### KENTUCKY UTILITIES COMPANY

## Response to Commission Staff's First Request for Information Dated November 24, 2020

### Case No. 2020-00349

### **Question No. 1**

### Responding Witness: Kent W. Blake / Lonnie E. Bellar / Christopher M. Garrett / Eileen L. Saunders / John K. Wolfe

- Q-1. Provide the following expense account data:
  - a. A schedule, in comparative form, showing the operating expense account balance for the base period and each of the three most recent calendar years for each account or subaccount included in the utility's annual report. Show the percentage of increase or decrease of each year over the prior year.
  - b. A listing, with descriptions, of all activities, initiatives or programs undertaken or continued by the utility since its last general rate case for the purpose of minimizing costs, or improving the efficiency of its operations or maintenance activities. Include all quantifiable realized and projected savings.

A-1.

- a. See attached.
- b. See the direct testimonies of Kent W. Blake, Lonnie E. Bellar, John K. Wolfe and Eileen L. Saunders.

### **KENTUCKY UTILITIES COMPANY**

# Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

# Question No. 2

## **Responding Witness: Christopher M. Garrett**

- Q-2. Provide, in the format provided in Schedule A, a schedule showing a comparison of the balance in the revenue accounts for each month of the base period to the same month of the immediately preceding 12-month period for each revenue account or subaccount included in the utility's chart of accounts. Include appropriate footnotes to show the month each rate change was approved and the month the full impact of the change was recorded in the accounts.
- A-2. See attached. The data is shown in two six-month periods. Information for the first six months of the Base Period is actual data at the account level per the Chart of Accounts and is compared to actual data from the preceding year. The second six months of the Base Period is forecasted data, from the Company's forecasting tool, which aggregates certain accounts. This is compared to actual data from the preceding year that has been aggregated in the same manner.

(Decrease)			(8)		(18)	(40)	(55)

(1) During the period from March 2019 through August 2019 and March 2020 through August 2020, the Demand Side Management (DSM) mechanism was adjusted in April 2019 pursuant to KPSC approval. The first full month of impact occurred in the month the new rates went into effect. DSM was adjusted in May 2019 with a roll-in to base rates. DSM was adjusted in April 2020 pursuant to KPSC approval. The first full month of impact occurred in the month following the month the new rates went into effect.

(2) During the period from March 2019 through August 2019 and March 2020 through August 2020, the Fuel Adjustment Factor associated with the Fuel Adjustment Clause (FAC) mechanism was adjusted monthly in compliance with 807 KAR 5:056.

(3) During the period from March 2019 through August 2019 and March 2020 through August 2020, the Off-System Sales Tracking (OST) factor associated with the OST mechanism was adjusted monthly in compliance with 807 KAR 5:056.

(4) During the period from March 2019 through August 2019 and March 2020 through August 2020, the Environmental Surcharge associated with the Environmental Cost Recovery (ECR) mechanism was adjusted monthly in compliance with KRS 278.183(3).

Comparison of Kentucky Utility Revenue Account Balances (excluding Old Dominion Power) With Those of the Preceding 6 Months

"000 Omitted"

Excluding Old Dominion Power

(5) During the period from March 2019 through August 2019, Base Rates were adjusted, effective May 1st, 2019, for the Demand Charge, Basic Service Charge, and Base Energy Non-Fuel, within (Case No. 2018-000294), with the first full month of impact in May 2019. In addition, the DSM Revenues from Lost Sales (DRLS) component of the DSM Cost Recovery Mechanism was reset to a rate of zero, as the volumes associated with this component were incorporated within the customer class cost allocations of this case.

(6) During the period from March 2019 through August 2019 and March 2020 through August 2020, the Municipal FAC mechanism was adjusted monthly per FERC Docket No. ER13-2428-000.

(7) During the period from March 2019 through August 2019 and March 2020 through August 2020, the Municipal Demand and Energy Non-Fuel Revenues were adjusted in July 2019 and July 2020 per Annual Informational Filling (FERC Docket No. ER13-2428-000) with first full month impact in August 2019 and August 2020.

(8) During the period from March 2019 through August 2019 and March 2020 through August 2020, the Transmission rates were adjusted in June 2019 and June 2020 per the Open Access Transmission Tariff (OATT), with the first full month of impact in July 2019 and July 2020.

(9) The credit was eliminated effective May 1, 2019 with rate case order (Case No. 2018-00294).

(1) During the period from September 2019 through February 2020, the Demand Side Management (DSM) mechanism was adjusted in January 2020 pursuant to KPSC approval. The first full month of impact occurred in the month following the month the new rates went into effect.

(2) During the period from September 2019 through February 2020, the Fuel Adjustment Factor associated with the Fuel Adjustment Clause (FAC) mechanism was adjusted monthly in compliance with 807 KAR 5:056.

(3) During the period from September 2019 through February 2020, FAC base rates decreased February 2020 as a result of a transfer (roll-in) from the FAC mechanism effective with services rendered and the first full month of impact in February 2020 (per KPSC Order in Case No. 2019-00004).

(4) During the period from September 2019 through February 2020, the Off-System Sales Tracking (OST) factor associated with the OST mechanism was adjusted monthly in compliance with 807 KAR 5:056.

(5) During the period from September 2019 through February 2020, the Environmental Surcharge associated with the Environmental Cost Recovery (ECR) mechanism was adjusted monthly in compliance with KRS 278.183(3).

(6) During the period from September 2019 through February 2020, ECR base rates decreased as a result of a transfer (roll-in) from the ECR mechanism effective with bills rendered and the first full month of impact in November 2019 (per KPSC Order in Case No. 2019-00205).

(7) During the period from September 2019 through February 2020, the Municipal FAC mechanism was adjusted monthly per FERC Docket No. ER13-2428-000.

(8) For the period from September 2020 through February 2021, certain Accounts are combined within the Company's forecasting tool that produces the forecasted Base Period results. For presentation purposes, the same actual Accounts from the September 2019 through February 2020 period have been aggragated to show a combined comparison in same grouping as the Company's forecasting tool.

## **KENTUCKY UTILITIES COMPANY**

# Response to Commission Staff's First Request for Information Dated November 24, 2020

# Case No. 2020-00349

# **Question No. 5**

# **Responding Witness: Christopher M. Garrett**

- Q-5. Provide the following monthly account balances and a calculation of the average (13-month) account balances for the 12 months preceding the base period:
  - a. Plant in service (Account No. 101);
  - b. Plant purchased or sold (Account No. 102);
  - c. Property held for future use (Account No. 105);
  - d. Completed construction not classified (Account No. 106);
  - e. Construction work in progress (Account No. 107);
  - f. Depreciation reserve (Account No. 108);
  - g. Materials and supplies (include all accounts and subaccounts);
  - h. Computation and development of minimum cash requirements;
  - i. Balance in accounts payable applicable to amounts included in utility plant in service (If actual is indeterminable, provide a reasonable estimate.);
  - j. Balance in accounts payable applicable to amounts included in plant under construction (If actual is indeterminable, provide a reasonable estimate.); and
  - k. Balance in accounts payable applicable to prepayments by major category or subaccount.

## A-5.

a.-g. See attached.

h. The Company is not required to compute minimum cash requirements; therefore, this information is not available.

- i. The Company records are not maintained in a manner to determine the amount applicable to accounts payable or to reasonably estimate the balances in accounts payable for the accounts requested.
- j. See attached.
- k. The Company records are not maintained in a manner to determine the amount applicable to accounts payable or to reasonably estimate the balance in accounts payable for the accounts requested.

## **KENTUCKY UTILITIES COMPANY**

# Response to Commission Staff's First Request for Information Dated November 24, 2020

### Case No. 2020-00349

## **Question No. 6**

### **Responding Witness: Christopher M. Garrett**

- Q-6. Provide a detailed analysis of expenses for professional services during the 12 months preceding the base period, as shown in Schedule B, and all workpapers supporting the analysis. At a minimum, the workpapers should show the payee, dollar amount, reference (i.e., voucher no., etc.), account charged, hourly rates and time charged to the company according to each invoice, and a description of the services provided.
- A-6. See attached. In response to the request for hourly rates, the Company adheres to the *LG&E and KU Energy LLC Policy Purchasing* policy citing competitive bidding as the preferred method of procuring goods, commodities and services. Given the voluminous nature of the request to supply the requested time information, the Company is providing the annual legal fees rate schedule along with the billing schedule for audit fees in lieu of pulling hundreds of invoices. Hourly rate information for legal services is considered confidential and is being filed under seal pursuant to a Petition for Confidential Protection.

#### **KENTUCKY UTILITIES COMPANY**

#### Response to Commission Staff's First Request for Information Dated November 24, 2020

#### Case No. 2020-00349

#### **Question No. 7**

#### **Responding Witness: Christopher M. Garrett**

- Q-7. Provide the following information. If any amounts were allocated, show a calculation of the factor used to allocate each amount.
  - a. A detailed analysis of charges booked for advertising expenditures during the 12 months preceding the base period. Include a complete breakdown of Account No. 913 Advertising Expenses, and any other advertising expenditures included in any other expense accounts, as shown in Schedule C1. The analysis should specify the purpose of the expenditure and the expected benefit to be derived.
  - b. An analysis of Account No. 930 Miscellaneous General Expenses for the 12 months preceding the base period. Include a complete breakdown of this account as shown in Schedule C2 and provide detailed workpapers supporting this analysis. At a minimum, the analysis should show the date, vendor, reference (i.e., voucher no., etc.), dollar amount, and brief description of each expenditure of \$500 or more, provided that lesser items are grouped by classes as shown in Schedule C2.
  - c. An analysis of Account No. 426 Other Income Deductions for the 12 months preceding the base period. Include a complete breakdown of this account as shown in Schedule C3, and provide detailed workpapers supporting this analysis. At a minimum, the analysis should show the date, vendor, reference (i.e., voucher no., etc.), dollar amount, and a brief description of each expenditure of \$500 or more, provided that lesser items are grouped by classes as shown in Schedule C3.
- A-7.
- a. See attached.
- b. See attached.
- c. See attached.

#### KENTUCKY UTILITIES COMPANY

## Response to Commission Staff's First Request for Information Dated November 24, 2020

#### Case No. 2020-00349

#### **Question No. 8**

#### **Responding Witness: Lonnie E. Bellar**

- Q-8. Provide an analysis of the utility's expenses for research and development activities for the base period and the three most recent calendar years. The analysis should include the following:
  - a. The basis of fees paid to research organizations and the utility's portion of the total revenue of each organization. Where the contribution is monthly, provide the current rate and the effective date.
  - b. Details of the research activities conducted by each organization.
  - c. Details of services and other benefits provided to the utility by each organization.
  - d. Annual expenditures of each organization with a basic description of the nature of costs incurred by the organization.
  - e. Details of the expected benefits to the utility.
- A-8. The largest recipient of Research, Development and Demonstration funding is the Electric Power Research Institute (EPRI). The EPRI expenses are for collaborative research studies, technology development and demonstration projects. Other expenses associated with specific projects include the University of Kentucky Center for Applied Energy Research (UK CAER), the University of Kentucky Power and Energy Institute of Kentucky (UK PEIK), and other university affiliated research centers. The following amounts for these projects are provided for 2017, 2018, 2019, and the base year (KU's portion).

