

Request 66: Description/data showing how their pension plan compare to their market

Data on Grayson's pension plan compared to their market's benefits are not available to us. Our state organization discontinued their yearly comparison a couple of years ago due to legal concerns.

However, through informal discussions and previous year comparisons, Grayson's pension plan is comparable to others in our target market. A benefit level of 1.7-2.0 has been common within the group.
