SEBREE SOLAR, LLC'S VERIFIED APPLICATION FOR A CONSTRUCTION CERTIFICATE

Comes now Sebree Solar, LLC ("Sebree"), by counsel, pursuant to KRS 278.700, *et seq.*, 807 KAR 5:110, 807 KAR 5:120, and other applicable law, and does hereby tender its Application for the award of a Certificate to construct an approximately 250 Megawatt ("MW") merchant solar electric generating facility in Henderson County, Kentucky and an approximately 4.85 mile nonregulated electric transmission line in Henderson County and Webster County, Kentucky (together the "Project"),¹ respectfully stating as follows:

I. INTRODUCTION

1. Sebree is an affiliate of NextEra Energy Resources, LLC ("NEER"), a leading wholesale power generator, operating power plants and offering a diverse fuel mix to utilities,

¹ The Notice of Intent filed in February of 2021 was based upon an estimated transmission line length of 4.5 miles. Subsequent evaluation determined that the length would be 4.85 miles in length. As a matter of administrative efficiency and clarity, Sebree respectfully requests the Commission to modify the case style to reflect this change.

retail electricity providers, power cooperatives, municipal electric providers and large industrial companies. NEER is the world's largest generator of renewable energy from the wind and the sun, having invested billions of dollars – with plans to invest even more – in energy infrastructure across North America. NEER entered the solar generation business in 1989 and has significantly expanded its solar development to approximately 3,629 MW of utility and small-scale operating assets. NEER's unparalleled experience, resources and commitment to the communities it serves assures that the Project will be a lasting benefit to Henderson County and Webster County.

2. Sebree proposes to construct the Project – a solar electric generating facility that will be capable of generating approximately 250 MWs of electricity from a solar array covering a total of approximately 1,200 acres . This acreage is located entirely within Henderson County. The Project includes approximately 850,000 photovoltaic solar panels, associated racking, 78 inverters and a project substation transformer that will connect via a 161 kV transmission line to the existing Reid Substation owned by Big Rivers Electric Corporation at a location approximately 4.85 miles away in Webster County, Kentucky.

II. FILING REQUIREMENTS

3. Pursuant to KRS 278.706(2)(a), KRS 278.714(2)(a), 807 KAR 5:120, Section 2(1)(a) and 807 KAR 5:001 Section 14, the applicant's name and address are as follows: Sebree Solar, LLC, 700 Universe Boulevard, Juno Beach, Florida 33408. Sebree's telephone number is: (832) 613-7247. Sebree is a foreign limited liability company organized under the laws of Delaware on April 7, 2020 that is registered, in good standing and authorized to conduct business within the Commonwealth of Kentucky. A copy of Sebree's authorization to conduct business within the Commonwealth of Kentucky is attached hereto and incorporated herein as **Exhibit 1** (Volume 1, Tab 1)

4. Pursuant to KRS 278.706(2)(b), the Project is to be located on a site encompassing approximately 1,200 acres that is located in and near the town of Robards, Kentucky. A more detailed description of the Project site, including a map showing the distance of the Project from residential neighborhoods, residential structures and public and private parks within a two-mile radius of the proposed facility is attached hereto and incorporated herein as **Exhibit 2** (Volume 1, Tab 2) of the supporting materials.

5. Pursuant to KRS 278.706(2)(c) and KRS 278.714(2)(e), evidence that the requisite public notice has been timely given is attached hereto and incorporated herein as **Exhibit 3** (Volume 1, Tab 3) of the supporting materials ("Notice"). The attached Notice: (a) includes the location of the proposed solar generating facility and transmission line and appurtenances thereto; (b) a general description of the Project; (c) confirms that the Project is subject to approval by the Siting Board; and (d) provides the telephone number and address of the Public Service Commission. Sebree further affirms that this Notice was given in the prescribed statutory manner within thirty (30) days immediately preceding the application filing to landowners whose property borders the Project site and to the general public.

6. Pursuant to KRS 278.706(2)(d), a certification that the Project will be in compliance with all local ordinances and regulations concerning noise control and local planning and zoning ordinances, if any, is attached hereto and incorporated herein as **Exhibit 4** (Volume 1, Tab 4) of the supporting materials.

7. Pursuant to KRS 278.706(2)(e), Sebree states that the Project will not be located on the site of a former coal processing plant, nor will it use on-site waste coal as a fuel source. The Project does not involve the construction or use of an exhaust stack or wind turbine. 8. Pursuant to KRS 278.706(2)(e), Henderson County's Fiscal Court has adopted a county-wide solar ordinance that includes setback requirements consistent with KRS 278.704(3). A statement that the Project will comply with the Henderson County solar ordinance is attached hereto and incorporated herein as **Exhibit 5** (Volume 1, Tab 5) of the supporting materials. Webster County does not have a planning and zoning commission.

9. Pursuant to KRS 278.706(2)(f), Sebree has engaged in extensive efforts to involve the public in activities and educational efforts involving the Project prior to filing this Application. These efforts are set forth in **Exhibit 6** (Volume 1, Tab 6) of the supporting materials, which is attached hereto and incorporated herein.

10. Pursuant to KRS 278.706(2)(g), a summary of the efforts Sebree has made to locate the proposed facility on a site where existing electric generation facilities are located is attached hereto and incorporated herein as **Exhibit 7** (Volume 1, Tab 7) of the supporting materials.

11. Pursuant to KRS 278.706(2)(h) and KRS 278.714(2)(f), Sebree has sent a copy of the Application to the County Judge-Executives of both Henderson County and Webster County and the Mayor of Robards, Kentucky. Henderson County has a county-wide planning and zoning commission. Accordingly, Sebree has also sent a copy of the Application to the Executive Director of the Henderson City-County Planning and Zoning Commission. Copies of the cover letters are attached hereto and incorporated herein as **Exhibit 8** (Volume 1, Tab 8) of the supporting materials.

12. Pursuant to KRS 278.706(2)(i), an analysis of the Project's projected effect on the electric transmission system in Kentucky is attached hereto and incorporated herein as **Exhibit 9** (Volume 1, Tab 9).

13. Pursuant to KRS 278.706(2)(j), an analysis of the Project's economic impact upon the local region and state is attached hereto and incorporated herein as Exhibit 10 (Volume 1, Tab 10).

14. Pursuant to KRS 278.706(2)(k), a statement regarding any violations of federal or state environmental laws, rules or administrative regulations – whether judicial or administrative – on the part of Sebree or any person with an ownership interest in Sebree, which have resulted in a criminal conviction or civil or administrative fines exceeding five thousand dollars (\$5,000), is attached hereto and incorporated herein as **Exhibit 11** (Volume 1, Tab 11). There are no such violations of which Sebree is aware.

15. Pursuant to KRS 278.706(2)(1), a Site Assessment Report as delineated in KRS 278.708, is attached hereto and incorporated herein as **Exhibit 12** (Volume 2, Tab 12).

16. Although Sebree is not seeking a deviation request pursuant to KRS 278.704(4), it is nevertheless attaching hereto and incorporating herein as **Exhibit 13** (Volume 2, Tab 13) a copy of the Cumulative Environmental Assessment tendered to the Kentucky Energy and Environment Cabinet on August 12, 2021, in compliance with KRS 224.10-280.

17. Pursuant to KRS 278.714(2)(b), a full description of the proposed route of the electric transmission line and its appurtenances is attached hereto and incorporated herein as **Exhibit 14** (Volume 2, Tab 14). The exhibits includes maps showing the location of the proposed transmission line and all structures that will support it, the proposed centerline and right-of-way limits, existing property lines and the names of the property owners who own the property over which the transmission line will cross as indicated by the maps of the applicable property valuation administrator, and the distance of the proposed transmission line from residential neighborhoods, schools and public and private parks within one (1) mile of the proposed facilities. In accordance

with 807 KAR 5:120, Section 2(2), the map Sebree is providing is set forth in a scale of no less than one (1) inch equaling 1,000 feet for the proposed transmission line. Included with the maps are sketches of the proposed typical transmission line support structure and a separate map of the same scale showing the alternatives routes that were considered.

18. Pursuant to KRS 278.714(2)(c), a full description of the proposed electric transmission line and appurtenances is attached hereto and incorporated herein as **Exhibit 15** (Volume 2, Tab 15). The exhibit includes the initial and design voltages and capacities; the length of the line, terminal points and substation connections.

19. Pursuant to KRS 278.714(2)(d), Sebree states that the proposed electric transmission line and appurtenances will be constructed and maintained in accordance with accepted engineering practices and the National Electric Safety Code. An affidavit affirming this is attached hereto and incorporated herein as **Exhibit 16** (Volume 2, Tab 16).

20. Pursuant to KRS 278.714(3), Sebree states that the proposed route of the electric transmission line will minimize significant adverse impact to the scenic assets of Kentucky and that the Sebree will construct and maintain the line according to all applicable legal requirements.

21. Pursuant to 807 KAR 5:120, Section 2(1)(b) and 807 KAR 5:001, Section 15(2)(a)-(c) and (e)-(f), the facts relied upon by Sebree to show that the proposed construction is required are generally set forth throughout this Application and the supporting Exhibits. Sebree affirms that no franchises are necessary from any proper public authority for the proposed construction. Sebree will file copies of any necessary permits for the construction of the transmission line as they are obtained, however, Sebree is unaware of any such permits at this time. The full description of the proposed location and route of the proposed transmission line, as well as the manner of the construction, is set forth in Exhibit 15. To the best of Sebree's knowledge and belief, the proposed transmission line will not compete with any other public utilities, corporations or persons. Sebree also states that the proposed transmission line will be financed from funds available to it through its corporate affiliates. The annual estimated cost of operating the proposed transmission line is approximately \$7,500 per year. Information on each of these requirements is attached and incorporated herein as **Exhibit 17** (Volume 2, Tab 17).

22. Pursuant to 807 KAR 5:120, Section 2(3) - (4), a verified statement that notice has been sent or delivered in the prescribed method and including the required information to the appropriate property owners is attached hereto and incorporated herein as **Exhibit 18** (Volume 2, Tab 18). The Exhibit also includes a copy of the notice provide to property owners and the names and addresses of the persons to whom it was sent.

23. Pursuant to 807 KAR 5:120, Section 2(5) - (6), a copy of the notice of intent that has been published in the newspapers of general circulation in both Henderson County and Webster County is attached hereto and incorporated herein as **Exhibit 19** (Volume 2, Tab 19). This Exhibit includes a statement that the notice of intent was appropriately published.

24. Pursuant to 807 KAR 5:120, Section 2(7), Sebree states that it is not a public utility and, therefore, the Project does not involve sufficient capital outlay to materially affect the existing financial condition of any public utility.

III. FILING FEE

25. Pursuant to KRS 278.706(3), KRS 278.716 and 807 KAR 5:100, Section 1, the nameplate capacity of the Project is 250 MW. Accordingly, Sebree is required to submit an application fee of Two Hundred Thousand (\$200,000) for the solar electric generation facility.²

² See 807 KAR 5:100, Section 1 ("A person seeking to obtain a certificate to construct a merchant electricity generating plant shall submit with the application submitted in accordance with 807 KAR 5:110 to the Kentucky State Board on Electric Generation and Transmission Siting, at the offices of the Kentucky Public Service Commission, 211 Sower

The length of nonregulated electric transmission line is approximately 4.85 miles and rated at 161 kV, which yields a filing fee of \$39,043.³ Based upon these authorities, Sebree is tendering a check in the amount of \$239,043 to be deposited into the Kentucky Public Service Commission's "Siting Fund," created pursuant to KRS 278.716.

IV. CONCLUSION

26. The Project fully complies with KRS 278.700 – KRS 279.716 and, by having the unique ability to leverage NEER's experience, resources and commitment to the communities it serves, Sebree is perfectly suited to develop the solar facility within Henderson County and to build and operate the nonregulated transmission line connecting to a Big Rivers Electric substation in Webster County, Kentucky.

WHEREFORE, on the basis of the foregoing, Sebree respectfully requests the Siting Board to:

- 1. Grant a Construction Certificate for the Project, including both the solar facility and nonregulated electric transmission line; and
- 2. Award any and all other relief to which Sebree Solar, LLC might be entitled.

Done this 13th day of August, 2021.

Boulevard, Frankfort, Kentucky, an initial application fee of \$1,000 per megawatt of electricity generating capacity, based on the manufacturer's nameplate rated capacity of the proposed construction, except that the initial application fee for each application for each plant shall be in an amount not less than \$40,000 and not more than \$200,000.")

³ See 807 KAR 5:100, Section 2 ("A person seeking board approval of construction of a nonregulated transmission line shall file with the application submitted in accordance with 807 KAR 5:110 to the board a fee of fifty (50) dollars per kilovolt of rated capacity per mile of length, except that the initial application fee shall be in an amount not less than \$10,000 and not more than \$200,000.").

Application - Volume 1 Tab 1

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 1 Volume 1, Tab 1

Filing Requirement

To apply for a certificate of public convenience and necessity to construct an electric transmission line of 138 kilovolts or more and more than 5,280 feet, a utility shall file with the commission: (1) All documents and information required by: (a) 807 KAR 5:001, Section 14, except that the applicant shall file the original and six (6) copies of the application (807 KAR 5:120, Section 2(1)(a))

If a limited liability company, the applicant shall identify in the application the state in which it is organized and the date on which it was organized, attest that it is in good standing in the state in which it is organized, and, if it is not a Kentucky limited liability company, state if it is authorized to transact business in Kentucky (807 KAR 5:001, Section 14(3))

Respondent: Lina Jensen

Sebree Solar LLC was organized in the state of Delaware on April 7, 2020. It is currently

in good standing in the state in which it was organized and it is authorized to transact business in

the Commonwealth of Kentucky.

Application - Volume 1 Tab 2

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 2 Volume 1, Tab 2

Filing Requirement

A full description of the proposed site, including a map showing the distance of the proposed site from residential neighborhoods, the nearest residential structures, schools, and public and private parks that are located within a two (2) mile radius of the proposed facility (KRS 278.706(2)(b))

Respondent: Lina Jensen

The proposed Sebree Solar facility ("Project") will be capable of generating 250 megawatt alternating current ("MWac"). The Project is to be located on a site encompassing 1,200 acres located in and near the town of Robards in Henderson County, Kentucky. The Project includes approximately 850,000 photovoltaic ("PV") solar panels, associated racking, 78 inverters and a project substation transformer that will connect via a 161 kV transmission line to the existing Reid Substation owned by Big Rivers Electric Corporation at a location approximately 4.85 miles away in Webster County, Kentucky. The power generated by the Project will provide clean, renewable electricity.

