The Issuer, the Company, the Trustee and the Remarketing Agents cannot and do not give any assurances that DTC will distribute payments on the Bonds made to DTC or its nominee as the registered owner or any redemption or other notices, to the Participants, or that the Participants or others will distribute such payments or notices to the Beneficial Owners, or that they will do so on a timely basis, or that DTC will serve and act in the manner described in this Reoffering Circular.

THE ISSUER, THE COMPANY, THE REMARKETING AGENTS AND THE TRUSTEE WILL HAVE NO RESPONSIBILITY OR OBLIGATION TO ANY DIRECT PARTICIPANT, INDIRECT PARTICIPANT OR ANY BENEFICIAL OWNER OR ANY OTHER PERSON NOT SHOWN ON THE REGISTRATION BOOKS OF THE TRUSTEE AS BEING A REGISTERED OWNER WITH RESPECT TO: (1) THE ACCURACY OF ANY RECORDS MAINTAINED BY DTC OR ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT; (2) THE PAYMENT OF ANY AMOUNT DUE BY DTC TO ANY DIRECT PARTICIPANT OR BY ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT TO ANY BENEFICIAL OWNER IN RESPECT OF THE PRINCIPAL AMOUNT OR REDEMPTION OR PURCHASE PRICE OF OR INTEREST ON THE BONDS; (3) THE DELIVERY OF ANY NOTICE BY DTC TO ANY DIRECT PARTICIPANT OR BY ANY DIRECT PARTICIPANT OR INDIRECT PARTICIPANT TO ANY BENEFICIAL OWNER WHICH IS REQUIRED OR PERMITTED TO BE GIVEN TO REGISTERED OWNERS UNDER THE TERMS OF THE INDENTURE; (4) THE SELECTION OF THE BENEFICIAL OWNERS TO RECEIVE PAYMENT IN THE EVENT OF ANY PARTIAL REDEMPTION OF THE BONDS; OR (5) ANY CONSENT GIVEN OR OTHER ACTION TAKEN BY DTC AS REGISTERED OWNER.

Revision of Book-Entry-Only System; Replacement Bonds

In the event that DTC determines not to continue as securities depository or is removed by the Issuer, at the direction of the Company, as securities depository, the Issuer, at the direction of the Company, may appoint a successor securities depository reasonably acceptable to the Trustee. If the Issuer does not or is unable to appoint a successor securities depository, the Issuer will issue and the Trustee will authenticate and deliver fully registered Bonds, in authorized denominations, to the assignees of DTC or their nominees.

In the event that the book-entry-only system is discontinued, the following provisions will apply. The Bonds may be issued in denominations of $250,000 and multiples thereof. Bonds may be transferred or exchanged for an equal total amount of Bonds of other authorized denominations upon surrender of such Bonds at the designated office of the Bond Registrar, accompanied by a written instrument of transfer or authorization for exchange in form and with guaranty of signature satisfactory to the Bond Registrar, duly executed by the registered owner or the owner's duly authorized attorney. Except as provided in the Indenture, the Bond Registrar will not be required to register the transfer or exchange of any Bond during the fifteen days before any mailing of a notice of redemption, after such Bond has been called for redemption in whole or in part, or after such Bond has been tendered or deemed tendered for optional or mandatory purchase as described under "Mandatory Purchase of Bonds." Registration of transfers and exchanges will be made without charge to the owners of Bonds, except that the Bond Registrar may require any owner requesting registration of transfer or exchange to pay any required tax or governmental charge.

Summary of the Loan Agreement

The following, in addition to the provisions contained elsewhere in this Reoffering Circular, is a brief description of certain provisions of the Loan Agreement. This description is only a summary and does not purport to be complete and definitive. Reference is made to the Loan Agreement, for the detailed provisions thereof.

General

The term of the Loan Agreement commenced as of September 1, 2016 and will end on the earliest to occur of September 1, 2044, or the date on which all of the Bonds have been fully paid or provision has been made for such payment pursuant to the Indenture. See "Summary of the Indenture — Discharge of Indenture."

The Company has agreed to repay the loan pursuant to the Loan Agreement by making timely payments to the Trustee in sufficient amounts to pay the principal or redemption price of and interest required to be paid on the Bonds on each date upon which any such payments are due. The Company has also agreed to pay (a) the agreed upon fees and expenses of the Trustee, the Bond Registrar, the Tender Agent and the Paying Agent and all other amounts which may be payable to the Trustee, the Bond Registrar, the Paying Agent and the Tender Agent, as may be applicable, under the Indenture, (b) the expenses in connection with any redemption of the Bonds and (c) the reasonable expenses of the Issuer.

The Company has covenanted and agreed with the Issuer that it will cause the purchase of tendered Bonds that are not remarketed in accordance with the Indenture and, to that end, the Company will cause funds to be made available to the Tender Agent at the times and in the manner required to effect such purchases in accordance with the Indenture (see "Summary of the Bonds — Mandatory Purchase of Bonds — Remarketing and Purchase of Bonds").

All payments to be made by the Company to the Issuer pursuant to the Loan Agreement (except the fees and reasonable out-of-pocket expenses of the Issuer, the Trustee, the Paying Agent, the Bond Registrar and the Tender Agent, and amounts related to indemnification) have been assigned by the Issuer to the Trustee, and the Company will pay such amounts directly to the Trustee. The obligations of the Company to make the payments pursuant to the Loan Agreement are absolute and unconditional.

Maintenance of Tax Exemption

The Company and the Issuer have agreed not to take any action that would result in the interest paid on the Bonds being included in gross income of any Bondholder (other than a holder who is a "substantial user" of the Project or a "related person" within the meaning of Section 147(a) of the Code) for federal income tax purposes or that adversely affects the validity of the Bonds.

Issuance and Delivery of First Mortgage Bonds

For the purpose of providing security for the Bonds, the Company has executed and delivered to the Trustee the First Mortgage Bonds. The principal amount of the First Mortgage Bonds executed and delivered to the Trustee equals the aggregate principal amount of the Bonds. If the Bonds become immediately due and payable as a result of a default in payment of the principal or redemption price of or interest on the Bonds, or a default in payment of the purchase price of such Bonds, due to an event of default under the Loan Agreement and upon receipt by the First Mortgage Trustee of a Redemption Demand, or if all first mortgage bonds outstanding under the First Mortgage Indenture shall have become immediately due and payable, such First Mortgage Bonds will then bear interest at the same interest rate or rates borne by the Bonds and the principal of such First Mortgage Bonds, together with interest accrued thereon from the last date to which interest on the Bonds shall have been paid in full, will then be payable. See, however, "Summary of the Indenture — Waiver of Events of Default."

Upon payment of the principal or redemption price of and interest on any of the Bonds, and the surrender to and cancellation thereof by the Trustee, or upon provision for the payment thereof having been made in accordance with the Indenture, First Mortgage Bonds with corresponding principal amounts equal to the aggregate principal amount of the Bonds so surrendered and canceled or for the payment of which provision has been made, will be surrendered by the Trustee to the First Mortgage Trustee and will be canceled by the First Mortgage Trustee. The First Mortgage Bonds will be registered in the name of the Trustee and will be non-transferable, except to effect transfers to any successor trustee under the Indenture.

Payment of Taxes

The Company has agreed to pay certain taxes and other governmental charges that may be lawfully assessed, levied or charged against or with respect to the Project (see, however, subparagraph (i) under the heading "Summary of the Bonds — Redemptions — Extraordinary Optional Redemption in Whole"*)*. The Company may contest such taxes or other governmental charges unless the security provided by the Indenture would be materially endangered.

Maintenance; Damage, Destruction and Condemnation

So long as any Bonds are outstanding, the Company will maintain, preserve and keep the Project or cause the Project to be maintained, preserved and kept in good repair, working order and condition and will make or cause to be made all proper repairs, replacements and renewals necessary to continue to constitute the Project as air and water pollution control and abatement facilities under Section 103(b)(4)(F) of the Internal Revenue Code of 1954, as amended. However, the Company will have no obligation to maintain, preserve, keep, repair, replace or renew any portion of the Project, the maintenance, preservation, keeping, repair, replacement or renewal of which becomes uneconomical to the Company because of certain events, including damage or destruction by a cause not within the Company's control, condemnation of the Project, change in government standards and regulations, economic or other obsolescence or termination of operation of generating facilities to the Project.

The Company, at its own expense, may remodel the Project or make substitutions, modifications and improvements to the Project as it deems desirable, which remodeling, substitutions, modifications and improvements are deemed, under the terms of the Loan Agreement to be a part of the Project. The Company may not, however, change or alter the basic nature of the Project or cause it to lose its status under Section 103(b)(4)(F) of the Internal Revenue Code of 1954, as amended.

If, prior to the payment of all Bonds outstanding, the Project or any portion thereof is destroyed, damaged or taken by the exercise of the power of eminent domain and the Issuer, the Company or the First Mortgage Trustee receives net proceeds from insurance or a condemnation award in connection therewith, the Company must, subject to the requirements of the First Mortgage Indenture, (i) cause such net proceeds to be used to repair or restore the Project or (ii) take any other action, including the redemption of the Bonds in whole or in part at their principal amount, which, by the opinion of Bond Counsel, will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes. See "Summary of the Bonds — Redemptions — Extraordinary Optional Redemption in Whole or in Part."

Project Insurance

The Company will insure the Project in accordance with the provisions of the First Mortgage Indenture.

Assignment, Merger and Release of Obligations of the Company

The Company may assign the Loan Agreement, pursuant to an opinion of Bond Counsel that such assignment will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes, without obtaining the consent of either the Issuer or the Trustee. Such assignment, however, will not relieve the Company from primary liability for any of its obligations under the Loan Agreement and performance and observance of the other covenants and agreements to be performed by the Company. The Company may dispose of all or substantially all of its assets or consolidate with or merge into another entity, provided the acquirer of the Company's assets or the entity with which it will consolidate with or merge into is a corporation or other business organization organized and existing under the laws of the United States of America or one of the states of the United States of America or the District of Columbia, is qualified and admitted to do business in the Commonwealth of Kentucky, and assumes in writing all of the obligations and covenants of the Company under the Loan Agreement and delivers a copy of such assumption to the Issuer and the Trustee.

Release and Indemnification Covenant

The Company will indemnify and hold the Issuer harmless against any expense or liability incurred, including attorneys' fees, resulting from any loss or damage to property or any injury to or death of any person occurring on or about or resulting from any defect in the Project or from any action commenced in connection with the financing thereof.

Events of Default

Each of the following events constitutes an "Event of Default" under the Loan Agreement:

(1) failure by the Company to pay the amounts required for payment of the principal of, including purchase price for tendered Bonds and redemption and acceleration prices, and interest accrued, on the Bonds, at the times specified therein taking into account any periods of grace provided in the Indenture and the Bonds for the applicable payment of interest on the Bonds (see "Summary of the Indenture — Defaults and Remedies"), and such failure shall cause an event of default under the Indenture;

(2) failure by the Company to observe and perform any covenant, condition or agreement on its part to be observed or performed, other than as referred to in paragraph (1) above, for a period of 30 days after written notice by the Issuer or Trustee, subject to extension by the Issuer and the Trustee, provided, however, that if such failure is capable of being corrected, but cannot be corrected in such 30-day period, the Issuer and the Trustee will not unreasonably withhold their consent to an extension of such time if corrective action with respect thereto is instituted within such period and is being diligently pursued;

(3) certain events of bankruptcy, dissolution, liquidation, reorganization or insolvency of the Company;

(4) the occurrence of an Event of Default under the Indenture; or

(5) all first mortgage bonds outstanding under the First Mortgage Indenture, if not already due, shall have become immediately due and payable, whether by declaration or otherwise, and such acceleration shall not have been rescinded by the First Mortgage Trustee;

Under the Loan Agreement, certain of the Company's obligations (other than the Company's obligations, among others, (i) not to permit any action which would result in interest paid on the Bonds being included in gross income for federal and Kentucky income taxes, (ii) to maintain its corporate existence and good standing, and to neither dispose of all or substantially all of its assets or consolidate with or merge into another entity unless certain provisions of the Loan Agreement are satisfied; and (iii) to make loan payments and certain other payments under the provisions of the Loan Agreement) may be suspended if by reason of force majeure (as defined in the Loan Agreement) the Company is unable to carry out such obligations.

Remedies

Upon the happening and continuance of an Event of Default under the Loan Agreement, the Trustee, on behalf of the Issuer, may, among other things, take whatever action at law or in equity may appear necessary or desirable to collect the amounts then due and thereafter to become due, or to enforce performance and observance of any obligation, agreement or covenant of the Company, under the Loan Agreement, including any remedies available in respect of the First Mortgage Bonds.

In the event of a default in payment of the principal or redemption price of or interest on the Bonds and the acceleration of the maturity date of the Bonds (to the extent not already due and payable) as a consequence of such Event of Default, the Trustee may demand redemption of the First Mortgage Bonds. See "Summary of the First Mortgage Bonds and the First Mortgage Indenture" and "Summary of the Indenture — Defaults and Remedies." Any amounts collected upon the happening of any such Event of Default must be applied in accordance with the Indenture or, if the Bonds have been fully paid (or provision for payment thereof has been made in accordance with the Indenture) and all other liabilities of the Company accrued under the Indenture and the Loan Agreement have been paid or satisfied, made available to the Company.

Options to Prepay; Obligation to Prepay

The Company may prepay the loan pursuant to the Loan Agreement, in whole or in part, on certain dates, at the prepayment prices as shown under the headings "Summary of the Bonds — Redemptions — Extraordinary Optional Redemption in Whole" and "Extraordinary Optional Redemption in Whole or in Part." Upon the occurrence of the event described under the heading "Summary of the Bonds — Redemptions — Mandatory Redemption; Determination of Taxability," the Company will be obligated to prepay the loan in an aggregate amount sufficient to redeem the required principal amount of the Bonds.

In each instance, the loan prepayment price must be a sum sufficient, together with other funds deposited with the Trustee and available for such purpose, to redeem the requisite amount of the Bonds at a price equal to 100% of the principal amount plus accrued interest to the redemption date, and to pay all reasonable and necessary fees and expenses of the Trustee, the Paying Agent, the Bond Registrar and the Tender Agent and all other liabilities of the Company under the Loan Agreement accrued to the redemption date.

Amendments and Modifications

No alteration, amendment, change, supplement or modification of the Loan Agreement is permissible without the written consent of the Trustee. The Issuer and the Trustee may, however, without the consent of or notice to any Bondholders, enter into any alteration, amendment, change, supplement or modification of the Loan Agreement (i) which may be required by the provisions of the Loan Agreement or the Indenture, (ii) for the purpose of curing any ambiguity or formal defect or omission, (iii) in connection with any modification or change necessary to conform the Loan Agreement with changes and modifications in the Indenture or (iv) in connection with any other change which, in the judgment of the Trustee, does not adversely affect the Trustee or the Bondholders. Except for such alterations, amendments, changes, supplements or modifications, the Loan Agreement may be altered, amended, changed, supplemented or modified only with the consent of the Bondholders holding a majority in principal amount of the Bonds then outstanding (see "Summary of the Indenture — Supplemental Indentures" for an explanation of the procedures necessary for Bondholder consent); provided, however, that the approval of the Bondholders holding 100% in principal amount of the Bonds then outstanding is necessary to effectuate an alteration, amendment, change, supplement or modification with respect to the Loan Agreement of the type described in clauses (i) through (iv) of the first sentence of the third paragraph of "Summary of the Indenture — Supplemental Indentures."

Summary of the First Mortgage Bonds and the First Mortgage Indenture

The following, in addition to the provisions contained elsewhere in this Reoffering Circular, is a brief description of certain provisions of the First Mortgage Bonds and the First Mortgage Indenture. This description is only a summary and does not purport to be complete and definitive. Reference is made to the First Mortgage Indenture and to the form of the First Mortgage Bonds for the detailed provisions thereof.

General

The First Mortgage Bonds, in a principal amount equal to the principal amount of the Bonds, were issued as and constitute a new series of first mortgage bonds under the First Mortgage Indenture (see "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds"). The statements herein made (being for the most part summaries of certain provisions of the First Mortgage Indenture) are subject to the detailed provisions of the First Mortgage Indenture, which is incorporated herein by this reference. Words or phrases italicized are defined in the First Mortgage Indenture.

The First Mortgage Bonds will mature on the same date and bear interest at the same rate or rates as the Bonds; however, the principal of and interest on the First Mortgage Bonds will not be payable other than upon the occurrence of an event of default under the Loan Agreement. If the Bonds become immediately due and payable as a result of a default in payment of the principal or redemption price of or interest on the Bonds, or a default in payment of the purchase price of such Bonds, due to an event of default under the Loan Agreement, and if all first mortgage bonds outstanding under the First Mortgage Indenture shall not have become immediately due and payable following an event of default under the First Mortgage Indenture, the Company will be obligated to redeem the First Mortgage Bonds upon receipt by the First Mortgage Trustee of a Redemption Demand from the Trustee for redemption, at a redemption price equal to the principal amount thereof plus accrued interest at the rates borne by the Bonds from the last date to which interest on the Bonds has been paid.

The First Mortgage Bonds at all times will be in fully registered form registered in the name of the Trustee, will be non-negotiable, and will be non-transferable except to any successor trustee under the Indenture. Upon payment and cancellation of Bonds by the Trustee or the Paying Agent (other than any Bond or portion thereof that was canceled by the Trustee or the Paying Agent and for which one or more Bonds were delivered and authenticated pursuant to the Indenture), whether at maturity, by redemption or otherwise, or upon provision for the payment of the Bonds having been made in accordance with the Indenture, an equal principal amount of First Mortgage Bonds will be deemed fully paid and the obligations of the Company thereunder will cease.

Security; Lien of the First Mortgage Indenture

General. Except as described below under this heading and under "— Issuance of Additional First Mortgage Bonds," and subject to the exceptions described under "— Satisfaction and Discharge," all first mortgage bonds issued under the First Mortgage Indenture, including the First Mortgage Bonds, will be secured, equally and ratably, by the lien of the First Mortgage Indenture, which constitutes, subject to *permitted liens* and exclusions as described below, a first mortgage lien on substantially all of the Company's real and tangible personal property located in Kentucky and used or to be used in connection with the generation, transmission and distribution of electricity and the storage, transportation and distribution of natural gas (other than property duly released from the lien of the First Mortgage Indenture in accordance with the provisions thereof and other than *excepted property*, as described below). Property that is subject to the lien of the First Mortgage Indenture is referred to below as "Mortgaged Property."

The Company may obtain the release of property from the lien of the First Mortgage Indenture from time to time, upon the bases provided for such release in the First Mortgage Indenture. See "— Release of Property."

The Company may enter into supplemental indentures with the First Mortgage Trustee, without the consent of the holders of the first mortgage bonds, in order to subject additional property (including property that would otherwise be excepted from such lien) to the lien of the First Mortgage Indenture. This property would constitute *property additions* and would be available as a basis for the issuance of additional first mortgage bonds. See "— Issuance of Additional First Mortgage Bonds."

The First Mortgage Indenture provides that after-acquired property (other than *excepted property*) will be subject to the lien of the First Mortgage Indenture. However, in the case of consolidation or merger (whether or not the Company is the surviving company) or transfer of the Mortgaged Property as or substantially as an entirety, the First Mortgage Indenture will not be required to be a lien upon any of the properties either owned or subsequently acquired by the successor company except properties acquired from the Company in or as a result of such transfer, as well as improvements, extensions and additions (as defined in the First Mortgage Indenture) to such properties and renewals, replacements and substitutions of or for any part or parts thereof. See "— Consolidation, Merger and Conveyance of Assets as an Entirety."

Excepted Property. The lien of the First Mortgage Indenture does not cover, among other things, the following types of property: property located outside of Kentucky and not specifically subjected or required to be subjected to the lien of the First Mortgage Indenture; property not used by the Company in its electric generation, transmission and distribution business or its natural gas storage, transportation and distribution business; cash and securities not paid, deposited or held under the First Mortgage Indenture or required so to be; contracts, leases and other agreements of all kinds, contract rights, bills, notes and other instruments, revenues, accounts receivable, claims, demands and judgments; governmental and other licenses, permits, franchises, consents and allowances; intellectual property rights and other general intangibles; vehicles, movable equipment, aircraft and vessels; all goods, stock in trade, wares, merchandise and inventory held for the purpose of sale or lease in the ordinary course of business; materials, supplies, inventory and other personal property consumable in the operation of the Company's business; fuel; tools and equipment; furniture and furnishings; computers and data processing, telecommunications and other facilities used primarily for administrative or clerical purposes or otherwise not used in connection with the operation or maintenance of electric generation, transmission and distribution facilities or natural gas storage, transportation and distribution facilities; coal, ore, gas, oil and other minerals and timber rights; electric energy and capacity, gas, steam, water and other products generated, produced, manufactured, purchased or otherwise acquired; real property and facilities used primarily for the production or gathering of natural gas; property which has been released from the lien of the First Mortgage Indenture; and leasehold interests. Property of the Company not covered by the lien of the First Mortgage Indenture is referred to herein as excepted property. Properties held by any of the Company's subsidiaries, as well as properties leased from others, would not be subject to the lien of the First Mortgage Indenture.

Permitted Liens. The lien of the First Mortgage Indenture is subject to permitted liens described in the First Mortgage Indenture. Such permitted liens include liens existing at the execution date of the First Mortgage Indenture, purchase money liens and other liens placed or otherwise existing on property acquired by the Company after the execution date of the First Mortgage Indenture at the time the Company acquires it, tax liens and other governmental charges which are not delinquent or which are being contested in good faith, mechanics', construction and materialmen's liens, certain judgment liens, easements, reservations and rights of others (including governmental entities) in, and defects of title to, the Company's property, certain leases and leasehold interests, liens to secure public obligations, rights of others to take minerals, timber, electric energy or capacity, gas, water, steam or other products produced by the Company or by others on the Company's property, rights and interests of persons other than the Company arising out of agreements relating to the common ownership or joint use of property, and liens on the interests of such persons in such property and liens which have been bonded or for which other security arrangements have been made.

The First Mortgage Indenture also provides that the First Mortgage Trustee will have a lien, prior to the lien on behalf of the holders of the first mortgage bonds, including the First Mortgage Bonds, upon the Mortgaged Property as security for the Company's payment of its reasonable compensation and expenses and for indemnity against certain liabilities. Any such lien would be a permitted lien under the First Mortgage Indenture.

Issuance of Additional First Mortgage Bonds

The maximum principal amount of first mortgage bonds that may be authenticated and delivered under the First Mortgage Indenture is subject to the issuance restrictions described below; provided, however, that the maximum principal amount of first mortgage bonds outstanding at any one time shall not exceed One Quintillion Dollars ($1,000,000,000,000,000,000), which amount may be changed by supplemental indenture. As of June 30, 2020, first mortgage bonds in an aggregate principal amount of $2,024,200,000 were outstanding under the First Mortgage Indenture, of which $539,200,000 were issued to secure the Company's payment obligations with respect to its outstanding pollution control and environmental facilities revenue bonds, including the Bonds.

First mortgage bonds of any series may be issued from time to time on the basis of, and in an aggregate principal amount not exceeding:

- 66 2/3% of the *cost* or *fair value* to the Company (whichever is less) of *property additions* (as described below) which do not constitute *funded property* (generally, *property additions* which have been made the basis of the authentication and delivery of first mortgage bonds, the release of Mortgaged Property or the withdrawal of cash, which have been substituted for retired *funded property* or which have been used for other specified purposes) after certain deductions and additions, primarily including adjustments to offset property retirements;

- the aggregate principal amount of *retired securities* (as described below); or

- an amount of cash deposited with the First Mortgage Trustee.

Property additions generally include any property which is owned by the Company and is subject to the lien of the First Mortgage Indenture except (with certain exceptions) goodwill, going concern value rights or intangible property, or any property the acquisition or construction of which is properly chargeable to one of the Company's operating expense accounts in accordance with U.S. generally accepted accounting principles.

Retired securities means, generally, first mortgage bonds which are no longer outstanding under the First Mortgage Indenture, which have not been retired by the application of *funded cash* and which have not been used as the basis for the authentication and delivery of first mortgage bonds, the release of property or the withdrawal of cash.

At June 30, 2020, approximately $1.8 billion of *property additions* and $285 million of *retired securities* were available to be used as the basis for the authentication and delivery of first mortgage bonds.

Release of Property

Unless an *event of default* has occurred and is continuing, the Company may obtain the release from the lien of the First Mortgage Indenture of any Mortgaged Property, except for cash held by the First Mortgage Trustee, upon delivery to the First Mortgage Trustee of an amount in cash equal to the amount, if any, by which sixty-six and two-thirds percent (66-2/3%) of the cost of the property to be released (or, if less, the *fair value* to the Company of such property at the time it became *funded property*) exceeds the aggregate of:

- an amount equal to 66 2/3% of the aggregate principal amount of obligations secured by *purchase money liens* upon the property to be released and delivered to the First Mortgage Trustee;

- an amount equal to 66 2/3% of the *cost* or *fair value* to the Company (whichever is less) of certified *property additions* not constituting *funded property* after certain deductions and additions, primarily including adjustments to offset property retirements (except that such adjustments need not be made if such *property additions* were acquired or made within the 90-day period preceding the release);

- the aggregate principal amount of first mortgage bonds the Company would be entitled to issue on the basis of *retired securities* (with such entitlement being waived by operation of such release);

- the aggregate principal amount of first mortgage bonds delivered to the First Mortgage Trustee (with such first mortgage bonds to be canceled by the First Mortgage Trustee);

- any amount of cash and/or an amount equal to 66 2/3% of the aggregate principal amount of obligations secured by *purchase money liens* upon the property released that is delivered to the trustee or other holder of a lien prior to the lien of the First Mortgage Indenture, subject to certain limitations described in the First Mortgage Indenture; and

- any taxes and expenses incidental to any sale, exchange, dedication or other disposition of the property to be released.

As used in the First Mortgage Indenture, the term *purchase money lien* means, generally, a lien on the property being released which is retained by the transferor of such property or granted to one or more other persons in connection with the transfer or release thereof, or granted to or held by a trustee or agent for any such persons, and may include liens which cover property in addition to the property being released and/or which secure indebtedness in addition to indebtedness to the transferor of such property.

Unless an *event of default* has occurred and is continuing, property which is not *funded property* may generally be released from the lien of the First Mortgage Indenture without depositing any cash or property with the First Mortgage Trustee as long as (a) the aggregate amount of *cost* or *fair value* to the Company (whichever is less) of all *property additions* which do not constitute *funded property* (excluding the property to be released) after certain deductions and additions, primarily including adjustments to offset property retirements, is not less than zero or (b) the *cost* or *fair value* (whichever is less) of property to be released does not exceed the aggregate amount of the cost or fair value to the Company (whichever is less) of *property additions* acquired or made within the 90-day period preceding the release.

The First Mortgage Indenture provides simplified procedures for the release of minor properties and property taken by eminent domain, and provides for dispositions of certain obsolete property and grants or surrender of certain rights without any release or consent by the First Mortgage Trustee.

If the Company retains any interest in any property released from the lien of the First Mortgage Indenture, the First Mortgage Indenture will not become a lien on such property or such interest therein or any improvements, extensions or additions to such property or renewals, replacements or substitutions of or for such property or any part or parts thereof.

Withdrawal of Cash

Unless an *event of default* has occurred and is continuing, and subject to certain limitations, cash held by the First Mortgage Trustee may, generally, (1) be withdrawn by the Company (a) to the extent of sixty-six and two-thirds percent (66-2/3%) of the *cost* or *fair value* to the Company (whichever is less) of *property additions* not constituting *funded property*, after certain deductions and additions, primarily including adjustments to offset retirements (except that such adjustments need not be made if such *property additions* were acquired or made within the 90-day period preceding the withdrawal) or (b) in an amount equal to the aggregate principal amount of first mortgage bonds that the Company would be entitled to issue on the basis of *retired securities* (with the entitlement to such issuance being waived by operation of such withdrawal) or (c) in an amount equal to the aggregate principal amount of any outstanding first mortgage bonds delivered to the First Mortgage Trustee; or (2) upon the Company's request, be applied to (a) the purchase of first mortgage bonds in a manner and at a price approved by the Company or (b) the payment (or provision for payment) at stated maturity of any first mortgage bonds or the redemption (or provision for payment) of any first mortgage bonds which are redeemable; provided, however, that cash deposited with the First Mortgage Trustee as the basis for the authentication and delivery of first mortgage bonds may, in addition, be withdrawn in an amount not exceeding the aggregate principal amount of cash delivered to the First Mortgage Trustee for such purpose.

Events of Default

An "event of default" occurs under the First Mortgage Indenture if

- the Company does not pay any interest on any first mortgage bonds within 30 days of the due date;

- the Company does not pay principal or premium, if any, on any first mortgage bonds on the due date;

- the Company remains in breach of any other covenant (excluding covenants specifically dealt with elsewhere in this section) in respect of any first mortgage bonds for 90 days after the Company receives a written notice of default stating the Company is in breach and requiring remedy of the breach; the notice must be sent by either the First Mortgage Trustee or holders of 25% of the principal amount of outstanding first mortgage bonds; the First Mortgage Trustee or such holders can agree to extend the 90-day period and such an agreement to extend will be automatically deemed to occur if the Company initiates corrective action within such 90 day period and the Company is diligently pursuing such action to correct the default; or

- the Company files for bankruptcy or certain other events in bankruptcy, insolvency, receivership or reorganization occur.

Remedies

Acceleration of Maturity. If an event of default occurs and is continuing, then either the First Mortgage Trustee or the holders of not less than 25% in principal amount of the outstanding first mortgage bonds may declare the principal amount of all of the first mortgage bonds to be due and payable immediately.

Rescission of Acceleration. After the declaration of acceleration has been made and before the First Mortgage Trustee has obtained a judgment or decree for payment of the money due, such declaration and its consequences will be rescinded and annulled, if

- the Company pays or deposits with the First Mortgage Trustee a sum sufficient to pay:

  - all overdue interest;
  - the principal of and premium, if any, which have become due otherwise than by such declaration of acceleration and interest thereon;
  - interest on overdue interest to the extent lawful;
  - all amounts due to the First Mortgage Trustee under the First Mortgage Indenture; and
- all *events of default*, other than the nonpayment of the principal which has become due solely by such declaration of acceleration, have been cured or waived as provided in the First Mortgage Indenture.

For more information as to waiver of defaults, see "— Waiver of Default and of Compliance" below.

Appointment of Receiver and Other Remedies. Subject to the First Mortgage Indenture, under certain circumstances and to the extent permitted by law, if an *event of default* occurs and is continuing, the First Mortgage Trustee has the power to appoint a receiver of the Mortgaged Property, and is entitled to all other remedies available to mortgagees and secured parties under the Uniform Commercial Code or any other applicable law.

Control by Holders; Limitations. Subject to the First Mortgage Indenture, if an *event of default* occurs and is continuing, the holders of a majority in principal amount of the outstanding first mortgage bonds will have the right to

- direct the time, method and place of conducting any proceeding for any remedy available to the First Mortgage Trustee, or
- exercise any trust or power conferred on the First Mortgage Trustee.

The rights of holders to make direction are subject to the following limitations:

- the holders' directions may not conflict with any law or the First Mortgage Indenture; and
- the holders' directions may not involve the First Mortgage Trustee in personal liability where the First Mortgage Trustee believes indemnity is not adequate.

The First Mortgage Trustee may also take any other action it deems proper which is not inconsistent with the holders' direction.

In addition, the First Mortgage Indenture provides that no holder of any first mortgage bond will have any right to institute any proceeding, judicial or otherwise, with respect to the First Mortgage Indenture for the appointment of a receiver or for any other remedy thereunder unless

- that holder has previously given the First Mortgage Trustee written notice of a continuing *event of default*;
- the holders of 25% in aggregate principal amount of the outstanding first mortgage bonds have made written request to the First Mortgage Trustee to institute proceedings in respect of that *event of default* and have offered the First Mortgage Trustee reasonable indemnity against costs, expenses and liabilities incurred in complying with such request; and
- for 60 days after receipt of such notice, request and offer of indemnity, the First Mortgage Trustee has failed to institute any such proceeding and no direction inconsistent with such request has been given to the First Mortgage Trustee during such 60-day period by the holders of a majority in aggregate principal amount of outstanding first mortgage bonds.

Furthermore, no holder of first mortgage bonds will be entitled to institute any such action if and to the extent that such action would disturb or prejudice the rights of other holders of first mortgage bonds.

However, each holder of first mortgage bonds has an absolute and unconditional right to receive payment when due and to bring a suit to enforce that right.

Notice of Default. The First Mortgage Trustee is required to give the holders of the first mortgage bonds notice of any default under the First Mortgage Indenture to the extent required by the Trust Indenture Act, unless such default has been cured or waived; except that in the case of an *event of default* of the character specified in the third bullet point under "— Events of Default" (regarding a breach of certain covenants continuing for 90 days after the receipt of a written notice of default), no such notice shall be given to such holders until at least 60 days after the occurrence thereof. The Trust Indenture Act currently permits the First Mortgage Trustee to withhold notices of default (except for certain payment defaults) if the First Mortgage Trustee in good faith determines the withholding of such notice to be in the interests of the holders of the first mortgage bonds.

The Company will furnish the First Mortgage Trustee with an annual statement as to its compliance with the conditions and covenants in the First Mortgage Indenture.

Waiver of Default and of Compliance. The holders of a majority in aggregate principal amount of the outstanding first mortgage bonds may waive, on behalf of the holders of all outstanding first mortgage bonds, any past default under the First Mortgage Indenture, except a default in the payment of principal, premium or interest, or with respect to compliance with certain provisions of the First Mortgage Indenture that cannot be amended without the consent of the holder of each outstanding first mortgage bond affected.

Compliance with certain covenants in the First Mortgage Indenture or otherwise provided with respect to first mortgage bonds may be waived by the holders of a majority in aggregate principal amount of the affected first mortgage bonds, considered as one class.

Consolidation, Merger and Conveyance of Assets as an Entirety

Subject to the provisions described below, the Company has agreed to preserve its corporate existence.

The Company has agreed not to consolidate with or merge with or into any other entity or convey, transfer or lease the Mortgaged Property as or substantially as an entirety to any entity unless

- the entity formed by such consolidation or into which the Company merges, or the entity which acquires or which leases the Mortgaged Property substantially as an entirety, is an entity organized and existing under the laws of the United States of America or any State or Territory thereof or the District of Columbia; and
    - expressly assumes, by supplemental indenture, the due and punctual payment of the principal of, and premium and interest on, all the outstanding first mortgage bonds and the performance of all of the Company's covenants under the First Mortgage Indenture; and
    - such entity confirms the lien of the First Mortgage Indenture on the Mortgaged Property; and
- in the case of a lease, such lease is made expressly subject to termination by (i) the Company or by the First Mortgage Trustee and (ii) the purchaser of the property so leased at any sale thereof, at any time during the continuance of an *event of default*; and
- immediately after giving effect to such transaction, no *event of default*, and no event which after notice or lapse of time or both would become an *event of default*, will have occurred and be continuing.

In the case of the conveyance or other transfer of the Mortgaged Property as or substantially as an entirety to any other person, upon the satisfaction of all the conditions described above the Company would be released and discharged from all obligations under the First Mortgage Indenture and on the first mortgage bonds then outstanding unless the Company elects to waive such release and discharge.

The First Mortgage Indenture does not prevent or restrict:

- any consolidation or merger after the consummation of which the Company would be the surviving or resulting entity; or

- any conveyance or other transfer, or lease, of any part of the Mortgaged Property which does not constitute the entirety or substantially the entirety thereof.

If following a conveyance or other transfer, or lease, of any part of the Mortgaged Property, the fair value of the Mortgaged Property retained by the Company exceeds an amount equal to three-halves (3/2) of the aggregate principal amount of all outstanding first mortgage bonds, then the part of the Mortgaged Property so conveyed, transferred or leased shall be deemed not to constitute the entirety or substantially the entirety of the Mortgaged Property. This fair value will be determined within 90 days of the conveyance or transfer by an independent expert that the Company selects and that is approved by the First Mortgage Trustee.

Modification of First Mortgage Indenture

Without Holder Consent. Without the consent of any holders of first mortgage bonds, the Company and the First Mortgage Trustee may enter into one or more supplemental indentures for any of the following purposes:

- to evidence the succession of another entity to the Company;

- to add one or more covenants or other provisions for the benefit of the holders of all or any series or tranche of first mortgage bonds, or to surrender any right or power conferred upon the Company;

- to correct or amplify the description of any property at any time subject to the lien of the First Mortgage Indenture; or to better assure, convey and confirm unto the First Mortgage Trustee any property subject or required to be subjected to the lien of the First Mortgage Indenture; or to subject to the lien of the First Mortgage Indenture additional property (including property of others), to specify any additional Permitted Liens with respect to such additional property and to modify the provisions in the First Mortgage Indenture for dispositions of certain types of property without release in order to specify any additional items with respect to such additional property;

- to add any additional *events of default*, which may be stated to remain in effect only so long as the first mortgage bonds of any one more particular series remains outstanding;

- to change or eliminate any provision of the First Mortgage Indenture or to add any new provision to the First Mortgage Indenture that does not adversely affect the interests of the holders in any material respect;

- to establish the form or terms of any series or tranche of first mortgage bonds;

- to provide for the issuance of bearer securities;

- to evidence and provide for the acceptance of appointment of a successor First Mortgage Trustee or by a co-trustee or separate trustee;

- to provide for the procedures required to permit the utilization of a non-certificated system of registration for any series or tranche of first mortgage bonds;

- to change any place or places where

  - the Company may pay principal, premium and interest,

  - first mortgage bonds may be surrendered for transfer or exchange, and

  - notices and demands to or upon the Company may be served;

- to amend and restate the First Mortgage Indenture as originally executed, and as amended from time to time, with such additions, deletions and other changes that do not adversely affect the interest of the holders in any material respect;

- to cure any ambiguity, defect or inconsistency or to make any other changes that do not adversely affect the interests of the holders in any material respect; or

- to increase or decrease the maximum principal amount of first mortgage bonds that may be outstanding at any time.

In addition, if the Trust Indenture Act is amended after the date of the First Mortgage Indenture so as to require changes to the First Mortgage Indenture or so as to permit changes to, or the elimination of, provisions which, at the date of the First Mortgage Indenture or at any time thereafter, were required by the Trust Indenture Act to be contained in the First Mortgage Indenture, the First Mortgage Indenture will be deemed to have been amended so as to conform to such amendment or to effect such changes or elimination, and the Company and the First Mortgage Trustee may, without the consent of any holders, enter into one or more supplemental indentures to effect or evidence such amendment.

With Holder Consent. Except as provided above, the consent of the holders of at least a majority in aggregate principal amount of the first mortgage bonds of all outstanding series, considered as one class, is generally required for the purpose of adding to, or changing or eliminating any of the provisions of, the First Mortgage Indenture pursuant to a supplemental indenture. However, if less than all of the series of outstanding first mortgage bonds are directly affected by a proposed supplemental indenture, then such proposal only requires the consent of the holders of a majority in aggregate principal amount of the outstanding first mortgage bonds of all directly affected series, considered as one class. Moreover, if the first mortgage bonds of any series have been issued in more than one tranche and if the proposed supplemental indenture directly affects the rights of the holders of first mortgage bonds of one or more, but less than all, of such tranches, then such proposal only requires the consent of the holders of a majority in aggregate principal amount of the outstanding first mortgage bonds of all directly affected tranches, considered as one class.

