

**COMMONWEALTH OF KENTUCKY
BEFORE THE KENTUCKY STATE BOARD ON
ELECTRIC GENERATION AND TRANSMISSION SITING**

In the Matter of:

ELECTRONIC APPLICATION OF GREEN)
RIVER SOLAR LLC FOR A CERTIFICATE OF)
CONSTRUCTION FOR AN APPROXIMATELY)
200 MEGAWATT MERCHANT ELECTRIC) Case No. 2020-00387
SOLAR GENERATING FACILITY IN)
BRECKENRIDGE AND MEADE COUNTY,)
KENTUCKY, PURSUANT TO KRS 278.700)
AND 807 KAR 5:110)

**GREEN RIVER SOLAR LLC'S
PRE-HEARING FILING**

Comes now Green River Solar LLC, (“Green River”), by and through counsel, pursuant to 807 KAR 5:0110, Section 6 and other applicable law, and does hereby give notice of its intent to make the following witnesses available for examination at the hearing for this matter which is scheduled for 1:30 PM on Monday, November 1, 2021:

Ms. Lina Jensen, Project Manager, of NextEra Energy Resources will be available to provide testimony concerning the Project generally.

Mr. Matthew Towery of NextEra Energy Resources will be available to provide testimony concerning the design of the Project and planning for the Project’s construction phase.

Mr. Brian Bartels of NextEra Energy Resources will be available to provide testimony concerning the environmental considerations relating to the Project.

Mr. Chris Mason, of Environmental Consulting & Technology, Inc., will be available to provide testimony concerning site work and the Project’s Site Assessment Report. This report was

tendered as part of Green River's application. Mr. Mason's CV is attached hereto and incorporated herein as Exhibit 1.

Mr. Joshua Crawford, of the Pegasus Institute, will be available to provide testimony concerning the Project's Economic Impact Report. This report was tendered as part of Green River's application. Mr. Crawford's CV is attached hereto and incorporate herein as Exhibit 2.

This 25th day of October, 2021.

Respectfully submitted,

David S. Samford
L. Allyson Honaker

Counsel for Green River Solar LLC

CERTIFICATE OF SERVICE

This is to certify that the electronic filing has been transmitted to the Commission on October 25, 2021 and that there are currently no parties in this proceeding that the Commission has excused from participation by electronic means. Pursuant to the Commission's July 22, 2021 Order in Case No. 2020-00085 no paper copies of this filing will be made.

Counsel for Green River Solar LLC

> Christopher Mason

Senior Manager – Environmental Permitting

Mr. Mason has more than thirteen years of environmental consulting experience with an emphasis on environmental due diligence and permitting, contaminated site management, and site assessment and remediation. As an experienced project manager and environmental scientist, Mr. Mason has developed significant experience with power sector, oil & gas, industrial, and public sector clients. His renewable energy experience includes distributed generation and utility scale solar projects in several states including Kentucky, Maine, Michigan, Pennsylvania, Virginia, and others. Mr. Mason obtained his bachelor's degree in biology, with a minor in environmental studies. He also obtained a master's degree in earth and environmental sciences with a focus on aquatic resources and environmental law.

PROJECT EXPERIENCE

Green River Solar | NextEra | Breckenridge County, KY

Project Manager for environmental due diligence, environmental permitting, and local permitting of an approximately 200 MW solar facility. Serving as the client contact, Mr. Mason coordinates project tasks in support of early due diligence efforts, including agency coordination, environmental studies, siting avoidance strategies and permitting. Provides agency coordination and permitting support for the project, including the U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, the Kentucky Electrical Generation Siting Board, as well as local municipalities.

Sebree Solar | NextEra | Henderson County, KY

Project Manager for environmental due diligence, environmental permitting, and local permitting of an approximately 250 MW solar facility. Serving as the client contact, Mr. Mason coordinates project tasks in support of early due diligence efforts, including agency coordination, environmental studies, siting avoidance strategies and permitting. Provides agency coordination and permitting support for the project, including the U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, the Kentucky Electrical Generation Siting Board, as well as local municipalities.