Photovoltaic solar panels will be mounted on racking, which will fix the solar panels to the ground. Additional infrastructure at the Project will consist of 78 central electric inverters and transformers, underground electrical collection systems, electrical collector substation, point of interconnection, switchyard, a solar meteorological station, supervisory control, data acquisition (SCADA) hardware, control house, and associated facilities, private gravel access roads with gated ingress/egress points and security fencing. A map of the Project is attached hereto and more detailed preliminary site maps are attached to the Site Assessment Report (Tab 12)

Application - Volume 1 Tab 3

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 3 Volume 1, Tab 3

Filing Requirement

Evidence of public notice that shall include the location of the proposed site and a general description of the project, state that the proposed construction is subject to approval by the board, and provide the telephone number and address of the Public Service Commission. Public notice shall be given within thirty (30) days immediately preceding the application filing to: 1. Landowners whose property borders the proposed site; and 2. The general public in a newspaper of general circulation in the county or municipality in which the facility is proposed to be located (KRS 278.706(2)(c))

With respect to both electric transmission lines and carbon dioxide transmission pipelines, evidence that public notice has been given by publication in a newspaper of general circulation in the general area concerned. Public notice shall include the location of the proposed electric transmission line or carbon dioxide pipeline, shall state that the proposed line or pipeline is subject to approval by the board, and shall provide the telephone number and address of the Public Service Commission (KRS 278.714(2)(e))

Respondent: Lina Jensen

A copy of the public notice provided by Sebree is attached. Participating and adjacent landowners whose property borders the proposed site were provided with this notice via certified mail that was delivered to the United States Postal Service on August 11, 2021. In addition, the public notice was published in *The Henderson Gleaner*, *The Providence Journal* and *The Sebree Banner*, newspapers of general circulation in Henderson and Webster Counties respectively, all on August 4, 2021. The mailing date for participating and adjacent landowners and the publication date for both newspapers is within thirty (30) days of the filing of this Application, in compliance with KRS 278.706(2)(c). Copies of the published notice and publishers' affidavits evidencing notice of publication are attached.

Public Notice of Filing (1 Page)

SEBREE SOLAR, LLC NOTICE OF APPLICATION

On or about August 13, 2021, Sebree Solar, LLC will be filing an application with the Kentucky State Board on Electric Generation and Transmission Siting (Siting Board) in Case No. 2021-00072 to develop and construct an approximately 250 megawatt (MW) solar photovoltaic electric generating facility on approximately 1,200 acres to be located at 8308 Spencer Thornsberry Road, Robards, Kentucky, 42452 and nearby areas. The proposed Sebree Solar project will consist of solar photovoltaic panels and associated appurtenant facilities, including racking, inverters, substation transformer and other necessary equipment to support the project. In addition, the application will include a request for approval to construct an approximately 4.85 mile 161 kV electric transmission line connecting the solar facility to the Reid Substation in Webster County that is owned by Big Rivers Electric Corporation. A map of the transmission line is provided below:

Sebree Solar LLC's application is subject to the Siting Board's review and approval. The contact information for the Siting Board is as follows: P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615, or by telephone at (502) 564-3940.

Any person wishing to become a party to a proceeding before the Siting Board may, by written motion filed no later than thirty (30) days after the application has been submitted, request leave to intervene.

A party may, upon written motion filed no later than thirty (30) days after an application has been filed, request the Siting Board to schedule an evidentiary hearing at the offices of the Kentucky Public Service Commission, P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615.

A request that the Siting Board conduct a local public hearing or local public information meeting shall be made by at least three (3) interested persons who reside in the county or municipal corporation in which the facility is proposed to be constructed to consider the application for a construction certificate. The request shall be made in writing and shall be filed no later than thirty (30) days after a complete application is filed.

Any questions related to the application or other aspects of the approval process may be directed to the Siting Board at P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615, or by telephone at (502) 564-3940.

DOZENS OF AREA farmers gathered at Slaughters Sunday afternoon for the eighth annual Independence Bank tractor drive. The event helps raise funds for charitable groups in the county. The Shake, Rattle and Roll event travels through the backroads of the county from Slaughters to Onton where participants have a meal and ice cream.

ALLIS-CHALMERS

SEBREE SOLAR, LLC NOTICE OF APPLICATION

On or about August 13, 2021, Sebree Solar, LLC will be filing an application with the Kentucky State Board on Electric Generation and Transmission Siting (Siting Board) in Case No. 2021-00072 to develop and construct an approximately 250 megawatt (MW) solar photovoltaic electric generating facility on approximately 1,200 acres to be located at 8308 Spencer Thornsberry Road, Robards, Kentucky 42452 and nearby areas. The proposed Sebree Solar project will consist of solar photovoltaic panels and associated appurtenant facilities, including racking, inverters, substation transformer and other necessary equipment to support the project. In addition, the application will include a request for approval to construct an approximately 4.85-mile 161 kV electric transmission line connecting the solar facility to the Reid Substation in Webster County that is owned by Big Rivers Electric Corporation. A map of the transmission line is provided below:

Sebree Solar, LLC's application is subject to the Siting Board's review and approval. The contact information for the Siting Board is as follows: P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615, or by telephone at (502) 564-3940.

Any person wishing to become a party to a proceeding before the Siting Board may, by written motion filed no later than thirty (30) days after the application has been submitted, request leave to intervene.

A party may, upon written motion filed no later than thirty (30) days after an application has been filed, request the Siting Board to schedule an evidentiary hearing at the offices of the Kentucky Public Service Commission, P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615.

A request that the Siting Board conduct a local public hearing or local public information meeting shall be made by at least three (3) interested persons who reside in the county or municipal corporation in which the facility is proposed to be constructed to consider the application for a construction certificate. The request shall be made in writing and shall be filed no later than thirty (30) days after a complete application is filed.

Any questions related to the application or other aspects of the approval process may be directed to the Siting Board at P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615, or by telephone at (502) 564-3940.

• Support school-based young people who excel in arts education programs. sports, music, theater, and, Funding for arts programs is perpetually in jeopardy. Each state and school district is different, but a 2013 report from the National Assoand humanities programs totaled roughly \$250 million a year, while the National Science Foun-\$5 billion annually. Arts can support legislation

or pursue other artsbased interests is a great way to incorporate the arts into home life while showing kids how fun the arts can be.

 Research local performing arts schools. Children who exhibit an especially strong interest in the arts may benefit from enrolling in a school that specializes in performing arts. Such schools may be open to kids as young as five and extend all the way through high school. Some performing arts schools require prospective students to audition or apply. Arts high schools still offer instruction in core academic subjects, but parents should explore each school's curriculum before deciding if a given school is right for their children.

Arts education can have a profound impact Make art a part of on the life of a young

With a little creativity and some design tips, a dorm room become a space to be proud of.

Follow form, function when outfitting your dorm room

BY METRO

College campuses are a home away from home for much of the year for students who go away to school. According to Azusa Pacific University, many universities, APU included, require students to live on campus during their freshman and sophomore years. Doing so provides many students opportunities to fully immerse themselves in their school communities and enjoy a little independence at the same time.

Dorm rooms afford students a chance to impart their own unique touches on their living spaces. A dorm room need not be drab. In fact, with a little creativity and some design tips, a dorm room become a space to be proud of.

• Coordinate your vision. Once you meet your roommate, discuss how you see the dorm room evolving. Choosing a color palette is a great place to start. If you can't agree on bedding patterns, work with a color scheme so your side of the room and your roommate's will coordinate.

• Invest in high-quality linens and bedding. Focus your attention on making the one area of the room where you'll spend most of your time as comfortable and attractive as it can be. Look for high thread counts on sheets and pillowcases. HGTV recommends a duvet cover that can be swapped out to change the look of your bed when the mood spaces feel more like home.

strikes. Throw pillows and a throw blanket are ideal for lounging in style, and they can be arranged to make a tradition XL twin bed look like a daybed or chaise.

• Opt for multi-use furniture. If your dorm room only has the basics and you can add a few pieces, maximize space and function with items that serve multiple purposes. Storage ottomans can keep belongings organized and also serve as extra seating for guests. A mirror behind your desk can serve as a vanity for getting ready when the shared bathroom is occupied.

• Set aside a kitchen area. While you may not be cooking a four-course meal inside your dorm room — and most schools limit which types of cooking can take place in dorm rooms — set up a kitchen station with some essentials. According to the storage and organizational company Spacewise, a rolling utility cart equipped with a coffee maker, small microwave, mini fridge, and some cube storage containers is the perfect place to have snacks and beverages at the ready.

 Maximize storage. Shelves over a bed, underbed storage, bedskirt organizers, closet caddies, and additional organizational gadgets can keep rooms tidy and functional.

Dorm rooms can be customized with some simple additions to make these

SEBREE SOLAR, LLC NOTICE OF APPLICATION

On or about August 13, 2021, Sebree Solar, LLC will be filing an application with the Kentucky State Board on Electric Generation and Transmission Siting (Siting Board) in Case No. 2021-00072 to develop and construct an approximately 250 megawatt (MW) solar photovoltaic electric generating facility on approximately 1,200 acres to be located at 8308 Spencer Thornsberry Road, Robards, Kentucky 42452 and nearby areas. The proposed Sebree Solar project will consist of solar photovoltaic panels and associated appurtenant facilities, including racking, inverters, substation transformer and other necessary equipment to support the project. In addition, the application will include a request for approval to construct an approximately 4.85-mile 161 kV electric transmission line connecting the solar facility to the Reid Substation in Webster County that is owned by Big Rivers Electric Corporation. A map of the transmission line is provided below:

Sebree Solar, LLC's application is subject to the Siting Board's review and approval. The contact information for the Siting Board is as follows: P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615, or by telephone at (502) 564-3940.

Any person wishing to become a party to a proceeding before the Siting Board may, by written motion filed no later than thirty (30) days after the application has been submitted, request leave to intervene.

A party may, upon written motion filed no later than thirty (30) days after an application has been filed, request the Siting Board to schedule an evidentiary hearing at the offices of the Kentucky Public Service Commission, P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615.

A request that the Siting Board conduct a local public hearing or local public information meeting shall be made by at least three (3) interested persons who reside in the county or municipal corporation in which the facility is proposed to be constructed to consider the application for a construction certificate. The request shall be made in writing and shall be filed no later than thirty (30) days after a complete application is filed.

Any questions related to the application or other aspects of the approval process may be directed to the Siting Board at P.O. Box 615, 211 Sower Blvd., Frankfort, Kentucky 40602-0615, or by telephone at (502) 564-3940.

DaBaby offers 2nd apology after homophobic comments

Rapper DaBaby offered another apology Monday while facing backlash after he made crude and homophobic remarks at a recent Miami-area music festival.

The Grammv-nominated performer said he was misinformed for his comments about HIV/ AIDS in the post, which came a day after the rapper was cut from Lollapalooza's lineup in Chicago.

On Monday, New York City's Governors Ball and Day N Vegas in Las Vegas each announced the rapper had been dropped from their lineups.

Da Baby, whose real name is Jonathan Kirk, apologized to the LGBTQ+ community for his "hurtful and triggering" comments.

It's the second time DaBaby has apologized following his remarks at Miami's Rolling Loud Festival.

Verified McCarthy Twitter account is fake

Sorry, Cormac McCarthy fans. That bluechecked Twitter account for the famous, and famously media-shy author is fake.

"The account referenced was verified by mistake and that has since been reversed," a Twitter spokesperson said. "The account will also be required to adhere to Twitter's parody, newsfeed, commentary, and fan account policy."

Forest Service promises swifter action on California wildfires

Dale Kasler

Sacramento Bee TRIBUNE NEWS SERVICE

SACRAMENTO, Calif. - Hit with bipartisan criticism about a "wait and see" approach to fighting wildfires in California, the new chief of the U.S. Forest Service is directing his agency to become more ag-

gressive about suppressing new fires. Forest Service Chief Randy Moore, who until earlier this year oversaw 18 national forests in California, is implementing the new policy amid complaints that the federal agency was too slow to respond to wildfires that began this year on national forest land in the north state. "Chief Moore committed that he will

the U.S. Forest Service, including California, to immediately put out all fires," said Rep. Doug LaMalfa, R-California., who re- major infrastructure," LaMalfa wrote. vealed the new direction in an email to LaMalfa, who has been critical of the

Application - Volume 1 Tab 4

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 4 Volume 1, Tab 4

Filing Requirement

A statement certifying that the proposed plant will be in compliance with all local ordinances and regulations concerning noise control and with any local planning and zoning ordinances. The statement shall also disclose setback requirements established by the planning and zoning commission as provided under KRS 278.704(3) (KRS 278.706(2)(d))

Respondent: Lina Jensen

Sebree certifies that the Project will be in compliance with all local ordinances and

regulations concerning noise control as well as any other applicable local planning and zoning

ordinances. Webster County does not have an ordinance that applies to electric transmission lines.

Henderson County developed a solar ordinance, with setback requirements established as follows:

Setback requirements for Level 3 SES shall be as follows:

(1) All equipment shall be at least twenty-five (25) feet from the perimeter property lines of the project area;

(2) No interior property line setbacks shall be required if the project spans multiple contiguous properties;

(3) All equipment shall be located at least one hundred (100) feet from any residential structure and; the maximum height of any individual component will be 25 feet measured from the local ground level of the component.

Attachment A: Henderson County Zoning Ordinance (Nov. 10, 2020) (5 Pages)

The electric transmission line portion of the Project is not subject to setback requirements in either Henderson County or Webster County.

Application - Volume 1 Tab 4 Attachment A

HENDERSON COUNTY ZONING ORDINANCE

FINAL 11-10-2020

ARTICLE XXX: HENDERSON COUNTY SOLAR ENERGY SYSTEM REGULATIONS

Section 30.01. Design Standards

The components and subsystems required to convert solar energy into electric energy suitable for use. The area of the system includes all the land inside the perimeter of the system, which extends to any fencing. For the purposes of these zoning regulations, solar energy systems are divided into three (3) classes.

a. Level 1 Solar Energy System. A roof mounted system on any code compliant structure or any ground mounted system on an area of up to fifty (50) percent of the footprint of the primary structure on the parcel but not more than one (1) acre and not more than twenty-five (25) feet tall or any building integrated system (i.e. shingle, hanging solar, canopy, etc.)

b. Level 2 Solar Energy System. Any ground mounted system not included in a Level 1 SES and meets the following area restrictions:

1. In an agricultural zone the area of the SES shall not exceed one half (1/2) acre in size and shall require a building permit issued by the Henderson County Codes Department. In areas exceeding one half (1/2) acre, a Site Plan shall be required by the Henderson City-County Planning Commission.

2. In an industrial zone the SES shall not exceed ten (10) acres in size.

3. In an Industrial Zone, an SES of any size shall require a site plan approved by the Henderson City-County Planning Commission.

(c) Level 3 Solar Energy System. Any system that does not satisfy the parameters for a Level 1 or Level 2 SES.

Section 30.02. Requirements

Solar Energy Systems (SES) shall comply with the following criteria:

a. The height of any ground mounted SES shall not exceed twenty-five (25) feet as measured from the highest natural grade below each solar panel (excludes utility poles, substations and antennas constructed for the project).

b. Setback requirements for Level 1 and Level 2 SES shall be in compliance with the zoning classification for the parcel.

c. Setback requirements for Level 3 SES shall be as follows: (1) All equipment shall be at least twentyfive (25) feet from the perimeter property lines of the project area; (2) No interior property line setbacks shall be required if the project spans multiple contiguous properties,; (3) All equipment shall be located at least one hundred (100) feet from any residential structure and; the maximum height of any individual component will be 25 feet measured from the local ground level of the component.

d. All Level 3 SES shall be screened with a seven (7) foot tall fence and, to the extent reasonably practicable, a visual buffer that provides reasonable screening to reduce the view of the SES from residential dwelling units on adjacent lots (including those lots located across a public right of way). A vegetation screening plan to reduce the view of the SES from residential dwelling units on adjacent lots will be submitted for approval of the Henderson City-County Planning Commission. The existing natural tree growth and natural land forms along the SES perimeter may create a sufficient buffer and shall be preserved when reasonably practicable. When no alternative vegetation screening plan is approved by the Henderson City-County Planning Commission, a double row of staggered evergreen trees will be planted 15' on center from adjacent non participating residential dwellings including the outdoor living space immediately near residential dwellings. Parcel boundaries with no proximity to residential dwellings shall not require screening. The proposed evergreen trees shall be placed on the exterior of security fencing. The use of barbed wire or sharp pointed fences shall be prohibited in or along any boundary adjoining residential properties.

e. There shall be no signs permitted except those displaying emergency information, owner contact information, warning or safety instructions or signs that are required by a federal, state or local agency. Such signs shall not exceed 5 square feet in area.

f. Excessive lighting shall be prohibited except that required by federal or state regulations.

g. Decommissioning of Level 3 SES shall be as follows:

1. The developer shall post a Surety Bond, or other form of Security acceptable to the County, for the abandonment of the site and in the event the Commission must remove the facility. Abandonment shall be when the SES ceases to transfer energy on a continuous basis for twelve (12) months. The surety bond or other form or security, shall be one (1) percent of the total project cost re-calculated every 5 years during the project life.

