State Regulation and Rates
Louisville, Kentucky

**Issued by Authority of an Order of the Public Service Commission in Case No. 2018-00182 dated July 30, 2018**

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 85.1**

**Adjustment Clause** **GSC**
**Gas Supply Clause**

The bill amount computed under each of the rate schedules to which this Gas Supply Clause is applicable shall include a Gas Supply Cost Component per 100 cubic feet of consumption calculated for each three-month period in accordance with the following formula:

GSCC = Gas Supply Cost + GCAA + GCBA + RF + PBRRC

where:

Gas Supply Cost is the expected average cost per 100 cubic feet for each three-month period (beginning February 1, May 1, August 1, or November 1, as the case may be) determined by dividing the sum of the monthly gas supply costs by the expected deliveries to customers. Monthly gas supply cost is composed of the following:

(a) Expected purchased gas costs (gas supply and pipeline transportation) for system supply, minus

(b) Portion of such expected purchased gas costs expected to be used for non-Gas Department purposes, minus

(c) Portion of such expected purchased gas cost expected to be injected into underground storage, plus

(d) Expected underground storage withdrawals at the average unit cost of working gas contained therein;

(GCAA) is the Gas Cost Actual Adjustment per 100 cubic feet which compensates for differences between the previous three-month period's expected gas cost and the actual cost of gas during that three-month period, plus net uncollectible gas cost portion of bad debt.

(GCBA) is the Gas Cost Balance Adjustment per 100 cubic feet which compensates for any under- or over-collections which have occurred as a result of prior adjustments.

(RF) is the sum of the Refund Factors set forth on Sheet No. 85 of this Tariff.

(PBRRC) is the amount per 100 cubic feet calculated pursuant to the Experimental Performance-Based Rate Mechanism contained in the Adjustment Clause PBR. The PBRRC is determined for each 12-month PBR period ended October 31.

Company shall file a revised Gas Supply Cost Component (GSCC) every three months giving effect to known changes in the wholesale cost of all gas purchases and the cost of gas deliveries from underground storage. The Company may make out-of-time filings when warranted. Such filing shall be made at least thirty (30) days prior to the beginning of each three-month period and shall include the following information:

**DATE OF ISSUE**: July 7, 2017

## Louisville Gas and Electric Company

**P.S.C. Gas No. 12, Original Sheet No. 85.1**

**Adjustment Clause** **GSC**
**Gas Supply Clause**

The bill amount computed under each of the rate schedules to which this Gas Supply Clause is applicable shall include a Gas Supply Cost Component per 100 cubic feet of consumption calculated for each three-month period in accordance with the following formula:

GSCC = Gas Supply Cost + GCAA + GCBA + RF + PBRRC

where:

Gas Supply Cost is the expected average cost per 100 cubic feet for each three-month period (beginning February 1, May 1, August 1, or November 1, as the case may be) determined by dividing the sum of the monthly gas supply costs by the expected deliveries to customers. Monthly gas supply cost is composed of the following:

a. Expected purchased gas costs (gas supply and pipeline transportation) for system supply, minus

b. Portion of such expected purchased gas costs expected to be used for non-Gas Department purposes, minus

c. Portion of such expected purchased gas cost expected to be injected into underground storage, plus

d. Expected underground storage withdrawals at the average unit cost of working gas contained therein;

(GCAA) is the Gas Cost Actual Adjustment per 100 cubic feet which compensates for differences between the previous three-month period's expected gas cost and the actual cost of gas during that three-month period, plus net uncollectible gas cost portion of bad debt.

(GCBA) is the Gas Cost Balance Adjustment per 100 cubic feet which compensates for any under- or over-collections which have occurred as a result of prior adjustments.

(RF) is the sum of the Refund Factors set forth on Sheet No. 85 of this Tariff.

(PBRRC) is the amount per 100 cubic feet calculated pursuant to the Experimental Performance-Based Rate Mechanism contained in the Adjustment Clause PBR. The PBRRC is determined for each 12-month PBR period ended October 31.

Company shall file a revised Gas Supply Cost Component (GSCC) every three months giving effect to known changes in the wholesale cost of all gas purchases and the cost of gas deliveries from underground storage. The Company may make out-of-time filings when warranted. Such filing shall be made at least thirty (30) days prior to the beginning of each three-month period and shall include the following information:

**DATE OF ISSUE:** September 28, 2018

**DATE EFFECTIVE:** Effective with Service Rendered
On And After January 4, 2013

**ISSUED BY:** /s/ Robert M. Conroy, Vice President
State Regulation and Rates
Louisville, Kentucky

**Issued by Authority of an Order of the Public Service Commission in Case No. 2012-00222 dated December 20, 2012**

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 85.2**

**Adjustment Clause** **GSC**

**Gas Supply Clause**

1. A copy of the tariff rate(s) of Company's pipeline transporter(s) applicable to such three-month period.
2. A statement, through the most recent three-month period for which figures are available, setting out the accumulated costs recovered hereunder compared to actual gas supply costs recorded on the books.
3. A statement setting forth the supporting calculations of the Gas Supply Cost and the Gas Cost Actual Adjustment (GCAA) and the Gas Cost Balance Adjustment (GCBA) applicable to such three-month period.

To allow for the effect of Company's cycle billing, each change in the GSCC shall be placed into effect with service rendered on and after the first day of each three-month period.

In the event that Company receives from its supplier a cash refund of amounts paid to such supplier with respect to a prior period, Company will make adjustments in the amounts charged to its customers under this provision, as follows:

1. The "Refundable Amount" shall be the amount received by Company as a refund less any portion thereof applicable to gas purchased for electric energy production plus interest at a rate equal to the average of the "3-month commercial paper rate" for the immediately preceding 12-month period, less ½ of 1 percent to cover the cost of refunding in accordance with the Order of the Commission in Case No. 7799-D. Such Refundable Amount shall be divided by the number of hundred cubic feet of gas that Company estimates it will sell to its customers during the twelve-month period which commences with implementation of the next Gas Supply Clause filing, thus determining a "Refund Factor."
2. Effective with the implementation of the next Gas Supply Clause filing, Company will reduce, by the Refund Factor so determined, the Gas Supply Cost Component that would otherwise be applicable during the subsequent twelve-month period. Provided, however, that the period of reduced Gas Supply Cost Component will be adjusted, if necessary, in order to refund, as nearly as possible, the Refundable Amount.
3. In the event of any large or unusual refunds, Company may apply to the Public Service Commission of Kentucky for the right to depart from the refund procedure herein set forth.

**DATE OF ISSUE:** September 28, 2018

**DATE EFFECTIVE:** Effective with Service Rendered
On And After January 4, 2013

**ISSUED BY:** /s/ Robert M. Conroy, Vice President
State Regulation and Rates
Louisville, Kentucky

**Issued by Authority of an Order of the Public Service Commission in Case No. 2012-00222 dated December 20, 2012**

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 86**

**Adjustment Clause** **DSM**

**Demand-Side Management Cost Recovery Mechanism**

**APPLICABLE**

In all territory served.

**AVAILABILITY OF SERVICE**

This schedule is mandatory to Residential Gas Service Rate RGS, Volunteer Fire Department Service Rate VFD, Firm Commercial Gas Service Rate CGS, Firm Industrial Gas Service Rate IGS, As-Available Gas Service Rate AAGS, Substitute Gas Sales Service Rate SGSS, and Firm Transportation Rate FT. T

**RATE**

The monthly amount computed under each of the rate schedules to which this Demand-Side Management Cost Recovery Mechanism is applicable shall be increased or decreased by the DSM Cost Recovery Component (DSMRC) at a rate per 100 cubic feet (Ccf) of monthly gas consumption in accordance with the following formula:

**DSMRC = DCR + DRLS + DSMI + DBA + DCCR**

Where:

**DCR = DSM COST RECOVERY**

The DCR shall include all expected costs that have been approved by the Commission for each twelve-month period for demand-side management programs that have been developed through a collaborative advisory process ("approved programs"). Such program costs shall include the cost of planning, developing, implementing, monitoring, and evaluating DSM programs. Program costs will be assigned for recovery purposes to the rate classes whose customers are directly participating in the program. In addition, all costs incurred by or on behalf of the collaborative process, including but not limited to costs for consultants, employees and administrative expenses, will be recovered through the DCR. Administrative costs that are allocable to more than one rate class will be recovered from those classes and allocated by rate class on the basis of the estimated budget from each program. The cost of approved programs shall be divided by the expected Ccf sales for the upcoming twelve-month period to determine the DCR for such rate class. T

**DRLS = DSM REVENUE FROM LOST SALES**

Revenues from lost sales due to DSM programs implemented on and after the effective date of this tariff will be recovered as follows:

**DATE OF ISSUE**: July 7, 2017

**DATE EFFECTIVE:** July 1, 2017

**ISSUED BY:** /s/ Robert M. Conroy, Vice President

**Adjustment Clause** **DSM**

**Demand-Side Management Cost Recovery Mechanism**

**APPLICABLE**

In all territory served.

**AVAILABILITY OF SERVICE**

This schedule is mandatory to Residential Gas Service Rate RGS, Volunteer Fire Department Service Rate VFD, Firm Commercial Gas Service Rate CGS, Firm Industrial Gas Service Rate IGS, As-Available Gas Service Rate AAGS, Substitute Gas Sales Service Rate SGSS, and Firm Transportation Rate FT.

**RATE**

The monthly amount computed under each of the rate schedules to which this Demand-Side Management Cost Recovery Mechanism is applicable shall be increased or decreased by the DSM Cost Recovery Component (DSMRC) at a rate per 100 cubic feet (Ccf) of monthly gas consumption in accordance with the following formula:

**DSMRC = DCR + DRLS + DSMI + DBA + DCCR**

Where:

**DCR = DSM COST RECOVERY**

The DCR shall include all expected costs that have been approved by the Commission for each twelve-month period for demand-side management programs that have been developed through a collaborative advisory process ("approved programs"). Such program costs shall include the cost of planning, developing, implementing, monitoring, and evaluating DSM programs. Program costs will be assigned for recovery purposes to the rate classes whose customers are directly participating in the program. In addition, all costs incurred by or on behalf of the collaborative process, including but not limited to costs for consultants, employees and administrative expenses, will be recovered through the DCR. Administrative costs that are allocable to more than one rate class will be recovered from those classes and allocated by rate class on the basis of the estimated budget from each program. The cost of approved programs shall be divided by the expected Ccf sales for the upcoming twelve-month period to determine the DCR for such rate class.

**DRLS = DSM REVENUE FROM LOST SALES**

Revenues from lost sales due to DSM programs implemented on and after the effective date of this tariff will be recovered as follows:

**DATE OF ISSUE:** September 28, 2018

**DATE EFFECTIVE:** Effective with Service Rendered
On And After July 1, 2017

**ISSUED BY:** /s/ Robert M. Conroy, Vice President
State Regulation and Rates
Louisville, Kentucky

**Issued by Authority of an Order of the Public Service Commission in Case No. 2016-00371 dated July 22, 2017 and modified June 29, 2017**

## Louisville Gas and Electric Company

P.S.C. Gas No. 11, Original Sheet No. 86.1

**Adjustment Clause** **DSM**

**Demand-Side Management Cost Recovery Mechanism**

**DRLS = DSM REVENUE FROM LOST SALES** (continued)

1. For each upcoming twelve-month period, the estimated reduction in customer usage (in Ccf) as determined for the approved programs shall be multiplied by the non-variable revenue requirement per Ccf for purposes of determining the lost revenue to be recovered hereunder for each customer class. The non-variable revenue requirement is defined as the weighted average price per Ccf of expected Distribution Charge billings for the customer classes. T

2. The lost revenues for each customer class shall then be divided by the estimated class sales (in Ccf) for the upcoming twelve-month period to determine the applicable DRLS surcharge. Recovery of revenues from lost sales calculated for a twelve-month period shall be included in the DRLS for thirty-six (36) months or until implementation of new rates pursuant to a general rate case. For recovery purposes, the lost sales revenues will be assigned to the rate classes whose programs resulted in the lost sales.

Revenues collected hereunder are based on engineering estimates of energy savings, expected program participation and estimated sales for the upcoming twelve-month period. At the end of each such period, any difference between the lost revenues actually collected hereunder and the lost revenues determined after any revisions of the engineering estimates and actual program participation are accounted for shall be reconciled in future billings under the DSM Balance Adjustment (DBA) component.

A program evaluation vendor will be selected to provide evaluation criteria against which energy savings will be estimated for that program. Each program will be evaluated after implementation and any revision of the original engineering estimates will be reflected in both (a) the retroactive true-up provided for under the DSM Balance Adjustment and (b) the prospective future lost revenues collected hereunder.

**DSMI = DSM INCENTIVE**.

For all Energy Impact Programs except Direct Load Control, the DSM incentive amount shall be computed by multiplying the net resource savings expected from the approved programs that are to be installed during the upcoming twelve-month period times fifteen (15) percent, not to exceed five (5) percent of program expenditures. Net resource savings are defined as program benefits less utility program costs and participant costs where program benefits will be calculated on the basis of the present value of Company's avoided costs over the expected life of the program, and will include both capacity and energy savings. For the Energy Education Program, the DSM incentive amount shall be computed by multiplying the annual cost of the approved program times five (5) percent.

## Louisville Gas and Electric Company

P.S.C. Gas No. 11, Original Sheet No. 86.2

**Adjustment Clause** **DSM**

**Demand-Side Management Cost Recovery Mechanism**

**DSMI = DSM INCENTIVE** (continued)

The DSM incentive amount shall be divided by the expected Ccf sales for the upcoming twelve-month period to determine the DSMI. DSM incentive amounts will be assigned for recovery purposes to the rate classes whose programs created the incentive.

**DBA = DSM BALANCE ADJUSTMENT**.
The DBA shall be calculated on a calendar year basis and is used to reconcile the difference between the amount of revenues actually billed through the DCR, DRLS, DSMI, DCCR, and previous application of the DBA and the revenues that should have been billed, as follows:

(1) For the DCR, the balance adjustment amount will be the difference between the amount billed in a twelve-month period from the application of the DCR unit charge and the actual cost of the approved programs during the same twelve-month period.

(2) For the DRLS the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DRLS unit charge and the amount of lost revenues determined for the actual DSM measures implemented during the twelve-month period.

(3) For the DSMI, the balance adjustment amount will be the difference between the amount billed during the twelve-month period from application of the DSMI unit charge and the incentive amount determined for the actual DSM measures implemented during the twelve-month period.

(4) For the DBA, the balance adjustment amount will be determined by calculating the difference between the amount billed during the twelve-month period from application of the DBA unit charges and the balance adjustment amount established for the same twelve-month period.

The balance adjustment amounts determined on the basis of the above paragraphs (1)-(4) shall include interest to be calculated at a rate equal to the average of the "Three-Month Commercial Paper Rate" for the immediately preceding twelve-month period. The balance adjustment amounts, plus interest, shall be divided by the expected Ccf sales for the upcoming twelve-month period to determine the DBA for each rate class. DSM balance adjustment amounts will be assigned for recovery purposes to the rate classes for which over- or under-recoveries of DSM amounts were realized.

## Louisville Gas and Electric Company

P.S.C. Gas No. 11, Original Sheet No. 86.3

**Adjustment Clause** **DSM**

**Demand-Side Management Cost Recovery Mechanism**

**DCCR = DSM CAPITAL COST RECOVERY**

The DCCR component is the means by which the Company recovers its capital investments made for DSM programs, as well as an approved rate of return on such capital investments. The Company calculates the DCCR component as follows:

DCCR = [(RB) (ROR + (ROR – DR) (TR / (1 – TR))] + OE

a) RB is the total rate base for DCCR projects.
b) ROR is the overall rate of return on DSM Rate Base (RB).
c) DR is the composite debt rate (i.e., the cost of short- and long-term debt) embedded in ROR.
d) TR is the composite federal and state income tax rate that applies to the equity return component of ROR.
e) OE is the sum of the capital-related operating expenses (i.e., depreciation and amortization expense, property taxes, and insurance expense) of the DSM projects to which DCCR applies.

The Company then allocates the DCCR component to the rate class(es) benefitting from the Company's various DSM-related capital investment(s).

**CHANGES TO DSMRC**

The filing of modifications to the DSMRC that require changes in the DCR component shall be made at least two (2) months prior to the beginning of the effective period for billing. Modifications to other components of the DSMRC shall be made at least thirty (30) days prior to the effective period for billing. Each filing shall include the following information as applicable:

(1) A detailed description of each DSM program developed by the collaborative process, the total cost of each program over the twelve-month period, an analysis of expected resource savings, information concerning the specific DSM or efficiency measures to be installed, and any applicable studies that have been performed, as available.

(2) A statement setting forth the detailed calculation of the DCR, DRLS, DSMI, DBA and DSMRC.

Each change in the DSMRC shall be placed into effect with bills rendered on and after the effective date of such change.

**PROGRAMMATIC CUSTOMER CHARGES**

**Residential Customer Program Participation Incentives:**
The following Demand Side Management programs are available to residential customers receiving service from the Company on the RGS and VFD Standard Gas Rate Schedules.

**Residential Conservation / Home Energy Performance Program**
The on-site audit offers a comprehensive audit from a certified auditor and incentives for residential customers to support the implementation of energy saving measures for a fee of
$25. For on-site audits conducted prior to April 1, 2018, customers are eligible for incentives N
of $150 or $1,000 based on customer purchased and installed energy efficiency measures
and validated through a follow-up test. The follow-up test must be scheduled by September N
1, 2018. No follow-up tests or incentives will be available related to on-site audits conducted N
on or after April 1, 2018. N

**Residential Low Income Weatherization Program (WeCare)**
The Residential Low Income Weatherization Program (WeCare) is an education and weatherization program designed to reduce energy consumption of LG&E's low-income customers. The program provides energy audits, energy education, and blower door tests, and installs weatherization and energy conservation measures. Qualified customers could receive energy conservation measures ranging from $0 to $2,100 based upon the customer's most recent twelve month energy usage and results of an energy audit.

**Smart Energy Profile**
The Smart Energy Profile Program provides a portion of LG&E's highest consuming residential customers with a customized report of tips, tools and energy efficiency programming recommendations based on individual household energy consumption. These reports are benchmarked against similar local properties. The report will help the customer understand and make better informed choices as it relates to energy usage and the associated costs. Information presented in the report will include a comparison of the customer's energy usage to that of similar houses (collectively) and a comparison to the
customer's own energy usage in the prior year. The Company will cease offering this N
program effective April 1, 2018. N

**Demand-Side Management Cost Recovery Mechanism**

**PROGRAMMATIC CUSTOMER CHARGES**

**Residential Customer Program Participation Incentives:**
The following Demand Side Management programs are available to residential customers receiving service from the Company on the RGS and VFD Standard Gas Rate Schedules.

**Residential Conservation / Home Energy Performance Program**
The on-site audit offers a comprehensive audit from a certified auditor and incentives for residential customers to support the implementation of energy saving measures for a fee of $25. For on-site audits conducted prior to April 1, 2018, customers are eligible for incentives of $150 or $1,000 based on customer purchased and installed energy efficiency measures and validated through a follow-up test. The follow-up test must be scheduled by September 1, 2018. No follow-up tests or incentives will be available related to on-site audits conducted on or after April 1, 2018.

**Customer Education and Public Information**

This program help customers make sound energy-use decisions, increase control over energy bills and empower them to actively manage their energy usage. Customer Education and Public Information is accomplished through three processes: a mass-media campaign, an elementary- and middle-school program, and training for home construction professionals. The mass media campaign includes public-service advertisements that encourage customers to implement steps to reduce their energy usage. The elementary and middle school program provides professional development and innovative materials to K-8 schools to teach concepts such as basic energy and energy efficiency concepts. The training for home construction professionals provides education about new building codes, standards and energy efficient construction practices which support high performance residential construction.

**Commercial Customer Program Participation Incentives:**

The following Demand Side Management programs are available to commercial customers receiving service from the Company on the CGS, IGS, AAGS, SGSS, and FT Standard Gas Rate Schedules. T

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 87**

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

**APPLICABLE**

To all gas sold.

**RATE MECHANISM**

The monthly amount computed under each of the rate schedules to which this Performance Based Ratemaking Mechanism is applicable shall be increased or decreased by the Performance Based Rate Recovery Component **(PBRRC)** at a rate per 100 cubic feet (Ccf) of monthly gas consumption. Demand costs and commodity costs shall be accumulated separately and included in the Pipeline Supplier's Demand Component and the Gas Supply Cost Component of the Gas Supply Clause (GSC), respectively. The PBRRC shall be determined for each 12-month period ended October 31 during the effective term of this experimental performance based ratemaking mechanism, which 12-month period shall be defined as the PBR period.

The PBRRC shall be computed in accordance with the following formula:

$$\textbf{PBRRC} = \frac{\textbf{CSPBR + BA}}{\textbf{ES}}$$

Where:

**ES** = Expected Ccf sales, as reflected in Company's GSC filing for the upcoming 12-month period beginning February 1.

**CSPBR** = Company Share of Performance Based Ratemaking Mechanism savings or expenses. The CSPBR shall be calculated as follows:

$$\textbf{CSPBR = TPBRR x ACSP}$$

Where:

**TPBRR** = Total Performance Based Ratemaking Results. The TPBRR shall be savings or expenses created during the PBR Period. TPBRR shall be calculated as follows:

$$\textbf{TPBRR = (GAIF + TIF + OSSIF)}$$

**GAIF**

**GAIF** = Gas Acquisition Index Factor. The GAIF shall be calculated by comparing the total annual Benchmark Gas Costs **(BGC)** for system supply natural gas purchases for the PBR period to the total annual Actual Gas Costs **(AGC)** for system supply natural gas purchases during the same period to determine if any Shared Expenses or Shared Savings exist.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 87.1**

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

The BGC shall include the benchmark component as follows:

**BGC = TABMGCC**

Where:

**TABMGCC** represents the Total Annual Benchmark Gas Commodity Costs and is the annual sum of the monthly Benchmark Gas Commodity Costs **(BMGCC)** of gas purchased for system supply; and

**BMGCC** represents Benchmark Gas Commodity Costs and shall be calculated on a monthly basis and accumulated for the PBR period. BMGCC shall be calculated as follows:

**BMGCC = Sum {[SZFQE%i x (APV - PEFDCQ)x SAIi]} + [PEFDCQ x DAI]**

Where:

**SZFQE%** is the Supply Zone Firm Quantity Entitlement Percentage derived from Company's firm seasonal entitlements by pipeline and by zone for which indices are posted. The seasonal percentages represent the pro-rata portion of Company's firm lateral and mainline receipt point quantity entitlements by zone for each transportation contract by pipeline.

**i** represents each supply area.

**APV** is the actual purchased volumes of natural gas for system supply for the month. The APV shall include purchases necessary to cover retention volumes required by the pipeline as fuel.

**PEFDCQ** are the Purchases In Excess of Firm Daily Contract Quantities delivered to Company's city gate. Firm Daily Contract Quantities are the maximum daily contract quantities which Company can deliver to its city gate under its various firm transportation agreements and arrangements.

**SAI** is the Supply Area Index factor to be established for each supply area in which Company may have firm transportation entitlements used to transport its natural gas purchases and for which price postings are available. The five supply areas are TGT-SL (Texas Gas Transmission - Zone SL), TGT-1 (Texas Gas Transmission - Zone 1), TGT-4 (Texas Gas Transmission – Zone 4), TGPL-0 (Tennessee Gas Pipeline - Zone 0), and TGPL-1 (Tennessee Gas Pipeline - Zone 1).

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 87.4**

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

The daily DAI applicable to the daily purchases made for city-gate delivery shall be the higher of the following, either

**DAI = DAI (TGT-1) / (1 – FR%) + CCS + DDCS**

or

**DAI = DAI (TGT-4) / (1 – FR%) + CCS + DDCS**

Where:

**DAI (TGT-1)** represents the highest daily midpoint posting by *Platts Gas Daily* for East Texas – North Louisiana Area, Texas Gas, zone 1.

**DAI (TGT-4)** represents the highest daily midpoint posting by *Platts Gas Daily* for Appalachia – Lebanon Hub.

**FR%** is the tariffed Fuel Retention Percentage under Texas Gas Transmission, LLC's Rate NNS.

**CCS** are the tariffed NNS Commodity Charge and Surcharges under Texas Gas Transmission, LLC's Rate NNS.

**DDCS** are the tariffed Daily Demand Charge and Surcharges under Texas Gas Transmission, LLC's Rate NNS.

If an index ceases to exist or fails to report, the Company may use a suitable replacement index and report that change in writing to the Commission in the applicable quarterly report. If the Company elects not to select a replacement index, the average is adjusted accordingly.

**AGC** represents Company's total annual Actual Gas Costs of natural gas purchased for system supply and is equal to the total monthly actual gas commodity costs (excluding any supply reservation fees) plus the gains and/or losses from the use of financial hedging instruments and the financial transaction costs associated with such instruments paid by Company to its suppliers accumulated for the PBR period. Such costs shall exclude labor-related or other expenses typically classified as operating and maintenance expenses.

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

The daily DAI applicable to the daily purchases made for city-gate delivery shall be the higher of the following, either

**DAI = DAI (TGT-1) / (1 – FR%) + CCS + DDCS**

or

**DAI = DAI (TGT-4) / (1 – FR%) + CCS + DDCS**

Where:

**DAI (TGT-1)** represents the highest daily midpoint posting by *Platts Gas Daily* for East Texas – North Louisiana Area, Texas Gas, zone 1.

**DAI (TGT-4)** represents the highest daily midpoint posting by *Platts Gas Daily* for Appalachia – Lebanon Hub.

**FR%** is the tariffed Fuel Retention Percentage under Texas Gas Transmission, LLC's Rate NNS.

**CCS** are the tariffed NNS Commodity Charge and Surcharges under Texas Gas Transmission, LLC's Rate NNS.

**DDCS** are the tariffed Daily Demand Charge and Surcharges under Texas Gas Transmission, LLC's Rate NNS.

If an index ceases to exist or fails to report, the Company may use a suitable replacement index and report that change in writing to the Commission in the applicable quarterly report. If the Company elects not to select a replacement index, the average is adjusted accordingly.

**AGC** represents Company's total annual Actual Gas Costs of natural gas purchased for system supply and is equal to the total monthly actual gas commodity costs (excluding any supply reservation fees) plus the gains and/or losses from the use of financial hedging instruments and the financial transaction costs associated with such instruments paid by Company to its suppliers accumulated for the PBR period. Such costs shall exclude labor-related or other expenses typically classified as operating and maintenance expenses.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 87.5**

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

To the extent that AGC exceeds BGC for the PBR period, then the GAIF Shared Expenses shall be computed as follows:

**Shared Expenses = AGC - BGC**

To the extent that AGC is less than BGC for the PBR period, then the GAIF Shared Savings shall be computed as follows:

**Shared Savings = BGC – AGC**

**TIF**

**TIF** = Transportation Index Factor. The Transportation Index Factor shall be calculated by comparing the Total Annual Benchmark Monthly Gas Transportation Costs **(TABMGTC)** of natural gas transportation services during the PBR period, to the Total Annual Actual Gas Transportation Costs **(TAAGTC)** applicable to the same period to determine if any Shared Expenses or Shared Savings exist.

The Total Annual Benchmark Monthly Gas Transportation Costs **(TABMGTC)** are calculated as follows:

**TABMGTC = Annual Sum of Monthly BMGTC**

Where:

**BMGTC** is the Benchmark Monthly Gas Transportation Costs which include both demand and volumetric costs associated with natural gas pipeline transportation services. The BMGTC shall be accumulated for the PBR period and shall be calculated as follows:

**BMGTC = Sum [BM(TGT) + BM(TGPL) + BM(PPL)]**

Where:

**BM(TGT)** is the benchmark associated with Texas Gas Transmission, LLC.

**BM(TGPL)** is the benchmark associated with Tennessee Gas Pipeline Company, LLC.

**BM(PPL)** is the benchmark associated with a proxy pipeline. The appropriate benchmark, which will be determined at the time of purchase, will be used to benchmark purchases of transportation capacity from non-traditional sources.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 87.6**

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

The benchmark associated with each pipeline shall be calculated as follows:

**BM(TGT)** = (TPDR x DQ) + (TPCR x AV) + S&DB

**BM(TGPL)** = (TPDR x DQ) + (TPCR x AV) + S&DB

**BM(PPL)** = (TPDR x DQ) + (TPCR x AV) + S&DB

Where:

**TPDR** is the applicable Tariffed Pipeline Demand Rate.

**DQ** is the Demand Quantities contracted for by Company from the applicable transportation provider.

**TPCR** is the applicable Tariffed Pipeline Commodity Rate.

**AV** is the Actual Volumes delivered at Company's city-gate by the applicable transportation provider for the month.

**S&DB** represents Surcharges, Direct Bills and other applicable amounts approved by the Federal Energy Regulatory Commission (FERC). Such amounts are limited to FERC-approved charges such as surcharges, direct bills, cashouts, take-or-pay amounts, Gas Supply Realignment and other Order 636 transition costs.

The Total Annual Actual Gas Transportation Costs (**TAAGTC)** paid by Company for the PBR period shall include both demand and volumetric costs associated with natural gas pipeline transportation services as well as all applicable FERC-approved surcharges, direct bills and cash-outs included in S&DB, plus the gains and/or losses from the use of financial hedging instruments and the financial transaction costs associated with such instruments. Such costs shall exclude labor-related or other expenses typically classified as operating and maintenance expenses.

To the extent that TAAGTC exceeds TABMGTC for the PBR period, then the TIF Shared Expenses shall be computed as follows:

**Shared Expenses = TAAGTC – TABMGTC**

To the extent that TAAGTC is less than TABMGTC for the PBR period, then the TIF Shared Savings shall be computed as follows:

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 87.7**

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

**Shared Savings = TABMGTC - TAAGTC**

Should one of Company's pipeline transporters file a rate change effective during any PBR period and bill such proposed rates subject to refund, the period over which the benchmark comparison is made for the relevant transportation costs will be extended for one or more 12-month periods, until the FERC has approved final settled rates, which will be used as the appropriate benchmark. Company will not share in any of the savings or expenses related to the affected pipeline until final settled rates are approved.

**OSSIF**

**OSSIF** = Off-System Sales Index Factor. The Off-System Sales Index Factor shall be equal to the Net Revenue from Off-System Sales **(NR)**.

Net Revenue is calculated as follows:

**NR = OSREV - OOPC**

Where:

**OSREV** is the total revenue associated with off-system sales and storage service transactions.

**OOPC** is the out-of-pocket costs associated with off-system sales and storage service transactions, and shall be determined as follows:

**OOPC = OOPC(GC) + OOPC(TC) + OOPC(SC) + OOPC(UGSC) + Other Costs**

Where:

**OOPC(GC)** is the Out-of-Pocket Gas Costs associated with off-system sales transactions. For off-system sales utilizing Company's firm supply contracts, the OOPC(GC) shall be the incremental cost to purchase the gas available under Company's firm supply contracts. For off-system sales not using Company's firm supply contracts, the OOPC(GC) shall be the incremental costs to purchase the gas from other entities.

**OOPC(TC)** is the Out-of-Pocket Transportation Costs associated with off-system sales transactions. For off-system sales utilizing Company's firm transportation agreements, the OOPC(TC) shall be the incremental cost to use the transportation available under Company's firm transportation contracts. For off-system sales not using Company's firm transportation agreements, the OOPC(TC) shall be the incremental costs to purchase the transportation from other entities.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 87.8**

**Adjustment Clause** **PBR**

**Experimental Performance Based Rate Mechanism**

**OOPC(SC)** is the Out-of-Pocket Storage Costs associated with off-system sales of storage. If this is gas in Company's own storage it shall be priced at the average price of the gas in Company's storage during the month of the sale. If this is gas from the storage component of Texas Gas's No-Notice Service, this gas shall be priced at the replacement cost.

**OOPC(UGSC)** is the Out-of-Pocket Underground Storage Costs associated with off-system sales of storage services. For the off-systems sales of storage services utilizing Company's on-system storage, the OOPC(UGSC) shall include incremental storage losses, odorization, and other fuel-related costs such as purification, dehydration, and compression. Such costs shall exclude labor-related expenses.

**Other Costs** represent all other incremental costs and include, but are not limited to, costs such as applicable sales taxes and excise fees plus the gains and/or losses from the use of financial hedging instruments and the transaction costs associated with such instruments. Such costs shall exclude labor-related or other expenses typically classified as operating and maintenance expenses.

**ACSP**

**ACSP** = Applicable Company Sharing Percentage. The ACSP shall be determined based on the PTAGSC.

Where:

**PTAGSC** = Percentage of Total Actual Gas Supply Costs. The PTAGSC shall be the TPBRR stated as a Percentage of Total Actual Gas Supply Costs and shall be calculated as follows:

$$\mathbf{PTAGSC} = \frac{\mathbf{TPBRR}}{\mathbf{TAGSC}}$$

Where:

**TAGSC** = Total Actual Gas Supply Costs. The TAGSC shall be calculated as follows:

$$\mathbf{TAGSC = AGC + TAAGTC}$$

If the absolute value of the PTAGSC is less than or equal to 3.0%, then the ACSP of 25% shall be applied to TPBRR to determine CSPBR. If the absolute value of the PTAGSC is greater than 3.0%, then the ACSP of 25% shall be applied to the amount of TPBRR that is equal to 3.0% of TAGSC to determine a portion of CSPBR, and the ACSP of 50% shall be applied to the amount of TPBRR that is in excess of 3.0% of TAGSC to determine a portion of CSPBR. These two portions are added together to produce the total CSPBR.

**Adjustment Clause** **WNA**

**Weather Normalization Adjustment Clause** T

**APPLICABLE**

The sales to Residential Customers, Volunteer Fire Departments, and Commercial Customers under Rate Schedules RGS, VFD, and CGS shall be increased or decreased monthly by an amount hereinafter described as the WNA.

**DETERMINATION OF WNA**

Weather normalized volumes shall be utilized during the November through April billing periods to calculate the applicable Distribution Charges for Customers served under Rate Schedules RGS, VFD and CGS. During the remainder of the year, May through October, the bills shall be computed based on actual consumption.

WNA will be calculated using the following formula:

**WNA = [(Actual Mcf - Base Load Mcf) * (Normal Degree Days/Actual Degree Days)]**

Each Customer's base load will be determined individually, and will be recomputed annually. Rates used in the computation of the WNA shall be determined based on the applicable Distribution Charge T
as set forth on the RGS, VFD, and CGS Rate Schedules. T

## Louisville Gas and Electric Company

**Adjustment Clause** **TCJA**
**Tax Cuts and Jobs Act Surcredit**

**APPLICABLE**
In all territory served.

**AVAILABILITY OF SERVICE**
This schedule is mandatory to all Standard Rate Schedules listed in Section 1 of the General Index.

**RATE**
The monthly billing amount computed under each of the rate schedules to which this surcredit is applicable shall decrease by the Tax Cuts and Jobs Act (TCJA) Surcredit. The TCJA Surcredit will be distributed to the Company's customers based on the following:

TCJA Surcredit per 100 cubic feet:

| | |
|---|---|
| Residential (RGS, VFD): | $0.05042 |
| Non-Residential (all other Rate Schedules): | $0.02087 |

**TERMS OF DISTRIBUTION**

(1) The TCJA Surcredit shall be applied to the customer's bill following the rates and charges for gas service, but before application of the Gas Line Tracker, Franchise Fee Rider, School Tax, and Home Energy Assistance Program.

(2) The TCJA Surcredit shall be effective April 1, 2018 and continued through April 30, 2019 at the rates specified above.

(3) The TCJA Surcredit amounts listed on this page are interim amounts that are subject to change once the Public Service Commission issues a final decision in Case No. 2018-00034.

(4) In the event that the Company's base rates do not change on May 1, 2019, the TCJA Surcredit will continue at the following rates:

TCJA Surcredit per 100 cubic feet:

| | |
|---|---|
| Residential (RGS, VFD): | $0.04096 |
| Non-Residential (all other Rate Schedules): | $0.01696 |

(5) The TCJA Surcredit shall terminate when base rates are changed following an application requesting a change in base rates.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 90**

**Adjustment Clause**

**Franchise Fee**

**APPLICABILITY**
All gas rate schedules.

**MONTHLY CHARGE**
A surcharge shall be calculated and added to the total bill for gas service for all customers located within local governmental jurisdictions which currently or in the future impose municipal franchise fees or other local taxes on the Company by ordinance, franchise, or otherwise. Such fees or taxes shall be net of any corresponding fees or taxes which are currently included in the base charges of each rate schedule.

The amount calculated shall be applied exclusively to the bills of customers receiving service within the territorial limits of the authority imposing the fee or tax. The fee or tax shall be added to the customer's bill as a separate item. Where more than one such fee or tax is imposed, each of the fees or taxes applicable to each customer shall be added to the bills as separately identified items.

**Adjustment Clause** **FF**

**Franchise Fee**

**APPLICABLE** T
In all territory served. N

**AVAILABILITY**
Available as an option for collection of revenues within governmental jurisdictions which impose on Company franchise fees, permitting fees, local taxes or other charges by ordinance, franchise, or other governmental directive and not otherwise collected in the charges of Company's base schedules

**BILLING**
1. The franchise charge will be applied exclusively to the base rate and all riders of bills of Customers receiving service within the franchising governmental jurisdiction, before taxes.
2. The franchise charge will appear as a separate line item on Customer's bill and show the unit of government requiring the franchise.
3. Payment of the collected franchise charges will be made to the governmental franchising body as agreed to in the franchise agreement.
4. At its option, a governmental body imposing a franchise fee shall not be billed for that portion of a franchise fee, applied to services designated by the governmental body that would ultimately be repaid to the governmental body.

**TERM OF CONTRACT**
As agreed to in the franchise agreement. Company will not calculate or collect any such fees, taxes, or charges pursuant to expired, lapsed, or otherwise invalid, ineffective or inapplicable ordinances, franchise agreements, or other governmental enactment.

**P.S.C. Gas No. 11, Original Sheet No. 95**

**TERMS AND CONDITIONS**

**Customer Bill of Rights**

As a residential customer of a regulated public utility in Kentucky, you are guaranteed the following rights subject to Kentucky Revised Statutes and the provisions of the Kentucky Public Service Commission Administrative Regulations:

- You have the right to service, provided you (or a member of your household whose debt was accumulated at your address) are not indebted to the utility.
- You have the right to inspect and review the utility's rates and tariffed operating procedures during the utility's normal office hours.
- You have the right to be present at any routine utility inspection of your service conditions.
- You must be provided a separate, distinct disconnect notice alerting you to a possible disconnection of your service, if payment is not received.
- You have the right to dispute the reasons for any announced termination of your service.
- You have the right to negotiate a partial payment plan when your service is threatened by disconnection for non-payment.
- You have the right to participate in equal, budget payment plans for your natural gas and electric service, unless any rate or rider under which you take service explicitly states otherwise. T
- You have the right to maintain your utility service for up to thirty (30) days upon presentation of a medical certificate issued by a health official.
- You have the right to prompt (within 24 hours) restoration of your service when the cause for discontinuance has been corrected.
- If you have not been disconnected, you have the right to maintain your natural gas and electric service for up to thirty (30) days, provided you present a Certificate of Need issued by the Kentucky Cabinet for Human Resources between the months of November and the end of March.
- If you have been disconnected due to non-payment, you have the right to have your natural gas or electric service reconnected between the months of November through March provided you:
  1) Present a Certificate of Need issued by the Kentucky Cabinet for Human Resources, and
  2) Pay one third (1/3) of your outstanding bill ($200 maximum), and
  3) Accept referral to the Human Resources' Weatherization Program, and
  4) Agree to a repayment schedule that will cause your bill to become current by October 15.
- You have the right to contact the Public Service Commission regarding any dispute that you have been unable to resolve with your utility (call Toll Free 1-800-772-4636).

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 97**

**TERMS AND CONDITIONS**

**Customer Responsibilities**

**APPLICATION FOR SERVICE**

A written, in-person, electronic, or oral application or contract, properly executed, will be required before Company is obligated to render gas service. Company may require any party applying for service to provide some or all of the following information for the party desiring service: full legal name, address, full Social Security Number or other taxpayer identification number, date of birth (if applicable), relationship of the applying party to the party desiring service, and any other information Company deems necessary for legal, business, or debt-collection purposes. Company shall have the right to reject for valid reasons any such application or contract, including the applying party's refusal to provide requested information. T

All applications for service shall be made in the legal name of the party desiring the service.

Where an unusual expenditure for construction or equipment is necessary or where the proposed manner of using gas service is clearly outside the scope of Company's standard rate schedules, Company may establish special terms and require special contracts giving effect to such unusual circumstances.

**TRANSFER OF APPLICATION**

Applications for gas service are not transferable and new occupants of premises will be required to make application for service before commencing the use of gas. Customers who have been receiving gas service shall notify Company when discontinuance of service is desired, and shall pay for all gas service furnished until such notice has been given and final meter readings made by Company.

**OPTIONAL RATES**

If two or more rate schedules are available for the same class of service, it is Customer's responsibility to determine the options available and to designate the schedule under which Customer desires to receive service.

Company will, at any time, upon request, advise any Customer as to the most advantageous rate for existing or anticipated service requirements as defined by the Customer, but Company does not assume responsibility for the selection of such rate or for the continuance of the lowest annual cost under the rate selected.

In those cases in which the most favorable rate is difficult to predetermine, the Customer will be given the opportunity to change to another schedule, unless otherwise prevented by the rate schedule under which Customer is currently served, after trial of the schedule originally designated; however, after the first such change, Company shall not be required to make a change in schedule more often than once in twelve months.

From time to time, Customer should investigate Customer's operating conditions to determine a desirable change from one available rate to another. Company, lacking knowledge of changes that may occur at any time in Customer's operating conditions, does not assume responsibility that Customers will at all times be served under the most beneficial rate.

In no event will Company make refunds covering the difference between the charges under the rate in effect and those under any other rate applicable to the same class of service.

**TERMS AND CONDITIONS**

**Customer Responsibilities**

**CUSTOMER'S EQUIPMENT AND INSTALLATION**.

Customer shall furnish, install, and maintain at Customer's expense the necessary Customer's Service Line extending from Company's Service Connection at the property line to the building or place of utilization of the gas.

All piping, appliances, and other gas equipment and apparatus, except the meter, regulator, and any gas riser or service line the Company has installed, repaired, or replaced, located on and within the Customer's premises beyond point of connection with Company's Service Connection at the property line shall be furnished and installed by and at the expense of Customer, and shall be maintained by Customer in good and safe condition. Company assumes no responsibility whatsoever for the condition of Customer's piping, apparatus or appliances, nor for the maintenance or renewal of any portion thereof.

**OWNER'S CONSENT TO OCCUPY**

Customer shall grant easements and rights-of-way on and across Customer's property at no cost to Company.

**ACCESS TO PREMISES AND EQUIPMENT**

Company shall have the right of access to Customer's premises at all reasonable times for the purpose of installing, meter reading, inspecting, repairing, or removing its equipment used in connection with its supply of gas service or for the purpose of turning on and shutting off the gas supply when necessary and for all other proper purposes. Customer shall not construct or permit the construction of any structure or device which will restrict the access of Company to its equipment for any of the above purposes.

**PROTECTION OF COMPANY'S PROPERTY**

Customers will be held responsible for tampering, interfering with, breaking of seals of meters, or other equipment of Company installed on Customer's premises, and will be held liable for same according to law. Customer hereby agrees that no one except the employees of Company shall be allowed to make any internal or external adjustments of any meter or any other piece of apparatus which shall be the property of Company.

**EXCLUSIVE SERVICE ON INSTALLATION CONNECTED**

Gas service shall not be used for purposes other than as set forth in customer's application or contract.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 97.2**

**TERMS AND CONDITIONS**

**Customer Responsibilities**

**EXCLUSIVE SERVICE ON INSTALLATION CONNECTED (continued)**

Company shall not be obligated to provide natural gas or natural gas service under any standard natural gas rate schedule on a standby, back-up, supplemental or other basis to any Customer that is physically connected to the facilities of any other provider of natural gas service, such other providers to include, but not be limited to, another natural gas local distribution company, public, private, or municipal; a producer, gatherer, or transmitter of natural gas; an interstate or intrastate natural gas pipeline; or any other entity (including the Customer itself acting in any one or more of these roles) that provides natural gas or natural gas service to residential, commercial, industrial, public authority, or any other type of customers which might otherwise receive natural gas from Company. In the event that such Customer desires to continue to receive natural gas service from T
Company and/or declines to allow Company to remove Company's facilities hitherto used to provide T
natural gas service to Customer, then Customer shall be obligated to take service under Rate SGSS. T

**LIABILITY**

Customer assumes all responsibility for the gas service upon Customer's premises at and from the point of delivery of gas and for the pipes and equipment used in connection therewith, and will protect and save Company harmless from all claims for injury or damage to persons or property occurring on Customer's premises or at and from the point of delivery of gas, occasioned by such gas or said pipes and equipment, except where said injury or damage will be shown to have been occasioned solely by the negligence of Company.

**NOTICE TO COMPANY OF CHANGES IN CUSTOMER'S LOAD**

The service pipes, meters, and appurtenances supplied by Company for the rendition of gas service to its customers have a definite capacity. In the event that Customer contemplates any material increase in Customer's connected load, whether in a single increment or over an extended period, Customer shall immediately give Company written notice of this fact so as to enable it to enlarge the capacity of such equipment. In case of failure to give such notice, Customer may be held liable for any damage done to meters, regulators, or other equipment of Company caused by such material increase in Customer's connected load.

**PERMITS**

Customer shall obtain or cause to be obtained all permits, easements, or certificates, except street permits, necessary to give Company or its agents access to Customer's premises and equipment and to enable its service to be connected therewith. In case Customer is not the owner of the premises or of intervening property between the premises and Company's distribution mains, Customer shall obtain from the proper owner or owners the necessary consent to the installation and maintenance in said premises and across such intervening property of Customer's piping and facilities required for the supply of gas service to Customer. Provided, however, to the extent permits, easements, or certificates are necessary for the installation and maintenance of Company-owned facilities, Company shall obtain the aforementioned consent.

In case of failure to give such notice, Customer may be held liable for any damage done to meters, regulators, or other equipment of Company caused by such material increase in Customer's connected load.

**PERMITS**

Customer shall obtain or cause to be obtained all permits, easements, or certificates, except street permits, necessary to give Company or its agents access to Customer's premises and equipment and to enable its service to be connected therewith. In case Customer is not the owner of the premises or of intervening property between the premises and Company's distribution mains, Customer shall obtain from the property owner or owners the necessary consent to the T
installation and maintenance in said premises and across such intervening property of Customer's piping and facilities required for the supply of gas service to Customer. Provided, however, to the extent permits, easements, or certificates are necessary for the installation and maintenance of Company-owned facilities, Company shall obtain the aforementioned consent.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 97.3**

**TERMS AND CONDITIONS**

**Customer Responsibilities**

**PERMITS (continued)**

Company shall make or cause to be made application for any necessary street permits, and shall not be required to supply service under Customer's application until a reasonable time after such permits are granted.

**COMPANY-OWNED SERVICE LINES**

The Company will install, own, operate and maintain the service line at the premises of residential and commercial customers, if such premises are not connected to a Company main by a service line. With respect to residential and commercial customers that occupy premises already connected to a Company main by a service line that the Company has installed, repaired, or replaced, the Company shall be responsible for operating and maintaining the customer service line and when the Company determines that replacement of such customer service line is necessary the Company shall be responsible for installing the service line and shall thereafter own the service line.

Any customer accepting gas service under this section shall be deemed to have granted the Company an easement across his property for such service. No service line shall be installed across private property other than the premises of the building to be supplied with gas, except after special investigation and approval by the Company.

When the length of the service pipe required between the property line and the meter is 100 feet or less, the Company will assess no charge for the service pipe installation.

When the length of required service pipe exceeds 100 feet, the Company may require the applicant to contribute toward the cost of the service line installation an amount equal to the estimated cost per foot for each lineal foot of service beyond 100 feet. Contributions by customers toward the Company's cost of furnishing and installing service lines in accordance with this section are non-refundable.

In the event that the Company is required to undertake any excavation on a customer's property in connection with the installation, repair, maintenance or replacement of a service line, the Company shall make reasonable efforts to restore the property to its original condition pursuant to generally accepted utility standards for such construction operations.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 98**

**TERMS AND CONDITIONS**

**Company Responsibilities**

**METERING**

The gas used will be measured by a meter or meters to be furnished and installed by Company at its expense and all bills will be calculated upon the registration of said meters. Company has the right to install any meter or meters it deems in its sole discretion to be necessary or prudent to serve any customer, including without limitation a digital, automated meter reading, automated metering infrastructure, or advanced metering systems meter or meters. When service is supplied by Company at more than one delivery point on the same premises, each delivery point will be metered and billed separately on the rate applicable. Meters include all measuring instruments. Meters will be located outside whenever possible. Otherwise, meters will be located as near as possible to the service entrance and on the ground floor of the building, in a clean, dry, safe and easily accessible place, free from vibration, agreed to by Company. T T T T

**POINT OF DELIVERY OF GAS**

The point of delivery of gas supplied by Company shall be at the point where the gas passes from the pipes of Company's Service Connection into Customer's Service Line, irrespective of the location of the metering and regulating equipment.

If the Service Line is owned by the Customer, the point of delivery of gas supplied by the Company shall be at the point where the gas passes from the pipes of Company's Service Connection into Customer's Service Line, irrespective of the location of the metering and regulation equipment.

If the Service Line is owned by the Company, the point of delivery of gas supplied by the Company shall be at the point where the gas passes from the outlet of the meter to the Customer's yard line or house piping.

**COMPANY'S EQUIPMENT AND INSTALLATION**

The Company shall furnish, install, and maintain at its expense the necessary service connection. The location of this service connection will be made at the discretion and judgment of the Company.

The Company will furnish, install, and maintain at its expense the necessary meter, regulator, and connections which will be located at or near the building, at the discretion or judgment of the Company. Suitable site or location for the meter, meter stand (including meter riser), and regulator and connections shall be provided by the Customer and title to this equipment shall remain in the Company with the right to install, operate, maintain, and remove same and no charge shall be made by the Customer for use of the premises as occupied or used. Customer shall protect such property of Company from loss or damage, and no one who is not an agent of Company shall be permitted to remove, damage or tamper with the same. Customer shall execute a reasonable form of easement agreement, if requested by Company.

Customer that is physically connected to the facilities of any other provider of natural gas service, such other providers to include, but not be limited to, another natural gas local distribution company, public, private, or municipal; a producer, gatherer, or transmitter of natural gas; an interstate or intrastate natural gas pipeline; or any other entity (including the Customer itself acting in any one or more of these roles) that provides natural gas or natural gas service to residential, commercial, industrial, public authority, or any other type of customers which might otherwise receive natural gas from Company. Company and Customer may mutually agree to enter into a special contract for standby, back-up, supplemental or other service subject to the approval of the Kentucky Public Service Commission.

**SPECIAL RULES FOR CUSTOMERS SERVED FROM HIGH PRESSURE MAINS, GAS TRANSMISSION MAINS, AND STORAGE GATHERING LINES**

In order to ensure the integrity, safe operations, and reliability of the Company's gas system, these special rules apply to customers served from high pressure mains, gas transmission mains, and storage gathering lines.

When a customer requests service from a high pressure main, gas transmission main, or storage gathering line under Rate RGS, VFD, CGS, IGS, AAGS, SGSS, or FT, Company shall determine, in its sole discretion, if service is justified, feasible, and consistent with good operating practice. T

Upon approval by Company of a request by a customer (or group of customers) for service from a high pressure main, gas transmission main, or storage gathering line, then Company may charge the customer (or group of customers) in addition to the charges under the applicable rate schedule, the estimated installed cost of the tap, any regulation equipment, piping, and any other equipment or facilities determined by Company, in its sole discretion, to be necessary to provide such service consistent with good operating practice.

In no case, shall Company be obligated to provide service to customers served under Rate DGGS from a high pressure main, gas transmission main, or storage gathering line.

**PURCHASE OF CERTAIN CUSTOMER-OWNED GAS SERVICE ENTRANCES AND RISERS.**

LG&E will reimburse its gas customers who have replaced their service entrances or gas risers (or both) between January 1, 2011 and December 31, 2012. Customers must notify LG&E if they desire such reimbursement. LG&E has no obligation to seek out such customers. LG&E will post on its website a notice of the availability of this reimbursement. The reimbursement will be in the amount of the customers' reasonable costs of replacing such service entrances or gas risers (or both), which must be demonstrated to LG&E's reasonable satisfaction. Customers disputing the amount of reimbursement may contact the Commission. LG&E will reimburse only owners of affected properties, each of whom must have owned the affected property at the time of the replacement of the service entrance or gas riser.

**P.S.C. Gas No. 11, Original Sheet No. 101**

**TERMS AND CONDITIONS**

**Billing**

**METER READINGS AND BILLS**

As used in the entirety of this Tariff, “meter reading” and similar terms shall include data collected remotely from automated meter reading, automated meter infrastructure, advanced metering systems, and other electronic meter equipment or systems capable of delivering usage data to Company. A physical, manual reading of a meter is not required to constitute a “meter reading.” T

Each bill for utility service shall be issued in compliance with 807 KAR 5:006, Section 7.

All bills will be based upon meter readings made in accordance with Company's meter reading schedule. Company, except if prevented by reasons beyond its control, shall read customers meters at least quarterly, except that customer-read meters shall be read at least once during the calendar year.

In the case of opening and closing bills when the total period between regular and special meter readings is less than thirty days, the minimum charges of the applicable rate schedules will be prorated on the basis of the ratio of the actual number of days in such period to thirty days.

When Company is unable to read Customer's meter after reasonable effort, or when Company experiences circumstances which make actual meter readings impossible or impracticable, Customer may be billed on an estimated basis and the billing will be adjusted as necessary when the meter is read.

In the event Company's electric or gas meter fails to register properly by reason of damage, accident, etc., Company shall have the right to estimate Customer's consumption during the period of failure on the basis of such factors as Customer's connected load, heating degree days, and consumption during a previous corresponding period and during a test period immediately following replacement of the defective meter.

Where Company serves a customer with both electric and gas service at the same service location, Company will render a combined bill. However, a residential customer may request, and Company will render, separate bills under the following conditions: (1) Customer is being threatened with disconnection for non-payment or has already been disconnected for that reason and (2) Customer would be able to pay either the gas or electric portion of his bill and thus retain one service.

Bills are due and payable at the office of Company during business hours, or at other locations designated by Company, within sixteen (16) business days (no less than twenty-two (22) calendar days) from the date of rendition thereof. If full payment is not received by the due date of the bill, a late payment charge will be assessed on the current month’s charges. Beginning October 1, 2010, residential customers who receive a pledge for or notice of low income energy assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which T

Louisville, Kentucky

**Issued by Authority of an Order of the Public Service Commission in Case No. 2018-00295 dated ____**

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 101.1**

**TERMS AND CONDITIONS**

**Billing**

**METER READINGS AND BILLS** (continued)

the pledge or notice is received, nor will they be assessed or required to pay a late payment charge in any of the eleven (11) months following receipt of such pledge or notice. There will be no adverse credit impact on the customer's payment and credit record, including credit scoring, both internally and externally, and the account will not be considered delinquent for any purpose if the Company receives the customer's payment within fifteen days after the date on which the Company issues the customer's bill. T T

Failure to receive a bill does not exempt Customer from these provisions of Company's Terms and Conditions.

**READING OF SEPARATE METERS NOT COMBINED**

For billing purposes, each meter upon Customer's premises will be considered separately and readings of two or more meters will not be combined except where Company's operating convenience requires the installation of two or more meters upon Customer's premises instead of one meter.

**CUSTOMER RATE MIGRATION**

Unless otherwise specified in the applicable rate schedule or rider, a change from one rate to another will be effective with the first full billing period following a customer's request for such change or with a rate change mandated by changes in a customer's load. In cases where a change from one rate to another necessitates a change in metering, the change from one rate to another will be effective with the first full billing period following the meter change.

**MONITORING OF CUSTOMER USAGE**

In order to detect unusual deviations in individual Customer consumption, Company will monitor the usage of each Customer at least once quarterly. In addition, Company may investigate usage deviations brought to its attention as a result of its ongoing meter reading or billing processor customer inquiry. Should an unusual deviation in the Customer's consumption be found which cannot be attributed to a readily identified cause, Company may perform a detailed analysis of the Customer's meter reading and billing records. If the cause for the usage deviation cannot be determined from analysis of the Customer's meter reading and billing records, Company may contact Customer by telephone or in writing to determine whether there have been changes such as different number of household members or work staff, additional or different appliances, changes in business volume, or known leaks in the Customer's service line. Where the deviation is not otherwise explained, Company will test Customer's meter to determine whether the results show the meter is within the limits allowed by 807 KAR 5:022, Section 8(3)(a)1, and Section 8(3)(b)1. Company will notify the customers of the investigation, its findings, and any refunds or back-billing in accordance with 807 KAR 5:006, Section 11(4) and (5).

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 102**

**TERMS AND CONDITIONS**

**Deposits**

**GENERAL**

1) Company may require a cash deposit or other guaranty from customers to secure payment of bills in accordance with 807 KAR 5:006, Section 8 except for customers qualifying for service reconnection pursuant to 807 KAR 5:006, Section 16, Winter Hardship Reconnection.
2) Deposits may be required from all customers not meeting satisfactory credit and payment criteria. Satisfactory credit for customers will be determined by utilizing independent credit sources (primarily utilized with new customers having no prior history with Company), as well as historic and ongoing payment and credit history with Company.
   a) Examples of independent credit scoring resources include credit scoring services, public record financial information, financial scoring and modeling services, and information provided by independent credit/financial watch services.
   b) Satisfactory payment criteria with Company may be established by paying all bills rendered, having no disconnections for nonpayment, having no late notices, having no defaulted credit arrangements, having no returned payments, having no meter diversion or theft of service
3) Company may offer residential customers the option of paying all or a portion of their deposits in installments over a period not to exceed the first six (6) normal billing periods. Service may be refused or discontinued for failure to pay and/or maintain the requested deposit.
4) Interest on deposits will be calculated at the rate prescribed by law, from the date of deposit, and will be paid annually either by refund or credit to Customer's bills, except that no refund or credit will be made if Customer's bill is delinquent on the anniversary date of the deposit. If interest is paid or credited to Customer's bill prior to twelve (12) months from the date of deposit, the payment or credit will be on a prorated basis. Upon termination of service, the deposit, any principal amounts, and interest earned and owing will be credited to the final bill, with any remainder refunded to Customer.
5) The General Terms and Conditions regarding Deposits set forth above shall not apply to, and shall be superseded by, the requirements set forth in Section 3 of the Special Terms and Conditions T
contained in Standard Rate Rider PS-TS-2 (Sheet No. 59.7), Standard Rate Rider PS-FT (Sheet T
No. 61.2), and the CREDITWORTHINESS section of Rate LGDS (Sheet No. 36.11). T

**RESIDENTIAL**

1) Residential customers are those customers served under Residential Gas Service, Sheet No. 5.
2) The deposit for a residential customer is in the amount of $100.00, which is calculated in accordance with 807 KAR5:006, Section 8(1)(d). For combination gas and electric customers, the total deposit will be $260.00.
3) Company shall retain Customer's deposit for a period not to exceed twelve (12) months, provided Customer has met satisfactory payment and credit criteria.

4) If a deposit is held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than $10.00, Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
5) If Customer fails to maintain a satisfactory payment or credit record, or otherwise becomes a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

**OTHER SERVICE**

1) The deposit for all other customers, those not classified herein as residential, shall not exceed 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly in accordance with 807 KAR5:006, Section 8(1)(d).
2) For customers not meeting the parameters of GENERAL ¶ 2, Company may retain Customer's deposit as long as Customer remains on service.
3) For a deposit held longer than eighteen (18) months, the deposit will be recalculated, at Customer's request, and based on Customer's actual usage. If the deposit on account differs from the recalculated amount by more than ten percent (10%), Company may collect any underpayment and shall refund any overpayment by check or credit to Customer's bill. No refund will be made if Customer's bill is delinquent at the time of the recalculation.
4) If Customer fails to maintain a satisfactory payment or credit record, or otherwise becomes a new or greater credit risk, as determined by Company in its sole discretion, Company may require a new or additional deposit from Customer.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 103**

**TERMS AND CONDITIONS**

**Budget Payment Plan**

Company's Budget Payment Plan is available to residential customers and to small commercial customers served under Rates CGS. Small business customers with combined gas and electric services must be served exclusively under General Service Rate GS for their electric service. Under this plan, a customer may elect to pay, each billing period, a budgeted amount in lieu of billings for actual usage. A customer may enroll in the plan at any time.

The budgeted amount will be determined by Company and will be based on one-twelfth of the customer's usage for either an actual or estimated twelve (12) months. The budgeted amount will be subject to review and adjustment by Company at any time during the customer's budget year. If actual usage indicates the customer's account will not be current with the final payment in the customer's budget year, the customer will be required to pay their Budget Payment Plan account to $0 prior to the beginning of the customer's next budget year.

If a customer fails to pay bills as agreed under the Budget Payment Plan, Company reserves the right to remove the customer from the plan, restore the customer to regular billing and require immediate payment of any deficiency. A customer removed from the Budget Payment Plan for non-payment may be prohibited from further participation in the Plan for twelve (12) months.

Failure to receive a bill in no way exempts a customer from the provisions of these terms and conditions.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 105**

**TERMS AND CONDITIONS**

**Discontinuance of Service**

In accordance with and subject to the rules and regulations of the Public Service Commission of Kentucky, Company shall have the right to refuse, or to discontinue, service to an applicant or customer under the following conditions:

A. When Company's or Commission's rules and regulations have not been complied with. However, service may be discontinued or refused only after Company has made a reasonable effort to induce Customer to comply with its rules and then only after Customer has been given at least 10 days written notice of such intention, mailed or otherwise delivered, including, but not limited to, electronic mail, to Customer's last known address.

B. When a dangerous condition is found to exist on Customer's or Applicant's premises. In such case service will be discontinued without notice or refused, as the case might be. Company will notify Customer or Applicant immediately of the reason for the discontinuance or refusal and the corrective action to be taken before service can be restored or initiated.

C. When Customer or Applicant refuses or neglects to provide reasonable access and/or easements to and on Customer's or Applicant's premises for the purposes of installation, operation, meter reading, maintenance, or removal of Company's property. Customer shall be given 15 days written notice (either mailed or otherwise delivered, including, but not limited to, electronic mail), of Company's intention to discontinue or refuse service.

D. When Applicant is indebted to Company for service furnished. Company may refuse to serve until indebtedness is paid.

E. When Customer or Applicant does not comply with state, municipal or other codes, rules and regulations applying to such service.

F. When directed to do so by governmental authority.

G. Service will not be supplied to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same or any other premises until payment of such indebtedness shall have been made. Service will not be continued to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same premises in accordance with 807 KAR 5:006, Section 15(1)(f). Unpaid balances of previously rendered Final Bills may be transferred to any account for which Customer has responsibility and may be included on initial or subsequent bills for the account to which the transfer was made. Such transferred Final Bills, if unpaid, will be a part of the past due balance of the account to which they are transferred. When there is no lapse in service, such transferred Final Bills will be subject to Company's collections and disconnect procedures in accordance with 807 KAR 5:006, Section 15(1)(f). Final Bills transferred following a T

## Louisville Gas and Electric Company

**P.S.C. Gas No. 12, Original Sheet No. 105**

**Terms and Conditions**
**Discontinuance of Service**

In accordance with and subject to the rules and regulations of the Kentucky Public Service Commission, Company shall have the right to refuse, or to discontinue, service to an applicant or customer under the following conditions:

1.. When Company's or Commission's rules and regulations have not been complied with. However, service may be discontinued or refused only after Company has made a reasonable effort to induce Customer to comply with its rules and then only after Customer has been given at least 10 days written notice of such intention, mailed or otherwise delivered, including, but not limited to, electronic mail, to Customer's last known address. T

2. When a dangerous condition is found to exist on Customer's or Applicant's premises. In such case service will be discontinued without notice or refused, as the case might be. Company will notify Customer or Applicant immediately of the reason for the discontinuance or refusal and the corrective action to be taken before service can be restored or initiated. T

3. When Customer or Applicant refuses or neglects to provide reasonable access and/or easements to and on Customer's or Applicant's premises for the purposes of installation, operation, meter reading, maintenance, or removal of Company's property. Customer shall be given 15 days written notice (either mailed or otherwise delivered, including, but not limited to, electronic mail), of Company's intention to discontinue or refuse service. T

4. When Applicant is indebted to Company for service furnished. Company may refuse to serve until indebtedness is paid. T

5. When Customer or Applicant does not comply with state, municipal or other codes, rules and regulations applying to such service. T

6. When directed to do so by governmental authority. T

7. Service will not be supplied to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same or any other premises until payment of such indebtedness shall have been made. Service will not be continued to any premises if Applicant or Customer is indebted to Company for service previously supplied at the same premises in accordance with 807 KAR 5:006, Section 15(1)(f). Unpaid balances of previously rendered Final Bills may be transferred to any account for which Customer has responsibility and may be included on initial or subsequent bills for the account to which the transfer was made. **ISSUED BY:** /s/ Robert M. Conroy, Vice President
State Regulation and Rates
Louisville, Kentucky

**Issued by Authority of an Order of the Public Service Commission in Case No. 2018-00295 dated ____**

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 105.1**

**TERMS AND CONDITIONS**

**Discontinuance of Service**

lapse in service will not be subject to disconnection unless: (1) such service was provided pursuant to a fraudulent application submitted by Customer; (2) Customer and Company have entered into a contractual agreement which allows for such a disconnection; or (3) the current account is subsequently disconnected for service supplied at that point of delivery, at which time, all unpaid and past due balances must be paid prior to reconnect. Company shall have the right to transfer Final Bills between residential and commercial with residential characteristics (e.g., service supplying common use facilities of any apartment building) revenue classifications. T

Service will not be supplied or continued to any premises if at the time of application for service Applicant is merely acting as an agent of a person or former customer who is indebted to Company for service previously supplied at the same or other premises until payment of such indebtedness shall have been made. Service will not be supplied where Applicant is a partnership or corporation whose general partner or controlling stockholder is a present or former customer who is indebted to Company for service previously supplied at the same premises until payment of such indebtedness shall have been made.

H. For non-payment of bills. Company shall have the right to discontinue service for non-payment of bills after Customer has been given at least ten days written notice separate from Customer's original bill. Cut-off may be effected not less than twenty-seven (27) days after the mailing date of original bills unless, prior to discontinuance, a residential customer presents to Company a written certificate, signed by a physician, registered nurse, or public health officer, that such discontinuance will aggravate an existing illness or infirmity on the affected premises, in which case discontinuance may be effected not less than thirty (30) days from the original date of discontinuance. Company shall notify Customer, in writing, (either mailed or otherwise delivered, including, but not limited to, electronic mail), of state and federal programs which may be available to aid in payment of bills and the office to contact for such possible assistance.

I. For fraudulent or illegal use of service. When Company discovers evidence that by fraudulent or illegal means Customer has obtained unauthorized service or has diverted the service for unauthorized use or has obtained service without same being properly measured, the service to Customer may be discontinued without notice. Within twenty-four (24) hours after such termination, Company shall send written notification to Customer of the reasons for such discontinuance of service and of the customer's right to challenge the termination by filing a formal complaint with the Public Service Commission of Kentucky. Company's right of termination is separate from and in addition to any other legal remedies which the utility may pursue for illegal use or theft of service. Company shall not be required to restore service until Customer has complied with all rules of Company and regulations of the Commission and Company has been reimbursed for the estimated amount of the service rendered, and assessment of the charges under the Unauthorized Reconnect Charge provision of Special Charges incurred by reason of the fraudulent use. Service will not be supplied or continued to any premises if at the time of application for service Applicant is merely acting as an agent of a person or former customer who is indebted to Company for service previously supplied at the same or other premises until payment of such indebtedness shall have been made. Service will not be supplied where Applicant is a partnership or corporation whose general partner or controlling stockholder is a present or former customer who is indebted to Company for service previously supplied at the same premises until payment of such indebtedness shall have been made.

8 . For non-payment of bills. Company shall have the right to discontinue service for non-payment of bills after Customer has been given at least ten days written notice separate from Customer's original bill. Cut-off may be effected not less than twenty-seven (27) days after the mailing date of original bills unless, prior to discontinuance, a residential customer presents to Company a written certificate, signed by a physician, registered nurse, or public health officer, that such discontinuance will aggravate an existing illness or infirmity on the affected premises, in which case discontinuance may be effected not less than thirty (30) days from the original date of discontinuance. Company shall notify Customer, in writing, (either mailed or otherwise delivered, including, but not limited to, electronic mail), of state and federal programs which may be available to aid in payment of bills and the office to contact for such possible assistance. T

9. For fraudulent or illegal use of service. When Company discovers evidence that by fraudulent or illegal means Customer has obtained unauthorized service or has diverted the service for unauthorized use or has obtained service without same being properly measured, the service to Customer may be discontinued without notice. Within twenty-four (24) hours after such termination, Company shall send written notification to Customer of the reasons for such discontinuance of service and of the customer's right to challenge the termination by filing a formal complaint with the Kentucky Public Service Commission. Company's right of termination is separate from and in addition to any other legal remedies which the utility may pursue for illegal use or theft of service. Company shall not be required to restore service until Customer has complied with all rules of Company and regulations of the Commission and Company has been reimbursed for the estimated amount of the service rendered, and assessment of the charges under the Unauthorized Reconnect Charge provision of Special Charges incurred by reason of the fraudulent use. ## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 106**

**TERMS AND CONDITIONS**

**Gas Main Extension Rules**

1. Company will extend its gas distribution mains at its own expense for a distance of one hundred (100) feet to each bona-fide applicant who agrees in writing to take service within one (1) year after the extension is completed and who has a suitable Customer's Service Line installed and ready for connection provided the following criteria are met:
   a) The existing main is of sufficient capacity to properly supply the additional customer(s);
   b) The customer(s) contracts to use gas on a continuous basis for one (1) year or more; and,
   c) The potential consumption and revenue will be of such amount and permanence as to warrant the capital expenditures involved to make the investment economically feasible.

2. Company will extend its gas mains in excess of the above distance provided the applicant for service advances to Company an amount equal to the estimated cost of such excess portion of the extension. Company shall have the right to determine the length of the extension and to specify the pipe size and location of the extension, as well as the timing of its construction.

3. Where funds were advanced in accordance with paragraph 2 for extensions into developed residential neighborhoods and notwithstanding paragraph 1, any customer that subsequently connects to the main during a ten-year period from the effective date of the main extension contract shall advance to Company a pro rata share of the cost of the extension over 100 feet per connected customer.

4. For each new year-round customer connected to an extension in accordance with paragraph 3, Company will refund to the previous applicant(s) who advanced funds an amount equal to the difference between the refundable amount advanced and the amount of the advance so determined for the new applicant.

5. Company will extend its gas mains to serve a proposed real estate subdivision provided the applicant for such extension advances to Company an amount equal to the estimated cost of the total extension. Company shall have the right to determine the length of the extension and to specify the pipe size and the location of the extension, as well as the timing of its construction.

6. For each new year-round customer actually connected to the extension within a ten-year period following the effective date of the gas main extension contract, but not to extensions or laterals therefrom, Company will refund to applicant(s) who advanced funds in accordance with paragraph 5 above an amount equal to 100 times the average unit cost per foot of extension advanced by such applicant(s); provided that such refunds shall not exceed, in the aggregate, the amount originally advanced to Company.

**P.S.C. Gas No. 11, First Revision of Original Sheet No. 106.1**
**Canceling P.S.C. Gas No. 11, Original Sheet No. 106.1**

**TERMS AND CONDITIONS**

**Gas Main Extension Rules**

7. Company will install at its own expense a service pipe of suitable capacity extending from its gas main to the customer's property line beyond which point all necessary piping shall be installed by and at the expense of the customer and in a manner acceptable to Company.

8. Company will install at its own expense the necessary meter together with the regulator required to convert from medium pressure to service pressure. When a high pressure gas line is tapped to serve a customer or group of customers, Company may charge the customer or customers for the estimated installed cost of the tap, any regulation equipment, piping, and any other equipment or facilities determined by Company, in its sole discretion, to be necessary to provide such service consistent with good operating practice.

9. In the event Company is required to make a further extension of its mains to serve a customer, Company reserves the right to tap any extension constructed under these rules and to make connections from such additional extensions without application of the refunds referred to in paragraph 4 or 6 above.

10. The title to all extensions herein provided for, together with all necessary rights-of-way, permits and easements, shall be and remain in Company.

11. Company shall not be obligated to make service connections or to extend its gas mains in cases where such extensions or connections, in the sole judgment of Company would be infeasible, impractical, or contrary to good operating practice, or where such extensions are not in accordance with the terms of the applicable rate schedule.

12. A Customer may request the installation of an Excess Flow Valve (EFV) pursuant to Federal Pipeline Hazardous Materials Safety Administration regulation 49 CFR 192.383. All EFV installations requested by Customer shall be at the Customer's sole expense. The Company and Customer shall mutually agree upon the timing of such installation with regard to any necessary permitting that may be required. The Customer requesting the installation of an excess flow valve shall be responsible for the actual total cost of such installation and the Company shall provide Customer with a written estimated cost of such installation prior to performing the installation. A deposit of fifty (50) percent of the estimated cost of installation shall be required prior to the commencement of the installation. The balance of the actual cost of installation shall be due upon completion. N

    The Company shall not be required to install an EFV if one or more of the following conditions is present:

    a. The service line does not operate at a pressure of 10 psig or greater throughout the year;
    b. Company has prior experience with contaminants in the gas stream that could interfere with the excess flow valve's operation or cause loss of service to a customer;
    c. The excess flow valve could interfere with necessary maintenance and operation activities;
    d. An excess flow valve meeting applicable performance standards is not commercially available; or
    e. Gas deliveries on the line exceed 1,000 cubic feet per hour.

## Louisville Gas and Electric Company

**P.S.C. Gas No. 11, Original Sheet No. 107**

**TERMS AND CONDITIONS**

**Gas Service Restrictions**

By Order dated September 5, 1973, in Case Nos. 5829 and 5839, the Public Service Commission of Kentucky authorized Company to incorporate in its gas tariff restrictions on the supply of gas service, occasioned by the inadequacy of gas supplies to meet customer demands. These restrictions have been modified from time to time by tariff filings authorized or approved by the Commission. Uncertainty as to future gas supply makes it necessary that Company continue to exercise control over the addition of gas loads to its system, as set forth in these rules.

1. **GENERAL**. Except as specifically provided in these rules, Company will not (a) initiate service to any new customer, location, or service point; (b) permit any commercial customer (including any governmental agency or institution) or any industrial customer to increase its connected load or to expand its gas requirements in any manner; or (c) permit any customer to change to another rate schedule for the purpose of obtaining a higher priority under Company's Tariff.

2. **NEW CUSTOMERS**. Until further notice, Company will accept applications for gas service to new customers as set forth below. Main extensions will be made in accordance with the Gas Main Extension Rules contained in this Tariff.

   (a) **FOR SERVICE UNDER RATES RGS, VFD, CGS, DGGS, IGS, SGSS, and FT**. Single family dwelling units individually metered. Commercial and industrial customers and multi-family residences served through a single meter. Company will have the right to limit the total connected load to a maximum of 8,000 cubic feet per hour, when in Company's judgment such is necessary in order to enable it to continue to supply reliable service to existing customers. T

   (b) **FOR SERVICE UNDER OTHER RATE SCHEDULES**. Company may undertake to serve new customers with requirements in excess of those allowable under Rates RGS, VFD, CGS, DGGS, IGS, SGSS, and FT when in its judgment actual and potential gas supplies are sufficient to enable it to do so. Company will designate the applicable rate schedule under which such service will be supplied. T

3. **INCREASE IN SERVICE TO EXISTING CUSTOMERS**. Until further notice, Company will, upon application, permit increases in the connected gas load or the gas usage of commercial and industrial customers existing as of the effective date of these rules, as follows:

   (a) **ADDITIONAL SERVICE UNDER RATES RGS, VFD, CGS, DGGS, IGS, SGSS, and FT.** Company will permit the addition of connected gas loads under Rates RGS, VFD, CGS, DGGS, IGS, SGSS, and FT. Company will have the right to limit the total connected load to a maximum of 8,000 cubic feet per hour, when in Company's judgment such is necessary in order to enable it to continue to supply reliable service to existing customers. (b) **ADDITIONAL SERVICE UNDER OTHER RATE SCHEDULES**. Company may undertake to serve existing customers with additional requirements in excess of those allowable under Rates RGS, VFD, CGS, DGGS, IGS, SGSS, and FT when in its judgment actual and potential gas supplies are sufficient to enable it to do so. Company will designate the applicable rate schedule under which such service will be supplied. T

4. **LOAD ADDITIONS TO BE AGGREGATED**. Limitations on new or additional gas loads as specified herein refer to the aggregate of loads added subsequent to the effective date of these rules, and not to individual increments made from time to time.

5. **VOLUMES OF GAS USAGE**. Daily and monthly volumes of gas usage may be established or increased to reflect additions of connected load or increased usage of connected load existing as of the effective date of these rules. For customers subject to curtailment under Company's Curtailment Rules, Monthly Base Period Volumes will be established or adjusted accordingly.

6. **TRANSFERS BETWEEN LOCATIONS**. Company may permit any customer to transfer his own gas entitlement from one location to another; provided, however, that transfers of service cannot be aggregated so as to exceed the limitations on connected load set forth in Paragraphs 2 and 3 above with respect to Rates RGS, VFD, CGS, DGGS, IGS, SGSS, and FT. T

7. **PRIORITY CONSIDERATIONS**. If at any time, Company is required to select among applicants for service as provided for in Paragraphs 2(b) or 3(b) above, it will, to the extent practicable, observe the following priorities in the order named:

   (a) Schools, hospitals and similar institutions.
   (b) Other commercial establishments.
   (c) Industrial process and feedstock uses.
   (d) Other industrial applications.

8. **LAPSE OF APPLICATIONS**. If any applicant for new or increased service under these rules is not ready to take such service within twelve (12) months from the date of application, such application shall be void. Any reapplication shall be subject to Company's rules in effect at the time thereof.

9. Applicants may make application for gas service beyond that provided for in these rules, to be initiated at such time as these rules may be terminated or modified so as to enable Company to provide the service applied for. Company will file such applications in the order of receipt and dispose of them as circumstances dictate.

## Louisville Gas and Electric Company

**TERMS AND CONDITIONS**

**Curtailment Rules**

These rules are established to govern Company's available supply of gas to sales and transportation customers during periods of shortage or substantial reduction in the gas available to Company. These rules are designed to provide for curtailment or discontinuance of service made necessary by a deficiency in gas supply, capacity, or unforeseen emergency circumstances. These rules are designed to enable Company to continue to supply reliable gas service for residential and other human welfare purposes. These rules shall apply and continue in effect until lawfully modified or superseded under the regulatory jurisdiction of the Public Service Commission of Kentucky.

1. **DEFINITIONS** (for purposes of these Rules).

   **COMMERCIAL CUSTOMERS**: Customers engaged primarily in the sale of goods or services, including institutions and local, state and Federal governmental agencies, for uses other than those involving manufacturing as further described in Rate CGS.

   **HUMAN NEEDS**: Residential and other customers whose facilities are used for residential dwellings on either a permanent or temporary basis or a facility providing critical emergency services (including, but not limited to, apartment buildings, correctional institutions, hospitals, nursing homes, assisted living facilities, hotels, motels, fire department stations, police stations, national guard facilities, and emergency response agency facilities).

   **INDUSTRIAL CUSTOMERS**: Customers engaged primarily in a process or processes which create or change raw or unfinished materials into another form or product, including, but not limited to, the generation of electric power as further described in Rate IGS and Rate DGGS.

   **SMALL INDUSTRIAL CUSTOMER**: Any industrial customer whose aggregate of twelve Monthly Base Period Volumes is 10,000 Mcf or less.

   **LARGE INDUSTRIAL CUSTOMER**: Any industrial customer whose aggregate of twelve Monthly Base Period Volumes exceeds 10,000 Mcf.

   **PILOT LIGHT REQUIREMENTS**: Gas used on either a continuous or intermittent basis only for the ignition of the fuel in the main burner; does not include any gas used to preheat or atomize solid or liquid fuels.

   **BASE PERIOD**: The twelve (12) months ending on the October 31 preceding the calendar year which is the subject of the implementation of any curtailments hereunder.

1. **DEFINITIONS** (for purposes of these Rules).

   **COMMERCIAL CUSTOMERS**: Customers engaged primarily in the sale of goods or services, including institutions and local, state and Federal governmental agencies, for uses other than those involving manufacturing as further described in Rate CGS.

   **HUMAN NEEDS**: Residential and other customers whose facilities are used for residential dwellings on either a permanent or temporary basis or a facility providing critical emergency services (including, but not limited to, apartment buildings, correctional institutions, hospitals, nursing homes, assisted living facilities, hotels, motels, fire department stations, police stations, national guard facilities, and emergency response agency facilities).

   **INDUSTRIAL CUSTOMERS**: Customers engaged primarily in a process or processes which create or change raw or unfinished materials into another form or product, including, but not limited to, the generation of electric power as further described in Rate IGS and Rate DGGS.

   **SMALL INDUSTRIAL CUSTOMER**: Any industrial customer whose aggregate of twelve Monthly Base Period Volumes is 10,000 Mcf or less.

   **LARGE INDUSTRIAL CUSTOMER**: Any industrial customer whose aggregate of twelve Monthly Base Period Volumes exceeds 10,000 Mcf.

   **PILOT LIGHT REQUIREMENTS**: Gas used on either a continuous or intermittent basis only for the ignition of the fuel in the main burner; does not include any gas used to preheat or atomize solid or liquid fuels.

   **BASE PERIOD**: The twelve (12) months ending on the October 31 preceding the calendar year which is the subject of the implementation of any curtailments hereunder.

**DATE OF ISSUE:** September 28, 2018

## Louisville Gas and Electric Company

P.S.C. Gas No. 11, Original Sheet No. 108.1

TERMS AND CONDITIONS

**Curtailment Rules**

**MONTHLY BASE PERIOD VOLUMES**: Monthly volumes assigned to each customer determined from its gas consumption (including sales and transportation volumes) during the Base Period.

**AUTHORIZED MONTHLY VOLUME**: The volume of gas authorized to be taken during a month and determined by deducting from the Monthly Base Period Volume the curtailment amount applicable for the month.

Some customers may have usage falling within more than one (1) of the above categories; as such, these customers may be required to segregate their total usage accordingly.

2. **COMBINATION OF AUTHORIZED MONTHLY VOLUMES**. Subject to a written application by a customer and acceptance thereof by Company, Company may permit any customer served through more than one point of delivery at any location, or any person, corporation or entity served with gas at more than one location, to take gas through the points or at the locations of its choosing, provided that the gas so taken will not exceed the combined Authorized Monthly Volumes applicable to such points of delivery, and provided that only volumes purchased under rate schedules subject to Pro-Rata Curtailment may be so combined. Gas taken through each individual point of delivery will be billed at the rate applicable to such point of delivery.

The right to combine Authorized Monthly Volumes as herein described is limited to individual customers or individual persons, corporations or entities and such right will not extend to similar combinations between or among unrelated customers. Nor shall such combinations be employed by any customer for the purpose of obtaining a lower overall cost of gas.

Provided, however, in the case of Industrial Customers provided with sales service under Rate IGS or Special Contracts, which have requested and received approval to combine Authorized Monthly Volumes, Monthly Base Period Volumes for such combined Industrial Customers must aggregate to not less than 10,000 Mcf for a twelve-month period and such combination shall be treated as a Large Industrial Customer for the purpose of implementing either Pro-Rata or Emergency Curtailment.

For the purpose of assessment of penalties, the point of delivery will be considered on a combined basis, so that the actual combined takes will be measured against combined Authorized Monthly Volumes. It will be the responsibility of any applicant for this treatment to advise Company in writing as to the party or entity to be held accountable for the payment of such penalty.

**TERMS AND CONDITIONS**

**Curtailment Rules**

3. **PRO-RATA CURTAILMENT**. In order to meet seasonal and daily sendout requirements, to preserve underground storage deliverability, and to provide for adequate and timely underground storage injections, Company will implement pro-rata curtailment with respect to the classes of customers here listed:

   (a) All customers served under Rate AAGS.
   (b) Large Industrial Customers provided with sales service under Rate IGS, Rate SGSS, or Special Contracts. T

   Company will assign Monthly Base Period Volumes to each customer in the above two classes. Except in the case of an Emergency Curtailment, Company will provide as much notice as practicable to each of these customers that curtailment is being implemented. Such notice will include the percentage curtailment applicable to customer's Monthly Base Period Volume and the Authorized Monthly Volume such customer is authorized to take during said billing period.

   Except in the case of Emergency Curtailment, such Pro-Rata Curtailment may only be implemented after Company issues an Operational Flow Order to customers served under Rate FT and takes similar actions applicable to transportation customers served under Special Contracts.

   During each month, Pro-Rata Curtailment will be first applied to Rate AAGS customers until such curtailment reaches 100% of Monthly Base Period Volumes (allowing, however, for continuation of Pilot Light Requirements used in connection with alternate fuels). When Rate AAGS customers are 100% curtailed, any additional curtailment required will be apportioned at a uniform percentage to other customers subject to pro-rata curtailment under this Section 3.

4. **EMERGENCY CURTAILMENT**. In the event of an emergency, Company will initiate the following actions, individually or in combination, in the order necessary as time permits so that service may continue to be supplied for residential and other human health, safety and welfare needs.

   (1) Issue Operational Flow Orders to customers served under Rate FT, and take similar actions applicable to transportation customers served under Special Contracts. Customers that fail to comply with Operational Flow Orders will be required to discontinue the use of natural gas.

   (2) Issue Action Alerts to Pool Managers under Rider PS-TS-2 serving customers under Rider TS-2, and take similar actions applicable to transportation customers served under Special Contracts. Customers of Pool Managers that fail to comply with Action Alerts may be required to terminate service under Rider PS-TS-2 and Rider TS-2 and return to firm sales service.

## CERTIFICATE OF NOTICE

Pursuant to the Kentucky Public Service Commission's Regulation 807 KAR 5:001, Section 16(1)(b)(5), I hereby certify that I am Robert M. Conroy, Vice President, State Regulation and Rates, for Louisville Gas and Electric Company ("LG&E" or "Company"), a utility furnishing retail electric and gas service within the Commonwealth of Kentucky, which, on the 28th day of September, 2018, filed an application with the Kentucky Public Service Commission for the approval of an adjustment of the electric and gas rates, terms, conditions and tariffs of LG&E, and that notice to the public of the filing of the application is being given in all respects as required by the Commission's Order in Case No. 2018-00250,[1] as follows:

I certify that more than twenty (20) customers will be affected by said change by way of an increase in their rates or charges, and that on the 19th day of September, 2018, there was delivered to the Kentucky Press Association, an agency that acts on behalf of newspapers of general circulation throughout the Commonwealth of Kentucky in which customers affected reside, for publication therein once a week for three consecutive weeks beginning the week ending September 28, 2018, an abbreviated notice in conformity with the

---

[1] *In the Matter of: Application of Kentucky Utilities Company and Louisville Gas and Electric Company for an Order Establishing the Form of Notice and Number of Copies of Certain Documents to be Filed in Support of their Upcoming Applications for Rate Adjustment*, Case No. 2018-00250, Order (Ky. PSC Aug 31, 2018).

Commission's Order of August 31, 2018, in Case No. 2018-00250 of the filing of LG&E's application. A copy of said notice is attached hereto as Exhibit A. A list of newspapers of general circulation throughout the Commonwealth of Kentucky in which LG&E's customers affected reside is attached hereto as Exhibit B. A certificate of publication of said notice will be furnished to the Kentucky Public Service Commission upon completion pursuant to 807 KAR 5:001, Section 17(3)(b).

On the 24th day of September, 2018, the full customer notice to the public, a copy of which is attached hereto as Exhibit C, was delivered for exhibition and public inspection at 820 West Broadway, Louisville, KY 40202 and will be kept open to public inspection at said office in conformity with the Commission's Order in Case No. 2018-00250. Also in accordance with that Order, on the 21st day of September, 2018, LG&E sent by certified mail to each public library, located within LG&E's service territory a copy of the full customer notice and a request to post it in a public location. A list of those libraries is attached hereto as Exhibit D.

Also beginning on 24th day of September, 2018, LG&E posted on its website a copy of the full customer notice that 807 KAR 5:001, Section 17 requires and a hyperlink to the location on the Kentucky Public Service Commission's website where the case documents and tariff filings are available. Beginning on 28th day of September, 2018, LG&E posted on its website a complete copy of LG&E's application in this case. LG&E's Application filed with the Commission on the 28th day of September, 2018, includes the customer notice as a separate document labeled "Customer Notice of Rate Adjustment."

In addition, beginning on the 19th day of September, 2018, LG&E issued press advisories to all known news media organizations who cover the areas within its certified territory advising of the filing of its application and including a hyperlink to the location on LG&E’s and the Commission's websites where case documents and tariff filings will be available.

Beginning on 28th day of September, 2018, LG&E began including a general statement explaining the application in this case with the bills for all Kentucky retail customers during the course of their regular monthly billing cycle. An accurate copy of this general statement is attached as Exhibit E. Both the notice being published in newspapers and the bill inserts being sent to customers include the web address to the online posting.

Also beginning on 28th day of September, 2018, LG&E provided notice by certified mail to special contract customers and state, local, and federal governmental units and educational institutions, such as public and private colleges eligible to affix attachments to Company structures.

Given under my hand this 28th day of September, 2018.

Robert M. Conroy
Vice President, State Regulation and Rates
LG&E and KU Services Company
220 West Main Street
Louisville, Kentucky 40202

| Basic Service Charge per Month: | $16.35 per delivery point | |
| Basic Service Charge per Day: | | $0.65 per delivery point |
| Plus a Charge Per 100 Cubic Feet: | | |
| Distribution Charge | $ 0.36300 | $0.39076 |
| Gas Supply Cost Component | 0.41446 | $0.41446 |
| Total Gas Charge Per 100 Cubic Feet | $ 0.77746 | $0.80522 |

LG&E is also proposing changes to the rates for other customer classes. These customer classes and the changes in their associated annual revenue changes are listed in the tables shown below. LG&E is also proposing changes in the text of some of its rate schedules and other tariff provisions, including substantive changes in its terms and conditions for electric or gas service and miscellaneous charges, as well as adding a Standard Facility Contribution Rider for gas service. LG&E's proposed rates reflect a proposed annual increase in electric revenues of approximately 3.09% and gas revenues of approximately 7.57% to LG&E.

The estimated amount of the annual change and the average monthly bill to which the proposed electric rates will apply for each electric customer class are as follows:

| **Electric Rate Class** | **Average Usage (kWh)** | **Annual $ Increase** | **Annual % Increase** | **Monthly Bill $ Increase** | **Monthly Bill % Increase** |
|---|---|---|---|---|---|
| Residential | 917 | 18,795,252 | 4.09 | 4.23 | 4.09 |
| Residential Time-of-Day Energy | 1,077 | 3,838 | 4.06 | 4.35 | 4.06 |
| General Service | 2,322 | 4,410,485 | 2.66 | 8.00 | 2.66 |
| Power Service | 52,002 | 4,723,825 | 2.65 | 133.13 | 2.65 |
| Time-of-Day Secondary | 227,989 | 2,031,137 | 2.08 | 389.55 | 2.08 |
| Time-of-Day Primary | 1,326,570 | 3,100,289 | 2.10 | 2,015.79 | 2.10 |
| Retail Transmission | 6,770,655 | 1,426,166 | 2.11 | 9,142.08 | 2.11 |
| Fluctuating Load | No Customers are currently served under this Rate Schedule | | | | |
| Outdoor Lights | 94 | 636,550 | 2.66 | 0.60 | 2.70 |
| Lighting Energy | 1,942 | 0.00 | 0.00 | 0.00 | 0.00 |
| Traffic Energy | 284 | (6.00) | 0.00 | 0.00 | 0.00 |
| PSA | N/A | 0.00 | 0.00 | 0.00 | 0.00 |
| Rider – CSR | N/A | 0.00 | 0.00 | 0.00 | 0.00 |
| Outdoor Sports Lighting – Pilot Program | 2,000 | 272 | 2.66 | 23.00 | 2.66 |

The estimated amount of the annual change and the average monthly bill to which the proposed gas rates will apply for each gas customer class is as follows:

| **Gas Rate Class** | **Average Usage (Mcf)** | **Annual $ Increase** | **Annual % Increase** | **Mthly Bill $ Increase** | **Mthly Bill % Increase** |
|---|---|---|---|---|---|
| Residential | 5.4 | 17,691,740 | 8.12 | 4.93 | 8.12 |
| Commercial | 33.1 | 7,347,663 | 8.12 | 24.42 | 8.12 |
| Industrial | 596.7 | (74.00) | 0.00 | (0.02) | 0.00 |
| As-Available | 3,598.4 | 0.00 | 0.00 | 0.00 | 0.00 |
| Firm Transportation | 14,385.0 | (85.00) | 0.00 | (0.09) | 0.00 |
| Distributed Generation | 0.4 | 0.00 | 0.00 | 0.00 | 0.00 |
| Substitute Gas Sales | 124.8 | 3,528 | 8.12 | 293.98 | 8.12 |
| Local Gas Delivery | No Customers are currently served under this Rate Schedule | | | | |

The monthly residential electric bill increase due to the proposed electric base rates will be 4.1 percent, or approximately $4.23, for a customer using 917 kWh of electricity (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential electric bill increase will be 7.5%, or approximately $7.53, for a customer using 917 kWh of electricity.

The monthly residential gas bill increase due to the proposed gas base rates will be 8.1 percent, or approximately $4.93, for a customer using 54 ccf of gas (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential gas bill increase will be 12.2%, or approximately $7.14, for a customer using 54 ccf of gas.

LG&E is proposing numerous revisions to the rates, terms and conditions for service under for Pole and Structure Attachment Charges – Rate PSA, including expanding the availability of the schedule to internal communication network facilities of governmental units and educational institutions. If approved, the rates terms and conditions for attaching communication network facilities of such governmental units and educational institutions will be subject to Rate Schedule PSA.

**Other Charges**

LG&E is proposing the following revisions to other charges in its Electric tariff:

| **Other Charges** | **Current Charge** | **Proposed Charge** |
|---|---|---|
| Returned Payment Charge | $10.00 | $3.00 |
| Meter Pulse Charge | $15.00 | $25.00 |
| Redundant Capacity - Secondary | $1.59 | $1.84 |
| Redundant Capacity - Primary | $1.44 | $1.41 |
| EVSE – Single Charger | $180.50 | $135.83 |
| EVSE – Dual Charger | $302.13 | $198.85 |
| EVSE-R – Single Charger | $132.00 | $125.14 |
| EVSE-R – Dual Charger | $205.15 | $177.49 |
| EVC – Charge per Hour for First Two Hours | $2.86 | $0.75 |
| EVC – Charge per Hour for Every Hour After First Two Hours | $2.86 | $1.00 |
| Solar Share Program Rider | $6.27 | $5.68 |
| Excess Facilities – w/ no CIAC | 1.32% | 1.26% |
| Excess Facilities – w/ CIAC | 0.54% | 0.53% |
| TS – Temporary-to-Permanent | 100% | 15% |
| TS – Seasonal | 100% | 100% |

LG&E is proposing the following revisions to other charges in its Gas tariff:

| **Other Charges** | **Current Charge** | **Proposed Charge** |
|---|---|---|
| Returned Payment Charge | $10.00 | $3.00 |
| Daily Storage Charge for Daily Imbalances (TS-1 and LGDS) | $0.2785 | $0.3797 |
| Excess Facilities – w/ no CIAC | 1.24% | 1.19% |
| Excess Facilities – w/ CIAC | 0.47% | 0.46% |

A detailed notice of all proposed revisions and a complete copy of the proposed tariffs containing the proposed text changes, terms and conditions for electric or gas service and rates may be obtained by submitting a written request by e-mail to myaccount@lge-ku.com or by mail to Louisville Gas and Electric Company, ATTN: Rates Department, 220 West Main Street, Louisville, Kentucky, 40202, or by visiting LG&E's website at www.lge-ku.com. A copy of the full customer notice required by 807 KAR 5:001 Section 17 is posted and may be viewed in each public library located within LG&E's service territory or at the offices of LG&E located at 820 West Broadway, Louisville, Kentucky.

A person may examine LG&E's application at the offices of LG&E located at 820 West Broadway, Louisville, Kentucky, and at LG&E's website at www.lge-ku.com. A person may also examine this application at the Public Service Commission's offices located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or may view and download the through the Commission's Web site at http://psc.ky.gov.

Comments regarding the application may be submitted to the Public Service Commission by mail to Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, or by sending an email to the Commission's Public Information Officer at psc.info@ky.gov. All comments should reference Case No. 2018-00295.

The rates contained in this notice are the rates proposed by LG&E, but the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice. A person may submit a timely written request for intervention to the Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, establishing the grounds for the request including the status and interest of the party. If the commission does not receive a written request for intervention within thirty (30) days of initial publication or mailing of the notice, the commission may take final action on the application.

**CUSTOMER NOTICE OF RATE ADJUSTMENT**

Notice is hereby given that, in a September 28, 2018, Application, Louisville Gas and Electric Company is seeking approval by the Kentucky Public Service Commission, Frankfort, Kentucky of an adjustment of electric and gas rates and charges proposed to become effective on and after November 1, 2018.

## LG&E CURRENT AND PROPOSED ELECTRIC RATES

### Residential Service - Rate RS

**Rate:**

| | Current | Proposed |
|---|---|---|
| Basic Service Charge per Month: | $12.25 | |
| Basic Service Charge per Day: | | $0.53 |
| Plus an Energy Charge per kWh: | $0.09382 | |
| Infrastructure | | $0.06214 |
| Variable | | $0.03206 |
| Total | | $0.09420 |

**Adjustment Clauses:**

**Current**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Demand Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Tax Cuts and Jobs Act Surcredit | Sheet No. 89 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee Rider | Sheet No. 90 |
| School Tax | Sheet No. 91 |
| Home Energy Assistance Program | Sheet No. 92 |

**Proposed**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Demand-Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Home Energy Assistance Program | Sheet No. 92 |
| Franchise Fee | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Late Payment Charge**:

**Current**

If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month's charges. Beginning October 1, 2010, residential Customers who receive a pledge for or notice of low income energy assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which the pledge or notice is received, nor will they be assessed or required to pay a late payment charge in any of the eleven (11) months following receipt of such pledge or notice.

**Proposed**
If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month's charges. Residential Customers who receive a pledge for or notice of low income energy assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which the pledge or notice is received, nor will they be assessed or required to pay a late payment charge in any of the eleven (11) months following receipt of such pledge or notice.
Beginning May 1, 2019, Residential Service Customers in good standing by not having been assessed a Late Payment Charge for the previous eleven (11) months have the option of waiving one (1) late payment charge upon request. This option may only be used once every twelve (12) months as long as the Customer remains in good standing.

## Residential Time-of-Day Energy Service - Rate RTOD-Energy

**Rate:**

| | Current | Proposed |
|---|---|---|
| Basic Service Charge per Month: | $12.25 | |
| Basic Service Charge per Day: | | $ 0.53 |
| Plus an Energy Charge per kWh: | | |
| Off-Peak Hours | $0.06882 | |
| Off-Peak Hours (Infrastructure): | | $ 0.03676 |
| Off-Peak Hours (Variable): | | $ 0.03206 |
| Off-Peak Hours (Total): | | $ 0.06882 |
| On-Peak Hours | $0.23483 | |
| On-Peak Hours (Infrastructure): | | $ 0.20852 |
| On-Peak Hours (Variable): | | $ 0.03206 |
| On-Peak Hours (Total): | | $ 0.24058 |

**Adjustment Clauses:**
**Current**
The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Demand Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Tax Cuts and Jobs Act Surcredit | Sheet No. 89 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee Rider | Sheet No. 90 |
| School Tax | Sheet No. 91 |
| Home Energy Assistance Program | Sheet No. 92 |

**Proposed**
The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Demand-Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Home Energy Assistance Program | Sheet No. 92 |
| Franchise Fee | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Rating Periods:**

**Current**

Pricing periods are established in Eastern Standard Time year round by season for weekdays and weekends. The hours of the pricing periods for the price levels are as follows:

Summer Months of April through October

| | Off-Peak | On-Peak |
|---|---|---|
| Weekdays | 5 PM - 1 PM | 1 PM - 5 PM |
| Weekends | All Hours | |

All Other Months of November continuously through March

| | Off-Peak | On-Peak |
|---|---|---|
| Weekdays | 11 AM - 7 AM | 7 AM - 11 AM |
| Weekends | All Hours | |

**Proposed**

The rating periods are established in Eastern Standard Time year-round by season for weekdays and weekends throughout Company's service territory, and shall be as follows:

Summer Months of April through October

| | Off-Peak | On-Peak |
|---|---|---|
| Weekdays | 5 PM - 1 PM | 1 PM - 5 PM |
| Weekends | All Hours | |

All Other Months of November continuously through March

| | Off-Peak | On-Peak |
|---|---|---|
| Weekdays | 11 AM - 7 AM | 7 AM - 11 AM |
| Weekends | All Hours | |

If a legal holiday falls on a weekday, it will be considered a weekday.

**Late Payment Charge**:

**Current**

If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month's charges.

**Proposed**

If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month's charges.

Beginning May 1, 2019, RTOD-Energy Customers in good standing by not having been assessed a Late Payment Charge for the previous eleven (11) months have the option of waiving one (1) late payment charge upon request. This option may only be used once every twelve (12) months as long as the Customer remains in good standing.

## Residential Time-of-Day Demand Service - Rate RTOD-Demand

**Rate:**

**Current**

| | |
|---|---|
| Basic Service Charge per Month: | $12.25 |
| Plus an Energy Charge per kWh: | $ 0.05183 |
| Plus a Demand Charge per kW: | |
| Base Hours | $ 3.51 |
| Peak Hours | $ 7.68 |

| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Demand Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Tax Cuts and Jobs Act Surcredit | Sheet No. 89 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee Rider | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Proposed**
The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Demand-Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee | Sheet No. 90 |
| School Tax | Sheet No. 91 |

## General Service - Rate GS

**Rate:**

| **Single Phase** | **Current** | **Proposed** |
|---|---|---|
| Basic Service Charge per Month | $31.50 | |
| Basic Service Charge per Day: | | $ 1.04 |
| Plus an Energy Charge per kWh | $0.10297 | |
| Infrastructure | | $0.07354 |
| Variable | | $0.03283 |
| Total | | $0.10637 |
| **Three Phase** | | |
| Basic Service Charge per Month | $50.40 | |
| Basic Service Charge per Day: | | $1.66 |
| Plus an Energy Charge per kWh | $0.10297 | |
| Infrastructure | | $0.07354 |
| Variable | | $0.03283 |
| Total | | $0.10637 |

**Adjustment Clauses:**

**Current**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Demand Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Tax Cuts and Jobs Act Surcredit | Sheet No. 89 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee Rider | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Proposed**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Demand-Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee | Sheet No. 90 |
| School Tax | Sheet No. 91 |

## Power Service – Rate PS

**Rate:**

| **Secondary Service** | **Current** | **Proposed** |
|---|---|---|
| Basic Service Charge per Month | $90.00 | |
| Basic Service Charge per Day | | $2.96 |
| Plus an Energy Charge per kWh | $0.03756 | $0.03306 |
| Plus a Demand Charge per kW per month of billing demand | | |
| Summer Rate (May through September) | $22.04 | $24.80 |
| Winter Rate (All Other Months) | $19.39 | $21.83 |

| **Primary Service** | **Current** | **Proposed** |
|---|---|---|
| Basic Service Charge per Month | $240.00 | |
| Basic Service Charge per Day | | $7.89 |
| Plus an Energy Charge per kWh | $0.03609 | $0.03223 |
| Plus a Demand Charge per kW per month of billing demand | | |
| Summer Rate (May through September) | $19.38 | $21.89 |
| Winter Rate (All Other Months) | $16.86 | $19.04 |

**Adjustment Clauses:**

**Current**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Demand Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Tax Cuts and Jobs Act Surcredit | Sheet No. 89 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee Rider | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Proposed**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Demand-Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee | Sheet No. 90 |
| School Tax | Sheet No. 91 |

## Time-of-Day Secondary Service Rate TODS

**Availability:**

**Current**

This schedule is available for secondary service. Service under this schedule will be limited to customers whose 12-month-average monthly minimum loads exceed 250 kW and whose 12-month-average monthly maximum loads do not exceed 5,000 kW.

**Proposed**

Available for secondary service to Customers whose twelve (12) month-average monthly minimum loads exceed 250 kVA, and whose twelve (12) month-average monthly maximum loads do not exceed 5,000 kVA.

**Rate:**

| | **Current** | **Proposed** |
|---|---|---|
| Basic Service Charge per Month | $200.00 | |
| Basic Service Charge per Day | | $6.58 |
| Plus an Energy Charge per kWh | $0.03734 | $0.03263 |
| Plus a Maximum Load Charge per kW per month | | |
| Peak Demand Period | $7.30 | |
| Intermediate Demand Period | $5.51 | |
| Base Demand Period | $5.21 | |

Plus a Maximum Load Charge per kVA per month

| | |
|---|---|
| Peak Demand Period | $8.91 |
| Intermediate Demand Period | $6.74 |
| Base Demand Period | $3.61 |

**<u>Current</u>**

Where:

the monthly billing demand for the Peak and Intermediate Demand Periods is the greater of:

a) the maximum measured load in the current billing period, or

b) a minimum of 50% of the highest measured load in the preceding eleven (11) monthly billing periods, and

the monthly billing demand for the Base Demand Period is the greater of:

a) the maximum measured load in the current billing period but not less than 250 kW, or

b) the highest measured load in the preceding eleven (11) monthly billing periods, or

c) the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.

**<u>Proposed</u>**

Where:

the monthly billing demand for the Peak and Intermediate Demand Periods is the greater of:

1. the maximum measured load in the current billing period, or
2. a minimum of 50% of the highest measured load in the preceding eleven (11) monthly billing periods, and

the monthly billing demand for the Base Demand Period is the greater of:

1. the maximum measured load in the current billing period but not less than 250 kVA, or
2. the highest measured load in the preceding eleven (11) monthly billing periods, or
3. the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.

**Adjustment Clauses:**

**<u>Current</u>**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |

**Rating Periods:**
**<u>Current</u>**
The rating periods applicable to the Maximum Load charges are established in Eastern Standard Time year-round by season for weekdays and weekends throughout Company's service area, and shall be as follows:

<u>Summer peak months of May through September</u>

| | Base | Intermediate | Peak |
|---|---|---|---|
| Weekdays | All Hours | 10 A.M. – 10 P.M. | 1 P.M. – 7 P.M. |
| Weekends | All Hours | | |

<u>All other months of October continuously through April</u>

| | Base | Intermediate | Peak |
|---|---|---|---|
| Weekdays | All Hours | 6 A.M. – 10 P.M. | 6 A.M. – 12 Noon |
| Weekends | All Hours | | |

**<u>Proposed</u>**
The rating periods applicable to the Maximum Load charges are established in Eastern Standard Time year-round by season for weekdays and weekends throughout Company's service area, and shall be as follows:

<u>Summer peak months of May through September</u>

| | Base | Intermediate | Peak |
|---|---|---|---|
| Weekdays | All Hours | 10 A.M. – 10 P.M. | 1 P.M. – 7 P.M. |
| Weekends | All Hours | | |

<u>All other months of October continuously through April</u>

| | Base | Intermediate | Peak |
|---|---|---|---|
| Weekdays | All Hours | 6 A.M. – 10 P.M. | 6 A.M. – 12 Noon |
| Weekends | All Hours | | |

If a legal holiday falls on a weekday, it will be considered a weekday.

**Determination of Maximum Load:**
**<u>Current</u>**
The load will be measured and will be the average kW demand delivered to the customer during the 15-minute period of maximum use during the appropriate rating period each month. Company reserves the right to place a kVA meter and base the billing demand on the measured kVA. The charge will be computed based on the measured kVA times 90 percent, at the applicable kW charge.
In lieu of placing a kVA meter, Company may adjust the measured maximum load for billing purposes when the power factor is less than 90 percent in accordance with the following formula: (BASED ON POWER FACTOR MEASURED AT THE TIME OF MAXIMUM LOAD)

$$\text{Adjusted Maximum kW Load for Billing Purposes} = \frac{\text{Maximum kW Load Measured x 90\%}}{\text{Power Factor (in percent)}}$$

**<u>Proposed</u>**
The load will be measured and will be the average kVA demand delivered to Customer during the 15-minute period of maximum use during the appropriate rating period each month.

**<u>Time-of-Day Primary Service Rate TODP</u>**

**Rate:**

| | **<u>Current</u>** | **<u>Proposed</u>** |

**Terms and Conditions:**
**Current**
6. If Customer requests the removal of an existing lighting system, including, but not limited to, fixtures, poles, or other supporting facilities that were in service less than twenty years, and requests installation of replacement lighting within 5 years of removal, Customer agrees to pay to Company its cost of labor to install the replacement facilities.
7. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.

**Proposed**
6. If Customer requests the removal of an existing lighting system, including, but not limited to, fixtures, poles, or other supporting facilities, Customer agrees to pay to Company its cost of labor to remove existing facilities. Customer will be required to pay Conversion Fee if Customer requests installation of LED replacement within five (5) years.
7. Temporary suspension of lighting service is not permitted. Upon permanent discontinuance of service, lighting units and other supporting facilities solely associated with providing service under this tariff, except underground facilities and pedestals, will be removed.
8. Should Customer request underground service, Customer shall make a non-refundable cash contribution prior to the time of installation, or, at the option of Company, make a work contribution to Company for the difference in the installed cost of the system requested and the cost of the overhead lighting system.
Where the location of existing poles is not suitable or where there are no existing poles for mounting of lights, and Customer requests service under these conditions, Company may furnish the requested facilities at an additional charge to be determined under the Excess Facilities Rider.

## Traffic Energy Service – Rate TE

**Availability of Service:**

**Current**
Available to municipalities, county governments, divisions of the state or Federal governments or any other governmental agency for service on a 24 hour all day every day basis, where the governmental agency owns and maintains all equipment on its side of the point of delivery of the energy supplied hereunder. In the application of this rate each point of delivery will be considered as a separate customer.
This service is limited to traffic control devices including, but not limited to, signals, cameras, or other traffic lights, electronic communication devices, and emergency sirens.

