EXHIBITS

- A. Map of Surrounding Residential Neighborhoods
- B. Public Notice Evidence & Certified Letters of Receipt
- C. Published Public Notice & Proof of Notice of Application
- D. Public Information Meeting
- E. Certifying Statement of no zoning requirements
- F. Public Involvement Documents
- G. PJM Interconnection – Feasibility Study Report
- H. PJM Interconnection – System Impact Study Report
- I. PJM Interconnection – Facility Study Report
- J. PJM/EKPC – Interconnection Service Agreement
- K. PJM/EKPC – Interconnection Construction Service Agreement
- L. LGE/KU Affected System Study
- M. TVA Affected System Study – Cover Letter
- N. Economic Assessment
- O. Site Assessment Report

1.0 APPLICANT INFORMATION

KRS 278.706(2)(a): *The name, address and telephone number of the person proposing to construct and own the merchant electric generating facility.*

KRS 278.714(2)(a): *The name, address, and telephone number of the person proposing construction of the nonregulated electric transmission line or the carbon dioxide transmission pipeline*

Name: Northern Bobwhite Solar LLC
Attn: Scott Wentzell

Address: 10 Second St. NE Suite 400
Minneapolis, MN 55413

Phone: 612.486.4523 (office)

Northern Bobwhite Solar LLC (“Bobwhite” or “Applicant”) is a limited liability company organized under the laws of the Commonwealth of Kentucky. Bobwhite is a subsidiary of EDF Renewables Development, Inc (“EDF Renewables” or “EDF”).

On October 15, 2020, Geenex Solar LLC (“Geenex”) transferred ownership of Bobwhite to EDF Renewables. While Geenex spearheaded land acquisition, permitting, and continues to be involved in the development of Northern Bobwhite Solar (“the Project”), EDF Renewables will complete the permits and oversee the Project’s engineering, procurement, construction, power marketing and operation and maintenance.

EDF Renewables has the experience to build, own, and operate solar power generation facilities like Bobwhite. EDF Renewables is a market-leading independent power producer in the United States, Canada and Mexico. EDF Renewables develops projects that deliver grid-scale power, including solar, solar plus storage, electric vehicle charging and energy management. As of November 2020, the company’s North American portfolio consists of 165 operating projects, generating the equivalent of powering 1.6 million homes, operates and maintains a fleet of 11,000 MW in renewable energy projects in more than 34 different states and provinces and has an additional 162 projects in development, like Bobwhite.

2.0 PROPOSED SITE DESCRIPTION

KRS 278.706(2)(b): *A full description of the proposed site, including a map showing the distance of the proposed site from residential neighborhoods, the nearest residential structures, schools, and public and private parks that are located within a two (2) mile radius of the proposed facility.*

KRS 278.714(2)(b): *A full description of the proposed route of the electric transmission line or the carbon dioxide transmission pipeline and its appurtenances. The description shall include a map or maps showing:*

- 1. The location of the proposed line or pipeline and all proposed structures that will support it;*
- 2. The proposed right-of-way limits;*
- 3. Existing property lines and the names of persons who own the property over which the line or pipeline will cross; and*
- 4. a. The distance of the proposed electric transmission line from residential neighborhoods, schools, and public and private parks within one (1) mile of the proposed facilities; or*
b. The distance of the proposed carbon dioxide transmission pipeline from residential neighborhoods, schools, and parks, either private or public, within one thousand (1,000) feet of the proposed facilities.

KRS 278.714(2)(c): *With respect to electric transmission lines, a full description of the proposed line and appurtenances, including the following:*

- 1. Initial and design voltages and capacities;*
- 2. Length of line;*
- 3. Terminal points; and*
- 4. Substation connections.*

KRS 278.714(2)(d): *A statement that the proposed electric transmission line and appurtenances will be constructed and maintained in accordance with accepted engineering practices and the National Electric Safety Code.*

The proposed Project will be a 96-megawatt alternating current (“MWac”) photovoltaic (“PV”) electric generating facility. The Project is to be located in unincorporated Marion County, KY, north of the City of Lebanon, KY and east of Highway 55 at approximate coordinates 37°36’56.80” N, -85°13’45.57” W. Electricity generated by the Project will be sold through the PJM Regional Transmission Organization. The Project will interconnect to the transmission system via an existing substation adjacent to the Project.

The Project will be situated on up to 1300 acres of land, which has historically been used for agriculture and farming. Project components will include photovoltaic solar panels, associated ground-mounted racking structure, access roads, inverters, medium voltage transformers, buried electrical collection cabling, a step-up substation, a short 161-kilovolt (“kV”) transmission line, security fencing, laydown areas, and an operations and maintenance (“O&M”) building.

In the Notice of Intent to file an Application that was submitted on June 26, 2020 in Case No. 2020-00208, the description of the Project included the number of inverters and storage facilities. The actual number of inverters may vary based on the final design and manufacture selected. The Applicant has decided not

to include storage facilities at this time. If the Applicant later decides to add storage, a revised or new siting application will be submitted for approval.

The solar panels are attached to a racking system, which in turn secures the solar array to the ground. Piles are driven into the ground without the use of concrete and impact a very small footprint of the land beneath the solar panels. Vegetation will be planted beneath and between the rows of panels, which will allow for rainwater infiltration, improve water retention and prevent runoff. The electrical infrastructure will be enclosed by a security fence.

A map showing the distance of the proposed site from residential neighborhoods, nearest residential structures, schools, and public and private parks that are located within a two-mile radius of the proposed facility is provided in **Exhibit A**.

GEN-TIE LINE

The main power transformer in the Project substation will step-up power from the collector feeder lines from 34.5-kV to 161-kV. The Project Substation will be connected to the point of interconnection, the Marion County Substation, via an approximately 700 to 1,000 foot 161-kV transmission line (the "Gen-Tie Line"). The Gen-Tie Line will be located on a parcel under lease to Bobwhite authorizing the placement of Project facilities, including transmission lines. The exact length and position of the Gen-Tie Line will be determined by the final placement of the Project substation and transmission line poles. Bobwhite currently assumes up to three poles will be placed along the transmission corridor. Poles will be made of wood or steel and approximately 70-100 feet in height. The Gen-Tie Line will be constructed and maintained in accordance with accepted engineering practices and the National Electric Safety Code.

A map showing the proposed route of the Gen-Tie Line is provide in **Exhibit A**. There is one residential neighborhood approximately 0.75 miles to the southwest of the Gen-Tie Line. The Marion County Substation is located between the neighborhood and the proposed Gen-Tie Line. No schools or parks within one mile of the proposed Gen-Tie Line.

