

## Proposed Power Source Notice on Joint Accounts

*LG&E and KU recently amended their tariffs to include provisions memorializing their practices with regard to joint ownership of accounts. When starting, stopping or moving service, or at any time after that, the primary account holder may authorize additional parties who also reside at the residence as joint account holders. Each additional person or “joint account holder” is fully authorized to conduct business on the account and is fully financially responsible for the account.*

*The primary account holder may also authorize a contact person who is not a joint account holder. A contact person has limited authority to conduct business on the account and is not financially responsible for the account.*

- *Net Metering - If the account includes net metering service, any unused excess billing-period credits will continue as long as at least one joint account holder remains at the premise. Refer to **LG&E’s net metering tariff** or **KU’s net metering tariff** for additional information. <HIGHLIGHTED PORTIONS WOULD BE COMPANY SPECIFIC.>*
- *Solar Share Program - If the account holder is enrolled in the LG&E and KU Solar Share program, any unused Solar Energy Credit value will continue as long as at least one joint account holder remains in the program. See **LG&E’s Solar Share tariff** or **KU’s Solar Share tariff**. <HIGHLIGHTED PORTIONS WOULD BE COMPANY SPECIFIC.>*

Visit lge-ku.com for more information on how to add a joint account holder.

## Proposed Updates to Corporate Website

LG&E and KU will add a page to explain the meaning of “joint account holder” on the Corporate Website accessible via links from other pages as noted below. The new page will contain the same verbiage as proposed above with regard to the Power Source newsletter notice:

(Heading) Important information about residential joint accounts

*When starting, stopping or moving service, or at any time after that, the primary account holder may authorize additional parties who also reside at the residence as joint account holders. Each additional person or “joint account holder” is fully authorized to conduct business on the account and is fully financially responsible for the account.*

The primary account holder may also authorize a contact person who is not a joint account holder. A contact person has limited authority to conduct business on the account and is not financially responsible for the account.

- Net Metering - If the account includes net metering service, any unused excess billing-period credits will continue as long as at least one joint account holder remains at the premise. Refer to [LG&E's net metering tariff](#) or [KU's net metering tariff](#) for additional information. <HIGHLIGHTED PORTIONS WOULD BE HYPERLINKS TO THOSE WEB PAGES.>
- Solar Share Program - If the account holder is enrolled in the LG&E and KU Solar Share program, any unused Solar Energy Credit value will continue as long as at least one joint account holder remains in the program. See [LG&E's Solar Share tariff](#) or [KU's Solar Share tariff](#). <HIGHLIGHTED PORTIONS WOULD BE HYPERLINKS TO THOSE WEB PAGES.>

Links to this page would include the following (additional links may be added in the future):

**Moving** – hover over the underlined “joint account holder” (updates in purple boxes) to see the above information

The screenshot shows the LG&E KU website interface. At the top, there is a navigation bar with the LG&E KU logo and links for 'Billing & payment', 'Start, stop or move service', 'Outages', and 'Contact'. A user profile link 'Bill Pay | My Account' is visible in the top right. The main heading is 'Start, stop or move service'. Below this, there are two tabs: 'Residential' (selected) and 'Business'. The content is organized into three main columns:

- Start service:** Lists requirements: 'Primary and joint account holder's full Social Security number', 'Location and contact information', and 'Access to meter location'. Includes a 'Start service request' button.
- Stop service:** Lists requirements: 'Account number and the last four digits of the account holder's Social Security number', 'Location and contact information', and 'Access to meter location'. Includes a 'Stop service request' button.
- Move service:** Lists requirements: 'Primary and joint account holder's full Social Security number', 'Location and contact information', 'Access to meter location', and 'Your previous account number'. Includes a 'Move service request' button.

Below the service columns, there are two additional sections:

- Moving checklist:** A note about getting organized for a new place, with a 'Download the checklist (0.55mb)' button and a 'Learn more' link.
- Residential guides & handbooks:** A resource for various guides, with a 'See list' button.

**Moves Form** – accessed from the links above

Additional authorized parties - Additional Party type:

*Selection list*

Spouse

Roommate

Authorized contact person

Proposal:

Add the following language under the header “Joint account holder(s) or contact person(s)”:

*When starting, stopping or moving service, or at any time after that, the primary account holder may authorize additional parties who also reside at the residence as joint account holders. Each additional person or “joint account holder” is fully authorized to conduct business on the account and is fully financially responsible for the account.*

*The primary account holder may also authorize a contact person who is not a joint account holder. A contact person has limited authority to conduct business on the account and is not financially responsible for the account.*

Joint account holder(s) or contact person(s)

Add party

Type

- Select -

- Select -

Spouse Joint account holder

Roommate Joint account holder

Authorized contact person

## Net Metering Page:

# Net Metering for your home

[Residential services](#) / Net Metering for...

Whether you plan to privately generate electricity using solar panels, wind turbines, biomass or biogas energy, or hydro-energy, Net Metering allows customers who have a private generation source to receive credits towards future power needs for any excess power generated.

## Net Metering Service Interconnection Guidelines

Be sure to follow the Net Metering Service Interconnection Guidelines for your respective utility. Customers' private generation systems must:

- Generate electricity using solar energy, wind energy, biomass or biogas energy or hydro energy;
- Have a rated capacity of not greater than forty-five (45) kilowatts;
- Be located on the customer's premises;
- Be owned and operated by the customer;
- Be connected in parallel with the utility's electric distribution system; and
- Have the primary purpose of supplying all or part of the customer's own electricity requirements.

## Additional information

For additional information about Net Metering, please call the [Residential Service Center](#) and ask for Net Metering information. If you're considering installing a private generation system, it's important to first do your research and take a variety of factors into account. We have [resources](#) that can help guide your decision and other renewable options to consider, like our [Solar Share Program](#).

**NOTE: A joint account can help ensure continuing benefits from your net metering investment as the makeup of your household changes over time.**

# Solar Share Program

Programs / Solar Share Program

For less than 20 cents per day, you can help grow local solar energy in Kentucky that helps power our community.

- [Enroll now](#) to secure shares of solar energy for your **home or business!**
- Avoid the up-front installation costs and long-term maintenance required for a private system.
- Earn credits on your bill or gift them to a loved one, friend or organization important to you.
- Watch [live solar data](#) now.

[Enroll now](#) [Get an estimate](#)

## Help grow solar energy in Kentucky

When you subscribe to our Solar Share program, you're helping grow solar energy in Kentucky. Whether you're in Louisville, Lexington, Maysville, Morganfield, Pineville or in between, residential, business and industrial electric customers across our LG&E and KU service territories have the opportunity to share in local solar energy and receive credits on their monthly bill.

## Live solar generation dashboard

Watch live while our Solar Share Facility generates power.

[Watch live](#) →

## Getting started

**Step 1** - Choose a subscription level that is right for you using our [Solar Share Calculator](#).

**Step 2** - [Enroll through our online form](#) or by calling 800-356-5467.

**Step 3** - Start supporting local solar and tell your family and friends!

**Step 4** - After the array section that contains your subscribed shares begins to produce energy, track the solar generation data through our online dashboard available to all participants at no extra cost.

**NOTE:** A joint account can help ensure continuing benefits from your solar share program participation as the makeup of your household changes over time.