2. A decommissioning plan shall be submitted at the time of application by the developer responsible for decommissioning and must include the following: (1) Defined conditions upon which the decommissioning will be initiated. i.e. there has been no power production for 12 months, the land lease has ended, or succession of use of abandoned facility, etc.; (2) Removal of all non-utility owned equipment, conduit, structures, fencing, roads, and foundations to the depth of three (3) feet; (3) Restoration of the property to substantially similar physical condition that existed immediately prior to construction of the SES; (4) The time frame for completion of decommissioning activities; (5) the party currently responsible for decommissioning, and; (6) Plans for updating the decommissioning plan.

The components and subsystems required to convert solar energy into electric energy suitable for use. The area of the system includes all the land inside the perimeter of the system, which extends to any fencing. For the purposes of these zoning regulations, solar energy systems are divided into three (3) classes.

A. Level 1 Solar Energy System. A roof mounted system on any code compliant structure.

1. Level 1 Solar Energy System are prohibited in Riverfront-1 and Riverfront-3 zones.

2. Level 1 Solar Energy Systems, other than solar shingles, are allowed in Riverfront- 2, Riverfront-4, Central Business District, Gateway Zone, and Henderson Innovative Planning District only if the SES is enclosed or screened to ensure that such features are not visible from street level and are compatible to the architectural style of the building.

3. Level 1 Solar Energy Systems which are solar shingles if visible from the street are a conditional use in Riverfront-2, Riverfront-4, Central Business District, Gateway Zone, and Henderson Innovative Planning District and must match the existing façade and architecture of the building.

4. Level 1 Solar Energy Systems are allowable in all other zones other than those listed in subsections (1) and (2) above.

B. Level 2 Solar Energy System. Any ground mounted system not included in a Level 1 SES and meets the following area restrictions and requirements:

1. Level 2 Solar Energy Systems are only allowed in Agricultural Zone and Light Industrial (M-1) and Heavy Industrial (M-2) zones.

2. In an Agricultural zone the area of the SES shall not exceed one half (1/2) acre in size and shall require a building permit issued by the Henderson City Codes Department.

3. In an Industrial zone the SES shall not exceed ten (10) acres in size.

4. The height of any ground mounted SES shall not exceed twenty-five (25) feet as measured from the highest natural grade below each solar panel (excludes utility poles and antennas constructed for the project).

5. Setback requirements for Level 1 and Level 2 SES shall be in compliance with the zoning classification for the parcel.

6. There shall be no signs permitted on Level 2 SES except those displaying emergency information, owner contact information, warning or safety instructions or signs that are required by a federal, state or local agency. Such signs shall not exceed 5 square feet in area.

7. In an Industrial Zone, a Level 2 SES shall require a site plan approved by the Henderson City-County Planning Commission and a building permit by the Henderson City Codes Department.

8. Lighting on Level 2 SES shall be prohibited except that required by federal or state regulations.

C. Level 3 Solar Energy System. Any ground mounted system that is greater than the one half (1/2) acre in size for agricultural zone or exceeds the ten acres in size for an industrial zone satisfy the parameters for a Level 2 SES and must meet the following restrictions and requirements.

1. Level 3 SES are only allowed in Agricultural Zone and Light Industrial (M-1) and Heavy Industrial (M-2) zones.

2. The height of any ground mounted Level 3 SES shall not exceed twenty-five (25) feet as measured from the highest natural grade below each solar panel (excludes utility poles and antennas constructed for the project).

3. Setback requirements for Level 3 SES shall be as follows: (1) All equipment shall be at least fifty (50) feet from the perimeter property lines of the project area; (2) No interior property line setbacks shall be required if the project spans multiple contiguous properties; (3) All equipment shall be located at least one hundred (100) feet from any residential structure and; the maximum height of any individual component will be 25 feet measured from the local ground level of the component.

4. All Level 3 SES shall be screened with an 8' tall fence and a double row of staggered evergreens (minimum 8' height at planting) planted 15' on center from any public right-of-way or adjacent residential use. The evergreens shall be located outside of the fence. The use of barbed wire or sharp pointed fences shall be prohibited in or along any boundary adjoining residential properties.

5. There shall be no signs permitted on Level 3 SES except those displaying emergency information, owner contact information, warning or safety instructions or signs that are required by a federal, state or local agency. Such signs shall not exceed 5 square feet in area.

6. Level 3 SES shall require a site plan approved by the Henderson City-County Planning Commission and a building permit by the Henderson City Codes Department.

7. Lighting on Level 3 SES shall be prohibited except that required by federal or state regulations.

D. Decommissioning of Level 3 SES shall be as follows:

1. The developer shall post a Surety Bond with the Henderson City-County Planning Commission for the abandonment of the site and in the event the Commission must remove the facility. Abandonment shall be when the SES ceases to transfer energy on a continuous basis for twelve (12) months. The surety bond shall be one (1) percent of the total cost of the installed SES.

2. A decommissioning plan shall be submitted at the time of application by the party responsible for decommissioning and the land owner and must include the following: (1) Defined conditions upon which the decommissioning will be initiated. i.e. there has been no power production for 12 months, the land lease has ended, or succession of use of abandoned facility, etc.; (2) Removal of all non-utility owned equipment, conduit, structures, fencing, roads, and foundations; (3) Restoration of the property to its original condition prior to development of the SES; (4) The time frame for completion of decommissioning activities; (5) the party currently responsible for decommissioning, and; (6) Plans for updating the decommissioning plan.

Application - Volume 1 Tab 5

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 5 Volume 1, Tab 5

Filing Requirement

If the facility is not proposed to be located on a site of a former coal processing plant and the facility will use on-site waste coal as a fuel source or in an area where a planning and zoning commission has established a setback requirement pursuant to KRS 278.704(3), a statement that the exhaust stack of the proposed facility and any wind turbine is at least one thousand (1,000) feet from the property boundary of any adjoining property owner and all proposed structures or facilities used for generation of electricity are two thousand (2,000) feet from any residential neighborhood, school, hospital, or nursing home facility, unless facilities capable of generating ten megawatts (10MW) or more currently exist on the site. If the facility is proposed to be located on a site of a former coal processing plant and the facility will use on-site waste coal as a fuel source, a statement that the proposed site is compatible with the setback requirements provided under KRS 278.704(5). If the facility is proposed to be located in a jurisdiction that has established setback requirements pursuant to KRS 278.704(3), a statement that the proposed site is in compliance with those established setback requirements (KRS 278.706(2)(e))

Respondent: Lina Jensen

The Project will not be located on the site of a former coal processing facility, nor will the Project use on-site waste coal as a resource. The Project site also does not have any existing electricity generating facilities. Because the proposed Project is a ground mounted solar photovoltaic electric generating facility, it will not contain any exhaust stacks or wind turbines, rendering the 1,000/2,000 setback requirements contained in KRS 278.706(2)(e) for such structures inapplicable to this Application.

The electric generation portion of the Project is entirely within Henderson County and is therefore subject to local planning and zoning requirements that are less restrictive than those in KRS 278.704(2). Sebree certifies that the Project will be in compliance with the Henderson County solar ordinance's setback requirements.

Application - Volume 1 Tab 6

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 6 Volume 1, Tab 6

Filing Requirement

A complete report of the applicant's public involvement program activities undertaken prior to the filing of the application, including: 1. The scheduling and conducting of a public meeting in the county or counties in which the proposed facility will be constructed at least ninety (90) days prior to the filing of an application, for the purpose of informing the public of the project being considered and receiving comment on it; 2. Evidence that notice of the time, subject, and location of the meeting was published in the newspaper of general circulation in the county, and that individual notice was mailed to all owners of property adjoining the proposed project at least two (2) weeks prior to the meeting; and 3. Any use of media coverage, direct mailing, fliers, newsletters, additional public meetings, establishment of a community advisory group, and any other efforts to obtain local involvement in the siting process (KRS 278.706(2)(f))

Respondents: Lina Jensen

Sebree has undertaken an extensive public outreach effort that exceeds the minimum requirements of the statute. As detailed below, this effort includes numerous in-person meetings with landowners, local officials and community leaders, a virtual public meeting, office hours, establishing a Project website and Facebook page and individual outreach to adjacent landowners.

Sebree established a website for the Project in November 2020. The website included information concerning the description of the Project, an overview of solar power generation, frequently asked questions, contact information, and a means by which individuals could seek additional information about the Project. The Project's website is:

https://www.nexteraenergyresources.com/sebree-solar.html

In addition to the website, Sebree established a Facebook page to provide more frequent updates and developments on the Project and to address questions and comments from the public. The Project's Facebook page is:

https://www.facebook.com/SebreeSolar

Sebree conducted in-person office hours in Henderson, Kentucky at Hometown Roots Restaurant on March 24, 2021 from 12:00 PM – 7:00 PM. Office hours in Robards, Kentucky were held at Farmer & Frenchman Winery on March 23, 2021 from 10:00 AM to 5:00 PM. In addition, Sebree held a virtual public meeting on March 30, 2021. Prior to hosting each of these events, Sebree posted a copy of the Project map in the courthouses of Henderson County and Webster County.

In addition, an extra effort has been made to reach out to adjacent landowners. On August 3-4, 2021, Sebree representatives hand-delivered invitations to adjacent landowners for community "Meet & Greet" events to provide an avenue for interested persons to ask questions and learn more about the Project.

Sebree has additionally taken a proactive stance on meeting with local leaders on the Project. Specifically, Sebree representatives have met with the County Judge Executive and Planning & Zoning Administration within Henderson County. Individual meetings have been held with state and local government officials, and community leaders, including the following:

Date	Local Official / Community Contact	Topic of Discussion
9/17/2019	Henderson County Economic Development (Kyndle)	Presented overview of NextEra Energy Resources, Sebree project scope & timeline
10/2/2019	Brian Bishop, Planning Commission	Presented overview of NextEra Energy Resources, Sebree project scope & timeline; discussed Henderson County P&Z process / requirements
11/5/2019	County Judge, Brad Schneider	Introductions, discussed overview of NextEra Energy Resources, Sebree project scope & timeline
11/18/2019	Henderson 4 Star Industrial Board	Presented background on NextEra Energy Resources, Sebree project; Discussed potential acquisition of property near Big Rivers substation

		(this is now part of our transmission line)
12/3/2019	Kentucky Chamber Legislative Luncheon (in Henderson)	Provided background on NextEra Energy Resources, Sebree project

In addition, Sebree provides the following documents to support this filing requirement:

Attachment A: Office Hours Invitation and Mailing List (12 Pages)

Attachment B: Public Meeting Notice, Presentation and Mailing List (29 Pages)

Attachment C: Website Screenshots (15 Pages)

Attachment D: Social Media (27 Pages)

Attachment E: Community "Meet & Greet" Doorhangers (2 Pages)

Attachment F: E-newsletter (1 Page)

Application - Volume 1 Tab 6 Attachment A

Office Hours Invitation and Mailing List (12 Pages)

Sebree Solar Office Hours

Instead of a typical open house (where you can drop in any time), we will be holding "office hours" for you to stop in and learn more about the proposed Sebree Solar project in Henderson County. Mark your calendars to meet with us:

Tuesday, March 23 10 a.m. - 5 p.m. Farmer & Frenchman Winery: 12522 Highway 41 S - Robards Wednesday, March 24 12 p.m. - 7 p.m. Hometown Roots: 136 2nd Street - Henderson

To take advantage of this time, please contact our team member, Matt, at Matthew.Kiehlmeier@NEE.com, to set up a unique time to meet.

Note: social distancing measures will be observed.

Case No. 2021-00072 App. Vol. 1 - Tab 6 - Attach. A Page 2 of 12

Mark your calendar to visit with us during our office hours to learn more about the proposed Sebree Solar project.

• Tuesday, March 23

10 a.m. - 5 p.m. Farmer & Frenchman Winery: 12522 Highway 41 S - Robards

Wednesday, March 24
12 p.m. - 7 p.m. Hometown Roots:
136 2nd Street - Henderson

Choose a day that works for you and reach out to Matt, at 561-323-0763 or email Matthew.Kiehlmeier@NEE.com, to schedule your time.

Public Meeting Notice, Presentation and Mailing List (29 Pages)

Sebree Solar Public Meeting

Please mark your calendars to attend a "virtual" public meeting on Tuesday, March 30 to learn more about an innovative solar project proposed by Sebree Solar, LLC, a subsidiary of NextEra Energy Resources, LLC, for Henderson County. You are invited to log in or call in to meet our team and discuss the proposed project. For additional information visit: www.SebreeSolar.com.

Tuesday, March 30 at 6 p.m. Central

JOIN MEETING BY PHONE:

JOIN MEETING ONLINE: https://services.choruscall.com/links/sebree.html

Dial in (toll-free): 1-866-807-9684

QUESTIONS: If you have questions in advance of the meeting, please e-mail them to: SebreeSolar@nexteraenergy.com

Case No. 2021-00072 App. Vol. 1 - Tab 6 - Attach B Page 2 of 29

You're invited to attend a "virtual" public meeting to learn more about the proposed Sebree Solar project on Tuesday, March 30 at 6 p.m. Central.

Two easy options for joining the meeting:

- 1. By phone (line opens 15 minutes early)
 - o Call 1-866-807-9684
 - Ask to "join the NextEra Energy call"

2. Online (allows you to view presentation)

- o Open your web browser
- Type in: <u>https://services.choruscall.com/</u> links/sebree.html
- o Fill out contact information
- o Click on the "Join Webcast" link

Meeting agenda:

6 p.m. - Welcome 6:10 p.m. - Project update 6:35 p.m. - Q&A session

Case No. 2021-00072 App. Vol. 1 - Tab 6 - Attach B Page 3 of 29

Booker may challenge Paul for US Senate seat

Morgan Watkins and Ayana Archie Louisville Courier Journal USA TODAY NETWORK

Former Kentucky Rep. Charles Booker says he's "strongly considering" running for the U.S. Senate again in 2022 challenging incumbent Republican Rand Paul.

He announced his decision Sunday on Kentucky Educational Television.

"I believe the work is not done and we have, and we have the ability to tell a new story for Kentucky," he said. "And I want to do my part in that. And so I'm excited about what's ahead for us, and I'm giving new consideration to our ability to transform our future in the upcoming year."

In the interview with KET's Renee Shaw, Booker reinforced that although many have labeled him a progressive politician, his approach is to find common ground among Kentuckians.

"The truth of the matter is we have much more in common than we do otherwise," he said. "And there are struggles that I have experienced in the west end of Louisville that aren't partisan rationing my insulin, seeing my lights be cut off, not having a place to stay, seeing loved ones battle drug addiction and looking at jobs leaving our community and never coming back."