3.0 PUBLIC NOTICE EVIDENCE

KRS 278.706(2)(c)

Evidence of public notice that shall include the location of the proposed site and a general description of the project, state that the proposed construction is subject to approval by the board and provide the telephone number and address of the Public Service Commission. Public notice shall be given within thirty (30) day immediately preceding the application filing to:

1. *Landowners whose property borders the proposed site; and*
2. *The general public in a newspaper of general circulation in the county or municipality in which the facility is proposed to be located.*

KRS 278.714(2)(e)

With respect to both electric transmission lines and carbon dioxide transmission pipelines, evidence that public notice has been given by publication in a newspaper of general circulation in the general area concerned. Public notice shall include the location of the proposed electric transmission line or carbon dioxide pipeline, shall state that the proposed line or pipeline is subject to approval by the board, and shall provide the telephone number and address of the Public Service Commission;

Bobwhite mailed letters providing notice that it intended to file this Application to 75 landowners whose property border and within 300 feet of the proposed site and 13 participating landowners were mailed by certified mail, return receipt requested, and via regular US Mail on November 27, 2020. Subsequent to the notice for the Public Information Meeting described in **Section 6** below, ownership of four adjacent landowners changed. As a result, notices for the Application were submitted to the new owners instead of the previous owners. At the filing of this Application, 20 return receipts were not returned. A sample copy of the letter and the list of addresses and names of the landowners are provided in **Exhibit B**.

On December 2, 2020, Bobwhite published notice that it intended to file this Application in the Lebanon Enterprise, a newspaper of general circulation in Marion County, Kentucky. A copy of the newspaper advertisement and affidavit are provided in **Exhibit C**.

4.0 COMPLIANCE WITH LOCAL ORDINANCES AND REGULATIONS

KRS 278.706(2)(d) *A statement certifying that the proposed plant will be in compliance with all local ordinances and regulations concerning noise control and any local planning and zoning ordinances. The statement shall also disclose setback requirements established by the planning and zoning commission as provided under KRS 278.704(3).*

The Project lies in unincorporated Marion County. There is no zoning or noise control ordinance covering unincorporated Marion County and, accordingly, there are no setback requirements established for the location of the Project. Bobwhite certifies that the Project will be in compliance with all local ordinances and regulation concerning noise control and with any applicable local planning and zoning ordinances. A statement certifying these facts is submitted as **Exhibit E**.

5.0 SETBACK REQUIREMENTS

KRS 278.706(2)(e); *If the facility is not proposed to be located on a site of a former coal processing plant and the facility will use on-site waste coal as a fuel source or in an area where a planning and zoning commission has established a setback requirement pursuant to KRS 278.704(3), a statement that the exhaust stack of the proposed facility and any wind turbine is at least one thousand (1,000) feet from the property boundary of any adjoining property owner and all proposed structures or facilities used for generation of electricity are two thousand (2,000) feet from any residential neighborhood, school, hospital, or nursing home facility, unless facilities capable of generating ten megawatts (10MW) or more currently exist on the site. If the facility is proposed to be located on a site of a former coal processing plant and the facility will use on-site waste coal as a fuel source, a statement that the proposed site is compatible with the setback requirements provided under KRS 278.704(5). If the facility is proposed to be located in a jurisdiction that has established setback requirements pursuant to KRS 278.704(3), a statement that the proposed site is in compliance with those established setback requirements:*

The Project is not proposed to be located on the site of a former coal processing plant, nor will it use any waste coal as a fuel source. The Project site does not have any existing electricity generating facilities on-site. Marion County has no established setback requirements for this location, nor has a planning unit enacted any setback requirements for this location. The Project will not include any exhaust stacks or wind turbines as part of the facility, therefore there are no established setback requirements from the property boundary of any adjoining property owner to the energy generating facilities. There is one residential neighborhood (as defined by KRS 278.700 (6)) within 2,000 feet of the Project's facilities. Pursuant to KRS 278.704 (4), Bobwhite is seeking a deviation from this setback requirement. See **Exhibit A** for a map showing the residential neighborhoods in relation to the Project.

6.0 PUBLIC INVOLVEMENT ACTIVITIES

KRS 278.706(2)(f)

A complete report of applicant's public involvement program activities undertaken prior to the filing of the application, including:

- 1. The scheduling and conduction of a public meeting in the county or counties in which the proposed facility will be constructed at least ninety (90) days prior to the filing of an application, for the purpose of informing the public of the project being considered and receiving comment on it;*
- 2. Evidence that notice of time, subject, and location of the meeting was published in the newspaper of general circulation in the county, and that individual notice was mailed to all owners of property adjoining the proposed project at least two (2) weeks prior to the meeting; and*
- 3. Any use of media coverage, direct mailing, fliers, newsletters, additional public meetings, establishment of a community advisory group, and any other efforts to obtain local involvement in the siting process.*

Bobwhite, through its initial developer partner Geenex, has been actively engaged with Marion County officials and the community since early 2019. That year, at least two informal meetings were held with Marion County staff and officials to ensure Geenex was answering any questions they had about the development of the proposed Project.

On October 29, 2019, the Marion County Public Library in Lebanon, Kentucky was the site for a regional Utility-Scale Solar Workshop for County Officials conducted by the Center for Energy Education and funded by Geenex. Several representatives from Marion County attended this day-long event along with approximately 30 officials from more than 12 counties across the state of Kentucky. Geenex representatives Kara Price, Senior VP of Permitting & Development and Doug Schulte, Director of Operations for Kentucky, presented at the workshop. The workshop featured presentations on topics including environmental health and safety, property values, land leasing, and economic benefits to hosting counties, as well as informal meetings between representatives of Geenex and Marion County officials (see invitation/agenda in **Exhibit F**).

In 2020, Geenex twice presented publicly to the Marion County Fiscal Court and had opportunities to answer their questions concerning the Project. The first presentation on June 4, 2020 was a high-level introduction to utility-scale solar, its growth in Kentucky and the future benefits of the Project to Marion County. The second presentation on July 23, 2020 provided the officials and participating citizens a more detailed look into the design and layout of the Project and the proposed setbacks and vegetative screening to be utilized.

On June 22, 2020, the Applicant sent an introductory letter to neighboring landowners of the Project informing them about the proposed Project and providing them contact information ahead of official public information meetings to come. A copy of this letter is included in **Exhibit F**.

In light of COVID-19 restrictions, Bobwhite requested a minor deviation from standard meeting requirements. On June 26, 2020, the Applicant filed a motion for waiver and request for approval of an alternative method for the public information program including: i) a Project website, ii) Informational Open House "Office Hours", and iii) a virtual Public Information Meeting. The Applicant's motion was granted on July 9, 2020.

Bobwhite provided notice of the public information program to 75 landowners whose property borders or is within 300 feet of the proposed site through letters sent via certified mail, return receipt requested, on July 13, 2020. A sample copy of the letter, mailing list and certified mail receipts are provided in **Exhibit D**. Six certified receipts were not returned.

On July 15, 2020, Bobwhite published notice of the public information program in the Lebanon Enterprise, a newspaper of general circulation in Marion County, Kentucky. A copy of the newspaper advertisement and affidavit are provided in **Exhibit D**.

