Date: Monday, August 31, 2015, 04:14 PM EDT

Thank you for your prompt responses. I have heard from all groups involved and it appears that the afternoon of September 15th is the best time for us to get together for our next meeting.

We will meet in conference room 301D at the Department for Environmental Protection, 300 Fair Oaks Lane, Frankfort, Kentucky on **Tuesday, September 15, 2015, at 1:30 p.m. EDT** to continue the conversation on the benefits and costs of expanded net metering in Kentucky. (This is the same conference room as our meeting earlier this summer).

I expect both sides of the issue to bring individuals with technical expertise to the meeting. Please send any written materials you plan on distributing at the meeting to me no later than COB on Wednesday, September 9th. I will share these materials with our group no later than the morning of Thursday, September 10th.

Thanks again and I look forward to seeing everyone on the 15th.

Sincerely,

Morgan

Subject: Net Metering Group

Thanks to everyone for their patience and persistence in facilitating our next meeting. The doodle poll was sent out with the best of intentions but, once some time had passed and we started getting the schedules of experts involved, it became a little complicated.

I've spoken with representatives from the solar community and the utilities and we have agreed on a new plan. We are going to meet in mid-September. The solar advocates are going to get dates from their team, including the expert they are flying in for the meeting, and send those dates to me. I am going to send those dates to the representatives of the utilities, the PSC, and the Cabinet. We will choose a date based on the most number of people that can attend and the dates that those with technical expertise can attend. I would also like to receive any written materials one week prior to the meeting.

Thanks for continuing to work on this incredibly important issue.

Again, please forward this email to anyone who was inadvertently left off the list.

Sincerely,

Morgan