## <u>Pole and Structure Attachment Charges, Terms and Conditions – Rate PSA</u>

**Attachment Charges:**
**<u>Current</u>**
$7.25 per year for each wireline pole attachment.
$0.81 per year for each linear foot of duct.
$36.25 per year for each Wireless Facility located on the top of a Company pole.
**<u>Proposed</u>**
$7.25 per year for each wireline pole attachment.
$0.81 per year for each linear foot of duct.
$36.25 per year for each Wireless Facility located on the top of a Company pole.

**<u>Revisions to Terms and Conditions:</u>**
1) Availability

Expands the types of entities eligible to affix attachments to Company structures to include state, local and federal governmental units and educational institutions, such as public and private colleges. Provides that current license agreements with governmental units or educational institutions to permit attachment will continue in effect until their expiration date, at which time the attachments will be subject to the PSA Rate Schedule.

2) Penalties

Establishes a penalty of $25 per unauthorized attachment in addition to the assessment of two years of attachment fees. Currently an attachment customer is assessed two years of attachment fees ($14.50) for each unauthorized attachment.

Establishes a penalty for failing to correct an attachment installation that fails to conform to the standards of the National Electrical Safety Code ("NESC"). This penalty is equal to 50% of the Company's actual cost to correct the non-compliant installation and may be imposed only if an attachment customer fails to properly install an attachment and, after receiving notice of the non-compliant installation, fails to correct that installation within the prescribed time.

3) Self-performing Make Ready Work

Requires an attachment customer to notify the Company one week before the start of make-ready supply space work and to reimburse the Company for the cost of a Company inspector to accompany the attachment customer's overhead electric crews. Notice of such work is not currently required.

4) Definition of "Attachment"

Revises definition of attachment to clarify that multiple attachments located within one foot of usable space will not be considered a single attachment and will be in violation of NESC and Company standards.

5) Unauthorized attachments

Establishes that an attachment is an "unauthorized attachment" if (1) a new attachment is made prior to completion of all necessary communications space make-ready, including the transfer of existing attachments to a new pole, or (2) an overlash is made without required advanced notice.

6) Unidentified attachments

Requires reimbursement of the Company's costs to identify the owner of an untagged attachment when the Company must relocate or remove an untagged attachment or otherwise contact the attachment's owner and the attachment owner cannot be readily identified. Provides that the time period in which the owner of an untagged attachment must take corrective action regarding its attachment begins upon the date on which the Company determines that corrective action on the untagged attachment is required.

7) Attachment Audit/Inventory

Requires an attachment customer to bear the cost of periodic attachment audits and inventories.

8) Insurance

Revises required insurance coverage levels and the eligibility requirements for self-insurance.

9) Surety bond

Modifies surety bond requirements to provide a fixed surety requirement based solely upon the number of attachments. Current requirements vary with the stage of construction of the attachment and the length of time that the attachment has been attached.

**Electric Vehicle Supply Equipment – Rate EVSE**

| | Current | Proposed |
|---|---|---|

## <u>Electric Vehicle Charging – Rate EVC</u>

**Availability:**
**<u>Current</u>**
Available to operators of licensed electric vehicles (EV). EV Customer is defined as the party who owns/operates a licensed electric vehicle, connects that vehicle for the purpose of receiving vehicle charging service to a Company-owned charging station providing service under this schedule, and willingly accepts the Company's fee structure for the vehicle charging service. EVC is offered under the conditions set out hereinafter for the purpose of charging EVs via street parking, parking lots, and other outdoor areas. EV Customers' charging systems must meet applicable charging standards.
Company assumes no liability or responsibility for any potential automotive-related incidents that occur at specific charging locations. EV Customer accepts all restrictions related to the temporary parking space.

## Special Charges

**Returned Payment Charge**

| | |
|---|---|
| **Current Rate** | $10.00 |
| **Proposed Rate** | $ 3.00 |

**Meter Test Charge**

| | |
|---|---|
| **Current Rate** | $75.00 |
| **Proposed Rate** | $75.00 |

**Disconnecting and Reconnecting Service Charge**

| | |
|---|---|
| **Current Rate** | $28.00 |
| **Proposed Rate** | $28.00 |

**Meter Pulse Charge**

**Current Rate**
$15.00 per month per installed set of pulse-generating equipment
**Proposed Rate**
$25.00 per month per installed set of pulse-generating equipment

**Unauthorized Reconnect Charge:**
**Current**
When the Company determines that Customer has tampered with a meter, reconnected service without authorization from Company that previously had been disconnected by Company, or connected service without authorization from Company, then the following charges shall be assessed for each instance of such tampering or unauthorized reconnection or connection of service:

1. A charge of $70.00 for tampering or an unauthorized connection or reconnection that does not require the replacement of the meter;
2. A charge of $90.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a single-phase standard meter;
3. A charge of $110.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a single-phase Automatic Meter Reading (AMR) meter;

4.A charge of $174.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a single-phase Automatic Meter System (AMS) meter; or
5.A charge of $177.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a three-phase meter.

**Proposed**

When the Company determines that Customer has tampered with a meter, reconnected service without authorization from Company that previously had been disconnected by Company, or connected service without authorization from Company, then the following charges shall be assessed for each instance of such tampering or unauthorized reconnection or connection of service:
(1) A charge of $70.00 for tampering or an unauthorized connection or reconnection that does not require the replacement of the meter;
(2) A charge of $90.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a single-phase standard meter;
(3) A charge of $110.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a single-phase Automatic Meter Reading (AMR) meter;
(4) A charge of $174.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a single-phase Advanced Metering System (AMS) meter; or
(5) A charge of $177.00 for tampering or an unauthorized connection or reconnection that requires the replacement of a three-phase meter.

## Curtailable Service Rider-1 – CSR-1

**Rate:**

| **Primary** | **Current** | **Proposed** |
|---|---|---|
| Monthly Demand Credit Per kVA: | $3.67 | $3.67 |
| Non-Compliance Charge Per kVA: | $16.00 | $16.00 |
| **Transmission** | **Current** | **Proposed** |
| Monthly Demand Credit Per kVA: | $3.56 | $3.56 |
| Non-Compliance Charge Per kVA: | $16.00 | $16.00 |

## Curtailable Service Rider-2 – CSR-2

**Rate:**

| **Primary** | **Current** | **Proposed** |
|---|---|---|
| Monthly Demand Credit Per kVA: | $6.00 | $6.00 |
| Non-Compliance Charge Per kVA: | $16.00 | $16.00 |
| **Transmission** | **Current** | **Proposed** |
| Monthly Demand Credit Per kVA: | $5.90 | $5.90 |
| Non-Compliance Charge Per kVA: | $16.00 | $16.00 |

## Net Metering Service

**Metering and Billing**

**Current**

Net metering service shall be measured using a single meter or, as determined by Company, additional meters and shall be measured in accordance with standard metering practices by metering equipment capable of registering power flow in both directions for each time period defined by the applicable rate schedule. This net metering equipment shall be provided without any cost to the Customer. This provision does not relieve Customer’s responsibility to pay metering costs embedded in the Company’s Commission-approved base rates. Additional meters, requested by Customer, will be provided at Customer’s expense.

If electricity generated by Customer and fed back to Company's system exceeds the electricity supplied to Customer from the system during a billing period, Customer shall receive a billing- period credit for the net delivery on Customer's bill for the succeeding billing periods. If Customer takes service under time-of-use or time-of-day rate schedule, Company will apply billing-period credits Customer creates in a particular time-of-day or time-of-use block only to offset net energy consumption in the same time-of-day or time-of-use blocks in any billing period. Any such unused excess billing-period credits will be carried forward and drawn on by Customer as needed. Unused excess billing-period credits existing at the time Customer's service is terminated end with Customer's account and are not transferrable between customers or locations.

**Proposed**

Net metering service shall be measured using a single meter or, as determined by Company, additional meters and shall be measured in accordance with standard metering practices by metering equipment capable of registering power flow in both directions for each time period defined by the applicable rate schedule. This net metering equipment shall be provided without any cost to Customer. This provision does not relieve Customer's responsibility to pay metering costs embedded in Company's Commission-approved base rates. Additional meters, requested by Customer, will be provided at Customer's expense. Unused excess billing-period credits existing at the time Customer's service is terminated end with Customer's account and are not transferrable between Customers or locations.

**Standard Rider for Excess Facilities – Rider EF**

| Customer shall pay for excess facilities by: | **Current** | **Proposed** |
|---|---|---|
| (a) Making a monthly Excess Facilities charge payment equal to the installed cost of the excess facilities times the following percentage: | | |
| Percentage with No Contribution-in-Aid-of-Construction | 1.32% | 1.26% |
| (b) Making a one-time Contribution-in-Aid-of-Construction equal to the installed cost of the excess facilities plus a monthly Excess Facilities Charge payment equal to the installed cost of the excess facilities times the following percentage: | | |
| Percentage with Contribution-in-Aid-of-Construction | 0.54% | 0.53% |

**Standard Rider for Redundant Capacity Charge – Rider RC**

**Availability:**

**Current**

Available to customers requesting the reservation of capacity on Company's facilities which are shared by other customers when Company has and is willing to reserve such capacity. Such facilities represent a redundant delivery to provide electric service to the Customer's facility in the event that an emergency or unusual occurrence renders the Customer's principal delivery unavailable for providing service. Where Customer desires to split a load between multiple meters on multiple feeds and contract for Redundant Capacity on those feeds, service is contingent on the practicality of metering to measure any transferred load to the redundant feed.

**Proposed**

Available to customers served under Company's rate schedules which include a demand charge or a special contract including a demand charge.

Available to Customers requesting the reservation of capacity on Company's facilities which are shared by other Customers when Company has and is willing to reserve such capacity. Such facilities represent a redundant delivery to provide electric service to Customer's facility in the event that an emergency or unusual occurrence renders Customer's principal delivery unavailable for providing service. Where Customer desires to split a load between multiple meters on multiple feeds and contract for Redundant Capacity on those feeds, service is contingent on the practicality of metering to measure any transferred load to the redundant feed.

**Rate:**

| Capacity Reservation Charge per Month: | **Current** **(Per kW/kVA)** | **Proposed** **(Per kW/kVA)** |
|---|---|---|
| Secondary Distribution | $1.59 | $1.84 |
| Primary Distribution | $1.44 | $1.41 |

## Temporary-to-Permanent and Seasonal Service – Rider TS

**Availability:**

**Current**

This rider is available at the option of Company where:

1. Customer's business does not require permanent installation of Company's facilities excluding service provided for construction of permanent delivery points for residences and commercial buildings, and is of such nature to require only seasonal service or temporary service; or
2. the service is over 50 kW, provided for construction purposes, and where in the judgment of Company the local and system electrical facility capacities are adequate to serve the load without impairment of service to other customers; or
3. Customer has need for temporary intermittent use of Company facilities and Company has facilities it is willing to provide Customer for installation and operational testing of Customer's equipment.

This service is available for not less than one (1) month (approximately thirty (30) days), but when service is used longer than one (1) month, any fraction of a month's use will be prorated for billing purposes. Where this service is provided under 2 or 3 above, the Company will determine the term of service, which shall not exceed one (1) year.

**Proposed**

This rider is available at the option of Company where:

1. Customer's business requires service provided for construction of permanent delivery points for residences and commercial buildings; or
2. Customer's business does not require permanent installation of Company's facilities and is of such nature to require only seasonal service or temporary service; or
3. Customer's service is over 50 kW, provided for construction purposes, and where in the judgment of Company the local and system electrical facility capacities are adequate to serve the load without impairment of service to other Customers; or
4. Customer has need for temporary intermittent use of Company facilities and Company has facilities it is willing to provide Customer for installation and operational testing of Customer's equipment.

This service is available for not less than one (1) month (approximately thirty (30) days), but when service is used longer than one (1) month, any fraction of a month's use will be prorated for billing purposes. Where this service is provided under 3 or 4 above, Company will determine the term of service, which shall not exceed three (3) years.

**Conditions:**

**<u>Current</u>**

Company may permit such electric loads to be served on the rate schedule normally applicable, but without requiring a yearly contract and minimum, substituting therefor the following conditions and agreements:

1. Customer shall pay Company for all costs of making temporary connections, including cost of installing necessary transformers, meters, poles, wire and any other material, and any cost of material which cannot be salvaged, and the cost of removing such facilities when load has ceased.
2. Customer shall pay regular rate of the applicable electric rate schedule.
3. Where Customer is receiving service under a standard rate and has need for temporary use of Company facilities, Customer will pay for non-salvageable materials outlined in (1) above plus a monthly charge for the salvageable equipment at the Percentage With No Contribution -in-Aid-of-Construction specified on the Excess Facilities Rider, Rate Sheet No. 60.

**<u>Proposed</u>**

Company may permit such electric loads to be served on the rate schedule normally applicable, but without requiring a yearly contract and minimum, substituting therefore the following conditions and agreements:

1. For Temporary-to-Permanent service which requires service for construction of permanent delivery points for residences and commercial buildings, the Company will provide a temporary electric service upon request by the customer for a non-refundable charge. This charge, which will be subject to an annual review and revision, shall depend on the facilities which must be installed (and removed) by the Company in order to connect service.

   The standard charge shall be 15% of the estimated installation and removal cost where the facilities to provide service are already in place. It also applies where all of the installed facilities will be utilized, without modification, as part of a future permanent service.
2. For Seasonal Service where facilities are installed for temporary service that will not be utilized as part of a future permanent service, the customer shall pay Company for all costs of making temporary connections, including cost of installing necessary transformers, meters, poles, wire and any other material, and any cost of material which cannot be salvaged, and the cost of removing such facilities when load has ceased.

   Temporary services for underground or overhead installations are to be constructed as specified by Company standards. Customer will furnish and install material and equipment, including mast for service entrance, conductors, meter base, main disconnect, breaker assembly and grounding. Once the temporary service is no longer needed, the Customer must contact the Company for removal.

   For such cases where a temporary service is written upon a refundable contract, the customer will be refunded back the deposit paid for the temporary service after three years of continuous service.

## <u>Green Tariff – Rider GT</u>

**New Tariff – Replaces Small Green Energy Rider (SGE) and Large Green Energy Rider (LGE)**

The Company is adding a new Green Tariff to ensure that businesses inside and outside Kentucky know that the Company has multiple renewable offerings. The new Green Tariff provides three options for customers seeking to support the development of renewable energy resources.

The first option is the continuation of the Company' existing Small Green Energy and Large Green Energy programs (Riders SGE and LGE), which the Company proposes to remove from its tariff as separate riders and incorporate into a single option under the new Green Tariff. None of the pricing or substantive terms of the existing Riders SGE and LGE will change in Green Tariff option 1.

The second option in the new Green Tariff is the Business Solar option. This option will continue and formalize as a tariff offering the Company's existing Business Solar program. The program is for non-residential customers seeking to have solar facilities constructed and owned by the Company. The Company arranges for the design, installation, and ongoing operation and maintenance of the facilities. Business Solar customers receive two significant benefits: (1) the benefit of additionality, i.e., causing entirely new solar facilities to be constructed, and (2) the benefit of receiving the value of the facilities' output.

The Company will require a contract with a customer under the Business Solar option to obtain reasonable assurances of cost recovery, and will file all such contracts with the Commission.

The third Green Tariff option will allow customers to engage with the Company to consider entering into renewable energy purchase agreements to supply some or all of a customer's energy needs. To be eligible for option 3, a customer must have load of 10 MVA or more and be willing to enter into an obligation for 10 MW or more of new (not already existing) renewable capacity. The energy from the new renewable facility must be delivered to the Company's transmission system. The minimum term of the contract into which the customer must enter with the Company is five years and is equivalent to the term of the agreement with the renewable energy provider. The Company will file all such contracts with the Commission. The Company proposes to limit this offering to 50 MW.

## Economic Development Rider – Rider EDR

**Rate:**

**Current**

A customer taking service under EDR shall be served according to all of the rates, terms, and conditions of the normally applicable rate schedule subject to the following:

a) for the twelve consecutive monthly billings of the first contract year, the Total Demand Charge shall be reduced by 50%;

b) for the twelve consecutive monthly billings of the second contract year, the Total Demand Charge shall be reduced by 40%;

c) for the twelve consecutive monthly billings of the third contract year, the Total Demand Charge shall be reduced by 30%;

d) for the twelve consecutive monthly billings of the fourth contract year, the Total Demand Charge shall be reduced by 20%;

e) for the twelve consecutive monthly billings of the fifth contract year, the Total Demand Charge shall be reduced by 10%; and

f) all subsequent billing shall be at the full charges stated in the applicable rate schedule.

"Total Demand Charge" is the sum of all demand charges, including any credits provided under any other demand applicable rider, before the EDR discounts described above are applied.

**Proposed**

A Customer taking service under EDR shall be served according to all of the rates, terms, and conditions of the normally applicable rate schedule subject to the following:

For the twelve (12) consecutive monthly billings and the subsequent four consecutive twelve (12) monthly billing periods thereafter, the Total Demand Charge shall be reduced by 50%, 40%, 30%, 20%, 10% in the order of Customers choosing at time of contract filing. All subsequent billing shall be at the full charges stated in the applicable rate schedule after this five (5) year period.

"Total Demand Charge" is the sum of all demand charges, including any credits provided under any other demand applicable rider, before the EDR discounts described above are applied.

**Terms and Conditions:**

**Current**

Brownfield Development

a) Service under EDR for Brownfield Development is available to customers locating at sites that have been submitted to, approved by, and added to the Brownfield Inventory maintained by the Kentucky Energy and Environment Cabinet (or by any successor entity created and authorized by the Commonwealth of Kentucky).

b) EDR for Brownfield Development is available only to minimum monthly billing loads of 500 kVA or greater where the customer takes service from existing Company facilities.

Economic Development

c) Service under EDR for Economic Development is available to:

1) new customers contracting for a minimum monthly billing load of 1,000 kVA; and

2) existing customers contracting for a minimum monthly billing load of 1,000 kVA above their Existing Base Load, to be determined as follows:

i. Company and the existing customer will determine Customer's Existing Base Load by calculating a 12-month rolling average of measured demand.

ii. Company and the existing customer must agree upon the Existing Base Load, which shall be an explicit term of the special contract submitted to the Commission for approval before the customer can take service under EDR. Once the Existing Base Load's value is thus established, it will not be subject to variation or eligible for service under EDR.

iii. This provision is not intended to reduce or diminish in any way EDR service already being provided to all or a portion of a customer's Existing Base Load. Such EDR service would continue under the terms of the contract already existing between the Company and the customer concerning the affected portion of the customer's Existing Base Load.

d) A customer desiring service under EDR for Economic Development must submit an application for service that includes:

1) a description of the new load to be served;

2) the number of new employees, if any, Customer anticipates employing associated with the new load;

3) the capital investment Customer anticipates making associated with the EDR load;

4) a certification that Customer has been qualified by the Commonwealth of Kentucky for benefits under the Kentucky Business Investment Program (KBI), or the Kentucky Industrial Revitalization Act (KIRA), or the Kentucky Jobs Retention Act (KJRA), or other comparable programs approved by the Commonwealth of Kentucky.

e) Should Company determine a refundable contribution for the capital investment in Customer-specific facilities required by Company to serve the EDR load would ordinarily be required as set out under Company's Line Extension Plan, I. Special Cases, that amount shall be determined over a fifteen (15) year period and payable at the end of the fifteen (15) year period.

General

f) Company may offer EDR to qualifying new load only when Company has generating capacity available and the new load will not accelerate Company's plans for additional generating capacity over the life of the EDR contract.

g) Customer may request an EDR effective initial billing date that is no later than twelve (12) months after the date on which Company initiates service to Customer.

h) Neither the demand charge reduction nor any unjustified capital investment in facilities will be borne by Company's other customers during the term of the EDR contract.

i) Company may offer differing terms, as appropriate, under special contract to which this rider is a part depending on the circumstances associated with providing service to a particular customer and subject to approval by the Kentucky Public Service Commission.

j) In any billing month where Customer's metered load is less than the load required to be eligible for either Brownfield Development or Economic Development, no credit under EDR will be calculated or applied to Customer's billing.

**Proposed**

Brownfield Development

1. Service under EDR for Brownfield Development is available to Customers locating at sites that have been submitted to, approved by, and added to the Brownfield Inventory maintained by the Kentucky Energy and Environment Cabinet (or by any successor entity created and authorized by the Commonwealth of Kentucky).

2. EDR for Brownfield Development is available only to minimum monthly billing loads of 500 kVA or greater where the Customer takes service from existing Company facilities with no material changes.

Economic Development

3. Service under EDR for Economic Development is available to:

   a. new Customers contracting for a minimum monthly billing load of 1,000 kVA, and at least a 50% load factor; and

   b. Existing Customers contracting for a minimum monthly billing load of 1,000 kVA above their Existing Base Load, and at least a 50% load factor to be determined as follows:

      i. Company and the existing Customer will determine Customer's Existing Base Load by calculating a twelve (12) month rolling average of measured demand.

      ii. Company and the existing Customer must agree upon the Existing Base Load, which shall be an explicit term of the special contract submitted to the Commission for approval before the Customer can take service under EDR. Once the Existing Base Load's value is thus established, it will not be subject to variation or eligible for service under EDR.

      iii. This provision is not intended to reduce or diminish in any way EDR service already being provided to all or a portion of a Customer's Existing Base Load. Such EDR service would continue under the terms of the contract already existing between Company and the Customer concerning the affected portion of the Customer's Existing Base Load.

4. A Customer desiring service under EDR for Economic Development must submit an application for service that includes:

   a. a description of the new load to be served;

   b. the number of new employees, if any, Customer anticipates employing associated with the new load;

   c. the capital investment Customer anticipates making associated with the EDR load;

   d. a certification that Customer has been qualified by the Commonwealth of Kentucky for benefits under the Kentucky Business Investment Program (KBI), or the Kentucky Industrial Revitalization Act (KIRA), or the Kentucky Jobs Retention Act (KJRA), or other comparable programs approved by the Commonwealth of Kentucky.

5. Should Company determine a refundable contribution for the capital investment in Customer-specific facilities required by Company to serve the EDR load would ordinarily be required as set out under Company's Line Extension Plan, I. Special Cases, that amount shall be determined over a fifteen (15) year period and payable at the end of the fifteen (15) year period.

Economic Re-Development

6. Service under EDR for Economic Re-Development is available to:

   a. Customers locating at vacant commercial or industrial properties in the Company's service territory which have been unoccupied for at least twelve (12) consecutive months. Verification of vacancy will constitute evidence of minimal to no electrical use during the unoccupied timeframe as determined by the company. Development of green space or undeveloped properties or sites are excluded from the Re-Development rider.

   b. EDR for Economic Re-Development is available only to minimum monthly billing loads of 500 kVA or greater where Customer takes service from the existing electrical infrastructure with no material changes and at least a 50% load factor.

   c. A customer desiring service under must submit an application for service that includes:

      i. a description of the new load to be served;

      ii. the number of new employees, if any, Customer anticipates employing associated with the new load; and

      iii. the capital investment Customer anticipates making associated with the EDR load.

   d. Customers relocating their operations from another premise within the company's service territory and maintaining the same demand load as indicated on the customer's Load Data Sheet are ineligible to participate in this tariff.

   e. Customers relocating their operations from another premise within the company's service territory and increasing the demand load as indicated on the customer's Load Data Sheet are eligible to participate in this tariff for the increased demand of 500 kVA minimum and at least a 50% load factor.

f. Should Company determine a refundable contribution for the capital investment in Customer-specific facilities required by Company to serve the EDR load would ordinarily be required as set forth under Company's Line Extension Plan, that amount shall be determined over a fifteen (15) year period and payable at the end of the fifteen (15) year period

General

7. Company may offer EDR to qualifying new load only when Company has generating capacity available and the new load will not accelerate Company's plans for additional generating capacity over the life of the EDR contract.

8. Customer may request an EDR effective initial billing date that is no later than twelve (12) months after the date on which the Kentucky Public Service Commission approves the customer agreement.

9. Neither the demand charge reduction nor any unjustified capital investment in facilities will be borne by Company's other Customers during the term of the EDR contract.

10. Company may offer differing terms, as appropriate, under special contract to which this rider is a part depending on the circumstances associated with providing service to a particular Customer and subject to approval by the Kentucky Public Service Commission.

11. No credit under EDR will be calculated or applied to Customer's billing in any billing month in which Customer's metered load is less than the load required to be eligible for either Brownfield Development, Economic Development, or Economic Re-Development no credit under EDR will be calculated or applied to Customer's billing.

12. EDR is not available to a new customer that results solely from a change in ownership of a previous customer's account. However, if a change in ownership occurs after the previous customer had entered into an EDR special contract, the successor customer may be allowed to fulfil the balance of the EDR special contract.

## Solar Share Program Rider – Rider SSP

**Availability:**

**Current**

This optional, voluntary service is available to Company's customers taking service under any Standard Rate Schedule except those served under Retail Transmission Service, Fluctuating Load Service, Lighting Service, Restricted Lighting Service, Lighting Energy Service, Traffic Energy Service, Pole and Structure Attachment Charges, Electric Vehicle Supply Equipment, and Electric Vehicle Charging Service rate schedules. The terms and conditions set out herein are available for and applicable to participation in Company's Solar Share Program.

**Proposed**

This optional, voluntary service is available to Customers taking service under Rates RS, RTOD-Energy, RTOD-Demand, VFD, GS, AES, PS, TODS, and TODP. The terms and conditions set out herein are available for and applicable to participation in Company's Solar Share Program.

**Rate:**

| Solar Capacity Charge | **Current Per kW Subscribed** | **Proposed Per kW Subscribed** |
|---|---|---|
| One-Time Solar Capacity Charge | | $790 |
| Monthly Solar Capacity Charge | $6.27 | $5.68 |

**Current**

| Monthly Credits and Adjustments | Rate Schedule | Credit per kWh |
|---|---|---|
| Solar Energy Credit (per kWh of pro rata energy produced by the Solar Share Facilities; number of kWh eligible for credit limited to customer's net kWh consumption on each bill) | RS | $0.03401 |
| | RTOD-Energy | $0.03401 |
| | RTOD-Demand | $0.03401 |
| | VFD | $0.03401 |
| | GS | $0.03401 |
| | PS Secondary | $0.03756 |
| | PS Primary | $0.03609 |
| | TODS | $0.03734 |
| | TODP | $0.03505 |
| Solar FAC Adjustment | | Subscriber's billing under Adjustment Clause FAC will be adjusted corresponding to number of kWh to which Solar Energy Credit applies |

**Proposed**

**Solar Energy Credit**

Each billing period during which the Subscriber has paid in full for subscribed capacity under either option above, Company will compare a subscribing customer's pro rata AC energy produced by the Solar Share Facilities (truncated to a whole kWh value) to the subscribing customer's energy consumption (in kWh) every 15 minutes. If consumption exceeded production, Company will bill Customer for the net energy consumed in accordance with Customer's standard rate schedule. If production equaled or exceeded consumption in any relevant period, Company will bill Customer for zero energy consumption for that period and provide a bill credit for each kWh of net production, if any, at the then-applicable non-time-differentiated rate for Company's Standard Rate Rider SQF, (Small Capacity Cogeneration and Small Power Production Qualifying Facilities) Original Sheet No. 55.

**Program Description:**

**Current**

The Solar Share Program is an optional, voluntary program that allows customers to subscribe capacity in the Solar Share Facilities. Each Solar Share Facility will have an approximate direct-current (DC) capacity of 500 kW and will be available for subscription in nominal 250 W (quarter-kW) DC increments. Each subscribing customer ("Subscriber") may subscribe capacity up to an aggregate amount of 500 kW DC, though no Subscriber may subscribe more than 250 kW DC in any single Solar Share Facility.

Subscriber's desired capacity will be considered subscribed upon Subscriber's commitment to pay charges under this Rider for at least 12 billing periods (or enters in a contract as required herein for subscriptions of 50 kW DC or more). Subscriber will pay the monthly Solar Capacity Charge for each quarter-kW subscribed beginning with the first billing period in which the subscribed capacity has been in service for the entire billing period. For each such billing period, Subscriber will also receive (i) a bill credit in the amount of the monthly Solar Energy Credit (see Rate above) times the pro rata amount of energy production attributable to Subscriber's subscribed capacity (limited by Subscriber's net kWh consumption for the period being billed) and (ii) a bill adjustment to the Subscriber's Fuel Adjustment Clause (FAC) credits or charges corresponding to the number of kWh for which the Subscriber receives a Solar Energy Credit.

Customers subscribing less than 50 kW DC will not be required to enter into a contract concerning their subscriptions; however, a customer may not reduce or cancel a subscription earlier than 12 months from the date of the customer's most recent change to the customer's subscription level following the first billing period for which Subscriber pays Solar Capacity Charges. Therefore, a customer subscribing less than 50 kW has a 12-month payment commitment, and may have a longer commitment if the customer subsequently increases subscribed capacity (which a customer may do at any time) or if the customer chooses to decrease but not cancel the subscription after the initial 12 months. As addressed in Term of Contract below, customers subscribing 50 kW DC or more must enter into a 5-year contract with Company.

**Proposed**

The Solar Share Program is an optional, voluntary program that allows customers to subscribe to capacity in the Solar Share Facilities. Each Solar Share Facility will have an approximate direct-current (DC) capacity of 500 kW and will be available for subscription in nominal 250 W (quarter-kW) DC increments. Each subscribing customer ("Subscriber") may subscribe capacity up to an aggregate amount of 500 kW DC, though no Subscriber may subscribe more than 250 kW DC in any single Solar Share Facility.

There are two mutually exclusive options for subscribing to each increment of capacity.

Option 1: Capacity Subscribed by Paying Only the One-Time Solar Capacity Charge

For capacity subscribed by paying the One-Time Solar Capacity Charge, the One-Time Solar Capacity Charge will be included on the Subscriber's bill for the first billing period in which the subscribed capacity achieves commercial operation.

A customer choosing to pay the One-Time Solar Capacity Charge may transfer subscribed capacity between the customer's own accounts or may assign subscribed capacity to another customer. Once assigned, the assigning customer forfeits all rights to the assigned capacity.

A customer who ceases taking service from Company will have 60 calendar days to assign subscribed capacity to another customer within Company's service area. Any capacity such a customer does not assign within 60 days of ceasing to take service will be forfeited and made available to other customers under Option 2: Capacity Subscribed by Paying Only the Monthly Solar Capacity Charge.

Option 2: Capacity Subscribed by Paying Only the Monthly Solar Capacity Charge

For capacity subscribed by paying the Monthly Solar Capacity Charge, the Solar Capacity Charge will be included on the Subscriber's bill beginning with the bill for the first billing period in which the subscribed capacity achieves commercial operation.

Monthly subscriptions of less than 50 kW DC will not require a contract; however, a customer may not reduce or cancel a monthly subscription earlier than 12 months from the date of the customer's most recent change to the customer's monthly subscription level. Therefore, a customer subscribing monthly less than 50 kW has a 12-month commitment from the date of the customer's initial monthly subscription or initial solar facility commercial operation, whichever is later, and may have a longer commitment if the customer subsequently increases monthly subscribed capacity (which a customer may do at any time) or if the customer chooses to decrease but not cancel the monthly subscription after the initial 12 months. Monthly subscriptions of 50 kW DC or more require a 5-year contract with Company.

**Terms and Conditions:**

**Current**

1) Subscriptions will be available on a first-come first-served basis, except that 25% of the capacity of Solar Share Facility No. 1 will be available only to residential customers for the first 45 days of the initial subscription period for new facility. Otherwise, all capacity in the Solar Share Facilities will be available for subscription by all customers on a first-come, first-served basis.
2) Individual subscriptions will be available in nominal 250 W DC (quarter-kW) increments.
3) Customer may subscribe as much solar capacity as desired up to an aggregate amount of 500 kW DC. No customer may subscribe more than 250 kW DC in any single Solar Share Facility.
4) Subject to the restrictions above, Company will fill subscriptions as capacity in the Solar Share Facilities becomes available, and will fill subscriptions in the chronological order in which the subscriptions were made. A Subscriber whose subscription the Company can fulfill only partially may either accept the available capacity and await additional capacity, or decline the partial fulfillment, allowing the next awaiting Subscriber(s) to accept the available capacity. Accepting or declining available capacity will not affect a Subscriber's place in the queue of Subscribers awaiting capacity.
5) Customers may not owe any arrearage prior to participating in the Solar Share Program.
6) Subscribers' pro-rata share of the electricity produced by the Solar Share Facilities will be determined on a billing cycle basis. The corresponding Solar Energy Credit (per kWh) and Solar FAC Adjustment will appear on the Subscriber's bill.
7) Subscriber may continue to participate in the Program if Subscriber changes premises within the combined Kentucky certified electric service territories of Louisville Gas and Electric Company and Kentucky Utilities Company.
8) Subscribers whose customer accounts are closed for any reason will not be able to remain in the Program. Upon account closing, Subscriber will be obligated to pay Solar Capacity Charges for any remaining commitment period(s) associated with Subscriber's capacity, e.g., a Subscriber closing an account after having paid only six billing periods' Solar Capacity Charges for less than 50 kW DC subscribed capacity would be obligated to pay the remaining six billing periods' Solar Capacity Charges at the time of account closing.
9) Unless constrained by contract (see Term of Contract below), Subscriber may decrease or terminate a subscription any time after 12 months following the date of the most recent change to Subscriber's subscription that occurs after the first billing period for which Subscriber pays Solar Capacity Charges.
10) Unless constrained by contract (see Term of Contract below), Subscriber may also increase subscribed capacity at any time.
11) Each subscription under the Solar Share Program applies to a particular meter. Subscribers with multiple meters may obtain multiple subscriptions, one per meter. But Company will not aggregate usage across multiple meters for applying credits, charges, or adjustments under Rider SSP; credits, charges, and adjustments under Rider SSP apply only to the meter associated with the subscription. The only exception to this restriction is if Subscriber has more than one meter for a single service, which multiple meters Company installed for its own operating convenience and bills on an aggregated basis in accordance with Company's Terms and Conditions.
12) Subscriptions are not transferrable or assignable between customers or between a single customer's meters.
13) Subscriber's Solar Energy Credit and corresponding Solar FAC Adjustment will apply each billing cycle to the Subscriber's pro rata amount of AC energy produced by the Solar Share Facilities (truncated to a whole kWh value) or Subscriber's net energy consumption (kWh) for the billing period, whichever is less.

14) For all customers taking service under both of Riders NMS and SSP, Company will apply all provisions of Rider NMS to their bills before applying charges and credits under Rider SSP, including applying the Solar Energy Credit and Solar FAC Adjustment to such customers' net energy consumption. Therefore, customers should note that in months in which a customer taking service under Riders SSP and NMS has net zero energy consumption or net energy production under the terms of Rider NMS—including carryover net-energy credits from previous months, if any—the customer will receive zero Solar Energy Credit and Solar FAC Adjustment under Rider SSP. These provisions apply regardless of whether a customer first took service under Rider NMS before taking service under Rider SSP or vice versa, or if a customer began taking service under both riders simultaneously.

15) All Renewable Energy Credits ("RECs") related to energy produced by subscribed portions of the Solar Share Facilities will be retired.

16) Use of any images of the Solar Share Facilities or use any other of Company's intellectual property requires Company licensing prior to use.

17) Service will be furnished under Company's Terms and Conditions except as provided herein.

**Proposed**

1. Individual subscriptions are available in nominal 250 W DC (quarter-kW) increments.
2. Customer may subscribe as much solar capacity as desired up to an aggregate amount of 500 kW DC (nominal). No customer may subscribe more than 250 kW DC (nominal) in any single Solar Share Facility.
3. All One-Time Solar Capacity Charges are non-refundable.
4. Subject to the restrictions above, Company will fill subscriptions as capacity in the Solar Share Facilities becomes available, and will fill subscriptions in the chronological order in which the subscriptions were made. A Subscriber whose subscription the Company can fulfill only partially may either accept the available capacity and await additional capacity, or decline the partial fulfillment, allowing the next awaiting Subscriber(s) to accept the available capacity. Accepting or declining available capacity will not affect a Subscriber's place in the queue of Subscribers awaiting capacity.
5. Customers may not owe any arrearage prior to participating in the Solar Share Program.
6. Subscribers' pro-rata share of the AC electricity produced by the Solar Share Facilities will be determined on a billing-cycle basis. The corresponding Solar Energy Credit will be calculated and appear on the Subscriber's bill.
7. Unless constrained by contract (see Term of Contract below), Subscriber may decrease or terminate a monthly subscription any time after 12 months following the date of the most recent change to Subscriber's monthly subscription capacity at any time.
8. Unless constrained by contract (see Term of Contract below) or condition #2 above, Subscriber may also increase monthly subscribed capacity at any time.
9. Subscriptions made by paying the One-Time Solar Capacity Charge may be transferred between a Subscriber's accounts no more than once per billing period (Solar Energy Credit values do not transfer between accounts or customers). A subscription transfer between a Subscriber's accounts takes effect in the billing period following the billing period in which the Subscriber requests the transfer. A Subscriber may transfer a subscription at any time prior to or including 60 calendar days after the Subscriber terminated service on the account to which the subscription attached. If the Subscriber whose account has been terminated does not transfer the subscription within 60 calendar days, the Subscriber forfeits the subscription.
10. Capacity subscribed by paying the Monthly Solar Capacity Charge is not transferrable or assignable between customers.

11. Capacity subscribed by paying the One-Time Solar Capacity Charge may be assigned between customers, but only within the same Company service territory, at any time prior to or including 60 calendar days after the assigning Subscriber terminated service on the account to which the subscription attached. Once assigned, the assigning customer loses all rights regarding future credits and the ability to subsequently assign the capacity; those rights become the rights of the assignee upon assignment. Assigned capacity cannot be reassigned by the assignee to any other Customer, including the Customer who originally subscribed the assigned capacity. For all purposes other than the Solar Energy Credit, all capacity assignments become effective immediately upon assignment. For the purpose of the Solar Energy Credit, the assignor will receive Solar Energy Credits for the entire billing period in which the assignment occurs; the assignee will receive Solar Energy Credits beginning in the first billing period following the assignment.

12. Unused Solar Energy Credit value is not transferrable between customers or customer accounts. Therefore, a Subscriber's closing a customer account terminates any unused Solar Energy Credit value associated with that account.

13. Participants in SSP are required to have an advanced meter capable of collecting and communicating at least 15 minute interval data.

14. All Renewable Energy Credits ("RECs") related to energy produced by subscribed portions of the Solar Share Facilities will be retired.

15. Use of any images of the Solar Share Facilities or use any other of Company's intellectual property requires Company licensing prior to use.

16. Service will be furnished under Company's Terms and Conditions except as provided herein.

**Term of Contract:**

**Current**

Subscriptions of 50 kW DC or more will require a five (5) year non-transferrable, non-assignable contract between Subscriber and Company.

**Proposed**

Subscriptions of 50 kW DC or more will require a five (5) year non-transferrable, non-assignable contract between Subscriber and Company.

**Electric Vehicle Supply Equipment – Rider EVSE-R**

| Monthly Charging Unit Fee | Current | Proposed |
|---|---|---|
| Single Charger | $132.00 | $125.14 |
| Dual Charger | $205.15 | $177.49 |

**School Power Service (SPS) and School Time-of-Day Service (STOD) rates are being eliminated**

**Outdoor Sports Lighting Service – Pilot OSL**

**Rate:**

| Secondary | Current | Proposed |
|---|---|---|
| Basic Service Charge per month | $90.00 | |
| Basic Service Charge per day | | $2.96 |
| Plus and Energy Charge per kWh of: | $0.03773 | $0.03306 |
| Plus a Maximum Load Charge per kW of: | | |
| Peak Demand Period | $15.57 | $22.52 |
| Base Demand Period | $4.89 | $4.89 |

| **Primary** | **Current** | **Proposed** |
|---|---|---|
| Basic Service Charge per month | $240.00 | |
| Basic Service Charge per day | | $7.89 |
| Plus and Energy Charge per kWh of: | $0.03627 | $0.03627 |
| Plus a Maximum Load Charge per kW of: | | |
| Peak Demand Period | $14.01 | $20.26 |
| Base Demand Period | $3.48 | $3.46 |

**Adjustment Clauses:**

**Current**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Demand Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Tax Cuts and Jobs Act Surcredit | Sheet No. 89 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee Rider | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Proposed**

The bill amount computed at the charges specified above shall be increased or decreased in accordance with the following:

| | |
|---|---|
| Demand-Side Management Cost Recovery Mechanism | Sheet No. 86 |
| Fuel Adjustment Clause | Sheet No. 85 |
| Off-System Sales Adjustment Clause | Sheet No. 88 |
| Environmental Cost Recovery Surcharge | Sheet No. 87 |
| Franchise Fee | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Rating Periods:**

**Current**

The rating periods applicable to the Maximum Load charges are established in Eastern Standard Time year round by season for weekdays and weekends, throughout Company's service area, and shall be as follows:

Summer peak months of May through September

| | Base | Peak |
|---|---|---|
| Weekdays | All Hours | 1 P.M. - 7 P.M. |
| Weekends | All Hours | |

All other months of October continuously through April

| | Base | Peak |
|---|---|---|
| Weekdays | All Hours | 6 A.M. – 12 Noon |
| Weekends | All Hours | |

**Proposed**

The rating periods applicable to the Maximum Load charges are established in Eastern Standard Time year round by season for weekdays and weekends, throughout Company's service area, and shall be as follows:

Summer peak months of May through September

| | Base | Peak |
|---|---|---|
| Weekdays | All Hours | 1 P.M. - 7 P.M. |
| Weekends | All Hours | |

All other months of October continuously through April

| | Base | Peak |
|---|---|---|
| Weekdays | All Hours | 6 A.M. – 12 Noon |
| Weekends | All Hours | |

If a legal holiday falls on a weekday, it will be considered a weekday.

## Demand-Side Management Cost Recovery Mechanism

**Availability:**

**Current**

This schedule is mandatory to Residential Service Rate RS, Residential Time-of-Day Energy Service Rate RTOD-Energy, Residential Time of Day Demand Service Rate RTOD-Demand, Volunteer Fire Department Service Rate VFD, General Service Rate GS, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, Retail Transmission Service Rate RTS, School Power Service Rate SPS, School Time-of-Day Service Rate STOD, and Outdoor Sports Lighting Service Rate OSL. Industrial customers who elect not to participate in a demand-side management program hereunder shall not be assessed a charge pursuant to this mechanism. For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes that create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32, and 33. All other non-residential customers will be defined as "commercial."

**Proposed**

This schedule is mandatory to Residential Service Rate RS, Residential Time-of-Day Energy Service Rate RTOD-Energy, Residential Time of Day Demand Service Rate RTOD-Demand, Volunteer Fire Department Service Rate VFD, General Service Rate GS, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, Retail Transmission Service Rate RTS, and Outdoor Sports Lighting Service Rate OSL. Industrial customers who elect not to participate in a demand-side management program hereunder shall not be assessed a charge pursuant to this mechanism. For purposes of rate application hereunder, non-residential customers will be considered "industrial" if they are primarily engaged in a process or processes that create or change raw or unfinished materials into another form or product, and/or in accordance with the North American Industry Classification System, Sections 21, 22, 31, 32, and 33. All other non-residential customers will be defined as "commercial."

## Environmental Cost Recovery Surcharge

**Availability of Service:**

**Current**

This schedule is mandatory to all Standard Electric Rate Schedules listed in Section 1 of the General Index except PSA and Special Charges, all Pilot Programs listed in Section 3 of the General Index, and the FAC (including the Off-System Sales Tracker) and DSM Adjustment Clauses. Standard Electric Rate Schedules subject to this schedule are divided into Group 1 or Group 2 as follows:

Group 1: Rate Schedules RS; RTOD-Energy; RTOD-Demand; VFD; LS; RLS; LE; and TE.
Group 2: Rate Schedules GS; PS; TODS; TODP; RTS; FLS; EVSE; EVC; SPS; STOD; and OSL.

**Proposed**

This schedule is mandatory to all rate schedules listed in Section 1 of the General Index except Rate PSA and Special Charges, all Pilot Programs listed in Section 3 of the General Index, and FAC (including OSS) and DSM Adjustment Clauses. Rate schedules subject to this adjustment clause are divided into Group 1 or Group 2 as follows:

Group 1: Rates RS; RTOD-Energy; RTOD-Demand; VFD; LS; RLS; LE; and TE.
Group 2: Rates GS; PS; TODS; TODP; RTS; FLS; EVSE; EVC; and OSL.

**Tax Cuts and Jobs Act Surcredit (TCJA) Adjustment Clause**
**withdrawn from tariff and cancelled**

The approval of a change in LG&E's base rates will cause the Tax Cuts and Jobs Act ("TCJA") Surcredit Tariff to be withdrawn from service and associated billing credits cancelled effective May 1, 2019. The TCJA Surcredit is a rate mechanism that provides a monthly credit that reduces customers' bills. In its base rate application, LG&E is proposing to include all changes associated with the TCJA in the calculation of its proposed base rates. When the new base rates become effective, customers will no longer receive the credit provided by the TCJA surcredit mechanism. The monthly residential electric bill increase due to the proposed electric base rates will be 4.1 percent, or approximately $4.23, for a customer using 917 kWh of electricity (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential electric bill increase will be 7.5%, or approximately $7.53, for a customer using 917 kWh of electricity.

**Franchise Fee – FF**

**Proposed**
**DEFINITIONS, RATE, and TERMS AND CONDITIONS sections removed**

**Billing:**
**Proposed (New)**
d. At its option, a government body imposing a franchise fee shall not be billed for that portion of a franchise fee, applied to services designated by the governmental body that would ultimately be repaid to the governmental body.

**Term of Contract:**
**Current**
As agreed to in the franchise agreement. In the event such franchise agreement should lapse but payment of franchise fees, other local taxes, or permitting fees paid by Company by ordinance, franchise, or other governmental directive should continue, collection shall continue under this tariff.
**Proposed**
As agreed to in the franchise agreement. Company will not calculate or collect any such fees, taxes, or charges pursuant to expired, lapsed, or otherwise invalid, ineffective or inapplicable ordinances, franchise agreements, or other governmental enactment.

**Home Energy Assistance Program Adjustment Clause - HEA**

**Rate:**
**Current**
$0.25 per month.
**Proposed**
$0.25 per month.

**Terms and Conditions – Character of Service**

**Current**
**TRANSMISSION VOLTAGES**
According to location, 69,000 volts, 138,000 volts, or 345,000 volts.
**Proposed**
**TRANSMISSION VOLTAGES**
According to location, 69,000 volts, 138,000 volts, 161,000 volts, or 345,000 volts.

## Terms and Conditions – Billing

**Meter Readings and Bills:**

**Current**

In the case of opening and closing bills when the total period between regular and special meter readings is less than thirty days, the minimum charges of the applicable rate schedules will be prorated on the basis of the ratio of the actual number of days in such period to thirty days.

**Proposed**

In the case of opening and closing bills when the total period between regular and special meter readings is less than thirty days, the minimum charges of the applicable rate schedules will be prorated on the basis of the ratio of the actual number of days in such period to thirty (30) days, unless an applicable rate schedule has a daily Basic Service Charge, in which case a full daily Basic Service Charge will be charged to a customer for each day or partial day during which the customer's account was open and served under that rate schedule.

**Minimum Charge:**

**Current**

Without limiting the foregoing, the Demand Charge shall be due regardless of any event or occurrence that might limit (a) Customer's ability or interest in operating Customer's facility, including, but without limitation, any acts of God, fires, floods, earthquakes, acts of government, terrorism, severe weather, riot, embargo, changes in law, or strikes or (b) Company's ability to serve customer.

**Proposed**

Without limiting the foregoing, the Basic Service Charge and Demand Charge shall apply and be due for all times during which a customer's account is open, regardless of any event or occurrence that might limit (a) Customer's ability or interest in operating Customer's facility, including, but without limitation, any acts of God, fires, floods, earthquakes, acts of government, terrorism, severe weather, riot, embargo, changes in law, or strikes or (b) Company's ability to serve Customer.

## Terms and Conditions - Deposits

**Current**

| | |
|---|---|
| For Customers Served Under Residential Service Rates RS, RTOD-Energy, and RTOD-Demand: | $160.00 |
| For Customers Served Under General Service Rate GS | $240.00 |

For all other Customers not classified herein, the deposit will be no more than 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly.

**Proposed**

| | |
|---|---|
| For Customers Served Under Residential Service Rates RS, RTOD-Energy, and RTOD-Demand: | $160.00 |
| For Customers Served Under General Service Rate GS | $240.00 |

For all other Customers not classified herein, the deposit will be no more than 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly.

## Terms and Conditions – Line Extension Plan

**Current**

**D. NORMAL LINE EXTENSIONS**

1) In accordance with 807 KAR 5:041, Section 11(1), Company will provide, at no cost, a line extension of up to 1,000 feet to Customer requesting permanent service where the installed transformer capacity does not exceed 25kVA.

2) Where Customer requires poly-phase service or transformer capacity in excess of 25kVA and Company provides such facilities, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost to Company in providing facilities above that required in NORMAL LINE EXTENSIONS ¶ 1 above.

**Proposed**

**4. NORMAL LINE EXTENSIONS**

a. In accordance with 807 KAR 5:041, Section 11(1), Company will provide, at no cost, a line extension of up to 1,000 feet to Customer requesting permanent service where the installed transformer capacity does not exceed 25kVA.

b. Where Customer requires poly-phase distribution service or transformer capacity in excess of 25 kVA and Company provides such facilities, Company shall provide requested line extension to the extent the cost of an overhead extension, whether request is for overhead or underground, does not exceed five (5) times the Customers estimated annual net revenue, where "net revenue is defined as the Customer's total revenue (less base fuel, Fuel Adjustment Clause, Off-System Sales, Demand Side Management, franchise fees, and school taxes). Company may require Customer to pay, in advance, a non-refundable amount for the additional cost above the five (5) times net revenue calculation to Company in providing facilities above that required in NORMAL LINE EXTENSIONS ¶ a. above. Customer must commit to a minimum contract term of five (5) years.

**Current**

**E. OTHER LINE EXTENSIONS**

1) In accordance with 807 KAR 5:041, Section 11(2), Company shall provide to Customer requesting permanent service a line extension in excess of 1,000 feet per customer but Company may require the total cost of the footage in excess of 1,000 feet per customer, based on the average cost per foot of the total extension, be deposited with Company by Customer.

2) Each year for ten (10) years Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension for each additional customer connected during that year directly to the original extension for which the deposit was made.

3) Each year for ten (10) years Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension less the length of the lateral or extension for each additional customer connected during that year by a lateral or extension to the original extension for which the deposit was made.

4) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten (10) year refund period ends.

5) Where Customer requires poly-phase service or transformer capacity above 25kVA per customer and Company provides such facilities, Company may require Customer to pay, in advance, a non-refundable amount for the additional cost to Company in providing facilities above that required in OTHER LINE EXTENSIONS ¶ 1 above.

**Proposed**

**5. OTHER LINE EXTENSIONS**

a. In accordance with 807 KAR 5:041, Section 11(2), Company shall provide to Customer requesting permanent service a line extension in excess of 1,000 feet per Customer but Company may require the total cost of the footage in excess of 1,000 feet per Customer, based on the average cost per foot of the total extension, be deposited with Company by Customer.

b. After the ten (10) year period following the line extension, Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension for each additional customer connected during the first ten (10) year period directly to the original extension for which the deposit was made.

c. After the ten (10) year period following the line extension, Company shall refund to Customer, who made the deposit for excess footage, the cost of 1,000 feet of extension less the length of the lateral or extension for each additional Customer connected during the first ten (10) year period by a lateral or extension to the original extension for which the deposit was made.

d. The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten (10) year refund period ends.

e. Where Customer requires poly-phase distribution service or transformer capacity in excess of 25 kVA and Company provides such facilities, Company shall provide requested line extension to the extent the cost of an overhead extension, whether request is for overhead or underground, does not exceed five (5) times the Customers estimated annual net revenue, where “net revenue is defined as the Customer’s total revenue (less base fuel, Fuel Adjustment Clause, Demand Side Management, franchise fees, and school taxes). Company may require Customer to pay, in advance, a non-refundable amount for the additional cost above the five (5) times net revenue calculation to Company in providing facilities above that required in NORMAL LINE EXTENSIONS ¶ a. above.

**Current**

**F. OVERHEAD LINE EXTENSIONS FOR SUBDIVISIONS**

1) In accordance with 807 KAR 5:041, Section 11(3), Customer desiring service extended for and through a subdivision may be required by Company to deposit the total cost of the extension.

2) Each year for ten (10) years Company shall refund to Customer, the cost of 1,000 feet of extension for each additional customer connected during that year directly to the original extension for which the deposit was made.

3) The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten-year refund period ends.

**Proposed**

**6. OVERHEAD LINE EXTENSIONS FOR SUBDIVISIONS**

a. In accordance with 807 KAR 5:041, Section 11(3), Customer desiring service extended for and through a subdivision may be required by Company to deposit the total cost of the extension.

b. After the ten (10) year period following the line extension, Company shall refund to Customer, the cost of 1,000 feet of extension for each additional Customer connected during the first ten (10) year period directly to the original extension for which the deposit was made.

c. The total amount refunded shall not exceed the amount originally deposited nor shall any refund be made after the ten-year refund period ends.

**Current**

**UNDERGROUND EXTENSIONS**

7) In consideration of Customer’s underground service, Company shall credit any amounts due under the contract for each service at the rate of $50.00 or Company’s average estimated installed cost for an overhead service whichever is greater.

**Proposed**

This section has been removed.

**Current**

**Medium Density Subdivisions**

3) The Customer may be required to advance to the Company the Company’s full estimated cost of construction of an underground electric distribution extension. Where Customer is required to provide trenching and backfilling, advance will be the Company’s full estimate cost of construction. Where Customer is required to deposit with the Company a non-refundable advance in place of trenching and backfilling, advance will be determined by a unit charge of $22.35 per aggregate lot front-foot along all streets contiguous to the lots to be served through an underground extension.

4) Each year for ten (10) years Company shall refund to Customer an amount determined as follows:

a. Where customer is required to provide trenching and backfilling, a refund of $5,000 for each customer connected during that year.

b. Where customer is required to provide a non-refundable advance, 500 times the difference in the unit charge advance amount in 3) and the non-refundable unit charge advance in 2) for each customer connected during that year.

**Proposed**
This section has been removed.

**Current**

**High Density Subdivisions**

1) A high density residential subdivision is defined as building complexes consisting of two or more buildings each not more than three stories above grade and each designed for five (5) or more family occupancy.

2) Customer shall provide any required trenching and backfilling or at Company's discretion be required to deposit with Company a non-refundable amount for the additional cost of the underground extension (including all associated facilities) over the cost of an overhead extension of equivalent capacity.

3) The Customer may be required to advance to the Company the Company's full estimated cost of construction of an underground electric distribution extension.

   i. Company shall refund to Customer any amounts due when permanent service is provided by Company to twenty (20%) percent of the family units in Customer's project.

   ii. In no case shall the refunds provided for herein exceed the amounts deposited less any non-refundable charges applicable to the project nor shall any refund be made after a ten-year refund period ends.

**Proposed**

**High Density Subdivisions**

i. A high density residential subdivision is defined as building complexes consisting of two or more buildings each not more than three stories above grade and each designed for five (5) or more family occupancy.

| Franchise Fee | Sheet No. 90 |
| School Tax | Sheet No. 91 |

**Late Payment Charge:**

**Current**

If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month’s charges. Beginning October 1, 2010, residential customers who receive a pledge for or notice of low income energy assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which the pledge or notice is received, nor will they be assessed or required to pay a late payment charge in any of the eleven (11) months following receipt of such pledge or notice.

**Proposed**

If full payment is not received by the due date of the bill, a 3% late payment charge will be assessed on the current month’s charges. Beginning October 1, 2010, residential Customers who receive a pledge for or notice of low income energy assistance from an authorized agency will not be assessed or required to pay a late payment charge for the bill for which the pledge or notice is received, nor will they be assessed or required to pay a late payment charge in any of the eleven (11) months following receipt of such pledge or notice.

Beginning May 1, 2019, Residential Gas Service Customers in good standing by not having been assessed a Late Payment Charge for the previous eleven (11) months have the option of waiving one (1) late payment charge upon request. This option may only be used once every twelve (12) months as long as the Customer remains in good standing.

## Volunteer Fire Department Service – Rate VFD

**Availability:**

**Current**

Available, in accordance with the provisions of KRS 278.172, to any volunteer fire department qualifying for aid under KRS 95A.262. Service under this rate schedule is at the option of the customer with the customer determining whether service will be provided under this schedule or any other schedule applicable to this load. If an additional separate point of delivery is requested by a volunteer fire department qualifying for aid under KRS 95A.262 to provide gas for use in standby electric generation, customer shall be served under Standard Rate DGGS.

All existing and future installations of equipment for the purpose of providing gas for use in standby electric generation or personal vehicle fueling shall be reported by the Customer (or the Customer's Representative) to the Company in conjunction with the "Notice to Company of Changes in Customer's Load" set out in the Customer Responsibilities section of the Company's Terms and Conditions. Additionally, service for gas for use in standby electric generation and personal vehicle fueling shall be subject to the availability of adequate capacity on Company's gas system to perform such service without detriment to its other Customers.

**Proposed**

The Monthly Billing Demand shall be the greater of (1) the MDQ, (2) the highest daily volume of gas delivered during the current month, or (3) 70% of the highest daily volume of gas delivered during the previous eleven (11) monthly billing periods. The term "day" or "daily" shall mean the period of time corresponding to the gas day as observed by the Pipeline Transporter as adjusted for local time.

**Proposed**

The Monthly Billing Demand shall be the greater of (1) the MDQ, (2) the highest daily volume of gas delivered during the current month, or (3) the highest daily volume of gas delivered during the previous eleven (11) monthly billing periods. The term "day" or "daily" shall mean the period of time corresponding to the gas day as observed by the Pipeline Transporter as adjusted for local time.

## Firm Transportation Service (Transportation Only) Rate FT

**Availability:**

**Current**

For new customers whose historical gas consumption is not available, Company will determine Customer's eligibility for service hereunder based upon data provided by Customer and such other information as may be available to Company. Company may allow such new customers to begin service hereunder prior to the November 1 date specified above for existing customers.

**Proposed**

For new customers who have no historical gas consumption, Company will determine Customer's eligibility for service hereunder based upon data provided by Customer and such other information as may be available to Company. Company may allow such new customers to begin service hereunder prior to the November 1 date specified above for existing customers. A new customer is responsible for presenting its request to Company for service hereunder at least six (6) months prior to first receiving natural gas from Company under any of Company's rate schedules.

**Rate:**

**Current**

**Special Terms and Conditions:**

**Current**

2. Service under this rate schedule shall be performed under a written contract between Customer and Company setting forth specific arrangements as to the volumes to be transported by Company for Customer, Delivery Points, timing of receipts and deliveries of gas by Company, and any other matters relating to individual Customer circumstances.

4. In no case will Company be obligated to deliver gas, including both gas transported and gas sold, to Customer in greater volumes or at greater rates of flow than those specified in the written contract between Customer and Company. The maximum daily volume that Company shall be obligated to deliver shall be referred to as the Maximum Daily Quantity ("MDQ"). The maximum hourly volume that Company shall be obligated to deliver shall not exceed 1/24th of the MDQ. The MDQ is the maximum daily volume of gas, as determined by Company, based on Customer's historical daily metered volumes. In the event that historical daily metered volumes are not available, Company will determine the MDQ based upon data provided by Customer and/or monthly metered data. Once historical daily metered data becomes available, the MDQ will be subject to revision by Company on an annual basis.

**Proposed**

2. Service under this rate schedule shall be performed under a written contract between Customer and Company setting forth specific arrangements as to the volumes to be transported by Company for Customer, Delivery Points, timing of receipts and deliveries of gas by Company, and any other matters relating to individual Customer circumstances.

Customer may appoint only one PS-FT Pool Manager for a given period. If Customer elects to change its PS-FT Pool Manager, Customer shall notify Company and execute and return the required documentation of its election to change its PS-FT Pool Manager at least thirty (30) days prior to the beginning of the billing period for which the change is to become effective. In appointing a PS-FT Pool Manager, Customer acknowledges that it has appointed the designated PS-FT Pool Manager to act as its limited agent in the performance of certain stated functions and to assume certain stated responsibilities with regard to transportation under Rate FT, including the requesting and receiving of information, the scheduling of gas flows, and all related duties. Customer will continue to be responsible for any and all costs, fees, and other liabilities as the result of the actions or inactions of PS-FT Pool Manager as its limited agent. Customer shall indemnify, defend, and hold Company harmless from any costs (including, but not limited to, reasonable attorney fees), expenses, losses, or liabilities, incurred (a) as a result of Company's performance when relying upon the authority of the PS-FT Pool Manager, (b) as a result of Company's reliance upon Customer's representation that it has express authority to appoint said PS-FT Pool Manager as its limited agent, and (c) due to the Customer's or PS-FT Pool Manager's failure to strictly comply with the provisions of Rate FT or Rider PS-FT.

4.In no case will Company be obligated to deliver gas, including both gas transported and gas sold, to Customer in greater volumes or at greater rates of flow than those specified in the written contract between Customer and Company. The maximum daily volume that Company shall be obligated to deliver shall be set forth in the contract and referred to as the Maximum Daily Quantity ("MDQ"). The maximum hourly volume that Company shall be obligated to deliver shall not exceed 1/24$^{th}$ of the MDQ. The MDQ is the maximum daily volume of gas, as determined by Company, based on Customer's historical daily metered volumes. In the event that historical daily metered volumes are not available, Company will determine the MDQ based upon data provided by Customer; and/or historical monthly metered data; and/or historical daily metered data (if available). Once 12 months of historical daily metered data becomes available, the MDQ will be subject to revision by Company on an annual basis.

## <u>Distribution Generation Gas Service - Rate DGGS</u>

**Availability:**

**<u>Current</u>**

Applicable to firm natural gas service to customer-owned electric generation facilities except (i) when such natural gas is limited to the production of electricity for Customer's own use during emergency situations during which Customer's normal supply of electricity is not otherwise available, and (ii) when such electric generation facilities have a total connected load of less than 2,000 cubic feet per hour. Natural gas purchased for electric generation facilities with a total connected load of 2,000 or more cubic feet per hour, or purchased to generate electricity for further distribution, for sale in the open market, or for any purpose other than to provide Customer with standby electrical supplies during emergency situations shall be subject to this tariff. Additionally, service under this Standard Rate DGGS shall be applicable only to electric generation facilities described above and installed and operating on and after ninety (90) days after August 1, 2010, (and therefore not eligible for service under Standard Rates CGS or IGS) by commercial and industrial customers.

**Proposed**

Applicable to firm natural gas service to customer-owned electric generation facilities except when (i) such natural gas is limited to the production of electricity for Customer's own use during emergency situations during which Customer's normal supply of electricity is not otherwise available, and (ii) such electric generation facilities have a total connected load of less than 2,000 cubic feet per hour. All natural gas generation facilities (including, but not limited to, those facilities used for standby generation) with a total connected load of 2,000 or more cubic feet per hour shall be served hereunder subject to the availability of adequate capacity as provided for herein. Natural gas purchased to generate electricity for further distribution, for sale in the open market, or for any purpose other than standby generation shall be served hereunder regardless of the size of Customer's total connected load. Additionally, service under this Standard Rate DGGS shall be applicable only to electric generation facilities described above and installed and operating on and after ninety (90) days after August 1, 2010, (and therefore not eligible for service under Standard Rates CGS or IGS) by commercial and industrial customers.

**Availability of Service:**
**Current:**
For new customers whose historical gas consumption is not available, Company will determine Customer's eligibility for service hereunder based upon data provided by Customer and such other information as may be available to Company. Company may allow such new customers to begin service hereunder prior to the November 1 date specified above for existing customers.
**Proposed**
For new customers who have no historical gas consumption, Company will determine Customer's eligibility for service hereunder based upon data provided by Customer and such other information as may be available to Company. Company may allow such new customers to begin service hereunder prior to the November 1 date specified above for existing customers. A new customer is responsible for presenting its request to Company for service hereunder at least six (6) months prior to first receiving natural gas from Company under any of Company's rate schedules.

**Special Terms and Conditions:**
**Current**
3. In no case will Company be obligated to deliver gas to Customer in greater volumes or at greater rates of flow than those specified in the written contract between Customer and Company. The maximum daily volume that Company shall be obligated to deliver shall be referred to as the Maximum Daily Quantity ("MDQ"). The maximum hourly volume that Company shall be obligated to deliver shall not exceed 1/24th of the MDQ. The MDQ is the maximum daily volume of gas, as determined by Company, based on Customer's historical daily metered volumes. In the event that historical daily metered volumes are not available, Company will determine Customer's MDQ based upon data provided by Customer and/or monthly metered data. Once historical daily metered data becomes available, the MDQ will be subject to revision by Company on an annual basis. In the case of customers served under Rate DGGS, the MDQ under this rider shall be the same as the MDQ established under Rate DGGS.

**Proposed**

**Special Terms and Conditions:**

**Current**

2.To receive service hereunder, the FT Pool Manager shall enter into a PS-FT Pool Management Agreement with Company and shall submit a PS-FT Application/Agency Agreement for each Customer in the FT Pool, signed by both Customer and its FT Pool Manager. The PS-FT Pool Management Agreement shall set forth the specific obligations of the FT Pool Manager and Company under this rider. The PS-FT Application/Agency Agreement shall set forth the Customers in the FT Pool.

The FT Pool Manager shall submit a signed PS-FT Pool Management Agreement and a PS-FT Application/Agency Agreement for each Customer in the FT Pool at least thirty (30) days prior to the beginning of a billing period when service under this rider shall commence. Company shall notify the FT Pool Manager of the date when service hereunder will commence. A Customer who terminates service under this rider or who desires to change FT Pool Managers shall likewise provide Company with a written notice at least thirty (30) days prior to the end of a billing period.

The Pool Maximum Daily Quantity ("PMDQ") shall be set forth in the Pool Management Agreement. The PMDQ shall be equal to the total of the MDQs of all the Customers in the FT Pool. Company is not obligated to accept volumes for re-delivery on any day in excess of the PMDQ.

4.The FT Pool Manager shall provide Company with the written consent, in the form of a PS-FT Application/Agency Agreement, of all Customers to any change in the composition of the Customers in the FT Pool at least thirty (30) days prior to the beginning of the first billing period that would apply to the modified FT Pool Such written consent for existing Customers in the FT Pool to any change in the composition of the FT Pool may be made by the FT Pool Manager as Agent for the current Customers in the FT Pool. Without exception, any new Customer in the FT Pool must provide its own written consent in the form of a PS-FT Application/Agency Agreement.

**Proposed**

2.To receive service hereunder, the FT Pool Manager shall enter into a PS-FT Pool Management Agreement with Company. The PS-FT Pool Management Agreement shall set forth the specific obligations of the FT Pool Manager and Company under this rider.

The FT Pool Manager shall submit a signed PS-FT Pool Management Agreement at least thirty (30) days prior to the beginning of a billing period when service under this rider shall commence. Company shall notify the FT Pool Manager of the date when service hereunder will commence. A Customer who terminates service under this rider or who desires to change FT Pool Managers shall likewise provide Company with a written notice at least thirty (30) days prior to the end of a billing period.

The Pool Maximum Daily Quantity ("PMDQ") shall be set forth in the Pool Management Agreement. The PMDQ shall be equal to the total of the MDQs of all the Customers in the FT Pool. Company is not obligated to accept volumes for re-delivery on any day in excess of the PMDQ.

4.The FT Pool Manager shall provide in a form specified by Company the Customers in the FT Pool (or any changes thereto) at least thirty (30) days prior to the beginning of the first billing period that would apply to the FT Pool. Only those customers served under Rate FT and designating Pool Manager as provided for in Rate FT shall be members of the Pool Manager's pool.

## Excess Facilities – Rider EF

| Customer shall pay for excess facilities by: | Current | Proposed |
|---|---|---|
| (a) Making a monthly Excess Facilities charge payment equal to the installed cost of the excess facilities times the following percentage: | | |
| Percentage with No Contribution-in-Aid-of-Construction | 1.24% | 1.19% |

| | Current | Proposed |
|---|---|---|
| (b) Making a one-time Contribution-in-Aid-of-Construction equal to the installed cost of the excess facilities plus a monthly Excess Facilities Charge payment equal to the installed cost of the excess facilities times the following percentage: | | |
| Percentage with Contribution-in-Aid-of-Construction | 0.47% | 0.46% |

**Natural Gas Vehicle Service - Rider NGV**

**Rate:**

**Current**

The rates, provisions, and special terms and conditions of Rate IGS, Rider TS-2, or Rate FT as applicable to the Customer shall apply.

**Proposed**

The rates, provisions, and special terms and conditions of Rate IGS, Rider TS-2, or Rate FT as applicable to the Customer shall apply.

**Standard Facility Contribution Rider – Rider SFC**
**New Rider to Tariffs**

**APPLICABLE**

In all territory served.

**AVAILABILITY**

This rider is available for gas main extensions made pursuant to Company's "Gas Main Extension Rules" that are necessary to provide basic gas service when the revenue credit received by the customer under the Company's "Gas Main Extension Rules" does not cover the cost of the gas main extension. Company reserves the right to decline to provide service under this rider to an individual customer for any gas main extension costs that are in excess of those covered by Company's Gas Main Extension Rules (i) where the excess costs are less than $500,000 or greater than $2,000,000, or (ii) where the gas main extension is likely to become obsolete prior to the end of the contract term.

Company shall not be obligated to provide service under this rider when the total gas main extension costs subject to this rider are greater than $4,000,000 per calendar year.

Any customer receiving service under this rider shall be eligible for refunds (if any) available pursuant to Company's Gas Main Extension Rules when the customer's obligation under this rider is fulfilled at the end of the five (5) year contract term.

**DEFINITION OF STANDARD FACILITIES**

Standard facilities are limited to gas main extensions used to provide service to a customer. Customer will not be required to pay for facilities installed by Company that are in excess of those required to provide service to customer unless customer requests such facilities. Company's Excess Facilities Rider (Standard Rate Rider EF) applies to customer-requested excess facilities.

**STANDARD FACILITIES CHARGE**

Company shall provide normal operation and maintenance of the standard facilities. If the facilities suffer failure, Company will provide for replacement of such facilities. No adjustment in the monthly charge for a replacement of facilities will be made during the term of the contract.

Customer shall pay for standard facilities by making a monthly Standard Facilities Charge payment for 60 months equal to the installed cost of the standard facilities times the following factor:

$$\text{Standard Facility Contribution Factor} = \frac{i(1+i)^{60}}{(1+i)^{60}-1}$$

Where the interest rate *(i)* in the above formula is the 5-year Treasury constant maturity rate published in the latest Federal Reserve Statistical Release H-15 as of the day immediately preceding the date when the agreement under this rider is executed with the Customer, plus 100 basis points, divided by 12 months.

**PAYMENT**
The Standard Facilities Charges will be incorporated with the bill for gas service and will be subject to the same payment provisions.

**CREDITWORTHINESS**
Customer shall upon request of Company agree to maintain an irrevocable letter of credit, cash prepayment, or such other financial instrument satisfactory to Company ("credit support") in order to assure Customer's performance of its obligations hereunder. In determining the level of the security to be required of Customer, Company shall consider such factors, including, but not limited to, the following: the cost of the main extension to be paid by Customer, the general creditworthiness of Customer, and Customer's prior credit record with Company, if any. In the event that Customer defaults on its obligations under this rate schedule, Company shall have the immediate right to draw on such credit support to satisfy Customer's obligation hereunder. Such credit requirements shall be administered by Company in a nondiscriminatory manner.

**CONTRACT**
Service under this rider shall be performed under a written contract between Company and Customer. The term of the contract shall be five (5) years.

**Gas Line Tracker – Adjustment Clause GLT**

**Rates:**

| | **Current** | |
|---|---|---|

| FT, LGDS | $0.00 | $0.00031 |

**Tax Cuts and Jobs Act Surcredit (TCJA) Adjustment Clause withdrawn from tariff and cancelled**

The approval of a change in LG&E's base rates will cause the Tax Cuts and Jobs Act ("TCJA") Surcredit Tariff to be withdrawn from service and associated billing credits cancelled effective May 1, 2019. The TCJA Surcredit is a rate mechanism that provides a monthly credit that reduces customers' bills. In its base rate application, LG&E is proposing to include all changes associated with the TCJA in the calculation of its proposed base rates. When the new base rates become effective, customers will no longer receive the credit provided by the TCJA surcredit mechanism. The monthly residential gas bill increase due to the proposed gas base rates will be 8.1 percent, or approximately $4.93, for a customer using 54 Ccf of gas (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential gas bill increase will be 12.2%, or approximately $7.14, for a customer using 54 Ccf of gas.

## Franchise Fee – Adjustment Clause FF

**Current**

**APPLICABILITY**

All gas rate schedules.

**MONTHLY CHARGE**

A surcharge shall be calculated and added to the total bill for gas service for all customers located within local governmental jurisdictions which currently or in the future impose municipal franchise fees or other local taxes on the Company by ordinance, franchise, or otherwise. Such fees or taxes shall be net of any corresponding fees or taxes which are currently included in the base charges of each rate schedule.

The amount calculated shall be applied exclusively to the bills of customers receiving service within the territorial limits of the authority imposing the fee or tax. The fee or tax shall be added to the customer's bill as a separate item. Where more than one such fee or tax is imposed, each of the fees or taxes applicable to each customer shall be added to the bills as separately identified items.

**Proposed**

**APPLICABLE**

In all territory served.

**AVAILABILITY**

Available as an option for collection of revenues within governmental jurisdictions which impose on Company franchise fees, permitting fees, local taxes or other charges by ordinance, franchise, or other governmental directive and not otherwise collected in the charges of Company's base schedules

**BILLING**

1. The franchise charge will be applied exclusively to the base rate and all riders of bills of Customers receiving service within the franchising governmental jurisdiction, before taxes.
2. The franchise charge will appear as a separate line item on Customer's bill and show the unit of government requiring the franchise.
3. Payment of the collected franchise charges will be made to the governmental franchising body as agreed to in the franchise agreement.
4. At its option, a governmental body imposing a franchise fee shall not be billed for that portion of a franchise fee, applied to services designated by the governmental body that would ultimately be repaid to the governmental body.

**TERM OF CONTRACT**

As agreed to in the franchise agreement. Company will not calculate or collect any such fees, taxes, or charges pursuant to expired, lapsed, or otherwise invalid, ineffective or inapplicable ordinances, franchise agreements, or other governmental enactment.

## Home Energy Assistance Program Adjustment Clause HEA

**Rate:**

**Current**

$0.25 per month.

**Proposed**

$0.25 per month.

## Terms and Conditions – Customer Responsibilities

**Customer's Equipment and Installation:**

**Current**

Customer shall furnish, install, and maintain at Customer's expense the necessary Customer's Service Line extending from Company's Service Connection at the property line to the building or place of utilization of the gas.

All piping, appliances, and other gas equipment and apparatus, except the meter, regulator, and any gas riser or service line the Company has installed, repaired, or replaced, located on and within the Customer's premises beyond point of connection with Company's Service Connection at the property line shall be furnished and installed by and at the expense of Customer, and shall be maintained by Customer in good and safe condition. Company assumes no responsibility whatsoever for the condition of Customer's piping, apparatus or appliances, nor for the maintenance or renewal of any portion thereof.

**Proposed**

Company will install at its own expense, a service pipe of suitable capacity extending from its gas main to the gas meter serving Customer, beyond which point all necessary piping shall be installed by and at the expense of Customer.

## Terms and Conditions – Character of Service

**Heating Value:**

**Current**

Company will normally supply natural gas having a heating value of approximately 1,000 Btu per cubic foot. All gas received into the system of Company from interstate pipelines shall meet the applicable quality standards of the respective interstate pipeline delivering natural gas to Company All gas received into the system of Company from sources other than an interstate pipeline shall meet the quality standards prescribed in Local Gas Delivery Service Rate LGDS. When it is necessary to supplement the supply of natural gas, Company reserves the right, at its discretion, to supplement its supply of natural gas with a mixture of vaporized liquefied petroleum gas and air.

**Proposed**

Company will normally supply natural gas having an average heating value of approximately 1,050 Btu per cubic foot for any twelve (12) month period. All gas received into the system of Company from interstate pipelines shall meet the applicable quality standards of the respective interstate pipeline delivering natural gas to Company All gas received into the system of Company from sources other than an interstate pipeline shall meet the quality standards prescribed in Local Gas Delivery Service Rate LGDS. When it is necessary to supplement the supply of natural gas, Company reserves the right, at its discretion, to supplement its supply of natural gas with a mixture of vaporized liquefied petroleum gas and air.

## Terms and Conditions – Billing

**Meter Reading and Bills:**

**Current**

In the case of opening and closing bills when the total period between regular and special meter readings is less than thirty days, the minimum charges of the applicable rate schedules will be prorated on the basis of the ratio of the actual number of days in such period to thirty days.

**Proposed**

In the case of opening and closing bills when the total period between regular and special meter readings is less than thirty days, the minimum charges of the applicable rate schedules will be prorated on the basis of the ratio of the actual number of days in such period to thirty days, unless an applicable rate schedule has a daily Basic Service Charge, in which case a full daily Basic Service Charge will be charged to a customer for each day or partial day during which the customer’s account was open and served under that rate schedule.

## Terms and Conditions - Deposits

**Current**

For Customers Served Under
Residential Gas Service Rate RGS $100.00
(For Combination Gas and Electric Residential Customers,
the total deposit would be $260.00)
For Non-Residential Gas Customers, the deposit will be no more than 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly.

**Proposed**

For Customers Served Under
Residential Gas Service Rate RGS $100.00
(For Combination Gas and Electric Residential Customers,
the total deposit would be $260.00)
For Non-Residential Gas Customers, the deposit will be no more than 2/12 of Customer's actual or estimated annual bill where bills are rendered monthly.

## Terms and Conditions – Gas Main Extension Rules

**Current**

1.Company will extend its gas distribution mains at its own expense for a distance of one hundred (100) feet to each bona-fide applicant who agrees in writing to take service within one (1) year after the extension is completed and who has a suitable Customer's Service Line installed and ready for connection provided the following criteria are met:

a) The existing main is of sufficient capacity to properly supply the additional customer(s);

b) The customer(s) contracts to use gas on a continuous basis for one (1) year or more; and,

c) The potential consumption and revenue will be of such amount and permanence as to warrant the capital expenditures involved to make the investment economically feasible.

2. Company will extend its gas mains in excess of the above distance provided the applicant for service advances to Company an amount equal to the estimated cost of such excess portion of the extension. Company shall have the right to determine the length of the extension and to specify the pipe size and location of the extension, as well as the timing of its construction.

3. Where funds were advanced in accordance with paragraph 2 for extensions into developed residential neighborhoods and notwithstanding paragraph 1, any customer that subsequently connects to the main during a ten-year period from the effective date of the main extension contract shall advance to Company a pro rata share of the cost of the extension over 100 feet per connected customer.

4. For each new year-round customer connected to an extension in accordance with paragraph 3, Company will refund to the previous applicant(s) who advanced funds an amount equal to the difference between the refundable amount advanced and the amount of the advance so determined for the new applicant.

5. Company will extend its gas mains to serve a proposed real estate subdivision provided the applicant for such extension advances to Company an amount equal to the estimated cost of the total extension. Company shall have the right to determine the length of the extension and to specify the pipe size and the location of the extension, as well as the timing of its construction.

6. For each new year-round customer actually connected to the extension within a ten-year period following the effective date of the gas main extension contract, but not to extensions or laterals therefrom, Company will refund to applicant(s) who advanced funds in accordance with paragraph 5 above an amount equal to 100 times the average unit cost per foot of extension advanced by such applicant(s); provided that such refunds shall not exceed, in the aggregate, the amount originally advanced to Company.

7. Company will install at its own expense a service pipe of suitable capacity extending from its gas main to the customer's property line beyond which point all necessary piping shall be installed by and at the expense of the customer and in a manner acceptable to Company.

8. Company will install at its own expense the necessary meter together with the regulator required to convert from medium pressure to service pressure. When a high pressure gas line is tapped to serve a customer or group of customers, Company may charge the customer or customers for the estimated installed cost of the tap, any regulation equipment, piping, and any other equipment or facilities determined by Company, in its sole discretion, to be necessary to provide such service consistent with good operating practice.

9.In the event Company is required to make a further extension of its mains to serve a customer, Company reserves the right to tap any extension constructed under these rules and to make connections from such additional extensions without application of the refunds referred to in paragraph 4 or 6 above.

10. The title to all extensions herein provided for, together with all necessary rights-of-way, permits and easements, shall be and remain in Company.

11.Company shall not be obligated to make service connections or to extend its gas mains in cases where such extensions or connections, in the sole judgment of Company would be infeasible, impractical, or contrary to good operating practice, or where such extensions are not in accordance with the terms of the applicable rate schedule.

12.A Customer may request the installation of an Excess Flow Valve (EFV) pursuant to Federal Pipeline Hazardous Materials Safety Administration regulation 49 CFR 192.383. All EFV installations requested by Customer shall be at the Customer's sole expense. The Company and Customer shall mutually agree upon the timing of such installation with regard to any necessary permitting that may be required. The Customer requesting the installation of an excess flow valve shall be responsible for the actual total cost of such installation and the Company shall provide Customer with a written estimated cost of such installation prior to performing the installation. A deposit of fifty (50) percent of the estimated cost of installation shall be required prior to the commencement of the installation. The balance of the actual cost of installation shall be due upon completion.

The Company shall not be required to install an EFV if one or more of the following conditions is present:

a. The service line does not operate at a pressure of 10 psig or greater throughout the year;

b. Company has prior experience with contaminants in the gas stream that could interfere with the excess flow valve's operation or cause loss of service to a customer;

c. The excess flow valve could interfere with necessary maintenance and operation activities;

d. An excess flow valve meeting applicable performance standards is not commercially available; or

e. Gas deliveries on the line exceed 1,000 cubic feet per hour.

**Proposed**

1.Company will extend its gas distribution mains at its own expense for a distance of one hundred (100) feet to each bona-fide applicant who agrees in writing to take service within one (1) year after the extension is completed and who has a suitable Customer's Service Line installed and ready for connection provided the following criteria are met:

a. The existing main is of sufficient capacity to properly supply the additional customer(s);

b. The customer(s) contracts to use gas on a continuous basis for one (1) year or more; and,

c. The potential consumption and revenue will be of such amount and permanence as to warrant the capital expenditures involved to make the investment economically feasible.

2. Company shall provide to Customer requesting permanent service a line extension in excess of one hundred (100) feet per Customer to the extent that the cost of such line extension does not exceed five (5) times the Customer's estimated annual net revenue, where "net revenue" is defined as the customer's total revenue (excluding franchise fees and school taxes) less gas supply costs (i.e., the Gas Supply Cost Component of the Company's rates). In such cases, Company shall require the Customer to provide a guarantee of the estimated annual net revenue not less than five years, after taking into consideration any ramping up of the customer's demand and energy.

3. Company will extend its gas mains in excess of the above distance provided the applicant for service advances to Company an amount equal to the estimated cost of such excess portion of the extension. Company shall have the right to determine the length of the extension and to specify the pipe size and location of the extension, as well as the timing of its construction.

4. Where funds were advanced in accordance with paragraph 3 for extensions into developed residential neighborhoods and notwithstanding paragraph 1, any customer that subsequently connects to the main during a ten-year period from the effective date of the main extension contract shall advance to Company a pro rata share of the cost of the extension over 100 feet per connected customer.

5. For each new year-round customer connected to an extension in accordance with paragraph 4, Company will refund to the previous applicant(s) who advanced funds an amount equal to the difference between the refundable amount advanced and the amount of the advance so determined for the new applicant.

6. Company will extend its gas mains to serve a proposed real estate subdivision provided the applicant for such extension advances to Company an amount equal to the estimated cost of the total extension. Company shall have the right to determine the length of the extension and to specify the pipe size and the location of the extension, as well as the timing of its construction.

7. For each new year-round customer actually connected to the extension within a ten-year period following the effective date of the gas main extension contract, but not to extensions or laterals therefrom, Company will refund to applicant(s) who advanced funds in accordance with paragraph 6 above an amount equal to 100 times the average unit cost per foot of extension advanced by such applicant(s); provided that such refunds shall not exceed, in the aggregate, the amount originally advanced to Company.

8. Company will install at its own expense, subject to paragraph 1 above, a service pipe of suitable capacity extending from its gas main to the gas meter serving Customer, beyond which point all necessary piping shall be installed by and at the expense of Customer.

9. Company will install at its own expense the necessary meter together with the regulator required to convert from medium pressure to service pressure. When a high pressure gas line is tapped to serve a customer or group of customers, Company may charge the customer or customers for the estimated installed cost of the tap, any regulation equipment, piping, and any other equipment or facilities determined by Company, in its sole discretion, to be necessary to provide such service consistent with good operating practice.

10. In the event Company is required to make a further extension of its mains to serve a customer, Company reserves the right to tap any extension constructed under these rules and to make connections from such additional extensions without application of the refunds referred to in paragraph 5 or 7 above.

11. The title to all extensions herein provided for, together with all necessary rights-of-way, permits and easements, shall be and remain in Company.

12. Company shall not be obligated to make service connections or to extend its gas mains in cases where such extensions or connections, in the sole judgment of Company would be infeasible, impractical, or contrary to good operating practice, or where such extensions are not in accordance with the terms of the applicable rate schedule.

13. A Customer may request the installation of an Excess Flow Valve (EFV) pursuant to Federal Pipeline Hazardous Materials Safety Administration regulation 49 CFR 192.383. All EFV installations requested by Customer shall be at the Customer's sole expense. The Company and Customer shall mutually agree upon the timing of such installation with regard to any necessary permitting that may be required. The Customer requesting the installation of an excess flow valve shall be responsible for the actual total cost of such installation and the Company shall provide Customer with a written estimated cost of such installation prior to performing the installation. A deposit of fifty (50) percent of the estimated cost of installation shall be required prior to the commencement of the installation. The balance of the actual cost of installation shall be due upon completion.

The Company shall not be required to install an EFV if one or more of the following conditions is present:

a. The service line does not operate at a pressure of 10 psig or greater throughout the year;
b. Company has prior experience with contaminants in the gas stream that could interfere with the excess flow valve's operation or cause loss of service to a customer;
c. The excess flow valve could interfere with necessary maintenance and operation activities;
d. An excess flow valve meeting applicable performance standards is not commercially available; or
e. Gas deliveries on the line exceed 1,000 cubic feet per hour.

Louisville Gas and Electric Company also proposes to change the text of the following electric tariffs: Residential Service Rate RS, Residential Time-of-Day Energy Service Rate RTOD-Energy, Residential Time-of-Day Demand Service Rate RTOD-Demand, Volunteer Fire Department Service Rate VFD, General Service Rate GS, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, Retail Transmission Service Rate RTS, Fluctuating Load Service Rate FLS, Lighting Service Rate LS, Restricted Lighting Service Rate RLS, Lighting Energy Rate LE, Traffic Energy Service Rate TE, Pole and Structure Attachment Charges PSA, Electric Vehicle Supply Equipment Rate EVSE, Electric Vehicle Charging Rate EVC, Special Charges, Curtailable Service Rider-1 CSR-1, Curtailable Service Rider-2 CSR-2, Redundant Capacity Rider RC, Temporary-to-Permanent and Seasonal Service Rider TS, Economic Development Rider EDR, Solar Share Program Rider SSP, Outdoor Sports Lighting Service OSL, Environmental Cost Recovery Surcharge ECR, Franchise Fee Rider FF, and the Terms and Conditions.

Louisville Gas and Electric Company also proposes to change the text of the following gas tariffs: Residential Gas Service Rate RGS, Volunteer Fire Department Service Rate VFD, Firm Commercial Gas Service Rate CGS, Firm Industrial Gas Service Rate IGS, As-Available Gas Service Rate AAGS, Substitute Gas Sales Service SGSS, Firm Transportation Service Rate FT, Distributed Generation Gas Service Rate DGGS, Local Gas Delivery Service LGDS, Special Charges, Gas Transportation Service/Firm Balancing Service Rider TS-2, Gas Meter Pulse Service Rider GMPS, Pooling Service Rider PS-TS-2, Pooling Service Rate PS-FT, Weather Normalization Adjustment Clause Mechanism WNA, Franchise Fee FF, School Tax ST, and the Terms and Conditions.

Complete copies of the proposed tariffs containing the text changes and proposed rates, terms and conditions may be obtained by contacting Louisville Gas and Electric Company at P. O. Box 32010, Louisville, Kentucky, 502-589-1444 or 1-800-331-7370, or by visiting Louisville Gas and Electric Company’s website at www.lge-ku.com. A copy of this customer notice required by 807 KAR 5:001 Section 17 is posted and may be viewed in each public library located within LG&E’s service territory or at the LG&E office where bills are paid.

The foregoing rates reflect a proposed annual increase in electric revenues of approximately 3.09% and gas revenues of approximately 7.57% to Louisville Gas and Electric Company.

The estimated amount of the annual change and the average monthly bill to which the proposed electric rates will apply for each electric customer class is as follows:

| **Electric Rate Class** | **Average Usage (kWh)** | **Annual $ Increase** | **Annual % Increase** | **Monthly Bill $ Increase** | **Monthly Bill % Increase** |
|---|---|---|---|---|---|
| Residential | 917 | 18,795,252 | 4.09 | 4.23 | 4.09 |
| Residential Time-of-Day Energy | 1,077 | 3,838 | 4.06 | 4.35 | 4.06 |
| General Service | 2,322 | 4,410,485 | 2.66 | 8.00 | 2.66 |
| Power Service | 52,002 | 4,723,825 | 2.65 | 133.13 | 2.65 |
| Time-of-Day Secondary | 227,989 | 2,031,137 | 2.08 | 389.55 | 2.08 |
| Time-of-Day Primary | 1,326,570 | 3,100,289 | 2.10 | 2,015.79 | 2.10 |
| Retail Transmission | 6,770,655 | 1,426,166 | 2.11 | 9,142.08 | 2.11 |
| Fluctuating Load | No Customers are currently served under this Rate Schedule | | | | |
| Outdoor Lights | 94 | 636,550 | 2.66 | 0.60 | 2.70 |
| Lighting Energy | 1,942 | 0.00 | 0.00 | 0.00 | 0.00 |
| Traffic Energy | 284 | (6.00) | 0.00 | 0.00 | 0.00 |
| PSA | N/A | 0.00 | 0.00 | 0.00 | 0.00 |
| Rider – CSR | N/A | 0.00 | 0.00 | 0.00 | 0.00 |
| Outdoor Sports Lighting – Pilot Program | 2,000 | 272 | 2.66 | 23.00 | 2.66 |

The estimated amount of the annual change and the average monthly bill to which the proposed gas rates will apply for each gas customer class is as follows:

| **Gas Rate Class** | **Average Usage (Mcf)** | **Annual $ Increase** | **Annual % Increase** | **Mthly Bill $ Increase** | **Mthly Bill % Increase** |
|---|---|---|---|---|---|
| Residential | 5.4 | 17,691,740 | 8.12 | 4.93 | 8.12 |
| Commercial | 33.1 | 7,347,663 | 8.12 | 24.42 | 8.12 |
| Industrial | 596.7 | (74.00) | 0.00 | (0.02) | 0.00 |
| As-Available | 3,598.4 | 0.00 | 0.00 | 0.00 | 0.00 |
| Firm Transportation | 14,385.0 | (85.00) | 0.00 | (0.09) | 0.00 |
| Distributed Generation | 0.4 | 0.00 | 0.00 | 0.00 | 0.00 |
| Substitute Gas Sales | 124.8 | 3,528 | 8.12 | 293.98 | 8.12 |
| Local Gas Delivery | No Customers are currently served under this Rate Schedule | | | | |

The monthly residential electric bill increase due to the proposed electric base rates will be 4.1 percent, or approximately $4.23, for a customer using 917 kWh of electricity (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential electric bill increase will be 7.5%, or approximately $7.53, for a customer using 917 kWh of electricity.

The monthly residential gas bill increase due to the proposed gas base rates will be 8.1 percent, or approximately $4.93, for a customer using 54 Ccf of gas (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential gas bill increase will be 12.2%, or approximately $7.14, for a customer using 54 Ccf of gas.

Notice is further given that a person may examine this application at the offices of Louisville Gas and Electric Company located at 820 West Broadway, Louisville, Kentucky or through Louisville Gas and Electric Company's website at www.lge-ku.com. A person may also examine this application at the Public Service Commission's offices located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or through the commission's Web site at http://psc.ky.gov.

Comments regarding the application may be submitted to the Public Service Commission, by mail to Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, through its Web site, or by sending an email to the Commission's Public Information Officer at psc.info@ky.gov. All comments should reference Case No. 2018-00295.

The rates contained in this notice are the rates proposed by Louisville Gas and Electric Company, but the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice. A person may submit a timely written request for intervention to the Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, establishing the grounds for the request including the status and interest of the party. If the commission does not receive a written request for intervention within thirty (30) days of initial publication or mailing of the notice, the commission may take final action on the application.

# Customer Bill Insert
# General Statement

**NOTICE TO CUSTOMERS OF**
**LOUISVILLE GAS AND ELECTRIC COMPANY**

**PLEASE TAKE NOTICE** that, in a September 28, 2018 Application, Louisville Gas and Electric Company ("LG&E") is seeking approval by the Kentucky Public Service Commission of an adjustment of its electric and gas rates and charges to become effective on and after November 1, 2018.

The proposed rates reflect a proposed annual increase in electric revenues of approximately 3.09% and gas revenues of approximately 7.57% to LG&E.

The estimated amount of the annual change and the average monthly bill to which the proposed electric rates will apply for each electric customer class are as follows:

| Electric Rate Class | Average Usage (kWh) | Annual $ Increase | Annual % Increase | Monthly Bill $ Increase | Monthly Bill % Increase |
|---|---|---|---|---|---|
| Residential | 917 | 18,795,252 | 4.09 | 4.23 | 4.09 |
| Residential Time-of-Day Energy | 1,077 | 3,838 | 4.06 | 4.35 | 4.06 |
| General Service | 2,322 | 4,410,485 | 2.66 | 8.00 | 2.66 |
| Power Service | 52,002 | 4,723,825 | 2.65 | 133.13 | 2.65 |
| Time-of-Day Secondary | 227,989 | 2,031,137 | 2.08 | 389.55 | 2.08 |
| Time-of-Day Primary | 1,326,570 | 3,100,289 | 2.10 | 2,015.79 | 2.10 |
| Retail Transmission | 6,770,655 | 1,426,166 | 2.11 | 9,142.08 | 2.11 |
| Fluctuating Load | No Customers are currently served under this Rate Schedule | | | | |
| Outdoor Lights | 94 | 636,550 | 2.66 | 0.60 | 2.70 |
| Lighting Energy | 1,942 | 0.00 | 0.00 | 0.00 | 0.00 |
| Traffic Energy | 284 | (6.00) | 0.00 | 0.00 | 0.00 |
| PSA | N/A | 0.00 | 0.00 | 0.00 | 0.00 |
| Rider – CSR | N/A | 0.00 | 0.00 | 0.00 | 0.00 |
| Outdoor Sports Lighting – Pilot Program | 2,000 | 272 | 2.66 | 23.00 | 2.66 |

The estimated amount of the annual change and the average monthly bill to which the proposed gas rates will apply for each gas customer class is as follows:

| Gas Rate Class | Average Usage (Mcf) | Annual $ Increase | Annual % Increase | Mthly Bill $ Increase | Mthly Bill % Increase |
|---|---|---|---|---|---|
| Residential | 5.4 | 17,691,740 | 8.12 | 4.93 | 8.12 |
| Commercial | 33.1 | 7,347,663 | 8.12 | 24.42 | 8.12 |
| Industrial | 596.7 | (74.00) | 0.00 | (0.02) | 0.00 |
| As-Available | 3,598.4 | 0.00 | 0.00 | 0.00 | 0.00 |
| Firm Transportation | 14,385.0 | (85.00) | 0.00 | (0.09) | 0.00 |
| Distributed Generation | 0.4 | 0.00 | 0.00 | 0.00 | 0.00 |
| Substitute Gas Sales | 124.8 | 3,528 | 8.12 | 293.98 | 8.12 |
| Local Gas Delivery | No Customers are currently served under this Rate Schedule | | | | |

The monthly residential electric bill increase due to the proposed electric base rates will be 4.1 percent, or approximately $4.23, for a customer using 917 kWh of electricity (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential electric bill increase will be 7.5%, or approximately $7.53, for a customer using 917 kWh of electricity.

The monthly residential gas bill increase due to the proposed gas base rates will be 8.1 percent, or approximately $4.93, for a customer using 54 ccf of gas (the average monthly consumption of a LG&E residential customer). LG&E is proposing to withdraw Adjustment Clause TCJA from service and cancelling the associated billing credits effective when new base rates change. When the TCJA Surcredit is cancelled when new base rates take effect, the total monthly residential gas bill increase will be 12.2%, or approximately $7.14, for a customer using 54 ccf of gas.

LG&E is proposing numerous revisions to the rates, terms and conditions for service under for Pole and Structure Attachment Charges – Rate PSA, including expanding the availability of the schedule to internal communication network facilities of governmental units and educational institutions. If approved, the rates terms and conditions for attaching communication network facilities of such governmental units and educational institutions will be subject to Rate Schedule PSA.

LG&E is also proposing changes in the text of some of its rate schedules and other tariff provisions, including its terms and conditions for electric or gas service, as well as a new Standard Facility Contribution Rider ("SFC") for gas service. Complete copies of the proposed tariffs containing the proposed text changes and rates may be obtained by contacting, Louisville Gas and Electric Company at 220 West Main Street, Louisville, Kentucky, 40202, 502-589-1444 or 1-800-331-7370, or by visiting LG&E's website at www.lge-ku.com.

Notice is further given that a person may examine this application at the offices of LG&E located at 820 West Broadway, Louisville, Kentucky, and may also be examined at LG&E's website at www.lge-ku.com. A person may also examine this application at the Public Service Commission's offices located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or through the commission's Web site at http://psc.ky.gov. A copy of the customer notice required by 807 KAR 5:001 Section 17 is posted and may be viewed in each public library located within LG&E's service territory or at the LG&E office where bills are paid.

Comments regarding the application may be submitted to the Public Service Commission, by mail to Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, or by sending an email to the Commission's Public Information Officer at psc.info@ky.gov. All comments should reference Case No. 2018-00295.

The rates contained in this notice are the rates proposed by LG&E, but the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice. A person may submit a timely written request for intervention to the Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602, establishing the grounds for the request including the status and interest of the party. If the commission does not receive a written request for intervention within thirty (30) days of initial publication or mailing of the notice, the commission may take final action on the application.

A copy of the Notice of Filing and the proposed tariff, once filed, shall also be available for public inspection on LG&E's website at www.lge-ku.com, or through the Public Service Commission's website at http://psc.ky.gov.

**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(2)**
**Sponsoring Witness: Robert M. Conroy**

## Description of Filing Requirement:

*Notice of Intent. Utilities with gross annual revenues greater than $5,000,000 shall notify the Commission in writing of its intent to file a rate application at least thirty (30) days, but not more than sixty (60) days, prior to filing its application.*

*(a) The notice of intent shall state if the rate application will be supported by a historical test period or a fully forecasted test period.*

*(b) Upon filing the notice of intent, an application may be made to the commission for permission to use an abbreviated form of newspaper notice of proposed rate increases provided the notice includes a coupon that may be used to obtain a copy from the applicant of the full schedule of increases or rate changes.*

*(c) Upon filing the notice of intent with the commission, the applicant shall mail to the Attorney General's Office of Rate Intervention at a copy of the notice of intent or send by electronic mail in a portable document format, to rateintervention@ag.ky.gov.*

## Response:

See attached.

The Commission granted the request of Kentucky Utilities Company ("KU") and LG&E to publish an abbreviated newspaper customer notice.[3] Also, KU and LG&E are required to post the full customer notice in each public library located in the service territories.[4]

**RE: Application of Louisville Gas and Electric Company for an Adjustment of Its Electric and Gas Rates**
**Case No. 2018-00___**

Dear Ms. Pinson:

Please take notice that Louisville Gas and Electric Company ("LG&E") intends to file on or after September 28, 2018, an application for a general adjustment in its electric and gas rates, including changes to its electric and gas tariffs. This application will be supported by a fully forecasted test period ending April 30, 2020.

LG&E has contemporaneously filed a Notice of Election of Use of Electronic Filing Procedures for this proceeding. Please assign this matter a case number and style and advise us of same so that it can be incorporated in the application and supporting testimony before filing with the Commission.

Sincerely,

Robert M. Conroy

## NOTICE OF ELECTION OF USE OF ELECTRONIC FILING PROCEDURES

(Complete All Shaded Areas and Check Applicable Boxes)

In accordance with 807 KAR 5:001, Section 8, Louisville Gas and Electric Company gives notice of its intent to file an application for an adjustment of its electric and gas rates with the Public Service Commission no later than September 28, 2018 and to use the electronic filing procedures set forth in that regulation.

Louisville Gas and Electric Company further states that:

| | Yes | No |
|---|---|---|
| 1. It requests that the Public Service Commission assign a case number to the intended application and advise it of that number as soon as possible; | [X] | [ ] |
| 2. It or its authorized representatives have registered with the Public Service Commission and are authorized to make electronic filings with the Public Service Commission; | [X] | [ ] |
| 3. Neither it nor its authorized representatives have registered with the Public Service Commission for authorization to make electronic filings but will do so no later than seven days before the date of its filing of its application for rate adjustment; | [ ] | [X] |
| 4. It or its authorized agents possess the facilities to receive electronic transmissions; | [X] | [ ] |

5. The following persons are authorized to make filings on its behalf and to receive electronic service of Public Service Commission orders and any pleadings filed by any party or the Public Service Commission Staff:

| Name | Electronic Mail Address |
|---|---|
| Robert M. Conroy | robert.conroy@lge-ku.com |
| Allyson K. Sturgeon | allyson.sturgeon@lge-ku.com |
| Kendrick R. Riggs | kendrick.riggs@skofirm.com |

| | Yes | No |
|---|---|---|
| 6. It and its authorized representatives listed above have read and understand the procedures for electronic filing set forth in 807 KAR 5:001 and will fully comply with those procedures unless the Public Service Commission directs otherwise. | [X] | [ ] |

Signed ________________

Name: Robert M. Conroy

Title: VP, State Regulation and Rates

Address: 220 West Main Street
Louisville, KY 40202

Telephone Number: 502-627-3324

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(6)(a)**
**Sponsoring Witness: Robert M. Conroy**

## Description of Filing Requirement:

*The financial data for the forecasted period shall be presented in the form of pro forma adjustments to the base period.*

## Response:

The financial data for the forecasted period is presented in the form of pro forma adjustments to the base period.

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(6)(b)**
**Sponsoring Witness: Robert M. Conroy**

**Description of Filing Requirement:**

*Forecasted adjustments shall be limited to the twelve (12) months immediately following the suspension period.*

**Response:**

Forecasted adjustments have been limited to the twelve (12) months immediately following the suspension period.

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(6)(c)**
**Sponsoring Witness: Robert M. Conroy**

**Description of Filing Requirement:**

*Capitalization and net investment rate base shall be based on a thirteen (13) month average for the forecasted period.*

**Response:**

Capitalization and net investment rate base are based on a thirteen (13) month average for the forecasted period.

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(6)(d)**
**Sponsoring Witness: Robert M. Conroy**

**Description of Filing Requirement:**

*After an application based on a forecasted test period is filed, there shall be no revisions to the forecast, except for the correction of mathematical errors, unless the revisions reflect statutory or regulatory enactments that could not, with reasonable diligence, have been included in the forecast on the date it was filed. There shall be no revisions filed within thirty (30) days of a scheduled hearing on the rate application.*

**Response:**

LG&E acknowledges this requirement.

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(6)(e)**
**Sponsoring Witness: Robert M. Conroy**

**Description of Filing Requirement:**

*The commission may require the utility to prepare an alternative forecast based on a reasonable number of changes in the variables, assumptions, and other factors used as the basis for the utility's forecast.*

**Response:**

LG&E acknowledges this requirement.

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(6)(f)**
**Sponsoring Witness: Christopher M. Garrett**

## Description of Filing Requirement:

*The utility shall provide a reconciliation of the rate base and capital used to determine its revenue requirements.*

## Response:

See attached.

# LOUISVILLE GAS AND ELECTRIC COMPANY

### Reconciliation of Capitalization and Rate Base

| Line No. | Description | 13 Month Average Total Company Balance | 13 Month Average Electric | 13 Month Average Gas |
|---|---|---|---|---|
| 1 | Rate Base Percentage (Schedule J-1.1/J-1.2) | | 80.33% | 19.67% |
| 2 | Capitalization: | | | |
| 3 | Common Equity | $ 2,437,703,817 | | |
| 4 | Long-Term Debt | 2,088,568,822 | | |

# Financial Planning Modeling Process

## Table of Contents

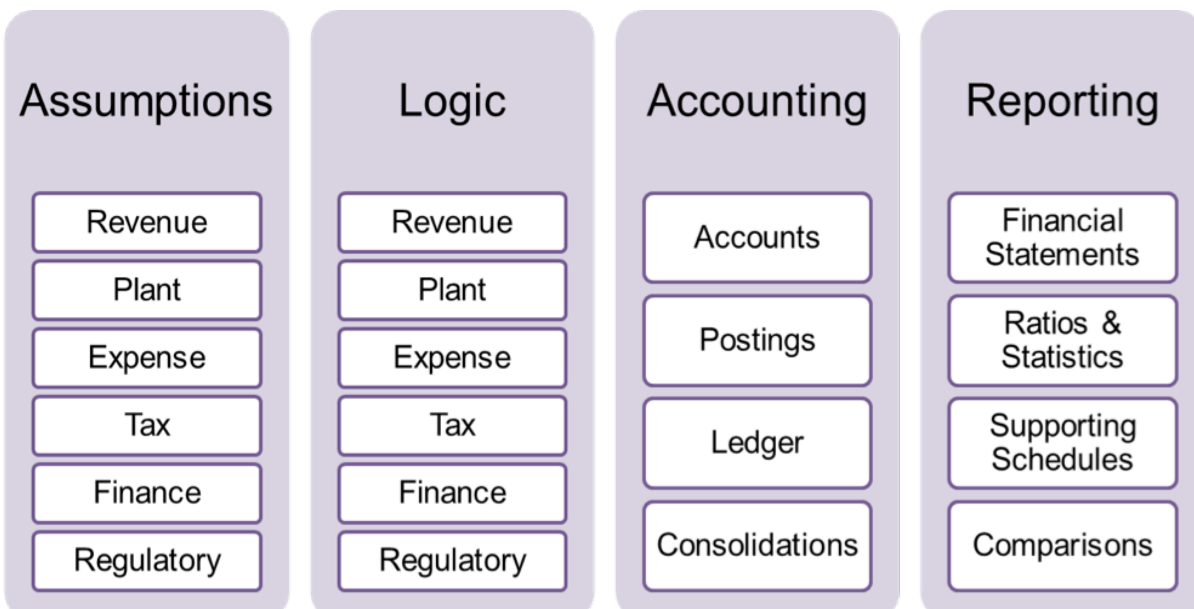
# 1. General

*Introduction*

The Financial Planning & Analysis group develops the five-year Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") and LG&E and KU Energy LLC ("LKE" or collectively "the Companies") business plan. The business plan is developed using the financial planning system, UIPlanner, an iterative model, which incorporates numerous inputs from the business as well as various formulas, algorithms and set logic. The business plan includes the projected five-year income statements, balance sheets and cash flows for the Companies.

*UIPlanner (UI)*

UI allows the Companies to manage all of the assumptions in the business plan, integrates the business logic, utilizes built-in accounting controls, and produces robust analyses and reports.



[1]

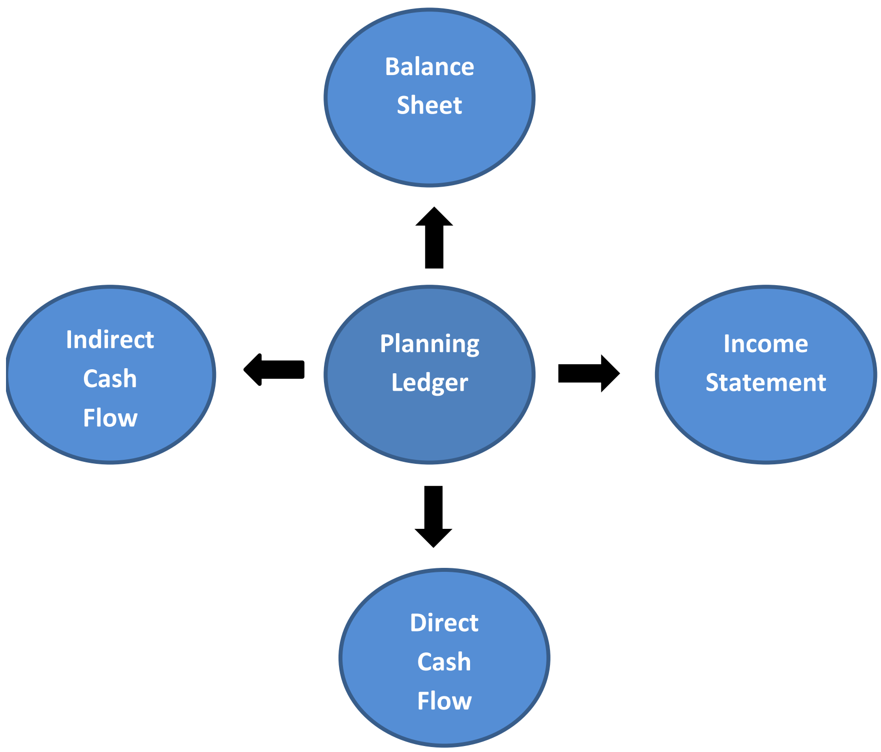
Planning assumptions are managed in UI. UI is superior to an Excel-based model because it allows for sharing assumptions in a common database. UI tracks changes to assumptions and maintains a record of who made the change and when.

UI has built-in accounting capabilities, which function identical to a general ledger (see Planning Ledger flow chart below). Double-entry accounting of debits and credits is

[1] http://utilitiesinternational.com/uiplanner-software/planning/

developed in UI to maintain integrity of financial statements. If a posting is not entered in UI or if one side of the debit/credit is missing, UI will produce an error message before it will produce a financial statement. Ledger accounts are organized with a configurable roll-up structure. UI also allows for combining several accounts to a summary account for consistent and concise formatting in the production of financial statements. These summary accounts are rolled up into a high-level area (asset, direct cash, expense, indirect cash, liability, or revenue). Each account in the ledger is also associated with an indirect cash flow account which can be customized to generate a detailed cash flow statement.