However, no amendment or modification may, without the consent of the holder of each outstanding first mortgage bond directly affected thereby:

- change the stated maturity of the principal or interest on any first mortgage bond (other than pursuant to the terms thereof), or reduce the principal amount, interest or premium payable (or the method of calculating such rates) or change the currency in which any first mortgage bond is payable, or impair the right to bring suit to enforce any payment;

- create any lien (not otherwise permitted by the First Mortgage Indenture) ranking prior to the lien of the First Mortgage Indenture with respect to all or substantially all of the Mortgaged Property, or terminate the lien of the First Mortgage Indenture on all or substantially all of the Mortgaged Property (other than in accordance with the terms of the First Mortgage Indenture), or deprive any holder of the benefits of the security of the lien of the First Mortgage Indenture;

- reduce the percentages of holders whose consent is required for any supplemental indenture or waiver of compliance with any provision of the First Mortgage Indenture or of any default thereunder and its consequences, or reduce the requirements for quorum and voting under the First Mortgage Indenture; or

- modify certain of the provisions of the First Mortgage Indenture relating to supplemental indentures, waivers of certain covenants and waivers of past defaults with respect to first mortgage bonds.

A supplemental indenture which changes, modifies or eliminates any provision of the First Mortgage Indenture expressly included solely for the benefit of holders of first mortgage bonds of one or more particular series or tranches will be deemed not to affect the rights under the First Mortgage Indenture of the holders of first mortgage bonds of any other series or tranche.

Satisfaction and Discharge

Any first mortgage bonds or any portion thereof will be deemed to have been paid and no longer outstanding for purposes of the First Mortgage Indenture and, at the Company's election, the Company's entire indebtedness with respect to those securities will be satisfied and discharged, if there shall have been irrevocably deposited with the First Mortgage Trustee or any Paying Agent (other than the Company), in trust:

- money sufficient, or

- in the case of a deposit made prior to the maturity of such first mortgage bonds, non-redeemable *eligible obligations* (as defined in the First Mortgage Indenture) sufficient, or

- a combination of the items listed in the preceding two bullet points, which in total are sufficient,

to pay when due the principal of, and any premium, and interest due and to become due on such first mortgage bonds or portions of such first mortgage bonds on and prior to their maturity.

The Company's right to cause its entire indebtedness in respect of the first mortgage bonds of any series to be deemed to be satisfied and discharged as described above will be subject to the satisfaction of any conditions specified in the instrument creating such series.

The First Mortgage Indenture will be deemed satisfied and discharged when no first mortgage bonds remain outstanding and when the Company has paid all other sums payable by it under the First Mortgage Indenture.

All moneys the Company pays to the First Mortgage Trustee or any Paying Agent on First Mortgage Bonds that remain unclaimed at the end of two years after payments have become due may be paid to or upon the Company's order. Thereafter, the holder of such First Mortgage Bond may look only to the Company for payment.

Duties of the First Mortgage Trustee; Resignation and Removal of the First Mortgage Trustee; Deemed Resignation

The First Mortgage Trustee will have, and will be subject to, all the duties and responsibilities specified with respect to an indenture trustee under the Trust Indenture Act. Subject to these provisions, the First Mortgage Trustee will be under no obligation to exercise any of the powers vested in it by the First Mortgage Indenture at the request of any holder of first mortgage bonds, unless offered reasonable indemnity by such holder against the costs, expenses and liabilities which might be incurred thereby. The First Mortgage Trustee will not be required to expend or risk its own funds or otherwise incur financial liability in the performance of its duties if the First Mortgage Trustee reasonably believes that repayment or adequate indemnity is not reasonably assured to it.

The First Mortgage Trustee may resign at any time by giving written notice to the Company.

The First Mortgage Trustee may also be removed by act of the holders of a majority in principal amount of the then outstanding first mortgage bonds.

No resignation or removal of the First Mortgage Trustee and no appointment of a successor trustee will become effective until the acceptance of appointment by a successor trustee in accordance with the requirements of the First Mortgage Indenture.

Under certain circumstances, the Company may appoint a successor trustee and if the successor accepts, the First Mortgage Trustee will be deemed to have resigned.

Evidence to be Furnished to the First Mortgage Trustee

Compliance with First Mortgage Indenture provisions is evidenced by written statements of the Company's officers or persons selected or paid by the Company. In certain cases, opinions of counsel and certifications of an engineer, accountant, appraiser or other expert (who in some cases must be independent) must be furnished. In addition, the First Mortgage Indenture requires the Company to give to the First Mortgage Trustee, not less than annually, a brief statement as to the Company's compliance with the conditions and covenants under the First Mortgage Indenture.

Miscellaneous Provisions

The First Mortgage Indenture provides that certain first mortgage bonds, including those for which payment or redemption money has been deposited or set aside in trust as described under "— Satisfaction and Discharge" above, will not be deemed to be "outstanding" in determining whether the holders of the requisite principal amount of the outstanding first mortgage bonds have given or taken any demand, direction, consent or other action under the First Mortgage Indenture as of any date, or are present at a meeting of holders for quorum purposes.

The Company will be entitled to set any day as a record date for the purpose of determining the holders of outstanding first mortgage bonds of any series entitled to give or take any demand, direction, consent or other action under the First Mortgage Indenture, in the manner and subject to the limitations provided in the First Mortgage Indenture. In certain circumstances, the First Mortgage Trustee also will be entitled to set a record date for action by holders. If such a record date is set for any action to be taken by holders of particular first mortgage bonds, such action may be taken only by persons who are holders of such first mortgage bonds on the record date.

Governing Law

The First Mortgage Indenture and the first mortgage bonds provide that they are to be governed by and construed in accordance with the laws of the State of New York except where the Trust Indenture Act is applicable or where otherwise required by law. The effectiveness of the lien of the First Mortgage Indenture, and the perfection and priority thereof, will be governed by Kentucky law.

Summary of the Indenture

The following, in addition to the provisions contained elsewhere in this Reoffering Circular, is a brief description of certain provisions of the Indenture. This description is only a summary and does not purport to be complete and definitive. Reference is made to the Indenture for the detailed provisions thereof.

Security

Pursuant to the Indenture, the Issuer assigned and pledged to the Trustee its interest in and to the Loan Agreement, including payments and other amounts due the Issuer thereunder, together with all moneys, property and securities from time to time held by the Trustee under the Indenture (with certain exceptions, including moneys held in or earnings on the Rebate Fund and the Purchase Fund).

The Bonds are further secured by the First Mortgage Bonds delivered to the Trustee (see "Summary of the Loan Agreement — Issuance and Delivery of First Mortgage Bonds"). The First Mortgage Bonds are registered in the name of the Trustee and are non-transferable, except to effect a transfer to any successor trustee. The Bonds are not directly secured by the Project (although the Project is subject to the lien of the First Mortgage Indenture).

No Pecuniary Liability of the Issuer

No provision, covenant or agreement contained in the Indenture or in the Loan Agreement, nor any breach thereof, will constitute or give rise to any pecuniary liability of the Issuer or any charge upon any of its assets or its general credit or taxing powers. The Issuer has not obligated itself by making the covenants, agreements or provisions contained in the Indenture or in the Loan Agreement, except with respect to the application of the amounts assigned to payment of the principal or redemption price of and interest on the Bonds.

The Bond Fund

The payments to be made by the Company pursuant to the Loan Agreement to the Issuer and certain other amounts specified in the Indenture will be deposited into a Bond Fund established pursuant to the Indenture (the "Bond Fund") and will be maintained in trust by the Trustee. Moneys in the Bond Fund will be used solely and only for the payment of the principal or redemption price of and interest on the Bonds, and for the payment of the reasonable fees and expenses to which the Trustee, Bond Registrar, Tender Agent, Authenticating Agent, any Paying Agent and the Issuer are entitled pursuant to the Indenture or the Loan Agreement. Any moneys held in the Bond Fund will be invested by the Trustee at the specific written direction of the Company in certain Governmental Obligations, investment-grade corporate obligations and other investments permitted under the Indenture.

The Rebate Fund

A Rebate Fund has been created by the Indenture (the "Rebate Fund") and will be maintained as a separate fund free and clear of the lien of the Indenture. The Issuer, the Trustee and the Company have agreed to comply with all rebate requirements of the Code and, in particular, the Company has agreed that if necessary, it will deposit in the Rebate Fund any such amount as is required under the Code. However, the Issuer, the Trustee and the Company may disregard the Rebate Fund provisions to the extent that they receive an opinion of Bond Counsel that such failure to comply will not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes.

Discharge of Indenture

When all the Bonds and all fees and charges accrued and to accrue of the Trustee and the Paying Agent have been paid or provided for, and when proper notice has been given to the Bondholders or the Trustee that the proper amounts have been so paid or provided for, and if the Issuer is not in default in any other respect under the Indenture, the Indenture will become null and void. The Bonds will be deemed to have been paid and discharged when there have been irrevocably deposited with the Trustee moneys sufficient to pay the principal or redemption price of and accrued interest on such Bonds to the due date (whether such date be by reason of maturity or upon redemption) or, in lieu thereof, Governmental Obligations have been deposited which mature in such amounts and at such times as will provide the funds necessary to so pay such Bonds, and when all reasonable and necessary fees and expenses of the Trustee, the Tender Agent, the Authenticating Agent, the Bond Registrar and the Paying Agent have been paid or provided for.

Surrender of First Mortgage Bonds

Upon payment of any principal or redemption price of and interest on any of the Bonds which reduces the principal amount of Bonds outstanding, or upon provision for the payment thereof having been made in accordance with the Indenture (see "Discharge of Indenture" above), First Mortgage Bonds in a principal amount equal to the principal amount of the Bonds so paid, or for the payment of which such provision has been made, shall be surrendered by the Trustee to the First Mortgage Trustee. The First Mortgage Bonds so surrendered shall be deemed fully paid and the obligations of the Company thereunder terminated.

Defaults and Remedies

Each of the following events constitutes an "Event of Default" under the Indenture:

(a) failure to make due and punctual payment of any installment of interest on any Bond within a period of five Business Days from the due date;

(b) failure to make due and punctual payment of the principal of, or premium, if any, on any Bond on the due date, whether at the stated maturity thereof, or upon proceedings for redemption, or upon the maturity thereof by declaration or if payment of the purchase price of any Bond required to be purchased pursuant to the Indenture is not made when such payment has become due and payable, provided that no Event of Default has occurred in respect of failure to receive such purchase price for any Bond if the Company has made the payment at the opening of business on the next Business Day as described in the last paragraph under “Summary of the Bonds — Mandatory Purchase of Bonds — Remarketing and Purchase of Bonds” above;

(c) failure of the Issuer to perform or observe any other of the covenants, agreements or conditions in the Indenture or in the Bonds which failure continues for a period of 30 days after written notice by the Trustee or by the registered owners holding not less than 25% in aggregate principal amount of all Bonds outstanding, provided, however, that if such failure is capable of being cured, but cannot be cured in such 30-day period, it will not constitute an Event of Default under the Indenture if corrective action in respect of such failure is instituted within such 30-day period and is being diligently pursued;

(d) the occurrence of an “Event of Default” under the Loan Agreement (see “Summary of the Loan Agreement — Events of Default”); or

(e) all first mortgage bonds outstanding under the First Mortgage Indenture, if not already due, shall have become immediately due and payable, whether by declaration or otherwise, and such acceleration shall not have been rescinded by the First Mortgage Trustee.

Upon the occurrence of an Event of Default under the Indenture, the Trustee may, and upon the written request of the registered owners holding not less than 25% in aggregate principal amount of Bonds then outstanding and upon receipt of indemnity reasonably satisfactory to it, must: (i) enforce each and every right granted to the Trustee as a holder of the First Mortgage Bonds (see “Summary of the First Mortgage Bonds and the First Mortgage Indenture”), (ii) declare the principal of all Bonds and interest accrued thereon to be immediately due and payable and (iii) declare all payments under the Loan Agreement to be immediately due and payable and enforce each and every other right granted to the Issuer under the Loan Agreement for the benefit of the Bondholders. Interest on the Bonds will cease to accrue on the date of issuance of a declaration of acceleration of payment of the principal and interest on the Bonds.

In exercising such rights, the Trustee will take any action that, in the judgment of the Trustee, would best serve the interests of the registered owners, taking into account the security and remedies afforded to holders of first mortgage bonds under the First Mortgage Indenture. Upon the occurrence of an Event of Default under the Indenture, the Trustee may also proceed to pursue any available remedy by suit at law or in equity to enforce the payment of the principal or redemption price of and interest on the Bonds then outstanding.

If an Event of Default under the Indenture shall occur and be continuing and the maturity date of the Bonds has been accelerated (to the extent the Bonds are not already due and payable) as a consequence of such event of default, the Trustee may, and upon the written request of the registered owners holding not less than 25% in principal amount of all Bonds then outstanding and upon receipt of indemnity satisfactory to it shall, exercise such rights as it shall possess under the First Mortgage Indenture as a holder of the First Mortgage Bonds and shall also issue a Redemption Demand for such First Mortgage Bonds to the First Mortgage Trustee.

If the Trustee recovers any moneys following an Event of Default, unless the principal of the Bonds has been declared due and payable, all such moneys will be applied in the following order: (i) to the payment of the fees, expenses, liabilities and advances incurred or made by the Trustee and the Paying Agent and the payment of any sums due and payable to the United States pursuant to Section 148(f) of the Code, (ii) to the payment of all interest then due on the Bonds, and (iii) to the payment of unpaid principal and premium, if any, of the Bonds. If the principal of the Bonds has become due or has been accelerated, such moneys will be applied in the following order: (i) to the payment of the fees, expenses, liabilities and advances incurred or made by the Trustee and the Paying Agent and (ii) to the payment of principal of and interest then due and unpaid on the Bonds.

No Bondholder may institute any suit or proceeding in equity or at law for the enforcement of the Indenture unless an Event of Default has occurred of which the Trustee has been notified or is deemed to have notice, and registered owners holding not less than 25% in aggregate principal amount of Bonds then outstanding have made written request to the Trustee to proceed to exercise the powers granted under the Indenture or to institute such action in their own name and the Trustee fails or refuses to exercise its powers within a reasonable time after receipt of indemnity satisfactory to it.

Any judgment against the Issuer pursuant to the exercise of rights under the Indenture will be enforceable only against specific assigned payments, funds and accounts under the Indenture in the hands of the Trustee. No deficiency judgment will be authorized against the general credit of the Issuer.

Waiver of Events of Default

Except as provided below, the Trustee may in its discretion waive any Event of Default under the Indenture and will do so upon the written request of the registered owners holding a majority in principal amount of all Bonds then outstanding. If, after the principal of all Bonds then outstanding have been declared to be due and payable as a result of a default under the Indenture and prior to any judgment or decree for the appointment of a receiver or for the payment of the moneys due has been obtained or entered, (i) the Company causes to be deposited with the Trustee a sum sufficient to pay all matured installments of interest upon all Bonds and the principal of and premium, if any, on any and all Bonds which would become due otherwise than by reason of such declaration (with interest thereon as provided in the Indenture) and the expenses of the Trustee in connection with such default and (ii) all Events of Default under the Indenture (other than nonpayment of the principal of Bonds due by said declaration) have been remedied, then such Event of Default will be deemed waived and such declaration and its consequences rescinded and annulled by the Trustee. Such waiver, rescission and annulment will be binding upon all Bondholders. No such waiver, rescission and annulment will extend to or affect any subsequent Event of Default or impair any right or remedy consequent thereon.

Upon any waiver or rescission as described above or any discontinuance or abandonment of proceedings under the Indenture, the Trustee shall immediately rescind in writing any Redemption Demand of First Mortgage Bonds previously given to the First Mortgage Trustee. The rescission under the First Mortgage Indenture of a declaration that all first mortgage bonds outstanding under the First Mortgage Indenture are immediately due and payable shall also constitute a waiver of an Event of Default described in paragraph (e) under the subheading "Defaults and Remedies" above and a waiver and rescission of its consequences, provided that no such waiver or rescission shall extend to or affect any subsequent or other default or impair any right consequent thereon.

Notwithstanding the foregoing, nothing in the Indenture will affect the right of a registered owner to enforce the payment of principal or redemption price of and interest on the Bonds after the maturity thereof.

Voting of First Mortgage Bonds Held by Trustee

The Indenture provides that the Trustee, as the holder of the First Mortgage Bonds, will be required to attend such meeting or meetings of bondholders under the First Mortgage Indenture or, at its option, deliver its proxy in connection therewith, as relate to matters with respect to which it, as such holder, is entitled to vote or consent. The Trustee, either at any such meeting or meetings or otherwise when the consent of the holders of the First Mortgage Bonds is sought without a meeting, will be required to vote all First Mortgage Bonds then held by it, or consent with respect thereto, proportionately with the vote or consent of the holders of all other securities of the Company then outstanding under the First Mortgage Indenture eligible to vote or consent, as evidenced by, and as to be delivered to the Trustee, a certificate signed by the temporary chairman, the temporary secretary, the permanent chairman, the permanent secretary, or an inspector of votes at any meeting or meetings of security holders under the First Mortgage Indenture, or by the First Mortgage Trustee in the case of consents of such security holders which are sought without a meeting, which states what the signer thereof reasonably believes are the proportionate votes or consents of the holders of all securities (other than the First Mortgage Bonds) outstanding under the First Mortgage Indenture and counted for the purposes of determining whether such security holders have approved or consented to the matter put before them; provided, however, that the Trustee shall not so vote in favor of, or so consent to, any amendment or modification of the First Mortgage Indenture, which, if it were an amendment or modification of the Indenture, would require the consent of the Bondholders as described in the third paragraph under the heading "Summary of the Indenture – Supplemental Indenture," without the prior consent and approval of Bondholders which would be so required; provided further that as a condition to the Trustee voting or giving such consent, the Trustee shall have received a certificate of a Company representative or an opinion of counsel, at its election, stating that such voting or consent is authorized or permitted by the Indenture.

Supplemental Indentures

The Issuer and the Trustee may enter into indentures supplemental to the Indenture as shall not be inconsistent with the terms and provisions of the Indenture, without the consent of or notice to the Bondholders, in order (i) to cure any ambiguity or formal defect or omission in the Indenture, (ii) to grant to or confer upon the Trustee, as may lawfully be granted, additional rights, remedies, powers or authorities for the benefit of the Bondholders, (iii) to subject to the Indenture additional revenues, properties or collateral, (iv) to permit qualification of the Indenture under any federal statute or state blue sky law, (v) to add additional covenants and agreements of the Issuer for the protection of the Bondholders or to surrender or limit any rights, powers or authorities reserved to or conferred upon the Issuer, (vi) to make any other modification or change to the Indenture which, in the sole judgment of the Trustee, does not adversely affect the Trustee or any Bondholder, (vii) to make other amendments not otherwise permitted by (i), (ii), (iii), (iv) or (v) of this paragraph to provisions relating to federal income tax matters under the Code or other relevant provisions if, in the opinion of Bond Counsel, those amendments would not adversely affect the exclusion of the interest on the Bonds from gross income for federal income tax purposes, (viii) to make any modification or change to the Indenture necessary to provide liquidity or credit support for the Bonds, including any modifications necessary to upgrade or maintain the then applicable ratings on the Bonds or (ix) to permit the issuance of the Bonds in other than book-entry-only form or to provide changes to or for the book-entry system.

Notwithstanding the foregoing, the Company, with the consent of the Trustee, may at any time further secure the Bonds by means of a letter of credit, other credit facility or other guarantee or collateral.

Exclusive of supplemental indentures for the purposes set forth in the preceding two paragraphs, the consent of registered owners holding a majority in aggregate principal amount of all Bonds then outstanding is required to approve any supplemental indenture, except no such supplemental indenture may permit, without the consent of all of the registered owners of the Bonds then outstanding, (i) an extension of the maturity of the principal of or the interest on any Bond issued under the Indenture or a reduction in the principal amount of any Bond or the rate of interest or time of redemption or redemption premium thereon, (ii) a privilege or priority of any Bond or Bonds over any other Bond or Bonds, (iii) a reduction in the aggregate principal amount of the Bonds required for consent to such supplemental indenture or (iv) the deprivation of any registered owners of the lien of the Indenture.

If at any time the Issuer requests the Trustee to enter into any supplemental indenture requiring the consent of the registered owners of the Bonds, the Trustee, upon being satisfactorily indemnified with respect to expenses, must notify all such registered owners. Such notice must set forth the nature of the proposed supplemental indenture and must state that copies thereof are on file at the designated office of the Trustee for inspection. If, within sixty days (or such longer period as prescribed by the Issuer or the Company) following the giving of such notice, the registered owners holding the requisite amount of the Bonds outstanding have consented to the execution thereof, no Bondholder will have any right to object or question the execution thereof.

No supplemental indenture will become effective unless the Company consents to the execution and delivery of such supplemental indenture. The Company will be deemed to have consented to the execution and delivery of any supplemental indenture if the Trustee does not receive a notice of protest or objection signed by the Company on or before 4:30 p.m., local time in the city in which the designated office of the Trustee is located, on the fifteenth day after the mailing to the Company of a notice of the proposed changes and a copy of the proposed supplemental indenture.

Enforceability of Remedies

The remedies available to the Trustee, the Issuer and the owners upon an Event of Default under the Loan Agreement, the Indenture or the First Mortgage Indenture are in many respects dependent upon judicial actions which are often subject to discretion and delay. Under existing constitutional and statutory law and judicial decisions, the remedies specified by the Loan Agreement, the Indenture and the First Mortgage Indenture may not be readily available or may be limited. The various legal opinions to be delivered concurrently with the delivery of the Bonds will be qualified as to the enforceability of the various legal instruments by limitations imposed by principles of equity, bankruptcy, reorganization, insolvency, moratorium or other similar laws affecting the rights of creditors generally.

Tax Treatment

On September 15, 2016, the date of original issuance and delivery of the Bonds, Stoll Keenon Ogden PLLC ("Prior Bond Counsel") delivered its opinion stating that under existing law, including current statutes, regulations, administrative rulings and official interpretations, subject to the qualifications and exceptions set forth below, interest on the Bonds would be excluded from the gross income of the recipients thereof for federal income tax purposes, except that no opinion was expressed regarding such exclusion from gross income with respect to any Bond during any period in which it is held by a "substantial user" of the Project or a "related person" as such terms are used in Section 147(a) of the Code. Interest on the Bonds would be an item of tax preference in determining alternative minimum taxable income under the Code. Prior Bond Counsel further opined that, subject to the assumptions stated in the preceding sentence, (i) interest on the Bonds would be excluded from gross income of the owners thereof for Kentucky income tax purposes and (ii) the Bonds would be exempt from all ad valorem taxes in Kentucky. Such opinion has not been updated as of the date hereof and no continuing tax exemption opinions are expressed by Dinsmore & Shohl LLP ("Bond Counsel").

Bond Counsel will deliver an opinion in connection with this reoffering to the effect that the conversion of the interest rate mode to a Long Term Rate Period (i) is authorized or permitted by the Act and the Indenture and (ii) will not adversely affect the validity of the Bonds or any exclusion from gross income of interest on the Bonds for federal income tax purposes to which interest on the Bonds would otherwise be entitled.

The opinion of Prior Bond Counsel as to the excludability of interest from gross income for federal income tax purposes was based upon and assumed the accuracy of certain representations of facts and circumstances, including with respect to the Project, which were within the knowledge of the Company and compliance by the Company with certain covenants and undertakings set forth in the proceedings authorizing the Bonds which are intended to assure that the Bonds are and will remain obligations the interest on which is not includable in gross income of the recipients thereof under the law in effect on the date of such opinion. Prior Bond Counsel did not independently verify the accuracy of the certifications and representations made by the Company and the Issuer. On the date of the opinion and subsequent to the original delivery of the Bonds on September 15, 2016, such representations of facts and circumstances must be accurate and such covenants and undertakings must continue to be complied with in order that interest on the Bonds be and remain excludable from gross income of the recipients thereof for federal income tax purposes under existing law. Prior Bond Counsel expressed no opinion (i) regarding the exclusion of interest on any Bond from gross income for federal income tax purposes on or after the date on which any change, including any interest rate conversion, permitted by the documents other than with the approval of Bond Counsel is taken which adversely affects the tax treatment of the Bonds or (ii) as to the treatment for purposes of federal income taxation of interest on the Bonds upon a Determination of Taxability.

Prior Bond Counsel further opined that the Code prescribes a number of qualifications and conditions for the interest on state and local government obligations to be and to remain excluded from gross income for federal income tax purposes, some of which, including provisions for potential payments by the Issuer to the federal government, require future or continued compliance after issuance of the Bonds in order for the interest to be and to continue to be so excluded from the date of issuance. Noncompliance with certain of these requirements by the Company or the Issuer with respect to the Bonds could cause the interest on the Bonds to be included in gross income for federal income tax purposes and to be subject to federal income taxation retroactively to the date of their issuance. The Company and the Issuer each covenanted to take all actions required of each to assure that the interest on the Bonds will be and remain excluded from gross income for federal income tax purposes, and not to take any actions that would adversely affect that exclusion.

The opinion of Prior Bond Counsel as to the exclusion of interest on the Bonds from gross income for federal income tax purposes and federal tax treatment of interest on the Bonds was subject to the following exceptions and qualifications:

(a) The Code provides for a "branch profits tax" which subjects to tax, at a rate of 30%, the effectively connected earnings and profits of a foreign corporation which engages in a United States trade or business. Interest on the Bonds would be includable in the amount of effectively connected earnings and profits and thus would increase the branch profits tax liability.

(b) The Code also provides that passive investment income, including interest on the Bonds, may be subject to taxation for any S corporation with Subchapter C earnings and profits at the close of its taxable year if greater than 25% of its gross receipts is passive investment income.

Except as stated above, Prior Bond Counsel expressed no opinion as to any federal or Kentucky tax consequences resulting from the receipt of interest on the Bonds.

Owners of the Bonds should be aware that the ownership of the Bonds may result in collateral federal income tax consequences. For instance, the Code provides that property and casualty insurance companies will be required to reduce their loss reserve deductions by 15% of the tax-exempt interest received on certain obligations, such as the Bonds, acquired after August 7, 1986. (For purposes of the immediately preceding sentence, a portion of dividends paid to an affiliated insurance company may be treated as tax-exempt interest.) The Code further provides for the disallowance of any deduction for interest expenses incurred by banks and certain other financial institutions allocable to carrying certain tax-exempt obligations, such as the Bonds, acquired after August 7, 1986. The Code also provides that, with respect to taxpayers other than such financial institutions, such taxpayers will be unable to deduct any portion of the interest expenses incurred or continued to purchase or carry the Bonds. The Code also provides, with respect to individuals, that interest on tax-exempt obligations, including the Bonds, is included in modified adjusted gross income for purposes of determining the taxability of social security and railroad retirement benefits. Furthermore, the earned income tax credit is not allowed for individuals with an aggregate amount of disqualified income within the meaning of Section 32 of the Code, which exceeds $2,200. Interest on the Bonds will be taken into account in the calculation of disqualified income. Prospective purchasers of the Bonds should consult their own tax advisors regarding such matters and any other tax consequences of holding the Bonds.

From time to time, there are legislative proposals in Congress which, if enacted, could alter or amend one or more of the federal tax matters referred to above or could adversely affect the market value of the Bonds. It cannot be predicted whether or in what form any such proposal might be enacted or whether, if enacted, it would apply to obligations (such as the Bonds) issued prior to enactment.

The opinion of Prior Bond Counsel delivered on the date of issuance of the Bonds is attached as Appendix B-1. The opinion of Bond Counsel relating to the conversion of the interest rate mode to a Long Term Rate Period in substantially the form in which it is expected to be delivered on the Conversion Date, redated to the Conversion Date, is attached as Appendix B-2.

Legal Matters

Certain legal matters in connection with the conversion of the interest rate mode to a Long Term Rate Period and the mandatory purchase and reoffering of the Bonds will be passed upon by Bond Counsel. Certain legal matters will be passed upon for the Company by Jones Day, Chicago, Illinois, and John R. Crockett III, General Counsel, Chief Compliance Officer and Corporate Secretary for the Company. Certain legal matters will be passed upon for the Remarketing Agents by their counsel, McGuireWoods LLP, Chicago, Illinois.

Reoffering

Subject to the terms and conditions of the Remarketing and Bond Purchase Agreement dated as of August 18, 2020 (the "Remarketing Agreement"), between the Company and J.P. Morgan Securities LLC, as Representative of the Remarketing Agents, the Remarketing Agents have agreed to purchase and reoffer the Bonds delivered to the Paying Agent for purchase on September 3, 2020, at a price equal to 100% of the principal amount of the Bonds, plus accrued interest (if any), and in connection therewith will receive compensation in the amount of $531,250, plus reimbursement of certain expenses. Under the terms of the Remarketing Agreement, the Company has agreed to indemnify the Remarketing Agents against certain civil liabilities, including liabilities under federal securities laws.

The Remarketing Agents and their affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage activities. The Remarketing Agents and their affiliates have, from time to time, performed, and may in the future perform various investment and commercial banking services for the Company, for which they received or will receive customary fees and expenses. Under certain circumstances, the Remarketing Agents and their affiliates may have certain creditor and/or other rights against the Company and any affiliates thereof in connection with such transactions and/or services. The Remarketing Agents and their affiliates also may communicate independent investment recommendations, market advice or trading ideas and/or publish or express independent research views in respect of assets, securities or instruments of the Company and at any time may hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

J.P. Morgan Securities LLC, one of the Remarketing Agents, has entered into negotiated dealer agreements (each, a "Dealer Agreement") with each of Charles Schwab & Co, Inc. ("CS&Co.") and LPL Financial LLC ("LPL") for the retail distribution of certain securities offerings at the original issue prices. Pursuant to each Dealer Agreement, each of CS&Co. and LPL may purchase Bonds from J.P. Morgan Securities LLC at the original issue price less a negotiated portion of the selling concession applicable to and Bonds that such firm sells.

Continuing Disclosure

Because the Bonds are special and limited obligations of the Issuer, the Issuer is not an "obligated person" for purposes of Rule 15c2-12 (the "Rule") promulgated by the SEC under the Exchange Act, and does not have any continuing obligations thereunder. Accordingly, the Issuer will not provide any continuing disclosure information with respect to the Bonds or the Issuer.

In order to enable the Remarketing Agent to comply with the requirements of the Rule, the Company will covenant in an amended and restated continuing disclosure undertaking agreement delivered to the Trustee for the benefit of the holders of the Bonds (the "Continuing Disclosure Agreement") to provide certain continuing disclosure for the benefit of the holders of the Bonds. Under the Continuing Disclosure Agreement, the Company will covenant to take the following actions:

(i) The Company will provide to the Municipal Securities Rulemaking Board ("MSRB") (in electronic format) (a) annual financial information of the type set forth in Appendix A to this Reoffering Circular (including any information incorporated by reference in Appendix A) and (b) audited financial statements prepared in accordance with generally accepted accounting principles, in each case not later than 120 days after the end of the Company's fiscal year.

(ii) The Company will file in a timely manner not in excess of 10 business days after the occurrence of the event with the MSRB notice of the occurrence of any of the following events (if applicable) with respect to the Bonds: (a) principal and interest payment delinquencies; (b) non-payment related defaults, if material; (c) any unscheduled draws on debt service reserves reflecting financial difficulties; (d) unscheduled draws on credit enhancement facilities reflecting financial difficulties; (e) substitution of credit or liquidity providers, or their failure to perform; (f) adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701-TEB) or other material notices or determinations with respect to the tax status of the Bonds, or other material events affecting the tax status of the Bonds; (g) modifications to rights of the holders of the Bonds, if material; (h) bond calls for any Bonds, if material, and tender offers; (i) defeasance of the Bonds or any portion thereof; (j) release, substitution, or sale of property securing repayment of the Bonds, if material; (k) rating changes; (l) bankruptcy, insolvency, receivership or similar event of the Company; (m) the consummation of a merger, consolidation or acquisition involving the Company, or the sale of all of substantially all of the assets of the Company, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material; (n) appointment of a successor or additional trustee or a change of name of a trustee, if material; (o) incurrence by the Company of a Financial Obligation, if material, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a Financial Obligation of the Company, any of which affect security holders, if material; and (p) default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a Financial Obligation of the Company, any of which reflect financial difficulties.

(iii) The Company will file in a timely manner with the MSRB notice of a failure by the Company to file any of the information referred to in paragraph (i) above by the due date.

A Financial Obligation, as referred to above, is defined as (i) a debt obligation; (ii) a derivative instrument entered into in connection with, or pledged as a security or a source of payment for, an existing or planned debt obligation; or (iii) a guarantee of (i) or (ii). The term Financial Obligation does not include municipal securities as to which a final official statement has been provided to the MSRB consistent with the Rule.

The Company may amend the Continuing Disclosure Agreement (and the Trustee agrees to any amendment so requested by the Company that does not change the duties of the Trustee thereunder) or waive any provision thereof, but only with a change in circumstances that arises from a change in legal requirements, change in law, or change in the nature or status of the Company with respect to the Bonds or the type of business conducted by the Company; provided that the undertaking, as amended or following such waiver, would have complied with the requirements of the Rule on the date of issuance of the Bonds, after taking into account any amendments to the Rule as well as any change in circumstances, and the amendment or waiver does not materially impair the interests of the holders of the Bonds to which such undertaking relates, in the opinion of the Trustee or counsel expert in federal securities laws acceptable to both the Company and the Trustee, or is approved by the Beneficial Owners of a majority in aggregate principal amount of the outstanding Bonds. The Company acknowledges that its undertakings pursuant to the Rule described under this caption are intended to be for the benefit for the holders of the Bonds and will be enforceable by the holders of those Bonds or by the Trustee on behalf of such holders. Any breach by the Company of these undertakings pursuant to the Rule will not constitute an event of default under the Indenture, the Loan Agreement or the Bonds.

The Company is a party to continuing disclosure agreements with respect to nine series of pollution control bonds. The MSRB's Electronic Municipal Market Access ("EMMA") website reflects that, within the past five years, for two series of such bonds, the Company's 2011 annual financial statements were timely posted, but to outdated CUSIP numbers. The 2011 annual financial statements were re-posted to the correct CUSIP numbers for those series in May 2012. With respect to both series of bonds, the Company also failed to file on the MSRB's EMMA website in a timely manner a notice of the Company's failure to file such 2011 financial statements in accordance with the applicable continuing disclosure agreements. The Company has subsequently made all of these corrective filings. The Company's 2011 annual financial statements had been filed with the SEC on February 28, 2012. The Company has had, and continues to have, procedures in place in order to make material event notices and financial statement filings on an ongoing basis.

This Reoffering Circular has been duly approved, executed and delivered by the Company.

LOUISVILLE GAS AND ELECTRIC COMPANY

By:____________________________
Daniel K. Arbough
Treasurer

APPENDIX A

THE COMPANY

Louisville Gas and Electric Company (the "Company"), incorporated in Kentucky in 1913, is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy and the storage, distribution and sale of natural gas. As of December 31, 2019, the Company provides electric service to approximately 418,000 customers in Louisville and adjacent areas in Kentucky, covering approximately 700 square miles in nine counties and provides natural gas service to approximately 329,000 customers in its electric service area and eight additional counties in Kentucky. The Company's coal-fired electric generating stations, all equipped with systems to reduce sulphur dioxide emissions, produce most of the Company's electricity. The remainder is generated by a natural gas combined cycle combustion turbine, a hydroelectric power plant, natural gas and oil-fueled combustion turbines and a small solar facility. Underground natural gas storage fields help the Company provide economical and reliable natural gas service to customers.

The Company is a wholly-owned subsidiary of LG&E and KU Energy LLC and an indirect wholly-owned subsidiary of PPL Corporation. The Company's affiliate, Kentucky Utilities Company ("KU"), is a regulated public utility engaged in the generation, transmission, distribution and sale of electric energy in Kentucky and Virginia. The Company's obligations under the Loan Agreement are solely its own, and not those of any of its affiliates. None of KU, PPL Corporation or the Company's other affiliates will be obligated to make any payment on the Loan Agreement or the Bonds.

The Company's executive offices are located at 220 West Main Street, Louisville, Kentucky 40202, telephone: (502) 627-2000.

The information above concerning the Company is only a summary and does not purport to be comprehensive. Additional information regarding the Company, including audited financial statements, is available in the documents listed under the heading "Documents Incorporated by Reference," which documents are incorporated by reference herein.

The selected financial data presented above for the three fiscal years ended December 31, 2019, and as of December 31 for each of those years, have been derived from the Company's audited financial statements. The selected financial data presented above for the six months ended June 30, 2020 and 2019 have been derived from the Company's unaudited financial statements for the six months ended June 30, 2020 and 2019. The Company's audited financial statements for the three fiscal years ended December 31, 2019, and as of December 31 for each of those years, are included in the Company's Form 10-K for the year ended December 31, 2019 incorporated by reference herein. The Company's unaudited financial statements for the six months ended June 30, 2020 are included in the Company's Form 10-Q for the quarter ended June 30, 2020 incorporated by reference herein. "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Form 10-K for the year ended December 31, 2019 and "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Form 10-Q for the quarter ended June 30, 2020, as well as the Combined Notes to Financial Statements as of December 31, 2019, 2018 and 2017 and the Combined Notes to Condensed Financial Statements (Unaudited) as of June 30, 2020 and December 31, 2019 and for the six-month periods ended June 30, 2020 and 2019, should be read in conjunction with the above information. Deloitte & Touche LLP audited the Company's financial statements for the three fiscal years ended December 31, 2019.

Risk Factors

Investing in the Bonds involves risk. Please see the risk factors in the Company's Annual Report on Form 10-K for the year ended December 31, 2019 and in the Company's Quarterly Reports on Form 10-Q for the periods ended March 31, 2020 and June 30, 2020, which are incorporated by reference in this Appendix A. Before making an investment decision, you should carefully consider these risks as well as the other information contained or incorporated by reference in this Appendix A. Risks and uncertainties not presently known to the Company or that the Company currently deems immaterial may also impair its business operations, its financial results and the value of the Bonds.

Available Information

The Company is subject to the information requirements of the Securities Exchange Act of 1934, as amended, and, accordingly, files reports and other information with the Securities and Exchange Commission (the "SEC"). Such reports and other information on file can be inspected and copied at the public reference facilities of the SEC, currently at 100 F Street, N.E., Room 1580, Washington, D.C. 20549; or from the SEC's Web Site (http://www.sec.gov). Please call the SEC at 1-800-SEC-0330 for further information on the public reference room.

Documents Incorporated by Reference

The following documents, as filed by the Company with the SEC, are incorporated herein by reference:

1. Form 10-K Annual Report of the Company for the year ended December 31, 2019;

2. Form 10-Q Quarterly Reports of the Company for the quarters ended March 31, 2020 and June 30, 2020; and

2. Form 8-K Current Report of the Company filed with the SEC on March 31, 2020.

All documents filed by the Company with the SEC pursuant to Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 subsequent to the date of this Reoffering Circular and prior to the termination of the offering of the Bonds shall be deemed to be incorporated by reference in this Appendix and to be made a part hereof from their respective dates of filing. Any statement contained in a document incorporated or deemed to be incorporated by reference in this Reoffering Circular shall be deemed to be modified or superseded for purposes of this Reoffering Circular to the extent that a statement contained in this Reoffering Circular or in any other subsequently filed document which also is or is deemed to be incorporated by reference in this Reoffering Circular modifies or supersedes such statement. Any statement so modified or superseded shall not be deemed, except as so modified or superseded, to constitute a part of this Reoffering Circular.

The Company hereby undertakes to provide without charge to each person (including any beneficial owner) to whom a copy of this Reoffering Circular has been delivered, on the written or oral request of any such person, a copy of any or all of the documents referred to above which have been or may be incorporated in this Reoffering Circular by reference, other than certain exhibits to such documents. Requests for such copies should be directed to Treasurer, Louisville Gas and Electric Company, 220 West Main Street, Louisville, Kentucky 40202, telephone: (502) 627-2000.