Year 2017	\$4,079,113
Year 2018	\$2,837,853
Year 2019	\$2,918,977
Base Year	\$2,856,673

a. Payments to EPRI vary depending on the project sets in which each company wishes to participate. EPRI's pricing is based on different metrics specific to each program (see attachment). Other payments for research are specific to

the work being conducted. For the calendar year 2019, KU's payments represented 0.5% of EPRI's revenues. For the UK CAER, KU's payments represented 0.6% of UK CAER's revenues for the fiscal year ended June 30, 2020.

- b. Research projects are related to the operational needs of the different lines of business, such as generation, environmental, transmission, distribution, and customer end-use. See attached for the details of each project set.
- c. EPRI's portfolio of research and development projects is extensive and covers the complete spectrum of activities of interest to most energy suppliers. The purpose of their research program is to find answers and solutions to short and long-term problems or questions. A description of the projects KU has elected to fund for the base year are provided on the attachment, both for EPRI and the other organizations.
- d. EPRI's total expenses in calendar year 2019 (the most current information available) were approximately \$420 million for research and development activities. The University of Kentucky, Center for Applied Energy Research (UK CAER) total expenses for the fiscal year ended June 30, 2020 were approximately \$18 million for research and development activities. The University of Kentucky College of Electrical Engineering total expenses for the fiscal year 2020 were approximately \$2.6 million for research and development activities.
- e. The expected benefits are included in the program descriptions on the attachment.

## Case Nos. 2020-00349 and 2020-00350 Attachment to Response to PSC-1 Question No. 8(e) Page 1 of 7 Bellar

# University of Kentucky Center for Applied Energy Research

# **Fly Ash Fouling Project**

Air heater fouling during low load operation is a significant cause of fossil fuel generating unit outages, requiring the dispatch of less efficient and more expensive generating units, and costs significant financial resources to correct. The University of Kentucky Center for Applied Energy Research (UKy-CAER), in partnership LG&E and KU proposed to conduct a pilot scale research project to reduce fly ash fouling in the air heater during load cyclic operation. The project cost is \$2.5m, with only \$200k coming from LG&E and KU and the majority, \$2.0m, coming from the Office of Fossil Energy within the Department of Energy (DOE) for "Improving Efficiency, Reliability, and Flexibility of Existing Coal-Fueled Power Plants." The pilot will receive a slipstream of flue gas from Brown Unit 3 and then return the flue gas back to the Unit 3's flue gas duct. To improve power plant reliability, UKy-CAER is developing a self-cleaning, ash-foulingfree air heater to increase the capacity of coal-fired power plants for load following due to the use of alternative energy sources. The proposed technology uses auto-controlled blind valves at the air inlet of the air heater without any additional duct or blower. Whenever the load is below 50% of capacity, the inlet blind valve will be rotationally closed to provide a hot-temperature non-heat changing zone inside the air-heater for condensate ammonia bisulfite/bisulfate reevaporation, then transfer the adhesive fouling ash to loose dry ash, which will be cleaned by high temperature flue gas. The effectiveness of auto-control blind valves will be investigated in terms of flue gas pressure drop across the air heater and the flue gas exhaust temperature versus the operating time. The optimal blind valves opening frequency and sequence will be determined during a year-long operation. If successful, the potential benefit to existing coal-fired power plants would be reduced unit outages due to air heater fouling and improved turn-down ratio of coal-fired power plants.

# University of Kentucky Power and Energy Institute of Kentucky (UK PEIK)

# **Renewable Integration Project**

LG&E and KU contracted with the University of Kentucky (UK) Power and Energy Institute of Kentucky (PEIK) to study the integration of large-scale solar photovoltaic systems. The purpose of the project is to determine the maximum PV hosting capacity for the LG&E and KU service area i.e. the maximum amount of PV installation the utility can handle without the need for an additional generator or protection device installations. This project is also helping to identify the factors affecting the maximum PV hosting capacity for the utility and prescribe system modifications that would allow for increased capacity. The UK team is assisting LG&E and KU to model transmission system impacts due to the integration of a large solar PV generation resource and simulate the power quality impacts, in terms of voltage and frequency, as well as potential fault contributions.

## Case Nos. 2020-00349 and 2020-00350 Attachment to Response to PSC-1 Question No. 8(e) Page 2 of 7 Bellar

# EPRI Program 18 Electric Transportation

**Project Summary:** This project provides research critical to the development of technology, infrastructure, and analytics necessary to support the advancement of electric transportation. **Project Benefit:** Value is gained from rate design, sharing of best practices, electric transportation standards development, general monitoring of the electric transportation infrastructure and vehicle technologies, and provision of vehicle ownership data for the service territory.

# EPRI Program 34 Transmission Asset Analytics

**Project Summary:** This project develops asset knowledge enablers, such as failure rates and asset health assessment algorithms, to help utilities make diligent decisions associated with managing the life cycle of transmission equipment and provide a sound basis for maintenance decisions.

**Project Benefit:** Value is gained by enhancing the asset management decision-making processes and improving their results by providing data, tools, and methodologies that can be used by T&S asset and maintenance managers for better decision support.

# EPRI Program 37 Substations

*Project Summary:* Develops tools, techniques, and methodologies to help a utility improve substation equipment inspection, assessment, maintenance, and risk-based asset management. *Project Benefit:* Benefits include research on change management, PRC-005 maintenance methodologies, IEC 61850 substation communication protocol, and optical instrument transformers.

# EPRI Program 49 Coal Combustion Products

*Project Summary:* Provides advanced tools, guidance and comprehensive data to facilitate the safe, cost effective management, use and disposal of coal combustion residual products. Provides information on and testing of technologies to address groundwater remediation and site restoration.

*Project Benefit:* Value is provided by research related to CCR-required parameters (radium 226+228, cobalt, fluoride, molybdenum, lithium) that were not commonly evaluated in most state-required monitoring programs.

# EPRI Program 54 Fish Protection

**Project Summary:** This project provides tools, technologies and analyses for power plants to cost effectively protect aquatic communities at intake structures and hydro dams in accordance with U.S. and International fish protection regulations.

**Project Benefit:** This project enables cost-effective determination of best technology available for I&E control and provide resources to determine balanced indigenous populations potentially impacted by thermal effluent.

## Case Nos. 2020-00349 and 2020-00350 Attachment to Response to PSC-1 Question No. 8(e) Page 3 of 7 Bellar

# EPRI Program 62 Occupational Health and Safety

*Project Summary:* This project provides products, tools and design recommendations to help electric power companies maintain safer, healthier work environments, identify injury and illness trends, develop cost-effective ergonomic interventions, and addresses critical occupational exposure issues.

*Project Benefit:* Value is provided by the scientific research needed for informed decisions on strategies for injury prevention, safety program targets, exposure controls, regulatory compliance, and intervention and training methods.

# EPRI Program 63 Boiler Life Improvement

**Project Summary:** This project develops reliable and cost-effective inspections to reduce O&M costs and improve life-management options, tools for boiler component life management and remaining-life assessment, high-energy steam and water piping safety and reliability techniques and understanding how damage mechanisms affect piping components.

*Project Benefit:* Value is gained from reducing costs by avoiding lost availability due to boiler tube failures and knowledge sharing by consulting with EPRI and other utilities.

# EPRI Program 64 Boiler and Turbine Chemistry

*Project Summary:* This project develops guidelines, technology, and training materials to help plant operators manage water-steam cycle chemistry, avoid unplanned outages, reduce operations and maintenance costs, and improve unit efficiency.

**Project Benefit:** Value is provided by improvement in overall unit availability and flexibility by preventing unmitigated damaging corrosive conditions that result from improper response to cycle chemistry excursions.

# EPRI Program 65 Steam Turbine and Aux Systems

*Project Summary:* This project supports continuous improvement in the safety and availability of steam turbines, generators, and auxiliary systems through applied research in component life management, preventive maintenance, condition assessment, advanced monitoring, and control systems.

**Project Benefit:** Value is provided by improvement to the safety, reliability, and availability of steam turbines - key systems for overall plant performance in conventional, combined-cycle, and nuclear generating asset types.

# EPRI Program 68 Instrumentation, Controls, Automation

*Project Summary:* This project identifies, develops, and demonstrates state-of-the-art sensing, monitoring, analytics, automation, and control system technologies to manage equipment condition and optimize plant performance.

**Project Benefit:** Value is provided through well-documented plant demonstrations with member participation. Guidance documents and innovative product delivery are utilized to provide an on-demand training experience for controls experts in the field as well as by members to improve the overall understanding of plant controls.

## Case Nos. 2020-00349 and 2020-00350 Attachment to Response to PSC-1 Question No. 8(e) Page 4 of 7 Bellar

# EPRI Program 69 Maintenance Management & Tech.

*Project Summary:* This project develops maintenance processes and technologies to improve the safety, reliability, and performance of plant staff and equipment.

**Project Benefit:** Value is provided by resolution of maintenance, equipment and reliability issues within the industry - enhancing best practices - in a manner that can be integrated into enterprise systems.

# EPRI Program 75 Integrated Environmental Controls

**Project Summary:** This project assists operators of SCRs, sorbent injection systems, electrostatic precipitators (ESPs), baghouses, flue gas desulfurization systems (FGDs), and other post-combustion environmental controls to optimize practices for maximum reliability and performance. Environmental controls are assessed in an integrated manner, considering not only emission reductions achieved, but also impacts on plant reliability and total costs. **Project Benefit:** Project supports cost-effective and reliable reductions of emissions and optimized performance and resolution of operability issues for all environmental control devices.

# EPRI Program 77 Continuous Emissions Monitoring

*Project Summary:* This project supports development and validation of accurate, robust, and low-maintenance CEMs monitoring and reporting capabilities.

**Project Benefit:** Value of project is in the investigation and development of best practices for system O&M and stack testing methods and access to a comprehensive CEM information repository and training/reference resources.

# EPRI Program 87 Materials and Repair

**Project Summary:** This project provides integrated materials selection guidance, repair and welding technologies, and corrosion mitigation methods to improve equipment performance, reliability, and safety.

*Project Benefit:* The value of this project is the increased availability through better understanding of plant materials, minimization of repeat failures and equipment damage, and reduced outage frequency and duration.

# EPRI Program 88 Combined Cycle HRSG

**Project Summary:** This project provides technical tools to improve the performance and reliability of combined-cycle heat recovery steam generators (HRSGs) and balance of plant equipment.