There was a lot of anticipation about what office Booker, a 36-year-old Louisvillian, might run for next after he lost a high-profile bid last year for Senate

Former Kentucky 43rd District Representative Charles Booker. PAT MCDONOGH / COURIER JOURNAL

Minority Leader Mitch McConnell's congressional seat.

Paul doesn't have the same degree of longevity or power McConnell wields, but he'll still be tough to beat as an established Republican incumbent in increasingly conservative Kentucky.

While Booker has garnered a lot of national attention and a Twitter audience of well over 300,000 followers, Paul has been a national figure for years. He regularly makes headlines and appears in conservative news outlets, plus he has over 3 million Twitter followers. He didn't launch his 2020 Senate

campaign until January of that year, about six months after fellow Democrat Amy McGrath announced her bid for McConnell's seat.

By that point, McGrath already had solidified her position as the contender to beat in the primary and amassed plenty of campaign cash. He also has a much bigger platform today than he did when he kickstarted his first Senate bid.

Booker landed in the spotlight during

his progressive campaign for McConnell's seat, even though he was far from a frontrunner. He got a huge surge in support — within and outside Kentucky — mere weeks before the 2020 primary election when he joined major protests against police brutality and racism in Louisville as people grieved the loss of Breonna Taylor, whom local police officers killed earlier that year.

He ended up narrowly losing to McGrath, who went on to lose to McConnell that fall.

Even though Booker lost, there still was plenty of interest in his political future, especially given his better-thanexpected performance in the primary and his message of building a grassroots movement "from the hood to the holler" in Kentucky. But until Sunday, he hadn't said much about his future plans as a politician.

Instead, he spent the past several months working with "Hood to the Holler," the nonprofit advocacy group he founded after his 2020 Senate campaign failed. He also recently confirmed he scored a book deal to write a memoir called, of course, "From the Hood to the Holler."

Booker served one term in the Kentucky House of Representatives, which officially ended in January. He decided to pursue McConnell's Senate seat instead of running for reelection.

COVID-19

Continued from Page 1A

patients in the district -18,290 - have recovered, and there have been 342 CO-VID-related deaths.

Henderson County has reported 4,271 cases since last March with 3,761 of those (88%) having recovered.

Henderson County Schools is reporting four active cases through its dashboard on the district website: Two involve staff members and two are students who are receiving hybrid instruction.

Union County has reported 1,224 cases since last March with 1,124 of those (92%) having recovered.

Union County Schools is reporting no active cases on its district website.

Webster County has reported 1,150 cases since March with 1,014 of those (88%) having recovered.

Webster County Schools is reporting no active cases on its district website.

The state of Kentucky reported 416,215 confirmed cases of COVID-19 and 4,982 deaths statewide. As of March 15, 995,784 unique individuals have been vaccinated in Kentucky.

those facilities, visit deaconess.com/ Coronavirus/Visitor-Restrictions-(1)

Visitors must screen for COVID-19 symptoms or exposure, and then register when they arrive; the two designated visitors may see the patient together or separately throughout the day. Masking will be required for all visitors. Current visitor restrictions for outpatient and emergency departments, NICUs, and patients in isolation, will remain in place at this time. Additionally, coalition member hospitals have specific processes in place for end-of-life visitation.

Hospitals will be increasing visitation at some point this week, and may have varying visiting hours, so check hospital websites or call ahead for specific details.

Other Community Patient Safety Coalition hospitals include Daviess Community Hospital, Deaconess Health System (Indiana and Kentucky), Good Samaritan Hospital, Encompass Health Deaconess Rehabilitation, Memorial Hospital and Health Care Center, Select Specialty Hospital, Ascension St. Vincent Evansville, Ascension St. Vincent Warrick, St. Vincent Orthopedic Hospital and the Women's Hospital. vaccine sites, and information regarding scheduling an appointment and more can be found at Deaconess.com/ Coronavirus/COVID-19-Vaccine.

Those eligible and interested can also make a new COVID-19 vaccination appointment at Owensboro Health online at owensborohealth.org/vaccine or by calling central scheduling at 270-685-7100.

Retail pharmacies and health centers are also providing COVID-19 vaccinations. Additional COVID-19 vaccine information can be found at vaccinefinder.org.

The Kentucky COVID-19 vaccine dashboard at govstatus.egov.com/kycovid-vaccine offers additional information, and the Kentucky COVID-19 Vaccine Hotline, 800-722-5725, can answer general COVID-19 vaccine questions.

COVID-19 Testing & Flu Shots

The health department is offering free COVID-19 testing and encourages anyone who has been in crowds, had close contact with people in public or traveled recently to get tested. To schedule an appointment visit the GRDHD website, healthdepartment.org , and follow the COVID-19 Test prompts. Flu shots, including the high dose vaccine for those 65 years of age and older, can also be scheduled on the website or by calling your county health department for an appointment.

• Union County Health Center: March 17, 24 & 31,10-11 a.m.

• Webster County Health Center: March 17, 24 & 31, 9-10 a.m.

Demographics

The cases being reported from the Green River District Health Department are being investigated and confirmed locally. These cases are then reported to the Kentucky Department for Public Health.

As of Monday morning, the total reported cases in the Green River district by county, followed by the amount of recovered cases, current COVID-19 hospitalizations, the cases ever hospitalized and the number of deaths by county are:

- Daviess: 9,674 8,767 2 345 160
- Hancock: 779 703 2 23 15
- Henderson: 4,271 3,761 2 200 62
- McLean: 826 760 0 48 26
 Ohio: 2,407 2,161 3 121 49

Man Arrested Following Two Vehicle Accident

A Sebree man was arrested Thursday, March 4, following a two vehicle accident at the corner of 41-N and East Webster Street.

According to Webster County Deputy Nathan Stinchcomb's report, he received a call from dispatch at approximately 7:37 p.m. that the driver of one of the vehicles, an Hispanic male, involved in the incident was trying to leave the scene.

When Stinchcomb arrived at the incident, he observed a black car with Indiana plates parked on the wrong side of the road at an angle with a male later identified as Fransisco Gaspar Diego sitting on the hood; the other vehicle a white Jeep was across the road "almost like it was blocking the black car," the report says. The driver of that vehicle was identified as Robert Forker who told Stinchcomb that he was north bound on US 41 and saw the Diego vehicle coming at him head-on with no headlights on in the north lane. Forker told the officer he veered left toward the southbound land to avoid a head-on

collision but the Diego vehicle struck the rear passenger back panel of the Forker vehicle.

The report notes that Forker said the Diego vehicle kept going rather than stopping and turned on East Webster Street; Forker followed the vehicle and stopped in front of Diego to keep him from leaving the scene; he was also able to get the keys of the Diego vehicle, the report says.

Following the investigation, Diego was arrested for DUI and lodged in the Webster County Jail.

Slaughters Cemetery Board SEEKING DONATIONS

Countians are at risk for kidney disease. High blood pressure, heart disease, diabetes, and obesity increase risk of end state renal disease," said Cole. "We must take care of our kidney health and others' by registering as an organ donor."

Join the Kentucky Organ Donor Registry in one of the following ways:

 \ast Online 24/7 at RegisterMe. org

* On your Apple iPhone, go to your Health App and toggle to "organ donor."

* Driver's License Renewals: All Circuit Clerks' offices and all KYTC offices have re-opened, adhering to Governor Beshear's COVID-19 guidelines and continue to do so. Slaughters Cemetery Board is asking for help in the cost of maintaining the Cemetery.

The cost for maintaining the Cemetery each year runs \$12,760.00. Without donations from family and friends we will be unable to maintain the upkeep for the 2021 summer season.

Please send donations to the:

City of Slaughters PO Box 23 Slaughters KY 42456 Attention Cemetery Fund

All donations are tax deductible. Please enclose a self-address stamped envelope and a receipt will be returned to you.

SEBREE SOLAR PROJECT

About the Project

The Sebree Solar Project is an innovative solar project proposed for Henderson County, Kentucky that will have a capacity of up to 250 megawatts of clean, renewable, American-made energy. The Sebree Solar project is more than solar panels - it represents a significant capital investment in Kentucky. Once operational, it will create good-paying jobs and millions in additional revenue for the local community. It is a subsidiary of NextEra Energy Resources, LLC, the world's largest generator of renewable energy from the wind and the sun.

Project Overview

Sebree Solar Project creates jobs, economic growth and clean energy.

Map is representative of project location, but is not to scale and the icon does not indicate actual project boundaries.

SEBREE SOLAR PROJECT

250 Megawatts of Clean Energy in Henderson County, Kentucky

For decades, NextEra Energy Resources' subsidiaries have been helping fuel America's economic growth and quality of life and moving our nation toward energy independence. To date, we operate solar projects in 27 states and Sebree Solar will be among the first solar projects in Kentucky.

Features of the Sebree Solar Project:

- Photovoltaic (PV) solar arrays capable of generating up to 250 megawatts (MW) of clean, renewable energy.
- The project encompasses approximately 1,500 acres.
- Subject to local and state approvals, the project is scheduled to begin operations by the end of 2023.

COMMUNITY BENEFITS

Bringing Economic Opportunities

Solar projects generate home-grown, renewable energy, while preserving clean air and water. They can also generate significant economic benefits for the communities that host them.

Employment Opportunities

Sebree Solar Project will create local employment opportunities, including up to 300 jobs to construct the project

County Tax Revenue

The project provides approximately \$12 million* in additional revenue for Henderson County, money that can enhance local roads, schools and services

HOW TO PARTICIPATE

There are many ways you can become a part of the Sebree Solar Project, because you're not alone!

If you live in Henderson County and want to help bring the benefits of this project to your community, or if you simply want to encourage the growth of solar energy development, we could use your help writing a letter of support to local and state elected officials.

If you are a landowner in or near the project area, you may be able to host solar panels or equipment on your land and enhance your income, potentially for years to come.

The biggest way you can get involved is providing your email to stay up-to-date on the latest project information.

Learn about solar energy and your health, the environment, property values and decommissioning.

Does solar energy negatively impact our health?

No. People have been safely living and working around solar panels for decades. Solar energy emits no pollutants and the overall impact of solar on human health is overwhelmingly positive. In fact, studies have shown health-related air quality benefits from solar energy are worth even more than the electricity itself.⁴

Modern, photovoltaic (PV) solar panels are made of materials typical of those found in electronic equipment and are encased, so as not to pose a concern for the water supply or public health.²

ENVIRONMENT	>
PROPERTY VALUES	>
DECOMMISSIONING	>

Does a solar project impact the environment?

No form of energy is free from environmental impact; however, solar energy has among the lowest impacts as it emits no air or water pollution.

Protecting wildlife and sensitive natural habitats is a priority for NextEra Energy Resources.

As part of our development process, we conduct thorough wildlife studies and ensure each site complies with all local, state and federal environmental regulations.

What are solar panels made of?

Solar photovoltaic (PV) panels typically consist of glass, polymer, aluminum, copper and semiconductor materials that can be recovered and recycled at the end of their useful life.

To provide decades of corrosion-free operation, solar cells are encapsulated from air and moisture between two layers of plastic, with a layer of tempered glass and a polymer sheet or industrial laminate. In the same way a windshield cracks but stays intact, a damaged solar cell does not generally create small pieces of debris.

Crystalline silicon panels represent approximately 90 percent of solar panels in use today. Research has shown they "do not pose a material risk or toxicity to public health and safety."

Thin-film solar panels represent a small percentage of panels in use today; some use a stable compound called cadmium telluride or other semi-conductor materials. Research has shown the tiny amount of cadmium in these panels does not pose a health or safety risk.²

Recycling solar panels

Although modern solar panels can be safely disposed of in landfills, they can also be recycled. PV solar panel recycling technologies have been implemented over the past decade and have been shown to recover over 95 percent of semiconductor material and over 90 percent of the glass in the panel.³ The industry is exploring the most cost-effective ways to recycle.

First Solar, a U.S. company and the main supplier of thin-film panels has a robust solar recycling program that has been operating commercially since 2005. Solar manufacturers and developers continue to research ways to reduce the use of raw materials, a secondary market for reuse, and recycling.

DECOMMISSIONING

What impact will a solar project have on my property value?

There is no evidence to indicate a solar project will impact neighboring property values. A 2018 study by Cohn and Resnick, a Chicago-based firm that specializes in property valuation, looked at home sales in proximity to six solar farms in Illinois, Indiana and Minnesota. It found no measurable impact on property values adjacent to solar farms.

Importantly, a solar project brings numerous economic benefits to a community, including the potential for millions of dollars in additional tax revenue (or payments in lieu of taxes) which can be used to enhance schools, roads and essential services – enhancing both the quality of life and overall value of the community. Solar projects can deliver these economic benefits without making additional demands or impact on community services.

Have More Questions?

We have the answers to your solar energy questions. VISIT OUR FAQ PAGE >

What happens at the end of a solar project's useful life?

Decommissioning is the process of removing all elements of a solar project and returning the land to its original condition.

Modern solar projects are designed to operate for at least 25-30 years, during which time they are carefully managed and maintained.

We often replace aging solar panels with newer, more efficient technology to extend their useful lives. However, should there no longer be a demand for the project after 30 years, we will decommission it.

To ensure taxpayers do not pay for removing any part of a solar project, our company makes financial commitments to pay the full costs of decommissioning.

This process typically includes removing and disposing of all above-ground infrastructure including solar arrays, inverters, concrete foundations and pads, and fences.

Frequently Asked Questions

Find answers to your questions about this renewable source of energy.

What is solar energy used for?

Once converted into electricity, solar energy is used in homes and businesses just like any other form of electricity.

What are some advantages of solar energy?

After the initial investment in solar-energy equipment, the costs are minimal since the sun provides free "fuel." These facilities are not affected by the supply and demand of fuel or subject to price volatility, and solar energy can help reduce America's dependence on foreign sources of energy. Solar energy is also clean and renewable, which helps protect our environment.

How Does Solar Energy Work?

1. As light hits the solar panels, the solar energy is converted into direct current (DC) electricity.

2. The direct current flows from the panels into power inverters and is converted into altering current (AC) electricity, which is suitable for use by homes and businesses.

3. The AC electricity from the power inverters is collected using cables and delivered to a central electrical substation, where it passes through a power transformer.

4. The electricity travels through transformers, and the voltage is boosted for delivery onto the transmission lines.

5. Clean, renewable, American-made solar electricity is delivered to homes and businesses.

How many solar facilities does your company have and where are they located?

Through its subsidiaries, NextEra Energy Resources is the world's largest generator of renewable energy from the wind and the sun. We currently have ownership interests in 3,160 MW of operating solar projects (as of Dec. 31, 2020), representing universal-scale solar facilities in 27 states, as well as multiple small-scale (distributed generation) solar projects.

Are solar facilities good for the environment?

Solar energy emits no pollutants and the overall impact of solar on human health is overwhelmingly positive. To learn more, view our solar environment page.

What percentage of generation does solar energy represent in the NextEra Energy Resources' portfolio?

Solar energy represents about 13 percent of NextEra Energy Resources' generation.

What do you look for in a site when building a renewable energy project?

We look for a location with good wind or solar resources, landowners who are interested in hosting our equipment, and proximity to transmission lines.

If I have land and want you to assess its suitability for a renewable energy project, how do I get you to come out to look at it?

We cannot guarantee that we will assess every parcel of land presented to us. However, you can contact us for more information.

How much land does a solar project require?

Typically, a project will require 5 to 8 acres of land for each megawatt of solar energy capacity.

Is there construction traffic?