Re: $125,000,000 County of Trimble, Kentucky, Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project)

We hereby certify that we have examined certified copies of the proceedings of record of the County of Trimble, Kentucky (the "**County**"), acting by and through its Fiscal Court as its duly authorized governing body, preliminary to and in connection with the issuance by the County of its Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project), dated their date of issuance, in the aggregate principal amount of $125,000,000 (the "**2016 Series A Bonds**"). The 2016 Series A Bonds are issued under the provisions of Sections 103.200 to 103.285, inclusive, of the Kentucky Revised Statutes (the "**Act**"), for the purpose of providing funds which will be used, with other funds provided by Louisville Gas and Electric Company (the "**Company**") for the current refunding of (i) $83,335,000 aggregate principal amount of the County's Pollution Control Revenue Bonds, 2000 Series A (Louisville Gas and Electric Company Project), dated August 9, 2000 (the "**Refunded 2000 Series A Bonds**"), and (ii) $41,665,000 aggregate principal amount of the County's Pollution Control Revenue Bonds, 2002 Series A (Louisville Gas and Electric Company Project), dated October 23, 2002 (the "**Refunded 2002 Series A Bonds**", and collectively with the Refunded 2000 Series A Bonds, the "**Refunded Bonds**"), which were issued for the purpose of currently refunding a portion of the costs of construction of air and water pollution control facilities serving certain electric generating units of the Company located in Trimble County, Kentucky (the "**Project**"), as provided by the Act.

The 2016 Series A Bonds mature on September 1, 2044 and bear interest initially at the Weekly Rate, as defined in the Indenture, hereinafter described, subject to change as provided in such Indenture. The 2016 Series A Bonds will be subject to optional and mandatory redemption prior to maturity at the times, in the manner, and upon the terms set forth in the 2016 Series A Bonds. From such examination of the proceedings of the Fiscal Court of the County referred to above and from an examination of the Act, we are of the opinion that the County is duly authorized and empowered to issue the 2016 Series A Bonds under the laws of the Commonwealth of Kentucky now in force.

We have examined an executed counterpart of a certain Loan Agreement, dated as of September 1, 2016 (the "**Loan Agreement**"), by and between the County and the Company and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Loan Agreement, pursuant to which the County has agreed to issue the 2016 Series A Bonds and to lend the proceeds thereof to the Company to provide funds to pay and discharge, with other funds provided by the Company, the Refunded Bonds. The Company has agreed to make loan payments to the Trustee at times and in amounts fully adequate to pay maturing principal of, interest on, and redemption premium, if any, on the 2016 Series A Bonds as same become due and payable. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Loan Agreement; that the Loan Agreement has been duly authorized, executed, and delivered by the County; and that the Loan Agreement is a legal, valid, and binding obligation of the County, enforceable in accordance with its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency, or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

We have also examined an executed counterpart of a certain Indenture of Trust, dated as of September 1, 2016 (the "**Indenture**"), by and between the County and U.S. Bank National Association, as trustee (the "**Trustee**"), securing the 2016 Series A Bonds and setting forth the covenants and undertakings of the County in connection with the 2016 Series A Bonds and a certified copy of the proceedings of record of the Fiscal Court of the County preliminary to and in connection with the execution and delivery of the Indenture. Pursuant to the Indenture, certain of the County's rights under the Loan Agreement, including the right to receive payments thereunder, and all moneys and securities held by the Trustee in accordance with the Indenture (except moneys and securities in the Rebate Fund created thereby) have been assigned to the Trustee, as security for the holders of the 2016 Series A Bonds. From such examination, we are of the opinion that such proceedings of the Fiscal Court of the County show lawful authority for the execution and delivery of the Indenture; that the Indenture has been duly authorized, executed, and delivered by the County; and that the Indenture is a legal, valid, and binding obligation upon the parties thereto according to its terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency, or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought.

In our opinion the 2016 Series A Bonds have been validly authorized, executed, and issued in accordance with the laws of the Commonwealth of Kentucky now in full force and effect, and constitute legal, valid, and binding special and limited obligations of the County entitled to the benefit of the security provided by the Indenture and enforceable in accordance with their terms, subject to the qualification that the enforcement thereof may be limited by laws relating to bankruptcy, insolvency, or other similar laws affecting creditors' rights generally, including equitable provisions where equitable remedies are sought. The 2016 Series A Bonds are payable by the County solely and only from payments and other amounts derived from the Loan Agreement and as provided in the Indenture.

In our opinion, under existing laws, including current statutes, regulations, administrative rulings, and official interpretations by the Internal Revenue Service, subject to the exceptions and qualifications contained in the succeeding paragraphs, (i) interest on the 2016 Series A Bonds is excluded from the gross income of the recipients thereof for federal income tax purposes, except that no opinion is expressed regarding such exclusion from gross income with respect to any 2016 Series A Bond during any period in which it is held by a "substantial user" of the Project or a "related person," as such terms are used in Section 147(a) of the Internal Revenue Code of 1986, as amended (the "**Code**"); and (ii) interest on the 2016 Series A Bonds is a separate item of tax preference in determining alternative minimum taxable income for individuals and corporations under the Code. In arriving at this opinion, we have relied upon representations, factual statements, and certifications of the Company with respect to certain material facts which are solely within the Company's knowledge in reaching our conclusion, among other things, that all of the proceeds of the Refunded 2002 Series C Bonds were used to refinance air and water pollution control facilities qualified for financing under Section 103(b)(4)(F) of the Internal Revenue Code of 1954, as amended, and Section 1312(a) of the Tax Reform Act of 1986. Further, in arriving at the opinion set forth in this paragraph as to the exclusion from gross income of interest on the 2016 Series A Bonds, we have assumed and this opinion is conditioned on, the accuracy of and continuing compliance by the Company and the County with representations and covenants set forth in the Loan Agreement and the Indenture which are intended to assure compliance with certain tax-exempt interest provisions of the Code. Such representations and covenants must be accurate and must be complied with after the issuance of the 2016 Series A Bonds in order that interest on the 2016 Series A Bonds be excluded from gross income for federal income tax purposes. Failure to comply with certain of such representations and covenants in respect of the 2016 Series A Bonds after the issuance of the 2016 Series A Bonds could cause the interest thereon to be included in gross income for federal income tax purposes retroactively to the date of issuance of the 2016 Series A Bonds. We express no opinion (i) regarding the exclusion of interest on any 2016 Series A Bond from gross income for federal income tax purposes on or after the date on which any change, including any interest rate conversion, permitted by the documents (other than with approval of this firm) is taken which adversely affects the tax treatment of the 2016 Series A Bonds; or (ii) as to the treatment for purposes of federal income taxation of interest on the 2016 Series A Bonds upon a Determination of Taxability. We are further of the opinion that interest on the 2016 Series A Bonds is excluded from gross income of the recipients thereof for Kentucky income tax purposes and that the 2016 Series A Bonds are exempt from ad valorem taxation by the Commonwealth of Kentucky and all political subdivisions thereof.

Our opinion as to the exclusion of interest on the 2016 Series A Bonds from gross income for federal income tax purposes and federal tax treatment of interest on the 2016 Series A Bonds is further subject to the following exceptions and qualifications:

(a) The Code provides for a "branch profits tax" which subjects to tax, at a rate of 30%, the effectively connected earnings and profits of a foreign corporation which engages in a United States trade or business. Interest on the 2016 Series A Bonds would be includable in the amount of effectively connected earnings and profits and thus would increase the branch profits tax liability.

(b) The Code also provides that passive investment income, including interest on the 2016 Series A Bonds, may be subject to taxation for any S corporation with Subchapter C earnings and profits at the close of its taxable year if greater than 25% of its gross receipts is passive investment income.

Except as stated above, we express no opinion as to any federal or Kentucky tax consequences resulting from the receipt of interest on the 2016 Series A Bonds.

Holders of the 2016 Series A Bonds should be aware that the ownership of the 2016 Series A Bonds may result in collateral federal income tax consequences. For instance, the Code provides that, for taxable years beginning after December 31, 1986, property and casualty insurance companies will be required to reduce their loss reserve deductions by 15% of the tax-exempt interest received on certain obligations, such as the 2016 Series A Bonds, acquired after August 7, 1986. (For purposes of the immediately preceding sentence, a portion of dividends paid to an affiliated insurance company may be treated as tax-exempt interest.) The Code further provides for the disallowance of any deduction for interest expenses incurred by banks and certain other financial institutions allocable to carrying certain tax-exempt obligations, such as the 2016 Series A Bonds, acquired after August 7, 1986. The Code also provides that, with respect to taxpayers other than such financial institutions, such taxpayers will be unable to deduct any portion of the interest expenses incurred or continued to purchase or carry the 2016 Series A Bonds. The Code also provides, with respect to individuals, that interest on tax-exempt obligations, including the 2016 Series A Bonds, is included in modified adjusted gross income for purposes of determining the taxability of social security and railroad retirement benefits. Furthermore, the earned income credit is not allowed for individuals with an aggregate amount of disqualified income within the meaning of Section 32 of the Code, which exceeds $2,200. Interest on the 2016 Series A Bonds will be taken into account in the calculation of disqualified income.

We have received opinions of Gerald A. Reynolds, General Counsel, Chief Compliance Officer, and Corporate Secretary of the Company and Jones Day, Chicago, Illinois, counsel to the Company, of even date herewith. In rendering this opinion, we have relied upon said opinions with respect to the matters therein. We have also received an opinion of even date herewith of Hon. Crystal L. Heinz, County Attorney of Trimble County, Kentucky, and relied upon said opinion with respect to the matters therein. The opinions are in forms satisfactory to us as to both scope and content.

We express no opinion as to the title to, the description of, or the existence or priority of any liens, charges, or encumbrances on the Project.

In rendering the foregoing opinions, we are passing upon only those matters specifically set forth in such opinions and are not passing upon the investment quality of the 2016 Series A Bonds or the accuracy or completeness of any statements made in connection with any offer or sale thereof. The opinions herein are expressed as of the date hereof and we assume no obligation to supplement or update such opinions to reflect any facts or circumstances that may hereafter come to our attention or any changes in law that may hereafter occur.

We are members of the Bar of the Commonwealth of Kentucky and do not purport to be experts on the laws of any jurisdiction other than the Commonwealth of Kentucky and the United States of America, and we express no opinion as to the laws of any jurisdiction other than those specified.

Respectfully submitted,

County of Trimble, Kentucky
Bedford, Kentucky

U.S. Bank National Association, as Trustee
Louisville, Kentucky

Re: Conversion of the Interest Rate Mode of $125,000,000 County of Trimble, Kentucky, Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project)

Ladies and Gentlemen:

This opinion is being furnished in accordance with the requirements of the Indenture of Trust, dated as of September 1, 2016 (the "Indenture"), between the County of Trimble, Kentucky (the "Issuer") and U.S. Bank National Association, as Trustee, Bond Registrar, Paying Agent, and Tender Agent (the "Trustee"), pertaining to $125,000,000 principal amount of County of Trimble, Kentucky, Pollution Control Revenue Refunding Bonds, 2016 Series A (Louisville Gas and Electric Company Project), dated September 15, 2016 (the "2016 Series A Bonds"), in order to satisfy certain requirements of Section 2.09 of the Indenture. Pursuant to Section 2.09 of the Indenture, the Company has elected to convert the Interest Rate Mode applicable to the 2016 Series A Bonds from a Weekly Rate to a Long Term Rate effective as of September 3, 2020. The Conversion to the Long Term Rate shall be effective for an initial Long Term Rate Period beginning on and including September 3, 2020 and ending August 31, 2027. The 2016 Series A Bonds mature on September 1, 2044. The terms used herein denoted by initial capitals and not otherwise defined shall have the meanings specified in the Indenture.

We have examined the law and such documents and matters as we have deemed necessary to provide this opinion. As to questions of fact material to the opinions expressed herein, we have relied upon the provisions of the Indenture and related documents, and upon representations made to us without undertaking to verify the same by independent investigation.

Based upon the foregoing, as of the date hereof, we are of the opinion that the Conversion of the Interest Rate Mode applicable to the 2016 Series A Bonds from a Weekly Rate to a Long Term Rate for an initial Long Term Rate Period commencing on and effective as of September 3, 2020 and ending August 31, 2027 as described herein (a) is authorized or permitted by the Act and is authorized by the Indenture and (b) will not adversely affect the validity of the 2016 Series A Bonds or any exclusion from gross income of the interest on the 2016 Series A Bonds for federal income tax purposes to which interest on the 2016 Series A Bonds would otherwise be entitled. Interest on the 2016 Series A Bonds is not and will not be excluded from gross income during any period when the 2016 Series A Bonds are held by the Company or a "related person" of the Company as defined in Section 147(a) of the Internal Revenue Code of 1986, as amended.

In rendering this opinion, we assume, without verifying, that the Issuer and the Company have complied and will comply with all covenants contained in the Indenture, the Loan Agreement between the Issuer and the Company, dated as of September 1, 2016, and other documents relating to the 2016 Series A Bonds. Stoll Keenon Ogden PLLC rendered its approving opinion at the time of the issuance of the 2016 Series A Bonds relating to, among other things, the validity of the 2016 Series A Bonds and the exclusion from federal income taxation of interest on the 2016 Series A Bonds. We have not been requested to update or continue such opinion and have not undertaken to do so. Accordingly, we do not express any opinion with respect to the 2016 Series A Bonds except as set forth above.

Our opinion represents our legal judgment based upon our review of the law and the facts that we deem relevant to render such opinion and is not a guarantee of a result. This opinion is given as of the date hereof and we assume no obligation to review or supplement this opinion to reflect any facts or circumstances that may hereafter come to our attention or any changes in law that may hereafter occur.

We express no opinion herein as to the investment quality of the 2016 Series A Bonds or the adequacy, accuracy, or completeness of any information furnished to any person in connection with any offer or sale of the 2016 Series A Bonds.

Respectfully submitted,

DINSMORE & SHOHL LLP

Case No. 2020-00350
Forecasted Test Period Filing Requirements
(Forecasted Test Period 12ME 6/30/22; Base Period 12ME 2/28/21)

Filing Requirement
Tab 41 - 807 KAR 5:001 Section 16(7)(k)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

The most recent Federal Energy Regulatory Commission Form 1 (electric), Federal Energy Regulatory Commission Form 2 (gas), or Public Service Commission Form T (telephone).

Response:

LG&E’s most recent FERC Form 1 and KPSC Annual Report for Major Natural Gas Companies for the year ended December 31, 2019 are attached. Please note that by a FERC Order dated July 12, 2007 in FERC Docket No. CP07-232-000, LG&E was granted a Section (7) exemption by the FERC under the Natural Gas Act, and as a part of that exemption LG&E was granted "a waiver of reporting and accounting requirements," which includes the filing of Form 2 with the FERC. In addition, on February 15, 2008, the Public Service Commission issued an order granting LG&E’s request to cease the annual filing of the FERC Form 2. In lieu of filing a FERC Form 2 with the Public Service Commission, LG&E was ordered to file a paper copy of the annual report information that it files with the Public Service Commission electronically.

The Commission granted the request of LG&E in lieu of producing one copy of these documents in paper medium to file an electronic copy of the same on a physical electronic storage media when filing the remaining portions of their applications in paper medium.[5]

INSTRUCTIONS FOR FILING FERC FORM NOS. 1 and 3-Q

GENERAL INFORMATION

I. Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q)is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

II. Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141.1), and FERC Form 3-Q (18 C.F.R. § 141.400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

(1) one million megawatt hours of total annual sales,
(2) 100 megawatt hours of annual sales for resale,
(3) 500 megawatt hours of annual power exchanges delivered, or
(4) 500 megawatt hours of annual wheeling for others (deliveries plus losses).

III. What and Where to Submit

(a) Submit FERC Forms 1 and 3-Q electronically through the forms submission software. Retain one copy of each report for your files. Any electronic submission must be created by using the forms submission software provided free by the Commission at its web site: http://www.ferc.gov/docs-filing/forms/form-1/elec-subm-soft.asp. The software is used to submit the electronic filing to the Commission via the Internet.

(b) The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q filings.

(c) Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:

Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

(d) For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

a) Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

b) Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

Reference Schedules	Pages
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

e) The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of _____ for the year ended on which we have reported separately under date of ____________ , we have also reviewed schedules ___________________of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases."

The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(f) Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. To further that effort, new selections, "Annual Report to Stockholders," and "CPA Certification Statement" have been added to the dropdown "pick list" from which companies must choose when eFiling. Further instructions are found on the Commission's website at http://www.ferc.gov/help/how-to.asp.

(g) Federal, State and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from http://www.ferc.gov/docs-filing/forms/form-1/form-1.pdf and http://www.ferc.gov/docs-filing/forms.asp#3Q-gas .

IV. When to Submit:

FERC Forms 1 and 3-Q must be filed by the following schedule:

a) FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and

b) FERC Form 3-Q for each calendar quarter must be filed within 60 days after the reporting quarter (18 C.F.R. § 141.400).

V. Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,168 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 168 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

GENERAL INSTRUCTIONS

I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA.

II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

III Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

V. Enter the month, day, and year for all dates. Use customary abbreviations. **The "Date of Report" included in the header of each page is to be completed only for resubmissions** (see VII. below).

VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

VII For any resubmissions, submit the electronic filing using the form submission software only. Please explain the reason for the resubmission in a footnote to the data field.

VIII. Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

IX. Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and" firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and “firm” means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

DEFINITIONS

I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to with:

(3) ’Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinafter defined;

(4) 'Person' means an individual or a corporation;

(5) 'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;

(7) 'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, unitizing, or distributing power; ......

(11) "project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

"Sec. 4. The Commission is hereby authorized and empowered

(a) To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development -costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special* reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the -proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports salt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies*.10

"Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

General Penalties

The Commission may assess up to $1 million per day per violation of its rules and regulations. *See* FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

GENERAL INFORMATION

1. Provide name and title of officer having custody of the general corporate books of account and address of office where the general corporate books are kept, and address of office where any other corporate books of account are kept, if different from that where the general corporate books are kept.

Kent W. Blake, Chief Financial Officer
220 West Main Street
Louisville, KY 40202

2. Provide the name of the State under the laws of which respondent is incorporated, and date of incorporation. If incorporated under a special law, give reference to such law. If not incorporated, state that fact and give the type of organization and the date organized.

Kentucky July 2, 1913

3. If at any time during the year the property of respondent was held by a receiver or trustee, give (a) name of receiver or trustee, (b) date such receiver or trustee took possession, (c) the authority by which the receivership or trusteeship was created, and (d) date when possession by receiver or trustee ceased.

Not Applicable

4. State the classes or utility and other services furnished by respondent during the year in each State in which the respondent operated.

Respondent furnished electric and natural gas services in Metro Louisville and adjacent territory in Kentucky.

5. Have you engaged as the principal accountant to audit your financial statements an accountant who is not the principal accountant for your previous year's certified financial statements?

(1) [ ] Yes...Enter the date when such independent accountant was initially engaged:
(2) [X] No

Name of Respondent	This Report Is:	Date of Report	Year/Period of Report

CONTROL OVER RESPONDENT

1. If any corporation, business trust, or similar organization or a combination of such organizations jointly held control over the repondent at the end of the year, state name of controlling corporation or organization, manner in which control was held, and extent of control. If control was in a holding company organization, show the chain of ownership or control to the main parent company or organization. If control was held by a trustee(s), state name of trustee(s), name of beneficiary or beneficiearies for whom trust was maintained, and purpose of the trust.

Louisville Gas and Electric Company (LG&E) is a wholly-owned subsidiary of LG&E and KU Energy LLC (LKE). LKE is a wholly-owned subsidiary of PPL Corporation (PPL), based in Allentown, PA.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission		End of 2019/Q4

CORPORATIONS CONTROLLED BY RESPONDENT

1. Report below the names of all corporations, business trusts, and similar organizations, controlled directly or indirectly by respondent at any time during the year. If control ceased prior to end of year, give particulars (details) in a footnote.
2. If control was by other means than a direct holding of voting rights, state in a footnote the manner in which control was held, naming any intermediaries involved.
3. If control was held jointly with one or more other interests, state the fact in a footnote and name the other interests.

Definitions
1. See the Uniform System of Accounts for a definition of control.
2. Direct control is that which is exercised without interposition of an intermediary.
3. Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.
4. Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

INFORMATION ON FORMULA RATES
Formula Rate Variances

1. If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1.
2. The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1.
3. The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts.
4. Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

IMPORTANT CHANGES DURING THE QUARTER/YEAR

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.
2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.
3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.
4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.
5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.
7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.
8. State the estimated annual effect and nature of any important wage scale changes during the year.
9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.
10. Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Page 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
11. (Reserved.)
12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.
13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.
14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)

1. None.

2. None.

3. None.

4. None of a material nature.

5. None.

6. LG&E received FERC authorization in FERC Docket No. ES19-51-000 for up to $500 million in the form of money pool debt, commercial paper or any other type of short-term loan through November 30, 2021. LG&E's money pool balance was zero at December 31, 2019 and December 31, 2018. LG&E's commercial paper program limit of $350 million was established on April 30, 2013. As of December 31, 2019 and December 31, 2018, the outstanding commercial paper balance is $238 million and $279 million, respectively.

   LG&E received authorization to issue up to $600 million in long-term debt from the Kentucky Public Service Commission Order, Case No. 2018-00335 on December 3, 2018. In April 2019, LG&E issued $400 million of 4.25% First Mortgage Bonds due 2049. LG&E received proceeds of $396 million, net of discounts and underwriting fees, which were used to repay commercial paper and LG&E's term loan.

   In June 2019, the Louisville/Jefferson County Metro Government of Kentucky remarketed $31 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series A due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.65% through their mandatory purchase date of June 1, 2021.

   In June 2019, the Louisville/Jefferson County Metro Government of Kentucky remarketed $35 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series B due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.65% through their mandatory purchase date of June 1, 2021.

   In June 2019, LG&E issued a notice to bondholders of its intention to convert the $40 million Louisville/Jefferson County Metro Government of Kentucky Pollution Control Revenue Bonds, 2005 Series A to a weekly interest rate, as permitted under the loan documents. The conversion was completed on August 1, 2019. In connection with the conversation, LG&E purchased these bonds from the remarketing agent and held them until September 17, 2019, at which time LG&E remarketed the bonds at a long-term rate that will bear interest at 1.75% through their mandatory purchase date of July 1, 2026.

   LG&E has a revolving credit facility totaling $500 million. The facility was approved by the Kentucky Public Service Commission Order, Case No. 2015-00138 on July 2, 2015. The Kentucky Public Service Commission approved an extension of the credit facility in Case No. 2018-00335 on December 3, 2018. On March 8, 2019, LG&E amended this revolving credit facility to extend the termination date from

Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission		End of 2019/Q4

STATEMENT OF INCOME

Quarterly
1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.
2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
3. Report in column (g) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.
4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.
5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable
5. Do not report fourth quarter data in columns (e) and (f)
6. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility columnin a similar manner to a utility department. Spread the amount(s) over lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.
7. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

Line No.	Title of Account (a)	(Ref.) Page No. (b)	Total Current Year to Date Balance for Quarter/Year (c)	Total Prior Year to Date Balance for Quarter/Year (d)	Current 3 Months Ended Quarterly Only No 4th Quarter (e)	Prior 3 Months Ended Quarterly Only No 4th Quarter (f)

STATEMENT OF INCOME FOR THE YEAR (Continued)

9. Use page 122 for important notes regarding the statement of income for any account thereof.
10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.
11 Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purches, and a summary of the adjustments made to balance sheet, income, and expense accounts.
12. If any notes appearing in the report to stokholders are applicable to the Statement of Income, such notes may be included at page 122.
13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.
15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

STATEMENT OF RETAINED EARNINGS

1. Do not report Lines 49-53 on the quarterly version.
2. Report all changes in appropriated retained earnings, unappropriated retained earnings, year to date, and unappropriated undistributed subsidiary earnings for the year.
3. Each credit and debit during the year should be identified as to the retained earnings account in which recorded (Accounts 433, 436 - 439 inclusive). Show the contra primary account affected in column (b)
4. State the purpose and amount of each reservation or appropriation of retained earnings.
5. List first account 439, Adjustments to Retained Earnings, reflecting adjustments to the opening balance of retained earnings. Follow by credit, then debit items in that order.
6. Show dividends for each class and series of capital stock.
7. Show separately the State and Federal income tax effect of items shown in account 439, Adjustments to Retained Earnings.
8. Explain in a footnote the basis for determining the amount reserved or appropriated. If such reservation or appropriation is to be recurrent, state the number and annual amounts to be reserved or appropriated as well as the totals eventually to be accumulated.
9. If any notes appearing in the report to stockholders are applicable to this statement, include them on pages 122-123.

NOTES TO FINANCIAL STATEMENTS

1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Cormmission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.
7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.
8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred.
9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

PAGE 122 INTENTIONALLY LEFT BLANK
SEE PAGE 123 FOR REQUIRED INFORMATION.

GLOSSARY OF TERMS AND ABBREVIATIONS

KU - Kentucky Utilities Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity, primarily in Kentucky.

LG&E - Louisville Gas and Electric Company, a public utility subsidiary of LKE engaged in the regulated generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky.

LKE - LG&E and KU Energy LLC, a subsidiary of PPL and the parent of LG&E, KU and other subsidiaries.

LKS - LG&E and KU Services Company, a subsidiary of LKE that provides administrative, management and support services primarily to LKE and its subsidiaries.

PPL - PPL Corporation, the parent holding company of LKE and other subsidiaries.

PPL Services - PPL Services Corporation, a subsidiary of PPL that provides administrative, management and support services to PPL and its subsidiaries.

Other terms and abbreviations

401(h) account(s) - a sub-account established within a qualified pension trust to provide for the payment of retiree medical costs.

AFUDC - allowance for funds used during construction. The cost of equity and debt funds used to finance construction projects of regulated businesses, which is capitalized as part of construction costs.

ARO - asset retirement obligation.

CCR(s) - Coal Combustion Residual(s). CCRs include fly ash, bottom ash and sulfur dioxide scrubber wastes.

Clean Air Act - federal legislation enacted to address certain environmental issues related to air emissions, including acid rain, ozone and toxic air emissions.

Clean Water Act - federal legislation enacted to address certain environmental issues relating to water quality including effluent discharges, cooling water intake, and dredge and fill activities.

CPCN - Certificate of Public Convenience and Necessity. Authority granted by the KPSC pursuant to Kentucky Revised Statute 278.020 to provide utility service to or for the public or the construction of certain plant, equipment, property or facility for furnishing of utility service to the public.

DSM - Demand Side Management. Pursuant to Kentucky Revised Statute 278.285, the KPSC may determine the reasonableness of DSM programs proposed by any utility under its jurisdiction. DSM programs consist of energy efficiency programs intended to reduce peak demand and delay the investment in additional power plant construction, provide customers with tools and information regarding their energy usage and support energy efficiency.

ECR - Environmental Cost Recovery. Pursuant to Kentucky Revised Statute 278.183, Kentucky electric utilities are entitled to the current recovery of costs of complying with the Clean Air Act, as amended, and those federal, state or local environmental requirements that apply to coal combustion wastes and by-products from the production of energy from coal.

ELG(s) - Effluent Limitation Guidelines, regulations promulgated by the EPA.

EPA - Environmental Protection Agency, a U.S. government agency.

FERC - Federal Energy Regulatory Commission, the U.S. federal agency that regulates, among other things, interstate transmission and wholesale sales of electricity, hydroelectric power projects and related matters.

GAAP - Generally Accepted Accounting Principles in the U.S.

GHG(s) - greenhouse gas(es).

GLT - gas line tracker. The KPSC approved mechanism for LG&E's recovery of costs associated with gas transmission lines, gas service lines, gas risers, leak mitigation, and gas main replacements.

HB 487 **–** House bill 487, Comprehensive Kentucky state tax legislation enacted on April 27, 2018.

IRS - Internal Revenue Service, a U.S. government agency.

KPSC - Kentucky Public Service Commission, the state agency that has jurisdiction over the regulation of rates and service of utilities in Kentucky.

kWh - kilowatt hour, basic unit of electrical energy.

LG&E 2010 Mortgage Indenture - LG&E's Indenture, dated as of October 1, 2010, to The Bank of New York Mellon, as supplemented.

LIBOR - London Interbank Offered Rate.

MW - megawatt, one thousand kilowatts.

NERC - North American Electric Reliability Corporation.

NPNS - the normal purchases and normal sales exception as permitted by derivative accounting rules. Derivatives that qualify for this exception may receive accrual accounting treatment.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

OVEC - Ohio Valley Electric Corporation, located in Piketon, Ohio, an entity in which LG&E owns a 5.63% interest, which is recorded at cost. OVEC owns and operates two coal-fired power plants, the Kyger Creek plant in Ohio and the Clifty Creek plant in Indiana, with combined capacities of 2,120 MW.

PP&E - property, plant and equipment.

RCRA - Resource Conservation and Recovery Act of 1976.

RFC - ReliabilityFirst Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

Scrubber - an air pollution control device that can remove particulates and/or gases (primarily sulfur dioxide) from exhaust gases.

SEC - the U.S. Securities and Exchange Commission, a U.S. government agency primarily responsible to protect investors and maintain the integrity of the securities markets.

SERC - SERC Reliability Corporation, one of eight regional entities with delegated authority from NERC that work to safeguard the reliability of the bulk power systems throughout North America.

Superfund - federal environmental statute that addresses remediation of contaminated sites; states also have similar statutes.

TCJA - Tax Cuts and Jobs Act. Comprehensive U.S. federal tax legislation enacted on December 22, 2017.

VEBA - Voluntary Employee Benefit Association Trust, accounts for health and welfare plans for future benefit payments for employees, retirees or their beneficiaries.

As permitted by the FERC for the Year Ended December 31, 2019 Form 1, the Notes to Financial Statements set forth below are principally from the Respondent's SEC Form 10-K for the Year Ended December 31, 2019, which was filed with the SEC on February 14, 2020.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

General

Capitalized terms and abbreviations appearing in the notes to financial statements are defined in the glossary. Dollars are in millions unless otherwise noted.

Presentation

The accompanying financial statements are prepared on the regulatory basis of accounting in accordance with the requirements of the FERC, which is a comprehensive basis of accounting other than GAAP. The significant differences between GAAP and FERC reporting are as follows:

Reporting Classifications	FERC reporting	GAAP reporting
Cost of removal obligations	Reported in accumulated depreciation.	Reported in regulatory liabilities.
Certain retirement work in progress amounts	Reported in accumulated depreciation.	Reported in asset retirement obligations.
Certain intangible assets	Reported in utility plant and accumulated depreciation.	Reported in other intangibles.
Debt maturity classification	Reported in total in the long-term debt section.	Reported separately in current liabilities for the short-term portion and in long-term debt for the long-term portion.
Deferred taxes	Reported gross on the Balance Sheet (a deferred asset and a deferred liability are recorded).	Reported as a net asset or net liability.
Income taxes	Income taxes, deferred taxes and investment tax credits are reported on separate lines on the Income Statement.	Income taxes, deferred taxes and investment tax credits are netted on a single line on the Income Statement.
Pension and OPEB non-service costs eligible for capitalization	Reported in PP&E.	Reported as a regulatory asset or regulatory liability.

Reporting Classifications	FERC reporting	GAAP reporting
Regulatory asset maturity classification	Reported in total in deferred debits.	Short-term regulatory assets are reported in current assets and long-term regulatory assets are reported in other noncurrent assets.
Regulatory liability maturity classification	Reported in total in deferred credits.	Short-term regulatory liabilities are reported in current liabilities and long-term regulatory liabilities are reported in deferred credits and other noncurrent liabilities.
Deferred financing costs	Reported as deferred debits.	Reported as contra-liabilities and netted with long-term debt.
Operating lease right of use assets	Reported in PP&E	Reported in other noncurrent assets
Amounts presented within the Balance Sheet and Income Statement	Reported without purchase accounting adjustments.	Reported with purchase accounting adjustments.

Business and Consolidation

LG&E is engaged in the generation, transmission, distribution and sale of electricity and in the distribution and sale of natural gas in Kentucky.

The financial statements of LG&E include accounts as well as the accounts of all entities in which the company has a controlling financial interest. Entities for which a controlling financial interest is not demonstrated through voting interests are evaluated based on accounting guidance for Variable Interest Entities (VIEs). LG&E consolidates a VIE when it is determined to have a controlling interest in the VIE, and as a result is the primary beneficiary of the entity. LG&E is not the primary beneficiary in any significant VIEs. Investments in entities in which a company has the ability to exercise significant influence but does not have a controlling financial interest are accounted for under the equity method. All other investments are carried at cost or fair value. All significant intercompany transactions have been eliminated.

LG&E's financial statements include its share of any undivided interests in jointly owned facilities, as well as its share of the related operating costs of those facilities. See Note 9 for additional information.

Regulation

LG&E is a cost-based rate-regulated utility for which rates are set by regulators to enable LG&E to recover the costs of providing electric or gas service and to provide a reasonable return to its shareholder. Base rates are generally established based on a future test period. As a result, the financial statements are subject to the

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

accounting for certain types of regulation as prescribed by GAAP and reflect the effects of regulatory actions. Regulatory assets are recognized for the effect of transactions or events where future recovery of underlying costs is probable in regulated customer rates. The effect of such accounting is to defer certain or qualifying costs that would otherwise currently be charged to expense. Regulatory liabilities are recognized for amounts expected to be returned through future regulated customer rates. In certain cases, regulatory liabilities are recorded based on an understanding or agreement with the regulator that rates have been set to recover expected future costs, and the regulated entity is accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose. The accounting for regulatory assets and regulatory liabilities is based on specific ratemaking decisions or precedent for each transaction or event as prescribed by the FERC or the applicable state regulatory commissions. See Note 5 for additional details regarding regulatory matters.

Accounting Records

LG&E's system of accounts is maintained in accordance with the Uniform System of Accounts prescribed by the FERC and adopted by the applicable state regulatory commissions.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Loss Accruals

Potential losses are accrued when (1) information is available that indicates it is "probable" that a loss has been incurred, given the likelihood of the uncertain future events and (2) the amount of the loss can be reasonably estimated. Accounting guidance defines "probable" as cases in which "the future event or events are likely to occur." LG&E continuously assesses potential loss contingencies for environmental remediation, litigation claims, regulatory penalties and other events. Loss accruals for environmental remediation are discounted when appropriate.

The accrual of contingencies that might result in gains is not recorded, unless realization is assured.

Price Risk Management

Interest rate contracts are used to hedge exposure to changes in the fair value of debt instruments and to hedge exposure to variability in expected cash flows associated with existing floating-rate debt instruments or forecasted fixed-rate issuances of debt. Similar derivatives may receive different accounting treatment, depending on management's intended use and documentation.

Certain contracts may not meet the definition of a derivative because they lack a notional amount or a net settlement provision. In cases where there is no net settlement provision, markets are periodically assessed to determine whether market mechanisms have evolved to facilitate net settlement. Certain derivative contracts may be excluded from the requirements of derivative accounting treatment because NPNS has been elected. These contracts are accounted for using accrual accounting. Contracts that have been classified as derivative contracts are reflected on the balance sheets at fair value. The portion of derivative positions that deliver within a year are included in "Current Assets" and "Current Liabilities," while the portion of derivative positions that deliver beyond a year are recorded in "Other Noncurrent Assets" and "Deferred Credits and Other Noncurrent Liabilities."

Cash inflows and outflows related to derivative instruments are included as a component of operating, investing or financing activities on the Statements of Cash Flows, depending on the classification of the hedged items.

LG&E has elected not to offset net derivative positions against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

Processes exist that allow for subsequent review and validation of the contract information as it relates to interest rate derivatives. The accounting department provides the treasury department with guidelines on appropriate accounting classifications for various contract types and strategies. Examples of accounting guidelines provided to the treasury department staff include:

- Derivative transactions may be marked to fair value through regulatory assets/liabilities if approved by the appropriate regulatory body. These transactions generally include the effect of interest rate swaps that are included in customer rates.

See Notes 12 and 13 for additional information on derivatives.

Revenue

<u>Revenue Recognition</u>

Operating revenues are recorded based on energy deliveries through the end of the calendar month. Unbilled retail revenues result because customers' bills are rendered throughout the month, rather than bills being rendered at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh by an average rate per customer class. Any difference between estimated and actual revenues is adjusted the following month when the previous unbilled estimate is reversed and actual billings occur.

LG&E's base rates are determined based on cost of service. Some regulators have also authorized the use of additional alternative revenue programs, which enables LG&E to adjust future rates based on past activities or completed events. Revenues from alternative revenue programs are recognized when the specific events permitting future billings have occurred. Revenues from alternative revenue programs are required to be presented separately from revenues from contracts with customers. These amounts are, however, presented as revenues from contracts with customers, with an offsetting adjustment to alternative revenue program revenue, when they are billed to customers in future periods. See Note 2 for additional information.

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Accounts Receivable

Accounts receivable are reported on the Balance Sheets at the gross outstanding amount adjusted for an allowance for doubtful accounts.

Allowance for Doubtful Accounts

Accounts receivable collectability is evaluated using a combination of factors, including past due status based on contractual terms, trends in write-offs and the age of the receivable. Specific events, such as bankruptcies, are also considered when applicable. Adjustments to the allowance for doubtful accounts are made when necessary based on the results of analysis, the aging of receivables and historical and industry trends.

Accounts receivable are written off in the period in which the receivable is deemed uncollectible.

The changes in the allowance for doubtful accounts at December 31 were:

	Balance at Beginning of Period	Additions: Charged to Income	Additions: Charged to Other Accounts	Deductions (a)	Balance at End of Period
2019	$ 1	$ 2	$ 2	$ 4	$ 1
2018	1	4	1	5	1

(a) Primarily related to uncollectible accounts written off.

Cash

Cash Equivalents

All highly liquid investments with original maturities of three months or less are considered to be cash equivalents.

Fair Value Measurements

LG&E values certain financial and nonfinancial assets and liabilities at fair value. Generally, the most significant fair value measurements relate to price risk management assets and liabilities, investments in securities in defined benefit plans, and cash and cash equivalents. LG&E uses, as appropriate, a market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models) and/or a cost approach (generally, replacement cost) to measure the fair value of an asset or liability. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk.

LG&E classifies fair value measurements within one of three levels in the fair value hierarchy. The level assigned to a fair value measurement is based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are as follows:

- **Level 1** - quoted prices (unadjusted) in active markets for identical assets or liabilities that are accessible at the measurement date. Active markets are those in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

- **Level 2** - inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for substantially the full term of the asset or liability.

- **Level 3** - unobservable inputs that management believes are predicated on the assumptions market participants would use to measure the asset or liability at fair value.

Assessing the significance of a particular input requires judgment that considers factors specific to the asset or liability. As such, LG&E’s assessment of the significance of a particular input may affect how the assets and liabilities are classified within the fair value hierarchy.

Investments

Generally, the original maturity date of an investment and management's intent and ability to sell an investment prior to its original maturity determine the classification of investments as either short-term or long-term. Investments that would otherwise be classified as short-term, but are restricted as to withdrawal or use for other than current operations or are clearly designated for expenditure in the acquisition or construction of noncurrent assets or for the liquidation of long-term debts, are classified as long-term.

<u>Short-term Investments</u>

Short-term investments generally include certain deposits as well as securities that are considered highly liquid or provide for periodic reset of interest rates. Investments with original maturities greater than three months and less than a year, as well as investments with original maturities of greater than a year that management has the ability and intent to sell within a year, are included in "Other current assets" on the Balance Sheets.

Long-Lived and Intangible Assets

<u>Property, Plant and Equipment</u>

PP&E is recorded at original cost, unless impaired. If impaired, the asset is written down to fair value at that time, which becomes the new cost basis of the asset. Original cost for constructed assets includes material, labor, contractor costs, certain overheads and financing costs, where applicable. Included in PP&E are

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

capitalized costs of software projects that were developed or obtained for internal use. The cost of repairs and minor replacements are charged to expense as incurred. LG&E records costs associated with planned major maintenance projects in the period in which work is performed and costs are incurred.

LG&E generally does not record AFUDC as a return is provided on construction work in progress.