**Project Benefit:** Value is derived from reduced risk of in-service failures to high-temperature and pressure components, reduced impact of lost availability due to HRSG tube failures, and the extension of time between outages and inspections though the use of advanced inspection and analysis techniques.

## Case Nos. 2020-00349 and 2020-00350 Attachment to Response to PSC-1 Question No. 8(e) Page 5 of 7 Bellar

# EPRI Program P94 Energy Storage & Generation

**Project Summary:** This project facilitates the availability and use of energy storage to support safe, reliable, affordable, and environmentally responsible electricity. This project integrates multiple activities, including technology evaluation, economic and technical modeling to support grid planning and operations, testing and field demonstration, and industry collaboration. *Project Benefit:* Value is provided by the tools, methods, and best practices that support utilities and other users to assess and design energy storage, fueled DG, and microgrid projects that are safer, more reliable, lower cost, and with environmental and societal benefit.

# EPRI Program 104 Balance of Plant Systems and Equipment

*Project Summary:* The project aims to improve overall efficiency and reliability of the balance of plant equipment, which includes a majority of plant equipment, excluding the turbine, generator, and boiler

**Project Benefit:** Provides a network of maintenance professions to share best practices and troubleshooting advice, reference materials to create a lubrication audit and lubrication manual, and the development of new Field Inspection Guides for mobile devices and Equipment Guide documents with 3D graphics and videos.

# EPRI Program 108 Operations Management

*Project Summary:* Develops advanced processes and related technologies that support improved plant reliability and reduced costs. Addresses key challenges relating to power plant management, conduct of operations, workforce performance, and risk.

*Project Benefit:* This project provides benefits such as quick visuals and instructions for best practices on various operations and maintenance topics.

# EPRI Program 180 Distribution Systems

**Project Summary:** Delivers a portfolio of tools and technologies to increase overall distribution systems reliability and resiliency, understand the expected performance for specific components throughout its life cycle, assess methods for evaluating the condition of system components, and develop and test new technologies.

*Project Benefit:* This project enhances the safety, both for utility workers and the public, improves asset and system reliability, and helps proactively plan capital and maintenance budgets.

# EPRI Program 183 Cyber Security

*Project Summary:* Focuses on addressing the emerging threats to an interconnected electric sector through multidisciplinary, collaborative research on cyber security technologies, standards, and business processes to enhance the current cyber security posture of the grid and increase the security of systems deployed in the future.

*Project Benefit:* Project benefits include techniques for assessing and monitoring risk, practical approaches to mitigating the risk of operating legacy systems, early identification of security

## Case Nos. 2020-00349 and 2020-00350 Attachment to Response to PSC-1 Question No. 8(e) Page 6 of 7 Bellar

gaps through laboratory assessments of security technologies, and technologies that support the management of cyber incidents and increase the cyber security and resiliency of the grid.

# EPRI Program 185 Water Management Technology

**Project Summary:** Identifies, evaluates, and demonstrates technologies to support cost-effective and reliable treatment for limiting pollutants discharged from power plants, re-use of water streams within the power plants, and use of alternative sources of water.

**Project Benefit:** Project research demonstrated that lime and acid are not needed in the Chemical and Physical Treatment section of the Process Water System. There is additional research in tertiary treatment for ELG systems that are unable to meet compliance, providing vital information for the options surrounding non-compliant systems.

# EPRI Program 194 Heat Rate Improvement

**Project Summary:** The focus of this project is to improve plant efficiency and heat rate, independent of the fuel type used for generation. Heat rate improvements bear a direct relationship to the amount of fuel consumed for generation and therefore affects not only the Company's fuel expenditures but also the amounts of air emissions released. Any reduction in fuel consumed for a fossil source (coal or gas) leads to a direct reduction in the amount of CO<sub>2</sub>, NOx, SO<sub>2</sub>/SO<sub>3</sub>, Hg, ash, and other regulated emissions. Operating with a lower heat rate assists the plants in maintaining environmental compliance with stack emissions.

*Project Benefit:* Benefits include enhanced monitoring, avoided fuel costs, reduction in auxiliary power, avoided lost generation, and avoided feedwater heater costs.

# EPRI Program 196 Water Quality Program

*Project Summary:* Evaluates wastewater discharges in terms of metals, inorganics and organics to properly characterize emissions and evaluate treatment options.

**Project Benefit:** The project benefits ELG-related issues for water treatment as well as research of alternative treatments for cooling tower biological control for increasing regulatory concerns of environmental impacts and including potential cost-reduction economic drivers.

# EPRI Program 200 Distributions Operations & Planning

**Project Summary:** Provides planning processes and frameworks, models, tools, reliability assessment analytics, as well as incorporation of new automation, protection, and control technologies that will be required to transform the current distribution system into one that integrates and uses new distributed technologies.

*Project Benefit:* The project allows for assessment of costs and benefits of smart grid applications and advanced technology as well as supports the implementation of advanced distribution control functions for reliability improvement, voltage control, and dynamic grid management.

## Case Nos. 2020-00349 and 2020-00350 Attachment to Response to PSC-1 Question No. 8(e) Page 7 of 7 Bellar

# EPRI Program P203B Air Health Effects

**Project Summary:** Third party research and assessment of health costs with the goal to deliver scientifically sound information on the health impacts of air pollution from electric generating facilities and other operations.

*Project Benefit:* Studies assessing the various concentrations of O<sub>3</sub>-NO<sub>2</sub>-PM - could lead to an alternative means of addressing statutory reduction assessments of criteria pollutants.

# EPRI Program 203C Power Plant Multimedia Emissions

**Project Summary:** This project provides tools and research for meeting existing air quality compliance requirements and informing future regulations and stakeholder communications. Provides state of the science information on multimedia emissions and discharges essential to power companies making environmental management decisions in an evolving landscape of fuel, environmental controls, and operating conditions.

**Project Benefit:** One of the project benefits includes multimedia characterization and partitioning research, which develops modeling improvements to adequately predict Post-MATS HAP emissions for existing and new plant equipment configurations.

# EPRI Program 209 Cyber Security for Generation Assets

*Project Summary:* This project addresses the specific considerations associated with existing and new fossil assets, new and existing renewable assets, and other critical infrastructure sector's interfaces with generation (i.e. transportation systems, municipal water, natural gas and fuel pipelines, etc.)

*Project Benefit:* Improves overall generation operational technology cyber security posture and maturity as well as better prepares to protect, detect, respond, and recover from cyber threats.

### **KENTUCKY UTILITIES COMPANY**

## Response to Commission Staff's First Request for Information Dated November 24, 2020

### Case No. 2020-00349

### **Question No. 9**

## **Responding Witness: Lonnie E. Bellar**

- Q-9. Regarding what are commonly referred to as smart grid initiatives, provide the following information:
  - a. Identify all smart grid costs the utility has incurred since the start of the test year in its last general rate case. Identify the specific projects the utility has undertaken, the accounts in which the costs have been recorded, and state whether the costs were expensed or capitalized.
  - b. Provide the level of smart grid costs the utility has included in its forecasted test period and the amounts to be expensed and capitalized.
- A-9.
- a. The following expense accounts reflect project costs for smart grid initiatives: 562, 566, 570, 571, 581, 588 and 908. The following capital accounts reflect project costs for smart grid initiatives: 107 and 108. See attached for the breakdown of the smart grid initiatives since the start of the test year in the last general rate case.
- b. See attached for the breakdown of costs for smart grid investments in the forecasted test period. See also the direct testimony of Lonnie E. Bellar and Exhibit LEB-4 thereto for a summary of projected smart grid investments by year.

# Case No. 2020-00349 Attachment to Response to PSC-1 Question No. 9(b) Page 1 of 1 Bellar

Smart Grid (In \$000s)

	May 2019 through October 2020		Twelve Months Ending June 30, 2022

## **KENTUCKY UTILITIES COMPANY**

## Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

## **Question No. 10**

### **Responding Witness: Robert M. Conroy**

- Q-10. Regarding demand-side management, conservation, and energy-efficiency programs, provide the following:
  - a. A list of all programs currently offered by the utility.
  - b. The total cost incurred for these programs by the utility in each of the three most recent calendar years.
  - c. The total energy and demand reductions realized through these programs in each of the three most recent calendar years.
  - d. The total cost for these programs included in the forecasted test period and the expected energy reductions to be realized therefrom.
- A-10. All demand-side management ("DSM") program expenditures are recovered through the DSM Mechanism and are not included in the determination of the revenue requirement for base rates in this proceeding.
  - a. The DSM programs currently offered by LG&E and KU are:
    - Residential Low-Income Weatherization Program
    - Residential and Small Nonresidential Demand Conservation Program
    - Large Nonresidential Demand Conservation Program
    - Nonresidential Rebates Program
    - Program Development & Administration
    - Advanced Metering Systems (AMS) Customer Service Offering
  - b. The total cost incurred for these programs by the utility in each of the three most recent calendar years is in the table below:

KU DSM Cost of Programs ('000)			
2017	2018	2019	

\$20,232	\$14,022	\$8,507
----------	----------	---------

c. The total energy and demand reductions realized through these programs in each of the three most recent calendar years is in the table below:

KU DSM Energy and Demand Reductions						
2017 2018 2019						
Energy (MWh)	MWh) 90,002 67,417 50,					
Demand (MW) 32.6 18.0 6.7						

d. All DSM expenditures are removed from the forecasted test period in the determination of the revenue requirement for base rates. The energy reduction expected to be realized for KU is included in the load forecast. For the forecasted test year, the expected energy reduction associated with KU DSM is 15,285 MWh.

## **KENTUCKY UTILITIES COMPANY**

## Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

## Question No. 11

## **Responding Witness: Christopher M. Garrett**

- Q-11. Provide the following information for the most recent calendar year concerning the utility and any affiliated service corporation or corporate service division/unit:
  - a. A schedule detailing the costs charged, either directly or allocated, by the utility to the service corporation. Indicate the utility's accounts in which these costs were originally recorded. For costs that are allocated, include a description of the allocation factors utilized.
  - b. A schedule detailing the costs charged, either directly or allocated, by the service corporation to the utility. Identify the utility's accounts in which these costs were recorded. For costs that are allocated, include a description of the allocation factors utilized.

#### A-11.

- a. See attached.
- b. See attached.

For allocation methodologies, refer to the Cost Allocation Manual filed within the Filing Requirements at Tab 51.

## KENTUCKY UTILITIES COMPANY

## Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

## Question No. 12

## **Responding Witness: Christopher M. Garrett**

- Q-12. Provide the following information for the most recent calendar year concerning all affiliate-related activities not identified in response to Item 11:
  - a. Provide the names of affiliates that provided some form of service to the utility and the type of service the utility received from each affiliate.
  - b. Provide the names of affiliates to whom the utility provided some form of service and the type of service the utility provided to each affiliate.
  - c. Identify the service agreement with each affiliate, state whether the service agreement has been previously filed with the Commission, and identify the proceeding in which it was filed. Provide each service agreement that has not been previously filed with the Commission.