**Planning Ledger Flow Chart**



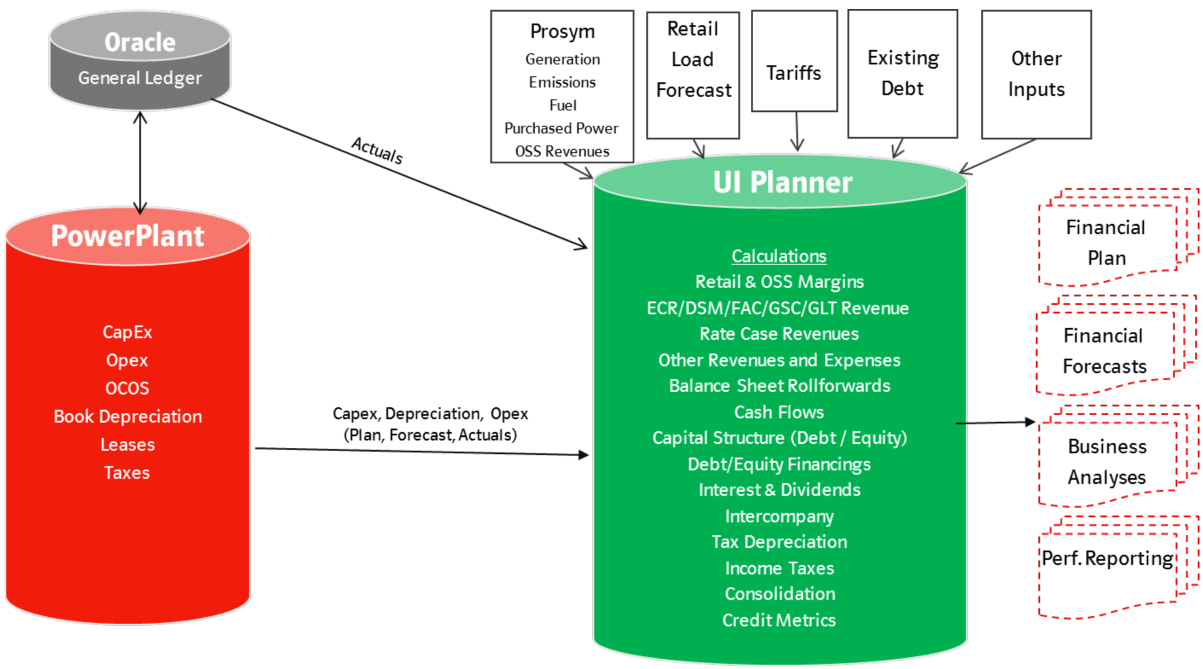
Each month actual balances are imported from the Oracle General Ledger (GL) to update UI with the latest balances and to compare the budget and revised forecast to actuals. The actuals imported into UI are compared to the trial balance in Oracle monthly to ensure completeness and accuracy.

Data in UI is entered into UI either manually or through a download from text files and housed within "cases". A collection of cases is grouped to create a "scenario". For example, the "2018 Business Plan" is a scenario in UI. After a scenario runs through the iterative process in UI, users can view the Financial Statements and other various reports in UI.

Security is specific by user in UI. When data assumptions are entered, the person entering the assumptions is tracked within UI for auditing purposes. Only certain users have the ability to edit data entry and logic assumptions. In addition, when a scenario, such as the business plan, is finalized, the scenario is locked so no further changes can be made. Only certain users have the ability to lock and unlock scenarios and cases. Logic from a case and/or scenario can be copied and utilized in additional what-if analyses. UI allows for creating and managing multiple scenarios with various planning assumptions and business logic in a transparent and efficient manner.

See the Financial Planning Software Flow Diagram below, detailing which systems provide data and other forms of inputs to UI to create the financial plan, forecast, business analysis and other management reports. This document summarizes the systems used to produce the business plan.

**<u>Financial Planning Software Flow Diagram</u>**



*Budgeting Overview*

LKE uses a "bottom up" budgeting approach. The process begins with the various business units preparing detailed budgets for their individual areas of responsibility, consisting of expense items, certain types of LOB managed revenues, and capital spending. The budgets prepared by the business units are reviewed and approved by LKE management. The LKE Officers ultimately approve the LKE consolidated annual budget. If any changes occur during the review and approval process, the changes are communicated to the appropriate line of business (LOB), and each LOB submits a revised budget through the same review and approval process.

Each year, LKE prepares a five-year forecast of operating revenues and expenses, which is the starting point for preparing the annual budget and the five-year business plan. Each business unit is required to create its own five-year capital and operation and maintenance (O&M) expense plan to produce an all-inclusive operating plan which is presented for review by the Officers. The five-year capital and O&M plan is developed and accumulated in PowerPlan, the Company's corporate budgeting application. These details from PowerPlan are uploaded into the financial planning system – UI.

## 2. Revenue and Load Forecast

*Retail Revenue*

In order to calculate revenues, UI logic uses the load forecast and the tariffs that need to be applied to the forecast. For energy, UI multiplies megawatt hours times the energy tariff. For demand, UI calculates base, intermediate and peak demand revenue by multiplying the megawatt or kilovolt-ampere (kVA) times the demand tariff for base, intermediate and peak demand. For customer charge revenue, UI multiplies the number of customers times the customer charge. For base fuel revenues, UI multiplies the base fuel rate times the megawatt hour sales by jurisdiction.

The first step in preparing the operating revenues is to obtain an energy, demand and customer forecast of the projected electric and gas sales. The load forecasts are calculated on a yearly basis for each tariff. See the Annual Electric Sales and Demand Forecast Process Document, the Annual Natural Gas Volume Forecast Process Document and associated presentations, for detailed descriptions of the assumptions and methodology used in developing the electricity and gas load forecast. The following information is uploaded into UI:

- Energy forecast for each month and year, by tariff
- Demand forecast by month and year, by tariff
- Customer count by month and year, by tariff
- Base fuel revenues forecast by month and year

Tariff rates are entered into UI based upon the tariff book currently in effect. UI then calculates energy, demand, and customer revenues by tariff. Allocators are used to convert the load from tariff rate to revenue class in UI. The allocators are supplied by the Sales Analysis and Forecasting group. The previous calendar year actuals data is utilized to calculate the allocators. The revenues are then posted to the income statement by revenue class.

*Transmission Revenue*

External Transmission revenue is imported into UI from an excel spreadsheet prepared by the Transmission Policy and Tariffs department. The projected external transmission amounts are calculated as follows:

1. Network Service (the forecast multiplied by the associated rates)
   a. The volumetric forecasts are provided by the customer by year.
   b. Volumetric forecasts are based on the summer and winter peaks provided and interpolated over a twelve month period.
   c. The transmission rates are forecasted based on Attachment O of the Open Access Transmission Tariff (OATT).
2. Point to Point Service (Service request multiplied by the associated rates)
   a. Long term service – is based on the original transmission request, these volumes remain fixed until their expiration unless there was newer information which indicated these long term reservations would be rolled over.
   b. Short-term firm service – is projected based on annual historical revenue.
   c. The transmission rates are forecasted based on Attachment O of the OATT.

The projected intercompany transmission revenue is imported into UI from PowerPlan based on the generation forecast provided by the Generation Planning department.

The transmission rates are documented in the LG&E and KU OATT, which is reviewed and approved by the FERC. The projected load is applied to the appropriate transmission rates to calculate the transmission revenue.

*Miscellaneous Revenue*

Miscellaneous revenue is comprised of:

- Forfeited discounts/late payment charges
- Reconnect, temporary service, unauthorized reconnect, gas meter and inspection charges and other service charges
- Rent from electric and gas property
- Other Electric and Gas revenues
- Refined coal reservation fees
- Electric vehicle charging station rental revenues

For most of the above items, the miscellaneous revenue is calculated by utilizing historical trends based on the most recent three years of data. Three years gives an appropriate distribution of data to evaluate the account activity. This data is then uploaded into UI based on the calculations done in Excel.

Accounts associated with cable TV attachments, rent from fiber optic, facility charges, and rent received from pole attachments, property, and equipment utilize the most recent year of data.

Refined coal exclusivity fees are fees received for allowing companies to reserve the right to locate refined coal facilities at Company generating stations.

Electric vehicle charging station rental revenues are based on budgeted EVSE-R electric vehicle charging station installations and monthly charging unit fees per existing tariffs.

# 3. Mechanisms

*Background*

The Kentucky Public Service Commission (KPSC) has adopted a series of regulatory mechanisms that reduce regulatory lag and provide for timely recovery of and a return on, in some instances, prudently incurred costs. The following represents an overview of certain key mechanisms and assumptions reflected in the business plan.

*Environmental Cost Recovery (ECR)*

The Utilities are entitled to recovery of operating costs and recovery of and a return on capital costs of complying with Federal Clean Air Act with a two-month lag. The first step is to calculate the total revenue requirement which involves determination of environmental rate base and operating expenses for each KPSC approved ECR project.

Within UI the revenue requirement for ECR is calculated using the following:

- The logic calculates a monthly ending rate base by adding ECR capital expenditures from the capital plan to the previous months' ending rate base; subtracting ECR depreciation for the period and increase/decrease in ECR deferred taxes calculated within UI. A return on the ending rate base is calculated using a weighted average cost of capital computed within UI using weighted average cost of debt and allowed return on equity;
- ECR Depreciation and O&M is then added to the return on rate base to calculate a total revenue requirement;
- A jurisdictional factor is computed within UI using a ratio of KY retail to total revenue and applied to the total revenue requirement to calculate a jurisdictionalized ECR Revenue Requirement;
- The model then deducts any ECR revenue recovered within the base rates to generate a net ECR mechanism revenue.

*Demand Side Management (DSM)*

DSM provides for concurrent recovery of DSM costs and provides incentive for implementing DSM programs, including lost revenue.

In UI, there are four components for DSM revenue:

- DSM expense as imported from PowerPlan within the Cost of Sales import
- DSM incentive revenue as calculated in UI on the eligible portion of programs
- DSM lost sales revenue as calculated in UI using the imported lost sales volume and rates from the DSM Energy Efficiency model
- DSM capital revenue requirement is calculated in UI by adding the capital spend imported from PowerPlan to the previous month's ending DSM rate base, adjusted for depreciation and the increase/decrease in deferred taxes. A return on the DSM rate base is calculated using a weighted average cost of capital computed within UI using weighted average cost of debt and allowed return on equity. In addition, the depreciation and O&M expenses are added to the return on the DSM rate base to calculate the total DSM Capital Revenue Requirement.
- DSM expense, incentive revenue, and lost sales revenues are added to the capital revenue requirement to calculate the total DSM revenue requirement.

*Gas Line Tracker (GLT)*

GLT provides for recovery of costs associated with replacing customer service risers, replacing and installing service lines, leak mitigation, main replacements, the steel gas service line program and the transmission pipeline modernization.

The GLT revenue requirement is calculated in UI using the following:

- The rate base is rolled forward for identified GLT projects using capital spend and in service dates per PowerPlan as well as the calculated deferred income taxes;
- The rate of return on rate base is computed within UI using weighted average cost of debt and allowed rate of return on equity.
- GLT Depreciation, Property Tax and O&M are then added to the return on rate base to calculate a total revenue requirement;

*Fuel Adjustment Clause (FAC)*

The FAC mechanism allows for near-real time recovery of allowed fuel expenses.

Total fuel expense incurred consists of all generation and purchased power costs. For FAC purposes, total recoverable fuel expense includes total incurred expense reduced by the following components: non-energy components of purchased power expense; substitute generation or purchased power costs during forced outages; coal burned for Off-System

Sales (OSS) electric generation, company use, line loss and unrecoverable intercompany sales. The total recoverable fuel expenses is then compared to the base fuel revenues. The over/under is booked to the FAC.

*OSS*

Included in a previous rate case settlement was an OSS Tracker which results in sharing the OSS margins on a 75 percent - 25 percent basis, with 75 percent of the OSS margins being credited to customers via the FAC.

*Mechanism Revenue Calculations*

For all mechanisms, except for the GLT, the total mechanism revenue requirement is divided by the total forecasted megawatt hours by electric rate code associated with each mechanism. These values are applied as a dollar per megawatt hour to calculate the revenue by electric rate code.

For GLT, the total mechanism revenue requirement is allocated to the customer class associated with GLT based on the class allocation percentages from the most recent filing.

The revenues from all mechanisms are recorded to the income statement as revenues from customers.

## 4. Generation Forecast and Other Cost of Sales (OCOS)

The PROSYM application is used to calculate generation and OSS. See the annual Plan Generation Forecast Process Document and related presentations, for a detailed description of the assumptions and methodology used to calculate these inputs.

The projected data includes fuel burn, generation, purchase power, emissions, and OSS levels from an hourly dispatch model. Imported into UI is a monthly, by unit, volumes, revenues and costs associated with off system sales, purchased power, emissions, generation, and fuel burn for the planning period.

*Power Purchase Agreement*

Power purchase agreement costs are based on the contracts set with the third party power producers. The amounts per the contracts are imported into UI, which is recorded on the income statement as the purchased power cost. The information uploaded into UI by month and year includes the following costs:

- Capacity and demand payments
- Energy payments, and
- Firm gas transport costs, if applicable

UI logic ensures the power purchase cost reflects the recovery of the energy and firm gas transport costs through the FAC and the capacity and demand costs through base rates.

*Other Cost of sales (OCOS)*

OCOS inputs come from PowerPlan and PROSYM. OSS, purchased power, and fuel related costs come from PROSYM, as noted above. Emissions, mechanism (DSM, ECR, ECR, Gas Supply Clause, and GLT), and transmission related costs come from PowerPlan.

OCOS includes variable production consumables used by the power plants in the generation of electricity. For coal generating units, this includes the cost of operating environmental controls and the cost of controlling coal combustion residuals (CCR). This includes:

- Limestone – $SO_2$ emission control for flue gas desulfurization (FGD) systems
- Ammonia – $NO_X$ emission control for selective catalytic reduction (SCR) systems
- Hydrated Lime – $SO_3$ emission control for sorbent injection systems
- Powder Activated Carbon – Hg emission control for pulse jet fabric filter systems

The individual power plant's budget coordinator, in coordination with the operations leadership team at the plant, calculates the costs. This is a function of the usage rates for the consumables utilized by each individual operating unit. This is multiplied by the unit price determined by fleet wide contracts with suppliers. Planned outages and forecasted generation levels by year are included in these assumptions for each unit.

The calculation for these consumables includes the following inputs and calculations:

| Unit Price | Usage Rate | Unit Production | Conversion | Total Projected Cost |
|---|---|---|---|---|
| $/ton (lbs.) | lbs. /hour | MWH's by unit | $/MWH | Total $ by month and year |

These costs are loaded into PowerPlan under the appropriate FERC account and then uploaded into UI and incorporated into the Income Statement.

The cost of sales items related to fuel burn, emissions and purchased power are reflected in the Cost of Electric Sales section of the Income Statement.

*Gas Supply*

Gas supply costs are calculated by using the gas load forecast priced out at contracted rates and market prices for open/indexed positions.

# 5. Operations & Maintenance (O&M) (Non-fuel)

O&M expenses are included as part of the Income Statement and reflect the labor and non-labor expenditures incurred and charged to the appropriate FERC account and company location. The budget is developed in a "bottoms up" approach and is reviewed and approved by several levels of management before being entered into PowerPlan for consolidation. This information is then uploaded to UI.

*Labor Cost*

The Company's current labor base is obtained from PeopleSoft annually in March. The PeopleSoft data is exported to excel where the wage increases, vacation hours, personal days, and sick time are manually added. The adjusted data is imported into PowerPlan with the labor forecast being available by mid-March. The forecast includes full-time and part-time regular employees, summarized by employee type and expenditure organization.

Updates to the forecast in PowerPlan are due in early April. This updated data is used to calculate employee benefit costs (also referred to as 'burdens' - which include costs such as pension, savings plan, medical, dental, and payroll taxes), which will be added to the forecast by mid-April. The labor forecast is not finalized at this time and changes can be made, as required.

*Non-labor Expenses*

The management teams and budget coordinators throughout the LOBs prepare the budget for non-labor O&M expenses at the same time as the labor budget. These expenses are budgeted to the appropriate FERC account in PowerPlan.

Planned changes in costs within accounts can be specifically escalated according to contractual changes and other volume based assumptions or expected changes in primary cost categories such as generation facilities, outages, workforce plan changes, demand-side management, and environmental costs.

- The labor rates are subject to possible adjustment pursuant to union negotiations. The rate increase assumptions are based on annual benchmarking studies performed.
- Non-labor expenses are increased at known cost increases due to contract language, fixed amounts, or historical trend increases in costs. Non-labor expenses do not contain a general inflationary increase.

## 6. Property Tax

Property taxes are estimated annually based on net book asset values, including CWIP, as of December 31 of the previous year and include several current asset balances such as; fuel inventory and materials and supplies. The expense accrual is spread evenly over twelve months while cash payments are based on historic trends, which normally result in large cash payments during the fourth quarter of a calendar year.

The primary source of data used to calculate the estimates is within the UI report labeled "KY Plant Account". The plant account assignment determines the property classification (real estate, manufacturing machinery, other tangible) and then the appropriate tax rates are applied to those balances. State and local tax rates are based on prior year settlements with an assumed increase to local tax rates of two percent per year.

## 7. Other Income Statement Items

Other income and expense items not included above include:

- Donations – annual budget is approved by Senior Officers based on planned commitments and in support of Community and Corporate Responsibility initiatives
- Employee Recognition costs (non-safety related) – based on detailed review of historical and projected expenses for employee recognition programs under each business unit
- Non-Utility Revenues and Expenses – based on detailed review of historical and projected items, including contractual based amounts and projected increases
- Interest income and dividends received – primarily interest received which is based on the interest income from temporary cash investments. The interest rate is obtained from the Corporate Finance department and UI calculates the monthly expected interest income based on the temporary cash investment balance.

## 8. Taxes

*Current and Deferred Income Taxes*

Income taxes are calculated using several schedules within UI. The calculation starts by utilizing the monthly pretax book income per UI's income statement. Pretax book income is then adjusted by permanent and temporary book/tax differences to derive taxable income. The book/tax differences are primarily pulled from multiple sources within UI, which include;

- tax depreciation,
- book depreciation,
- regulatory asset & liability movement,

- pensions/post-retirements, and
- capitalized interest

Other book/tax differences are manually input into UI. Taxable income is multiplied by the statutory tax rates to determine current tax expense. Quarterly tax payments are derived based on current tax expense.

Deferred taxes are calculated within UI by using the temporary book/tax differences used in the current tax calculation and applying the statutory tax rates. Adjustments to deferred tax expense are made for excess deferred taxes, investment tax credit (ITC) amortizations, and ITC basis reductions as provided by the Tax department. Additionally, regulatory tax movements are manually entered into UI based on schedules maintained by the Tax department.

## 9. Capital / Utility Plant

*Background*

Each LOB develops a five-year Capital plan by individual project that includes the start date, the timing of expected spend projections and the in service date for each project. The Capital plan is entered and maintained in PowerPlan.

The Senior Officers approve the Capital plan each year. The Capital plan is presented to the Senior Officers for approval by a subcommittee referred to as the Resource Allocation Committee ("RAC"). The RAC includes leaders from multiple LOBs so that Capital decisions are made based on priorities of the company as a whole.

In order to import the capital budget into UI, Financial Planning receives an excel file from PowerPlan containing monthly capital construction expenditures (CWIP) and cost of removal (RWIP) by utility. There are categories in the model used to separate mechanism capital (ECR, DSM, GLT) from non-mechanism capital.

## 10. Closings to Plant in Service and Depreciation

After capital spending is booked to CWIP on the balance sheet, UI gets an import from PowerPlan by plant account to determine additions to Plant in Service.

UI also imports a depreciation forecast that is done based on the Capital plan, including property classifications and in service dates, and approved depreciation rates.

The approved depreciation rates[2] are from the latest depreciation study, which are broken into life, salvage, and cost of removal per depreciation group. The rates are annual, so they are divided by 12 and multiplied by the monthly plant in service ending balances. The

[2] Filed rates based on most recent depreciation study to be approved by the KPSC.

depreciation group to which an asset belongs is determined by the location and plant account selected at the time the capital project is setup in PowerPlan.

The Plant in Service ending balance for the most recent month of actuals is pulled out of PowerPlan. The ending balance of each forecast month is calculated as the beginning Plant in Service balance plus any capital additions placed in service for the month minus any asset retirements for the month. We use a half-month convention for additions and retirements. In the first month of an addition or retirement to Plant in service, we divide the normal depreciation amount by two. This is done to average out the spend since the addition or retirement does not always occur on day one of the month.

The additions to Plant in Service are based on the Capital plan and the estimated in-service dates on those assets. If the asset is already in service and additional money is spent on the asset, the spend is put in Plant in Service in that same month of spend. If the asset is not yet in service and spend occurs, it is held in CWIP until the month of the estimated in-service date in PowerPlan, on which date the entire CWIP balance is moved to plant in service.

## 11. Dividends, Debt and Equity

*Dividends:*

LG&E and KU (the "Utilities") pay dividends to its parent, LKE, on a quarterly basis. The dividend has historically been calculated in the model using a payout assumption equal to 65 percent of the previous quarter's net income. This percentage may be revised to maintain a balanced capital structure. Equity contributions from the parent may also be received by LG&E and KU to maintain the desired capital structure. These payout ratios may change over time.

To maintain the desired capital structure at LG&E and KU (53% equity/47% debt), LKE makes equity contributions to the Utilities or the Utilities pay extra dividends to LKE. At any time where the Utilities can pay dividends in excess of 65 percent, that amount is paid to LKE, who in turn utilizes the additional cash to pay down the intercompany Note Payable to PPL. If LKE needs funds to provide equity contributions to the Utilities, LKE either receives equity contributions from PPL or borrows intercompany debt from PPL.

*Capital Structure:*

LG&E and KU strive to maintain a ratio of 53% equity and 47% debt. Within UI, the debt balancing and equity ratio targeting logic is different on the quarter versus non-quarter months. Equity ratio targeting reviews the capitalization ratios and rebalances it every quarter to 53% equity and 47% debt. LKE serves as the medium to move cash from the Utilities to parent or from the parent to the Utilities to maintain this ratio. Cash balancing logic looks at the cash needs and calculates how to fund those needs. It is important to note that UI limits cash balances at the Utilities to $5 million unless short-term debt is zero and there is positive cash flow from operating and investing operations.

The following information is entered into UI for each individual long-term debt issuance:

- company,
- issue date,
- interest rate,
- first interest payment date,
- issue amount, and
- retirement date

These debt issuance properties are entered and maintained in UI under the Edit Attributes module. The attributes in the Business Plan are compiled to create a case, which is used to run the Business Plan scenario.

On the non-quarter months, UI calculates cash needs from operating and investing operations and issues debt equal to cash shortage. Short-term debt in the form of commercial paper is issued first until it reaches a maximum as prescribed by the Corporate Finance department (typically $300 million by Utility). The Utilities each have approved commercial paper programs of $350 million and FERC has approved short-term debt of up to $500 million for each utility. However, the Utilities need to maintain liquidity for emergencies and to support certain floating rate tax-exempt bonds. Therefore, the Utilities have a general modeling limit of $300 million on the commercial paper balances. The maximum can be changed after discussions with the Treasurer and the CFO. Once the maximum short-term debt is reached, long-term debt is issued in increments of $300 million or more and the balancing starts again the next month. The $300 million minimum is used because at that size the bonds are index-eligible and more attractive to investors, which results in a lower interest rate.

On the quarter months, the model balances equity and debt to a 53:47 ratio over multiple iterations. While performing the debt to equity targeting, UI issues only short-term debt to fund cash needs from operating and investing activities. The model is monitored to make sure that short-term debt balances are always within the acceptable limits. Similarly, to the non-quarter months, once the maximum short-term debt is reached, long-term debt is issued in increments of $300 million or more. Capital contributions in the form of equity from LKE are used to maintain the proper equity to debt ratios. LKE receives capital contributions from PPL to fund the Utilities cash needs.

All short-term interest rates on cash balances are based on a spread to the one-month LIBOR. The spread is based on current market issuances for similarly rated companies. For long-term debt, the rates are based on a spread to the US treasury rates (five-year, ten-year, thirty-year, etc.). The long-term debt spreads are also based on current levels for similarly rated entities and projected changes in those spreads for forecast periods. The forward curve as of a selected date is used to determine future LIBOR and US treasury rates.

# 12. Pension & Postretirement

Plan assumptions are evaluated by Senior Financial officers and Human Resources associates and the independent actuary. These assumptions are approved on an annual basis, barring any events requiring an interim re-measurement.

During the first half of the year, the independent actuary delivers a projection of estimated Plan funding, pension expense and pension liability for the five-year Business Plan based on management's assumptions. These assumptions include the annual discount rate, the expected return on plan assets, the expected annual wage increase, the annual mortality rate table, funding policy and other assumptions as needed. The actuary's projections also incorporate the 15-year amortization of gains and losses as agreed in the 2014/2015 Kentucky rate case.

The projected pension and postretirement costs received from the actuary such as the service cost, interest cost, return on plan assets, and amortizations of prior service cost, transition, and (gain)/loss are summarized by company and by program offering. These amounts are used to update the annual budget by reflecting changes to the balance sheet for the revised liability projections and the pension cost used when calculating the employee burden rates by company. The pension burden rates are included in the O&M and Capital budgets entered into PowerPlan. These amounts are spread by month consistent with the timing of the labor budget.

Pension funding is assumed to occur annually in January while postretirement funding is assumed quarterly with the 401(h) portion of the funding occurring all in the second quarter.

# 13. Other Balance Sheet assumptions

a. Balances

   The last actual monthly balances from the Balance Sheets were the starting points for this forecast (for this budget it was June). The amounts were imported to UI from the G/L. A detailed and thorough balancing process is also done to ensure all details from Oracle translate appropriately into UI.

b. Leases

   Beginning January 1, 2019 upon the adoption of Accounting Standards Codification (ASC) 842 Leases, all leases will be recorded on the balance sheet. The monthly balance sheet amounts are obtained from the lease report obtained from the Financial Accounting and Analysis department using the PowerPlan Lease module and this is uploaded into UI from a text file.

c. Cash

As noted above, minimum cash balances are set each year at $5 million per utility. This is based on discussion with Corporate Finance and if UI determines insufficient cash balances based on the projected activity short-term debt is issued.

d. Accounts Receivable and Unbilled Revenue

The monthly balances are based on forecasted revenues from customers and projected days of sales in receivables based on historical trends.

e. Fuels, materials and supplies (M&S)

Fuel inventory balances are developed based on targeted inventory levels for each generation plant. PROSYM is utilized to determine the amount of purchases needed to achieve the targeted inventory levels. Price assumptions for coal purchases utilize existing contract information as well as the assumed cost of coal that will be contracted in the future.

Natural Gas Inventory: Storage inventory levels are set within storage operating parameters in order to achieve maximum deliverability needed to meet winter season requirements. Price assumptions for gas purchases reflect forecasted gas prices and estimated pipeline transport costs. Materials and supplies inventory is based on the annual June balance and is adjusted for disposals.

f. Prepayments affecting the balance sheet include insurance, Information Technology (IT) contracts, Kentucky Public Service Commission Fees (PSC), and Tennessee Valley Authority (TVA) fees. For insurance, the amortization of the balance/expense begins at the start of the policy and continues through the term of the policy. For IT contracts, the estimated balances are amortized monthly over the period of services. For the PSC and TVA fees, we receive a bill for the current year. The out years of the budget are escalated at an appropriate rate and the yearly cost is amortized over twelve months.

g. Unamortized debt expenses

For each bond issued, the Company incurs debt issuance costs, which are amortized over the period required by GAAP, generally the life of the debt issued. Additional financing costs that require amortization are unamortized loss on reacquired or remarketed debt, which is the expense that remains to be amortized when a debt instrument is remarketed/ refinanced / repurchased. The financing costs are amortized over the life of the replacement debt. Amortized financing costs are provided by Corporate Finance for future periods and input into UI. The amortization expense flows to the income statement under interest expense. The unamortized financing costs are found on the balance sheet under other non-current assets and the unamortized loss on reacquired or remarketed debt are found on the balance sheet under regulatory assets.

h. Regulatory Assets and Liabilities

Adjustments to the regulatory assets and liabilities are obtained from schedules produced by the Company's Regulatory Accounting Department, reflecting amortization rates previously approved by the Commission on existing line items and line of business proponent estimates for proposed line items. These schedules include storm costs, rate case expenses, deferred income taxes, CCR Asset Retirement Obligation (ARO) recovery, etc.

Unrecognized pension and post-retirement costs are amortized as part of the monthly expense projections discussed earlier.

UI performs calculations for regulatory assets and liabilities associated with the various rate mechanisms to address regulatory lag issues and under/over recoveries. The amortization of interest rate swap regulatory assets and liabilities are performed using UI logic.

i. ARO

The calculation of accretion expense is performed in an automated fashion within the PowerPlan Fixed Asset System. Accretion and depreciation expense are calculated by taking the beginning ARO liability balance multiplied by the discount rate / depreciation rate for each ARO. The ARO depreciation and accretion are recorded onto the income statement and then reclassified back into the balance sheet as a regulatory asset.

j. Accounts Payable

The material monthly balances are based on a lag utilizing capital spend and operation and maintenance expense monthly totals. Actual payables range from 15 days to 45 days from invoice date, the budget utilizes 50% of the current month and 50% of the prior month as it relates to capital spend and operation and maintenance expense monthly totals.

# Electric Sales & Demand Forecast Process

PPL companies

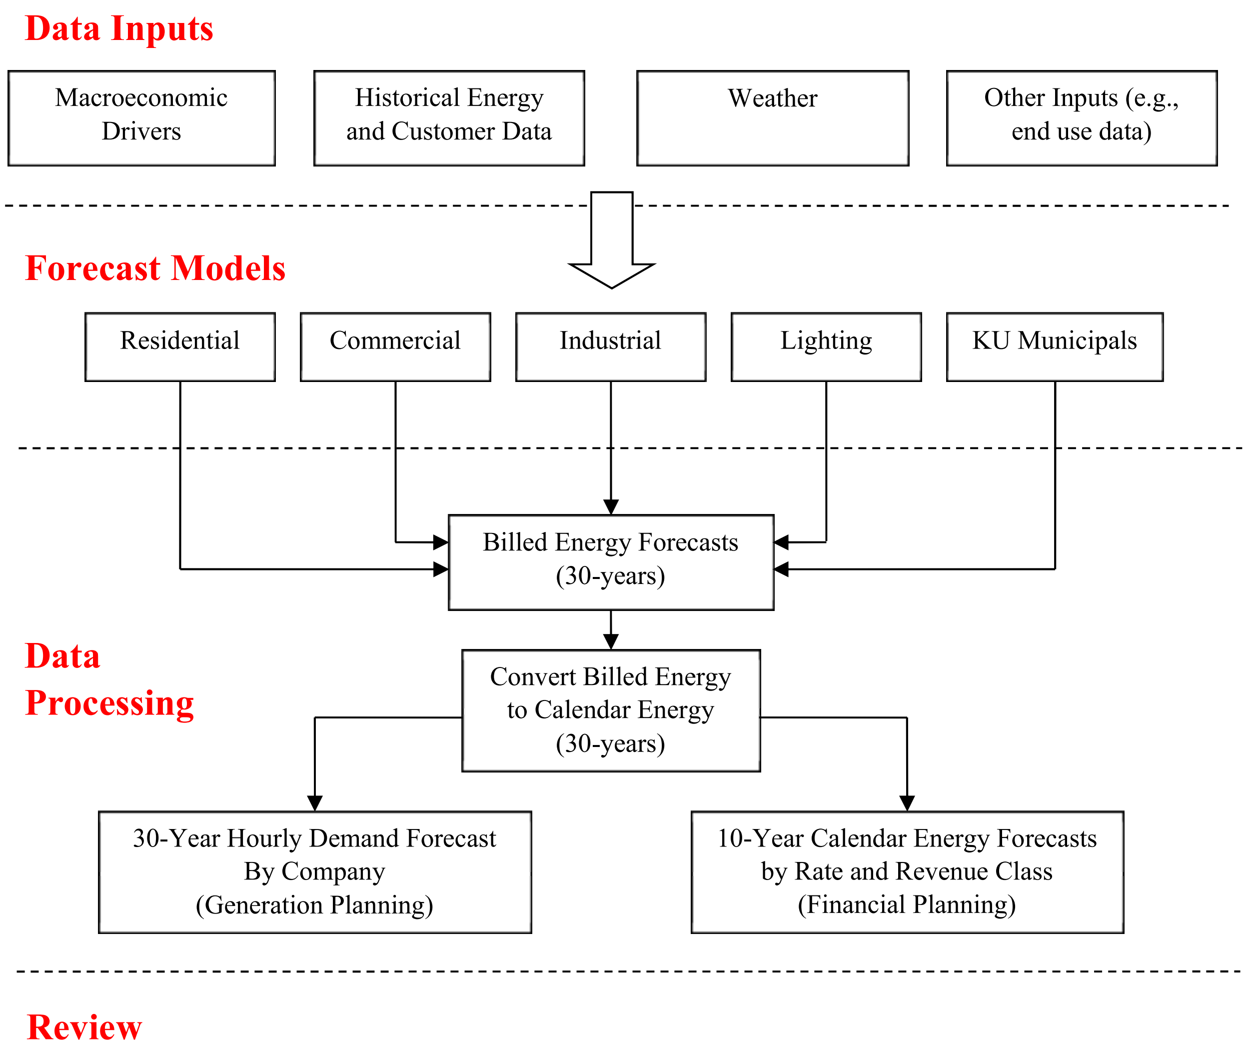
## Sales Analysis & Forecasting
## September 2018

## Table of Contents

# 1. Introduction

The Sales Analysis & Forecasting group develops the sales and demand forecasts for Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") (collectively, "the Companies"). These forecasts serve as foundational inputs for the Generation Planning department's Generation Forecast and the Financial Planning department's Business Plan. This document summarizes the processes used to produce the sales and demand forecasts. The forecast process can be divided into four parts (see Figure 1).

**Figure 1 – Load Forecasting Process Diagram**



The first part of the forecast process involves gathering and processing input data. The following are key inputs to the forecast process:

- Macroeconomic data
- Historical energy and customer data
- Weather data (20-year normal degree-day series)

- Other data, including billing portion forecasts, class-level electricity price series, and residential appliance shares and efficiencies.

The input data is used to specify a number of forecast models for each company. Generally, each model is used to forecast energy sales for a group of customers with homogeneous energy-use patterns within the same, or similar, tariff rates.

Most of the forecast models produce monthly energy forecasts on a billed basis.[1] In the third part of the forecast process, the billed energy forecasts are allocated to calendar months and then to rate and revenue classes for the Financial Planning department.[2] In addition, a forecast of hourly energy requirements is developed for the Generation Planning department.[3]

The final part of the forecast process includes validating and documenting the forecast results. To ensure results are reasonable, the new forecast is compared to (i) the previous forecast and (ii) weather-normalized actual sales for the comparable period in prior years.

Each of these steps and the software tools used to produce the forecast are discussed in more detail in the following sections.

## 2. Software Tools

The following software packages are used in the forecast process:

- SAS, R
- Metrix ND (Itron)
- Microsoft Office: Excel, PowerPoint, Access
- @Risk

SAS, R, and Metrix ND are used to specify forecast models. The Microsoft Office tools are primarily used for analysis and presentations. Finally, @Risk is used to assess the reasonableness of the forecast.

[1] All customers are assigned to one of 20 billing portions. A billing portion determines what time of the month a customer's meter is read. Because the beginning and end of most billing portions do not coincide with the beginning and end of calendar months, most customers' monthly bills will include energy that was consumed in multiple calendar months. The energy on customers' bills is referred to as "billed" energy.
[2] Rate class defines the tariff assigned to each customer meter while Revenue class is a higher level grouping; a Revenue class consists of one or more rate classes.
[3] Energy requirements are equal to sales plus transmission and distribution losses.

# 3. Input Data

Table 1 provides a summary of data inputs. The sections that follow describe key processes used to prepare the data for use in the forecast process.

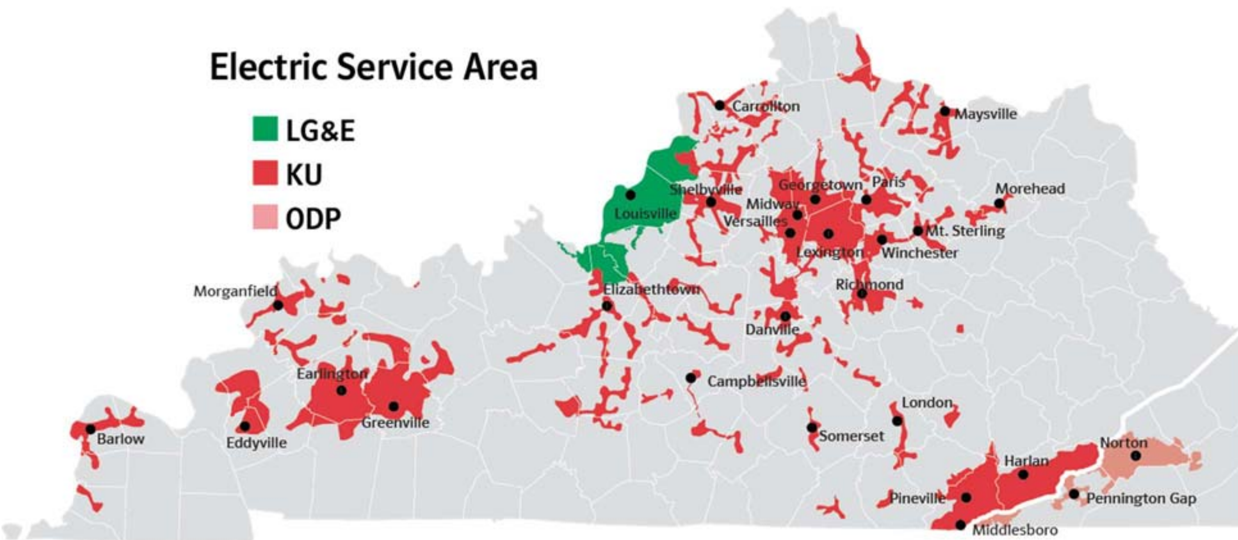
**Table 1 – Summary of Forecast Data Inputs**

| ***Data*** | ***Source*** | ***Format*** |
|---|---|---|
| State Macroeconomic and Demographic Drivers (e.g., Employment, Wages, Households, Population) | IHS Markit, Kentucky Data Center | Annual or Quarterly by County – History and Forecast |
| National Macroeconomic Drivers | IHS Markit | Annual or Quarterly – History and Forecast |
| Personal Income | IHS Markit | Annual by County |
| Weather | National Oceanic and Atmospheric Administration ("NOAA") | Daily HDD/CDD Data and Hourly Solar Irradiance by Weather Station – History |
| Billing Portion Schedule | Revenue Accounting | Monthly Collection Dates – History and Forecast |
| Appliance Saturations/Efficiencies | Energy Information Administration ("EIA"), 2010 LG&E/KU Residential Customer Survey | Annual – History and Forecast |
| Structural Variables (e.g., dwelling size, age, and type) | EIA, 2010 LG&E/KU Residential Customer Survey | Annual – History and Forecast |
| Elasticities of Demand | EIA / Historical Trend | Annual – History |
| Billed Sales History | CCS Billing System | Monthly by Service Territory and Rate Group |
| Number of Customers History | CCS Billing System | Monthly by Service Territory and Rate Group |
| Energy Requirements History | Energy Management System ("EMS") | Hourly Energy Requirements by Company |
| Annual Loss Factors | 2012 Loss Factor Study (by Management Applications Consulting, Inc.) | Annual Average Loss Factors by Company |
| Solar Installations | CCS Billing System, National Renewable Energy Laboratory ("NREL") | Net Metering/Qualifying Facility Customers, Solar Net Metering Customer Forecast |
| Electric Vehicles | IHS Markit, Bloomberg New Energy Finance ("BNEF"), NREL, Electric Power Research Institute ("EPRI") | Monthly Cars on Road (historical), Monthly Cars on Road (forecast), Hourly EV Charging Shapes |

## 3.1 Service Territory-Specific Macroeconomic Forecasts

IHS Markit produces forecasts of macroeconomic drivers by county. With an understanding of the counties that make up each service territory, this data can be used to create service territory-specific forecasts of macroeconomic drivers. Figure 2 contains a map of the LG&E, KU, and ODP electric service territories.

**Figure 2 – LG&E, KU, and ODP Service Territory Map**



LG&E serves customers in Louisville and 16 surrounding counties. KU serves customers in 77 Kentucky counties and five counties in Virginia, where KU operates under the name Old Dominion Power Company ("ODP"). For the purposes of this document, the area served by KU in Kentucky is called the KU service territory; the area served by KU in Virginia is called the ODP service territory. Service territory-specific macroeconomic forecasts are created by aggregating the applicable county-specific forecasts for the counties in the LG&E, KU, and ODP service territories.

## 3.2 Processing of Weather Data

Weather is a key explanatory variable in the electric forecast models. The weather dataset from NOAA's National Climatic Data Center ("NCDC") contains temperature (maximum, minimum, and average), heating degree days ("HDD"), and cooling degree days ("CDD") for each day and weather station over the past 20+ years. This data is used to create (a) a historical weather series by billing month, (b) a forecast of "normal" weather by billing month, and (c) a forecast of "normal" daily weather.[4] Each of these processes is summarized below.

[4] "Normal" weather is defined as the average weather over a 20-year historical period. The Companies do not attempt to forecast any trends in weather.

### 3.2.1 Historical Weather by Billing Month

The process used to create the historical weather series by billing month consists of the following steps:

1. Using the historical daily weather data from the NCDC, sum the HDD and CDD values by billing portion.[5] Each historical billing month consists of 20 portions. The Companies' historical meter reading schedule contains the beginning and ending date for each billing portion.
2. Average the billing portion total HDDs and CDDs by billing month.

### 3.2.2 Normal Weather Forecast by Billing Month

The process used to produce the forecast of normal weather by billing month includes the production of a daily forecast of normal weather. The process used to develop the daily forecast (summarized below in Steps 2-5) is consistent with the process used by the NCDC to create its daily normal weather forecast.[6] The following steps are used to create the forecast of normal weather by billing month:

1. Compute the forecast of normal monthly weather by *calendar* month by averaging monthly degree-day values over the period of history upon which the normal forecast is based. The normal weather forecast is based on the most recent 20-year historical period. Therefore, the normal HDD value for January is the average of the 20 January HDD values in this period.
2. Compute "unsmoothed" daily normal weather values by averaging temperature, HDDs, and CDDs by calendar day. The unsmoothed normal temperature for January 1, for example, is computed as the average of the 20 January 1 temperatures in the historical period. This process excludes February 29.
3. Smooth the daily values using a 30-day moving average centered on the desired day. The "smoothed" normal temperature for January 1, for example, is computed as the average of the unsmoothed daily normal temperatures between December 16 and January 15.
4. Manually adjust the integer values in Step 3 so that the following criteria are met:
    a. The monthly average temperature – computed by averaging the daily temperatures by month and rounding to the nearest integer – should match the normal monthly temperatures in Step 1.
    b. The sum of the daily HDDs and CDDs by month should match the normal monthly HDDs and CDDs in Step 1.
    c. The daily temperatures and CDDs should be monotonically increasing from winter to summer and monotonically decreasing from summer to winter. The daily HDD series should follow a reverse trend.

   These criteria ensure the daily normal series is consistent with the monthly normal series.
5. The Companies' forecasted meter reading schedule contains the beginning and ending date for each billing portion through the end of the forecast period. In this step, sum the HDD

[5] Weather data in the electric forecast is taken from the weather stations at the Bowman Field Airport in Louisville, Bluegrass Field Airport in Lexington, and Tri-Cities Airport in Tennessee.

[6] The NCDC derives daily normal values by applying a cubic spline to a specially prepared series of the monthly normal values.

and CDD values by billing portion. Use the February 28 weather data as a proxy for February 29 when billing portions include leap days.

6. Average the billing portion totals by billing month.

# 4. Forecast Models

LG&E and KU's electricity sales forecasts are developed through econometric modeling of energy sales by rate class, but also incorporate specific intelligence on the prospective energy requirements of the utilities' largest customers. Econometric modeling captures the (observed) statistical relationship between energy consumption – the dependent variable – and one or more independent explanatory variables such as the number of households or the level of economic activity in the service territory. Forecasts of electricity sales are then derived from a projection of the independent variable(s).

This widely-accepted approach can readily accommodate the influences of national, regional and local (service territory) drivers of electricity sales. This approach may be applied to forecast the number of customers, energy sales, or use-per-customer. The statistical relationships will vary depending upon the jurisdiction being modeled and the class of service.

The LG&E sales forecast comprises one jurisdiction: Kentucky-retail. The KU sales forecast comprises three jurisdictions: Kentucky-retail, Virginia-retail, and FERC-wholesale.[7] Within the retail jurisdictions, the forecast typically distinguishes several classes of customers including residential, commercial, public authority, and industrial.

The econometric models used to produce the forecast pass two critical tests. First, the explanatory variables of the models must be theoretically appropriate and widely used in electricity sales forecasting. Second, the inclusion of these explanatory variables must produce statistically-significant results that lead to an intuitively reasonable forecast. In other words, the models must be theoretically and empirically robust to explain the historical behavior of the Companies' customers. These forecast models are discussed in detail in the following sections.

## 4.1 Residential Forecasts

The Companies develop a residential forecast for each service territory. For the KU and LG&E service territories, the residential forecast includes all customers on the Residential Service ("RS"), Residential Time of Day ("RTOD"), and Volunteer Fire Department ("VFD") rate schedules. The ODP Residential forecast includes all customers on the RS rate schedule.[8] Residential sales are forecasted for each service territory as the product of a customer forecast and a use-per-customer forecast.

[7] For the purposes of this document, the KU service territory comprises KU's Kentucky-retail and FERC-wholesale jurisdictions. The ODP service territory comprises the Virginia-retail jurisdiction.

[8] KU's Virginia-retail jurisdiction does not have RTOD or VFD rate schedules.

### 4.1.1 Residential Customer Forecasts

The number of residential customers is forecasted by service territory as a function of the number of forecasted households or forecasted population in the service territory. Household and population data by county and Metropolitan Statistical Area ("MSA") is available from IHS Markit and the Kentucky Data Center.

### 4.1.2 Residential Use-per-Customer Forecasts

Average use-per-customer is forecast using a Statistically-Adjusted End-Use ("SAE") Model. The SAE model combines econometric modeling with traditional end-use modeling. The SAE approach defines energy use as a function of energy used by heating equipment, cooling equipment, and other equipment.

$$\text{Use-per-Customer} = a1*XHeat + a2*XCool + a3*XOther$$

Inputs for developing the heating, cooling, and other variables include weather (heating and cooling degree days), appliance saturations, efficiencies, and economic and demographic variables such as income, population, members per household and electricity prices. Once the historical profile of these explanatory variables has been established, a regression model is specified to identify the statistical relationship between changes in these variables and changes in the dependent variable, use-per-customer. A more detailed discussion of each of these components and the methodology used to develop them is contained in Appendix A.

## 4.2 Commercial and Industrial Forecasts

Table 2 lists the rate schedules included in the commercial and industrial forecasts. A relatively small number of the Companies' largest industrial customers account for a significant portion of total industrial sales, and any expansion or reduction in operations by these customers can significantly impact the Companies' load forecast. As a result, sales to these customers are forecast based on information obtained through direct discussions with these customers. These regular communications allow the Companies to directly adjust sales expectations given the first-hand knowledge of the utilization outlook for these companies. The following sections summarize the Companies' commercial and industrial forecasts.

**Table 2: Commercial and Industrial Rate Schedules**

| Service Territory | Rate Schedules |
|---|---|
| LG&E | General Service (“GS”),<br>Power Service (“PS”),<br>Retail Transmission Service (“RTS”),<br>Time-of-Day Primary Service (“TODP”),<br>Time-of-Day Secondary Service (“TODS”) |
| KU | All-Electric School (“AES”),<br>Fluctuating Load Service (“FLS”),<br>GS, PS, RTS, TODP, TODS |
| ODP | GS, PS, RTS, TODP, TODS,<br>Water Pumping Service (“M”) |

### 4.2.1 General Service Forecasts

The general service forecasts include all customers on the GS rate schedule. For each service territory, the GS sales forecast employs an SAE model similar to the model used to forecast residential use-per-customer, and defines energy use as a function of energy used by heating equipment, cooling equipment, and other equipment as well as binary variables to account for anomalies in the historical data. A more detailed discussion of this model is included in Appendix B.

### 4.2.2 KU Secondary Forecast

The KU Secondary forecast includes all customers who receive secondary service on the PS rate schedule and all customers on the TODS rate schedule. Sales to these customers are modeled as a function of heating and cooling degree days, cooling efficiencies, and binary variables which account for anomalies in the historical data.

### 4.2.3 KU All-Electric School Forecast

The KU All-Electric School forecast includes all customers on the AES rate schedule. Sales to these customers are modeled as a function of the number of KU households, weather, and binary variables to account for anomalies in the historical data.

### 4.2.4 LG&E Secondary Forecast

The LG&E Secondary forecast includes all customers who receive secondary service on the PS rate schedule and all customers on the TODS rate schedule. Sales to these customers are modeled as a function of weather, specific economic drivers, the number of customers, and other binary variables to account for anomalies in the historical data.

### 4.2.5 LG&E Special Contract Forecast

LG&E has one customer that is served under a special contract. This customer’s consumption is forecasted separately based on information obtained through direct discussions with the customer.

#### 4.2.6 ODP Secondary Forecast

The ODP Secondary forecast includes all customers who receive secondary service on the PS rate schedule and all customers on the TODS rate schedule. Sales to these customers are modeled as a function of weather, the number of customers, and other binary variables to account for anomalies in the historical data.

#### 4.2.7 ODP Municipal Pumping Forecast

The ODP municipal pumping forecast consists of customers on the Water Pumping Service rate schedule. Sales to these customers are modeled using a trend based on recent sales.

#### 4.2.8 KU Primary Forecast

The KU Primary forecast includes all customers who receive primary service on the PS rate schedule and all customers on the TODP rate schedule. Sales to these customers are modeled as a function of an industry-weighted Industrial Production Index and weather. If necessary, the forecast is adjusted to reflect significant expansions or reductions for large customers in these rate classes that are forecast individually based on information obtained through direct discussions with these customers.

#### 4.2.9 KU Retail Transmission Service Forecast

The KU Retail Transmission Service forecast includes customers who receive service on the RTS rate schedule. Sales for a number of large KU RTS customers are forecast individually based on information obtained through direct discussions with these customers. The majority of the remaining RTS customers are mining customers. Sales to these customers are modeled as a function of a mining index.

#### 4.2.10 KU Fluctuating Load Service Forecast

The KU Fluctuating Load Service forecast includes the one customer on the FLS rate schedule and is developed based on information obtained through direct discussions with this customer.

#### 4.2.11 LG&E Primary Forecast

The LG&E Primary forecast includes all customers who receive primary service on the PS rate schedule and all customers on the TODP rate schedule. Sales to these customers are modeled as a function of an industry-weighted Industrial Production Index and weather. If necessary, the forecast is adjusted to reflect significant expansions or reductions for large customers on these rate schedules that are forecast individually based on information obtained through direct discussions with these customers.

#### 4.2.12 LG&E Retail Transmission Service Forecast

The LG&E Retail Transmission Service forecast includes customers who receive service on the RTS rate schedule. Sales for a number of large LG&E RTS customers are forecast individually based on information obtained through direct discussions with these customers. Sales to the remaining customers are modeled using a trend based on recent sales.

#### 4.2.13 ODP Industrial Forecast

The ODP industrial forecast includes all customers receiving primary service on the PS rate schedule as well as customers receiving service on the TODP or RTS rate schedules. ODP industrial sales are modeled as a function of mining production indices and weather.

### 4.3 KU Municipal Forecasts

KU's municipal customers develop their own sales forecasts. These forecasts are reviewed by KU for consistency and compared to historical sales trends. Any questions or concerns regarding the forecasts are directed to the municipal customers and any forecast revisions resulting from this process are made by the municipal customers.

### 4.4 Lighting Forecasts

The Lighting forecast includes customers receiving service on the following rate schedules:

- LG&E
  - Lighting Energy Service ("LES")
  - Outdoor Sports Lighting Service ("OSL")
  - Traffic Energy Service ("TES")
  - Unmetered Street Lighting ("UM")
- KU
  - LES
  - OSL
  - TES
  - UM
- ODP
  - UM

All Lighting-related energy is modeled using a trend based on recent sales.

### 4.5 Distributed Solar Generation Forecast

The distributed solar generation forecast comprises both a consumer choice model and a forecast for the Companies' service territories produced by NREL. The consumer choice model is driven by the levelized cost of energy ("LCOE") for solar installations and retail price of electricity from the grid. Over the forecast timeframe, the consumer choice model and NREL forecast are blended such that by 2050 the forecast is the NREL forecast. The modeling is at the combined Companies' level and capacities are allocated out to various rate schedules (primarily RS, GS, and PS).

### 4.6 Electric Vehicle Forecast

The electric vehicle forecast comprises both a consumer choice model and a forecast adapted to the Companies' service territories from BNEF. The consumer choice model is driven by the declines in the price of electric vehicles due to projected declines in battery pack costs as well as the cost of internal combustion engine vehicles. The consumer choice model forecast is the near-term forecast and is blended with the BNEF model over the forecast period such that by 2050 the

BNEF model is the forecast. Certain efficiency and miles driven assumptions are used to translate the vehicles-in-operation into an energy impact and that impact is allocated entirely to the Residential class.

### 4.7 Billed Demand Forecasts

Billed demand forecasts are developed for rate schedules with demand rates based on historical demand factors, where the demand factor is the ratio of the billed demand volume to the billed sales volume. The historical demand factors are multiplied by the forecast of monthly sales to compute forecasted billing demands.

### 4.8 Weather-Year Forecasts

The Companies develop their hourly energy requirements forecast with the assumption that weather will be average or "normal" in every year (see discussion below in Section 5.2). While this is a reasonable assumption for long-term resource planning, weather from one year to the next is never the same. For this reason, to support the Companies' Reserve Margin Analysis, the Companies produced 45 hourly energy requirement forecasts for 2021 based on weather in each of the last 45 years.

To create these "weather year" forecasts, the Companies develop a model to forecast daily energy requirements as a function of temperature and calendar variables such as day of week and holidays. This model is used to forecast daily energy requirements in each year of the forecast period based on weather from the prior 45 calendar years and calendar variables from the forecast period. Forecasted daily energy requirements are allocated to hours using daily load shapes derived from recent energy requirement profiles for days with similar weather. Finally, to ensure consistency with the Companies' energy forecast, the weather year forecasts are adjusted so that the mean of monthly energy requirements from the weather year forecasts equals monthly energy requirements in the base energy forecast.[9]

## 5. Data Processing

Most customers' monthly bills include energy that was consumed in portions of more than one calendar month. As a result, the majority of the Companies' forecast models are initially specified to forecast monthly "billed" sales. The following processes are completed to prepare the forecasts for use as inputs to the Companies' revenue and generation forecasts:

1. Billed-to-Calendar Energy Conversion
2. Hourly Energy Requirements Forecast

### 5.1 Billed-to-Calendar Energy Conversion

The following process is used to allocate sales volumes from billed forecasts to calendar months by rate and revenue class so that the allocated volumes can be used as inputs to the Companies' revenue forecast. Municipal customers and customers on the following rate schedules are billed

[9] The process for computing monthly energy requirements in the base forecast is discussed in Section 5.2.

on a calendar-month basis and are not included in this process: LG&E Special Contract and FLS.

1. Allocate billed forecast volumes for each service territory to calendar months to reflect energy consumption under normal weather conditions.
2. Allocate calendar-month forecast volumes for each service territory to rate schedule and revenue class. In a given month, each rate schedule's share of calendar-month sales is assumed to equal its share of total forecasted billed sales for the month. The allocation of volumes for each rate schedule to revenue class is based historical allocations. All forecast volumes are allocated to one of the following revenue classes: Residential, Commercial, Industrial, Public Authority, Wholesale, and Lighting.

## 5.2 Hourly Energy Requirements Forecast

The Generation Planning department uses the hourly energy requirements forecast to develop resource expansion plans and a forecast of generation production costs. An hourly energy requirements forecast is developed for each company by adding losses to calendar-month sales and allocating the sum to hours. The result reflects customers' hourly energy requirements under normal weather conditions. The following process is used to develop this forecast:

1. Sum calendar-month forecast volumes by company and add transmission and distribution losses to compute monthly energy requirements. The sum of calendar-month forecast volumes for KU includes forecast volumes for the KU and ODP service territories.
2. Develop normalized load duration curves for each company and month based on 10 years of historical hourly energy requirements. For KU, to model the impact of the municipal departure, this process is completed based on total-company energy requirements as well as energy requirements where the impact of the departing municipals has been removed.
    a. Compute the ratio of hourly energy requirements and monthly energy requirements for each hour and company. Rank the ratios in each month from highest to lowest.
    b. In all months except January and August, the normalized load duration curve is computed by averaging the ratios by month, rank, and company. Because the winter and summer peak can occur in multiple months and the average peak for a season is higher than the average peak for any individual month in the season, the normalized load duration curves for January and August are computed based on the Januaries and Augusts in the historical period with lower-than-average load factors.[10] This process produces seasonal peak demand forecasts for January and August.
3. Allocate monthly energy requirements to hours using the normalized load duration curves. For KU, the normalized load duration curves used to produce hourly energy requirements through April 2019 are based on total-company energy requirements over the past 10 years. Beyond April 2019, the normalized load durations curves reflect the municipal departure.

[10] Specifically, of the ten Januaries and Augusts in the historical period, the analysis uses the months with the 2nd, 3rd, 4th, and 5th lowest load factors.

4. Assign hourly energy requirements to specific hours in each month based on the ordering of days and weekends in the month.
5. Adjust the hourly energy requirements forecast to reflect the forecasted impact of distributed solar generation and electric vehicle load.

# 6. Review

The final part of the forecast process includes validating and documenting the forecast results. To ensure results are reasonable, the new forecast is compared to (i) the previous forecast and (ii) weather-normalized actual sales for the comparable period in prior years. This process ensures that the forecast is consistent with recent trends in the way customers are using electricity.

# Appendix A:  Residential SAE Modeling Framework

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions.  Econometric models are well suited to identifying historical trends and to projecting these trends into the future.  In contrast, end-use models are able to identify and isolate the end-use factors that are driving energy use.  By incorporating end-use structure into an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to this approach.

- The equipment efficiency and saturation trends, dwelling square footage, and thermal integrity changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast.  This provides a strong bridge between the two forecasts.
- By explicitly incorporating trends in equipment saturations, equipment efficiency, dwelling square footage, and thermal integrity levels, it is easier to explain changes in usage levels and changes in weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects.  By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be incorporated into the final model.

This section describes this approach, the associated supporting SAE spreadsheets, and the *MetrixND* project files that are used in the implementation.  The main source of the SAE spreadsheets is the 2017 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

## Statistically Adjusted End-Use Modeling Framework

The statistically adjusted end-use modeling framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$), and other equipment ($Other_{y,m}$). Formally,

$$\mathrm{USE}_{y,m} = \mathrm{Heat}_{y,m} + \mathrm{Cool}_{y,m} + \mathrm{Other}_{y,m} \tag{1}$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$\mathrm{USE}_{m} = a + b_1 \times \mathrm{XHeat}_{m} + b_2 \times \mathrm{XCool}_{m} + b_3 \times \mathrm{XOther}_{m} + \varepsilon_{m} \tag{2}$$

$XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, dwelling data, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

### *Constructing XHeat*

As represented in the SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days
- Heating equipment saturation levels
- Heating equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier:

$$XHeat_{y,m} = HeatIndex_{y,m} \times HeatUse_{y,m} \tag{3}$$

Where:

- $XHeat_{y,m}$ is estimated heating energy use in year ($y$) and month ($m$)
- $HeatIndex_{y,m}$ is the monthly index of heating equipment
- $HeatUse_{y,m}$ is the monthly usage multiplier

The heating equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Given a set of fixed weights, the index will change over time with changes in equipment saturations (*Sat*), operating efficiencies (*Eff*), building structural index (*StructuralIndex*), and energy prices. Formally, the equipment index is defined as:

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( Sat_y^{Type} \middle/ Eff_y^{Type} \right)}{\left( Sat_{09}^{Type} \middle/ Eff_{09}^{Type} \right)} \qquad (4)$$

The *StructuralIndex* is constructed by combining the EIA's building shell efficiency index trends with surface area estimates, and then it is indexed to the 2009 value:

$$StructuralIndex_y = \frac{BuildingShellEfficiencyIndex_y \times SurfaceArea_y}{BuildingShellEfficiencyIndex_{09} \times SurfaceArea_{09}} \qquad (5)$$

The *StructuralIndex* is defined on the *StructuralVars* tab of the SAE spreadsheets. Surface area is derived to account for roof and wall area of a standard dwelling based on the regional average square footage data obtained from EIA. The relationship between the square footage and surface area is constructed assuming an aspect ratio of 0.75 and an average of 25% two-story and 75% single-story. Given these assumptions, the approximate linear relationship for surface area is:

$$SurfaceArea_y = 892 + 1.44 \times Footage_y \qquad (6)$$

In Equation 4, 2009 is used as a base year for normalizing the index. As a result, the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times HeatShare_{09}^{Type} \qquad (7)$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *HeatIndex* value in 2009 will be equal to estimated annual heating intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For electric heating equipment, the SAE spreadsheets contain two equipment types: electric resistance furnaces/room units and electric space heating heat pumps. Examples of weights for these two equipment types for the U.S. are given in Table 1.

### Table 1: Electric Space Heating Equipment Weights

| Equipment Type | Weight (kWh) |
|---|---|
| Electric Resistance Furnace/Room units | 760 |
| Electric Space Heating Heat Pump | 126 |

Data for the equipment saturation and efficiency trends are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for electric space heating heat pumps are given in terms of Heating Seasonal Performance Factor [BTU/Wh], and the efficiencies for electric furnaces and room units are estimated as 100%, which is equivalent to 3.41 BTU/Wh.

**Price Impacts**. In the 2007 version of the SAE models and thereafter, the Heat Index has been extended to account for the long-run impact of electric and natural gas prices. Since the Heat Index represents changes in the stock of space heating equipment, the price impacts are modeled to play themselves out over a 10-year horizon. To introduce price effects, the Heat Index as defined by

Equation 4 above is multiplied by a 10-year moving-average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities:

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left( Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \times \left( TenYearMovingAverageElectricPrice_{y,m} \right)^{\phi} \times \left( TenYearMovingAverageGasPrice_{y,m} \right)^{\gamma} \quad (8)$$

Since the trends in the Structural index (the equipment saturations and efficiency levels) are provided exogenously by the EIA, the price impacts are introduced in a multiplicative form. As a result, the long-run change in the Heat Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels relative to what was contained in the base EIA long-term forecast.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, prices, and billing days. The estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left( \frac{WgtHDD_{y,m}}{HDD_{09}} \right) \times \left( \frac{HHSize_y}{HHSize_{09}} \right)^{0.25} \times \left( \frac{Income_y}{Income_{09}} \right)^{0.20} \times \left( \frac{ElecPrice_{y,m}}{ElecPrice_{09,7}} \right)^{\lambda} \times \left( \frac{GasPrice_{y,m}}{GasPrice_{09,7}} \right)^{\kappa} \quad (9)$$

Where:

- *WgtHDD* is the weighted number of heating degree days in year (*y*) and month (*m*). This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month.
- *HDD* is the annual heating degree days for 2009
- *HHSize* is average household size in a year (*y*)
- *Income* is average real income per household in year (*y*)
- *ElecPrice* is the average real price of electricity in month (*m*) and year (*y*)
- *GasPrice* is the average real price of natural gas in month (*m*) and year (*y*)

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and heating degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in the economic drivers, as transformed through the end-use elasticity parameters. The price impacts captured by the Usage equation represent short-term price response.

### *Constructing XCool*

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days
- Cooling equipment saturation levels
- Cooling equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_{y} \times CoolUse_{y,m} \tag{10}$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year ($y$) and month ($m$)
- $CoolIndex_{y}$ is an index of cooling equipment
- $CoolUse_{y,m}$ is the monthly usage multiplier

As with heating, the cooling equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Formally, the cooling equipment index is defined as:

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left( Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \tag{11}$$

Data values in 2009 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times CoolShare_{09}^{Type} \tag{12}$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *CoolIndex* value in 2009 will be equal to estimated annual cooling intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For cooling equipment, the SAE spreadsheets contain three equipment types: central air conditioning, space cooling heat pump, and room air conditioning. Examples of weights for these three equipment types for the U.S. are given in Table 2.

### Table 2: Space Cooling Equipment Weights

| Equipment Type | Weight (kWh) |
|---|---|
| Central Air Conditioning | 1,209 |
| Space Cooling Heat Pump | 238 |
| Room Air Conditioning | 175 |

The equipment saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for space cooling heat pumps and central air conditioning (A/C) units are given in terms of Seasonal Energy Efficiency Ratio [BTU/Wh], and room A/C unit efficiencies are given in terms of Energy Efficiency Ratio [BTU/Wh].

**Price Impacts.** In the 2007 SAE models and thereafter, the Cool Index has been extended to account for changes in electric and natural gas prices. Since the Cool Index represents changes in the stock of space heating equipment, it is anticipated that the impact of prices will be long-term in nature. The Cool Index as defined Equation 11 above is then multiplied by a 10-year moving average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities.

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( Sat_y^{Type} \Big/ Eff_y^{Type} \right)}{\left( Sat_{09}^{Type} \Big/ Eff_{09}^{Type} \right)} \times \left(TenYearMovingAverageElectric\,Price_{y,m}\right)^{\phi} \times \left(TenYearMovingAverageGas\,Price_{y,m}\right)^{\gamma} \qquad (13)$$

Since the trends in the Structural index, equipment saturations and efficiency levels are provided exogenously by the EIA, price impacts are introduced in a multiplicative form. The long-run change in the Cool Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels. Without a detailed end-use model, it is not possible to isolate the price impact on any one of these concepts.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, and prices. The estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left(\frac{WgtCDD_{y,m}}{CDD_{09}}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.25} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.20} \times \left(\frac{Elec\,Price_{y,m}}{Elec\,Price_{09}}\right)^{\lambda} \times \left(\frac{Gas\,Price_{y,m}}{Gas\,Price_{09}}\right)^{\kappa} \qquad (14)$$

Where:

- *WgtCDD* is the weighted number of cooling degree days in year (*y*) and month (*m*). This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2009.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in the economic driver changes.

### Constructing XOther

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Appliance and equipment saturation levels
- Appliance efficiency levels
- Average number of days in the billing cycle for each month
- Average household size, real income, and real prices

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherEqpIndex_{y,m} \times OtherUse_{y,m} \tag{15}$$

The first term on the right-hand side of this expression ($OtherEqpIndex_y$) embodies information about appliance saturation and efficiency levels and monthly usage multipliers. The second term (*OtherUse*) captures the impact of changes in prices, income, household size, and number of billing-days on appliance utilization.

End-use indices are constructed in the SAE models. A separate end-use index is constructed for each end-use equipment type using the following function form.

$$ApplianceIndex_{y,m} = Weight^{Type} \times \frac{\left( Sat_y^{Type} \Big/ \frac{1}{UEC_y^{Type}} \right)}{\left( Sat_{09}^{Type} \Big/ \frac{1}{UEC_{09}^{Type}} \right)} \times MoMult_m^{Type} \times \tag{16}$$
$$(TenYearMovingAverageElectric\Pr ice)^{\lambda} \times (TenYearMovingAverageGas\Pr ice)^{\kappa}$$

Where:

- *Weight* is the weight for each appliance type
- *Sat* represents the fraction of households, who own an appliance type
- $MoMult_m$ is a monthly multiplier for the appliance type in month ($m$)
- *Eff* is the average operating efficiency the appliance
- *UEC* is the unit energy consumption for appliances

This index combines information about trends in saturation levels and efficiency levels for the main appliance categories with monthly multipliers for lighting, water heating, and refrigeration.

The appliance saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets.

Further monthly variation is introduced by multiplying by usage factors that cut across all end uses, constructed as follows:

$$ApplianceUse_{y,m} = \left(\frac{BDays_{y,m}}{30.44}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.46} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.10} \times \left(\frac{ElecPrice_{y,m}}{ElecPrice_{09}}\right)^{\phi} \times \left(\frac{GasPrice_{y,m}}{GasPrice_{09}}\right)^{\lambda} \qquad (17)$$

The index for other uses is derived then by summing across the appliances:

$$OtherEqpIndex_{y,m} = \sum_k ApplianceIndex_{y,m} \times ApplianceUse_{y,m} \qquad (18)$$

## Supporting Spreadsheets and MetrixND Project Files

The SAE approach described above has been implemented for each of the nine Census Divisions. A mapping of states to Census Divisions is presented in Figure 15. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 3.

**Figure 15: Mapping of States to Census Divisions**

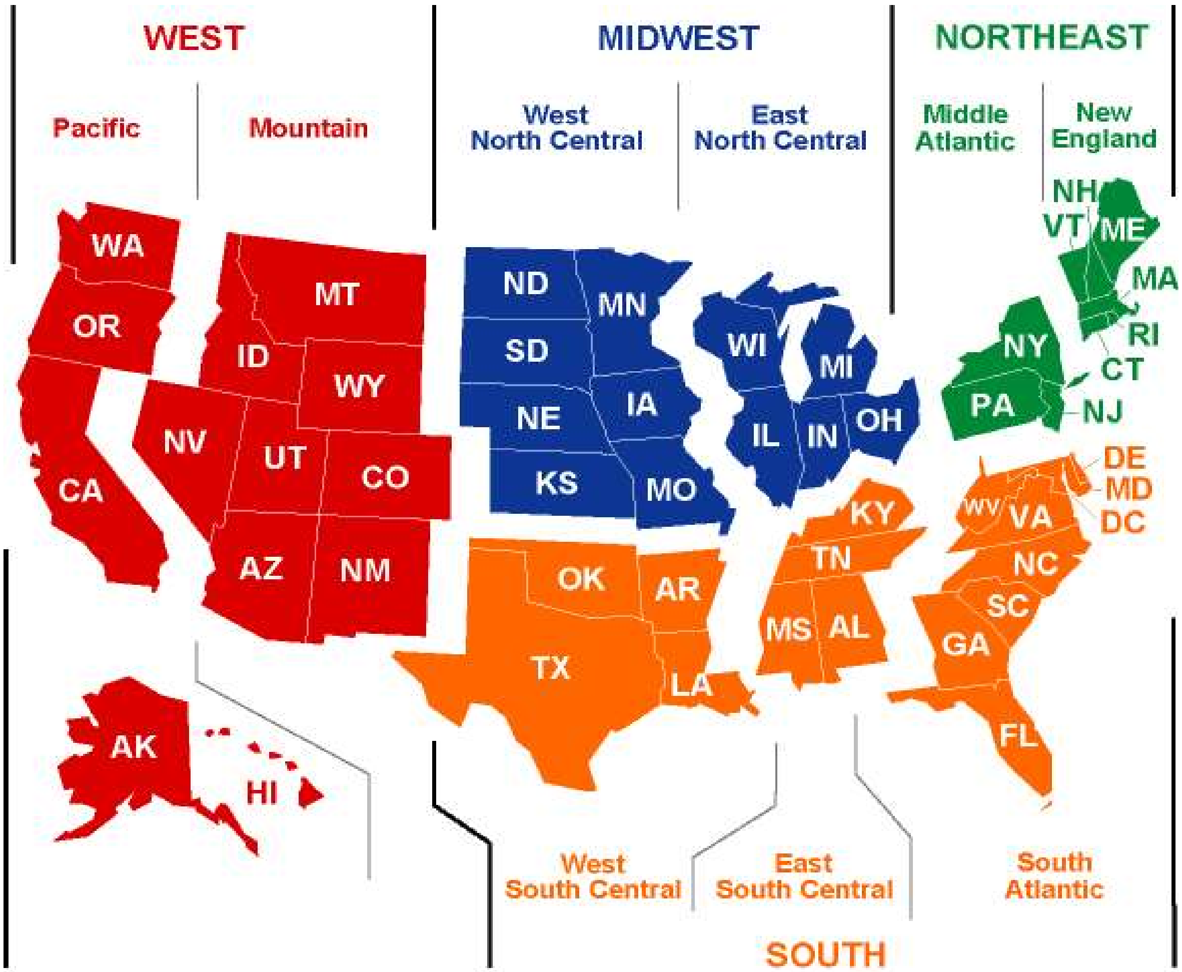


**Table 3: List of SAE Files**

| Spreadsheet | *MetrixND* Project File |
|---|---|
| NewEngland.xls | SAE_NewEngland.ndm |
| MiddleAtlantic.xls | SAE_MiddleAtlantic.ndm |
| EastNorthCentral.xls | SAE_EastNorthCentral.ndm |
| WestNorthCentral.xls | SAE_WestNorthCentral.ndm |
| SouthAtlantic.xls | SAE_SouthAltantic.ndm |
| EastSouthCentral.xls | SAE_EastSouthCentral.ndm |
| WestSouthCentral.xls | SAE_WestSouthCentral.ndm |
| Mountain.xls | SAE_Mountain.ndm |
| Pacific.xls | SAE_Pacific.ndm |

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The *MetrixND* project files link to the data in these spreadsheets. These project files calcualte the end-use *Usage* variables are constructed and the estimated SAE models.

Each of the nine SAE spreadsheets contains the following tabs:

- **Definitions -** Contains equipment, end use, worksheet, and Census Division definitions.
- **Intensities -** Calculates the annual equipment indices.
- **Shares -** Contains historical and forecasted equipment shares. The default forecasted values are provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **Efficiencies -** Contains historical and forecasted equipment efficiency trends. The forecasted values are based on projections provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **StructuralVars -** Contains historical and forecasted square footage, number of households, building shell efficiency index, and calculation of structural variable. The forecasted values are based on projections provided by the EIA.
- **Calibration -** This tab contains calculations of the base year *Intensity* values used to weight the equipment indices.
- **EIAData -** Contains the raw forecasted data provided by the EIA.
- **MonthlyMults -** Contains monthly multipliers that are used to spread the annual equipment indices across the months.
- **EV -** Worksheet for incorporating electric vehicle (EV) impacts.
- **PV -** Worksheet for incorporating photovoltaic battery (PV) impacts.

The *MetrixND* Project files are linked to the *AnnualIndices*, *ShareUEC*, and *MonthlyMults* tabs in the spreadsheets. Sales, economic, price and weather information for the Census Division is provided in the linkless data table *UtilityData*. In this way, utility specific data and the equipment indices are brought into the project file. The *MetrixND* project files contain the objects described below.

### Parameter Tables

- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use. There are five types of elasticities included on this table.

  - Economic variable elasticities
  - Short-term own price elasticities
  - Short-term cross price elasticities
  - Long-term own price elasticities

- Long-term cross price elasticities

The short-term price elasticities drive the end-use usage equations. The long-term price elasticities drive the Heat, Cool and other appliance indices. The combined price impact is an aggregation of the short and long-term price elasticities. As such, the long-term price elasticities are input as incremental price impact. That is, the long-term price elasticity is the difference between the overall price impact and the short-term price elasticity.

### *Data Tables*

- **AnnualEquipmentIndices** links to the *AnnualIndices* tab for heating and cooling indices, and *ShareUEC* tab for water heating, lighting, and appliances in the SAE spreadsheet.
- **UtilityData** is a linkless data table that contains sales, price, economic and weather data specific to a given Census Division.
- **MonthlyMults** links to the corresponding tab in the SAE spreadsheet.

### *Transformation Tables*

- **EconTrans** computes the average usage, and household size, household income, and price indices used in the usage equations.
- **WeatherTrans** computes the HDD and CDD indices used in the usage equations.
- **ResidentialVars** computes the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model.
- **BinaryVars** computes the calendar binary variables that could be required in the regression model.
- **AnnualFcst** computes the annual historical and forecast sales and annual change in sales.
- **EndUseFcst** computes the monthly sales forecasts by end uses.

### *Models*

- **ResModel** is the Statistically Adjusted End-Use Model.

### *Steps to Customize the Files for Your Service Territory*

The files that are distributed along with this document contain regional data. If you have more accurate data for your service territory, you are encouraged to tailor the spreadsheets with that information. This section describes the steps needed to customize the files.

*Minimum Customization*

- Save the *MetrixND* project file and the spreadsheet into the same folder
- Select the spreadsheet and *MetrixND* project file from the appropriate Census Division

- Open the spreadsheet and navigate to the *Calibration* tab
- In cell "B9", replace base year Census Division use-per-customer with observed use-per-customer for your service territory
- Save the spreadsheet and open the *MetrixND* project file
- Click on the *Update All Links* button on the *Menu* bar
- Review the model results

*Further Customization of Starting Usage Levels*

In addition to the minimum steps listed above, you can also utilize model-based calibration process described above on pages 15-16 to further fine-tune starting year usage estimates to your service territory.

*Customizing the End-use Share Paths*

You can also install your own share history and forecasts. To do this, navigate to the *Share* tab in the spreadsheet and paste in the values for your region. Make sure that base year shares on the *Calibration* tab reflect changes on the *Shares* tab.

*Customizing the End-use Efficiency Paths*

Finally, you can override the end-use efficiency paths that are contained on the *Efficiencies* tab of the spreadsheet.

# Appendix B: Commercial Statistically Adjusted End-Use Model

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions. From a forecasting perspective, econometric models are well suited to identifying historical trends and to projecting these trends into the future. In contrast, end-use models are able to incorporate the end-use factors driving energy use. By including end-use structure in an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to the SAE approach.

- The equipment efficiency trends and saturation changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast, thereby providing a strong bridge between the two forecasts.
- By explicitly introducing trends in equipment saturations and efficiency levels, SAE models can explain changes in usage levels and weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects. By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be built into the final model.

This document describes this approach, the associated supporting Commercial SAE spreadsheets, and *MetrixND* project files that are used in the implementation. The source for the commercial SAE spreadsheets is the 2017 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

## 1.1 Commercial Statistically Adjusted End-Use Model Framework

The commercial statistically adjusted end-use model framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$) and other equipment ($Other_{y,m}$). Formally,

$$USE_{y,m} = Heat_{y,m} + Cool_{y,m} + \text{Other}_{y,m} \quad (1)$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$USE_m = a + b_1 \times XHeat_m + b_2 \times XCool_m + b_3 \times XOther_m + \varepsilon_m \quad (2)$$

Here, $XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end-uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

### *Constructing XHeat*

As represented in the Commercial SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days,
- Heating intensity,
- Commercial output and energy price.

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier. That is,

$$XHeat_{y,m} = HeatIndex_y \times HeatUse_{y,m} \quad (3)$$

Where

- $XHeat_{y,m}$ is estimated heating energy use in year $y$ and month $m$,
- $HeatIndex_y$ is the annual index of heating equipment, and
- $HeatUse_{y,m}$ is the monthly usage multiplier.

The heating equipment index is composed of electric space heating intensity. The index will change over time with changes in heating intensity. Formally, the equipment index is defined as:

$$HeatIndex_y = HeatSales_{13} \times \frac{(HeatIntensity_y)}{(HeatIntensity_{13})} \quad (4)$$

In this expression, 2013 is used as a base year for normalizing the index. The ratio on the right is equal to 1.0 in 2013. In other years, it will be greater than 1.0 if intensity levels are above their 2004 level.

$$HeatSales_{04} = \left(\frac{kWh}{Sqft}\right)_{Heating} \times \left(\frac{CommercialSales_{13}}{\sum_e kWh/Sqft_e}\right) \tag{5}$$

Here, base-year sales for space heating is the product of the average space heating intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space heating sales value is defined on the *BaseYrInput* tab. The resulting $HeatIndex_y$ value in 2013 will be equal to the estimated annual heating sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, commercial level economic activity, and prices. Using the COMMEND default elasticity parameters, the estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left(\frac{WgtHDD_{y,m}}{HDD_{13}}\right) \times \left(\frac{Output_y}{Output_{13}}\right) \times \left(\frac{Price_{y,m}}{Price_{13}}\right)^{-0.18} \tag{6}$$

Where

- *WgtHDD* is the weighted number of heating degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month
- *HDD* is the annual heating degree days for 2013,
- *Output* is a real commercial output driver in year *y*,
- *Price* is the average real price of electricity in month *m* and year *y*,

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2013). The first terms, which involve heating degree days, serves to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in commercial output and prices, as transformed through the end-use elasticity parameters. For example, if the real price of electricity goes up 10% relative to the base year value, the price term will contribute a multiplier of about .98 (computed as 1.10 to the -0.18 power).

### *Constructing XCool*

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days,
- Cooling intensity,
- Commercial output and energy price.

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_y \times CoolUse_{y,m} \tag{7}$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year $y$ and month $m$,
- $CoolIndex_y$ is an index of cooling equipment, and
- $CoolUse_{y,m}$ is the monthly usage multiplier.

As with heating, the cooling equipment index depends on equipment saturation levels (*CoolShare*) normalized by operating efficiency levels (*Eff*). Formally, the cooling equipment index is defined as:

$$CoolIndex_y = CoolSales_{13} \times \frac{\left( CoolShare_y / Eff_y \right)}{\left( CoolShare_{13} / Eff_{13} \right)} \tag{8}$$

Data values in 2013 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2013. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2013 level. This will be counteracted by higher efficiency levels, which will drive the index downward. Estimates of base year cooling sales are defined as follows.

$$CoolSales_{13} = \left( \frac{kWh}{Sqft} \right)_{Cooling} \times \left( \frac{CommercialSales_{13}}{\sum_e kWh / Sqft_e} \right) \tag{9}$$

Here, base-year sales for space cooling is the product of the average space cooling intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space cooling sales value is defined on the *BaseYrInput* tab. The resulting *CoolIndex* value in 2013 will be equal to the estimated annual cooling sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, economic activity levels and prices. Using the COMMEND default parameters, the estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left(\frac{WgtCDD_{y,m}}{CDD_{13}}\right) \times \left(\frac{Output_y}{Output_{13}}\right) \times \left(\frac{Price_{y,m}}{Price_{13}}\right)^{-0.18} \qquad (10)$$

Where

- *WgtCDD* is the weighted number of cooling degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2013.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2013). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in commercial output and prices.

### *Constructing XOther*

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Equipment intensities,
- Average number of days in the billing cycle for each month, and
- Real commercial output and real prices.

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherIndex_{y,m} \times OtherUse_{y,m} \tag{11}$$

The second term on the right hand side of this expression embodies information about equipment saturation levels and efficiency levels. The equipment index for other uses is defined as follows:

$$OtherIndex_{y,m} = \sum_{Type} Weight_{13}^{Type} \times \left( \frac{Share_{y}^{Type} \big/ Eff_{y}^{Type}}{Share_{13}^{Type} \big/ Eff_{13}^{Type}} \right) \tag{12}$$

Where

- *Weight* is the weight for each equipment type,
- *Share* represents the fraction of floor stock with an equipment type, and
- *Eff* is the average operating efficiency.

This index combines information about trends in saturation levels and efficiency levels for the main equipment categories. The weights are defined as follows:

$$Weight_{13}^{Type} = \left( \frac{kWh}{Sqft} \right)_{Type} \times \left( \frac{CommercialSales_{13}}{\sum_{e} kWh \big/ Sqft_{e}} \right) \tag{13}$$

Further monthly variation is introduced by multiplying by usage factors that cut across all end-uses, constructed as follows:

$$OtherUse_{y,m} = \left(\frac{BDays_{y,m}}{30.44}\right) \times \left(\frac{Output_y}{Output_{13}}\right) \times \left(\frac{Price_{y.m}}{Price_{13}}\right)^{-0.18} \tag{14}$$

In this expression, the elasticities on output and real price are computed from the COMMEND default values.

## 1.2 Supporting Spreadsheets and *MetrixND* Project Files

The SAE approach described above has been implemented for each of the nine census divisions. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 1.

### Table 1: List of SAE Files

| Spreadsheets | *MetrixND* Project Files |
|---|---|
| NewEnglandCom17.xls | NewEnglandCom17.ndm |
| MiddleAtlanticCom17.xls | MiddleAtlanticCom17.ndm |
| EastNorthCentralCom17.xls | EastNorthCentralCom17.ndm |
| WestNorthCentralCom17.xls | WestNorthCentralCom17.ndm |
| SouthAtlanticCom17.xls | SouthAltanticCom17.ndm |
| EastSouthCentralCom17.xls | EastSouthCentralCom17.ndm |
| WestSouthCentralCom17.xls | WestSouthCentralCom17.ndm |
| MountainCom17.xls | MountainCom17.ndm |
| PacificCom17.xls | PacificCom17.ndm |

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The data from these spreadsheets are linked to the *MetrixND* project files. In these project files, the end-use *Usage* variables (Equations 6, 10, and 14 above) are constructed and the SAE model is estimated.

The nine spreadsheets contain the following tabs.

- **EIAData** contains the raw forecasted data provided by the EIA
- **BaseYrInput** contains base year Census Division intensities by end-use and building type as well as default building type weights. It also contains functionality for changing the weights to reflect utility service territory.
- **Efficiency** contains historical and forecasted end-use equipment efficiency trends. The forecasted values are based on projections provided by the EIA.
- **Shares.** This tab contains historical and forecasted end-use saturations.
- **Intensity** contains the annual intensity (kWh/sqft) projections by end-use.
- **AnnualIndices** contains the annual *Heat*, *Cool* and *Other* equipment indices.
- **FloorSpace** contains the annual floor space (sqft) projections by end-use.
- **PV** incorporates the impact of photovoltaic batteries into the forecast.
- **Graphs** contains graphs of Efficiency and Intensities, which can be updating by selecting from the list in cell B2.

The *MetrixND* project files contain the following objects.

### *Parameter Tables*

- **Parameters.** This parameter table includes the values of the annual HDD and CDD in 2013 used to calculate the *Usage* variables for each end-use.
- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use.

### *Data Tables*

- **AnnualIndices.** This data table is linked to the *AnnualIndices* tab in the Commercial SAE spreadsheet and contains sales-adjusted commercial SAE indices.
- **Intensity.** This data table is linked to the *Intensity* tab in the Commercial SAE spreadsheet.
- **FloorSpace.** This data table links to *FloorSpace* tab in the Commercial SAE spreadsheet.
- **UtilityData.** This linkless data table contains Census Division level data. It can be populated with utility-specific data.

### *Transformation Tables*

- **EconTrans.** This transformation table is used to compute the output and price indices used in the usage equations.
- **WeatherTrans.** This transformation table is used to compute the HDD and CDD indices used in the usage equations.
- **CommercialVars.** This transformation table is used to compute the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model. Structural variables based on the intensity/floor space combination are also calculated here.
- **BinaryVars.** This transformation table is used to compute the calendar binary variables that could be required in the regression model.
- **AnnualFcst.** This transformation table is used to compute the annual historical and forecast sales and annual change in sales.
- **EndUseFcst.** This transformation table breaks the forecast down into its heating, cooling and other components.

### *Models*

- **ComSAE:** The commercial SAE model (energy forecast driven by end-use indices, price, and output projections).
- **ComStruct:** Simple stock model (energy forecast driven by end-use energy intensities, and square footage).

# 2019 Business Plan Electric Forecast

# Forecast Summary

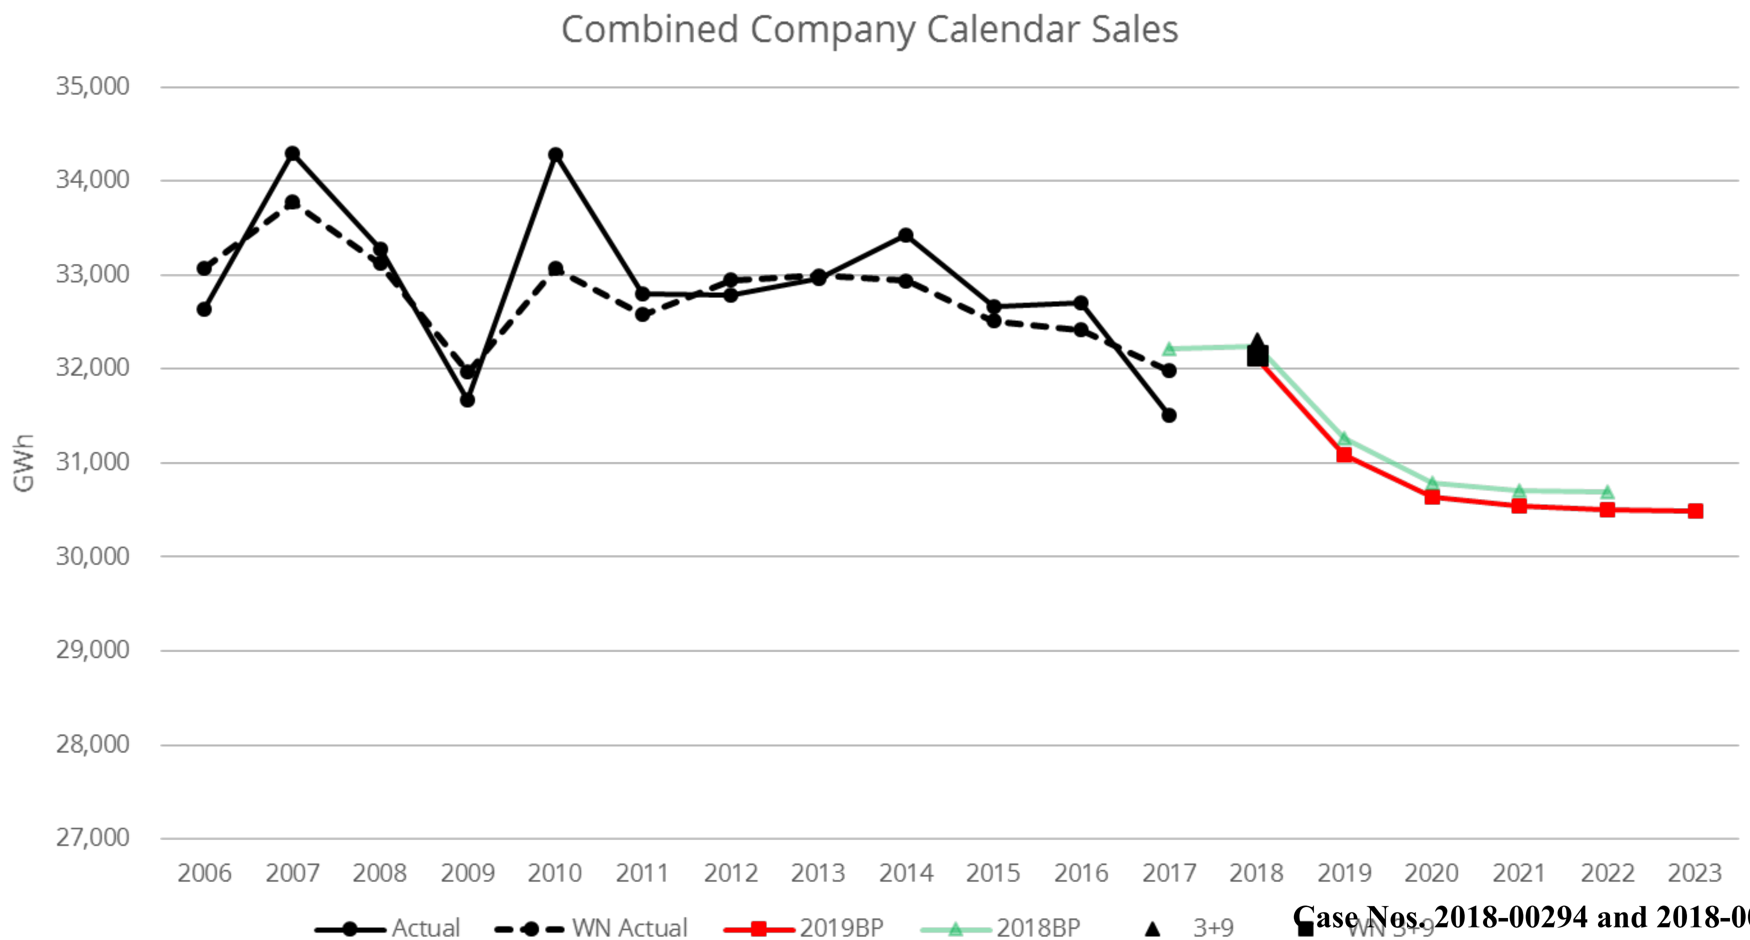
**CONFIDENTIAL INFORMATION REDACTED**

- Sales volumes decreased 0.5% or approximately 160 GWh from the 2018 Plan in 2019
  - 80 GWh decrease due to [redacted] with an additional 30 GWh decrease from other Major Accounts and Industrials
  - Customer growth in Louisville and Lexington remains strong and offsets declining use-per-customer in 2017
- Municipal departure reduces sales approximately 1,000 GWh in 2019
- Electric Vehicles and Distributed Generation have limited impact in short-term
  - Longer-term implications considered as scenarios for the IRP

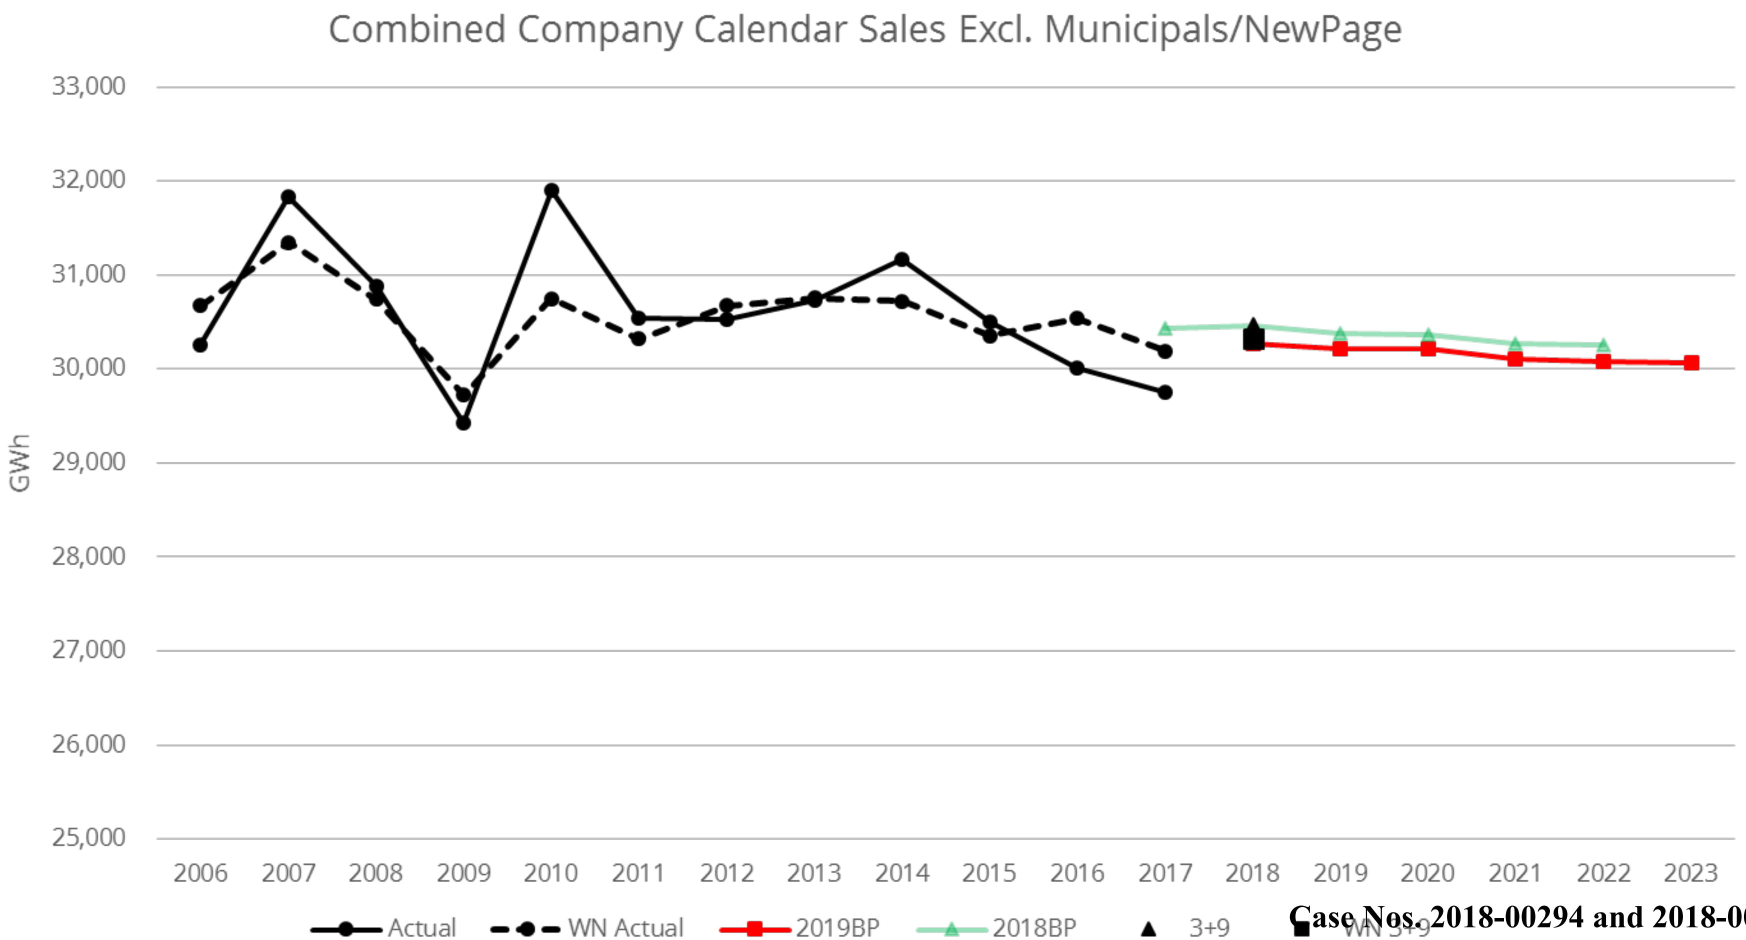
# Key Assumptions

- Economic conditions remain robust with limited impact on sales volumes from economic growth
- Household growth of 0.5% driven by Louisville and Lexington
- Increased LED lighting penetration provides further decreases in use-per-customer
- Distributed solar and electric vehicle penetration continue to increase but no significant sales impact through 2025
- No adjustments for AMS related sales impacts (e.g. customer responses, theft reductions, outage reduction time)
- No assumptions on increased battery storage to manage demand charges

# Municipals departing in May 2019 remains the largest change



# 2019 Plan Sales excluding Municipals decline 150 GWh 2019-2023 due to Residential and Commercial



Case Nos. 2018-00294 and 2018-00295

# Conclusion

**CONFIDENTIAL INFORMATION REDACTED**

- [redacted] and other Industrial volumes account for most changes in sales volumes from 2018 Plan
- Reduced Residential & Commercial use-per-customer offset by robust customer growth
  – Use-per-customer changes from new premise type, heating source & efficiency gains
- Demand Revenues
  – PS demand charge & ratchets both provide strong price signals encouraging behavioral changes and BTM storage

# Natural Gas Volume Forecast Process

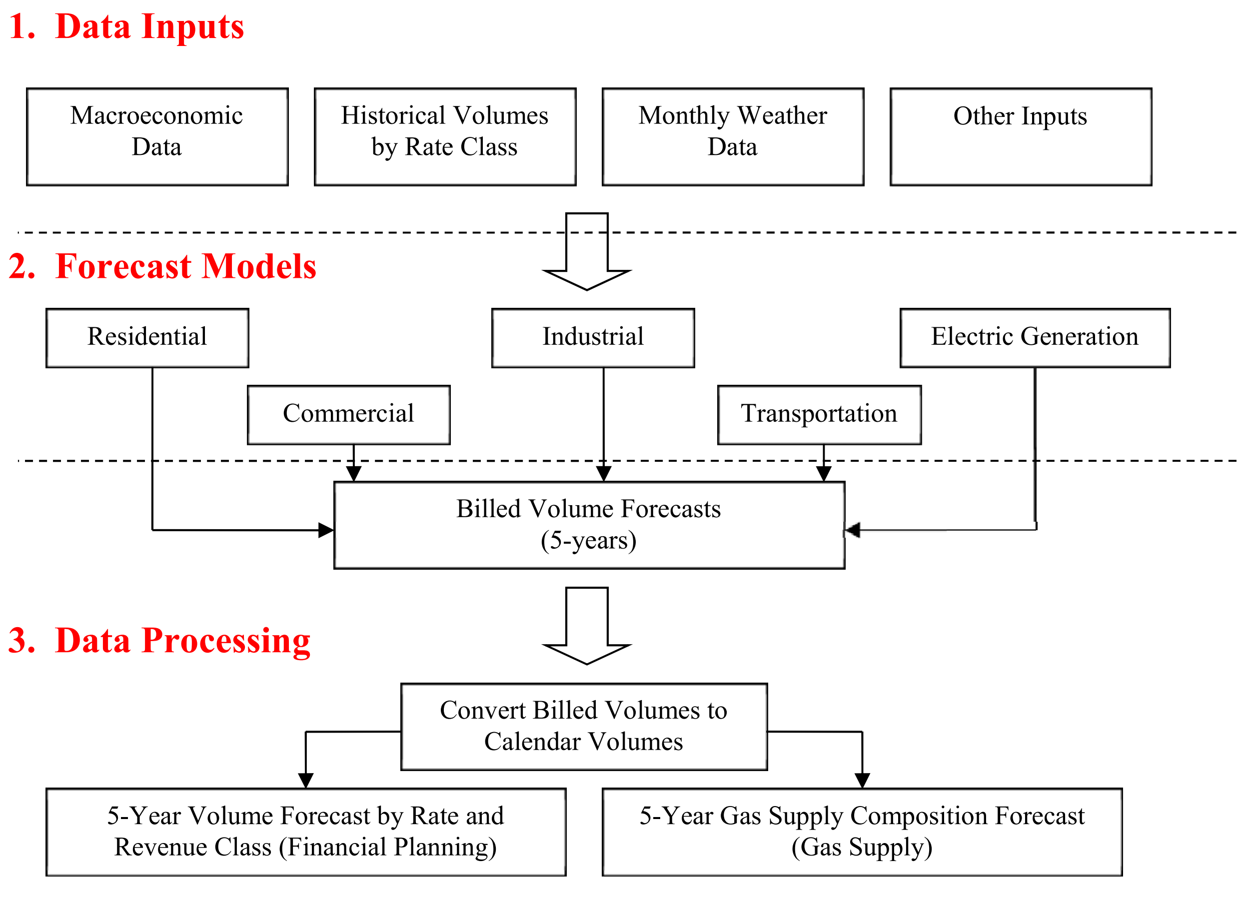
Sales Analysis & Forecasting
September 2018

# Table of Contents

# 1 Introduction

The Sales Analysis & Forecasting group annually develops the natural gas sales and transportation forecasts for the Louisville Gas & Electric Company (LG&E). LG&E natural gas customers can broadly be classified as either sales customers or transportation customers. Furthermore, sales customers can be further divided into firm and interruptible customers. LG&E must procure gas for firm sales customers, but it has no obligation to procure gas for interruptible (AAGS) sales customers. Sales customers are grouped by residential, industrial, and commercial gas service rates. Transportation customers are large industrial and commercial customers on LG&E's distribution system who contract for their own gas supply and use the company's pipeline system to deliver gas from an interstate pipeline connection point with LG&E to their facility. These forecasts are an input to the company's revenue and gas supply expense forecast. This document describes the processes used to produce the annual volume forecasts. The forecast process can be divided into three parts (see Figure 1).

**Figure 1 – Natural Gas Volume Forecast Process Diagram**



The first part of the forecast process involves gathering and processing input data. The following are key inputs to the forecast process:

- Macroeconomic data
- Historical gas sales and customer data

- Weather data
- Other data, including billing cycle forecasts and residential heating appliance shares and efficiencies.

The input data is used to specify various forecast models. LG&E's natural gas volumes are forecasted by rate class as each model is used to forecast sales for a group of customers with homogeneous usage patterns within the same, or similar, tariff rates.

Most of the forecast models produce volume forecasts on a monthly billed basis.[1] In the third part of the forecast process, gas volume data from the forecast models is processed to meet the needs of the forecast end users. The monthly billed energy forecasts must first be converted to calendar month forecasts. The billed and calendar sales forecasts are allocated by rate and revenue class for the Financial Planning department.[2] In addition, the calendar forecasts are used to produce the Gas Supply Composition Forecast.

The final part of the forecast process includes validating and documenting the forecast results. To ensure the results are reasonable, the new forecast is compared to (i) the previous forecast and (ii) weather-normalized actual sales for the comparable period in prior years. Each of these steps is discussed in more detail in the following sections.

[1] All customers are assigned to one of 20 billing cycles. A billing cycle determines what time of the month a customer's meter is read. Because most billing cycles do not coincide precisely with the boundaries of calendar months, most customers' monthly bills will include energy that was consumed in multiple calendar months. The energy on customers' bills is referred to as "billed" energy.

[2] Rate class defines the tariff assigned to each customer meter while Revenue class is a higher level grouping; a Revenue class consists of one or more rate classes.

# 2 Input Data

Table 1 provides a summary of the data inputs. The sections that follow describe key processes used to prepare the data for use in the forecast process.

**Table 1 – Volume Forecast Data Inputs**

| *Data* | *Source* | *Format* |
|---|---|---|
| State Macroeconomic Data (Employment, Wages) | IHS Markit | Annual or Quarterly by County – History and Forecast |
| State Demographic Data (Households, Personal Income, Population) | IHS Markit, Kentucky Data Center | Annual or Quarterly – History and Forecast |
| National Macroeconomic Data (Industrial Production Index) | IHS Markit | Annual or Quarterly – History and Forecast |
| Weather | National Oceanic and Atmospheric Administration ("NOAA") | Daily HDD/CDD by Weather Station – History |
| Historical Gas Supply Cost | State Regulation and Rates | Monthly |
| Henry Hub Gas Price Forecast | Corporate Long-term Planning Process | Monthly |
| Gas Supply Cost Forecast | Gas Supply (based on Henry Hub Gas Price Forecast) | Monthly |
| Historical Billing Cycle Meter Reading Schedule | Revenue Accounting | Billing Cycle Read Dates |
| Heating Appliance Efficiencies | Energy Information Administration ("EIA") | Annual Efficiencies by Appliance (Furnace, Water Heater) |
| Residential End-Use Data | EIA, LG&E Residential End-Use Survey | Appliance Saturations |
| Commercial End-Use Data | EIA, LG&E Commercial End-Use Survey | Appliance Saturations |
| Billed Sales History by Rate Class | CCS Billing System | Monthly |
| Number of Customers History by Rate Class | CCS Billing System | Monthly |
| Individual Customer Usage History | CCS Billing System | Monthly |
| Forecasts of Gas Used by Electric Generation | Generation Planning | Monthly |

## 2.1 Service Area-Specific Macroeconomic Forecasts

LG&E's natural gas service area includes all or portions of 17 Kentucky counties.[3] IHS Markit forecasts of macroeconomic drivers by county and industry. Service area-specific macroeconomic forecasts are created by aggregating the county-specific forecasts for the counties in LG&E's service area.

## 2.2 Software Tools

The following software packages are used in the forecast process:

- Microsoft Office: Excel, PowerPoint, Access
- SAS
- R
- Itron Metrix ND

## 2.3 Billed Usage History

Historical billed usage volumes for all retail customers are taken from the LG&E Customer Care System (CCS). The LG&E Billed Transport Report contains historical usage volumes for all transportation customers. Transportation customers nominate – on a daily basis – the amount of gas they expect to consume. A daily or monthly "imbalance" is computed as the difference between the amount of natural gas actually consumed and the amount of natural gas nominated.

For several classes, a significant portion of the total gas usage is made up of gas consumed by heating appliances (e.g., gas furnaces and gas water heaters). Heating appliance usage is a function of appliance efficiencies and the weather. As appliance efficiencies improve over time, the average use-per-customer – for a given class and temperature – will decline in the absence of customers' behavioral changes.

The heating appliances that consume the most natural gas are the gas furnace and gas water heater. Total usage and efficiency data for these appliances are provided by the US Energy Information Administration (EIA) and are used as inputs into some of the forecast models.

## 2.4 Processing of Weather Data

Weather is a key explanatory variable in the gas forecast models. The weather dataset from the National Oceanic & Atmospheric Administration (NOAA) contains temperatures (maximum, minimum, and average), heating degree days (HDD), and cooling degree days (CDD) for each day and weather station over the past 30 years. This data and the Company's meter reading schedule are used to create (a) a historical weather series by billing month and (b) a forecast of "normal" weather by billing month.[4] Each of these processes is summarized below.

---

[3] LG&E is the only gas utility serving Bullitt, Henry, Larue, Meade, Nelson, Oldham, Spencer and Trimble counties. LG&E also serves parts of Barren, Green, Hardin, Hart, Jefferson, Marion, Metcalfe, Shelby and Washington counties.

[4] "Normal" weather is defined as the average weather over a historical period. The Companies do not attempt to forecast any trends in weather.

### 2.4.1 Historical Weather by Billing Month

The methodology used to create the historical weather series by billing month consists of the following steps:

1. Using the historical daily weather data from NOAA, sum the HDD and CDD values by billing cycle.[5] Each historical billing month consists of 20 cycles. The Company's historical meter reading schedule contains the beginning and ending date for each billing cycle.
2. Average the billing cycle total HDDs and CDDs by billing month.