Depreciation

Depreciation is recorded over the estimated useful lives of property using various methods including the straight-line, composite and group methods. When a component of PP&E that was depreciated under the composite or group method is retired, the original cost is charged to accumulated depreciation. When all or a significant portion of an operating unit that was depreciated under the composite or group method is retired or sold, the property and the related accumulated depreciation account is reduced and any gain or loss is included in income, unless otherwise required by regulators. LG&E accrues costs of removal net of estimated salvage value through depreciation, which is included in the calculation of customer rates over the assets' depreciable lives in accordance with regulatory practices. Cost of removal amounts accrued through depreciation rates are accumulated as a regulatory liability until the removal costs are incurred. For LG&E, all ARO depreciation expenses are reclassified to a regulatory asset. See "Asset Retirement Obligations" below and Note 5 for additional information.

LG&E’s weighted-average rates of depreciation for regulated utility plant were 3.87% and 3.63% for the years ended December 31, 2019 and 2018.

Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price paid over the fair value of the identifiable net assets acquired in a business combination.

Other acquired intangible assets are initially measured based on their fair value. Intangibles that have finite useful lives are amortized over their useful lives based upon the pattern in which the economic benefits of the intangible assets are consumed or otherwise used. Costs incurred to obtain an initial license and renew or extend terms of licenses are capitalized as intangible assets.

When determining the useful life of an intangible asset, including intangible assets that are renewed or extended, LG&E considers:

- the expected use of the asset;
- the expected useful life of other assets to which the useful life of the intangible asset may relate;
- legal, regulatory, or contractual provisions that may limit the useful life;
- the company's historical experience as evidence of its ability to support renewal or extension;
- the effects of obsolescence, demand, competition, and other economic factors; and,
- the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	(Mo, Da, Yr) / /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Asset Impairment (Excluding Investments)

LG&E reviews long-lived assets that are subject to depreciation or amortization, including finite-lived intangibles, for impairment when events or circumstances indicate carrying amounts may not be recoverable.

A long-lived asset classified as held and used is impaired when the carrying amount of the asset exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If impaired, the asset's carrying value is written down to its fair value.

A long-lived asset classified as held for sale is impaired when the carrying amount of the asset (disposal group) exceeds its fair value less cost to sell. If impaired, the asset's (disposal group's) carrying value is written down to its fair value less cost to sell.

LG&E reviews goodwill for impairment at the reporting unit level annually or more frequently when events or circumstances indicate that the carrying amount of a reporting unit may be greater than the unit's fair value. Additionally, goodwill must be tested for impairment in circumstances when a portion of goodwill has been allocated to a business to be disposed. LG&E is a single operating and reporting unit.

LG&E may elect either to initially make a qualitative evaluation about the likelihood of an impairment of goodwill or to bypass the qualitative evaluation and test goodwill for impairment using a two-step quantitative test. If the qualitative evaluation (referred to as "step zero") is elected and the assessment results in a determination that it is not more likely than not that the fair value of a reporting unit is less than the carrying amount, the two-step quantitative impairment test is not necessary. However, the quantitative impairment test is required if management concludes it is more likely than not that the fair value of a reporting unit is less than the carrying amount based on the step zero assessment.

If the carrying amount of the reporting unit, including goodwill, exceeds its fair value, the implied fair value of goodwill must be calculated in the same manner as goodwill in a business combination. The fair value of a reporting unit is allocated to all assets and liabilities of that unit as if the reporting unit had been acquired in a business combination. The excess of the fair value of the reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. If the implied fair value of goodwill is less than the carrying amount, goodwill is written down to its implied fair value.

LG&E qualitatively tested the goodwill of its reporting units for impairment as of the fourth quarter of 2019. No impairment was recognized.

Asset Retirement Obligations

LG&E records liabilities to reflect various legal obligations associated with the retirement of long-lived assets. Initially, this obligation is measured at fair value and offset with an increase in the value of the capitalized asset, which is depreciated over the asset's useful life. Until the obligation is settled, the liability is increased through the recognition of accretion expense classified within “Other operation and maintenance” on the Statements of Income to reflect changes in the obligation due to the passage of time. All ARO accretion and depreciation expenses are reclassified as a regulatory asset. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, at the time of retirement, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

Estimated ARO costs and settlement dates, which affect the carrying value of the ARO and the related capitalized asset, are reviewed periodically to ensure that any material changes are incorporated into the latest estimate of the ARO. Any change to the capitalized asset, positive or negative, is generally amortized over the remaining life of the associated long-lived asset. See Note 5 and Note 15 for additional information on AROs.

Compensation and Benefits

Defined Benefits

LG&E sponsors and participates in various defined benefit pension and other postretirement plans. An asset or liability is recorded to recognize the funded status of all defined benefit plans with an offsetting entry to regulatory assets or liabilities. Consequently, the funded status of all defined benefit plans is fully recognized on the Balance Sheets.

The expected return on plan assets is determined based on a market-related value of plan assets, which is calculated by rolling forward the prior year market-related value with contributions, disbursements and long-term expected return on investments. One-fifth of the difference between the actual value and the expected value is added (or subtracted if negative) to the expected value to determine the new market-related value.

LG&E and LKE use an accelerated amortization method for the recognition of gains and losses for its defined benefit pension plans. Under the accelerated method, actuarial gains and losses in excess of 30% of the plan's projected benefit obligation are amortized on a straight-line basis over one-half of the expected average remaining service of active plan participants. Actuarial gains and losses in excess of 10% of the greater of the plan's projected benefit obligation or the market-related value of plan assets and less than 30% of the plan's projected benefit obligation are amortized on a straight-line basis over the expected average remaining service period of active plan participants.

See Note 5 for a discussion of the regulatory treatment of defined benefit costs and Note 8 for a discussion of defined benefits.

Taxes

Income Taxes

LG&E is included in PPL’s consolidated U.S. federal income tax return.

Significant management judgment is required in developing LG&E’s provision for income taxes, primarily due to the uncertainty related to tax positions taken or expected to be taken in tax returns and valuation allowances on deferred tax assets.
Significant management judgment is also required to determine the amount of benefit to be recognized in

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

relation to an uncertain tax position. LG&E uses a two-step process to evaluate tax positions. The first step requires LG&E to determine whether, based on the technical merits supporting a particular tax position, it is more likely than not (greater than a 50% chance) that the tax position will be sustained. This determination assumes that the relevant taxing authority will examine the tax position and is aware of all the relevant facts surrounding the tax position. The second step requires LG&E to recognize in the financial statements the benefit of a tax position that meets the more-likely-than-not recognition criterion. The benefit recognized is measured at the largest amount of benefit that has a likelihood of realization, upon settlement, that exceeds 50%. Unrecognized tax benefits are classified as current to the extent management expects to settle an uncertain tax position by payment or receipt of cash within one year of the reporting date. The amounts ultimately paid upon resolution of issues raised by taxing authorities may differ materially from the amounts accrued and may materially impact LG&E's financial statements in future periods. At December 31, 2019, no significant changes in unrecognized tax benefits are projected over the next 12 months.

Deferred income taxes reflect the net future tax effects of temporary differences between the carrying amounts of assets and liabilities for accounting purposes and their basis for income tax purposes, as well as the tax effects of net operating losses and tax credit carryforwards.

LG&E records valuation allowances to reduce deferred tax assets to the amounts that are more likely than not to be realized. LG&E considers the reversal of temporary differences, future taxable income and ongoing prudent and feasible tax planning strategies in initially recording and subsequently reevaluating the need for valuation allowances. If LG&E determines that it is able to realize deferred tax assets in the future in excess of recorded net deferred tax assets, adjustments to the valuation allowances increase income by reducing tax expense in the period that such determination is made. Likewise, if LG&E determines that it is not able to realize all or part of net deferred tax assets in the future, adjustments to the valuation allowances would decrease income by increasing tax expense in the period that such determination is made. The amount of deferred tax assets ultimately realized may differ materially from the estimates utilized in the computation of valuation allowance and may materially impact the financial statements in the future.

LG&E defers investment tax credits when the credits are utilized and amortize the deferred amounts over the average lives of the related assets.

LG&E recognizes tax-related interest and penalties in "Income Taxes" on its Statements of Income.

See Note 4 for additional discussion regarding income taxes, including the impact of the TCJA.

LG&E's provision for deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the regulators. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded under GAAP is deferred and included on the Balance Sheets in noncurrent "Regulatory assets" or "Regulatory liabilities."

LG&E's income tax provision is calculated in accordance with an intercompany tax sharing agreement which provides that taxable income be calculated as if LG&E filed a separate return. Tax benefits are not shared between companies. LG&E is only entitled to tax benefits that it generated. The effect of PPL filing a consolidated tax return is taken into account in the settlement of current taxes and the recognition of deferred taxes. LG&E's intercompany tax payable was $4 million at December 31, 2019 and insignificant at December 31, 2018.

Taxes, Other Than Income

LG&E presents sales taxes in "Other current liabilities" on the Balance Sheets. These taxes are not reflected on the Statements of Income. See Note 4 for details on taxes included in "Taxes, other than income" on the Statements of Income.

Other

Leases

LG&E evaluates whether arrangements entered into contain leases for accounting purposes. See Note 7 for additional information.

Fuel, Materials and Supplies

Fuel, natural gas stored underground and materials and supplies are valued using the average cost method. Fuel costs for electric generation are charged to expense as used. Natural gas supply costs are charged to expense as delivered to the distribution system. See Note 5 for further discussion of the fuel adjustment clause and gas supply clause.

"Fuel, materials and supplies" on the Balance Sheets consisted of the following at December 31:

	2019	2018
Fuel	$ 43	$ 42
Natural gas stored underground	35	41
Materials and supplies	44	44
Total	$ 122	$ 127

Guarantees

Generally, the initial measurement of a guarantee liability is the fair value of the guarantee at its inception. However, there are certain guarantees excluded from the scope of accounting guidance and other guarantees that are not subject to the initial recognition and measurement provisions of accounting guidance that only require disclosure. See Note 10 for further discussion of recorded and unrecorded guarantees.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

New Accounting Guidance Adopted

Accounting for Leases

Effective January 1, 2019, LG&E adopted accounting guidance that requires lessees to recognize a right of use asset and lease liability for leases, unless determined to meet the definition of a short-term lease. For income statement purposes, the FASB retained a dual model for lessees, requiring leases to be classified as either operating or finance. Operating leases result in straight-line expense recognition. Currently, LG&E only has operating leases.

Lessor accounting under the new guidance is similar to the current model, but updated to align with certain changes to the lessee model and current revenue recognition guidance. Lessors classify leases as operating, direct financing, or sales-type.

In adopting this new guidance, LG&E elected to use the following practical expedients:

- LG&E did not re-assess the lease classifications or initial direct costs of existing leases. LG&E also did not re-assess existing contracts for leases or lease classification.

- LG&E did not evaluate land easements that were not previously accounted for as leases under this new guidance. New land easements are evaluated under the new guidance beginning January 1, 2019.

See Note 7 for the required disclosures resulting from the adoption of this guidance.

Amounts recorded on the Balance Sheet as of January 1, 2019 as a result of the adoption of this guidance, using a modified retrospective transition method with transition applied as of the beginning of the period of adoption include $23 million of right-of-use assets, $9 million of current lease liabilities and $18 million of noncurrent lease liabilities. Right-of-use assets are recorded in "Other noncurrent assets" on the Balance Sheet, current lease liabilities are recorded in "Other current liabilities" on the Balance Sheet and noncurrent lease liabilities are recorded in "Other deferred credits and noncurrent liabilities" on the Balance Sheet.

Improvements to Accounting for Hedging Activities

Effective January 1, 2019, LG&E adopted accounting guidance, using a modified retrospective approach, which reduces complexity when applying hedge accounting as well as improves the transparency of an entity's risk management activities. This guidance eliminates the separate measurement and reporting of hedge ineffectiveness for cash flow and net investment hedges and provides for the ability to perform subsequent qualitative effectiveness assessments. The guidance also allows entities to apply the short-cut method to partial-term fair value hedges of interest rate risk as well as expands the ability to apply the critical terms match method to cash flow hedges of groups of forecasted transactions.

See Note 13 for the additional disclosures of the income statement impacts of hedging activities required from the adoption of this guidance. Disclosures related to ineffectiveness are no longer required. Other impacts of adopting this guidance were not material.

NOTES TO FINANCIAL STATEMENTS (Continued)

2. Revenue from Contracts with Customers

LG&E generates substantially all of its revenues from contracts with customers primarily from regulated tariff-based sales of electricity and natural gas.

LG&E is engaged in the generation, transmission, distribution and sale of electricity and the distribution and sale of natural gas in Kentucky. Revenue from these activities is generated from tariffs approved by applicable regulatory authorities including the FERC and KPSC. LG&E satisfies its performance obligations upon delivery of electricity and/or natural gas to customers. This revenue is recognized over-time as the customer simultaneously receives and consumes the benefits provided. The amount of revenue recognized is the billed volume of electricity and/or natural gas delivered multiplied by a tariff rate per-unit of energy, plus any applicable fixed charges or additional regulatory mechanisms. Customers are billed monthly and outstanding amounts are typically due within 22 days of the date of the bill. Additionally, unbilled revenues are recognized as a result of customers' bills rendered throughout the month, rather than bills being rendered at the end of the month. Unbilled revenues for a month are calculated by multiplying an estimate of unbilled kWh or Mcf delivered but not yet billed by the estimated average cents per kWh or Mcf. Any difference between estimated and actual revenues is adjusted the following month when the previous unbilled estimate is reversed and actual billings occur. This method of recognition fairly presents the transfer of electricity and/or natural gas to the customer as the amount recognized is based on actual and estimated volumes delivered and the tariff rate per-unit of energy and any applicable fixed charges or regulatory mechanisms as set by the respective regulatory body.

Customers generally have no minimum purchase commitment. Performance obligations are limited to the service requested and received to date. Accordingly, there is no unsatisfied performance obligation associated with these customers.

The following table reconciles "Operating Revenues" included the Statement of Income with revenues generated from contracts with customers for the years ended December 31.

	2019	2018
Operating Revenues	$ 1,500	$ 1,496
Revenues derived from:		
Alternative revenue programs (a)	(10)	12
Other (b)	(9)	(5)
Revenues from Contracts with Customers	$ 1,481	$ 1,503

(a) Alternative revenue programs include the ECR, DSM and GLT programs. This line item shows the over/under collection of these rate mechanisms with over-collections of revenue shown as positive amounts in the table and above and under-collections shown as negative amounts.
(b) Represents additional revenues outside the scope of revenues from contracts with customers such as leases and other miscellaneous revenues.

The following table shows revenues from contracts with customers disaggregated by customer class for the year ended December 31.

	2019	2018
Residential	$ 668	$ 666
Commercial	466	455
Industrial	180	180
Other (a)	121	129
Wholesale - other (b)	46	73
Revenues from Contracts with Customers	$ 1,481	$ 1,503

(a) Primarily includes revenues from pole attachments, street lighting, other public authorities and other non-core business.
(b) Includes wholesale power and transmission revenues.

Contract receivables from customers are primarily included in “Accounts receivable - Customer” and “Unbilled revenues” on the Balance Sheets. Accounts receivable balances of $2 million and $4 million were impaired for the years ended December 31, 2019 and 2018.

Contract liabilities resulting from contracts with customers were $5 million at December 31, 2019 and December 31, 2018. Revenue recognized during the year ended December 31, 2019 that was included in the opening contract liability balance at December 31, 2018 was $5 million.

Contract liabilities resulting from contracts with customers were $5 million and $4 million at December 31, 2018 and December 31, 2017. Revenue recognized during the year ended December 31, 2018 that was included in the opening contract liability balance at December 31, 2017 was $4 million.

Contract liabilities result from recording contractual billings in advance for customer attachments to LG&E’s infrastructure and payments received in excess of revenues earned to date. Advanced billings for customer attachments are recognized as revenue ratably over the billing period. Payments received in excess of revenues earned to date are recognized as revenue as services are delivered in subsequent periods.

3. Preferred Securities

LG&E is authorized to issue up to 1,720,000 shares of preferred stock at a $25 par value and 6,750,000 shares of preferred stock without par value. LG&E had no preferred stock issued or outstanding in 2019 or 2018.

4. Income and Other Taxes

The provision for LG&E's deferred income taxes for regulated assets and liabilities is based upon the ratemaking principles reflected in rates established by the KPSC and the FERC. The difference in the provision for deferred income taxes for regulated assets and liabilities and the amount that otherwise would be recorded

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

under GAAP is deferred and included in "Regulatory assets" or "Regulatory liabilities" on the Balance Sheets.

Significant components of LG&E's deferred income tax assets and liabilities were as follows:

	2019	2018
Deferred Tax Assets		
Contribution in aid of construction	$ 15	$ 14
Regulatory liabilities	19	24
Accrued pension and postretirement costs	6	16
Deferred investment tax credits	8	9
Income taxes due to customers	136	139
State tax credit carryforwards	14	-
Lease liabilities	5	-
Valuation allowances	(14)	-
Other	10	15
Total deferred tax assets	199	217
Deferred Tax Liabilities		
Plant - net	811	751
Regulatory assets	77	88
Lease right-of-use assets	4	-
Other	4	6
Total deferred tax liabilities	896	845
Net deferred tax liability	$ 697	$ 628

At December 31, 2019 LG&E had $14 million of state credit carryforwards that expire in 2028. In 2019, LG&E recorded a $14 million valuation allowance related to state credit carryforwards due to insufficient projected Kentucky taxable income.

NOTES TO FINANCIAL STATEMENTS (Continued)

Details of the components of income tax expense, a reconciliation of federal income taxes derived from statutory tax rates applied to "Income Before Income Taxes" to income taxes for reporting purposes, and details of "Taxes, other than income" were:

	2019	2018
Income Tax Expense (Benefit)		
Current - Federal	$ 4	$ -
Current - State	4	4
Total Current Expense (Benefit)	8	4
Deferred - Federal	46	51
Deferred - State	10	10
Total Deferred Expense, excluding benefits of operating loss carryforwards	56	61
Amortiztion of investment tax credit - Federal	(1)	(1)
Total Tax Expense (Benefit) of Operating Loss Carryforwards	-	-
Total income tax expense (benefit)	$ 63	$ 64
Total income tax expense (benefit) - Federal	$ 49	$ 50
Total income tax expense (benefit) - State	14	14
Total income tax expense (benefit)	$ 63	$ 64

	2019	2018
Reconciliation of Income Taxes		
Federal income tax on Income Before Income Taxes at statutory tax rate (a)	$ 62	$ 62
Increase (decrease) due to:		
State income taxes, net of federal income tax benefit	12	11
Amortization of excess deferred federal and state income taxes (b)	(10)	(8)
Kentucky recycling credit, net of federal income tax expense (c)	(14)	-
Valuation allowance adjustments (c)	14	-
Other	(1)	(1)
Total increase (decrease)	1	2
Total income tax expense (benefit)	$ 63	$ 64
Effective income tax rate	21.4%	21.5%

(a) The U.S. federal corporate tax rate was reduced from 35% to 21%, as enacted by the TCJA, effective January 1, 2018.
(b) In 2019 and 2018, LG&E recorded lower income tax expense for the amortization of excess deferred income taxes that primarily resulted from the U.S. federal corporate income tax rate

reduction from 35% to 21% enacted by the TCJA. This amortization represents each year's refund amount, prior to a tax gross-up, to be paid to customers for previously collected deferred taxes at higher income tax rates.

(c) In 2019, LG&E recorded a deferred income tax benefit associated with two projects placed into service that prepare a generation waste material for reuse and, as a result, qualify for a Kentucky recycling credit. The applicable credit provides tax benefits for a portion of the equipment costs for major recycling projects in Kentucky. This amount has been reserved due to insufficient Kentucky taxable income projected at LG&E.

	2019	2018
Taxes, other than income		
Property and other	$ 39	$ 36
Total	$ 39	$ 36

Unrecognized Tax Benefits

LG&E's income tax provision is calculated in accordance with an intercompany tax sharing agreement, which provides that taxable income be calculated as if LG&E filed a separate return. Based on this tax sharing agreement, LG&E indirectly files tax returns in two major tax jurisdictions. At December 31, 2019, these jurisdictions, as well as the tax years that are no longer subject to examination, were as follows:

U.S. (federal)	2015 and prior
Kentucky (state)	2014 and prior

Tax Cuts and Jobs Act (TCJA)

On December 22, 2017, President Trump signed into law the TCJA. Substantially all of the provisions of the TCJA were effective for taxable years beginning after December 31, 2017. In 2018 PPL completed its assessment of the impact of the TCJA on its 2017 consolidated federal income tax return using guidance issued by the U.S. Treasury Department and the IRS and on its 2017 and 2018 financial statements in accordance with SEC guidance.

NOTES TO FINANCIAL STATEMENTS (Continued)

Regulatory Treatment of the TCJA

On November 15, 2018, the FERC issued a policy statement, Docket No. PL19-2-000, requiring companies to disclose the following items related to the accounting and rate treatment of excess and deficient accumulated deferred income taxes (ADIT) in light of the U.S. federal corporate income tax rate change from 35% to 21%, as enacted by the TCJA. The FERC accounts affected include the following:

- Account 190 - Accumulated deferred income taxes
- Account 282 - Accumulated deferred income taxes – other property
- Account 283 - Accumulated deferred income taxes – other
- Account 254 - Other regulatory liabilities
- Account 410.1 - Provision for deferred income taxes
- Account 411.1 - Provision for deferred income taxes - Cr.

Deferred tax assets and liabilities are measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. Thus, at the date of enactment, LG&E's deferred taxes are remeasured based upon new federal or state corporate income tax rates. The changes in deferred taxes are primarily recorded as an offset to either a regulatory asset or regulatory liability and are reflected in future rates charged to customers. Protected excess ADIT balances are governed by IRS normalization requirements and must be amortized using the Average Rate Assumption Method (ARAM). Unprotected excess ADIT balances are being amortized in accordance with regulatory approvals as discussed below.

For the Kentucky Electric and Gas jurisdictions, unprotected excess ADIT balances resulting from the TCJA were amortized over a 15-year period starting January 1, 2018 per final orders in Case Nos. 2018-00034 and 2018-00294. Additionally, in Case No. 2018-00294, LG&E was approved to use a 15-year amortization period beginning May 1, 2019 for unprotected excess ADIT balances resulting from Kentucky tax reform HB 487.

For the FERC Jurisdiction, LG&E plans to address the amortization of unprotected excess ADIT in future rate filings.

The table below shows the related amounts associated with the reversal and elimination of ADIT balances; the amount of excess and deficient ADIT that is protected and unprotected; the accounts to which the excess or deficient ADIT will be amortized; and the amortization period of the excess and deficient ADIT to be returned or recovered through rates for both protected and unprotected ADIT. Additionally, a reconciliation to Form 1 page 278 – Other Regulatory Liabilities is provided.

	Unamortized Net Excess ADIT as of 12/31/18 (a)	2019 Amortization of Excess ADIT (b)	Unamortized Net Excess ADIT as of 12/31/19

(a) Excess ADIT balances resulting from U.S. federal (TCJA) and Kentucky (HB 487) corporate income tax rate reductions effective January 1, 2018, U.S. federal corporate income tax rate reduction in 1986, and Kentucky corporate income tax rate reductions in 2005 through 2007.
(b) Excess ADIT balances are recorded to account 254 and reversed through accounts 410.1/411.1. See discussion above for amortization periods used for protected and unprotected excess ADIT.

Other

Kentucky State Tax Reform

HB 487, which became law on April 27, 2018, provides for significant changes to the Kentucky tax code including (1) adopting mandatory combined reporting for corporate members of unitary business groups for taxable years beginning on or after January 1, 2019 (members of a unitary business group may make an

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

eight-year binding election to file consolidated corporate income tax returns with all members of their federal affiliated group) and (2) a reduction in the Kentucky corporate income tax rate from 6% to 5% for taxable years beginning after December 31, 2017.

As indicated in Note 1, LG&E's accounting for income taxes is impacted by rate regulation. Therefore, reductions in regulated accumulated deferred income tax balances due to the reduction in the Kentucky corporate income tax rate to 5% under the provisions of HB 487 will result in amounts previously collected from utility customers for these deferred taxes to be refundable to such customers in future periods. In the second quarter of 2018, LG&E recorded the impact of the reduced tax rate, related to the remeasurement of deferred income taxes, as an increase in regulatory liabilities of $16 million. In a separate regulatory proceeding, LG&E has requested to begin returning state excess deferred income taxes to customers in conjunction with the 2018 Kentucky base rate case, which was filed on September 28, 2018. See Note 5 for additional information related to the rate case proceedings.

5. Utility Rate Regulation

Regulatory Assets and Liabilities

LG&E reflects the effects of regulatory actions in the financial statements for its cost-based rate-regulated utility operations. Regulatory assets and liabilities are classified as current if, upon initial recognition, the entire amount related to that item will be recovered or refunded within a year of the balance sheet date.

LG&E is subject to the jurisdiction of the KPSC and FERC.

LG&E's Kentucky base rates are calculated based on a return on capitalization (common equity, long-term debt and short-term debt) including adjustments for certain net investments and costs recovered separately through other means. As such, LG&E generally earns a return on regulatory assets.

NOTES TO FINANCIAL STATEMENTS (Continued)

The following table provides information about the regulatory assets and liabilities of cost-based rate-regulated utility operations at December 31:

	December 31, 2019	December 31, 2018
Current Regulatory Assets:		
Plant outage costs	$ 16	$ 7
Gas supply clause	8	12
Other	1	2
Total current regulatory assets	$ 25	$ 21
Noncurrent Regulatory Assets:		
Defined benefit plans	$ 206	$ 249
Storm costs	14	20
Unamortized loss on debt	14	15
Interest rate swaps	22	20
Terminated interest rate swaps	47	51
AROs	76	75
Other	1	1
Total noncurrent regulatory assets	$ 380	$ 431
Current Regulatory Liabilities:		
Environmental cost recovery	$ 1	$ 6
TCJA customer refund	-	7
Other	1	4
Total current regulatory liabilities	$ 2	$ 17
Noncurrent Regulatory Liabilities:		
Accumulated cost of removal of utility plant	$ 266	$ 279
Power purchase agreement - OVEC	35	41
Net deferred taxes	544	557
Terminated interest rate swaps	34	36
Other	4	2
Total noncurrent regulatory liabilities	$ 883	$ 915

Following is an overview of selected regulatory assets and liabilities detailed in the preceding tables. Specific developments with respect to certain of these regulatory assets and liabilities are discussed in "Regulatory Matters."

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Defined Benefit Plans

Defined benefit plan regulatory assets and liabilities represent prior service costs and net actuarial gains and losses that will be recovered in defined benefit plans expense through future base rates based upon established regulatory practices and, generally, are amortized over the average remaining service lives of plan participants. These regulatory assets and liabilities are adjusted at least annually or whenever the funded status of defined benefit plans is remeasured.

As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between pension cost calculated in accordance with LG&E's pension accounting policy and pension cost calculated using a 15-year amortization period for actuarial gains and losses is recorded as a regulatory asset. As of December 31, 2019 and 2018, the balances were $29 million and $25 million.

Storm Costs

LG&E has the ability to request from the KPSC the authority to treat expenses related to specific extraordinary storms as a regulatory asset and defer such costs for regulatory accounting and reporting purposes. Once such authority is granted, LG&E can request recovery of those expenses in a base rate case and begin amortizing the costs when recovery starts. LG&E’s regulatory assets for storm costs are being amortized through various dates ending in 2029.

Unamortized Loss on Debt

Unamortized loss on reacquired debt represents losses on long-term debt reacquired or redeemed that have been deferred and will be amortized and recovered over either the original life of the extinguished debt or the life of the replacement debt (in the case of refinancing). Such costs are being amortized through 2044.

Accumulated Cost of Removal of Utility Plant

LG&E charges costs of removal through depreciation expense with an offsetting credit to a regulatory liability. The regulatory liability is relieved as costs are incurred.

TCJA Customer Refund

As a result of the reduced U.S. federal corporate income tax rate as enacted by the TCJA, the regulators of LG&E have ruled that these tax benefits should be refunded to customers. In some instances, timing differences occur between the recognition of these tax benefits and the refund of the benefit to the customers which create a regulatory asset or liability.

LG&E distributed these tax savings for Kentucky customers through the TCJA bill credit prior to incorporating them into base rates effective May 1, 2019. See “Regulatory Matters” for additional information.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Net Deferred Taxes

Regulatory liabilities associated with net deferred taxes represent the future revenue impact from the adjustment of deferred income taxes required primarily for excess deferred taxes and unamortized investment tax credits, largely a result of the TCJA enacted in 2017. See Note 4 for additional information on the TCJA.

Environmental Cost Recovery

Kentucky law permits LG&E to recover the costs, including a return of operating expenses and a return of and on capital invested, of complying with the Clean Air Act and those federal, state or local environmental requirements, which apply to coal combustion wastes and by-products from coal-fired electricity generating facilities. The KPSC requires reviews of the past operations of the environmental surcharge for six-month and two-year billing periods to evaluate the related charges, credits and rates of return, as well as to provide for the roll-in of ECR amounts to base rates each two-year period. The KPSC has authorized a return on equity of 9.725% for all existing approved ECR plans and projects. The ECR regulatory asset or liability represents the amount that has been under- or over-recovered due to timing or adjustments to the mechanism and is typically recovered or refunded within 12 months.

Fuel Adjustment Clause

LG&E's retail electric rates contain a fuel adjustment clause, whereby variances in the cost of fuel to generate electricity, including transportation costs, from the costs embedded in base rates are adjusted in LG&E's rates. The KPSC requires public hearings at six-month intervals to examine past fuel adjustments and at two-year intervals to review past operations of the fuel adjustment clause and, to the extent appropriate, reestablish the fuel charge included in base rates. The regulatory assets or liabilities represent the amounts that have been under- or over-recovered due to timing or adjustments to the mechanism and are typically recovered within 12 months. LG&E's fuel adjustment clause asset is included within other current regulatory assets above.

AROs

As discussed in Note 1, all ARO accretion and depreciation expenses are reclassified as a regulatory asset. ARO regulatory assets associated with certain CCR projects are amortized to expense in accordance with regulatory approvals. For other AROs, at the time of retirement, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

Power Purchase Agreement – OVEC

As a result of purchase accounting associated with PPL's acquisition of LKE, the fair value of the OVEC power purchase agreement was recorded on the Balance Sheets with an offset to a regulatory liability. The regulatory liability is being amortized using the units-of-production method until March 2026, the expiration date of the agreement at the date of the acquisition. LG&E's customer rates continue to reflect the original contracts. See Notes 10 and 14 for additional discussion of the power purchase agreement.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Interest Rate Swaps

LG&E’s unrealized gains and losses are recorded as regulatory assets or regulatory liabilities until they are realized as interest expense. Interest expense from existing swaps is realized and recovered over the terms of the associated debt, which matures through 2033.

Terminated Interest Rate Swaps

Net realized gains and losses on all interest rate swaps are probable of recovery through regulated rates. As such, any gains and losses on these derivatives are included in regulatory assets or liabilities and are primarily recognized in "Interest Expense" on the Statements of Income over the life of the associated debt.

Plant Outage Costs

Since July 1, 2017, plant outage costs in Kentucky have been normalized for ratemaking purposes based on an average level of expenses. Plant outage expenses that are greater or less than the average are collected from or returned to customers, through future base rates. Effective May 1, 2019 plant outage costs are normalized based on a five-year average of historical expenses with over or under recoveries collected or returned over an eight-year period.

Gas Supply Clause

LG&E's natural gas rates contain a gas supply clause, whereby the expected cost of natural gas supply and variances between actual and expected costs from prior periods are adjusted quarterly in rates, subject to approval by the KPSC. The gas supply clause also includes a separate natural gas procurement incentive mechanism, which allows rates to be adjusted annually to share savings between the actual cost of gas purchases and market indices with the shareholders and the customers during each performance-based rate year (12 months ending October 31). The regulatory assets or liabilities represent the total amounts that have been under- or over-recovered due to timing or adjustments to the mechanisms and are typically recovered within 18 months.

Regulatory Matters

Rate Case Proceedings

In September 2018, LG&E filed requests with the KPSC for increases in annual base electricity and gas rates of approximately $35 million and $25 million. LG&E's application also sought to include changes associated with the TCJA and state tax reform in the calculation of the proposed base rates and to terminate the TCJA bill credit mechanism when new base rates would go into effect. The elimination of the TCJA bill credit mechanism will result in increases in electricity and gas revenues of approximately $40 million and $12 million. The application was based on a forecasted test year of May 1, 2019 through April 30, 2020 with a requested return-on-equity of 10.42%.

In March 2019, LG&E, along with substantially all intervening parties to the proceeding, filed stipulation and recommendation agreements (stipulations) with the KPSC resolving all material issues with the parties. In

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

addition to terminating the TCJA bill credit mechanism, the proposed stipulations provided for increases in annual base electricity and gas rates of approximately $4 million and $20 million, based on a 9.725% return-on-equity.

On April 30, 2019, the KPSC issued orders ruling on open issues and approving the proposed stipulations filed in March 2019. The orders provide for increases associated with base electricity and gas rates of $2 million and $19 million. With the termination of the TCJA bill credit mechanism, this represents annual revenue increases of $73 million. The new base rates and all elements of the orders became effective on May 1, 2019.

Federal Matters

FERC Transmission Rate Filing

In 2018, LG&E and KU applied to the FERC requesting elimination of certain on-going credits to a sub-set of transmission customers relating to the 1998 merger of LG&E's and KU's parent entities and the 2006 withdrawal of LG&E and KU from the Midcontinent Independent System Operator, Inc. (MISO), a regional transmission operator and energy market. The application seeks termination of LG&E's and KU's commitment to provide certain Kentucky municipalities mitigation for certain horizontal market power concerns arising out of the 1998 LG&E and KU merger and 2006 MISO withdrawal. The amounts at issue are generally waivers or credits granted to a limited number of Kentucky Municipalities for either certain LG&E and KU or MISO transmission charges incurred for transmission service received. Due to the development of robust, accessible energy markets over time, LG&E and KU believe the mitigation commitments are no longer relevant or appropriate. In March 2019, the FERC granted LG&E's and KU's request to remove the on-going credits, conditioned upon the implementation by LG&E and KU of a transition mechanism for certain existing power supply arrangements, subject to FERC review and approval. In July 2019, LG&E and KU proposed their transition mechanism to the FERC and in September 2019, the FERC rejected the proposed transition mechanism and issued a separate order providing clarifications of certain aspects of the March order. In October 2019, LG&E and KU filed requests for rehearing and clarification on the two September orders. These rehearing requests are currently pending before FERC. Additionally, certain petitions for review of FERC's orders have been filed by multiple parties, including LG&E and KU, at the D.C. Circuit Court of Appeals. LG&E and KU cannot predict the outcome of the proceedings. LG&E and KU currently receive recovery of waivers and credits provided through other rate mechanisms.

TCJA Impact on FERC Rates

In November 2019, the FERC published Final Rules providing that public utility transmission providers include mechanisms in their formula rates to deduct excess ADIT from, or add deficient ADIT to, rate base and adjust their income tax allowances by amortized excess or deficient ADIT, and to make a related compliance filing.

In February 2019, in connection with the requirements of the TCJA and Kentucky HB 487, LG&E filed a request with the FERC to amend its transmission formula rates resulting from the laws' reductions to corporate income tax rates. The FERC approved this request effective June 1, 2019. LG&E is currently reviewing the Final Rule and will submit a compliance filing addressing excess ADIT by June 1, 2020. LG&E does not anticipate the impact of the TCJA and Kentucky HB 487 related to its FERC-jurisdictional rates to be significant.

6. Financing Activities

Credit Arrangements and Short-term Debt

LG&E maintains a credit facility to enhance liquidity, provide credit support and provide a backstop to its commercial paper program. The Syndicated Credit Facility is recorded as “Short-term debt” on the Balance Sheets and except for borrowings under the Term Loan Facility which are recorded as “Long-term debt due within one year” on the December 31, 2018 Balance Sheet. The following credit facilities were in place at December 31:

	December 31, 2019			December 31, 2018		
	Syndicated Credit Facility (a) (b)	Term Loan Credit Facility (c)	Total Credit Facilities	Syndicated Credit Facility (a) (b)	Term Loan Credit Facility (c)	Total Credit Facilities
Expiration Date	Jan. 2024			Jan. 2023	Oct. 2019	
Capacity	$ 500	$ -	$ 500	$ 500	$ 200	$ 700
Borrowed	$ -	$ -	$ -	$ -	$ 200	$ 200
Commercial Paper Issuances	$ 238	$ -	$ 238	$ 279	$ -	$ 279
Unused Capacity	$ 262	$ -	$ 262	$ 221	$ -	$ 221

(a) LG&E pays customary fees under its facilities and borrowings generally bear interest at LIBOR-based rates plus an applicable margin.
(b) The facility contains a financial covenant requiring debt to total capitalization not to exceed 70% as calculated in accordance with the facility and other customary covenants. Additionally, as it relates to the syndicated credit facility and subject to certain conditions, LG&E may request up to a $250 million increase in its facility's capacity.
(c) LG&E entered into a $200 million term loan credit agreement in October 2017. All borrowings were repaid and the facility expired in 2019. The outstanding borrowings at December 31, 2018 bore interest at an average rate of 2.97%.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

LG&E maintains a commercial paper program to provide an additional financing source to fund short-term liquidity needs. Commercial paper issuances, included in "Short-term debt" on the Balance Sheets, are supported by LG&E's syndicated credit facility. The following commercial paper program was in place at December 31:

	December 31, 2019	December 31, 2018
Weighted - Average Interest Rate	2.07%	2.94%
Capacity	$ 350	$ 350
Commercial Paper Issuances	$ 238	$ 279
Unused Capacity	$ 112	$ 71

See Note 11 for discussion of intercompany borrowings.

Long-term Debt

	December 31, 2019	December 31, 2018
Term Loan Credit Facility	$ -	$ 200

NOTES TO FINANCIAL STATEMENTS (Continued)

distribution of electricity and the storage and distribution of natural gas. The aggregate carrying value of the property subject to the lien was $5.3 billion and $5.1 billion at December 31, 2019 and 2018.

The first mortgage bonds were issued to the respective trustees of tax-exempt revenue bonds to secure obligations to make payments with respect to each series of bonds. The first mortgage bonds were issued in the same principal amounts, contain payment and redemption provisions that correspond to and bear the same interest rate as such tax-exempt revenue bonds. The related tax-exempt revenue bonds were issued by various governmental entities, principally counties in Kentucky, on behalf of LG&E. The related revenue bond documents allow LG&E to convert the interest rate mode on the bonds from time to time to a commercial paper rate, daily rate, weekly rate, term rate of at least one year or, in some cases, an auction rate or a LIBOR index rate.

At December 31, 2019, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a term rate mode totaled $392 million. At December 31, 2019, the aggregate tax-exempt revenue bonds issued on behalf of LG&E that were in a variable rate mode totaled $148 million. These variable rate tax-exempt revenue bonds are subject to tender for purchase by LG&E at the option of the holder and to mandatory tender for purchase by LG&E upon the occurrence of certain events.

None of the outstanding debt securities noted above have sinking fund requirements. The aggregate maturities of long-term debt, based on stated maturities or earlier put dates, for the periods 2020 through 2024 and thereafter are as follows:

2020	$	-
2021		292
2022		-
2023		-
2024		-
Thereafter		1,732
Total	$	2,024

In April 2019, LG&E issued $400 million of 4.25% First Mortgage Bonds due 2049. LG&E received proceeds of $396 million, net of discounts and underwriting fees, which were used to repay commercial paper and LG&E's term loan.

In April 2019, the County of Jefferson, Kentucky remarketed $128 million of Pollution Control Revenue Bonds, 2001 Series A due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.85% through their mandatory purchase date of April 1, 2021.

In June 2019, the Louisville/Jefferson County Metro Government of Kentucky remarketed $31 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series A due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.65% through their mandatory purchase date of June 1, 2021.

In June 2019, the Louisville/Jefferson County Metro Government of Kentucky remarketed $35 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series B due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.65% through their mandatory purchase date of June 1, 2021.