### A-12.

- a. See attached.
- b. See attached.
- c. Service agreements are listed below for each affiliate for calendar year 2019. See attached.

Affiliate	Service Agreement	Filing Reference

### PPL AND CONSENTING MEMBERS OF ITS CONSOLIDATED GROUP AGREEMENT FOR FILING CONSOLIDATED INCOME TAX RETURNS AND FOR ALLOCATION OF CONSOLIDATED INCOME TAX LIABILITIES AND BENEFITS

#### WITNESSETH

WHEREAS, the parties hereto are Members of an affiliated group ("Affiliated Group") as defined in Section 1504(a) of the Internal Revenue Code of 1986, as amended ("Code"), of which the Parent is the common parent; and

WHEREAS, such Affiliated Group intends to file a U.S. consolidated income tax return for its tax period 2018 and for subsequent years; and

WHEREAS, PPL has historically determined its income tax allocation utilizing the principles of the "stand alone" or "separate company" method; and

WHEREAS, Kentucky Utilities Company ("KU") and Louisville Gas and Electric Company ("LG&E") were ordered in the Commonwealth of Kentucky Public Service Commission Case Nos. 2009-00548 and 2009-00549 to allocate income tax liabilities using the "stand alone" rate making principal; and

WHEREAS, LG&E was ordered in the Commonwealth of Kentucky Public Service Commission Case No. 89-374 to allocate income tax liabilities using the "stand alone" method; and

WHEREAS, KU was ordered in the Commonwealth of Kentucky Public Service Commission Case No. 10296 to allocate income tax liabilities using the "stand alone" method; and

WHEREAS, the Commonwealth of Kentucky Public Service Commission ordered LG&E and KU in case No. 97-300 to follow Corporate Policies and Guidelines for Intercompany Transactions which state: "The 'stand alone' method will be used to allocate the income tax liabilities of each entity."

WHEREAS, KU is subject to regulation by the Commonwealth of Virginia State Corporation Commission; and

WHEREAS, in 2008, Section 56.235.2(A) the Code of Virginia was amended to state that "for ratemaking purposes, the Commission shall determine the federal and state income tax costs for investor-owned water, gas, or electric utility that is part of a publicly-traded, consolidated group as follows: (i) such utility's apportioned state income tax costs shall be calculated according to the applicable statutory rate, as if the utility had not filed a consolidated return with its affiliates, and (ii) such utility's federal income tax costs shall be calculated according to the applicable federal income tax rate and shall exclude any consolidated tax liability or benefit adjustments originating from any taxable income or loss of its affiliates."

WHEREAS, it is the intent and desire of the parties hereto that a method be established for allocating the consolidated tax liability of the Affiliated Group among its Members, for reimbursing Parent for payment of such tax liability, for compensating any party for use of its losses or tax credits, and to provide for the allocation and payment of any refund or credit arising from a carryback, or carryforward of losses or tax credits from other tax years.

NOW, THEREFORE, in consideration of the mutual covenants and promises contained herein, the parties hereto agree as follows:

### 1. DEFINITIONS

<u>"Associate company</u>" is a consenting Member of the PPL consolidated group which agrees to be subject to this Agreement.

<u>"Consolidated tax"</u> is the aggregate current federal income tax liability for a tax year, being the tax shown on the consolidated federal income tax return of the Affiliated Group and any adjustments thereto, as described in Section 4 hereof. The Consolidated tax shall also mean the amount of the refund if the consolidated tax return shows a negative tax liability.

<u>"Corporate tax credit</u>" shall mean the negative Separate return tax of an Associate company for a taxable year, equal to the amount by which the Consolidated tax is reduced by including a loss, credit, carryover or other tax benefit of such Associate company in the consolidated return.

<u>"Corporate taxable income</u>" is the positive taxable income of an associate company for a tax year, computed as though such company had filed a separate return on the same basis as used in the consolidated return, except that dividend income or distributions from associate companies shall be disregarded, and other intercompany transactions, eliminated in consolidation, shall be given appropriate effect. Carryovers and carrybacks shall be taken into account unless the Member has been paid a Corporate Tax Credit therefore under paragraph 4 of this Agreement.

<u>"Corporate taxable loss</u>" is the taxable loss of an associate company for a tax year, computed as though such company had filed a separate return on the same basis as used in the consolidated return, except that dividend income from associate companies shall be disregarded, and other intercompany transactions, eliminated in consolidation, shall be given appropriate effect. Carryovers and carrybacks shall be taken into account unless Member has been paid a Corporate Tax Credit therefore under paragraph 4 of this Agreement.

<u>"Member"</u> is a subsidiary or affiliate company of PPL, the activity of which is included in the PPL consolidated U.S. federal tax return and an Associate company, including a business as indicated in Section 3 herein, which agrees to be subject to this Agreement.

"PPL" means PPL Corporation, a Pennsylvania Corporation.

<u>"Separate return tax</u>" is the tax on the Corporate taxable income or loss of an associate company as though such company were not a Member of a consolidated group. For purposes of computing the Separate return tax of a Member which is a limited liability company, such Member shall be considered to possess and be entitled to use losses, carryovers, tax credits and other tax attributes (1) attributable to a predecessor of such Member taxable as a corporation or (2) arising while such Member is a limited liability company.

These definitions shall apply, as appropriate, in the context of the regular income tax and the Alternative Minimum Tax ("AMT") unless otherwise indicated in the Agreement.

2. A U.S. consolidated income tax return shall be filed by Parent, or its designee, for all tax periods covered under this Agreement and for which the Affiliated Group is required or permitted to file a consolidated tax return. Parent, or its designee, shall be responsible for the preparation of such returns, and shall be entitled to make all such elections under the Code as it shall deem appropriate or advisable in connection with those returns; provided that Parent, or its designee, shall have no liability to the subsidiaries for any errors or omissions in the preparation or filing of those returns, or in connection with those elections. Each of the undersigned Members shall, and shall cause their respective subsidiaries to execute and file such consents, elections, and other documents that Parent may determine are required or appropriate, in Parent's discretion and at its request, for the proper filing of, or in connection with, such returns, and take all such other actions as shall be required to give effect to the provisions of this Agreement. The undersigned Members and their respective subsidiaries are hereinafter collectively referred to as the "subsidiaries" or "Members," and individually referred to as a "subsidiary" or a "Member" and shall be bound by this agreement.

## 3. BUSINESSES OPERATING IN LLC OR LP FORM

For purposes of allocating the consolidated federal and state tax liabilities and tax benefits under this Agreement, each business operating as an LLC or LP shall be considered a Member, and shall be responsible for its allocable share of Corporate taxable income (or shall be entitled to a credit for its allocable share of Corporate taxable loss), as set forth in Sections 4 through 7 hereof. For purposes of this Agreement, the determination of a regulated business's allocable share shall be made (i) as if such regulated business was a regarded entity for U.S. federal income tax purposes and (ii) utilizing the separate "Corporate taxable income" or stand alone method.

## 4. TAX ALLOCATION PROCEDURES

The Consolidated tax shall be allocated among the Members of the group utilizing the separate "Corporate taxable income" or stand alone method, in the following manner:

a) Each Member, which has a Corporate taxable loss, will be entitled to a Corporate tax credit equal to the amount by which the consolidated regular income tax is reduced by including the Corporate taxable loss of such Member in the consolidated tax return. The Members having Corporate taxable income will be allocated an amount of regular income tax liability equal to the sum of the consolidated regular tax liability and the Corporate tax credits allocated to the Members having Corporate taxable losses based on the ratio that each such Member's Corporate taxable income bears to the total Corporate taxable income of all Members having Corporate taxable income. If the aggregate of the Members' Corporate tax losses are not entirely utilized on the current year's consolidate return, the consolidated carryback or carryforward of such losses to the applicable taxable year(s) will be allocated to each Member having a Corporate taxable loss in the ratio that such Member's separate Corporate taxable loss bears to the total Corporate taxable loss of all Members having Corporate taxable losses.

Intercompany eliminations recorded by consolidation entries that affect the Consolidated tax will be assigned to the appropriate Member necessitating the intercompany elimination for the purpose of computing Separate return tax.

b) The consolidated AMT will be allocated among the Members in accordance with the procedures and principles set forth in Proposed Treasury Regulation Section 1.1502-55 in the form such regulation existed on the date on which this Agreement was executed. For purposes of this Agreement, any liability for alternative minimum tax shall be treated as part of the Member's separate tax liability provided that the entire Affiliated Group incurs an alternative minimum tax liability.

c) Tax benefits such as general business credits, foreign tax benefits, or other tax credits shall be apportioned directly to those Members whose investments or contributions generated the credit or benefit.

If the credit or benefit cannot be entirely utilized to offset current consolidated tax, the consolidated credit carryback or carryforward shall be apportioned to those Members whose investments or contributions generated the credit or benefit in proportion to the relative amounts of credits or benefits generated by each Member.

d) If the amount of consolidated tax allocated to any Member under this Agreement, as determined above, exceeds the separate return tax of such Member, such excess shall be reallocated among those Members who allocated tax liability is less than the amount of their respective separate return tax liabilities (i.e. sur-tax exemption). The reallocation shall be proportionate to the respective reductions in separate return tax liability of such Members. Any remaining unallocated tax liability shall be assigned to PPL. The term "tax" and "tax liability" used in the subsection shall include regular tax and AMT. Under no circumstances shall the amount of tax liability allocated to a Member of the Affiliated Group under this Agreement exceed its separate tax liability. The remaining cost or benefit will be allocated to the applicable business unit parent on at least an annual basis.

## 5. TAX PAYMENTS AND COLLECTIONS FOR ALLOCATIONS

Parent, or its designee, shall make any calculations on behalf of the Members necessary to comply with the estimated tax provisions of the Internal Revenue Code of 1986 as amended (the "Code"). Based on such calculations, Parent, or its designee, shall charge or refund to the Members appropriate amounts at intervals consistent with the dates indicated by Code Section 6655. Parent, or its designee, shall be responsible for paying to the Internal Revenue Service the consolidated current federal income tax liability.

## Case Nos. 2020-00349 and 2020-00350 Attachment 1 to Response to PSC-1 Question No. 12(c) Page 5 of 9 Garrett

After filing the consolidated federal income tax return and allocating the consolidated tax liability among the Members, Parent, or its designee, shall charge or credit, as appropriate, the Members to reflect the difference between prior payments or credits and their current tax as allocated under this Agreement.

Charges or credits shall be made within ten business days after the returns are filed or estimated tax payments are made. Charges or credits are permitted to be made with each Member through the use of an intercompany account, as permitted under applicable state regulatory jurisdictions.