### 2.4.2 Normal Weather Forecast by Billing Month

The methodology used to produce the forecast of normal weather by billing month includes the production of a daily forecast of normal weather. The methodology used to develop the daily forecast (summarized in Steps 2-5) is consistent with the methodology used by NOAA to create its daily normal weather forecast.[6] The following steps are used to create the forecast of normal weather by billing month:

1. Compute the forecast of monthly weather by *calendar* month by averaging the monthly degree-day values and over the period of history upon which the normal forecast is based. The normal weather forecast is based on the most recent 30-year historical period. Therefore, the normal HDD value for January is the average of the 30 January HDD values in this period.
2. Compute "unsmoothed" daily normal weather values by averaging temperature, HDDs, and CDDs by calendar day. The unsmoothed normal temperature for January 1, for example, is computed as the average of the 30 January 1 temperatures in the historical period. This process excludes February 29.
3. Smooth the daily values using a 30-day moving average centered about the desired day. The "smoothed" normal temperature for January 1, for example, is computed as the average of the unsmoothed daily normal temperatures between December 16 and January 15.
4. Manually adjust the integer values in Step 3 so that the following criteria are met:
    a. The monthly average temperature – computed by averaging the daily temperatures by month and rounding to the nearest integer – should match the normal monthly temperatures in Step 1.
    b. The sum of the daily HDDs and CDDs by month should match the normal monthly HDDs and CDDs in Step 1.
    c. The daily temperatures and CDDs should be monotonically increasing from winter to summer and monotonically decreasing from summer to winter. The daily HDD series should follow a reverse trend.

    These criteria ensure the daily normal series is consistent with the monthly normal series.
5. The Company's forecasted meter reading schedule contains the beginning and ending date for each billing cycle through the end of the forecast period. In this step, sum the HDD and CDD values by billing cycle. Use the February 28 weather data as a proxy for February 29 when billing cycles include leap days.
6. Average the billing cycle totals by billing month.

---

[5] Weather data in the gas forecast is taken from the weather station at Standiford Field Airport (SDF) in Louisville.
[6] NOAA derives daily normal values by applying a cubic spline to a specially prepared series of the monthly normal values.

## 2.5 Forecasts of Gas Used by Electric Generation

Effective May 1, 2008, LG&E and KU's electric generation business entered into a special contract ("Electric Generation Special Contract") with LG&E's gas distribution business for gas sales and transportation services. Under the contract, the Cane Run and Mill Creek generating stations were served as a firm sales customer and the Paddy's Run generating station was served as a transportation customer. Since September 2014, Cane Run has taken gas directly from Texas Gas at a new interconnection point built for the Cane Run natural gas combined cycle plant and is no longer served by the LG&E Gas Business. In November 2016, Paddy's Run connected to an extension of the Cane Run pipeline and is no longer served by the LG&E Gas Business.

The forecasts of gas used by each of the aforementioned generating stations are provided by the Generation Planning group. In addition, the Generation Planning group provides a forecast of gas used by the Zorn generating station, which is also served via the LG&E gas distribution system (but not as a part of the Electric Generation Special Contract).

From a revenue accounting perspective, the gas consumed by the Mill Creek station is accounted for in a separate Interdepartmental Sales revenue class. The gas consumed by the Zorn station is considered Company Use and is recorded in the utility financial reports as part of gas 'Used in Electric Generation.'

# 3 Forecast Models

LG&E natural gas customers can broadly be classified as either sales customers or transportation customers. Sales customers include customers on the residential, industrial, and commercial gas service rates. Transportation customers are large industrial and commercial customers on LG&E's distribution system who contract for their own gas supply. Each forecast is discussed in detail in the following sections.

## 3.1 Residential Forecast

The residential forecast consists of all customers on the Residential Gas Service (RGS) rate schedule. The RGS class accounts for approximately half of the total volume forecast. RGS sales are forecasted as the product of a customer forecast and a use-per-customer forecast. Volunteer Fire Department (VFD) rate schedule is included in the RGS customer and use-per-customer forecast.

### 3.1.1 Residential Gas Service (RGS) Customer Forecast

The RGS customer forecast is modeled as a function of the number of forecasted households in the LG&E service territory. Household and population data by county and Metropolitan Statistical Area (MSA) are available from IHS Markit and the Kentucky Data Center.

### 3.1.2 Residential Gas Service (RGS) Use-per-Customer Forecast

The RGS use-per-customer forecast is developed using a Statistically-Adjusted End-Use (SAE) model (similar to what is used to forecast residential electric sales). Such a model combines an econometric model – that relates monthly sales to various explanatory variables such as weather and economic conditions – with traditional end-use modeling. For natural gas, the SAE approach defines energy use as a function of energy used by heating equipment and other natural-gas fueled equipment.

$$\text{Use-per-Customer} = a_1 * \text{XHeat} + a_2 * \text{XOther}$$

The heating and other components (the X variables) are based on various input variables including weather (heating and cooling degree days), appliance saturations, efficiencies, and economic and demographic variables such as income, population, members per household and the gas supply cost. In addition, certain binary variables may be added to compensate for anomalies in the data or other events. Once the historical profile of these explanatory variables has been established, a regression model is specified to identify the statistical relationship between changes in these variables and changes in the dependent variable, use-per-customer. A discussion of each of these components and the methodology used to develop them is contained in Appendix A.

## 3.2 Commercial Forecast

The commercial forecast is comprised of customers on the Firm Commercial Gas Service (CGS) and Commercial As-Available Gas Service (CAAGS) rate schedules. Given the unique characteristics of these classes, each class is modeled separately.

### 3.2.1 Firm Commercial Gas Service (CGS) Sales Forecast

Similar to the RGS use-per-customer forecast, the CGS volume forecast is developed using an SAE model. Such a model combines an econometric model – that relates monthly sales to various explanatory variables such as weather and economic conditions – with traditional end-use modeling. The SAE approach defines energy use as a function of energy used by heating equipment, cooling equipment, and other equipment.

$$\text{Use-per-Customer} = a1 * \text{XHeat} + a2 * \text{XOther}$$

The heating and other components (the X variables) are based on various input variables including weather (heating and cooling degree days), appliance saturations, efficiencies, and economic and demographic variables such as income, population, members per household and the gas supply cost. Once the historical profile of these explanatory variables is established, a regression model is specified to identify the statistical relationship between changes in these variables and changes in the dependent variable (volumes). A discussion of each of these components and the methodology used to develop them is contained in Appendix B.

### 3.2.2 Commercial As-Available Gas Service (CAAGS) Forecast

There are a small number of customers on CAAGS so each customer is forecasted separately. These forecasts are developed by the Sales Analysis & Forecasting department with input from Major Account representatives when available to make sure the underlying assumptions and forecasted volumes are reasonable.

## 3.3 Industrial Forecast

The industrial revenue class is comprised of customers on the Firm Industrial Gas Service (IGS) and Industrial As-Available Gas Service (IAAGS) rate schedules.

### 3.3.1 Firm Industrial Gas Service (IGS) Forecast

IGS volumes are forecasted in total as a function of natural gas prices, number of customers, and a rate-specific industrial production index.

### 3.3.2 Industrial As-Available Gas Service (IAAGS) Forecast

There are a small number of customers on IAAGS so each customer is forecasted separately. These forecasts are developed by the Sales Analysis & Forecasting department with input from Major Account representatives when available to make sure the underlying assumptions and forecasted volumes are reasonable.

## 3.4 Substitute Gas Sales Service (SGGS)

There are a small number of customers on SGGS so each customer is forecasted separately. These forecasts are developed by the Sales Analysis & Forecasting department with input from Major Account representatives when available to make sure the underlying assumptions and forecasted volumes are reasonable.

## 3.5 Distributed Generation Gas Service (DGGS)

There are a small number of customers on DGGS so each customer is forecasted separately. These forecasts are developed by the Sales Analysis & Forecasting department based on usage over the last twelve months in conjunction with the Gas Supply group.

## 3.6 Interdepartmental Sales Forecast

The interdepartmental sales forecasts consist of gas used by the Mill Creek generating station. The forecast of gas used by these stations is based on usage over the last twelve months in conjunction with the Generation Planning group.

## 3.7 Firm Transportation Forecast

The firm transportation forecast consists of special contract customers and customers on the Firm Transportation Service (FT) rate schedule. The firm transportation revenue class consists of the company's largest natural gas customers. For forecasting purposes, the largest commercial and industrial customers in this class are forecasted separately. These forecasts are developed by the Sales Analysis & Forecasting department with input from Major Account representatives to make sure the underlying assumptions and forecasted volumes are reasonable.

### 3.7.1 Industrial Firm Transportation (IFT) Forecast

The largest customers in the IFT class make up about two-thirds of the class's total usage and are forecasted with direct input from account managers. Volumes for the other customers are forecasted in total as a function of heating degree days, gas supply cost, industrial production indices, and binary variables to account for anomalies in the data.

### 3.7.2 Commercial Firm Transportation (CFT) Forecast

CFT volumes are forecasted as a function of heating degree days, economic indices, and binary variables to account for anomalies in the data.

### 3.8 Rider TS-2 Transportation Forecast

The TS-2 transportation forecast consists of commercial and industrial customers with a Gas Transportation Service (TS-2) rider. The rate forecast is the sum of projections for individual customers that are expected to be on the rate in any given period.

## 4 Data Processing

The models discussed in the preceding section produce forecasts on a "billed" basis. All customers are assigned to one of 20 billing cycles. A billing cycle determines what time of the month, generally, a customer's meter is read. The volumes on customers' bills are referred to as "billed" volumes. If a customer's billing cycle does not coincide directly with the boundaries of calendar months, that customer's bill will include volumes from multiple calendar months.

In this part of the forecast process, the billed forecast data is processed to meet the needs of the forecast's end users. First, the billed forecasts are converted from a billed basis to a calendar month basis. Then, the calendar forecasts are allocated by rate and revenue class for use by the Financial Planning Department. In addition, the calendar forecasts are used – along with forecasts of gas losses and gas used by company-owned facilities and generating assets – to produce the Gas Supply Composition Forecast. Each of these processes is discussed in the following sections.

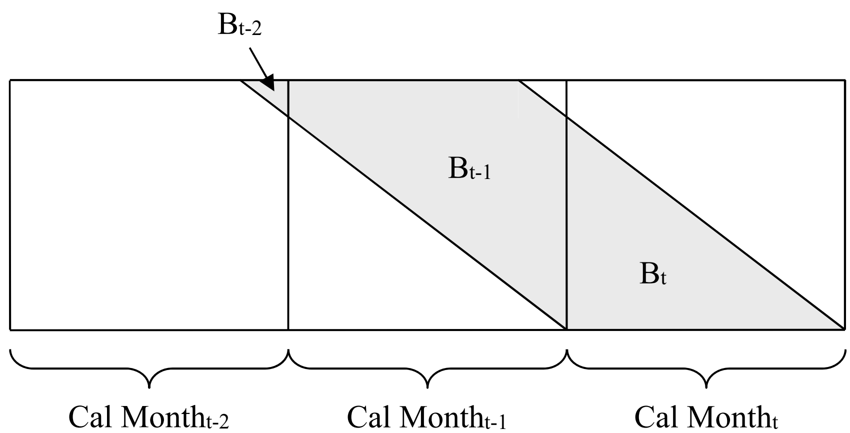
### 4.1 Billed-to-Calendar Conversion

The following forecasts must be converted from a billed to calendar basis: RGS, CGS, and IGS. The remaining forecasts are billed at the end of each calendar month; thus, their "billed" volumes are already stated on a "calendar month" basis and a billed-to-calendar conversion is not necessary.

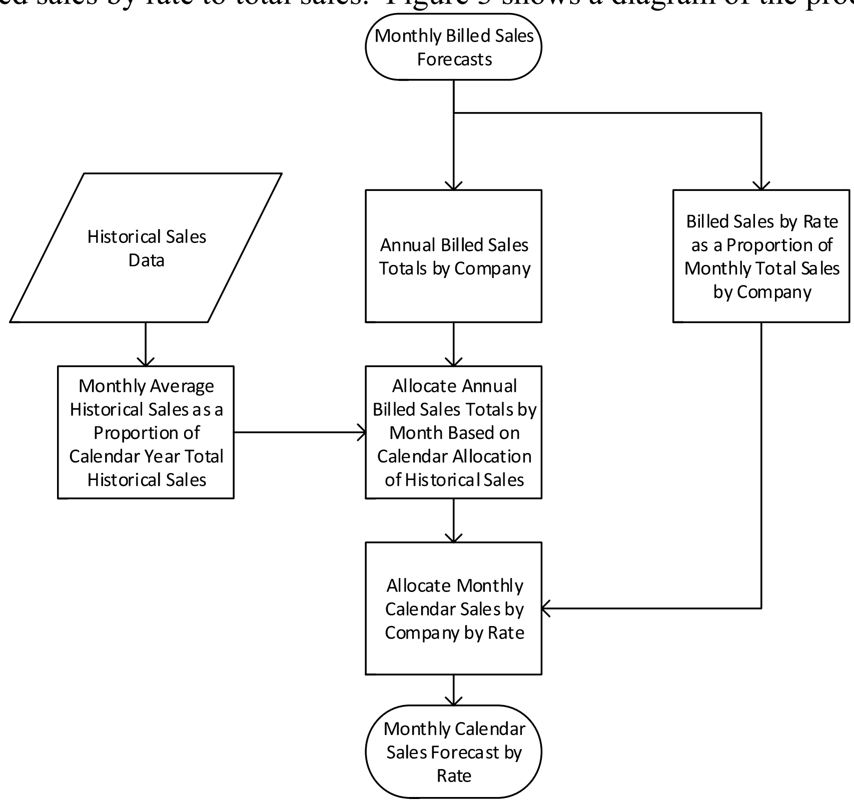
The shaded area in Figure 2 represents a typical billing month (B). Area $B_t$ represents the volumes in the billing month that were consumed in the current calendar month (time = t). Area $B_{t-1}$ represents the volumes in the billing month that were consumed in the previous calendar month (time = t-1). Area $B_{t-2}$ represent the volumes in the billing month that were consumed in the calendar month two months prior to the current month (time = t-2).[7] In this process, ratios of historical monthly calendar sales by revenue class to annual monthly calendar sales by revenue class are developed to allocate forecasted billed sales to calendar sales.

[7] Not all billing months include volumes that were consumed in the calendar month two months prior to the current month.

**Figure 2 – Billed and Calendar Energy**



Using historical calendar data to obtain monthly allocation ratios, the annual billed sales forecasts are allocated into months using the monthly allocation ratios. This yields monthly calendar sales forecasts. These monthly calendar sales are then allocated into rate categories (i.e., tariffs) using the ratio of billed sales by rate to total sales. Figure 3 shows a diagram of the process.



## 4.2 Rate-to-Revenue Class Allocation

To meet revenue forecasting requirements, the billed and calendar volume forecasts, which are initially developed by rate class, must be allocated to revenue classes. Revenue class is a higher level grouping; all rate classes are allocated to one or more of the following revenue classes:

- Residential
- Commercial
- Industrial
- Interdepartmental
- Transport

This information is used by the Financial Planning department to develop a forecast of revenues for the planning period. Billed and calendar forecasts are allocated to revenue classes using a set of monthly allocation ratios. These ratios are derived based on historical sales data from CCS for gas volumes and customers.

## 4.3 Customer Forecasts

The customer forecasts are used in the company's revenue forecast to compute revenue from customer charges.

The customer charge for the CGS and IGS rate plans varies based on the capacity of the customer's meter – whether it's less than or greater than 5,000 cf/hr. Therefore, information from CCS is used to segment the total number of CGS and IGS customers into these two meter capacity categories.

# Appendix A: Residential SAE Modeling Framework

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions. Econometric models are well suited to identifying historical trends and to projecting these trends into the future. In contrast, end-use models are able to identify and isolate the end-use factors that are driving energy use. By incorporating end-use structure into an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to this approach.

- The equipment efficiency and saturation trends, dwelling square footage, and thermal integrity changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast. This provides a strong bridge between the two forecasts.
- By explicitly incorporating trends in equipment saturations, equipment efficiency, dwelling square footage, and thermal integrity levels, it is easier to explain changes in usage levels and changes in weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects. By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be incorporated into the final model.

This section describes this approach, the associated supporting SAE spreadsheets, and the *MetrixND* project files that are used in the implementation. The main source of the SAE spreadsheets is the 2017 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

## Statistically Adjusted End-Use Modeling Framework

The statistically adjusted end-use modeling framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$), and other equipment ($Other_{y,m}$). Formally,

$$USE_{y,m} = Heat_{y,m} + Cool_{y,m} + Other_{y,m} \tag{1}$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$USE_m = a + b_1 \times XHeat_m + b_2 \times XCool_m + b_3 \times XOther_m + \varepsilon_m \tag{2}$$

$XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, dwelling data, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

### *Constructing XHeat*

As represented in the SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days
- Heating equipment saturation levels
- Heating equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier:

$$XHeat_{y,m} = HeatIndex_{y,m} \times HeatUse_{y,m} \tag{3}$$

Where:

- $XHeat_{y,m}$ is estimated heating energy use in year ($y$) and month ($m$)
- $HeatIndex_{y,m}$ is the monthly index of heating equipment
- $HeatUse_{y,m}$ is the monthly usage multiplier

The heating equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Given a set of fixed weights, the index will change over time with changes in equipment saturations (*Sat*), operating efficiencies (*Eff*), building structural index (*StructuralIndex*), and energy prices. Formally, the equipment index is defined as:

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left( Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \tag{4}$$

The *StructuralIndex* is constructed by combining the EIA's building shell efficiency index trends with surface area estimates, and then it is indexed to the 2009 value:

$$StructuralIndex_y = \frac{BuildingShellEfficiencyIndex_y \times SurfaceArea_y}{BuildingShellEfficiencyIndex_{09} \times SurfaceArea_{09}} \tag{5}$$

The *StructuralIndex* is defined on the *StructuralVars* tab of the SAE spreadsheets. Surface area is derived to account for roof and wall area of a standard dwelling based on the regional average square footage data obtained from EIA. The relationship between the square footage and surface area is constructed assuming an aspect ratio of 0.75 and an average of 25% two-story and 75% single-story. Given these assumptions, the approximate linear relationship for surface area is:

$$SurfaceArea_y = 892 + 1.44 \times Footage_y \tag{6}$$

In Equation 4, 2009 is used as a base year for normalizing the index. As a result, the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times HeatShare_{09}^{Type} \tag{7}$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *HeatIndex* value in 2009 will be equal to estimated annual heating intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For electric heating equipment, the SAE spreadsheets contain two equipment types: electric resistance furnaces/room units and electric space heating heat pumps. Examples of weights for these two equipment types for the U.S. are given in Table 1.

**Table 1: Electric Space Heating Equipment Weights**

| Equipment Type | Weight (kWh) |
|---|---|
| Electric Resistance Furnace/Room units | 760 |
| Electric Space Heating Heat Pump | 126 |

Data for the equipment saturation and efficiency trends are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for electric space heating heat pumps are given in terms of Heating Seasonal Performance Factor [BTU/Wh], and the efficiencies for electric furnaces and room units are estimated as 100%, which is equivalent to 3.41 BTU/Wh.

**Price Impacts**. In the 2007 version of the SAE models and thereafter, the Heat Index has been extended to account for the long-run impact of electric and natural gas prices. Since the Heat Index represents changes in the stock of space heating equipment, the price impacts are modeled to play themselves out over a 10-year horizon. To introduce price effects, the Heat Index as defined by

Equation 4 above is multiplied by a 10-year moving-average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities:

$$HeatIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( Sat_y^{Type} / Eff_y^{Type} \right)}{\left( Sat_{09}^{Type} / Eff_{09}^{Type} \right)} \times \left( TenYearMovingAverageElectricPrice_{y,m} \right)^{\phi} \times \left( TenYearMovingAverageGasPrice_{y,m} \right)^{\gamma} \tag{8}$$

Since the trends in the Structural index (the equipment saturations and efficiency levels) are provided exogenously by the EIA, the price impacts are introduced in a multiplicative form. As a result, the long-run change in the Heat Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels relative to what was contained in the base EIA long-term forecast.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, prices, and billing days. The estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left( \frac{WgtHDD_{y,m}}{HDD_{09}} \right) \times \left( \frac{HHSize_y}{HHSize_{09}} \right)^{0.25} \times \left( \frac{Income_y}{Income_{09}} \right)^{0.20} \times \left( \frac{ElecPrice_{y,m}}{ElecPrice_{09,7}} \right)^{\lambda} \times \left( \frac{GasPrice_{y,m}}{GasPrice_{09,7}} \right)^{\kappa} \tag{9}$$

Where:

- *WgtHDD* is the weighted number of heating degree days in year ($y$) and month ($m$). This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month.
- *HDD* is the annual heating degree days for 2009
- *HHSize* is average household size in a year ($y$)
- *Income* is average real income per household in year ($y$)
- *ElecPrice* is the average real price of electricity in month ($m$) and year ($y$)
- *GasPrice* is the average real price of natural gas in month ($m$) and year ($y$)

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and heating degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in the economic drivers, as transformed through the end-use elasticity parameters. The price impacts captured by the Usage equation represent short-term price response.

### *Constructing XCool*

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days
- Cooling equipment saturation levels
- Cooling equipment operating efficiencies
- Average number of days in the billing cycle for each month
- Thermal integrity and footage of homes
- Average household size, household income, and energy prices

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_y \times CoolUse_{y,m} \tag{10}$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year ($y$) and month ($m$)
- $CoolIndex_y$ is an index of cooling equipment
- $CoolUse_{y,m}$ is the monthly usage multiplier

As with heating, the cooling equipment index is defined as a weighted average across equipment types of equipment saturation levels normalized by operating efficiency levels. Formally, the cooling equipment index is defined as:

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( \frac{Sat_y^{Type}}{Eff_y^{Type}} \right)}{\left( \frac{Sat_{09}^{Type}}{Eff_{09}^{Type}} \right)} \qquad (11)$$

Data values in 2009 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2009. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2009 level. This will be counteracted by higher efficiency levels, which will drive the index downward. The weights are defined as follows.

$$Weight^{Type} = \frac{Energy_{09}^{Type}}{HH_{09}} \times CoolShare_{09}^{Type} \qquad (12)$$

In the SAE spreadsheets, these weights are referred to as *Intensities* and are defined on the *EIAData* tab. With these weights, the *CoolIndex* value in 2009 will be equal to estimated annual cooling intensity per household in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

For cooling equipment, the SAE spreadsheets contain three equipment types: central air conditioning, space cooling heat pump, and room air conditioning. Examples of weights for these three equipment types for the U.S. are given in Table 2.

### Table 2: Space Cooling Equipment Weights

| Equipment Type | Weight (kWh) |
|---|---|
| Central Air Conditioning | 1,209 |
| Space Cooling Heat Pump | 238 |
| Room Air Conditioning | 175 |

The equipment saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets. The efficiency for space cooling heat pumps and central air conditioning (A/C) units are given in terms of Seasonal Energy Efficiency Ratio [BTU/Wh], and room A/C unit efficiencies are given in terms of Energy Efficiency Ratio [BTU/Wh].

**Price Impacts.** In the 2007 SAE models and thereafter, the Cool Index has been extended to account for changes in electric and natural gas prices. Since the Cool Index represents changes in the stock of space heating equipment, it is anticipated that the impact of prices will be long-term in nature. The Cool Index as defined Equation 11 above is then multiplied by a 10-year moving average of electric and gas prices. The level of the price impact is guided by the long-term price elasticities.

$$CoolIndex_y = StructuralIndex_y \times \sum_{Type} Weight^{Type} \times \frac{\left( Sat_y^{Type} \big/ Eff_y^{Type} \right)}{\left( Sat_{09}^{Type} \big/ Eff_{09}^{Type} \right)} \times \left( TenYearMovingAverageElectric\,Price_{y,m} \right)^{\phi} \times \left( TenYearMovingAverageGas\,Price_{y,m} \right)^{\gamma} \tag{13}$$

Since the trends in the Structural index, equipment saturations and efficiency levels are provided exogenously by the EIA, price impacts are introduced in a multiplicative form. The long-run change in the Cool Index represents a combination of adjustments to the structural integrity of new homes, saturations in equipment and efficiency levels. Without a detailed end-use model, it is not possible to isolate the price impact on any one of these concepts.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, household size, income levels, and prices. The estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left( \frac{WgtCDD_{y,m}}{CDD_{09}} \right) \times \left( \frac{HHSize_y}{HHSize_{09}} \right)^{0.25} \times \left( \frac{Income_y}{Income_{09}} \right)^{0.20} \times \left( \frac{Elec\,Price_{y,m}}{Elec\,Price_{09}} \right)^{\lambda} \times \left( \frac{Gas\,Price_{y,m}}{Gas\,Price_{09}} \right)^{\kappa} \tag{14}$$

Where:

- *WgtCDD* is the weighted number of cooling degree days in year (*y*) and month (*m*). This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2009.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2009). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in the economic driver changes.

### Constructing XOther

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Appliance and equipment saturation levels
- Appliance efficiency levels
- Average number of days in the billing cycle for each month
- Average household size, real income, and real prices

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherEqpIndex_{y,m} \times OtherUse_{y,m} \tag{15}$$

The first term on the right-hand side of this expression ($OtherEqpIndex_y$) embodies information about appliance saturation and efficiency levels and monthly usage multipliers. The second term (*OtherUse*) captures the impact of changes in prices, income, household size, and number of billing-days on appliance utilization.

End-use indices are constructed in the SAE models. A separate end-use index is constructed for each end-use equipment type using the following function form.

$$ApplianceIndex_{y,m} = Weight^{Type} \times \frac{\left( Sat_y^{Type} \Big/ \frac{1}{UEC_y^{Type}} \right)}{\left( Sat_{09}^{Type} \Big/ \frac{1}{UEC_{09}^{Type}} \right)} \times MoMult_m^{Type} \times \tag{16}$$
$$(TenYearMovingAverageElectric\Pr ice)^{\lambda} \times (TenYearMovingAverageGas\Pr ice)^{\kappa}$$

Where:

- *Weight* is the weight for each appliance type
- *Sat* represents the fraction of households, who own an appliance type
- $MoMult_m$ is a monthly multiplier for the appliance type in month ($m$)
- *Eff* is the average operating efficiency the appliance
- *UEC* is the unit energy consumption for appliances

This index combines information about trends in saturation levels and efficiency levels for the main appliance categories with monthly multipliers for lighting, water heating, and refrigeration.

The appliance saturation and efficiency trends data are presented on the *Shares* and *Efficiencies* tabs of the SAE spreadsheets.

Further monthly variation is introduced by multiplying by usage factors that cut across all end uses, constructed as follows:

$$ApplianceUse_{y,m} = \left(\frac{BDays_{y,m}}{30.44}\right) \times \left(\frac{HHSize_y}{HHSize_{09}}\right)^{0.46} \times \left(\frac{Income_y}{Income_{09}}\right)^{0.10} \times \left(\frac{ElecPrice_{y,m}}{ElecPrice_{09}}\right)^{\phi} \times \left(\frac{GasPrice_{y,m}}{GasPrice_{09}}\right)^{\lambda} \tag{17}$$

The index for other uses is derived then by summing across the appliances:

$$OtherEqpIndex_{y,m} = \sum_k ApplianceIndex_{y,m} \times ApplianceUse_{y,m} \tag{18}$$

## Supporting Spreadsheets and MetrixND Project Files

The SAE approach described above has been implemented for each of the nine Census Divisions. A mapping of states to Census Divisions is presented in Figure 15. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 3.

**Figure 15: Mapping of States to Census Divisions**

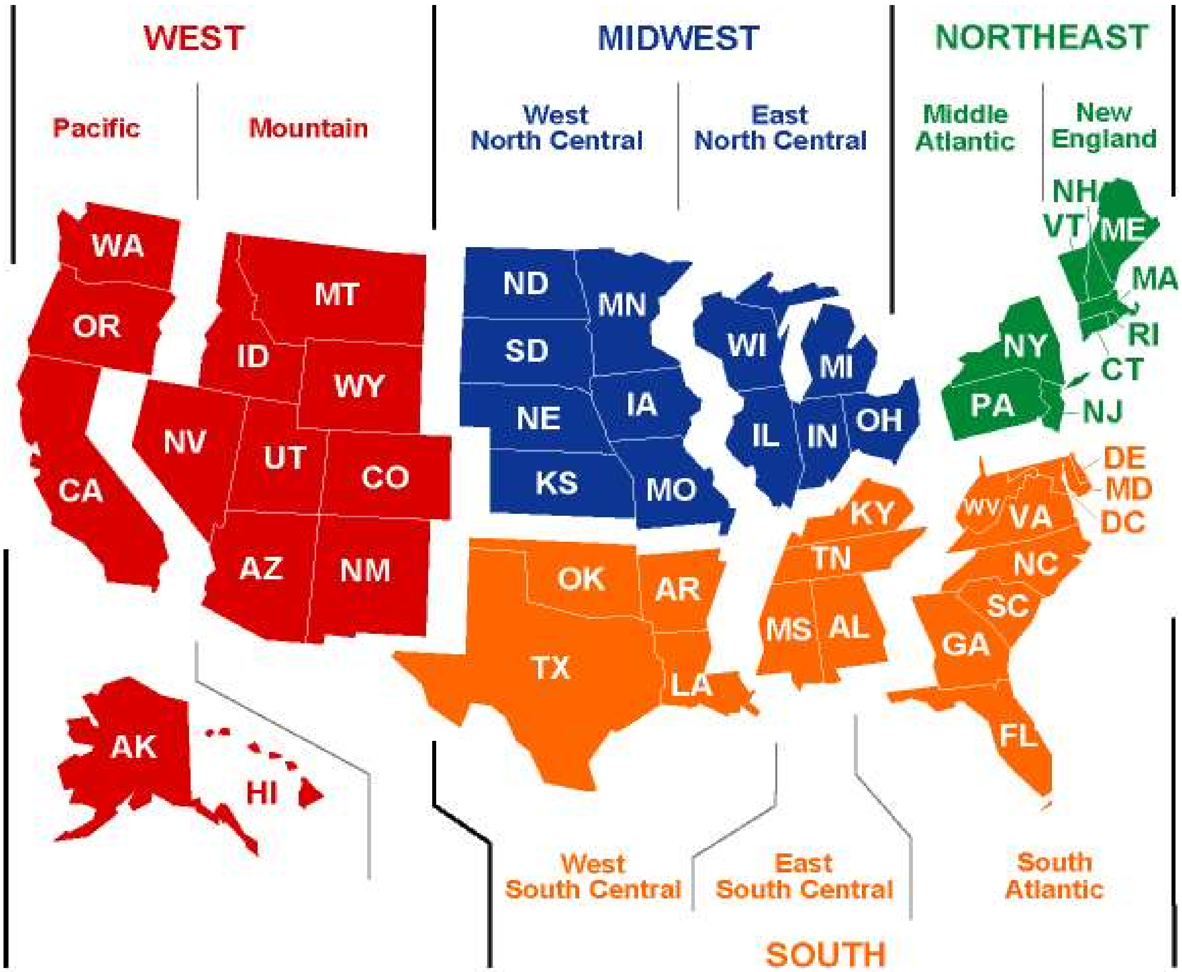


**Table 3: List of SAE Files**

| Spreadsheet | *MetrixND* Project File |
|---|---|
| NewEngland.xls | SAE_NewEngland.ndm |
| MiddleAtlantic.xls | SAE_MiddleAtlantic.ndm |
| EastNorthCentral.xls | SAE_EastNorthCentral.ndm |
| WestNorthCentral.xls | SAE_WestNorthCentral.ndm |
| SouthAtlantic.xls | SAE_SouthAltantic.ndm |
| EastSouthCentral.xls | SAE_EastSouthCentral.ndm |
| WestSouthCentral.xls | SAE_WestSouthCentral.ndm |
| Mountain.xls | SAE_Mountain.ndm |
| Pacific.xls | SAE_Pacific.ndm |

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The *MetrixND* project files link to the data in these spreadsheets. These project files calcualte the end-use *Usage* variables are constructed and the estimated SAE models.

Each of the nine SAE spreadsheets contains the following tabs:

- **Definitions -** Contains equipment, end use, worksheet, and Census Division definitions.
- **Intensities -** Calculates the annual equipment indices.
- **Shares -** Contains historical and forecasted equipment shares. The default forecasted values are provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **Efficiencies -** Contains historical and forecasted equipment efficiency trends. The forecasted values are based on projections provided by the EIA. The raw EIA projections are provided on the *EIAData* tab.
- **StructuralVars -** Contains historical and forecasted square footage, number of households, building shell efficiency index, and calculation of structural variable. The forecasted values are based on projections provided by the EIA.
- **Calibration -** This tab contains calculations of the base year *Intensity* values used to weight the equipment indices.
- **EIAData -** Contains the raw forecasted data provided by the EIA.
- **MonthlyMults -** Contains monthly multipliers that are used to spread the annual equipment indices across the months.
- **EV -** Worksheet for incorporating electric vehicle (EV) impacts.
- **PV -** Worksheet for incorporating photovoltaic battery (PV) impacts.

The *MetrixND* Project files are linked to the *AnnualIndices*, *ShareUEC*, and *MonthlyMults* tabs in the spreadsheets. Sales, economic, price and weather information for the Census Division is provided in the linkless data table *UtilityData*. In this way, utility specific data and the equipment indices are brought into the project file. The *MetrixND* project files contain the objects described below.

### *Parameter Tables*

- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use. There are five types of elasticities included on this table.

  - Economic variable elasticities
  - Short-term own price elasticities
  - Short-term cross price elasticities
  - Long-term own price elasticities

- Long-term cross price elasticities

The short-term price elasticities drive the end-use usage equations. The long-term price elasticities drive the Heat, Cool and other appliance indices. The combined price impact is an aggregation of the short and long-term price elasticities. As such, the long-term price elasticities are input as incremental price impact. That is, the long-term price elasticity is the difference between the overall price impact and the short-term price elasticity.

### Data Tables

- **AnnualEquipmentIndices** links to the *AnnualIndices* tab for heating and cooling indices, and *ShareUEC* tab for water heating, lighting, and appliances in the SAE spreadsheet.
- **UtilityData** is a linkless data table that contains sales, price, economic and weather data specific to a given Census Division.
- **MonthlyMults** links to the corresponding tab in the SAE spreadsheet.

### Transformation Tables

- **EconTrans** computes the average usage, and household size, household income, and price indices used in the usage equations.
- **WeatherTrans** computes the HDD and CDD indices used in the usage equations.
- **ResidentialVars** computes the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model.
- **BinaryVars** computes the calendar binary variables that could be required in the regression model.
- **AnnualFcst** computes the annual historical and forecast sales and annual change in sales.
- **EndUseFcst** computes the monthly sales forecasts by end uses.

### Models

- **ResModel** is the Statistically Adjusted End-Use Model.

### Steps to Customize the Files for Your Service Territory

The files that are distributed along with this document contain regional data. If you have more accurate data for your service territory, you are encouraged to tailor the spreadsheets with that information. This section describes the steps needed to customize the files.

*Minimum Customization*

- Save the *MetrixND* project file and the spreadsheet into the same folder
- Select the spreadsheet and *MetrixND* project file from the appropriate Census Division

- Open the spreadsheet and navigate to the *Calibration* tab
- In cell "B9", replace base year Census Division use-per-customer with observed use-per-customer for your service territory
- Save the spreadsheet and open the *MetrixND* project file
- Click on the *Update All Links* button on the *Menu* bar
- Review the model results

*Further Customization of Starting Usage Levels*

In addition to the minimum steps listed above, you can also utilize model-based calibration process described above on pages 15-16 to further fine-tune starting year usage estimates to your service territory.

*Customizing the End-use Share Paths*

You can also install your own share history and forecasts. To do this, navigate to the *Share* tab in the spreadsheet and paste in the values for your region. Make sure that base year shares on the *Calibration* tab reflect changes on the *Shares* tab.

*Customizing the End-use Efficiency Paths*

Finally, you can override the end-use efficiency paths that are contained on the *Efficiencies* tab of the spreadsheet.

# Appendix B: Commercial Statistically Adjusted End-Use Model

The traditional approach to forecasting monthly sales for a customer class is to develop an econometric model that relates monthly sales to weather, seasonal variables, and economic conditions. From a forecasting perspective, econometric models are well suited to identifying historical trends and to projecting these trends into the future. In contrast, end-use models are able to incorporate the end-use factors driving energy use. By including end-use structure in an econometric model, the statistically adjusted end-use (SAE) modeling framework exploits the strengths of both approaches.

There are several advantages to the SAE approach.

- The equipment efficiency trends and saturation changes embodied in the long-run end-use forecasts are introduced explicitly into the short-term monthly sales forecast, thereby providing a strong bridge between the two forecasts.
- By explicitly introducing trends in equipment saturations and efficiency levels, SAE models can explain changes in usage levels and weather-sensitivity over time.
- Data for short-term models are often not sufficiently robust to support estimation of a full set of price, economic, and demographic effects. By bundling these factors with equipment-oriented drivers, a rich set of elasticities can be built into the final model.

This document describes this approach, the associated supporting Commercial SAE spreadsheets, and *MetrixND* project files that are used in the implementation. The source for the commercial SAE spreadsheets is the 2017 Annual Energy Outlook (AEO) database provided by the Energy Information Administration (EIA).

## 1.1 Commercial Statistically Adjusted End-Use Model Framework

The commercial statistically adjusted end-use model framework begins by defining energy use ($USE_{y,m}$) in year (y) and month (m) as the sum of energy used by heating equipment ($Heat_{y,m}$), cooling equipment ($Cool_{y,m}$) and other equipment ($Other_{y,m}$). Formally,

$$USE_{y,m} = Heat_{y,m} + Cool_{y,m} + \mathrm{Other}_{y,m} \quad (1)$$

Although monthly sales are measured for individual customers, the end-use components are not. Substituting estimates for the end-use elements gives the following econometric equation.

$$USE_m = a + b_1 \times XHeat_m + b_2 \times XCool_m + b_3 \times XOther_m + \varepsilon_m \quad (2)$$

Here, $XHeat_m$, $XCool_m$, and $XOther_m$ are explanatory variables constructed from end-use information, weather data, and market data. As will be shown below, the equations used to construct these X-variables are simplified end-use models, and the X-variables are the estimated usage levels for each of the major end-uses based on these models. The estimated model can then be thought of as a statistically adjusted end-use model, where the estimated slopes are the adjustment factors.

### *Constructing XHeat*

As represented in the Commercial SAE spreadsheets, energy use by space heating systems depends on the following types of variables.

- Heating degree days,
- Heating intensity,
- Commercial output and energy price.

The heating variable is represented as the product of an annual equipment index and a monthly usage multiplier. That is,

$$XHeat_{y,m} = HeatIndex_y \times HeatUse_{y,m} \quad (3)$$

Where

- $XHeat_{y,m}$ is estimated heating energy use in year $y$ and month $m$,
- $HeatIndex_y$ is the annual index of heating equipment, and
- $HeatUse_{y,m}$ is the monthly usage multiplier.

The heating equipment index is composed of electric space heating intensity. The index will change over time with changes in heating intensity. Formally, the equipment index is defined as:

$$HeatIndex_y = HeatSales_{13} \times \frac{(HeatIntensity_y)}{(HeatIntensity_{13})} \quad (4)$$

In this expression, 2013 is used as a base year for normalizing the index. The ratio on the right is equal to 1.0 in 2013. In other years, it will be greater than 1.0 if intensity levels are above their 2004 level.

$$HeatSales_{04} = \left(\frac{kWh}{Sqft}\right)_{Heating} \times \left(\frac{CommercialSales_{13}}{\sum_{e} kWh / Sqft_{e}}\right) \tag{5}$$

Here, base-year sales for space heating is the product of the average space heating intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space heating sales value is defined on the *BaseYrInput* tab. The resulting $HeatIndex_y$ value in 2013 will be equal to the estimated annual heating sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Heating system usage levels are impacted on a monthly basis by several factors, including weather, commercial level economic activity, and prices. Using the COMMEND default elasticity parameters, the estimates for space heating equipment usage levels are computed as follows:

$$HeatUse_{y,m} = \left(\frac{WgtHDD_{y,m}}{HDD_{13}}\right) \times \left(\frac{Output_{y}}{Output_{13}}\right) \times \left(\frac{\Pr ice_{y,m}}{\Pr ice_{13}}\right)^{-0.18} \tag{6}$$

Where

- *WgtHDD* is the weighted number of heating degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's HDD and the prior month's HDD. The weights are 75% on the current month and 25% on the prior month
- *HDD* is the annual heating degree days for 2013,
- *Output* is a real commercial output driver in year *y*,
- *Price* is the average real price of electricity in month *m* and year *y*,

By construction, the $HeatUse_{y,m}$ variable has an annual sum that is close to 1.0 in the base year (2013). The first terms, which involve heating degree days, serves to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will reflect changes in commercial output and prices, as transformed through the end-use elasticity parameters. For example, if the real price of electricity goes up 10% relative to the base year value, the price term will contribute a multiplier of about .98 (computed as 1.10 to the -0.18 power).

### Constructing XCool

The explanatory variable for cooling loads is constructed in a similar manner. The amount of energy used by cooling systems depends on the following types of variables.

- Cooling degree days,
- Cooling intensity,
- Commercial output and energy price.

The cooling variable is represented as the product of an equipment-based index and monthly usage multiplier. That is,

$$XCool_{y,m} = CoolIndex_y \times CoolUse_{y,m} \tag{7}$$

Where

- $XCool_{y,m}$ is estimated cooling energy use in year $y$ and month $m$,
- $CoolIndex_y$ is an index of cooling equipment, and
- $CoolUse_{y,m}$ is the monthly usage multiplier.

As with heating, the cooling equipment index depends on equipment saturation levels (*CoolShare*) normalized by operating efficiency levels (*Eff*). Formally, the cooling equipment index is defined as:

$$CoolIndex_y = CoolSales_{13} \times \frac{\left( \frac{CoolShare_y}{Eff_y} \right)}{\left( \frac{CoolShare_{13}}{Eff_{13}} \right)} \tag{8}$$

Data values in 2013 are used as a base year for normalizing the index, and the ratio on the right is equal to 1.0 in 2013. In other years, it will be greater than 1.0 if equipment saturation levels are above their 2013 level. This will be counteracted by higher efficiency levels, which will drive the index downward. Estimates of base year cooling sales are defined as follows.

$$CoolSales_{13} = \left( \frac{kWh}{Sqft} \right)_{Cooling} \times \left( \frac{CommercialSales_{13}}{\sum_e \frac{kWh}{Sqft_e}} \right) \tag{9}$$

Here, base-year sales for space cooling is the product of the average space cooling intensity value and the ratio of total commercial sales in the base year over the sum of the end-use intensity values. In the Commercial SAE Spreadsheets, the space cooling sales value is defined on the *BaseYrInput* tab. The resulting *CoolIndex* value in 2013 will be equal to the estimated annual cooling sales in that year. Variations from this value in other years will be proportional to saturation and efficiency variations around their base values.

Cooling system usage levels are impacted on a monthly basis by several factors, including weather, economic activity levels and prices. Using the COMMEND default parameters, the estimates of cooling equipment usage levels are computed as follows:

$$CoolUse_{y,m} = \left(\frac{WgtCDD_{y,m}}{CDD_{13}}\right) \times \left(\frac{Output_y}{Output_{13}}\right) \times \left(\frac{\Pr ice_{y,m}}{\Pr ice_{13}}\right)^{-0.18} \qquad (10)$$

Where

- *WgtCDD* is the weighted number of cooling degree days in year *y* and month *m*. This is constructed as the weighted sum of the current month's CDD and the prior month's CDD. The weights are 75% on the current month and 25% on the prior month.
- *CDD* is the annual cooling degree days for 2013.

By construction, the *CoolUse* variable has an annual sum that is close to 1.0 in the base year (2013). The first two terms, which involve billing days and cooling degree days, serve to allocate annual values to months of the year. The remaining terms average to 1.0 in the base year. In other years, the values will change to reflect changes in commercial output and prices.

### *Constructing XOther*

Monthly estimates of non-weather sensitive sales can be derived in a similar fashion to space heating and cooling. Based on end-use concepts, other sales are driven by:

- Equipment intensities,
- Average number of days in the billing cycle for each month, and
- Real commercial output and real prices.

The explanatory variable for other uses is defined as follows:

$$XOther_{y,m} = OtherIndex_{y,m} \times OtherUse_{y,m} \tag{11}$$

The second term on the right hand side of this expression embodies information about equipment saturation levels and efficiency levels. The equipment index for other uses is defined as follows:

$$OtherIndex_{y,m} = \sum_{Type} Weight_{13}^{Type} \times \left( \frac{Share_y^{Type} / Eff_y^{Type}}{Share_{13}^{Type} / Eff_{13}^{Type}} \right) \tag{12}$$

Where

- *Weight* is the weight for each equipment type,
- *Share* represents the fraction of floor stock with an equipment type, and
- *Eff* is the average operating efficiency.

This index combines information about trends in saturation levels and efficiency levels for the main equipment categories. The weights are defined as follows.

$$Weight_{13}^{Type} = \left( \frac{kWh}{Sqft} \right)_{Type} \times \left( \frac{CommercialSales_{13}}{\sum_e kWh / Sqft_e} \right) \tag{13}$$

Further monthly variation is introduced by multiplying by usage factors that cut across all end-uses, constructed as follows:

$$OtherUse_{y,m} = \left(\frac{BDays_{y,m}}{30.44}\right) \times \left(\frac{Output_{y}}{Output_{13}}\right) \times \left(\frac{Price_{y.m}}{Price_{13}}\right)^{-0.18} \tag{14}$$

In this expression, the elasticities on output and real price are computed from the COMMEND default values.

## 1.2 Supporting Spreadsheets and *MetrixND* Project Files

The SAE approach described above has been implemented for each of the nine census divisions. This section describes the contents of each file and a procedure for customizing the files for specific utility data. A total of 18 files are provided. These files are listed in Table 1.

**Table 1: List of SAE Files**

| Spreadsheets | *MetrixND* Project Files |
|---|---|
| NewEnglandCom17.xls | NewEnglandCom17.ndm |
| MiddleAtlanticCom17.xls | MiddleAtlanticCom17.ndm |
| EastNorthCentralCom17.xls | EastNorthCentralCom17.ndm |
| WestNorthCentralCom17.xls | WestNorthCentralCom17.ndm |
| SouthAtlanticCom17.xls | SouthAltanticCom17.ndm |
| EastSouthCentralCom17.xls | EastSouthCentralCom17.ndm |
| WestSouthCentralCom17.xls | WestSouthCentralCom17.ndm |
| MountainCom17.xls | MountainCom17.ndm |
| PacificCom17.xls | PacificCom17.ndm |

As defaults, the SAE spreadsheets include regional data, but utility data can be entered to generate the *Heat*, *Cool*, and *Other* equipment indices used in the SAE approach. The data from these spreadsheets are linked to the *MetrixND* project files. In these project files, the end-use *Usage* variables (Equations 6, 10, and 14 above) are constructed and the SAE model is estimated.

The nine spreadsheets contain the following tabs.

- **EIAData** contains the raw forecasted data provided by the EIA
- **BaseYrInput** contains base year Census Division intensities by end-use and building type as well as default building type weights. It also contains functionality for changing the weights to reflect utility service territory.
- **Efficiency** contains historical and forecasted end-use equipment efficiency trends. The forecasted values are based on projections provided by the EIA.
- **Shares.** This tab contains historical and forecasted end-use saturations.
- **Intensity** contains the annual intensity (kWh/sqft) projections by end-use.
- **AnnualIndices** contains the annual *Heat*, *Cool* and *Other* equipment indices.
- **FloorSpace** contains the annual floor space (sqft) projections by end-use.
- **PV** incorporates the impact of photovoltaic batteries into the forecast.
- **Graphs** contains graphs of Efficiency and Intensities, which can be updating by selecting from the list in cell B2.

The *MetrixND* project files contain the following objects.

### *Parameter Tables*

- **Parameters.** This parameter table includes the values of the annual HDD and CDD in 2013 used to calculate the *Usage* variables for each end-use.
- **Elas.** This parameter table includes the values of the elasticities used to calculate the *Usage* variables for each end-use.

### *Data Tables*

- **AnnualIndices.** This data table is linked to the *AnnualIndices* tab in the Commercial SAE spreadsheet and contains sales-adjusted commercial SAE indices.
- **Intensity.** This data table is linked to the *Intensity* tab in the Commercial SAE spreadsheet.
- **FloorSpace.** This data table links to *FloorSpace* tab in the Commercial SAE spreadsheet.
- **UtilityData.** This linkless data table contains Census Division level data. It can be populated with utility-specific data.

### *Transformation Tables*

- **EconTrans.** This transformation table is used to compute the output and price indices used in the usage equations.
- **WeatherTrans.** This transformation table is used to compute the HDD and CDD indices used in the usage equations.
- **CommercialVars.** This transformation table is used to compute the *Heat*, *Cool* and *Other Usage* variables, as well as the *XHeat*, *XCool* and *XOther* variables that are used in the regression model. Structural variables based on the intensity/floor space combination are also calculated here.
- **BinaryVars.** This transformation table is used to compute the calendar binary variables that could be required in the regression model.
- **AnnualFcst.** This transformation table is used to compute the annual historical and forecast sales and annual change in sales.
- **EndUseFcst.** This transformation table breaks the forecast down into its heating, cooling and other components.

### *Models*

- **ComSAE:** The commercial SAE model (energy forecast driven by end-use indices, price, and output projections).
- **ComStruct:** Simple stock model (energy forecast driven by end-use energy intensities, and square footage).

# Electric Class Load Profile Forecast Process

PPL companies

## Sales Analysis & Forecasting
## September 2018

# Table of Contents

# 1. Introduction

The Sales Analysis & Forecasting group develops the class load profile forecasts for Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") (collectively, "the Companies") as inputs to the Companies' cost of service studies. The class load profile forecasts provide an estimate of each class's contribution to forecasted hourly energy requirements. The purpose of this document is to summarize the process used to produce and validate these forecasts.

# 2. Input Data

Table 1 contains a summary of key inputs to this process. The processes used to forecast monthly sales and hourly energy requirements are summarized in a separate document ("Electric Sales & Demand Forecast Process").

**Table 1: Inputs to Class Load Profile Forecast**

| **Data Input** | **Source** |
|---|---|
| 5- and 15-Minute Customer Energy Usage | History: MV90 System |
| Monthly Sales by Class | History: CCS / Accounting<br>Forecast: Business Plan |
| Hourly Energy Requirements by Company | History: Energy Management System<br>Forecast: Business Plan |
| Loss Percentages by Service Level | History: 2012 Line Loss Study |

# 3. Methodology

LG&E and KU develop class load profile forecasts for the classes listed in Table 2. With limited exceptions, each class comprises all or a portion of one rate schedule. For example, the Commercial Power Service Primary class comprises commercial customers who take primary service on the Power Service ("PS") rate schedule. The goal of the forecast process is to develop profiles for each class that reflect the classes' hourly energy requirements under "normal" weather conditions.[1]

[1] "Normal" weather is defined as the average weather over a 20-year historical period.

**Table 2: LG&E and KU Classes**

| Class | Company | Rate Schedule | Sample / Census | Weather-Sensitive |
|---|---|---|---|---|
| Residential | LG&E, KU | RS, VFD | Sample | Yes |
| Residential Time-of-Day | LG&E, KU | RTOD | Sample | Yes |
| Electric Vehicle Charging | LG&E, KU | EVC | Census | No |
| General Service | LG&E, KU | GS | Sample | Yes |
| Commercial Power Service Primary | LG&E | PS | Sample | Yes |
| Commercial Power Service Secondary | LG&E | PS | Sample | Yes |
| Commercial Time-of-Day Primary | LG&E | TODP | Census | Yes |
| Commercial Time-of-Day Secondary | LG&E | TODS | Census | Yes |
| Industrial Power Service Primary | LG&E | PS | Sample | No |
| Industrial Power Service Secondary | LG&E | PS | Sample | No |
| Industrial Time-of-Day Primary | LG&E | TODP | Census | No |
| Industrial Time-of-Day Secondary | LG&E | TODS | Census | No |
| Louisville Water Company | LG&E | Special Contract | Census | No |
| All Electric Schools | KU | AES | Sample | Yes |
| Power Service Secondary | KU | PS | Sample | Yes |
| Time-of-Day Secondary | KU | TODS | Census | Yes |
| Power Service Primary | KU | PS | Sample | Yes |
| Time-of-Day Primary | KU | TODP | Census | Yes |
| Fluctuating Load Service | KU | FLS | Census | No |
| Retail Transmission Service | LG&E, KU | RTS | Census | No |
| Outdoor Sports Lighting | LG&E, KU | OSL | Sample | No |
| Unmetered Lighting | LG&E, KU | LS, RLS | Sample | No |
| Lighting Energy Service | LG&E, KU | LE | Sample | No |
| Traffic Energy Service | LG&E, KU | TE | Sample | No |
| Company Uses | LG&E, KU | N/A | N/A | Yes |
| Muni Primary | KU | Special Contract | Census | Yes |
| Muni Transmission | KU | Special Contract | Census | Yes |
| Old Dominion Power | KU | N/A | Census | Yes |

The Companies' most recent cost of service studies focused on the twelve months ending April 2020 ("Forecasted Test Period"). To forecast class load profiles for this period, the Companies first developed historical class load profiles for the twelve months ending April 2018 ("Historical Period"). Then, these historical load profiles were used along with other forecasted inputs to forecast class load profiles for Forecasted Test Period. This process is completed separately for LG&E and KU. The following sections summarize the process in more detail.

## 3.1 Historical Period Class Load Profiles

Hourly class load profiles for the Historical Period are developed using customers' 5- and 15-minute energy usage data ("interval data"). The Companies have interval data for all customers in classes with demand rates that vary by time of day. Therefore, historical profiles for these "census" classes are created simply by aggregating interval data for all customers in the class by hour. For each of the classes without interval data for all customers ("sample" classes), historical profiles are created based on interval data for a sample of customers. The samples were designed for this purpose and account for differences within each class in the way customers use electricity.

For all classes, the Companies ensure that the sum of hourly demands in each month equals actual monthly sales according to accounting records. In addition, the Companies ensure that the sum of class demands in each hour plus losses and company uses equals the actual hourly energy requirements according to the Energy Management System ("EMS").

## 3.2 Forecasted Test Period Class Load Profiles

A key consideration in developing class load profile forecasts is accounting for differences in weather and non-weather factors between the Historical Period and the Forecasted Test Period; non-weather factors include the number of customers, non-heating or cooling end-use efficiencies, and industrial production levels. In the Forecasted Test Period, the monthly sum of hourly loads for each class is aligned with the Companies' forecast of monthly energy requirements. This accounts for monthly differences in weather and non-weather factors, but because the Companies' cost of service studies are focused on hours with a loss-of-load probability, additional steps must be taken to ensure the class profiles on high load days are reasonable.

To develop daily class load profiles, the Companies rank the daily system peaks in the Historical Period and the Forecasted Test Period by month. For each month in the Forecasted Test Period, class profiles on the day with the highest system peak (daily rank = 1) are forecasted based on class profiles from the day in the Historical Period with the highest system peak. Then, class profiles on the day with the second highest system peak (daily rank = 2) are forecasted based on class profiles from the day in the Historical Period with the second highest system peak, and so on.

This ranking process ensures that the highest daily profiles in the Forecasted Test Period are forecasted based on days in the Historical Period with similar weather. Even so, weather differences can still exist between the Historical Period and Forecasted Test Period on days with the same daily rank. For example, weather on the peak day in August 2017 (Historical Period) was milder than a normal summer peak day and weather on the peak day in January 2018 (Historical Period) was colder than a normal winter peak day. To account for these differences, daily class profiles for weather-sensitive and non-weather-sensitive classes are forecasted differently.

Table 2 indicates which classes are considered weather-sensitive and non-weather-sensitive.[2] For each of the non-weather-sensitive classes, monthly class load profiles in the Historical Period are scaled up or down so that the sum of hourly loads in each month equals the Companies' energy requirements forecast for the corresponding month of the Forecasted Test Period. Then, the daily load profile in the Forecasted Test Period is equal to the "scaled" daily load profile from the day in the Historical Period with the same daily rank. The scaling process accounts for non-weather-related differences between the Historical Period and the Forecasted Test Period. With one exception, load factors for non-weather-sensitive classes in each month of the Forecasted Test Period are equal to load factors from the corresponding month in the Historical Period.[3]

For each of the weather-sensitive classes, the daily load profile in the Forecasted Test Period is based on the class's share of weather-sensitive load on the day in the Historical Period with the same daily rank. Weather-sensitive load in a given hour is equal to the system load less the sum of loads from non-weather-sensitive classes. This process accounts for the typically small weather differences between the Historical Period and Forecasted Test Period on days with the same daily rank.[4] A scaling adjustment is also made to weather-sensitive classes to align the sum of forecasted loads by month with the Companies' energy requirements forecast.

Because the Companies' cost of service studies are focused on hours with a loss-of-load probability, the class load forecasting process prioritizes accuracy on high load days. At the end of the process, the sum of class loads in each hour of the Forecasted Test Period equals the forecasted system load for that hour. In addition, the sum of loads for each class and month is closely aligned with the Companies' forecast of monthly class energy requirements.

## 4. Review

The forecast process has several built-in controls to ensure that the forecasted class load profiles are consistent with the separately-developed forecasts of hourly system energy requirements and monthly class-level sales. At the end of the process, the Companies review the class load profile forecasts to ensure that they are reasonable. Because the Companies' cost of service studies are focused on hours with a loss-of-load probability, this review is focused primarily on high load days to ensure they are reasonable in light of historical days on which the forecasts are based.

---

[2] This designation was determined based on the Companies' sales forecasting process. If weather was a significant explanatory variable in specifying a class's forecast model, the class is considered weather-sensitive.

[3] The one exception was made based on direct feedback from a large customer comprising a significant portion of the class.

[4] For example, because weather was colder than normal on the peak day in January 2018, the weather-sensitive load on that day was greater than the weather-sensitive load on the peak day in January of the Forecasted Test Period.

# 2019 Business Plan Gas Sales Forecast

**Sales Analysis & Forecasting**
**May 14, 2018**

# Forecast Summary

- 2019 Plan gas volumes are mostly unchanged versus 2018 Plan
  - Sales volumes 0.5% (163 MMCF) higher
  - Transport volumes 0.18% (25 MMCF) higher

- Economy: Louisville economic indicators remain positive. Kentucky's economy expanded by 1.8 percent in 2017 and is expected to surpass two percent in 2018 and 2019 due to the fiscal stimulus provided by the Tax Cuts and Jobs Act.
  - Similar to the state as a whole, Louisville MSA real gross metro product is expected to increase by more than two percent in 2018 and 2019.
  - Louisville MSA unemployment continues to decline. The rate fell to 3.7 percent early in March 2018, down 0.8 percent year over year. The rate has declined steadily since the Great Recession, when unemployment peaked at 11.9 percent.
  - Louisville MSA private single-family housing starts are up eight percent on a rolling 12-month basis.

# Generation Forecast Process

PPL companies

## Generation Planning & Analysis
## 2018

## Table of Contents

# 1 Introduction

The Generation Planning group annually prepares a generation and off-system sales ("OSS") forecast for Louisville Gas and Electric Company ("LG&E") and Kentucky Utilities Company ("KU") (collectively "the Companies"). This forecast provides the basis for – among other things – the Companies' forecasts of fuel costs, generation-related variable operating and maintenance costs, economy purchased power, and OSS margin. This document summarizes the process used to prepare the generation forecast.

# 2 Production Cost Model

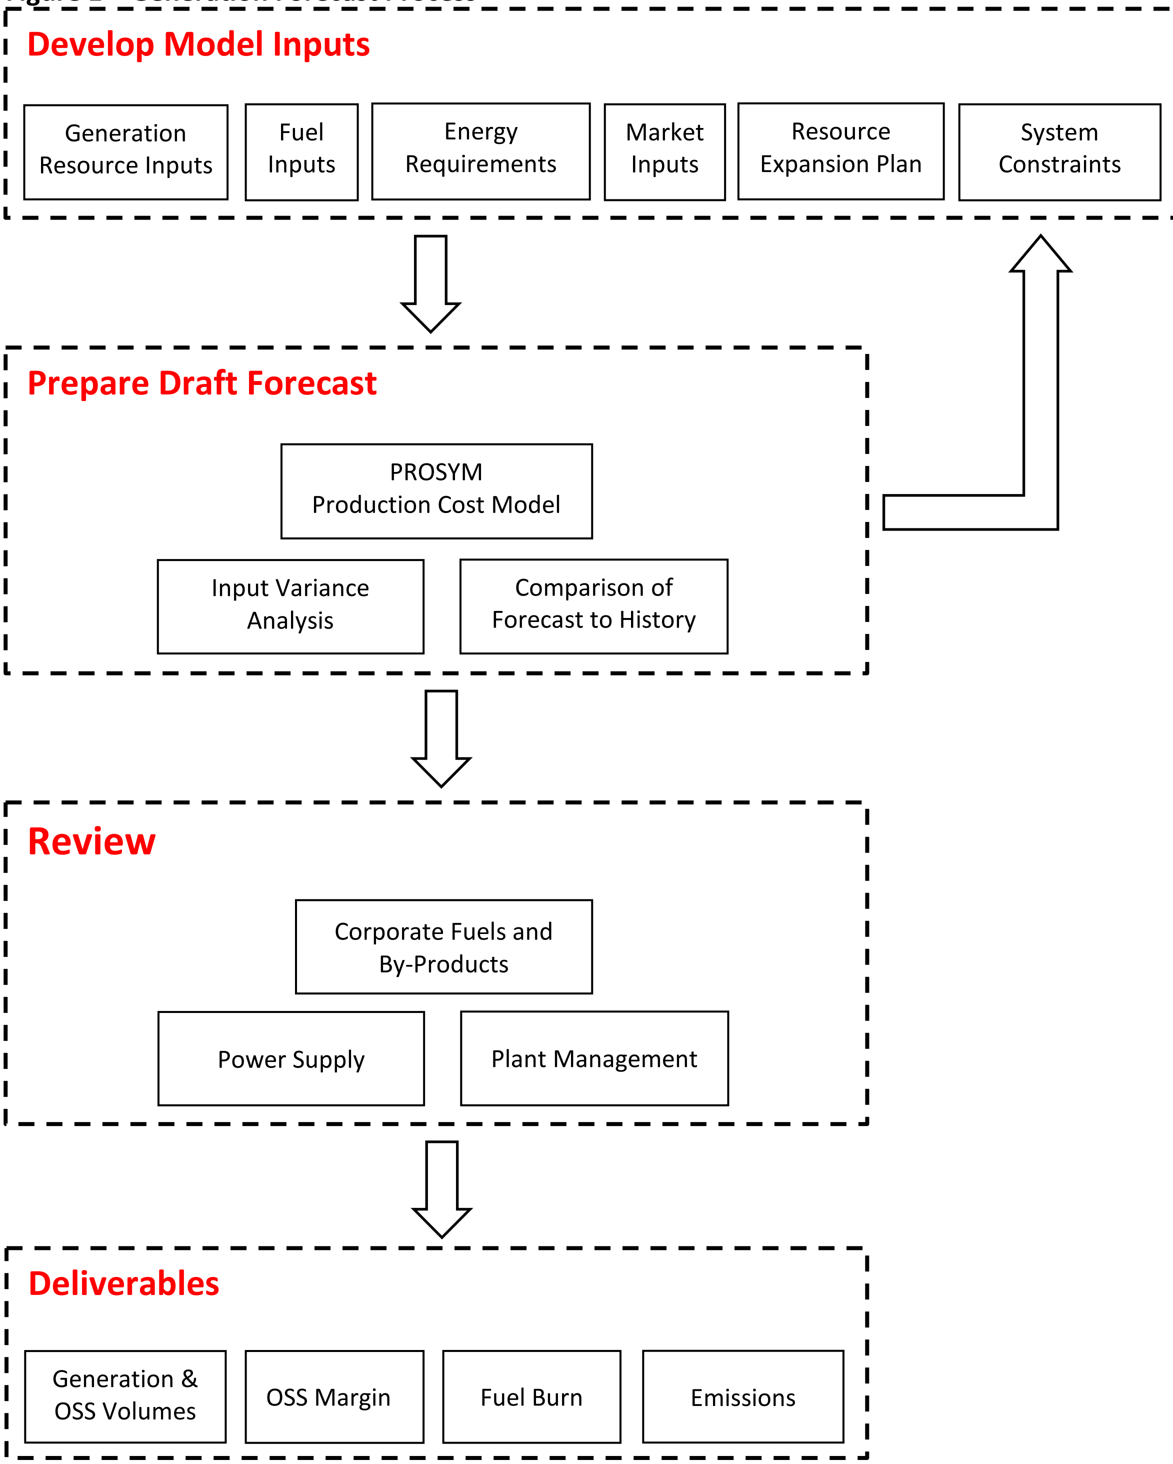
The Companies' generation forecast is developed using ABB's PROSYM, a proprietary production cost model. PROSYM is a chronological simulation engine that optimizes unit commitment and economic dispatch to meet the load for an interconnected electric system, considering the reserve requirements and other aspects of the electric system. PROSYM is a proven production cost model that has been used by utilities throughout the United States for decades.

In addition to PROSYM, SAS, Microsoft Access, and Microsoft Excel are used to process and analyze forecast results. Presentations containing forecast assumptions and results are prepared using Microsoft PowerPoint.

# 3 Process Overview

Figure 1 provides an overview of the process used to develop the Companies' generation forecast. In the first part of the process, model inputs are developed. Then, the model inputs are loaded into PROSYM and a draft generation forecast is prepared. PROSYM is a complex model, so extensive review takes place to ensure that the inputs are correctly loaded into the model and that the model results are reasonable. An input variance analysis evaluates the impact of changing each input or group of related inputs to ensure that the associated output changes are reasonable. Then, various elements of the generation forecast are compared to historical trends for reasonableness. If the forecast results are not deemed reasonable, the applicable model inputs are adjusted and the process is repeated. In the third part of the process, the results of the forecast are reviewed by other departments. This review process ensures that the forecast considers feedback from a broad range of perspectives. After all parties are satisfied with the results, the generation forecast is finalized and distributed to the groups who use the forecast to prepare financial budgets. Each part of this process is discussed further in the following sections.

**Figure 1 – Generation Forecast Process**



## 3.1 Develop Model Inputs

The first part of the process used to develop the Companies' generation forecast involves developing and vetting model inputs. Well-vetted inputs are essential to a good forecast. Wherever possible (and applicable), model inputs are initially developed based on an analysis of historical data. Then, these inputs are reviewed with plant management for reasonableness. Model inputs are adjusted when historical trends are not expected to continue in the future. Table 1 lists the six main categories of model inputs along with the inputs in each category. Each of these categories is discussed further in the following sections.

**Table 1 - Key Inputs to the Generation Forecast**

| Input Category | Inputs |
|---|---|
| Generation Resource Inputs | Minimum and maximum capacity, heat rate, emission rates, variable operating and maintenance cost, operating limits, unit availability, company allocation |
| Fuel Inputs | Coal prices, natural gas prices, oil prices, other fuel-related inputs |
| Energy Requirements | Hourly energy requirements |
| Market Inputs | Electricity prices, emission allowance prices, off-system sales and purchase limits, off-system sales and purchase price thresholds |
| Expansion Plan Inputs | Timing and type of expansion plan units |
| System Constraints | Transmission constraints, spinning reserve requirements, off-system sales constraints, dispatch order rules |

### 3.1.1 Generation Resource Inputs

The generation resources modeled in PROSYM include the Companies' existing and (if applicable) planned generation resources. Generation resources include generating units owned by the Companies, power purchase agreements with other power producers, and the capacity associated with the Companies' curtailable service rider ("CSR") customers.

Generation resource inputs define the operating characteristics of the generation resources. These inputs include the resource's minimum and maximum capacity, heat rate, emission rates, variable operating and maintenance cost, operating limits, equivalent forced outage rate, and ownership ratio. Each of these inputs is discussed further in the following sections.

#### 3.1.1.1 Minimum and Maximum Capacity

The minimum and maximum capacity (or output) is specified for each generation resource as a megawatt ("MW") value for the summer, winter, fall, and spring seasons. Capacity inputs are specified based on an analysis of historical data and unit rating tests but rarely change materially from forecast to forecast.

#### 3.1.1.2 Heat Rate

The heat rate specifies the amount of fuel required to produce a megawatt-hour ("MWh") of electricity. Where applicable, a heat rate curve is specified for each generation resource for the summer, winter, fall, and spring seasons. The heat rate curves are specified based on an analysis of historical data and heat rate tests performed by the plants.

#### 3.1.1.3 Emission Rates

Where applicable, PROSYM models the emissions of sulfur dioxide ("$SO_2$"), nitrogen oxides ("$NO_x$"), and carbon dioxide ("$CO_2$") for each generation resource:

- $SO_2$ Emissions: For coal units, $SO_2$ emissions are modeled as a function of the unit's $SO_2$ removal rate and the sulfur content of the fuel. The $SO_2$ removal rate for each coal unit ranges between

91.5% and 99.2%, depending on the vintage of the unit's flue-gas desulfurization ("FGD") equipment.[1] The $SO_2$ removal rate is specified based on an analysis of historical data and updated in the forecast period for units being retrofitted with new or upgraded FGD equipment. The sulfur content of the fuel is provided by the Corporate Fuels and By-Products group. For gas units, $SO_2$ emissions are modeled as a function of an average $SO_2$ emission rate (specified in lb/MMBtu). The $SO_2$ emission rate for gas units is estimated by the unit manufacturer.

- $NO_x$ Emissions: For coal units, $NO_x$ emissions are modeled as a function of a $NO_x$ emission curve (specified in lb/MMBtu). $NO_x$ emissions vary seasonally and with the unit's generation output and are lower for units retrofitted with selective catalytic reduction ("SCR") equipment. The $NO_x$ emission curve is specified based on an analysis of historical data in conjunction with performance expectations associated with the timing of catalyst replacement. Cane Run 7's $NO_x$ emission rate is specified based on an analysis of historical data. For other gas units, $NO_x$ emissions are modeled as a function of an average emission rate (also specified in lb/MMBtu) estimated by the unit manufacturer.
- $CO_2$ Emissions: $CO_2$ emissions are modeled as a function of the unit's average $CO_2$ emission rate (specified in lb/MMBtu). Average $CO_2$ emission rates are dependent on the type of fuel burned in the unit and are based on engineering estimates.

#### 3.1.1.4 Variable Operating and Maintenance Cost

Variable operating and maintenance ("O&M") costs include all incremental non-fuel costs that are incurred when operating the generation resource. For coal units, variable O&M includes the cost of operating environmental controls. For Cane Run 7, variable O&M includes the cost of its long-term program contract ("LTPC"), which is paid quarterly based on the number of starts and operating hours for the unit. For simple-cycle combustion turbines ("SCCTs"), the cost of major maintenance is considered in unit commitment and dispatch decisions but is not modeled as a component of production costs.

#### 3.1.1.5 Operating Limits

The following operating limits are modeled in PROYSM for each generation resource. Each of these inputs is specified based on operational experience.

- Minimum Down-Time: Minimum down-time is the minimum number of hours after coming offline that a generation resource must remain offline before it can be brought back online.
- Minimum Up-Time: Minimum up-time is the minimum number of hours after coming online that a generation resource must remain online before it can be taken offline for economic reasons.
- Ramp-Up Rate: Ramp-up rate is the rate (specified in MW/hour) at which a generation resource can increase its output.
- Ramp-Down Rate: Ramp-down rate is the rate (specified in MW/hour) at which a generation resource can decrease its output.

#### 3.1.1.6 Unit Availability

The following unit availability inputs are modeled in PROSYM for each resource. These inputs determine the extent a resource is available for operation.

- Planned Maintenance Schedule: The planned maintenance schedule specifies the timing and duration of planned maintenance events. The schedule is developed with input from plant

[1] Brown Units 1-3 share the same FGD. Mill Creek Units 1-2 also share the same FGD.

management, Generation Dispatch, and Project Engineering, such that the outages will have the least economic and reliability impact to customers.

- Equivalent Unplanned Outage Rate ("EUOR"): EUOR inputs determine the amount of time the generation resource is unavailable due either to a forced outage or maintenance outage. EUOR inputs are specified based on an analysis of historical data.

#### 3.1.1.7 Company Allocation

The energy and capacity for all generation resources modeled in PROSYM are either wholly or jointly allocated to LG&E and/or KU. For each generation resource, the Companies' allocation is specified in PROSYM to facilitate the process of creating generation and other forecasts by company as well as forecasting the After-the-Fact Billing process used to calculate the Fuel Adjustment Clause.

### 3.1.2 Fuel Inputs

Each thermal generation resource is associated with one or more fuel forecasts for startup and for online operation. The fuel inputs in PROSYM specify the cost of fuel, the fuel's heat content, the quantity of fuel required for startup, and – for generation resources where the fuel price is a blend of multiple fuel forecasts – the blend ratio of each fuel forecast. For coal, the fuel inputs also include the fuel's $SO_2$ content.

#### 3.1.2.1 Coal Prices

A forecast of delivered coal prices is developed for each station by the Corporate Fuels and By-products group. These forecasts reflect the cost curve for the Companies' contracted coal volumes, the assumed cost of coal that will be contracted in the future, and the cost of transporting fuel from mines to the stations. Based on the coal burn forecast by unit, the Corporate Fuels and By-Products group calculates the target coal purchase tonnage needed each year to maintain desired inventory levels while meeting the forecasted coal burn. The forecasted price per MMBtu for each coal type is the result of computing the volume weighted average of the price of coal already under contract and the market price of coal. In the first five years of the forecast, the market price is a blend of coal bids received, but not under contract, and the forecast from an independent third party consultant, IHS. Beyond the fifth year, prices are increased at the compound annual growth rate reflected in the Energy Information Administration's latest Annual Energy Outlook for "All Coals, Minemouth" price forecast.

#### 3.1.2.2 Natural Gas Prices

A forecast of Henry Hub natural gas prices is developed as a starting point for undelivered gas. The initial years of the Henry Hub price forecast reflect monthly forward market prices from NYMEX as of a specific recent quote date, which reflects a current view of forward prices at the time the forecast is prepared. In the subsequent years, the market prices are blended with the EIA's price forecast published in its most recent Annual Energy Outlook. The Henry Hub forward market prices are then adjusted to local delivered prices to KU and LG&E units using an average annual loss factor and a variable O&M charge per MMBtu, which also adjusts for average assumed basis differentials. For each station that uses natural gas for startup or online operations, a forecast of delivered natural gas prices is developed by adding transportation costs and a cost for pipeline losses to the forecast of Henry Hub prices.

#### 3.1.2.3 Oil Prices

A forecast of delivered oil prices is developed for coal units that use fuel oil for startup and for SCCTs that can use fuel oil for online operation as an alternative to natural gas. The fuel oil price forecast consists of market prices in the short term that are then interpolated to a long-term forecast. The

Companies' delivered oil price forecast first uses NYMEX New York Harbor #2 fuel oil monthly contract settled prices as far out in time as there is some market liquidity.

Long-term #2 fuel oil prices are developed by applying the historical relationship between New York Harbor #2 fuel oil and West Texas Intermediate ("WTI") oil prices to forecasted WTI prices derived from IHS Global Insight's latest 30-year macro forecast. To integrate the two forecast periods, the short-term market-based fuel oil price forecast is interpolated to the long-term regression-based price forecast. The forecasted #2 fuel oil prices are then multiplied by the historical average ratio of the Companies' fuel purchase price to the New York Harbor #2 fuel oil price to arrive at the Companies' delivered fuel oil purchase price forecast.

#### 3.1.2.4 Other Fuel-Related Inputs

Other fuel inputs include the fuel blend ratio, the quantity of startup fuel, the fuel's heat content, and fuel's $SO_2$ content.

- Fuel Blend Ratio – Trimble County 2 burns a blend of Illinois Basin coal and Powder River Basin coals. Because the prices of these coals are specified in separate forecasts in PROSYM, the fuel blend ratio determines the weighting that is used to compute the price of coal for Trimble County 2.
- Quantity of Startup Fuel – For each generating unit, the startup fuel quantity is the amount of fuel required to start the unit. These inputs are specified based on an analysis of historical data with input from plant management.
- Heat Content and $SO_2$ Content – Fuel heat and $SO_2$ contents are provided by the Corporate Fuels and By-products group.

### 3.1.3 Energy Requirements

PROSYM simulates the dispatch of the Companies' generating units to meet hourly energy requirements. The forecast of hourly energy requirements, which consists of native load sales and transmission and distribution losses, is developed by the Sales Analysis and Forecasting group. See the Electric Sales & Demand Forecast Process document for a discussion of the process used to develop the Companies' forecast of hourly energy requirements.

### 3.1.4 Market Inputs

Market inputs define the market in which the Companies operate. These inputs include spot hourly wholesale electricity prices, emission allowance prices, hourly OSS and economy purchase volume limits, and OSS and economy purchase price threshold values. Together, these inputs determine when the model should make economy purchases or OSS. Each of the market inputs is discussed in the following sections.

#### 3.1.4.1 Electricity Prices

A forecast of spot hourly electricity prices is developed to model the Companies' interactions with the electricity market. The Companies buy and sell electricity primarily with PJM through the PJM-South Import ("PJM-SI") interface / pricing point which is used in the planning process to represent the electricity market.[2] In the initial years, monthly forward market prices for PJM West Hub ("PJM-WH")[3] quoted by Intercontinental Exchange as of a specific recent quote date are used as a basis for

[2] The Companies also transact electricity with counterparties other than PJM. The Companies model PJM as a representative market, considering liquidity and availability of market data.
[3] The PJM market is used as a proxy for all markets available to the Companies because most of the Companies' off-system sales and purchases are expected to be transacted with the PJM market.

developing an hourly forecast of PJM-SI prices, reflecting the most current view of forward prices at the time the forecast was prepared.[4] In the subsequent years, the market prices are interpolated to a long-term PJM-WH forecast developed using EPIS's AuroraXMP software, a proprietary electricity market model. Monthly PJM-SI prices are derived by applying seasonal discount factors by peak type to the PJM-WH prices. The discount factors are based on historical ratios between actual PJM-SI and PJM-WH spot prices.

Monthly average PJM-SI prices are shaped to daily average prices by peak type by maintaining a correlation between the Companies' forecasted daily average energy and the forecasted daily average electricity price in each month, based on their historical correlation. This relationship serves as a proxy for the correlation between the daily load level in the PJM market and the corresponding daily average electricity price. The daily average prices are derived by multiplying the forecasted monthly average prices (by peak type) by a daily weighting that reflects the correlated variances between forecasted daily vs. average monthly loads and forecasted daily vs. average monthly electricity prices, based on historical observations. Hourly prices are then derived by multiplying the daily prices by hourly price multipliers that reflect the historical average ratios of hourly prices to daily prices by month and by peak type.

#### 3.1.4.2 Emission Allowance Prices

The dispatch cost for each unit includes the unit's fuel cost, variable O&M costs, and the cost of emission allowances. Emission allowance price forecasts are developed for $SO_2$, ozone seasonal $NO_x$, and annual $NO_x$ emission allowances. Initial prices reflect market prices as of a specific recent quote date for allowances under the Cross-State Air Pollution Rule. Longer-term prices reflect those in IHS Energy's most recent long-term planning scenario. No $CO_2$ emission allowance price assumptions are made for the Clean Power Plan because of the uncertainty regarding its future status.

#### 3.1.4.3 Hourly Off-System Sales and Purchase Volume Limits

The OSS and purchase limit inputs determine the maximum quantity (in MW) of OSS and economy purchases that can be made in any given hour. Since the volatility of available transmission capacity cannot be effectively modeled in PROSYM, limits on hourly OSS and economy purchases are used to align the volume of modeled OSS and economy purchase transactions with recent historical experience.

#### 3.1.4.4 Off-System Sales and Purchase Price Thresholds

When making an OSS or economy purchase, the Companies incur various costs related to the transaction. These costs are referred to as OSS and purchase "thresholds." OSS and purchase thresholds include the cost of transmission and transmission losses, independent system operator balancing charges, and a risk premium the Companies' Power Supply group uses to manage the uncertainty that exists between real-time prices and aggregated hourly (or settled) prices.

### 3.1.5 Resource Expansion Plan Inputs

The expansion plan inputs specify the timing and type of generation resources planned, if any, to be added to the Companies' generation portfolio to meet customers' need for energy and capacity. These generation resources can take the form of new generating units or power purchase agreements with a third-party provider. Generation resource inputs are discussed in Section 3.1.1.

[4] The quoted "off-peak wrap" forward prices for PJM-WH are split into off-peak (7x8) and weekend (2x16) peak types using historical ratios.

### 3.1.6 System Constraints

PROSYM enables the user to model a variety of physical constraints that exist within the Companies' transmission system and generation portfolio. These constraints are discussed in the following sections.

#### 3.1.6.1 Transmission Constraints

The Companies' transmission and distribution system is designed to deliver electricity from generation resources to load under a variety of circumstances. Despite the flexibility that is afforded the Companies, some constraints can occur in real time. For example, there are limits to the energy that can flow from LG&E to KU. PROSYM enables the Companies to model this and other transmission constraints.

#### 3.1.6.2 Spinning Reserve Requirements

As a NERC balancing area, the Companies are required to carry contingency reserves to ensure the reliability of the grid. To meet these obligations in a least-cost manner, the Companies are party to a reserve sharing agreement with TVA. By sharing reserves with TVA, the Companies are able to reduce the amount of contingency reserves they need to carry. In the current plan, the Companies need to maintain 250 MW of contingency reserves at all times. In addition, the Companies typically carry approximately 75 MW of regulating reserves to follow load fluctuations in real time. PROSYM models these reserve requirements.

#### 3.1.6.3 Off-System Sale Constraints

As a general rule, because hourly market prices can fluctuate, potential OSS margins from SCCTs do not justify the wear and tear associated with starting a unit in anticipation of potential OSS margins. Therefore, the Companies' SCCTs are generally only committed to meet customers' need for peak energy. For this reason, a constraint is modeled in PROSYM that reduces OSS by limiting modeled OSS when SCCTs are operating, which results in a proportion of OSS from SCCTs in line with historical volumes.

#### 3.1.6.4 Dispatch Order Rules

Dispatch order rules determine the order in which different types of generation resources are dispatched. The majority of generation resources are dispatched economically. However, curtailment of the Companies' CSR customers is limited to times when most or all other company-owned resources have been or are being dispatched. Likewise, the Companies' reserve sharing agreement gives the Companies limited and temporary access to emergency reserves that can only be dispatched after all other resources have been exhausted. The dispatch order rules enable the Companies to model these constraints.

## 3.2 Prepare Draft Generation Forecast

In the second part of the process used to develop the Companies' generation forecast, model inputs are loaded into PROSYM and PROSYM is used to prepare a draft generation forecast. PROSYM is a complex model, so extensive review takes place to ensure that the inputs are correctly loaded and that the model results are reasonable. An input variance analysis evaluates the impact of changing each input or group of related inputs to ensure that the associated output changes are reasonable. Then, various elements of the generation forecast are compared to historical trends for reasonableness. The input variance analysis and comparison of the forecast to history are discussed in more detail in the following sections.

### 3.2.1 Input Variance Analysis

The process of performing an input variance analysis begins with the previous year's generation forecast and is completed in steps. As each input or group of inputs is updated, PROSYM is used to create a new forecast. A comparison of forecast results in each step reveals the impact of changing each input (or group of related inputs) incrementally. The comparison of forecast results for each step includes a comparison of native load production costs, OSS margin, generation volumes, unit capacity factors, fuel burn, and other factors. In most cases, the change from the previous year's forecast to the current year's forecast is explained primarily by a limited number of factors. Despite this fact, the impact of all input changes is evaluated carefully. If the impact of a change is not deemed reasonable, the model inputs are adjusted and the process is repeated.

### 3.2.2 Comparison of Forecast to History

The goal of the generation forecasting process is to produce the most accurate forecast possible. In addition to the input variance analysis, numerous elements of the forecast are compared to historical trends to further assess the reasonableness of the forecast. In many cases, the forecast should be consistent with historical trends. When this is not the case, it is important to ensure that forecasted deviations from historical trends are reasonable. The following is a sample of forecast elements that are compared to historical data.

- Annual/monthly/hourly generation by generation resource
- Annual/monthly fuel burn by generation resource
- Annual startup fuel by generation resource
- Annual SCCT starts/run hours
- Annual/monthly/hourly OSS volumes by peak type
- Annual/monthly/hourly OSS margin by peak type
- Annual/monthly/hourly economy purchase volumes by peak type
- Annual $SO_2$/$NO_x$ emissions
- Annual/monthly capacity factor by generation resource
- Annual/monthly intercompany transaction volumes
- Annual/monthly dispatch order

## 3.3 Review

In the third part of the process used to develop the Companies' generation forecast, the results of the forecast are reviewed by other departments. This review process ensures that the forecast considers feedback from a broad range of perspectives.

The following groups are primary consumers of the forecast results and review various elements of the forecast to help ensure that the results are reasonable:

- Corporate Fuels and By-products: The Corporate Fuels and By-Products group reviews the fuel burn forecast by generating station and fuel type.
- Power Supply: The Power Supply group reviews the forecasts of OSS margin, OSS volumes, and economy purchase volumes by peak type.
- Plant Management: Plant managers review the forecasts of generation by station and fuel type.

## 3.4 Deliverables

After forecast reviews are completed, the forecast deliverables are distributed to the groups within the company who use the forecast to prepare financial budgets. The following is a list of key deliverables:

- Generation Forecast
- Fuel Burn Forecast
- Fuel Expense Forecast
- OSS Margin Forecast
- Emissions Forecast

# Generation & OSS Forecast

# 2019 BP Summary

- Compared to the 2018 BP, native load production costs ($/MWh) are notably lower in the 2019 BP; OSS contribution is higher in 2019 and lower in 2020-2022
  - Lower fuel prices, market electricity prices, and load drive differences throughout planning period

| Native Load Production Costs[1] ($/MWh) | 2019 | 2020 | 2021 | 2022 | 2023 | CAGR |
|---|---|---|---|---|---|---|
| 2018 BP[2] | 22.93 | 22.88 | 23.43 | 24.52 | 25.42 | 2.6% |
| 2019 BP | 22.46 | 22.57 | 23.07 | 23.70 | 24.21 | 1.9% |

| OSS Contribution (100%, $M) | 2019 | 2020 | 2021 | 2022 | 2023 |
|---|---|---|---|---|---|
| 2018 BP | 1.0 | 2.4 | 4.2 | 5.1 | 6.8 |
| 2019 BP | 2.0 | 1.9 | 3.6 | 4.6 | 6.9 |

1) Includes variable fuel costs, consumables, purchases, and variable PPA costs

2) 2018 BP numbers have been adjusted to reflect exclusion of fixed coal transportation costs to better align with dispatched costs

# Key planning assumptions & inputs

- Load, fuel prices, and electricity prices are generally lower Plan-over-Plan

| Plan-over-Plan Change (%) | 2019 | 2020 | 2021 | 2022 | 2023 |
|---|---|---|---|---|---|
| Native Load | -0.5% | -0.5% | -0.5% | -0.6% | -0.7% |
| Gas Prices (LKE Wgt Avg)[1] | -3.9% | -4.8% | -6.1% | -8.6% | -11.1% |
| Electricity Prices (PJM-SI ATC) | 4.8% | -5.5% | -5.4% | -5.4% | -5.4% |
| Coal Prices (LKE Wgt Avg)[1] | -0.9% | -0.3% | 0.3% | -1.6% | -2.1% |

1) Fuel prices reflect variable delivered costs inclusive of contracted volumes

- Brown 1-2 are assumed to retire February 28, 2019
- Coal generating units are assumed to have a 65-year life for planning purposes

# Winter reserve margin is 33% to 37% after retirement of Brown 1-2; winter reserve margin target based on 1-in-10 LOLE standard is above 30%

**Combined Company**
**Winter Reserve Margin Needs (MW)**
**based on 2019 Business Plan Load Forecast**

| | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | 2027 | 2028 |
|---|---|---|---|---|---|---|---|---|---|---|
| Net Peak Load | 6,220 | 5,972 | 5,975 | 5,970 | 5,966 | 5,966 | 5,957 | 5,948 | 5,949 | 5,954 |
| Existing Capability[1,2] | 8,425 | 8,253 | 8,253 | 8,261 | 8,261 | 8,086 | 8,279 | 8,279 | 8,279 | 8,279 |
| Retirements | 0 | -275 | -291 | -291 | -291 | -291 | -291 | -291 | -291 | -291 |
| CSR[3] | 141 | 141 | 141 | 141 | 141 | 141 | 141 | 141 | 141 | 141 |
| Total Supply | 8,566 | 8,119 | 8,103 | 8,111 | 8,111 | 7,936 | 8,129 | 8,129 | 8,129 | 8,129 |
| MW Margin | 2,346 | 2,147 | 2,128 | 2,141 | 2,144 | 1,969 | 2,172 | 2,180 | 2,180 | 2,175 |
| **Reserve Margin %** | **37.7%** | **35.9%** | **35.6%** | **35.9%** | **35.9%** | **33.0%** | **36.5%** | **36.7%** | **36.6%** | **36.5%** |

1) Includes OVEC and Bluegrass PPA; Bluegrass PPA expires on 4/30/2019
2) Reflects expected hot gas path maintenance outage for Paddy's Run 13 in 2024, which will make unit unavailable for that winter
3) CSR reflects expected hourly curtailment, which differs from contracted curtailable load

# CSAPR II update

- $NO_x$ emission rates are reflective of collaborative plan developed during 2017 BP
  - $NO_x$ targets are being reviewed given updates since 2017 BP (lower load, lower gas prices, Brown 1-2 retirement); changes not anticipated for 2019 BP

- Current forecasts yield $NO_x$ emissions above annual allowance allocations in near term (but well within banked volumes), and within allocations in long term

# Key takeaways

- Lower native load costs yields lower costs for ratepayers
  - Projected production cost savings of $10-40M per year vs. 2018 BP
- Load forecast is flat; absent additional unit retirements or significant load growth, no need for new capacity
- CSAPR II compliance plan appears manageable through collaborative effort
  - Monitoring Jefferson County NAAQS attainment plan
- Cane Run 7 projected to be dispatched at a high capacity factor with low gas prices
- No expected impact to generation portfolio over the planning period due to future federal regulations

# Appendix

# 2019 BP – Assumptions

- Modeled EFOR and MOR assumptions are based on historical values ('target' EFORs will continue to be the basis for KPI reporting)

- Retirements / expansion plan:
  - Bluegrass PPA (165 MW): May 2015 – April 2019
  - Brown 1-2 assumed to retire February 28, 2019
  - No expansion units planned at this time
  - Coal generating units are assumed to have a 65-year life for planning purposes

- Turbine overhaul schedule:
  - 2019: GH2, MC3, MC1, BR3
  - 2020: GH4
  - 2021: GH1
  - 2022: MC4
  - 2023: N/A

# Coal generating units are assumed to have a 65-year life for planning purposes

| Unit | Retirement w/ 65-Year Planning Assumption |
|---|---|
| Brown 1 | 2022[1] |
| Brown 2 | 2028[1] |
| Brown 3 | 2036 |
| Mill Creek 1 | 2037 |
| Ghent 1 | 2039 |
| Mill Creek 2 | 2039 |
| Ghent 2 | 2042 |
| Mill Creek 3 | 2043 |
| Ghent 3 | 2046 |
| Mill Creek 4 | 2047 |
| Ghent 4 | 2049 |
| Trimble County 1 | 2055 |
| Trimble County 2 | 2076 |

1) Brown 1-2 are assumed to retire on February 28, 2019 in the 2019 BP

# Allowance price assumptions

**CSAPR Emission Allowance Prices ($/ton emitted)**

| Year | Annual $NO_x$ | Seasonal $NO_x$ | $SO_2$ |
|---|---|---|---|
| 2019 | 2 | 84 | 1 |
| 2020 | 2 | 26 | 2 |
| 2021 | 2 | 66 | 2 |
| 2022 | 8 | 338 | 99 |
| 2023 | 6 | 218 | 46 |
| 2024 | 5 | 198 | 21 |
| 2025 | 4 | 180 | 10 |
| 2026 | 2 | 164 | 4 |
| 2027 | 1 | 149 | 2 |
| 2028 | 0 | 135 | 0 |

| MC3 | 10,480 | 10,408 | -0.7% | 10,368 | 10,557 | 1.8% | 10,669 |
| MC4 | 10,407 | 10,352 | -0.5% | 10,218 | 10,284 | 0.6% | 10,470 |
| TC1 | 10,529 | 10,341 | -1.8% | 10,497 | 10,210 | -2.7% | 10,510 |
| TC2 | 9,316 | 9,369 | 0.6% | 9,106 | 9,194 | 1.0% | 9,387 |
| CR7 | 6,634 | 6,653 | 0.3% | 6,718 | 6,624 | -1.4% | 6,562 |

Notes:

-Values shown represent net heat rates (in Btu/kWh).

-Summer and winter heat rates reflect values at maximum load. KPI heat rates reflect average observed values.

-Heat rate changes reflect calibration of forecasted fuel burn to actual fuel burn.

# 2019 fuel cost comparison – annual averages

| Fuel Expense ($/mmBtu) | | | | Delta | |

# Power Generation
# LG&E and KU Utilities
# 2019 Operating Plan

**August 2018**

# Table of Contents

# Plan Highlights

- Major investment and integration of environmental compliance – Coal Combustion Residuals (CCR), pond closures and Process Water/Effluent water Limit Guidelines (ELG)
- Generation forecast assumes continued trend of high Natural Gas Combined Cycle (NGCC) production levels based on current projections for gas prices in first three years of the plan; NGCC production levels taper off later in the plan as gas prices increase
- Increased resource requirements to meet and maintain compliance with incremental regulatory requirements – begin staffing to operate Process Water plants in 2018
- Brown 1 and 2 to be retired March 1, 2019. Brown coal investment includes unit 3 only.

# Major Operational Assumptions

- No generation capacity additions are in the plan through 2023.
- Brown 1 and 2 to be retired March 1, 2019. Capital spend is based on a Unit 3 only generation profile beginning in spring 2018.
- The next turbine overhauls by unit are as follows:
  - 2018: Ghent 3, Mill Creek 2, Trimble 2 (HP rotor and IP rotors)
  - 2019: Brown 3, Ghent 2, Mill Creek 1, Mill Creek 3, Trimble 2 (both LP rotors)
  - 2020: Trimble 2 (Generator), Ghent 4
  - 2021: Ghent 1.
  - 2022: Mill Creek 4.
  - 2023: None
- Demolition Timing:
  - Paddy's Run Coal Plant was completed in 2017.
  - Cane Run Coal Plant is contracted for 2017-2019.
  - Green River planned for 2018-2019.
  - Pineville Station planned for 2018-2019.
  - Tyrone Station planned for 2018-2019.
  - Canal Station planned for 2020-2021.

# Major Financial Assumptions

- Amended 2016 ECR filed January 26, 2018 for smaller, modified Phase II of the Landfill and closure of the Main Ash Pond not covered by Landfill Phases I, modified II, and hardscaped areas.

- Planned outage normalization regulatory treatment began July 1, 2017
  - Budgeted in accordance with revenue requirements allowed in 2017 rate proceeding with difference recorded in a regulatory asset or liability
  - Assumes this treatment will continue in future regulatory proceedings relative to Kentucky jurisdiction
  - Assumes amortization of regulatory assets or liabilities will be over a eight year period
  - Base rate case will be filed in third quarter 2018 for test year beginning May 1, 2019 through April 30, 2020

- Labor budget built on current work force plan recommendations. Assumptions include anticipated employee retirements and wage increase for current employees on average of 3% per year.

- Supplemental contractor work force includes on average a 2.5% escalation in costs based on approved contracts.

- Total Operating Costs remain in line with the approved 2018 Business Plan with the exception of costs associated with landfill well monitoring and new process water systems beginning in 2019.

# Major Assumptions – Process Water

- Process water facilities (Phys-chem for Mercury, Arsenic, metals) in-service 2019 for all four coal-fired plants:
  - Mill Creek - January 2019
  - Trimble County - April 2019
  - Ghent - June 2019
  - E.W. Brown - October 2019
- Labor resources consistent at each site
- All labor and non labor costs for operating and maintaining process water systems will be in base rates.
- Effluent water guideline (ELG) has placeholder spend primarily in 2021-2023 until final ELG regulations are promulgated, which are expected in 2019. Mill Creek has an anticipated in service date of November 2022 while Trimble County and Ghent anticipated in November 2023. ELG at E.W. Brown has been removed due to less volume resulting in cycling up chlorides and closed loop on WFGD.
- Plan assumes a proposed ECR filing in the first quarter of 2020 time frame seeking recovery of ELG costs, both capital and operating expense.

# Major Assumptions – Combustion Turbines

- Combustion turbine (CT) outages in the plan:
  - Dollars are split between O&M and capital based on the estimated scope of work that is reconditioning (expense – approximately 5%) vs. new parts (capital – approximately 95%).
  - For the second set of Trimble CT hot gas path inspections, the schedule is one unit each in 2017, 2018, 2020, 2022 and 2023.
  - This order may change in conjunction with the majors and rotor inspections during this plan. Currently, the majors and rotor inspections are just outside of the 5-year planning window.
  - Funding for enhanced in line inspections for gas transmission included in plan for Trimble County (2019) and E.W. Brown (2021) – included in fuel costs.
  - Brown C inspections by unit are as follows:
    - Unit 11 in 2018.
    - Unit 6 in 2019.
    - Unit 7 in 2021.
    - Unit 8 in 2021.
    - Unit 9 in 2024.
    - Unit 10 in 2026.

- Brown 6 and 7 Long-Term Services Agreement (LTSA) is in place.

- The CT component outages for Cane Run 7 are a Hot Gas Path Inspection (HGPI) Spring 2020, Combustion Inspection March, 2022, and a major in 2024 (HGPI and turbine overhaul).
    - Cane Run 7 CT's are covered under a signed Long Term Program Contract (LTPC).

# Major Assumptions- Coal Combustion Residuals (CCR's)

- v EPA finalized the CCR rule on December 19, 2014 (published in the Federal Register on April 17, 2015).
  - Maintained the non-hazardous designation of CCRs.
  - Does not require the immediate closure of unlined CCR impoundments but instead lists several criteria that must be met to continue operation. Some of those criteria include:
    - Siting requirements (wetlands, karst, water table …)
    - Dam safety factors
    - Groundwater monitoring and statistical evaluation
    - Flood control system
  - Requires development of:
    - Emergency action plans
    - Fugitive dust control plan
    - Inspection programs
    - Public available internet site for placement of operating data
  - Current design of new landfill construction project at Trimble, as well as the landfills constructed at Ghent and E.W. Brown meet the requirements of the rule.
  - Expect CCR impoundments to stop receiving CCR no later than April 2019 due to trigger of groundwater criteria.
  - Congress passed and the President signed the Water Infrastructure Improvements for the Nation Act (WIIN Act) on December 16, 2016. The WIIN Act is the first step to allow for the implementation of the federal CCR Rule through a state or federal based permit program.
  - On November 15, 2017 the EPA issued the CCR Rule "Remand Rule". The Remand Rule establishes a timeframe for the EPA to reconsider various aspects of the CCR Rule that have been brought forth by the utility industry and environmentalist. As of June, the Remand Rule does not appears to affect the direction or timing of the Companies compliance program.
  - All CCR impoundment closures included in approved 2016 ECR filing.

# Major Assumptions – CCR (continued)

- CCR Impoundment Closures under the CCR Rule by year are as follows:
  - 2018: Mill Creek Clearwell and Construction Runoff Ponds; Ghent Reclaim Pond and Gypsum Stack Phase I of II.  Mill Creek Emergency Pond was closed in 2017.
  - 2019: Green River Main Ash Pond, ATB2 and SO2 Pond; Pineville Ash Pond; Tyrone Ash Pond; Mill Creek Dead Storage Pond; Brown Main Ash Pond (landfill Phase II (partial) and entire Phase III).
  - 2020: Ghent Gypsum Stack Phase II of II; and Brown Aux Pond.
  - 2021: Mill Creek Ash Pond.
  - 2023: Ghent ATB#1,  ATB #2, and Secondary Pond; Trimble County BAP and GSP. (2023 is the initial 5-year window, based on current negotiations related to off-site beneficial use, the GH and TC projects could be extended 1-2 years as a result of available CCR to close the facilities.)
  - In the year that each pond is closed, it will also be retired from the property accounting ARO perspective.
  - Monitoring wells and monitoring are added for all CCR impoundments and landfills affected by the CCR Rule.  Well installation and monitoring until closure trigger (anticipated Oct. 2018) are capex against the ECR projects managed by PE.  Monitoring cost post-trigger for 30-year minimum is covered by Generation Services projects.  Monitoring costs for landfill wells are O&M and included in Generation Services budget

Case Nos. 2018-00294 and 2018-00295

LG&E KU PPL companies

# Major Assumptions – CCR (continued)

- Trimble County Landfill and Transport.
  - The contracted in-service month for the treatment system is August, 2018.
  - The contracted in-service month for the transport system is October, 2019.
  - The contracted in-service date for Landfill Phase 1A is Q4, 2019.
    - The KY-DWM landfill permit was issued in February, 2017.
    - The USACE 404 Permit was issued in June, 2017.
    - All permits required to allow landfill construction have been received.
    - While no lawsuits exist as of June 2018, litigation of permit remains possible; however, construction will continue as planned unless court issues a stay of the permit.

- A new Mill Creek landfill was removed from the planning period. The contract for a new gypsum dewatering facility was executed in 2017 with a contract in-service date by December 31, 2018 to support increased off-site beneficial reuse marketing of gypsum.

- All CCR Capital Projects' cost are based on actual awarded contract values or use nominal dollars, thus no longer using an annual escalation rate of 4.0% as in past BPs.

- The CCR impoundment closure projects assume that existing CCR materials from each plant can be beneficially used to construct the designed contour in each pond similar to that done at Cane Run. If that is not allowed by rule, the estimated cost of having to instead procure off-site fill material is an additional $180-200M.

| **Variance** | | 5 | 21 | 23 | 25 | 32 | |

# Plan Risks

- Personnel resources and knowledge transfer due to work force turnover as result of retirements
- Increased cost pressures due to inflation and commodity price increases
- Cane Run 7 operation and maintenance costs – warranty recently expired
- Any subsequent changes to approved or proposed environmental regulations will impact the investment, construction and implementation of new systems and resources needed in this plan
- Generation dispatch for the plan years is based on current view of regulations and assumptions on pricing for gas supply and allowances which is subject to significant changes to unit cost profiles and maintenance schedules if changes occur
- Integration of additional CCR equipment, pond closures and dry landfill conversions will be on an aggressive schedule with potential to impact outage schedules and forecasted operating expenses.

# Operational Performance

## Key Performance Indicators

| KPI | 2017 Actual | 2018 Forecast | 2019 Plan | 2020 Plan | 2021 Plan | 2022 Plan | 2023 Plan |
|---|---|---|---|---|---|---|---|
| Generation (Twh)[1] | 32.4 | 33.8 | 32.5 | 32.1 | 32.2 | 32.2 | 32.5 |
| EAF (Steam) | 84.8% | 82.7% | 79.5% | 85.2% | 85.7% | 85.8% | 87.0% |
| EFOR (Steam) | 3.5% | 5.0% | 5.0% | 5.0% | 5.0% | 5.0% | 5.0% |
| Controllable Cost ($M)[2] | $250.4 | $257.4 | $264.3 | $275.5 | $280.8 | $292.3 | $290.3 |
| Controllable Cost (per Mwh)[2] | $7.74 | $7.62 | $8.12 | $8.58 | $8.73 | $9.07 | $8.94 |
| Cash Cost (per Mwh)[3] | $12.40 | $12.00 | $15.03 | $13.24 | $14.41 | $12.38 | $12.95 |
| Cost Per Mwh [4] | $7.76 | $7.91 | $8.04 | $8.19 | $8.49 | $8.81 | $9.10 |
| Recordable Injuries [5] | 1.23 | 3.14 | 1.80 | 1.73 | 1.66 | 1.55 | 1.47 |
| Days Away/Restricted/Transferred Case Rate (DART) [5] | 0.61 | 0.67 | 0.72 | 0.67 | 0.63 | 0.63 | 0.59 |

[1] Steam Generation includes 75% of Trimble County 1 and 2.

[2] Controllable Costs include Utility O&M and Other Cost of Sales.

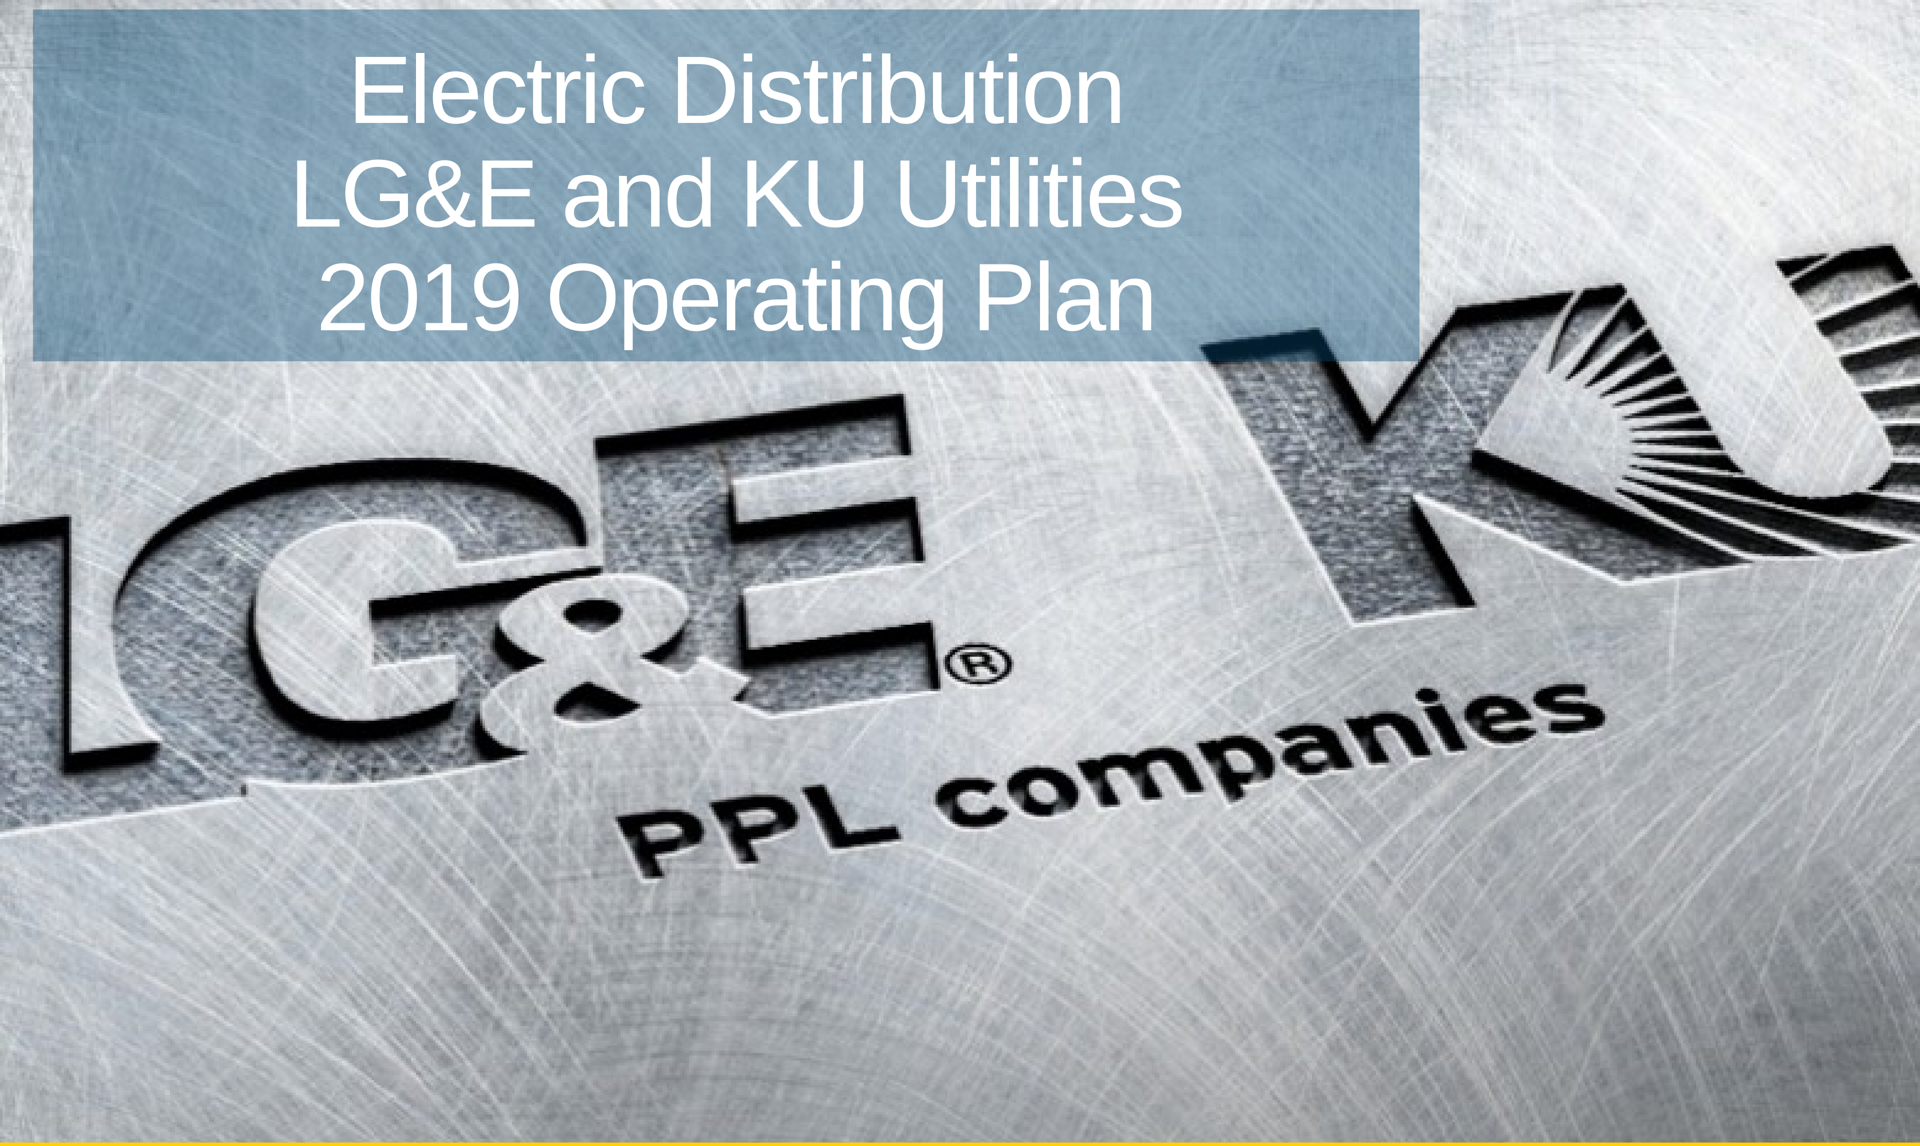
[3] Cash cost includes controllable costs plus capital divided by MWH (75% TC)

[4] Five year average - measure is non fuel O&M used in FERC benchmarking and includes all lines of business divided by MWH (75% TC)

[5] The 2018 number represents the June YTD value; Recordable injury rate without hearing loss is 1.12 YTD June

[*]2018 Forecast is from the 6&6 forecast.

