsidy to any class but is instead being subsidized by other classes. Therefore, there is no indicated subsidy on Exhibit PHR-5 to remove.

Respondents: Paul Raab and Mark Martin

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-27 Page 1 of 1

REQUEST:

If the Commission alters the revenue requirement, provide Atmos's proposal for how to allocate any revenue requirement difference.

RESPONSE:

If the Commission were to alter the revenue requirement, Atmos Energy's would propose a pro-rata adjustment to the rates the Company has proposed for each customer class.

Respondent: Mark Martin

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-28 Page 1 of 1

REQUEST:

Provide the number of leaks that Atmos has detected in each type of pipe (e.g., bare steel, low-pressure systems, Aldyl-A, unlocatable plastic pipe, etc.) in the last year and identify the portion of those leaks that were caused by an excavator striking the line for each type of pipe.

RESPONSE:

Per Greg Smith's testimony during the hearing, this request is difficult to compile due to the fact that the specific pipe type is not formally documented until the leak repair is completed (excavated and inspected). Comparing our 2018 leak repairs to our system maps and pipe materials, it appears that:

- In 2018, 130 leak repairs were made on Bare Steel. Of those, three were caused by third party damage.
- In 2018, 63 leak repairs were made on Aldyl-A/Unlocatable plastic. Of those, 20 were caused by third party damage.
- In 2018, 25 leak repairs were made on Low Pressure systems. Of those, one was caused by third party damage.

Atmos Energy has reported that there were 420 active underground leaks on record January 1, 2019. Based on estimates of location and pipe materials:

- 125 of those leaks appear to be on Bare Steel pipe
- 38 of those leaks appear to be on Aldyl-A/Unlocatable plastic
- 42 of those leaks appear to be on LP systems
- The remaining leaks appear to not be on Bare Steel; Aldyl-A/Unlocatable plastic; or LP systems

This means that approximately 10% of Atmos Energy's distribution system in Kentucky account for 50% of all active underground leaks, reflecting the urgency for proactive replacement.

Respondent: Greg Smith

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-31 Page 1 of 1

REQUEST:

Refer to Atmos's response to the Attorney General's First Request for Information, Item 53.

- a. Identify the states in which the Supplemental Executive Retirement Program (SERP) expense is allowed for ratemaking purposes.
- b. Provide the amount of SERP expense included in Atmos's forecasted test year.

RESPONSE:

- a. SERP expense is allowed for ratemaking purposes in every state Atmos Energy serves with the exception of a partial exclusion in Texas.
- b. Kentucky-allocated SERP expense included in the forecasted test year is approximately \$148,405.

Respondent: Greg Waller

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-32 Page 1 of 1

REQUEST:

Provide an update to Atmos's revenue requirement, and any affected schedules based upon any changes that Atmos has identified to date in this proceeding.

RESPONSE:

The updated revenue requirement and any affected schedules based upon any changes identified by Atmos Energy to date in this proceeding have been incorporated into Exhibit GKW-R-1 presented in Greg Waller's rebuttal testimony.

Respondent: Greg Waller

Case No. 2018-00281 Atmos Energy Corporation, Kentucky Division Staff Post-Hearing DR Set No. 1 Question No. 1-33 Page 1 of 1

REQUEST:

Refer to Commission Staff's Second Request for Information, Item 3, and provide an updated table. Also, include what Atmos's average annual bill would be under the proposed rates.

RESPONSE:

Please see Attachment 1.