## 6. ALLOCATION OF STATE TAX LIABILITIES OR BENEFITS

The allocation of state and local income tax liabilities will be determined based on the application of one of the following filing methods:

- (1) Separate entity
- (2) Unitary group
- (3) Nexus Combined
- (4) Consolidated (mirrors the federal group);

provided, however, that no Member's state or local tax income tax liability under the Agreement shall exceed its state or local tax liability had it filed a separate return.

All tax cost or benefit determined under a separate entity filing will be allocated to the subsidiary that filed the separate return.

Tax cost or benefit determined for a unitary filing will be allocated to the applicable business unit (such as a regulated company or group of non-regulated companies), similar to a separate entity filing allocation. For example, if a business unit files a state unitary return including a parent entity and its subsidiaries, the entire state tax cost or benefit is allocated to the business unit. Further allocation within the business unit is optional at the discretion of the business unit.

Tax cost or benefit determined for a nexus combined filing will be allocated as if each entity or business unit filed a "stand alone" or separate entity return. Both apportionment factors and taxable income are to be considered in the allocation. Any remaining cost or benefit will be allocated to the applicable business unit parent on at least an annual basis.

Tax cost or benefit determined for a consolidated filing will be allocated based on each subsidiary's or business unit's nexus (as defined below) with the individual state or locality. For example, state tax determined in a consolidated return will be allocated as if the entity (or business unit) filed a "stand alone" or separate tax return using both: (a) the entity's (or business unit's) property, payroll, and receipts apportioned to the state and (b) their taxable income or loss. No tax cost or benefit will be allocated to any entity or business unit having no nexus in the state or locality. The remaining cost or benefit will be allocated to the applicable business unit parent on at least an annual basis.

For purposes of state and local allocations, the following definitions are provided:

"Nexus" -- The connection an entity has with a taxing jurisdiction generally represented by property and payroll. The applicable jurisdiction's nexus standards will determine whether tax cost or benefit is allocated to an entity. (e.g., state sales or receipts of an entity may require inclusion in a consolidated return even though the entity itself does not have nexus and is protected by PL 86-272.)

"Unitary" -- The relationship between related/affiliated Members generally within a consolidated group. The applicable jurisdiction will determine whether the entities are unitary. This often requires a presence of unity of ownership (e.g., over 50% owned by common parent), unity of operation (back-office or central support functions) and unity of use (centralized policies, common management forces, intercompany products flow or services provided by one entity to another).

"Nexus-combined" -- A return that includes only those entities having nexus in the applicable jurisdiction.

7. TAX RETURN ADJUSTMENTS

In the event the consolidated tax return is subsequently adjusted by the Internal Revenue Service, state tax authorities, amended returns, claims for refund, or otherwise, such adjustments shall be reflected in the same manner as though they had formed part of the original consolidated return. Interest paid or received, and penalties imposed on account of any adjustment will be allocated to the responsible Member. In the case of a refund, Parent shall make payment to each Member for its share of the refund, determined in the same manner as in paragraph 3 above, within ten business days after the refund is received by Parent, and in the case of an increase in tax liability, each Member shall pay to Parent its allocable share of such liability from Parent.

## 8. NEW MEMBERS

If, at any time, any other company becomes a Member of the Affiliated Group, the parties hereto agree that such new Member may become a party to this Agreement by executing a duplicate copy of this Agreement. Unless otherwise specified, such new Member shall have similar rights and obligations to all other Members under this Agreement.

## 9. MEMBERS LEAVING THE AFFILIATED GROUP

In the event that any Member of the Affiliated Group at any time leaves the group and, under any applicable statutory provision or regulation, that Member is assigned and is deemed to take with it all or a portion of any of the tax attributes (including, but not limited to, net operating losses, credit carryforwards, and minimum tax credit carryforwards) of the Affiliated Group, then, to the extent the amount of the attributes so assigned differs from the amount of such attributes previously allocated to such Member under this Agreement, the leaving Member shall appropriately settle with the group. Such settlement shall consist of payment of a dollar-for-dollar basis for all differences in credits and, in the case of net operating loss differences, in an amount computed by reference to the highest marginal corporate tax rate. The settlement

amounts shall be allocated among the remaining Members of the group in proportion to the relative level of attributes possessed by each Member and the attributes of each Member shall be adjusted accordingly.

## 10. SUCCESSORS, ASSIGNS

The provisions and terms of the Agreement shall be binding on and insure to the benefit of any successor or assignee by reason of merger, acquisition of assets, or otherwise, of any of the Members hereto.

## 11. AMENDMENTS AND TERMINATION

This Agreement may be amended at any time by the written agreement of the parties hereto at the date of such amendment and may be terminated at any time by the written consent of all such parties.

## 12. GOVERNING LAW

This Agreement is made under the law of the Commonwealth of Pennsylvania, which law shall be controlling in all matters relating to the interpretation, construction, or enforcement hereof.

## 13. EFFECTIVE DATE

This Agreement is effective for the allocation of the current federal income tax liabilities of the Members for the consolidated tax year (2018) and all subsequent years until this Agreement is revised in writing.

The above procedure for apportioning the consolidated annual net current federal and state tax liabilities and tax benefits of PPL and consenting Members of its consolidated group have been agreed to by each of the below listed Members of the consolidated group as evidenced by the signature of an officer of each business unit or sub-group parent company.

# AMENDED AND RESTATED TRANSMISSION COORDINATION AGREEMENT

Between

Louisville Gas and Electric Company

and

**Kentucky Utilities Company** 

March 2, 2018

## AMENDED AND RESTATED TRANSMISSION COORDINATION AGREEMENT

## Between

## Louisville Gas and Electric Company

and

### Kentucky Utilities Company

THIS AMENDED AND RESTATED TRANSMISSION COORDINATION AGREEMENT, hereinafter called "Agreement," is made and entered into as of the 2<sup>nd</sup> day of March 2018 by and between Louisville Gas and Electric Company ("LG&E"), and Kentucky Utilities Company ("KU"), hereinafter separately referred to as "Company" and jointly as "Companies."

WHEREAS, LG&E and KU are the owners and operators of interconnected generation, transmission and distribution facilities with which they are engaged in the business of transmitting and selling electric power to the general public, to other entities and to other electric utilities; and

WHEREAS, in 1998 LG&E's holding company parent, LG&E Energy Corp., and KU's holding company parent, KU Energy Corporation, merged, pursuant to which LG&E and KU became a wholly-owned subsidiary of an entity whose successor is now known as LG&E and KU Energy LLC ("LKE");

WHEREAS, the Companies entered into a Transmission Coordination Agreement, dated October 9, 1997, which set forth the terms for the coordinated planning, operation and maintenance of their transmission facilities;

WHEREAS, since the merger LG&E and KU have been operating as a single interconnected and coordinated Transmission System pursuant to the Transmission Coordination Agreement;

WHEREAS, the Transmission Coordination Agreement was amended on July 2, 2013 and now needs to be further amended be updated and modified to reflect current operations;

NOW, THEREFORE, the Companies mutually agree as follows:

#### ARTICLE I TERM OF AGREEMENT

## 1.1 Effective Date

This Agreement shall become effective upon the later of March 2, 2018, or such date as approved by the Federal Energy Regulatory Commission. This Agreement shall continue in force and effect from the effective date hereinabove described, and continue from Year to Year thereafter until terminated by either Company.

## 1.2 Periodic Review

This Agreement will be reviewed periodically by the Coordinating Committee, as defined herein, or by the Companies in their individual capacities to determine whether revisions are necessary to meet changing conditions. In the event that revisions are made by the Companies pursuant to Section 8.5, and after requisite approval or acceptance for filing by the appropriate regulatory authorities, the Coordinating Committee will thereafter, for the purpose of ready reference to a single document, prepare for distribution to the Companies an amended document reflecting all changes in and additions to this Agreement with notations thereon of the date amended.

# ARTICLE II

## DEFINITIONS

For purposes of this Agreement, the following definitions shall apply:

2.1 <u>Agreement</u> shall mean this Agreement including all attachments and schedules applying thereto and any amendments made hereafter.

2.2 <u>Ancillary Services</u> shall mean those services that are necessary to support the transmission of capacity and energy from resources to loads while maintaining reliable operation of the Companies' Transmission System in accordance with Good Utility Practice.

2.3 <u>Balancing Authority</u> shall mean the responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority Area, and supports Interconnection frequency in real time.

2.4 <u>Balancing Authority Area</u> shall mean the collection of generation, transmission, and loads within the metered boundaries of the Balancing Authority. The Balancing Authority maintains load-resource balance within this area.

2.5 <u>Designated Agent</u> shall mean any entity that performs actions or functions on behalf of the Transmission Provider, an Eligible Customer, or the Transmission Customer required under the LG&E-KU Open Access Transmission Tariff.

2.6 <u>Direct Assignment Facilities</u> shall mean facilities or portions of facilities that are constructed by the Transmission Provider for the sole use/benefit of a particular Transmission Customer requesting service under the LG&E-KU Open Access Transmission Tariff.

2.7 <u>Month shall mean a calendar month consisting of the applicable 24-hour periods as</u> measured by Eastern Standard Time.

2.8 <u>LG&E-KU Open Access Transmission Tariff</u> shall mean the LG&E-KU Open Access Transmission Tariff filed with the Federal Energy Regulatory Commission on behalf of the Companies as it may be amended from time to time.

2.9 <u>Point-to-Point Transmission Service</u> shall mean service provided under Part II of the LG&E-KU Open Access Transmission Tariff.

2.10 <u>Scheduling, System Control and Dispatch Service</u> shall mean the service required to schedule the movement of power through, out of, within, or into a Balancing Authority Area, as specified in Schedule 1 of the LG&E-KU Open Access Transmission Tariff.

2.11 <u>Transmission Customer</u> shall mean any Eligible Customer as defined in the LG&E-KU Open Access Transmission Tariff (or its Designated Agent) that (i) executes a Service Agreement, or (ii) requests in writing that the Transmission Provider file with the Federal Energy Regulatory Commission, a proposed unexecuted Service Agreement to receive Transmission Service under Part II of the LG&E-KU Open Access Transmission Tariff. This term is used in the Part I Common Service Provisions of the LG&E-KU Open Access Transmission Tariff to include customers receiving service under Part II and Part III of the LG&E-KU Open Access Transmission Tariff.

2.12 <u>Transmission Provider</u> shall mean the Transmission System Operator (or its Designated Agent).

2.13 <u>Transmission Service</u> shall mean service provided under Part II and Part III of the LG&E-KU Open Access Transmission Tariff on a firm and non-firm basis.

2.14 <u>Transmission System</u> shall mean the facilities owned, controlled or operated by the Companies that are used to provide service under the LG&E-KU Open Access Transmission Tariff.

2.15 <u>Transmission System Operator</u> shall mean the organization described in Article VI of this Agreement.

#### ARTICLE III OBJECTIVES

#### 3.1 Purpose

The purpose of this Agreement is to provide the contractual basis for the coordinated planning and operation of the Transmission System to achieve optimal economies, consistent with reliable electric service and environmental requirements.