# Electric Distribution
# LG&E and KU Utilities
# 2019 Operating Plan



**September 2018 – Updated to reflect KPSC AMS ruling**

# Table of Contents

# Plan Highlights

Electric Distribution's Business Plan provides for continued emphasis on the Company's core values of safety and customer satisfaction.  Plan funding will continue to provide for safe, reliable, resilient and low cost electric service for customers, with priority given to the following:

- Employee, business partner and public safety
- Transfer of knowledge to new employees as retirements accelerate
- System enhancements to meet existing and future customer loads
- Electric system automation, hardening and protection to improve service reliability and system resiliency
- Technology advancements to enhance business processes, improve operational efficiencies and enhance communications with customers
- Asset replacements to address aging infrastructure
- Construction projects to serve new customers and satisfy customer requested projects
- Maintenance, inspections and operations programs which assure regulatory compliance and operational performance

Attachment to Filing Requirement
807 KAR 5:001 Section 16(7)(c)
I. Page 31 of 235
Bellar/Blake

# Plan Highlights

- Safety and Wellness
  - Continue commitment to employees, business partners and public safety
  - Focus on incident prevention plans and critical danger zones
  - Support transfer of safety knowledge from seasoned to new employees
  - Ensure a comprehensive safety/technical training plan is in place for all employees
  - Benchmark and implement industry best practices
  - Maintain industry leading performance
  - Continue to improve motor vehicle safety
  - Promote wellness initiatives as an aspect of safety

# Plan Highlights

- Customer Experience
  - Respond effectively and efficiently to customer requests for service
  - Invest in system reliability and contingency to meet increasing customer expectations respective to service availability
  - Invest in aging infrastructure to continue long term service reliability
  - Advance grid intelligence to meet evolving customer expectations and align with industry trends
  - Respond to outage events in an efficient and effective manner, and continue to improve on the accuracy, timeliness, and provision of estimated restoration times
  - Build on technology which enhances business processes, reduces cycle times, and expands communications with customers
  - Focus on portraying a professional and positive image to customers
  - Satisfy system capacity needs to meet customer load

# Major Assumptions

- Customer reliance on electricity continues to increase, with advancement of end use technologies and electrification of nearly everything. Accordingly, customer expectations respective to electric service safety, reliability, and quality continue to evolve.
- Expectations for system resiliency and outage responsiveness will continue to grow in the face of increased grid vulnerabilities linked to severe and extreme weather, threats of cyber and physical attacks, and interference from wildlife and vegetation.
- Cost pressures will continue to increase with decreasing load projections, and with continued investments needed for grid reliability and resiliency improvements, aging infrastructure replacement, and system enhancements to meet new load or load shifts associated with population movement from rural to urban service areas.
- Regulations governing the operation, maintenance, inspection, and construction of the electric distribution system will remain relatively steady.

# Major Assumptions

- Across the industry, customers, regulators, and community leaders will continue to push for modernization of the electric grid, effective interconnection of distributed energy resources, increased operational flexibility, and enhanced customer communications.
- Customer interconnection of distributed generation and electric vehicles will increase slightly through the business plan period, as related costs continue to decline and efficiencies improve.
- Increased retirements and advancing technology will necessitate creative and timely solutions for converging legacy and future skillset needs, and transferring critical technical knowledge.
- New business growth will continue to increase moderately in urban service areas, and remain flat or decrease in most rural areas of the distribution system.

# Major Assumptions

- New business funding levels will be based on known projects, customer growth forecasts and historical work activity.
  - Funding for known major customer investment projects will be budgeted separately.
  - LG&E and KU capital blankets will be escalated at 5% and 3% through the planning period.
- Reliability funding levels will continue to target regulatory compliance and step improvements in performance.
  - Allocated vegetation management expenses will continue to assure maintenance of a required 5-year trim cycle, and support hazard tree removal and emerald ash borer mitigation.
  - Phase I investments in distribution automation deployment will continue through 2021, and target 50% of customers and 20% of distribution circuits. Phase II of distribution automation is planned in 2022 and 2023, and will target an additional 20% of customers and 20% of distribution circuits.
  - Investments for targeted circuit hardening and reliability improvement projects will continue to be allocated based on circuit reliability performance and specific customer interruption frequencies.
  - Substation investments will provide for enhanced wildlife protection and expansion of Supervisory Control and Data Acquisition (SCADA).

# Major Assumptions

- Distribution equipment replacement and repair investment and expense blankets will be budgeted based on historical trends.
- Infrastructure investments throughout the plan period will support continued improvements in system resiliency:
  - Distribution Substation Transformer Contingency Program
  - Pole Inspection, Treatment, and Replacement Program
- Aging infrastructure investments will place emphasis on:
  - Replacement of legacy substation equipment such as oil breakers, electro-mechanical relays, and underground exit cables.
  - Replacement of Paper Insulated Lead Covered (PILC) cable in the Downtown Louisville Distribution Network
  - Structural repair of vaults and manholes in the Downtown Louisville Distribution Network
- Weather related system repairs and service restoration budgets are based on historical trends (three year average).

# Plan Risks

- Abnormal or unexpected grid exposure to severe weather, periods of temperature extremes, natural disasters, or physical and cyber attacks, resulting in increased distribution grid trouble or damages
- Continued / increased mutual assistance efforts impacting availability of supplemental and off-system contractor resources
- Accelerated reliability impacts associated with emerald ash borer and hazard trees, or other grid vulnerabilities
- Substantial deviations from economic forecasts or system load plans.
- Unpredicted increases in material, contractor labor, or equipment costs
- Unforeseen market penetrations of distributed energy resources, including distributed generation and electric vehicles
- Accelerated retirements/loss of key technical skillsets and increased competition for qualified resources in the industry
- Unforeseen regulatory rulings which require substantial changes to legacy system operations, maintenance, or construction practices

# Operational Performance

| Cash Cost Per MWH Sold - 5 Yr. Avg. Calculation | 7.43 | 8.29 | 9.19 | 10.02 | 10.69 | 11.14 | 11.21 |

**1)** 2018 Forecast numbers are YTD May 2018 actuals and not forecasted.
**2)** Measures the time between the approved inspection and the connection to the customer.
**3)** Measures the duration from once the call is received to when we are onsite to assess / repair.
**4)** Measures the time frame between the first call and arrival time for emergency calls on Blue Sky Days only.
**5)** Measures the percentage that service is restored on or before the ERT.

# Gas Distribution
# LG&E and KU Utilities
# 2019 Operating Plan

**September 2018 – Updated to reflect KPSC AMS ruling**

# Table of Contents

# Plan Highlights

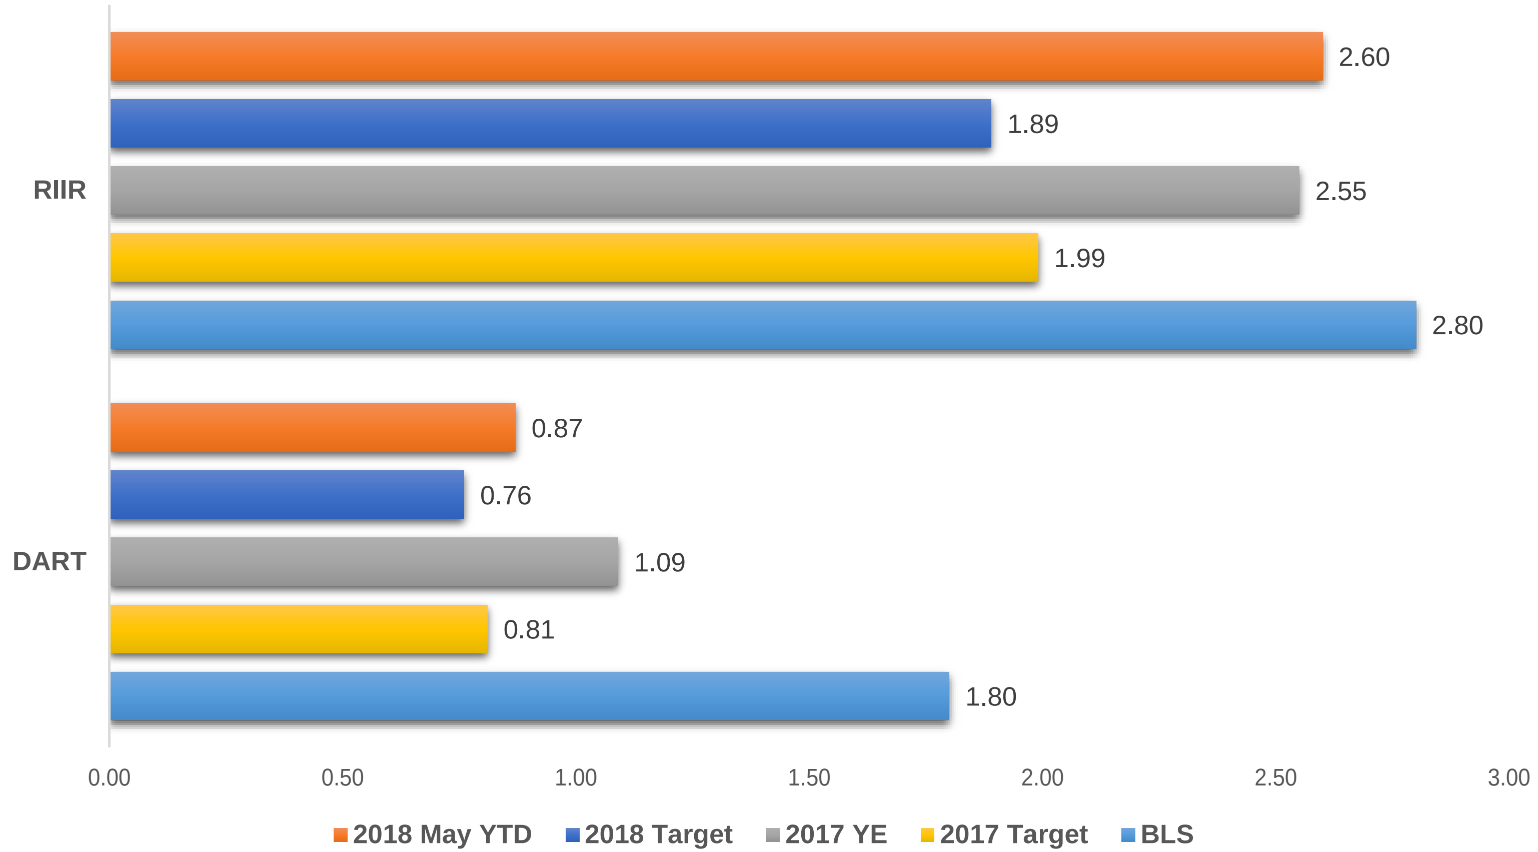
Safety and customer satisfaction are core values at LG&E and KU. Gas Distribution Operations mission is to provide safe, reliable, and low cost service that enhances our customer's quality of life.

Funding levels within the proposed plan were established with the following priorities in mind:

- Employee, contractor and public safety
- Regulatory compliance
- Supporting customer service
- Gas system reliability
- Asset replacement to ensure reliable and safe service
- System enhancements to meet customer needs
- Technology to increase efficiencies and enhance customer experience
- Capital investments for transmission modernization, customer service line replacement and service line ownership

# Plan Highlights

## Safety Performance - Gas



2016 BLS - most recent data

# Plan Highlights

- Safety and Wellness
  - Continuously strive to improve employee safety performance
  - Improve gas system safety thru effective Distribution Integrity, Transmission Integrity, Public Awareness, Damage Prevention, Storage Integrity and Gas Control Room Management programs
  - Maintain strong safety partnerships with business partners
  - Enhanced public safety through customer communications and asset replacement
  - Continuation of motor vehicle safety initiatives
  - Identify, share, and capitalize on industry best practices
  - Mock drills, leak detection training, and emergency response improvements
  - Effective liaison with emergency response agencies
  - Promote wellness initiatives as an aspect of safety

# Plan Highlights

- Customer Experience
  - Meet customer expectations for new service requests
  - Promptly address customer service issues
  - Identify customer service improvement opportunities
  - Invest in aging infrastructure to ensure reliable and safe service
  - Promote professional and positive corporate image to customers
  - Restore customer service outages quickly and efficiently
  - Meet customer capacity needs
  - Implement technology to support customer service
  - Proactively communicate with customers

# Plan Highlights

- Reliability, Infrastructure and Regulatory Compliance
  - Investments in infrastructure to meet customer needs
  - Investment in aging infrastructure to improve safety, reliability and performance
  - Effectively manage gas distribution integrity, transmission integrity, storage integrity and control room management regulatory programs
  - Provide reliable gas supplies through investments in:
    - Gas regulation/measurement facilities
    - Gas transmission system
    - Gas compressor stations
    - Gas storage fields
    - Distribution infrastructure upgrades

# Plan Highlights

- Workforce Development
  - Headcount plan that addresses high number of expected retirements
  - Identification of pre-hires for critical job positions
  - Knowledge transfer to new employees
  - Support of employee continuing education initiatives
  - Support onboarding and enhanced training/operator qualification to promote consistent work practices across operational groups
  - Internal and external training opportunities
  - Mobile computing technologies supporting training
  - Skilled craft-worker intern program in participation with local technical colleges

# Major Assumptions

- Customer expectations regarding levels of service and information availability will continue to increase.
- Incremental headcount is needed to meet increased regulatory, work scope and compliance demands, and transfer critical knowledge in preparation for retirements.
- New Business assumes low to moderate customer growth and inflationary increases through the planning period with new commercial and industrial loads requiring gas main extensions and system reinforcements.
- Continuation of the Gas Line Tracker (GLT) mechanism through the planning period.
- Gas Supply Clause remains fundamentally unchanged.
- Incremental resources for the Gas Trouble department to improve Emergency Response Time remain through the planning period.
- Available technology and operating conditions will support successful enhanced in-line inspections.

# Major Assumptions

- Continued focus on reliability initiatives and system reinforcement.
- New gas safety regulatory requirements will:
  - Require operators to validate MAOPs of gas transmission pipelines.
  - Expand pipeline integrity requirements beyond high consequence areas.
  - Expand operator qualification requirements to construction activities.
  - Require continuous improvement for distribution system integrity.
  - Require continued implementation of storage integrity compliance program.
- Based upon the 2019 BP:
  - Forecasted Design Day for 2018 is expected to increase to 682,000 Mcf/day from 680,000 Mcf/day estimated in the prior BP. During the current 5-year planning period, the forecasted Design Day is expected to gradually decrease to 670,000 Mcf/day.
  - The Transmission Modernization and Steel Customer Service line programs will continue infrastructure upgrades supporting compliance and reliability.
  - Replacement of amine gas processing systems with H2S scavenging systems will increase storage reliability, reduce environmental risks and reduce headcount to operate compressor stations.

# Plan Risks

- Finalization of new transmission pipeline regulations
- Regulatory changes impacting capital and O&M costs
- Mitigation costs associated with gas transmission pipeline inspections
- Mitigation costs associated with new storage integrity compliance requirements
- Economic development-pace
- Impact of workforce turnover from retirements
- Overtime needs exceeding overtime assumed in the plan
- Material, equipment, and resource cost escalation and availability
- Permitting and Right of Way acquisition for Pipeline projects

# Plan Risks

- Findings from failure analysis on longitudinal defect on Ballardsville gas transmission pipeline could drive capital or O&M incremental to the plan.
- Aggressive KPSC enforcement of gas safety regulations and KY "Before you Dig" laws
  - Increased citations/fines
  - Increased underground locating costs
- Telecommunications fiber projects and other general construction increases driving increase in line locating costs

# Operational Performance

## Key Performance Indicators

| KPI | 2017 Year End | 2018 Forecast | 2019 Plan | 2020 Plan | 2021 Plan | 2022 Plan | 2023 Plan |
|---|---|---|---|---|---|---|---|
| Safety - Employee Incident Rate [1] | 2.55 | 2.60 | 1.80 | 1.73 | 1.66 | 1.55 | 1.47 |
| Safety - Contractors Incident Rate [1] | 1.58 | 0.00 | 1.80 | 1.73 | 1.66 | 1.55 | 1.47 |

| Gas Response Priority 1 Calls (minutes) | 37.1 | 35.6 | 35.0 | 34.5 | 34.0 | 33.5 | 33.0 |
| New Business Cycle Time (Calendar Days) [2] | 6.00 | 9.00 | 9.00 | 9.00 | 9.00 | 9.00 | 9.00 |

1) 2018 Forecast numbers are YTD May 2018 actuals and not forecasted.
2) Measures from the time a service request is approved by a locator from the Design department to the time the service is installed.

# Transmission
# LG&E and KU Utilities
# 2019 Operating Plan

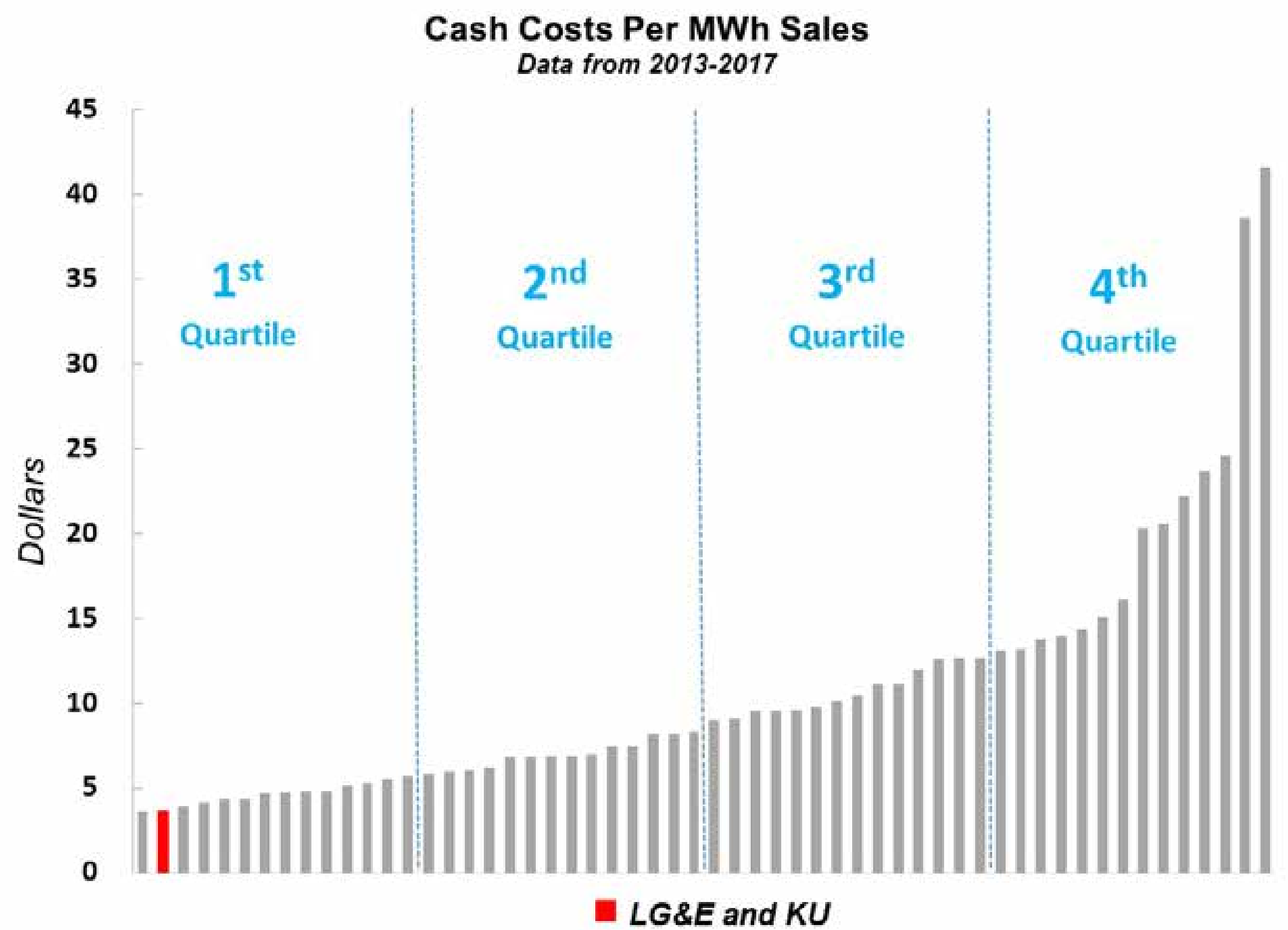
**August 2018**

# Table of Contents

# Plan Highlights

1. The overall objective of the 2019-2023 Transmission Business Plan is to invest in the system to accommodate network load flows with a focus on improving system reliability and resiliency at a fair and reasonable cost. The work will be completed while maintaining a strong culture of safety, customer experience, performance, and regulatory compliance.
2. Data analytics will continue to be utilized to improve performance by identifying projects that will reduce outage frequency and duration. Programs in the plan are primarily a continuation of those initiated in 2017 as part of the Transmission System Improvement Plan.
3. Transmission line and substation projects approved by the Independent Transmission Organization (ITO) driven by NERC planning standards and LG&E and KU system planning guidelines to ensure electric grid adequacy to reliably serve forecasted network flow in light and heavy load periods.
4. Targeted replacement of small copper and single layer aluminum conductor steel-reinforced (ACSR) conductor.
5. Reduction of the transmission wood pole back log from a multi-year back log to a targeted single-year backlog by the end of the plan period.
6. Transmission line extensions to serve new distribution substations for retail customers.
7. Security initiatives including the protection of critical facilities from physical attacks and vandalism.
8. Resiliency initiatives to both harden the system to withstand catastrophic events as well as improve our ability to recover should we have an event.
9. Will have replaced all underground transmission cable that has experienced diminishing performance with observed failures.

# Plan Highlights
# FERC Benchmarking Data



Cash cost benchmarking analysis includes Transmission O&M and capital costs per MWh company sales compared to other utilities.

# Major Assumptions

Reliability, Operations and Asset Management:

1. Reliability improvement – Data Analytics will be utilized to prioritize line segments based on past performance and overall risk. Programs include:
   i. Line Sectionalizing - Segmenting circuits with equipment to reduce customer exposure from sustained outages and improve restoration time.
   ii. Enhanced vegetation clearing will reduce sustained and momentary outages:
      - Line vegetation clearing began transitioning from an inspection based program to a 5 year maintenance cycle in 2017 for all lines 69kV and higher. The first cycle will continue through 2022.
      - A hazard tree identification and removal program continues to reduce the probability of dead, dying, and diseased trees from falling on transmission lines.
2. System Integrity - Enhanced transmission asset management will effectively improve the performance and reliability of the assets over time:
   i. Structure, cross arm and insulator replacements based on condition determined by detailed inspections. Pole backlog will be reduced from approximately 2,900 in 2018 to a targeted single-year backlog (~ 250) by the end of the plan period.
   ii. Overhead line conductor and static wire replacements are based on age, type (e.g. copper and single layer ACSR) and condition of conductor.
   iii. Control house and related protection and control replacements based on risk, age, condition and performance.
   iv. Circuit breaker replacements based on risk, age, condition and maintainability.
   v. Extend life of tower and substation structural steel through condition assessment and enhanced maintenance including corrosion prevention and control.
   vi. Optimize asset lifecycle of substation equipment including circuit breakers and transformers through diagnostics.
3. Storm damage and emergency replacement costs are based on past trends.

# Major Assumptions

Transmission Expansion Plan (TEP) and Native Load:

1. Projects are based on the 2018 TEP, which has been submitted to the ITO for approval, and initial analysis for the 2019 TEP, which includes transmission customer demand forecasts submitted in the fall of 2017. It is assumed those customer forecasts are reasonable and that the Independent Transmission Organization (ITO) will approve the 2018 & 2019 TEPs without significant revisions.

2. The TEP includes funding for rating increases to certain transmission lines based on estimates. Detailed costs will be developed after surveying and subsequent analyses are completed.

3. No funding needed to accommodate new long term, firm transmission service requests that have not already been requested or studied.

4. Connection costs for native load are coordinated with the Electric Distribution planning requirements.

Regulatory and Compliance:

1. Assessments of the system for impact from a Geomagnetic Disturbance (GMD) will not result in risks requiring material expenditures to mitigate.

2. Expenditures related to mitigating Electromagnetic Pulse (EMP) events are not anticipated during the plan period.

3. Additional revisions to NERC Reliability standards will not require material incremental expenditures beyond what is funded in this plan.

4. Regional and interregional planning processes as required by FERC Order 1000 will not result in material capital or O&M expenditures.

# Major Assumptions

**CONFIDENTIAL INFORMATION REDACTED**

Open Access Transmission Tariff (OATT) Revenue are based on the following:

1. Customer provided load forecasts have been evaluated and adjusted, based on historical performance, to reflect their expected coincident peak billing amount.
2. OATT rate forecast is based on 2017 FERC Form 1 data, the FERC approved rate formula and ROE, and 2019 Business Plan projections, including O&M and capital.
3. [redacted] will not renew its existing point to point (PTP) reservations at the end of their respective terms (2019, 2020, and 2022). This assumption is based on the announcement that [redacted] to retire [redacted] over the plan period.
4. Assumed short term and non-firm revenue of $650K, based on the 2015-2017 annual average.
5. Joint Party Settlement revenue of $1.2m annually is assumed to continue through the duration of the business plan.

**Case Nos. 2018-00294 and 2018-00295**
**Attachment to Filing Requirement**
**807 KAR 5:001 Section 16(7)(c)**
**I. Page 82 of 235**
**Bellar/Blake**

# Major Assumptions

**CONFIDENTIAL INFORMATION REDACTED**

Cost of Sales assume the following:

1. MISO transmission rates used to calculate merger mitigation depancaking (MMD) expenses per Rate Schedule 402:
   - For Scheduled 26A, the posted MISO rate is used and multiplied by the volume which is determined by a load factor of 55%.
   - Schedules 7 & 8 are adjusted at an annual increase of 5% starting with the April 2018 rate. The 5% annual increase reflects the 10 year historical rate of change prior to the recent federal tax decrease. The April 2018 rate is the starting point and includes impacts of the federal tax law decrease.
   - MISO resources for Kentucky Municipal Electric Agency (KYMEA), those assumed to be eligible for depancaking, are based on existing MISO resources – 20 MWs through April 2019, 200 MWs starting in May 2019 – December 2022. 100 MWs of a non-MISO resource, not eligible for de-pancaked rates, expires on 4/30/22 and this is assumed to be replaced from a non-MISO source.
2. MMD expense includes MISO PTP service purchased by [redacted] for 115 MWs with a term of February 2018 – January.
3. TranServ will continue as the ITO service provider at costs based on the existing agreement.
4. TVA will remain as the Reliability Coordinator (RC) at costs based on the existing agreement.

| **Change from Prior Plan** | 30 | 18 | 18 | 34 | 34 | |

# Plan Risks

**CONFIDENTIAL INFORMATION REDACTED**

1. Revised regulations may materially increase investments and expenses.
2. Regional changes to the transmission grid topology, location and mix of generation resources, and other factors may result in power flows that drive the need for significant additional infrastructure investments.
3. System conditions (weather, external grid configuration and loop flows, generation status, etc.) may delay or alter outages required to complete construction.
4. Replacement power for [redacted] related to the announced retirements of the [redacted] may require additional projects and be eligible for incremental depancaking expense reimbursement
5. KYMEA sourcing of future transmission reservations may require additional projects and be eligible for incremental depancaking expense reimbursement.
6. Inflation may have a greater impact on vegetation management costs and overhead line construction than what has been assumed in the plan.

# Operational Performance

## Key Performance Indicators

| KPI | 2017 Year End | 2018 Forecast | 2019 Plan | 2020 Plan | 2021 Plan | 2022 Plan | 2023 Plan |
|---|---|---|---|---|---|---|---|
| Recordable Injury Incident Rate - Employees | 0.67 | 0.00 | 0.69 | 0.69 | 0.69 | 0.69 | 0.69 |
| Recordable Injury Incident Rate - Contractors | 1.68 | 0.39 | 1.80 | 1.73 | 1.66 | 1.55 | 1.55 |
| Days Away from work, Restriction, or Transfer - Employees | 0.00 | 0.00 | 0.69 | 0.69 | 0.69 | 0.69 | 0.69 |
| Annual SAIDI (minutes) | 6.0 | 6.9 | 10.1 | 9.7 | 9.0 | 8.7 | 8.3 |
| Cash Cost / MWh | $3.59 | $4.32 | $4.99 | $5.80 | $6.44 | $7.29 | $7.28 |
| Cash Cost / Mile | $25,669 | $30,728 | $34,736 | $39,823 | $43,871 | $49,216 | $48,646 |

The 2018 Forecast for RIIR for both employees and contractors, DART for employees is the actual through June. SAIDI and Cash Cost / mile are based on the year-to-date actual through June 30, 2018 and forecast for July through December 2018.
The cash cost / MWh and the cash cost / mile are both the average of the five year period ending in that year.

# Energy Supply and Analysis
# LG&E and KU Utilities
# 2019 Operating Plan

**August 2018**

# Table of Contents

# Plan Highlights

- Optimize the utilization of existing assets to provide reliable, low cost energy.
- Procure coal and gas necessary to cost-effectively operate generating plants.
- Maximize beneficial use of by-products to minimize pond closure and landfill development costs.
- Provide high quality analysis to enhance decision-making and ES&A risk management activities.
- Implement processes required to meet reliability standards.
- Improve analysis capability and knowledge about customer energy usage, DER, EVs, and storage to support DSM, ratemaking, legislative, customer service, and resource planning efforts.
- Target R&D activities to support major issues associated across the business.

# Major Assumptions

- Analysis needed to support major company initiatives (KPSC filings) and strategic planning can be met by existing staff levels while absorbing headcount reductions due to retirements.
- Retirement risk is growing over the planning period but adequate time for training and development is forecasted to occur.
- Training for new employees will not require expenditures beyond recent historical experience for existing employees.
- No material change from historical non-labor expenses.

Note 1: 2017 Actual has been restated to include R&D.

Note 2: Includes Interns.

# Plan Risks

- OSS margin risk is minimal due lower electricity prices and KY sharing mechanism.
- Workforce transition due to retirements.
- Unanticipated major project that would require material outside services (low risk).

# Corporate Cost Center
# LG&E and KU Utilities
# 2019 Operating Plan

**August 2018**

# Table of Contents

# Major Assumptions

- Benefits for 2019 based on 3,672 full-time, 111 co-ops/interns, and 21 part-time regular employees (as of 12/31/19)
  - Full-time actual headcount at June 30, 2018 is 3,439.
- The projection for medical was based upon the calculation provided by Mercer and adjusted for incremental headcount, and adjusted 4% each year thereafter.
- Amortization of regulatory assets will continue through plan periods based on KPSC orders.
- Incentive expenses based on:
  - Safety, customer service, cost control, reliability goals
  - Individual effectiveness and team goals
- IMEA/IMPA portion included in Corporate is the credit that covers the same burden types that hit Corporate. The balance of IMEA/IMPA reimbursements are included within Power Production.

# Major Assumptions

- Pension Costs
  - The mortality assumption reflects the RP-2014 gender specific healthy employee and healthy annuitant mortality tables with collar and factor adjustments and applying MP-2017 mortality improvements from 2006 on a generational basis.
  - 15 year amortization period used for KPSC-jurisdictional accounting/ratemaking. Double corridor used for Virginia, FERC and LKS charges to LKC.
  - Discount rate is assumed to be 4.2% for the non-union plan and 4.15% for the union plan. These are 50bps higher than discount rates at 12/31/17 based on changes in corporate bond rates through April 2018.
  - EROA is assumed to be 7%
  - Lump sum take rate is assumed to be 50%
  - Service cost is assumed to decrease 4.00% annually for the Non-Union plan and decrease 10.00% annually for the Union plan, except that the Union service cost includes an assumed offsetting increase of 7.5% every three years (i.e., the increases for 2021-2023 are assumed to be reflected at January 1, 2021) consistent with the impact of the plan changes resulting from the union negotiations in 2017.

| Current Plan - GAAP View | $88,531 | $88,973 | $87,571 | $85,221 | $87,121 |

# Plan Risks

- The largest plan risk is pension expense. Discount rates assumed are 50bps higher than discount rates at 12/31/17 based on changes in corporate bond rates through April 2018. These rates have changed since then and will fluctuate over time.
- The second largest risk is medical expense, but it is partially mitigated by the 4/4/50 sharing relationship.

# Table of Contents

- Plan Highlights
- Major Assumptions
- Financial Performance
  - o 2017-2023 Annual O&M Expenses
  - o 2017-2023 Capital Expenditures
  - o Labor Expense
  - o Headcount
  - o Supplemental Contractors
- Plan Risks

# Plan Highlights

- CFO group is designed to meet the overall objectives of the Company in the most cost effective manner possible.
  - Functions include accounting, financial reporting, regulatory reporting, tax, payroll, financing, cash management, investor relations, forecasting & budgeting, financial planning & analysis, insurance, pensions, rates, state regulatory affairs, audit services, SOX compliance and supply chain.
- Headcount, excluding interns, will remain flat compared to the 2018BP throughout the plan.
  - Labor represents 46% of the CFO 2019BP O&M expenses.
- Insurance represents 39% of the CFO 2019BP O&M expenses.
- Bank Fees and Audit Fees each represent an additional 4% of O&M.

# Major Assumptions

- Projected insurance premiums are based on feedback from brokers and increase for amount of property placed in service.
  - A larger property increase in 2020 is assumed once the three year rate freeze expires.
  - The membership credits offered by FM Global and AEGIS are not assumed to continue beyond 2018 renewal.
- Several new bonds related to pond and landfill closure will be required (included in insurance budget).
- Bank Fees, excluding rating agency fees, are projected to increase at approximately 1.4% annually based on recent experience.

# Major Assumptions

- Audit Fees
  - Audit fees through 2018 are based on negotiated fees with firms and prior costs of predecessor consents. Audit fees for financial statements beyond 2018 are based on estimates provided by the external auditors.
  - Benefit plan audits will be re-bid in 2018 and are expected to increase at rates consistent with prior years.
  - Expected incremental work for auditor consent letters for financings will be amortized over the life of the financing.
  - No other incremental work (e.g., system post-implementation audits) is assumed.

# Major Assumptions

- State Regulation & Rates
  - Filing of base rate cases for LG&E and KU in Kentucky.
  - Filing of base rate cases for KU in Virginia.
  - Annual revision of the formula rates for FERC wholesale municipal and OATT customers.
  - Filing of Integrated Resource Plan.
    - KY – 2018 & 2021
    - VA – Annual
  - Filing of new ECR Plan to address ELG Regulations – late 2019.

LG&E KU
PPL companies

# Plan Risks

- The continued movement of software to hosted environments creates increases in O&M costs and increases the risk of functionality gaps.
- An increased focus on IT security and verification of vendor compliance with Company security requirements may require incremental resources.
- Technical support for in-house software, such as Oracle, is not meeting business expectations.
- Integration of primary system changes within planning window and their impact on existing processes (PowerPlan, Volts replacement, Oracle, etc.).

# Plan Risks

- Maintaining flat staffing levels, along with less experienced resources, will
  - Impact the ability to resource special projects and major system upgrades and may prompt the need for additional external resources.
  - Impact the ability to develop and take advantage of new technologies, such as RPA.
- Higher level of employee retirements during plan period place greater emphasis on knowledge transfer and effective timing of staffing changes.
- The level of rate increases for insurance premiums are at historically low levels and creates a level of risk regarding future premiums.

# Information Technologies
# LG&E and KU Utilities
# 2019 Operating Plan

**September 2018 – Updated to reflect KPSC AMS ruling**

# Table of Contents

# Plan Highlights

- The 2019 Information Technology O&M Budget submitted for the 2019 Business Plan is $64.95 million
- Hardware/software maintenance under contract or additions included in the 2019 BP account for 36% to 38% of the Information Technology budget over the 5 year plan period.
- Roughly 52% of the 5 year capital plan (approximately $120M) represents 19 major projects (including $40M for Enterprise GIS, $14M for Financial & Supply Chain systems, $15M for Tech Refresh, and $11M for Infrastructure Telecommunications Network).
- The 2019 Information Technology Capital budget submitted for the 2019 Business Plan is $43 million and is $600k higher than the 2018 Business Plan.

# Major Assumptions

- Safety & Regulatory
  - *Increased regulatory scrutiny at FERC, NERC and SERC as it relates to Critical Infrastructure Protection (CIP) and cybersecurity will drive the need for increased spending for both labor and information technology solutions to meet compliance and information protection requirements.*
  - *Increased emphasis on SOX regulations has caused incremental work.*

# Major Assumptions

- Business Reliance on Technology
  - *Business reliance on information technology services to conduct day to day operations continues to expand.   More business processes are moving towards automation.*
  - *To address the need for skill set flexibility and scalability in the IT Application Development and Support area a co-source partner is being identified with the expectation that a contract will be in place in 4th quarter 2018.*
  - *This trend means the reliability and availability of information technology services is critically important to the business.  There is little tolerance for almost any kind of system outage. This leads to an increased focus on planned and automated testing activities for all major system changes.*
  - *Increased reliance on technology is leading to increased storage, maintenance and support costs which are reflected in the plan. We continue to look for ways to mitigate these increases through adoption of new infrastructure technologies that offer lower support costs.*

# Major Assumptions

- Cybersecurity Threats
  - *Cybersecurity threats and data protection issues continue to increase. These threats are becoming even more sophisticated and difficult to overcome. Third party security assessments and recommendations for new protection measures will likely initiate changes to the plan.*
- Customer Experience
  - *Implementation of the Advanced Metering Systems will occur during this business plan period.*
  - *As our primary interface with our customers, maintaining the CCS system is critical to meet customer and business expectations.*
  - *Expansion of green energy technologies will require enhancements to the CCS system.*

# Major Assumptions

- Advances in New Technologies
  - *Continuing to leverage mobile technologies will be a major differentiator for productivity and customer satisfaction.*
  - *Robotic Process Automation has potential to provide business benefit. Proofs of concepts and identification of use-cases will determine priority for implementation.*
  - *Plans include working closely with the business to determine which of these technologies can deliver the greatest benefit.*
  - *The use of advanced data analytics has the potential to optimize operations; funding has been included in the current business plan. The need for data analysis positions in IT and the business areas is recognized and has been included in the plan.*

# Plan Risks

- Approximately 67 employees are at risk to capital labor for the 2019BP, approximately $11.4m. Any reductions to the capital plan will adversely impact staffing levels.
- Resources are tied to the AMS schedule in order achieve benefits consistent with business case.
- Acquiring skilled IT resources will continue to be a challenge for us and the rest of the industry. IT unemployment levels constrain the available population of employees and contractor resources for hire.
- There will be a skill-set shift due to the increased level of employee retirements.

# Plan Risks

- Changes in vendor pricing models from on-premise technology to subscriptions could lead to increased O&M.
- Planned levels of spend do not include unplanned business initiatives that may have an IT staffing and O&M impact.
- Vendors are driving more frequent upgrades as they invest their development budgets towards the cloud.
- While we have planned measures to protect the company from Cybersecurity threats, the nature and volume could increase the impact to the company.

# Customer Services
# LG&E and KU Utilities
# 2019 Operating Plan

**September 2018 – Updated to reflect KPSC AMS ruling**

PPL companies

# Table of Contents

# Plan Highlights

Customer focus is a core value at LG&E and KU.  Customer Services strives to provide safe, reliable, and reasonable cost of service to our customers, improving the quality of life in the areas we serve.  Additionally, we are committed to enhancing our relationship with our customers by delivering positive experiences that create value and build trust.

Funding levels within the proposed plan are established with the following priorities in mind:

Employee and public safety including compliance with industry regulatory requirements
Focus on economic development and emerging technologies
Continuing some Energy Efficiency programs and services for our customers
Investing in technology to enhance customer experience
Facility construction and renovation to address operational needs
Maintaining operational performance levels
Managing “best in class” bad debt expense

# Plan Highlights

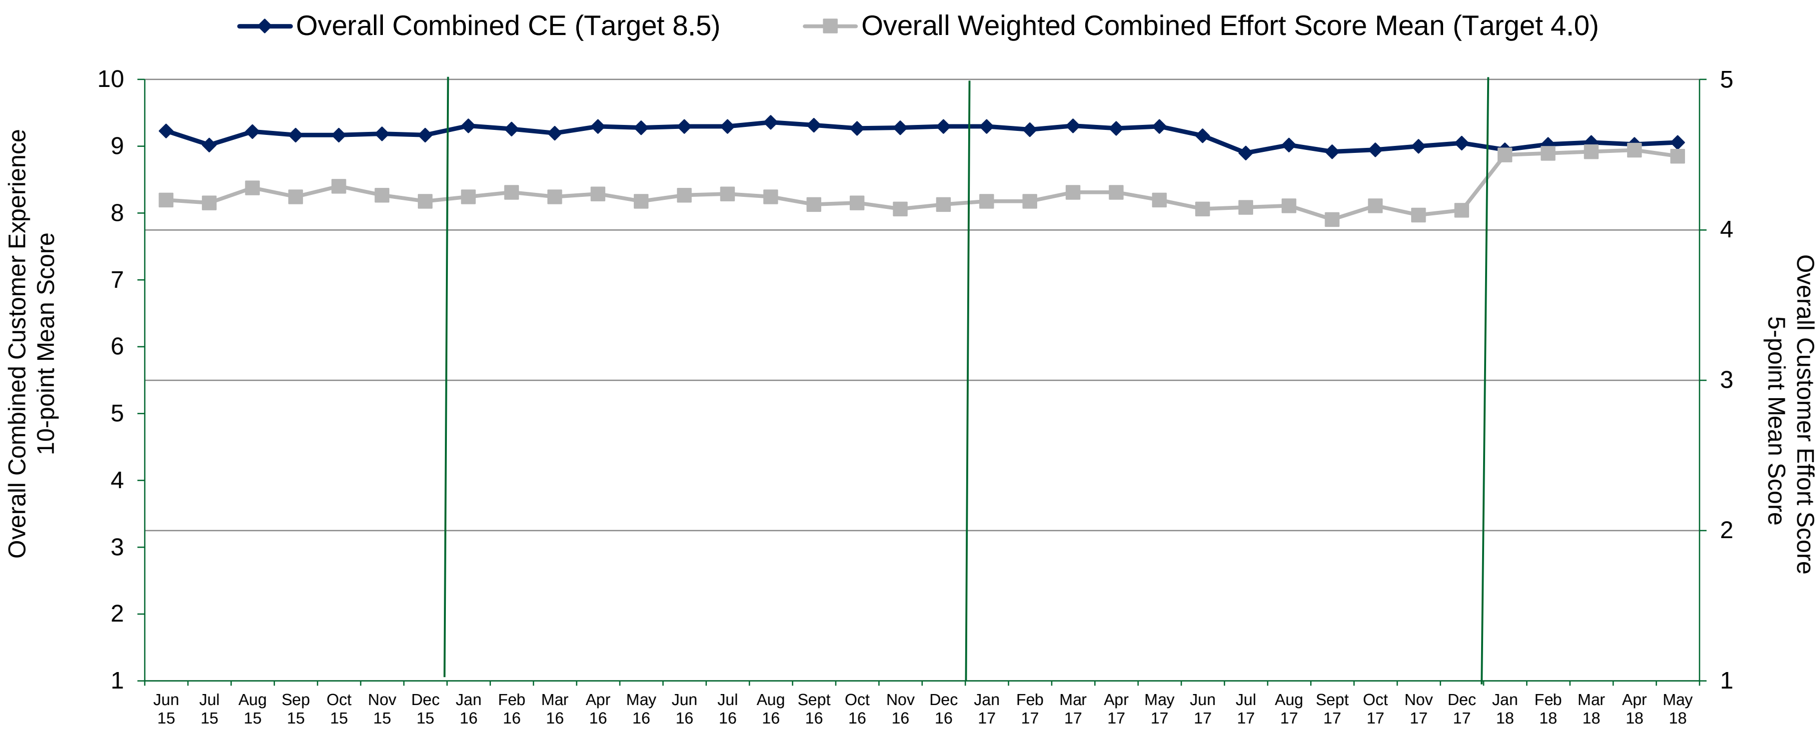
## All Customer Contact Channels

Combined “Customer Experience” vs “Combined Effort” Score



Combined scores = Residential and Business agent and self serve contact channels, weighted by channel volumes.
Note: In January 2018, the wording of the question for measuring the Effort Score was simplified due to respondent confusion around the previous wording. Effort perceptions are now being asked as “Ease of Completing”.
Note: Residential and Business IVR transaction surveys were discontinued in 2016.

# Plan Highlights

- Safety and Wellness
  - Maintain industry leading performance
  - Implement formalized safety structure within Customer Services to focus on both field and office hazards, understanding of safety processes and timely delivery of consistent messaging
  - Enhance operational effectiveness within the COO organization
  - Support the transfer of safety knowledge from seasoned to new employees
  - Ensure a comprehensive safety/technical training plan is in place for all employees
  - Continue to improve workforce, business partners and public safety
  - Continue to improve motor vehicle safety
  - Identify, share and capitalize on industry best practices
  - Promote wellness initiatives as an aspect of safety

# Plan Highlights

- Customer Experience
  - — Advance corporate-wide "Customer Experience" strategy/initiative
  - — Continue investments in technology to enhance digital customer experience
    - Offer limited "Chat" assistance to Corporate Website visitors in 2018, expand offerings in 2019-2023
    - Expand and improve "My Account" offerings annually and upgrade Outage Map
    - Advance "My Notifications" in response to customer requests for reminders and information
    - Pilot At-Home Agents to improve response time to customer inquiries and employee satisfaction
  - — Enhance our "Customer Advocacy" role through partnerships with customer focus groups
  - — Continue commitment to corporate citizenship and community involvement

# Plan Highlights

- Customer Experience
  - — Continue to assist low-income customers through energy efficiency programs and partnerships with advocacy groups
    - By year-end 2018, improve low-income website to include both pledge and payment of assistance funds
  - — Advance our understanding of customer behavior while gaining insight into customer needs
  - — Pursue tariff changes to drive positive impact on customer experience such as Green tariff, EDR enhancements and one-time LPC waiver
  - — Continue to educate customers on renewable offerings and encourage participation by implementing program enhancements

# Major Assumptions

- The “Customer Experience” will continue to be a significant focus across the Company.
- Customer expectations regarding levels of service, digital experience and availability of information will continue to increase.
- The Company will increase focus on emerging businesses that provide customer solutions and drive economic development.
- Bad debt expense is based on .182% of projected revenues for LG&E and .316% of projected revenues for KU through the planning period.
- Contact center pay rate increases are based off market survey data and support maintaining a competitive position within the local market.
- New contracts for Meter Reading and Field Services will require increased funding in light of the strong economy.

# Major Assumptions

- DSM cost of sales reflected in the Plan assume a level of cost effective programming beginning 1/1/2019. The DSM case creates unknowns around labor and outside services within the BP timeframe.
- The Solar Share Facility project for the first array will begin in 2018, with one additional 500kW facility built each year of the plan.

# Plan Risks

- Increased capital and O&M costs due to industry regulatory actions
- Customer hardship and uncollectible accounts
- Customer satisfaction impacts due to ongoing rate case filings
- IT and business resource and financial constraints on ability to implement technology to meet customer expectations in enhancing the customer experience
- Customer satisfaction, regulatory issues and DSM headcount, depending upon the level of post-2018 DSM program offerings
- The timing of each solar facility is subject to customer education and resulting participation levels.

# Operational Performance

## Key Performance Indicators

| KPI | 2017 Year End | 2018 Forecast | 2019 Plan | 2020 Plan | 2021 Plan | 2022 Plan | 2023 Plan |

LG&E KU PPL companies

# Table of Contents

# Plan Highlights

- The five-year plan for Communications and Corporate Responsibility is designed to sufficiently educate customers on energy choices and ways to save energy and money through tips, tools and initiatives.

# Major Assumptions

- Corporate Communications
  - — Educating customers on their energy choices and ways to reduce their usage through energy efficiency tips, tools and initiatives will require us to continue to utilize surround sound approach for communications tactics.
  - — LG&E and KU communications preferences will require segmented communications and advertising strategies.

# Major Assumptions

- Corporate Responsibility and Community Affairs
  - Criticism and scrutiny, if any, in aftermath of rate case filing does not necessitate extraordinary community investment response.
  - Criticism and scrutiny of the DSM programs going away does not necessitate extraordinary community investment.
  - Criticism and scrutiny from environmental groups does not escalate dramatically.
  - No significant deterioration in customer satisfaction ratings from low-income customers.
  - Our corporate-wide sustainability program responsibilities do not increase.

# Plan Risks

- Corporate Communications
  - Reduction in energy efficiency programs could still impact customer satisfaction levels.
  - Continued increases in customer bills could potentially result in lower customer satisfaction levels.
  - Ruling on AMS alters the amount of funding for education of the new meters.
  - Opposition to net metering, smart meters and the CCR rule could result in litigation and adverse media exposure.

# Plan Risks

- Corporate Responsibility and Community Affairs
  - Adverse weather and/or natural disasters may necessitate new levels of assistance for agencies addressing the needs of our challenged customers.
  - Reduction in energy efficiency programs could result in different community relations activities.
  - Dissatisfaction with AMS may require additional community relations actions.
  - Unfavorable legal or regulatory result may require focused community relations strategy.

# General Counsel
# LG&E and KU Utilities
# 2019 Operating Plan

**August 2018**

# Table of Contents

- Plan Highlights
- Major Assumptions
- Financial Performance
  - o 2017-2023 Annual O&M Expenses
  - o Labor Expense
  - o Headcount
- Plan Risks

# Plan Highlights

- General Counsel provides support to the entire company through Legal, Compliance, Federal Regulation & Policy, and External Affairs.
- The 2019 General Counsel budget is under expectation by $140k.
- Outside Counsel is 46% of the overall General Counsel budget.
- Headcount will remain flat throughout the plan.
  - Labor represents 27% of the General Counsel 2019BP O&M expenses.
- Company Dues represents 8% of the General Counsel 2019BP O&M expenses.

# Major Assumptions

- Legal
  - Hourly rates of outside providers remain stable.
  - Pending and anticipated legal matters proceed within a band of predictability.
  - There are no material, unanticipated legal issues which arise.

# Major Assumptions

- Compliance
  - — No significant changes in the role played by Compliance Department.
    - A driver for change could be modified expectations, new interpretations of current regulations, significant new or revised regulatory requirements, or increased demand for support from the business teams to reduce regulatory risks.
  - — Limited PHMSA involvement beyond administration of new program
    - Recent implementation of new PHMSA compliance program involved reallocation of existing resources, but developments in that program could create additional resource needs.

# Major Assumptions

- Federal Regulation & Policy
  - — Generally routine pace of rulemaking or policy initiatives from FERC continues.
  - — Continued moderate engagement by the Company in EEI or other industry group activities.
  - — No targeted initiatives by Company to influence a particular policy matter.
  - — No other major developments at FERC or other forums (e.g., PHMSA) that will dictate fundamentally different resource needs.

# Major Assumptions

- External Affairs
  - Expectation that at least one 2019 legislative issue will require modest outside communications agency spending.
  - Convergence of legislative, regulatory and legal issues expected to continue (e.g. Solar Share and Planning and Zoning legislation, change in Basic Service Charge and legislation limiting the same, potential change in net metering statute requiring filing of new tariffs, etc.).

# Plan Risks

- Legal
  - The plan does not include funds for material contingencies.
  - Unfavorable developments in the Brown and Cane Run environmental litigation cases would place the 2019 budget under significant stress.
  - The Company could become involved in a significant unanticipated legal issue, or could face an unanticipated shift in the timing of key steps in pending or planned legal matters.

# Plan Risks

- Compliance
  - Possibility of significant new compliance or policy initiatives.
  - Expansion of Compliance Department's role under existing PHMSA compliance program.
  - Possibility of requirement to increase coordination on specific compliance topics, such as NERC.

# Plan Risks

- Federal Regulation & Policy
  - — New FERC chairman and/or new commissioners could set aggressive agenda for major policy initiatives in which the Company must engage.
  - — Significant new regulations and policies that affect issues critical to the Company could be initiated (e.g., RTO membership, cyber-security, certain manifestations of federal/state jurisdictional questions).

# Plan Risks

- External Affairs
  - Activity in the external affairs arena may result in additional activity/spending in other departments, including Corporate Communications, Legal, Regulatory and Environmental.

# Human Resources
# LG&E and KU Utilities
# 2019 Operating Plan

**August 2018**

# Table of Contents

# Plan Highlights

- Total OPEX increase of $3.76 million over the period of 2019-2023 relative to the 2018 HR Business Plan.
- Headcount is up 3 compared to last year's plan.
- The plan provides sufficient resources for HR to execute its mission of attracting, developing and retaining employees to meet business needs.
- Continued focus on talent development, career pathing, the mentoring program and the succession planning process to ensure employee engagement and a more qualified workforce.
- Continued focus on our knowledge retention plans ensuring solid action plans and regular updates occur.

# Major Assumptions

- We will continue to see high levels of retirements – 139 YTD in 2018 with an average of 137 projected for each year of the plan.
- We will continue to see a significant volume of open positions in each year of the plan (364 filled in 2017).
- We will continue to see significant internal movement to roles with increasing responsibility (276 promotions YTD in 2018).
- We will continue to see changes in the health insurance market that will impact company costs.
- Upcoming union negotiations will be challenging, but we anticipate a favorable outcome with no work stoppages.

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(7)(e)**
**Sponsoring Witness: Paul W. Thompson**

**Description of Filing Requirement:**

*A statement of attestation signed by the utility's chief officer in charge of Kentucky operations, which shall provide:*

1. *That the forecast is reasonable, reliable, made in good faith, and that all basic assumptions used in the forecast have been identified and justified;*
2. *That the forecast contains the same assumptions and methodologies as used in the forecast prepared for use by management, or an identification and explanation for differences that exist, if applicable; and*
3. *That productivity and efficiency gains are included in the forecast.*

**Response:**

See attached.

**STATEMENT OF ATTESTATION SIGNED BY THE UTILITY'S CHIEF OFFICER IN CHARGE OF KENTUCKY OPERATIONS**

1. The forecast presented in this rate application is reasonable, reliable, made in good faith, and all basic assumptions used in the forecast have been identified and justified;

2. The forecast contains the same assumptions and methodologies as used in the forecast prepared for use by management, except for the differences that have been identified and explained in the filing requirements and schedules thereto; and

3. Productivity and efficiency gains are included in the forecast.

PAUL W. THOMPSON
Chief Executive Officer and President of
Louisville Gas and Electric Company and
Kentucky Utilities Company

Subscribed and sworn to before me, a Notary Public in and before said County and State, this 18th day of September, 2018.

My Commission Expires:

Judy Schooler
Notary Public, ID No. 603967
State at Large, Kentucky
Commission Expires 7/11/2022

Judy Schooler
Notary Public

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(7)(f)**
**Sponsoring Witness: Daniel K. Arbough**

**Description of Filing Requirement:**

*For each major construction project that constitutes five (5) percent or more of the annual construction budget within the three (3) year forecast, the following information shall be filed:*

1. *The date the project was started or estimated starting date;*
2. *The estimated completion date;*
3. *The total estimated cost of construction by year exclusive and inclusive of allowance for funds used during construction ("AFUDC") or interest during construction credit; and*
4. *The most recent available total costs incurred exclusive and inclusive of AFUDC or interest during construction credit.*

**Response:**

See attached.

**Case No. 2018-00295**
**Attachment to Filing Requirement**
**807 KAR 5:001 Sec. 16(7)(f)**

**Arbough**

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(7)(g)**
**Sponsoring Witness: Daniel K. Arbough**

**Description of Filing Requirement:**

*For all construction projects that constitute less than five (5) percent of the annual construction budget within the three (3) year forecast, the utility shall file an aggregate of the information requested in paragraph (f)3 and 4 of this subsection.*

**Response:**

See LG&E's response to Filing Requirement 807 KAR 5:001 Section 16(7)(f) [Tab No. 19].

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(7)(h)**
**Sponsoring Witness: Daniel K. Arbough**

## Description of Filing Requirement:

*A financial forecast corresponding to each of the three (3) forecasted years included in the capital construction budget. The financial forecast shall be supported by the underlying assumptions made in projecting the results of operations and shall include the following information:*

## Response:

See LG&E's responses to Tab Nos. 22-38.

**Louisville Gas and Electric Company**
**Case No. 2018-00295**
**Forecasted Test Period Filing Requirements**
**(Forecasted Test Period 12ME 4/30/20; Base Period 12ME 12/31/18)**

**Filing Requirement**
**807 KAR 5:001 Section 16(7)(h)(1)**
**Sponsoring Witness: Daniel K. Arbough**

**Description of Filing Requirement:**

*A financial forecast corresponding to each of the three (3) forecasted years included in the capital construction budget. The financial forecast shall be supported by the underlying assumptions made in projecting the results of operations and shall include the following information:*

1. *Operating income statement (exclusive of dividends per share or earnings per share);*

**Response:**

See attached. Note that the attached does not reflect any impact from rate case activity beyond 2018.

**Response:**

The most recent Federal Energy Regulatory Commission ("FERC") audit report relating to LG&E is attached. The Federal Communications Commission has not conducted an audit of LG&E, and, therefore, no such audit reports exist.

In Reply Refer To:
Office of Enforcement
Docket No. FA12-12-000
October 9, 2014

PPL Corporation
Attention: Robert J. Grey
Executive Vice President, General Counsel and Secretary
Two North Ninth St.
Allentown, PA 18101

Dear Mr. Grey:

1. The Division of Audits and Accounting within the Office of Enforcement (OE) has completed an audit of PPL Corporation (PPL), including its service companies and associated companies. The purpose of the audit was to evaluate the companies' compliance with Federal Energy Regulatory Commission (Commission): (1) cross-subsidization restrictions on affiliate transactions under 18 C.F.R. pt. 35; (2) accounting, recordkeeping, and reporting requirements under 18 C.F.R. pt. 366; (3) Uniform System of Accounts (USofA) for centralized service companies under 18 C.F.R. pt. 367; (4) preservation of records requirements for holding and service companies under 18 C.F.R. pt. 368; and (5) FERC Form No. 60 annual report requirements under 18 C.F.R. pt. 369.

The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies under 18 C.F.R. pt. 101 and the applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorization in Docket No. EC10-77-000.

Moreover, the audit evaluated Kentucky Utilities Company (KU) and Louisville Gas and Electric Company's (LG&E) compliance with their transmission cost-of-service formula rate schedule included as Attachment O of KU and LG&E's Open Access Transmission Tariff (OATT) and PPL Electric Utilities Corporation's compliance with its transmission cost of service formula rate schedule included as Attachment H-8-G of PJM Interconnection, L.L.C.'s OATT. The audit covered the period from January 1, 2010 through December 31, 2011. The enclosed audit report explains our audit findings and recommendations.

2. On September 26, 2014, PPL agreed with the findings and accepted the recommendations contained in the audit report. PPL stated it has already undertaken some corrective actions, as observed in the audit report.

3. In addition, PPL also provided descriptions of the planned corrective actions it will take to comply with the audit report recommendations and provided target completion dates. The appendix to the audit report includes a copy of PPL's response. I hereby approve the audit report.

4. PPL should submit its implementation plan within 30 days of this letter and make quarterly submissions to DAA describing the progress made to comply with the recommendations. As indicated in the audit report, these submissions should be made no later than 30 days after the end of each calendar quarter, beginning with the first quarter after this audit report is issued, and continuing until all corrective actions are completed.

5. The Commission delegated the authority to act on this matter to the Director of OE under 18 C.F.R. section 375.311 (2013). This letter order constitutes final agency action. PPL may file a request for rehearing with the Commission within 30 days of the date of this order under 18 C.F.R. section 385.713 (2013).

6. This letter order is without prejudice to the Commission's right to require hereafter any adjustments it may consider proper from additional information that may come to its attention. In addition, any instance of non-compliance not addressed herein or that may occur in the future may also be subject to investigation and appropriate remedies.

7. I appreciate the courtesies extended to the auditors. If you have any questions, please contact Mr. Bryan K. Craig, Director and Chief Accountant, Division of Audits and Accounting at (202) 502-8741.

Sincerely,

Larry D. Gasteiger
Acting Director
Office of Enforcement

Enclosure

Federal Energy Regulatory Commission

# Audit of
# PPL Corporation's Affiliate Transactions, and Compliance with:

- Transmission Formula Rates

Docket No. FA12-12-000
October 9, 2014

**Office of Enforcement**
**Division of Audits and Accounting**

## TABLE OF CONTENTS

# I. Executive Summary

## A. Overview

The Division of Audits and Accounting (DAA) within the Office of Enforcement has completed an audit of PPL Corporation (PPL), including its service and associated companies. The audit was commenced to evaluate compliance with the Federal Energy Regulatory Commission's (FERC or the Commission): (1) cross-subsidization restrictions on affiliate transactions;[1] (2) accounting, recordkeeping, and reporting requirements;[2] (3) Uniform System of Accounts (USofA) for centralized service companies;[3] (4) preservation of records requirements for holding and service companies;[4] and (5) FERC Form No. 60 annual report requirements.[5]

The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies under 18 C.F.R. pt. 101 and applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorization in Docket No. EC10-77-000. Lastly, the audit evaluated Kentucky Utilities Company (KU) and Louisville Gas and Electric Company's (LG&E) compliance with their transmission cost-of-service formula rate schedule included as Attachment O of KU and LG&E's Open Access Transmission Tariff (OATT) and PPL Electric Utilities Corporation's (PPL Electric) compliance with its transmission cost-of-service formula rate schedule included as Attachment H-8-G of PJM Interconnection, L.L.C.'s (PJM) OATT. The audit covered the period from January 1, 2010 through December 31, 2011.

Based on audit staff examination of KU, LG&E, and PPL Electric's accounting and formula rate calculations, audit staff identified numerous areas of substantial non-compliance with various Commission requirements. The level of non-compliance and the seriousness of these matters uncovered during the audit resulted in excessive formula rate billings to wholesale transmission customers. Audit staff is very concerned that the lack of sufficient oversight of PPL's accounting and formula rate policies that impact rate recovery have contributed to erroneous and excessive formula rate billings to wholesale

[3] *Id.* pt. 367.

[4] *Id.* pt. 368.

[5] *Id.* pt. 369.

transmission customers. Audit staff is also concerned that wholesale transmission customers would have continued to pay excessive amounts through formula rate billings had these areas of non-compliance gone undetected by audit staff. However, audit staff is encouraged by PPL's: (1) cooperation throughout the entire audit process and (2) swift and comprehensive implementation plan to correct these serious breaches of compliance with Commission requirements during and after the audit fieldwork. These areas of non-compliance are reflected in the compliance findings summarized in section C below and in full in section IV.

## B. Transmission Formula Rate

KU and LG&E

KU and LG&E operate their system as a single, integrated, and coordinated transmission system and provide transmission service under the terms of their shared joint OATT. KU and LG&E adopted a formula rate for transmission service under schedule 7 (covering long-term firm and short-term firm point-to-point transmission service), schedule 8 (covering non-firm point-to-point transmission service), and schedule 9 (covering network integration service). The formula rate also provides for recovery of their Independent Transmission Organization and Reliability Coordinator costs.

The formula rate is in Attachment O to KU and LG&E's OATT. KU and LG&E are not required to file an annual informational or compliance filing for their wholesale transmission cost-of-service formula rate. Rather, KU and LG&E post the formula rate on OASIS by May 1, effective June 1, each year. All amounts in the formula rate are based on actual amounts. There are no over/under-collections, refunds, additional billings, projections, or estimates in the formula rate.

The transmission formula rate calculation is prepared in an Excel spreadsheet that primarily uses FERC Form No. 1 data. Each input item is identified within the spreadsheet, KU and LG&E's FERC Form No. 1 data are entered in the input section of the spreadsheet, and they are combined to calculate the final combined OATT rates. Sources of the data used to prepare the transmission formula rate are the KU and LG&E FERC Form No. 1s for the calendar year. Specific pages and line numbers are in the data entry section of the formula spreadsheet to help identify correct data points. After initial data entry is completed, separate teams in the accounting and transmission groups review the formula inputs and results to ensure data accuracy. The Rates and Regulatory (Rates) group maintains the spreadsheet where the formula rate is calculated. The Rates group enters data from the FERC Form No. 1, which allows formula rates to be calculated in the spreadsheet.

PPL Electric

PPL Electric is a member of PJM. PJM directs the operation of PPL Electric's transmission facilities, and transmission service over these facilities is provided under the PJM OATT. PPL Electric's annual transmission revenue requirement (ATRR) and annual transmission rates are set forth in Attachment H-8G to PJM's OATT, and the formula rate implementation protocols (Protocols) for the ATRR and rates are set forth in Attachment H-8H to PJM's OATT. The Protocols describe the process in which PPL Electric will account for certain inputs, updates to the formula, annual review procedures, and formal challenge procedures.

PPL Electric's ATRR established point-to-point transmission rates to the PPL Group Zone and Network Integration Transmission Service (NITS) rates in the PPL Group Zone. PPL Electric's ATRR is based on actual costs for transmission service for the preceding calendar year and based on associated FERC Form No. 1 data. PPL Electric is allowed to include the cost of weighted, capital additions projected for the current year, as well as projected CWIP for its transmission incentive project, Susquehanna-Roseland. PPL Electric also has a true-up mechanism through which deviations from actual costs will be addressed.

The ATRR produced by PPL Electric's approved formula rate is the sum of return on rate base, operation and maintenance expense, administrative and general expense, depreciation expense, taxes other than income tax, and income taxes, less any applicable revenue credits. PPL Electric's formula rate components are based on FERC Form No. 1 data and/or supporting documentation for data not otherwise available in the FERC Form No. 1. PPL Electric's Regulatory Compliance group manages the formula rate filing process, while other groups such as Transmission Expansion, Office of General Counsel, and Taxes provide data and various exhibits supporting some components. PPL Electric's formula rate filing is submitted to the Commission as an informational filing, due annually on or before May 15 of each year.

## C. Summary of Compliance Findings

Audit staff's compliance findings are summarized below. Details are in section IV of this report. Audit staff identified the following areas of noncompliance:

- PPL Electric improperly accounted for its investment in PPL Receivables Corporation under the consolidated method of accounting instead of using the equity method of accounting, as required by the Commission. As a result of using the consolidated method instead of the equity method of accounting, PPL Electric erroneously included certain amounts in its formula rate billings to wholesale transmission customers.

- PPL Electric improperly accounted for overpayments of its current year's estimated Federal and state income taxes in Account 165, Prepayments.

- PPL Electric improperly accounted for manufactured gas plant remediation expenses in Account 930.2, Miscellaneous General Expenses. These expenses should have been accounted for so that no amounts would be recovered from wholesale transmission customers since these costs were not associated with obligations related to wholesale transmission customers. As a result of the incorrect accounting, these expenses were improperly included in the formula rate computation.

- KU and LG&E neither sought nor received Commission approval to recover asset retirement obligation costs in their transmission formula rate.

- KU did not remove all amounts from its formula rate calculations associated with its Virginia distribution utility plant facilities, as required by the Commission.

- KU and LG&E improperly accounted for cost of removal on physical assets related to asset retirement obligations.

- PPL's three franchised public utilities (KU, LG&E, and PPL Electric) incorrectly included some transaction-related costs related to PPL's merger with E.ON U.S. in formula rate billings to wholesale power and transmission customers.

- KU's method of computing Allowance for Funds Used During Construction (AFUDC) on Construction Work In Progress (CWIP) was deficient by compounding AFUDC monthly instead of semi-annually, including unrealized losses in its common equity balance used to calculate AFUDC, and using an incorrect balance for the common equity component.

- KU and LG&E's formula rate Attachment O included multiple inaccurate line references.

- FERC Form No. 60 filings that PPL Services Corporation (PPL Services) and LG&E and KU Services Company (LKS) made contained several reporting errors relating to account misclassifications, supporting schedule discrepancies, and the reporting of convenience payments.

## D. Summary of Recommendations

Audit staff's recommendations to remedy the findings are summarized below. Detailed recommendations are in section IV. To address the areas of noncompliance, audit staff recommends the following:

1. PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

2. PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

3. PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.

4. PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

5. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

6. PPL Electric should reclassify Federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account 146, Accounts Receivable from Associated Companies, or Account 143, Other Accounts Receivable, as appropriate.

7. PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

8. PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

9. PPL Electric should revise procedures to appropriately determine its tax accrual amount.

10. PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

11. For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

12. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

13. PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.

14. PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

15. PPL Electric should determine the amount of manufactured gas plant remediation costs recovered through its formula rate.

16. For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

17. PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

18. LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

19. LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

20. For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under section 35.19a of the Commission's regulations.

21. LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

22. For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under section 35.19a of the Commission's regulations.

23. LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

24. For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

25. LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

26. PPL Electric, LG&E, and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

27. PPL Electric, LG&E, and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

28. PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under section 35.19a of the Commission's regulations for LG&E and KU.

29. KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

30. LG&E and KU should develop and implement controls to ensure accurate and complete line references.

31. LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

32. LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

33. LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

## E. Compliance and Implementation of Recommendations

Audit staff further recommends that PPL:

- Submit its plans for implementing audit staff's recommendations for audit staff's review. PPL should submit these plans to audit staff within 30 days after this final audit report is issued.

- Submit all correcting entries to the Division of Audits and Accounting within 30 days after this final audit report is issued, including all correcting entries affecting the books for its associated franchised public utilities.

- Submit quarterly reports to the Division of Audits and Accounting describing PPL's progress in completing each corrective action recommended in this final audit report. PPL should make quarterly filings no later than 30 days after the end of each calendar quarter, beginning with the first quarter after the final audit report in this docket is issued, and continuing until PPL completes all recommended corrective actions.

- Submit copies of any written policies and procedures developed in response to recommendations in the final audit report. These policies and procedures should be submitted for audit staff review in the first quarterly filing after PPL completes these products.

## II. Background Information

### A. Description of PPL Corporation System

Headquartered in Allentown, PA, PPL is a public utility holding company with public utility and nonutility subsidiaries in the United States. PPL controls or owns approximately 19,000 megawatts of generating capacity in the United States, sells energy in U.S. markets, and delivers electricity and natural gas to about 10 million customers in the United States. PPL also owns a regulated distribution company in the United Kingdom that serves 7.8 million customers in Wales, and southwest and central England. During the audit period, PPL was the parent of three Commission-jurisdictional franchised public utilities (FPUs): PPL Electric, LG&E, and KU.[6]

PPL Electric delivers electricity to 1.4 million customers in eastern and central Pennsylvania, and owns transmission facilities within PJM's balancing authority area. PPL Electric does not have captive wholesale or retail customers, but is the default supplier for retail customers within its service area. LG&E is a public utility that owns and operates electric generation, transmission, and distribution facilities, as well as natural gas distribution, transmission, and storage facilities, in Kentucky and Indiana. LG&E serves 397,000 electric customers. KU is a public utility that owns and operates electric generation, transmission, and distribution facilities in Kentucky, with limited operations in Tennessee and Virginia. KU serves 516,000 electric customers in Kentucky and 30,000 electric customers in Virginia.

PPL's two centralized service company subsidiaries (LKS and PPL Services) provide a variety of services to PPL, affiliated FPUs, and other affiliates.

LKS provides a variety of administrative, management, engineering, construction, environmental, and support services to affiliated entities, including KU and LG&E, at cost. LKS was formed as a Kentucky corporation on June 2, 2000 and commenced operations as a service company on January 1, 2001. Following the repeal of the Public Utility Holding Company Act (PUHCA) of 1935 and the enactment of PUHCA 2005, LKS transitioned, effective January 1, 2008, to the Commission's USofA for centralized service companies under part 367. LKS is a wholly owned subsidiary of LG&E and KU Energy LLC (LKE), which in turn is a wholly owned subsidiary of PPL. LKS became an indirect, wholly owned subsidiary of PPL when PPL acquired all of the limited liability company's interest of LKE from E.ON U.S. LLC (E.ON U.S.) on November 1, 2010.

[6] The term franchised public utility means a public utility with a franchised service obligation under state law.

PPL Services, a Delaware corporation, is a wholly owned subsidiary of PPL. PPL Services also provides various administrative services at cost to affiliated entities, including LKS and PPL Electric. PPL Services was formed as a corporate entity on February 14, 2000 as a PPL subsidiary. When PPL Services was formed, PPL was a single state exempt holding company under PUHCA 1935, so PPL Services was not subject to regulation as a centralized service company. PPL remained a single state exempt holding company after PUHCA 2005 was passed. On October 26, 2010, the Commission issued an order under section 203 of the Federal Power Act (FPA), authorizing PPL's acquisition of E.ON U.S. As a result of the acquisition of E.ON U.S., PPL derived more than 13 percent of its public utility company revenues from outside of a single state. After the acquisition, PPL notified the Commission that it no longer qualified for the waiver from applicable accounting, record retention, and reporting requirements under part 366 of the Commission's regulations as a single state holding company and notified the Commission it no longer sought to maintain its waiver as a single state holding company. Due to the acquisition of E.ON U.S. and PPL's change in status under PUHCA 2005, PPL Services fell under regulation as a centralized service company under PUHCA 2005 on November 1, 2010. The basic organizational structure of PPL Services has not changed significantly since it was formed in 2000.

## B. Non-Power Goods and Services

LKS and PPL Services are the centralized service companies within PPL's holding company system that provide business support services to PPL, affiliated FPUs, and other subsidiaries. During the audit period, the service companies had service agreements between themselves and the FPUs. Under these agreements, the service companies provided administrative and professional services to PPL, its associated public utilities, and other PPL nonregulated operating companies "at-cost." Specifically, these administrative and professional services included, among others, corporate audit services, environmental management services, facilities management, financial accounting and reporting services, human resources, IT support, tax services, and legal services. Also, affiliated companies provided PPL's FPUs with other non-power goods and services. Such services were provided under agreements for mutual assistance, gas transportation services, insurance services, third-party services, data hosting, and intercompany billing support.

## C. Service Company Accounting Systems

Cost accumulation and tracking at PPL Services is accomplished using two systems: PeopleSoft Project Costing (Project Costing) and PowerPlant. Project Costing is the system where projects are created and serves as the repository for amounts from various subsystems, such as payroll, accounts payable, and inventory. PPL Services tracks expenses by project. These can either be expense or capital projects. The Commission account for applicable costs is assigned as part of this Project Costing. PowerPlant contains plant records for PPL Services and serves as the database for its property records. PowerPlant data fields are updated by a nightly interface with PeopleSoft. Any capital projects established in PowerPlant are reviewed for proper accounting set up by the Asset Management group, which is part of the Controller's department. PowerPlant calculates depreciation expense as well as any capitalized interest. At month end, PowerPlant creates journal entries that are interfaced back to the PeopleSoft general ledger. PowerPlant is used exclusively for accumulating costs for capital projects.

Classification of accounts is maintained by the Corporate Accounting department in the Shared Accounting Services group and conforms to the requirements of the USofA. The classification also establishes accounting requirements as applicable to transactions occurring under normal circumstances in the ordinary course of business. The general ledger records and maintains activity and balances for direct and indirect costs. The general ledger also runs a monthly process to allocate indirect service company costs recorded, by category, from the service company to various PPL business lines as defined by the Financial Planning group. Also, the Financial Planning group created manual journal entries, and reviewed and approved direct cost allocations from the service company to the various business lines.

LKS cost accumulation and tracking is accomplished using Oracle products. Transactions affecting LKS post to the Oracle general ledger and originate from spreadsheet journal entries and mass allocations generated within the Oracle general ledger module, and from the subsidiary systems' Oracle Project Accounting, Oracle Payables, Oracle Purchasing, PowerPlant, the VOLTS timekeeping system, and the Transportation Resource Management System.

LKS uses the Oracle Project Accounting (Project Accounting) module to capture and accumulate direct and indirect costs. Projects have been created for each associated company, which receives charges with tasks designated to record income statement charges for direct and indirect labor, and for direct and indirect nonlabor. Charges from LKS to projects with tasks set up to balance sheet accounts on associated companies are designated as direct. Labor burdens are designated as indirect, consistent with the treatment on the FERC Form No. 1. LKS employees record their time through the timekeeping system to the appropriate direct or indirect labor tasks, and the labor is interfaced to Project Accounting and the general ledger. Nonlabor charges are recorded to appropriate direct or indirect nonlabor tasks via coding on purchase orders, disbursement requests, purchasing cards, or expense reports. After employees' labor charged to associated companies is interfaced from Project Accounting and posted to the general ledger, an Oracle process calculates burden components on this labor. This process debits direct burden accounts for all labor, including indirect labor. Another Oracle process then moves burden amounts from direct burden accounts to indirect burden accounts.

## D. Cost Allocation Methods

The service companies directly and indirectly charge costs to affiliates. Directly charged costs are identifiable and charged entirely to the appropriate affiliate, while indirectly charged costs require application of different cost allocation methodologies to determine charges. These methodologies are based on several factors such as number of employees, number of transactions, number of customers, or occupied square footage. In general, the service companies charge costs to affiliates in one of three ways:

- Costs for services performed for an affiliate are directly charged to the affiliate.
- Costs for services performed for two or more affiliates are distributed among and charged to the affiliates, using methods determined on a cost-causation basis consistent with the type of work performed and based on an allocation method.
- Costs for general services, which are applicable to all affiliates or a class or classes of affiliates, are allocated among or charged to such affiliates by application of one or more cost allocation methods.

LKS reported approximately $296 million in service costs for 2011. Moreover, LKS directly charged some 47 percent and allocated 53 percent of costs to affiliates with respect to non-power goods and services it provided. KU and LG&E received about 88 percent of the service company's charges during 2011. LKS neither directly charged nor allocated any costs to PPL Electric during 2011. LKS directly charged or allocated costs to affiliates using 18 different allocation methods.

PPL Services reported approximately $400 million in service costs for 2011. Moreover, it directly charged some 59 percent and allocated 41 percent of costs to affiliates with respect to non-power goods and services it provided. PPL Electric received about 36 percent of the service company's charges during 2011. PPL Services neither directly charged nor allocated any costs to KU or LG&E during 2011. PPL Services directly charged or allocated costs to affiliates using 11 different allocation methods.

## E. Internal Audit Role and Reporting

PPL's Internal Audit department is divided into three branches: PPL Audit Services, Special Projects, and LKE Audit Services. The executive director of the Internal Audit department reports functionally to the Audit Committee of the Board of Directors and reports administratively to the Chairman/President/CEO. Most of these staffers have Certified Public Accountant and/or Certified Internal Auditor professional certifications.

The Internal Audit department uses and complies with the Institute of Internal Auditors' International Standards for the Professional Practice of Internal Auditing. Each quarter, the Internal Audit department prepares a report for the PPL Audit Committee that addresses key risk areas assessed during the quarter, a summary of audit results, a summary of significant or material control deficiencies, audit performance measures, and a summary of select in-progress audits. Each year, the Internal Audit department also reports to the PPL Audit Committee on overall control environment, Sarbanes-Oxley section 404 compliance, audit organization and qualifications, budget and expenditures, annual audit plans, and the Internal Audit department's charter. The Internal Audit department did not perform any work that directly related to the scope areas in this audit.

## F. Acquisition of E.ON U.S.

On November 1, 2010, PPL purchased E.ON U.S., the parent company of Kentucky's two major utilities, KU and LG&E, for $7.625 billion from German utility firm E.ON AG. On October 25, 2010, the Commission issued an order approving this acquisition of all issued and outstanding limited liability company interests of E.ON U.S.[7] As a result of the transaction, E.ON U.S. became a direct, wholly owned subsidiary of PPL, and E.ON U.S.'s subsidiaries, including KU and LG&E, became indirect, wholly owned subsidiaries of PPL. In its Merger Order approving the transaction, the Commission required that transmission and wholesale customers be held harmless from costs related to the transaction for five years to the extent that such costs would exceed savings related to the transaction.

[7] *PPL Corporation*, 133 FERC ¶ 61,083 (2010) (Merger Order).

# III. Introduction

## A. Objectives

The audit's objectives were to determine whether PPL and its associated companies complied with: (1) Commission cross-subsidization restrictions on affiliate transactions; (2) accounting, recordkeeping, and reporting requirements; (3) the USofA for centralized service companies; (4) Commission preservation of records requirements for holding companies and service companies; and (5) FERC Form No. 60 Annual Report requirements. The audit evaluated PPL's associated public utilities' compliance with Commission accounting requirements for transactions with associated companies and applicable reporting requirements in the FERC Form No. 1. The audit also evaluated compliance with the conditions upon which the Commission granted merger and acquisition of jurisdictional facilities authorizations in Docket No. EC10-77-000. Lastly, audit staff examined KU, LG&E, and PPL Electric's compliance with their transmission cost-of-service formula rate schedules within the respective OATTs. The audit covered January 1, 2010 through December 31, 2011.

## B. Scope and Methodology

To address overall audit objectives, audit staff:

- Identified standards and criteria used to evaluate compliance with each audit scope area. They included Commission rules, regulations, letter orders, and other requirements for holding and service companies, and Commission accounting regulations for jurisdictional public utilities.

- Reviewed FERC-65, Notification of Holding Company Status, and FERC Form No. 60 Annual Reports to ensure filed information was reliable, accurate, and complete.

- Reviewed publicly available materials to understand PPL's operations, including select filings to the SEC (Forms 10-K and 10-Q), FERC Form Nos. 1 and 60 filings, prior audits, and other filings with the Commission.

- Conferred with officials from the Pennsylvania, Kentucky, Virginia, and Tennessee public utility commissions, which have jurisdiction over PPL's FPUs.

- Conducted site visits to corporate headquarters in Allentown, PA, and Louisville, KY. The visits enabled audit staff to understand PPL's structure, activities, functions, systems, and the processes used in its operations. While on site, audit staff reviewed and tested supporting details for PPL's allocation methods; interviewed PPL staff responsible for accounting, financial reporting, record retention, cost allocations, and PPL's compliance program; sampled select supporting documents to ensure the service companies' accounting complied with Commission accounting regulations; sampled select supporting documents to ensure that billings and associated public utilities' accounting for these billings complied with Commission accounting regulations; and tested compliance with preservation of records requirements.

- Conducted interviews, teleconferences, and met with PPL employees to discuss processes, procedures, operations, and observations.

- Discussed data responses with PPL employees, and clarified and supplemented data responses with more information on areas of specific concern.

- Reviewed relevant audit reports and working papers of the Internal Audit department and external audit firm Ernst & Young LLP.

- Conferred with other Commission staff on various compliance issues to ensure audit findings would be consistent with Commission precedent and policy. For example, audit staff spoke with staff from other divisions within the Office of Enforcement, and with technical and legal staff from other Commission offices, including the Office of Energy Market Regulation and the Office of General Counsel.

Audit staff performed several specific actions to evaluate compliance with all relevant requirements relating to audit objectives. A summary of these actions includes:

*Cross-subsidization Restrictions*

To evaluate compliance with Commission cross-subsidization restrictions on affiliate transactions, audit staff:

- Reviewed policies, procedures, and practices related to the sale of non-power goods and services.

- Interviewed PPL employees, particularly those who account and report transfers of non-power goods and services.

- Reviewed and tested pricing mechanisms for non-power goods and services the FPUs provided to and received from each other, service companies, and other nonutility affiliates.

- Sampled charges and payments to determine accurate pricing for the sale of goods and services.

*Accounting, Recordkeeping, and Financial Reporting*

To evaluate compliance with Commission accounting, recordkeeping, and financial reporting regulations, audit staff:

- Reviewed FERC Form No. 60 Annual Report filings, Notification of Holding Company Status – FERC-65 filings, and the public utilities' FERC Form No. 1 reports. Audit staff also verified select, electronically filed information reported on the FERC Form No. 60 filings with supporting books and records to ensure reported information was accurate and complete.

- Compared select information in the FERC Form No. 1s with the FERC Form No. 60s to ensure information was reported accurately and consistently. Also, audit staff reviewed page 429 of the FERC Form No. 1s, which included non-power goods and services transactions for each FPU.

- Reviewed, sampled, analyzed, and tested select centralized service company accounting data.

- Sampled FPUs' accounting for select costs received from the centralized service companies.

*Cost Allocation and Billings*

To evaluate service company cost allocation methodologies and billings, audit staff:

- Identified cost allocation methods used, and identified and reviewed new allocation methods to facilitate our review of the service companies' cost allocation methods and costs the service companies billed to PPL's FPUs. Also, audit staff reviewed and tested billings and supporting details behind select allocation methods.

*Preservation of Records*

To evaluate compliance with Commission preservation of records requirements, audit staff:

- Interviewed PPL employees responsible for retaining records for the service companies.

- Requested and tested select records to ensure their retention.

*Merger and Acquisition Authorizations Compliance Review*

To evaluate compliance with conditions of the Commission's Merger Order, audit staff:

- Reviewed PPL's applications and related Commission filings and orders to understand the terms, conditions, and context of the merger and acquisition request, and identify commitments made in applicable orders.

- Examined procedures and controls for compliance with "hold harmless" provisions the Commission established in its merger and acquisition order. This included a review of accounting filings for recovery of transaction-related costs, controls for compliance oversight, and rates to ensure cost recoveries were appropriate.

- Discussed the merger with state public utility commissions that regulate PPL to understand their merger oversight and any concerns related to the post-merger company.

- Evaluated PPL's implementation process to ensure compliance with the merger's hold harmless provisions, requiring PPL to hold wholesale power and transmission customers harmless for five years from merger costs that may exceed merger-related savings.

- Interviewed employees involved in merger costs and synergy savings tracking.

- Tested certain amounts recorded as merger costs and synergy savings to determine appropriate classification and the level of support maintained.

*Transmission Formula Rate*

To evaluate each FPU's compliance with its respective formula rates, audit staff:

- Evaluated PPL Electric's compliance with its transmission cost-of-service formula rate in Attachment H-8G and the related Protocols set forth in Attachment H-8H to PJM's OATT, and KU and LG&E's compliance with their transmission cost-of-service formula rate in Attachment O to their joint OATT, including filings containing inputs to the formula rate.

- Reviewed initial and all subsequent Commission orders accepting the formula rate, including orders approving related settlements and PPL filings. Determined the level of functionalization, derivation of allocation factors, return on equity, rate base, accumulated depreciation, and other expenses. Reviewed background information about specific cost treatment, deferrals, cost caps, disallowances, and other matters disclosed as part of approving the derivation of the formula rate.

- Evaluated processes, procedures, and controls used to prepare and review the formula rate and annual updates, true-ups, or informational filings associated with the formula rate.

- Reviewed formula rate mechanics (forward-looking, historical, true-up, and informational filings), including a comprehensive overview of the formula rate mechanism the company provided.

- Evaluated the FERC Form No. 1 reporting processes and procedures to ensure accurate and complete reporting. As part of this evaluation, audit staff reconciled FERC Form No. 1 data with formula rate calculations and reviewed all discrepancies.

- Reviewed the FERC Form Nos. 1 and 3-Q, including related notes to financial statements to identify major accounting matters. Audit staff highlighted significant notes to understand financial statement and formula rate implications, and identified underlying accounting entries for these significant accounting matters.

- Determined whether the FPUs' accounting for significant matters impacted the formula rate calculation.

- Evaluated whether PPL's FPUs applied formula rate inputs in compliance with rate approval orders.

- Reconciled formula rate inputs derived from the FERC Form No. 1 to FPU books and records. Evaluated compliance with the USofA for the inputs under review, including all related guidance and accounting releases and accounting treatment of input items.

- Evaluated various accounts incorporated into cost-of-service formula rates and compliance with relevant accounting regulations in the UsofA.

Besides these actions, audit staff reviewed PPL's regulatory compliance program. Audit staff assessed the program for audit scope areas consistent with prior Commission orders and policy statements. Specifically, audit staff:

- Reviewed PPL's regulatory compliance program structure, including its authority and responsibilities for overseeing corporate compliance and the delegation of compliance responsibilities.

- Reviewed the Internal Audit department structure, including its chain-of-command and access to the Board of Directors through its Audit Committee to assess the effectiveness and independence of the audit function.

- Interviewed PPL executives, managers, and operational employees to evaluate their knowledge and application of the compliance program.

# IV. Findings and Recommendations

## 1. Long-Term Investment in Subsidiary

PPL Electric improperly accounted for its investment in PPL Receivables under the consolidated method of accounting instead of using the equity method of accounting, as required by the Commission. As a result of using the consolidated method instead of the equity method of accounting, PPL Electric erroneously included certain amounts in its formula rate billings to wholesale transmission customers.

## Pertinent Guidance

On February 1, 1973, the Commission issued Order No. 469 to amend the requirements of the Uniform System of Accounts to adopt the equity method of accounting for long-term investments in subsidiaries.[8]

18 C.F.R. pt. 101, Account 123.1, Investment in Subsidiary Companies, states:

> A. This account shall include the cost of investments in securities issued or assumed by subsidiary companies and investment advances to such companies, including interest accrued thereon when such interest is not subject to current settlement plus the equity in undistributed earnings or losses of such subsidiary companies since acquisition. This account shall be credited with any dividends declared by such subsidiaries.

18 C.F.R. pt. 101, Account 418.1, Equity in Earnings of Subsidiary Companies, states:

> This account shall include the utility's equity in the earnings or losses of subsidiary companies for the year.

Instructions to the schedule on page 224 of the FERC Form No. 1, Investments in Subsidiary Companies (Account 123.1), require in part:

> 1. Report below investments in Accounts 123.1, Investments in Subsidiary Companies.

[8] *Revisions in the Uniform System of Accounts, and Annual Report Forms No. 1 and No. 2 to Adopt the Equity Method of Accounting for Long-Term Investments in Subsidiaries*, Order No. 469, 49 FPC 326 (1973), *rehearing denied*, 49 FPC 1028 (1973).

> 3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.

PJM Interconnection L.L.C., FERC Electric Tariff, Attachment H-8H, sections I, III.B states, in part:

> I.H "Material Accounting Change" means any (i) change in PPL Electric's accounting policies and practices, or (ii) change in PPL Electric's inter-corporate cost allocation policies or practices from those policies and/or practices in effect for the Rate Year upon which the immediately preceding Annual Update was based, which change causes a result under the Formula Rate difference than the result under the Formula Rate as calculated without such change.
>
> III.B. (2) The Annual Transmission Revenue Requirement shall be based on PPL Electric's books and records which reflect data properly recorded in: PPL Electric's FERC Form No. 1 to the extent the Formula Rate specifies the FERC Form No. 1 data as the input source; and The Commission's Uniform System of Accounts, as each exists as of the last day of the preceding calendar year.
>
> III.B. (3)(b) The Annual Update shall provide notice of Material Accounting Changes, which may incorporate by reference applicable disclosure statements filed with the SEC.

## Background

Since 1973, the Commission has adopted the equity method of accounting for long-term investments in subsidiaries. Under the equity method of accounting, the investment in subsidiaries is recorded in Account 123.1, Investment in Subsidiary Companies (Major Only).[9] This account is increased or decreased based on a utility's proportionate share of subsidiary earnings regardless of whether such earnings were paid out as dividends to that utility. Although the Commission adopted the equity method of accounting for long-term investment in subsidiaries, it maintained its policy for ratemaking purposes that undistributed earnings of the subsidiary are to be excluded from the equity portion of the jurisdictional company capital structure in determining the rate of return.

[9] *Id*.

PPL Electric has three investments in the following subsidiary companies: CEP Commerce, LLC (CEP Commerce), CEP Lending, Inc. (CEP Lending), and PPL Receivables Corporation (PPL Receivables). PPL Electric has full control of these entities through 100 percent ownership of direct voting rights. CEP Commerce is the parent of CEP Lending, a company formed to make intercompany loans to all of PPL affiliates. PPL informed audit staff that PPL Receivables was formed to serve only the financing needs of PPL Electric. PPL Receivables is a special purpose entity whose sole purpose is to buy eligible accounts receivable and unbilled revenue from PPL Electric to secure asset-backed commercial paper from a third party.

Audit staff examined PPL Electric's accounting for its long-term investment in subsidiaries and found that it used the equity method of accounting to account for its long-term investment in CEP Commerce and CEP Lending. Conversely, it used the consolidated method of accounting to account for its long-term investment in PPL Receivables since its inception in 2004.

PPL Electric used various income statement and balance sheet accounts to record its long-term investment in PPL Receivables under the consolidated method of accounting. During the course of the audit fieldwork, PPL Electric filed its 2012 FERC Form No. 1 as required by Commission regulations.[10] On page 450.1 of the refiled 2012 FERC Form No. 1, PPL Electric disclosed the accounting impact if it had followed the Commission's approved method of accounting for subsidiary investments, which was the equity method of accounting. In addition, audit staff noted that some of these accounts and associated amounts flowed through the formula rate billings to transmission customers.

Audit staff determined that PPL Electric appropriately accounted for its long-term investment in CEP Commerce and CEP Lending using the equity method of accounting. However, PPL Electric did not properly account for its long-term investment in PPL Receivables based on the equity method of accounting, as required by Commission accounting regulations. The Commission's accounting regulations require that long-term investments in subsidiaries be recorded in Accounts 123.1 and 418.1, Equity in Earnings of Subsidiary Companies. Also, PPL Electric should not have included certain amounts in formula rate billings to wholesale transmission customers associated with using the consolidated method of accounting for PPL Receivables. Lastly, audit staff did not find sufficient evidence demonstrating that PPL Electric provided notification to its customers that it was using an accounting method not prescribed by the Commission to account for its long-term investment in PPL Receivables using the consolidated versus the equity method of accounting.

[10] 18 C.F.R. section 141.1.

Since PPL Electric neither sought nor received retroactive relief to use the consolidated method of accounting for its subsidiary investment in PPL Receivables, it must refund amounts erroneously included in formula rate billings to transmission customers since 2004.

**Recommendations**

We recommend that:

1. PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.

2. PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.

3. PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.

4. PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

5. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

## 2. Tax Overpayments

PPL Electric improperly accounted for overpayments of its 2010 and 2011 estimated Federal and state income tax liability in Account 165, Prepayments.

## Pertinent Guidance

18 C.F.R. pt. 101, Account 236(A) (B), Taxes Accrued, states:

> A. This account shall be credited with the amount of taxes accrued during the accounting period, corresponding debits being made to the appropriate accounts for tax charges. Such credits may be based upon estimates, but from time to time during the year as the facts become known, the amount of the periodic credits shall be adjusted so as to include as nearly as can be determined in each year the taxes applicable thereto. Any amount representing a prepayment of taxes applicable to the period subsequent to the date of the balance sheet, shall be shown under account 165, Prepayments.
>
> B. If accruals for taxes are found to be insufficient or excessive, correction therefore shall be made through current tax accruals.

## Background

Audit staff reviewed PPL Electric's taxes and related procedures to understand why PPL Electric characterized taxes as prepaid. Specifically, audit staff asked PPL Electric to explain: (1) the calculation of its estimated Federal and state income tax liability each year; (2) the procedures for determining its estimated and actual Federal and state income tax liability; and (3) the documentation supporting its estimated and actual Federal and state income tax liability and Federal and state income tax prepayment determinations for 2010 and 2011.

PPL Electric determined its estimated Federal and state income tax liability each month by applying the applicable Federal and state income tax rates to its estimated taxable income. When quarterly income tax payments exceeded the estimated income tax liability, PPL Electric considered the income tax overpayment as a prepayment and then recorded this amount in Account 165. PPL Electric paid estimated Federal and state income taxes in four quarterly installments based on its estimated annualized taxable income.

Based on the examination of tax information, audit staff found that PPL Electric recorded Federal and state income tax overpayment amounts in Account 165 that were refunded to PPL Electric for tax years ending 2010 and 2011. Specifically, PPL Electric received refunds amounting to $59,843,908 and $17,272,745 for tax years 2010 and 2011, respectively. Thus, PPL Electric did not reduce any future year's tax liability by the 2010 and 2011 income tax overpayments.

While Account 165 of the Commission's accounting regulations allows the prepayment of income taxes to be recorded therein, Account 236 requires that such prepayments must be applicable to periods subsequent to the date of the balance sheet. Further, the Commission has defined prepayments included in Account 165 as expenses for a service or a supply paid in advance that will be consumed or used in future accounting periods, such as rent and insurance.[11] Audit staff believes PPL Electric's treatment of income tax overpayments as a prepayment is not consistent with the requirements of Account 165 or other Commission requirements because these monies were refunded and not used to pay PPL Electric's income tax obligations in advance.

PPL Electric included the income tax overpayments recorded in Account 165 in its formula rate as a component of rate base. Under the PJM OATT, PPL Electric is allowed to include prepaid amounts recorded to Account 165, Prepayments, as an item in the derivation of its rate base calculated in its formula rates. Prepayments, which represent amounts paid in advance for a good or service, are included as an adjustment to rate base and serve as an added benefit to transmission owners for costs essential to their operations but are prepaid, like insurance premiums. PPL Electric's prepayment input was the product of its applicable prepayment balance and its wages and salaries allocation factor. In conformance with notes to PPL Electric's formula rate, it can only include prepayments for its electric operations.

Because PPL Electric elected not to apply the income tax overpayments to future tax obligations, it should not have been reclassifying excess tax payments in Account 236 to Account 165. Audit staff is aware that PPL Electric engaged in this accounting practice during and prior to the audit period. Also, PPL Electric should not have recovered amounts for its overpayment of income taxes through its formula rate. For amounts determined to be potential refunds and not used to pay PPL Electric's tax obligations in advance, PPL Electric should reclassify state income tax prepayments to Account 143, Other Accounts Receivable, and Federal income tax prepayments to Account 146, Accounts Receivable from Associated Companies.

[11] *Entergy Services, Inc.*, Opinion No. 505, 130 FERC ¶ 61,023, at P 190 (2010).

### Recommendations

We recommend that:

6. PPL Electric should reclassify Federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account146, Accounts Receivable from Associated Companies or Account 143, Other Accounts Receivable, as appropriate.

7. PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.

8. PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.

9. PPL Electric should revise procedures to appropriately determine its tax accrual amount.

10. PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.

11. For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

12. PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.

## 3. Manufactured Gas Plant Obligations

PPL Electric improperly accounted for manufactured gas plant remediation expenses in Account 930.2, Miscellaneous General Expenses. As a result of the incorrect accounting, these expenses were improperly included in the formula rate computation. These expenses should have been treated such that no amounts would be recovered from wholesale transmission customers since these costs were not associated with providing service to wholesale transmission customers.

### Pertinent Guidance

18 C.F.R. pt. 101, Account 242, Miscellaneous Current and Accrued Liabilities, states:

> This account shall include the amount of all other current and accrued liabilities not provided for elsewhere appropriately designated and supported so as to show the nature of each liability.

18 C.F.R. pt. 101, Account 253, Other Deferred Credits, states:

> This account shall include advance billings and receipts and other deferred credit items, not provided for elsewhere, including amounts which cannot be entirely cleared or disposed of until additional information has been received.

18 C.F.R. pt. 101, Account 426.5, Other Deductions, states:

> This account shall include other miscellaneous expenses which are nonoperating in nature, but which are properly deductible before determining total income before interest charges.

18 C.F.R. pt. 101, Account 930.2, Miscellaneous General Expense, states:

> This account shall include the cost of labor and expenses incurred in connection with the general management of the utility not provided for elsewhere.

### Background

PPL Electric incurred manufactured gas plant (MGP) environmental obligations to clean up contaminated sites in conjunction with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. This act imposed joint and several liability for cleaning up contamination caused by hazardous substances. PPL Electric estimated its liability for MGP environmental remediation to be $3,874,758 and $696,010 in 2010 and 2011, respectively. PPL Electric accounted for the MGP environmental remediation contingencies by debiting Account 930.2, and crediting Account 242 or Account 253, as appropriate.

PPL Electric represented that it included the environmental remediation obligations related to the MGPs in Account 930.2 because the environmental costs could not be identified with a specific business line. Consistent with PPL Electric's accounting policy, when a specific business line cannot be identified, either due to contamination that related to the purchase of property or related to former operation of facilities no longer in service, the costs are recorded in Account 930.2.

Audit staff believes that PPL Electric's accounting for its MGP environmental obligations was not consistent with the Commission's accounting regulations because such obligations should not have been included in Accounts 930.2. Audit staff also noted that these costs were not related to providing service to wholesale transmission customers. Therefore, under the Commission's accounting regulations, PPL Electric should have accounted for the MGP environmental obligations by debiting the appropriate nonutility expense account, not a transmission or administrative and general expense account tied to the transmission formula rate, and crediting Account 242 or Account 253, as appropriate.

For ratemaking purposes, PPL Electric included amounts in Account 930.2 in formula rate determinations. The formula rate template permits PPL Electric to recover costs recorded in this account through the application of the transmission wages and salaries allocator. The transmission wages and salaries allocator is the ratio of transmission wages expense to total wages expense less administrative and general wages expense. The application of this allocation factor allowed PPL Electric to recover transmission-related costs recorded in Account 930.2.

As part of the examination of Account 930.2, audit staff determined that in 2010 and 2011 PPL Electric recorded $3,874,758 and $696,010, respectively, of MGP environmental remediation costs in this account and subsequently included these amounts in formula rate determinations. In addition, audit staff noted that PPL Electric recorded these MGP environmental obligations in Account 930.2 for years prior to the audit period. PPL Electric represented to audit staff that these amounts were related to its former MGPs, which include Brodhead Creek, Columbia Gas Plant, Milton Gas Plant, Mt. Joy Gas Plant, and Shamokin Gas Plant. These MGPs were owned by Pennsylvania Power and Light Company, to which PPL Electric is the successor. However, these MGPs are no longer reflected on PPL Electric's books. The MGPs were not used in PPL Electric's wholesale transmission operations. Rather, they were historically used to produce a low Btu gas that was distributed to the Pennsylvania Power and Light Company's retail gas utility customers during the earlier years of the company's operations, when it was both a natural gas and electric utility.

PPL Electric should amend its accounting policy for MGP environmental obligations to record such contingencies by debiting the appropriate nonoperating expense account and crediting Account 242 or Account 253, as appropriate. PPL Electric should also refrain from including these costs in formula rate determinations, since these costs were not associated with providing service to wholesale transmission customers.

**Recommendations**

We recommend that:

13. PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.

14. PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.

15. PPL Electric should determine the amount of manufactured gas plant remediation expenses recovered through its formula rate.

16. For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.

17. PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.

## 4. Asset Retirement Obligation

KU and LG&E neither sought nor received Commission approval to recover asset retirement obligation costs in their transmission formula rate.

## Pertinent Guidance

Order No. 631 states:

> However, public utilities, licensees, and natural gas companies with formula rate tariffs must not include any cost components related to asset retirement obligations in their formula rate billing tariffs for automatic recovery in their billing determinations without obtaining Commission approval. [12]

Order No. 631 goes on to say:

> The Commission finds that the issue of whether, and to what extent, a particular asset retirement cost must be recovered through jurisdictional rates should be addressed on a case-by-case basis in the individual rate change filed by public utilities, licensees, and natural gas companies. To ensure that all rate base amounts related to asset retirement obligations can be identified and excluded from the rate base calculation in a rate change filing, the Commission adds sections 35.18 and 154.315 to its rate change filing requirements. These new regulations require that public utilities, licensees, and natural gas companies who have recorded an asset retirement obligation on their books in accordance with this rule must, as part of any initial rate filing or general rate change filing, provide a schedule identifying all cost components related to the asset retirement obligation that are included in the book balances of all accounts reflected in the cost of service computation supporting the proposed rates. In addition, the regulations require that all asset retirement obligations related rate base items be removed from the rate base computation through an adjustment. If the public utility, licensee, or natural gas company is seeking recovery of an asset retirement obligation in rates, it must also provide a detailed study supporting the amounts proposed to be collected in rates. If the public utility, licensee, or natural gas company is not seeking

[12] *Accounting, Financial Reporting, and Rate Filing Requirements for Asset Retirement Obligations*, Order No. 631, 103 FERC ¶ 61,021, at P 60 (2003).

> recovery of the asset retirement obligation in rates, then it must remove all asset retirement obligation related cost components from its cost of service.[13]

Section 35.18 of the Commission's regulations specifically states:

> (a) A public utility that files a rate schedule, tariff or service agreement under section 35.12 or section 35.13 and has recorded an asset retirement obligation on its books must provide a schedule, as part of the supporting work papers, identifying all cost components related to the asset retirement obligations that are included in the book balances of all accounts reflected in the cost of service computation supporting the proposed rates. However, all cost components related to asset retirement obligations that would impact the calculation of rate base, such as electric plant and related accumulated depreciation and accumulated deferred income taxes, may not be reflected in rates and must be removed from the rate base calculation through a single adjustment.
>
> (b) A public utility seeking to recover nonrate base costs related to asset retirement costs in rates must provide, with its filing under section 35.12 or section 35.13, a detailed study supporting the amounts proposed to be collected in rates.
>
> (c) A public utility that has recorded asset retirement obligations on its books, but is not seeking recovery of the asset retirement costs in rates, must remove all asset-retirement-obligations-related cost components from the cost of service supporting its proposed rates.[14]

18 C.F.R. pt. 101, Account 182.3, Other Regulatory Assets, states, in part:

> When specific identification of the particular source of a regulatory asset cannot be made, such as in plant phase-ins, rate moderation plans, or rate levelization plans, account 407.4, Regulatory credits, shall be credited.

[13] *Id.* P 62.

[14] 18 C.F.R. section 35.18 (2012).

## Background

KU and LG&E recorded liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with a separate asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased to reflect changes in the obligation due to the passage of time through the recognition of accretion expense.

General Instruction 25 of part 101 of the USofA defines an asset retirement obligation (ARO) as:

> A liability for the legal obligation associated with the retirement of a tangible long-lived asset that a company is required to settle as a result of an existing or enacted law, statute, ordinance, or written or oral contract or by legal construction of a contract under the doctrine of promissory estoppel.[15]

KU and LG&E initially recorded the ARO by debiting Account 101, Electric Plant in Service, and crediting Account 230, Asset Retirement Obligation. These AROs were for obligations associated with ash ponds, chemical storage, asbestos, coal storage, environmental ponds, and other operational matters.

To record the depreciation on the ARO assets, KU and LG&E debited Account 403.1, Depreciation Expense for Asset Retirement Costs, and credited Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. This depreciation is calculated on a straight line basis over a life dictated by the settlement date of the ARO liability.

For accretion expense, KU and LG&E debited Account 411.10, Accretion Expense, and credited Account 230. The accretion expense recognizes the increase in the cost of removing an asset over its useful life.

Lastly, to defer the total depreciation on ARO costs and accretion on ARO liabilities, KU and LG&E debited Account 182.3, Other Regulatory Assets, and credited Account 407.4, Regulatory Credits. Account instructions to Account 182.3 would require KU and LG&E to credit Account 407.4, Regulatory Credits, when "specific identification of the particular source of a regulatory asset cannot be made." However, in this case, the particular source of the regulatory asset can be specifically identified as the depreciation initially recorded in Account 403.1 and the accretion initially recorded in Account 411.10. Therefore, KU and LG&E should have credited Accounts 403.1 and

[15] 18 C.F.R. pt. 101, General Instruction 25.

411.10 rather than Account 407.4. Audit staff understands that amounts deferred in Account 182.3 may have been included in depreciation expense recorded in Account 403.1 and previously collected from wholesale power and transmission customers. Due to these being previously collected, KU and LG&E overstated the regulatory asset recorded in Account 182.3. However, audit staff will not require KU and LG&E to reduce the regulatory asset to the extent KU and LG&E make refunds for the amounts previously collected.

Although KU and LG&E recorded the ARO assets and liability in Accounts 101 and 230, respectively, it included in rate base only the amounts recorded in Account 101 resulting in an increase in rate base. By not decreasing rate base by the amount recorded in Account 230, KU and LG&E overstated amounts included in rate base. Also, KU and LG&E flowed through the effects of the depreciation of the ARO assets recorded in Accounts 403.1 and 108 in the formula rate.

It is audit staff's understanding that ARO costs were included in LG&E and KU's formula rate calculation since inception of the formula rate. Based on Commission requirements, audit staff believes no aspect of the ARO should have been included in formula rate billings to wholesale power and transmission customers, absent KU and LG&E seeking approval from the Commission to include ARO amounts in formula rate determinations. This would have afforded the Commission the opportunity to request further information regarding KU and LG&E's accounting and the impacts of including ARO amounts to determine the annual revenue requirement. KU and LG&E should refund amounts previously collected from wholesale power and transmission customers related to their ARO obligations.

**Recommendation**

We recommend that:

18. LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.

19. LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.

20. For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under section 35.19a of the Commission's regulations.

### 5. Virginia Distribution Utility Plant Costs

KU did not remove all amounts from its formula rate calculations associated with its Virginia distribution utility plant facilities, as required by the Commission.

### Pertinent Guidance

The March 17, 2006 Commission order accepting KU and LG&E's attachment O formula rate stated:

> We accept the attachment O rate formula for use in Applicants' stand-alone OATT, subject to revision. We agree with Applicants that the proposed rate formula represents an appropriate rate methodology for inclusion in Applicants' stand-alone OATT. However, Applicants must exclude the cost of certain facilities in Virginia that the Commission has found to serve a distribution function and not a transmission function. [16]

Note M of Attachment O requires KU to remove transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until FERC Form No. 1 balances are adjusted to reflect application of seven-factor test).[17]

[16] *Louisville Gas and Electric Company, et al.*, 114 FERC ¶ 61,282 at P198, (2006) (Citing *Louisville Gas & Electric Co*., 109 FERC ¶ 61,330 at P 8-9 (2004) (order affirming Presiding Judge's finding that certain facilities in Virginia that perform a distribution function must be excluded from the formula rates used in an interconnection agreement and transmission service agreement between Applicants and East Kentucky Coop.), *order denying reh'g*, 111 FERC ¶ 61,323 at P 50 (2005)).

[17] FERC uses a seven-factor test to determine whether an electric facility is distribution or transmission. FERC will give deference to state commission determinations, but that is limited by the expectation that the state follows the seven-factor test: (1) Local distribution facilities are normally in close proximity to retail customers; (2) local distribution facilities are primarily radial in character; (3) power flows into local distribution systems; it rarely, if ever, flows out; (4) when power enters a local distribution system, it is not reconsigned or transported onto some other market; (5) power entering a local distribution system is consumed in a comparatively restricted geographic area; (6) meters are based at the transmission/local distribution interface to measure flows into the local distribution system; and (7) local distribution systems will be of reduced voltage. Order No. 888, FERC Stats. & Regs. ¶ 31,036 at 31,771, 31,981 (1996).