In June 2019, LG&E issued a notice to bondholders of its intention to convert the $40 million Louisville/Jefferson County Metro Government of Kentucky Pollution Control Revenue Bonds, 2005 Series A to a weekly interest rate, as permitted under the loan documents. The conversion was completed on August 1, 2019. In connection with the conversation, LG&E purchased these bonds from the remarketing agent and held them until September 17, 2019, at which time LG&E remarketed the bonds at a long-term rate that will bear interest at 1.75% through their mandatory purchase date of July 1, 2026.

Legal Separateness

The subsidiaries of PPL are separate legal entities. PPL's subsidiaries are not liable for the debts of PPL. Accordingly, creditors of PPL may not satisfy their debts from the assets of PPL's subsidiaries absent a specific contractual undertaking by a subsidiary to pay PPL's creditors or as required by applicable law or regulation. Similarly, PPL is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of PPL's subsidiaries may not satisfy their debts from the assets of PPL or its other subsidiaries absent a specific contractual undertaking by PPL or its other subsidiaries to pay the creditors or as required by applicable law or regulation.

Similarly, the subsidiaries of LKE are each separate legal entities. These subsidiaries are not liable for the debts of LKE. Accordingly, creditors of LKE may not satisfy their debts from the assets of its subsidiaries absent a specific contractual undertaking by a subsidiary to pay the creditors or as required by applicable law or regulation. Similarly, LKE is not liable for the debts of its subsidiaries, nor are its subsidiaries liable for the debts of one another. Accordingly, creditors of its subsidiaries may not satisfy their debts from the assets of LKE (or its other subsidiaries) absent a specific contractual undertaking by that parent or other subsidiary to pay such creditors or as required by applicable law or regulation.

Distributions and Related Restrictions

LG&E is subject to Section 305(a) of the Federal Power Act, which makes it unlawful for a public utility to make or pay a dividend from any funds "properly included in capital account." The meaning of this limitation has never been clarified under the Federal Power Act. LG&E believes, however, that this statutory restriction, as applied to its circumstances, would not be construed or applied by the FERC to prohibit the payment from retained earnings of dividends that are not excessive and are for lawful and legitimate business purposes. In February 2012, LG&E petitioned the FERC requesting authorization to pay dividends in the future based on retained earnings balances calculated without giving effect to the impact of purchase accounting adjustments for the acquisition of LKE by PPL. In May 2012, the FERC approved the petition with the further condition that LG&E may not pay dividends if such payment would cause its adjusted equity ratio to fall below 30% of total capitalization. Accordingly, at December 31, 2019, net assets of $1.3 billion were restricted for purposes of paying dividends to LKE, and net assets of $1.5 billion were available for payment of dividends to LKE. LG&E believes it will not be required to change its current dividend practice as a result of the foregoing requirement.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Orders from the KPSC require LG&E to obtain prior consent or approval before lending amounts to PPL or LKE.

7. Leases

LG&E determines whether contractual arrangements contain a lease by evaluating whether those arrangements either implicitly or explicitly identify an asset, whether LG&E has the right to obtain substantially all of the economic benefits from use of the asset throughout the term of the arrangement, and whether LG&E has the right to direct the use of the asset. Renewal options are included in the lease term if it is reasonably certain LG&E will exercise those options. Periods for which LG&E is reasonably certain not to exercise termination options are also included in the lease term. LG&E has certain agreements with lease and non-lease components, such as office space leases, which are generally accounted for separately.

LG&E has entered into various operating leases primarily for office space, vehicles and railcars. The leases generally have fixed payments with expiration dates ranging from 2020 to 2025, some of which have options to extend the leases from one year to ten years and some have options to terminate at LG&E's discretion. For leases that existed as of December 31, 2018, payments associated with renewal options are not included in the measurement of the lease liability and right of use (ROU) asset.

Short-term Leases

Short-term leases are leases with a term that is 12 months or less and do not include a purchase option to extend the initial term of the lease to greater than 12 months that LG&E is reasonably certain to exercise. LG&E has made an accounting policy election to not recognize the ROU asset and the lease liability arising from leases classified as short-term. Expenses related to short-term leases are included in the tables below.

Discount Rate

The discount rate for a lease is the rate implicit in the lease unless that rate cannot be readily determined. In that case, LG&E is required to use its incremental borrowing rate, which is the rate LG&E would have to pay to borrow, on a collateralized basis over a similar term, an amount equal to the lease payments in a similar economic environment.

LG&E receives secured borrowing rates from financial institutions based on its applicable credit profile. LG&E uses the secured rate which corresponds with the term of the applicable lease.

Practical Expedients

See Note 2 for information on the adoption of the new lease guidance as well as the practical expedients LG&E has elected as part of the transition.

NOTES TO FINANCIAL STATEMENTS (Continued)

Lessee Transactions

The following table provides the components of lease cost for the LG&E's operating leases for the periods ended December 31, 2019.

		2019
Lease cost:		
Operating lease cost	$	12
Short-term lease cost		1
Total lease cost	$	13

The following table provides other key information related to LG&E's operating leases at December 31, 2019.

Cash paid for amounts included in the measurement of lease liabilities		
Operating cash flows from operating leases	$	9
Right-of-use asset obtained in exchange for new operating lease liabilities	$	5

The following table provides the total future minimum rental payments for operating leases, as well as a reconciliation of these undiscounted cash flows to the lease liabilities recognized on the Balance Sheets as of December 31, 2019.

2020	$	7
2021		5
2022		4
2023		3
2024		2
Thereafter		3
Total	$	24
Weighted-average discount rate		3.89%
Weighted-average remaining lease term (in years)		5
Current lease liabilities (a)	$	6
Non-current lease liabilities (a)	$	15
Right-of-use assets (b)	$	18

(a) Current lease liabilities are included in "Other Current Liabilities" on the Balance Sheets. Non-current lease liabilities are included in "Other deferred credits and noncurrent liabilities"on the Balance Sheets. The difference between the total future minimum lease payments and the recorded lease liabilities is due to the impact of discounting.
(b) Right-of-use assets are included in "Other noncurrent assets" on the Balance Sheets.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

At December 31, 2018, the total future minimum rental payments for all operating leases were estimated to be:

2019	$	10
2020		6
2021		4
2022		3
2023		3
Thereafter		4
Total	$	30

Lessor Transactions

Third parties lease land from LG&E at certain generation plants to produce refined coal used in generation of electricity. The leases are operating leases and expire in 2021. Payments are allocated among lease and non-lease components as stated in the agreements. Lease payments are determined based on the amount of refined coal used in electricity generation at the facility. Payments received are primarily recorded as a regulatory liability and are amortized in accordance with regulatory approvals.

LG&E recognized lease income of $5 million for the year ended December 31, 2019.

8. Retirement and Postemployment Benefits

Defined Benefits

In addition to the plan it sponsors, LG&E is allocated a portion of the funded status and costs of certain defined benefit plans sponsored by LKE. LG&E is also allocated costs of defined benefit plans from LKS for defined benefit plans sponsored by LKE. See Note 11 for additional information on costs allocated to LG&E from LKS. These allocations are based on LG&E's participation in those plans, which management believes are reasonable. LG&E's and LKE's defined benefit pension plans were closed to new salaried and bargaining unit employees hired after December 31, 2005. Employees hired after December 31, 2005 receive additional company contributions above the standard matching contributions to their savings plans. The pension plans sponsored by LKE and LG&E were merged effective January 1, 2020 into the LG&E and KU Pension Plan. The merged plan is sponsored by LKE. LG&E participates in this plan.

The majority of employees are eligible for certain health care and life insurance benefits upon retirement through a contributory plan sponsored by LKE. Postretirement health benefits may be paid from 401(h) accounts established as part of the LG&E and KU Pension Plan within the PPL Services Corporation Master Trust, funded VEBA trusts, and company funds.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The following table provides the components of net periodic defined benefit costs for LG&E's pension benefit plan for the years ended December 31.

		2019		2018
Net periodic defined benefit costs (credits):				
Service cost	$	1	$	1
Interest cost		11		12
Expected return on plan assets		(21)		(22)
Amortization of:				
Prior service cost		5		5
Actuarial loss (a)		9		7
Net periodic defined benefit costs (b)	$	5	$	3
Other Changes in Plan Assets and Benefit Obligations Recognized in Regulatory Assets - Gross:				
Net (gain) loss	$	(19)	$	22
Prior service cost		-		-
Amortization of:				
Prior service credit		(5)		(5)
Actuarial gain		(9)		(7)
Total recognized in regulatory assets		(33)		10
Total recognized in net periodic benefit costs (credits) and regulatory assets	$	(28)	$	13

(a) As a result of the 2014 Kentucky rate case settlement that became effective July 1, 2015, the difference between actuarial (gain)/loss calculated in accordance with LG&E's pension accounting policy and the actuarial (gain)/loss calculated using a 15 year amortization period was $3 million in 2019 and $2 million in 2018.
(b) Due to the amount of lump sum payment distributions from the LG&E qualified pension plan, settlement charges of $5 million in 2019 and $6 million in 2018 were incurred. In accordance with existing regulatory accounting treatment, LG&E has maintained the settlement charge in regulatory assets. The amount will be amortized in accordance with existing regulatory practice.

The net periodic defined benefit costs charged to expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for pension benefits sponsored by LG&E were $3 million in 2019 and $4 million in 2018. Allocations to LG&E for net periodic defined benefit costs charged to operating expense or regulatory assets, excluding amounts charged to construction work in progress and other non-expense accounts, for pension benefits were insignificant in 2019 and $2 million in 2018. Allocations to LG&E for net periodic defined benefit costs charged to operating expense, excluding amounts charged to construction work in progress and other non-expense accounts, for other postretirement benefits were $2 million in 2019 and 2018. These allocated amounts are based on LG&E's participation in those plans, which management believes is reasonable. See Note 11 for additional information on costs allocated to LG&E from LKS.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

For the pension plan sponsored by LG&E and LG&E's portion of the plan sponsored by LKE, of the costs charged to expense or regulatory assets, excluding amounts charged to construction and other non-expense accounts, $2 million and $3 million were recorded as regulatory assets during 2019 and 2018, representing the difference between net periodic defined benefit costs under the pension accounting policy and using a 15 year amortization period for gains and losses.

LG&E uses the base mortality tables issued by the Society of Actuaries in October 2014 (RP-2014 base tables with collar and factor adjustments, where applicable) for its defined benefit pension and LKE's other postretirement benefit plans. In 2017, LG&E updated to the MP-2017 mortality improvement scale from 2006 on a generational basis and continued to use this improvement scale in 2019.

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used in the valuation of the benefit obligations at December 31:

	2019	2018
Discount rate	3.60%	4.33%

For the pension plan sponsored by LG&E, the following weighted-average assumptions were used to determine the net periodic defined benefit costs for the years ended December 31:

	2019	2018
Discount rate	4.33%	3.65%
Expected return on plan assets (a)	7.25%	7.25%

(a) The expected long-term rates of return for pension benefits are based on management's projections using a best-estimate of expected returns, volatilities and correlations for each asset class. The plan's specific current and expected asset allocations are also considered in developing a reasonable return assumption.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The funded status of LG&E's plan at December 31 was as follows:

	2019	2018
Change in Benefit Obligation		
Benefit Obligation, beginning of period	$ 285	$ 326
Service cost	1	1
Interest cost	11	12
Actuarial (gain) loss	25	(24)
Gross benefits paid (a)	(36)	(30)
Benefit Obligation, end of period	$ 286	$ 285
Change in Plan Assets		
Plan assets at fair value, beginning of period	281	325
Actual return on plan assets	64	(24)
Employer contributions	1	10
Gross benefits paid (a)	(36)	(30)
Plan assets at fair value, end of period	310	281
Funded Status, end of period	$ 24	$ (4)
Amounts recognized in the Balance Sheets consist of:		
Noncurrent asset (liability)	24	(4)
Net amount recognized, end of period	$ 24	$ (4)
Amounts recognized in regulatory assets (pre-tax) consists of:		
Prior service cost	$ 17	$ 22
Net actuarial loss	79	107
Total	$ 96	$ 129
Total accumulated benefit obligation for defined benefit	$ 286	$ 285

(a) Gross benefits paid by the plan include lump-sum cash payments made to participants during 2019 and 2018 of $21 million and $16 million in connection with this offering.

LG&E’s pension plan had plan assets in excess of projected and accumulated benefit obligations at December 31, 2019 and December 31, 2018.

Allocations to LG&E for pension benefits resulted in an asset of $7 million at December 31, 2019 and a liability of $7 million at December 31, 2018. Allocations to LG&E for other postretirement benefits resulted in a liability of $63 million and $65 million at December 31, 2019 and 2018.

NOTES TO FINANCIAL STATEMENTS (Continued)

Plan Assets – U.S. Pension Plans

The pension plans sponsored by LKE and LG&E are invested in the PPL Services Corporation Master Trust (the Master Trust) that also includes 401(h) accounts that are restricted for certain other postretirement benefit obligations of PPL and LKE. The investment strategy for the Master Trust is to achieve a risk-adjusted return on a mix of assets that, in combination with LG&E's funding policy, will ensure that sufficient assets are available to provide long-term growth and liquidity for benefit payments, while also managing the duration of the assets to complement the duration of the liabilities. The Master Trust benefits from a wide diversification of asset types, investment fund strategies and external investment fund managers, and therefore has no significant concentration of risk.

The investment policy of the Master Trust outlines investment objectives and defines the responsibilities of the EBPB, external investment managers, investment advisor and trustee and custodian. The investment policy is reviewed annually by PPL's Board of Directors.

The EBPB created a risk management framework around the trust assets and pension liabilities. This framework considers the trust assets as being composed of three sub-portfolios: growth, immunizing and liquidity portfolios. The growth portfolio is comprised of investments that generate a return at a reasonable risk, including equity securities, certain debt securities and alternative investments. The immunizing portfolio consists of debt securities, generally with long durations, and derivative positions. The immunizing portfolio is designed to offset a portion of the change in the pension liabilities due to changes in interest rates. The liquidity portfolio consists primarily of cash and cash equivalents.

Target allocation ranges have been developed for each portfolio based on input from external consultants with a goal of limiting funded status volatility. The EBPB monitors the investments in each portfolio, and seeks to obtain a target portfolio that emphasizes reduction of risk of loss from market volatility. In pursuing that goal, the EBPB establishes revised guidelines from time to time. EBPB investment guidelines as of the end of 2019 are presented below.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The asset allocation for the trust and the target allocation by portfolio at December 31 are as follows:

	Percentage of Trust Assets		2019 Target Asset Allocation (a)
	2019 (a)	**2018**	**Weighted Average**
Growth Portfolio	**57%**	**55%**	**55%**
Equity securities	34%	30%	
Debt securities (b)	14%	15%	
Alternative investments	9%	10%	
Immunizing Portfolio	**42%**	**43%**	**43%**
Debt securities (b)	35%	39%	
Derivatives	7%	4%	
Liquidity Portfolio	**1%**	**2%**	**2%**
Total	100%	100%	100%

(a) Allocations exclude consideration of a group annuity contract held by the plan sponsored by LG&E and KU Retirement Plan.
(b) Includes commingled debt funds, which are treated as debt securities for asset allocation purposes.

LG&E's and LKE's pension plan assets are invested solely in the Master Trust, which is fully disclosed below. The fair value of LG&E's plan's assets of $310 million and $281 million at December 31, 2019 and 2018 represents an interest of approximately 9% in the Master Trust. The fair value of LKE's plans' assets of $1.5 billion and $1.3 billion at December 31, 2019 and 2018 represents an interest of approximately 41% and 42% in the Master Trust.

401(h) accounts restricted for other postretirement benefit obligations	(129)			
Total PPL Services Corporation Master Trust pension assets	$ 3,109			

(a) In accordance with accounting guidance certain investments that are measured at fair value using the net asset value per share (NAV), or its equivalent practical expedient, have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.

(b) Receivables and payables represent amounts for investments sold/purchased but not yet settled along with interest and dividends earned but not yet received.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2019 is as follows:

	Corporate debt	Insurance contracts	Total
Balance at beginning of period	$ 25	$ 21	$ 46
Actual return on plan assets			
Relating to assets still held at the reporting date	(1)	4	3
Relating to assets sold during the period	3	-	3
Purchases, sales and settlements	(7)	(21)	(28)
Balance at end of period	$ 20	$ 4	$ 24

A reconciliation of the Master Trust assets classified as Level 3 at December 31, 2018 is as follows:

	Corporate debt	Insurance contracts	Total
Balance at beginning of period	$ 13	$ 24	$ 37
Actual return on plan assets			
Relating to assets still held at the reporting date	(2)	1	(1)
Relating to assets sold during the period	3	-	3
Purchases, sales and settlements	11	(4)	7
Balance at end of period	$ 25	$ 21	$ 46

The fair value measurements of cash and cash equivalents are based on the amounts on deposit.

The market approach is used to measure fair value of equity securities. The fair value measurements of equity securities (excluding commingled funds), which are generally classified as Level 1, are based on quoted prices in active markets. These securities represent actively and passively managed investments that are managed against various equity indices.

Investments in commingled equity and debt funds are categorized as equity securities. Investments in commingled equity funds include funds that invest in U.S. and international equity securities. Investments in commingled debt funds include funds that invest in a diversified portfolio of emerging market debt obligations, as well as funds that invest in investment grade long-duration fixed-income securities.

The fair value measurements of debt securities are generally based on evaluations that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences. The fair value of debt securities is generally measured using a market approach, including the use of pricing models which incorporate observable inputs. Common inputs include benchmark yields, relevant trade data, broker/dealer bid/ask prices, benchmark securities and credit valuation adjustments. When necessary, the fair value of debt securities is measured using the income approach, which incorporates similar observable inputs as well as payment data, future predicted cash flows, collateral performance and new issue data. For the Master Trust, these securities represent investments in securities issued by U.S. Treasury and U.S. government sponsored agencies; investments securitized by residential mortgages, auto loans, credit cards and other pooled loans; investments in investment grade and non-investment grade bonds issued by U.S. companies across several industries; investments in debt securities issued by foreign governments and corporations.

Investments in real estate represent an investment in a partnership whose purpose is to manage investments in core U.S. real estate properties diversified geographically and across major property types (e.g., office, industrial, retail, etc.). The strategy is focused on properties with high occupancy rates with quality tenants. This results in a focus on high income and stable cash flows with appreciation being a secondary factor. Core real estate generally has a lower degree of leverage when compared with more speculative real estate investing strategies. The partnership has limitations on the amounts that may be redeemed based on available cash to fund redemptions. Additionally, the general partner may decline to accept redemptions when necessary to avoid adverse consequences for the partnership, including legal and tax implications, among others. The fair value of the investment is based upon a partnership unit value.

Investments in private equity represent interests in partnerships in multiple early-stage venture capital funds and private equity fund of funds that use a number of diverse investment strategies. The partnerships have limited lives of at least 10 years, after which liquidating distributions will be received. Prior to the end of each partnership's life, the investment cannot be redeemed with the partnership; however, the interest may be sold to other parties, subject to the general partner's approval. The Master Trust has unfunded commitments of $63 million that may be required during the lives of the partnerships. Fair value is based on an ownership interest in partners' capital to which a proportionate share of net assets is attributed.

Investments in hedge funds represent investments in a fund of hedge funds. Hedge funds seek a return utilizing a number of diverse investment strategies. The strategies, when combined aim to reduce volatility and risk while attempting to deliver positive returns under most market conditions. Major investment strategies for the fund of hedge funds include long/short equity, tactical trading, event driven, and relative value. Shares may be redeemed with 45 days prior written notice. The fund is subject to short term lockups and other restrictions. The fair value for the fund has been estimated using the net asset value per share.

The fair value measurements of derivative instruments utilize various inputs that include quoted prices for similar contracts or market-corroborated inputs. In certain instances, these instruments may be valued using models, including standard option valuation models and standard industry models. These securities primarily represent treasury futures, total return swaps, interest rate swaps and swaptions (the option to enter into an interest rate swap), which are valued based on quoted prices, changes in the value of the underlying exposure or on the swap details, such as swap curves, notional amount, index and term of index, reset frequency, volatility and payer/receiver credit ratings.

In 2018, insurance contracts, classified as Level 3, represent an investment in an immediate participation guaranteed group annuity contract. The fair value is based on contract value, which represents cost plus interest income less distributions for benefit payments and administrative expenses. In 2019, obligations underlying the guaranteed group annuity contract were assumed by the insurance company, with a residual amount remaining in the general account of the insurer that will be paid into the master trust or distributed to participants.

Plan Assets – U.S. Other Postretirement Benefit Plans

The investment strategy with respect to other postretirement benefit obligations is to fund VEBA trusts and/or 401(h) accounts with voluntary contributions and to invest in a tax efficient manner. Excluding the 401(h) accounts included in the Master Trust, other postretirement benefit plans are invested in a mix of assets for long-term growth with an objective of earning returns that provide liquidity as required for benefit payments. These plans benefit from diversification of asset types, investment fund strategies and investment fund managers and, therefore, have no significant concentration of risk. Equity securities include investments in domestic large-cap commingled funds. Ownership interests in commingled funds that invest entirely in debt securities are classified as equity securities, but treated as debt securities for asset allocation and target allocation purposes. Ownership interests in money market funds are treated as cash and cash equivalents for asset allocation and target allocation purposes. The asset allocation for the PPL VEBA trusts, excluding LKE, and the target allocation, by asset class, at December 31 are detailed below.

	Percentage of Plan Assets		2019 Target Asset Allocation
	2019	2018	Weighted Average
Asset Class			
U.S. Equity securities	45%	40%	45%
Debt securities (a)	52%	56%	50%
Cash and cash equivalents (b)	3%	4%	5%
Total	100%	100%	100%

(a) Includes commingled debt funds and debt securities.
(b) Includes money market funds.

LKE's other postretirement benefit plan is invested primarily in a 401(h) account, as disclosed in the PPL Services Corporation Master Trust, with insignificant amounts invested in money market funds within VEBA trusts for liquidity.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The fair value of assets in the U.S. other postretirement benefit plans by asset class and level within the fair value hierarchy was:

	2019			
	Total	Level 1	Level 2	Level 3
Money market funds	$ 6	$ 6	$ -	$ -
U.S. Equity securities:				
Large-cap equity fund measure at NAV (a)	89	-	-	-
Commingled debt measured at NAV (a)	68	-	-	-
Debt securities:				
Corporate bonds	35	-	35	-
Total VEBA trust assets, at fair value	$ 198	$ 6	$ 35	$ -
Receivables and payables, net (b)	-			
401(h) account assets	142			
Total other postretirement benefit plan assets	$ 340			

	2018			
	Total	Level 1	Level 2	Level 3
Money market funds	$ 6	$ 6	$ -	$ -
U.S. Equity securities:				
Large-cap equity fund measure at NAV (a)	69	-	-	-
Commingled debt measured at NAV (a)	68	-	-	-
Debt securities:				
Corporate bonds	28	-	28	-
Total VEBA trust assets, at fair value	$ 171	$ 6	$ 28	$ -
Receivables and payables, net (b)	1			
401(h) account assets	129			
Total other postretirement benefit plan assets	$ 301			

(a) In accordance with accounting guidance certain investments that are measured at fair value using the net asset value per share (NAV), or its equivalent, practical expedient have not been classified in the fair value hierarchy. The fair value amounts presented in the table are intended to permit reconciliation of the fair value hierarchy to the amounts presented in the statement of financial position.
(b) Receivables and payables represent amounts for investments sold/purchased but not yet settled along with interest and dividends earned but not yet received.

Investments in money market funds represent investments in funds that invest primarily in a diversified portfolio of investment grade money market instruments, including, but not limited to, commercial paper, notes, repurchase agreements and other evidences of indebtedness with a maturity not exceeding 13 months from the date of purchase. The primary objective of the fund is a level of current income consistent with stability of principal and liquidity. Redemptions can be made daily on this fund.

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) _ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Investments in large-cap equity securities represent investments in a passively managed equity index fund that invests in securities and a combination of other collective funds. Fair value measurements are not obtained from a quoted price in an active market but are based on firm quotes of net asset values per share as provided by the trustee of the fund. Redemptions can be made daily on this fund.

Investments in commingled debt securities represent investments in a fund that invests in a diversified portfolio of investment grade long-duration fixed income securities. Redemptions can be made daily on these funds.

Investments in corporate bonds represent investment in a diversified portfolio of investment grade long-duration fixed income securities. The fair value of debt securities are generally based on evaluations that reflect observable market information, such as actual trade information for identical securities or for similar securities, adjusted for observable differences.

Expected Cash Flows - Defined Benefit Plans

Effective January 1, 2020, the LKE and LG&E defined benefit pension plans were merged into a combined defined benefit pension plan. The following disclosures relate to the new combined LKE plan.

While LKE’s defined benefit pension plans have the option to utilize available prior year credit balances to meet current and future contribution requirements, LKE contributed $22 million to its pension plan in January 2020. No additional contributions are expected in 2020.

LKE sponsors various non-qualified supplemental pension plans for which no assets are segregated from corporate assets. LKE expects to make $5 million of benefit payments under these plans in 2020.

LKE is not required to make contributions to its other postretirement benefit plan but has historically funded this plan in amounts equal to the postretirement benefit costs recognized. Continuation of this past practice would cause LKE to contribute a projected $14 million to its other postretirement benefit plan in 2020. The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid by the plan and the following federal subsidy payments are expected to be received by LKE.

		Other Postretirement	
	Pension	Benefit Payment	Expected Federal Subsidy
2020	$ 114	$ 14	$ 1
2021	115	15	-
2022	115	15	-
2023	113	15	-
2024	115	15	-
2025 - 2029	545	72	1

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Savings Plans

Substantially all employees of LG&E are eligible to participate in deferred savings plans (401(k)s). Employer contributions to the plans were $6 million in 2019 and 2018.

9. Jointly Owned Facilities

At December 31, 2019 and 2018, the Balance Sheets reflect the owned interests in the facilities listed below.

	Ownership Interest	Electric Plant	Accumulated Depreciation	Construction Work in Progress
2019				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 45	$ 20	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	52	20	-
Trimble County Unit 1	75.00%	440	54	2
Trimble County Unit 2	14.25%	340	43	69
Trimble County Units 5-6	29.00%	32	12	-
Trimble County Units 7-10	37.00%	78	27	-
Cane Run Unit 7	22.00%	119	13	-
E.W. Brown Solar Unit	39.00%	10	2	-
Solar Share	44.00%	1	-	-
2018				
Generating Plants				
E.W. Brown Units 6-7	38.00%	$ 41	$ 20	$ -
Paddy's Run Unit 13 & E.W. Brown Unit 5	53.00%	51	17	-
Trimble County Unit 1	75.00%	427	77	-
Trimble County Unit 2	14.25%	226	39	152
Trimble County Units 5-6	29.00%	32	11	-
Trimble County Units 7-10	37.00%	77	24	-
Cane Run Unit 7	22.00%	119	9	-
E.W. Brown Solar Unit	39.00%	10	1	-

LG&E provides its own funding for its share of each of the above facilities. LG&E receives a portion of the total output of the generating plants equal to its percentage ownership. The share of fuel and other operating costs associated with the plants is included in the corresponding operating expenses on the Statements of Income.

10. Commitments and Contingencies

Energy Purchase Commitments

LG&E enters into purchase contracts to supply the coal and natural gas requirements for generation facilities and retail natural gas supply operations. These contracts include the following commitments:

Contract Type	Maximum Maturity Date
Natural Gas Fuel	2022
Natural Gas Retail Supply	2021
Coal	2024
Coal Transportation and Fleeting Services	2027
Natural Gas Transportation	2026

LG&E has a power purchase agreement with OVEC expiring in June 2040. See "Guarantees and Other Assurances" below for information on the OVEC power purchase contract, including recent developments in credit or debt conditions relating to OVEC. Future obligations for power purchases from OVEC are demand payments, comprised of debt-service payments and contractually-required reimbursements of plant operating, maintenance and other expenses, and are projected as follows:

2020	$	21
2021		21
2022		21
2023		21
2024		22
Thereafter		276
	$	382

LG&E had total energy purchases under the OVEC power purchase agreement of $15 million and $14 million for the years ended December 31, 2019 and 2018.

Legal Matters

LG&E is involved in legal proceedings, claims and litigation in the ordinary course of business and cannot predict the outcome of such matters, or whether such matters may result in material liabilities, unless otherwise noted.

Cane Run Environmental Claims

In December 2013, six residents, on behalf of themselves and others similarly situated, filed a class action complaint against LG&E and PPL in the U.S. District Court for the Western District of Kentucky (U.S. District

Court) alleging violations of the Clean Air Act, RCRA, and common law claims of nuisance, trespass and negligence. In July 2014, the U.S. District Court dismissed the RCRA claims and all but one Clean Air Act claim, but declined to dismiss the common law tort claims. In February 2017, the U.S. District Court dismissed PPL as a defendant and dismissed the final federal claim against LG&E, and in April 2017, issued an Order declining to exercise supplemental jurisdiction on the state law claims dismissing the case in its entirety. In June 2017, the plaintiffs filed a class action complaint in Jefferson County, Kentucky Circuit Court, against LG&E alleging state law nuisance, negligence and trespass tort claims. The plaintiffs seek compensatory and punitive damages for alleged property damage due to purported plant emissions on behalf of a class of residents within one to three miles of the plant. On January 8, 2020, the Jefferson Circuit Court issued an order denying the plaintiffs' request for class certification. On January 14, 2020, the plaintiffs filed a notice of appeal in the Kentucky Court of Appeals. LG&E cannot predict the outcome of this matter and an estimate or range of possible losses cannot be determined.

Air

Sulfuric Acid Mist Emissions

In June 2016, the EPA issued a notice of violation under the Clean Air Act alleging that LG&E violated applicable rules relating to sulfuric acid mist emissions at its Mill Creek plant. The notice alleges failure to install proper controls, failure to operate the facility consistent with good air pollution control practice, and causing emissions exceeding applicable requirements or constituting a nuisance or endangerment. LG&E believes it has complied with applicable regulations during the relevant time period. Discussions between the EPA and LG&E are ongoing. The parties have entered into a tolling agreement with respect to this matter through July 31, 2020. The parties are conducting initial negotiations regarding potential settlement of the matter. LG&E is unable to predict the outcome of this matter or the potential impact on operations of the Mill Creek plant, including increased capital or operating costs, and potential civil penalties or remedial measures, if any.

Water/Waste

ELGs

In 2015, the EPA finalized ELGs for wastewater discharge permits for new and existing steam electricity generating facilities. These guidelines require deployment of additional control technologies providing physical, chemical and biological treatment and mandate operational changes including "no discharge" requirements for certain wastewaters. The implementation date for individual generating stations was to be determined by the states on a case-by-case basis according to criteria provided by the EPA. Legal challenges to the final rule were consolidated before the U.S. Court of Appeals for the Fifth Circuit. In April 2017, the EPA announced that it would grant petitions for reconsideration of the rule. In September 2017, the EPA issued a proposed rule to postpone the compliance date for certain requirements. The EPA expects to complete its reconsideration of best available technology standards by the fall of 2020. Upon completion of the ongoing regulatory proceedings, the rule will be implemented by the states in the course of their normal permitting activities. LG&E is developing compliance strategies and schedules. LG&E is unable to predict the outcome of the EPA's pending reconsideration of the rule or fully estimate compliance costs or timing. Additionally, certain aspects of these

Name of Respondent Louisville Gas and Electric Company	This Report is: (1) X An Original (2) __ A Resubmission	Date of Report (Mo, Da, Yr) / /	Year/Period of Report 2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

compliance plans and estimates relate to developments in state water quality standards, which are separate from the ELG rule or its implementation. Costs to comply with ELGs or other discharge limits are expected to be significant. Certain costs are included in the LG&E's capital plans and are subject to rate recovery.

CCRs

In 2015, the EPA issued a final rule governing management of CCRs which include fly ash, bottom ash and sulfur dioxide scrubber wastes. The CCR Rule imposes extensive new requirements for certain CCR impoundments and landfills, including public notifications, location restrictions, design and operating standards, groundwater monitoring and corrective action requirements, and closure and post-closure care requirements, and specifies restrictions relating to the beneficial use of CCRs. Legal challenges to the final rule are pending before the D.C. Circuit Court of Appeals. In July 2018, the EPA issued a final rule extending the deadline for closure of certain impoundments and adopting other substantive changes. In August 2018, the D.C. Circuit Court of Appeals vacated and remanded portions of the CCR Rule. In December 2019, the EPA addressed the deficiencies identified by the court and proposed amendments to change the closure deadline to August 31, 2020, but allow certain extensions. EPA has announced that additional amendments to the rule are planned. LG&E is unable to predict the outcome of the ongoing litigation and rulemaking or potential impacts on current compliance plans. LG&E is currently finalizing closure plans and schedules.

In January 2017, Kentucky issued a new state rule relating to CCR management, effective May 2017, aimed at reflecting the requirements of the federal CCR rule. As a result of a subsequent legal challenge, in January 2018, the Franklin County, Kentucky Circuit Court issued an opinion invalidating certain procedural elements of the rule. LG&E presently operate its facilities under continuing permits authorized under the former program and do not currently anticipate material impacts as a result of the judicial ruling. The Kentucky Energy and Environmental Cabinet has announced it intends to propose new state rules aimed at addressing procedural deficiencies identified by the court and providing the regulatory framework necessary for operation of the state program in lieu of the federal CCR Rule. Associated costs are expected to be subject to rate recovery.

LG&E received KPSC approval for a compliance plan providing for the closure of impoundments at the E.W. Brown, and Ghent stations, and construction of process water management facilities at those plants. Since 2017, LG&E has commenced closure of many of the subject impoundments and have completed closure of some of their smaller impoundments. LG&E expects to commence closure of the remaining impoundments no later than August 2020. LG&E generally expects to complete impoundment closures within five years of commencement, although a longer period may be required to complete closure of some facilities. Associated costs are expected to be subject to rate recovery.

In connection with the final CCR rule, LG&E recorded adjustments to existing AROs beginning in 2015, and continue to record adjustments as required. See Note 15 for additional information. Further changes to AROs, current capital plans or operating costs may be required as estimates are refined based on closure developments, groundwater monitoring results, and regulatory or legal proceedings. Costs relating to this rule are subject to rate recovery.

Superfund and Other Remediation

LG&E is potentially responsible for investigating and remediating contamination under the federal Superfund program and similar state programs. Actions are under way at certain sites including former coal gas manufacturing plants in Kentucky previously owned or operated by, or currently owned by predecessors or affiliates of, LG&E.

LG&E lacks sufficient information about such additional sites to estimate any potential liability or range of reasonably possible losses, if any, related to these sites. Such costs, however, are not expected to be significant.

The EPA is evaluating the risks associated with polycyclic aromatic hydrocarbons and naphthalene, chemical by-products of coal gas manufacturing. As a result, individual states may establish stricter standards for water quality and soil cleanup, that could require LG&E to take a more extensive assessment and remedial actions at former coal gas manufacturing plants. LG&E cannot estimate a range of possible losses, if any, related to these matters.

Regulatory Issues

See Note 5 for information on regulatory matters related to utility rate regulation.

Electricity - Reliability Standards

The NERC is responsible for establishing and enforcing mandatory reliability standards (Reliability Standards) regarding the bulk electric system in North America. The FERC oversees this process and independently enforces the Reliability Standards.

The Reliability Standards have the force and effect of law and apply to certain users of the bulk electric system, including electric utility companies, generators and marketers. Under the Federal Power Act, the FERC may assess civil penalties for certain violations.

LG&E monitors its compliance with the Reliability Standards and self-reports or self-logs potential violations of applicable reliability requirements whenever identified, and submits accompanying mitigation plans, as required. The resolution of a small number of potential violations is pending. Penalties incurred to date have not been significant. Any Regional Reliability Entity (including RFC or SERC) determination concerning the resolution of violations of the Reliability Standards remains subject to the approval of the NERC and the FERC.

In the course of implementing its programs to ensure compliance with the Reliability Standards, certain other instances of potential non-compliance may be identified from time to time. LG&E cannot predict the outcome of these matters, and an estimate or range of possible losses cannot be determined.

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Other

Guarantees and Other Assurances

In the normal course of business, LG&E enters into agreements that provide financial performance assurance to third parties. Such agreements include, for example, guarantees, stand-by letters of credit issued by financial institutions and surety bonds issued by insurance companies. These agreements are entered into primarily to support or enhance creditworthiness attributed to a subsidiary on a stand-alone basis or to facilitate the commercial activities in which these subsidiaries engage.

Pursuant to the OVEC power purchase contract, LG&E is obligated to pay for its share of OVEC's excess debt service, post-retirement and decommissioning costs, as well as any shortfall from amounts included within a demand charge designed and expected to cover these costs over the term of the contract. LG&E's proportionate share of OVEC's outstanding debt was $76 million at December 31, 2019. The maximum exposure and the expiration date of these potential obligations are not presently determinable. See "Energy Purchase Commitments" above for additional information on the OVEC power purchase contract.

In March 2018, a sponsor with a 4.85% pro-rata share of OVEC obligations filed for bankruptcy under Chapter 11 and, in August 2018, received a rejection order for the OVEC power purchase contract in the bankruptcy proceeding. In October 2019, the bankruptcy court issued an order confirming the sponsor's proposed reorganization plan. OVEC and other entities are challenging the contract rejection, the bankruptcy plan confirmation and potential FERC approval of the plan in various forums, and, in December 2019, an appellate court remanded the contract rejection issue for further proceedings. The plan's effective date remains subject to certain conditions precedent, including FERC regulatory approval, and relevant aspects of the contract rejection and the plan subject to on-going appellate, bankruptcy and regulatory proceedings. OVEC and certain of its sponsors, including LG&E, are analyzing certain potential additional credit support actions to preserve OVEC's access to credit markets or mitigate risks or adverse impacts relating thereto, including increased interest costs, establishing or continuing debt reserve accounts or other changes involving OVEC's existing short and long-term debt. The ultimate outcome of these matters, including the sponsor bankruptcy and related appellate or regulatory proceedings, OVEC structural or financial steps relating thereto and any other potential impact on LG&E's obligations relating to OVEC under the power purchase contract cannot be predicted.

LG&E provides other miscellaneous guarantees through contracts entered into in the normal course of business. These guarantees are primarily in the form of indemnification or warranties related to services or equipment and vary in duration. The amounts of these guarantees often are not explicitly stated, and the overall maximum amount of the obligation under such guarantees cannot be reasonably estimated. Historically, no significant payments have been made with respect to these types of guarantees and the probability of payment/performance under these guarantees is remote.

PPL, on behalf of itself and certain of its subsidiaries, including LG&E, maintains insurance that covers liability assumed under contract for bodily injury and property damage. The coverage provides maximum aggregate coverage of $225 million. This insurance may be applicable to obligations under certain of these contractual arrangements.

Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

11. Related Party Transactions

Wholesale Sales and Purchases

LG&E and KU jointly dispatch their generation units with the lowest cost generation used to serve their retail customers. When LG&E has excess generation capacity after serving its own retail customers and its generation cost is lower than that of KU, KU purchases electricity from LG&E, and vice versa. These transactions are reflected in the Statements of Income as "Electric revenue from affiliate" and "Energy purchases from affiliate" and are recorded at a price equal to the seller's fuel cost plus any split savings. Savings realized from such intercompany transactions are shared equally between both companies. The volume of energy each company has to sell to the other is dependent on its retail customers' needs and its available generation.

Support Costs

LKS provides LG&E with administrative, management and support services. The costs of these services are charged to LG&E as direct support costs. General costs that cannot be directly attributed to a specific LKE subsidiary are allocated and charged to LG&E and other subsidiaries as indirect support costs. LKS bases its indirect allocations on the subsidiaries' number of employees, total assets, revenues, number of customers and/or other statistical information.

LKS charged LG&E $160 million and $151 million for the years ended December 31, 2019 and 2018, including amounts applied to accounts that are further distributed between capital and expense on LG&E’s books, based on methods that are believed to be reasonable.

