REQUEST:

Provide, in the format provided in Schedule 18, an analysis of Atmos's Construction Work in Progress as defined in the Uniform System of Accounts for each project identified in Schedule 17.

RESPONSE:

Please see Attachment 1.

ATTACHMENT:

ATTACHMENT 1 - Atmos Energy Corporation, Staff_1-18_Att1 - CWIP.xlsx, 21 Pages.

Respondent: Greg Waller

REQUEST:

Provide a calculation of the rate or rates used to capitalize interest during construction for the three most recent calendar years. Explain each component entering into the calculation of the rate(s).

RESPONSE:

Please see Attachment 1 through Attachment 3.

ATTACHMENTS:

ATTACHMENT 1 - Atmos Energy Corporation, Staff_1-19_Att1 - AFUDC Computation Dec 15.xlsx, 9 Pages.

ATTACHMENT 2 - Atmos Energy Corporation, Staff_1-19_Att2 - AFUDC Computation Dec 16.xlsx, 9 Pages.

ATTACHMENT 3 - Atmos Energy Corporation, Staff_1-19_Att3 - AFUDC Computation Dec 17.xlsx, 9 Pages.

Respondents: Greg Waller and Joe Christian

Atmos Energy Corporation
Computation of AFUDC Rate
For the Month ended December 31, 2015
Methodology

18 CFR Part 201, Gas Plant Instructions, Components of construction costs, item 17.

(17) "Allowance for funds used during construction" includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds when so used, not to exceed without prior approval of the Commission allowances computed in accordance with the formula prescribed in paragraph (a) below, except when such other funds are used for exploration and development or leases acquired after October 7, 1969, no allowance on such other funds shall be included in these accounts. No allowance for funds used during construction charges shall be included in these accounts upon expenditures for construction projects which have been abandoned.

(a) The formula and elements for the computation of the allowance for funds used during construction shall be:

$$A_i = s\left(\frac{S}{W}\right) + d\left(\frac{D}{D+P+C}\right)\left(1-\frac{S}{W}\right)$$

$$A_e = \left[1-\frac{S}{W}\right]\left[p\left(\frac{P}{D+P+C}\right) + c\left(\frac{C}{D+P+C}\right)\right]$$

A_i = Gross allowance for borrowed funds used during construction rate.

A_e = Allowance for other funds used during construction rate.

S = Average short-term debt.

s = Short-term debt interest rate.

D = Long-term debt.

d = Long-term debt interest rate.

P = Preferred stock.

p = Preferred stock cost rate.

C = Common equity.

c = Common equity cost rate.

W = Average balance in construction work in progress.

(b) The rates shall be determined annually. The balances for long-term debt [1], preferred stock and common equity [2] shall be the actual book balances as of the end of the prior year. The cost rates for long-term debt and preferred stock shall be the weighted average cost determined in the manner indicated in subpart D of part 154 of the Commission's Regulations Under the Natural Gas Act. The cost rate for common equity shall be the rate granted common equity in the last rate proceeding before the ratemaking body having primary rate jurisdiction [3]. If such cost rate is not available, the average rate actually earned during the preceding three years shall be used. The short-term debt balances [4]and related cost and the average balance for construction work in progress [5] shall be estimated for the current year with appropriate adjustments as actual data becomes available.

NOTE: When a part only of a plant or project is placed in operation or is completed and ready for service but the construction work as a whole is incomplete, that part of the cost of the property placed in operation, or ready for service, shall be treated as "Gas Utility Plant" and allowance for funds used during construction thereon as a charge to construction shall cease. Allowance for funds used during construction on that part of the cost of the plant which is incomplete may be continued as a charge to construction until such time as it is placed in operation or is ready for service, except as limited in item 17, above.

[1] Please see WP L - LTD.
[2] Please see Wp C.
[3] The most recent case in which an ROE Mid-Tex 2012.
The rate agreed to in this proceeding was 10.5%.
[4] Please see Wp S.
[5] Please see Wp W - CWIP.

The USOA appears to contemplate AFUDC booked to individual projects based upon the length of time the project is in progress. For example, a project remaining open for 85 days would receive 85 days of interest recorded monthly based upon the cost rate applicable for each month.

Atmos Energy Corporation
Computation of AFUDC Rate
For the Month ended December 31, 2015
Per 18 CFR Part 201, Gas Plant Instructions, Components of construction costs, item 17.

Atmos Energy Corporation
Computation of AFUDC Rate
For the Month ended December 31, 2016
Methodology

18 CFR Part 201, Gas Plant Instructions, Components of construction costs, item 17.

(17) "Allowance for funds used during construction" includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds when so used, not to exceed without prior approval of the Commission allowances computed in accordance with the formula prescribed in paragraph (a) below, except when such other funds are used for exploration and development or leases acquired after October 7, 1969, no allowance on such other funds shall be included in these accounts. No allowance for funds used during construction charges shall be included in these accounts upon expenditures for construction projects which have been abandoned.

(a) The formula and elements for the computation of the allowance for funds used during construction shall be:

$$A_i = s\left(\frac{S}{W}\right) + d\left(\frac{D}{D+P+C}\right)\left(1-\frac{S}{W}\right)$$

$$A_e = \left[1-\frac{S}{W}\right]\left[p\left(\frac{P}{D+P+C}\right) + c\left(\frac{C}{D+P+C}\right)\right]$$

A_i = Gross allowance for borrowed funds used during construction rate.

A_e = Allowance for other funds used during construction rate.

S = Average short-term debt.

s = Short-term debt interest rate.

D = Long-term debt.

d = Long-term debt interest rate.

P = Preferred stock.

p = Preferred stock cost rate.

C = Common equity.

c = Common equity cost rate.

W = Average balance in construction work in progress.

(b) The rates shall be determined annually. The balances for long-term debt [1], preferred stock and common equity [2] shall be the actual book balances as of the end of the prior year. The cost rates for long-term debt and preferred stock shall be the weighted average cost determined in the manner indicated in subpart D of part 154 of the Commission's Regulations Under the Natural Gas Act. The cost rate for common equity shall be the rate granted common equity in the last rate proceeding before the ratemaking body having primary rate jurisdiction [3]. If such cost rate is not available, the average rate actually earned during the preceding three years shall be used. The short-term debt balances [4]and related cost and the average balance for construction work in progress [5] shall be estimated for the current year with appropriate adjustments as actual data becomes available.

NOTE: When a part only of a plant or project is placed in operation or is completed and ready for service but the construction work as a whole is incomplete, that part of the cost of the property placed in operation, or ready for service, shall be treated as "Gas Utility Plant" and allowance for funds used during construction thereon as a charge to construction shall cease. Allowance for funds used during construction on that part of the cost of the plant which is incomplete may be continued as a charge to construction until such time as it is placed in operation or is ready for service, except as limited in item 17, above.

[1] Please see WP L - LTD.
[2] Please see Wp C.
[3] The most recent case in which an ROE Mid-Tex 2012.
The rate agreed to in this proceeding was 10.5%.
[4] Please see Wp S.
[5] Please see Wp W - CWIP.

The USOA appears to contemplate AFUDC booked to individual projects based upon the length of time the project is in progress. For example, a project remaining open for 85 days would receive 85 days of interest recorded monthly based upon the cost rate applicable for each month.