**Background**

KU's transmission facilities in southwestern Virginia consist of 22 miles of 500-kV lines, 44 miles of 161-kV lines, 8 miles of 138-kV lines, 114 miles of 69-kV lines, and 5 transmission substations.

In a March 2004 initial decision, an administrative law judge determined that these Virginia transmission facilities serve a distribution function and not a transmission function, and, therefore, KU must eliminate the cost of these facilities from the transmission rates it charges.[18] In December 2004, the Commission affirmed the administrative law judge's finding that these Virginia transmission facilities serve a distribution function and not a transmission function and stated that the costs of these facilities must be eliminated from the rates charged.[19] In the March 2006 order that conditionally approved KU's withdrawal from Midwest Independent Transmission System Operator, Inc. (MISO), the Commission again required KU to "exclude the cost of certain facilities in Virginia that the Commission has found to serve a distribution function and not a transmission function."[20]

During a review of the transmission formula rate calculation, audit staff determined that KU did not comply with Note M of Attachment O, which requires KU to remove transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test. KU acknowledged that its Virginia transmission facilities were state-jurisdictional, and KU should have removed the Gross Plant in Service cost of its Virginia transmission facilities and associated depreciation in the calculation of the Transmission Plant Allocator of Attachment O, in conformity with Note M of Attachment O.

Audit staff determined that, by not complying with Note M, KU did not remove certain expenses related to these Virginia distribution plant facilities from formula rate determinations. This includes not only amounts included in the calculation of rate base, return, depreciation, and income taxes that are allocated directly using the transmission plant allocator, but also amounts or expenses, such as accumulated deferred income taxes, operation and maintenance expenses, administrative and general expenses, or taxes other than income taxes that are allocated using other allocators (based on net or gross plant balances, wages and salaries, transmission operation and maintenance expenses,

[18] *Louisville Gas & Electric Co*., 106 FERC ¶ 63,039, at P 64 (2004), *aff'd*. 109 FERC ¶ 61,330 at P 8 (2004), reh'g denied, 111 FERC ¶ 61,323.

[19] *Louisville Gas & Electric Co.*, 109 FERC ¶ 61,330 (2004).

[20] *Louisville Gas & Electric Co*., 114 FERC ¶ 61,282, at P 197 (2006).

etc.) that indirectly incorporate the transmission plant allocator. This resulted in KU erroneously collecting amounts from wholesale power and transmission customers since it did not remove all costs associated with the Virginia distribution plant facilities from formula rate determinations.

### Recommendations

We recommend that:

21. LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.

22. For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under section 35.19a of the Commission's regulations.

## 6. Accounting for Cost of Removal

KU and LG&E improperly accounted for cost of removal on physical assets with legal asset retirement obligations.

## Pertinent Guidance

18 C.F.R. pt. 101, Account 108, Accumulated Provision for Depreciation of Electric Utility plant (Major Only), states, in part:

> A. This account shall be credited with the following:
>
> (1) Amounts charged to account 403, Depreciation expense, or to clearing accounts for current depreciation expense for electric plant in service.
>
> (2) Amounts charged to account 403.1, Depreciation expense for asset retirement costs, for current depreciation expense related to asset retirement costs in electric plant in service in a separate subaccount.

E. The utility is restricted in its use of the accumulated provision of depreciation to the purposes set forth above. It shall not transfer any portion of this account … or make any other use thereof without authorization by the Commission.

## Background

Audit staff examined KU and LG&E’s cost of removal accounting for physical assets with legal asset retirement obligations, such as ash ponds, landfills, and coal storage facilities. KU and LG&E booked the cost of removal related to these assets by debiting Account 403, Depreciation Expense, and crediting Account 108, Accumulated Provision for Depreciation of Electric Utility Plant. KU and LG&E then reclassified these amounts to a regulatory liability account by debiting Account 108 and crediting Account 254, Other Regulatory Liabilities. Once KU and LG&E retired the asset and settled the ARO, KU and LG&E debited Account 254 and credited Account 108.

While KU and LG&E received state commission guidance from the Kentucky Public Service Commission that approved this accounting treatment, such approval does not dictate how this transaction should be accounted for under the Commission’s accounting regulations. Under the Commission’s accounting regulations, cost of removal is typically factored in the depreciation rate, and depreciation expense is accounted for in Accounts 403 and 108. According to the instructions to Account 108, amounts recorded herein must not be transferred to any other account absent of approval from the Commission. KU and LG&E did not seek nor receive approval from the Commission to transfer any amounts from Account 108. By transferring amounts initially recorded in Account 108 to Account 254, KU and LG&E did not follow the instructions for Account 108. For rate purposes, Account 108 is typically used to reduce rate base while amounts recorded in Account 254 are typically not used in the formula rate calculations. Since KU and LG&E removed these amounts from Account 108, it erroneously overstated rate base used to determine formula rate billings to transmission customers. Audit staff is aware that this accounting practice was used for years prior to the audit period.

### Recommendations

We recommend that:

23. LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.

24. For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.

25. LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.

## 7. Merger Costs

PPL's three franchised public utilities (KU, LG&E, and PPL Electric) incorrectly included some transaction-related costs related to PPL's merger with E.ON U.S. in formula rate billings to wholesale power and transmission customers.[21]

## Pertinent Guidance

The October 25, 2010 Commission order approving the merger of PPL and E.ON U.S., LLC stated:

> With respect to transaction-related costs, we accept Applicants' commitment to hold transmission and wholesale customers harmless from costs related to the transaction for a period of five years to the extent that such costs exceed savings related to the transaction, which we interpret to include all transaction-related costs, not only costs related to consummating the transaction.
>
> If Applicants seek to recover transaction-related costs through their wholesale power or transmission rates they must submit a compliance filing that details how they are satisfying the hold harmless requirement. If Applicants seek to recover transaction-related costs in an existing formula rate that allows for such recovery, then that compliance filing must be filed in the section 205 docket in which the formula rate was approved by the Commission, as well as in the instant section 203 docket. We also note that, if Applicants seek to recover transaction-related costs in a filing whereby they are proposing a new rate (either a new formula rate or a new stated rate), then that filing must be made in a new section 205 docket as well as in the instant section 203 docket. The Commission will notice such filings for public comment. In such filings, Applicants must: specifically identify the transaction-related costs they are seeking to recover, and (2) demonstrate that those costs are exceeded by the savings produced by the transaction, in addition to any requirements associated with filings made under section 205. Such a hold

[21] KU sells wholesale power to certain municipal utilities under long-term agreements that established cost-based wholesale power rates based on a formula rate. Moreover, PPL Electric, LG&E, and KU provide transmission service at formula rates.

> harmless commitment will protect customers' wholesale power and transmission rates from being adversely affected by the proposed transaction. [22]

## Background

On June 28, 2010, PPL filed an application seeking authorization under sections 203(a)(1)(A), 203(a)(1)(B), and 203(a)(2) of the FPA for a proposed transaction in which PPL would acquire all of the issued and outstanding limited liability company interests of E.ON U.S. from E.ON AG's indirect, wholly owned subsidiary, E.ON U.S. Investments Corp. PPL sought to acquire E.ON U.S. for a purchase price of $7.625 billion, comprised of $2.062 billion in cash (subject to adjustment), the repayment of outstanding debt of E.ON U.S., LG&E, and KU estimated at $4.638 billion, and the assumption of $925 million in tax-exempt bonds of LG&E and KU. On October 25, 2010, the Commission issued an order approving the transaction under Docket No. EC10-77-000. [23] Audit staff evaluated PPL and its FPU subsidiaries for compliance with the conditions of this order. Besides reviewing Commission orders and company filings, understanding processes and procedures, and interviewing company staff, audit staff reviewed and tested compliance with the order's various provisions, such as verifying that the transaction did not result in any: (1) transfer of jurisdictional facilities between affiliated entities; (2) any securities issued for the benefit of any affiliated entity or in any new pledge or encumbrance of assets of an affiliated entity; or (3) any new affiliate contracts between affiliated entities. Audit staff also verified that all purchase accounting adjustment amounts were removed from account balances reported in the FERC Form No. 1.

Audit staff also evaluated compliance with the order's hold harmless provision, which required PPL to "hold transmission and wholesale customers harmless from costs related to the transaction for a period of five years to the extent that such costs exceed savings related to the transaction, which we interpret to include all transaction-related costs, not only costs related to consummating the transaction."

PPL properly excluded most of its transaction-related costs from formula rate billings to wholesale power and transmission customers, which included legal fees, consulting expenses, third-party costs, and internal labor costs. PPL had controls and procedures in place to hold harmless wholesale power and transmission customers, such as: payroll and time-reporting controls, communications from appropriate groups on how to charge certain costs, and supervisory review and approval of nonpayroll charges.

[22] *PPL Corporation*, 133 FERC ¶ 61,083, at PP 26-27 (2010).

[23] *Id.* P 1.

However, audit staff identified a small amount of transaction-related costs that flowed through to the formula rate billings.

In our review of transaction-related costs, audit staff determined that PPL's two service companies (PPL Services and LKS) allocated the most transaction-related costs to PPL ($113 million), LG&E & KU Capital ($32 million), and PPL Strategic Development ($1 million). These three entities held $146 million of the approximately $150 million in total transaction-related costs incurred during the audit period. The remaining $4 million of transaction-related costs were allocated to 12 other PPL entities, including PPL's 3 franchised public utilities, KU, LG&E, and PPL Electric, which are in bold in the table below. This table shows transaction costs allocated to each entity:

| PPL Entity | Total Transaction Costs |
|---|---|
| 1. PPL Corporation | $113,164,077 |
| 2. LG&E and KU Capital | $32,133,630 |
| 3. PPL Strategic Development | $1,262,186 |
| 4. PPL Global, LLC | $734,575 |
| 5. PPL Susquehanna LLC | $573,396 |
| 6. PPL Energy Services Holdings, LLC | $301,957 |
| 7. PPL Energy Plus, LLC | $298,902 |
| 8. PPL Generation LLC | $257,975 |
| 9. PPL Brunner Island, LLC | $222,337 |
| 10. PPL Montour LLC | $194,040 |
| **11. PPL Electric** | **$163,329** |
| **12. Louisville Gas & Electric** | **$108,981** |
| **13. Kentucky Utilities** | **$95,060** |
| 14. PPL Martins Creek, LLC | $58,814 |
| 15. PPL University Park, LLC | $24,408 |
| **Total** | **$149,593,668** |

In summary, PPL's three FPUs, KU, LG&E, and PPL Electric, were allocated approximately $367,000 in transaction-related costs, and they included approximately $329,229 of these costs in their wholesale power and transmission formula rate calculations. These costs consisted primarily of legal fees, consulting fees, wages of PPL staff in different departments, office supplies, and general and administrative expenses. These transaction-related costs included costs that were incurred before PPL filed its merger application with the Commission, during the transaction, and after the transaction was consummated. The Merger Order defines costs related to the transaction as "all transaction-related costs, not only costs related to consummating the transaction." The Merger Order also states, "If Applicants seek to recover transaction-related costs through their wholesale power or transmission rates they must submit a compliance filing that details how they are satisfying the hold harmless requirement. If Applicants seek to recover transaction-related costs in an existing formula rate that allows for such recovery, then that compliance filing must be filed in the section 205 docket in which the formula rate was approved by the Commission, as well as in the instant section 203 docket." PPL made no such filing to seek recovery for these costs.

### Recommendations

We recommend that:

26. PPL Electric, LG&E, and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.

27. PPL Electric, LG&E, and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.

28. PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under section 35.19a of the Commission's regulations for LG&E and KU.

## 8. Allowance for Funds Used During Construction

KU's method of computing AFUDC on CWIP was deficient by compounding AFUDC monthly instead of semi-annually, including unrealized losses in its common equity balance used to calculate AFUDC, and using an incorrect balance for the common equity component.

## Pertinent Guidance

AFUDC allows a company to recover its debt and equity costs used for funding construction. In Federal Power Commission's (FPC) Order No. 561, the Commission's predecessor agency, the FPC established a uniform formula for determining maximum rates to use for computing AFUDC.[24] The order states:

> The balances of long-term debt, preferred stock, and common equity for use in the formula for the current year will be the balances in such accounts at the end of the prior year; the cost rates for long-term debt and preferred stock will be the effective weighted average cost of such capital. The average short-term debt balances and related cost and the average construction work in progress balance will be estimated for the current year. We shall require, however, that public utilities and natural gas companies monitor their actual experience and adjust to actual at year-end if a significant deviation from the estimate should occur. For this purpose we shall consider a significant deviation to exist if the gross AFUDC rate exceeds by more than one-quarter of a percentage point (25 basis points) the rate that is derived from the formula by use of actual 13 monthly balances of construction work in progress and the actual weighted average cost and balances for short-term debt outstanding during the year.

On frequency of compounding of the AFUDC base, Order No. 561 states:

> We believe that a monthly compounding of AFUDC may result in excessive amounts capitalized since cash outlays for interest and dividends are not normally made on a monthly basis. We shall

[24] *Order Adopting Amendment to Uniform System of Accounts for Public Utilities and Licensees and for Natural Gas Companies*, Order No. 561, 57 FPC 608 (1977), *Order On Reh'g and Clarification*, Order 561-A, 59 FPC 1340 (1977), *further clarified*, 2 FERC ¶ 61,050 (1978).

> therefore permit compounding but no more frequently than semiannually.

18 C.F.R. pt. 101, Electric Plant Instruction 3 (17), Allowance for Funds Used During Construction, states in part:

> (a) Includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds.
>
> (b) The rates shall be determined annually. The balances for long-term debt, preferred stock and common equity shall be the actual book balances as of the end of the prior year … the short-term debt balances and related cost and the average balance for construction work in progress plus nuclear fuel in process of refinement, conversion, enrichment, and fabrication shall be estimated for the current year with appropriate adjustments as actual data becomes available.

18 C.F.R. pt. 101, General Instruction 23 (C), Accounting for Other Comprehensive Income, states:

> (c) When it is probable that an item of other comprehensive income will be included in the development of cost-of-service rates in subsequent periods, that amount of unrealized losses or gains will be recorded in Accounts 182.3 or 254 as appropriate.

## Background

AFUDC includes the net cost for the period borrowed funds were used for construction and a reasonable rate on other funds. KU recorded the balances below in Account 419.1, Allowance for Other Funds Used During Construction, and Account 432, Allowance for Borrowed Funds Used During Construction – Credit, during the audit period:

| Year | Account 419.1 | Account 432 |
|---|---|---|
| 2010 | $521,152 | $968,597 |
| 2011 | $42,662 | $12,955 |

Audit staff evaluated KU's AFUDC base and rate calculations, and the application of these calculations, to determine the accrual of AFUDC on CWIP for select construction projects. This evaluation identified several deficiencies with KU's AFUDC calculation methodology.

1. *AFUDC Compounded Monthly* – KU improperly compounded its AFUDC on a monthly basis. The Commission allows for compounding of AFUDC no more frequently than semi-annually.

2. *Unrealized Losses* – KU incorrectly included unrealized losses from Account 219, Accumulated Other Comprehensive Income (AOCI), in the common equity component of the AFUDC rate calculation. Specifically, KU recorded unrealized losses for its 20 percent ownership of Electric Energy, Inc.'s AOCI, which consisted of the unfunded portion of its pension and postretirement obligations. KU recorded Account 219 balances of ($2,854) and ($467,077) in 2010 and 2011, respectively. Accounting treatment for these unrealized losses was a debit to Account 219 and a credit to Account 123, Investment in Associated Companies (Major Only). Since these losses are unrealized and not used in determining KU's retained earnings, these amounts should not impact the amount of retained earnings used to calculate the AFUDC rate. Therefore, Account 219 should not be in the common equity component of the AFUDC calculation. However, it is appropriate for KU to include losses in determining the AFUDC rate once these amounts are realized, and enter retained earnings.

3. *Common Equity Balance* – KU input the wrong balance as the common equity component to its AFUDC calculation. For its 2010 AFUDC calculation, KU input the long-term debt amount of $1,648,779,405, instead of the common equity amount of $1,951,966,344, as found in the 2009 KU FERC Form No. 1 on line 16(c).

During the 2010 and 2011 years, KU accrued an aggregate amount of $1,545,366 in total AFUDC. Due to the above errors, this amount understated the correct actual amount, which was $1,550,647. The errors included overstatement effects of $290 and $305, due to the monthly compounding and inclusion of AOCI balance errors, respectively, offset by an understatement effect of $5,876 due to the common equity input error.

## Recommendations

We recommend that:

29. KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.

## 9. Formula Rate Line References

KU and LG&E's formula rate Attachment O included multiple inaccurate line references.

### Pertinent Guidance

Attachment O (Transmission Formula Rate) of KU and LG&E's OATT required formula rate inputs derived from FERC Form No. 1 amounts.

### Background

During our review, audit staff determined that KU and LG&E's formula rate Attachment O included multiple inaccurate line references. Specifically, audit staff identified these incorrect line references:

| Formula Rate Component | Att. O Reference | FERC Form No. 1 Line Item |
|---|---|---|
| Gross Plant in Service - Production | 206.46g | 205.46g |
| Gross Plant in Service - Transmission | 206.58g | 207.58g |
| Gross Plant in Service - Distribution | 206.75g | 207.75g |
| Gross Plant in Service - General & Intangible | 206.5g and 206.90g | 205.5g and 207.99g |
| Accumulated Depreciation - General & Intangible | 219.27c | 219.28c and 200.21c |
| Land Held For Future Use | 214xd | Must specify line number |
| Materials & Supplies | 227.8c and 227.15c | 227.8c and 227.16c |
| O&M - Transmission | 321.100b | 321.112 |
| O&M - Account 565 | 321.88b | 321.96b |
| Depreciation Expense - General | 336.10f | 336.1f and 336.10f |
| Payroll Taxes | 263i | Must specify line number |
| Highway and Vehicle Taxes | 263i | Must specify line number |
| Property Taxes | 263i | Must specify line number |
| Gross Receipts Taxes | 263i | Must specify line number |
| Other Taxes | 263i | Must specify line number |
| Wages & Salaries - Production | 354.18b | 354.20b |
| Wages & Salaries - Transmission | 354.19b | 354.21b |
| Wages & Salaries - Distribution | 354.20b | 354.23b |
| Wages & Salaries - Other | 354.21, 22, 23b | 354.24, 25, 27b |
| Proprietary Capital | 112.15d | 112.16d |
| Long term debt | 112.18c-21c | 112.18c-23c |
| Preferred Stock | 112.3d | 112.3c |
| Sales for Resale | 311xh | Must specify page/line/column |

Also, audit staff determined that KU and LG&E can improve the transparency of their formula rate calculations by better presenting all manual adjustments and purchase accounting adjustments that impact balances reported within Attachment O.

**Recommendations**

We recommend that:

30. LG&E and KU should develop and implement controls to ensure accurate and complete line references.

31. LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.

## 10. FERC Form No. 60 Reporting

FERC Form No. 60 filings that PPL Services and LKS made contained several reporting errors relating to account misclassifications, supporting schedule discrepancies, and the reporting of convenience payments.

### Pertinent Guidance

In 2006, centralized service companies became subject to the requirements of PUHCA 2005, which are incorporated into the Commission regulations in 18 C.F.R. pts. 366-369. The FERC Form No. 60 has specific reporting instructions for preparation of individual schedules and pages of the report. Regulations applicable to FERC Form No. 60 reporting by centralized service companies are:

18 C.F.R. section 366.23(a)(1), FERC Form No. 60, annual reports of centralized service companies, states, in part, "Every report must be submitted on the FERC Form No. 60 then in effect and must be prepared in accordance with the instructions incorporated into that form."

18 C.F.R. section 369(2)(ii), FERC Form No. 60, annual report of centralized service company, states in part, "The annual report in effect must be filed with the Commission as prescribed in Section 385.2011 of this chapter and as indicated in the General Instructions set out in the form, and must be properly completed and verified."

### Background

Audit staff analyzed the FERC Form No. 60 filings made by PPL's two service companies – PPL Services and LKS. This analysis identified these reporting errors:

<u>900 Series Account Misclassifications</u>

PPL Services misclassified amounts reported on its 2010 FERC Form No. 60 for Accounts 920, Administrative and General Salaries, 921, Office Supplies and Expenses, and 923, Outside Services Employed. Specifically, PPL Services over-reported Account 920 by approximately $7 million, over-reported Account 921 by approximately $5 million, and under-reported Account 923 by approximately $12 million.

<u>Accounts 457.1, Regional Transmission Service Revenues, and 457.2, Miscellaneous Revenues, Reporting</u>

In its 2010 FERC Form No. 60, which reported only November and December 2010, PPL Services reported total billings of $67,368,843 on Schedule XVII – Analysis of Billing-Associate Companies. PPL Services then provided supporting documentation for total billings for November and December 2010 that totaled $68,300,671. This resulted in a variance of $931,828.

LKS identified adjustments in February 2010 for $138,642.20 and September 2010 for $1,426,588.45 in Account 457.1. For both months, both revenue and expenses were understated.

These errors occurred for various reasons, including administrative oversight, limited review procedures, and the absence of appropriate verification procedures.

Convenience Payments

Service companies report convenience payments on Schedule V of its FERC Form No. 60. Specifically, instruction 2 of Schedule V states:

> *If the service company has provided accommodation or convenience payments for associate companies, provide in a separate footnote a listing of total payments for each associate company.*

Audit staff reviewed convenience payment data from LKS. During this review, audit staff learned that some convenience payments, amounting to $252,448, were reflected on the 2010 income statement. These payments were recorded in Account 923, and were identified as having convenience payment expenditure types in error. Also, additional expenses, amounting to $1,570, were reflected as 2010 convenience payments and should not have been. Convenience payments should be charged only to balance sheet accounts and not income statement accounts. Therefore, these amounts were recorded in error. These errors caused no financial impact as they were included in both revenue and expense on the service company's income statement.

These errors were due to human error involving misclassification and improper recording of expenses. To address them, LKS developed and implemented a procedure to determine if convenience payments had been modified to use a more detailed review of transactions to be disclosed.

**Recommendations**

We recommend that:

32. LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.

33. LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.

# V. Other Matters

## Formula Rate Recovery of Intangible Plant

KU and LG&E's formula rate under Attachment O of its joint OATT included templates for calculating rate base and cost-of-service components used to determine transmission formula rate billings. As relevant here, the Attachment O formula rate included a FERC Form No. 1 line reference for gross intangible plant in service. However, the Attachment O formula rate did not include a FERC Form No. 1 line reference for accumulated amortization related to intangible plant. Also, the Attachment O formula rate did not include a FERC Form No. 1 line reference for amortization expense of intangible plant. When KU and LG&E withdrew from MISO and began recovering their transmission revenue requirement under their joint OATT in March 2006, they adopted a formula rate that is substantially the same formula rate template in Attachment O to the MISO OATT, and carried over the same omissions related to intangible plant.

In October 2011, MISO and its transmission owners filed revisions to portions of the Attachment O formula rate, under FPA section 205**,** to clarify inclusion of intangible plant in the calculation of Attachment O revenue requirements under Docket No. ER12-297-000. The filing parties proposed to clarify the inclusion of intangible plant by adding the appropriate FERC Form No. 1 reference to intangible plant for the line item that contains accumulated depreciation on general and intangible plant. The filing parties also proposed to add the language "and Amortization" to the column heading for "Depreciation Expense" and add the language "and Intangible" to the line item for "General" depreciation and amortization expense. Finally, the filing parties proposed to add the appropriate FERC Form No. 1 reference for amortization expense of intangible plant. On December 21, 2011, the Commission accepted MISO's submittal for filing.

During audit fieldwork, audit staff pointed out that KU and LG&E's formula rate under its joint OATT continues to have omissions related to intangible plant that were identified and corrected in Docket No. ER12-297-000. Since KU and LG&E now recover their cost of service based on a formula rate substantially the same as the MISO formula rate, they should have made a filing with the Commission under FPA section 205, similar to what MISO and its transmission owners did in ER12-297-000, to address the proper recovery of intangible plant.

Specifically, in calculating the revenue requirement for the transmission formula rate, KU and LG&E included intangible plant assets recorded in Accounts 301, Organization, 302, Franchise and Consents, and 303, Miscellaneous Intangible Plant, as components of its rate base. However, KU and LG&E did not reduce any of these amounts by any related corresponding amortization recorded in Account 111, Accumulated Provision for Amortization of Electric Plant.

**Recommendation**

We recommend that:

LG&E and KU submit a filing with the Commission under FPA section 205 to adopt the revisions for intangible plant MISO proposed in Docket No. ER12-297-000 and incorporate them into KU and LG&E's formula rate template under their joint OATT.

Re: PPL Corporation, Docket No. FA12-12-000
Comments on Draft Audit Report

Dear Mr. Craig:

PPL Corporation ("PPL") appreciates this opportunity to comment on the September 11, 2014 Draft Audit Report provided to PPL by the Division of Audits and Accounting of the Office of Enforcement of the Federal Energy Regulatory Commission ("DAA") relating to an audit conducted in the above-referenced docket (the "Draft Audit Report"). PPL agrees with the findings and accepts the recommendations contained in the Draft Audit Report.

In many cases, PPL already has completed implementation or begun implementation of corrective measures related to the audit findings. Attachment A to this letter explains the corrective actions taken or planned, and provides actual or target completion dates for these actions.

PPL wishes to thank DAA personnel involved in the audit for their professionalism and courtesy.

Sincerely,

Vincent Sorgi

Attachment

**Attachment A**

## I. Draft Audit Report Section IV. Findings and Recommendation

### *1. Long-Term Investment in Subsidiary*

**Recommendation 1 - PPL Electric should provide notice of its material accounting changes to its wholesale transmission customers as required by section III.B of Attachment H-8H, Formula Rate Implementation Protocols, of its Open Access Transmission Tariff.**

Corrective Action: On May 15, 2014, PPL Electric filed its 2014 Annual Update with the Federal Energy Regulatory Commission ("Commission") in Docket No. ER09-1148 pursuant to the Formula Rate Implementation Protocols of its Open Access Transmission Tariff. The Commission publicly posted the filing on its eLibrary system the same day. Therein, PPL Electric explained that it changed its method of accounting for the activities of its subsidiary PPL Receivables Corporation from the consolidated method of accounting to the equity method of accounting in accordance with the Commission's regulations and that the changes affected PPL Electric's 2009 through 2013 Rate Years, given that the formula rate was first implemented on November 1, 2008. PPL Electric served the 2014 Annual Update on all parties to the docket on May 15, 2014, and provided a copy to its Regional Transmission Organization, PJM Interconnection, L.L.C. ("PJM") for posting on the PJM website. This action is completed.

**Recommendation 2 - PPL Electric should implement procedures to ensure that it follows the equity method of accounting for all investments in subsidiaries and ensure no deviation between accounting practices and Commission accounting regulations.**

Corrective Action 1: By November 30, 2014, PPL Electric will finalize its policy related to the differences in FERC and Securities and Exchange Commission ("SEC") reporting. Included in this policy will be a discussion of the accounting for investments in subsidiaries using the equity method of accounting and recording those investments in Account 123.1, Investment in Subsidiary Companies, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

Corrective Action 2: In December 2013, PPL Electric implemented a new methodology that involves reviewing and cataloging electric industry-wide FERC Audit Report findings to ensure that PPL Electric appropriately reflects the accounting for similar transactions identified in such audit findings. The associated database is updated quarterly.

Corrective Action 3: On November 8, 2013, PPL Corporation modified its Journal Entry policy and procedures to specifically state that the impact on rate making mechanisms be considered for all journal entries affecting the domestic regulated utilities within the PPL family of companies.

Corrective Action 4: PPL Electric, together with PPL Services, will establish enhanced senior management-level procedures for on-going communication and oversight of company analysis and implementation of FERC developments related to accounting procedures and transmission formula rate calculations. This is expected to be completed within 90 days of the issuance of a final audit report.

**Recommendation 3 - PPL Electric should adopt controls that will ensure all costs related to PPL Receivables' operating activities are excluded from all components in PPL Electric's formula rate calculation.**

Corrective Action 1: By November 30, 2014, PPL Electric will finalize its policy related to the differences in FERC and SEC reporting. Included in this policy will be a discussion of the accounting for investments in subsidiaries using the equity method of accounting and recording those investments in Account 123.1, Investment in Subsidiary Companies, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

Corrective Action 2: PPL Electric has modified its reporting of PPL Receivables in FERC Form 1 to use the equity method of accounting. PPL Electric utilizes the FERC Form 1 as the basis for its formula rate inputs. By reporting PPL Receivables using the equity method, PPL Electric will no longer include PPL Receivables' operating activities in the formula rate calculation.

**Recommendation 4 - PPL Electric should refund all costs incorrectly included in and recovered through the formula rate since its inception, with interest, calculated in accordance with the formula rate protocols approved by the Commission through the formula rate true-up process in 2014.**

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the costs to properly account for PPL Receivables Corporation using the equity versus consolidated method of accounting recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

**Recommendation 5 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.**

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

2. ***Tax Overpayments***

**Recommendation 6 - PPL Electric should reclassify federal and state income taxes recorded in Account 165, Prepayments, applicable to those years in which PPL Electric chose to receive a refund of those amounts to Account 146, Accounts Receivable from Associated Companies or Account 143, Other Accounts Receivable, as appropriate.**

Corrective Action: PPL Electric reclassified federal and state income tax overpayments to the appropriate receivable accounts for the 2011 and 2012 balance sheets and for supporting pages of the 2012 FERC Form I Restatement filed on October 29, 2013. PPL Electric also reclassified federal and state income tax overpayments to the appropriate receivable accounts for rate years 2009-2013 and refunded the reduction in the revenue requirement, with interest, that resulted from including overpayments as receivables rather than prepayments as explained in the 2014 Annual Update filed with the Commission in May 15, 2014.

**Recommendation 7 - PPL Electric should submit correcting entries to the Division of Audits and Accounting within 30 days of this report.**

Corrective Action: PPL Electric will submit correcting entries to DAA within 30 days of the date of the issuance of the final audit report.

**Recommendation 8 - PPL Electric should revise procedures to ensure its income tax transactions recorded to Account 165 represent actual prepayments.**

Corrective Action 1: PPL Electric revised procedural documentation to explain the accounting of federal and state income tax overpayments on November 25, 2013. PPL Electric also implemented an automated process that will no longer reclassify federal and state income tax overpayments to Account 165, which began with the December 31, 2013 accounting close.

Corrective Action 2: In addition, as this is an area where FERC accounting differs from SEC accounting, the policy relating to differences in FERC and SEC reporting that is referenced in Corrective Action 1 of Recommendation 2 will make reference to this issue. That policy will be completed by November 30, 2014.

**Recommendation 9 - PPL Electric should revise procedures to appropriately determine its tax accrual amount.**

Corrective Action: PPL Electric has revised its procedures to properly reclassify income tax overpayments, determined through its accrual and payment process, recorded in Account 236 to either Account 143 or Account 146. See corrective action to Recommendation 8.

**Recommendation 10 - PPL Electric should record the necessary correcting entries as of December 31 to reflect the proper accounting for Federal and state estimated tax overpayment.**

Corrective Action: PPL Electric has completed this as part of the corrective actions discussed in response to Recommendation 6 above.

**Recommendation 11 - For each year these amounts were included in the formula rate calculations, PPL Electric should refund all costs incorrectly included in and recovered through the formula rate, with interest, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.**

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the costs incorrectly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

**Recommendation 12 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to PPL Electric's wholesale transmission customers.**

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

### *3. Manufactured Gas Plant Obligations*

**Recommendation 13 - PPL Electric should amend its accounting policies to ensure manufactured gas plant remediation expenses are accounted for consistent with the Commission's accounting regulations.**

Corrective Action: As referenced in Corrective Action 1 of Recommendation 2, PPL Electric will finalize its policy related to the differences in FERC and SEC reporting by November 30, 2014. Included in this policy is a discussion of the recording of manufactured gas site remediation expenses to Account 426.5, Other Deductions, for FERC reporting purposes, consistent with the FERC's accounting guidelines.

**Recommendation 14 - PPL Electric should refrain from including manufactured gas plant remediation expenses in the formula rate determinations, since such costs were not incurred in providing service to wholesale transmission customers.**

Corrective Action: PPL Electric provided notice of its accounting change relating to Manufactured Gas Plant costs in its 2014 Annual Update filed with the Commission on May 15, 2014 and will refrain on an ongoing basis from including these costs in its formula rate determinations based on the Division of Audits and Accounting's view that such costs were not incurred in providing service to wholesale transmission customers.

**Recommendation 15 - PPL Electric should determine the amount of manufactured gas plant remediation expenses recovered through its formula rate.**

Corrective Action: In September 2014, PPL Electric provided to DAA as Attachment 19 the amount of MGP environmental remediation expenses recovered through PPL Electric's transmission formula rate.

**Recommendation 16 - For each year affected, PPL Electric should refund the manufactured gas plant remediation expense amounts improperly included and recovered through the formula rate, calculated pursuant to its formula rate protocols approved by the Commission through the formula rate true-up process in 2014.**

Corrective Action: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the manufactured gas plant remediation expenses improperly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

**Recommendation 17 - PPL Electric should file a refund report with the Commission that reflects amounts refunded to its wholesale transmission customers.**

Corrective Action: PPL Electric expects to file a refund report within 90 days of the issuance of a final audit report.

### 4. *Asset Retirement Obligation*

**Recommendation 18 - LG&E and KU should submit a filing with the Commission under FPA section 205 to address their recovery of asset retirement obligation costs.**

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing relating to the recovery of asset retirement obligations within 90 days of the issuance of a final audit report.

**Recommendation 19 - LG&E and KU should calculate the rate impact of recovering these ARO costs in the formula rate, and provide these calculations to the Division of Audits and Accounting.**

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including ARO costs, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations, including ARO costs, (through a then-current date) within 60 days following issuance of a final audit report. Thereafter, LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing rate impacts for any final or remaining period of ARO cost recovery within 60 days following effectiveness of new rates pursuant to the FPA section 205 proceeding.

**Recommendation 20 - For each year affected since the inception of their stand-alone formula rate, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to recovering asset retirement obligation costs, calculated with interest under § 35.19a of the Commission's regulations.**

Corrective Action: LG&E and KU will refund or credit to ratepayers amounts inappropriately recovered through the transmission formula rate during such period due to recovering asset retirement obligation costs with interest, and anticipate that they will do so within 30 days of each applicable final Commission order accepting the respective refund reports filed in response to Recommendation 19.

### ***5. Virginia Distribution Utility Plant Costs***

**Recommendation 21 - LG&E and KU should calculate the rate impact of recovering these costs in their stand-alone formula rate, and provide these calculations to the Division of Audits and Accounting.**

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (with interest through June 2014) regarding the consolidated anticipated audit findings, including Virginia distribution plant costs, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations, including Virginia distribution plant costs, (through a then-current date) within 60 days following issuance of a final audit report.

**Recommendation 22 - For each year these Virginia distribution utility costs were included in their stand alone formula rate calculation, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate, calculated with interest under § 35.19a of the Commission's regulations.**

Corrective Action: In connection with LG&E and KU's 2012 Annual Update for rates effective in the 2012 rate year which began on June 1, 2013 and ended on May 31, 2014, LG&E and KU corrected the inputs for Virginia plant so that costs associated with Virginia distribution utility plant no longer would flow through the formula rate. LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate during such period associated with Virginia plant distribution costs with interest and anticipate that they will do so within 30 days of each applicable final Commission order accepting the refund report filed in response to Recommendation 21.

### ***6. Accounting for Cost of Removal***

**Recommendation 23 - LG&E and KU should provide to the Division of Audits and Accounting correcting entries that show the reversal of amounts from Account 254.**

Corrective Action: As part of the August 2013 accounting close, LG&E and KU corrected their accounting entries for cost of removal. Effective with

LG&E and KU's 2013 Annual Update for rates effective in the 2013 rate year which began on June 1, 2014 and ends on May 31, 2015, LG&E and KU's formula rate no longer included rate impacts from such cost of removal accounting. LG&E and KU will file such correcting entries showing the reversal of amounts from Account 254 within 30 days of the issuance of the final audit report.

**Recommendation 24 - For each year these amounts were included in their stand-alone formula rate, LG&E and KU should refund all costs, calculated with interest under section 35.19a of Commission regulations.**

Corrective Action: LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate during such period due to cost of removal with interest and anticipate that they will do so within 30 days of each applicable final Commission order accepting the refund report filed in response to Recommendation 25.

**Recommendation 25 - LG&E and KU should file a refund report with the Commission that reflects amounts refunded to their customers.**

Corrective Action: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including cost of removal, and certain rate under-billings to the Division of Audits and Accounting. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations including cost of removal (through a then-current date) within 60 days following issuance of a final audit report.

### *7. Merger Costs*

**Recommendation 26 - PPL Electric, LG&E and KU should strengthen existing procedures so that no transaction-related costs flow through an FPU's formula rates.**

Corrective Action 1: PPL Corporation made organizational changes in 2011 to create PPL Strategic Development, LLC for the Strategic Development group, the group that coordinates merger and acquisition ("M&A") activities and bears the costs of these activities. This organizational change has made it easier to direct M&A charges to the proper business unit and thereby exclude them from the regulated entities.

Corrective Action 2: PPL Services has improved communications among the Strategic Development group, Office of General Counsel, the Financial

Department and other appropriate groups within PPL Corporation in an effort to establish proper accounting for M&A projects at the onset of such projects by:

a) Reviewing the FERC audit with budget coordinators and reemphasizing the need for stronger controls and accurate accounting for costs associated with Strategic Development acquisition and divesture activities. (completed December 2012).
b) Drafting and reviewing with budget coordinators the proposed Accounting Policy and Procedures for Costs Associated with Acquisitions and Divestures. (completed April 2014).
c) Issuing an email communication to budget coordinators instructing them how to charge transaction and transition costs related to the spinoff of PPL Corporation Supply Segment. (completed June 2014).
d) Conducting meetings with key individuals for the purpose of discussing and reviewing issues related to proper charging of PPL Corporation Supply Segment spinoff costs. (completed July and August, 2014).
e) Issuing the Accounting Policy and Procedures for Costs Associated with Acquisitions and Divestures and communicating said issuance to all budget coordinators. (completed August 2014).
f) Developing and issuing a message to all PPL Corporation supervisors to emphasize the importance of properly capturing all costs related to the spinoff of PPL Corporation Supply Segment. (completed September 2014).

<u>Corrective Action 3</u>: As of August 2014, PPL Services' Financial and Accounting Departments developed an accounting policy/procedure related to M&A activities and included it with other accounting policies and procedures on the Controller's Department Accounting Policies and Procedures intranet web site.

<u>Corrective Action 4</u>: PPL Services will include a summary of the M&A accounting policy in the Cost Allocation Manual during the next update by December 31, 2014.

<u>Corrective Action 5</u>: Commencing with LG&E and KU's 2013 Annual Update for rates effective in the 2013 rate year which began on June 1, 2014 and ends on May 31, 2015, LG&E and KU no longer included rate impacts from such transaction-related costs.

<u>Corrective Action 6</u>: During September 2013, LG&E and KU modified their Regulatory Compliance accounting policy to provide additional guidance on merger costs. Examples of merger transaction and transition costs were included in this accounting policy.

Corrective Action 7: During September 2013, LG&E and KU updated its "Merger Transaction and Transition Cost" accounting treatment guidance on the Company's intranet site with information regarding how merger transaction and transition costs are to be handled.

**Recommendation 27 - PPL Electric, LG&E and KU should calculate the rate impact of recovering transaction-related costs in their respective formula rates, and provide these calculations to the Division of Audits and Accounting.**

Corrective Action 1: In September 2014, LG&E and KU provided estimated rate impact calculations (interest through June 2014) regarding the consolidated anticipated audit findings, including transaction-related costs, and certain rate under-billings to DAA. LG&E and KU anticipate that they will provide to DAA and file with the Commission for approval a report showing updated consolidated rate impact calculations regarding transaction-related costs (through a then-current date) within 60 days following issuance of a final audit report.

Corrective Action 2: In September 2014, PPL Electric provided DAA with Attachment 1 that identifies the rate impact of recovering transaction-related costs through PPL Electric's transmission formula rate.

**Recommendation 28 - PPL Electric, LG&E and KU should refund to ratepayers amounts inappropriately recovered through the transmission formula rate due to the incorrect allocation of transaction-related costs, calculated with interest in accordance to the Commission-approved formula rate protocols for PPL Electric and under § 35.19a of the Commission's regulations for LG&E and KU.**

Corrective Action 1: LG&E and KU will refund or credit to ratepayers amounts recovered through the transmission formula rate due to such transaction-related costs, with interest, and anticipate that they will do so within 30 days of each applicable final Commission order accepting the respective refund report filed in response to Recommendation 27.

Corrective Action 2: In accordance with Section VII of PPL Electric's Formula Rate Implementation Protocols, PPL Electric refunded the transaction-related costs improperly included in and recovered through the formula rate since its inception, with interest, as detailed in its 2014 Annual Update filed on May 15, 2014 with the Commission. The changes to the revenue requirement detailed in the 2014 Annual Update took effect in the 2014 rate year, which began on June 1, 2014 and ends on May 31, 2015.

### 8. ***Allowance for Funds Used During Construction***

**Recommendation 29 - KU should revise and implement procedures going forward to ensure its AFUDC base and rate calculation is consistent with Electric Plant Instruction 3(17) and other applicable Commission requirements.**

Corrective Action 1: Beginning with the February 2012 accounting close, KU modified its PowerPlant fixed asset accounting system to properly account for AFUDC. The PowerPlant automated AFUDC calculation was updated to compound interest semiannually rather than monthly.

Corrective Action 2:
During August 2012, KU finalized modifications to its AFUDC accounting policy and procedures to record AFUDC in accordance with Electric Plant Instruction 3(17) and Federal Power Commission Order 561.

### 9. ***Formula Rate Line References***

**Recommendation 30 - LG&E and KU should develop and implement controls to ensure accurate and complete line references.**

Corrective Action: During 2012 and 2013, LG&E and KU developed and implemented, enhanced controls and procedures for the transmission formula rate template to ensure appropriate references going forward, similar to Sarbanes-Oxley–level controls. LG&E and KU strengthened spreadsheet controls on the formula rate template, such as password protection, increased automation and protection for calculations, clearly labeled input data entry, and increased internal cross-check features. LG&E and KU implemented written process documentation and a narrative for the controls describing the specific procedures and responsibilities for calculating and reviewing the transmission formula rate relating to calculation performed by its Rates Department, reviews performed by its Rates, Accounting, and Transmission Departments and sign-off at the senior management level prior to posting.

**Recommendation 31 - LG&E and KU should submit a filing with the Commission under FPA section 205 to address the incorrect formula rate line references.**

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing(s) relating to incorrect formula rate line references within 90 days of the issuance of a final audit report.

### *10. FERC Form No. 60 Reporting*

**Recommendation 32 - LKS and PPL Services should develop and implement procedures to ensure proper account classification, consistent reporting, and completion of all supporting schedules of the FERC Form No. 60. As part of these procedures, incorporate an annual review to ensure the FERC Form No. 60 filed with the Commission is complete and accurate.**

Corrective Action 1: In March 2012, during preparation for the 2012 Form 60 filing, LG&E and KU developed a query within its Oracle financial system to better identify and capture LKS intercompany transactions that should be distinguished as convenience payments. Further enhancements were made to this query throughout 2013 to improve the efficiency of the query and to reduce manual adjustments to identify the convenience payments. In January and February 2013 LG&E and KU set up additional expenditure types within Oracle to also aid in identifying convenience payments.

Corrective Action 2: In November 2012, LG&E and KU developed a document to further educate employees on the identification of convenience payments. This document, along with a decision tree, has been shared with all employees via their intranet site.

Corrective Action 3: PPL Services implemented an automated process in 2012, using delivered allocation functionality in its general ledger software. The automated process performs the reclassification among Accounts 920, 921 and 923 based on cost type. The automated process mirrors the manual reclassification journal entries reflected in the 2011 FERC Form 60. As an additional control for PPL Services, beginning in 2012, the cost types in accounts 920, 921, and 923 are reviewed on a monthly basis to ensure that amounts are appropriately classified in these accounts.

Corrective Action 4: PPL Services developed written procedures for the preparation of Form 60. Prior to the filing of the 2013 Form 60 which occurred on April 30, 2014, Corporate Audit Services reviewed the process for preparing PPL Services' Form 60, the procedures used to allocate cost in the 2013 Form 60, and the completeness and accuracy of the 2013 Form 60. Management has requested Corporate Audit Services to include a review of the Form 60 in its audit plan.

**Recommendation 33 - LKS and PPL Services should refile 2010 FERC Form No. 60, correcting all reporting errors within 90 days after this report is issued.**

Corrective Action 1: LKS will refile the 2010 FERC Form No. 60 within 90 days of the date the final audit report is issued.

Corrective Action 2: PPL Services will refile the 2010 FERC Form No. 60 within 90 days of the date the final audit report is issued.

II. **Draft Audit Report Section V. Other Matters**

***Formula Rate Recovery of Intangible Plant***

**Recommendation - LG&E and KU submit a filing with the Commission under FPA section 205 to adopt the revisions for intangible plant MISO proposed in Docket No. ER12-297-000 and incorporate them into KU and LG&E's formula rate template under their joint OATT.**

Corrective Action: LG&E and KU anticipate that they will submit the recommended FPA Section 205 filing(s) adopting revisions for intangible plant as proposed by MISO and incorporating those changes into the formula rate template under their joint OATT within 90 days of the issuance of a final audit report.

**NOT NEW ISSUES** **BOOK-ENTRY ONLY**

*On March 22, 2002, the date on which the Bonds of each series were originally issued, Bond Counsel delivered its opinion that stated that, subject to the conditions and exceptions set forth under the caption "Tax Treatment," under then current law, interest on each series of Bonds would be excludable from the gross income of the recipients thereof for federal income tax purposes, except that no opinion was expressed regarding such exclusion from gross income with respect to any Bond during any period in which it is held by a "substantial user" of the related Project or a "related person" of a substantial user as such terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "Code"). Interest on each series of Bonds will be an item of tax preference in determining alternative minimum taxable income for individuals or corporations under the Code. The alternative minimum tax has been repealed with respect to corporations for taxable years beginning after December 31, 2017. Such interest may be subject to certain federal income taxes imposed on certain corporations, including imposition of the branch profits tax on a portion of such interest. Bond Counsel was further of the opinion that interest on each series of Bonds would be excludable from the gross income of the recipients thereof for Kentucky income tax purposes and that, under then current law, principal of the Bonds would be exempt from ad valorem taxes in Kentucky. Such opinions have not been updated as of the date hereof and no continuing tax exemption opinions are expressed by Bond Counsel. However, in connection with the expiration of the current Long Term Rate Period and the change to a new Long Term Rate Period on each series of Bonds, as more fully described in this Reoffering Circular, Bond Counsel will deliver its opinions to the effect that such change for each series of Bonds (a) is authorized or permitted by the Act and the related Indenture and (b) will not adversely affect the validity of the Bonds or any exclusion of the interest thereon from the gross income of the owners of the Bonds for federal income tax purposes. See the information under the caption "Tax Treatment" in this Reoffering Circular.*

**$35,000,000**
**LOUISVILLE/JEFFERSON COUNTY METRO GOVERNMENT, KENTUCKY**
**Pollution Control Revenue Bonds,**
**2001 Series B**
**(Louisville Gas and Electric Company Project)**
**Due: November 1, 2027**
**Mandatory Purchase Date: May 3, 2021**
**Interest Payment Dates: May 1 and November 1**
**Interest Rate: 2.55%**

**$35,000,000**
**COUNTY OF TRIMBLE, KENTUCKY**
**Pollution Control Revenue Bonds,**
**2001 Series B**
**(Louisville Gas and Electric Company Project)**
**Due: November 1, 2027**
**Mandatory Purchase Date: May 3, 2021**
**Interest Payment Dates: May 1 and November 1**
**Interest Rate: 2.55%**

**Date of Change of Long Term Rate Period: May 1, 2018**

The Bonds of each issue (individually, the "Jefferson County Bonds" and the "Trimble County Bonds" and, collectively, the "Bonds") are special and limited obligations of the Louisville/Jefferson County Metro Government, Kentucky (as successor in interest to the County of Jefferson) and Trimble County, Kentucky (the "Issuers"), payable by the respective Issuers solely from and secured by payments to be received by the Issuers pursuant to separate Loan Agreements with Louisville Gas and Electric Company (the "Company"), except as payable from proceeds of such Bonds or investment earnings thereon. The Bonds do not constitute general obligations of the Issuers or a charge against the general credit or taxing powers thereof or of the Commonwealth of Kentucky or any other political subdivision of Kentucky.

Principal of, and interest on, the Bonds are further secured by the delivery to U.S. Bank National Association, as Trustee, of First Mortgage Bonds of

## LOUISVILLE GAS AND ELECTRIC COMPANY

The Bonds of each issue were originally issued on March 22, 2002 and each series currently bears interest at a Long Term Rate. Pursuant to the Indentures under which the Bonds were issued, the Company has elected to exercise its option to change the existing Long Term Rate Period on each series of Bonds to a new Long Term Rate Period, effective as of May 1, 2018 (the "Change Date"). As a result of the expiration of the current Long Term Rate Period on each series of Bonds, the Bonds are subject to mandatory purchase on the Change Date and are being reoffered hereby. Morgan Stanley & Co. LLC and PNC Capital Markets LLC will serve as Initial Co-Remarketing Agents for purposes of this reoffering of the Bonds. Following this reoffering, Morgan Stanley & Co. LLC will serve as the sole Remarketing Agent for the Bonds.

The Bonds of each issue are separate series, and the sale and delivery of one series is not dependent on the sale and delivery of the other series. The Bonds will accrue interest from the Change Date, payable on May 1 and November 1, commencing on November 1, 2018 and will be subject to mandatory purchase following this Long Term Rate Period on May 3, 2021 (the "Mandatory Purchase Date"). **Failure to pay the purchase price of a series of the Bonds on the Mandatory Purchase Date will constitute an Event of Default under the applicable Indenture (as defined herein). See the information contained under the caption "Summary of the Bonds — Mandatory Purchase of Bonds — Remarketing and Purchase of Bonds" below.** The interest rate period, interest rate and Interest Rate Mode for each series of the Bonds will be subject to change under certain conditions, in whole or in part, as described in this Reoffering Circular. Prior to the Mandatory Purchase Date, the Bonds will not be subject to optional redemption, but will be subject to extraordinary redemption and mandatory redemption following any determination of taxability prior to maturity as described under the caption "Summary of the Bonds – Redemptions."

The Bonds are registered in the name of Cede & Co., as registered owner and nominee for The Depository Trust Company ("DTC"), New York, New York. DTC will act as securities depository. Except as described in this Reoffering Circular, purchases of beneficial ownership interests in the Bonds will be made in book-entry only form in denominations of $5,000 and integral multiples thereof. Purchasers will not receive certificates representing their beneficial interest in the Bonds. See the information contained under the caption "Summary of the Bonds—Book-Entry-Only System" herein. The principal of, premium, if any, and interest on the Bonds will be paid by U.S. Bank National Association, as Trustee, to Cede & Co., as long as Cede & Co. is the registered owner of the Bonds. Disbursement of such payments to the DTC Participants is the responsibility of DTC, and disbursement of such payments to the purchasers of beneficial ownership interests is the responsibility of DTC Direct Participants and Indirect Participants, as more fully described herein.

---

**PRICE: 100%**

---

The Bonds are reoffered subject to prior sale, withdrawal or modification of the offer without notice (provided, however, that any such notice of withdrawal must be given on the Business Day prior to the Change Date) and to the approval of legality by Stoll Keenon Ogden PLLC, Louisville, Kentucky, as Bond Counsel and upon satisfaction of certain conditions. Certain legal matters will be passed upon for the Company by its counsel, Jones Day, Chicago, Illinois, and John R. Crockett III, General Counsel, Chief Compliance Officer and Corporate Secretary of the Company, and for the Remarketing Agents by their counsel, McGuireWoods LLP, Chicago, Illinois. It is expected that the Bonds will be available for redelivery to DTC in New York, New York on or about May 1, 2018.

April 24, 2018

No dealer, broker, salesman or other person has been authorized by the Issuers or either of them, the Company or the Remarketing Agents to give any information or to make any representation with respect to the Bonds, other than those contained in this Reoffering Circular, and, if given or made, such other information or representation must not be relied upon as having been authorized by any of the foregoing. The Remarketing Agents have provided the following sentence for inclusion in this Reoffering Circular. The Remarketing Agents have reviewed the information in this Reoffering Circular in accordance with, and as part of, their responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Remarketing Agents do not guarantee the accuracy or completeness of such information. The information and expressions of opinion herein are subject to change without notice and neither the delivery of this Reoffering Circular nor any sale made hereunder shall, under any circumstances, create any implication that there has been no change in the affairs of the parties referred to above since the date hereof. The information set forth herein with respect to the Issuers has been obtained from the respective Issuer, and all other information has been obtained from the Company and from other sources which are believed to be reliable, but it is not guaranteed as to accuracy or completeness by, and is not to be construed as a representation by, the Remarketing Agents.

In connection with the reoffering of the Bonds, the Remarketing Agents may over-allot or effect transactions which stabilize or maintain the market prices of the Bonds at levels above those that might otherwise prevail in the open market. Such stabilizing, if commenced, may be discontinued at any time.

IN MAKING AN INVESTMENT DECISION, INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE TERMS OF THE REOFFERING, INCLUDING THE MERITS AND RISKS INVOLVED. THESE SECURITIES HAVE NOT BEEN RECOMMENDED BY ANY FEDERAL OR STATE SECURITIES COMMISSION OR REGULATORY AUTHORITY. FURTHERMORE, THE FOREGOING AUTHORITIES HAVE NOT CONFIRMED THE ACCURACY OR DETERMINED THE ADEQUACY OF THIS DOCUMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

## INTRODUCTORY STATEMENT

This Reoffering Circular, including the cover page and Appendices, is provided to furnish information in connection with the reoffering of (i) the Louisville/Jefferson County Metro Government, Kentucky ("Jefferson County") Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project), in the aggregate principal amount of $35,000,000 (the "Jefferson County Bonds") issued pursuant to an Indenture of Trust dated as of November 1, 2001, and as amended by Supplemental Indenture No. 1 dated as of September 1, 2010 (collectively, the "Jefferson County Indenture") between Louisville/Jefferson County Metro Government, as successor in interest to the County of Jefferson, and U.S. Bank National Association, as successor trustee (the "Jefferson County Trustee"), and (ii) the County of Trimble, Kentucky ("Trimble County") Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project), in the aggregate principal amount of $35,000,000 (the "Trimble County Bonds") issued pursuant to an Indenture of Trust dated as of November 1, 2001 and as amended by Supplemental Indenture No. 1 dated as of September 1, 2010 (collectively, the "Trimble County Indenture") between Trimble County and U.S. Bank National Association, as successor trustee (the "Trimble County Trustee").

Pursuant to separate Loan Agreements by and between Louisville Gas and Electric Company (the "Company") and each of the Issuers, dated as of November 1, 2001, and as amended by Amendment No. 1 dated as of September 1, 2010 (each a "Loan Agreement" and, collectively, the "Loan Agreements"), proceeds from the sale of the Jefferson County Bonds and the Trimble County Bonds were loaned by the applicable Issuer to the Company. The Loan Agreements are separate undertakings by and between the Company and the applicable Issuer.

The proceeds of the Jefferson County Bonds were applied to pay and discharge $35,000,000 in outstanding principal amount of "County of Jefferson, Kentucky, Pollution Control Revenue Bonds, 1997 Series A (Louisville Gas and Electric Company Project)," dated November 13, 1997 (the "1997 Jefferson Bonds") on the date of issuance of the Jefferson County Bonds. The proceeds of the Trimble County Bonds were applied to pay and discharge $35,000,000 in outstanding principal amount of "County of Trimble, Kentucky, Pollution Control Revenue Bonds, 1997 Series A (Louisville Gas and Electric Company Project)," dated November 13, 1997 (the "1997 Trimble Bonds"), on the date of issuance of the Trimble County Bonds. The 1997 Jefferson Bonds and the 1997 Trimble Bonds were issued to refinance the costs of construction of, respectively, the Jefferson County Project and the Trimble County Project (each as described herein).

The Company will continue to repay each loan under the applicable Loan Agreement by making payments to the applicable Trustee in sufficient amounts to pay the principal of and interest and any premium on, and the purchase price of, the applicable series of Bonds. See "Summary of the Loan Agreement—General." Pursuant to the applicable Indenture, an Issuer's rights under the applicable Loan Agreement (other than with respect to certain indemnification and expense payments) were assigned to the applicable Trustee as security for the applicable series of Bonds.

For the purpose of further securing the Bonds of a series, the Company has issued and delivered to each of the Trustees a separate tranche of the Company's First Mortgage Bonds, Collateral Series 2010 (the "First Mortgage Bonds"). The principal amount, maturity date and interest rate (or method of determining interest rates) of each such tranche of First Mortgage Bonds are identical to the principal amount, maturity date and interest rate (or method of determining interest rates) of the related series of Bonds. The First Mortgage Bonds will only be payable, and interest thereon will only accrue, as described herein. See "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds" and "Summary of the First Mortgage Bonds and the First Mortgage Indenture." The First Mortgage Bonds will not provide a direct source of liquidity to pay the purchase price of Bonds of a series tendered for purchase in accordance with the applicable Indenture.

The First Mortgage Bonds have been issued under, and are secured by, an Indenture, dated as of October 1, 2010, as supplemented by a supplemental indenture dated as of October 15, 2010 relating to the Bonds (the "Supplemental Indenture"), (the Indenture, as so supplemented, the "First Mortgage Indenture"), between the Company and The Bank of New York Mellon, as trustee (the "First Mortgage Trustee").

The Company is a wholly-owned subsidiary of LG&E and KU Energy LLC and an indirect wholly-owned subsidiary of PPL Corporation. The Company's obligations under the Loan Agreements are solely its own, and not those of any of its affiliates. None of PPL Corporation or the Company's other affiliates will be obligated to make any payments due under the Loan Agreements or First Mortgage Bonds or any other payments of principal, interest, premium or purchase price of the Bonds.

The Company has elected to exercise its option to change the existing Long Term Rate Period for the Bonds to a new Long Term Rate Period commencing on the Change Date. On the Mandatory Purchase Date of May 3, 2021, each series of Bonds may be subsequently converted to a new Interest Rate Mode or the Long Term Rate Period for each series of Bonds may be changed at its expiration to a new Long Term Rate Period. ***This Reoffering Circular pertains only to the Bonds during such period of time that they bear interest at the Long Term Rate established on the Change Date of May 1, 2018. In the event of a remarketing of the Bonds on or after the Mandatory Purchase Date, a supplement to this Reoffering Circular or a new reoffering circular will be prepared to describe the new terms and provisions then applicable to the Bonds.***

The Bonds are special and limited obligations of the respective Issuer and the respective Issuer's obligation to pay the principal of and interest and any premium on, and purchase price of, its respective series of Bonds is limited solely to the revenues and other amounts received by the Trustee under the applicable Indenture pursuant to the applicable Loan Agreement and amounts payable under the applicable First Mortgage Bonds. The Bonds will not constitute an indebtedness, general obligation or pledge of the faith and credit or taxing power of the respective Issuer, the Commonwealth of Kentucky or any political subdivision thereof.

Morgan Stanley & Co. LLC and PNC Capital Markets LLC (each, a "Remarketing Agent" and collectively, the "Remarketing Agents") will be appointed under the Indenture to serve as Initial Co-Remarketing Agents for purposes of this reoffering of the Bonds. Following this reoffering, Morgan Stanley & Co. LLC will serve as the sole Remarketing Agent for the Bonds. Any Remarketing Agent may resign or be removed and a successor Remarketing Agent may be appointed in accordance with the terms of the Indenture and the Remarketing Agreement for the Bonds between such Remarketing Agent and the Company.

Brief descriptions of the Company, the Issuers, the Bonds, the Loan Agreements, the Indentures and the First Mortgage Bonds (including the First Mortgage Indenture) are included in this Reoffering Circular. Such descriptions and information do not purport to be complete, comprehensive or definitive and are not to be construed as a representation or a guaranty of accuracy or completeness. All references herein to the documents are qualified in their entirety by reference to such documents, and references herein to a series of Bonds are qualified in their entirety by reference to the definitive form thereof included in the applicable Indenture. Copies of the Loan Agreements and the Indentures will be available for inspection at the principal corporate trust office of the Trustee. The First Mortgage Indenture (including the forms of the First Mortgage Bonds) is available for inspection at the office of the Company in Louisville, Kentucky, and at the corporate trust office of the First Mortgage Trustee in New York, New York. Certain information relating to The Depository Trust Company ("DTC") and the book-entry-only system has been furnished by DTC. Appendix A to this Reoffering Circular and all information contained under the heading The Projects" has been furnished by the Company. The Issuers and Bond Counsel assume no responsibility for the accuracy or completeness of such Appendix A or such information. Appendix B to this Reoffering Circular contains the opinions of Bond Counsel delivered in connection with the initial issuance and delivery of the Bonds and the proposed forms of opinion of Bond Counsel to be delivered in connection with the change in the Long Term Rate Period on the Bonds.

## THE ISSUERS

Each Issuer is a public body corporate and politic duly created and existing as a county and political subdivision under the Constitution and laws of the Commonwealth of Kentucky. Each Issuer is authorized by Section 103.200 to 103.285, inclusive, and, with respect to Jefferson County, Chapter 67C, of the Kentucky Revised Statutes (collectively, the "Act") to (i) convert and reoffer the respective series of Bonds and (ii) continue to perform its obligations under the Loan Agreements and the Indentures. The Issuers, through their respective legislative bodies, the Metro Government Legislative Council or Fiscal Court, have adopted one or more ordinances authorizing the issuance of the Bonds and the execution and delivery of the related documents.

THE BONDS OF EACH ISSUE ARE SPECIAL AND LIMITED OBLIGATIONS PAYABLE SOLELY AND ONLY FROM CERTAIN SOURCES, INCLUDING AMOUNTS TO BE RECEIVED BY OR ON BEHALF OF THE APPLICABLE ISSUER UNDER THE APPLICABLE LOAN AGREEMENT AND OTHER AMOUNTS RECEIVED FROM PAYMENTS MADE UNDER THE APPLICABLE FIRST MORTGAGE BONDS. THE BONDS OF EACH ISSUE WILL NOT CONSTITUTE AN INDEBTEDNESS, GENERAL OBLIGATION OR PLEDGE OF THE FAITH AND CREDIT OR TAXING POWER OF THE RESPECTIVE ISSUER, THE COMMONWEALTH OF KENTUCKY OR ANY POLITICAL

SUBDIVISION THEREOF, AND WILL NOT GIVE RISE TO A PECUNIARY LIABILITY OF THE RESPECTIVE ISSUER OR A CHARGE AGAINST ITS GENERAL CREDIT OR TAXING POWERS.

## THE PROJECTS

### Jefferson County Project

The Jefferson County Project has been completed and consists of certain air pollution control facilities completed in connection with the Mill Creek and Cane Run Stations of the Company situated in Jefferson County, Kentucky. Major components of the Jefferson County Project include the acquisition, construction, installation and equipping of major reconstructions, and modifications for the sulphur dioxide removal systems serving seven generating units at the two generating stations.

The Department for Natural Resources and Environmental Protection of the Commonwealth of Kentucky and the Air Pollution Control District of Jefferson County, Kentucky, the agencies exercising jurisdiction with respect to the Jefferson County Project, have previously certified that the Jefferson County Project, as designed, was in furtherance of the purposes of controlling atmospheric pollutants or contaminants.

The Company has retired all coal units at the Cane Run Station, including units that include components that are part of the Jefferson County Project.

### Trimble County Project

The Trimble County Project has been completed and consists of certain air and water pollution control and solid waste disposal facilities in connection with Unit 1 of the Trimble County Station situated in Trimble County, Kentucky. Major components of the Project include electrostatic precipitators to capture flyash and particulate emissions from the Unit 1 steam-boilers; sulphur dioxide removal systems (scrubbers) to remove sulphur dioxide from flue gases; water pollution control and solid waste disposal facilities, including retention basins, sludge and ash ponds for the receipt of sludge wastes produced by sulphur dioxide removal facilities and by electrostatic precipitators as well as bottom ash; both exterior and interior systems for the collection and transmission to treatment and neutralization facilities of polluted liquids, including coal pile liquid runoffs and fuel oil and other chemical spills; a natural draft cooling tower for the abatement of thermal pollution to the interstate stream (Ohio River); and facilities for the reception, transportation, preparation and holding of reactant chemicals and materials used in sulphur dioxide removal systems, which facilities are functionally related and subordinate to such sulphur dioxide removal systems.

The Department for Natural Resources and Environmental Protection of the Commonwealth of Kentucky, the agency exercising jurisdiction with respect to the Trimble County Project, has previously certified that the Trimble County Project, as designed, was in furtherance of the purposes of controlling atmospheric pollutants or contaminants and water pollution.

## SEPARATE SERIES

The Jefferson County Bonds and the Trimble County Bonds will be paid from payments made by or on behalf of the Company, will have substantially the same claim to such source of funds and are treated for federal income tax purposes as a single issue of obligations. However, the Jefferson County Bonds and the Trimble County Bonds are separate series and optional or mandatory redemption of either the Jefferson County Bonds or the Trimble County Bonds may be made in the manner described below without the redemption of the other series. Similarly, a default under one of the series of Bonds or Loan Agreements will not necessarily constitute a default under the other series of Bonds or Loan Agreement. Each series of Bonds can bear interest at an Interest Rate Mode different from the Interest Rate Mode borne by the other series of Bonds. Each series of Bonds is separately secured by a separate tranche of First Mortgage Bonds. Unless specifically otherwise noted, the following discussion under the captions "Summary of the Bonds," "Summary of the Loan Agreement," "Summary of the Indenture," "Summary of the First Mortgage Bonds and the First Mortgage Indenture," "Enforceability of Remedies," "Tax Treatment" and "Continuing Disclosure" applies equally, but separately, to the Jefferson County Bonds and the Trimble County Bonds.

As used under such captions with respect to the Jefferson County Bonds, the term "Issuer" shall mean Jefferson County, the term "Project" shall mean the Jefferson County Project, the term "Generating Station" shall mean the Mill Creek Station or the Cane Run Station, the term "Bonds" shall mean the Jefferson County Bonds, the term "First Mortgage Bonds" shall mean the related tranche of First Mortgage Bonds, the term "1997 Bonds" shall mean the 1997 Jefferson Bonds, the term "Loan Agreement" shall mean the Loan Agreement pursuant to which Jefferson County loaned the proceeds from the sale of the Jefferson County Bonds to the Company, the term "Indenture" shall mean the Jefferson County Indenture, and the term "Trustee" shall mean the Jefferson County Trustee.

As used under such captions with respect to the Trimble County Bonds, the term "Issuer" shall mean Trimble County, the term "Project" shall mean the Trimble County Project, the term "Generating Station" shall mean the Trimble County Station, the term "Bonds" shall mean the Trimble County Bonds, the term "First Mortgage Bonds" shall mean the related tranche of First Mortgage Bonds, the term "1997 Bonds" shall mean the 1997 Trimble Bonds, the term, "Loan Agreement" shall mean the Loan Agreement pursuant to which Trimble County loaned the proceeds from the sale of the Trimble County Bonds to the Company, the term "Indenture" shall mean the Trimble County Indenture, and the term "Trustee" shall mean the Trimble County Trustee.

## SUMMARY OF THE BONDS

### General

The Bonds will be reoffered in the aggregate principal amount set forth on the cover page of this Reoffering Circular and will mature on November 1, 2027. The Bonds are also subject to redemption prior to maturity as described herein.

The Bonds currently bear interest at a Long Term Rate to and including April 30, 2018. Pursuant to the terms and provisions of the Indentures summarized below, the Company has exercised its option, effective on the Change Date, to change the existing Long Term Rate Period to a new Long Term Rate Period. The Jefferson County Bonds will bear interest at the Long Term Rate of 2.55% per annum from May 1, 2018 and, following the expiration of this new Long Term Rate Period, will be subject to mandatory purchase on the Mandatory Purchase Date of May 3, 2021. The Trimble County Bonds will bear interest at the Long Term Rate of 2.55% per annum from May 1, 2018 and, following the expiration of this new Long Term Rate Period, will be subject to mandatory purchase on the Mandatory Purchase Date of May 3, 2021. Interest on the Bonds is payable on each May 1 and November 1, commencing November 1, 2018 (unless any such interest payment date is not a Business Day, in which case interest will be paid on the next succeeding Business Day), to the persons who are the registered owners of the Bonds as of the Record Date preceding such interest payment date.

The Bonds will continue to bear interest at a Long Term Rate until a Conversion to another Interest Rate Mode is specified by the Company or until the redemption or maturity of the Bonds. Also, following the new Long Term Rate Period, the Company may elect to change the Long Term Rate Period to a different Long Term Rate Period. The permitted Interest Rate Modes for the Bonds are (i) the "Flexible Rate," (ii) the "Daily Rate," (iii) the "Weekly Rate," (iv) the "Semi-Annual Rate," (v) the "Annual Rate," (vi) the "Long Term Rate" and (vii) the "Dutch Auction Rate."

This Reoffering Circular pertains only to the Bonds during such period of time that they bear interest at the Long Term Rate established on the Change Date of May 1, 2018. In the event of a remarketing of the Bonds on or after the Mandatory Purchase Date, a supplement to this Reoffering Circular or a new reoffering circular will be prepared describing the new terms and provisions then applicable to such Bonds.

Interest on the Bonds will be computed on the basis of a 360-day year of twelve 30-day months. Interest payable on any Interest Payment Date will be payable to the registered owner of the Bond as of the Record Date for such payment. The Record Date will be the close of business on the fifteenth day (whether or not a Business Day) of the month preceding each Interest Payment Date.

The Bonds have been issued solely in book-entry-only form through DTC (or its nominee, Cede & Co.). So long as the Bonds are held in the book-entry-only system, DTC or its nominee will be the registered owner or holder of the Bonds for all purposes of the Indenture, the Bonds and this Reoffering Circular. See " — Book-Entry-Only System" below. Individual purchases of book-entry interests in the Bonds will be made in book-entry-only form in denominations of $5,000 and integral multiples thereof.

Except as otherwise described below for Bonds held in DTC's book-entry-only system, the principal or redemption price of the Bonds is payable at the designated corporate trust office in New York, New York, of the Trustee, as paying agent (the "Paying Agent"). Except as otherwise described below for Bonds held in DTC's book-entry-only system, interest on the Bonds is payable by check mailed to the owner of record; provided that interest payable on each Bond will be payable in immediately available funds by wire transfer within the continental United States or by deposit into a bank account maintained with the Paying Agent at the written request of any owner of record holding at least $1,000,000 aggregate principal amount of the Bonds, received by the Trustee, as bond registrar (the "Bond Registrar"), at least one Business Day prior to any Record Date.

Bonds may be transferred or exchanged for an equal total amount of Bonds of other authorized denominations upon surrender of such Bonds at the principal office of the Bond Registrar, accompanied by a written instrument of transfer or authorization for exchange in form and with guaranty of signature satisfactory to the Bond Registrar, duly executed by the registered owner or the owner's duly authorized attorney. Except as provided in the Indenture, the Bond Registrar will not be required to register the transfer or exchange of any Bond (i) during the fifteen days before any mailing of a notice of redemption of Bonds, (ii) after such Bond has been called for redemption or (iii) which has been purchased (see "— Mandatory Purchase of Bonds — Payment of Purchase Price" below). Registration of transfers and exchanges will be made without charge to the registered owners of Bonds, except that the Bond Registrar may require any registered owner requesting registration of transfer or exchange to pay any required tax or governmental charge.

**Security**

Payment of the principal of and interest and any premium on the Bonds is secured by an assignment by the Issuer to the Trustee of the Issuer's interest in and to the Loan Agreement and all payments to be made pursuant thereto (other than certain indemnification and expense payments). Pursuant to the Loan Agreement, the Company has agreed to pay, among other things, amounts sufficient to pay the aggregate principal amount of and premium, if any, on the Bonds, together with interest thereon as and when the same become due. The Company further has agreed to make payments of the purchase price of the Bonds tendered for purchase to the extent that funds are not otherwise available therefor under the provisions of the Indenture.

The payment of the principal of and interest and any premium on the Bonds is further secured by a separate tranche of the Company's First Mortgage Bonds issued under the First Mortgage Indenture between the Company and the First Mortgage Trustee. The principal amount of the First Mortgage Bonds equals the principal amount of the Bonds. If the Bonds become immediately due and payable as a result of a default in payment of the principal of, premium, if any, or interest on the Bonds, or a default in payment of the purchase price of such Bonds, due to an event of default under the Loan Agreement and upon receipt by the First Mortgage Trustee of a written demand from the Trustee for redemption of the First Mortgage Bonds ("Redemption Demand"), or if all first mortgage bonds outstanding under the First

Mortgage Indenture shall have been immediately due and payable, such First Mortgage Bonds will bear interest at the same interest rate or rates borne by the Bonds and the principal of such First Mortgage Bonds, together with interest accrued thereon from the last date or dates to which interest on the Bonds has been paid in full, will be payable in accordance with the Supplemental Indenture. See "Summary of the First Mortgage Bonds and the First Mortgage Indenture."

The First Mortgage Bonds are not intended to provide a direct source of liquidity to pay the purchase price of Bonds tendered for purchase in accordance with the Indenture. The First Mortgage Bonds are secured by a lien on certain property owned by the Company. In certain circumstances, the Company is permitted to reduce the aggregate principal amount of its First Mortgage Bonds held by the Trustee, but in no event to an amount lower than the aggregate outstanding principal amount of the Bonds.

**Tender Agent**

Owners will be required to tender their Bonds to the Tender Agent for purchase at the times and in the manner described herein under "— Mandatory Purchase of Bonds." So long as the Bonds are held in DTC's book-entry-only system, the Trustee will act as Tender Agent under the Indenture. Any successor Tender Agent appointed pursuant to the Indenture will also be a Paying Agent.

**Remarketing Agents**

Morgan Stanley & Co. LLC and PNC Capital Markets LLC will serve as Initial Co-Remarketing Agents for purposes of this reoffering of the Bonds. Following this reoffering, Morgan Stanley & Co. LLC will serve as the sole Remarketing Agent for the Bonds. The Remarketing Agent may be removed by the Issuer, if so directed by the Company, upon seven days' notice, and may resign in accordance with the Remarketing Agreement upon sixty days' notice.

**Certain Definitions**

As used herein, each of the following terms will have the meaning indicated:

"*Beneficial Owner*" means the person in whose name a Bond is recorded as such upon the systems of DTC and each DTC Participant or the registered holder of such Bonds if such Bond is not then registered in the name of CEDE & Co.

"*Business Day*" means any day other than (i) a Saturday or Sunday or legal holiday or a day on which banking institutions in the city in which the principal office of the Trustee, the Bond Registrar, the Tender Agent, the Paying Agent, the Company or the Remarketing Agent are located are authorized by law or executive order to close or (ii) a day on which the New York Stock Exchange is closed.

"*Conversion*" means any conversion from time to time in accordance with the terms of the Indenture of the Bonds from one Interest Rate Mode to another Interest Rate Mode.

"*Interest Payment Date*" means each May 1 and November 1 and also the day following the end of the Long Term Rate Period.

"*Interest Period*" means the period from and including each Interest Payment Date to and including the day immediately preceding the next Interest Payment Date, provided, however that the first Interest Period for the Bonds will begin on (and include) the date of issuance of the Bonds and the final Interest Period will end on October 31, 2027.

"*Interest Rate Mode*" means the Flexible Rate, the Daily Rate, the Weekly Rate, the Semi-Annual Rate, the Annual Rate, the Long Term Rate and the Dutch Auction Rate.

"*Long Term Rate Period*" means any period established by the Company and beginning on, and including, the date of Conversion to the Long Term Rate and ending on, and including, the day preceding the last Interest Payment Date for such period and, thereafter, each successive period of the same duration as the Long Term Rate Period previously established until the day preceding the earliest of the change to a different Long Term Rate Period, the Conversion to a different Interest Rate Mode or the maturity of the Bonds.

**Mandatory Purchase of Bonds**

***General.*** The Bonds will be subject to mandatory purchase on the Mandatory Purchase Date at a purchase price equal to the principal amount thereof plus accrued and unpaid interest. Notice to owners of Bonds subject to such mandatory purchase will be given by the Bond Registrar by first class mail at least 30 days prior the Mandatory Purchase Date. The notice of mandatory purchase will state those matters required to be set forth therein under the Indenture.

***Remarketing and Purchase of Bonds.*** The Indenture provides that, subject to the terms of a Remarketing Agreement with the Company, unless otherwise instructed by the Company, the Remarketing Agent will use its commercially reasonable best efforts to remarket Bonds purchased on the Mandatory Purchase Date. Each such sale will be at a price equal to the principal amount thereof, plus interest accrued to the date of sale. The Remarketing Agent, the Trustee, the Paying Agent, the Bond Registrar or the Tender Agent each may purchase any Bonds offered for sale for its own account.

The purchase price of Bonds tendered for purchase will be paid by the Tender Agent from moneys derived from the remarketing of such Bonds by the Remarketing Agent and, if such remarketing proceeds are insufficient, from moneys made available by the Company. The Company is obligated to purchase any Bonds tendered for purchase to the extent such Bonds have not been remarketed. Any such purchases by the Company will not result in the extinguishment of the purchased Bonds. The Company currently maintains lines of credit or other liquidity facilities in amounts determined by it to be sufficient to meet its current needs and expects to continue to maintain such lines of credit or other liquidity facilities from time to time to the extent determined by it to be necessary to meet its then-current needs. The Trustee, any Paying Agent, the Tender Agent and the owners of the Bonds have no right to draw under any line of credit or other liquidity facility maintained by the Company. There is no provision in the Indenture or the Loan Agreement requiring the Company to maintain such financing arrangements which may be discontinued at any time without notice. The First Mortgage Bonds are not intended to provide a direct source of liquidity to pay the purchase price of Bonds tendered for purchase pursuant to the Indenture.

Any deficiency in purchase price payments resulting from the Remarketing Agent's failure to deliver remarketing proceeds of all Bonds with respect to which the Remarketing Agent notified the Tender Agent were remarketed will not result in an Event of Default under the Indenture until the opening of business on the next succeeding Business Day unless the Company fails to provide sufficient funds to pay such purchase price by the opening of business on such next succeeding Business Day. If sufficient funds are not available for the purchase of all tendered Bonds, no purchase of Bonds will be consummated, but failure to consummate such purchase will not be deemed to be an Event of Default under the Indenture if sufficient funds have been provided in a timely manner by the Company to the Tender Agent for such purpose.

***Payment of Purchase Price.*** Payment of the purchase price of any Bond will be payable on the Mandatory Purchase Date upon delivery of such Bond to the Tender Agent on such Mandatory Purchase Date; provided that such Bond must be delivered to the Tender Agent at or prior to 11:00 a.m. (New York City time). When a book-entry-only system is in effect, the requirement for physical delivery of the Bonds will be deemed satisfied when the ownership rights in the Bonds are transferred by Direct Participants on the records of DTC to the participant account of the Tender Agent. If the Mandatory Purchase Date is not a Business Day, the purchase price will be payable on the next succeeding Business Day.

Any Bond delivered for payment of the purchase price must be accompanied by an instrument of transfer thereof in form satisfactory to the Tender Agent executed in blank by the registered owner thereof and with all signatures guaranteed. The Tender Agent may refuse to accept delivery of any Bond for which an instrument of transfer satisfactory to it has not been provided and has no obligation to pay the purchase price of such Bond until a satisfactory instrument is delivered.

If the registered owner of any Bond (or portion thereof) that is subject to purchase pursuant to the Indenture fails to deliver such Bond with an appropriate instrument of transfer to the Tender Agent for purchase on the Mandatory Purchase Date, and if the Tender Agent is in receipt of the purchase price therefor, such Bond (or portion thereof) nevertheless will be deemed purchased on the Mandatory Purchase Date. Any owner who so fails to deliver such Bond for purchase on (or before) the Mandatory Purchase Date will have no further rights thereunder, except the right to receive the purchase price thereof from those moneys deposited with the Tender Agent in the Purchase Fund pursuant to the Indenture upon presentation and surrender of such Bond to the Tender Agent properly endorsed for transfer in blank with all signatures guaranteed.

**Redemptions**

***Optional Redemption.*** Except as described below under the subheadings "--- Extraordinary Optional Redemption in Whole" and "--- Extraordinary Optional Redemption in Whole or in Part," the Bonds are not subject to optional redemption prior to the Mandatory Purchase Date.

***Extraordinary Optional Redemption in Whole.*** The Bonds may be redeemed by the Issuer in whole at any time at 100% of the principal amount thereof plus accrued interest to the redemption date upon the exercise by the Company of an option under the Loan Agreement to prepay the loan if any of the following events shall have occurred within 180 days preceding the giving of written notice by the Company to the Trustee of such election:

(i) if the Project or a portion thereof or other property of the Company in connection with which the Project is used has been damaged or destroyed to such an extent so as, in the judgment of the Company, to render the Project or such other property of the Company in connection with which the Project is used unsatisfactory to the Company for its intended use, and such condition continues for a period of six months;

(ii) there has occurred condemnation of all or substantially all of the Project or the taking by eminent domain of such use or control of the Project or other property of the Company in connection with which the Project is used so as, in the judgment of the Company, to render the Project or such other property of the Company unsatisfactory to the Company for its intended use;

(iii) the Loan Agreement has become void or unenforceable or impossible of performance by reason of any changes in the Constitution of the Commonwealth of Kentucky or the Constitution of the United States of America or by reason of legislative or administrative action (whether state of federal) or any final decree, judgment or order of any court or administrative body, whether state or federal; or

(iv) a final order or decree of any court or administrative body after the issuance of the Bonds requires the Company to cease a substantial part of its operation at the Generating Station where any of the Project is located to such extent that the Company will be prevented from carrying on its normal operations at such Generating Station for a period of six months.

As a result of a Company Letter Agreement between the Issuer and the Company, dated as of December 15, 2014, and as to be extended pursuant to a notice dated as of April 30, 2018, the Company will agree that it will not, prior to the Mandatory Purchase Date, exercise the rights under the Loan Agreement it would otherwise have to redeem the Bonds under the following circumstances:

(i) if in the judgment of the Company, unreasonable burdens or excessive liabilities have been imposed upon the Company after the issuance of the Bonds with respect to the Project or the operation thereof, including without limitation federal, state or other ad valorem property, income or other taxes not imposed on the date the Bonds are issued, other than ad valorem taxes levied upon privately owned property used for the same general purpose as the Project; or

(ii) in the event changes, which the Company cannot reasonably control, in the economic availability of materials, supplies, labor, equipment or other properties or things necessary for the efficient operation of the Generating Station where any of the Project is located have occurred, which, in the judgment of the Company, render the continued operation of such Generating Station or any generating unit at such station uneconomical; or changes in circumstances after the issuance of the Bonds, including but not limited to changes in clean air or other air and water pollution control requirements or solid waste disposal requirements, have occurred such that the Company determines that use of the Project is no longer required or desirable.

***Extraordinary Optional Redemption in Whole or in Part.*** The Bonds are also subject to redemption in whole or in part at 100% of the principal amount thereof plus accrued interest to the redemption date at the option of the Company in an amount not to exceed the net proceeds received from insurance or any condemnation award received by the Issuer, the Company or the First Mortgage Trustee in the event of damage, destruction or condemnation of all or a portion of the Project, subject to receipt of an opinion of Bond Counsel that such redemption will not adversely affect the exclusion of interest on any of the Bonds from gross income for federal income tax purposes. See "Summary of the Loan Agreement — Maintenance; Damage, Destruction and Condemnation."

***Mandatory Redemption; Determination of Taxability.*** The Bonds are required to be redeemed by the Issuer, in whole, or in such part as described below, at a redemption price equal to 100% of the principal amount thereof, without redemption premium, plus accrued interest, if any, to the redemption date, within 180 days following a "Determination of Taxability." As used herein, a "Determination of Taxability" means the receipt by the Trustee of written notice from a current or former registered owner of a Bond or from the Company or the Issuer of (i) the issuance of a published or private ruling or a technical advice memorandum by the Internal Revenue Service in which the Company participated or has been given the opportunity to participate, and which ruling or memorandum the Company, in its discretion, does not contest or from which no further right of administrative or judicial review or appeal exists, or (ii) a final determination from which no further right of appeal exists of any court of competent jurisdiction in the United States in a proceeding in which the Company has participated or has been a party, or has been given the opportunity to participate or be a party, in each case, to the effect that as a result of a failure by the Company to perform or observe any covenant or agreement or the inaccuracy of any representation contained in the Loan Agreement or any other agreement or certificate delivered in connection with the Bonds, the interest on the Bonds is included in the gross income of the owners thereof for federal income tax purposes, other than with respect to a person who is a "substantial user" of the Project or a "related person" of a substantial user within the meaning of Section 147 of Internal Revenue Code of 1986, as amended (the "Code"); provided, however, that no such Determination of Taxability shall be considered to exist as a result of the Trustee receiving notice from a current or former registered owner of a Bond or from the Issuer unless (i) the Issuer or the registered owner or former registered owner of the Bond involved in such proceeding or action (A) gives the Company and the Trustee prompt notice of the commencement thereof, and (B) (if the Company agrees to pay all expenses in connection therewith) offers the Company the opportunity to control unconditionally the defense thereof, and (ii) either (A) the Company does not agree within 30 days of receipt of such offer to pay such expenses and liabilities and to control such defense, or (B) the Company shall exhaust or choose not to exhaust all available proceedings for the contest, review, appeal or rehearing of such decree, judgment or action which the Company determines to be appropriate. No Determination of Taxability described above will result from the inclusion of interest on any Bond in the computation of minimum or indirect taxes. All of the Bonds are required to be redeemed upon a Determination of Taxability as described above unless, in the opinion of Bond Counsel, redemption of a portion of such Bonds would have the result that interest payable on the remaining Bonds outstanding after the redemption would not be so included in any such gross income.

In the event any of the Issuer, the Company or the Trustee has been put on notice or becomes aware of the existence or pendency of any inquiry, audit or other proceedings relating to the Bonds being conducted by the Internal Revenue Service, the party so put on notice is required to give immediate written notice to the other parties of such matters. Promptly upon learning of the occurrence of a Determination of Taxability (whether or not the same is being contested), or any of the events described above, the Company is required to give notice thereof to the Trustee and the Issuer.

If the Internal Revenue Service or a court of competent jurisdiction determines that the interest paid or to be paid on any Bond (except to a "substantial user" of the Project or a "related person" of a substantial user within the meaning of Section 147(a) of the Code) is or was includable in the gross income of the recipient for federal income tax purposes for reasons other than as a result of a failure by the Company to perform or observe any of its covenants, agreements or representations in the Loan Agreement or any other agreement or certificate delivered in connection therewith, the Bonds are not subject to redemption. In such circumstances, Bondholders would continue to hold their Bonds, receiving principal and interest at the applicable rate as and when due, but would be required to include such interest payments in gross income for federal income tax purposes. Also, if the lien of the Indenture is discharged or defeased prior to the occurrence of a final Determination of Taxability, Bonds will not be redeemed as described herein.

***General Redemption Terms.*** Notice of redemption will be given by mailing a redemption notice by first class mail to the registered owners of the Bonds to be redeemed not less than 30 days but not more than 45 days prior to the redemption date. Any notice mailed as provided in the Indenture will be conclusively presumed to have been given, irrespective of whether the owner receives the notice. Failure to give any such notice by mailing or any defect therein in respect of any Bond will not affect the validity of any proceedings for the redemption of any other Bond. No further interest will accrue on the principal of any Bond called for redemption after the redemption date if funds sufficient for such redemption have been deposited with the Paying Agent as of the redemption date. So long as the Bonds are held in book-entry-only form, all redemption notices will be sent only to Cede & Co.

**Conversion of Interest Rate Modes**

The Interest Rate Mode for the Bonds is subject to Conversion from time to time, including on the Mandatory Purchase Date following the end of the new Long Term Rate Period, at the option of the Company in accordance with the terms of the Indenture, upon notice from the Bond Registrar to the registered owners of the Bonds. With any notice of Conversion, the Company must also deliver to the Bond Registrar an opinion of Bond Counsel stating that such Conversion is authorized or permitted by the Act and is authorized by the Indenture and will not adversely affect the exclusion from gross income of interest on the Bonds for federal income tax purposes.

**Book-Entry-Only System**

*Portions of the following information concerning DTC and DTC's book-entry-only system have been obtained from DTC. The Issuer, the Company and the Remarketing Agents make no representation as to the accuracy of such information.*

Initially, DTC will act as securities depository for the Bonds and the Bonds initially will be issued solely in book-entry-only form to be held under DTC's book-entry-only system, registered in the name of Cede & Co. (DTC's partnership nominee). One fully registered bond in the aggregate principal amount of the Bonds will be deposited with DTC.

DTC is a limited-purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934 (the "Exchange Act"). DTC holds and provides asset servicing of U.S. and non-U.S. equity, corporate and municipal debt issues, and money market instruments that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants" and, together with "Direct Participants," "Participants"). The DTC Rules applicable to its Participants are on file with the SEC. More information about DTC can be found at www.dtcc.com.

Purchases of the Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the Bonds on DTC's records. The ownership interest of each actual purchaser of each Bond ("Beneficial Owner") is, in turn, to be recorded on the Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners, however, are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Bonds are to be accomplished by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Bonds, except in the event that use of the book-entry-only system for the Bonds is discontinued.

To facilitate subsequent transfers, all Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. or such other name as may be requested by an authorized representative of DTC. The deposit of Bonds with DTC and their registration in the name of Cede & Co. or such other nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such Bonds are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption notices will be sent to DTC. If less than all of the Bonds within an issue are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Bonds unless authorized by a Direct Participant in accordance with DTC's Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the Issuer as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Principal and interest payments on the Bonds will be made to Cede & Co. or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts, upon DTC's receipt of funds and corresponding detail information from the Issuer or the Trustee on the payable date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC nor its nominee, the Trustee, the Company or the Issuer, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the Issuer or the Trustee, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

A Beneficial Owner will effect delivery of purchased Bonds by causing the Direct Participant to transfer the Participant's interest in the Bonds on DTC's records to the Tender Agent. The requirement for physical delivery of Bonds in connection with a mandatory purchase will be deemed satisfied when the ownership rights in the Bonds are transferred by Direct Participants on DTC's records and followed by a book-entry credit of tendered Bonds to the Tender Agent's DTC account.

DTC may discontinue providing its services as securities depository with respect to the Bonds at any time by giving reasonable notice to the Issuer, the Company, the Tender Agent and the Trustee. The Issuer, at the request of the Company, may decide to discontinue use of the system of book-entry-only transfers through DTC (or a successor securities depository for the Bonds). Under such circumstances, in the event that a successor securities depository is not obtained, bond certificates are required to be printed and delivered as described in the Indenture (see "— Revision of Book -Entry-Only System; Replacement Bonds" below). The Beneficial Owner, upon registration of certificates held in the Beneficial Owner's name, will become the registered owner of the Bonds.

So long as Cede & Co. is the registered owner of the Bonds, as nominee of DTC, references herein to the registered owners of the Bonds will mean Cede & Co. and will not mean the Beneficial Owners. Under the Indenture, payments made by the Trustee to DTC or its nominee will satisfy the Issuer's obligations under the Indenture and the Company's obligations under the Loan Agreement and the First Mortgage Bonds, to the extent of the payments so made. Beneficial Owners will not be, and will not be considered by the Issuer or the Trustee to be, and will not have any rights as, owners of Bonds under the Indenture.

The Trustee and the Issuer, so long as a book-entry-only system is used for the Bonds, will send any notice of redemption or of proposed document amendments requiring consent of registered owners and any other notices required by the document (including notices of Conversion and mandatory purchase) to be sent to registered owners only to DTC (or any successor securities depository) or its nominee. Any failure of DTC to advise any Direct Participant, or of any Direct Participant or Indirect Participant to notify the Beneficial Owner, of any such notice and its content or effect will not affect the validity of the redemption of the Bonds called for redemption, the document amendment, the Conversion, the mandatory purchase or any other action premised on that notice.

The Issuer, the Company, the Trustee and the Remarketing Agents cannot and do not give any assurances that DTC will distribute payments on the Bonds made to DTC or its nominee as the registered owner or any redemption or other notices, to the Participants, or that the Participants or others will distribute such payments or notices to the Beneficial Owners, or that they will do so on a timely basis, or that DTC will serve and act in the manner described in this Reoffering Circular.

THE ISSUER, THE COMPANY, THE REMARKETING AGENTS AND THE TRUSTEE WILL HAVE NO RESPONSIBILITY OR OBLIGATION TO ANY DIRECT PARTICIPANT, INDIRECT PARTICIPANT OR ANY BENEFICIAL OWNER OR ANY OTHER PERSON NOT SHOWN ON THE REGISTRATION BOOKS OF THE TRUSTEE AS BEING A REGISTERED OWNER WITH RESPECT TO: (1) THE ACCURACY OF ANY RECORDS MAINTAINED BY DTC OR ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT; (2) THE PAYMENT OF ANY AMOUNT DUE BY DTC TO ANY DIRECT PARTICIPANT OR BY ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT TO ANY BENEFICIAL OWNER IN RESPECT OF THE PRINCIPAL AMOUNT OR REDEMPTION OR PURCHASE PRICE OF OR INTEREST ON THE BONDS; (3) THE DELIVERY OF ANY NOTICE BY DTC TO ANY DIRECT PARTICIPANT OR BY ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT TO ANY BENEFICIAL OWNER WHICH IS REQUIRED OR PERMITTED TO BE GIVEN TO REGISTERED OWNERS UNDER THE TERMS OF THE INDENTURE; (4) THE SELECTION OF THE BENEFICIAL

OWNERS TO RECEIVE PAYMENT IN THE EVENT OF ANY PARTIAL REDEMPTION OF THE BONDS; OR (5) ANY CONSENT GIVEN OR OTHER ACTION TAKEN BY DTC AS REGISTERED OWNER.

***Revision of Book-Entry-Only System; Replacement Bonds***. In the event that DTC determines not to continue as securities depository or is removed by the Issuer, at the direction of the Company, as securities depository, the Issuer, at the direction of the Company, may appoint a successor securities depository reasonably acceptable to the Trustee. If the Issuer does not or is unable to appoint a successor securities depository, the Issuer will issue and the Trustee will authenticate and deliver fully registered Bonds, in authorized denominations, to the assignees of DTC or their nominees.

In the event that the book-entry-only system is discontinued, the following provisions will apply. The Bonds may be issued in denominations of $5,000 and integral multiples thereof. Bonds may be transferred or exchanged for an equal total amount of Bonds of other authorized denominations upon surrender of such Bonds at the principal office of the Bond Registrar, accompanied by a written instrument of transfer or authorization for exchange in form and with guaranty of signature satisfactory to the Bond Registrar, duly executed by the registered owner or the registered owner's duly authorized attorney. Except as provided in the Indenture, the Bond Registrar will not be required to register the transfer or exchange of any Bond during the fifteen days before any mailing of a notice of redemption, after such Bond has been called for redemption in whole or in part, or after such Bond has been tendered or deemed tendered for mandatory purchase as described under "— Mandatory Purchase of Bonds." Registration of transfers and exchanges will be made without charge to the registered owners of Bonds, except that the Bond Registrar may require any registered owner requesting registration of transfer or exchange to pay any required tax or governmental charge.

## SUMMARY OF THE LOAN AGREEMENT

*The following, in addition to the provisions contained elsewhere in this Reoffering Circular, is a brief description of certain provisions of the Loan Agreement. Reference is made to the Loan Agreement for the detailed provisions thereof.*

### General

The term of the Loan Agreement commenced as of its date and will end on the earliest to occur of November 1, 2027, or the date on which all of the Bonds shall have been fully paid or provision has been made for such payment pursuant to the Indenture. See "Summary of the Indenture — Discharge of Indenture."

The Company has agreed to repay the loan pursuant to the Loan Agreement by making timely payments to the Trustee in sufficient amounts to pay the principal of, premium, if any, and interest required to be paid on the Bonds on each date upon which any such payments are due. The Company has also agreed to pay (a) the reasonable fees and expenses of the Trustee, the Bond Registrar, any Tender Agent and any Paying Agent appointed under the Indenture, (b) the expenses in connection with any redemption of the Bonds and (c) the reasonable expenses of the Issuer.

The Company covenants and agrees with the Issuer that it will cause the purchase of tendered Bonds that are not remarketed in accordance with the Indenture and, to that end, the Company shall cause funds to be made available to the Tender Agent at the times and in the manner required to effect such purchases in accordance with the Indenture (see "Summary of the Bonds — Mandatory Purchase of Bonds — Remarketing and Purchase of Bonds").

All payments to be made by the Company to the Issuer pursuant to the Loan Agreement (except the reasonable out-of-pocket expenses of the Issuer, the Trustee, the Paying Agent, the Bond Registrar, the Tender Agent and amounts related to indemnification) have been assigned by the Issuer to the Trustee, and the Company will pay such amounts directly to the Trustee. The obligations of the Company to make the payments pursuant to the Loan Agreement are absolute and unconditional.

**Maintenance of Tax Exemption**

The Company and the Issuer have agreed not to take any action that would result in the interest paid on the Bonds being included in gross income of any Bondholder (other than a holder who is a "substantial user" of the Project or a "related person" within the meaning of Section 147(a) of the Code) for federal income tax purposes or that adversely affects the validity of the Bonds.

**Issuance and Delivery of First Mortgage Bonds**

For the purpose of providing security for the Bonds, the Company has executed and delivered to the Trustee the First Mortgage Bonds. The principal amount of the First Mortgage Bonds executed and delivered to the Trustee equals the aggregate principal amount of the Bonds. If the Bonds become immediately due and payable as a result of a default in payment of the principal of, premium, if any, or interest on the Bonds, or a default in payment of the purchase price of such Bonds, due to an event of default under the Loan Agreement and upon receipt by the First Mortgage Trustee of a Redemption Demand, or if all first mortgage bonds outstanding under the First Mortgage Indenture shall have been immediately due and payable, such First Mortgage Bonds will bear interest at the same interest rate or rates borne by the Bonds and the principal of such First Mortgage Bonds, together with interest accrued thereon from the last date to which interest on the Bonds shall have been paid in full, will then be payable. See, however, "Summary of the Indenture — Waiver of Events of Default."

Upon payment of the principal of, premium, if any, and interest on any of the Bonds, and the surrender to and cancellation thereof by the Trustee, or upon provision for the payment thereof having been made in accordance with the Indenture, First Mortgage Bonds with corresponding principal amounts equal to the aggregate principal amount of the Bonds so surrendered and canceled or for the payment of which provision has been made, will be surrendered by the Trustee to the First Mortgage Trustee and will be canceled by the First Mortgage Trustee. The First Mortgage Bonds are registered in the name of the Trustee and are nontransferable, except to effect transfers to any successor trustee under the Indenture.

**Payment of Taxes**

The Company has agreed to pay certain taxes and other governmental charges that may be lawfully assessed, levied or charged against or with respect to the Project (see, however, subparagraph (i) under "Summary of the Bonds — Redemptions — *Extraordinary Optional Redemption in Whole*"). The Company may contest such taxes or other governmental charges unless the security provided by the Indenture would be materially endangered.

**Maintenance; Damage, Destruction and Condemnation**

So long as any Bonds are outstanding, the Company will maintain the Project or cause the Project to be maintained in good working condition and will make or cause to be made all proper repairs, replacements and renewals necessary to continue to constitute the Project as air and water pollution control and abatement facilities and solid waste disposal facilities, as applicable, under Section 103(b)(4)(E) and (F) of the Internal Revenue Code of 1954, as amended. However, the Company will have no obligation to maintain, repair, replace or renew any portion of the Project, the maintenance, repair, replacement or renewal of which becomes uneconomical to the Company because of certain events, including damage or destruction by a cause not within the Company's control, condemnation of the Project, change in government standards and regulations, economic or other obsolescence or termination of operation of generating facilities to the Project.

The Company, at its own expense, may remodel the Project or make substitutions, modifications and improvements to the Project as it deems desirable, which remodeling, substitutions, modifications and improvements shall be deemed, under the terms of the Loan Agreement to be a part of the Project. The Company may not, however, change or alter the basic nature of the Project or cause it to lose its status under Section 103(b) (4) (E) and (F) of the Internal Revenue Code of 1954, as amended.

If, prior to the payment of all Bonds outstanding, the Project or any portion thereof is destroyed, damaged or taken by the exercise of the power of eminent domain and the Issuer, the Company or the First Mortgage Trustee receives net proceeds from insurance or a condemnation award in connection therewith, the Company shall (i) cause such net proceeds to be used to repair or restore the Project or (ii) take any other action, including the redemption of the Bonds in whole or in part at their principal amount, which, by the opinion of Bond Counsel, will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes. See "Summary of the Bonds — Redemptions — Extraordinary Optional Redemption in Whole or in Part."

**Insurance**

The Company has agreed to insure the Project in accordance with the provisions of the First Mortgage Indenture.

**Assignment, Merger and Release of Obligations of the Company**

The Company may assign the Loan Agreement, pursuant to an opinion of Bond Counsel that such assignment will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes, without obtaining the consent of either the Issuer or the Trustee. Such assignment, however, shall not relieve the Company from primary liability for any of its obligations under the Loan Agreement and performance and observance of the other covenants and agreements to be performed by the Company. The Company may dispose of all or substantially all of its assets or consolidate with or merge into another corporation, provided the acquirer of the Company's assets or the corporation with which it shall consolidate with or merge into shall be a corporation organized and existing under the laws of one of the states of the United States of America, shall be qualified and admitted to do business in the Commonwealth of Kentucky, and shall assume in writing all of the obligations of the Company under the Loan Agreement.

**Release and Indemnification Covenant**

The Company will indemnify and hold the Issuer harmless against any expense or liability incurred, including attorneys' fees, resulting from any loss or damage to property or any injury to or death of any person occurring on or about or resulting from any defect in the Project or from any action commenced in connection with the financing thereof.

**Events of Default**

Each of the following events constitutes an "event of default" under the Loan Agreement:

(1) failure by the Company to pay the amounts required for payment of the principal of, including purchase price for tendered Bonds and redemption and acceleration prices, and interest accrued, on the Bonds, at the times specified therein taking into account any periods of grace provided in the Indenture and the Bonds for the applicable payment of interest on the Bonds (see "Summary of the Indenture — Defaults and Remedies");

(2) failure by the Company to observe and perform any covenant, condition or agreement, other than as referred to in paragraph (1) above, for a period of thirty days after written notice by the Issuer or Trustee, provided, however, that if such failure is capable of being corrected, but cannot be corrected in such 30-day period, it will not constitute an event of default under the Loan Agreement if corrective action with respect thereto is being diligently pursued;

(3) all first mortgage bonds outstanding under the First Mortgage Indenture, if not already due, shall have become immediately due and payable, whether by declaration or otherwise, and such acceleration shall not have been rescinded by the First Mortgage Trustee;

(4) certain events of bankruptcy, dissolution, liquidation, reorganization or insolvency of the Company; or

(5) the occurrence of an event of default under the Indenture.

Under the Loan Agreement, certain of the Company's obligations (other than the Company's obligations, among others, (i) not to permit any action which would result in interest paid on the Bonds being included in gross income for federal and Kentucky income taxes, (ii) to maintain its corporate existence and good standing, and to neither dispose of all or substantially all of its assets or consolidate with or merge into another corporation unless certain provisions of the Loan Agreement are satisfied; and (iii) to make loan payments and certain other payments under the provisions of the Loan Agreement) may be suspended if by reason of force majeure (as defined in the Loan Agreement) the Company is unable to carry out such obligations.

**Remedies**

Upon the happening of an event of default under the Loan Agreement, the Trustee, on behalf of the Issuer, may, among other things, take whatever action at law or in equity may appear necessary or desirable to collect the amounts then due and thereafter to become due, or to enforce performance and observance of any obligation, agreement or covenant of the Company, under the Loan Agreement, including any remedies available in respect of the First Mortgage Bonds.

Upon the happening of an event of default under the Loan Agreement that results in an event of a default in payment of the principal of, premium, if any, or interest on the Bonds or a default in the payment of the purchase price of the Bonds tendered for purchase, and the acceleration of the maturity date of the Bonds (to the extent not already due and payable) as a consequence of such event of default, the Trustee may demand redemption of the First Mortgage Bonds. See "Summary of the First Mortgage Bonds and the First Mortgage Indenture" and "Summary of the Indenture — Defaults and Remedies." Any amounts collected upon the happening of any such event of default will be applied in accordance with the Indenture or, if the Bonds have been fully paid (or provision for payment thereof has been made in accordance with the Indenture) and all other liabilities of the Company accrued under the Indenture and the Loan Agreement have been paid or satisfied, made available to the Company.

**Options to Prepay, Obligation to Prepay**

The Company may prepay the loan pursuant to the Loan Agreement, in whole or in part, on certain dates, at the prepayment prices as shown under the captions "Summary of the Bonds — Redemptions — Optional Redemption," "Extraordinary Optional Redemption in Whole" and "Extraordinary Optional Redemption in Whole or in Part." Upon the occurrence of the event described under the caption "Summary of the Bonds — Redemptions — Mandatory Redemption; Determination of Taxability," the Company shall be obligated to prepay the loan in an aggregate amount sufficient to redeem the required principal amount of the Bonds.

In each instance, the loan prepayment price shall be a sum sufficient, together with other funds deposited with the Trustee and available for such purpose, to redeem the requisite amount of the Bonds at a price equal to the applicable redemption price plus accrued interest to the redemption date, and to pay all reasonable and necessary fees and expenses of the Trustee, the Paying Agent and all other liabilities of the Company under the Loan Agreement accrued to the redemption date.

**Amendments and Modifications**

No amendment or modification of the Loan Agreement is permissible without the written consent of the Trustee. The Issuer and the Trustee may, however, without the consent of or notice to any Bondholders, enter into any amendment or modification of the Loan Agreement (i) which may be required by the provisions of the Loan Agreement or the Indenture, (ii) for the purpose of curing any ambiguity or formal defect or omission, (iii) in connection with any modification or change necessary to conform the Loan Agreement with changes and modifications in the Indenture or (iv) in connection with any other change which, in the judgment of the Trustee, does not adversely affect the Trustee or the Bondholders. Except for such amendments, the Loan Agreement may be amended or modified only with the consent of the Bondholders holding a majority in principal amount of the Bonds then outstanding (see "Summary of the Indenture — Supplemental Indentures" for an explanation of the procedures necessary for Bondholder consent); provided, however, that the approval of the Bondholders holding 100% in principal amount of the Bonds then outstanding is necessary to effectuate an amendment or modification with respect to the Loan Agreement of the type described in clauses (i) through (iv) of the first sentence of the second paragraph of "Summary of the Indenture — Supplemental Indentures."

## SUMMARY OF THE FIRST MORTGAGE BONDS AND THE FIRST MORTGAGE INDENTURE

*The following, in addition to the provisions contained elsewhere in this Reoffering Circular, is a brief description of certain provisions of the First Mortgage Bonds and the First Mortgage Indenture. Reference is made to the First Mortgage Indenture and to the form of the First Mortgage Bonds for the detailed provisions thereof.*

**General**

The First Mortgage Bonds, in a principal amount equal to the principal amount of the Bonds, were issued as a new tranche from a new series of first mortgage bonds under the First Mortgage Indenture (see "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds"). The statements herein made (being for the most part summaries of certain provisions of the First Mortgage Indenture) are subject to the detailed provisions of the First Mortgage Indenture, which is incorporated herein by this reference. Words or phrases italicized are defined in the First Mortgage Indenture.

The First Mortgage Bonds will mature on the same date and bear interest at the same rate or rates as the Bonds; however, the principal of and interest on the First Mortgage Bonds will not be payable other than upon the occurrence of an event of default under the Loan Agreement. If the Bonds become immediately due and payable as a result of the occurrence of an event of default under the Loan Agreement that has resulted in a default in payment of the principal of, premium, if any, or interest on the Bonds, or a default in payment of the purchase price of any such Bonds tendered for purchase, and the maturity date of the Bonds has been accelerated (to the extent the Bonds are not already due and payable) as a consequence of such event of default, and if all first mortgage bonds outstanding under the First Mortgage Indenture shall not have become immediately due and payable following an event of default under the First Mortgage

Indenture, the Company will be obligated to redeem the First Mortgage Bonds upon receipt by the First Mortgage Trustee of a Redemption Demand from the Trustee for redemption, at a redemption price equal to the principal amount thereof plus accrued interest at the rates borne by the Bonds from the last date to which interest on the Bonds has been paid.

The First Mortgage Bonds at all times will be in fully registered form registered in the name of the Trustee, will be non-negotiable, and will be nontransferable except to any successor trustee under the Indenture. Upon payment and cancellation of Bonds by the Trustee or the Paying Agent (other than any Bond or portion thereof that was canceled by the Trustee or the Paying Agent and for which one or more Bonds were delivered and authenticated pursuant to the Indenture), whether at maturity, by redemption or otherwise, or upon provision for the payment of the Bonds having been made in accordance with the Indenture, an equal principal amount of First Mortgage Bonds will be deemed fully paid and the obligations of the Company thereunder will cease.

**Security; Lien of the First Mortgage Indenture**

***General.*** Except as described below under this heading and under "— Issuance of Additional First Mortgage Bonds," and subject to the exceptions described under "— Satisfaction and Discharge," all first mortgage bonds issued under the First Mortgage Indenture, including the First Mortgage Bonds, will be secured, equally and ratably, by the lien of the First Mortgage Indenture, which constitutes, subject to *permitted liens* and exclusions as described below, a first mortgage lien on substantially all of the Company's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage, transportation and distribution of natural gas (other than property duly released from the lien of the First Mortgage Indenture in accordance with the provisions thereof and other than *excepted property*, as described below). Property that is subject to the lien of the First Mortgage Indenture is referred to below as "Mortgaged Property."

The Company may obtain the release of property from the lien of the First Mortgage Indenture from time to time, upon the bases provided for such release in the First Mortgage Indenture. See "— Release of Property."