Yes. During construction there will be additional traffic. Although the construction period is only a matter of months, it will require heavy equipment, including bulldozers, graders, trenching machines, concrete trucks, flatbed trucks and large cranes.

How long will it take to complete construction?

It depends on the size of the project. However, six to 12 months is a reasonable time frame to build most solar projects.

Ruth Nunn	from sun energy. Nanny. Lol	NEUTRAL
Steve Slaughter	There around 36 solar panels for never did use them	NEUTRAL
	References say that solar panels can produce up to 10% of rated energy on overcast days. So the other 9/10ths has to come from other sources.	
	That was never an issue with Henderson's coal fired plants.	
	The US Energy Dept says that non-steered solar panels only reach rated output for about 5 hours a day on clear sunny days. They produce much	
	less early in the morning when people need power to get ready to go to work and little power in later afternoons when people are coming home	
	from work and preparing the evening meal. Nothing at night when we need power for lighting, entertainment devices, and air conditioning, of	
	course.	
	So, we still have to ask, what meets demand when solar doesn't, and how does the forced idling of those non-solar plants in the middle of the work	
Delead Coffeen	day affect the busbar cost amortization? In other words, how much penalty is there for covering non-revenue costs when non-solar systems are	NEUTOAL
Roland Coffman	idled by solar? That has to be figured into the total system cost of solar.	NEUTRAL
Sebroo Solar	Roland, solar panels can actually use direct or indirect sunlight to generate power. Though they are most effective in direct sunlight, solar panels will still work even when the light is reflected or partially blocked by clouds. We invite you to learn more about the project: http://sor.ly/618/vE/F/	NEUTDAY

	the elder body of "JEHOVAH WITNESS"(I'm not one of them, and I have never been a Jehovah's witness or a member of the "WATCHTOWER	
	ORGANIZATION" (I Am A "SERVANT OF JEHOVAH" or "WITNESS FOR JEHOVAH" ??) Henderson ky congregation EXPELLED me from the kingdom Hall	
	on January 16th 2021 for addressing a Bible teachings that we all go to heaven and not just a 144,000 individuals (Revelation 7:9-14; Revelation	
	22:14) because it doesn't go along with the governing body teaches, so I realized they were just false religion(no difference than the RELIGIONS	
	they preach about) if they're not going to go along with the Bible teachings, if they're going to go by what the governing body teaches rather than	
	what the Bible teaches, and Brother Kregg woosley and brother Bruce Baily said they will escort me out of the kingdom Hall if I ever come back I am	
	no longer welcome and my invitation is revoked(is that the mark 🎔 of love Jesus said his disciples would have, expelling your brother and	
	friend(instead of addressing it and accepting it) for teaching Bible Truth??) I would also like to make clear I CONTACTED the WATCHTOWER	
	ORGANIZATION in New York and talked to brothers about the message they was teaching being false and shared SCRIPTURES and told them to	
	make sure the governing body received the message, but they still proceed to teach the lie, so I must shed light on the truth.(Luke 11:33) but like I	
	said, I was never baptized as a Jehovah's witness, I got baptized outside of the organization, so I'm not baptized into any religions or member of any	
	church, so I just actually follow Jesus Christ, he is my only leader (Matthew 23:10) I don't do churches anymore, he's going to destroy all the	
	religious sects, you don't want to be caught in those, no offense ??(Revelation 18:4) but I love talking to everybody about the Bible anyway, I want	
	everyone to follow Jesus Christ but I just don't want them to follow man, I just want people to follow the Bible for what it says, quit giving to	
	religious organizations or the church and their business(Jehovah's gift of everlasting life is free through faith in Jesus Christ Ransom sacrifice) if you	
	want to give gifts of Mercy just give to your neighbor, do something kind for them, show love to your neighbor, (just treat them like you want to be	
	treated) and not a church or business because Matthew 24 at the beginning Jesus said he was going to destroy the church(or Temple) and in 70AD	
	the church was destroyed that means we no longer have use for the church(you have use for ENCOURAGEMENT from LIKE-MINDED people and	
	ASSOCIATION) now we just FOLLOW JESUS CHRIST(he is OUR HIGH PRIEST) and live by the law of love, what you would have given to the church,	
	give to your neighbors(spread out over many people be a cheerful giver), help someone out in need, even a stranger, help that poor man out, buy	
	some one a meal, give your gifts of Mercy to them, not to a mans business, just follow Jesus Christ(a man asked Jesus a good question, "Who really	
	is my neighbor?" you'd be surprised to find out who Jesus said was actually his neighbor, and it wasn't the obvious choices for that time	
	period(Luke 10:29-37)), try not to practice sin and teach others about them, that right there is what true freedom is, I didn't realize it until they	
	actually expelled me, because I saw where Jesus said they would (John 16:2), J just got expelled for preaching the truth and I know I didn't do	
	anything wrong, so since I just got expelled for preaching the truth, that's when I understood the real truth and understood I wasn't meant to go	
	into captivity[John 8:32] as a Jehovah's witnesses(or in a False religion that just USES JEHOVAH GOD'S NAME(after all THEY had tried to PREDICT	
Ministration	THE END in 1975, 1925,1914(there might be more actually)and DBVIOUSLY THEY WERE NOT RIGHT[WRONG or FALSE(Deuteronomy 18:20-22), just We are clustered on the second s	NECATIVE
Nick Lewis	like the CHURCH OF JESUS CHRIST might uses JESUS name, BUT THEY ARE STILL CONSIDERED FALSE RELIGION), they should just use their ACTUAL	NEGATIVE
	I know Jehovah witnesses have been taught a lie that heaven is meant for a 144,000 people but the only place that there's a specific number	

mentioned of those who go to heaven is in Revelation and it gives a number of 144000 to go to heaven for specific purpose to be Kings and priests for a 1000 years(but notice 1st Corinthians comes before revelation we read the Bible from front to back not Back to front)...

JW's have been taught 1st Corinthians is only addressed to the 144,000(or the annointed) but notice in 1st Corinthians 1 who Paul is directing this letter to

1st Corinthians 1:2

to the congregation of God that is in Corinth, to you who have been sanctified in union with Christ Jesus, called to be holy ones, together with all those everywhere who are calling on the name of our Lord Jesus Christ... (we know the holy ones are the annoited but he also added in, "together with all those everywhere who are calling on the name of the Lord Jesus Christ" so this is for everybody who calls on the name of the Lord Jesus Christ, this is who this letter is addressed to

skip to 1st Corinthians 6.10

theres, gready people, drunkards, revilers, and extortioners WILL NOT INHERIT GOD'S KINGDOM(all servants of Jehovah will inherit God's Kingdom, that's our goal to get into that Kingdom)

skip ahead to 1st Corinthians 15:44

It is sown a physical body; it is raised up a spiritual body. If there is a physical body, there is also a spiritual one(the scripture says if there is a physical body there is a spiritual one that is a definite)

1st Corinthians 15

However, what is spiritual is not first. What is physical is first, and afterward what is spiritual. 47 The first man is from the earth and made of dust; the second man is from heaven (it says that our first life is from the earth, our second life is from heaven, although we will still inherit the Earth because the Bible says that but just like Jesus could transfigure a spiritual body on the mountain, as a perfect person, showing us that it can be Do you have any time solar panels that would heat an above ground pool? I have seen several on the market but was wondering if anything that you have would be comparable > , Awesome! Take the masks off !!!!

the elder body of "JEHOVAH WITNESS" (I'm not one of them, and I have never been a Jehovah's witness or a member of the "WATCHTOWER ORGANIZATION" (I Am A "SERVANT OF JEHOVAH" or "WITNESS FOR JEHOVAH" ??) Henderson ky congregation EXPELLED me from the kingdom Hall on January 16th 2021 for addressing a Bible teachings that we all go to heaven and not just a 144,000 individuals (Revelation 7:9-14; Revelation 22:14) because it doesn't go along with the governing body teaches, so I realized they were just false religion(no difference than the RELIGIONS they preach about) if they're not going to go along with the Bible teachings, if they're going to go by what the governing body teaches rather than what the Bible teaches, and Brother Kregg woosley and brother Bruce Baily said they will escort me out of the kingdom Hall if I ever come back I am no longer welcome and my invitation is revoked(is that the mark 🖤 of love Jesus said his disciples would have, expelling your brother ar friend(instead of addressing it and accepting it) for teaching Bible Truth??) I would also like to make clear I CONTACTED the WATCHTOWER ORGANIZATION in New York and talked to brothers about the message they was teaching being false and shared SCRIPTURES and told them to make sure the governing body received the message, but they still proceed to teach the lie, so I must shed light on the truth.(Luke 11:33) but like I said, I was never baptized as a Jehovah's witness, I got baptized outside of the organization, so I'm not baptized into any religions or member of any church, so I just actually follow Jesus Christ, he is my only leader (Matthew 23:10) I don't do churches anymore, he's going to destroy all the religious sects, you don't want to be caught in those, no offense ??(Revelation 18:4) but I love talking to everybody about the Bible anyway, I want everyone to follow Jesus Christ but I just don't want them to follow man, I just want people to follow the Bible for what it says, quit giving to religious organizations or the church and their business(Jehovah's gift of everlasting life is free through faith in Jesus Christ Ransom sacrifice) if you want to give gifts of Mercy just give to your neighbor, do something kind for them, show love to your neighbor, (just treat them like you want to be treated) and not a church or business because Matthew 24 at the beginning Jesus said he was going to destroy the church(or Temple) and in 70AD the church was destroyed that means we no longer have use for the church(you have use for ENCOURAGEMENT from LIKE-MINDED people and ASSOCIATION) now we just FOLLOW JESUS CHRIST(he is OUR HIGH PRIEST) and live by the law of love, what you would have given to the church, give to your neighbors(spread out over many people be a cheerful giver), help someone out in need, even a stranger, help that poor man out, buy some one a meal, give your gifts of Mercy to them, not to a mans business, just follow Jesus Christ(a man asked Jesus a good question, "Who really is my neighbor?" you'd be surprised to find out who Jesus said was actually his neighbor, and it wasn't the obvious choices for that time period(Luke 10:29-37)), try not to practice sin and teach others about them, that right there is what true freedom is I didn't realize it until they actually expelled me, because I saw where Jesus said they would (John 16:2), I just got expelled for preaching the truth and I know I didn't do anything wrong, so since I just got expelled for preaching the truth, that's when I understood the real truth and understood I wasn't meant to go into captivity as a Jehovah's witnesses(or in a False religion that just USES JEHOVAH GOD'S NAME(after all THEY had tried to PREDICT THE END in 1975, 1925,1914(there might be more actually)and OBVIOUSLY THEY WERE NOT RIGHT(WRONG or FALSE(Deuteronomy 18:20-22), just like the CHURCH OF JESUS CHRIST might uses JESUS name, BUT THEY ARE STILL CONSIDERED FALSE RELIGION), they should just use their ACTUAL NAME

NEGATIVE

I know Jehovah witnesses have been taught a lie that heaven is meant for a 144,000 people... but the only place that there's a specific number mentioned of those who go to heaven is in Revelation and it gives a number of 144000 to go to heaven for specific purpose to be Kings and priests for a 1000 years(but notice 1st Corinthians comes before revelation we read the Bible from front to back not Back to front)...

JW's have been taught 1st Corinthians is only addressed to the 144,000(or the annointed) but notice in 1st Corinthians 1 who Paul is directing this letter to

1st Corinthians 1:2

to the congregation of God that is in Corinth, to you who have been sanctified in union with Christ Jesus, called to be holy ones, together with all those everywhere who are calling on the name of our Lord Jesus Christ..(we know the holy ones are the annoited but he also added in, "together with all those everywhere who are calling on the name of the Lord Jesus Christ" so this is for everybody who calls on the name of the Lord Jesus Christ "so this is for everybody who calls on the name of the Lord Jesus Christ. This is who this letter is addressed to

skip to 1st Corinthians 6:10

thieves, greedy people, drunkards, revilers, and extortioners WILL NOT INHERIT GOD'S KINGDOM(all servants of Jehovah will inherit God's Kingdom, that's our goal to get into that Kingdom)

skip ahead to 1st Corinthians 15:44

It is sown a physical body; it is raised up a spiritual body. If there is a physical body, there is also a spiritual one(the scripture says if there is a physical body there is a spiritual one that is a definite)

1st Corinthians 15 However, what is spiritual is not first. What is physical is first, and afterward what is spiritual. 47 The first man is from the earth and made of dust; the second man is from heaven (it says that our first life is from the earth, our second life is from heaven, although we will still inherit the Earth because the Bible says that but just like Jesus could transfigure a spiritual body on the mountain, as a perfect person, showing us that it can be POSITIVE Beautiful ?? Susan Shepherd	Why is it so hard to get mobile homes done with this? I have called and been told no we don't cover mobile home s.	NEGATIVE
	If anyone has any spiritual Bible related question, I would be happy to help you learn the truth about what the bible teaches(to the best of my	
	ability) That's why I do this work, so I can try to help save as many lives as possible before Armageddon remember Jehovah loves everyone of	
	you and don't want any who reads this message to die, so most IMPORTANTLY just get baptized(not into a religious organization or into a religion)	
	but by somebody who is baptized believes and puts faith in the Father(Jehovah God) and the Son (Jesus Christ) and the Holy Spirit(even if it's in a	
	inflatable swimming pool in your backyard, a lake or river on the side of the road, or just in your bathtub(that's what I had to do.)) Stop being led by	
	men(who can't judge you)and truly free yourself and start being led by Jesus Christ and Jehovah God (or what the Bible teaches) the ones who will	
	judge you Read your Bible daily(even if it's just 5 or 10 minutes a day, even a half a chapter a day (some spiritual food is better than spiritual	
	starvation) and try to apply what you learn in your life and grow close to Jehovah God and Jesus Christ personally on your own) and try live up to	
	your dedication by loving your neighbor as yourself, try not to be a greedy man, be generous with your things and give and help others in need	
	when you can, try not to practice sin and just teach others about Jehovah God and his son Jesus Christ and about the things you learn in the Bible	
	occasionally so they can have your hope and be saved to be able to gain access into the city of Heaven(Revelation 22:14) dont be foolish like they	
	was in Noah's day Please listen to Jehovah and follow Jesus Christ and let me try to help you acquire life saving knowledge before it's to late(I'll get back to you as soon as I can, I respond to alot of questions)	
	ger back to you as soon as really respond to alor of questions).	

SIDE NOTE: This message is in full support of Jehovah God's Kingdom.. I do not support any earthly politicians whatsoever.. this is not an earthly political message... If anything it's spiritual political message in support of Jehovah God's kingdom ruled by JEHOVAH'S SON AND CHOSEN KING JESUS CHRIST)

??Ezekiel 18:23?? "'Do I take any pleasure at all in the death of a wicked person?' declares the Sovereign Lord Jehovah. 'Do I not prefer that he turn away from his ways and keep living?'

NEUTRAL

Nick Lewis

??John 16:2??

