|  |  |  |  |  |  |
| Other |  |  |  |  |  |
| Other |  |  |  |  |  |
| Other |  |  |  |  |  |
|  |  |  |  |  |  |
| Total |  |  | 1,591,227.46 |  |  |
|  |  |  |  |  |  |

[^0]Note 2 - The original order for the Surcharge being added to the billing was for 60 months and the loan payout was calculated for 60 months so therefore, we aren't anticipating any Activity past that period.

[^0]:    Note 1 - The assumptions and calculations used are that we took the totals from the Cumulative Inception to March 31, 2023 and divided that by 39 months to get an average monthly amount then multiplied that monthly amount by 60 months to get the total for the cumulative inception to end of 60 months. We used this calculation for the other numbers in this column. The beginning Bank Balance would be zero for this column as well.