The Company may enter into supplemental indentures with the First Mortgage Trustee, without the consent of the holders of the first mortgage bonds, in order to subject additional property (including property that would otherwise be excepted from such lien) to the lien of the First Mortgage Indenture. This property would constitute *property additions* and would be available as a basis for the issuance of additional first mortgage bonds. See "— Issuance of Additional First Mortgage Bonds."

The First Mortgage Indenture provides that after-acquired property (other than *excepted property*) will be subject to the lien of the First Mortgage Indenture. However, in the case of consolidation or merger (whether or not the Company is the surviving company) or transfer of the Mortgaged Property as or substantially as an entirety, the First Mortgage Indenture will not be required to be a lien upon any of the properties either owned or subsequently acquired by the successor company except properties acquired from the Company in or as a result of such transfer, as well as improvements, extensions and additions (as defined in the First Mortgage Indenture) to such properties and renewals, replacements and substitutions of or for any part or parts thereof. See "— Consolidation, Merger and Conveyance of Assets as an Entirety."

***Excepted Property.*** The lien of the First Mortgage Indenture does not cover, among other things, the following types of property: property located outside of Kentucky and not specifically subjected or required to be subjected to the lien of the First Mortgage Indenture; property not used by the Company in its electric generation, transmission and distribution business or its natural gas storage, transportation and distribution business; cash and securities not paid, deposited or held under the First Mortgage Indenture or required so to be; contracts, leases and other agreements of all kinds, contract rights, bills, notes and other instruments, revenues, accounts receivable, claims, demands and judgments; governmental and other licenses, permits, franchises, consents and allowances; intellectual property rights and other general intangibles; vehicles, movable equipment, aircraft and vessels; all goods, stock in trade, wares, merchandise and inventory held for the purpose of sale or lease in the ordinary course of business; materials, supplies, inventory and other personal property consumable in the operation of the Company's business; fuel; tools and equipment; furniture and furnishings; computers and data processing, telecommunications and other facilities used primarily for administrative or clerical purposes or otherwise not used in connection with the operation or maintenance of electric generation, transmission and distribution facilities or natural gas storage, transportation and distribution facilities; coal, ore, gas, oil and other minerals and timber rights; electric energy and capacity, gas, steam, water and other products generated, produced, manufactured, purchased or otherwise acquired; real property and facilities used primarily for the production or gathering of natural gas; property which has been released from the lien of the First Mortgage Indenture; and leasehold interests. Property of the Company not covered by the lien of the First Mortgage Indenture is referred to herein as excepted property. Properties held by any of the Company's subsidiaries, as well as properties leased from others, would not be subject to the lien of the First Mortgage Indenture.

***Permitted Liens.*** The lien of the First Mortgage Indenture is subject to permitted liens described in the First Mortgage Indenture. Such *permitted liens* include liens existing at the execution date of the First Mortgage Indenture, purchase money liens and other liens placed or otherwise existing on property acquired by the Company after the execution date of the First Mortgage Indenture at the time the Company acquires it, tax liens and other governmental charges which are not delinquent or which are being contested in good faith, mechanics', construction and materialmen's liens, certain judgment liens, easements, reservations and rights of others (including governmental entities) in, and defects of title to, the Company's property, certain leases and leasehold interests, liens to secure public obligations, rights of others to take minerals, timber, electric energy or capacity, gas, water, steam or other products produced by the Company or by others on the Company's property, rights and interests of persons other than the Company arising out of agreements relating to the common ownership or joint use of property, and liens on the interests of such persons in such property and liens which have been bonded or for which other security arrangements have been made.

The First Mortgage Indenture also provides that the First Mortgage Trustee will have a lien, prior to the lien on behalf of the holders of the first mortgage bonds, including the First Mortgage Bonds, upon the Mortgaged Property as security for the Company's payment of its reasonable compensation and expenses and for indemnity against certain liabilities. Any such lien would be a *permitted lien* under the First Mortgage Indenture.

**Issuance of Additional First Mortgage Bonds**

The maximum principal amount of first mortgage bonds that may be authenticated and delivered under the First Mortgage Indenture is subject to the issuance restrictions described below; provided, however, that the maximum principal amount of first mortgage bonds outstanding at any one time shall not exceed One Quintillion Dollars ($1,000,000,000,000,000,000), which amount may be changed by supplemental indenture. As of December 31, 2017, first mortgage bonds in an aggregate principal amount of $1,624,200,000 were outstanding under the First Mortgage Indenture, of which $539,200,000 were issued to secure the Company's payment obligations with respect to its outstanding pollution control and environmental facilities revenue bonds, including the Bonds.

First mortgage bonds of any series may be issued from time to time on the basis of, and in an aggregate principal amount not exceeding:

- 66 2/3% of the *cost* or *fair value* to the Company (whichever is less) of *property additions* (as described below) which do not constitute *funded property* (generally, *property additions* which have been made the basis of the authentication and delivery of first mortgage bonds, the release of Mortgaged Property or the withdrawal of cash, which have been substituted for retired *funded property* or which have been used for other specified purposes) after certain deductions and additions, primarily including adjustments to offset property retirements;

- the aggregate principal amount of *retired securities* (as described below); or

- an amount of cash deposited with the First Mortgage Trustee.

*Property additions* generally include any property which is owned by the Company and is subject to the lien of the First Mortgage Indenture except (with certain exceptions) goodwill, going concern value rights or intangible property, or any property the acquisition or construction of which is properly chargeable to one of the Company's operating expense accounts in accordance with U.S. generally accepted accounting principles.

*Retired securities* means, generally, first mortgage bonds which are no longer outstanding under the First Mortgage Indenture, which have not been retired by the application of *funded cash* and which have not been used as the basis for the authentication and delivery of first mortgage bonds, the release of property or the withdrawal of cash.

At December 31, 2017, approximately $1.77 billion of property additions and $285 million of retired securities were available to be used as the basis for the authentication and delivery of first mortgage bonds.

**Release of Property**

Unless an *event of default* has occurred and is continuing, the Company may obtain the release from the lien of the First Mortgage Indenture of any Mortgaged Property, except for cash held by the First Mortgage Trustee, upon delivery to the First Mortgage Trustee of an amount in cash equal to the amount, if any, by which sixty-six and two-thirds percent (66-2/3%) of the cost of the property to be released (or, if less, the *fair value* to the Company of such property at the time it became *funded property*) exceeds the aggregate of:

- an amount equal to 66 2/3% of the aggregate principal amount of obligations secured by *purchase money liens* upon the property to be released and delivered to the First Mortgage Trustee;
- an amount equal to 66 2/3% of the *cost* or *fair value* to the Company (whichever is less) of certified *property additions* not constituting *funded property* after certain deductions and additions, primarily including adjustments to offset property retirements (except that such adjustments need not be made if such *property additions* were acquired or made within the 90-day period preceding the release);
- the aggregate principal amount of first mortgage bonds the Company would be entitled to issue on the basis of *retired securities* (with such entitlement being waived by operation of such release);
- the aggregate principal amount of first mortgage bonds delivered to the First Mortgage Trustee (with such first mortgage bonds to be canceled by the First Mortgage Trustee);
- any amount of cash and/or an amount equal to 66 2/3% of the aggregate principal amount of obligations secured by *purchase money liens* upon the property released that is delivered to the trustee or other holder of a lien prior to the lien of the First Mortgage Indenture, subject to certain limitations described in the First Mortgage Indenture; and
- any taxes and expenses incidental to any sale, exchange, dedication or other disposition of the property to be released.

As used in the First Mortgage Indenture, the term *purchase money* lien means, generally, a lien on the property being released which is retained by the transferor of such property or granted to one or more other persons in connection with the transfer or release thereof, or granted to or held by a trustee or agent for any such persons, and may include liens which cover property in addition to the property being released and/or which secure indebtedness in addition to indebtedness to the transferor of such property.

Unless an *event of default* has occurred and is continuing, property which is not *funded property* may generally be released from the lien of the First Mortgage Indenture without depositing any cash or property with the First Mortgage Trustee as long as (a) the aggregate amount of *cost* or *fair value* to the Company (whichever is less) of all *property additions* which do not constitute *funded property* (excluding the property to be released) after certain deductions and additions, primarily including adjustments to offset property retirements, is not less than zero or (b) the cost or *fair value* (whichever is less) of property to be released does not exceed the aggregate amount of the cost or fair value to the Company (whichever is less) of *property additions* acquired or made within the 90-day period preceding the release.

The First Mortgage Indenture provides simplified procedures for the release of minor properties and property taken by eminent domain and provides for dispositions of certain obsolete property and grants or surrender of certain rights without any release or consent by the First Mortgage Trustee.

If the Company retains any interest in any property released from the lien of the First Mortgage Indenture, the First Mortgage Indenture will not become a lien on such property or such interest therein or any improvements, extensions or additions to such property or renewals, replacements or substitutions of or for such property or any part or parts thereof.

**Withdrawal of Cash**

Unless an *event of default* has occurred and is continuing, and subject to certain limitations, cash held by the First Mortgage Trustee may, generally, (1) be withdrawn by the Company (a) to the extent of sixty-six and two-thirds percent (66-2/3%) of the cost or *fair value* to the Company (whichever is less) of *property additions* not constituting *funded property*, after certain deductions and additions, primarily including adjustments to offset retirements (except that such adjustments need not be made if such *property additions* were acquired or made within the 90-day period preceding the withdrawal) or (b) in an amount equal to the aggregate principal amount of first mortgage bonds that the Company would be entitled to issue on the basis of *retired securities* (with the entitlement to such issuance being waived by operation of such withdrawal) or (c) in an amount equal to the aggregate principal amount of any outstanding first mortgage bonds delivered to the First Mortgage Trustee; or (2) upon the Company's request, be applied to (a) the purchase of first mortgage bonds in a manner and at a price approved by the Company or (b) the payment (or provision for payment) at stated maturity of any first mortgage bonds or the redemption (or provision for payment) of any first mortgage bonds which are redeemable; provided, however, that cash deposited with the First Mortgage Trustee as the basis for the authentication and delivery of first mortgage bonds may, in addition, be withdrawn in an amount not exceeding the aggregate principal amount of cash delivered to the First Mortgage Trustee for such purpose.

**Events of Default**

An "*event of default*" occurs under the First Mortgage Indenture if

- the Company does not pay any interest on any first mortgage bonds within 30 days of the due date;

- the Company does not pay principal or premium, if any, on any first mortgage bonds on the due date;

- the Company remains in breach of any other covenant (excluding covenants specifically dealt with elsewhere in this section) in respect of any first mortgage bonds for 90 days after the Company receives a written notice of default stating the Company is in breach and requiring remedy of the breach; the notice must be sent by either the First Mortgage Trustee or holders of 25% of the principal amount of outstanding first mortgage bonds; the First Mortgage Trustee or such holders can agree to extend the 90-day period and such an agreement to extend will be automatically deemed to occur if the Company initiates corrective action within such 90 day period and the Company is diligently pursuing such action to correct the default; or

- the Company files for bankruptcy or certain other events in bankruptcy, insolvency, receivership or reorganization occur.

**Remedies**

***Acceleration of Maturity.*** If an event of default occurs and is continuing, then either the First Mortgage Trustee or the holders of not less than 25% in principal amount of the outstanding first mortgage bonds may declare the principal amount of all of the first mortgage bonds to be due and payable immediately.

***Rescission of Acceleration.*** After the declaration of acceleration has been made and before the First Mortgage Trustee has obtained a judgment or decree for payment of the money due, such declaration and its consequences will be rescinded and annulled, if

- the Company pays or deposits with the First Mortgage Trustee a sum sufficient to pay:
  - all overdue interest;
  - the principal of and premium, if any, which have become due otherwise than by such declaration of acceleration and interest thereon;
  - interest on overdue interest to the extent lawful; and
  - all amounts due to the First Mortgage Trustee under the First Mortgage Indenture; and
- all *events of default*, other than the nonpayment of the principal which has become due solely by such declaration of acceleration, have been cured or waived as provided in the First Mortgage Indenture.

For more information as to waiver of defaults, see "— Waiver of Default and of Compliance" below.

***Appointment of Receiver and Other Remedies.*** Subject to the First Mortgage Indenture, under certain circumstances and to the extent permitted by law, if an *event of default* occurs and is continuing, the First Mortgage Trustee has the power to appoint a receiver of the Mortgaged Property, and is entitled to all other remedies available to mortgagees and secured parties under the Uniform Commercial Code or any other applicable law.

***Control by Holders; Limitations.*** Subject to the First Mortgage Indenture, if an *event of default* occurs and is continuing, the holders of a majority in principal amount of the outstanding first mortgage bonds will have the right to

- direct the time, method and place of conducting any proceeding for any remedy available to the First Mortgage Trustee, or
- exercise any trust or power conferred on the First Mortgage Trustee.

The rights of holders to make direction are subject to the following limitations:

- the holders' directions may not conflict with any law or the First Mortgage Indenture; and
- the holders' directions may not involve the First Mortgage Trustee in personal liability where the First Mortgage Trustee believes indemnity is not adequate.

The First Mortgage Trustee may also take any other action it deems proper which is not inconsistent with the holders' direction.

In addition, the First Mortgage Indenture provides that no holder of any first mortgage bond will have any right to institute any proceeding, judicial or otherwise, with respect to the First Mortgage Indenture for the appointment of a receiver or for any other remedy thereunder unless

- that holder has previously given the First Mortgage Trustee written notice of a continuing *event of default*;
- the holders of 25% in aggregate principal amount of the outstanding first mortgage bonds have made written request to the First Mortgage Trustee to institute proceedings in respect of that *event of default* and have offered the First Mortgage Trustee reasonable indemnity against costs, expenses and liabilities incurred in complying with such request; and
- for 60 days after receipt of such notice, request and offer of indemnity, the First Mortgage Trustee has failed to institute any such proceeding and no direction inconsistent with such request has been given to the First Mortgage Trustee during such 60-day period by the holders of a majority in aggregate principal amount of outstanding first mortgage bonds.

Furthermore, no holder of first mortgage bonds will be entitled to institute any such action if and to the extent that such action would disturb or prejudice the rights of other holders of first mortgage bonds.

However, each holder of first mortgage bonds has an absolute and unconditional right to receive payment when due and to bring a suit to enforce that right.

***Notice of Default.*** The First Mortgage Trustee is required to give the holders of the first mortgage bonds notice of any default under the First Mortgage Indenture to the extent required by the Trust Indenture Act, unless such default has been cured or waived; except that in the case of an *event of default* of the character specified in the third bullet point under "— Events of Default" (regarding a breach of certain covenants continuing for 90 days after the receipt of a written notice of default), no such notice shall be given to such holders until at least 60 days after the occurrence thereof. The Trust Indenture Act currently permits the First Mortgage Trustee to withhold notices of default (except for certain payment defaults) if the First Mortgage Trustee in good faith determines the withholding of such notice to be in the interests of the holders of the first mortgage bonds.

The Company will furnish the First Mortgage Trustee with an annual statement as to its compliance with the conditions and covenants in the First Mortgage Indenture.

***Waiver of Default and of Compliance.*** The holders of a majority in aggregate principal amount of the outstanding first mortgage bonds may waive, on behalf of the holders of all outstanding first mortgage bonds, any past default under the First Mortgage Indenture, except a default in the payment of principal, premium or interest, or with respect to compliance with certain provisions of the First Mortgage Indenture that cannot be amended without the consent of the holder of each outstanding first mortgage bond affected.

Compliance with certain covenants in the First Mortgage Indenture or otherwise provided with respect to first mortgage bonds may be waived by the holders of a majority in aggregate principal amount of the affected first mortgage bonds, considered as one class.

**Consolidation, Merger and Conveyance of Assets as an Entirety**

Subject to the provisions described below, the Company has agreed to preserve its corporate existence.

The Company has agreed not to consolidate with or merge with or into any other entity or convey, transfer or lease the Mortgaged Property as or substantially as an entirety to any entity unless

- the entity formed by such consolidation or into which the Company merges, or the entity which acquires or which leases the Mortgaged Property substantially as an entirety, is an entity organized and existing under the laws of the United States of America or any State or Territory thereof or the District of Columbia, and
    - expressly assumes, by supplemental indenture, the due and punctual payment of the principal of, and premium and interest on, all the outstanding first mortgage bonds and the performance of all of the Company's covenants under the First Mortgage Indenture, and
    - such entity confirms the lien of the First Mortgage Indenture on the Mortgaged Property; and
- in the case of a lease, such lease is made expressly subject to termination by (i) the Company or by the First Mortgage Trustee and (ii) the purchaser of the property so leased at any sale thereof, at any time during the continuance of an *event of default*; and

- immediately after giving effect to such transaction, no *event of default*, and no event which after notice or lapse of time or both would become an *event of default*, will have occurred and be continuing.

In the case of the conveyance or other transfer of the Mortgaged Property as or substantially as an entirety to any other person, upon the satisfaction of all the conditions described above the Company would be released and discharged from all obligations under the First Mortgage Indenture and on the first mortgage bonds then outstanding unless the Company elects to waive such release and discharge.

The First Mortgage Indenture does not prevent or restrict:

- any consolidation or merger after the consummation of which the Company would be the surviving or resulting entity; or

- any conveyance or other transfer, or lease, of any part of the Mortgaged Property which does not constitute the entirety or substantially the entirety thereof.

If following a conveyance or other transfer, or lease, of any part of the Mortgaged Property, the fair value of the Mortgaged Property retained by the Company exceeds an amount equal to three-halves (3/2) of the aggregate principal amount of all outstanding first mortgage bonds, then the part of the Mortgaged Property so conveyed, transferred or leased shall be deemed not to constitute the entirety or substantially the entirety of the Mortgaged Property. This fair value will be determined within 90 days of the conveyance or transfer by an independent expert that the Company selects and that is approved by the First Mortgage Trustee.

**Modification of First Mortgage Indenture**

***Without Holder Consent.*** Without the consent of any holders of first mortgage bonds, the Company and the First Mortgage Trustee may enter into one or more supplemental indentures for any of the following purposes:

- to evidence the succession of another entity to the Company;

- to add one or more covenants or other provisions for the benefit of the holders of all or any series or tranche of first mortgage bonds, or to surrender any right or power conferred upon the Company;

- to correct or amplify the description of any property at any time subject to the lien of the First Mortgage Indenture; or to better assure, convey and confirm unto the First Mortgage Trustee any property subject or required to be subjected to the lien of the First Mortgage Indenture; or to subject to the lien of the First Mortgage Indenture additional property (including property of others), to specify any additional Permitted Liens with respect to such additional property and to modify the provisions in the First Mortgage Indenture for dispositions of certain types of property without release in order to specify any additional items with respect to such additional property;

- to add any additional *events of default*, which may be stated to remain in effect only so long as the first mortgage bonds of any one more particular series remains outstanding;

- to change or eliminate any provision of the First Mortgage Indenture or to add any new provision to the First Mortgage Indenture that does not adversely affect the interests of the holders in any material respect;

- to establish the form or terms of any series or tranche of first mortgage bonds;

- to provide for the issuance of bearer securities;

- to evidence and provide for the acceptance of appointment of a successor First Mortgage Trustee or by a co-trustee or separate trustee;

- to provide for the procedures required to permit the utilization of a noncertificated system of registration for any series or tranche of first mortgage bonds;

- to change any place or places where

    - the Company may pay principal, premium and interest,

    - first mortgage bonds may be surrendered for transfer or exchange, and

    - notices and demands to or upon the Company may be served;

- to amend and restate the First Mortgage Indenture as originally executed, and as amended from time to time, with such additions, deletions and other changes that do not adversely affect the interest of the holders in any material respect;

- to cure any ambiguity, defect or inconsistency or to make any other changes that do not adversely affect the interests of the holders in any material respect; or

- to increase or decrease the maximum principal amount of first mortgage bonds that may be outstanding at any time.

In addition, if the Trust Indenture Act is amended after the date of the First Mortgage Indenture so as to require changes to the First Mortgage Indenture or so as to permit changes to, or the elimination of, provisions which, at the date of the First Mortgage Indenture or at any time thereafter, were required by the Trust Indenture Act to be contained in the First Mortgage Indenture, the First Mortgage Indenture will be deemed to have been amended so as to conform to such amendment or to effect such changes or elimination, and the Company and the First Mortgage Trustee may, without the consent of any holders, enter into one or more supplemental indentures to effect or evidence such amendment.

***With Holder Consent.*** Except as provided above, the consent of the holders of at least a majority in aggregate principal amount of the first mortgage bonds of all outstanding series, considered as one class, is generally required for the purpose of adding to, or changing or eliminating any of the provisions of, the First Mortgage Indenture pursuant to a supplemental indenture. However, if less than all of the series of outstanding first mortgage bonds are directly affected by a proposed supplemental indenture, then such proposal only requires the consent of the holders of a majority in aggregate principal amount of the outstanding first mortgage bonds of all directly affected series, considered as one class. Moreover, if the first mortgage bonds of any series have been issued in more than one tranche and if the proposed supplemental indenture directly affects the rights of the holders of first mortgage bonds of one or more, but less than all, of such tranches, then such proposal only requires the consent of the holders of a majority in aggregate principal amount of the outstanding first mortgage bonds of all directly affected tranches, considered as one class.

However, no amendment or modification may, without the consent of the holder of each outstanding first mortgage bond directly affected thereby:

- change the stated maturity of the principal or interest on any first mortgage bond (other than pursuant to the terms thereof), or reduce the principal amount, interest or premium payable (or the method of calculating such rates) or change the currency in which any first mortgage bond is payable, or impair the right to bring suit to enforce any payment;

- create any lien (not otherwise permitted by the First Mortgage Indenture) ranking prior to the lien of the First Mortgage Indenture with respect to all or substantially all of the Mortgaged Property, or terminate the lien of the First Mortgage Indenture on all or substantially all of the Mortgaged Property (other than in accordance with the terms of the First Mortgage Indenture), or deprive any holder of the benefits of the security of the lien of the First Mortgage Indenture;

- reduce the percentages of holders whose consent is required for any supplemental indenture or waiver of compliance with any provision of the First Mortgage Indenture or of any default thereunder and its consequences, or reduce the requirements for quorum and voting under the First Mortgage Indenture; or

- modify certain of the provisions of the First Mortgage Indenture relating to supplemental indentures, waivers of certain covenants and waivers of past defaults with respect to first mortgage bonds.

A supplemental indenture which changes, modifies or eliminates any provision of the First Mortgage Indenture expressly included solely for the benefit of holders of first mortgage bonds of one or more particular series or tranches will be deemed not to affect the rights under the First Mortgage Indenture of the holders of first mortgage bonds of any other series or tranche.

**Satisfaction and Discharge**

Any first mortgage bonds or any portion thereof will be deemed to have been paid and no longer outstanding for purposes of the First Mortgage Indenture and, at the Company's election, the Company's entire indebtedness with respect to those securities will be satisfied and discharged, if there shall have been irrevocably deposited with the First Mortgage Trustee or any Paying Agent (other than the Company), in trust:

- money sufficient, or
- in the case of a deposit made prior to the maturity of such first mortgage bonds, non-redeemable *eligible obligations* (as defined in the First Mortgage Indenture) sufficient, or
- a combination of the items listed in the preceding two bullet points, which in total are sufficient,

to pay when due the principal of, and any premium, and interest due and to become due on such first mortgage bonds or portions of such first mortgage bonds on and prior to their maturity.

The Company's right to cause its entire indebtedness in respect of the first mortgage bonds of any series to be deemed to be satisfied and discharged as described above will be subject to the satisfaction of any conditions specified in the instrument creating such series.

The First Mortgage Indenture will be deemed satisfied and discharged when no first mortgage bonds remain outstanding and when the Company has paid all other sums payable by it under the First Mortgage Indenture.

All moneys the Company pays to the First Mortgage Trustee or any Paying Agent on First Mortgage Bonds that remain unclaimed at the end of two years after payments have become due may be paid to or upon the Company's order. Thereafter, the holder of such First Mortgage Bond may look only to the Company for payment.

**Duties of the First Mortgage Trustee; Resignation and Removal of the First Mortgage Trustee; Deemed Resignation**

The First Mortgage Trustee will have, and will be subject to, all the duties and responsibilities specified with respect to an indenture trustee under the Trust Indenture Act. Subject to these provisions, the First Mortgage Trustee will be under no obligation to exercise any of the powers vested in it by the First Mortgage Indenture at the request of any holder of first mortgage bonds, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred thereby. The First Mortgage Trustee will not be required to expend or risk its own funds or otherwise incur financial liability in the performance of its duties if the First Mortgage Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

The First Mortgage Trustee may resign at any time by giving written notice to the Company.

The First Mortgage Trustee may also be removed by act of the holders of a majority in principal amount of the then outstanding first mortgage bonds.

No resignation or removal of the First Mortgage Trustee and no appointment of a successor trustee will become effective until the acceptance of appointment by a successor trustee in accordance with the requirements of the First Mortgage Indenture.

Under certain circumstances, the Company may appoint a successor trustee and if the successor accepts, the First Mortgage Trustee will be deemed to have resigned.

**Evidence to be Furnished to the First Mortgage Trustee**

Compliance with First Mortgage Indenture provisions is evidenced by written statements of the Company's officers or persons selected or paid by the Company. In certain cases, opinions of counsel and certifications of an engineer, accountant, appraiser or other expert (who in some cases must be independent) must be furnished. In addition, the First Mortgage Indenture requires the Company to give to the First Mortgage Trustee, not less than annually, a brief statement as to the Company's compliance with the conditions and covenants under the First Mortgage Indenture.

**Miscellaneous Provisions**

The First Mortgage Indenture provides that certain first mortgage bonds, including those for which payment or redemption money has been deposited or set aside in trust as described under "— Satisfaction and Discharge" above, will not be deemed to be "outstanding" in determining whether the holders of the requisite principal amount of the outstanding first mortgage bonds have given or taken any demand, direction, consent or other action under the First Mortgage Indenture as of any date, or are present at a meeting of holders for quorum purposes.

The Company will be entitled to set any day as a record date for the purpose of determining the holders of outstanding first mortgage bonds of any series entitled to give or take any demand, direction, consent or other action under the First Mortgage Indenture, in the manner and subject to the limitations provided in the First Mortgage Indenture. In certain circumstances, the First Mortgage Trustee also will be entitled to set a record date for action by holders. If such a record date is set for any action to be taken by holders of particular first mortgage bonds, such action may be taken only by persons who are holders of such first mortgage bonds on the record date.

**Governing Law**

The First Mortgage Indenture and the first mortgage bonds provide that they are to be governed by and construed in accordance with the laws of the State of New York except where the Trust Indenture Act is applicable or where otherwise required by law. The effectiveness of the lien of the First Mortgage Indenture, and the perfection and priority thereof, will be governed by Kentucky law.

## SUMMARY OF THE INDENTURE

*The following, in addition to the provisions contained elsewhere in this Reoffering Circular, is a brief description of certain provisions of the Indenture. Reference is made to the Indenture for the detailed provisions thereof.*

**Security**

Pursuant to the Indenture, the Issuer has assigned and pledged to the Trustee its interest in and to the Loan Agreement, including payments and other amounts due the Issuer thereunder, together with all moneys, property and securities from time to time held by the Trustee under the Indenture (with certain exceptions, including moneys held in or earnings on the Rebate Fund and the Purchase Fund). The Bonds have been further secured by the First Mortgage Bonds delivered to the Trustee (see "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds"). The First Mortgage Bonds have been registered in the name of the Trustee and are nontransferable, except to effect a transfer to any successor trustee. The Bonds will not be directly secured by the Project (although the Project is subject to the lien of the First Mortgage Indenture).

**No Pecuniary Liability of the Issuer**

No provision, covenant or agreement contained in the Indenture or in the Loan Agreement, nor any breach thereof, shall give rise to any pecuniary liability of the Issuer or any charge upon its general credit or taxing powers. The Issuer has not obligated itself by making the covenants, agreements or provisions contained in the Indenture or in the Loan Agreement, except with respect to the Project and the application of the amounts assigned to the payment of the principal of, premium, if any, and interest on the Bonds.

**The Bond Fund**

The payments to be made by the Company pursuant to the Loan Agreement to the Issuer and certain other amounts specified in the Indenture will be deposited into a Bond Fund established pursuant to the Indenture (the "Bond Fund") and will be maintained in trust by the Trustee. Moneys in the Bond Fund will be used solely for the payment of the principal of, premium, if any, and interest on the Bonds, for the redemption of Bonds prior to maturity and for the payment of the reasonable and necessary fees and expenses to which the Trustee, Paying Agent and the Issuer are entitled pursuant to the Indenture or the Loan Agreement. Any moneys held in the Bond Fund will be invested by the Trustee at the specific written direction of the Company in certain Governmental Obligations, investment-grade corporate obligations and other investments permitted under the Indenture.

**The Rebate Fund**

A Rebate Fund has been created by the Indenture (the "Rebate Fund") and will be maintained as a separate fund free and clear of the lien of the Indenture. The Issuer, the Trustee and the Company have agreed to comply with all rebate requirements of the Code and, in particular, the Company has agreed that if necessary, it will deposit in the Rebate Fund any such amount as is required under the Code. However, the Issuer, the Trustee and the Company may disregard the Rebate Fund provisions to the extent that they shall receive an opinion of Bond Counsel that such failure to comply will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes.

**Discharge of Indenture**

When all the Bonds and all fees and charges accrued and to accrue of the Trustee and the Paying Agent have been paid or provided for, and when proper notice has been given to the Bondholders or the Trustee that the proper amounts have been so paid or provided for, and if the Issuer is not in default in any other respect under the Indenture, the Indenture shall become null and void. The Bonds shall be deemed to have been paid and discharged when there shall have been irrevocably deposited with the Trustee moneys sufficient to pay the principal, premium, if any, and accrued interest on such Bonds to the due date (whether such date be by reason of maturity or upon redemption) or, in lieu thereof, Governmental Obligations shall have been deposited which mature in such amounts and at such times as will provide the funds necessary to so pay such Bonds, and when all reasonable and necessary fees and expenses of the Trustee, the Authenticating Agent, the Bond Registrar and the Paying Agent have been paid or provided for.

**Surrender of First Mortgage Bonds**

Upon payment of any principal of, premium, if any, and interest on any of the Bonds which reduces the principal amount of Bonds outstanding, or upon provision for the payment thereof having been made in accordance with the Indenture (see "Discharge of Indenture" above), First Mortgage Bonds in a principal amount equal to the principal amount of the Bonds so paid, or for the payment of which such provision has been made, shall be surrendered by the Trustee to the First Mortgage Trustee. The First Mortgage Bonds so surrendered shall be deemed fully paid and the obligations of the Company thereunder terminated.

**Defaults and Remedies**

Each of the following events constitutes an "Event of Default" under the Indenture:

(a) Failure to make payment of any installment of interest on any Bond (i) if such Bond bears interest at other than the Long Term Rate, within a period of one Business Day from the due date and (ii) if such Bond bears interest at the Long Term Rate, within a period of five Business Days from the date due;

(b) Failure to make punctual payment of the principal of, or premium, if any, on any Bond on the due date, whether at the stated maturity thereof, or upon proceedings for redemption, or upon the maturity thereof by declaration or if payment of the purchase price of any Bond required to be purchased pursuant to the Indenture is not made when such payment has become due and payable, provided that no event of default shall have occurred in respect of failure to receive such purchase price for any Bond if the Company shall have made the payment on the next Business Day as described in the last paragraph under "Summary of the Bonds — Mandatory Purchase of Bonds — Remarketing and Purchase of Bonds" above;

(c) Failure of the Issuer to perform or observe any other of the covenants, agreements or conditions in the Indenture or in the Bonds which failure continues for a period of 30 days after written notice by the Trustee, provided, however, that if such failure is capable of being cured, but cannot be cured in such 30-day period, it will not constitute an event of default under the Indenture if corrective action in respect of such failure is being diligently pursued;

(d) The occurrence of an "event of default" under the Loan Agreement (see "Summary of the Loan Agreement — Events of Default"); or

(e) All first mortgage bonds outstanding under the First Mortgage Indenture, if not already due, shall have become due and payable, whether by declaration or otherwise, and such acceleration shall not have been rescinded by the First Mortgage Trustee.

Upon the occurrence of an Event of Default under the Indenture, the Trustee may, and upon the written request of the registered owners holding not less than 25% in principal amount of Bonds then outstanding and upon receipt of indemnity satisfactory to it shall: (i) enforce each and every right granted to the Trustee as a holder of the First Mortgage Bonds (see "Summary of the First Mortgage Bonds and the First Mortgage Indenture"), (ii) declare the principal of all Bonds and interest accrued thereon to be immediately due and payable and (iii) declare all payments under the Loan Agreement to be immediately due and payable and enforce each and every other right granted to the Issuer under the Loan Agreement for the benefit of the Bondholders. Interest on the Bonds will cease to accrue on the date of issuance of the declaration of acceleration of payment of principal and interest on the Bonds. In exercising such rights, the Trustee shall take any action that, in the judgment of the Trustee, would best serve the interests of the registered owners. Upon the occurrence of an Event of Default under the Indenture, the Trustee may also proceed to pursue any available remedy by suit at law or in equity to enforce the payment of the principal of, premium, if any, and interest on the Bonds then outstanding and may also issue a Redemption Demand for such First Mortgage Bonds to the First Mortgage Trustee.

If an Event of Default under the Indenture shall occur and be continuing and the maturity date of the Bonds has been accelerated (to the extent the Bonds are not already due and payable) as a consequence of such event of default, the Trustee may, and upon the written request of the registered owners holding not less than 25% in principal amount of all Bonds then outstanding and upon receipt of indemnity satisfactory to it shall, exercise such rights as it shall possess under the First Mortgage Indenture as a holder of the First Mortgage Bonds.

If the Trustee recovers any moneys following an Event of Default, unless the principal of the Bonds shall have been declared due and payable, all such moneys shall be applied in the following order: (i) to the payment of the fees, expenses, liabilities and advances incurred or made by the Trustee and the Paying Agent and the payment of any sums due and payable to the United States pursuant to Section 148(f) of the Code, (ii) to the payment of all interest then due on the Bonds, and (iii) to the payment of unpaid principal and premium, if any, of the Bonds. If the principal of the Bonds has become due or has been accelerated, such moneys shall be applied in the following order: (i) to the payment of the fees, expenses, liabilities and advances incurred or made by the Trustee and the Paying Agent and the payment of any sums due and payable to the United States pursuant to Section 148(f) of the Code and (ii) to the payment of principal of and interest then due and unpaid on the Bonds.

No Bondholder may institute any suit or proceeding in equity or at law for the enforcement of the Indenture unless an Event of Default has occurred of which the Trustee has been notified or is deemed to have notice, and registered owners holding not less than 25% in aggregate principal amount of Bonds then outstanding shall have made written request to the Trustee to proceed to exercise the powers granted under the Indenture or to institute such action in their own name and the Trustee shall fail or refuse to exercise its powers within a reasonable time after receipt of indemnity satisfactory to it.

Any judgment against the Issuer pursuant to the exercise of rights under the Indenture shall be enforceable only against specific assigned payments, funds and accounts under the Indenture in the hands of the Trustee. No deficiency judgment shall be authorized against the general credit of the Issuer.

No default under paragraph (c) above shall constitute an Event of Default until actual notice is given to the Issuer and the Company by the Trustee, or to the Issuer, the Company and the Trustee by the registered owners holding not less than 25% in aggregate principal amount of all Bonds outstanding and the Issuer and the Company shall have had thirty days after such notice to correct the default and failed to do so. If the default is such that it cannot be corrected within the applicable period but is capable of being cured, it will not constitute an Event of Default if corrective action is instituted within the applicable period.

**Waiver of Events of Default**

Except as provided below, the Trustee may in its discretion waive any Event of Default under the Indenture and shall do so upon the written request of the registered owners holding a majority in principal amount of all Bonds then outstanding. If, after the principal of all Bonds then outstanding shall have been declared to be due and payable and prior to any judgment or decree for the appointment of a receiver or for the payment of the moneys due shall have been entered, (i) the Company has caused to be deposited with the Trustee a sum sufficient to pay all matured installments of interest upon all Bonds and the principal of and premium, if any, on any and all Bonds which shall have become due otherwise than by reason of such declaration (with interest thereon as provided in the Indenture) and the expenses of the Trustee in connection with such default and (ii) all Events of Default under the Indenture (other than nonpayment of the principal of Bonds due by said declaration) shall have been remedied, then such Event of Default shall be deemed waived and such declaration and its consequences rescinded and annulled by the Trustee. Such waiver, rescission and annulment shall be binding upon all Bondholders. No such waiver, rescission and annulment shall extend to or affect any subsequent Event of Default or impair any right or remedy consequent thereon.

Upon any waiver or rescission as described above or any discontinuance or abandonment of proceedings under the Indenture, the Trustee shall immediately rescind in writing any Redemption Demand of First Mortgage Bonds previously given to the First Mortgage Trustee. The rescission under the First Mortgage Indenture of a declaration that all first mortgage bonds outstanding under the First Mortgage Indenture are immediately due and payable shall also constitute a waiver of an Event of Default described in paragraph (e) under the sub caption "—Defaults and Remedies" above and a waiver and rescission of its consequences, provided that no such waiver or rescission shall extend to or affect any subsequent or other default or impair any right consequent thereon.

Notwithstanding the foregoing, nothing in the Indenture shall affect the right of a registered owner to enforce the payment of principal of, premium, if any, and interest on the Bonds after the maturity thereof.

**Voting of First Mortgage Bonds Held by Trustee**

The Trustee, as holder of the First Mortgage Bonds, shall attend any meeting of holders of first mortgage bonds outstanding under the First Mortgage Indenture as to which it receives due notice. The Trustee shall vote the First Mortgage Bonds held by it, or shall consent with respect thereto, proportionally in the way in which the Trustee reasonably believes will be the vote or consent of all other holders of first mortgage bonds outstanding under the First Mortgage Indenture then eligible to vote or consent.

Notwithstanding the foregoing, the Trustee may not vote the First Mortgage Bonds in favor of, or give consent to, any action which, in the Trustee's opinion, would materially adversely affect the First Mortgage Bonds in a manner not generally shared by all other series of first mortgage bonds, except upon notification by the Trustee to the registered owners of all Bonds then outstanding of such proposal and consent thereto of the registered owners of at least $66^{2/3}$% in aggregate principal amount of all Bonds then outstanding.

**Supplemental Indentures**

The Issuer and the Trustee may enter into indentures supplemental to the Indenture without the consent of or notice to, the Bondholders in order (i) to cure any ambiguity or formal defect or omission in the Indenture, (ii) to grant to the Trustee, as may lawfully be granted, additional rights for the benefit of the Bondholders, (iii) to subject to the Indenture additional revenues, properties or collateral, (iv) to permit qualification of the Indenture under any federal statute or state blue sky law, (v) to add additional covenants and agreements of the Issuer for the protection of the Bondholders or to surrender or limit any rights reserved to the Issuer, (vi) to make any modification or change to the Indenture which, in the sole judgment of the Trustee, does not adversely affect the Trustee or any Bondholder, (vii) to make amendments to provisions relating to federal income tax matters under the Code or other relevant provisions if, in the opinion of Bond Counsel, those amendments would not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes, (viii) to make any modification or change to the Indenture necessary to provide liquidity or credit support for the Bonds, or (ix) to permit the issuance of the Bonds in other than book-entry-only form or to provide changes to or for the book-entry system.

Exclusive of supplemental indentures for the purposes set forth in the preceding paragraph, the consent of registered owners holding a majority in principal amount of all Bonds then outstanding is required to approve any supplemental indenture, except no such supplemental indenture shall permit, without the consent of all of the registered owners of the Bonds then outstanding, (i) an extension of the maturity of the principal of or the interest on any Bond issued under the Indenture or a reduction in the principal amount of any Bond or the rate of interest or time of redemption or redemption premium thereon, (ii) a privilege or priority of any Bond or Bonds over any other Bond or Bonds, (iii) a reduction in the principal amount of the Bonds required for consent to such supplemental indenture, or (iv) the deprivation of any registered owners of the lien of the Indenture.

If at any time the Issuer shall request the Trustee to enter into any supplemental indenture requiring the consent of the registered owners of the Bonds, the Trustee, upon being satisfactorily indemnified with respect to expenses, must notify all such registered owners. Such notice shall set forth the nature of the proposed supplemental indenture and shall state that copies thereof are on file at the principal office of the Trustee for inspection. If, within sixty days (or such longer period as shall be prescribed by the Issuer or the Company) following the mailing of such notice, the registered owners holding the requisite amount of the Bonds outstanding shall have consented to the execution thereof, no Bondholder shall have any right to object or question the execution thereof.

No supplemental indenture shall become effective unless the Company consents to the execution and delivery of such supplemental indenture. The Company shall be deemed to have consented to the execution and delivery of any supplemental indenture if the Trustee does not receive a notice of protest or objection signed by the Company on or before 4:30 p.m., local time in the city in which the principal office of the Trustee is located, on the fifteenth day after the mailing to the Company of a notice of the proposed changes and a copy of the proposed supplemental indenture.

## ENFORCEABILITY OF REMEDIES

The remedies available to the Trustee, the Issuer and the owners upon an event of default under the Loan Agreement, the Indenture or the First Mortgage Indenture are in many respects dependent upon judicial actions which are often subject to discretion and delay. Under existing constitutional and statutory law and judicial decisions, the remedies specified by the Loan Agreement, the Indenture and the First Mortgage Indenture may not be readily available or may be limited. The various legal opinions to be delivered concurrently with the delivery of the Bonds will be qualified as to the enforceability of the various legal instruments by limitations imposed by principles of equity, bankruptcy, reorganization, insolvency, moratorium or other similar laws affecting the rights of creditors generally.

## REOFFERING

Subject to the terms and conditions of the Remarketing and Bond Purchase Agreement dated as of April 24, 2018 (the "Remarketing Agreement"), between the Company and Morgan Stanley & Co. LLC, as Representative of the Remarketing Agents, the Remarketing Agents have agreed to purchase and reoffer the Bonds delivered to the Paying Agent for purchase on May 1, 2018, at a price equal to 100% of the principal amount of the Bonds, plus accrued interest (if any), and in connection therewith will receive compensation in the amount of $113,750 for the Jefferson County Bonds and $113,750 for the Trimble County Bonds, plus reimbursement of certain expenses. Under the terms of the Remarketing Agreement, the Company has agreed to indemnify the Remarketing Agents against certain civil liabilities, including liabilities under federal securities laws.

The Remarketing Agents and their affiliates are full-service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage activities. The Remarketing Agents and certain of their affiliates have, from time to time, performed, and may in the future perform, various investment banking and commercial banking services for the Company, for which they received or will receive customary fees and expenses.

In the ordinary course of their various business activities, the Remarketing Agents and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (which may include bank loans and/or credit default swaps) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve securities and instruments of the Company.

Morgan Stanley, parent company of Morgan Stanley & Co. LLC, one of the Remarketing Agents of the Bonds, has entered into a retail brokerage joint venture. As part of the joint venture, Morgan Stanley & Co. LLC will distribute municipal securities to retail investors through the financial advisor network of a new broker-dealer, Morgan Stanley Smith Barney LLC. This distribution arrangement became effective on June 1, 2009. As part of this arrangement, Morgan Stanley & Co. LLC will compensate Morgan Stanley Smith Barney LLC for its selling efforts with respect to the Bonds.

## TAX TREATMENT

On March 22, 2002, the date on which the Bonds of each series were originally issued, Bond Counsel delivered its opinions that stated that, under existing law, including then current statutes, regulations, administrative rulings and official interpretations, subject to the qualifications and exceptions set forth below, interest on the Bonds would be excluded from the gross income of the recipients thereof for federal income tax purposes, except that no opinion would be expressed regarding such exclusion from gross income with respect to any Bond during any period in which it is held by a "substantial user" of the Project or a "related person" of a substantial user as such terms are used in Section 147(a) of the Code. Interest on the Bonds will be an item of tax preference in determining alternative minimum taxable income for individuals and corporations under the Code. The alternative minimum tax has been repealed with respect to corporations for taxable years beginning after December 31, 2017. Bond Counsel further opined that, subject to the assumptions stated in the preceding sentence, (i) interest on the Bonds would be excluded from gross income of the owners thereof for Kentucky income tax purposes and (ii) the Bonds would be exempt from all ad valorem taxes in Kentucky. Such opinions have not been updated as of the date hereof and no continuing tax exemption opinions are expressed by Bond Counsel.

Bond Counsel also will deliver opinions in connection with this reoffering to the effect that the change to the Long Term Rate Period (i) is authorized or permitted by Sections 103.200 to 103.285, inclusive, of the Kentucky Revised Statutes (the "Act") and the related Indenture and (ii) will not adversely affect the validity of the Bonds or any exclusion from gross income of interest on the Bonds for federal income tax purposes to which interest on the Bonds would otherwise be entitled.

The opinion of Bond Counsel as to the excludability of interest from gross income for federal income tax purposes was based upon and assumed the accuracy of certain representations of facts and circumstances, including with respect to the Project, which are within the knowledge of the Company and compliance by the Company with certain covenants and undertakings set forth in the proceedings authorizing the Bonds which are intended to assure that the Bonds are and will remain obligations the interest on which is not includable in gross income of the recipients thereof under the law in effect on the date of such opinion. Bond Counsel did not independently verify the accuracy of the certifications and representations made by the Company and the Issuer. On the date of the opinion and subsequent to the original delivery of the Bonds, such representations of facts and circumstances must be accurate and such covenants and undertakings must continue to be complied with in order that interest on the Bonds be and remain excludable from gross income of the recipients thereof for federal income tax purposes under existing law. Bond Counsel expressed no opinion (i) regarding the exclusion of interest on any Bond from gross income for federal income tax purposes on or after the date on which any change, including any interest rate conversion, permitted by the documents other than with the approval of Bond Counsel is taken which adversely affects the tax treatment of the Bonds or (ii) as to the treatment for purposes of federal income taxation of interest on the Bonds upon a Determination of Taxability.

The Code prescribes a number of qualifications and conditions for the interest on state and local government obligations to be and to remain excluded from gross income for federal income tax purposes, some of which, including provisions for potential payments by the Issuer to the federal government, require future or continued compliance after issuance of the Bonds in order for the interest to be and to continue to be so excluded from the date of issuance. Noncompliance with certain of these requirements by the Company or the Issuer with respect to the Bonds could cause the interest on the Bonds to be included in gross income for federal income tax purposes and to be subject to federal income taxation retroactively to the date of their issuance. The Company and the Issuer have each covenanted to take all actions required of each to assure that the interest on the Bonds shall be and remain excluded from gross income for federal income tax purposes, and not to take any actions that would adversely affect that exclusion.

The opinion of Bond Counsel as to the exclusion of interest on the Bonds from gross income for federal income tax purposes and federal tax treatment of interest on the Bonds was subject to the following exceptions and qualifications:

(a) The Code provides for "branch profits tax" which subjects to tax, at a rate of 30%, the effectively connected earnings and profits of a foreign corporation which engages in a United States trade or business. Interest on the Bonds would be includable in the amount of effectively connected earnings and profits and thus would increase the branch profits tax liability.

(b) The Code also provides that passive investment income, including interest on the Bonds, may be subject to taxation for any S corporation with Subchapter C earnings and profits at the close of its taxable year if greater than 25% of its gross receipts is passive investment income.

Except as stated above, Bond Counsel expressed no opinion as to any federal or Kentucky tax consequences resulting from the receipt of interest on the Bonds.

Owners of the Bonds should be aware that the ownership of the Bonds may result in collateral federal income tax consequences. For instance, the Code provides that property and casualty insurance companies will be required to reduce their loss reserve deductions by 15% of the tax-exempt interest received on certain obligations, such as the Bonds, acquired after August 7, 1986. (For purposes of the immediately preceding sentence, a portion of dividends paid to an affiliated insurance company may be treated as tax-exempt interest.) The Code further provides for the disallowance of any deduction for interest expenses incurred by banks and certain other financial institutions allocable to carrying certain tax-exempt obligations, such as the Bonds, acquired after August 7, 1986. The Code also provides that, with respect to taxpayers other than such financial institutions, such taxpayers will be unable to deduct any portion of the interest expenses incurred or continued to purchase or carry the Bonds. The Code also provides, with respect to individuals, that interest on tax-exempt obligations, including the Bonds, is included in modified adjusted gross income for purposes of determining the taxability of social security and railroad retirement benefits. Furthermore, the earned income tax credit is not allowed for individuals with an aggregate amount of disqualified income within the meaning of Section 32 of the Code, which exceeds $2,200. Interest on the Bonds will be taken into account in the calculation of disqualified income. Prospective purchasers of the Bonds should consult their own tax advisors regarding such matters and any other tax consequences of holding the Bonds.

From time to time, there are legislative proposals in Congress which, if enacted, could alter or amend one or more of the federal tax matters referred to above or could adversely affect the market value of the Bonds. It cannot be predicted whether or in what form any such proposal might be enacted or whether, if enacted, it would apply to obligations (such as the Bonds) issued prior to enactment.

The opinions of Bond Counsel delivered on the original date of issuance of the Bonds are attached as Appendix B-1. The opinions of Bond Counsel related to the change in the Long Term Rate Period of the Bonds as described herein, prepared as of the date the holders of the Bonds were previously notified of such change in accordance with the respective Indentures, and redated as of the effective date of such change, are attached as Appendix B-2.

## LEGAL MATTERS

Certain legal matters in connection with the mandatory purchase and reoffering of the Bonds will be passed upon by Stoll Keenon Ogden PLLC, Louisville, Kentucky, Bond Counsel. Certain legal matters pertaining to the Company will be passed upon by Jones Day, Chicago, Illinois, and John R. Crockett III, General Counsel, Chief Compliance Officer and Corporate Secretary of the Company. McGuireWoods LLP, Chicago, Illinois, will pass upon certain legal matters for the Remarketing Agents.

## CONTINUING DISCLOSURE

Because the Bonds are special and limited obligations of the Issuers, neither Issuer is an "obligated person" for purposes of Rule 15c2-12 (the "Rule") promulgated by the SEC under the Exchange Act, or has any continuing obligations thereunder. Accordingly, neither Issuer will provide any continuing disclosure information with respect to the Bonds or such Issuer.

In order to enable the Remarketing Agents to comply with the requirements of the Rule, the Company has covenanted in a continuing disclosure undertaking agreement delivered to the Trustee for the benefit of the holders of the Bonds (the "Continuing Disclosure Agreement") to provide certain continuing disclosure for the benefit of the holders of the Bonds. Under its Continuing Disclosure Agreement, the Company has covenanted to take the following actions:

(i) The Company will provide to the Municipal Securities Rulemaking Board ("MSRB") (in electronic format) (a) annual financial information of the type set forth in Appendix A to this Reoffering Circular (including any information incorporated by reference in Appendix A) and (b) audited financial statements prepared in accordance with generally accepted accounting principles, in each case not later than 120 days after the end of the Company's fiscal year.

(ii) The Company will file in a timely manner not in excess of 10 business days after the occurrence of the event with the MSRB notice of the occurrence of any of the following events (if applicable) with respect to the Bonds: (a) principal and interest payment delinquencies; (b) non-payment related defaults, if material; (c) any unscheduled draws on debt service reserves reflecting financial difficulties; (d) unscheduled draws on credit enhancement facilities reflecting financial difficulties; (e) substitution of credit or liquidity providers, or their failure to perform; (f) adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701-TEB) or other material notices or determinations with respect to the tax status of the Bonds, or other material events affecting the tax status of the Bonds; (g) modifications to rights of the holders of the Bonds, if material; (h) the giving of notice of optional or unscheduled redemption of any Bonds, if material, and tender offers; (i) defeasance of the Bonds or any portion thereof; (j) release, substitution, or sale of property securing repayment of the Bonds, if material; (k) rating changes; (l) bankruptcy, insolvency, receivership or similar event of the Company; (m) the consummation of a merger, consolidation or acquisition involving the Company, or the sale of all or substantially all of the assets of the Company, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material; and (n) appointment of a successor or additional trustee or a change of name of a trustee, if material.

(iii) The Company will file in a timely manner with the MSRB notice of a failure by the Company to file any of the information referred to in paragraph (i) above by the due date.

The Company may amend its Continuing Disclosure Agreement (and the Trustee shall agree to any amendment so requested by the Company that does not change the duties of the Trustee thereunder) or waive any provision thereof, but only with a change in circumstances that arises from a change in legal requirements, change in law, or change in the nature or status of the Company with respect to the Bonds or the type of business conducted by the Company; provided that the undertaking, as amended or following such waiver, would have complied with the requirements of the Rule on the date of issuance of the Bonds, after taking into account any amendments to the Rule as well as any change in circumstances, and the amendment or waiver does not materially impair the interests of the holders of the Bonds to which such undertaking relates, in the opinion of the Trustee or counsel expert in federal securities laws acceptable to both the Company and the Trustee, or is approved by the Beneficial Owners of a majority in aggregate principal amount of the outstanding Bonds. The Company acknowledges that its undertakings pursuant to the Rule described under this heading are intended to be for the benefit of the holders of the Bonds and shall be enforceable by the holders of those Bonds or by the Trustee on behalf of such holders. Any breach by the Company of these undertakings pursuant to the Rule will not constitute an event of default under the Indenture, the Loan Agreement or the Bonds.

The Company is a party to continuing disclosure agreements with respect to nine series of pollution control bonds. The MSRB's Electronic Municipal Market Access ("EMMA") website reflects that, within the past five years, for two series of such bonds, the Company's 2011 annual financial statements were timely posted, but to outdated CUSIP numbers. The 2011 annual financial statements were re-posted to the correct CUSIP numbers for those series in May 2012. With respect to both series of bonds, the Company also failed to file on the MSRB's EMMA website in a timely manner a notice of the Company's failure to file such 2011 financial statements in accordance with the applicable continuing disclosure agreements. The Company has subsequently made these corrective filings. The Company's 2011 annual financial statements had been filed with the SEC on February 28, 2012. The Company has had, and continues to have, procedures in place in order to make material event notices and financial statement filings on an ongoing basis.

This Reoffering Circular has been duly approved, executed and delivered by the Company.

LOUISVILLE GAS AND ELECTRIC COMPANY

**APPENDIX A**

## THE COMPANY

Louisville Gas and Electric Company (the "Company"), incorporated in Kentucky in 1913, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the distribution and sale of natural gas. As of December 31, 2017, the Company provides electric service to approximately 411,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in nine counties and provides natural gas service to approximately 326,000 customers in its electric service area and eight additional counties in Kentucky. The Company's coal-fired electric generating stations, all equipped with systems to reduce sulphur dioxide emissions, produce most of the Company's electricity. The remainder is generated by a natural gas combined cycle combustion turbine, a hydroelectric power plant, natural gas and oil fueled combustion turbines and a small solar facility. Underground natural gas storage fields help the Company provide economical and reliable natural gas service to customers.

The Company is a wholly-owned subsidiary of LG&E and KU Energy LLC and an indirect wholly-owned subsidiary of PPL Corporation. The Company's affiliate, Kentucky Utilities Company ("KU"), is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky, Virginia and Tennessee. The Company's obligations under the Loan Agreement are solely its own, and not those of any of its affiliates. None of KU, PPL Corporation or the Company's other affiliates will be obligated to make any payment on the Loan Agreement or the Bonds.

The Company's executive offices are located at 220 West Main Street, Louisville, Kentucky 40202, telephone: (502) 627-2000.

The information above concerning the Company is only a summary and does not purport to be comprehensive. Additional information regarding the Company, including audited financial statements, is available in the documents listed under the heading "Documents Incorporated by Reference," which documents are incorporated by reference herein.

## Selected Financial Data
## (Dollars in millions)

| | Year Ended December 31, 2017 | Year Ended December 31, 2016 | Year Ended December 31, 2015 |
|---|---|---|---|
| Operating revenues | $ 1,453 | $ 1,430 | $ 1,444 |
| Operating income | $ 420 | $ 405 | $ 362 |
| Net income | $ 213 | $ 203 | $ 185 |
| Total assets | $ 6,559 | $ 6,300 | $ 6,068 |
| Long-term debt obligations (including amounts due within one year) | $ 1,709 | $ 1,617 | $ 1,642 |
| Ratio of earnings to fixed charges[1] | 5.5 | 5.3 | 5.9 |

Capitalization:

| | December 31, 2017 | % of Capitalization |
|---|---|---|
| Long-term debt and notes payable | $1,908 | 43.0% |
| Common equity | $2,527 | 57.0% |
| Total capitalization | $ 4,435 | 100.0% |

(1) For purposes of this ratio, "Earnings" consist of earnings (as defined below) from continuing operations plus fixed charges. Fixed charges consist of all interest on indebtedness, amortization of debt discount and expense and the portion of rental expense that represents an imputed interest component. Earnings from continuing operations consist of income before taxes and the mark-to-market impact of derivative instruments.

The selected financial data presented above for the three fiscal years ended December 31, 2017, and as of December 31 for each of those years, have been derived from the Company's audited financial statements. The Company's audited financial statements for the three fiscal years ended December 31, 2017, and as of December 31 for each of those years, are included in the Company's Form 10-K for the year ended December 31, 2017 incorporated by reference herein. "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Form 10-K for the year ended December 31, 2017, as well as the Combined Notes to Financial Statements as of December 31, 2017, 2016 and 2015, should be read in conjunction with the above information. Deloitte & Touche LLP audited the Company's financial statements for the fiscal years ended December 31, 2017 and 2016. Ernst & Young LLP audited the Company's financial statements for the fiscal year ended December 31, 2015.

## Risk Factors

Investing in the Bonds involves risk. Please see the risk factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2017, which is incorporated by reference in this Appendix A. Before making an investment decision, you should carefully consider these risks as well as the other information contained or incorporated by reference in this Appendix A. Risks and uncertainties not presently known to the Company or that the Company currently deems immaterial may also impair its business operations, its financial results and the value of the Bonds.

## Available Information

The Company is subject to the information requirements of the Securities Exchange Act of 1934, as amended, and, accordingly, files reports and other information with the Securities and Exchange Commission (the "SEC"). Such reports and other information on file can be inspected and copied at the public reference facilities of the SEC, currently at 100 F Street, N.E., Room 1580, Washington, D.C. 20549; or from the SEC's Web Site (http://www.sec.gov). Please call the SEC at 1-800-SEC-0330 for further information on the public reference room.

## Documents Incorporated by Reference

The following documents, as filed by the Company with the SEC, are incorporated herein by reference:

1. Form 10-K Annual Report of the Company for the year ended December 31, 2017; and

2. Form 8-K Current Reports of the Company filed with the SEC on January 16, 2018 and March 26, 2018.

All documents filed by the Company with the SEC pursuant to Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 subsequent to the date of this Reoffering Circular and prior to the termination of the offering of the Bonds shall be deemed to be incorporated by reference in this Appendix and to be made a part hereof from their respective dates of filing. Any statement contained in a document incorporated or deemed to be incorporated by reference in this Reoffering Circular shall be deemed to be modified or superseded for purposes of this Reoffering Circular to the extent that a statement contained in this Reoffering Circular or in any other subsequently filed document which also is or is deemed to be incorporated by reference in this Reoffering Circular modifies or supersedes such statement. Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Reoffering Circular.

The Company hereby undertakes to provide without charge to each person (including any beneficial owner) to whom a copy of this Reoffering Circular has been delivered, on the written or oral request of any such person, a copy of any or all of the documents referred to above which have been or may be incorporated in this Reoffering Circular by reference, other than certain exhibits to such documents. Requests for such copies should be directed to Treasurer, Louisville Gas and Electric Company, 220 West Main Street, Louisville, Kentucky 40202, telephone: (502) 627-2000.

Re: $35,000,000 County of Trimble, Kentucky, Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project)

We hereby certify that we have examined certified copies of the proceedings of record of the County of Trimble, Kentucky (the "County"), acting by and through its Fiscal Court as its duly authorized governing body, preliminary to and in connection with the issuance by the County of its Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project), dated their date of issuance, in the aggregate principal amount of $35,000,000 (the "Bonds"). The Bonds are issued under the provisions of Sections 103.200 to 103.285, inclusive, of the Kentucky Revised Statutes (the "Act"), for the purpose of providing funds which will be used, with other funds provided by Louisville Gas and Electric Company (the "Company") for the current refunding of $35,000,000 aggregate principal amount of the County's Pollution Control Revenue Bonds, 1997 Series A (Louisville Gas and Electric Company Project), dated November 13, 1997 (the "Prior Bonds"), the proceeds of which were loaned to the Company to currently refund a portion of the costs of construction of air and water pollution control facilities and solid waste disposal facilities to serve certain electric generating units of the Company in Trimble County, Kentucky ("the Project") in order to provide for the control, containment, reduction and abatement of atmospheric and liquid pollutants and contaminants and for the disposal of solid wastes, as provided by the Act.

The Bonds mature on November 1, 2027 and bear interest initially at Flexible Rates, as defined in the Indenture, hereinafter described, subject to change as provided in such Indenture. The Bonds will be subject to optional and mandatory redemption prior to maturity at the times, in the manner and upon the terms set forth in each of the Bonds. From such examination of the proceedings of the Fiscal Court of the County referred to above and from an examination of the Act, we are of the opinion that the County is duly authorized and empowered to issue the Bonds under the laws of the Commonwealth of Kentucky now in force.

We have examined an executed counterpart of a certain Loan Agreement, dated as of November 1, 2001 (the "Loan Agreement"), between the County and the Company and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Loan Agreement, pursuant to which the County has agreed to issue the Bonds and to lend the proceeds thereof to the Company to provide funds to pay and discharge, with other funds provided by the Company, the Prior Bonds and the Company has agreed to make Loan payments to the Trustee at times and in amounts fully adequate to pay maturing principal of, interest on and redemption premium, if any, on the Bonds as same become due and payable. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Loan Agreement; that the Loan Agreement has been duly authorized, executed and delivered by the County; and that the Loan Agreement is a legal, valid and binding obligation of the County, enforceable in accordance with its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

We have also examined an executed counterpart of a certain Indenture of Trust, dated as of November 1, 2001 (the "Indenture"), by and between the County and Bankers Trust Company, as trustee (the "Trustee"), securing the Bonds and setting forth the covenants and undertakings of the County in connection with the Bonds and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Indenture. Pursuant to the Indenture, certain of the County's rights under the Loan Agreement, including the right to receive payments thereunder, and all moneys and securities held by the Trustee in accordance with the Indenture (except moneys and securities in the Rebate Fund created thereby) have been assigned to the Trustee, as security for the holders of the Bonds. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Indenture; that the Indenture has been duly authorized, executed and delivered by the County; and that the Indenture is a legal, valid and binding obligation upon the parties thereto according to its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

In our opinion the Bonds have been validly authorized, executed and issued in accordance with the laws of the Commonwealth of Kentucky now in full force and effect, and constitute legal, valid and binding special obligations of the County entitled to the benefit of the security provided by the Indenture and enforceable in accordance with their terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought. The Bonds are payable by the County solely and only from payments and other amounts derived from the Loan Agreement and as provided in the Indenture.

In our opinion, under existing laws, including current statutes, regulations, administrative rulings and official interpretations by the Internal Revenue Service, subject to the exceptions and qualifications contained in the succeeding paragraphs, interest on the Bonds is excluded from the gross income of the recipients thereof for federal income tax purposes, except that no opinion is expressed regarding such exclusion from gross income with respect to any Bond during any period in which it is held by a "substantial user" of the Project or a "related person," as such terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "Code"). Interest on the Bonds is a separate item of tax preference in determining alternative minimum taxable income for individuals and corporations under the Code. In arriving at this opinion, we have relied upon representations, factual statements and certifications of the Company with respect to certain material facts which are solely within the Company's knowledge in reaching our conclusion, inter alia, that all of the proceeds of the Prior Bonds were used to currently refinance certain bonds, all of the proceeds of which were used to currently refinance certain original bonds, not less than 95% of the net proceeds of which original bonds were used to finance air and water pollution control facilities and solid waste disposal facilities qualified for financing under Section 103(b)(4)(E) and (F) of the Internal Revenue Code of 1954, as amended, and permitted by Section 1312(a) of the Tax Reform Act of 1986. Further, in arriving at the opinion set forth in this paragraph as to the exclusion from gross income of interest on the Bonds, we have assumed and this opinion is conditioned on, the accuracy of and continuing compliance by the Company and the County with representations and covenants set forth in the Loan Agreement and the Indenture which are intended to assure compliance with certain tax-exempt interest provisions of the Code. Such representations and covenants must be accurate and must be complied with subsequent to the issuance of the Bonds in order that interest on the Bonds be excluded from gross income for federal income tax purposes. Failure to comply with certain of such representations and covenants in respect of the Bonds (or with similar requirements with respect to certain other bonds issued by the County of Jefferson, Kentucky at substantially the same time as the Bonds) subsequent to the issuance of the Bonds could cause the interest thereon to be included in gross income for federal income tax purposes retroactively to the date of issuance of the Bonds. We express no opinion (i) regarding the exclusion of interest on any Bond from gross income for federal income tax purposes on or after the date on which any change, including any interest rate conversion, permitted by the documents (other than with approval of this firm) is taken which adversely affects the tax treatment of the Bonds or (ii) as to the treatment for purposes of federal income taxation of interest on the Bonds upon a Determination of Taxability. We are further of the opinion that interest on the Bonds is excluded from gross income of the recipients thereof for Kentucky income tax purposes and that the Bonds are exempt from ad valorem taxation by the Commonwealth of Kentucky and all political subdivisions thereof.

Our opinion as to the exclusion of interest on the Bonds from gross income for federal income tax purposes and federal tax treatment of interest on the Bonds is subject to the following exceptions and qualifications:

(a) The Code provides for a "branch profits tax" which subjects to tax, at a rate of 30%, the effectively connected earnings and profits of a foreign corporation which engages in a United States trade or business. Interest on the Bonds would be includable in the amount of effectively connected earnings and profits and thus would increase the branch profits tax liability.

(b) The Code also provides that passive investment income, including interest on the Bonds, may be subject to taxation for any S corporation with Subchapter C earnings and profits at the close of its taxable year if greater than 25% of its gross receipts is passive investment income.

Except as stated above, we express no opinion as to any federal or Kentucky tax consequences resulting from the receipt of interest on the Bonds.

Holders of the Bonds should be aware that the ownership of the Bonds may result in collateral federal income tax consequences. For instance, the Code provides that, for taxable years beginning after December 31, 1986, property and casualty insurance companies will be required to reduce their loss reserve deductions by 15% of the tax-exempt interest received on certain obligations, such as the Bonds, acquired after August 7, 1986. (For purposes of the immediately preceding sentence, a portion of dividends paid to an affiliated insurance company may be treated as tax-exempt interest.) The Code further provides for the disallowance of any deduction for interest expenses incurred by banks and certain other financial institutions allocable to carrying certain tax-exempt obligations, such as the Bonds, acquired after August 7, 1986. The Code also provides that, with respect to taxpayers other than such financial institutions, such taxpayers will be unable to deduct any portion of the interest expenses incurred or continued to purchase or carry the Bonds. The Code also provides, with respect to individuals, that interest on tax-exempt obligations, including the Bonds, is included in modified adjusted gross income for purposes of determining the taxability of social security and railroad retirement benefits. Furthermore, the earned income credit is not allowed for individuals with an aggregate amount of disqualified income within the meaning of section 32 of the Code, which exceeds $2,200. Interest on the Bonds will be taken into account in the calculation of disqualified income.

We have received and relied upon opinions of John R. McCall, Esq., General Counsel of the Company and Jones, Day, Reavis & Pogue, Chicago, Illinois, counsel to the Company, of even date herewith. In rendering this opinion, we have relied upon said opinions with respect to the matters therein. We have also received an opinion of even date herewith of Hon. Perry Arnold, County Attorney of the County, and relied upon said opinion with respect to the matters therein. Said opinions are in forms satisfactory to us as to both scope and content.

We express no opinion as to the title to, the description of, or the existence or priority of any liens, charges or encumbrances on, the Project.

HARPER, FERGUSON & DAVIS

March 22, 2002
Page 5

In rendering the foregoing opinions, we are passing upon only those matters specifically set forth in such opinions and are not passing upon the investment quality of the Bonds or the accuracy or completeness of any statements made in connection with any sale thereof. The opinions herein are expressed as of the date hereof and we assume no obligation to supplement or update such opinions to reflect any facts or circumstances that may hereafter come to our attention or any changes in law that may hereafter occur.

We are members of the Bar of the Commonwealth of Kentucky and do not purport to be experts on the laws of any jurisdiction other than the Commonwealth of Kentucky and the United States of America, and we express no opinion as to the laws of any jurisdiction other than those specified.

Re: $35,000,000 County of Jefferson, Kentucky, Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project)

We hereby certify that we have examined certified copies of the proceedings of record of the County of Jefferson, Kentucky (the "County"), acting by and through its Fiscal Court as its duly authorized governing body, preliminary to and in connection with the issuance by the County of its Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project), dated their date of issuance, in the aggregate principal amount of $35,000,000 (the "Bonds"). The Bonds are issued under the provisions of Sections 103.200 to 103.285, inclusive, of the Kentucky Revised Statutes (the "Act"), for the purpose of providing funds which will be used, with other funds provided by Louisville Gas and Electric Company (the "Company") for the current refunding of $35,000,000 aggregate principal amount of the County's Pollution Control Revenue Bonds, 1997 Series A (Louisville Gas and Electric Company Project), dated November 13, 1997 (the "Prior Bonds"), the proceeds of which were loaned to the Company to currently refund a portion of the costs of construction of air pollution control facilities to serve certain electric generating units of the Company in Jefferson County, Kentucky ("the Project") in order to provide for the control, containment, reduction and abatement of atmospheric pollutants and contaminants, as provided by the Act.

The Bonds mature on November 1, 2027 and bear interest initially at Flexible Rates, as defined in the Indenture, hereinafter described, subject to change as provided in such Indenture. The Bonds will be subject to optional and mandatory redemption prior to maturity at the times, in the manner and upon the terms set forth in each of the Bonds. From such examination of the proceedings of the Fiscal Court of the County referred to above and from an examination of the Act, we are of the opinion that the County is duly authorized and empowered to issue the Bonds under the laws of the Commonwealth of Kentucky now in force.

We have examined an executed counterpart of a certain Loan Agreement, dated as of November 1, 2001 (the "Loan Agreement"), between the County and the Company and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Loan Agreement, pursuant to which the County has agreed to issue the Bonds and to lend the proceeds thereof to the Company to provide funds to pay and discharge, with other funds provided by the Company, the Prior Bonds and the Company has agreed to make Loan payments to the Trustee at times and in amounts fully adequate to pay maturing principal of, interest on and redemption premium, if any, on the Bonds as same become due and payable. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Loan Agreement; that the Loan Agreement has been duly authorized, executed and delivered by the County; and that the Loan Agreement is a legal, valid and binding obligation of the County, enforceable in accordance with its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

We have also examined an executed counterpart of a certain Indenture of Trust, dated as of November 1, 2001 (the "Indenture"), by and between the County and Bankers Trust Company, as trustee (the "Trustee"), securing the Bonds and setting forth the covenants and undertakings of the County in connection with the Bonds and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Indenture. Pursuant to the Indenture, certain of the County's rights under the Loan Agreement, including the right to receive payments thereunder, and all moneys and securities held by the Trustee in accordance with the Indenture (except moneys and securities in the Rebate Fund created thereby) have been assigned to the Trustee, as security for the holders of the Bonds. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Indenture; that the Indenture has been duly authorized, executed and delivered by the County; and that the Indenture is a legal, valid and binding obligation upon the parties thereto according to its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

In our opinion the Bonds have been validly authorized, executed and issued in accordance with the laws of the Commonwealth of Kentucky now in full force and effect, and constitute legal, valid and binding special obligations of the County entitled to the benefit of the security provided by the Indenture and enforceable in accordance with their terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought. The Bonds are payable by the County solely and only from payments and other amounts derived from the Loan Agreement and as provided in the Indenture.

In our opinion, under existing laws, including current statutes, regulations, administrative rulings and official interpretations by the Internal Revenue Service, subject to the exceptions and qualifications contained in the succeeding paragraphs, interest on the Bonds is excluded from the gross income of the recipients thereof for federal income tax purposes, except that no opinion is expressed regarding such exclusion from gross income with respect to any Bond during any period in which it is held by a "substantial user" of the Project or a "related person," as such terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "Code"). Interest on the Bonds is a separate item of tax preference in determining alternative minimum taxable income for individuals and corporations under the Code. In arriving at this opinion, we have relied upon representations, factual statements and certifications of the Company with respect to certain material facts which are solely within the Company's knowledge in reaching our conclusion, inter alia, that all of the proceeds of the Prior Bonds were used to currently refinance certain bonds, all of the proceeds of which were used to currently refinance certain original bonds, not less than 95% of the net proceeds of which original bonds were used to finance air pollution control facilities qualified for financing under Section 103(b)(4)(F) of the Internal Revenue Code of 1954, as amended, and permitted by Section 1312(a) of the Tax Reform Act of 1986. Further, in arriving at the opinion set forth in this paragraph as to the exclusion from gross income of interest on the Bonds, we have assumed and this opinion is conditioned on, the accuracy of and continuing compliance by the Company and the County with representations and covenants set forth in the Loan Agreement and the Indenture which are intended to assure compliance with certain tax-exempt interest provisions of the Code. Such representations and covenants must be accurate and must be complied with subsequent to the issuance of the Bonds in order that interest on the Bonds be excluded from gross income for federal income tax purposes. Failure to comply with certain of such representations and covenants in respect of the Bonds (or with similar requirements with respect to certain bonds issued by the County of Trimble, Kentucky at substantially the same time as the Bonds) subsequent to the issuance of the Bonds could cause the interest thereon to be included in gross income for federal income tax purposes retroactively to the date of issuance of the Bonds. We express no opinion (i) regarding the exclusion of interest on any Bond from gross income for federal income tax purposes on or after the date on which any change, including any interest rate conversion, permitted by the documents other than with approval of this firm is taken which adversely affects the tax treatment of the Bonds or (ii) as to the treatment for purposes of federal income taxation of interest on the Bonds upon a Determination of Taxability. We are further of the opinion that interest on the Bonds is excluded from gross income of the recipients thereof for Kentucky income tax purposes and that the Bonds are exempt from ad valorem taxation by the Commonwealth of Kentucky and all political subdivisions thereof.

Our opinion as to the exclusion of interest on the Bonds from gross income for federal income tax purposes and federal tax treatment of interest on the Bonds is subject to the following exceptions and qualifications:

(a) The Code provides for a "branch profits tax" which subjects to tax, at a rate of 30%, the effectively connected earnings and profits of a foreign corporation which engages in a United States trade or business. Interest on the Bonds would be includable in the amount of effectively connected earnings and profits and thus would increase the branch profits tax liability.

(b) The Code also provides that passive investment income, including interest on the Bonds, may be subject to taxation for any S corporation with Subchapter C earnings and profits at the close of its taxable year if greater than 25% of its gross receipts is passive investment income.

Except as stated above, we express no opinion as to any federal or Kentucky tax consequences resulting from the receipt of interest on the Bonds.

Holders of the Bonds should be aware that the ownership of the Bonds may result in collateral federal income tax consequences. For instance, the Code provides that, for taxable years beginning after December 31, 1986, property and casualty insurance companies will be required to reduce their loss reserve deductions by 15% of the tax-exempt interest received on certain obligations, such as the Bonds, acquired after August 7, 1986. (For purposes of the immediately preceding sentence, a portion of dividends paid to an affiliated insurance company may be treated as tax-exempt interest.) The Code further provides for the disallowance of any deduction for interest expenses incurred by banks and certain other financial institutions allocable to carrying certain tax-exempt obligations, such as the Bonds, acquired after August 7, 1986. The Code also provides that, with respect to taxpayers other than such financial institutions, such taxpayers will be unable to deduct any portion of the interest expenses incurred or continued to purchase or carry the Bonds. The Code also provides, with respect to individuals, that interest on tax-exempt obligations, including the Bonds, is included in modified adjusted gross income for purposes of determining the taxability of social security and railroad retirement benefits. Furthermore, the earned income credit is not allowed for individuals with an aggregate amount of disqualified income within the meaning of section 32 of the Code, which exceeds $2,200. Interest on the Bonds will be taken into account in the calculation of disqualified income.

We have received and relied upon opinions of John R. McCall, Esq., General Counsel of the Company and Jones, Day, Reavis & Pogue, Chicago, Illinois, counsel to the Company, of even date herewith. In rendering this opinion, we have relied upon said opinions with respect to the matters therein. We have also received an opinion of even date herewith of Hon. Irv Maze, County Attorney of the County, and relied upon said opinion with respect to the matters therein. Said opinions are in forms satisfactory to us as to both scope and content.

We express no opinion as to the title to, the description of, or the existence or priority of any liens, charges or encumbrances on, the Project.

In rendering the foregoing opinions, we are passing upon only those matters specifically set forth in such opinions and are not passing upon the investment quality of the Bonds or the accuracy or completeness of any statements made in connection with any sale thereof. The opinions herein are expressed as of the date hereof and we assume no obligation to supplement or update such opinions to reflect any facts or circumstances that may hereafter come to our attention or any changes in law that may hereafter occur.

We are members of the Bar of the Commonwealth of Kentucky and do not purport to be experts on the laws of any jurisdiction other than the Commonwealth of Kentucky and the United States of America, and we express no opinion as to the laws of any jurisdiction other than those specified.

## (SUPPLEMENTAL OPINIONS OF BOND COUNSEL)

[THIS PAGE INTENTIONALLY LEFT BLANK]

May 1, 2018

County of Trimble, Kentucky
Bedford, Kentucky

U.S. Bank National Association, as
successor Trustee
Louisville, Kentucky

Re: **Change in Long Term Rate Period of $35,000,000 County of Trimble, Kentucky, Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project)**

Ladies and Gentlemen:

This opinion is being furnished in accordance with the requirements of the Indenture of Trust, dated as of November 1, 2001, as amended and supplemented pursuant to Supplemental Indenture No. 1 to Indenture of Trust dated as of September 1, 2010 (collectively, the "**Indenture**"), between the County of Trimble, Kentucky (the "**Issuer**") and U.S. Bank National Association, as successor Trustee, Bond Registrar, Paying Agent, and Tender Agent (the "**Trustee**"), pertaining to $35,000,000 principal amount of County of Trimble, Kentucky, Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project), dated March 22, 2002 (the "**2001 Series B Bonds**"), in order to satisfy certain requirements of Section 2.02(d)(ii) of the Indenture. Pursuant to Section 2.02(d)(ii) of the Indenture, the Company has elected to change the existing Long Term Rate Period applicable to the 2001 Series B Bonds expiring on April 30, 2018 to a new Long Term Rate Period applicable to the 2001 Series B Bonds commencing on and effective as of May 1, 2018 and ending on May 2, 2021. The 2001 Series B Bonds will be subject to mandatory tender for purchase on May 3, 2021 following expiration of the new Long Term Rate Period. The 2001 Series B Bonds mature on November 1, 2027. The terms used herein denoted by initial capitals and not otherwise defined shall have the meanings specified in the Indenture.

We have examined the law and such documents and matters as we have deemed necessary to provide this opinion. As to questions of fact material to the opinions expressed herein, we have relied upon the provisions of the Indenture and related documents, and upon representations made to us without undertaking to verify the same by independent investigation.

Based upon the foregoing, as of the date hereof, we are of the opinion that the change in the Long Term Rate Period applicable to the 2001 Series B Bonds expiring on April 30, 2018 to a new Long Term Rate Period commencing on and effective as of May 1, 2018 and ending on May 2, 2021 as described herein (a) is authorized or permitted by the Act and is authorized by the Indenture and (b) will not adversely affect the validity of the 2001 Series B Bonds or any exclusion from gross income of the interest on the 2001 Series B Bonds for federal income tax purposes to which interest on the 2001 Series B Bonds would otherwise be entitled. Interest on the 2001 Series B Bonds is not and will not be excluded from gross income during any period when the 2001 Series B Bonds are held by the Company or a "related person" of the Company as defined in Section 147(a) of the Internal Revenue Code of 1986, as amended.

In rendering this opinion, we assume, without verifying, that the Issuer and the Company have complied and will comply with all covenants contained in the Indenture, the Loan Agreement between the Issuer and the Company, dated as of November 1, 2001, as amended and supplemented pursuant to Amendment No. 1 to Loan Agreement dated as of September 1, 2010, and other documents relating to the 2001 Series B Bonds. We rendered our approving opinion at the time of the issuance of the 2001 Series B Bonds relating to, among other things, the validity of the 2001 Series B Bonds and the exclusion from federal income taxation of interest on the 2001 Series B Bonds. We have not been requested to update or continue our opinion and have not undertaken to do so. Accordingly, we do not express any opinion with respect to the 2001 Series B Bonds except as set forth above.

Our opinion represents our legal judgment based upon our review of the law and the facts that we deem relevant to render such opinion and is not a guarantee of a result. This opinion is given as of the date hereof and we assume no obligation to review or supplement this opinion to reflect any facts or circumstances that may hereafter come to our attention or any changes in law that may hereafter occur.

We express no opinion herein as to the investment quality of the 2001 Series B Bonds or the adequacy, accuracy, or completeness of any information furnished to any person in connection with any offer or sale of the 2001 Series B Bonds.

Respectfully submitted,

**STOLL KEENON OGDEN PLLC**

Louisville/Jefferson County Metro Government, Kentucky
Louisville, Kentucky

U.S. Bank National Association, as successor Trustee
Louisville, Kentucky

**Re: Change in Long Term Rate Period of $35,000,000 Louisville/Jefferson County Metro Government, Kentucky, Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project)**

Ladies and Gentlemen:

This opinion is being furnished in accordance with the requirements of the Indenture of Trust, dated as of November 1, 2001, as amended and supplemented pursuant to Supplemental Indenture No. 1 to Indenture of Trust dated as of September 1, 2010 (collectively, the "**Indenture**"), between Louisville/Jefferson County Metro Government, Kentucky (the "**Issuer**") and U.S. Bank National Association, as Successor Trustee, Bond Registrar, Paying Agent, and Tender Agent (the "**Trustee**"), pertaining to $35,000,000 principal amount of Louisville/Jefferson County Metro Government, Kentucky, Pollution Control Revenue Bonds, 2001 Series B (Louisville Gas and Electric Company Project), dated March 22, 2002 (the "**2001 Series B Bonds**"), in order to satisfy certain requirements of Section 2.02(d)(ii) of the Indenture. Pursuant to Section 2.02(d)(ii) of the Indenture, the Company has elected to change the existing Long Term Rate Period applicable to the 2001 Series B Bonds expiring on April 30, 2018 to a new Long Term Rate Period applicable to the 2001 Series B Bonds commencing on and effective as of May 1, 2018 and ending on May 2, 2021. The 2001 Series B Bonds will be subject to mandatory tender for purchase on May 3, 2021 following expiration of the new Long Term Rate Period. The 2001 Series B Bonds mature on November 1, 2027. The terms used herein denoted by initial capitals and not otherwise defined shall have the meanings specified in the Indenture.

We have examined the law and such documents and matters as we have deemed necessary to provide this opinion. As to questions of fact material to the opinions expressed herein, we have relied upon the provisions of the Indenture and related documents, and upon representations made to us without undertaking to verify the same by independent investigation.

Based upon the foregoing, as of the date hereof, we are of the opinion that the change in the Long Term Rate Period applicable to the 2001 Series B Bonds expiring on April 30, 2018 to a new Long Term Rate Period commencing on and effective as of May 1, 2018 and ending on May 2, 2021 as described herein (a) is authorized or permitted by the Act and is authorized by the Indenture and (b) will not adversely affect the validity of the 2001 Series B Bonds or any exclusion from gross income of the interest on the 2001 Series B Bonds for federal income tax purposes to which interest on the 2001 Series B Bonds would otherwise be entitled. Interest on the 2001 Series B Bonds is not and will not be excluded from gross income during any period when the 2001 Series B Bonds are held by the Company or a "related person" of the Company as defined in Section 147(a) of the Internal Revenue Code of 1986, as amended.

In rendering this opinion, we assume, without verifying, that the Issuer and the Company have complied and will comply with all covenants contained in the Indenture, the Loan Agreement between the Issuer and the Company, dated as of November 1, 2001, as amended and supplemented pursuant to Amendment No. 1 to Loan Agreement dated as of September 1, 2010, and other documents relating to the 2001 Series B Bonds. We rendered our approving opinion at the time of the issuance of the 2001 Series B Bonds relating to, among other things, the validity of the 2001 Series B Bonds and the exclusion from federal income taxation of interest on the 2001 Series B Bonds. We have not been requested to update or continue our opinion and have not undertaken to do so. Accordingly, we do not express any opinion with respect to the 2001 Series B Bonds except as set forth above.

Our opinion represents our legal judgment based upon our review of the law and the facts that we deem relevant to render such opinion and is not a guarantee of a result. This opinion is given as of the date hereof and we assume no obligation to review or supplement this opinion to reflect any facts or circumstances that may hereafter come to our attention or any changes in law that may hereafter occur.

We express no opinion herein as to the investment quality of the 2001 Series B Bonds or the adequacy, accuracy, or completeness of any information furnished to any person in connection with any offer or sale of the 2001 Series B Bonds.

Respectfully submitted,

**Description of Filing Requirement:**

*The most recent Federal Energy Regulatory Commission Form 1 (electric), Federal Energy Regulatory Commission Form 2 (gas), or Public Service Commission Form T (telephone).*

**Response:**

LG&E's most recent FERC Form 1 and KPSC Annual Report for Major Natural Gas Companies for the year ended December 31, 2017 are attached. Please note that by a FERC Order dated July 12, 2007 in FERC Docket No. CP07-232-000, LG&E was granted a Section (7) exemption by the FERC under the Natural Gas Act, and as a part of that exemption LG&E was granted "a waiver of reporting and accounting requirements," which includes the filing of Form 2 with the FERC. In addition, on February 15, 2008, the Public Service Commission issued an order granting LG&E's request to cease the annual filing of the FERC Form 2. In lieu of filing a FERC Form 2 with the Public Service Commission, LG&E was ordered to file a paper copy of the annual report information that it files with the Public Service Commission electronically, and include with such copy a paper copy of the notes to its financial statements that LG&E had previously filed as part of its FERC Form 2.

## INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

## GENERAL INFORMATION

### I. Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q ( FERC Form 3-Q)is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

### II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

(1) one million megawatt hours of total annual sales,
(2) 100 megawatt hours of annual sales for resale,
(3) 500 megawatt hours of annual power exchanges delivered, or
(4) 500 megawatt hours of annual wheeling for others (deliveries plus losses).

### III. What and Where to Submit

(a) Submit FERC Forms 1 and 3-Q electronically through the forms submission software. Retain one copy of each report for your files. Any electronic submission must be created by using the forms submission software provided free by the Commission at its web site: http://www.ferc.gov/docs-filing/forms/form-1/elec-subm-soft.asp. The software is used to submit the electronic filing to the Commission via the Internet.

(b) The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

(c) Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:

Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

(d) For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

a) Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

b) Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

| Reference Schedules | Pages |
|---|---|
| Comparative Balance Sheet | 110-113 |
| Statement of Income | 114-117 |
| Statement of Retained Earnings | 118-119 |
| Statement of Cash Flows | 120-121 |
| Notes to Financial Statements | 122-123 |

e) The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of _____ for the year ended on which we have reported separately under date of ___________ , we have also reviewed schedules ___________________of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases."

The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(f) Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. To further that effort, new selections, "Annual Report to Stockholders," and "CPA Certification Statement" have been added to the dropdown "pick list" from which companies must choose when eFiling. Further instructions are found on the Commission's website at http://www.ferc.gov/help/how-to.asp.

(g) Federal, State and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from http://www.ferc.gov/docs-filing/forms/form-1/form-1.pdf and http://www.ferc.gov/docs-filing/forms.asp#3Q-gas .

**IV. When to Submit:**

FERC Forms 1 and 3-Q must be filed by the following schedule:

a) FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and

b) FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

**V. Where to Send Comments on Public Reporting Burden.**

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,168 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 168 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

## GENERAL INSTRUCTIONS

I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.

II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

III Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

V. Enter the month, day, and year for all dates. Use customary abbreviations. **The "Date of Report" included in the header of each page is to be completed only for resubmissions** (see VII. below).

VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

VII For any resubmissions, submit the electronic filing using the form submission software only. Please explain the reason for the resubmission in a footnote to the data field.

VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and” firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and “firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

## EXCERPTS FROM THE LAW

**Federal Power Act, 16 U.S.C. § 791a-825r**

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

(3) ’Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

(4) 'Person' means an individual or a corporation;

(5) 'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

(7) 'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power; ......

(11) "project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

(a) To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development -costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the -proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports salt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

**General Penalties**

The Commission may assess up to $1 million per day per violation of its rules and regulations. *See* FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

## GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Kent W. Blake, Chief Financial Officer
220 West Main Street
Louisville, KY 40202

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Kentucky July 2, 1913

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Respondent furnishes electric and natural gas services in Metro Louisville and adjacent territory in Kentucky.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

|---|---|---|---|
| Louisville Gas and Electric Company | (1) [X] An Original<br>(2) [ ] A Resubmission | / / | End of 2017/Q4 |

## CONTROL OVER RESPONDENT

1. If any corporation, business trust, or similar organization or a combination of such organizations jointly held control over the repondent at the end of the year, state name of controlling corporation or organization, manner in which control was held, and extent of control. If control was in a holding company organization, show the chain of ownership or control to the main parent company or organization. If control was held by a trustee(s), state name of trustee(s), name of beneficiary or beneficiearies for whom trust was maintained, and purpose of the trust.

Louisville Gas and Electric Company (LG&E) is a wholly-owned subsidiary of LG&E and KU Energy LLC (LKE). LKE is a wholly-owned subsidiary of PPL Corporation (PPL), based in Allentown, PA.

| Name of Respondent | This Report Is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) [X] An Original<br>(2) [ ] A Resubmission | / / | End of 2017/Q4 |

CORPORATIONS CONTROLLED BY RESPONDENT

1. Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by respondent at any time during the year. If control ceased prior to end of year, give particulars (details) in a footnote.
2. If control was by other means than a direct holding of voting rights, state in a footnote the manner in which control was held, naming any intermediaries involved.
3. If control was held jointly with one or more other interests, state the fact in a footnote and name the other interests.

Definitions
1. See the Uniform System of Accounts for a definition of control.
2. Direct control is that which is exercised without interposition of an intermediary.
3. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.
4. Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

INFORMATION ON FORMULA RATES
Formula Rate Variances

1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1.
2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1.
3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts.
4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

IMPORTANT CHANGES DURING THE QUARTER/YEAR

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.
2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.
3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.
4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.
5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.
7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.
8. State the estimated annual effect and nature of any important wage scale changes during the year.
9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Page 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
11. (Reserved.)
12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.
13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.
14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)

1. See Note 4 of Notes to Financial Statements on page 123.

2. None.

3. During September 2016, Louisville Gas and Electric Company ("LG&E") completed the sale of 73 rail cars owned by LG&E. The sale resulted in a gain of $76,448 in Account 102 (Electric Plant Purchased or Sold). In December 2016, LG&E filed a request with the Commission seeking approval to clear the balance of Account 102 to Account 151 pursuant to the Kentucky Public Service Commission's January 2, 1997 Order in Case No. 92-493, requiring that the gain on the sale of railcars depreciated through the Company's fuel adjustment clause (FAC) be passed to customers through the Company's FAC. The use of Account 151 is also consistent with the entries approved by the FERC under Docket No. AC10-137-000 for a similar rail car sale completed in 2009 by the Company. In December 2016, LG&E received FERC authorization in FERC Docket No. AC17-17-000 to clear the balance of Account 102 to Account 151.

4. None of a material nature.

5. None.

6. LG&E received FERC authorization in FERC Docket No. ES17-41-000 for up to $500 million in the form of money pool debt, commercial paper or any other type of short-term loan through November 30, 2019. LG&E's money pool balance was zero at December 31, 2017 and December 31, 2016. LG&E's commercial paper program limit is $350 million as of April 30, 2013. As of December 31, 2017 and December 31, 2016, the outstanding commercial paper balance is $199 million and $169 million, respectively.

   LG&E has a revolving credit facility totaling $500 million. The facility was approved by the Kentucky Public Service Commission Order, Case No. 2015-00138 on July 2, 2015. The Kentucky Public Service Commission approved an extension of the credit facility in Case No. 2016-00361 on December 9, 2016. On January 29, 2017, LG&E amended this revolving credit facility to extend the termination date from December 31, 2020 to January 29, 2022. There were no borrowings outstanding under this facility at December 31, 2017 and December 31, 2016.

   On October 26, 2017, LG&E executed a $200 million term loan with US Bank due October 25, 2019. Upon execution, an initial $100 million was drawn on the term loan at an interest rate of 1.74%. A second draw of $100 million was made on January 11, 2018. This agreement was executed pursuant to FERC Order Docket No. ES17-41-000 issued September 18, 2017.

7. None.

8. During the first quarter of 2017, exempt and non-exempt employees received routine wage increases in accordance with annual salary reviews. There were no changes to wage scales during the second or third quarters of 2017. The LG&E IBEW ratified a three-year contract including wage increases effective in the fourth quarter of 2017.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)

9. See Notes 4 and 10 of Notes to Financial Statements on page 123.

10. None.

11. N/A

12. See Notes to Financial Statements on page 123.

13. Victor A. Staffieri, Chairman of the Board and Chief Executive Officer, announced his retirement, effective March 15, 2018.

Paul W. Thompson, Chief Operating Officer, was named President and Chief Operating Officer effective January 3, 2017 and was named Chairman of the Board, President and Chief Executive Officer, effective March 16, 2018.

Lonnie E. Bellar, Vice President, Gas Distribution, was named Senior Vice President-Operations effective January 15, 2017. He was named Chief Operating Officer and a director, effective March 16, 2018. John. P. Malloy, Vice President, Customer Services, was named Vice President, Gas Distribution effective January 15, 2017. Elizabeth J. McFarland was named Vice President, Customer Services effective January 15, 2017.

George R. Siemens, Vice President, External Affairs, retired January 20, 2017. David J. Freibert was named Vice President, External Affairs effective January 21, 2017.

Laura M. Douglas, Vice President, Corporate Responsibility and Community Affairs, retired January 20, 2017.

John N. Voyles, Jr., Vice President, Transmission and Generation Services, retired March 31, 2017. R. Scott Straight was named Vice President, Project Engineering effective April 1, 2017.

Gerald A. Reynolds, General Counsel, Chief Compliance Officer and Corporate Secretary, resigned September 21, 2017. Dorothy E. O'Brien, Vice President and Deputy General Counsel, Legal and Environmental Affairs was named Vice President and Deputy General Counsel, Legal and Environmental Affairs and Corporate Secretary, effective October 9, 2017. She was named Vice President and Deputy General Counsel, effective January 1, 2018 and announced her retirement, effective April 17, 2018. John R. Crockett III was named General Counsel, Chief Compliance Officer and Corporate Secretary, effective January 1, 2018.

Valerie L. Scott, Controller, was named Vice President, Accounting effective January 1, 2018 and announced her retirement, effective February 19, 2018. Christopher M. Garrett, Director of Rates was named Controller, effective January 1, 2018.

14. LG&E is a participant in a cash pooling arrangement, but its proprietary capital ratio is above 30 percent.

## STATEMENT OF INCOME

Quarterly
1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable
5. Do not report fourth quarter data in columns (e) and (f)
6. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility columnin a similar manner to a utility department. Spread the amount(s) over lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
7. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

STATEMENT OF INCOME FOR THE YEAR (Continued)

9. Use page 122 for important notes regarding the statement of income for any account thereof.
10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
11 Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purches, and a summary of the adjustments made to balance sheet, income, and expense accounts.
12. If any notes appearing in the report to stokholders are applicable to the Statement of Income, such notes may be included at page 122.
13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

STATEMENT OF RETAINED EARNINGS

1. Do not report Lines 49-53 on the quarterly version.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, year to date, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436 - 439 inclusive). Show the contra primary account affected in column (b)
4. State the purpose and amount of each reservation or appropriation of retained earnings.
5. List first account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, include them on pages 122-123.

## STATEMENT OF CASH FLOWS

(1) Codes to be used:(a) Net Proceeds or Payments;(b)Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.
(2) Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.
(3) Operating Activities - Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.
(4) Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

NOTES TO FINANCIAL STATEMENTS

1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Cormmission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.
7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.
8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred.
9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

NOTES TO FINANCIAL STATEMENTS (Continued)

## GLOSSARY OF TERMS AND ABBREVIATIONS

***KU*** - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

***LG&E*** - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

***LKE*** - LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

***LKS*** - LG&E and KU Services Company, a subsidiary of LKE that provides administrative, management and support services primarily to LKE and its subsidiaries.

***PPL*** - PPL Corporation, the parent holding company of LKE and other subsidiaries.

***PPL Services*** - PPL Services Corporation, a subsidiary of PPL that provides administrative, management and support services to PPL and its subsidiaries.

### ***Other terms and abbreviations***

***401(h) account(s)*** - a sub-account established within a qualified pension trust to provide for the payment of retiree medical costs.

***Advanced Metering System*** - meters and meter reading systems that provide two-way communication capabilities, which communicate usage and other relevant data to LG&E at regular intervals, and are also able to receive information from LG&E, such as software upgrades and requests to provide meter readings in real time.

***AFUDC*** - allowance for funds used during construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

***ARO*** - asset retirement obligation.

***CCR(s)*** - Coal Combustion Residual(s). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

***Clean Air Act*** - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

***Clean Water Act*** - federal legislation enacted to address certain environmental issues relating to water quality including effluent discharges, cooling water intake, and dredge and fill activities.

***CPCN*** - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facility for furnishing of utility service to the public.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

***Distribution Automation*** - advanced grid intelligence enabling LG&E to perform remote monitoring and control, circuit segmentation and "self-healing" of select distribution system circuits, improving grid reliability and efficiency.

***DSM*** - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM programs proposed by any utility under its jurisdiction. DSM programs consist of energy efficiency programs intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information regarding their energy usage and support energy efficiency.

***ECR*** - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and by products from the production of energy from coal.

***ELG(s)*** - Effluent Limitation Guidelines, regulations promulgated by the EPA.

***EPA*** - Environmental Protection Agency, a U.S. government agency.

***FERC*** - Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

***GAAP*** - Generally Accepted Accounting Principles in the U.S.

***GHG*** - greenhouse gas(es).

***GLT*** - gas line tracker. The KPSC approved mechanism for LG&E's recovery of costs associated with gas transmission lines, gas service lines, gas risers, leak mitigation, and gas main replacements.

***IBEW*** - International Brotherhood of Electrical Workers.

***IRS*** - Internal Revenue Service, a U.S. government agency.

***KPSC*** - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

***kWh*** - kilowatt hour, basic unit of electrical energy.

***LG&E 2010 Mortgage Indenture*** - LG&E's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as supplemented.

***LIBOR*** - London Interbank Offered Rate.

***MW*** - megawatt, one thousand kilowatts.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |

| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

***NAAQS*** - National Ambient Air Quality Standards periodically adopted pursuant to the Clean Air Act.

***NERC*** - North American Electric Reliability Corporation.

***NGCC*** - Natural gas-fired combined-cycle generating plant.

***NPNS*** - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

***OVEC*** - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LG&E owns a 5.63% interest, which is accounted for as a cost-method investment. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined capacities of 2,120 MW.

***PP&E*** - property, plant and equipment.

***RCRA*** - Resource Conservation and Recovery Act of 1976.

***RFC*** - Reliability*First* Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

***SCRs*** - selective catalytic reduction, a pollution control process for the removal of nitrogen oxide from exhaust gas.

***Scrubber*** - an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

***SEC*** - the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

***SERC*** - SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

***Superfund*** - federal environmental statute that addresses remediation of contaminated sites; states also have similar statutes.

***TCJA*** - Tax Cuts and Jobs Act. Comprehensive U.S. federal tax legislation enacted on December 22, 2017.

***VEBA*** - Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

**As permitted by the FERC for the Year Ended December 31, 2017 Form 1, the Notes to Financial Statements set forth below are principally from the Respondent's SEC Form 10-K for the Year Ended December 31, 2017, which was filed with the SEC on February 22, 2018. Accordingly, these Notes do not reflect updated information since this filing date except for information disclosed in Note 18 and Note 19.**

## NOTES TO FINANCIAL STATEMENTS

### 1. Summary of Significant Accounting Policies

### General

Capitalized terms and abbreviations appearing in the notes to financial statements are defined in the glossary. Dollars are in millions unless otherwise noted.

Presentation

The accompanying financial statements are prepared on the regulatory basis of accounting in accordance with the requirements of the FERC, which is a comprehensive basis of accounting other than GAAP. The significant differences between GAAP and FERC reporting are as follows:

| Reporting Classifications | FERC reporting | GAAP reporting |
|---|---|---|
| Cost of removal obligations | Reported in accumulated depreciation. | Reported in regulatory liabilities. |
| Certain retirement work in progress amounts | Reported in accumulated depreciation. | Reported in asset retirement obligations. |
| Certain intangible assets | Reported in utility plant and accumulated depreciation. | Reported in other intangibles. |
| Debt maturity classification | Reported in total in the long-term debt section. | Reported separately in current liabilities for the short-term portion and in long-term debt for the long-term portion. |
| Deferred taxes | Reported gross on the Balance Sheet (a deferred asset and a deferred liability are recorded). | Reported as a net asset or net liability. |
| Income taxes | Income taxes, deferred taxes and investment tax credits are reported on separate lines on the Income Statement. | Income taxes, deferred taxes and investment tax credits are netted on a single line on the Income Statement. |
| Utility plant acquired before November 1, 2010 | Reported at original cost. | Restated to net fair value as of November 1, 2010. |

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) __ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

| Reporting Classifications | FERC reporting | GAAP reporting |
|---|---|---|
| Regulatory asset maturity classification | Reported in total in deferred debits. | Short-term regulatory assets are reported in current assets and long-term regulatory assets are reported in other noncurrent assets. |
| Regulatory liability maturity classification | Reported in total in deferred credits. | Short-term regulatory liabilities are reported in current liabilities and long-term regulatory liabilities are reported in deferred credits and other noncurrent liabilities. |
| Deferred financing costs | Reported as deferred debits. | Reported as contra-liabilities and netted with long-term debt. |
| Amounts presented within the Balance Sheet and Income Statement | Reported without purchase accounting adjustments. | Reported with purchase accounting adjustments. |

Beginning in 2017, certain balances have been adjusted to reflect amounts at the original cost basis of accounting. Prior to 2017, certain amounts reflected the impact of purchase business combination accounting. While both presentations conform to the FERC USofA, the 2017 presentation more closely aligns with the manner in which LG&E's rates are calculated and reflective of amounts included in separate regulatory filings. This change in the basis of presentation is included in the 2017 regulatory basis financial statements only; the 2016 regulatory basis financial statements have not been revised. As GAAP requires a comparative presentation; we have reconciled the changes that would have been made to the 2016 statements in the Footnote Data (pages 450.X) to the regulatory basis financial statements had they been revised. This change in presentation was communicated to the FERC by letter dated August 3, 2017 and a related phone conversation. Purchase accounting amounts as of December 31, 2017 are presented below:

| FERC Line Item | Current Year |
|---|---|
| Utility Plant (101-106, 114) | $(1,256,617,708) |
| Accum. Prov. for Depr. Amort. Depl. (108, 110, 111, 115) | (1,256,617,708) |
| Nonutility Property (121) | (63,360) |
| Accum. Prov. for Depr. and Amort. (122) | (63,360) |
| Unamortized Debt Expenses (181) | (86,420) |
| Other Regulatory Assets (182.3) | 86,420 |
| Miscellaneous Deferred Debits (186) (a) | 435,967,597 |
| Accumulated Deferred Income Taxes (190) | 12,048,957 |
| Other Paid-In Capital (208-211) | 1,194,085,869 |
| Retained Earnings (215, 215.1, 216) | (804,928,517) |
| Other Regulatory Liabilities (254) | 46,810,245 |

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

| FERC Line Item | Current Year |
|---|---|
| Accum. Deferred Income Taxes-Other (283) | $12,048,957 |
| Provision for Deferred Income Taxes (410.1) | 11,330,571 |
| Provision for Deferred Income Taxes-Cr. (411.1) | 11,913,893 |
| Interest on Long-Term Debt (427) | 1,499,542 |

(a) Includes goodwill amounts of $389,157,352.

Business and Consolidation

LG&E is engaged in the generation, transmission, distribution and sale of electricity and in the distribution and sale of natural gas in Kentucky.

LG&E has no controlling interest in any variable interest entities. All other investments are carried at cost or fair value.

LG&E's financial statements include its share of any undivided interests in jointly owned facilities, as well as its share of the related operating costs of those facilities. See Note 9 for additional information.

Regulation

LG&E is a cost-based rate-regulated utility for which rates are set by regulators to enable LG&E to recover the costs of providing electric or gas service and to provide a reasonable return to its shareholder. Base rates are generally established based on a future test period. As a result, the financial statements are subject to the accounting for certain types of regulation as prescribed by GAAP and reflect the effects of regulatory actions. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover costs that are expected to be incurred in the future, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and regulatory liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 4 for additional details regarding regulatory matters.

Accounting Records

LG&E's system of accounts is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." LG&E continuously assesses potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events.

The accrual of contingencies that might result in gains is not recorded, unless realization is assured.

**Price Risk Management**

Interest rate contracts are used to hedge exposure to changes in the fair value of debt instruments and to hedge exposure to variability in expected cash flows associated with existing floating-rate debt instruments or forecasted fixed-rate issuances of debt. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain contracts may not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, markets are periodically assessed to determine whether market mechanisms have evolved that would facilitate net settlement. Certain derivative contracts may be excluded from the requirements of derivative accounting treatment because NPNS has been elected. These contracts are accounted for using accrual accounting. Contracts that have been classified as derivative contracts are reflected on the Balance Sheets at fair value. The portion of derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while the portion of derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent Liabilities." LG&E considers intra-month transactions to be spot activity, which is not accounted for as a derivative.

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the classification of the hedged items.

LG&E has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

Processes exist that allow for subsequent review and validation of the contract information as it relates to interest rate derivatives. The accounting department provides the treasury department with guidelines on appropriate accounting classifications for various contract types and strategies. Examples of accounting guidelines provided to the treasury department staff include, but are not limited to:

- Transactions to lock in an interest rate prior to a debt issuance can be designated as cash flow hedges, to the extent the forecasted debt issuances remain probable of occurring.

- Derivative transactions may be marked to fair value through regulatory assets/liabilities if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps that are included in customer rates.

See Notes 12 and 13 for additional information on derivatives.

**Revenue**

Revenue Recognition

Operating revenues are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' meters are read and bills are rendered throughout the month, rather than all meters being read and bills rendered at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by the estimated average cents per kWh. Any difference between estimated and actual revenues is adjusted the following month.

**Accounts Receivable**

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount.

Allowance for Doubtful Accounts

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs and the age of the receivable. Specific events, such as bankruptcies, are also considered. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) __ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

The changes in the allowance for doubtful accounts at December 31 were:

| | Balance at Beginning of Period | Additions: Charged to Income | Additions: Charged to Other Accounts | Deductions (a) | Balance at End of Period |
|---|---|---|---|---|---|
| 2017 | $ 2 | $ 2 | $ (1) | $ 2 | $ 1 |
| 2016 | 1 | 2 | 1 | 2 | 2 |

(a) Primarily related to uncollectible accounts written off.

**Cash**

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

**Fair Value Measurements**

LG&E values certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities, investments in securities in defined benefit plans, and cash and cash equivalents. LG&E uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

LG&E classifies fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

- **Level 1** - quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

- **Level 2** - inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.

- **Level 3 -** unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, LG&E's assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

**Investments**

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

Short-term Investments

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Other current assets" on the Balance Sheets.

Cost Method Investment

LG&E has an investment in OVEC, which is accounted for using the cost method. The investment is recorded in "Other noncurrent assets" on the Balance Sheets. LG&E and 11 other electric utilities are equity owners of OVEC. OVEC's power is currently supplied to LG&E and 12 other companies affiliated with the various owners. LG&E owns 5.63% of OVEC's common stock. Pursuant to a power purchase agreement, LG&E is contractually entitled to its ownership percentage of OVEC's output, which is approximately 120 MW.

LG&E's investment in OVEC is not significant. The direct exposure to loss as a result of LG&E's involvement with OVEC is generally limited to the value of its investment; however, LG&E is conditionally responsible for a pro-rata share of certain OVEC obligations, pursuant to its power purchase contract with OVEC. As part of PPL's acquisition of LKE, the value of the power purchase contract was recorded as an intangible asset with an offsetting regulatory liability, both of which are being amortized using the units-of-production method until March 2026. See Notes 4, 10 and 14 for additional discussion of the power purchase agreement.

**Long-Lived and Intangible Assets**

Property, Plant and Equipment

PP&E is recorded at original cost, unless impaired. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost for constructed assets includes material, labor, contractor costs, certain overheads and financing costs, where applicable. The cost of repairs and minor

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|
| NOTES TO FINANCIAL STATEMENTS (Continued) | | | |

replacements are charged to expense as incurred. LG&E records costs associated with planned major maintenance projects in the period in which the costs are incurred. No costs associated with planned major maintenance projects are accrued to PP&E in advance of the period in which the work is performed. LG&E accrues costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. All ARO depreciation expense is reclassified to a regulatory asset. See "Asset Retirement Obligations" below, Note 4, and Note 15 for additional information.

LG&E does not record AFUDC as a return is provided on construction work in progress.

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. LG&E's weighted-average rates of depreciation for regulated utility plant were 3.63% and 3.58% at December 31, 2017 and 2016.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to obtain an initial license and renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, LG&E considers:
- the expected use of the asset;
- the expected useful life of other assets to which the useful life of the intangible asset may relate;
- legal, regulatory, or contractual provisions that may limit the useful life;
- the company's historical experience as evidence of its ability to support renewal or extension;
- the effects of obsolescence, demand, competition, and other economic factors; and,
- the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

Asset Impairment (Excluding Investments)

LG&E reviews long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

LG&E reviews goodwill for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment in circumstances when a portion of goodwill has been allocated to a business to be disposed. LG&E is a single reporting unit.

LG&E may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a two-step quantitative test. If the qualitative evaluation (referred to as "step zero") is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step quantitative impairment test is not necessary. However, the quantitative impairment test is required if management concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the step zero assessment.

If the carrying amount of the reporting unit, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

LG&E elected to perform the qualitative step zero evaluation of goodwill as of October 1, 2017. This evaluation considered the excess of fair value over the carrying value of LG&E's reporting unit that was calculated during step one of the quantitative impairment tests performed in the fourth quarter of 2015, and the relevant events and circumstances that occurred since those tests were performed including:

- current year financial performance versus the prior year,
- changes in planned capital expenditures,
- the consistency of forecasted free cash flows,
- earnings quality and sustainability,
- changes in market participant discount rates,
- changes in long-term growth rates,
- changes in PPL's market capitalization, and
- the overall economic and regulatory environments in which these regulated entities operate.