A description of each aspect of the public information program as approved and conducted is described below.

(i) Project Website

The Applicant launched a Project website (www.geenexsolar.com/northernbobwhite) on July 10, 2020. The website served as a hub for the public to view Project information and contained the following:

1. A PowerPoint presentation on the Project;
2. The date and time of the virtual public information meeting described below and information on how to access and participate;
3. The date, time and location of the in-person "office hours" described below;
4. A map of the Project showing the preliminary Project area, facility layout, aerial imagery, and parcel information for all participating properties;
5. Contact information for the Applicant and instructions for submitting questions and comments to the Applicant regarding the Project;
6. Summary of frequently asked questions ("FAQ") and responses from the Applicant's subject matter experts; and
7. Instructions on how to request more information, including paper copies of the PowerPoint presentation.

Information about the website (including the web address) was included in the notice to neighboring landowners and the newspaper advertisement for the Project. The website was promoted through direct mail, field outreach and virtual meetings. The website will remain active throughout the Kentucky State Board application process. It is anticipated that the project website may be re-launched using a uniform resource locator ("URL") address, web address, unique to EDF; however, the original URL will remain live and will redirect users to the new webpage should one be created.

(a) Power Point Presentation

The Applicant published a PowerPoint presentation on its website on July 10, 2020. The presentation contained information about the Applicant, the Project, and the Kentucky State siting board process. This is the same PowerPoint presentation presented at the Virtual Public Information meeting on July 30, 2020. A copy of the PowerPoint Presentation is included in **Exhibit F** of this Application.

(ii) Community Information Open House “Office Hours”

Bobwhite held an informational open house on July 30th from 10 a.m. to 3 p.m. in order to inform the public about the Project, answer questions, and receive comments. This meeting was held at the Marion County Agriculture Extension Complex which is located at 415 Fairgrounds Road in Lebanon close to the Project site. At the open house, representatives from Geenex, the Center for Energy Education, as well as a regulatory consultant with Smith Management Group a division of ALL4 LLC, were on hand to engage with attendees during the five hours of the Open House. At the event, neighbors of the Project were able to review large-scale site plans, gain information on health and safety of solar photovoltaics, obtain research on property value impacts from solar, and view video interviews with experts on utility-scale solar. The meeting complied with all safety protocols required by the Commonwealth of Kentucky including mandatory masks, social distancing, and availability of hand sanitizer. The sign-in sheet from this event is included in **Exhibit D**.

(a) Media & Forms of Communication

A notice announcing the public meeting was printed in the *Lebanon Enterprise* on July 15, 2020. The copy of this notice and the affidavit of publication for this notice is located in **Exhibit D**. Also enclosed in **Exhibit D** are letters mailed to all adjoining landowners and landowners within 300 feet of the Project notifying them of both the informational open house and the virtual public information meeting. A copy of the letter and direct mail piece sent directly to neighboring landowners is included as well as the list of those landowners. **Exhibit D** also contains a list of materials provided at the open house as well some images captured from this event.

(iii) Virtual Public Information Meeting (“PIM”)

On Thursday, July 30th from 6 p.m. to 8 p.m., the Applicant hosted a virtual PIM. Attendees were able to join either by web or telephone. The virtual public information meeting began with an introduction of the Applicant’s subject matter experts and a brief description of the Project as detailed in the PowerPoint presentation included in **Exhibit D**. This was followed by a live web/phone question and answer (“Q&A”) session on the Project. For the Q&A portion of the virtual public information meeting:

- a) Participants were able to interact with the subject matter experts.
- b) Participants were able to virtually “raise their hand” in order to ask questions either live or by allowing the moderator to read their question for them.
- c) Questions were addressed on a first-come, first-served basis.
- d) Any questions that the Applicant was not able to address during the virtual public information meeting were to be addressed after the presentation via telephone, email, or mail.

However, the Applicant was able to address all questions during the time of the event. The event was promoted via newspaper, website, direct mail, and field outreach. Presenting during the PIM were Geenex team members: Doug Schulte, Director of Operations for Kentucky, and Kara Price, Senior Vice President of Permitting and Development. In addition, various experts were on hand if questions pertaining to their area of expertise. Joining the Geenex team was Karen Thompson of Smith Management Group a division of ALL4 LLC (Kentucky State Siting Permit requirements); Rich Kirkland of Kirkland Appraisals (property value impacts from solar); and Woo Smith and Scott West of Terracon (environmental impacts/studies).

A synopsis of the virtual PIM from the hosting company, list of dial-in and web attendee are included in **Exhibit D**.

7.0 EFFORT TO LOCATE NEAR EXISTING GENERATING FACILITIES

KRS 278.706(2)(g)

A summary of the efforts made by the applicant to locate the proposed facility on a site where existing electric generating facilities are located.

The ideal site for a solar generation facility is very different than sites used for most of the existing generation facilities in the state. Ideally, solar facilities are sited on flat land or land with a minimal slope, no north facing slopes, outside of flood plains, contiguous acres, open land, minimal population, willing landowner participants, suitable subsurface for construction and close to a transmission line with sufficient capacity to reliably accept the power. Most of the existing coal plants are located near rivers, within flood plains and have some land with north facing slopes which is not generally compatible with solar facilities.

The Project is connecting to Eastern Kentucky Power Cooperative's ("EKPC") Marion County 161-kV substation. A transmission capacity study was performed to determine suitability of the location. Once it was determined that the location had available transmission capacity and generally favorable site characteristics, land parcels near the Marion County substation were screened for their suitability for hosting solar infrastructure. Voluntary land agreements were negotiated with willing landowners in the project area.

8.0 PROOF OF SERVICE

KRS 278.706(2)(h)

Proof of service of a copy of the application upon the chief executive officer of each county and municipal corporation in which the proposed facility is to be located, and upon the chief officer of each public agency charged with the duty of planning land use in the jurisdiction in which the facility is proposed to be located;

As indicated in the Certificate of Service, a copy of the Application for the Project was electronically transmitted to the Judge-Executive of Marion County, David Daugherty on the day this Application was filed. Upon inquiry by Bobwhite, Judge Daugherty indicated that he would accept an electronic copy of the application. There is no public agency charged with the duty of planning land use in Marion County.

9.0 EFFECT ON KENTUCKY'S ELECTRIC TRANSMISSION SYSTEM

KRS 278.706(2)(i)

An analysis of the proposed facility's projected effect on the electricity transmission system in Kentucky.

On September 24, 2018, Bobwhite filed to interconnect to EKPC's transmission system through a PJM Interconnection, L.L.C. ("PJM") application. EKPC is a member of PJM. PJM is the Regional Transmission Organization for 13 states including parts of Kentucky and is managing the interconnection of the Project in coordination with EKPC, which owns the transmission infrastructure to which the Project is proposing to interconnect.