#### ARTICLE IV COORDINATING COMMITTEE

#### 4.1 Coordinating Committee

The Coordinating Committee is the organization established to oversee planning, construction, operation, and maintenance of the Transmission System. The Coordinating Committee members shall include at least one member from LG&E and at least one member from KU who are not members of the Operating Committee established under the Power Supply System Agreement. The chairperson, who shall be the senior-most LKE officer (below the Chairman and/or President) with direct or indirect responsibility or oversight for transmission operations (or such-officer's designee), shall appoint the member representative(s) of LG&E and KU. Other than the chairperson, there shall be the same number of members representing each Company. Nothing herein shall preclude a member from holding a title with, or performing functions for, both LG&E and KU, whether relating to Operating committee activities or otherwise. Coordinating Committee decisions shall be by a majority vote of those present. However, any member not present may vote by proxy. The chairperson shall vote only in case of a tie.

#### 4.2 Responsibilities of the Coordinating Committee

The Coordinating Committee shall be responsible for overseeing:

(a) the Companies in the coordinated planning of the Transmission System, including studies for transmission planning purposes; and

(b) compliance with the terms of the LG&E-KU Open Access Transmission Tariff and the rules and regulations of the Federal Energy Regulatory Commission relating thereto.

#### 4.3 Delegation and Acceptance of Authority

The Companies hereby delegate to the Coordinating Committee, and the Coordinating Committee hereby accepts, responsibility and authority for the duties listed in this Article and clsewhere in this Agreement.

## 4.4 Reporting

The Coordinating Committee shall provide periodic summary reports of its activities under this Agreement to the Companies and shall keep the Companies informed of situations or problems that may materially affect the outcome of these activities. Furthermore, the Coordinating Committee agrees to report to the Companies in such additional detail as is requested regarding specific issues or projects under its oversight.

## 4.5 Expenses

All expenses incurred by the Coordinating Committee in the performance of its responsibilities shall be settled in accordance with arrangements made by the Companies for services provided between or on behalf of the Companies.

#### ARTICLE V PLANNING

## 5.1 Transmission Planning

The Companies agree that their transmission facilities shall be planned and developed on the basis that their combined individual systems constitute an integrated Transmission System and that the objective of their planning shall be to maximize the economy, efficiency and reliability of the Transmission System as a whole. In this connection, the Transmission System Operator will from time to time, as it deems appropriate, direct studies for transmission planning purposes.

#### ARTICLE VI TRANSMISSION

## 6.1 Delegation to the Transmission System Operator

(a) The Companies shall delegate to the Transmission System Operator the responsibility and authority to act as Transmission Provider on behalf of the Companies for all of the requirements and purposes of the LG&E-KU Open Access Transmission Tariff.

(b) Expenses of the Transmission System Operator shall be recovered from the Companies, in accordance with Schedule A. To recover these costs, the Companies may include costs incurred by the Transmission System Operator in the transmission revenue requirement and in their rates for Ancillary Services in future rate filings.

6.2 Transmission Facilities

Each Company shall make its Transmission System available to the Transmission System Operator.

## 6.3 Transmission Service Revenues

(a) The Companies shall share transmission service revenues obtained from the use of the transmission facilities that comprise the Transmission System as shown on Schedule B.

(b) Revenues received for third-party use of Direct Assignment Facilities shall be distributed to the Company(ies) owning such facilities.

(c) The distribution to the Companies of revenues received for stranded costs or new transmission facilities received from third-party customers under the LG&E-KU Open Access Transmission Tariff shall be determined on a case-by-case basis.

## 6.4 Costs for Point-to-Point Transmission Service for Third Party Sales

The cost of Transmission Service for Third Party Sales shall be allocated to each Company as determined by the results of the After the Fact Billing (AFB) program. The AFB program's primary function is the allocation of energy production costs for the Network Load of each Company and off-system sales. Each Company's portion of Point-to-Point Transmission costs for Third Party Sales shall be a ratio of that Company's resources assigned to Third Party Sales by the AFB program divided by the total Third Party Sales.

## ARTICLE VII ANCILLARY SERVICES

## 7.1 Ancillary Services

(a) Each Company shall make available Ancillary Services as required by the LG&E-KU Open Access Transmission Tariff.

(b) Revenues received for Ancillary Services will be allocated between the Companies in accordance with Schedule B.

### ARTICLE VIII GENERAL

## 8.1 Regulatory Authorization

This Agreement is subject to certain regulatory approvals and the Companies shall diligently seek all necessary regulatory authorization for this Agreement.

8.2 Effect on Other Agreements

This Agreement shall not modify the obligations of either Company under any agreement between such Company and others not parties to this Agreement in effect on the effective date of this Agreement.

## 8.3 <u>Waivers</u>

Any waiver at any time by a Company of its rights with respect to a default by the other Company under this Agreement shall not be deemed a waiver with respect to any subsequent default of similar or different nature.

## 8.4 Successors and Assigns: No Third Party Beneficiary

This Agreement shall inure to and be binding upon the successors and assigns of the respective Companies, but shall not be assignable by either Company without the written consent of the other Company, except upon foreclosure of a mortgage or deed of trust. Nothing expressed or mentioned or to which reference is made in this Agreement is intended or shall be construed to give any person or corporation other than the Companies any legal or equitable right, remedy or claim under or in respect of this Agreement or any provision herein contained, expressly or by reference, or any schedule hereto, this Agreement, any such schedule and any and all conditions and provisions hereof and thereof being intended to be and being for the sole exclusive benefit of the Companies, and for the benefit of no other person or corporation.

## 8.5 <u>Amendment</u>

It is contemplated by the Companies that it may be appropriate from time to time to change, amend, modify or supplement this Agreement or the schedules that are attached to this Agreement, to reflect changes in operating practices or costs of operations or for other reasons. This Agreement may be changed, amended, modified or supplemented by an instrument in writing executed by all of the Companies after requisite approval or acceptance for filing by the appropriate regulatory authorities.

## 8.6 Independent Contractors

By entering into this Agreement the Companies shall not become partners, and as to each other and to third persons, the Companies shall remain independent contractors in all matters relating to this Agreement.

## 8.7 <u>Responsibility and Liability</u>

The liability of the Companies shall be several, not joint or collective. Each Company shall be responsible only for its obligations, and shall be liable only for its proportionate share of the costs and expenses as provided in this Agreement, and any liability resulting herefrom. Each Company will defend, indemnify, and save harmless the other Company hereto from and against any and all liability, loss, costs, damages, and expenses, including reasonable attorney's fees, caused by or growing out of the gross negligence, willful misconduct, or breach of this Agreement by sucb indemnifying Company.

IN WITNESS WHEREOF, each Company has caused this Agreement to be executed and attested by its duly authorized officers on the day and year first above written.

### SCHEDULE A ALLOCATION OF OPERATING EXPENSES OF THE TRANSMISSION SYSTEM OPERATOR

## 1. Purpose

The purpose of this Schedule is to provide a basis for the allocation between the Companies for the costs of the Transmission System Operator.

## 2. <u>Costs</u>

Costs for the purpose of this Schedule shall include all costs incurred by the Transmission System Operator, including, among others, such items as salaries, wages, rentals, the cost of materials and supplies, interest, taxes, depreciation, transportation, travel expenses, and other professional services.

## 3. Allocation of Costs

Transmission System Operator Company allocation percentages will be calculated each year to be effective on June 1<sup>st</sup> of each year using the previous year's summation of the Transmission Peak Demands as found in FERC Form 1 for Kentucky Utilities Company (KU) and Louisville Gas & Electric Company (LG&E) page 400 sum of column b.

Allocation of Costs to each Company will be calculated by the following formulas:

KU Expense Allocation % = KU FERC Form 1, page 400 sum of column b divided by the sum of (KU FERC Form 1, page 400 sum of column b plus LG&E FERC Form 1, page 400 sum of column b).

LG&E Expense Allocation % = 1 minus KU Expense Allocation %

For example, based on the 2016 FERC Form 1 data for the calendar year 2016: KU Expense Allocation % = 54,436 / (54,436 + 29,300) = 65.01%LG&E Expense Allocation % = 1 - 65.01% = 34.99%

## SCHEDULE B ALLOCATION OF TRANSMISSION REVENUES and COSTS

## 1. Allocation of Transmission Revenues

The revenue the Transmission Service Operator receives pursuant to Section 6.4 of the Agreement for service provided by the Companies under Parts II and III of the LG&E-KU Open Access Transmission Tariff, other than revenues received pursuant to Sections 26 (Stranded Cost Recovery), 27 (Compensation for New Facilities and Redispatch Costs), and 34.4 (Redispatch Charge) thereof, will be allocated between the Companies based on Company allocation percentages that will be calculated each year to be effective on June 1<sup>st</sup> of each year using the previous year's net book value of Transmission assets as found in FERC Form 1 for Kentucky Utilities Company (KU) and Louisville Gas & Electric Company (LG&E).

Allocation of Transmission Revenues to each Company will be calculated by the following formulas:

KU Net Book Transmission Value (KU Net) = KU FERC Form 1, page 207 line 58(g) minus KU FERC Form 1, page 219 line 25(b)

LG&E Net Book Transmission Value (LG&E Net) = LG&E FERC Form 1, page 207 line 58(g) minus LG&E FERC Form 1, page 219 line 25(b)

KU Allocation % for Revenue = KU Net divided by sum of KU Net plus LG&E Net

LG&E Allocation % for Revenue = 1 minus KU Allocation % for Revenue

For example, based on the 2016 FERC Form 1 data for the calendar year 2016: KU Net = 874,918,082 - 336,270,966 = 538,647,116 LG&E Net = 424,955,863 - 152,022,964 = 272,932,899 KU Allocation % for Revenue = 538,647,116 / (538,647,116 + 272,932,899) = 66.37% LG&E Allocation % for Revenue = 1 - 66.37% = 33.63%

Revenues related to redispatch costs and Direct Assignment Facilities will be assigned to LG&E and KU in proportion to the related costs that each of them incurred. Assignment of revenues received from a third party related to stranded cost or new transmission facilities shall be determined on a case-by-case basis.

## 2. Allocation of Ancillary Service Revenues

(a) Revenues received from Scheduling, System Control and Dispatch Service under Schedule 1 of the LG&E-KU Open Access Transmission Tariff will be allocated between the Companies based on the same percentages as Schedule A above. (b) All revenues received for Ancillary Services under Schedule 2 - Reactive Supply and Voltage Control,

Transmission System Operator Company allocation percentages will be calculated each year to be effective on June 1<sup>st</sup> of each year using the latest Schedule 2 true up filing filed at FERC per Schedule 2 rate schedule.

Allocation of Ancillary Service Revenues to each Company will be calculated by the following formulas:

KU Schedule 2 Revenue % (KU-2 Rev) = MVAR-Hours produced by LG&E/KU Units located on KU divided by the total MVAR-Hours produced by LG&E/KU Units.