I have said these things to you so that you may not be stumbled. 2 Men will expel you from the synagogue. In fact, the hour is coming when everyone who kills you will think he has offered a sacred service to God. 3 But they will do these things because they have not come to know either

everyone who kills you will think he has offered a sacred service to God. 3 But they will do these things because they have not come to know either the Father or me	
??! HAVE BEEN EXPELLED FROM THE KINGDOM HALL OF JEHOVAH'S WITNESSES OR THEIR SYNAGOGUE??	
On this day, on January 16 2021, BROTHER KREGG WOOSLEY(I will say he came out measuring sizes?? right off the bat and asked me how long I've	
been associated with the truth and I told him since I was 3, THE CHURCH was actually my first memories(but I slept a lot, i wasn't too interested,	
but I was forced to go, so I absorbed a lot of the information they taught through most of my childhood, so I've always had the basic understanding	
of the "GOVERNING BODY'S TEACHINGS" although It really wasn't interesting at all growing up) and said well that's nice and he said he gave his 1st	
talk at 4 years old, so it seems he should of had a better understanding since he's been reading the Bible longer than me??, but yet and still he	
couldn't piece together that he is not being taught what the Bible teaches.?? well thankfully I did, thanks to Jehovah God and my Lord and	
HEAVENLY ?? Jesus Christ ♥), and BROTHER BRUCE BAILEY(both ELDERS REPRESENTING the ENTIRE ELDER BODY) of the HENDERSON KENTUCKY CONGREGATION of JEHOVAH'S WITNESSES said I am NO LONGER ALLOWED to come to the meetings for JEHOVAH'S WITNESSES, if I come to the	
KINGDOM HALL they will ESCORT ME OUT, they said "THEY HAVE REVOKED MY INVITATION" (because I PROMOTE SCRIPTURE IDEAS that are NOT IN	
LINE with what the GOVERNING BODY teaches (NOTICE they did not say because I PROMOTE SCRIPTURAL IDEAS that are not in line with what "THE	
BIBLE TEACHES") and ALL I WANTED TO DO WAS JUST LISTEN (they won't even let me in the zoom meetings, just to listen) they also TRIED to	
REVOKE THE BAPTISM I RECEIVED from ANOTHER BAPTIZED BROTHER(AS IF THEY HAVE THE POWER OR AUTHORITY) because THEY SAID HE	
DOESN'T have the AUTHORITY to BAPTIZE me, although JESUS GAVE him the AUTHORITY to BAPTIZE me at MATTHEW 28:19 But TAKE HEART	
because JESUS actually TOLD ME they would do this at John 16:2, and I like to point out NOT BECAUSE I COMMITTED A SIN or DID ANYTHING BAD	
or DID BAD WORKS but ONLY because I'm promoting what the SCRIPTURES OR BIBLE TEACHES RIGHT OUT OF IT, THAT WE ALL GO TO HEAVEN AND NOT JUST A SELECT NUMBER OF 144,000 INDIVIDUALS (REVELATION 7: 9-14; REVELATION 22:14, WHEN I WAS TALKING TO BROTHER WOOSLEY I	
WAS HAVING HIM READ THE REVELATION 7: 9-14, AND HE AGREED THAT HE WAS PART OF THAT GROUP, THAT IT TALKS ABOUT AND I ASKED HIM	
TO READ REVELATION 22:14 AND I ASKED HIM, "HAVE YOU WASHED YOUR ROBES" AND HE SAID, "NO I HAVEN'T WASHED MY ROBES" SO I SAID	
'YOUR NOT BAPTIZED" HE SAID "YES HE IS" , SO YOU WASHED YOUR ROBES THEN? "NO I DIDN'T WASH MY ROBES", SO HE DOESN'T EVEN REALIZE	
THAT SCRIPTURE RELATES TO HIM ALSO SO DON'T GET SUCKED IN TO FALSE RELIGION, I MEAN I STILL LOVE THE BROTHER AND I HOPE HE THINKS	
ABOUT THE SCRIPTURES AND HE COMES TO HIS SENSES ALSO, WE BOTH WERE RAISED IN IT BUT I JUST SAW IT FOR WHAT IT WAS, HE'S MORE	
INVESTED BECAUSE IF HE LEAVES THEY'RE GOING TO BE DONE WITH HIM, JUST LIKE HOW THEY PUSHED ME OUT(LUCKILY JEHOVAH TAUGHT ME Kevin, we always seek to hire as many people as possible from the project area. If you or someone you know is interested in learning more about	POSITIVE

Renee Ford	that works or has someone working in it.	NEUTRAL

NFUTRAL

POSITIVE NEUTRAL

If anyone has any spiritual Bible related question, I would be happy to help you learn the truth about what the bible teaches(to the best of my ability)... That's why I do this work, so I can try to help save as many lives as possible before Armageddom.. remember Jehovah loves everyone of you and don't want any who reads this message to die, so most IMPORTANTLY just get baptized(not into a religious organization or into a religion) but by somebody who believes and puts faith in the Father(Jehovah God) and the Son (Jesus Christ) and the Holy Spirit(even if it's in a inflatable swimming pool in your backyard, a lake or river on the side of the road, or just in your bathwitty(hat's what I had to do.)) Stop being led by men(who can't judge you)and truly free yourself and start being led by Jesus Christ and Jehovah God (son what the Bible teaches) the ones who will judge you. Read your Bible dail/(even if it's just 5 or 10 minutes a day, even a half a chapter a day (some spiritual food is better than spiritual starvation) and try to apply what you learn in your life and grow close to Jehovah God and his son Jesus Christ personally on your own) and try live up to your dedication by loving your neighbor as yourself, try not to be a greedy man, be generous with you things and give and help others in need when you can, try not to practice sin and just teach others about Jehovah God and his son Jesus Christ and about the things you learn in the Bible occasionally so they can have your hope and be saved to be able to gain access into the city of Heaven(Revelation 22:14).. dont be foolish like they was in Noah's day... Please listen to Jehovah to alot of questions).

SIDE NOTE: This message is in full support of Jehovah God's Kingdom.. I do not support any earthly politicians whatsoever.. this is not an earthly political message... If anything it's spiritual political message in support of Jehovah God's kingdom ruled by JEHOVAH'S SON AND CHOSEN KING IFSUS CHRISTI

??Ezekiel 18:23??

"'Do I take any pleasure at all in the death of a wicked person?' declares the Sovereign Lord Jehovah. 'Do I not prefer that he turn away from his ways and keep living?'

??Revelation 22??

"I am bearing witness to everyone who hears the words of the prophecy of this scroll: If anyone makes an addition to these things, God will add to him the plagues that are written in this scroll; 19 and if anyone takes anything away from the words of the scroll of this prophecy, God will take his portion away from the trees of life and out of the holy city things that are written about in this scroll.

So the entire elder body of Jehovah's witnesses (in Henderson KY) my particular congregation in my hometown said that they will not study with me anymore(as of January 13, 2021 they won't even allow me into the meeting, just to listen, that's not the way Jesus told his disciples to be, lacking love there), and not because I committed a sin, or because I did anything wrong but only because I believe what the Bible teaches about us all going to heaven (compare revelation 7:9-14 and revelation 22:14) over man or the "governing body" belief that just only 144,000 are going to heaven.. I showed two elders the scripture right out of the Bible, we read them together, they could not call me wrong but they said they refused to accept (but they showed me two scriptures Matthew 24:45,46 and Acts 17:11 but they expect me to accept (her in they refuse to accept it unless the governing body(or imperfect men) tells them it's true, even though it's clear as day in the Bible teaches it, they refuse to accept it unless the governing body(or imperfect men) tells them it's true, even though it's clear as day in the Bible) and they cauge it for themselves and there's supposed to follow what the Bible teaches they refuse to accept it unless those men(the governing body) say it's true. They said that I was trying to teach them (which I was and I will continue to try to teach and reach them and share the truth from the Bible) and they couldn't teach me because I only wanted to talk about what the Bible taught and study directly from the Bible and not from their Bible(asins, although the Bible is the spiritual food that saves you not man-made publications, they rather teach and have a Bible study from publications, although the Bible is the spiritual food that saves you not man-made publications, IS THAT THE MARK OF LOVE JESUS TALKED ABOUT HIS DISCIPLES WOULD HAVE) that there is the example of being led by men(publications) and NOT BEING LED

BY CHRIST(WHAT THE BIBLE TEACHES). (Matthew 23:8-10).. be sure to choose your teacher's wisely because if you follow their teachings(and they're wrong), you will suffer the same plagues (or punishments) the teachers you follow will if they're not teaching the complete truth(half truths are lies) because remember the Bible clearly says we are all supposed to inherit God's kingdom (1 Corinthians 6:9-10, Galatians 5:19-21) but the Bible also says that, if we have a physical body there is a spiritual body but flesh and blood cannot inherit God's kingdom(1st Corinthians 15:4, 1 Corinthians 15:50) if you're not teaching the complete truth even a little lie that the Bible does not teach you are false religion, choose your teacher's wisely, who will you serve? who do you belong? men(Satan) or Christ(the Bible) if you follow anything short of what the Bible teaches, and accept that group as your teachers you are in a sect of religion(those who practice sects will not inherit God's kingdom (Galatians 5:20) make sure the message which you preach is accurate with what the Bible teaches because anything that veers off what the Bible teaches even a little bit. The panels should be mounted on higher supports oc cattle and hoes can raze under them.

The parters should be mounted on higher supports so cattle and hogs can graze under them.	NEOTRAL

We don't need solar power, we have enough coal to last a long time Looks like crap and takes all that ground upuse coal its dependable.just think a bad storm its all torn up no powerTHEY dont tell price tag? We live in hobards. Interested in solar, but most likely can't afford set up If the panels were 8 ft. clear to ground and cables were under ground why not graze cattle????? Hi Gary, people have been safely living and working around solar panels for decades. Solar energy emits no pollution and the overall impact of solar on human health is overwhenlingly positive. Moders solar panels are made of materials typical of those found in electronic equipment and are encased, so they do not pose a concern for the water supply or public health. You can learn more on this topic here: http://spr.ly/6185HRUHd Malcolm, once operational, we are fully responsible for maintaining the solar project. Sebree Solar so does it just grow up unman-aged? Kara Melton Solar is cheaper, cleaner and healthier. Cadmium, arsenic, and lead leach from the panels into the ground water. Silane residues cause cancer. Solar cells, like windmills, are not being recycled because it costs more than the recovered materials are worth. So they wind up in landfills, contaminating our lands for generations. Peak Sun lasts for just 5 hours per sumny day. The other 19 hours, the panels produce little or no electricity. At night, when electric light is most needed to push back the darkness, solar panels don't work at all. So coal or nuclear plants are needed to provide that 19 hours of electricity, or massive toxic battery banks are needed. <l< td=""><td>NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL</td></l<>	NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL NEUTRAL

???? MY KINGDOM MINISTRY FOR MY GOD JEHOVAH ???? ??Ecclesiastics 11:6?? You do not know which will have success

Even if it appears that the Kingdom message we preach is not reaching the hearts of people, we should not underestimate the impact of our sowing work. Granted, many people do not listen to us, but they do observe us. They notice our neat attire, polite behavior, and warm smile. In time, our conduct may help some to see that their negative views about us may not be correct after all. Sergio and Olinda, pioneers, relate: "Because of illness, we did not go to the square for a while. When we returned, passersby asked, 'What happened? We missed you.'" Indeed, as long as we "do not let [our] hand rest" from sowing Kingdom seed, we have a valuable share in giving "a witness to all the nations." (Matt. 24:14) Above all, we have the deep joy that comes from knowing that we have Jehovah's approval, for he joyes all those who "bear fruit with endurance"!-Luke 8:15. w18.05 16 ¶16-18

SEBREE SOLAR PROJECT

YOU'RE INVITED to a MEET & GREET

Join us to learn more about Sebree Solar, an innovative solar project, proposed for Henderson County that will generate home-grown solar energy in Kentucky for years to come, while providing significant benefits to the local community. These benefits would include construction jobs and additional local tax revenue over the next 30 years, which can be used to enhance schools, roads and other essential services.

JOIN US

Mark your calendar to meet with us on **Thursday, Aug. 12** at Farmer & Frenchman Winery from 5:30 - 7:30 p.m.

12522 U.S. Highway 41 S, Robards, KY 42452

The Sebree Solar Project is proposed by a subsidiary of NextEra Energy Resources, LLC, an experienced community partner and the world's largest generator of wind and solar energy, with generating facilities across the U.S. and Canada.

We stopped by to discuss our project and appreciate the opportunity to speak in person.

Sebree Solar

Project update

Sebree Solar is an innovative solar project proposed for Henderson County. It is expected to generate significant positive economic impact for the region, including 300 construction jobs and an estimated \$12 million in tax revenue over the next 30 years. Pending all necessary approvals, the project would begin operations in late 2023. Features include:

- \$257 million project investment into the local area, over the next 30 years
- Photovoltaic solar arrays capable of generating up to 250 megawatts of clean, renewable, American-made energy

Virtual Public Meeting — Tues., March 30 at 6 p.m. CST You are invited to log in or call in to meet our team and discuss the proposed project. To join the meeting by phone, call 866-807-9684 and ask for the NextEra Energy call.

LEARN MORE

Get to know your developer John O'hair VI is the project director overseeing the Sebree Solar project. He meets with stakeholders and landowners to discuss project specifics, timelines and economic benefits.

CONTACT JOHN »

What do you look for in a site?

When building a renewable energy project, we generally look for a location with good wind or solar resources, landowners who are interested in hosting our equipment and proximity to transmission lines.

OTHER QUESTIONS »

Send to a friend: Do you know anyone interested in project updates and activities?

Sebree Solar, LLC Case No. 2021-00072

Application - Volume 1 Tab 7
Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 7 Volume 1, Tab 7

Filing Requirement

A summary of the efforts made by the applicant to locate the proposed facility on a site where existing electric generating facilities are located (KRS 278.706(2)(g))

Respondent: Lina Jensen

Sebree considered multiple factors when siting the Project. One important factor is its proximity to existing transmission infrastructure. The Project was sited near the Big Rivers Reid EHV 161 kV switchyard, located at the intersection of KY9004 and KY2097 in Webster County, Kentucky. The Project substation will be located central to the main solar array parcels, east of the intersection of State Road 283 and Robards Busby Station Road in Henderson County, Kentucky.

The solar panel arrays were located in proximity to the Project substation to the extent practicable to reduce the length of electric collection lines between the solar panel arrays and the Project substation. Location of the solar panel arrays is secondarily determined by land rights acquisition.

The Project was not co-located with an existing electric generating facility for several reasons. First, NEER and Sebree currently do not have any existing generating facilities operating in Kentucky. Second, utility scale solar economic feasibility is highly dependent on proximity to existing transmission infrastructure and regional solar energy rates. This Project site was located based on these key considerations. Lastly, opportunities to share facilities between solar and other types of electric generating facilities is mainly limited to the switchyard footprint.

Application - Volume 1 Tab 8

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 8 Volume 1, Tab 8

Filing Requirement

Proof of service of a copy of the application upon the chief executive officer of each county and municipal corporation in which the proposed facility is to be located, and upon the chief officer of each public agency charged with the duty of planning land use in the jurisdiction in which the facility is proposed to be located (KRS 278.706(2)(h))

Proof of service of a copy of the application upon the chief executive officer of each county and municipal corporation in which the proposed electric transmission line or carbon dioxide transmission pipeline is to be located, and upon the chief officer of each public agency charged with the duty of planning land use in the general area in which the line or pipeline is proposed to be located (KRS 278.714(2)(f))

Respondent: Lina Jensen

The Certificate of Service included within the Application provides proof of service of a copy of the Application to the required individuals. In further compliance with KRS 278.706(2)(h) and KRS 278.714(2)(f), Sebree is providing copies of the cover letters thar were mailed to the County Judge Executives of Henderson County and Webster County, the Executive Director of the Henderson City-County Planning and Zoning Commission and the Mayor of Robards. Hon. Brad Schneider Henderson County Judge-Executive 20 North Main Street Henderson, KY 42420

RE: Sebree Solar, LLC

Dear Judge Schneider:

Goss

ATTORNEYS AT LAW | PLLC

As you are aware, Sebree Solar, LLC ("Sebree") has been working to develop a 250 megawatt, solar-powered electric generating facility and transmission line in the Henderson County and Webster County community. We are grateful for the time and attention you have given Sebree and its representatives as they have visited the community over the past several months. An incredible amount of work has been done to bring this project to fruition.