West River Solar Project | NextEra | Augusta, ME

Research, develop, submit, and present site plan permission application and supplements for solar site development in the City of Augusta, ME. Coordinate with client regarding submission requirements of planning permissions, public hearing requirements, fees, negotiation of conditions of approval, and public presentation.

Solar Portfolio Permit-by-Rule | Virginia

Project Manager for preparation of Permit-by-Rule applications for three utility scale solar facilities in Virginia. Projects are located in Louisa County, Pittsylvania County, and Prince Edward County and range from 30 MW to 130 MW. Application requirements include interconnection studies and agreements, environmental impact assessments, mitigation plans, environmental permitting documentation, public review, and other studies.

Solar Portfolio | Michigan

Project Manager for multiple solar projects across the state of Michigan ranging from 5 MW to 20 MW. Primary tasks include wetland and waterways delineation, threatened and endangered species review, cultural and historical resources assessment, Phase I Environmental Site Assessment, and local permitting support.

PROFESSIONAL HISTORY

Senior Manager, Environmental Consulting & Technology, Inc., August 2020 to present

Project Manager, Environmental Scientist, AECOM, May 2008 to August 2020

Intern, Susquehanna River Basin Commission, summers of 2005 and 2006

EDUCATION

M.S., Earth & Environmental Science
Lehigh University

B.S., Biology
Lycoming College

CREDENTIALS

OSHA HAZWOPER

OSHA Construction Safety and Health

The Groundwater Pollution and Hydrology Course, Princeton Groundwater, Inc.

AREAS OF EXPERTISE

Project Management

Environmental Permitting

Due Diligence

Local Permitting

Site Investigation

Soil and Groundwater Remediation

> Christopher Mason

Senior Manager – Environmental Permitting

Page 2

Cathcart Solar | Columbus, NC

Project Manager for Phase I Environmental Site Assessment for a proposed solar facility to be located on an approximately 62-acre parcel.

Stanly Solar | Stanly County, NC

Project Manager for Phase I Environmental Site Assessment for a proposed solar facility to be located on an approximately 365-acre parcel.

Hillman Solar | Montmorency County, MI

Project Manager for environmental due diligence and permitting of a proposed solar facility. Primary tasks include wetland and waterways delineation, threatened and endangered species review, and cultural and historical resources assessment.

Iris Solar | Somerset County, PA

Project Manager for preparation of critical issues analysis for proposed solar facility.

Couch Creek Solar | Lunenburg County, VA

Project Manager for preparation of critical issues analysis for proposed solar facility.

Emporia Solar | Greensville County, VA

Project Manager for preparation of critical issues analysis for proposed solar facility.

Moonlight Solar | Isle of Wight County, VA

Project Manager for preparation of critical issues analysis for proposed solar facility.

Purdy Solar | Greensville County, VA

Project Manager for preparation of critical issues analysis for proposed solar facility.

Kidds Store Solar | Fluvanna County, VA

Project Manager for preparation of critical issues analysis for proposed solar facility.

CIAs for Solar Portfolio | Virginia

Project Manager for preparation of four critical issues analyses for proposed solar facilities in the state of Virginia.

CIAs for Solar Portfolio | Nationwide

Assisted with preparation of six critical issues analyses for solar facilities located in Louisiana, Iowa, Illinois, Michigan, and Ohio.

Bear Creek Solar | Cumberland County, VA

Project manager for preparation of critical issues analysis, Phase I Environmental Site Assessment, and topographic survey for proposed solar facility.

PREVIOUS CAREER EXPERIENCE

Owner's Engineer for The Clean Closure of Coal Ash Sites | Virginia

Hydrogeology Lead and Permitting Support for clean closure of CCR impoundments in accordance with Senate Bill 1355. Senate Bill 1355 requires the clean closure of CCR units in accordance with Virginia Solid Waste Management Regulations and disposal of CCR in landfills designed according to Criteria for Municipal Solid Waste Landfills. Primary tasks included permit planning and tracking and development and implementation of investigative drilling and sampling plans for ash characterization and landfill siting.