LG&E Schedule 2 Revenue % (LG&E-2 Rev) = 1 minus KU-2 Rev

For Example, based on calendar year 2016: KU-2 Rev = 343,665 MVAR-Hours / (343,665 + 396,456) MVAR-Hours = 46.43% LG&E-2 Rev = 1 - 46.43% = 53.57%

(c) All revenues received for Ancillary Services under Schedule 4 - Energy Imbalance Service and Schedule 9 – Generator Imbalance Service, shall be allocated to the Company that produced the energy as assigned by the AFB process.

(d) All revenues received for Ancillary Services under Schedule 3 – Regulation and Frequency Response, Schedule 5 - Operating Reserve Spinning Reserve Service and Schedule 6 - Operating Reserve Supplemental Reserve Service of the LG&E-KU Open Access Transmission Tariff will be allocated between the Companies to be effective on June 1<sup>st</sup> of each year using the previous year's net annual generation amount as found in FERC Form 1 for Kentucky Utilities Company (KU) and Louisville Gas & Electric Company (LG&E).

3. Allocation of Generation Services Costs

Generation cost allocation percentages will be calculated each year to be effective on June 1<sup>st</sup> of each year using the latest Schedule 2 true up filing filed at FERC per Schedule 2 rate schedule.

Allocation of cost to each Company will be calculated by the following formulas:

KU Gen. Services % = KU FERC Form 1, page 401a line 9(b) divided by the sum of (KU FERC Form 1, page 401a line 9(b) plus LG&E FERC Form 1, page 401a line 9(b).

LG&E Gen. Services % = 1 minus KU Gen. Services %

Case Nos. 2020-00349 and 2020-00350 Attachment 2 to Response to PSC-1 Question No. 12(c) Page 13 of 13 Garrett

For Example, based on the 2016 FERC Form 1 data for the calendar year 2016: KU Gen. Services % = 21,021,762 / (21,021,762 + 12,908,109) = 61.96%LG&E Gen. Services % = 1 - 61.96% = 38.04%

### Response to Commission Staff's First Request for Information Dated November 24, 2020

#### Case No. 2020-00349

#### **Question No. 13**

#### **Responding Witness: Robert M. Conroy**

- Q-13. Describe the utility's lobbying activities and provide a schedule showing the name, salary, and job title of each individual whose job function involves lobbying on the local, state, or national level.
- A-13. KU charges expenses for lobbying activities to account 426, Expenditures for Certain Civic, Political and Related Activities, a "below-the-line" account not deducted in arriving at net operating income. The expenses recorded in this account, which include all expenses of External Affairs, are not included in rates and are not proposed to be included in rates.

During the test year, these amounts are projected to be \$610,754. Of this amount, \$278,410 represents the salary and associated benefits of D.J. Freibert, C.P. Clark, and J. Lehn whose duties include, but are not limited to, representation before governmental agencies and legislative bodies at local, state and federal levels on matters directly related to the Company and the conduct of its business. These employees also provide functional representation of the Company at and participation in civic, charitable and community events, monitoring the legislative and regulatory processes, responding to inquiries by federal, state and local governmental agencies and legislative bodies and participation in industry meetings and conferences.

The remaining \$332,344 budgeted to this account is associated with administrative support and business expenses (e.g., travel and office expenses) for D.J. Freibert, C.P. Clark, and J. Lehn.

### **KENTUCKY UTILITIES COMPANY**

## Response to Commission Staff's First Request for Information Dated November 24, 2020

#### Case No. 2020-00349

## Question No. 14

### **Responding Witness: Christopher M. Garrett**

- Q-14. Provide the following information concerning the costs for the preparation of this case:
  - a. A detailed schedule of expenses incurred to date for the following categories:
    - (1) Accounting;
    - (2) Engineering;
    - (3) Legal;
    - (4) Consultants; and
    - (5) Other Expenses (Identify separately).
  - b. For each category identified in Item 14(a), the schedule should include the date of each transaction, check number or other document reference, the vendor, the hours worked, the rates per hour, amount, a description of the services performed, and the account number in which the expenditure was recorded. Provide copies of contracts or other documentation that support charges incurred in the preparation of this case. Identify any costs incurred for this case that occurred during the base period.
  - c. An itemized estimate of the total cost to be incurred for this case. Expenses should be broken down into the same categories as identified in Item 14(a), with an estimate of the hours to be worked and the rates per hour. Include a detailed explanation of how the estimate was determined, along with all supporting workpapers and calculations.
  - d. Provide monthly updates of the actual costs incurred in conjunction with this rate case, reported in the manner requested in Items 14(a) and 14(b), and a cumulative total of cost incurred to date for each category. Updates will be

due when the utility files its monthly financial statements with the Commission, through the month of the public hearing.

- A-14. a. See attached.
  - b. See attached.
  - c. See attached.
  - d. The Company will provide monthly updates as requested.

Subject:	Invoice for Services Provided by Gannett Fleming re LG&E/KU Contract No. 152967 -
	Depreciation Studies - ACTION REQUESTED
Attachments:	066193 - No. 5025 - February 14, 2020.pdf
Importance:	High

EXTERNAL email. STOP and THINK before responding, clicking on links, or opening attachments.

Good morning, Sara.....

Attached is our invoice related to consulting services for LG&E/KU re Contract No. 152967 - Depreciation Studies – LG&E and KU Services Company during the period January 1 thru January 31, 2020. Please note that this invoice reflects an increase in our hourly billing rates effective January 1, 2020. A copy of the updated billing rates (PDF and Word formats) was sent to you under a separate email earlier today, along with a request for an update to the contract.

## No services were provided during this period related to LG&E – Gas.

Would you please take the necessary action to have the invoice approved and sent to your Accounts Payable folks for processing of payment.

## No paper copy will be sent.

If you have any questions related to the invoice, please contact either John Spanos at <u>ispanos@gfnet.com</u> or me at <u>crutter@gfnet.com</u>.

Thank you, and have a pleasant day.

Cheryl

P.O. Box 13793 NEWARK NJ 07188-0793

Please include invoice numbers on all remittances. Wire transfer remittance information should be emailed to goss.cashreceipts@mercer.com.

Compensation paid to Mercer, including compensation in the form of fees or commissions, may or may not be paid from benefit plan assets. To the extent this invoice identifies certain fees as potentially allocable to an employee benefit plan (whether or not covered by ERISA) or certain commissions as constituting assets of an ERISA-covered plan or other benefit plan, this should not be interpreted as our advice or recommendation that these balances are plan assets or can or should be paid from plan assets suder governing law. The client, as a fiduciary of the plan, and not Mercer, has the responsibility for determining what constitutes an asset of the plan and whether these fees are reasonable expenses of administering the plan that may properly be charged (in whole or in part) to plan assets; and if so, what portion (if any) should be allocated to a particular plan or plans. Mercer recommends that the client make this determination with the assistance of legal counsel, as Mercer is not a law firm.

		Charged	Charged to	Charged to	Amounts	Amounts
	Item	Expense	Construction	Other (Note 1)	Accrued	Paid
Line No.	(a)	(b)	(c)	(d)	(e)	(f)
1	Kentucky Retail					
	(a) State Income	4,939		(602)	4,337	4,191
	(b) Franchise Fees			30,196	30,196	30,196
	(c) Ad valorem	30,144	1,100	27	31,271	30,155
	(d) Payroll (employers portion)	9,383	2,805	(5,619)	6,569	6,563
	(e) Other taxes	3,349	9,601	0	12,950	12,824
2	Total Retail [Line1(a) through L1(e)]	47,815	13,506	24,002	85,322	83,929
3	Other Jurisdictions	2,584	269	(352)	2,502	2,427
4	Total per books (L2 and L3)	50,399	13,775	23,650	87,824	86,356

Note 1: Amounts in the Charged to Other column d represent the following:

Line 1 a. State Income tax recorded to Other Income and Deductions.

Line 1 b. Franchise Fees recorded on the balance sheet in FERC account 241, Tax Collections Payable, these amounts are collected from customers and remitted to taxing authorities.

Line 1 c. Ad Valorem (Property) tax recorded to Other Income and Deductions and on balance sheet in FERC account 151, Fuel.

Line 1 d. Payroll tax accrued on affiliated companies. For example, when an Energy Services employee does work for KU that employee's payroll taxes are charged to KU but the payroll tax liability and payment are recorded at Energy Services company.

# Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

# Question No. 18

# **Responding Witness: Christopher M. Garrett**

- Q-18. Provide a copy of federal and state income tax returns for the most recent tax year, including supporting schedules.
- A-18. The 2019 pro forma federal and state income tax returns are attached and provided under seal. The tax returns are considered confidential and are being produced under seal pursuant to a Petition for Confidential Protection.

# The entire attachment is Confidential and provided separately under seal.

# Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

## **Question No. 19**

## **Responding Witness: Christopher M. Garrett**

- Q-19. Provide a schedule of franchise fees paid to cities, towns, or municipalities, including the basis of these fees.
- A-19. Franchise fees are a pass through from customers to the city or municipality; therefore, they are not included in the forecasted test year. The below information is for calendar year 2019.

See Attachment 1. Franchise payments remitted to each franchise location are based on 3.00% of the total residential and commercial electric sales generated for the period on customer accounts located within the boundaries of that franchise location.

See Attachment 2. Franchise payments remitted to each franchise location are based on 3.00% of the total retail electric sales (i.e., residential, commercial, industrial, and public authority) generated for the period on customer accounts located within the boundaries of that franchise location.

See Attachment 3. Franchise payments remitted to each franchise location are based on a franchise percentage other than 3.00%. The franchise fee percentages listed in the attachment are applied to total retail electric sales (i.e., residential, commercial, industrial, and public authority) generated for the period on customer accounts located within the boundaries of that franchise location.

# Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

# **Question No. 20**

## **Responding Witness: Christopher M. Garrett**

- Q-20. Provide the journal entries relating to the purchase of utility plant acquired as an operating unit or system by purchase, merger, consolidation, liquidation, or otherwise currently included in rate base. Also, provide a schedule showing the calculation of the acquisition adjustment at the date of purchase for each item of utility plant, the amortization period, and the unamortized balance at the beginning of the base period.
- A-20. In December 2009, KU purchased from Louisville Gas and Electric Company ("LG&E") a share of certain joint use assets which are being utilized by both Trimble County Generating Station Unit 1 (currently owned by LG&E) and Trimble County Generating Station Unit 2. Trimble County Unit 2 is jointly owned by KU and LG&E. Additionally, KU also purchased from LG&E a share of a hyperbolic cooling tower previously used by Trimble County Unit 1 but which is currently being used solely for Trimble County Unit 2. The assets were sold at net book value and accordingly, no acquisition adjustment was recorded.