In addition to the charges for services noted above, LKS makes payments on behalf of LG&E for fuel purchases and other costs for products or services provided by third parties. LG&E and KU also provide services to each other and to LKS. Billings between LG&E and KU relate to labor and overhead costs associated with union and hourly employees performing work for the other company, charges related to jointly owned generating units and other miscellaneous charges. Tax settlements between LKE and LG&E are reimbursed through LKS.

Intercompany Borrowings

LG&E participates in an intercompany money pool agreement whereby LKE and/or KU make available to LG&E funds up to $500 million at an interest rate based on a market index of commercial paper issues. No balances were outstanding at December 31, 2019 and 2018.

Other

See Note 1 for a discussion regarding the intercompany tax sharing agreement. See Note 8 for discussions regarding intercompany allocations associated with defined benefits.

12. Fair Value Measurements

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). A market approach (generally, data from market transactions), an income approach (generally, present value techniques and option-pricing models), and/or a cost approach (generally, replacement cost) are used to measure the fair value of an asset or liability, as appropriate. These valuation approaches incorporate inputs such as observable, independent market data and/or unobservable data that management believes are predicated on the assumptions market participants would use to price an asset or liability. These inputs may incorporate, as applicable, certain risks such as nonperformance risk, which includes credit risk. The fair value of a group of financial assets and liabilities is measured on a net basis. See Note 1 for information on the levels in the fair value hierarchy.

Recurring Fair Value Measurements

The assets and liabilities measured at fair value were:

	December 31, 2019			
	Total	Level 1	Level 2	Level 3
Assets				
Cash and cash equivalents	$ 15	$ 15	$ -	$ -

Price Risk Management Assets/Liabilities - Interest Rate Swaps

To manage interest rate risk, LG&E uses interest rate contracts such as forward-starting swaps and floating-to-fixed swaps. An income approach is used to measure the fair value of these contracts, utilizing readily observable inputs, such as forward interest rates (e.g., LIBOR and government security rates), as well as inputs that may not be observable, such as credit valuation adjustments. In certain cases, market information cannot practicably be obtained to value credit risk and therefore internal models are relied upon. These models use projected probabilities of default and estimated recovery rates based on historical observances. When the credit valuation adjustment is significant to the overall valuation, the contracts are classified as Level 3.

Financial Instruments Not Recorded at Fair Value

The carrying amounts of long-term debt on the Balance Sheets and their estimated fair values are set forth below. Long-term debt is classified as Level 2. The effect of third-party credit enhancements is not included in the fair value measurement.

December 31, 2019		December 31, 2018	
Carrying Amount (a)	Fair Value	Carrying Amount (a)	Fair Value
$ 2,005	$ 2,278	$ 1,809	$ 1,874

(a) Amount is net of debt issuance costs.

The carrying amounts of other current financial instruments (except for long-term debt due within one year) approximate their fair values because of their short-term nature.

13. Derivative Instruments and Hedging Activities

Risk Management Objectives

PPL has a risk management policy approved by the Board of Directors to manage market risk associated with commodities and interest rates on debt issuances (including price, liquidity and volumetric risk), and credit risk (including non-performance risk and payment default risk). The Risk Management Committee, comprised of senior management and chaired by the Senior Director - Risk Management, oversees the risk management function. Key risk control activities designed to ensure compliance with the risk policy and detailed programs include, but are not limited to, credit review and approval, validation of transactions, verification of risk and transaction limits and the coordination and reporting of the Enterprise Risk Management program.

Market Risk

Market risk includes the potential loss that may be incurred as a result of price changes associated with a particular financial or commodity instrument as well as market liquidity and volumetric risks. Forward contracts and swaps are utilized as part of risk management strategies to minimize unanticipated fluctuations in earnings caused by changes in commodity prices and interest rates. Many of these contracts meet the definition of a derivative. All derivatives are recognized on the Balance Sheets at their fair value, unless NPNS is elected.

The following summarizes the market risks that affect LG&E.

Interest rate risk

- LG&E is exposed to interest rate risk associated with forecasted fixed-rate and existing floating-rate debt issuances. LG&E utilizes over-the-counter interest rate swaps to limit exposure to market fluctuations on floating-rate debt, and utilizes forward starting interest rate swaps to hedge changes in benchmark interest rates, when appropriate, in connection with future debt issuances.

- LG&E is exposed to interest rate risk associated with debt securities and derivatives held by defined benefit plans. This risk is significantly mitigated to the extent that the plans are sponsored at or sponsored on behalf of LG&E due to the recovery methods in place.

Commodity price risk

- LG&E's rates include a mechanism for fuel, fuel-related expenses and energy purchases. In addition, LG&E's rates include a mechanism for natural gas supply expenses. These mechanisms generally provide for timely recovery of market price fluctuations associated with these expenses.

Volumetric risk

- LG&E is exposed to volumetric risk on retail sales, mainly due to weather and other economic conditions for which there is limited mitigation between rate cases.

Equity securities price risk

- LG&E is exposed to equity securities price risk associated with the fair value of the defined benefit plans' assets. This risk is significantly mitigated due to the recovery methods in place.

Credit Risk

Credit risk is the potential loss that may be incurred due to a counterparty's non-performance.

In the event a supplier of LG&E defaults on its obligation, LG&E would be required to seek replacement power or replacement fuel in the market. In general, subject to regulatory review or other processes, appropriate incremental costs incurred by LG&E would be recoverable from customers through applicable rate mechanisms, thereby mitigating its financial risk.

LG&E has credit policies in place to manage credit risk, including the use of an established credit approval process, daily monitoring of counterparty positions and the use of master netting agreements or provisions. These agreements generally include credit mitigation provisions, such as margin, prepayment or collateral requirements. LG&E may request additional credit assurance, in certain circumstances, in the event that the counterparties' credit ratings fall below investment grade, their tangible net worth falls below specified percentages or their exposures exceed an established credit limit.

Master Netting Arrangements

Net derivative positions on the balance sheets are not offset against the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable) under master netting arrangements.

LG&E had no obligation to return cash collateral under master netting arrangements at December 31, 2019 and 2018.

LG&E had no cash collateral posted under master netting arrangements at December 31, 2019 and 2018.

See “Offsetting Derivative Instruments” below for a summary of derivative positions presented in the balance sheets where a right of setoff exists under these arrangements.

Interest Rate Risk

LG&E issues debt to finance its operations, which exposes it to interest rate risk. A variety of financial derivative instruments are utilized to adjust the mix of fixed and floating interest rates in its debt portfolios, adjust the duration of the debt portfolios and lock in benchmark interest rates in anticipation of future financing, when appropriate. Risk limits under LG&E’s risk management program are designed to balance risk exposure to volatility in interest expense and changes in the fair value of the debt portfolio due to changes in benchmark interest rates. In addition, LG&E’s interest rate risk is potentially mitigated as a result of the existing regulatory framework or the timing of rate cases.

Economic Activity

LG&E enters into interest rate swap contracts that economically hedge interest payments on variable rate debt. Because realized gains and losses from the swaps, including terminated swap contracts, are recoverable through regulated rates, any subsequent changes in fair value of these derivatives are included in regulatory assets or liabilities until they are realized as interest expense. Realized gains and losses are recognized in “Interest Expense” on the Statements of Income at the time the underlying hedged interest expense is recorded. At December 31, 2019, LG&E held contracts with a notional amount of $147 million that range in maturity through 2033.

Accounting and Reporting

All derivative instruments are recorded at fair value on the Balance Sheets as an asset or liability unless NPNS is elected. NPNS contracts include physical purchase contracts. Changes in the fair value of derivatives not designated as NPNS are recognized in earnings unless specific hedge accounting criteria are met and designated as such, except for the changes in fair values of LG&E’s interest rate swaps that are recognized as regulatory assets or regulatory liabilities. See Note 5 for amounts recorded in regulatory assets and regulatory liabilities at December 31, 2019 and 2018.

See Note 1 for additional information on accounting policies related to derivative instruments.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

The following table presents the fair value and the location on the Balance Sheets of derivatives not designated as hedging instruments.

	December 31, 2019		December 31, 2018	
	Assets	Liabilities	Assets	Liabilities
Current:				
Price Risk Management Assets/Liabilities:				
Interest rate swaps	$ -	$ 4	$ -	$ 4
Total current	-	4	-	4
Noncurrent:				
Price Risk Management Assets/Liabilities:				
Interest rate swaps	-	17	-	16
Total noncurrent	-	17	-	16
Total derivatives	$ -	$ 21	$ -	$ 20

The following tables present the pre-tax effect of derivatives not designated as cash flow hedges that are recognized in income or regulatory assets.

Derivative Instruments	Location of Gain (Loss) Recognized in Income on Derivatives	2019	2018
Interest rate swaps	Interest expense	$ (5)	$ (5)

Derivative Instruments	Location of Gain (Loss) Recognized in Regulatory Assets	2019	2018
Interest rate swaps	Regulatory assets - noncurrent	$ (1)	$ 6

Offsetting Derivative Instruments

LG&E has master netting arrangements in place and also enters into agreements pursuant to which it purchases or sells certain energy and other products. Under the agreements, upon termination of the agreement as a result of a default or other termination event, the non-defaulting party typically would have a right to set off amounts owed under the agreement against any other obligations arising between the two parties (whether under the agreement or not), whether matured or contingent and irrespective of the currency, place of payment or place of booking of the obligation.

LG&E has elected not to offset derivative assets and liabilities and not to offset net derivative positions against the right to reclaim cash collateral pledged (an asset) or the obligation to return cash collateral received (a

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report

NOTES TO FINANCIAL STATEMENTS (Continued)

liability) under derivatives agreements. The table below summarizes the derivative positions presented in the balance sheets where a right of setoff exists under these arrangements and related cash collateral received or pledged as of December 31.

	Liabilities	
	December 31, 2019	December 31, 2018
Gross	$ 21	$ 20
Eligible for Offset		
Derivative Instruments	-	-
Cash Collateral Pledged	-	-
Net	$ 21	$ 20

Credit Risk-Related Contingent Features

Certain derivative contracts contain credit risk-related contingent features which, when in a net liability position, would permit the counterparties to require the transfer of additional collateral upon a decrease in LG&E's credit ratings. Most of these features would require the transfer of additional collateral or permit the counterparty to terminate the contract if the applicable credit rating were to fall below investment grade. Some of these features also would allow the counterparty to require additional collateral upon each downgrade in credit rating at levels that remain above investment grade. In either case, if the applicable credit rating were to fall below investment grade, most of these credit contingent features require either immediate payment of the net liability as a termination payment or immediate and ongoing full collateralization on derivative instruments in net liability positions.

Additionally, certain derivative contracts contain credit risk-related contingent features that require adequate assurance of performance be provided if the other party has reasonable concerns regarding LG&E's performance obligations under the contracts. A counterparty demanding adequate assurance could require a transfer of additional collateral or other security, including letters of credit, cash and guarantees from a creditworthy entity. This would typically involve negotiations among the parties. However, amounts disclosed below represent assumed immediate payment or immediate and ongoing full collateralization for derivative instruments in net liability positions with "adequate assurance" features.

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

At December 31, 2019, derivative contracts in a net liability position that contain credit risk-related contingent features, collateral posted on those positions and the related effect of a decrease in credit ratings below investment grade are summarized as follows:

Aggregate fair value of derivative instruments in a net liability position with credit risk-related contingent features	$	3
Aggregate fair value of collateral posted on these derivative instruments		-
Aggregate fair value of additional collateral requirements in the event of a credit downgrade below investment grade (a)		3

(a) Includes the effect of net receivables and payables already recorded on the Balance Sheet.

14. Other Intangible Assets

The gross carrying amount and the accumulated amortization of other intangible assets at December 31 were:

	2019		2018	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Subject to amortization:				
Land rights and easements	7	1	7	1
OVEC power purchase agreement (a)	86	51	87	46
Total subject to amortization	$ 93	$ 52	$ 94	$ 47

(a) Gross carrying amount represents the fair value at the acquisition date of the OVEC power purchase contract recognized as a result of the 2010 acquisition by PPL. An offsetting regulatory liability was recorded related to this contract, which is being amortized over the same period as the intangible asset, eliminating any income statement impact. See Note 5 for additional information.

Long-term intangible assets are presented as "Other intangibles" on the Balance Sheets.

Amortization expense was as follows:

	2019	2018
Intangible assets with regulatory offset	$ 6	$ 6

Name of Respondent	This Report is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) _ A Resubmission	/ /	2019/Q4

NOTES TO FINANCIAL STATEMENTS (Continued)

Amortization expense for each of the next five years is estimated to be:

	Intangible assets with regulatory offset
2020	$ 6
2021	6
2022	6
2023	6
2024	6

15. Asset Retirement Obligations

LG&E's ARO liabilities are primarily related to CCR closure costs. See Note 10 for information on the CCR rule. LG&E also has AROs related to natural gas mains and wells. LG&E's transmission and distribution lines largely operate under perpetual property easement agreements which do not generally require restoration upon removal of the property. Therefore, no material AROs are recorded for transmission and distribution assets. For LG&E, all ARO accretion and depreciation expenses are reclassified as a regulatory asset. For other AROs, at the time of retirement, the related ARO regulatory asset is offset against the associated cost of removal regulatory liability, PP&E and ARO liability.

The changes in the carrying amounts of AROs were as follows.

	2019	2018
ARO at beginning of period	$ 103	$ 121
Accretion	6	6
Changes in estimated timing or cost	(2)	(2)
Obligations settled	(34)	(22)
ARO at end of period	$ 73	$ 103

16. New Accounting Guidance Pending Adoption

Accounting for Financial Instrument Credit Losses

In June 2016, the FASB issued accounting guidance that requires the use of a current expected credit loss (CECL) model for the measurement of credit losses on financial instruments within the scope of this guidance, which includes accounts receivable. The CECL model requires an entity to measure credit losses using historical information, current information and reasonable and supportable forecasts of future events, rather than the incurred loss impairment model required under current GAAP.

LG&E adopted the guidance using a modified retrospective through a cumulative-effect adjustment to retained earnings on January 1, 2020. The adoption of this guidance did not have a significant impact on LG&E.

Accounting for Implementation Costs in a Cloud Computing Service Arrangement

In August 2018, the FASB issued accounting guidance that requires a customer in a cloud computing hosting arrangement that is a service contract to capitalize implementation costs consistent with internal-use software guidance for non-service arrangements. Prior guidance had not addressed these implementation costs. The guidance requires these capitalized implementation costs to be amortized over the term of the hosting arrangement to the statement of income line item where the service arrangement costs are recorded. The guidance also prescribes the financial statement classification of the capitalized implementation costs and cash flows associated with the arrangement. Additional quantitative and qualitative disclosures are also required.

LG&E adopted this guidance prospectively effective January 1, 2020. The adoption of this guidance did not have a significant impact on LG&E.

Simplifying the Test for Goodwill Impairment

In January 2017, the FASB issued accounting guidance that simplifies the test for goodwill impairment by eliminating the second step of the quantitative test. The second step of the quantitative test requires a calculation of the implied fair value of goodwill, which is determined in the same manner as the amount of goodwill in a business combination. Under this new guidance, an entity will now compare the estimated fair value of a reporting unit with its carrying value and recognize an impairment charge for the amount the carrying amount exceeds the fair value of the reporting unit.

LG&E adopted this guidance on January 1, 2020. The adoption of this guidance did not have a significant impact on LG&E.

17. Notes to Statement of Cash Flows

	December 31, 2019	December 31, 2018
Cash paid (received) during the period for:		
Income taxes	$ 2	$ 7
Interest	77	71
Significant noncash transactions:		
Accrued expenditures for property, plant and equipment	59	61

18. Subsequent Events

Management has evaluated the impact of events occurring after December 31, 2019 up to February 14, 2020, the date that LG&E's U.S. GAAP financial statements were issued and has updated such evaluation for disclosure purposes through March 25, 2020. These financial statements include all necessary adjustments and disclosures resulting from these evaluations.

STATEMENTS OF ACCUMULATED COMPREHENSIVE INCOME, COMPREHENSIVE INCOME, AND HEDGING ACTIVITIES

1. Report in columns (b),(c),(d) and (e) the amounts of accumulated other comprehensive income items, on a net-of-tax basis, where appropriate.
2. Report in columns (f) and (g) the amounts of other categories of other cash flow hedges.
3. For each category of hedges that have been accounted for as "fair value hedges", report the accounts affected and the related amounts in a footnote.
4. Report data on a year-to-date basis.

ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106) (Continued)

distributions of these tentative classifications in columns (c) and (d), including the reversals of the prior years tentative account distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.

7. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.

8. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.

9. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date

ELECTRIC PLANT HELD FOR FUTURE USE (Account 105)

1. Report separately each property held for future use at end of the year having an original cost of $250,000 or more. Group other items of property held for future use.
2. For property having an original cost of $250,000 or more previously used in utility operations, now held for future use, give in column (a), in addition to other required information, the date that utility use of such property was discontinued, and the date the original cost was transferred to Account 105.

ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

1. Explain in a footnote any important adjustments during year.
2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 11, column (c), and that reported for electric plant in service, pages 204-207, column 9d), excluding retirements of non-depreciable property.
3. The provisions of Account 108 in the Uniform System of accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

Section A. Balances and Changes During Year

Transmission Service and Generation Interconnection Study Costs

1. Report the particulars (details) called for concerning the costs incurred and the reimbursements received for performing transmission service and generator interconnection studies.
2. List each study separately.
3. In column (a) provide the name of the study.
4. In column (b) report the cost incurred to perform the study at the end of period.
5. In column (c) report the account charged with the cost of the study.
6. In column (d) report the amounts received for reimbursement of the study costs at end of period.
7. In column (e) report the account credited with the reimbursement received for performing the study.

CAPITAL STOCKS (Account 201 and 204)

1. Report below the particulars (details) called for concerning common and preferred stock at end of year, distinguishing separate series of any general class. Show separate totals for common and preferred stock. If information to meet the stock exchange reporting requirement outlined in column (a) is available from the SEC 10-K Report Form filing, a specific reference to report form (i.e., year and company title) may be reported in column (a) provided the fiscal years for both the 10-K report and this report are compatible.
2. Entries in column (b) should represent the number of shares authorized by the articles of incorporation as amended to end of year.

CAPITAL STOCKS (Account 201 and 204) (Continued)

3. Give particulars (details) concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.
4. The identification of each class of preferred stock should show the dividend rate and whether the dividends are cumulative or non-cumulative.
5. State in a footnote if any capital stock which has been nominally issued is nominally outstanding at end of year.
Give particulars (details) in column (a) of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledgee and purposes of pledge.

OTHER PAID-IN CAPITAL (Accounts 208-211, inc.)

Report below the balance at the end of the year and the information specified below for the respective other paid-in capital accounts. Provide a subheading for each account and show a total for the account, as well as total of all accounts for reconciliation with balance sheet, Page 112. Add more columns for any account if deemed necessary. Explain changes made in any account during the year and give the accounting entries effecting such change.

(a) Donations Received from Stockholders (Account 208)-State amount and give brief explanation of the origin and purpose of each donation.
(b) Reduction in Par or Stated value of Capital Stock (Account 209): State amount and give brief explanation of the capital change which gave rise to amounts reported under this caption including identification with the class and series of stock to which related.
(c) Gain on Resale or Cancellation of Reacquired Capital Stock (Account 210): Report balance at beginning of year, credits, debits, and balance at end of year with a designation of the nature of each credit and debit identified by the class and series of stock to which related.
(d) Miscellaneous Paid-in Capital (Account 211)-Classify amounts included in this account according to captions which, together with brief explanations, disclose the general nature of the transactions which gave rise to the reported amounts.

LONG-TERM DEBT (Account 221, 222, 223 and 224)

1. Report by balance sheet account the particulars (details) concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other long-Term Debt.
2. In column (a), for new issues, give Commission authorization numbers and dates.
3. For bonds assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds.
4. For advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received.
5. For receivers, certificates, show in column (a) the name of the court -and date of court order under which such certificates were issued.
6. In column (b) show the principal amount of bonds or other long-term debt originally issued.
7. In column (c) show the expense, premium or discount with respect to the amount of bonds or other long-term debt originally issued.
8. For column (c) the total expenses should be listed first for each issuance, then the amount of premium (in parentheses) or discount. Indicate the premium or discount with a notation, such as (P) or (D). The expenses, premium or discount should not be netted.
9. Furnish in a footnote particulars (details) regarding the treatment of unamortized debt expense, premium or discount associated with issues redeemed during the year. Also, give in a footnote the date of the Commission's authorization of treatment other than as specified by the Uniform System of Accounts.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

FOOTNOTE DATA

Schedule Page: 256 Line No.: 1 Column: a

Per instruction 9 concerning the treatment of unamortized debt expense, premium or discount, original debt premiums and expenses are being amortized over the lives of the related issues and remarketing expenses are being amortized through the put dates of the remarketed bonds.

Schedule Page: 256 Line No.: 2 Column: a

Pollution control series bonds are obligations of LG&E, issued in connection with tax-exempt pollution control revenue bonds issued by various governmental entities, principally counties in Kentucky. A loan agreement obligates LG&E to make debt service payments to the county that equate to the debt service due from the county on the related pollution control revenue bonds.

Schedule Page: 256 Line No.: 14 Column: a

As of December 31, 2019, the company had in effect three interest-rate swap agreements to hedge its exposure to tax exempt rates related to Pollution Control Bonds, Variable Rate Series. The Company's position under the swap agreements are to pay a fixed rate and receive a variable rate based on the Securities Industry and Financial Markets Association (SIFMA) Index or London Interbank Offered Rate (LIBOR). The specifics for each swap agreement related to notional amounts, maturity dates, payable and receivable positions are as follows:

Notional Amount	Maturity	Payable	Receivable
$83,335,000	11/01/2020	Fixed 5.495%	SIFMA Index
$32,000,000	10/01/2033	Fixed 3.657%	68% of 1 mo LIBOR
$32,000,000	10/01/2033	Fixed 3.645%	68% of 1 mo LIBOR

Schedule Page: 256 Line No.: 25 Column: a

By Order in Case No. 2018-00335 issued on December 3, 2018, LG&E was authorized by the KPSC to issue long-term debt in the form of First Mortgage Bonds in a principal amount not to exceed $600 million and enter into interest rate hedging agreements to lock in interest rates for debt to be issued in 2019. Debt was issued on April 1, 2019, totaling $400 million in 30-year First Mortgage Bonds.

Schedule Page: 256.1 Line No.: 3 Column: a

LG&E did not have long-term notes with associated companies in 2019.

Schedule Page: 256.1 Line No.: 8 Column: a

By Order in 130 FERC ¶ 61,269, Docket No. ES17-41-000, issued on September 18, 2017, LG&E was authorized by the FERC to issue secured and unsecured notes, not to exceed $250 million, in an effort to reduce short-term borrowings and for general corporate purposes. On October 26, 2017, LG&E entered into a $200 million Credit Agreement with US Bank, whereby LG&E borrowed $100 million resulting in the US Bank Term Loan - Tranche 1. On January 11, 2018, LG&E borrowed the second $100 million resulting in the US Bank Term Loan - Tranche 2.

The US Bank Term Loan Tranche 1 and Tranche 2 were repaid on April 1, 2019 and April 3, 2019, respectively, with proceeds from the First Mortgage Bonds issued in April 2019. The remaining unamortized debt expense associated with the terminated loan was fully expensed.

RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.
2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income with taxable net income as if a separate return were to be field, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.
3. A substitute page, designed to meet a particular need of a company, may be used as Long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a footnote.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR

1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual, or estimated amounts of such taxes are know, show the amounts in a footnote and designate whether estimated or actual amounts.
2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.) Enter the amounts in both columns (d) and (e). The balancing of this page is not affected by the inclusion of these taxes.
3. Include in column (d) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b)amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.

TAXES ACCRUED, PREPAID AND CHARGED DURING YEAR (Continued)

5. If any tax (exclude Federal and State income taxes)- covers more then one year, show the required information separately for each tax year, identifying the year in column (a).
6. Enter all adjustments of the accrued and prepaid tax accounts in column (f) and explain each adjustment in a foot- note. Designate debit adjustments by parentheses.
7. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.
8. Report in columns (i) through (l) how the taxes were distributed. Report in column (l) only the amounts charged to Accounts 408.1 and 409.1 pertaining to electric operations. Report in column (l) the amounts charged to Accounts 408.1 and 109.1 pertaining to other utility departments and amounts charged to Accounts 408.2 and 409.2. Also shown in column (l) the taxes charged to utility plant or other balance sheet accounts.
9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

ELECTRIC OPERATING REVENUES (Account 400)

1. The following instructions generally apply to the annual version of these pages. Do not report quarterly data in columns (c), (e), (f), and (g). Unbilled revenues and MWH related to unbilled revenues need not be reported separately as required in the annual version of these pages.
2. Report below operating revenues for each prescribed account, and manufactured gas revenues in total.
3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The -average number of customers means the average of twelve figures at the close of each month.
4. If increases or decreases from previous period (columns (c),(e), and (g)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
5. Disclose amounts of $250,000 or greater in a footnote for accounts 451, 456, and 457.2.

ELECTRIC OPERATING REVENUES (Account 400)

6. Commercial and industrial Sales, Account 442, may be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent if such basis of classification is not generally greater than 1000 Kw of demand. (See Account 442 of the Uniform System of Accounts. Explain basis of classification in a footnote.)
7. See pages 108-109, Important Changes During Period, for important new territory added and important rate increase or decreases.
8. For Lines 2,4,5,and 6, see Page 304 for amounts relating to unbilled revenue by accounts.
9. Include unmetered sales. Provide details of such Sales in a footnote.

SALES OF ELECTRICITY BY RATE SCHEDULES

1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Pages 310-311.
2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300-301. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the duplication in number of reported customers.
4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).
5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.
6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

SALES FOR RESALE (Account 447)

1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326-327).
2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
LF - for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
IF - for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
SF - for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
LU - for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
IU - for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.

SALES FOR RESALE (Account 447) (Continued)

OS - for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
AD - for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal - RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (9) through (k)
5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP)
demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
7. Report in column (g) the megawatt hours shown on bills rendered to the purchaser.
8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal - RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23. The "Subtotal - Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401,iine 24.
10. Footnote entries as required and provide explanations following all required data.

Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission		End of 2019/Q4

PURCHASED POWER (Account 555)
(Including power exchanges)

1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
2. Enter the name of the seller or other party in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the seller.
3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:

RQ - for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to, the supplier's service to its own ultimate consumers.

LF - for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get out of the contract.

IF - for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.

SF - for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.

LU - for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of the designated unit.

IU - for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.

EX - For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.

OS - for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.

PURCHASED POWER(Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.
9. Footnote entries as required and provide explanations following all required data.

PURCHASED POWER(Account 555) (Continued)
(Including power exchanges)

AD - for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.

4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (e), and the average monthly coincident peak (CP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explain.
6. Report in column (g) the megawatthours shown on bills rendered to the respondent. Report in columns (h) and (i) the megawatthours of power exchanges received and delivered, used as the basis for settlement. Do not report net exchange.
7. Report demand charges in column (j), energy charges in column (k), and the total of any other types of charges, including out-of-period adjustments, in column (l). Explain in a footnote all components of the amount shown in column (l). Report in column (m) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (m) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (l) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
8. The data in column (g) through (m) must be totalled on the last line of the schedule. The total amount in column (g) must be reported as Purchases on Page 401, line 10. The total amount in column (h) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Delivered on Page 401, line 13.
9. Footnote entries as required and provide explanations following all required data.

TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1)
(Including transactions referred to as 'wheeling')

1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.
2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).
3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c)
4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

FERC Docket No. RM19-5-000; Order No. 864, issued November 21, 2019. FERC is requiring all public utility transmission providers with transmission formula rates under an Open Access Transmission Tariff (OATT)rate schedules to revise those transmission formula rates to account for changes caused by the Tax Cuts and Jobs Act of 2017 (TCJA). The Commission is requiring public utilities with transmission formula rates to include a mechanism in those transmission formula rates to deduct any excess accumulated deferred incomes taxes (ADIT) from or add any deficient ADIT to their rate bases.

LG&E calculated the excess accumulated deferred income taxes (ADIT) that were charged in Transmission rates to customers during 2019 was $111,109. This amount was recorded to a regulatory liability as of December 31, 2019 in anticipation of further refunds.

TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)
(Including transactions referred to as "wheeling")

1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.
3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNS - Firm Network Transmission Service for Self, LFP - Long-Term Firm Point-to-Point Transmission Reservations. OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point-to- Point Transmission Reservations, NF - Non-Firm Transmission Service, and OS - Other Transmission Service. See General Instructions for definitions of statistical classifications.
4. Report in column (c) and (d) the total megawatt hours received and delivered by the provider of the transmission service.
5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
6. Enter "TOTAL" in column (a) as the last line.
7. Footnote entries and provide explanations following all required data.

FOOTNOTE DATA

Schedule Page: 332 Line No.: 1 Column: a

LG&E and KU are owned by LKE.

Schedule Page: 332 Line No.: 1 Column: b

Long-Term Firm purchases by LG&E and KU take place under the Open Access Transmission Tariff (OATT) with intercompany allocations for revenues and expenses determined by the Transmission Coordination Agreement between the Companies. The Tariff is evergreen and the Transmission Coordination Agreement automatically renews unless terminated.

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Account 403, 404, 405)
(Except amortization of aquisition adjustments)

1. Report in section A for the year the amounts for : (b) Depreciation Expense (Account 403; (c) Depreciation Expense for Asset Retirement Costs (Account 403.1; (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405).
2. Report in Section 8 the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.
3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.
Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any sub-account used.
In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.
For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification Listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.
4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R, D & D) project initiated, continued or concluded during the year. Report also support given to others during the year for jointly-sponsored projects.(Identify recipient regardless of affiliation.) For any R, D & D work carried with others, show separately the respondent's cost for the year and cost chargeable to others (See definition of research, development, and demonstration in Uniform System of Accounts).
2. Indicate in column (a) the applicable classification, as shown below:

Classifications:

A. Electric R, D & D Performed Internally:
- (1) Generation
  - a. hydroelectric
    - i. Recreation fish and wildlife
    - ii Other hydroelectric
  - b. Fossil-fuel steam
  - c. Internal combustion or gas turbine
  - d. Nuclear
  - e. Unconventional generation
  - f. Siting and heat rejection
- (2) Transmission
  - a. Overhead
  - b. Underground
- (3) Distribution
- (4) Regional Transmission and Market Operation
- (5) Environment (other than equipment)
- (6) Other (Classify and include items in excess of $50,000.)
- (7) Total Cost Incurred

B. Electric, R, D & D Performed Externally:
- (1) Research Support to the electrical Research Council or the Electric Power Research Institute

RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES (Continued)

(2) Research Support to Edison Electric Institute
(3) Research Support to Nuclear Power Groups
(4) Research Support to Others (Classify)
(5) Total Cost Incurred

3. Include in column (c) all R, D & D items performed internally and in column (d) those items performed outside the company costing $50,000 or more, briefly describing the specific area of R, D & D (such as safety, corrosion control, pollution, automation, measurement, insulation, type of appliance, etc.). Group items under $50,000 by classifications and indicate the number of items grouped. Under Other, (A (6) and B (4)) classify items by type of R, D & D activity.
4. Show in column (e) the account number charged with expenses during the year or the account to which amounts were capitalized during the year, listing Account 107, Construction Work in Progress, first. Show in column (f) the amounts related to the account charged in column (e)
5. Show in column (g) the total unamortized accumulating of costs of projects. This total must equal the balance in Account 188, Research, Development, and Demonstration Expenditures, Outstanding at the end of the year.
6. If costs have not been segregated for R, D &D activities or projects, submit estimates for columns (c), (d), and (f) with such amounts identified by "Est."
7. Report separately research and related testing facilities operated by the respondent.

DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

Line No.	Classification (a)	Direct Payroll Distribution (b)	Allocation of Payroll charged for Clearing Accounts (c)	Total (d)

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

FOOTNOTE DATA

Schedule Page: 354 Line No.: 70 Column: b

The balance consists of direct labor associated with plant construction charged to common utility plants.

Schedule Page: 354 Line No.: 70 Column: c

The balance consists of indirect and allocated local engineering labor associated with plant construction charged to common utility plants.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission	/ /	End of 2018/Q4

COMMON UTILITY PLANT AND EXPENSES

1. Describe the property carried in the utility's accounts as common utility plant and show the book cost of such plant at end of year classified by accounts as provided by Plant Instruction 13, Common Utility Plant, of the Uniform System of Accounts. Also show the allocation of such plant costs to the respective departments using the common utility plant and explain the basis of allocation used, giving the allocation factors.
2. Furnish the accumulated provisions for depreciation and amortization at end of year, showing the amounts and classifications of such accumulated provisions, and amounts allocated to utility departments using the Common utility plant to which such accumulated provisions relate, including explanation of basis of allocation and factors used.
3. Give for the year the expenses of operation, maintenance, rents, depreciation, and amortization for common utility plant classified by accounts as provided by the Uniform System of Accounts. Show the allocation of such expenses to the departments using the common utility plant to which such expenses are related. Explain the basis of allocation used and give the factors of allocation.
4. Give date of approval by the Commission for use of the common utility plant classification and reference to order of the Commission or other authorization.

(1) See attached sheet, page 356.1.

(2) See attached sheet, page 356.1.

(3) Depreciation - Electric $6,781,657; Gas $3,046,832. Amortization - Electric $11,155,926; Gas $5,012,082.

Common Utility expense accounts are not maintained but such expenses are allocated to Electric and Gas Departments as follows:

Customer Accounts Expenses (excluding uncollectable accounts)

Allocated between departments based on average number of customers served by each department for the year ending December 31, 2018.

Customer Service and Informational Expenses

Allocated between departments based on gross revenues from ultimate consumers by departments for the twelve month period.

Administrative and General Expenses

The administrative and general expenses are allocated based on general measures of cost causation.

(4) The property original cost studies made pursuant to the Uniform System of Accounts included a separate classification for Common Utility Plant. Orders were issued in connection with such studies by Public Service Commission of Kentucky on September 16, 1941, and January 5, 1945, and the Federal Power Commission on December 15, 1944.

AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

PURCHASES AND SALES OF ANCILLARY SERVICES

Report the amounts for each type of ancillary service shown in column (a) for the year as specified in Order No. 888 and defined in the respondents Open Access Transmission Tariff.

In columns for usage, report usage-related billing determinant and the unit of measure.

(1) On line 1 columns (b), (c), (d), (e), (f) and (g) report the amount of ancillary services purchased and sold during the year.

(2) On line 2 columns (b) (c), (d), (e), (f), and (g) report the amount of reactive supply and voltage control services purchased and sold during the year.

(3) On line 3 columns (b) (c), (d), (e), (f), and (g) report the amount of regulation and frequency response services purchased and sold during the year.

(4) On line 4 columns (b), (c), (d), (e), (f), and (g) report the amount of energy imbalance services purchased and sold during the year.

(5) On lines 5 and 6, columns (b), (c), (d), (e), (f), and (g) report the amount of operating reserve spinning and supplement services purchased and sold during the period.

(6) On line 7 columns (b), (c), (d), (e), (f), and (g) report the total amount of all other types ancillary services purchased or sold during the year. Include in a footnote and specify the amount for each type of other ancillary service provided.

		Amount Purchased for the Year			Amount Sold for the Year

MONTHLY TRANSMISSION SYSTEM PEAK LOAD

(1) Report the monthly peak load on the respondent's transmission system. If the respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.
(2) Report on Column (b) by month the transmission system's peak load.
(3) Report on Columns (c) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).
(4) Report on Columns (e) through (j) by month the system' monthly maximum megawatt load by statistical classifications. See General Instruction for the definition of each statistical classification.

MONTHLY ISO/RTO TRANSMISSION SYSTEM PEAK LOAD

(1) Report the monthly peak load on the respondent's transmission system. If the Respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.
(2) Report on Column (b) by month the transmission system's peak load.
(3) Report on Column (c) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).
(4) Report on Columns (e) through (i) by month the system's transmission usage by classification. Amounts reported as Through and Out Service in Column (g) are to be excluded from those amounts reported in Columns (e) and (f).
(5) Amounts reported in Column (j) for Total Usage is the sum of Columns (h) and (i).

NAME OF SYSTEM:

Line No.	Month (a)	Monthly Peak MW - Total (b)	Day of Monthly Peak (c)	Hour of Monthly Peak (d)	Imports into ISO/RTO (e)	Exports from ISO/RTO (f)	Through and Out Service (g)	Network Service Usage (h)	Point-to-Point Service Usage (i)	Total Usage (j)

MONTHLY PEAKS AND OUTPUT

1. Report the monthly peak load and energy output. If the respondent has two or more power which are not physically integrated, furnish the required information for each non- integrated system.
2. Report in column (b) by month the system's output in Megawatt hours for each month.
3. Report in column (c) by month the non-requirements sales for resale. Include in the monthly amounts any energy losses associated with the sales.
4. Report in column (d) by month the system's monthly maximum megawatt load (60 minute integration) associated with the system.
5. Report in column (e) and (f) the specified information for each monthly peak load reported in column (d).

NAME OF SYSTEM:

Line No.	Month	Total Monthly Energy	Monthly Non-Requirments Sales for Resale & Associated Losses	MONTHLY PEAK

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Report data for plant in Service only. 2. Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants. 3. Indicate by a footnote any plant leased or operated as a joint facility. 4. If net peak demand for 60 minutes is not available, give data which is available, specifying period. 5. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant. 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct. 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20. 8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

STEAM-ELECTRIC GENERATING PLANT STATISTICS (Large Plants) *(Continued)*

9. Items under Cost of Plant are based on U. S. of A. Accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses. 10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated plants. 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gas-turbine with the steam plant. 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used, fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

Schedule Page: 403 Line No.: -1 Column: d

Cane Run CT is a peak load service unit and was retired November 2019.

Schedule Page: 403 Line No.: -1 Column: e

LG&E owns 100% of Paddy's Run Unit 11, a 16 MW unit, and Unit 12, a 33 MW unit, and 53% of Unit 13, a 178 MW unit. The remaining percentage of Unit 13 is owned by KU. Paddy's Run Units 11, 12 and 13 are peak load service units. The information presented in here represents LG&E's share.

Schedule Page: 403 Line No.: -1 Column: f

No production/operation employees are directly assigned to the Zorn station. Employees from the Cane Run Plant maintain the Zorn station. Zorn station is peak load service unit only and is automatically operated.

Schedule Page: 402 Line No.: 1 Column: c

LG&E owns 75% of Trimble County Steam Unit 1, a 566 MW unit, with the remaining 25% owned by IMEA and IMPA. LG&E also owns 14.25% of Trimble County Steam Unit 2, a 838 MW unit, with the remaining percentages owned by KU, IMEA and IMPA. The information presented in here represents LG&E's share.

Schedule Page: 402.1 Line No.: -1 Column: b

LG&E owns 53% of Brown CT unit 5, a 123 MW unit, and 38% of Units 6 and 7, 177 MW each. The remaining percentages of Units 5, 6 and 7 are owned by KU. Brown CT units 5, 6, and 7 are peak load service units. The information presented here represents LG&E's share.

Schedule Page: 402.1 Line No.: -1 Column: c

LG&E owns 29% of Trimble County CT units 5 and 6 and 37% of Units 7, 8, 9 and 10. The remaining percentages for Units 5, 6, 7, 8, 9 and 10 are owned by KU. The total Nameplate Ratings for these units are 199 MW per unit and they are peak load servies units. The information presented here represents LG&E's share.

Schedule Page: 403.1 Line No.: -1 Column: d

LG&E owns 22% of Cane Run NGCC, a 808 MW unit, with the remaining percentage owned by KU. The information presented in here represents LG&E's share.

Name of Respondent	This Report Is:	Date of Report	Year/Period of Report

HYDROELECTRIC GENERATING PLANT STATISTICS (Large Plants)

1. Large plants are hydro plants of 10,000 Kw or more of installed capacity (name plate ratings)
2. If any plant is leased, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. If licensed project, give project number.
3. If net peak demand for 60 minutes is not available, give that which is available specifying period.
4. If a group of employees attends more than one generating plant, report on line 11 the approximate average number of employees assignable to each plant.