PJM assigned the Project a queue number of AE1-143. The interconnection process for PJM involves three studies: 1) Feasibility Study, 2) Impact Study, and 3) Facility Study. The Interconnection Service Agreement ("ISA") and Interconnection Construction Service Agreement ("ICSA") finalizes the requirements for interconnecting to the grid. The PJM Impact Study identified Tennessee Valley Authority ("TVA") and Louisville Gas and Electric Company/Kentucky Utilities Company ("LGE/KU") as potential Affected Systems. As a result, Affected System Studies were performed by TVA and LGE/KU.

- **Exhibit G** - PJM Feasibility Study Report completed in February 2019
- **Exhibit H** - PJM Impact Study Report complete in August 2019
- **Exhibit I** - PJM's Facility Study Report completed in July 2020
- **Exhibit J** - PJM/EKPC – ISA, effective October 7, 2020
- **Exhibit K** - PJM/EKPC – ICSA, effective November 6, 2020
- **Exhibit L** - LGE/KU's Affected System Study completed in May 2020
- **Exhibit M** - TVA's Affected System Study cover letter completed in April 2020

Based on the ISA, Bobwhite is providing upgrades to offset the impacts of connecting the Project to the EKPC system. Pursuant to the ISA, the total estimated cost to connect Bobwhite to EKPC's Marion County substation is \$1,190,000. Bobwhite has already provided security of \$297,500 for these upgrades.

Both TVA and LGE/KU confirmed that Bobwhite would have no adverse effects on their systems and therefore no upgrades are required to accommodate the interconnection of the Project. TVA considered their Affected System Study to be confidential and provided a cover letter with a summary for this Application.

10.0 LOCAL ECONOMIC IMPACT

KRS 278.706(2)(j)

An analysis of the proposed facility's economic impact on the affected region and the state.

Bobwhite used the current web-based version of IMPLAN (<https://implan.com/>) to model impacts to Marion County's local economy using Marion County and Kentucky datasets. The current economic dataset uses 2018 data with calculated dollars for 2020. Note there are no 2018 economic statistics for Kentucky for the construction of a solar farm. IMPLAN outputs were predicted from other construction of power and communication facilities in Kentucky and locally in Marion County using site specific information where available. **Exhibit N** provides the Economic Assessment for the Project.

Bobwhite anticipates capital construction costs of \$125 million. The Project is estimated to provide approximately 400 full-time equivalent construction jobs over a 12 to 18-month period. Bobwhite anticipates 50 to 100 local hires. Local contractors may be used for equipment rental, fencing, site work, and landscaping. Permanent positions supported during the operation of the facility include facility maintenance of the solar farm and landscaping/grounds-keeping. The Project anticipates having approximately two permanent positions for on-going O&M of the facility. Most of the local economic impact will be during construction with ongoing beneficial impacts from local and state taxes over the course of the Project.

The construction work force will include electricians, solar panel installers, heavy equipment operators, fencing installers, and other general laborers. A small portion of the labor force will be on-site managers and foremen. Hourly rates for solar installers range between \$13 -\$24 per hour depending on experience and geographical location¹. An average salary for all positions of \$16.35 per hour or \$34,000 per year was used for the model.

The IMPLAN model predicts direct, indirect and induced impacts. However, since the material (solar panels, invertors, and other electrical equipment) will be manufactured out of state, only the direct impacts are being provided. The indirect and induced values may be overstated since not all material will be sourced locally as is the case for other types of construction materials. IMPLAN predicts that with a 400 full-time employee ("FTE") employment increase, the area will see an increase of \$20,206,000 in labor income with \$41,085,700 in value added impacts to the local community. Value added from only local hires would be less (approximately \$10,200,000 or a quarter of the overall impact).

Local and State government will see a direct increase in tax revenue during construction from payroll. In addition, Bobwhite has secured an Inducement Resolution for an Industrial Revenue Bond ("IRB") with the Fiscal Court of Marion County consistent with state regulations to promote economic development and solar energy projects. A copy of the Memorandum of the IRB Agreement is included in **Exhibit N as Appendix A**. The Inducement Resolution for the IRB includes a form for the beneficial payments in lieu of taxes ("PILOT") agreement to the local school system of approximately \$400,000 to the school system over the lifetime of the Project and another approximately \$6 million in taxes. The PILOT agreement will

¹ [payscale.com](https://www.payscale.com)

be executed when the IRBs are issued. A letter of support from the Marion County Judge Executive is also provided in **Exhibit N as Appendix B**.

11.0 ENVIRONMENTAL VIOLATION RECORD

KRS 278.706(2)(k)

A detailed listing of all violations by it, or any person with an ownership interest, of federal or state environmental laws, rules, or administrative regulations, whether judicial or administrative, where violations have resulted in criminal convictions or civil or administrative fines exceeding five thousand dollars (\$5,000). The status of any pending action, whether judicial or administrative, shall also be submitted.

In 2015, EDF, the ultimate U.S. parent company of Bobwhite, paid a \$10,000 civil penalty for a possible eagle take that occurred within the five-year period prior to 2015 and entered into Eagle Conservation Plans with the U.S. Fish and Wildlife Service for seven of its operating projects in Northern California. In 2016, EDF entered into an additional agreement with the U.S. Fish and Wildlife Service regarding a golden eagle death and under which it paid a civil penalty of \$5,000.

12.0 SITE ASSESSMENT REPORT

KRS 278706(2)(I)

A site assessment report as specified in KRS 278.708. The applicant may submit, and the board may accept documentation of compliance with the National Environmental Policy Act (NEPA) rather than a site assessment report.

The Site Assessment Report is **Exhibit O**.

13.0 ENVIRONMENTAL PERMIT LIST

KRS 278.704(1)

*The certificate shall be conditioned upon the applicant obtaining necessary air, water and waste permits. **KRS 224.10-280:** Cumulative environmental assessment and fee required before construction of facility for generating electricity*

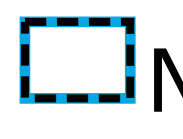

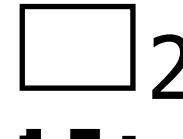

All necessary air, water, waste permits have been or will be obtained before construction and operation of the Project, and may include:

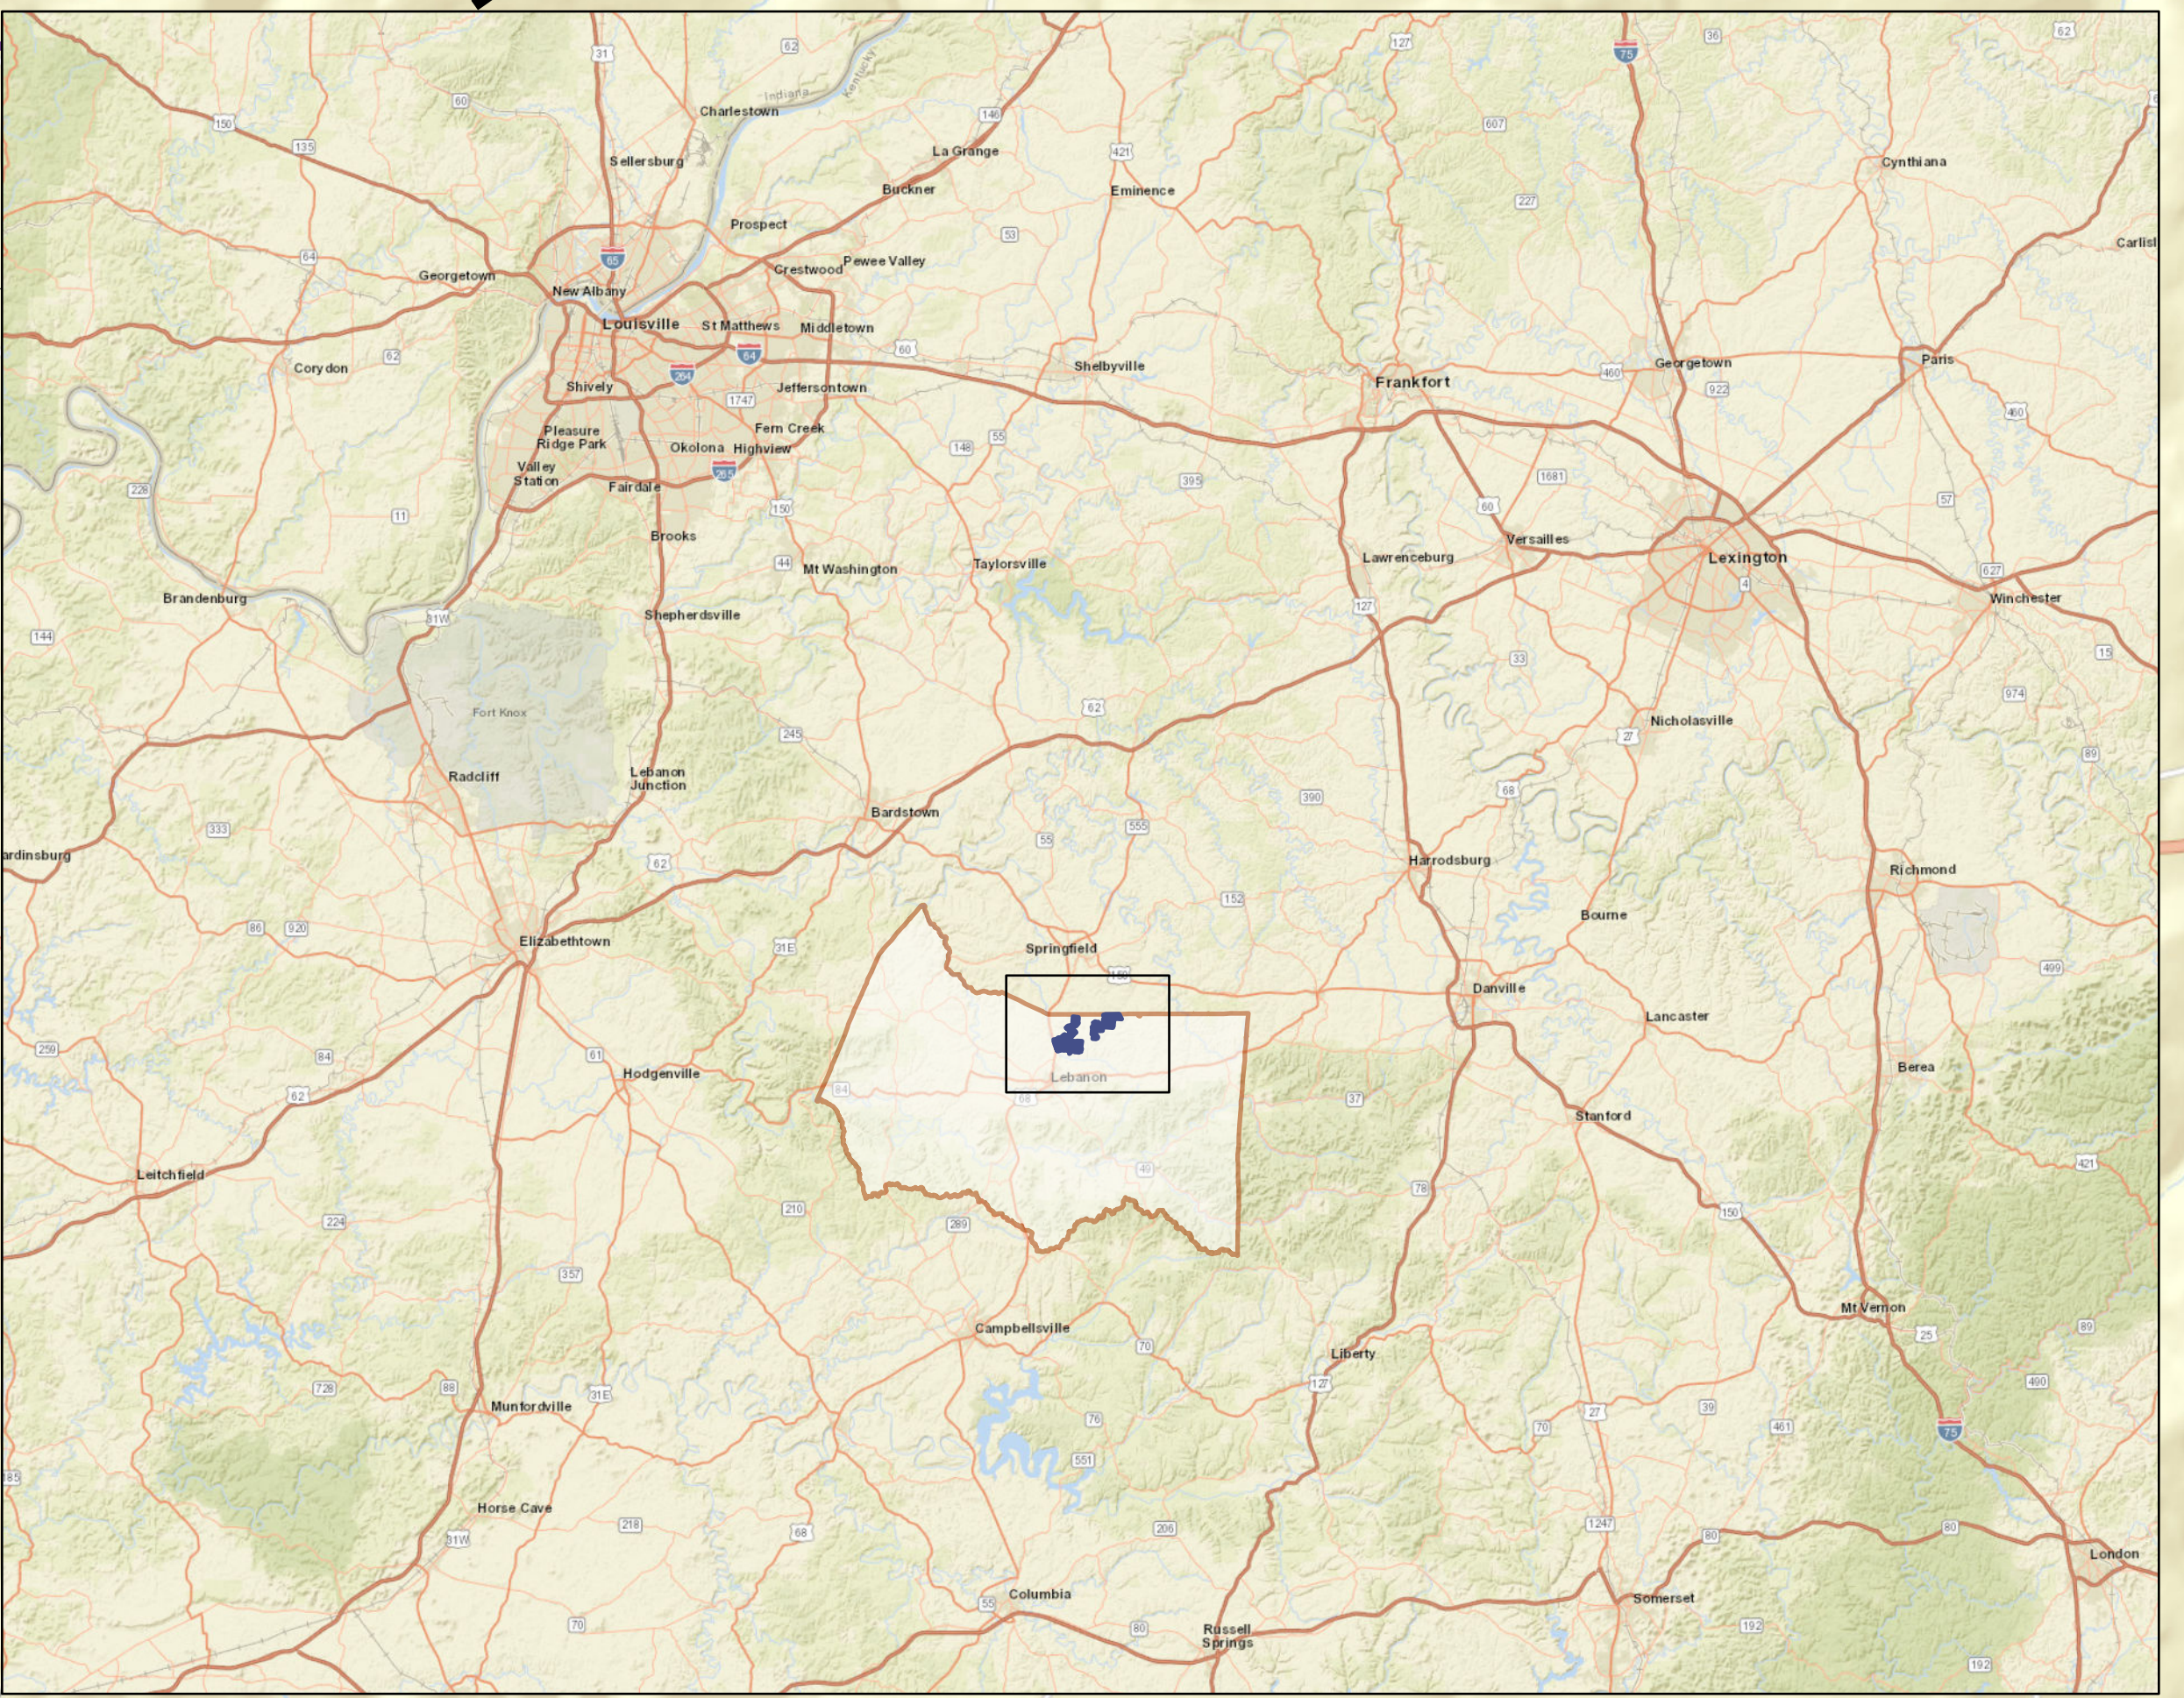

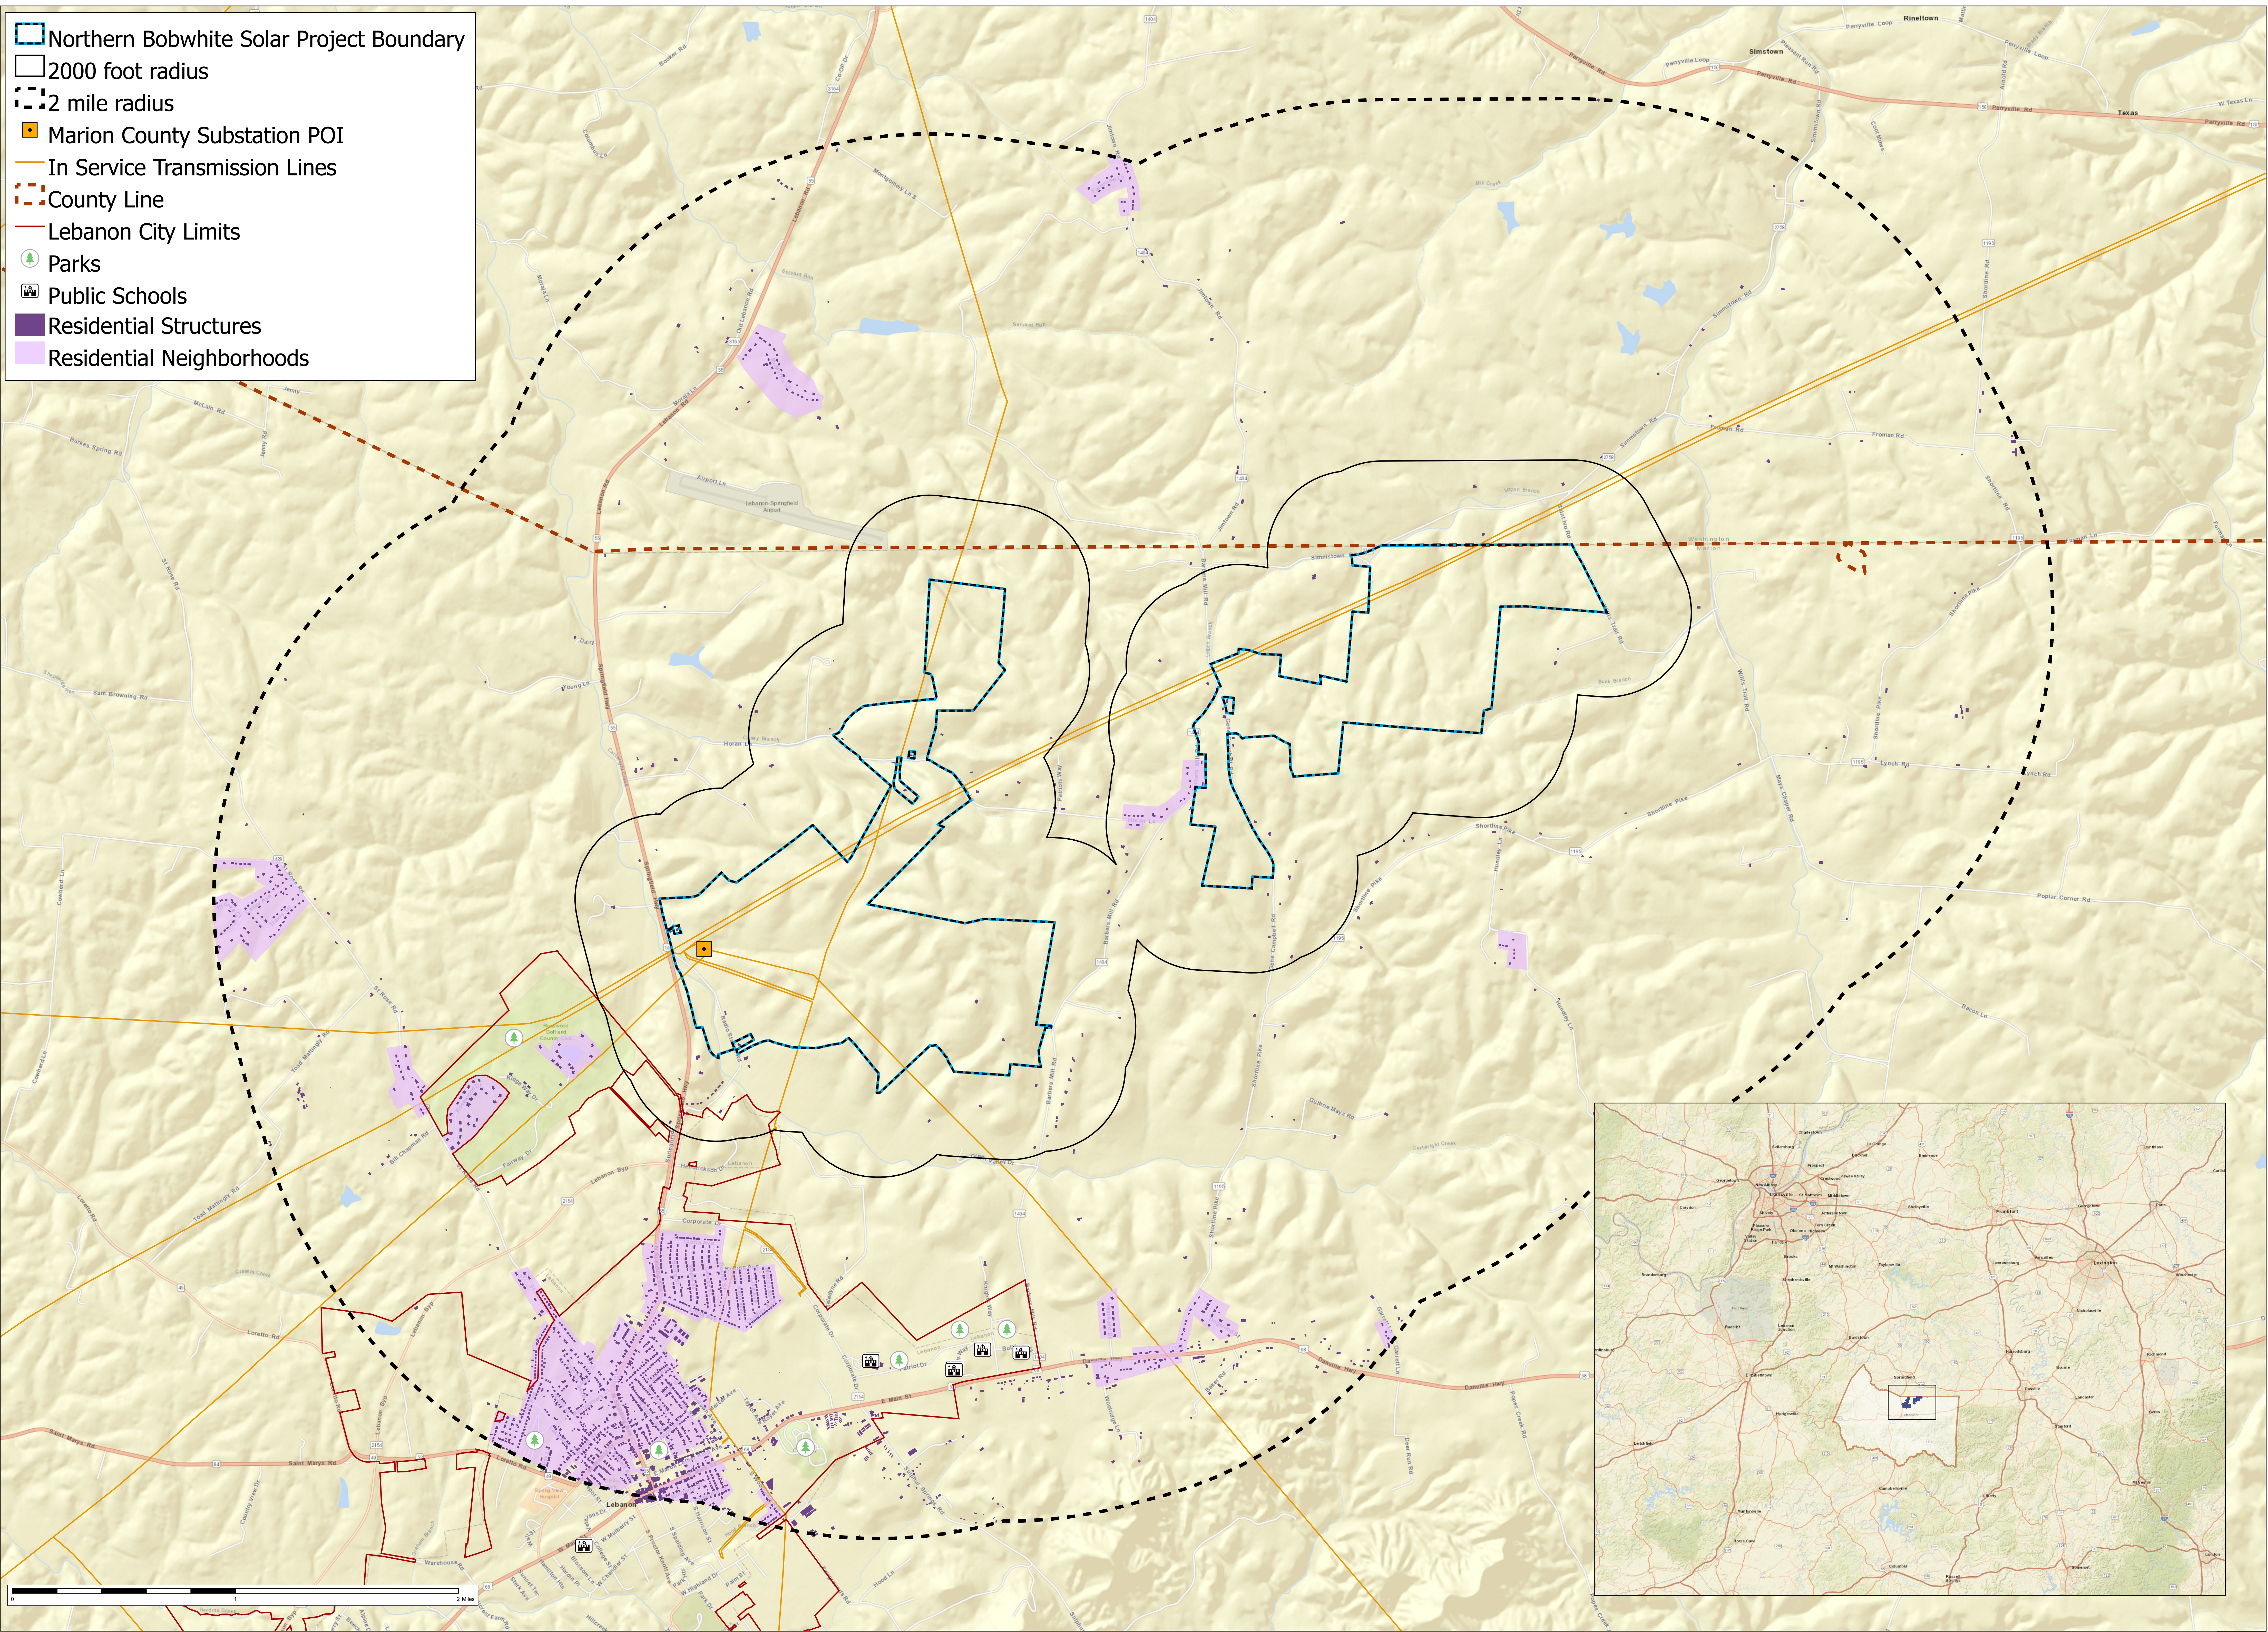

Permit	Regulatory Agency	Activity	Authority
Kentucky Pollutant Discharge Elimination System ("KPDES") Individual Permit	Kentucky Division of Water ("DOW")	Discharge of process wastewater, non-process wastewater or stormwater from a point source.	KRS 224.10-100, 224.16-050, 224.70-110, 224.70-120, 401 KAR 5:001, AND 401 KAR 5:055-5:080
KPDES Construction Storm Water Discharge General Permit	DOW	Stormwater discharges from construction activities that disturb one or more acres.	KRS 224.16-050, 224.16-060, 401 KAR 5:005 AND 5:060
KPDES Wastewater facility Construction Permit	DOW, Marion County	If installation of sewers or pump stations is involved, a Wastewater Facility Construction Permit is required.	KRS 151.230
General Permit for Floodplain Development	DOW	Development in, along, or across a stream requires floodplain permit.	KRS 151.230
Water Withdrawal Permit	DOW	Withdrawal of public water.	KRS 151.140, 401 KAR 4:010 and 4:200
Section 404 Clean Water Act Permit/Section 10 Rivers and Harbors Act Permit (Individual)	U.S. Army Corps of Engineers	Permit for structures and/or work in affecting navigable Waters of the United States.	33 CFR 322.2
Section 401 Water Quality Certification	DOW	Any discharge into water of the Commonwealth, associated with any federally licensed or permitted activity.	§ 401 CWA KRS 224.16-050 401 KAR Ch.5

