Date: Thursday, August 13, 2015, 05:54 PM EDT

I apologize for going so long between meetings without communicating, but I would like our group to resume its work. We still have time to possibly get something together for an October/November committee meeting.

I'd like to schedule the next working group meeting regarding net metering to focus on the costs and benefits of net metering and distributed solar generation. The format we discussed for this meeting will involve both parties (the utilities and the solar advocates) making presentations explaining their views about this issue. Our goals are for all parties to gain a better understanding of the issue and one another's perspectives, and to see if we can reach agreement on amendments to Kentucky's net metering statute that satisfies all parties.

I expect that the utilities will bring representatives with rate-making expertise who understand the relevant technical issues and that the solar advocates will come prepared to discuss these technical issues, as well.

Please complete the attached Doodle poll for this meeting. I appreciate your ongoing participation in this dialogue and look forward to seeing you at our next meeting. Once we pick a meeting time, I would appreciate someone from the utilities and someone from the solar community sending me any written materials you plan to present/discuss at least one week in advance. I will be sending these materials to the entire group *before* the meeting so we can all be on the same page.

If anyone was left off this list, it was not intentional. I think we all have a good sense of who has been participating, so please include anyone who has been inadvertently left off.

Hope everyone has had an enjoyable summer!

Sincerely,

Morgan