Line No.	Item (a)	FERC Licensed Project No. 289 Plant Name: Ohio Falls (b)	FERC Licensed Project No. 0 Plant Name: (c)

PUMPED STORAGE GENERATING PLANT STATISTICS (Large Plants) (Continued)

6. Pumping energy (Line 10) is that energy measured as input to the plant for pumping purposes.
7. Include on Line 36 the cost of energy used in pumping into the storage reservoir. When this item cannot be accurately computed leave Lines 36, 37 and 38 blank and describe at the bottom of the schedule the company's principal sources of pumping power, the estimated amounts of energy from each station or other source that individually provides more than 10 percent of the total energy used for pumping, and production expenses per net MWH as reported herein for each source described. Group together stations and other resources which individually provide less than 10 percent of total pumping energy. If contracts are made with others to purchase power for pumping, give the supplier contract number, and date of contract.

GENERATING PLANT STATISTICS (Small Plants)

1. Small generating plants are steam plants of, less than 25,000 Kw; internal combustion and gas turbine-plants, conventional hydro plants and pumped storage plants of less than 10,000 Kw installed capacity (name plate rating). 2. Designate any plant leased from others, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, and give a concise statement of the facts in a footnote. If licensed project, give project number in footnote.

GENERATING PLANT STATISTICS (Small Plants) (Continued)

3. List plants appropriately under subheadings for steam, hydro, nuclear, internal combustion and gas turbine plants. For nuclear, see instruction 11, Page 403. 4. If net peak demand for 60 minutes is not available, give the which is available, specifying period. 5. If any plant is equipped with combinations of steam, hydro internal combustion or gas turbine equipment, report each as a separate plant. However, if the exhaust heat from the gas turbine is utilized in a steam turbine regenerative feed water cycle, or for preheated combustion air in a boiler, report as one plant.

TRANSMISSION LINE STATISTICS

1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
3. Report data by individual lines for all voltages if so required by a State commission.
4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

TRANSMISSION LINE STATISTICS (Continued)

7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)
8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

TRANSMISSION LINE STATISTICS (Continued)

7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)
8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

Size of Conductor and Material (i)	COST OF LINE (Include in Column (j) Land, Land rights, and clearing right-of-way) Land (j)	Construction and Other Costs (k)	Total Cost (l)	EXPENSES, EXCEPT DEPRECIATION AND TAXES Operation Expenses (m)	Maintenance Expenses (n)	Rents (o)	Total Expenses (p)	Line No.

TRANSMISSION LINES ADDED DURING YEAR

1. Report below the information called for concerning Transmission lines added or altered during the year. It is not necessary to report minor revisions of lines.
2. Provide separate subheadings for overhead and under- ground construction and show each transmission line separately. If actual costs of competed construction are not readily available for reporting columns (l) to (o), it is permissible to report in these columns the

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVa except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

SUBSTATIONS

1. Report below the information called for concerning substations of the respondent as of the end of the year.
2. Substations which serve only one industrial or street railway customer should not be listed below.
3. Substations with capacities of Less than 10 MVa except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
4. Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).

SUBSTATIONS (Continued)

5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
6. Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

FOOTNOTE DATA

Schedule Page: 426.3 Line No.: 20 Column: h

Fourteen spare transformers are stored at the South Service Center and one spare transformer is stored at the Solite Substation.

Name of Respondent	This Report Is:	Date of Report (Mo, Da, Yr)	Year/Period of Report
Louisville Gas and Electric Company	(1) [X] An Original (2) [ ] A Resubmission		End of 2019/Q4

TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES

1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies.
2. The reporting threshold for reporting purposes is $250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general".
3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.

Accounts charged include: 163, 184, 560, 580 and 588

Schedule Page: 429 Line No.: 38 Column: a

Costs between Louisville Gas and Electric Company and Kentucky Utilities Company are either charged directly or are allocated by certain assignment methods described below that most accurately distribute the costs.

LG&E and KU Services Company (LKS) and PPL Services Corporation (PPL Services) either directly charge or allocate the costs of service among the affiliated companies using one of several methods that most accurately distributes the costs. The method of cost allocation varies based on the department rendering the service. Any of the methods may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes in the business, but are generally determined annually. The assignment methods used by LKS to allocate its costs, as well as pass-through costs from PPL Services, are as follows:

Contract Ratio – Based on the sum of the physical amount (i.e. tons of coal, mmbtu of natural gas) of the contract for coal and natural gas fuel burned for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	(Mo, Da, Yr) / /	2019/Q4

FOOTNOTE DATA

in the ratio from that used in the prior year.

Corporate Information Security Ratio – This ratio allocates the cost of cyber security activities using an allocation consistent with the methodology used by third party insurers providing cyber security insurance to the organization. The methodology assigns a percentage of the premium based on the various risks (e.g., number of employees, the number of customers, etc.). The total of the percentages equals 100%. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Departmental Charge Ratio – A specific department ratio based upon various factors. The departmental charge ratio typically applies to indirectly attributable costs such as departmental administrative, support, and/or material and supply costs that benefit more than one affiliate and that require allocation using general measures of cost causation. Methods for assignment are department-specific depending on the type of service being performed and are documented and monitored by the Budget Coordinators for each department. The numerator and denominator vary by department. The ratio is based upon various factors such as labor hours, labor dollars, departmental or entity headcount, capital expenditures, operations and maintenance costs, retail energy sales, charitable contributions, generating plant sites, average allocation of direct reports, net book value of utility plant, total line of business assets, electric capital expenditures, substation assets and transformer assets. The Departmental Charge Ratio will only be used with prior approval by the Controller when other applicable ratios would not result in the fair assignment of costs. These ratios are calculated on an annual basis. Any changes in these ratios will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in any of these ratios from that used in the prior year.

Electric Peak Load Ratio – Based on the sum of the monthly electric maximum system demands for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Facilities Ratio – Based on a two-tiered approach with one tier based on the number of employees by department or line of business and the other tier based on the applicable department or line of business ratio. The numerator for the number of employees is the number of employees by department or line of business at the facility and the denominator is the total employees at the facility. The numerator and denominator for the applicable department or line of business for the service provided as described in this document. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Generation Ratio – Based on the annual forecast of megawatt hours, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Louisville Gas and Electric Company	(1) X An Original (2) __ A Resubmission	/ /	2019/Q4

FOOTNOTE DATA

Network Users Ratio – Based on the number of IT network users at the end of the previous calendar year. A two-step assignment methodology is utilized to properly allocate costs to the proper legal entity. The numerator for the first step of this ratio is the total number of network users for each specific company, and the denominator is the total number of network users for all companies in which an allocator is assigned (i.e. LG&E, KU, LKS and PPL). For the second step, the ratio of LKS network users, to total network users will then be allocated to the other companies (LG&E, KU, and LKC) based on each company's ratio of LKS labor hours to total LKS labor hours. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Non-Fuel Material and Services Expenditures – Based on non-fuel material and services expenditures, net of reimbursements, for the immediately preceding twelve consecutive calendar months. The numerator is equal to such expenditures for a specific entity and/or line-of-business as appropriate and the denominator is equal to such expenditures for all applicable entities. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Customers Ratio – Based on the number of retail electric and/or gas customers. This ratio will be determined based on the actual number of customers at the end of the previous calendar year. In some cases, the ratio may be calculated based on the type of customer class being served (i.e. Residential, Commercial or Industrial). The numerator is the total number of each Company's retail customers. The denominator is the total number of retail customers for both LG&E and KU. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Employees Ratio – Based on the number of employees benefiting from the performance of a service. This ratio will be determined based on actual counts of applicable employees at the end of the previous calendar year. A two-step assignment methodology is utilized to properly allocate LKS employee costs to the proper legal entity. The numerator for the first step of this ratio is the total number of employees for each specific company, and the denominator is the total number of employees for all companies in which an allocator is assigned (i.e. LG&E, KU and LKS). For the second step, the ratio of LKS to total employees will then be allocated to the other companies (LG&E, KU and LKC) based on each company's ratio of labor hours to total labor hours. LKC has no employees, but non-utility related labor is charged to it. In some cases, the ratio may be calculated based on the number of employees at a specific location for the first step with the ratio of LKS to total employees being allocated based on labor hours of the employees at the specific location. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Meters Ratio – Based on the number or types of meters being utilized by customer classes within the system for the immediately preceding twelve consecutive calendar months. The numerator is equal to the number of meters for each utility and the denominator is equal to the total meters for KU and LG&E. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the

FOOTNOTE DATA

following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Number of Transactions Ratio – Based on the number of transactions occurring in the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. The Controller's organization is responsible for maintaining and monitoring specific product/service methodology documentation for actual transactions related to LKS billings. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Ownership Percentages – Based on the contractual ownership percentages of jointly-owned generating units, information technology, facilities and other capital projects. This ratio is updated as a result of a new jointly-owned capital projects and is based on the benefit to the respective company. The numerator is the specific company's forecasted usage. The denominator is the total forecasted usage of all respective companies.

Revenue Ratio – Based on the sum of the revenue for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Revenue, Total Assets and Number of Employees Ratio – Based on an average of the revenue, total assets and number of employees ratios. The numerator is the sum of Revenue Ratio, Total Assets Ratio and Number of Employees Ratio for the specific company. The denominator is three – the number of ratios being averaged. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Assets Ratio – Based on the total assets at year end for the preceding year. In the event of joint ownership of a specific asset, asset ownership percentages are utilized to assign costs. The numerator is the total assets for each specific company at the end of the preceding year. The denominator is the sum of total assets for each company in which an allocator is assigned (LG&E, KU and LKC). This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Total Utility Plant Assets Ratio – Based on the total utility plant assets at year end for the preceding year, the numerator of which is for an operating company and the denominator of which is for all operating companies. In the event of joint ownership of a specific asset, ownership percentages are utilized to assign costs. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

FOOTNOTE DATA

Transmission Ratio –The Transmission Coordination Agreement (TCA) provides "the contractual basis for the coordinated planning, operation, and maintenance of the combined" LG&E and KU transmission system. Pursuant to the terms of the TCA, LG&E/KU "operate their transmission systems as a single control area." The TCA establishes cost and revenue allocations between LG&E and KU. The Transmission Ratio is based upon Schedule A (Allocation of Operating Expenses of the Transmission System Operator) of the TCA. Transmission System Operator Company allocation percentages are calculated during June of each year to be effective July 1st of each year using the previous year's summation of the Transmission Peak Demands as found in FERC Form 1 for Kentucky Utilities Company (KU) and Louisville Gas & Electric Company (LG&E) page 400 line 17(b).

Ultimate Users Ratio – Based on the number of ultimate users of an IT product or service (i.e., software, hardware, mobile devices, etc.) at the end of the previous calendar year. A two-step assignment methodology is utilized to properly allocate costs to the proper legal entity. The numerator for the first step of this ratio is the total number of ultimate users for each specific company, and the denominator is the total number of ultimate users for all companies in which an allocator is assigned (i.e. LG&E, KU, LKS and PPL). For the second step, the ratio of LKS ultimate users, to total ultimate users will then be allocated to the other companies (LG&E, KU, and LKC) based on each company's ratio of LKS labor hours to total LKS labor hours. This ratio is calculated on an annual basis. Any changes in the ratio will be determined no later than May 1st of the following calendar year, and charges to date will be reallocated for any significant changes in the ratio from that used in the prior year.

Vehicle Cost Allocation Ratio – Based on the costs associated with providing and operating transportation fleet for all affiliated companies including developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles. Such rates are applied based on the specific equipment employment and the measured usage of services by the various company entities. This ratio is calculated monthly based on the actual transportation charges from the previous month. The numerator is the department labor charged to a specific company. The denominator is the total labor costs for the specific department. The ratio is then multiplied by the total transportation costs to determine the amount charged to each company.

22200500 Louisville Gas and Electric Company 01/01/2019 - 12/31/2019

Important Changes During the Year (Ref Page: 108)

	Explain
Give particulars concerning the matters indicated below.	
1. Changes in and important additions to franchise rights:	None.
2. Acquisition of ownership in other companies by reorganization, merger or consolidation with other companies:	None.
3. Purchase or sale of an operating unit or system:	None.
4. Important leaseholds (other than leaseholds for natural gas lands) thant have been accquired or given assigned or surrendered:	None of a material nature.
5. Important extension or reduction of transmission or distribution system:	None.
6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees.	LG&E received FERC authorization in FERC Docket No. ES19-51-000 for up to $500 million in the form of money pool debt, commercial paper or any other type of short-term loan through November 30, 2021. LG&E's money pool balance was zero at December 31, 2019 and December 31, 2018. LG&E’s commercial paper program limit of $350 million was established on April 30, 2013. As of December 31, 2019 and December 31, 2018, the outstanding commercial paper balance is $238 million and $279 million, respectively. LG&E received authorization to issue up to $600 million in long-term debt from the Kentucky Public Service Commission Order, Case No. 2018-00335 on December 3, 2018. In April 2019, LG&E issued $400 million of 4.25% First Mortgage Bonds due 2049. LG&E received proceeds of $396 million, net of discounts and underwriting fees, which were used to repay commercial paper and LG&E’s term loan. In June 2019, the Louisville/Jefferson County Metro Government of Kentucky remarketed $31 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series A due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.65% through their mandatory purchase date of June 1, 2021. In June 2019, the Louisville/Jefferson County Metro Government of Kentucky remarketed $35 million of Environmental Facilities Revenue Refunding Bonds, 2007 Series B due 2033 previously issued on behalf of LG&E. The bonds were remarketed at a long-term rate and will bear interest at 1.65% through their mandatory purchase date of June 1, 2021. In June 2019, LG&E issued a notice to bondholders of its intention to convert the $40 million Louisville/Jefferson County Metro Government of Kentucky Pollution Control Revenue Bonds, 2005 Series A to a weekly interest rate, as permitted under the loan documents. The conversion was completed on August 1, 2019. In connection with the conversation, LG&E purchased these bonds from the remarketing agent and held them until September 17, 2019, at which time LG&E remarketed the bonds at a long-term rate that will bear interest at 1.75% through their mandatory purchase date of July 1, 2026. LG&E has a revolving credit facility totaling $500 million. The facility was approved by the Kentucky Public Service Commission Order, Case No. 2015-00138 on July 2, 2015. The Kentucky Public Service Commission approved an extension of the credit facility in Case No. 2018-00335 on December 3, 2018. On March 8, 2019, LG&E amended this revolving credit facility to extend the termination date from January 26, 2023 to January 26, 2024. There were no borrowings outstanding under this facility at December 31, 2019 and December 31, 2018.

Important Changes During the Year (Ref Page: 108)

	Explain
7. Changes in articles of incoporation or amendments to charter: Explain the nature and purpose of such changes or amendments.	None.
8. State the estimated annual effect and nature of any important wage scale changes during the year.	During the first quarter of 2019, exempt and non-exempt employees received routine wage increases in accordance with annual salary reviews.
9. State briefly the status of any materially important legal proceedings pending at the end of the year and the results.	See Notes 5 and 10 of Notes to Financial Statements on page 123.
10. Describe briefly any materially important transactions not disclosed elsewhere in this report in which an officer, director, or associated company was a party or had a material interest.	None.
11. Estimated increase or decrease in annual revenues caused by important rate changes.	N/A

General Description of Construction Overhead Procedure - Components of Formulat (Ref Page: 218) - NOTES

LOCAL ENGINEERING:

Salaries and expenses of Gas Distribution Operations personnel engaged in construction work, but not assignable to a particular capital project, are charged to engineering clearing projects. Examples of such charges are: work with the construction budget, cost of estimating, construction work, preparation of field reports, conferences on construction matters, and general supervision of construction projects.

Each month, the costs accumulated in these clearing projects are allocated to specific capital projects owned by Gas Distribution based on the monthly spend by project.
The labor and expenses of engineers and other personnel who are directly assigned to a particular capital project are charged to that project.

EMPLOYEE BENEFITS:

Vacation, holiday, sick and other off-duty payments, medical, dental, group life insurance, long-term disability, 401(k), retirement income account and pension costs, are charged to construction, Local Engineering, and O&M by applying overhead rates to direct labor charges.

EMPLOYEE TEAM INCENTIVE AWARD:
Employee bonuses, known as Team Incentive Awards, are charged to construction, Local Engineering, and O&M by applying overhead rates to direct labor charges.

ADMINISTRATIVE AND GENERAL EXPENSES:

The allocation of administrative and general expenses to construction is based on a study of the estimated time engaged in construction activities by persons and departments charging time to FERC Account 920. The administrative and general salaries and expenses (FERC Account 920-921) applicable to construction are allocated to all construction projects on the basis of total direct costs.

Note:

VEHICLE COST ALLOCATION:
Vehicle costs are allocated to construction based on labor charges from the departments to which the vehicles are assigned. The costs of vehicles are allocated by the pro-rata share of monthly labor incurred from each department which owns vehicles.

ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION (AFUDC):

LG&E does not capitalize AFUDC for gas utility plant.

Accumulated Provision for Depreciation of Gas Utility Plant (Acct 108) (Ref Page: 219)

Magnolia Compressor Station	$2,096,691.00	90,914	8,190	4	12/10/2019
Muldraugh Compressor Station	$3,150,957.00	94,309	1,107	3	2/13/2019
Field Compressor Stations for Self-Use	$0.00	0	0	0	
Recover Underground Storage Gas	$0.00	0	0	0	
Doe-Run-Brandenburg,Ky and Laconia, In	$1,201,874.00	84	2,910	0	
Muldraugh-Muldraugh, Ky	$0.00	0	0	0	
Center Compressor Station	$222,297.00	17,201	3,940	2	1/14/2019

Note:
Doe-Run-Brandenburg, Ky. and Laconia, In., column (b):
Of total 10 compressors, only 3 were in operation in 2019, with a total of 915 horsepower, column (c).

Doe-Run-Brandenburg, Ky. and Laconia, In., column (e):
Of total amount, $268.33 is gas and $12,746.45 is electricity.

Doe-Run-Brandenburg, Ky. and Laconia, In., column (j):
Station Peak not applicable for field compressors.

Muldraugh-Muldraugh, Ky., column (j):
Station Peak not applicable for field compressors.

(Signature of officer authorized to administer oath)

[Persons making willful false statements in this report may be punished by fine or imprisonment under KRS 523.040 and 523.100.]

Louisville Gas and Electric Company
Case No. 2020-00350
Forecasted Test Period Filing Requirements
(Forecasted Test Period 12ME 6/30/22; Base Period 12ME 2/28/21)

Filing Requirement
Tab 42 - 807 KAR 5:001 Section 16(7)(l)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

The annual report to shareholders or members and the statistical supplements covering the most recent two (2) years from the application filing date.

Response:

There are no annual reports to LG&E's shareholders during the period referenced. LG&E does not publish a statistical supplement.

Federal securities rules generally require the delivery of annual reports to public shareholders when requesting their vote via certain proxy solicitations. During the period in question, the common stock of LG&E has been wholly-owned by LG&E and KU Energy LLC, which is a wholly-owned subsidiary of PPL Corporation.

Copies of the audited annual financial statements and other financial information of LG&E relating to the period described are provided in Filing Requirement 807 KAR 5:001 Section 16(7)(p) [Tab No. 46].

Louisville Gas and Electric Company
Case No. 2020-00350
Forecasted Test Period Filing Requirements
(Forecasted Test Period 12ME 6/30/22; Base Period 12ME 2/28/21)

Filing Requirement
Tab 43 - 807 KAR 5:001 Section 16(7)(m)
Sponsoring Witness: Christopher M. Garrett

Description of Filing Requirement:

The current chart of accounts if more detailed than the Uniform System of Accounts chart prescribed by the commission.

Response:

See attached.

Louisville Gas and Electric Company
Case No. 2020-00350
Forecasted Test Period Filing Requirements
(Forecasted Test Period 12ME 6/30/22; Base Period 12ME 2/28/21)

Filing Requirement
Tab 45 - 807 KAR 5:001 Section 16(7)(o)
Sponsoring Witness: Daniel K. Arbough

Description of Filing Requirement:

Complete monthly budget variance reports, with narrative explanations, for the twelve (12) months immediately prior to the base period, each month of the base period, and any subsequent months, as they become available.

Response:

The Companies have only one monthly budget variance (performance) report used for management reporting to the CEO and executive officers.

See attached for the monthly reports for:

- The twelve months prior to the March 2020 through February 2021 base period.
- Each month of the base period - As of the date of the filing only the months of March 2020 through September 2020 are available. The Company will provide this data for the remaining periods requested in the upcoming months as it becomes available.

Variance Explanations

Higher adjusted gross margins, primarily due to higher sales volumes from favorable weather.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(6) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

FERC conditionally granted the Company's request to remove mitigation in the form of rate depancaking imposed to resolve horizontal market power concerns arising from LG&E/KU's merger in 1998 and subsequent withdrawal from Midcontinent Independent System Operator, Inc. in 2006. The order conditionally grants LG&E/KU's request subject to the implementation of a transition mechanism for certain power supply arrangements.

Net metering reform legislation was passed in Kentucky near the end of the session. The Kentucky House took up the net metering reform bill (SB100) and voted 55-36 to recede from the amendments added to the bill (HFA1), passing it in the same form that arrived from the Senate (the form supported by the Company). It directs the KPSC, which determines all other rates, to consider and set the value of the energy net metering customers put back onto the grid.

Regarding the rate case proceeding, the Company filed post hearing rate case data requests on March 20 and then submitted the post-hearing brief on April 1st. The KPSC intends to issue its Order in the proceedings on or before April 30.

On April 1, the Company closed on $700 million of first mortgage bonds. The bonds priced at T+1.25 (4.257% yield). The $300 million at KU was an addition to the existing $250 million first mortgage bonds series maturing in September 2045, and $400 million was a new issue at LG&E maturing April 2049. The proceeds were used to repay a $200 million term-loan at LG&E, and commercial paper at both LG&E and KU. Additionally, LG&E remarketed $128 million in tax-exempt bonds which priced at 1.85% with a 2 year mandatory put in April 2021.

The KPSC issued an Order that authorized LG&E to establish a regulatory asset for the incremental costs incurred to repair and restore service resulting from the November 2018 Ice Storm. The Company assumed this treatment based on precedent when we closed the books for 2018, so this results in no changes relative to the 2019 Business Plan.

Significant Future Events

The rate case order from the KyPSC is expected by April 30. There are no other significant future events to discuss at this time.

Variance Explanations

Lower MTD & YTD adjusted gross margins primarily due to lower sales volumes from non-load supportive temperatures.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(6) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

On April 30th, the KPSC authorized a combined revenue increase of $187 million for KU and LG&E, inclusive of the elimination of a $110 million bill credit associated with the Tax Cuts and Jobs Act. New rates took effect on May 1st. In its decision, the Commission ruled on open issues and approved the settlement among the parties, including a 9.725% return on equity.

FERC was onsite recently conducting interviews regarding the Company's Open Access Transmission Tariff (OATT) operational audit. The auditors preliminarily indicated they did not identify any issues during the audit; however, they will be issuing more data requests to review and validate information provided, and to look more in-depth at certain areas. The auditors noted on several occasions that the Company appeared to have a strong compliance program and culture, and were appreciative of our responsiveness and transparency.

LKE recently received the following safety awards:
- London Crew Center employees won both the Edison Electric Safety Achievement Award and the Kentucky Governor's Safety and Health Award for completing 256,481 hours (nearly 9 ½ years) without a lost-time incident.
- Maysville Operations Center employees won the Edison Electric Safety Achievement Award for 500,002 hours (or nearly 10 years) without a lost-time incident.
- LKE employees won the American Gas Association Accident Prevention Award for Safety Excellence for having the lowest Days Away, Restricted or Transferred (DART) rate of 0.46 in 2018 among peer companies and groups.

The Company has completed its installation of 20 public-accessible electric vehicle charging stations across the LG&E and KU service territories, as part of its program approved by the KPSC.

LKE recently completed the consolidation of the LG&E and KU electric distribution control centers into a single new facility in Simpsonville, Kentucky. The center allows for the centralization of personnel which will include a unified team that will efficiently operate in one location with our field operations. Other benefits include the streamlining of processes and a new formal training program.

Significant Future Events

There are no significant future events to note at this time.

Income Statement: Actual vs. Budget (YTD) - LKE Consolidated — April 2019

($ Millions)

	Actual vs. Budget - YTD				Actual vs. PY - YTD			
	Actual	Budget	Variance	Comments	Actual	PY Actual	Variance	Comments
Gross Margin:								
Electric Margin	$ 590	$ 593	$ (3)		$ 590	$ 597	$ (7)	Due primarily to lower sales volumes and lower transmission margins, partially offset by ECR rate base growth and a favorable TCJA surcredit timing difference.
Gas Margin	82	86	(4)		82	82	0	
Total Gross Margin	672	679	(7)		672	679	(7)	
O&M	260	261	1		260	247	(13)	Due primarily to increase in contractor labor for line locating, veg. management, and storm restoration and an increase in repair expenses in 2019 at the Trimble County Generating Station including, FGD, Coal Feeder, and Mill Repairs.
Depreciation & Amortization	139	142	3		139	134	(5)	Due to larger plant in service balance.
Taxes, Other than Income	23	24	1		23	22	(1)	
Other income (expense)	1	(1)	2		1	(4)	5	Due primarily to decrease in donations and a decrease in pension non service cost burdens due to a 50bps increase in the discount rate and layers of prior service cost that were fully amortized in 2018 (and thus have no amortization in 2019).
EBIT	252	251	0		252	272	(20)	
Interest Expense	83	84	1		83	75	(9)	Primarily due to higher debt balances and higher interest rates.
Income from Ongoing Operations before income taxes	168	167	1		168	197	(29)	
Income Tax Expense	34	33	(2)		34	41	7	Lower tax expense primarily due to lower pre-tax income.
Net Income (loss) from ongoing operations	**134**	**135**	**(1)**		**134**	**156**	**(22)**	
Special Item - (Non Operating Income)	0	0	0		0	(9)	9	In 2018, due to Kentucky state tax reform resulting in a reduction of the Kentucky Corporate income tax, a $9 million deferred tax expense was recorded related to the revaluing of non-utility deferred taxes.

Balance Sheet - LG&E

April 2019

($ Millions)

	Actual	YTD Budget	PY Actual	Variance to Budget	Comments
Assets:					
Current Assets:					
Cash and Cash Equivalents	$ 6	$ 5	$ 8	$ 1	
Accounts Receivable (Trade)	155	178	169	(22)	Primarily due to timing of actuals.
Inventory	101	87	99	14	Primarily higher than budgeted coal inventory due the inventory built up for Ghent before the Stacker/Reclaimer and Barge Unloader outages, and higher gas stored underground due to slightly lower gas distribution.
Deferred Income Taxes	0	0	0	0	
Regulatory Assets Current	21	10	10	12	Primarily from increased gas cost and higher beginning gas supply regulatory asset balance in December 2018.
Prepayments and other current assets	61	48	59	13	Primarily due to lower than anticipated refined coal accounts receivable, other prelim survey charges, and accounts receivable from associated companies.
Total Current Assets	344	327	344	17	
Property, Plant, and Equipment	5,654	5,731	5,382	(78)	
Intangible Assets	25	6	6	19	Reclassification of operating leases from Property, Plant and Equipment.
Other Property and Investments	1	1	1	0	
Regulatory Assets Non Current	431	397	404	34	
Goodwill	0	0	0	0	
Other Long-term Assets	21	36	25	(15)	Lower due to a decrease in prepaid pension primarily due to negative return on investments versus budget and partially offset by an increase in the discount rate and other actuarial updates along with burdens of approximately $3.8M recorded through March 2019 which should be reflected in Accum Provision for Pension & Related Benefits (will be corrected in the second quarter); partially offset by higher Cane Run 7 LTPC and Brown 6 LTSA assets and increase in other preliminary survey charges.
Total Assets	**$ 6,476**	**$ 6,498**	**$ 6,162**	**$ (22)**	
Liabilities and Equity:					
Current Liabilities:					
Accounts Payable (Trade)	$ 177	$ 158	$ 198	$ 19	Primarily due to refined coal not being included in the budget due to having no contract in place at the time.
Dividends Payable to Affiliated Companies	0	0	0	0	
Customer Deposits	30	28	28	2	
Derivative Liability	4	4	4	0	
Accrued Taxes	16	8	20	8	
Regulatory Liabilities Current	7	9	28	(3)	
Other Current Liabilities	77	81	71	(5)	
Total Current Liabilities	311	290	349	22	
Debt - Affiliated Company	56	0	0	56	Due to unbudgeted Money Pool loan with KU.
Debt [(1)]	2,025	2,116	1,950	(92)	
Total Debt	2,081	2,116	1,950	(36)	
Deferred Tax Liabilities	644	641	582	3	
Investment Tax Credit	34	34	35	0	
Accum Provision for Pension & Related Benefits	10	0	1	10	Increase primarily due to negative return on investments versus budget, partially offset by an increase in the discount rate and other actuarial updates. Additionally, burdens of approximately $3.8M recorded through March 2019 were inadvertently reflected in other long-term assets in actuals but should be netted with pension liability. Will be corrected in the second quarter.
Asset Retirement Obligation	83	90	92	(7)	
Regulatory Liabilities Non Current	867	863	866	3	
Derivative Liability	16	13	17	3

LKE Consolidated	14.4%	13.3%	15.0%	14.8%

Variance Explanations

Lower MTD & YTD O&M, primarily related to higher labor and burdens recorded to capital and reg assets as well as open positions, and timing of other costs related to generation, IT and General Counsel.
Lower YTD depreciation primarily due to lower than budgeted gross plant in service.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(6) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

The remaining coal plant structures and stacks of the Cane Run plant were recently demolished. After 61 years, the coal plant generated its last megawatt of power on June 16, 2015. Cane Run is the second of six retired coal-fired generating plants that has been demolished throughout the service territory.

The Tennessee Public Utility Commission ("TPUC") approved KU's petition requesting permission to abandon its service area in the state and withdrawal its tariff for electric service after having acquired the four remaining residential properties served in the state. As a result, KU is no longer under TPUC's jurisdiction.

LG&E's Advanced Meter Opt-In pilot program recently reached its customer limit of 10,000, while KU is currently at 8,225 on its 10,000 limit. The Companies continue to see a strong customer response to education materials the Companies began using when the KPSC approved an expansion of this pilot program. Customer acceptance and use of the digital capabilities of the Advanced Meters will be an important factor in gaining full approval of system-wide Advanced Meters in the future.

Two parties recently filed appeals of the KPSC's Final Order in our rate case – the Attorney General on grounds that the Commission did not articulate sufficient findings of fact to support its decision on increases to the basic service charge, and the Metropolitan Housing Coalition on grounds that its dismissal from the case prevented it from examining witnesses regarding the basic service charge. We do not believe these filings have merit, but they will progress through the Franklin Circuit Court, and perhaps further appeals.

Significant Future Events

There are no significant future events to note at this time.

Gross Margin:									
Electric Margin	$ 747	$ 746	$ 1		$ 747	$ 752	$ (5)	Due primarily to lower sales volumes and lower transmission margins, partially offset by ECR rate base growth and an increase in KPSC base rate revenues effective May 1, 2019.	
Gas Margin	94	99	(5)	Due primarily to the allocation of budgeted gas volumes between Q1 and Q4 and lower than budgeted GLT rate base.	94	92	2		
Total Gross Margin	841	845	(3)		841	844	(3)		
O&M	318	325	7	Due to lower labor and burdens, HW/SW maintenance, insurance savings and timing of legal consultants offset by increased in-line inspections, line locating, storm restoration and veg. management costs.	318	306	(12)	Due primarily to increase in contractor labor for line locating, veg. management, and storm restoration and an increase in repair expenses in 2019 at the Trimble County Generating Station including, FGD, Coal Feeder, and Mill Repairs.	
Depreciation & Amortization	175	179	5	Due primarily to lower than anticipated plant in service.	175	168	(7)	Due primarily to larger plant in service balance.	
Taxes, Other than Income	29	30	1		29	27	(1)		
Equity in earnings	0	0	0		0	0	0		
Other income (expense)	1	(1)	3		1	(4)	6	Due primarily to due to shifting the majority of donations from the Company to the LG&E and KU Foundation and a decrease in pension non service cost burdens due to a 50bps increase in the discount rate and layers of prior service cost that were fully amortized in 2018 (and thus have no amortization in 2019).	
EBIT	321	309	12		321	339	(18)		
Interest Expense	105	108	3		105	94	(11)	Primarily due to higher debt balances and higher interest rates.	
Income from Ongoing Operations before income taxes	216	202	15		216	245	(29)		
Income Tax Expense	42	39	(3)		42	50	8	Lower tax expense primarily due to lower pre-tax income.	
Net Income (loss) from ongoing operations	**175**	**163**	**12**		**175**	**195**	**(21)**		
Special Item - (Non Operating Income)	0	0	0		0	(9)	9	In 2018, due to Kentucky state tax reform resulting in a reduction of the Kentucky Corporate income tax, a $9 million deferred tax expense was recorded related to the revaluing of non-utility deferred taxes.	
Discontinued Operations	(0)	0	(0)		(0)	(0)	0		
Net Income (loss)	$ 175	$ 163	$ 12		$ 175	$ 186	$ (11)		
KY Regulated Financing Costs	(14)	(14)	(0)		(14)	(15)	2		
KY Regulated Net Income	161	$ 149	$ 12		161	$ 171	$ (10)		
Earnings Per Share - Ongoing	$ 0.22	$ 0.20	$ 0.02		$ 0.22	$ 0.26	$ (0.04)		

Note: Schedules may not sum due to rounding.

LKE Consolidated	14.8%	13.5%	15.0%	14.8%

Variance Explanations

Lower YTD adjusted gross margins, primarily due to lower sales volumes from weather.

Lower YTD O&M primarily related to higher labor and burdens recorded to capital and regulatory assets as well as open positions, and timing of other costs related to generation, IT and General Counsel. These costs are somewhat offset by higher gas in-line inspection and line locating costs, as well as storm restoration costs.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

The Company has been recognized nationally for several awards across our lines of business:
- The Company won another J.D. Power award as KU ranked first (with an index score of 763) among the mid-sized utilities in the Midwest region of the 2019 Electric Utility Residential Customer Satisfaction study. This represents the fourth year in a row KU has received this honor.
- The Company has received national recognition by the United States Department of Defense for its commitment to the National Guard and Reserve, being named one of fifteen winners of the 2019 Secretary of Defense Employer Support Freedom Award.
- For the third consecutive year, the Company received the ESGR (Employer Support of the Guard and Reserve) Pro Patria Award — the United States Defense Department's highest state-level award for providing support to employees serving in the Kentucky National Guard and Reserve.
- LKE was once again a top performer and earned 11 communications awards in various categories during the recent Utility Communicators International conference.
- LKE was one of 14 Interactive Voice Responses ("IVRs") selected to receive the 2019 Gold Stethoscope Award by IVR Doctors and Market Strategies International.

Old Dominion Power (KU's operational unit in Virginia) filed its rate review application with the Virginia State Corporation Commission seeking an increase of about $13 million (18 percent) in its base rates. If approved, the new rates will become effective April 12, 2020.

KU's Advanced Meter Opt-In pilot program recently joined LG&E in reaching its approved customer limit of 10,000. Efforts continue on adding additional customer tools and monitoring results.

In an effort to move forward with the Bullitt County Pipeline project and purchase the final 15% of easements necessary for construction, LG&E will be initiating condemnation proceedings that will exercise its right to eminent domain. When the remaining easements are acquired and necessary permits received, construction is expected to take six to nine months.

KU signed a contract with Maker's Mark for the installation of a 190kW ground mounted solar array. This represents LKE's second Business Solar project, following a 33.6kW roof-mount array for the Archdiocese of Louisville.

Significant Future Events

There are no significant events to report at this time.

LKE Consolidated	15.3%	13.8%	14.7%	14.8%

Variance Explanations

Higher MTD adjusted gross margins, primarily due to higher sales volumes from weather.
Higher YTD adjusted gross margins, primarily due to lower purchased power demand costs and other offsetting margin components.
Lower MTD and YTD O&M primarily related to higher labor and burdens recorded to capital and regulatory assets as well as open positions, and timing of other costs.
Lower YTD depreciation primarily due to lower than budgeted gross plant in service.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

LKE celebrated a special milestone as it held a ribbon-cutting ceremony for its new community solar facility in Simpsonville. The nearly 1,400 panel array recently became fully operational and began producing solar energy. The newly completed array is the first of eight 500-kilowatt Solar Share sections planned for the facility, with construction of each section to be completed as each becomes fully subscribed. Ford Motor Company and other participating businesses, as well as various public officials attended the ceremony.

LG&E recently filed 10 condemnation actions against 11 property owners in Bullitt County to gain the remaining easements for the construction of a new gas pipeline. In addition, Bernheim Forest filed a complaint with the KPSC challenging the certificate of public convenience and necessity for the pipeline as awarded to LG&E in its 2016 rate case. The KPSC has not issued an order to answer the complaint but established a case number and acknowledged receipt of the complaint.

The recently elected leadership team of IBEW 2100 has taken office. However, we understand a formal challenge to the election process has been sustained. As such, the Company anticipates a new election will be conducted by the union in the coming weeks.

The KPSC opened an administrative case regarding implementation of the Net Metering statute that was passed in March by the Kentucky legislature. The statue directed the KPSC, which determines all other rates, to consider and set the value of the energy net metering customers put back onto the grid. The purpose of the proceeding is to invite comments from utilities and stakeholders to develop a record which the KPSC can draw upon as it considers issues of implementation of the statue as each utility brings forward a case involving net metering tariffs (LG&E and KU intend to file such a tariff in its next rate case). Written comments are to be filed no later than September 20, 2019, and a public comment hearing will be held on October 1, 2019. The statue takes effect January 1, 2020.

Significant Future Events

There are no significant future events at this time.

Gross Margin:								
Electric Margin	$ 433	$ 422	$ 11	Due primarily to favorable demand revenues and lower purchased power demand costs due to OVEC not collecting for prepayment of debt.	$ 433	$ 428	$ 5	Due primarily to the termination of the TCJA surcredit and ECR rate base growth, partially offset by lower sales volumes and lower transmission margins.
Gas Margin	118	122	(4)		118	111	7	Due primarily to an increase in KPSC base rate revenues effective May 1, 2019 and the termination of the TCJA surcredit.
Total Gross Margin	551	544	7		551	539	12	
O&M	199	203	4		199	193	(7)	Due primarily to increase in contractor labor for line locating, veg. management, and an increase in repair expenses in 2019 at the Trimble County Generating Station including, FGD, Coal Feeder, and Mill Repairs offset by decrease in contractor labor for storm restoration.
Depreciation & Amortization	101	104	3		101	96	(6)	Due primarily to larger plant in service balance.
Taxes, Other than Income	21	21	1		21	20	(1)	
Other income (expense)	(1)	(2)	1		(1)	(4)	3	
EBIT	229	213	15		229	227	2	
Interest Expense	50	52	2		50	44	(6)	Primarily due to higher debt balances and higher interest rates.
Income from Ongoing Operations before income taxes	178	161	17		178	183	(5)	
Income Tax Expense	39	34	(5)	Primarily due to higher pre-tax income.	39	40	0	
Net Income (loss) from ongoing operations	**$ 139**	**$ 127**	**$ 12**		**$ 139**	**$ 143**	**$ (4)**	

Note: Schedules may not sum due to rounding and exclude purchase accounting adjustments and corresponding goodwill.

