GENERATING AND STORAGE FACILITY IN)
MARION COUNTY, KENTUCKY PURSUANT TO)
KRS 278.700 AND 807 KAR 5:110)

**NORTHERN BOBWHITE SOLAR LLC'S MOTION
FOR APPROVAL OF PUBLIC MEETING FORMAT**

Northern Bobwhite Solar LLC (“Northern Bobwhite Solar” or “Applicant”) moves the Kentucky State Board on Electric Generation and Transmission Siting (“Board”) for approval of the form of public meeting required by KRS 278.706(2)(f). Northern Bobwhite Solar is filing concurrently with this motion a Notice of Intent to File Application for Certificate of Construction for an approximately 96 megawatt merchant solar electric generating and storage facility in unincorporated Marion County, Kentucky (the “Project”).

KRS 278.706(2)(f) requires applicants for construction certificates to include in their applications reports of their public involvement program activities including a public meeting in the county where the project will be constructed “for the purpose of informing the public of the project being considered and receiving comment on it...”¹ To meet this requirement, Northern Bobwhite Solar would, in normal times, conduct a public meeting in Marion County to inform the public of the Project and receiving comment on the same. These, however, are not normal times.

On March 16, 2020, in response to the COVID-19 pandemic, the Public Service Commission of Kentucky (“Commission”) issued an order in Case No. 2020-00085 limiting in-

¹ KRS 278.706(2)(f)(1).

person activities at the Commission and encouraging use of teleconferences to conduct official business. The Commission relied on Governor Beshear's Executive Order 2020-215 declaring a State of Emergency. The Commonwealth of Kentucky has subsequently issued restrictions on public gatherings that impact the ability of Northern Bobwhite Solar to conduct in-person meetings.

In light of the restrictions on public gatherings arising from the COVID-19 pandemic, Northern Bobwhite proposes to utilize the following approach inform the public of the Project and receive comments:

1. Project Website - By July 10th, 2020, the Applicant will launch a Project website accessible to the public. The website will contain key Project information including the following:

1. A PowerPoint presentation on the Project.
2. The date and time of the virtual public information meeting described below and information on how to access and participate.
3. The date, time and location of the in-person "office hours" described below.
4. A map of the Project showing the Project area, facility layout, aerial imagery, and parcel information for all participating properties.
5. Contact information for the Applicant and instructions for submitting questions and comments to the Applicant regarding the Project.
6. Summary of frequently asked questions ("FAQ") and responses from the Applicant's subject matter experts.
7. Instructions on how to request more information, including paper copies of the PowerPoint presentation.

Information about the website (including the web address) will be included in the notice to neighboring landowners and the newspaper advertisement for the Project.

2. In-Person "Office Hours" - On July 23rd, 2020, the Applicant and its representatives will be available in-person discussion between the hours of 10 a.m. – 3 p.m. at a location to be determined in nearby Lebanon, Kentucky. Parties interested in the project may

attend to ask questions and pick up information. Social distancing will be maintained during these interactions. The date, time and location of the “office hours” will be included in the notice to neighboring landowners and the newspaper advertisement for the Project.

3. Virtual Public Information Meeting - On July 23, 2020 from 6:00 p.m. to 8:00 p.m., Applicant and its subject matter experts will host a live presentation and question and answer (“Q&A”) session with options for attendees to join either by web or telephone. The virtual public information meeting will begin with an introduction of the Applicant’s subject matter experts and a brief description of the project as detailed in the PowerPoint presentation. Participants joining the virtual public information meeting via the project website will have access to the PowerPoint presentation described above, as well as an interactive map of the Project.

The virtual public information meeting will be hosted through a platform capable of hosting up to 300 participants. The platform will allow participants to connect by telephone or a web link and will function across desktop, browser, and mobile devices. For the Q&A portion of the virtual public information meeting:

1. Participants will be able to interact with the subject matter experts.
2. Participants will be able to virtually “raise their hand” in order to ask questions. Until it is his/her turn to speak, the participant’s line will be muted.
3. Questions will be addressed on a first-come, first-served basis.
4. Any questions that the Applicant is not able to address during the virtual public information meeting will be addressed after the presentation via telephone, email, mail, and/or updates to the FAQ section of the project website.

Information on how to access and participate in the virtual public information meeting will be included in the notice to neighboring landowners and the newspaper advertisement for the Project.

In order to ensure that the two week advance notice requirement in KRS 278.706(2)(f)(2) can be met, the newspaper advertisement for the in-person office hours and the virtual public information meeting must be submitted by July 6, 2020 for publication on July 8, 2020.

Accordingly, Northern Bobwhite Solar respectfully requests an order prior to July 6, 2020. Northern Bobwhite Solar understands that the requested time period for an order is extraordinarily short. The Applicant had hoped that conditions would have progressed such that a normal in-person public information meeting was possible, but that is unfortunately not the case.

The methods proposed by Northern Bobwhite Solar allow persons interested in the Project three options for obtaining information and submitting comments: via the Project website, attend the in-person hours in Lebanon, or participate in the virtual public information meeting. This approach allows Northern Bobwhite Solar to provide information and receive comments on the Project while doing so in a manner accounting for the public gathering limitations and social distancing requirements imposed by the COVID-19 State of Emergency in Kentucky.²

WHEREFORE, Northern Bobwhite Solar respectfully requests an order declaring that methods described above for providing information and receiving comments on the Project satisfy the requirement of a public meeting in Marion County established by KR 278.706(2)(f).

Respectfully submitted,

A handwritten signature in blue ink, appearing to read "KJG". It is enclosed in a blue oval.