Subj: Northern Bobwhite Solar Project Notice of Application

Dear <<name>>;

Northern Bobwhite Solar, LLC, is proposing to construct and operate a 96-megawatt AC solar energy project in Marion County, Kentucky. The proposed project will be located in unincorporated Marion County, KY, north of the City of Lebanon, KY and east of Highway 55. The project will be situated on approximately 1,300 acres which have historically been used for agriculture and farming. The equipment onsite will consist of photo-voltaic solar panels, inverters, a substation transformer, and an associated wiring and balance of system.

Northern Bobwhite Solar, LLC is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

A person who wishes to become a party to a proceeding before the board may, by written motion filed no later than thirty (30) days after the application has been submitted, request leave to intervene.

A party may, upon written motion filed no later than thirty (30) days after an application has been filed, request the board to schedule an evidentiary hearing at the offices of the Public Service Commission, 211 Sower Boulevard, Frankfort, Kentucky.

A request for a local public hearing or local public information meeting shall be made by at least three (3) interested persons who reside in the county or municipal corporation in which the pipeline, plant, or transmission line is proposed to be located. The request shall be made in writing and shall be filed within thirty (30) days following the filing of a completed application.

Any questions related to the application or its process may be directed to the Kentucky State Siting Board, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Our other news includes a change of ownership. On October 15, 2020, Geenex Solar LLC transferred ownership of Northern Bobwhite Solar, LLC to EDF Renewables Development, Inc. While Geenex Solar spearheaded land acquisition, permitting, and continues to be involved in the development of Northern Bobwhite Solar, EDF Renewables will oversee the project's engineering, procurement, construction, power marketing and operation and maintenance.

10 2nd Street NE #400
Minneapolis, MN 55413

EDF Renewables has the experience to build, own, and operate solar power generation facilities like Northern Bobwhite Solar. EDF Renewables is a market-leading independent power producer in the United States, Canada and Mexico. EDF Renewables develops projects that deliver grid-scale power, including wind (onshore and offshore), solar photovoltaic, and storage projects; as well as distributed solutions, including solar, solar plus storage, electric vehicle charging and energy management. As of November 2020, the company's North American portfolio consists of 165 operating projects, generating the equivalent of powering 1.6 million homes, operates and maintains their fleet of 11,000 MW in renewable energy projects in more than 34 different states and provinces and has an additional 162 projects in development, like Northern Bobwhite Solar.

Best wishes and stay well,

Scott Wentzell
EDF Renewable Development, Inc.
Northern Bobwhite Solar

AFFIDAVIT OF PUBLICATION

The following affidavit is to be executed by an officer of the newspaper attesting publication of legal advertisements as required under an Act of Kentucky Legislature of 1958.

Stevie Lowery of Lebanon, Kentucky, being first duly sworn, says that she is Publisher of The Lebanon Enterprise, a newspaper published in the State of Kentucky, County of Marion, and having general circulation in the County of Marion, and that the advertisement of which the annexed is a true copy has been published in said newspaper on the following 12-2-2020.

Stevie Lowery

Subscribed and sworn to before me, a Notary Public within and for the State and County aforesaid, by Stevie Lowery to me personally known, this 2nd day of December, 2020. My commission expires the 11th day of February, 2021.

Eva Jo Watson-Nugent
Notary Public, State At Large 570155
