PROTECT YOUR FAMILY FROM CARBON MONOXIDE

- Have your gas appliances inspected periodically to ensure that they are venting and operating properly.
- Install carbon monoxide detectors that are Underwriters Laboratories listed, carrying the UL mark.
- If you suspect carbon monoxide problems with your appliances, call your local appliance repair company.

DON'T SNOW ON US

Keep your gas meter and house vents clear of snow and ice. For your safety, please:

- Remove snow and ice from your gas meter carefully. This is helpful in emergencies and ensures that your gas meter works properly.
- Keep your appliance vents clear to prevent deadly carbon monoxide build up.
- Make sure snow and ice from your roof does not land on or bury your gas meter.

Visit www.atmosenergy.com/wintertips to learn how to properly remove snow and ice from your gas meter and house vents.

2020 CENSUS. EVERYONE COUNTS.

Starting in March 2020, households will receive a 2020 Census form.

Because the Census is only administered every 10 years, it's important that you are counted. Your participation in the Census helps to determine how more than \$675 billion is spent to support your state, county and community's vital programs.

The 2020 census can be completed online, over the phone or by mail.

For more information, visit 2020census.gov.

BE CAREFUL AROUND PIPELINE RIGHTS OF WAY

Yellow warning markers indicate the approximate route of larger pipelines and how to contact the operator. The right of way must always be kept clear so that the line can be visually inspected and quickly repaired. Obstructions must be kept off the right of way. State law requires you to call 811 at least two working days before digging to have pipelines or other utilities marked.

MAINTAINING YOUR GAS LINE

Pursuant to Department of Transportation regulation 49 CFR 192.16, Atmos Energy is required to inform you that we do not maintain the natural gas piping from our gas meter to your home or business. The natural gas piping from our gas meter to your home or business is your responsibility to maintain. If buried piping is not maintained, it may be subject to the potential hazards of corrosion and leakage. You should have piping periodically inspected for leaks. If the piping is metallic, it should be periodically inspected for corrosion. If any unsafe condition is discovered, it should be repaired. Plumbing contractors are possible resources for locating, inspecting and repairing your piping. Call 811 prior to any excavation to have underground utility-owned lines located and marked at no charge to you.

PROTECT YOUR FAMILY FROM ACCIDENTAL FIRES

Keep flammable materials away from natural gas appliances.

Never use or store flammable materials where a spark or open flame could ignite them.

Flammable items include:

- Gasoline
- Solvents
- Acetone
- Denatured alcohol
- Paints and thinners
- Camp stove fuel
- Lighter fluid
- Adhesives
- Propane tanks

For more information about natural gas safety, visit atmosenergy.com/GasSafety.

Always call 811 before you dig.

Hi! I'm Gus the Gopher.
I'm here to remind you to call 811 before you dig to have utility-owned lines in your yard located. This helps protect you from injury and expense. Call 811. It's free. And it's the law.

For more on safe digging, visit atmosenergy.com/call811.

Clean energy for generations to come.

You've made a smart energy choice with natural gas because it's affordable, reliable and produces less carbon emissions than electricity.

Natural gas is also efficient energy that partners with renewables to provide dependable and clean energy for today and generations to come.

IS YOUR HOT WATER TOO HOT?

Water temperatures higher than 120°F can cause serious burns or even death. Children, people with disabilities and the elderly are at high risk for being scalded by hot water. Read and follow the instructions for your water heater before setting its temperature controls. Always test the water before stepping into the bath, bathing your child or helping a disabled or elderly person into the bath.

PROTECT YOUR FAMILY FROM CARBON MONOXIDE

- Have your gas appliances inspected annually to ensure that they are venting and operating properly.
- Install carbon monoxide detectors that are Underwriters Laboratories listed, carrying the UL mark.
- If you suspect carbon monoxide problems with your appliances, call your local appliance repair company.
