1. Provide Copy of Milburn Water District current wholesale water supply agreement.

Answer

As far as we know there is not an agreement with Mayfield Electric and Water. In the past we have asked and they do not have one either.

Answered by: Donna Curtsinger

2. Provide a copy of the \$10,000.00 bank note or other instrument of indebtedness for the bank loan that Mark Vaden testified Milburn took out in 2018.

Answer

See Attached.

We are attaching the copy of the note and all papers that were sent from the bank. I included an activity report with it. Per Glynn's testimony he said we only liked \$4000.00 to have it paid off. We had talked earlier about how much we owed and I told him "if we paid all the money we had in the bank on the note the amount would be about \$4000.00". The Balance as of 7/25/2019 is \$7,750.92 with no Interest accrued.

LEVELS OF AUTHORITY. Notwithstanding any other provision of this Certificate, the following provisions shall apply with respect to levels of authority: BOARD MEMBERS.

ACTIONS AUTHORIZED. Any three (3) of the authorized persons listed above may enter into any agreements of any nature with Lender, and those agreements will bind the Entity. Specifically, but without limitation, any three (3) of such authorized persons is authorized, empowered, and directed to do the following for and on behalf of the Entity:

Borrow Money. To borrow, as a costgree or otherwise, from time to time from Lender, on such terms as may be agreed upon between the Entity and Lender, such sum or sums of money as in their judgment should be borrowed, without limitation.

Execute Notes. To execute and deliver to Lender the premissory note or notes, or other evidence of the Entity's credit accommodations, on Lender's forms, at such rates of interest and on such terms as may be agreed upon, evidencing the sums of money so borrowed or any of the Entity's indebtedness to Lender, and also to execute and deliver to Lender one or more renewals, extensions, modifications, refinancings, consolidations, or substitutions for one or more of the notes, any portion of the notes, or any other evidence of credit accommodations.

Grant Security. To mortgage, pladge, transfer, endorse, hypothecate, or otherwise encumber and deliver to Lender any property now or hereafter belonging to the Entity or in which the Entity now or hereafter may have an interest, including without limitation all of the Entity's real property and all of the Entity's personal property (tangible or intangible), as security for the payment of any loans or credit accommodificans so obtained, any promissory notes so executed (including any amendments to or modifications, renewals, and extensions of such promissory notes), or any other or further indebtedness of the Entity to Lender at any time owing, however the same may be evidenced. Such property may be mortgaged, pledged, transferred endorsed, hypothecated or encumbered at the time such loans are obtained or such indebtedness is incurred, or at any other time or times, and may be either in addition to or in lieu of any property theretofore mortgaged, pleaged, transferred, endorsed, hypothecated or encumbered.

Execute Security Documents. To execute and deliver to Lender the forms of mortgage, deed of trust, pledge agreement, hypothecation agreement, and other security agreements and financing statements which Lender may require and which shall evidence the terms and conditions under and pursuant to which such liens and encumbrances, or any of them, are given, and also to execute and deliver to Lender any other written instruments, any chattel paper, or any other collateral, of any kind or nature, which Lender may deem necessary or proper in connection with or pertaining to the giving of the liens and encumbrances. Notwithstanding the foregoing, any one of the above authorized persons may execute, deliver, or record financing statements.

Negotiate Items. To draw, endorse, and discount with Lender all drafts, trade acceptances, promissory notes, or other evidences of indebtedness payable to or belonging to the Entity or in which the Entity may have an interest, and either to receive cash for the same or to cause such proceeds to be credited to the Entity's account with Lender, or to cause such other disposition of the proceeds derived therefrom as they may deem advisable.

Further Acts. In the case of lines of credit, to designate additional or alternate individuals as being authorized to request advances under such lines, and in all cases, to do and perform such other acts and things, to pay any and all fees and costs, and to execute and deliver such other documents and agreements as the Officials may in their discretion deem reasonably necessary or proper in order to carry into effect the provisions of this Certificate.

ADD WMC Contact: James Smith

Project Description

The Milburn Water District will replace 9 miles of current AC lines with more modern a durable alternative. The rehabilitation will span the bulk of the Milburn system. This project will develop into a multiphase project as more research is conducted to determine which areas are in the greatest need of replacement.

Need for Project:

Briefly describe how this project promotes public health or achieves and/or maintains compliance with the Clean Water Act or Safe Drinking Water Act

Currently all the AC lines within the Milburn system are either falling or expected to fall in the near future. All the AC lines have been in ground since 1969, The Milburn water district is continually conducting repairs as more and more of the AC line fall. The best and safest alternative is to update all current AC lines with modern alternatives.

Project Alternatives:

Alternate A:

Split the entire project into a multiphase endeavor. Thus replacing AC lines over a longer period of time.

Alternate B

Only focus on the AC lines that have had the most issues over the last three years.