July 2019

($ Millions)

	Actual vs. Budget - YTD				Actual vs. PY - YTD			
	Actual	Budget	Variance	Comments	Actual	PY Actual	Variance	Comments
Gross Margin:								
Electric Margin	$ 663	$ 666	$ (3)		$ 663	$ 656	$ 7	Due primarily to an increase in KPSC base rate revenues effective May 1, 2019, the termination of the TCJA surcredit and ECR rate base growth, partially offset by lower sales volumes, lower transmission margins and the departure of 8 municipal customers.
Gas Margin	0	0	0		0	0	0	
Total Gross Margin	663	666	(3)		663	656	7	
O&M	216	232	16	Due primarily to higher labor and burdens recorded to capital and regulatory assets as well as open positions, and timing of other costs related to generation, IT and General Counsel. These costs are somewhat offset by storm restoration costs.	216	222	6	Due primarily to lower labor burdens (Pension & Medical), refined coal reg asset and timing of other costs related to generation, IT, Communications (Advertising) and Veg management.
Depreciation & Amortization	145	151	5	Due primarily to lower plant in service balance.	145	139	(6)	Due primarily to larger plant in service balance.
Taxes, Other than Income	19	20	1		19	19	(1)	
Other income (expense)	2	1	1		2	(0)	3	
EBIT	285	264	21		285	276	9

Income from Ongoing Operations before income taxes	221	200	22		221	218	3	
Income Tax Expense	47	41	(6)	Primarily due to higher pre-tax income.	47	46	(1)	
Net Income (loss) from ongoing operations	**$ 175**	**$ 159**	**$ 16**		**$ 175**	**$ 172**	**$ 3**	

Note: Schedules may not sum due to rounding and exclude purchase accounting adjustments and corresponding goodwill.

Income Statement: Forecast vs. Budget (Full Year) - LKE Consolidated — July 2019

($ Millions)

	Forecast vs. Budget - Full Year			
	Q2 Forecast	Budget	Variance	Comments
Gross Margin:				
Electric Margin	$ 1,870	$ 1,921	$ (51)	Lower electric margins due primarily to differences in actual vs. budgeted rate case revenue and removal of revenue challenge, partially offset by a change in purchased power demand assumptions.
Gas Margin	202	205	(3)	
Total Gross Margin	2,073	2,126	(54)	
O&M	783	790	7	Due primarily to delay in process water system in-service, reclassification of coal income and lower hardware/software maintenance contracts partially offset by an increase in line locating.
Depreciation & Amortization	433	448	15	Due primarily to lower than anticipated plant in service balance.
Taxes, Other than Income	70	72	2	
Other income (expense)	2	0	2	
EBIT	789	817	(28)	
Interest Expense	261	269	9	Due to lower average debt balances and lower forecasted interest rates.
Income from Ongoing Operations before income taxes	528	547	(19)	
Income Tax Expense	87	106	19	Primarily related to a recycling credit recognized in June 2019 in the forecast and lower pre-tax income.
Net Income (loss) from ongoing operations	**441**	**441**	**(0)**	
Special Item - (Non Operating Income)	0	0	0	
Discontinued Operations	(0)	0	(0)	
Net Income (loss)	$ 441	$ 441	$ (0)	
KY Regulated Financing Costs	(32)	(32)	(0)	
KY Regulated Net Income	$ 409	$ 409	$ (0)	
Earnings Per Share - Ongoing	$ 0.55	$ 0.55	$ 0.01

LKE Consolidated	16.8%	14.1%	14.7%	14.8%

Variance Explanations

Higher YTD adjusted gross margins, primarily due to lower purchased power demand costs and other offsetting margin components.

Lower MTD and YTD O&M primarily related to higher labor and burdens recorded to capital and regulatory assets as well as open positions, and timing of other costs.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

The Company deployed around 260 support personnel to help with Hurricane Dorian restoration efforts. A majority of the crews provided assistance to Dominion and South Carolina Gas and Electric.

LKE received approval from the KPSC for the installation of the 190 kW ground mount solar array at Maker's Mark in Loretto, KY. This will be the first Business Solar installation in the KU service territory. Construction began September 1 with completion expected by the end of the year.

Local newspaper Business First honored the Company with a Partners in Philanthropy Award for being an outstanding corporate citizen. LKE achieved a fourth place ranking [same as last year] in the large-company category. LKE has been ranked among the top five business philanthropists in the region each year since it began competing for the designation in 2012.

LKE was also recognized by Site Selection magazine as a top ten utility in the area of economic development. The Company has received this honor seven times since 2010.

LKE filed a notice of intent to submit an updated Gas Line Tracker plan at the end of September. The filing will ask for approval of costs associated with replacing portions of certain gas pipelines and conducting in-line inspections.

Virginia State Corporation Commission (VSCC) staff were on site the weeks of August 12 and September 16 as part of its procedures for the Virginia rate case.

Significant Future Events

A public comment hearing has been scheduled for October 2, and the formal hearing will be held January 22.

Variance Explanations

Higher MTD adjusted gross margins, primarily due to higher sales volumes from weather.

Higher YTD adjusted gross margins due to higher sales volumes of $13 million, primarily from weather, partially offset by other net margin components of $2 million.

Lower MTD O&M, primarily related to $4 million favorability on timing of gas in-line inspections, $2 million favorability from timing of other costs, and higher labor and burdens recorded to capital and regulatory assets, as well as open positions.

Lower YTD O&M, primarily related to $8 million higher labor and burdens recorded to capital and regulatory assets, as well as open positions, $7 million favorability from delay of process water systems and generation maintenance, $2 million in lower hardware/software maintenance, $2 million in lower insurance and legal consulting expenses, and timing of other costs.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

KU's Pineville Substation Construction and Maintenance employees won the Edison Electric Safety Achievement Award for 500,000 hours (or 24 years) without a lost-time incident.

In late September, FERC auditors returned for additional on-site interviews regarding the Company's Open Access Transmission Tariff (OATT) operational audit. FERC audit staff indicated they have not identified any findings of non-compliance and LKE controls and processes appear to be working appropriately. The auditors expect to provide a draft audit report to LKE in January 2020.

Both LG&E and Bernheim filed its reply brief to the KPSC regarding the Bullitt County pipeline case. LG&E took the position that Bernheim lacks standing to bring the complaint and otherwise fails to meet the statutory requirements to file a complaint. The Company is now waiting on a decision from the KPSC.

Virginia State Corporation Commission staff were on site again in September as part of its procedures for the Virginia rate case. Consistent with its August visit, the staff reviewed the Company's accounting, forecasting and budgeting processes since the case is for the 12 month period ending March 31, 2021, based on adjustments to calendar year 2018. A public comment hearing was also held on October 2. The Company is also working on various data requests from the Attorney General.

LG&E and KU filed an updated Gas Line Tracker plan with the KPSC. The filing will ask for approval of costs associated with replacing portions of certain gas pipelines and conducting in-line inspections. The procedural schedule calls for initial data requests to be due October 18th, and Company responses submitted by November 1st.

The Company is working on data requests regarding our IRP filing with the KPSC. LKE has received data requests from the Commission Staff, the Attorney General, and the Sierra Club.

Significant Future Events

The formal hearing for the Virginia rate case will be held January 22.

Regarding the gas line tracker case, supplemental requests for information are due November 15th, and Company responses must be filed by December 6th.

Income Statement: Actual vs. Budget (YTD) - LG&E — September 2019

($ Millions)

	Actual vs. Budget - YTD				Actual vs. PY - YTD			
	Actual	Budget	Variance	Comments	Actual	PY Actual	Variance	Comments
Gross Margin:								
Electric Margin	$ 580	$ 566	$ 15	Primarily due to higher sales volumes from weather, higher demand revenues and lower purchased power demand costs.	$ 580	$ 565	$ 15	Due primarily to the termination of the TCJA surcredit and ECR rate base growth, partially offset by lower sales volumes and lower transmission margins.
Gas Margin	140	145	(4)		140	132	9	Due primarily to an increase in KPSC base rate revenues effective May 1, 2019 and the termination of the TCJA surcredit.
Total Gross Margin	720	710	10		720	697	23	
O&M	256	269	13	Due primarily to favorable labor and burdens related to more labor charged to capital and regulatory outage asset as well as open positions, favorability from delay of process water system in-service, reclassification of refined coal income, timing of expenses for generation maintenance, software/hardware maintenance contracts and outside counsel, and timing of O&M expenses offset by higher storm expenses, line locating/in-line inspection expenses, and timing of vegetation management.	256	248	(8)	Due primarily to increase in contractor labor for line locating, veg. management, and an increase in repair expenses in 2019 at the Trimble County Generating Station including, FGD, Coal Feeder, and Mill Repairs offset by decrease in contractor labor for storm restoration.
Depreciation & Amortization	132	135	3		132	123	(9)	Due primarily to higher plant additions and new depreciation rates effective 5/1/2019.
Taxes, Other than Income	27	28	1		27	26	(1)	
Other income (expense)	(2)	(2)	0		(2)	(4)	3	
EBIT	304	276	28		304	296	8	
Interest Expense	65	68	3		65	57	(8)	Due primarily to higher debt balances and higher interest rates.
Income from Ongoing Operations before income taxes	239	208	31		239	239	(0)	
Income Tax Expense	51	43	(9)	Primarily due to higher pre-tax income	51	51	0	
Net Income (loss) from ongoing operations	**$ 188**	**$ 166**	**$ 22**		**$ 188**	**$ 188**	**$ 0**	

Note: Schedules may not sum due to rounding and exclude purchase accounting adjustments and corresponding goodwill.

Variance Explanations

Higher YTD adjusted gross margins due to higher sales volumes of $13 million, primarily from weather, partially offset by other net margin components of $2 million.

Lower YTD O&M, primarily related to $10 million higher labor and burdens recorded to capital and regulatory assets, as well as open positions, $9 million favorability from delay of process water systems and generation maintenance, $6m lower in gas in-line inspection costs, $2 million in lower hardware/software maintenance, $4 million in lower insurance and legal consulting expenses, and timing of other costs offset by $2m of higher line locating expenses and $1m of higher storm restoration costs.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

LKE won its 23rd J.D. Power award as KU ranked first among ten utilities in the Midwest Midsize segment of the 2019 Electric Business Study. KU's index score was 815. LG&E ranked third with an index score of 792. KU's and LG&E's scores rose 39 and 23 points over prior year, respectively.

IBEW 2100 held its election in June which resulted in a leadership change. This election was contested and recently rerun at the direction of the international office. The results of the second election were consistent with the previous outcome. LKE's relationship with the union remains strong and it does not expect any disruptions to operations as a result of this change in leadership.

Kentucky recently held its statewide elections and Republicans easily won five of the six races. Andy Beshear, the state attorney general and a Democrat, defeated the Republican incumbent Governor Bevin. The matchup resulted in a very close race with Beshear capturing 49.2 percent of the vote compared to Bevin's 48.8 percent (about 5,000 votes). Bevin formally requested counties recanvass their results. The recanvass was conducted on November 14th and confirmed Beshear's victory. In the race for attorney general, Republican Daniel Cameron made history with his victory over former Kentucky House Speaker Greg Stumbo. Cameron will be the first Republican attorney general in the state in more than 70 years. Cameron is a local attorney and previously served as legal counsel for U.S. Senate Majority Leader Mitch McConnell. Also on the ballot were races for agriculture commissioner, secretary of state, state treasurer, and state auditor.

The pace of enrollment in LKE's Solar Share Program is accelerating as the second 500kW array has recently reached full subscription. Construction plans are in development with an operational date planned in late spring 2020. LKE is now seeking subscriptions for the third array.

LKE won two more Edison Electric Safety Achievement Awards as the Norton Operations and Electric Distribution Engineering Designs employees recently were recognized with the honor.

The EPA Administrator signed an Order, denying the petition submitted by Sierra Club objecting to a proposed Clean Air Act title V operating permit issued to LG&E's Mill Creek Generating Station. The Order responds to a June 2, 2017, petition requesting that the EPA object to the final operating permit. The Sierra Club claimed that the permitting action "Includes an impermissible long-term emission limit that is inadequate to protect the 1-hour sulfur dioxide National Ambient Air Quality Standards ("NAAQS") and, even if it were permissible, the long-term limit is too high to protect the NAAQS". This permitting action was issued by the Louisville Metro Air Pollution Control District. The Order constitutes a final action on the petition.

Significant Future Events

The formal hearing for the Virginia rate case will be held January 22.

LKE is planning to file an ECR plan in early 2020 to address Effluent Limitations Guidelines regulation.

LKE Consolidated	16.9%	14.2%	16.9%	14.8%

Variance Explanations

Higher MTD adjusted gross margins due to higher sales volumes of $5 million, primarily from weather, and other net margin components of $2 million.

Higher YTD adjusted gross margins due to higher sales volumes of $18 million, primarily from weather, partially offset by other net margin components of $1 million.

Lower YTD O&M, primarily related to $10 million higher labor and burdens recorded to capital and regulatory assets, as well as open positions, $7 million favorability from delay of process water systems and generation maintenance, $6 million lower gas in-line inspection costs, $2 million in lower hardware/software maintenance, $4 million in lower insurance and legal consulting expenses, and timing of other costs; offset by $2 million of higher line locating expense and $1 million of higher storm restoration costs.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

LG&E and KU received word from FERC's operational audit team that a report draft is circulating within FERC and that it is a clean report with no adverse findings. The final report is scheduled to be issued early next year.

SERC recently processed many of LG&E and KU's open NERC Critical Infrastructure Protection ("CIP") self-reports. SERC closed nine of these issues as either Compliance Exceptions (CE - no fine and issues not included in compliance history) or as Find, Fix, and Track (FFT - no fine but issues included in compliance history). LG&E and KU have 5 remaining open CIP self-reports.

A fire broke out at the Ghent plant's coal combustion residual conveyor system. No one was injured. Full scope of the damage is being assessed. Cause of the fire is currently under investigation. Operations will continue at Ghent with minimal disruption.

LKE reached agreement with the Kentucky Department of Revenue regarding its $25 million recycling credit application. The agreement is consistent with the assumptions used to record a $17 million after-tax benefit in June 2019.

LG&E and KU, along with certain external partner agencies, participated in GridEx V at Company locations. The exercise scenarios presented various cyber and physical attacks on the LG&E and KU generation and transmission systems, providing the participants the opportunity to test various response plans and processes, problem solve, and gather lessons learned.

Significant Future Events

The formal hearing for the Virginia rate case will be held January 22.

LKE is planning to file an ECR plan in Q1 2020 to address Effluent Limitations Guidelines regulation.

Income Statement: Actual vs. Budget (YTD) - LKE Consolidated

November 2019

($ Millions)

	Actual vs. Budget - YTD				Actual vs. PY - YTD			
	Actual	Budget	Variance	Comments	Actual	PY Actual	Variance	Comments
Gross Margin:								
Electric Margin	$ 1,747	$ 1,728	$ 19	Due primarily to higher sales volumes from weather and other offsetting margin components.	$ 1,747	$ 1,700	$ 47	Due primarily to an increase in KPSC base rate revenues effective May 1, 2019, the termination of the TCJA surcredit and ECR rate base growth, partially offset by lower sales volumes, lower transmission margins and the departure of 8 municipal customers.
Gas Margin	175	177	(2)		175	162	13	Due primarily to an increase in KPSC base rate revenues effective May 1, 2019 and the termination of the TCJA surcredit.
Total Gross Margin	1,922	1,905	17		1,922	1,862	60	
O&M	695	730	34	Due primarily to higher labor and burdens recorded to capital and regulatory assets, as well as open positions, favorability from delay of process water systems and generation maintenance, lower hardware/software maintenance, insurance and legal consulting expenses, and timing of other costs.	695	702	7	Due primarily to higher PPL costs and line locating/in-line inspection expenses offset by favorable storm restoration expenses.
Depreciation & Amortization	394	409	15	Due primarily to lower spend and higher retirements.	394	370	(23)	Due primarily to higher plant additions and new depreciation rates effective 5/1/2019.
Taxes, Other than Income	64	66	2		64	61	(3)	
Other income (expense)	2	0	2		2	(3)	5	Due primarily to contributions to 501(c)(3) organizations moved to the Foundation, Industrial Coal Sales reclassified from O&M and a change to pension nonservice costs offset by PeopleSoft Time write-off and timing of heating assistance program funding.
EBIT	771	700	71		771	726	45	
Interest Expense	235	246	11	Due primarily to lower interest rates and lower debt balances.	235	211	(23)	Due primarily to higher debt balances and higher interest rates.
Income from Ongoing Operations before income taxes	536	454	82		536	514	22	
Income Tax Expense	94	88	(6)	Due to higher pre-tax income offset by a $25M state recycling credit with a $3M valuation allowance ($17M after federal benefit) related to gypsum dewatering systems that went into service during Q2 2019.	94	108	14	Due primarily to the recording of a $25M state recycling credit with a $3M valuation allowance ($17M after federal benefit) related to gypsum dewatering systems that went into service during Q2 2019.
Net Income (loss) from ongoing operations	**442**	**366**	**76**		**442**	**407**	**36**	
Special Item - (Non Operating Income)	0	0	0		0	(7)	7	In 2018, due to Kentucky state tax reform resulting in a reduction of the Kentucky Corporate income tax, a $9 million deferred tax expense was recorded related to the revaluing of non-utility deferred taxes offset by $1.9 million adjustment due to the KPSC TCJA outcome.
Discontinued Operations	(0)	0	(0)		(0)	0	(0)	
Net Income (loss)	$ 442	$ 366	$ 76		$ 442	$ 399	$ 43

Variance Explanations

Lower MTD adjusted gross margins due to $30 million of additional revenue budgeted in December and lower sales volumes of $3 million, primarily from weather.

Lower YTD adjusted gross margins due to $30m of additional revenue achieved in other income statement line items, partially offset by higher sales volumes of $15 million, primarily from weather.

Higher MTD O&M primarily due to $3 million generation maintenance, $3 million distribution operation and other expenses, $2m gas inline inspections, $1 million facility maintenance and $1 million advertising expenses.

Lower YTD O&M, primarily related to $11 million higher labor and burdens recorded to capital and regulatory assets, as well as open positions, $7 million favorability from generation outages and a reclassification, $4 million lower gas in-line inspection costs, $3 million in lower hardware/software maintenance, $3 million in lower insurance and legal consulting expenses, $2 million bad debt expense and $2m in permitting; offset by $4 million of higher line locating and other gas expenses, $3m electric distribution operation and other expenses, $2m of facility maintenance and $1 million of higher storm restoration costs.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

LKE won its 24th J.D. Power award (and third this year) as LG&E ranked first among 19 utilities in the Midwest segment of the 2019 Gas Business Study. LG&E earned a score of 833 which represents an increase of 32 points over prior year.

The KPSC recently issued three orders related to the Bullitt County pipeline. All three decisions were very favorable to the Company.

The Company completed its first KU business solar project, a 200 kW and 560 panel solar array with Maker's Mark.

KU reached an agreement in principal with Virginia commission staff and all intervenors on the revenue requirement of the current rate case with a resulting 13% revenue increase representing 75% of KU's request. It was a "black box" settlement with no specified ROE; however, a 9-10% ROE range is specified as reasonable and will be used for other regulatory purposes. The results were in line with the business plan. The rate design portion of the case will still go to hearing.

Significant Future Events

LKE is planning to file an ECR plan in Q1 2020 to address Effluent Limitations Guidelines regulation.

LKE will begin construction of the second 500 kW section of the Company's Solar Share Project in Q1 2020. Full commissioning is expected on or before June 1, 2020.

Balance Sheet - LKE Consolidated — December 2019

($ Millions)

	Actual	YTD Budget	PY Actual	Variance to Budget	Comments
Assets:					
Current Assets:					
Cash and Cash Equivalents	$ 27	$ 14	$ 24	$ 13	Primarily due to timing of cash receipts at the Utilities.
Accounts Receivable (Trade)	434	450	415	(16)	
Inventory	250	248	248	3	
Deferred Income Taxes	0	0	0	0	
Regulatory Assets Current	41	23	25	17	Primarily due to increased gas cost and higher beginning gas supply regulatory asset balance in December 2018 and outage normalization balance due to the change in the average method approved by KPSC
Prepayments and other current assets	91	67	81	24	Primarily due to two new refined coal contracts - one LG&E and one LG&E/KU split – being signed after the budget was completed and higher than anticipated prepayments partially offset by lower other preliminary survey charges.
Total Current Assets	843	802	793	41	
Property, Plant, and Equipment	13,085	13,191	12,614	(106)	
Intangible Assets	117	70	78	47	Reclassification of operating leases from Property, Plant and Equipment.
Other Property and Investments	1	1	1	0	
Regulatory Assets Non Current	766	790	849	(24)	
Goodwill	997	997	997	0	
Other Long-term Assets	122	96	81	27	Primarily due to the impact of updated demographics from the 1/1/19 census and higher earnings on investments in 2019 versus budget partially offset by a decrease in the discount rate, negative return on investments in 2018 versus budget and lower VEBA contributions in 2019; higher long-term IT prepayments, other preliminary survery charges and Cane Run 7 LTPC and Brown 6 LTSA assets.
Total Assets	**$ 15,931**	**$ 15,946**	**$ 15,412**	**$ (15)**	
Liabilities and Equity:					
Current Liabilities:					
Accounts Payable (Trade)	$ 327	$ 270	$ 376	$ 56	Primarily due to higher than anticipated accounts payable reg, natural gas, refined coal, and trade, along with higher CWIP/RWIP accruals.
Dividends Payable to Affiliated Companies	0	0	0	0	
Customer Deposits	62	59	61	3	
Derivative Liability	4	4	4	1	
Accrued Taxes	58	46	63	12	Primarily due to timing of property tax payments expected to occur in the budget versus actuals and timing of income tax accruals versus payments.
Regulatory Liabilities Current	19	16	48	2	
Other Current Liabilities	261	271	240	(10)	
Total Current Liabilities	731	667	791	64	
Debt - Affiliated Company	800	933	763	(133)	Lower notes payable to PPL primarily due to lower capital contributions to the Utilities.
Debt [(1)]	5,740	5,648	5,367	92	
Total Debt	6,540	6,580	6,130	(40)	
Deferred Tax Liabilities	1,069	1,098	956	(29)	
Investment Tax Credit	124	123	126	1	
Accum Provision for Pension & Related Benefits	233	233	282	0	
Asset Retirement Obligation	145	169	214	(24)	Decrease primarily due to ARO revaluations since the budget was completed partially offset by lower RWIP spend.
Regulatory Liabilities Non Current	1,973	1,964	2,039	9	
Derivative Liability	17	11	16	7	
Other Liabilities	155	154	136	1	
Total Deferred Credits and Other Liabilities	3,717	3,752	3,768	(35)	
Equity	4,943	4,946	4,722	(4)	
Total Liabilities and Equity	**$ 15,931**	**$ 15,946**	**$ 15,412**	**$ (15)**	

(1) Includes all ST and LT debt. See Financing Activities page for details.
Note: Schedules may not sum due to rounding.

LKE Consolidated	16.4%	16.9%	16.8%	17.3%

Variance Explanations

Lower YTD adjusted gross margins due to $15 million of additional revenue budgeted in January, $12 million of lower sales volumes from weather, and $5 million of lower demand revenues.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Major Developments

LKE filed their application with the KPSC for approval of a power purchase agreement for 100 MW of solar energy and the associated special contracts with Toyota and Dow for 50% and 25%, respectively, of the energy from the project. The KPSC issued a procedural schedule in the solar case which suggests they intend to issue an order by mid-May.

Significant Future Events

LKE is planning to file an ECR plan in Q1 2020 to address Effluent Limitations Guidelines regulation.

LKE recently began construction of the second 500 kW section of the Company's Solar Share Project. Full commissioning is expected on or before June 1, 2020.

Note: Schedules may not sum due to rounding.

Variance Explanations

Lower MTD adjusted gross margins due primarily to $5 million of lower sales volumes from weather.

Lower YTD adjusted gross margins due primarily to $15 million of additional revenue budgeted in January, $17 million of lower sales volumes from weather, and $6 million of lower demand revenues.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

There were a number of developments in the various customer renewable offerings of LG&E and KU this month:

- The new 560-panel solar array built for Maker's Mark went online. KU owns and maintains the solar array, while Maker's Mark pays a monthly fee and earns bill credits for the energy produced by the system.
- LG&E and KU began construction of the second 500 kW phase of the Company's Solar Share program. Full commissioning of this phase is expected on or before June 1, 2020.
- The KPSC held a conference with all parties to LG&E and KU's solar PPA filing in order to discuss questions and concerns of the KPSC. The Company will be providing supplemental information by March 23rd.

LG&E and KU submitted a notice of intent to the KPSC for filing its 2020 Environmental Cost Recovery Plan around March 31, 2020. The 2020 ECR Plan will include installation of facilities at Ghent, Trimble County and Mill Creek to comply with the Effluent Limitation Guidelines regulation.

Variance Explanations

Lower MTD adjusted gross margins due primarily to $8 million of lower sales volumes from weather and $2 million of lower demand revenues.

Lower YTD adjusted gross margins due primarily to $15 million of additional revenue budgeted in January, $26 million of lower sales volumes from weather, and $8 million of lower demand revenues.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

The VSCC issued an Order approving the settlement in the Virginia rate case. The new rates will be effective May 1, 2020.

The KPSC issued a procedural order in the solar PPA case which cancelled the April 14 hearing and established a briefing schedule with the case to then be submitted for decision. An order is still expected by mid-May.

The Company filed its 2020 ECR Plan with the KPSC as planned to address the EPA's Effluent Limitations Guideline rule. An order is expected in six months.

The KPSC issued an Order to address the COVID-19 pandemic which included a moratorium on disconnections for non-payment and fees for late payments until further notice.

KU and LG&E filed applications with the KPSC seeking authority to increase their revolving lines of credit and to issue long-term debt totaling $750 million and $400 million respectively. KU filed a similar application with the VSCC. The requests ensure liquidity should arrearages and bad debts increase significantly due to the moratorium on disconnects and waiver of late payment charges as a result of the COVID 19 pandemic.

LG&E made its quarterly gas supply clause adjustment filing for gas bills effective May 1. The May 2020 commodity cost per CCF is the lowest for LG&E customers since August 1995. We expect lower commodity costs and less generation dispatch will also lead to a lower fuel adjustment clause for our electric retail customers.

Significant Future Events

There are no significant future events to report at this time.

Variance Explanations

Lower MTD adjusted gross margins due to $10 million of lower demand revenues and $2 million of lower sales volumes, primarily due to the impacts of COVID-19.

Lower YTD adjusted gross margins due to $27 million of lower sales volumes ($25 million from weather and $2 million from COVID-19), $18 million of lower demand revenues ($10 million from COVID-19 and $8 million of other), and $15 million of additional revenue budgeted in January.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

The KPSC issued an order in the solar purchase power proceeding. The order approves the contracts between KU and Toyota and Dow, but with modifications that may not be acceptable to Toyota or Dow. The order may also place KU and LG&E at risk for cost disallowances for the remaining 25% assigned to native load customers. The Companies are considering seeking a request for clarification and/or rehearing which must be filed by the end of the May.

The KPSC issued an order establishing a procedural schedule for the ECR proceeding. Initial data responses are due May 22 with supplemental responses scheduled to be submitted on June 22. A decision in the case is expected by the end of September.

Significant Future Events

There are no significant future events to report at this time.

Variance Explanations

Lower MTD adjusted gross margins due primarily to $2 million of lower sales volumes from weather and $4 million of lower demand revenues from COVID-19, partially offset by $1 million of favorable gas volumes.

Lower YTD adjusted gross margins due primarily to $29 million of lower sales volumes ($27 million from weather and $2 million from COVID-19), $22 million of lower demand revenues ($14 million from COVID-19 and $8 million of other), and $15 million of additional revenue budgeted in January.

Lower MTD O&M due primarily to $2 million of lower labor and supplemental contractors, $1 million timing of generation maintenance, $1 million timing of gas inline inspections and $1 million T&D vegetation management and storm restoration.

Lower YTD O&M due primarily to $4 million timing of generation maintenance, $3 million of generation labor and supplemental contractors, $2 million timing of shared service expenses, $1 million of storm restoration and $2 million of stock compensation, partially offset by $3 million timing of vegetation management and $1 million of line locating.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

Nearly 1,300 solar panels have been installed at the Company's Solar Share site in Simpsonville, Kentucky to complete the second 500 kW section of the 4 MW array. Phase 3 of the facility is over 63 percent subscribed.

The Company recently completed its final process water treatment system (PWS) at its Brown generating station. The PWS projects totaled about $462 million. Each PWS facility was placed into service as planned in time to allow each station's coal combustion residuals impoundments to be closed as outlined in the 2016 Environmental Cost Recovery (ECR) filing. The 2016 ECR plan continues to be on target to be completed well within the originally filed estimate.

The Virginia State Corporation Commission issued an order which extended the moratorium on service disconnections for all utility customers through the end of August due to the coronavirus pandemic. The Kentucky Public Service Commission's moratorium on disconnects and late payment fees remains in place with no established end date.

Significant Future Events

A decision in the ECR case before the KPSC is expected by the end of September.

Gross Margin:								
Electric Margin	$ 740	$ 805	$ (64)	Lower gross margins due to $29 million of lower sales volumes ($27 million from weather and $2 million from COVID-19), $22 million of lower demand revenues ($14 million from COVID-19 and $8 million of other), and $15 million of additional revenue budgeted in January.	$ 740	$ 747	$ (7)	Due primarily to lower energy and demand revenues from weather and COVID-19, partially offset by higher base rates and the elimination of the TCJA surcredit effective May 1, 2019.
Gas Margin	111	111	0		111	94	17	Due primarily to higher base rates and the elimination of the TCJA surcredit effective May 1, 2019, partially offset by lower energy and demand revenues from weather and COVID-19.
Total Gross Margin	851	916	(64)		851	841	10	
						0		
O&M	307	317	10	Due primarily to generation labor/supp labor charged to capital, generation maintenance including delayed PWS commissioning and Boiler maintenance timing, PPL stock compensation, storm restoration, and shared services expenses including gain on sale of parking lot, HW/SW maintenance and insurance savings, and timing of legal matters, partially offset by COVID19 expenses, line locating, and timing of veg mgmt.	307	318	11	Due primarily to decreased burdens from a change in methodology for worker's comp, change in outage normalization from an 8 year average to 5 year, gain on the sale of a KU parking lot, lower PPL charges, lower regular ongoing O&M partially offset by COVID19 expenses.
Depreciation & Amortization	187	187	0		187	175	(12)	Due primarily to higher plant in service as a result of lower retirements and more additions.

Variance Explanations

Lower YTD adjusted gross margins due primarily to $29 million of lower sales volumes ($27 million from weather and $2 million from COVID-19), $25 million of lower demand revenues ($17 million from COVID-19 and $8 million of other), $15 million of additional revenue budgeted in January and $2 million in lower late payment and reconnect fees from COVID-19.

Lower MTD O&M, primarily due to $3 million net COVID-19 reclass to special item, $3 million timing of maintenance and operation expenses, $1 million of generation labor and supplemental contractors, partially offset by $1 million of PPL charges and $1 million of pension and postretirement expenses.

Lower YTD O&M, primarily due to $8 million of maintenance and operation expenses, $4 million of generation labor and supplemental contractors, $1 million related to storm restoration costs, $1 million related to the delay of the process water system, $1 million of PPL charges and $1 million of insurance expenses, partially offset by $3 million of vegetation management expenses, $1 million of line locating control expenses and $1 million timing of outside legal services.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

KU was named among the 2020 Most Trusted Brands list according to a residential study from Escalent, a top human behavior and analytics firm. KU was within one point of the nation-best score for the electric service category. This is especially noteworthy as the recognition highlights customers trust in our Companies during the COVID-19 pandemic.

LG&E and KU were one of only 12 companies with Interactive Voice Responses (IVRs) to receive the 2020 Gold Stethoscope Award from IVR Doctors Market and Strategies International for Top Quartile performance in Functionality, Usability, and Aesthetics. LKE has won IVR awards for eight of the past ten years.

Kent Chandler was appointed as a Commissioner to the KPSC by Governor Andy Beshear. Chandler's term will expire June 30, 2024 and his appointment is subject to confirmation by the Senate. Prior to his appointment, Chandler served as Executive Director of the KPSC, and will continue as Acting Executive Director until a replacement is named. Prior to serving as Executive Director, Chandler served as an advisor to the KPSC and an attorney in the Kentucky Attorney General's Office of Rate Intervention under then Attorney General Beshear.

Significant Future Events

A decision in the ECR case before the KPSC is expected by the end of September.

Variance Explanations

Higher MTD adjusted gross margins, primarily due to $11 million of higher sales volumes, of which $6 million was related to weather and $5 million was related to COVID-19, due to higher residential usage, partially offset by $2 million of lower demand revenue from COVID-19 and $1 million of lower late payment and reconnect fees from COVID-19.

Lower YTD adjusted gross margins, primarily due to $17 million of lower sales volumes, of which $21 million was related to weather, partially offset by $4 million related to COVID-19, primarily due to higher residential usage, $27 million of lower demand revenues, of which $19 million was related to COVID-19 and $8 million of other, $3 million of lower late payment and reconnect fees from COVID-19, and $15 million of additional revenue budgeted in January, partially offset by $3 million of other net margin items.

Lower MTD O&M, primarily due to $2 million of labor and supplemental contractors, $2 million of labor burden and PPL allocated costs and $1 million timing of vegetation management.

Lower YTD O&M, primarily due to $5 million of timing of plant maintenance and operation expenses, $5 million of generation labor and supplemental contractors, $3 million of labor burden and PPL allocated costs, $2 million related to the delay of the process water system, $1 million related to storm restoration costs, $1 million of IT operation costs, $1 million timing of advertising costs, $1 million of insurance expenses and $1 million of lower bad debt expenses, partially offset by $2 million of vegetation management expenses and $1 million of line locating expenses.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

In J.D. Power's Midpoint Electric Residential Study, KU and LG&E ranked first and third, respectively, among 16 utilities in the Midwest Midsize segment. KU and LG&E earned customer satisfaction index scores of 782 and 760.

LKE received and responded to data requests from KPSC staff in our ECR proceeding questioning the continuation of our authorized 9.725% return on equity.

KPSC staff issued their report on LG&E and KU's joint 2018 integrated resource plan ("IRP"). The KPSC has scheduled a hearing in the proceeding for September 15th, and scheduled an informal conference for August 26th to discuss the scope of the hearing and to identify witnesses.

Significant Future Events

A decision in the ECR case before the KPSC is expected by the end of September.

Variance Explanations

Lower MTD adjusted gross margins, primarily due to $3 million of lower sales volumes, of which $5 million was related to weather, partially offset by $2 million related to COVID-19, primarily due to higher residential usage, $3 million of lower demand revenues from COVID-19, and 1 million of lower late payment and reconnect fees from COVID-19.

Lower YTD adjusted gross margins, primarily due to $20 million of lower sales volumes, of which $26 million was related to weather, partially offset by $6 million related to COVID-19, primarily due to higher residential usage, $30 million of lower demand revenues, of which $22 million was related to COVID-19 and $8 million of other, $5 million of lower late payment and reconnect fees from COVID-19, and $15 million of additional revenue budgeted in January, partially offset by $3 million of other net margin items.

Lower YTD O&M primarily due to $8 million of timing of plant maintenance and operating expenses, $5 million of generation labor and supplemental contractors, $3 million of labor burden and PPL allocated costs, $2 million related to the delay of process water system costs, $2 million of lower bad debt expense, and $3 million of other that individually were not significant compared to budget.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

As of September 1, 2020, Project Engineering and their contractors have gone one year and surpassed 1,000,000 hours worked in the field with zero Recordables. Project Engineering's projects include large power plant demolition projects at five different retired generation stations, CCR impoundment closures throughout Kentucky, and water treatment projects at Ghent, Mill Creek, Trimble County and E.W. Brown.

The Company deployed over 200 resources to assist with storm restoration efforts in the aftermath of Hurricane Laura.

Site Selection magazine released its "Top 20 Utilities" in the U.S. edition, and for the eighth time since 2010 LG&E-KU received this honor. LG&E-KU was the only Kentucky-based utility included in the list. The magazine highlights several economic development topics.

LG&E and KU's "empowering possibilities" branding campaign has won 1st place in the E Source national advertising awards in the brand category. There were approximately 50 other utilities competing in this category and around 130 total campaigns submitted to the awards as a whole. The campaign is most recognized by the TV commercial "This little light of mine" which was later converted into an employee-sung rendition. Extensions of the campaign aim to empower customers with safety and savings, empower businesses with low rates and opportunities, empower communities through diversity and inclusion, and empower employees with career opportunities.

An informal conference in the solar PPA case was held recently during which the Company presented alternatives for how to address the KPSC's review of the economics of the PPA and cost recovery. The Company's proposed methodology was designed to address all expressed KPSC concerns with any cumulative incremental cost (under the limited scenarios presented by the Company where that might occur) to be addressed at the end of the 20-year PPA term. The Companies are filing testimony on September 18th in support of the proposed methodology discussed at the informal conference. After the filing the KPSC will either schedule a formal conference or reestablish the procedural schedule.

A hearing was held in the ECR case and there were a number of questions regarding the appropriate ROE and the least cost analysis. The Company also received a few post hearing data requests. The final order is expected by September 30.

Significant Future Events

The Company will submit a notice of intent to the KPSC on or around October 23 regarding the filing of its 2020 rate case.

Variance Explanations

Lower MTD margins primarily due to $2 million of lower sales volumes from weather, $3 million of lower demand revenues from COVID-19 and $1 million of lower late payment and reconnect fees from COVID-19.

Lower YTD margins primarily due to $23 million of lower sales volumes, $29 million related to weather partially offset by $6 million related to COVID-19 due to higher residential usage, $33 million of lower demand revenue, $25 million related to COVID-19 and $8 million of other, $5 million of lower late payment and reconnect fees from COVID-19 and $15 million of additional revenue budgeted in January.

Lower YTD O&M primarily due to $8 million of timing of plant maintenance and operating expenses, $7 million of generation labor and supplemental contractors, $3 million of labor burden and PPL allocated costs, $2 million related to the delay of process water system costs and $6 million of other that individually were not significant compared to budget.

(1) Full year forecast amount shown represents target.

(2) Net of cost recovery mechanisms and variable costs of production.

(3) Includes Management O&M, variable cost of production and mechanism operation and maintenance expenses.

(4) Actuals represents trailing twelve months.

(5) Excludes goodwill and other purchase accounting adjustments.

Note: Schedules may not sum due to rounding.

Major Developments

The Company has released approximately 100 support personnel to assist Entergy Louisiana with Hurricane Delta. This represents the third deployment in recent months as resources were also sent to help with Hurricanes Sally and Laura.

The KPSC issued an Order approving LKE's Effluent Limitation Guidelines ("ELG") compliance plan. The KPSC also set a definitive materiality threshold for our capital projects requiring a certificate of public convenience and necessity prior to making commitments or starting construction at $100 million. The KPSC set the return on equity for the ELG plan at 9.2%. LG&E and KU will have the opportunity to address return on equity on all of its ECR plans and base rates in its upcoming base rate proceeding.

LG&E and KU have fully subscribed section 3 of the Community Solar Share facility in Simpsonville, KY. It is expected to be fully operational in the Spring of 2021. We have already begun signing customers up for section 4.

FERC issued two orders on the rehearing requests the parties filed regarding FERC's requirement of a Transition Mechanism as a condition for the termination of the end of the Company's depancaking obligations. In the orders, FERC modified and set aside in part FERC's prior orders, resulting in certain changes to the Transition Mechanism requirements. The orders provided certainty that LKE's depancaking obligations will end by 2029 and excluded certain contracts as argued by LKE. The Orders did require reimbursement of some costs that we argued to exclude; however, those rulings were expected.

The Virginia State Corporation Commission ("VSCC") issued an order terminating the moratorium on disconnects October 5, 2020. This follows a similar ruling by the KPSC in which the moratorium on disconnections was terminated effective October 20. The Orders include prescriptive measures on how all utilities under their jurisdictions should deal with customers regarding their past due accounts. The KPSC continues the moratorium against charging late payment fees to residential customers through the end of the year.

Significant Future Events

The Company will submit a notice of intent to the KPSC on or around October 23 regarding the filing of its 2020 rate case.

A hearing has been scheduled in the solar PPA case for October 27.
