

Southern Water and Sewer District

Response to Ky. PSC (Kentucky Public Service Commission) for case # 2019-00084

1. Yes, in the first meter report provided to UMG staff there did appear to be 700 – 750 meters showing zero (0) usage and therefore being issued a water bill for the minimum usage, 2,000 gal.
 - A. Yes, to my knowledge and meter reports the customers were receiving a bill for minimum usage which as said above is 2,000 gal.
 - B. Meters that have been in the system at one point but at the current time do not have a customer attached to that account / location is categorized as “inactive” in their current software.
 - C. There are accounts associated with the “inactive” meters and to my knowledge they were/did receive bills prior to being categorized as “inactive”.
2. There have been some additional meters located that were reading zero (0) usage but to my knowledge the number has not been great enough to change the previous balance of 700 – 750.
3. To my knowledge there has not been a large increase in “inactive” meters, there have been illegal hook-ups located during the checking process of the “inactive” meters and those are promptly removed. The number of illegal hook-ups located at this time would be in the 15 – 25 range.
4. Same as # 3
5. See attached list

If you have any questions or concerns regarding this response please contact me at the information listed below.

Sincerely

Donald R. Compton