Mainable	Infrastructure	 Water 	Efficience	v:

In use of improved technologies and practices to deliver equal or better services with less water. Water efficiency encompasses conservation and reuse efforts, as well as water loss reduction and prevention, to protect water resources for the future, Examples include

	Component	Cost
	Installing or retrofitting water efficient devices such as plumbing fixtures and appliances (toilets, showerheads, urinals).	\$0
	Installing any type of water meter in previously unmetered areas (can include backflow prevention if in conjunction with meter replacement).	\$0
	Replacing existing broken/malfunctioning water meters with AMR or smart meters, meters with leak detection, backflow prevention.	\$0
	Retrofitting/adding AMR capabilities or leak equipment to existing meters.	\$0
	Conducting water utility audits, leak detection studies, and water use efficiency baseline studies, which are reasonably expected to result in a capital project or in a reduction in demand to alleviate the need for additional capital investment.	\$0
	Developing conservation plans/programs reasonable expected to result in a water conserving capital project or in a reduction in demand to alleviate the need for capital investment.	\$0
	Recycling and water reuse projects that replace potable sources with non-potable sources (Gray water, condensate, and wastewater effluent reuse systems, extra treatment or distribution costs associated with water reuse).	\$0
	Retrofit or replacement of existing landscape irrigation systems to more efficient landscape irrigation systems	\$0
\Box	Water meter replacement with traditional water meters.*	\$0
	Distribution pipe replacement or rehabilitation to reduce water loss and prevent water main breaks.*	\$0
	Storage tank replacement/rehabilitation to reduce water loss.*	\$0
	New water efficient landscape irrigation system, where there currently is not one.*	\$0
	Total Water Efficiency Cost:	\$0
	* Indicates a business case may be required for this item.	
	There are no Water Efficiency components specified for this project.	·
Sus	stainable infrastructure - Energy Efficiency:	
	Energy efficiency is the use of improved technologies and practices to reduce the energy consumption of water projec energy in a more efficient way, and/or produce/utilize renewable energy. Examples include:	ts, use
	Component	Cost
	Renewable energy projects, which are part of a public health project, such as wind, solar, geothermal, and micro-hydroelectric that provides power to a utility.	\$0
	Utility-owned or publicly-owned renewable energy projects.	\$0
	Utility energy management planning, including energy assessments, energy audits, optimization studies, and sub-metering of individual processes to determine high energy use areas.	\$0
	Energy efficient retrofits, upgrades, or new pumping systems and treatment processes (including variable frequency drives (VFDs).*	\$0
	Pump refurbishment to optimize pump efficiency.*	\$0
	Projects that result from an energy efficient related assessment.*	\$0
	Projects that cost effectively eliminate pumps or pumping stations.*	\$0
	Projects that achieve the remaining increments of energy efficiency in a system that is already very efficient.*	\$0
	Upgrade of lighting to energy efficient sources.'	\$0
	Automated and remote control systems (SCADA) that achieve substantial energy savings.	\$0
: " "	Total Energy Efficiency Cost:	\$0
	* Indicates a business case may be required for this item.	
	There are no Energy Efficiency components specified for this project.	

S	stainable Infrastructure - Environmentally Innovative:	
	nvironmentally innovatív a projects include those that demonstrate new and/or innovative approaches to delivering services of managing water resources in a more sustainable way. Examples include:) i
	Component Cost	
	Total integrated water resources management planning, or other planning framework where project life cycle costs are minimized, which enables communities to adopt more efficient and cost-effective infrastructure solutions.	\$0
	Plans to improve water quantity and quality associated with water system technical, financial, and managerial capacity.	\$0
	Source water protection planning (delineation, monitoring, modeling).	\$0
	Planning activities to prepare for adaptation to the long-term effects of climate change and/or extreme weather.	\$0
		\$0
	Greenhouse gas inventory or mitigation plan and submission of a GHG inventory to a registry as long as it is being done for an SRF eligible facility.	\$0
	Construction of US Building Council LEED certified buildings, or renovation of an existing building.	\$0
	Projects that significantly reduce or eliminate the use of chemicals in water treatment.*	\$0
	Treatment technologies or approaches that significantly reduce the volume of residuals, minimize the generation of residuals, or lower the amount of chemicals in the residuals."	\$0
	Trenchless or low impact construction technology.*	\$0
	Using recycled materials or re-using materials on-site.*	\$0
	Educational activities and demonstration projects for water or energy efficiency (such as rain gerdens).*	\$0
	Projects that achieve the goals/objectives of utility asset management plans.*	\$0
3	Total Environmentally Innovative Cost:	\$0
A	Indicates a business case may be required for this item.	
	There are no Environmentally Innovative components specified for this project.	
Su	stainable Infrastructure - Asset Management:	
-	If a category is selected, the applicant must provide proof to substantiate claims. The documents must be submitted to Anshu Singh (Anshu Singh@ky.gov) for CW projects