Senate Bill 807 and Senate Bill 1398 Responses | Virginia

Task Manager and Technical Support for development of response to Virginia Senate Bills 807 and 1398. Response to SB807 required preparation and issuance of detailed Requests for Proposals to conduct recycling and/or beneficial use projects at CCR facilities as well as rigorous assessment of bids received, which culminated in the preparation and submittal of a detailed business plan. Response to 1398 required thorough evaluation of closure options for eleven ash ponds at four facilities. Primary tasks included development and implementation of a CCR sampling and analysis plan to evaluate CCR location, quantity, and characteristics, and groundwater and surface water evaluations for each facility.

Atlantic Coast Pipeline | Virginia

Deputy Project Manager and Technical Support for erosion and sediment control and stormwater permitting for pipeline right of way and access roads. Project includes roadway design and development of the Stormwater Pollution Prevention Plan for the 600-mile pipeline through the state of Virginia and utilizes 400+ engineers/scientists from around the world. Responsibilities include quality assurance/quality control, weekly progress reports and schedule updates, and general project management support.

Failed Stormwater Pipe Evaluation | Chesterfield County, VA

Project Manager and Technical Support for geotechnical and environmental investigations and preparation of engineering recommendations for replacement of a failed stormwater pipe. The approximately 48-inch corrugated pipe handles stormwater from two large industrial facilities and its failure resulted in a large sinkhole. Primary responsibilities include planning and coordination, health and safety plan development, reporting, and tracking project schedule and financials.

> Christopher Mason

Senior Manager – Environmental Permitting

Page 3

Environmental Compliance and Permitting Audit Program | Multiple Nation-Wide Facilities.

Project Manager for market-leading meat producing client with farms and meat processing facilities across the United States conducting internal auditing program. Responsible for all client and third-party attorney communications as well as coordination of internal auditing staff.

Coal Ash Landfill Stability Assessment | Virginia.

Project Manager for industrial sector client planning to close an existing coal ash landfill. Conducted a geotechnical investigation and stability assessment and provided closure options and cost estimates based on current configuration of the landfill. Primary responsibilities included budget and personnel management, subcontractor procurement and coordination, health and safety monitoring, technical support, reporting, and quality control.

Former Telecommunications Manufacturing Facility, Operation, Maintenance & Monitoring | Winston Salem, NC

Project Manager for operations, maintenance, and monitoring at a former telecommunications manufacturing facility where soil and groundwater are impacted by CVOCs and petroleum hydrocarbons. A groundwater extraction and treatment system and an SVE system currently operate under the facility's RCRA Post-Closure Part B Permit and NPDES Permit. Site activities have included preparation of RCRA Post-Closure Part B Permit renewal application and NPDES Permit renewal application along with long-term management of permitted activities.

Remediation System Operation and Maintenance | Gastonia, NC.

Project Manager for remediation system operations and maintenance at a former manufacturing facility where soil and groundwater are impacted by CVOCs. A groundwater extraction and treatment system and SVE system are operated under the facility's RCRA Post-Closure Part B Permit and NPDES Permit. Site activities have included preparation of NPDES Permit renewal application and RCRA Post-Closure Part B Permit renewal application along with long-term management of permitted activities.

Remedial Investigation and Remedial Planning, Multiple Sites | North Carolina and South Carolina.

Task Manager for remedial investigation of light non-aqueous phase liquid (LNAPL) and hexavalent chromium contamination at active manufacturing facilities. LNAPL investigations have included a laser induced fluorescence survey, LNAPL bail-down testing, fluid properties analysis, and transmissivity

evaluations. Chromium investigations have incorporated multiple soil and groundwater investigations including within an active nickel-plating facility and along the manufacturing plant's sewer line. CVOC investigation activities have included delineating a CVOC plume extending approximately 1,000 feet offsite in three separate hydrostratigraphic units.

North Carolina Dry-cleaning Solvent Cleanup Act Program | Various Locations, North Carolina.

Project Manager for several projects under a state-led program for investigation and remediation at dry cleaner sites. Site activities include soil and groundwater investigations, vapor intrusion assessments, remediation, and risk-based closure.

North Carolina Department of Transportation Asphaltic Testing Laboratories Program | Various Locations, North Carolina.

Project Manager for several former asphalt testing laboratories that used chlorinated solvents. Site activities included long-term monitoring programs and groundwater pump and treat system operations and maintenance.