We are excited to be able to give you an update on our progress and to inform you that a key milestone has been achieved. Today, Sebree is tendering its application for a construction certificate to the Kentucky State Board on Electric Generation and Transmission Siting ("Siting Board"). The case is docketed as Case No. 2021-00072 and may be accessed through the website of the Kentucky Public Service Commission at www.psc.ky.gov. In accordance with KRS 278.706(2)(h), we are very pleased to give you notice of this filing with the Siting Board and to present you with a copy of the application for your review.

Again, let me thank you for your time and reiterate Sebree's continuing desire to be a constructive partner in advancing the long-term interests of your community in the years ahead. Should you have any questions concerning the Sebree project, please feel free to reach out to myself or Ms. Lina Jensen, Sebree's project manager, at (832) 613-7247.

Sincerely,

David S. Samford

RE: Sebree Solar, LLC

Dear Judge Henry:

As you are aware, Sebree Solar, LLC ("Sebree") has been working to develop a 250 megawatt, solar-powered electric generating facility and transmission line in the Henderson County and Webster County community. We are grateful for the time and attention you have given Sebree and its representatives as they have visited the community over the past several months. An incredible amount of work has been done to bring this project to fruition.

We are excited to be able to give you an update on our progress and to inform you that a key milestone has been achieved. Today, Sebree is tendering its application for a construction certificate to the Kentucky State Board on Electric Generation and Transmission Siting ("Siting Board"). The case is docketed as Case No. 2021-00072 and may be accessed through the website of the Kentucky Public Service Commission at www.psc.ky.gov. In accordance with KRS 278.706(2)(h), we are very pleased to give you notice of this filing with the Siting Board and to present you with a copy of the application for your review.

Again, let me thank you for your time and reiterate Sebree's continuing desire to be a constructive partner in advancing the long-term interests of your community in the years ahead. Should you have any questions concerning the Sebree project, please feel free to reach out to myself or Ms. Lina Jensen, Sebree's project manager, at (832) 613-7247.

Sincerely,

David S. Samford

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 9 Volume 1, Tab 9

Filing Requirement

An analysis of the proposed facility's projected effect on the electricity transmission system in Kentucky (KRS 278.706(2)(i))

Respondent: Lina Jensen

Significant time and effort have been spent developing the interconnection for the Project. The analysis of the proposed facility's projected effect on the electricity transmission system in Kentucky was initiated in 2019 with Big Rivers as the Transmission Owner and Midcontinent Independent System Operator, Inc. ("MISO") as the Transmission Provider. The Sebree Project was assigned queue position number J1466. MISO has completed Phase 1 of these studies, with 2 additional phases remaining. The final results for this 2019 MISO Central queue cycle are expected in March 2022, with GIA execution expected in August 2022.

Attached is the following document for reference:

1. Executive Summary

This report presents the results of a System Impact Study (SIS) performed to evaluate the interconnection of the generators in the DPP 2019 Central Area Phase I Study Cycle. The study was performed under the direction of MISO and reviewed by an ad hoc study group. The ad hoc study group was formed to review the study scope, methodology, models and results. The ad hoc study group consisted of representatives from the interconnection customers and the following utility companies – Ameren (AMIL, AMMO, ATXI), Duke Energy (DEI), Hoosier Energy (HE), Indianapolis Power & Light Company (IPL), Northern Indiana Public Service Company (NIPSCO), Southern Illinois Power Cooperative (SIPC), Big Rivers Electric Corporation (BREC), Henderson Municipal Power & Light (HMP&L), Columbia Water & Light (CWLD), City Water Light & Power (CWLP) and Southern Indiana Gas & Electric Company (SIGE).

1.1. Project List

The original interconnection requests for the DPP 2019 Central Area Study Cycle had a total of 110 generation projects.

- Projects J1240, J1273, J1418, J1420, J1412, J1288, J1324, J1489 withdrew prior to the Phase I study. This left 102 projects being active for the DPP Phase I study process.
- 102 generation projects with a combined nameplate rating of 15,725.6 MW (ERIS) & 15,515.6 MW (NRIS) were studied in Phase I.

The 2019 DPP Phase I Central Area study was kicked off on June 23rd 2020 and consisted of the projects shown below in Table 1.

1.2. Total Network Upgrades

The cost allocation of Network Upgrades for the projects in the DPP 2019 Central Area Phase I Study Cycle reflects responsibilities for mitigating system impacts. The total cost of network upgrades is listed in Table 2 below. The costs for Network Upgrades are planning-level estimates and subject to revision in the facility studies.

Project —		ERIS Network Upgrades (\$)					Intercon Faciliti		Shared Network	Total Network Upgrade Cost for Milestone Calculation	M2 (\$)	M3 (\$)	M4 (\$)
	Thermal	Voltage	Stability	Short Circuit	Affected System	Deliverability	TO Network Upgrades	TO – Owned Direct Assigned	Upgrades (\$)	(\$)	IVIZ (\$)		
а	b	c	d	e	f	g	h	i	j	k = b+c+d+e+g+h+j	\$4,000/MW	10% of (k) from Phase I- M2	(20% of (k) from Phase II) – M2 – M3

Analyses performed demonstrate the following transmission facilities are required to reliably interconnect this group of generators to the transmission system. Energy Resource Interconnection Service (ERIS) Network Upgrades and Network Resource Interconnection Service (NRIS) Network Upgrades are shown in Table 3. Shared Network Upgrades are shown in Table 4.

Network Upgrade	Operating Company (TO)	GI Projects Requiring Upgrade for ERIS	GI Projects Requiring Upgrade for NRIS	Planning Level Cost Estimate (\$)	TO Self- Fund
J1039 - Montgomery 345 kV Bus Upgrade	AMMO	J1191 J1222 J1338 J1363 J1352 J1376 J1488 J1490		250,000	Yes

Table 4: Shared Network Upgrades (Planning level cost estimates)

Shared Network Upgrade	то	Higher queued projects associated with SNU	Study projects associated with SNU	Cost of solution (\$)
No Projects Met Criteria – N/A				

Note:

- 1) Details pertaining to upgrades, costs, and the execution plan for interconnection of the generating facility at the POI will be documented in the Facility Study for Interconnecting Generator.
- 2) Facilities that have been included as base case assumptions and the level of interconnection service that would be conditional upon these facilities being in service will be documented in the GIA (Generator Interconnection Agreement) for each respective GI request successfully achieving GIA execution.

2. FERC Order 827 Compliance Review

The Final Rule of FERC Order 827 "Reactive Power Requirements for Non-Synchronous Generation", which was issued June 16, 2016, stated that "Under this Final Rule, newly interconnecting non-synchronous generators that have not yet executed a Facilities Study Agreement as of the effective date of this Final Rule will be required to provide dynamic reactive power within the range of 0.95 leading to 0.95 lagging at the high-side of the generator substation." As such, this Final Rule applies to all non-synchronous (wind, solar, and battery storage) projects included in the DPP 2018 April Central study cycle.

In this study, the power factor at the high-side of the generator substation for each inverter based project was calculated and reviewed. The study method is to set Qgen of each study project at its Qmax, solve the case, then record the P and Q injection on the high side of the generator substation to calculate the lagging power factor (injecting VAR to the system). The same process is then repeated by setting Qgen at Qmin to calculate the leading power factor (absorbing VAR from the system).

The results show that all projects meets the requirement to maintain 0.95 leading power factor, however, four projects do not meet the requirement to provide reactive power capability corresponding to 0.95 lagging power factor, as highlighted in red below in **Table 5**. Additional reactive support will be needed for these projects to meet the FERC requirement on reactive power capability prior to the completion of their GIA.

	FE	RC Order 827				Steady	State (A	t Genera	tor Substa	ation)	
	_	Reactive Power	-	v	AR Injecti	on	v	'AR Absorbt	ion	Meet FERC	Add'l

3. Model Development and Study Assumptions

3.1. Base Case Models

The origin of the DPP 2019 Study Cycle Central models is the MTEP 19 models with the Bench Cases including all pre-queued projects and associated network upgrades, while the Study Cases contain all of the interconnection requests in DPP 2018 April Central Phase II, in addition to all the facilities in the Bench Cases.

- Bench Cases
 - DPP19C1-Phasel-2024SH-Bench_11202020.raw
 - DPP19C1-Phasel-2024SUM-Bench_11202020.raw
- <u>Study Cases</u>

 - o DPP19C1-Phasel-2024SH-Study-Discharge_11202020.raw
 - DPP19C1-Phasel-2024SUM-Study-Charging_11202020_NIPSCO LPC.raw
 - o DPP19C1-Phasel-2024SUM-Study-Discharging_11202020.raw

3.2. Monitored Elements

Under NERC category P0 conditions (system intact) branches were monitored for loading above the normal rating (PSS®E Rating A), and for NERC category P1-P7 conditions branches were monitored for emergency rating (PSS®E Rating B). Voltage limits were specified for system intact and contingent conditions as per applicable Transmission Owner Planning Criteria.

3.3. Contingencies

The following contingencies were considered in the steady state analysis:

- 1) NERC Category P0 (system intact -- no contingencies)
- 2) NERC Category P1 contingencies
 - a. Single element outages, at buses with a nominal voltage of 68 kV and above
 - b. Multiple element NERC Category P1 contingencies
- 3) NERC Category P2-P7 contingencies
- 4) For all the contingencies and post-disturbance analyses, cases were solved with transformer tap adjustment enabled, area interchange adjustment disabled, phase shifter adjustment disabled (fixed) and switched shunt adjustment enabled.

3.4. Study Methodology

Non-linear (AC) contingency analysis was performed on the benchmark and study cases, and the incremental impact of the DPP 2019 Central generating facilities was evaluated by comparing the steady state performance of the transmission system in the Bench and Study Cases. Analyses used PSS®E version 33.7.0 and TARA version 2001.

3.5. Performance Criteria

A branch is considered a thermal constraint if the following conditions are met:

- 1) The generator has a larger than twenty percent (20%) sensitivity factor on the overloaded facilities under post-contingent condition (see NERC TPL) or five percent (5%) sensitivity factor under systemintact condition, or
- 2) The overloaded facility or the overload-causing contingency is at generator's outlet, or
- 3) The megawatt impact due to the generator is greater than or equal to twenty percent (20%) of the applicable rating (normal or emergency) of the overloaded facility, or
- 4) For any other constrained facility, where none of the Study Generators meet one of the above criteria, however, the cumulative MW impact of the group of study generators is greater than twenty percent (20%) of the rating of the facility, then only those study generators whose individual MW impact is greater than five percent (5%) of the rating of the facility and has DF greater than five percent (5%) will be responsible for mitigating thecumulative MW impact constraint, or
- 5) Impacts on Affected Systems would be classified as Injection constraints based on the Affected Systems' criteria, or
- 6) Any other applicable Transmission Owner FERC filed Local Planning Criteria are met.

A bus is considered a voltage constraint if both of the following conditions are met:

- 1) The bus voltage is outside of the applicable normal or emergency limits for the post change case, and
- 2) The change in bus voltage is greater than 0.01 per unit

All generators must mitigate thermal injection constraints and voltage constraints in order to obtain any type of Interconnection Service. Further, all generators requesting Network Resource Interconnection Service (NRIS) must mitigate constraints found by using the Deliverability algorithm, to meet the system performance criteria for NERC category P1 events, if DFAX due to the study generator is equal to or greater than 5%.

4. Thermal Analysis

The thermal analysis results for the 2019 Central Study Cycle show generator projects J1191, J1197, J1198, J1199, J1200, J1201, J1202, J1204, J1213, J1216, J1222, J1225, J1227, J1231, J1232, J1233, J1234, J1235, J1241, J1254, J1263, J1265, J1266, J1268, J1269, J1271, J1272, J1274, J1275, J1276, J1289, J1295, J1296, J1299, J1301, J1303, J1306, J1308, J1311, J1318, J1323, J1330, J1332, J1333, J1334, J1335, J1336, J1338, J1339, J1340, J1342, J1348, J1352, J1353, J1354, J1355, J1356, J1357, J1358, J1360, J1363, J1369, J1376, J1378, J1381, J1382, J1383, J1385, J1386, J1387, J1388, J1390, J1391, J1392, J1393, J1396, J1398, J1405, J1407, J1408, J1409, J1419, J1422, J1447, J1448, J1450, J1453, J1454, J1457, J1464, J1466, J1475, J1481, J1482, J1488, and J1490 causing constraints. The details pertaining to the thermal analysis can be found in Appendix A – Ameren System Impact Study Report (CEII) and Appendix C – MISO ERIS Analysis (CEII).

5. Voltage Analysis

The voltage analysis results for 2019 Central Study Cycle show generator projects J1208, J1209, J1227, J1233, J1234, J1235, J1254, J1269, J1271, J1272, J1274, J1275, J1276, J1295, J1296, J1302, J1308, J1356, J1369, J1388, J1391, J1393, J1396, J1398, J1405, J1409, J1419, J1422, J1450, and J1466 cause voltage violations. The details pertaining to the voltage analysis can be found in Appendix C – MISO ERIS Analysis (CEII).

6. Stability Analysis

The MISO DPP and Ameren LPC stability analysis will be performed during Phase II. Results will be shared at that time.

7. Short Circuit Analysis

The short circuit analysis for the 2019 Central Study Cycle will be performed during Phase II. Results will be shared at that time.

8. Affected System Impact Study

The Affected Systems analysis for the 2019 Central Study Cycle will be performed during Phase II. Results will be shared at that time.

9. Deliverability Analysis

9.1. Introduction

Generator interconnection projects have to pass Generator Deliverability Study to be granted NRIS. If the generator is deemed not fully deliverable, the customer can choose either to change the project to an Energy Resource (ER) project or to proceed with the system upgrades that will make the generator fully deliverable. Generator Deliverability Study ensures that the Network Resources, on an aggregate basis, can meet the MISO aggregate load requirements during system peak condition without getting bottled up. The wind generators are tested at 100% of their maximum output level which then can be used to meet Resource Adequacy obligations, under Module E, of the MISO Transmission and Energy Market Tariff (TEMT).

MISO Generator Deliverability Study whitepaper describing the algorithm can be found in BPM 015 – Generation Interconnection, Appendix C.

9.2. Determining the MW Restriction

If one facility is overloaded based on the assessed "severe yet credible dispatch" scenario described in the study methodology, and the generator under study has a DF greater than 5%, part or all of its output is not deliverable. The restricted MW is calculated as following:

(MW restricted) = (worst loading – MW rating) / (generator sensitivity factor)

If the result is larger than the maximum output of the generator, 100% of this generator's output is not deliverable.

9.3. Deliverability Study Results

The limiting constraints (mon-con pairs) seen in the deliverability analysis for the 2019 Central Study Cycle are summarized in Appendix D – MISO Deliverability Analysis (CEII).

9.3.1. J1191

This generator is determined to be fully deliverable for 64.0 MW, contingent upon the system upgrades and contingent facilities identified in the NRIS analysis. Table 6 shows the NRIS results and cost estimates determined in the NRIS analysis.