Based on this evaluation, management concluded it was not more likely than not that the fair value of LG&E's reporting unit was less than its carrying value. As such, the two-step quantitative impairment test was not

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

performed and no impairment was recognized.

Asset Retirement Obligations

LG&E records liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased through the recognition of accretion expense. All ARO accretion and depreciation expenses are reclassified as a regulatory asset. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, at the time of retirement, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset. See Note 15 for additional information on AROs.

**Compensation and Benefits**

Defined Benefits

LG&E sponsors and participates in various defined benefit pension and other postretirement plans. The plans LG&E participates in are sponsored by LG&E and LKE. LKE allocates a portion of the liability and net periodic defined benefit pension and other postretirement costs of certain plans to LG&E based on its participation in those plans. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

LG&E and LKE use an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 4 for a discussion of the regulatory treatment of defined benefit costs and Note 8 for a discussion of defined benefits.

**Taxes**

Income Taxes

LG&E is included in PPL’s consolidated U.S. federal income tax return.

LG&E has completed or made reasonable estimates of the effects of the TCJA and reflected these amounts in its December 31, 2017 financial statements. LG&E continues to evaluate the application of the TCJA and has used significant management judgement to make certain assumptions concerning the application of various components of the law in the calculation of 2017 income tax expense. The current and deferred components of the income tax expense calculations that LG&E considers provisional due to uncertainty either with respect to the technical application of the law or the quantification of the impact of the law include (but are not limited to) tax depreciation. LG&E believes that classification of these items as provisional is appropriate. LG&E has accounted for these items based on their interpretation of the TCJA.

Further interpretive guidance on the TCJA from the IRS, Treasury, the Joint Committee on Taxation through its "Blue Book" or from Congress in the form of Technical Corrections may differ from LG&E's interpretation of the TCJA.

Significant management judgment is required in developing LG&E’s provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and valuation allowances on deferred tax assets.

Significant management judgment is also required to determine the amount of benefit to be recognized in relation to an uncertain tax position. LG&E uses a two-step process to evaluate tax positions. The first step requires LG&E to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires LG&E to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact LG&E’s financial statements in future periods.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

LG&E records valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. LG&E considers the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If LG&E determines that it is able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if LG&E determines that it is not able to realize all or part of

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) __ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made.

LG&E defers investment tax credits when the credits are utilized and amortize the deferred amounts over the average lives of the related assets.

LG&E recognizes interest and penalties in "Income Taxes" on its Statements of Income.

See Note 3 for additional discussion regarding income taxes, including the impact of the TCJA.

LG&E's provision for deferred income taxes for regulated assets is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheets in noncurrent "Regulatory assets" or "Regulatory liabilities."

LG&E's income tax provision is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Tax benefits are not shared between companies. LG&E is only entitled to tax benefits that it generated. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. LG&E did not have an intercompany tax payable or receivable at December 31, 2017 and an intercompany tax payable of $18 million at December 31, 2016.

Taxes, Other Than Income

LG&E presents sales taxes in "Other current liabilities" on the Balance Sheets. These taxes are not reflected on the Statements of Income. See Note 3 for details on taxes included in "Taxes, other than income" on the Statements of Income.

**Other**

Leases

LG&E evaluates whether arrangements entered into contain leases for accounting purposes. See Note 7 for additional information.

Fuel, Materials and Supplies

Fuel, natural gas stored underground and materials and supplies are valued using the average cost method. Fuel costs for electric generation are charged to expense as used. Natural gas supply costs are charged to expense as delivered to the distribution system. See Note 4 for further discussion of the fuel adjustment clause and gas supply clause.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31:

| | 2017 | 2016 |
|---|---|---|
| Fuel | $ 45 | $ 60 |
| Natural gas stored underground | 43 | 42 |
| Materials and supplies | 43 | 41 |
| Total | $ 131 | $ 143 |

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 10 for further discussion of recorded and unrecorded guarantees.

**2. Preferred Securities**

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2017 or 2016.

**3. Income and Other Taxes**

Tax Cuts and Jobs Act (TCJA)

On December 22, 2017, President Trump signed into law the TCJA. Substantially all of the provisions of the TCJA are effective for taxable years beginning after December 31, 2017. The TCJA includes significant changes to the taxation of corporations, including provisions specifically applicable to regulated public utilities. The more significant changes that impact LG&E are:

- The reduction in the U.S. federal corporate income tax rate from a top marginal rate of 35% to a flat rate of 21%, effective January 1, 2018;
- Limitations on the tax deductibility of interest expense, with an exception to these limitations for regulated public utilities;
- Full current year expensing of capital expenditures with an exception for regulated public utilities that qualify for the exception to the interest expense limitation; and
- The continuation of certain rate normalization requirements for accelerated depreciation benefits. For non-regulated businesses, the TCJA generally provides for full expensing of property acquired after September 27, 2017.

Under GAAP, the tax effect of changes in tax laws must be recognized in the period in which the law is enacted, or December 2017 for TCJA. The changes enacted by the TCJA were recorded as an adjustment to LG&E's deferred tax provision.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

The components of these adjustments are discussed below:

Reduction of U.S. Federal Corporate Income Tax Rate

GAAP requires deferred tax assets and liabilities to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. Thus, at the date of enactment, LG&E's deferred taxes were remeasured based upon the new U.S. federal corporate income tax rate of 21%. The changes in deferred taxes were, in large part, recorded as an offset to either a regulatory asset or regulatory liability and will be reflected in future rates charged to customers.

As indicated in Note 1 - "Summary of Significant Accounting Policies - Income Taxes", LG&E's regulated operations' accounting for income taxes is impacted by rate regulation. Therefore, reductions in accumulated deferred income tax balances due to the reduction in the U.S. federal corporate income tax rate to 21% under the provisions of the TCJA may result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers over a period of time. The TCJA includes provisions that stipulate how these excess deferred taxes are to be passed back to customers for certain accelerated tax depreciation benefits. Potential refunds of other deferred taxes will be determined by LG&E's regulators. The Balance Sheet at December 31, 2017 reflects a net increase of $532 million to LG&E's regulatory liabilities as a result of the TCJA.

The measurement period ends at the earlier of the time the company finalizes its accounting for the impact of the TCJA or one year.

LG&E has completed or made reasonable estimates of the effects of the TCJA and reflected these amounts in its December 31, 2017 financial statements. LG&E continues to evaluate the application of the TCJA and has made certain assumptions concerning the application of various components of the law in the calculation of 2017 income tax expense. The current and deferred components of the income tax expense calculations that LG&E considers provisional within the meaning of the SEC guidance due to uncertainty either with respect to the technical application of the law or the quantification of the impact of the law include (but are not limited to) tax depreciation. LG&E believes that classification of these items as provisional is appropriate. LG&E has accounted for these items based on its interpretation of the TCJA.

Further interpretive guidance on the TCJA from the IRS, Treasury, the Joint Committee on Taxation through its “Blue Book” or from Congress in the form of Technical Corrections may differ from LG&E's interpretation of the TCJA.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes and the tax effects of net operating loss and tax credit carryforwards. Net deferred tax assets have been recognized based on management's estimates of future taxable income.

LG&E’s provision for deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Significant components of LG&E's deferred income tax assets and liabilities at December 31 were as follows:

| | 2017 (a) | 2016 |
|---|---|---|
| **Deferred Tax Assets** | | |
| Federal loss carryforwards | $ 29 | $ 80 |
| Contribution in aid of construction | 11 | 18 |
| Regulatory liabilities | 21 | 34 |
| Deferred investment tax credits | 9 | 14 |
| Income taxes due to customers (b) | 142 | 17 |
| Derivative liability | 7 | 12 |
| Other | 12 | 17 |
| Total deferred tax assets | 231 | 192 |
| **Deferred Tax Liabilities** | | |
| Plant - net (b) | 724 | 1,058 |
| Regulatory assets | 40 | 65 |
| Accrued pension costs | 34 | 35 |
| Other | 5 | 8 |
| Total deferred tax liabilities | 803 | 1,166 |
| Net deferred tax liability | $ 572 | $ 974 |

(a) Deferred tax assets and liabilities at December 31, 2017 reflect the U.S. federal corporate income tax rate reduction from 35% to 21% enacted by the TCJA.
(b) The impact on net deferred tax liabilities as a result of the U.S. federal tax rate reduction enacted by the TCJA is primarily related to plant (net of net operating losses) and resulted in a regulatory liability for income taxes due to customers, the deferred tax impact of which is reflected as a deferred tax asset.

LG&E expects to have adequate levels of taxable income to realize its recorded deferred income tax assets.

At December 31, 2017, LG&E had $140 million of federal net operating loss carryforwards that expire in 2035, and $6 million of federal credit carryforwards that expire from 2034 to 2037.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

Details of the components of income tax expense and a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes for the years ended were:

| | 2017 | 2016 |
|---|---|---|
| **Income Tax Expense (Benefit)** | | |
| Current - Federal | $ - | $ (22) |
| Current - State | 5 | 1 |
| Total Current Expense (Benefit) | 5 | (21) |
| Deferred - Federal | 112 | 134 |
| Deferred - State | 14 | 18 |
| Total Deferred Expense, excluding benefits of operating loss carryforwards | 126 | 152 |
| Investment tax credit, net - Federal | (1) | (1) |
| Tax expense (benefit) of operating loss carryforwards | | |
| Deferred - Federal | 1 | (4) |
| Total Tax Expense (Benefit) of Operating Loss Carryforwards | 1 | (4) |
| Total income tax expense | $ 131 | $ 126 |
| | | |
| Total income tax expense - Federal | $ 112 | $ 107 |
| Total income tax expense - State | 19 | 19 |
| Total income tax expense | $ 131 | $ 126 |

| | 2017 | 2016 |
|---|---|---|
| **Reconciliation of Income Taxes** | | |
| Federal income tax on Income Before Income Taxes at statutory tax rate - 35% | $ 120 | $ 115 |
| Increase (decrease) due to: | | |
| State income taxes, net of federal income tax benefit | 13 | 12 |
| Amortization of investment tax credit | (1) | (1) |
| Other | (1) | - |
| Total increase | 11 | 11 |
| Total income tax expense | $ 131 | $ 126 |
| **Effective income tax rate** | 38.1% | 38.3% |

For the years ended December 31, 2017 and 2016, LG&E incurred expenses of $33 million and $32 million related to taxes, other than income. Taxes, other than income were comprised primarily of property taxes.

**Unrecognized Tax Benefits**

LG&E’s income tax provision is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Based on this tax sharing agreement, LG&E indirectly files tax returns in two major tax jurisdictions. At December 31, 2017, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

| | |
|---|---|
| U.S. (federal) | 2013 and prior |
| Kentucky (state) | 2012 and prior |

**4. Utility Rate Regulation**

**Regulatory Assets and Liabilities**

LG&E reflects the effects of regulatory actions in the financial statements for its cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the balance sheet date.

LG&E is subject to the jurisdiction of the KPSC and FERC.

LG&E's base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through other means. As such, LG&E generally earns a return on regulatory assets.

As a result of purchase accounting requirements, certain fair value amounts related to contracts that had favorable or unfavorable terms relative to market were recorded on the Balance Sheets with an offsetting regulatory asset or liability. LG&E recovers in customer rates the cost of power purchases. As a result, management believes the regulatory assets and liabilities created to offset the fair value amounts at LKE's acquisition date meet the recognition criteria established by existing accounting guidance and eliminate any rate-making impact of the fair value adjustments. LG&E's customer rates continue to reflect the original contracted prices for remaining contracts.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

The following table provides information about the regulatory assets and liabilities of cost-based rate-regulated utility operations at December 31:

| | 2017 | 2016 |
|---|---|---|
| Current Regulatory Assets: | | |
| Environmental cost recovery | $ 5 | $ 6 |
| Gas supply clause | 4 | 3 |
| Other | 3 | - |
| Total current regulatory assets | $ 12 | $ 9 |
| Noncurrent Regulatory Assets: | | |
| Defined benefit plans | $ 234 | $ 246 |
| Storm costs | 18 | 26 |
| Unamortized loss on debt | 16 | 16 |
| Interest rate swaps | 26 | 31 |
| Terminated interest rate swaps | 54 | 57 |
| AROs | 61 | 70 |
| Other | 2 | 4 |
| Total noncurrent regulatory assets | $ 411 | $ 450 |
| Current Regulatory Liabilities: | | |
| Gas line tracker | $ 3 | $ - |
| Fuel adjustment clause | - | 2 |
| Demand side management | - | 2 |
| Other | - | 1 |
| Total current regulatory liabilities | $ 3 | $ 5 |
| Noncurrent Regulatory Liabilities: | | |
| Net deferred taxes (a) | $ 552 | $ 23 |
| Accumulated cost of removal of utility plant | 282 | 305 |
| Power purchase agreement - OVEC (b) | 47 | 52 |
| Terminated interest rate swaps | 37 | 39 |
| Other | 1 | - |
| Total noncurrent regulatory liabilities | $ 919 | $ 419 |

(a) Primarily relates to excess deferred taxes recorded as a result of the TCJA, which lowered the federal corporate income tax rate effective January 1, 2018 requiring deferred tax balances and the associated regulatory liabilities to be remeasured as of December 31, 2017.
(b) This liability was recorded as an offset to an intangible asset that was recorded at fair value upon the acquisition of LKE by PPL.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory Matters."

Defined Benefit Plans

Defined benefit plan regulatory assets and liabilities represent prior service costs and net actuarial gains and losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices and, generally, are amortized over the average remaining service lives of plan participants. These regulatory assets are adjusted at least annually or whenever the funded status of defined benefit plans is remeasured. Of the regulatory asset balances recorded, costs of $26 million are expected to be amortized into net periodic defined benefit costs in 2018 in accordance with LG&E's pension accounting policy.

As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between pension cost calculated in accordance with LG&E's pension accounting policy and pension cost calculated using a 15-year amortization period for actuarial gains and losses is recorded as a regulatory asset. As of December 31, 2017 and 2016, the balances were $18 million and $11 million. Of the costs expected to be amortized into net periodic defined benefit costs in 2018, $10 million is expected to be recorded as a regulatory asset in 2018.

Storm Costs

LG&E has the ability to request from the KPSC the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer such costs for regulatory accounting and reporting purposes. Once such authority is granted, LG&E can request recovery of those expenses in a base rate case and begin amortizing the costs when recovery starts. LG&E's regulatory assets for storm costs are being amortized through various dates ending in 2020.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2044.

Regulatory Liability Associated with Net Deferred Taxes

Regulatory liabilities associated with net deferred taxes represent the future revenue impact from the adjustment of deferred income taxes required primarily for excess deferred taxes and unamortized investment tax credits. At December 31, 2017, excess deferred taxes recorded as a result of the TCJA were $532 million, which includes the gross-up associated with the excess deferred taxes.

Environmental Cost Recovery

Kentucky law permits LG&E to recover the costs, including a return of operating expenses and a return of and

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

on capital invested, of complying with the Clean Air Act and those federal, state or local environmental requirements, which apply to coal combustion wastes and by-products from coal-fired electricity generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. In December 2017, the KPSC issued orders continuing the use of an authorized return on equity of 9.7% for all existing approved ECR plans and projects. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is typically recovered within 12 months.

Fuel Adjustment Clause

LG&E's retail electric rates contain a fuel adjustment clause, whereby variances in the cost of fuel to generate electricity, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel adjustment clause and, to the extent appropriate, reestablish the fuel charge included in base rates. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered within 12 months.

Demand Side Management

LG&E's DSM programs consist of energy efficiency programs, intended to reduce peak demand and delay investment in additional power plant construction, provide customers with tools and information to become better managers of their energy usage and prepare for potential future legislation governing energy efficiency. LG&E's rates contain a DSM provision, which includes a rate recovery mechanism that provides for concurrent recovery of DSM costs and incentives, and allows for the recovery of DSM revenues from lost sales associated with the DSM programs. Additionally, LG&E earns an approved return on equity for capital expenditures associated with the residential and commercial load management and demand conservation programs. The cost of DSM programs is assigned only to the class or classes of customers that benefit from the programs.

AROs

As discussed in Note 1, all ARO accretion and depreciation expenses are reclassified as a regulatory asset. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, at the time of retirement, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

Power Purchase Agreement – OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, the fair values of the OVEC power purchase agreement were recorded on the Balance Sheets with an offset to a regulatory liability. The regulatory liability is being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition. See Notes 1, 10 and 14 for additional discussion of the power purchase agreement.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |

NOTES TO FINANCIAL STATEMENTS (Continued)

Interest Rate Swaps

Unrealized gains and losses are recorded as regulatory assets or regulatory liabilities until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the terms of the associated debt, which matures through 2033.

Terminated Interest Rate Swaps

Net realized gains and losses on all interest rate swaps are probable of recovery through regulated rates; as such, any gains and losses on these derivatives are included in regulatory assets or liabilities and are primarily recognized in "Interest Expense" on the Statements of Income over the life of the associated debt.

A net cash settlement of $9 million was paid on a swap that was terminated in December 2016. The KPSC authorized the recording of a regulatory asset and the recovery of such costs. As part of the Stipulation to the 2016 Kentucky rate case that became effective July 1, 2017, the KPSC authorized LG&E to recover the swap termination payment through amortization of the regulatory asset using a straight-line method over 17 years. The amortization of the regulatory asset is recognized in "Interest Expense" on the Statements of Income.

Plant Outage Costs

The Stipulation to the 2016 Kentucky rate case that became effective July 1, 2017 provided for the normalization of expenses associated with plant outages using an eight-year average. The eight-year average is comprised of four historical years' and four forecasted years' expenses. Plant outage expenses that are greater or less than the eight-year average will be collected from or returned to customers, through future base rates. These amounts are included in other current regulatory assets or other current regulatory liabilities above.

Gas Line Tracker

The GLT authorizes LG&E to recover its incremental operating expenses, depreciation, property taxes and cost of capital, including a return on equity, for capital associated with the five year gas service riser, leak mitigation and customer service line ownership programs. As part of this program, LG&E makes necessary repairs to the gas distribution system and assumes ownership of service lines when replaced. In the 2016 rate case, the KPSC approved additional projects for recovery through the GLT mechanism related to further gas line replacements and transmission pipeline modernizations. Effective July 1, 2017, LG&E is authorized to earn a 9.7% return on equity for the GLT mechanism. As part of the 2016 rate case, LG&E now annually files a combined application which includes revised rates based on projected costs and a balancing adjustment calculation with rates effective on the first billing cycle in May. After the completion of a plan year, the balancing adjustment, as part of the combined application filing to the KPSC, amends rates charged for the differences between the actual costs and actual GLT charges for the preceding year. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to these cost differences.

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report (Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

variances between actual and expected costs from prior periods are adjusted quarterly in rates, subject to approval by the KPSC. The gas supply clause also includes a separate natural gas procurement incentive mechanism, which allows rates to be adjusted annually to share savings between the actual cost of gas purchases and market indices with the shareholders and the customers during each performance-based rate year (12 months ending October 31). The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are typically recovered within 18 months.

**Regulatory Matters**

*Rate Case Proceedings*

In November 2016, LG&E filed a request with the KPSC for increases in annual base electricity and gas rates. The application included requests for CPCNs for implementing an Advanced Metering System program and a Distribution Automation program.

In April and May 2017, LG&E along with all intervening parties to the proceeding, filed with the KPSC, stipulation and recommendation agreements (stipulations) resolving all issues with the parties. Among other things, the proposed stipulations provided for increases in annual revenue requirements associated with base electricity rates of $59 million and base gas rates of $8 million, reflecting a return on equity of 9.75%, the withdrawal of the request for a CPCN for the Advanced Metering System and other changes to the revenue requirements, which dealt primarily with the timing of cost recovery, including depreciation rates.

In June 2017, the KPSC issued orders approving, with certain modifications, the proposed stipulations filed in April and May 2017. The orders modified the stipulations to provide for increases in annual revenue requirements associated with base electricity rates of $57 million, base gas rates of $7 million and incorporated an authorized return on equity of 9.7%. Consistent with the stipulations, the orders approved the request for implementing a Distribution Automation program and the withdrawal of a request for a CPCN for the Advanced Metering System program. The orders also approved new depreciation rates that resulted in higher depreciation of approximately $4 million in 2017, exclusive of net additions to PP&E. The orders resulted in base electricity and gas rate increases of 5.2% and 2.1%. The new base rates and all elements of the orders became effective July 1, 2017. On June 23, 2017, the KPSC issued orders establishing an authorized return on equity of 9.7% for all existing approved ECR plans and projects, replacing the prior authorized return on equity levels of 9.8% for CCR projects and 10% for all other ECR approved projects, effective with bills issued in August 2017. The annual impact of the new authorized return for ECR projects is not expected to be significant.

*CPCN Filing*

On January 10, 2018, LG&E filed an application for a CPCN with the KPSC requesting approval for implementing Advanced Metering Systems across its service territory, including gas operations. The full Advanced Metering Systems deployment is expected to be completed in 2021 with estimated capital costs of $104 million and $62 million for electric and gas service. The full deployment will also result in incremental operation and maintenance costs during the deployment phase of $11 million and $3 million for electric and gas service.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

*TCJA Impact on Rates*

On December 21, 2017, Kentucky Industrial Utility Customers, Inc. submitted a complaint with the KPSC against LG&E and other utility companies in Kentucky, alleging that their respective rates would no longer be fair, just and reasonable following the enactment of the TCJA reducing the federal corporate tax rate from 35% to 21%. The complaint requested the KPSC to issue an order requiring LG&E to begin deferring, as of January 1, 2018, the revenue requirement effect of all income tax expense savings resulting from the federal corporate income tax reduction, including the amortization of excess deferred income taxes by recording those savings in a regulatory liability account and establishing a process by which the federal corporate income tax savings will be passed back to customers.

On December 27, 2017, as a result of the complaint, the KPSC ordered LG&E to satisfy or address the complaint and commence recording regulatory liabilities to reflect the reduction in the federal corporate tax rate to 21% and the associated savings in excess deferred taxes on an interim basis until utility rates are adjusted to reflect the federal tax savings.

On January 8, 2018, LG&E responded to the complaint, denying certain claims in the complaint but concurring that the TCJA will result in savings for its customers. LG&E stated in its response that the company recorded regulatory liabilities as of December 31, 2017 to reflect the reduction in the federal corporate tax rate and the associated savings in excess deferred taxes and will make changes to its ECR, DSM and GLT rate mechanisms to begin providing the applicable savings to customers. LG&E also offered to establish a new bill credit mechanism effective with the April 2018 billing cycle to begin distributing the tax savings associated with base rates to customers.

On January 29, 2018, LG&E reached a settlement agreement to commence returning savings related to the TCJA to its customers. The savings will be distributed through its ECR, DSM and GLT rate mechanisms beginning in March 2018 and through a new bill credit mechanism from April 1, 2018 through April 30, 2019. The estimated impact of the rate reduction represents approximately $69 million in electricity revenues and $17 million in gas revenues for the period January 2018 through April 2019. Ongoing tax savings are expected to also be addressed in LG&E's next base rate case. LG&E indicated its intent to file an application for base rate changes during 2018 to be effective during spring 2019. The settlement agreement is subject to review and approval by the KPSC. An order in the proceeding may occur during the first quarter of 2018.

The FERC has not issued any guidance on the effect on rates of the TCJA.
LG&E cannot predict the outcome of these proceedings.

*Gas Franchise*

LG&E’s gas franchise agreement for the Louisville/Jefferson County service area expired in March 2016. In August 2016, LG&E and Louisville/Jefferson County entered into a revised franchise agreement with a five-year term (with renewal options). The franchise fee may be modified at Louisville/Jefferson County's election upon 60 days' notice. However, any franchise fee is capped at 3% of gross receipts for natural gas service within the franchise area. The agreement further provides that if the KPSC determines that the franchise fee should be recovered from LG&E's customers, the franchise fee shall revert to zero. In August 2016, LG&E

filed an application in a KPSC proceeding to review and rule upon the recoverability of the franchise fee.

In August 2016, Louisville/Jefferson County submitted a motion to dismiss the proceeding filed by LG&E and, in November 2016, filed an amended complaint against LG&E relating to these issues. LG&E submitted KPSC filings to respond to, request dismissal of and consolidate certain claims or aspects of the proceedings. In January 2017, the KPSC issued an order denying Louisville/Jefferson County's motion to dismiss, consolidating the matter with LG&E's filed application and establishing a procedural schedule for the case. In September 2017, oral arguments were heard by the KPSC and a final order is expected in 2018. Until the KPSC issues a final order in this proceeding, LG&E cannot predict the ultimate outcome of this matter but does not anticipate that it will have a material effect on its financial condition or results of operation. LG&E continues to provide gas service to customers in this franchise area at existing rates, but without collecting or remitting a franchise fee.

## 5. Financing Activities

### Credit Arrangements and Short-term Debt

LG&E maintains a credit facility to enhance liquidity, provide credit support and provide a backstop to its commercial paper program. The Syndicated Credit Facility is recorded as “Short-term debt” on the Balance Sheets and the borrowings under the Term Loan Facility are recorded as “Long-term debt” on the Balance Sheet. The following credit facilities were in place at December 31:

| | 2017 | | | 2016 |
|---|---|---|---|---|
| | Syndicated Credit Facility (a) (b) | Term Loan Credit Facility (a) (c) | Total Credit Facilities | Syndicated Credit Facility |
| Expiration Date | Jan-2022 | Oct-2019 | | Dec 2020 |
| Capacity | $ 500 | $ 200 | $ 700 | $ 500 |
| Borrowed | $ - | $ 100 | $ 100 | $ - |
| Commercial Paper Issuances | $ 199 | $ - | $ 199 | $ 169 |
| Unused Capacity | $ 301 | $ 100 | $ 401 | $ 331 |

(a) LG&E pays customary fees under its facilities and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.
(b) The facilities contain a financial covenant requiring debt to total capitalization not to exceed 70% as calculated in accordance with the facility and other customary covenants. Additionally, as it relates to the syndicated credit facility and subject to certain conditions, LG&E may request up to a $100 million increase in its facility's capacity.
(c) LG&E entered into a term loan credit agreement in October 2017 whereby it may borrow up to $200 million. The outstanding borrowings at December 31, 2017 bore interest at a rate of 2.06%

In January 2018, LG&E borrowed the remaining $100 million available under its $200 million term loan facility. The proceeds were used to repay short-term debt and for general corporate purposes.

In January 2018, the expiration date for LG&E's syndicated credit facility expiring in January 2022 was extended to January 2023.

LG&E maintains a commercial paper program to provide an additional financing source to fund short-term liquidity needs, as necessary. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by LG&E's syndicated credit facility. The following commercial paper program was in place at December 31:

| | 2017 | | 2016 | |
|---|---|---|---|---|
| Weighted - Average Interest Rate | | 1.83% | | 0.94% |
| Capacity | $ | 350 | $ | 350 |
| Commercial Paper Issuances | $ | 199 | $ | 169 |
| Unused Capacity | $ | 151 | $ | 181 |

See Note 11 for discussion of intercompany borrowings.

NOTES TO FINANCIAL STATEMENTS (Continued)

**Long-term Debt**

| | December 31, 2017 | December 31, 2016 |
|---|---|---|
| Term Loan Credit Facility | $ 100 | $ - |
| First Mortgage Bonds | 1,624 | 1,634 |
| Total Long-term Debt Before Adjustments | 1,724 | 1,634 |
| **Other** | | |
| Fair market value adjustments | - | (1) |
| Unamortized discount | (4) | (4) |
| Unamortized debt issuance costs | (11) | (12) |
| Total Long-term Debt | 1,709 | 1,617 |
| Less current portion of Long-term Debt | 98 | 194 |
| Total Long-term Debt, noncurrent | $ 1,611 | $ 1,423 |
| Weighted-Average Rate (a): | | |
| Term Loan | 2.06% | - |
| First Mortgage Bonds | 3.48% | 3.45% |
| Maturities (a): | | |
| Term Loan | 2019 | - |
| First Mortgage Bonds | 2018 - 2045 | 2017 - 2045 |

(a) The table reflects principal maturities only, based on stated maturities or earlier put dates, and the weighted-average rates as of December 31, 2017.

LG&E's first mortgage bonds are secured by the lien of the LG&E 2010 Mortgage Indenture which creates a lien, subject to certain exceptions and exclusions, on substantially all of LG&E's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $4.7 billion and $4.4 billion at December 31, 2017 and 2016.

The first mortgage bonds were issued to the respective trustees of tax-exempt revenue bonds to secure obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amounts, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E. The related revenue bond documents allow LG&E to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2017, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a term rate mode totaled $391 million. At December 31, 2017, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a variable rate mode totaled $147 million. These variable rate tax-exempt revenue bonds are subject to tender for purchase by LG&E at the option of the holder and to mandatory tender for purchase by LG&E upon the occurrence of certain events.

None of the outstanding debt securities noted above have sinking fund requirements. The aggregate maturities of long-term debt, based on stated maturities or earlier put dates, for the periods 2018 through 2022 and thereafter are as follows:

| | | |
|---|---|---|
| 2018 | $ | 98 |
| 2019 | | 334 |
| 2020 | | - |
| 2021 | | - |
| 2022 | | - |
| Thereafter | | 1,292 |
| Total | $ | 1,724 |

In April 2017, the Louisville/Jefferson County Metro Government of Kentucky remarketed $128 million of Pollution Control Revenue Bonds, 2003 Series A (Louisville Gas and Electric Company Project) due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.50% through their mandatory purchase date of April 1, 2019.

In June 2017, the County of Trimble, Kentucky issued $60 million of Environmental Facilities Revenue Refunding Bonds, 2017 Series A (Louisville Gas and Electric Company Project) due 2033 on behalf of LG&E. The bonds were issued bearing interest at a rate of 3.75% through their maturity and are subject to an optional redemption on or after June 1, 2027. The proceeds of the bonds were used to redeem $60 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series A (Louisville Gas and Electric Company Project) due 2033 previously issued by the County of Trimble, Kentucky on behalf of LG&E.

In June 2017, the Louisville/Jefferson County Metro Government of Kentucky remarketed $31 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series A (Louisville Gas and Electric Company Project) due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.25% through their mandatory purchase date of June 3, 2019.

In June 2017, the Louisville/Jefferson County Metro Government of Kentucky remarketed $35 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series B (Louisville Gas and Electric Company Project) due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.25% through their mandatory purchase date of June 3, 2019.

In October 2017, LG&E entered into a term loan credit facility with a term expiring in October 2019. As of

December 31, 2017, LG&E had outstanding borrowings of $100 million under this agreement at a rate of 2.06%. In January 2018, LG&E borrowed the remaining $100 million available under this facility.

In November 2017, LG&E redeemed, at par, its $10 million Louisville/Jefferson Country Metro Government Environmental Facilities Revenue Bonds, 2001 Series A (Louisville Gas and Electric Company Project) due 2027.

**Legal Separateness**

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of LKE are each separate legal entities. These subsidiaries are not liable for the debts of LKE. Accordingly, creditors of LKE may not satisfy their debts from the assets of its subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, LKE is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of its subsidiaries may not satisfy their debts from the assets of LKE (or its other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

**Distributions and Related Restrictions**

LKE primarily relies on dividends from its subsidiaries to fund its distributions to PPL. LG&E is subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E believes, however, that this statutory restriction, as applied to its circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. In February 2012, LG&E petitioned the FERC requesting authorization to pay dividends in the future based on retained earnings balances calculated without giving effect to the impact of purchase accounting adjustments for the acquisition of LKE by PPL. In May 2012, the FERC approved the petition with the further condition that LG&E may not pay dividends if such payment would cause its adjusted equity ratio to fall below 30% of total capitalization. Accordingly, at December 31, 2017, net assets of $1.1 billion were restricted for purposes of paying dividends to LKE, and net assets of $1.4 billion were available for payment of dividends to LKE. LG&E believes it will not be required to change its current dividend practice as a result of the foregoing requirement. Orders from the KPSC require LG&E to obtain prior consent or approval before lending amounts to PPL or LKE.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

## 6. Acquisitions, Development and Divestitures

From time to time, LG&E evaluates opportunities for potential acquisitions, divestitures and development projects. Development projects are reexamined based on market conditions and other factors to determine whether to proceed with, modify or terminate the projects. Any resulting transactions may impact future financial results.

### Development

Capacity Needs

In December 2014, a final order was issued by the KPSC approving LG&E's and KU's request to construct a solar generation facility at the E.W. Brown facility. The jointly-owned 10 MW facility was placed into commercial operation in June 2016 at a cost of $25 million.

## 7. Leases

LG&E has entered into various agreements for the lease of office space, vehicles, land, gas storage and other equipment.

Rent - Operating Leases

Rent expense for operating leases was $15 million for the years ended December 31, 2017 and 2016.

Total future minimum rental payments for all operating leases are estimated to be:

| | | |
|---|---|---|
| 2018 | $ | 15 |
| 2019 | | 8 |
| 2020 | | 5 |
| 2021 | | 3 |
| 2022 | | 2 |
| Thereafter | | 6 |
| Total | $ | 39 |

## 8. Retirement and Postemployment Benefits

### Defined Benefits

In addition to the plan it sponsors, LG&E is allocated a portion of the funded status and costs of the plan sponsored by LKE based on its participation in the plan, which management believes is reasonable. LG&E's and LKE's defined benefit pension plans were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

the standard matching contributions to their savings plans.

The majority of employees are eligible for certain health care and life insurance benefits upon retirement through a contributory plan sponsored by LKE. Postretirement health benefits may be paid from 401(h) accounts established as part of the LKE plan within the PPL Services Corporation Master Trust, funded VEBA trusts, and company funds.

The following table provides the components of net periodic defined benefit costs for LG&E's pension benefit plan for the years ended December 31:

| | 2017 | 2016 |
|---|---|---|
| **Net periodic defined benefit costs (credits):** | | |
| Service cost | $ 1 | $ 1 |
| Interest cost | 13 | 15 |
| Expected return on plan assets | (22) | (21) |
| Amortization of: | | |
| Prior service cost | 5 | 4 |
| Actuarial loss (a) | 9 | 7 |
| Net periodic defined benefit costs (b) | $ 6 | $ 6 |
| Settlements (b) | | |
| Net periodic defined benefit costs (credits) | $ 6 | $ 6 |
| **Other Changes in Plan Assets and Benefit Obligations Recognized in Regulatory Assets - Gross:** | | |
| Net (gain) loss | $ (9) | $ 22 |
| Prior service cost | 7 | - |
| Amortization of: | | |
| Prior service credit | (5) | (4) |
| Actuarial gain | (9) | (7) |
| Total recognized in regulatory assets | (16) | 11 |
| Total recognized in net periodic benefit costs (credits) and regulatory assets | $ (10) | $ 17 |

(a) As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between actuarial (gain)/loss calculated in accordance with LG&E's pension accounting policy and the actuarial (gain)/loss calculated using a 15 year amortization period is recorded as a regulatory asset. This difference was $4 million in 2017 and $5 million in 2016.
(b) Due to the amount of lump sum payment distributions from the LG&E qualified pension plan, a settlement charge of $5 million was incurred. In accordance with existing regulatory accounting treatment, LG&E has maintained the settlement charge in regulatory assets. The amount will be amortized in accordance with existing regulatory practice.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original (2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

For the pension plan sponsored by LG&E, the estimated amount to be amortized from regulatory assets into net periodic defined benefit costs in 2018 is $14 million ($5 million amortization of prior service cost and $9 million amortization of actuarial loss). For LG&E's participation in LKE's pension plan, the estimated amount to be amortized from regulatory assets into net periodic defined benefit costs in 2018 is $11 million ($2 million amortization of prior service cost and $9 million amortization of actuarial loss). For LG&E's participation in LKE's other postretirement plan, the estimated amount to be amortized from regulatory assets into net periodic defined benefit costs in 2018 is less than $1 million (amortization of prior service cost).

For the pension plan sponsored by LG&E, of the costs expected to be amortized into net periodic defined benefit costs in 2018, $3 million is expected to be recorded as a regulatory asset representing the difference between net periodic defined benefit costs under the pension accounting policy and using a 15 year amortization period for gains and losses. For LG&E's participation in LKE's pension plan, of the costs expected to be amortized into net periodic defined benefit costs in 2018, $4 million is expected to be recorded as a regulatory asset for this difference.

The net periodic defined benefit costs charged to operating expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for pension benefits sponsored by LG&E were $3 million and $4 million in 2017 and in 2016. Allocations to LG&E for net periodic defined benefit costs charged to operating expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for pension benefits were $5 million and $4 million in 2017 and 2016. Allocations to LG&E for net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction work in progress and other non-expense accounts, for other postretirement benefits were $3 million in 2017 and 2016. These allocated amounts are based on LG&E's participation in those plans, which management believes is reasonable.

For the pension plan sponsored by LG&E, of the costs charged to operating expense or regulatory assets, excluding amounts charged to construction and other non-expense accounts, $2 million were recorded as regulatory assets during 2017 and 2016, representing the difference between net periodic defined benefit costs under the pension accounting policy and using a 15 year amortization period for gains and losses. An additional $2 million and $1 million were recorded as a regulatory asset for this difference for the pension plan in which LG&E participates during 2017 and 2016.

LG&E is also allocated costs of defined benefit plans sponsored by LKE. See Note 11 for additional information on costs allocated to LG&E from LKS. Allocations are based on LG&E's participation in those plans, which management believes are reasonable.

LKE and LG&E utilized the mortality tables issued by the Society of Actuaries in October 2014 (RP-2014 base tables with collar and factor adjustments, where applicable) for their defined benefit pension plans and LKE's other postretirement benefit plan. In addition, in 2014, LKE and LG&E updated the basis for estimating projected mortality improvements and selected the IRS BB-2D two-dimensional improvement scales on a generational basis for all their defined benefit pension plans and LKE's other postretirement benefit plan. In 2017, LKE and LG&E updated to the MP-2017 mortality improvement scale from 2006 on a generational basis. This new mortality assumption reflects the expectation of lower ongoing improvements in life expectancies.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used in the valuation of the benefit obligations at December 31:

| | 2017 | 2016 |
|---|---|---|
| Discount rate | 3.65% | 4.13% |

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used to determine the net periodic defined benefit costs for the years ended December 31:

| | 2017 | 2016 |
|---|---|---|
| Discount rate | 4.13% | 4.49% |
| Expected return on plan assets (a) | 7.00% | 7.00% |

(a) The expected long-term rates of return for pension benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. The plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

The funded status of LG&E's plan at December 31 was as follows:

| | 2017 | 2016 |
|---|---|---|
| **Change in Benefit Obligation** | | |
| Benefit Obligation, beginning of period | $ 329 | $ 326 |
| Service cost | 1 | 1 |
| Interest cost | 13 | 15 |
| Plan amendments | 6 | - |
| Actuarial loss | 11 | 15 |
| Gross benefits paid (a) | (34) | (28) |
| Benefit Obligation, end of period | $ 326 | $ 329 |
| **Change in Plan Assets** | | |
| Plan assets at fair value, beginning of period | 318 | 297 |
| Actual return on plan assets | 41 | 14 |
| Employer contributions | - | 35 |
| Gross benefits paid (a) | (34) | (28) |
| Plan assets at fair value, end of period | 325 | 318 |
| Funded Status, end of period | $ (1) | $ (11) |
| **Amounts recognized in the Balance Sheets consist of:** | | |
| Noncurrent liability | (1) | (11) |
| Net amount recognized, end of period | $ (1) | $ (11) |
| **Amounts recognized in regulatory assets (pre-tax) consists of:** | | |
| Prior service cost | $ 27 | $ 25 |
| Net actuarial loss | 92 | 110 |
| Total | $ 119 | $ 135 |
| **Total accumulated benefit obligation for defined benefit** | $ 326 | $ 329 |

(a) The pension plan was amended in December 2015 to allow active participants and terminated vested participants who had not previously elected a form of payment of their benefit to elect to receive their accrued pension benefit as a one-time lump-sum payment effective January 1, 2016. The projected benefit obligation at December 31, 2015 increased by $10 million as a result of the amendment. Gross benefits paid by the plan include $19 million and $14 million of lump-sum cash payments made to the participants during 2017 and 2016 in connection with this offering.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original (2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

Amounts recognized in LG&E's regulatory assets based on LG&E's participation in LKE's pension plan and other postretirement plan at December 31 were as follows:

| | Pension Benefits | | Other Postretirement Benefits | |
|---|---|---|---|---|
| | 2017 | 2016 | 2017 | 2016 |
| Prior service cost | $ 3 | $ 5 | $ 6 | $ 3 |
| Net actuarial loss | 85 | 88 | 2 | 5 |
| Total | $ 88 | $ 93 | $ 8 | $ 8 |

As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between net periodic defined benefit costs calculated in accordance with LG&E's pension accounting policy and the net periodic defined benefit costs calculated using a 15 year amortization period for actuarial gains and losses is recorded as a regulatory asset. This difference for LG&E's plan, LG&E's participation in LKE's plan and allocations to LG&E from LKS was $19 million and $10 million as of December 31, 2017 and 2016.

LG&E's pension plan had projected and accumulated benefit obligations in excess of plan assets at December 31, 2017 and 2016.

In addition to the plan it sponsors, LG&E is allocated a portion of the funded status and costs of certain defined benefit plans sponsored by LKE. LG&E is also allocated costs of defined benefit plans from LKS for defined benefit plans sponsored by LKE. See Note 11 for additional information on costs allocated to LG&E from LKS. These allocations are based on LG&E's participation in those plans, which management believes are reasonable. The actuarially determined obligations of current active employees and retired employees are used as a basis to allocate total plan activity, including active and retiree costs and obligations. Allocations to LG&E for pension benefits resulted in a liability of $44 million and $42 million at December 31, 2017 and 2016. Allocations to LG&E for other postretirement benefits resulted in a liability of $74 million and $76 million at December 31, 2017 and 2016.

**Plan Assets - Pension Plans**

The pension plans sponsored by LKE and LG&E are invested in the PPL Services Corporation Master Trust (the Master Trust) that also includes 401(h) accounts that are restricted for certain other postretirement benefit obligations of PPL and LKE. The investment strategy for the Master Trust is to achieve a risk-adjusted return on a mix of assets that, in combination with LG&E's funding policy, will ensure that sufficient assets are available to provide long-term growth and liquidity for benefit payments, while also managing the duration of the assets to complement the duration of the liabilities. The Master Trust benefits from a wide diversification of asset types, investment fund strategies and external investment fund managers, and therefore has no significant concentration of risk.

The investment policy of the Master Trust outlines investment objectives and defines the responsibilities of the EBPB, external investment managers, investment advisor and trustee and custodian. The investment policy is reviewed annually by PPL's Board of Directors.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

The EBPB created a risk management framework around the trust assets and pension liabilities. This framework considers the trust assets as being composed of three sub-portfolios: growth, immunizing and liquidity portfolios. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities, generally with long durations, and derivative positions. The immunizing portfolio is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

Target allocation ranges have been developed for each portfolio based on input from external consultants with a goal of limiting funded status volatility. The EBPB monitors the investments in each portfolio, and seeks to obtain a target portfolio that emphasizes reduction of risk of loss from market volatility. In pursuing that goal, the EBPB establishes revised guidelines from time to time. EBPB investment guidelines as of the end of 2017 are presented below.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |

| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

The asset allocation for the trust and the target allocation by portfolio at December 31 are as follows:

| | Percentage of Trust Assets 2017 (a) | 2017 Target Asset Allocation (a) Weighted Average |
|---|---|---|
| **Growth Portfolio** | **56%** | **55%** |
| Equity securities | 32% | |
| Debt securities (b) | 14% | |
| Alternative investments | 10% | |
| **Immunizing Portfolio** | **43%** | **43%** |
| Debt securities (b) | 39% | |
| Derivatives | 4% | |
| **Liquidity Portfolio** | **1%** | **2%** |
| Total | 100% | 100% |

| | Percentage of Trust Assets 2016 |
|---|---|
| **Growth Portfolio** | **52%** |
| Equity securities | 30% |
| Debt securities (b) | 12% |
| Alternative investments | 10% |
| **Immunizing Portfolio** | **46%** |
| Debt securities (b) | 43% |
| Derivatives | 3% |
| **Liquidity Portfolio** | **2%** |
| Total | 100% |

(a) Allocations exclude consideration of a group annuity contract held by the plan sponsored by LKE.
Includes commingled debt funds, which are treated as debt securities for asset allocation purposes.

LG&E's and LKE's pension plan assets are invested solely in the Master Trust, which is fully disclosed below. The fair value of LG&E's plan's assets of $325 million and $318 million at December 31, 2017 and 2016 represents an interest of approximately 9% and 10% in the Master Trust. The fair value of LKE's plans' assets of $1.4 billion and $1.3 billion at December 31, 2017 and 2016 represents an interest of approximately 40% and 41% in the Master Trust.

(a) In accordance with accounting guidance certain investments that are measured at fair value using the net asset value per share (NAV), or its equivalent practical expedient, have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.

(b) Receivables and payables represent amounts for investments sold/purchased but not yet settled along with interest and dividends earned but not yet received.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2017 is as follows:

| | Corporate debt | Insurance contracts | Total |
|---|---|---|---|
| Balance at beginning of period | $ 13 | $ 27 | $ 40 |
| Actual return on plan assets | | | |
| Relating to assets still held | | | |
| at the reporting date | - | 1 | 1 |
| Purchases, sales and settlements | - | (4) | (4) |
| Balance at end of period | $ 13 | $ 24 | $ 37 |

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2016 is as follows:

| | Corporate debt | Insurance contracts | Total |
|---|---|---|---|
| Balance at beginning of period | $ 10 | $ 32 | $ 42 |
| Actual return on plan assets | | | |
| Relating to assets still held | | | |
| at the reporting date | - | 1 | 1 |
| Purchases, sales and settlements | 3 | (6) | (3) |
| Balance at end of period | $ 13 | $ 27 | $ 40 |

The fair value measurements of cash and cash equivalents are based on the amounts on deposit.

The market approach is used to measure fair value of equity securities. The fair value measurements of equity securities (excluding commingled funds), which are generally classified as Level 1, are based on quoted prices in active markets. These securities represent actively and passively managed investments that are managed against various equity indices.

Investments in commingled equity and debt funds are categorized as equity securities. Investments in commingled equity funds include funds that invest in U.S. and international equity securities. Investments in commingled debt funds include funds that invest in a diversified portfolio of emerging market debt obligations, as well as funds that invest in investment grade long-duration fixed-income securities.

The fair value measurements of debt securities are generally based on evaluations that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences. The fair value of debt securities is generally measured using a market approach, including the use of pricing models which incorporate observable inputs. Common inputs include benchmark yields, relevant trade data, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as payment data, future predicted cash flows, collateral performance and new

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

issue data. For the Master Trust, these securities represent investments in securities issued by U.S. Treasury and U.S. government sponsored agencies; investments securitized by residential mortgages, auto loans, credit cards and other pooled loans; investments in investment grade and non-investment grade bonds issued by U.S. companies across several industries; investments in debt securities issued by foreign governments and corporations.

Investments in real estate represent an investment in a partnership whose purpose is to manage investments in core U.S. real estate properties diversified geographically and across major property types (e.g., office, industrial, retail, etc.). The manager is focused on properties with high occupancy rates with quality tenants. This results in a focus on high income and stable cash flows with appreciation being a secondary factor. Core real estate generally has a lower degree of leverage when compared with more speculative real estate investing strategies. The partnership has limitations on the amounts that may be redeemed based on available cash to fund redemptions. Additionally, the general partner may decline to accept redemptions when necessary to avoid adverse consequences for the partnership, including legal and tax implications, among others. The fair value of the investment is based upon a partnership unit value.

Investments in private equity represent interests in partnerships in multiple early-stage venture capital funds and private equity fund of funds that use a number of diverse investment strategies. The partnerships have limited lives of at least 10 years, after which liquidating distributions will be received. Prior to the end of each partnership's life, the investment cannot be redeemed with the partnership; however, the interest may be sold to other parties, subject to the general partner's approval. The Master Trust has unfunded commitments of $28 million that may be required during the lives of the partnerships. Fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Investments in hedge funds represent investments in a fund of hedge funds. Hedge funds seek a return utilizing a number of diverse investment strategies. The strategies, when combined, aim to reduce volatility and risk while attempting to deliver positive returns under most market conditions. Major investment strategies for the fund of hedge funds include long/short equity, tactical trading, event driven, and relative value. Shares may be redeemed within 45 days with prior written notice. The fund is subject to short term lockups and other restrictions. The fair value for the fund has been estimated using the net asset value per share.

The fair value measurements of derivative instruments utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. These securities primarily represent investments in interest rate swaps and swaptions (the option to enter into an interest rate swap), which are valued based on the swap details, such as swap curves, notional amount, index and term of index, reset frequency, volatility and payer/receiver credit ratings.

Insurance contracts, classified as Level 3, represent an investment in an immediate participation guaranteed group annuity contract. The fair value is based on contract value, which represents cost plus interest income less distributions for benefit payments and administrative expenses.

NOTES TO FINANCIAL STATEMENTS (Continued)

date of purchase. The primary objective of the fund is a level of current income consistent with stability of principal and liquidity. Redemptions can be made daily on this fund.

Investments in large-cap equity securities represent investments in a passively managed equity index fund that invests in securities and a combination of other collective funds. Fair value measurements are not obtained from a quoted price in an active market but are based on firm quotes of net asset values per share as provided by the trustee of the fund. Redemptions can be made daily on this fund.

Investments in commingled debt securities represent investments in a fund that invests in a diversified portfolio of investment grade long-duration fixed income securities. Redemptions can be made daily on these funds.

Investments in corporate bonds represent investment in a diversified portfolio of investment grade long-duration fixed income securities. The fair value of debt securities are generally based on evaluations that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences.

Investments in municipalities represent investments in a diverse mix of tax-exempt municipal securities. The fair value measurements for these securities are based on recently executed transactions for identical securities or for similar securities.

**Expected Cash Flows - Defined Benefit Plans**

While LG&E's and LKE's defined benefit pension plans have the option to utilize available prior year credit balances to meet current and future contribution requirements, LG&E contributed $10 million to its pension plan and $44 million to the LKE pension plan in January 2018. No additional contributions are expected in 2018.

LKE is not required to make contributions to its other postretirement benefit plan but has historically funded this plan in amounts equal to the postretirement benefit costs recognized. The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid by the plans for LG&E retirees.

| | LG&E Sponsored Pensions | Allocated from LKE Pension Plan | Other Postretirement Benefits |
|---|---|---|---|
| 2018 | $ 26 | $ 17 | $ 6 |
| 2019 | 26 | 17 | 7 |
| 2020 | 26 | 18 | 7 |

| Trimble County Unit 1 | 75.00% | 407 | 55 | 1 |
| Trimble County Unit 2 | 14.25% | 214 | 32 | 43 |
| Trimble County Units 5-6 | 29.00% | 30 | 8 | 1 |
| Trimble County Units 7-10 | 37.00% | 71 | 17 | 1 |
| Cane Run Unit 7 | 22.00% | 114 | 5 | 2 |
| E.W. Brown Solar Unit | 39.00% | 10 | - | - |

LG&E provides its own funding for its share of each of the above facilities. LG&E receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

## 10. Commitments and Contingencies

### Energy Purchase Commitments

LG&E enters into purchase contracts to supply the coal and natural gas requirements for generation facilities and retail natural gas supply operations. These contracts include the following commitments:

| Contract Type | Maximum Maturity Date |
|---|---|
| Natural Gas Fuel | 2019 |
| Natural Gas Retail Supply | 2019 |
| Coal | 2023 |
| Coal Transportation and Fleeting Services | 2024 |
| Natural Gas Transportation | 2026 |

LG&E has a power purchase agreement with OVEC expiring in June 2040. See "Guarantees and Other Assurances" below for information on the OVEC power purchase contract, including recent developments in credit or debt conditions relating to OVEC. Future obligations for power purchases from OVEC are unconditional demand payments, comprised of debt-service payments and contractually-required reimbursements of plant operating, maintenance and other expenses, and are projected as follows:

| | | |
|---|---|---|
| 2018 | $ | 20 |
| 2019 | | 19 |
| 2020 | | 18 |
| 2021 | | 19 |
| 2022 | | 19 |
| Thereafter | | 316 |
| | $ | 411 |

LG&E had total energy purchases under the OVEC power purchase agreement of $14 million and $16 million for the years ended December 31, 2017 and 2016.

### Legal Matters

LG&E is involved in legal proceedings, claims and litigation in the ordinary course of business and cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Cane Run Environmental Claims

In December 2013, six residents, on behalf of themselves and others similarly situated, filed a class action

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report (Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

complaint against LG&E and PPL in the U.S. District Court for the Western District of Kentucky alleging violations of the Clean Air Act, RCRA, and common law claims of nuisance, trespass and negligence. These plaintiffs seek injunctive relief and civil penalties, plus costs and attorney fees, for the alleged statutory violations. Under the common law claims, these plaintiffs seek monetary compensation and punitive damages for property damage and diminished property values for a class consisting of residents within four miles of the Cane Run plant. In their individual capacities, these plaintiffs sought compensation for alleged adverse health effects. In July 2014, the court dismissed the RCRA claims and all but one Clean Air Act claim, but declined to dismiss the common law tort claims. In November 2016, the plaintiffs filed an amended complaint removing the personal injury claims and removing certain previously named plaintiffs. In February 2017, the District Court issued an order dismissing PPL as a defendant and dismissing the final federal claim against LG&E. On April 13, 2017, the federal District Court issued an order declining to exercise supplemental jurisdiction on the state law claims and dismissed the case in its entirety. On June 16, 2017, the plaintiffs filed a class action complaint in Jefferson Circuit Court, Kentucky, against LG&E alleging state law nuisance, negligence and trespass tort claims. The plaintiffs seek compensatory and punitive damages for alleged property damage due to purported plant emissions on behalf of a class of residents within one to three miles of the plant. Proceedings are currently underway regarding potential class certification, for which a decision may occur in late 2018 or in 2019. LG&E cannot predict the outcome of this matter. LG&E retired one coal-fired unit at the Cane Run plant in March 2015 and the remaining two coal-fired units at the plant in June 2015.

Trimble County Water Discharge Permit

In May 2010, the Kentucky Waterways Alliance and other environmental groups filed a petition with the Kentucky Energy and Environment Cabinet (KEEC) challenging the Kentucky Pollutant Discharge Elimination System permit issued in April 2010, which covers water discharges from the Trimble County plant. In November 2010, the KEEC issued a final order upholding the permit, which was subsequently appealed by the environmental groups. In September 2013, the Franklin Circuit Court reversed the KEEC order and remanded the permit to the agency for further proceedings. LG&E and the KEEC appealed the order to the Kentucky Court of Appeals. In July 2015, the Court of Appeals upheld the lower court ruling. LG&E and the KEEC moved for discretionary review by the Kentucky Supreme Court. In February 2016, the Kentucky Supreme Court issued an order granting discretionary review and oral arguments were held in September 2016. On April 27, 2017, the Kentucky Supreme Court issued an order reversing the decision of the appellate court and upholding the permit issued to LG&E by the KEEC.

Trimble County Landfill

Various state and federal permits and regulatory approvals are required in order to construct a landfill at the Trimble County plant to be used for disposal of CCRs. In October 2016, the Kentucky Division of Water issued a water quality certification and in February 2017, the Kentucky Division of Waste Management issued a "special waste" landfill permit. In March 2017, the Sierra Club and a resident adjacent to the plant filed administrative challenges to the landfill permit which were subsequently dismissed by agreed order entered in August 2017. In June 2017, the U.S. Army Corps of Engineers issued a dredge and fill permit, the final approval required for construction of the landfill. LG&E believes that all permits and regulatory approvals issued for the project comply with applicable state and federal laws.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |

NOTES TO FINANCIAL STATEMENTS (Continued)

**Regulatory Issues**

See Note 4 for information on regulatory matters related to utility rate regulation.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk electric system in North America. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk electric system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties for certain violations.

LG&E monitors its compliance with the Reliability Standards and self-reports or self-logs potential violations of applicable reliability requirements whenever identified, and submits accompanying mitigation plans, as required. The resolution of a small number of potential violations is pending. Penalties incurred to date have not been significant. Any Regional Reliability Entity (including RFC or SERC) determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing its programs to ensure compliance with the Reliability Standards, certain other instances of potential non-compliance may be identified from time to time. LG&E cannot predict the outcome of these matters, and cannot estimate a range of reasonably possible losses, if any.

**Environmental Matters**

Due to the environmental issues discussed below or other environmental matters, it may be necessary for LG&E to modify, curtail, replace or cease operation of certain facilities or performance of certain operations to comply with statutes, regulations and other requirements of regulatory bodies or courts. In addition, legal challenges to new environmental permits or rules add to the uncertainty of estimating the future cost of these permits and rules. Finally, the regulatory reviews specified in the President's March 2017 Executive Order (the March 2017 Executive Order) promoting energy independence and economic growth could result in future regulatory changes and additional uncertainty.

LG&E is entitled to recover, through the ECR mechanism, certain costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements applicable to coal combustion wastes and by-products from facilities that generate electricity from coal in accordance with approved compliance plans. Costs not covered by the ECR mechanism are subject to rate recovery before the KPSC or the FERC, if applicable. LG&E can provide no assurances as to the ultimate outcome of future environmental or rate proceedings before regulatory authorities.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

Air

*NAAQS*

The Clean Air Act, which regulates air pollutants from mobile and stationary sources in the United States, has a significant impact on the operation of fossil fuel generation plants. Among other things, the Clean Air Act requires the EPA periodically to review and establish concentration levels in the ambient air for six pollutants to protect public health and welfare. The six pollutants are carbon monoxide, lead, nitrogen dioxide, ozone (contributed to by nitrogen oxide emissions), particulate matter and sulfur dioxide. The established concentration levels for these six pollutants are known as NAAQS. Under the Clean Air Act, the EPA is required to reassess the NAAQS on a five-year schedule.

Federal environmental regulations of these six pollutants require states to adopt implementation plans, known as state implementation plans, which detail how the state will attain the standards that are mandated by the relevant law or regulation. Each state identifies the areas within its boundaries that meet the NAAQS (attainment areas) and those that do not (non-attainment areas), and must develop a state implementation plan both to bring non-attainment areas into compliance with the NAAQS and to maintain good air quality in attainment areas. In addition, for attainment of ozone and fine particulates standards, states in the eastern portion of the country, including Kentucky, are subject to a regional program developed by the EPA known as the Cross-State Air Pollution Rule. The NAAQS, future revisions to the NAAQS and state implementation plans, or future revisions to regional programs, may require installation of additional pollution controls, the costs of which LG&E believes are subject to cost recovery.

Although LG&E does not anticipate significant costs to comply with these programs, changes in market or operating conditions could result in different costs than anticipated.

*Ozone*

The EPA issued the current ozone standard in October 2015. The states and the EPA are required to determine (based on ambient air monitoring data) those areas that meet the standard and those that are in non-attainment. The EPA was scheduled to designate areas as being in attainment or nonattainment of the current ozone standard by no later than October 2017 which was to be followed by further regulatory proceedings identifying compliance measures and deadlines. However, the current implementation and compliance schedule is uncertain because the EPA failed to make nonattainment demonstrations by the applicable deadline. In addition, some industry groups have requested the EPA to defer implementation of the 2015 ozone standard, but the EPA has not yet acted on this request. While implementation of the 2015 ozone standard could potentially require the addition of SCRs at some generating units, LG&E is currently unable to determine what the compliance measures and deadlines may ultimately be with respect to the new standard.

States are also obligated to address interstate transport issues associated with ozone standards through the establishment of "good neighbor" state implementation plans for those states that are found to contribute significantly to another state's non-attainment. As a result of a partial consent decree addressing claims regarding federal implementation, the EPA and several states, including Kentucky, are evaluating the need for further nitrogen oxide reductions from fossil-fueled plants to address interstate impacts. While LG&E is unable to predict the outcome of ongoing and future evaluations by the EPA and the states, such evaluations could potentially result in requirements for nitrogen oxide reductions beyond those currently required under the Cross State Air Pollution Rule.

*Sulfur Dioxide*

In 2010, the EPA issued the current NAAQS for sulfur dioxide and required states to identify areas that meet those standards and areas that are in "non-attainment". In July 2013, the EPA finalized non-attainment designations for parts of the country, including part of Jefferson County in Kentucky. Attainment must be achieved by 2018. As a result of scrubber replacements completed at the Mill Creek plant in 2016, all Jefferson County monitors now indicate compliance with the sulfur dioxide standards. Additionally, LG&E accepted a new sulfur dioxide emission limit to ensure continuing compliance with the NAAQS. LG&E does not anticipate any further measures to achieve compliance with the new sulfur dioxide standards.

*Climate Change*

There is continuing world-wide attention focused on issues related to climate change. In June 2016, President Obama announced that the United States, Canada and Mexico established the North American Climate, Clean Energy, and Environment Partnership Plan, which specifies actions to promote clean energy, address climate change and protect the environment. The plan includes a goal to provide 50% of the energy used in North America from clean energy sources by 2025. The plan does not impose any nation-specific requirements.

In December 2015, 195 nations, including the U.S., signed the Paris Agreement on Climate, which establishes a comprehensive framework for the reduction of GHG emissions from both developed and developing nations. Although the agreement does not establish binding reduction requirements, it requires each nation to prepare, communicate, and maintain GHG reduction commitments. Reductions can be achieved in a variety of ways, including energy conservation, power plant efficiency improvements, reduced utilization of coal-fired generation or replacing coal-fired generation with natural gas or renewable generation. Based on the EPA's rules issued in 2015 imposing GHG emission standards for both new and existing power plants, the U.S. committed to an initial reduction target of 26% to 28% below 2005 levels by 2025. However, on June 1, 2017, President Trump announced a plan to withdraw from the Paris Agreement and undertake negotiations to reenter the current agreement or enter a new agreement on terms more favorable to the U.S. Under the terms of the Paris Agreement, any U.S. withdrawal would not be complete until November 2020.

Additionally, the March 2017 Executive Order directed the EPA to review its 2015 greenhouse gas rules for consistency with certain policy directives and suspend, revise, or rescind those rules as appropriate. The March 2017 Executive Order also directs rescission of specified guidance, directives, and prior Presidential actions regarding climate change. LG&E cannot predict the outcome of such regulatory actions or the impact, if any, on plant operations, rate treatment or future capital or operating needs.

*The EPA's Rules under Section 111 of the Clean Air Act*

There continues to be uncertainty around the EPA's regulation of existing coal-fired power plants. In 2015 the EPA had finalized rules imposing GHG emission standards for both new and existing power plants and had

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

proposed a federal implementation plan that would apply to any states that failed to submit an acceptable state implementation plan to reduce GHG emissions on a state-by-state basis (the 2015 EPA Rules).

Following legal challenges to the 2015 EPA Rules, a stay of those rules by the U.S. Supreme Court, and the President's March 2017 Executive Order (requiring the EPA to review the 2015 EPA Rules), however, in October 2017, the EPA proposed to rescind the 2015 EPA Rules and in December 2017, released an advanced notice of proposed rulemaking for a replacement rule (Replacement Rules) which contemplates GHG reductions based on "inside the fence" measures implemented at individual plants. The contemplated approach in the Replacement Rules is a more limited approach than that taken in the 2015 EPA Rules which had included assumed increased levels of fuel switching and renewable energy in determining the level of emission reduction required by each state. At present, the 2015 EPA Rules remain stayed and the Replacement Rules have not yet been published.

In April 2014, the Kentucky General Assembly passed legislation limiting the measures that the Kentucky Energy and Environment Cabinet may consider in setting performance standards to comply with the 2015 EPA Rules, if enacted. The legislation provides that such state GHG performance standards will be based on emission reductions, efficiency measures and other improvements available at each power plant, rather than renewable energy, end-use energy efficiency, fuel switching and re-dispatch. These statutory restrictions are consistent with the EPA's notice of proposed rulemaking on the Replacement Rules.

LG&E is monitoring developments at the state and federal level. Until there is more clarity about the potential requirements that may be imposed under the Replacement Rules and Kentucky's implementation plan, LG&E cannot predict the potential impact, if any, on plant operations, future capital or operating costs. LG&E believes that the costs, which could be significant, would be subject to rate recovery.

*Sulfuric Acid Mist Emissions*

In June 2016, the EPA issued a notice of violation under the Clean Air Act alleging rules related to sulfuric acid mist emissions at the Mill Creek plant were violated. The notice alleges failure to install proper controls, failure to operate the facility consistent with good air pollution control practice, and causing emissions exceeding applicable requirements or constituting a nuisance or endangerment. LG&E believes it has complied with applicable regulations during the relevant time period. Discussions with the EPA are ongoing. The parties have entered into a tolling agreement with respect to this matter through December 2018. LG&E is unable to predict the outcome of this matter or the potential impact on operations of the Mill Creek plant, including increased capital or operating costs, and potential civil penalties or remedial measures, if any.

Water/Waste

*CCRs*

In April 2015, the EPA published its final rule regulating CCRs. CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes. The rule became effective in October 2015. It imposes extensive new requirements, including location restrictions, design and operating standards, groundwater monitoring and corrective action requirements, and closure and post-closure care requirements on CCR impoundments and landfills that are located on active power plants and not closed. Under the rule, CCRs are regulated as non-hazardous under Subtitle D of RCRA and beneficial use of CCRs is allowed, with some restrictions. The rule's requirements for covered CCR impoundments and landfills include implementation of groundwater monitoring and commencement or completion of closure activities generally between three and ten years from certain triggering events. The rule requires posting of compliance documentation on a publicly accessible website. Industry groups, environmental groups, individual companies and others have filed legal challenges to the final rule, which are pending before the D.C. Circuit Court of Appeals. The EPA has advised the court that it expects to reconsider certain aspects of the CCR Rule in the near future.

In January 2017, Kentucky issued a new state rule relating to CCR matters, effective May 2017, aimed at reflecting the requirements of the federal CCR Rule. In May 2017, a resident adjacent to LG&E's and KU's Trimble County plant filed a lawsuit in Franklin County, Kentucky Circuit Court against the Kentucky Energy and Environmental Cabinet and LG&E seeking to invalidate the new rule. On January 31, 2018, the state court issued an opinion invalidating certain elements of the new rule. LG&E cannot predict the ultimate outcome of the litigation. LG&E and KU presently operate their Trimble County facilities under continuing permits authorized via the former program and do not currently anticipate material impacts as a result of the challenge to the new rule. Separately, in December 2016, federal legislation was enacted that authorized the EPA to approve equally protective state programs that would operate in lieu of the CCR Rule. The Kentucky Energy and Environmental Cabinet indicated it may propose rules under such authority in the future.

LG&E received KPSC approval for a compliance plan providing for the closure of impoundments and construction of process water management facilities at the Mill Creek and Trimble County plants.

In connection with the final CCR rule, LG&E recorded adjustments to existing AROs during 2016 and 2017. See Note 15 for additional information. Further changes to AROs, current capital plans or operating costs may be required as estimates are refined based on closure developments, groundwater monitoring results, and regulatory or legal proceedings. Costs relating to this rule are subject to rate recovery.

*Clean Water Act*

Regulations under the federal Clean Water Act dictate permitting and mitigation requirements for facilities and construction projects in the United States. Many of those requirements relate to power plant operations, including requirements related to the treatment of pollutants in effluents prior to discharge, the temperature of effluent discharges and the location, design and construction of cooling water intake structures at generating facilities, standards intended to protect aquatic organisms that become trapped at or pulled through cooling water intake structures at generating facilities. The requirements could impose significant costs for LG&E, which are subject to rate recovery.

*ELGs*

In September 2015, the EPA released its final ELGs for wastewater discharge permits for new and existing steam electric generating facilities. The rule provides strict technology-based discharge limitations for control of pollutants in scrubber wastewater, fly ash and bottom ash transport water, mercury control wastewater, gasification wastewater and combustion residual leachate. The new guidelines require deployment of additional control technologies providing physical, chemical and biological treatment of wastewaters. The guidelines also mandate operational changes including "no discharge" requirements for fly ash and bottom ash transport waters and mercury control wastewaters. The implementation date for individual generating stations will be determined by the states on a case-by-case basis according to criteria provided by the EPA. Industry groups, environmental groups, individual companies and others have filed legal challenges to the final rule, which have been consolidated before the U.S. Court of Appeals for the Fifth Circuit. In April 2017, the EPA announced that it would grant petitions for reconsideration of the rule. In September 2017, the EPA published in the Federal Register a proposed rule that would postpone the compliance date for requirements relating to bottom ash transport waters and scrubber wastewaters discharge limits. The EPA expects to complete its reconsideration of best available technology standards by the fall of 2020. Upon completion of the ongoing regulatory proceedings, the rule will be implemented by the states in the course of their normal permitting activities. LG&E is developing compliance strategies and schedules and is unable to predict the outcome of the EPA's pending reconsideration of the rule or fully estimate compliance costs or timing. Additionally, certain aspects of these compliance plans and estimates relate to developments in state water quality standards, which are separate from the ELG rule or its implementation. Costs to comply with ELGs or other discharge limits, which are expected to be significant, are subject to rate recovery.

*Seepages and Groundwater Infiltration*

Seepages or groundwater infiltration have been detected at active and retired wastewater basins and landfills at various LG&E plants. LG&E completed, or is completing, assessments of seepages or groundwater infiltration at various facilities and completed, or is working with agencies to implement, further testing, monitoring or abatement measures, where applicable. A range of reasonably possible costs cannot currently be estimated. Depending on the circumstances in each case, certain costs, which may be subject to rate recovery, could be significant.

*Other Issues*

In June 2016, the "Frank Lautenberg Chemical Safety Act" took effect as an amendment to the Toxic Substance Control Act (TSCA). The Act made no changes to the pre-existing TSCA rules as it pertains to polychlorinated biphenyls (PCB). The EPA continues to reassess its PCB regulations as part of the 2010 Advanced Notice of Proposed Rulemaking (ANPRM). The EPA's ANPRM rulemaking is to occur in two phases. Only the second part of the rule, currently scheduled for November 2017, is applicable to LG&E operations. This part of the rule relates to the use of PCBs in electrical equipment and natural gas pipelines, as well as continued use of PCB-contaminated porous surfaces. Although the first rulemaking will not directly affect LG&E’s operations, it may indicate certain approaches or principles to occur in the later rulemaking which may affect LG&E’s facilities, including phase-out of some or all equipment containing PCBs. Should such a phase-out be required, the costs, which are subject to rate recovery, could be significant.

Superfund and Other Remediation

LG&E is investigating, responding to agency inquiries, taking various measures, remediating, or have completed the remediation of, for several sites that were not addressed under a regulatory program such as Superfund, but for which it may be liable for remediation. These include a number of former coal gas manufacturing plants in Kentucky previously owned or operated or currently owned by predecessors or affiliates of LG&E. To date, the costs of these sites have not been significant.

There are additional sites, formerly owned or operated by LG&E predecessors or affiliates. LG&E lacks sufficient information on such additional sites and are therefore is unable to estimate any potential liability it may have or a range of reasonably possible losses, if any, related to these matters.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result of the EPA's evaluation, individual states may establish stricter standards for water quality and soil cleanup. This could require LG&E to take more extensive assessment and remedial actions at former coal gas manufacturing plants. LG&E cannot estimate a range of reasonably possible losses, if any, related to these matters.

From time to time, LG&E undertakes testing, monitoring or remedial action in response to notices of violations, spills or other releases at various on-site and off-site locations, negotiates with the EPA and state and local agencies regarding actions necessary for compliance with applicable requirements, negotiates with property owners and other third parties alleging impacts from its operations and undertakes similar actions necessary to resolve environmental matters that arise in the course of normal operations. Based on analyses to date, resolution of these environmental matters is not expected to have a significant adverse impact on operations.

Future cleanup or remediation work at sites under review, or at sites not yet identified, may result in significant additional costs. Insurance policies maintained by LG&E may be applicable to certain of the costs or other obligations related to these matters but the amount of insurance coverage or reimbursement cannot be estimated or assured.

**Other**

Labor Union Agreements

In November 2017, LG&E and the IBEW ratified a three-year labor agreement through November 2020. The agreement covers approximately 671 employees. The terms of the new labor agreement do not have a significant impact on LG&E's financial results.

LG&E cannot predict the outcome of future union labor negotiations.

Guarantees and Other Assurances

In the normal course of business, LG&E enters into agreements that provide financial performance assurance to third parties. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance creditworthiness or to facilitate commercial activities.

Pursuant to the OVEC power purchase contract, LG&E is obligated to pay for its share of OVEC's excess debt service, post-retirement and decommissioning costs, as well as any shortfall from amounts included within a demand charge designed and expected to cover these costs over the term of the contract. LG&E's proportionate share of OVEC's outstanding debt was $81 million at December 31, 2017. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchase Commitments" above for additional information on the OVEC power purchase contract. In connection with recent credit market related developments at OVEC or certain of its sponsors, such parties, including LG&E, have allowed implementation of a limited, partial OVEC reserve fund for debt costs and are analyzing certain potential additional credit support actions to preserve OVEC's access to credit markets or mitigate risks or adverse impacts relating thereto, including increased interest costs and accelerated maturities of OVEC's existing short and long-term debt. The ultimate outcome of these matters, including any potential impact on LG&E's obligations relating to OVEC debt under the power purchase contract cannot be predicted.

LG&E provides other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, including LG&E, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of $225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

## 11. Related Party Transactions

### Wholesale Sales and Purchases

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E, and vice versa. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost plus any split savings. Savings realized from such intercompany transactions are shared equally between both companies. The volume of energy each company has to sell to the other is dependent on its retail customers' needs and its available generation.

### Support Costs

LKS provides LG&E with administrative, management and support services. The costs of these services are charged to LG&E as direct support costs. General costs that cannot be directly attributed to a specific LKE subsidiary are allocated and charged to LG&E and other subsidiaries as indirect support costs. LKS bases its indirect allocations on the subsidiaries' number of employees, total assets, revenues, number of customers and/or other statistical information.

LKS charged LG&E $169 million and $178 million for the years ended December 31, 2017 and 2016, including

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

amounts applied to accounts that are further distributed between capital and expense on LG&E's books, based on methods that are believed to be reasonable.

In addition to the charges for services noted above, LKS makes payments on behalf of LG&E for fuel purchases and other costs for products or services provided by third parties. LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overhead costs associated with union and hourly employees performing work for the other company, charges related to jointly owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E are reimbursed through LKS.

**Intercompany Borrowings**

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to $500 million at an interest rate based on a market index of commercial paper issues. No balances were outstanding at December 31, 2017 and 2016. Interest expense incurred on the money pool agreement with KU was not significant 2017 or 2016.

**Intercompany Derivatives**

Periodically, LG&E enters into forward-starting interest rate swaps with PPL. These hedging instruments have terms identical to forward-starting swaps entered into by PPL with third parties.

**Other**

See Note 1 for discussions regarding the intercompany tax sharing agreement. See Note 8 for discussions regarding intercompany allocations associated with defined benefits.

**12. Fair Value Measurements**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. Transfers between levels are recognized at end-of-reporting-period values. During 2017 and 2016, there were no transfers between Level 1 and Level 2. See Note 1 for information on the levels in the fair value hierarchy.

NOTES TO FINANCIAL STATEMENTS (Continued)

**Recurring Fair Value Measurements**

The assets and liabilities measured at fair value were:

| | December 31, 2017 | | | |
|---|---|---|---|---|
| | **Total** | **Level 1** | **Level 2** | **Level 3** |
| Assets | | | | |
| Cash and cash equivalents | $ 15 | $ 15 | $ - | $ - |
| Total assets | $ 15 | $ 15 | $ - | $ - |
| Liabilities | | | | |
| Price risk management liabilities: | | | | |
| Interest rate swaps | $ 26 | $ - | $ 26 | $ - |
| Total liabilities | $ 26 | $ - | $ 26 | $ - |

| | December 31, 2016 | | | |
|---|---|---|---|---|
| | **Total** | **Level 1** | **Level 2** | **Level 3** |
| Assets | | | | |
| Cash and cash equivalents | $ 5 | $ 5 | $ - | $ - |
| Cash collateral posted to counterparties (a) | 3 | 3 | - | - |
| Total assets | $ 8 | $ 8 | $ - | $ - |
| Liabilities | | | | |
| Price risk management liabilities: | | | | |
| Interest rate swaps | $ 31 | $ - | $ 31 | $ - |
| Total liabilities | $ 31 | $ - | $ 31 | $ - |

(a) Included in “Other noncurrent assets” on the Balance Sheets. Represents cash collateral posted to offset the exposure with counterparties related to certain interest rate swaps under master netting arrangements that are not offset.

Price Risk Management Assets/Liabilities - Interest Rate Swaps

To manage interest rate risk, LG&E uses interest rate contracts such as forward-starting swaps and floating-to-fixed swaps. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3.

**Financial Instruments Not Recorded at Fair Value**

The carrying amounts of long-term debt on the Balance Sheets and their estimated fair values are set forth below. The fair values were estimated using an income approach by discounting future cash flows at estimated current cost of funding rates, which incorporate LG&E's credit risk. Long-term debt is classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

| December 31, 2017 | | December 31, 2016 | |
|---|---|---|---|
| Carrying Amount (a) | Fair Value | Carrying Amount (a) | Fair Value |
| $ 1,709 | $ 1,865 | $ 1,617 | $ 1,710 |

(a) Amount is net of debt issuance costs.

The carrying amounts of other current financial instruments (except for long-term debt due within one year) approximate their fair values because of their short-term nature.

**13. Derivative Instruments and Hedging Activities**

**Risk Management Objectives**

PPL has a risk management policy approved by the Board of Directors to manage market risk associated with commodities and interest rates on debt issuances (including price, liquidity and volumetric risk), and credit risk (including non-performance risk and payment default risk). The Risk Management Committee, comprised of senior management and chaired by the Senior Director - Risk Management, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions, verification of risk and transaction limits and the coordination and reporting of the Enterprise Risk Management program.

**Market Risk**

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts and swaps are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of these contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected.

The following summarizes the market risks that affect LG&E.

*Interest rate risk*

- LG&E is exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

floating-rate debt, and utilizes forward starting interest rate swaps to hedge changes in benchmark interest rates, when appropriate, in connection with future debt issuances.

- LG&E is exposed to interest rate risk associated with debt securities and derivatives held by defined benefit plans. This risk is significantly mitigated to the extent that the plans are sponsored at or sponsored on behalf of LG&E due to the recovery methods in place.

*Commodity price risk*

- LG&E's rates include a mechanism for fuel, fuel-related expenses and energy purchases. In addition, LG&E's rates include a mechanism for natural gas supply expenses. These mechanisms generally provide for timely recovery of market price fluctuations associated with these expenses.

*Volumetric risk*

- LG&E is exposed to volumetric risk on retail sales, mainly due to weather and other economic conditions for which there is limited mitigation between rate cases.

*Equity securities price risk*

- LG&E is exposed to equity securities price risk associated with the fair value of the defined benefit plans' assets. This risk is significantly mitigated due to the recovery methods in place.

**Credit Risk**

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

In the event a supplier of LG&E defaults on its obligation, LG&E would be required to seek replacement power or replacement fuel in the market. In general, subject to regulatory review or other processes, appropriate incremental costs incurred by LG&E would be recoverable from customers through applicable rate mechanisms, thereby mitigating its financial risk.

LG&E has credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. LG&E may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

**Master Netting Arrangements**

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) __ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

LG&E had no obligation to return cash collateral under master netting arrangements at December 31, 2017 and 2016.

LG&E had no cash collateral posted under master netting arrangements at December 31, 2017. LG&E posted $3 million of cash collateral under master netting arrangements at December 31, 2016.

See "Offsetting Derivative Instruments" below for a summary of derivative positions presented in the balance sheets where a right of setoff exists under these arrangements.

**Interest Rate Risk**

LG&E issues debt to finance its operations, which exposes it to interest rate risk. A variety of financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in its debt portfolios, adjust the duration of the debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under LG&E's risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates. In addition, LG&E's interest rate risk is potentially mitigated as a result of the existing regulatory framework or the timing of rate cases.

Economic Activity

LG&E entered into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including terminated swap contracts, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in "Interest Expense" on the Statements of Income at the time the underlying hedged interest expense is recorded. In December 2016, a swap with a notional amount of $32 million was terminated. A cash settlement of $9 million was paid on the terminated swap. The settlement is included in noncurrent regulatory assets on the Balance Sheet and in "Cash Flows from Operating Activities" on the Statement of Cash Flows. At December 31, 2017, LG&E held contracts with a notional amount of $147 million that range in maturity through 2033.

**Accounting and Reporting**

All derivative instruments are recorded at fair value on the Balance Sheets as an asset or liability unless NPNS is elected. NPNS contracts include physical purchase contracts. Changes in the fair value of derivatives not designated as NPNS are recognized in earnings unless specific hedge accounting criteria are met and designated as such, except for the changes in fair values of LG&E's interest rate swaps that are recognized as regulatory assets or regulatory liabilities. See Note 4 for amounts recorded in regulatory assets and regulatory liabilities at December 31, 2017 and 2016.

See Note 1 for additional information on accounting policies related to derivative instruments.

| Name of Respondent | This Report is: | Date of Report | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) __ A Resubmission | (Mo, Da, Yr)<br>/ / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

The following table presents the fair value and the location on the Balance Sheets of derivatives not designated as hedging instruments.

| | December 31, 2017 | | December 31, 2016 | |
|---|---|---|---|---|
| | Assets | Liabilities | Assets | Liabilities |
| Current: | | | | |
| Price Risk Management | | | | |
| Assets/Liabilities: | | | | |
| Interest rate swaps | $ - | $ 4 | $ - | $ 4 |
| Total current | - | 4 | - | 4 |
| Noncurrent: | | | | |
| Price Risk Management | | | | |
| Assets/Liabilities: | | | | |
| Interest rate swaps | - | 22 | - | 27 |
| Total noncurrent | - | 22 | - | 27 |
| Total derivatives | $ - | $ 26 | $ - | $ 31 |

The following tables present the pre-tax effect of derivatives not designated as cash flow hedges that are recognized in income or regulatory assets.

| Derivative Instruments | Location of Gain (Loss) Recognized in Income on Derivatives | 2017 | 2016 |
|---|---|---|---|
| Interest rate swaps | Interest expense | $ (6) | $ (7) |

| Derivative Instruments | Location of Gain (Loss) Recognized in Regulatory Assets | 2017 | 2016 |
|---|---|---|---|
| Interest rate swaps | Regulatory assets - noncurrent | $ 5 | $ 7 |

**Offsetting Derivative Instruments**

LG&E has master netting arrangements in place and also enters into agreements pursuant to which it purchases or sells certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to set off amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

LG&E has elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a liability) under derivatives agreements. The table below summarizes the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged as of December 31:

| | Liabilities | |
|---|---|---|
| Gross | $ 26 | $ 31 |
| Eligible for Offset | | |
| Cash Collateral Pledged | - | 3 |
| Net | $ 26 | $ 28 |

**Credit Risk-Related Contingent Features**

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in LG&E's credit ratings. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding LG&E's performance obligations under the contracts. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

At December 31, 2017, derivative contracts in a net liability position that contain credit risk-related contingent features, collateral posted on those positions and the related effect of a decrease in credit ratings below investment grade are summarized as follows:

| | |
|---|---|
| Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent features | $ 10 |
| Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a) | 10 |

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

**14. Other Intangible Assets**

The gross carrying amount and the accumulated amortization of other intangible assets at December 31 were:

| | 2017 | | 2016 | |
|---|---|---|---|---|
| | Gross Carrying Amount | Accumulated Amortization | Gross Carrying Amount | Accumulated Amortization |
| **Subject to amortization:** | | | | |
| Coal contracts (a) | $ - | $ - | $ 124 | $ 124 |
| Land and transmission rights | 7 | 1 | 7 | 1 |
| OVEC power purchase agreement (b) | 87 | 40 | 87 | 34 |
| **Total subject to amortization** | $ 94 | $ 41 | $ 218 | $ 159 |

(a) Gross carrying amount represents the fair value at the acquisition date of coal contracts with terms favorable to market recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to these contracts, which was amortized over the same period as the intangible asset, eliminating any income statement impact.

(b) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to this contract, which is being amortized over the same period as the intangible asset, eliminating any income statement impact. See Note 4 for additional information.

Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Amortization expense was as follows:

| | 2017 | 2016 |
|---|---|---|
| Intangible assets with regulatory offset | $ 6 | $ 13 |

Amortization expense for each of the next five years is estimated to be:

| | Intangible assets with regulatory offset |
|---|---|
| 2018 | $ 6 |
| 2019 | 6 |
| 2020 | 6 |
| 2021 | 6 |
| 2022 | 6 |

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

**15. Asset Retirement Obligations**

LG&E's AROs are primarily related to the final retirement of assets associated with generating units. LG&E also has AROs related to natural gas mains and wells. LG&E's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. As described in Notes 1 and 4, LG&E's ARO accretion and depreciation expenses are reclassified as a regulatory asset. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, at the time of retirement, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

The changes in the carrying amounts of AROs were as follows.

| | 2017 | 2016 |
|---|---|---|
| ARO at beginning of period | $ 145 | $ 175 |
| Accretion | 7 | 7 |
| Changes in estimated timing or cost (a) | (8) | (19) |
| Obligations settled | (23) | (18) |
| ARO at end of period | $ 121 | $ 145 |

(a) LG&E recorded decreases of $8 million and $24 million to the existing AROs during 2017 and 2016 related to the closure of CCR impoundments. These revisions are the result of changes in closure plans related to expected costs and timing of closures. Further changes to AROs, capital plans or operating costs may be required as estimates of future cash flows are refined based on closure developments and regulatory or legal proceedings.

See Note 10 for information on the final CCR rule and Note 4 for information on the rate recovery applications.

**16. New Accounting Guidance Pending Adoption**

Accounting for Revenue from Contracts with Customers

In May 2014, the Financial Accounting Standards Board (FASB) issued accounting guidance that establishes a comprehensive new model for the recognition of revenue from contracts with customers. This model is based on the core principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

LG&E has completed an assessment of its revenue under this new guidance and has determined it will not have a material impact on current revenue recognition policies. LG&E’s operating revenues are derived primarily from tariff-based sales that result from providing electricity and natural gas to customers with no defined contractual term. Tariff-based sales are within the scope of the new guidance, and operating revenues under the new guidance will be equivalent to the electricity and natural gas delivered and billed in that period (including estimated billings), which is consistent with current practice.

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

The disclosure requirements included in the standard will result in increased information being provided to enable the users of the financial statements to understand the nature, amount, timing and uncertainty of revenue arising from contracts with customers. These disclosures will include disaggregation of revenues by geographic location, customer class or type of service. Some revenue arrangements, including alternative revenue programs and lease income, are excluded from the scope of the new guidance and will be accounted for and disclosed separately from revenues from contracts with customers. LG&E will also disclose the opening and closing balances of accounts receivable and any contract assets or contract liabilities resulting from contracts with customers.

LG&E adopted this guidance effective January 1, 2018 using the modified retrospective transition method.

Accounting for Leases

In February 2016, the FASB issued accounting guidance for leases. This new guidance requires lessees to recognize a right-of-use asset and a lease liability for virtually all of their leases (other than leases that meet the definition of a short-term lease). For income statement purposes, the FASB retained a dual model for lessees, requiring leases to be classified as either operating or finance. Operating leases will result in straight-line expense (similar to current operating leases) while finance leases will result in a front-loaded expense pattern (similar to current capital leases). Classification will be based on criteria that are largely similar to those applied in current lease accounting, but without explicit bright line tests.

Lessor accounting under the new guidance is similar to the current model, but updated to align with certain changes to the lessee model and the new revenue recognition standard. Similar to current practice, lessors will classify leases as operating, direct financing, or sales-type.

The standard is effective for public business entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted. The new standard must be adopted using a modified retrospective transition, and provides for certain practical expedients. One of these practical expedients allows entities to elect to not evaluate land easements as leases that exist or expired before the adoption date and were not previously accounted for as leases under current lease guidance. Transition will require application of the new guidance at the beginning of the earliest comparative period presented.

LG&E is currently assessing the impact of adopting this guidance and will adopt this guidance effective January 1, 2019.

Accounting for Financial Instrument Credit Losses

In June 2016, the FASB issued accounting guidance that requires the use of a current expected credit loss (CECL) model for the measurement of credit losses on financial instruments within the scope of this guidance, which includes accounts receivable. The CECL model requires an entity to measure credit losses using historical information, current information and reasonable and supportable forecasts of future events, rather than the incurred loss impairment model required under current GAAP.

For public business entities, this guidance will be applied using a modified retrospective approach and is

| Name of Respondent<br>Louisville Gas and Electric Company | This Report is:<br>(1) X An Original<br>(2) _ A Resubmission | Date of Report<br>(Mo, Da, Yr)<br>/ / | Year/Period of Report<br>2017/Q4 |
|---|---|---|---|

NOTES TO FINANCIAL STATEMENTS (Continued)

effective for fiscal years beginning after December 15, 2019, and interim periods within those years. All entities may early adopt this guidance beginning after December 15, 2018, including interim periods within those years.

LG&E is currently assessing the impact of adopting this guidance and the period it will be adopted.

Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost

In March 2017, the FASB issued accounting guidance that changes the GAAP income statement presentation of net periodic benefit cost. This new guidance requires the service cost component to be disaggregated from other components of net benefit cost and presented in the same income statement line items as other employee compensation costs arising from services rendered during the period. The other components of net periodic benefits will be presented separately from the line items that include the service cost and outside of any subtotal of operating income. Only the service cost component is eligible for capitalization.

For public business entities, the guidance on the presentation of the components of net periodic benefit costs will be applied retrospectively. The guidance that limits the capitalization to the service cost component of net periodic benefit costs will be applied prospectively. This guidance is effective for fiscal years beginning after December 15, 2017 and interim periods within those years. LG&E will adopt this guidance effective January 1, 2018.

For LG&E's U.S. defined benefit pension plan and for LKE's defined benefit pension and other postretirement benefit plans allocated to LG&E, the adoption of this new guidance is not expected to have a material impact on either the presentation on the GAAP income statements or the amounts capitalized and related impact to expense, as the difference between the service cost and the non-service cost components of net periodic benefit costs has not historically been and is not expected to be material in 2018.

LG&E is finalizing the expected 2018 impacts of adopting the guidance as the amounts are affected by market conditions and assumptions selected at December 31, 2017.

The adoption of this guidance will have no impact on the FERC income statements and balance sheets and will represent a FERC to GAAP reporting difference.

Improvements to Accounting for Hedging Activities

In August 2017, the FASB issued accounting guidance that reduces complexity when applying hedge accounting as well as improves transparency about an entity's risk management activities. This guidance eliminates recognizing hedge ineffectiveness for cash flow and net investment hedges and provides for the ability to perform subsequent effectiveness assessments qualitatively. The guidance also makes certain changes to allowable methodologies such as allowing entities to apply the short-cut method to partial-term fair value hedges of interest rate risk as well as expands the ability to apply the critical terms match method to cash flow hedges of groups of forecasted transactions. The guidance also updates certain recognition and presentation requirements as well as disclosure requirements.

For public business entities, this guidance is effective for fiscal years, and interim periods within those fiscal

| Name of Respondent | This Report is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) X An Original<br>(2) _ A Resubmission | / / | 2017/Q4 |

NOTES TO FINANCIAL STATEMENTS (Continued)

years, beginning after December 15, 2018. Early adoption is permitted. This standard must be adopted using a modified retrospective approach and provides for certain transition elections that must be made prior to the first effectiveness testing date after adoption.

LG&E is currently assessing the impact of adopting this guidance and the period it will be adopted.

Simplifying the Test for Goodwill Impairment

In January 2017, the FASB issued accounting guidance that simplifies the test for goodwill impairment by eliminating the second step of the quantitative test. The second step of the quantitative test requires a calculation of the implied fair value of goodwill, which is determined in the same manner as the amount of goodwill in a business combination. Under this new guidance, an entity will now compare the estimated fair value of a reporting unit with its carrying value and recognize an impairment charge for the amount the carrying amount exceeds the fair value of the reporting unit.

For public business entities, this guidance will be applied prospectively and is effective for annual or any interim goodwill impairment tests for fiscal years beginning after December 15, 2019. All entities may early adopt this guidance for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017.

LG&E is currently assessing the impact of adopting this guidance and the period it will be adopted.

**17. Notes to Statement of Cash Flows**

| | December 31, 2017 | December 31, 2016 |
|---|---|---|
| Cash paid (received) during the period for: | | |

NOTES TO FINANCIAL STATEMENTS (Continued)

million applicable to Common Utility Plant apportioned to Electric Operations.

See page 115, line 8, column (i). Gas Utility Amortization and Depletion of Utility Plant includes $5 million applicable to Common Utility Plant apportioned to Gas Operations.

**19. Subsequent Events**

Management has evaluated the impact of events occurring after December 31, 2017 up to February 22, 2018, the date that LG&E's U.S. GAAP financial statements were issued and has updated such evaluation for disclosure purposes through March 21, 2018. These updates are included below.

*TCJA Impact on Kentucky Rates*

On March 20, 2018, the KPSC issued an order in the regulatory proceeding related to the TCJA approving the parties' prior settlement agreement with certain modifications. The KPSC has estimated the impact of these additional modifications to reduce LG&E's electricity revenues by an additional $10 million from the initial settlement amounts for the period January 2018 through April 2019. Changes to LG&E's gas revenues were not significant. On March 26, 2018, LG&E filed a petition for reconsideration and request for hearing with the KPSC, taking exception with the KPSC's modifications and the process, and also requested certain relief from implementing the amounts represented by the additional reductions until the matter is fully resolved. LG&E cannot predict the ultimate outcome of this proceeding.

See Note 4 for more information on the TCJA complaint and subsequent settlement agreement.

*Gas Franchise*

On March 14, 2018, the KPSC issued an order in the regulatory proceeding relating to the Louisville/Jefferson County franchise fee matter, which order confirmed that such franchise fee is to be recovered from LG&E's customers. As a result, the franchise fee will continue to be zero in accordance with the terms of the August 2016 five-year gas franchise agreement with Louisville/Jefferson County.

See Note 4 for more information on the gas franchise agreement and proceeding with the KPSC.

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106)

1. Report below the original cost of electric plant in service according to the prescribed accounts.
2. In addition to Account 101, Electric Plant in Service (Classified), this page and the next include Account 102, Electric Plant Purchased or Sold; Account 103, Experimental Electric Plant Unclassified; and Account 106, Completed Construction Not Classified-Electric.
3. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.
4. For revisions to the amount of initial asset retirement costs capitalized, included by primary plant account, increases in column (c) additions and reductions in column (e) adjustments.
5. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
6. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, on an estimated basis, with appropriate contra entry to the account for accumulated depreciation provision. Include also in column (d)

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106) (Continued)

distributions of these tentative classifications in columns (c) and (d), including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.
7. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.
8. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.
9. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date

ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 11, column (c), and that reported for electric plant in service, pages 204-207, column 9d), excluding retirements of non-depreciable property.
3. The provisions of Account 108 in the Uniform System of accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

INVESTMENTS IN SUBSIDIARY COMPANIES (Account 123.1)

1. Report below investments in Accounts 123.1, investments in Subsidiary Companies.
2. Provide a subheading for each company and List there under the information called for below. Sub - TOTAL by company and give a TOTAL in columns (e),(f),(g) and (h)
(a) Investment in Securities - List and describe each security owned. For bonds give also principal amount, date of issue, maturity and interest rate.
(b) Investment Advances - Report separately the amounts of loans or investment advances which are subject to repayment, but which are not subject to current settlement. With respect to each advance show whether the advance is a note or open account. List each note giving date of issuance, maturity date, and specifying whether note is a renewal.
3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.

## Transmission Service and Generation Interconnection Study Costs

1. Report the particulars (details) called for concerning the costs incurred and the reimbursements received for performing transmission service and generator interconnection studies.
2. List each study separately.
3. In column (a) provide the name of the study.
4. In column (b) report the cost incurred to perform the study at the end of period.
5. In column (c) report the account charged with the cost of the study.
6. In column (d) report the amounts received for reimbursement of the study costs at end of period.
7. In column (e) report the account credited with the reimbursement received for performing the study.

## CAPITAL STOCKS (Account 201 and 204)

1. Report below the particulars (details) called for concerning common and preferred stock at end of year, distinguishing separate series of any general class. Show separate totals for common and preferred stock. If information to meet the stock exchange reporting requirement outlined in column (a) is available from the SEC 10-K Report Form filing, a specific reference to report form (i.e., year and company title) may be reported in column (a) provided the fiscal years for both the 10-K report and this report are compatible.
2. Entries in column (b) should represent the number of shares authorized by the articles of incorporation as amended to end of year.

| Line No. | Class and Series of Stock and Name of Stock Series (a) | Number of shares Authorized by Charter (b) | Par or Stated Value per share (c) | Call Price at End of Year (d) |

CAPITAL STOCKS (Account 201 and 204) (Continued)

3. Give particulars (details) concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.
4. The identification of each class of preferred stock should show the dividend rate and whether the dividends are cumulative or non-cumulative.
5. State in a footnote if any capital stock which has been nominally issued is nominally outstanding at end of year.
Give particulars (details) in column (a) of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledgee and purposes of pledge.

OTHER PAID-IN CAPITAL (Accounts 208-211, inc.)

Report below the balance at the end of the year and the information specified below for the respective other paid-in capital accounts. Provide a subheading for each account and show a total for the account, as well as total of all accounts for reconciliation with balance sheet, Page 112. Add more columns for any account if deemed necessary. Explain changes made in any account during the year and give the accounting entries effecting such change.
(a) Donations Received from Stockholders (Account 208)-State amount and give brief explanation of the origin and purpose of each donation.
(b) Reduction in Par or Stated value of Capital Stock (Account 209): State amount and give brief explanation of the capital change which gave rise to amounts reported under this caption including identification with the class and series of stock to which related.
(c) Gain on Resale or Cancellation of Reacquired Capital Stock (Account 210): Report balance at beginning of year, credits, debits, and balance at end of year with a designation of the nature of each credit and debit identified by the class and series of stock to which related.
(d) Miscellaneous Paid-in Capital (Account 211)-Classify amounts included in this account according to captions which, together with brief explanations, disclose the general nature of the transactions which gave rise to the reported amounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224)

1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.
2. In column (a), for new issues, give Commission authorization numbers and dates.
3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.
5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.
6. In column (b) show the principal amount of bonds or other long-term debt originally issued.
7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224) (Continued)

10. Identify separate undisposed amounts applicable to issues which were redeemed in prior years.
11. Explain any debits and credits other than debited to Account 428, Amortization and Expense, or credited to Account 429, Premium on Debt - Credit.
12. In a footnote, give explanatory (details) for Accounts 223 and 224 of net changes during the year. With respect to long-term advances, show for each company: (a) principal advanced during year, (b) interest added to principal amount, and (c) principle repaid during year. Give Commission authorization numbers and dates.
13. If the respondent has pledged any of its long-term debt securities give particulars (details) in a footnote including name of pledgee and purpose of the pledge.
14. If the respondent has any long-term debt securities which have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.
15. If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest expense in column (i). Explain in a footnote any difference between the total of column (i) and the total of Account 427, interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.
16. Give particulars (details) concerning any long-term debt authorized by a regulatory commission but not yet issued.

FOOTNOTE DATA

**Schedule Page: 256 Line No.: 1 Column: a**

Per instruction 9 concerning the treatment of unamortized debt expense, premium or discount, original debt premiums and expenses are being amortized over the lives of the related issues and remarketing expenses are being amortized through the put dates of the remarketed bonds.

**Schedule Page: 256 Line No.: 2 Column: a**

Pollution control series bonds are obligations of LG&E, issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates LG&E to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds.

**Schedule Page: 256 Line No.: 3 Column: a**

As of November 28, 2017, the Louisville Metro (previously, Jefferson County) 2001 Series A was redeemed and the remaining unamortized debt expense associated with this bond was reclassified to loss on reacquired debt and is being amortized over the life of the original issue.

**Schedule Page: 256 Line No.: 14 Column: a**

By Order in Case No. 2017-00081 on May 11, 2017, LG&E was authorized by the KPSC to issue debt in order to refinance one of its outstanding pollution control bonds. As of June 1, 2017, the Trimble County 2007 Series A pollution control bond was refinanced resulting in a new bond issue, Trimble County 2017 Series A. The remaining unamortized debt expense associated with the refinanced bond was reclassified to loss on reacquired debt and is now being amortized over the life of the new issue.

**Schedule Page: 256 Line No.: 17 Column: a**

By Order in 130 FERC ¶ 61,269, Docket No. ES17-41-000, issued on September 18, 2017, LG&E was authorized by the FERC to issue secured and unsecured notes, not to exceed $250 million, in an effort to reduce short-term borrowings and for general corporate purposes. On October 26, 2017, LG&E entered into a $200 million Credit Agreement with US Bank, whereby LG&E borrowed $100 million resulting in the US Bank Term Loan - Tranche 1.

**Schedule Page: 256 Line No.: 19 Column: a**

As of December 31, 2017, the company had in effect three interest-rate swap agreements to hedge its exposure to tax exempt rates related to Pollution Control Bonds, Variable Rate Series. The Company’s position under the swap agreements are to pay a fixed rate and receive a variable rate based on the Securities Industry and Financial Markets Association Index or London Interbank Offered Rate (LIBOR). The specifics for each swap agreement related to notional amounts, maturity dates, payable and receivable positions are as follows:

| Notional Amount | Maturity | Payable | Receivable |
|---|---|---|---|
| $83,335,000 | 11/01/2020 | Fixed 5.495% | SIFMA Index |
| $32,000,000 | 10/01/2033 | Fixed 3.657% | 68% of 1 mo LIBOR |
| $32,000,000 | 10/01/2033 | Fixed 3.645% | 68% of 1 mo LIBOR |

As of December 6, 2016, the company terminated the following interest rate swap agreement that hedged its exposure to tax exempt rates related to Louisville Metro 2000 Series A, which was redeemed as of December 1, 2016:

| Notional Amount | Maturity | Payable | Receivable |
|---|---|---|---|
| $32,000,000 | 10/01/2033 | Fixed 3.695% | 68% of 1 mo LIBOR |

The swap was settled at a loss of $9,409,000. By Order in Case No. 2016-00393 on December 14, 2016, LG&E was authorized by the KPSC to establish a regulatory asset for this amount. By Order in Case No. 2016-00371, the loss is being amortizated over the life of the related debt.

**Schedule Page: 256 Line No.: 21 Column: a**

Proceeds from LG&E's First Mortgage Bonds issued in 2010 were used to repay loans from a

FOOTNOTE DATA

PPL subsidiary and for general corporate purposes. Proceeds from LG&E's First Mortgage Bonds issued in 2013 were used for captial expenditures and general corporate purposes. Proceeds from LG&E's First Mortgage Bonds issued in 2015 were used to pay maturing debt, pay short-term debt, and general corporate purposes. The First Mortgage Bonds were issued at a discount.

As of December 31, 2017, all of the Company’s long-term debt, except for the US Bank Term Loan issued on October 26, 2017, is collateralized by a first mortgage lien on substantially all of the assets of the Company in Kentucky.

***Schedule Page: 256.1 Line No.: 6 Column: a***

LG&E did not have long-term notes with associated companies in 2017.

## RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be field, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.
3. A substitute page, designed to meet a particular need of a company, may be used as Long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.

## TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR

1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual, or estimated amounts of such taxes are know, show the amounts in a footnote and designate whether estimated or actual amounts.
2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.) Enter the amounts in both columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.
3. Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b)amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Continued)

5. If any tax (exclude Federal and State income taxes)- covers more then one year, show the required information separately for each tax year, identifying the year in column (a).
6. Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment in a foot- note. Designate debit adjustments by parentheses.
7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.
8. Report in columns (i) through (l) how the taxes were distributed. Report in column (l) only the amounts charged to Accounts 408.1 and 409.1 pertaining to electric operations. Report in column (l) the amounts charged to Accounts 408.1 and 109.1 pertaining to other utility departments and amounts charged to Accounts 408.2 and 409.2. Also shown in column (l) the taxes charged to utility plant or other balance sheet accounts.
9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

## ELECTRIC OPERATING REVENUES (Account 400)

1. The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.
2. Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The -average number of customers means the average of twelve figures at the close of each month.
4. If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
5. Disclose amounts of $250,000 or greater in a footnote for accounts 451, 456, and 457.2.

ELECTRIC OPERATING REVENUES (Account 400)

6. Commercial and industrial Sales, Account 442, may be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent if such basis of classification is not generally greater than 1000 Kw of demand. (See Account 442 of the Uniform System of Accounts. Explain basis of classification in a footnote.)
7. See pages 108-109, Important Changes During Period, for important new territory added and important rate increase or decreases.
8. For Lines 2,4,5,and 6, see Page 304 for amounts relating to unbilled revenue by accounts.
9. Include unmetered sales. Provide details of such Sales in a footnote.

## SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

| Name of Respondent | This Report Is: | Date of Report (Mo, Da, Yr) | Year/Period of Report |
|---|---|---|---|
| Louisville Gas and Electric Company | (1) [X] An Original (2) [ ] A Resubmission | / / | End of 2017/Q4 |

SALES FOR RESALE (Account 447)

1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity ( i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
LF - for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401,iine 24.
10. Footnote entries as required and provide explanations following all required data.

FOOTNOTE DATA

***Schedule Page: 320 Line No.: 78 Column: b***

The credit is the result of a refund from PJM Interconnection L.L.C. (PJM) to the Company per FERC Docket No. IN17-2-000 issued February 1, 2017. As stated in the Docket, PJM received a disgorgement payment from a separate PJM market participant relating to violations that this participant committed between May 2011 and September 2013. PJM was directed by the Federal Energy Regulatory Commission (FERC) to allocate the disgorged funds to any customer that incurred deviations during the aforementioned period. As a market participant customer during this period, the company received a refund from PJM and allocated the credit back to the original accounts charged as of September 2013.

***Schedule Page: 320 Line No.: 121 Column: b***

The credit balance is the result of the monthly amortization of the net Regulatory Liability for the MISO Exit Fee. During the 2012 KY base rate case, the Company netted the MISO Exit Fee Regulatory Asset and Regulatory Liability together for a net Regulatory Liability as of January 1, 2013.

***Schedule Page: 320 Line No.: 121 Column: c***

The credit balance is the result of the monthly amortization of the net Regulatory Liability for the MISO Exit Fee. During the 2012 KY base rate case, the Company netted the MISO Exit Fee Regulatory Asset and Regulatory Liability together for a net Regulatory Liability as of January 1, 2013.

***Schedule Page: 320 Line No.: 141 Column: b***

The credit balance is due to meter tampering charges billed to customers to offset the cost of meter maintenance.

***Schedule Page: 320 Line No.: 141 Column: c***

The credit balance is due to meter tampering charges billed to customers to offset the cost of meter maintenance.

## PURCHASED POWER (Account 555)
(Including power exchanges)

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

PURCHASED POWER (Account 555)
(Including power exchanges)

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

PURCHASED POWER(Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.
9. Footnote entries as required and provide explanations following all required data.

## TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1)
(Including transactions referred to as 'wheeling')

1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).
3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c)
4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

5. In column (e), identify the FERC Rate Schedule or Tariff Number, On separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (d), is provided.
6. Report receipt and delivery locations for all single contract path, "point to point" transmission service. In column (f), report the designation for the substation, or other appropriate identification for where energy was received as specified in the contract. In column (g) report the designation for the substation, or other appropriate identification for where energy was delivered as specified in the contract.
7. Report in column (h) the number of megawatts of billing demand that is specified in the firm transmission service contract. Demand reported in column (h) must be in megawatts. Footnote any demand not stated on a megawatts basis and explain.
8. Report in column (i) and (j) the total megawatthours received and delivered.

9. In column (k) through (n), report the revenue amounts as shown on bills or vouchers. In column (k), provide revenues from demand charges related to the billing demand reported in column (h). In column (l), provide revenues from energy charges related to the amount of energy transferred. In column (m), provide the total revenues from all other charges on bills or vouchers rendered, including out of period adjustments. Explain in a footnote all components of the amount shown in column (m). Report in column (n) the total charge shown on bills rendered to the entity Listed in column (a). If no monetary settlement was made, enter zero (11011) in column (n). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
10. The total amounts in columns (i) and (j) must be reported as Transmission Received and Transmission Delivered for annual report purposes only on Page 401, Lines 16 and 17, respectively.
11. Footnote entries and provide explanations following all required data.

## TRANSMISSION OF ELECTRICITY BY ISO/RTOs

1. Report in Column (a) the Transmission Owner receiving revenue for the transmission of electricity by the ISO/RTO.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in Column (a).
3. In Column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO – Firm Network Service for Others, FNS – Firm Network Transmission Service for Self, LFP – Long-Term Firm Point-to-Point Transmission Service, OLF – Other Long-Term Firm Transmission Service, SFP – Short-Term Firm Point-to-Point Transmission Reservation, NF – Non-Firm Transmission Service, OS – Other Transmission Service and AD- Out-of-Period Adjustments. Use this code for any accounting adjustments or “true-ups” for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.
4. In column (c) identify the FERC Rate Schedule or tariff Number, on separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (b) was provided.
5. In column (d) report the revenue amounts as shown on bills or vouchers.
6. Report in column (e) the total revenues distributed to the entity listed in column (a).

TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)
(Including transactions referred to as "wheeling")

1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.
3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations. OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to- Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.
4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.
5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
6. Enter "TOTAL" in column (a) as the last line.
7. Footnote entries and provide explanations following all required data.

FOOTNOTE DATA

***Schedule Page: 332 Line No.: 1 Column: a***

LG&E and KU are owned by PPL.

***Schedule Page: 332 Line No.: 1 Column: b***

Long-Term Firm purchases by LG&E and KU take place under the Open Access Transmission Tariff (OATT) with intercompany allocations for revenues and expenses determined by the Transmission Coordination Agreement between the Companies. The Tariff is evergreen and the Transmission Coordination Agreement automatically renews unless terminated.

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Account 403, 404, 405)
(Except amortization of aquisition adjustments)

1. Report in section A for the year the amounts for : (b) Depreciation Expense (Account 403; (c) Depreciation Expense for Asset Retirement Costs (Account 403.1; (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).
2. Report in Section 8 the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.
3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.
Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.
In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.
For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification Listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.
4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.
