COMMONWEALTH OF KENTUCKY

BEFORE THE PUBLIC SERVICE COMMISSION

IN THE MATTER OF:	
ELECTRONIC EXAMINATION OF THE APPLICATION OF THE FUEL ADJUSTMENT CLAUSE OF THE EAST KENTUCKY POWER COOPERATIVE, INC COOPERATIVES FROM NOVEMBER 1, 2016 THROUGH OCTOBER 31, 2018) CASE NO. 2019-00008
VERIFICATION OF MARK ABN	VER
STATE OF KENTUCKY) COUNTY OF KNOX)	

Mark Abner, being duly sworn, states that he has supervised the preparation of certain of the following responses of Cumberland Valley Electric, Inc., to the Public Service Commission Staff's Request for Information contained in the Appendix dated February 11, 2019, in the above-referenced case, and that the matters and things set forth in his responses are true and accurate to the best of his knowledge, information and belief, formed after reasonable inquiry.

Mark Abner

Subscribed and sworn to before me on this <u>S</u> day of March, 2019.

Haren Dale Willer NOTARY PUBLIC, Notary #596762 Commission expiration: 4-H-22-

- 1. a. Provide a schedule of the calculation of the 12-month average line loss, by month, for the period under review.
 - b. Describe the measures that have been taken to reduce line loss during this period under review.

A. See attached schedules.

		Current Mon	th		12 Month Running Totals

Barbara Elliott will be available to respond to questions concerning the 12 month average line loss.

Cumberland Valley Electric Line Loss Reduction Measures

- Cumberland Valley Electric (CVE) uses distribution transformers that are compliant with DOE efficiency standards
- Each year, CVE inspects one half of its system. Any issues identified are corrected. This may
 include broken insulators, guy wires, blown arrestors, trees growing into lines, old poles to be
 removed, etc.
- CVE examines station breaker current values regularly to determine the balance of current flowing on each phase. When these current values are found to vary widely from phase to phase, steps are taken to identify transformers or line taps that can be moved to better balance the circuit and thus reduce line losses.
- CVE's vegetation management program is ongoing on an annual basis and includes bucket trimming, manual crews, spraying and bush hogging where appropriate. Yard trees are trimmed when found to be encroaching close to energized conductors.
- CVE uses capacitors to improve power factor and that also reduces line current, thereby reducing line losses.
- Current diversion by members is an issue that sometimes contributes to line loss. When such
 instances are discovered, CVE files complaints with county attorneys to bring theft charges
 against perpetrators and demands reparations to pay for stolen energy and/or equipment
 damages.
- CVE is using LED security lights that use much less energy than older HID lighting systems while maintaining or exceeding lighting levels.
- CVE has been creating service orders on accounts that have been inactive for an extended
 period of time (idle services) to determine whether the accounts still exist in the field and if so,
 whether transformers, service cables, meters, etc., need to remain in place for future use of the
 premise or be retired from plant. This process sometimes identifies transformers that are
 energized. If the premise is gone or determined to be no longer habitable, service equipment is
 retired.
- CVE is actively replacing porcelain fuse cutouts that are known to crack, causing current leakage, with fiberglass and polymer units.
- CVE uses insulated riser wire and varmint guards on its distribution equipment to protect wildlife from contact and reduce energy losses.
- CVE occasionally performs circuit optimization studies to identify connecting circuits that can be reconfigured to rebalance loading on feeders to reduce line losses.

- 2. Q. Provide the monthly revenue reports and monthly billing summaries which show the total FAC billings and FAC revenue collected as reported the monthly filings required by the Commission for the period under review.
 - A. See attached schedules.

Subject: Case No. 2019-00003 ~ 2-year FAC Review Case

Importance: High

Ladies and Gentlemen,

The PSC has opened the next FAC review case, which covers the two-year period from November 1, 2016 through October 30, 2018. The FAC regulation provides that during the two-year review the PSC can reestablish the fuel clause charge.

EKPC's current base fuel cost is \$0.02776 per kWh, which reflects the base fuel cost from May 2015. This base fuel cost was established in Case No. 2017-00002 and became effective September 1, 2017. During the November 2016 to October 2018 period EKPC's actual monthly fuel costs have ranged from a low of \$0.02096 per kWh to a high of \$0.03294 per kWh.

In anticipation of the two-year review, EKPC has been reviewing and analyzing the historic monthly fuel cost information, the historic resource and generation mix data, the expected resource and generation mixes for 2019-2020, and the expected costs for coal, natural gas, and market purchases for 2019-2020. As a result of this analysis, EKPC has determined that it needs to propose a new base fuel cost. You may recall that in the final Order in Case No. 2017-00002 the PSC stressed the importance of having the base fuel rate as close as possible to actual fuel costs.

When EKPC responds to data requests in Case No. 2019-00003, it will be proposing to reduce the base fuel cost from \$0.02776 per kWh to \$0.02624 per kWh, a reduction of \$0.00152 per kWh. This new base fuel cost reflects the costs from February 2018, which EKPC will be proposing as the appropriate representative month. As part of this proposal, we will be submitting revised tariff sheets for our rates lowering our energy charges by \$0.00152 per kWh.

Since this change will affect your energy rates and responses in your two-year FAC review cases, we wanted to get this information to you as promptly as we could. If you have any questions about this proposed change, please let me know. Thank you.

PREPAY SERVICE

STANDARD RIDER:

Cumberland Valley Electric's Prepay Service ("Prepay") is an optional rider to Rate Schedule 1 – Residential Service as defined by the Cooperative.

AVAILABILTIY:

All Rate Schedule 1 - Residential services, excluding accounts on Levelized/Fixed Budget, Automatic Bank Draft, Net Metering, accounts greater than 200 Amp Service and three-phase accounts within the territory served by Cumberland Valley Electric.

MONTHLY RATE:

Consumer Facility Charge: Energy Charge per kWh: Prepay Service Fee: \$ 12.00 (\$0.40 per day) \$ 08500-\$0.08341 \$ 3.00 (\$0.10 per day)

(R)

TERMS & CONDITIONS:

Members who qualify as defined above in "Availability" may choose to voluntarily enroll their electric account(s) in the Prepay service and are subject to the following:

- 1. Each member electing Prepay will be subject to all other applicable rules and regulations which apply to members using the residential tariff, without the Prepay rider.
- 2. Members should have internet access or the ability to receive electronic communications, including texting services to participate in the voluntary Prepay service.
- 3. Any member choosing to enroll in Prepay shall sign a Prepay Service Agreement ("Agreement"). The Agreement shall remain in effect until the member notifies Cumberland Valley Electric, in writing, to cancel the Agreement.
- 4. Upon written cancellation of the Agreement, the member shall be subject to the conditions of the applicable tariff, without the Prepay rider. In accordance with Cumberland Valley Electric's current Rules and Regulations, this may require a security deposit to be paid by the member at the time of cancellation of the Prepay service.
