Tara,

Is there any update on progress to move forward with Drakeboro's natural gas line rehab project? Looks like we need to get this moving sooner rather than later.

I hate to say this however if this project cannot get construction started by May 1st, 2023 I am going to ask for funding to be pulled. Has there been any movement?

They have procured another engineer that is currently working on their USDA application. They are definitely still interested, as they continue to get pressure from PSC to fix the problems.

Any updates on this? or are they still interested in CDBG funds? Would these funds be best used for the water issue? Just checking

They were going to re-procure an engineer. I would like to wait for that person to be included in a GA meeting.

Any updates on this project? Do you have any dates for the GA meeting or do you want to wait?

Is the May construction date feasible at this point even if funding was in place?

Still trying to find the additional funding needed. We have started some design though.

Thanks,

Tara
