10 Year Average Slippage Factor (Mathematic Average of the Yearly Slippage Factors / 10 years)					105.890%

The Annual Actual Cost, Annual Original Budget, Variance in Dollars, and Variance as Percent are to be taken from Schedule 13a. Total all projects for a given year.

The Slippage Factor is calculated by dividing the Annual Actual Cost by the Annual Original Budget. Calculate a Slippage Factor for each year and the Totals line. Carry Slippage Factor percentages to 3 decimal places.

REQUEST:

Provide the following monthly account balances and a calculation of the average (13-month) account balances for the most recent calendar year:

a. Plant in service (Account No. 101);

b. Plant purchased or sold (Account No. 102);

c. Property held for future use (Account No. 105);

d. Completed construction not classified (Account No. 106);

e. Construction work in progress (Account No. 107);

f. Depreciation reserve (Account No. 108);

g. Materials and supplies (include all accounts and subaccounts);

h. Computation and development of minimum cash requirements;

i. Balance in accounts payable applicable to amounts included in utility plant in service (If actual is indeterminable, give reasonable estimate.);

j. Balance in accounts payable applicable to amounts included in plant under construction (If actual is indeterminable, give reasonable estimate.); and

k. Balance in accounts payable applicable to prepayments by major category or subaccount.

RESPONSE:

a) Please see Attachment 1 for the account balances.

b) There are no balances to report.

c) There are no balances to report.

d) There are no balances to report.

e) Please see Attachment 1 for the account balances.

f) Please see Attachment 1 for the account balances.

g) Please see Attachment 1 for the account balances.

h) Please see the Direct Testimony of Joe Christian for the calculation of cash working capital.

i) There are no balances to report.

j) Please see Attachment 1 for the account balances.

k) Please see Attachment 1 for the account balances.

REQUEST:

Provide a reconciliation and detailed explanation of each difference, if any, in Atmos's capitalization and net investment rate base for the base period.

RESPONSE:

Please see the Direct Testimony of Greg Waller and Schedule FR 16(6)(f) found in Atmos Energy's Rate Application. The schedule shows the test year rate base and the balance sheet as of the end of the test year arranged to highlight the differences between rate base and capital on the balance sheet. The differences due to thirteen month averages in the rate base are shown in the third column. The other differences are shown in the fourth and fifth columns.

Respondent: Greg Waller

REQUEST:

Provide a rate base, capital structure, and statement of income for Atmos for the most recent 12-month period for which information is available at the time it files its application and for the base period used in the application. Provide detailed explanations necessary to reconcile the data for the 12-month period with the filed base period information.

RESPONSE:

An income statement for the Kentucky gas operations for the base period is provided in FR 16(8)(i) of the application. An income statement for the Kentucky gas operations for the twelve months ended December 2017 is also provided in FR 16(8)(i).

FR 16(8)(j) of the application contains the total Company capital structure for the base period. Capital structure for the period ending December 2017 is provided in the Company's response to Staff DR No. 1-03. There is no separate capital structure for the Kentucky gas operations.

A calculation of rate base for the base period for the Kentucky gas operations is provided in FR 16(8)(b) Schedule B of the application. The Company prepares detailed rate base calculations for its utility rate base regulated operations on a jurisdictional basis as required for regulatory filings. Therefore, the Company does not have a detailed rate base calculation readily available for periods other than have been provided in the application.

Respondent: Greg Waller

REQUEST:

Provide the information shown in Schedule 17 for each construction project in progress, or planned to be in progress, during the 12 months preceding the base period, the base period, and the forecasted test period.

RESPONSE:

Please see Attachment 1 for historical data. CWIP for the base and test periods remained at the same level per the original filing.

Indirect Cost Other include the following types of expenditures:

BU A&G Pool
Business Unit A&G
Corporate A&G
Corporate A&G Pool
Depreciation - Capitalized
Heavy Equipment
Miscellaneous- GL
Rent
Restricted Stock
State A&G
State A&G Pool
Stores Overhead
Telecom
Transportation - Capitalized
Uniforms
Utilities
Variable Pay Plan

Please see the Company's response to Staff DR No. 1-18 for estimated completion percentages.