See Attachment to this response for journal entries related to Trimble County Unit 2 joint use assets and cooling tower purchase described above.

# Case No. 2020-00349 Attachment to Response to PSC-1 Question No. 20 Page 1 of 1 Garrett

#### Kentucky Utilities Company Journal Entries to Record the Purchase of Trimble County Joint Use Assets and Cooling Tower

ENTRY	ACCOUNT	DESCRIPTION	DEBIT	CREDIT
#1	102 131	Electric Plant Purchased Cash	58,525,272	58,525,272
		To record the purchase of electric plant from Louisville Gas and Electric Company		
#2	105 102	Electric Plant Held for Future Use Electric Plant Purchased	120,828,152	120,828,152
		To record the original cost of purchased plant to electric plant held for future use		
#3	102 108	Electric Plant Purchased Accumulated Provision for Depreciation	62,302,880	62,302,880
		To charge depreciation applicable to original cost of purchased plant to account 102		

*Note:* The assets were recorded to Account 105-Electric Plant Held for Future Use at the acquisition date since Trimble Count Unit 2 was still under construction. The assets were subsequently reclassified from Account 105 to Account 101-Electric Plant in Service in January 2011 when Trimble County Unit 2 was available for commercial operation.

# Response to Commission Staff's First Request for Information Dated November 24, 2020

# Case No. 2020-00349

# Question No. 21

# **Responding Witness: Daniel K. Arbough / Christopher M. Garrett**

- Q-21. Provide the utility's rate base, capital structure, and statement of income for the most recent 12 months preceding the base period and for the base period. Provide a reconciliation with detailed explanations.
- A-21. See attached.

3	COMMON EQUITY	3,240,064,027	54.20%	3,025,136,268	52.57%	214,927,759	(c)
4	TOTAL CAPITAL	5,978,385,530	100.00%	5,753,959,300	100.00%	224,426,231	

LINE NO.	CLASS OF CAPITAL	BASE PERIOD AMOUNT	BASE PERIOD RATIO	FEBRUARY 2020 AMOUNT	FEBRUARY 2020 RATIO	VARIANCE AMOUNT	
		\$	%	\$	%	\$	
1	<u>KENTUCKY JURISDICTIONAL:</u> SHORT-TERM DEBT	122,293,052	2.18%	108,722,329	2.02%	13,570,723	(a)
2	LONG-TERM DEBT <sup>(1)</sup>	2,442,019,193	43.62%	2,449,250,393	45.41%	(7,231,200)	(b) (d)
3	COMMON EQUITY	3,033,868,256	54.19%	2,835,430,821	52.57%	198,437,435	(c)
4	TOTAL CAPITAL	5,598,180,501	100.00%	5,393,403,543	100.00%	204,776,958	

(1) Includes the debt discount and premium, unamortized debt expense, and unamortized loss on reacquired debt

Explanations of variances greater than \$1 million:

(a) Increase reflects additional cost of operating activates and increased capital spend from March 2020 through February 2021.

(b) Lower due to increased unamortized debt expense due to the issuance of a First Mortgage Bond in Q2 2020.

(c) Reflects net income net of dividends paid and capital contribution.

# Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

# Question No. 25

# **Responding Witness: Daniel K. Arbough**

- Q-25. Provide the information shown in Schedule G for each construction project in progress, or planned to be in progress, during the 12 months preceding the base period, the base period, and the forecasted test period.
- A-25. See attached.

 \*All applicable benefits and administrative costs are charged directly to capital projects. No indirect costs are included.
 \*\*

 \*\* Estimated Physical Percent Completed was calculated utilizing the costs per column D divided by the current budgeted estimate.
 Data set includes projects with capital spend that may have actual and/or forecasted capital expenditures transferred to a different project.

 \*All applicable benefits and administrative costs are charged directly to capital projects. No indirect costs are included.
 \*\*
 \*\*
 Stimulated Physical Percent Completed was calculated utilizing the costs per column D divided by the current budgeted estimate.
 Data set includes projects with capital spend that may have actual and/or forecasted capital expenditures transferred to a different project.

# KENTUCKY UTILITIES COMPANY

# Response to Commission Staff's First Request for Information Dated November 24, 2020

## Case No. 2020-00349

## Question No. 26

# **Responding Witness: Daniel K. Arbough**

- Q-26. Provide, in the format provided in Schedule H, an analysis of the utility's Construction Work in Progress (CWIP) as defined in the Uniform System of Accounts for each project identified in Schedule G.
- A-26. See attached.

\* Data set includes projects with capital spend that may have actual and/or forecasted capital expenditures transferred to a different project.

# **KENTUCKY UTILITIES COMPANY**

# Response to Commission Staff's First Request for Information Dated November 24, 2020

# Case No. 2020-00349

# Question No. 27

## **Responding Witness: Kent W. Blake / Lonnie E. Bellar**

- Q-27. Concerning the utility's construction projects:
  - a. For each project started during the last five calendar years, provide the information requested in the format contained in Schedule I1. For each project, include the amount of any cost variance and delay encountered, and explain in detail the reasons for such variances and delays.
  - b. Using the data included in Schedule I1, calculate the annual "Slippage Factor" associated with those construction projects. The Slippage Factor should be calculated as shown in Schedule I2.
  - c. In determining the capital additions reflected in the base period and forecasted test period, explain whether the utility recognized a Slippage Factor.
- A-27.
- a. See attached. The Company has provided the requested data for both Mechanism Capital Construction Projects and Non-Mechanism Capital Construction Projects. Due to the voluminous number of projects over a 5-year period, the Company has provided the variance explanations included in the last rate case for portions of the five-year period included therein and have added explanations for variances greater than \$500,000 for the additional two periods.
- b. See attached for the requested calculations of the Slippage Factor. The Company recommends the weighted average, as opposed to the simple average, be used in the requested calculation to reflect the relationship of the size of the budget and associated variance.
- c. No. KU did not recognize a Slippage Factor for capital additions in either the base period or the forecasted test period. The requested calculation resulted in a slippage factor of 99.020% on capital projects that are recovered in base rates and demonstrates the reasonableness of KU's accuracy in projecting capital additions. To ensure reasonableness of the calculation, the Company

excluded the Advanced Metering System project originally included in the 2018 budget total as this project was denied by the Commission.

Given the reasonable accuracy demonstrated with years of being both over and under budget, the need to apply a Slippage Factor does not exist and the Commission should decline to do so. If a purely numeric slippage factor calculation based on historic results is used to either reduce or increase the projected capital construction costs, it can provide a disincentive for utilities to continue their efforts to reduce capital costs after having established its annual budget. In forward-looking test period rate cases, a utility is required to provide their actual forecast for capital spend "made in good faith". If a utility has historically been successful in managing down capital cost estimates, it would not be allowed to recover its then best estimate of capital spend for its forward-looking test period. In contrast, a utility that has been less effective in managing to or below its costs estimates and have incurred significant overruns on capital projects would actually be rewarded by being provided a revenue requirement above its best estimate of capital construction costs.

The Slippage Factors for the mechanism capital are different than base rate capital because mechanism projects are typically larger projects that are subject to delays caused by environmental permitting; ongoing, frequent, and contentious environmental regulation; and greater exposure to commodity and skilled labor availability variables. The projects to be included in base rates, with the exception of new base load generation, are typically smaller in size and are not subject to the same exposure by such variables. In addition, mechanism projects are explicitly reviewed and approved as part of the operation of the respective mechanism. To the extent there are delays or the Company is able to complete those projects at costs less than original estimates, that unexpected available capital is not redeployed to other prudent projects as the Company may do with respect to base rate capital projects.

Finally, mechanism capital slippage is irrelevant for ratemaking in a base rate case. The cost of base rate capital projects is recovered through forecasted amounts in future test period rate cases. In contrast, the cost of mechanism capital projects (e.g., KU's Environmental Cost Recovery mechanism) is recovered based on actual amounts spent. Therefore, any consideration of a slippage factor, if any, should be limited to capital projects to be recovered in base rates. For the reasons previously stated, the Company believes the need to apply a Slippage Factor does not exist and the Commission should decline to do so.

													F b 1 r ( s	Budget is developed at a higher level to encompass multiple projects and reallocated o individual Del Impection projects. These projects are: 146424,146425,146426,146427,146428,146429,146436,146437,146438. The et variance between the budget for 123136 and the other projects is a negative 32,551KJ. These projects experionced higher than average reject rates for areas elected for impection and treatment which resulted in more poles to be replaced. In otal between LockEar and KU, then et variance to budget was (3405X).

														Project started earlier than anticipated due to additional new load requirements for Lebanon East Substation identified in late 2014, necessitating the advancement of the project by one year for completion in 2016. Project was originally scheduled for 2016/2017 and included in the 2015 BP.

													r s I t	The 2 major environmental capital projects, bagbouse and scrubber, added ubustantial electrical boat to existing plant systems. These capital projects had to ovoide additional unit and reserve transformers to handle the loads. This increased he overall reliability of the reserve system to each unit. The unit 1/2 reserve feeder able project was moved to an out year based on the lower criticality.

													Project is an extension of 139808 which was initiated in 2015. Under project 139808 both limestone tanks were going to have a protective liming installed. Only 01 tank was completed due to contractor falling behind and unable to complete 02 with approaching winter weather. This project was added to complete 02 Limestone

									(((,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,				Th Co 15 but sel- var pro	e black start project was completed at two locations - Cane Run and Trimble unity. Projects 150080 and 150080KU are the Cane Run site projects. Projects 1126 and 151126KU are the Trimble County site locations. The oldinas were all dgeted under projects 150080 and 150080KU prior to the black start unit site ection. Actual costs were charged to the appropriate site causing a positive riance on the Cane Run projects and negative variance on the Trimble County ojects. The overall positive variance between all four projects in 2016 is driven preliminary engineering that occurred in 2015 rather than 2016.

													Unbudgeted work needed during CR7 2017 Fall Outage to replace Lo blades on steam turbine. Based on industry experience, this emergent work should not have been necessary until the Steam Turbine had accumulated 5-10 times as many hours of usage. While the RCFA is still in progress, it appears that errors prior to commercial operation contributed significantly to this issue. The OEM and the plant feel that this is issue is correctly remedied now but will re-inspect during the

Bids were received in April of 2017 and the budget was increased accordingly and the timeline was updated between 2017 and 2018. The favorable variance is due to timing of contract milestones associated with the final schedule.	2017

This project was started in 2018 to be finished in 2019 but was originally budgeted Nov-19 all To 2019 May-18 Eddy current testing on G2 heater (conducted when heater was open for tube leak) did not show significant wall loss to warrant a replacement at the time. Both G1 and G2 heater replacements were pushed out into the plan based on this testing. May-18 When bids came in, both the material and the labor was higher than the engineering estimates we were provided. The total project increased by 6.2M, with 722k of the	20 20 20 20 20 20 20 20 20 20 20 20 20 2
