CASE NO.
2020-00350

MEMORANDUM BRIEF

Come Louisville/ Jefferson County Metro Government and Lexington-Fayette Urban County Government (the “Cities”) and pursuant to the Commission’s Order dated May 3, 2021, state as follows:

I. The Cities strongly support the Settlement Agreement, including the following provisions filed as Exhibit 1 to the Stipulation Testimony of Kent Blake.

- (a) The increase to the residential rates is approximately equal to the rate increase for the LG&E/KU as a whole of 7.15%.

- (b) There is no increase to the Basic Service Charge.
- (c) The stay out for filing a new rate case is four years.
- (d) With respect to lighting issues:
 - (i) Approval of a one-time conversion fee for LG&E of \$260 for HID lights to L.E.D. This fee plus LS and RLS rates will allow the conversion of all Louisville Metro's non-L.E.D. fixtures to L.E.D. fixtures over a multi-year period. The carrying charge for both Utilities' conversion fee is eliminated.
 - (ii) Rate LS conversion fees will be reduced to \$3.29 for KU and \$4.62 for LG&E.
 - (iii) A new L.E.D. offering will be added to both Utilities' LS tariff to replace the current 100W HPS Cobra offering.
 - (iv) The Utilities commit to a competitive bid process for lighting fixtures every five years and such a process prior to the next rate case.
 - (v) The Cities and LG&E/KU will cooperate to explore opportunities with information technology so that street light outage notification from the Cities to LG&E/KU will flow more directly and thus quicker.
- (e) The shareholders of LG&E/KU will increase their LIHEAP contribution at a percentage increase equal to the overall percentage increase of the rate case.

II. Net metering.

The Companies' witness Steven Seelye testified that, even when using two different methods, non-participating customers are subsidizing the net-metering customers at an amount not greater than \$0.02 per month. In other words, during the entire four year stay out provision contemplated by this settlement agreement, a non-participating customer would be paying a "subsidy" to net-metering customers of less than \$1.00. This miniscule amount belies the argument that this is a problem that needs to be corrected. The Cities also reserve any rights they may have to further respond on net-metering

following the Commission's Order in the Kentucky Power Company case (2020-00179, May 14, 2021).

For the above-stated reasons, the Cities request that the PSC accept the Settlement and further reject any changes to the status quo for net metering.
