Response to Commission's Request for Information

Question No. 1

Responding Witness: Jamie Utley

Question 1. Explain in detail the manner in which you measure, calculate, and track water loss, and:

a. Identify whether you use any manual form (including Excel spreadsheet) or electronic or mechanized system to calculate and track water loss.

b. Provide a copy of any form used (including Excel spreadsheet).

c. Identify the source of any form or system used.

Response 1. South Logan Water Association (SLWA) reads master meters daily and customer meters monthly. Master meter readings reconciled with wholesale bills received provide the total amount of water in gallons purchased from all suppliers. Water loss is calculated monthly by using the Selected Code Report generated by the SLWA billing system of total gallons sold to all customers. The difference between water sold and water purchased after adjusting for flushing, hydrant flushing, fire department usage, line break loss and other usages as identified on Reporting Form is water loss.

b. See sample sheet from Excel Workbook labeled as Exhibit 1.

c. Kentucky Rural Water Association is the source of this Workbook.

Response to Commission's Request for Information

Question No. 7

Responding Witness: Jamie Utley

Question 7. State whether you believe it is reasonable, proper, and appropriate for the Commission to require jurisdictional water utilities to maintain and use the updated Commission Form described and attached as Appendix A to this Order. Fully explain your answer.

Response 7. South Logan Water Association (SLWA) believes it is reasonable, proper, and appropriate for the Commission to require jurisdictional water utilities to maintain and use the updated Commission Form described and attached as Appendix A to the Order. SLWA believes it is a good business practice for all water utilities to use the same Form to track all sources of non-revenue water.