Table 6: NRIS Results for J1191

Deliverable (NRIS) Amount in 2024 model: (Conditional on ERIS upgrades and case assumptions)	49.21	MW	76.89%	Constraints	1	
---	-------	----	--------	-------------	---	--

Next Upgrade for Higher NRIS Level (cumulative) (i.e. All upgrades must be made for 100% NRIS)	Level of Service Attainable (MW)	Distribution Factor	Associated with ERIS Network Upgrade	Projects Associated With ERIS Network Upgrade	Projects Associated With NRIS Constraint	NRIS Cost Allocated to Project (\$)	Total Cost of Upgrade (\$)
345992 7SPENCER 345 345435 7MAYWOOD 345 1 (Spencer Creek - Maywood 345 kV Line Rebuild/Upgrade)	64.0	0.1139	No	None	J1191 J1202 J1208 J1209 J1213 J1216 J1222 J1225 J1241 J1268 J1299 J1301 J1303 J1306 J1311 J1330 J1338 J1352 J1363 J1376 J1488 J1490	244,335	37,000,000

9.3.2. J1197

This generator is found to be fully deliverable for 75 MW without any network upgrades.

9.3.3. J1198

This generator is found to be fully deliverable for 51.8 MW without any network upgrades.

9.3.4. 1199

This generator is found to be fully deliverable for 20 MW without any network upgrades.

9.3.5. 1200

This generator is found to be fully deliverable for 24.2 MW without any network upgrades.

9.3.6. 1201

This generator is determined to be fully deliverable for 44.2 MW, contingent upon the system upgrades and contingent facilities identified in the NRIS analysis. Table 8 shows the NRIS results and cost estimates determined in the NRIS analysis.

Table 7: NRIS Results for J1201

Deliverable (NRIS) Amount in 2024 model: (Conditional on ERIS upgrades and case assumptions)	35.46	MW	80.23%	Constraints	1	
---	-------	----	--------	-------------	---	--

Next Upgrade for Higher NRIS Level (cumulative) (i.e. All upgrades must be made for 100% NRIS)	Level of Service Attainable (MW)	Distribution Factor	Associated with ERIS Network Upgrade	Projects Associated With ERIS Network Upgrade	Projects Associated With NRIS Constraint	NRIS Cost Allocated to Project (\$)	Total Cost of Upgrade (\$)
347955 7AUSTIN 345 270796 KINCAID ; B 345 1 (Kincaid - Austin 345 kV Line Rebuild/Upgrade)	44.2	0.0787	No	None	J1201 J1289 J1408 J1464	112,947	13,000,000

9.3.7. 1202

This generator is determined to be fully deliverable for 68.4 MW, contingent upon the system upgrades and contingent facilities identified in the NRIS analysis. Table 9 shows the NRIS results and cost estimates determined in the NRIS analysis.

Table 8: NRIS Results for J1202

Deliverable (NRIS) Amount in 2024 model: (Conditional on ERIS upgrades and case assumptions)	45.97	MW	67.21%	Constraints	1	
---	-------	----	--------	-------------	---	--

Next Upgrade for Higher NRIS Level (cumulative) (i.e. All upgrades must be made for 100% NRIS)	Level of Service Attainable (MW)	Distribution Factor	Associated with ERIS Network Upgrade	Projects Associated With ERIS Network Upgrade	Projects Associated With NRIS Constraint	NRIS Cost Allocated to Project (\$)	Total Cost of Upgrade (\$)

10. Cost Allocation

The cost allocation of Network Upgrades for the study group reflects responsibilities for mitigating system impacts based on Interconnection Customer-elected level of Network Resource Interconnection service as of the draft System Impact Study report date.

10.1. Cost Assumptions for Network Upgrades

The cost estimate for each network upgrade identified in System Impact Study was provided by the corresponding transmission owning company.

10.2. Cost Allocation Methodology

The costs of Network Upgrades (NU) for a set of generation projects (one or more sub-groups or entire group with identified NU) are allocated based on the MW impact from each project on the constrained facilities in the Study Case.

Cost Allocation Methodology for Thermal Constraints

- 1. With all Study Group generation projects dispatched in the Post Case, all thermal constraints are identified.
- 2. Distribution factor from each project on each constraint is obtained.
- 3. For each thermal constraint, the maximum MW contribution (increasing flow) from each project is then calculated in the Post Case without any network upgrades.
- 4. For each thermal constraint, the cost estimates for one or a subset of NU are provided by the corresponding Transmission Owner.
- 5. Then the cost of each NU is allocated based on the pro rata share of the MW contribution from each project on the constraints mitigated or partly mitigated by this NU. The methodology to determine the cost allocation of one NU is:

6. The total NU costs for each project are calculated if more than one NU is required.

Application - Volume 1 Tab 10

Kentucky State Board on Electric Generation and Transmission Siting Sebree Solar, LLC – Case No. 2021-00072 Application – Exhibit 10 Volume 1, Tab 10

Filing Requirement

An analysis of the proposed facility's economic impact on the affected region and the state (KRS 278.706(2)(j))

Respondent: Lina Jensen

Pursuant to KRS 278.706(2)(j), the attached Sebree Solar Project Economic Impact Analysis was prepared by Joshua Crawford, J.D., Executive Director at The Pegasus Institute, under the direction and supervision of Lina Jensen, on behalf of Sebree. The local and state tax analysis included in this report does not reflect tax abatement at any level. The Project does not have any tax abatement agreements in place currently but will be seeking a Payment-in-Lieu of Taxes ("PILOT") agreement with Henderson County, and also seeking tax abatement at the state level. Sebree will update the Kentucky Siting Board if an agreement is reached with local and/or state authorities regarding tax abatement, including any updated tax payment projections.

ABOUT PEGASUS INSTITUTE:

Pegasus Institute is a first of its kind, millennial-led, state-based think-tank. Our mission is to provide public policy research and solutions that help improve the lives of all Kentuckians. Pegasus Institute operates as an independent, non-partisan, privately funded research organization focused on state and local policies.

We believe that Kentucky has the potential to emerge as a national leader and a beacon of the New South. That potential can be unlocked with data-driven public policy solutions based in free market principles, individual liberty and responsibility, and effective, limited, and accountable government.

We produce research led by experts and subjected to peer-review prior to publication. To help ensure intellectual independence we do not accept government grants. All projects are designed with our central mission in mind, directed toward a 21st Century Kentucky.

1

Executive Summary

The solar industry is one of the fastest growing industries in the United States, far outpacing other energy sectors. This growth is expected to continue in the foreseeable future, with an anticipated compound annual growth rate of 17.32% between 2020 and 2025.ⁱ By 2050, solar electricity generation will make up more than half of all renewable energy, outgrowing wind, geothermal, and hydroelectric, which are expected to remain relatively constant.ⁱⁱ The solar industry is one of rapid growth in Kentucky as well, but one with considerable unrealized potential. At the end of 2020, one industry analysis found that the state ranks 48th in the nation for the amount of solar power being produced, trailing all but one of its neighbors.ⁱⁱⁱ

Solar presents a growth opportunity for the state, but several major companies have already adopted the technology. General Motors, which builds the Corvette exclusively in the Bowling Green, Kentucky facility and provides a source of tremendous economic and civil pride throughout the state, utilizes solar power at its plant, and has the largest solar array of any automaker in the state.^{iv} Several other projects have been approved or are expected to begin construction in the next two years.

Henderson County is situated in Western Kentucky directly across the Ohio River from Evansville, Indiana and is part of the Evansville metropolitan area. The Green River forms the county's eastern boundary. The county boasts a strong automotive, metalworking, logistics, and manufacturing base, all of which provide for employment numbers above average in multiple sectors. This provides for a balanced local economy, with companies like Tyson Foods, Gibbs Die Casting, and Century Aluminum providing a strong economic foundation. Despite this, the workforce of the county has shrunk by 6.5% since 2016, according to compiled numbers by the local economic development district.^v Household income in the county remains below state and national average by 20% and 35% respectively.^{vi}

The combined factors of a strong economic foundation and economic potential provide an ideal opportunity for the solar industry in Henderson County. The Sebree Solar Project will provide the region with up to 250 megawatts of renewable energy. Once completed, the project will be one of the largest solar operations in the state of Kentucky. The company expects a total investment of \$263 million over the course of the project on 1,200 acres of land in the county.

There are significant economic impacts expected as a result. The construction phase of the project will contribute approximately 300 one-time jobs over the course of the build, expected to take 1.5 - 2 years. We measure the direct payroll investment by the company during this phase to be \$24,000,000. The secondary impact of this investment, including both indirect and induced effects during the construction phase, will be an additional 86 jobs created in the region generating \$5,949,096 in payroll. In total, the construction phase alone will account for more than \$29,949,096 in payroll and 386 new jobs.

The long-term operational phase of the project will provide an additional \$7.3 million direct payroll investment. The permanent jobs created during that phase will have an average pay of \$80,000 per year. This is considerably higher than the average wage for jobs currently based in the county, which average \$42,892.

Once construction is completed, the land will be subject to property taxes in the respective counties, with considerable increases in revenue anticipated over their current uses. The site is expected to generate \$13.8 million in property tax revenue over the next 35 years.

In total, we estimate the community benefit of this project from the construction phase, operational phase, and property tax revenue will be \$50,249,096.

Solar Growth in the US

The solar industry is one of the fastest growing sectors in the United States. Since 2010, interlinked changes have occurred that has propelled the industry. Prices have fallen for both rooftop and utility scale solar generation, bringing costs down by more than 70%. For residential systems alone, in 2010, the average cost

was \$40,000. Today, the average cost is around \$18,000. This has allowed for a major boom in solar generation, increasing by 25x during the previous decade. Whereas in 2010 there were only a few dozen utility scale solar plants in the United States, by the end of the decade there were nearly 3,000. Employment in the industry has grown as well, more than doubling since 2010.^{vii}

Of new US electricity generation, the growth of solar has been unmatched. In 2010, only 4% of new generation capacity came from solar. By 2019, this reached 40%, and in 2021 was even higher at 43%. The percentage of electricity generated by fossil fuels has dropped significantly in the same time period, from 70% in 2010, to 62% by 2019.

This growth shows no sign of slowing. The industry is expected to grow at a compound annual growth rate of 17.32% between 2020 and 2025. Total solar installations are expected to grow from approximately 20 gigawatts in 2020, to over 50 gigawatts by 2030, with utility installations leading the way.

Solar Growth in Kentucky

Solar electricity generation has grown considerably in Kentucky over the last decade but at a slower pace than most neighboring states. It is difficult to establish the state's total solar generation operating capacity but at least one 2020 industry analysis found that

only one neighboring state was generating less electricity from solar than Kentucky. Most possessed a capacity more than double the Bluegrass State. Despite strong growth from 2010-2020, the solar industry is one of tremendous unrealized potential.

A 2020 report, primarily focused on residential usage, by the Solar Energy Industries Association found that Kentucky has 56.55 megawatts $\langle mw \rangle$ of solar installed, a dramatic increase from only 6.17mw in 2019. Despite the increase, the Commonwealth still ranked 48th in the nation in total solar capacity, dropping four spots year-overyear as other states outgrew Kentucky's capacity. The report estimates that the industry directly supports 1,362 employees between 41 solar companies.^{viii} Growth, as measured by residential megawatt capacity, is expected to increase by nearly 12x over the next 5 years to a projected 676.17mw in total. Though this growth is laudable, the state is still expected to be in the bottom third nationwide in overall solar power generation.^{ix}

A second report provides a view beyond residential utilization. The Kentucky Energy and Environmental Cabinet publishes a bi-annual report on Kentucky's energy production and consumption known at the Kentucky Energy Profile. The most recent profile, published in 2019, found that solar was last among all renewable energy sources. Measured in Btu, solar represented only 481 billion Btu of the 82.3 trillion Btu of energy generated from renewable sources. The report does however show that solar generation is the fastest growing with a 72.9% increase in gigawatt hours generated from the previous year. Neither report provides an exhaustive review of solar utilization in the state. Comprehensive data collection is needed but both provide valuable insights into the current status and trends in the commonwealth. At present, solar electricity generation represents a significant growth area with considerable increases in recent years and larger increases expected.

Economy of Henderson County

Henderson County, Kentucky has a population of 46,250 across 18,643 households. As of 2019, before the impacts of the coronavirus pandemic, 58.3% of the working age civilian population was in the workforce. The median household income in the county is \$48,926. In 2019, there were 16,450 jobs based in the county. The total payroll for jobs based in the county was \$705,573,000, meaning that the average wage for jobs based in the county equaled \$42,892.

Henderson County, Kentucky		
Estimated Population (2020)	46,250	
Number of Households	18,643	
Median Household Income	\$48,926	
Jobs Based in County	16,450	
Total Payroll Based in County	\$705,573,000	
Average Wage for Jobs Based in County	\$42,892	
Working Age Population in Labor Force	58.3%	

HENDERSON COUNTY

MEDIAN HOUSEHOLD INCOME

Case No. 2021-00072 App. Vol. 1 - Tab 10 - Attach A Page 11 of 25

The Site

The location of the project is near Robards, Kentucky, in Henderson County. The site is approximately 15 miles from Henderson, the county seat, and approximately 25 miles from Evansville, Indiana, the nearest Metropolitan Statistical Area. Robards is a home-rule city with a population just above 500. The site is near the Century Aluminum plant, which is the fourth largest private sector employer in the county. The proposed site is currently used for mixed agricultural purposes.

Direct Economic Impact

The Sebree Solar Project expects a total investment of \$263 million including land acquisition, site preparation, and equipment installation. Construction on the project is expected to last approximately 2 years and will employee an estimated 300 individuals. The estimated pay for these individuals will range from \$15-\$25 an hour.

The Bureau of Labor Statistics provides no listing specific to Kentucky for "Solar Photovoltaic Installer" but the national average annual wage for the position is \$46,850. Good inferences about other relevant occupations for the construction phase can be gleaned from similar occupations measured by the state. Construction managers can be expected to earn over \$80,000, heavy equipment operators around \$50,000, installers around \$45,000, electricians around \$53,000, and fencers \$30,000. Taking the median wage provided by the company, over the course of construction, the total direct payroll expenditure would equal an average wage of \$40,000.

Based on this, we can expect a direct payroll impact of \$24 million during the construction phase, which is expected to last approximately 2 years.

Job Type	Projected Average Wage
Construction Manager	\$80,000
Electricians	\$53,000
Heavy Equipment Operator	\$50,000
Installers	\$45,000
Fencers	\$30,000
National Average for Solar Photovoltaic Installer	\$46,850
Average Wage (All Jobs) Green River Solar LLC Project	\$40,000

Secondary Economic Impacts

Using an IMPLAN model to create a specific economic development estimate for the region, we can determine that there will be positive spin off effects, in addition to the direct investment.^x The model provides for the relevant project as "construction of new power and communications structure," which provides a guideline for the initial investment. The construction investment accounts for 2 years of projected payroll providing approximately 300 jobs. The projected wages of these jobs equals a payroll of \$24 million.

The IMPLAN model used provides detailed information secondary impacts, using the regional economy to estimate the benefits provided by increased household spending. This includes increases in the retail and service sectors as a result of direct compensation and subsequent consumption increases. The model likewise provides for impacts on local businesses, including predictions on how local supply chains might be utilized to meet project needs as well as additional sales that might support the project. These factors combine to predict the secondary impacts resulting from the initial investment. Using the metrics for the specific region, we project a secondary impact of an additional 86 jobs equaling \$5,949,096 in additional payroll. This will bring the total payroll impact of the construction phase to \$29,949,096 supporting a total of 386 jobs.

Other expenditures include \$1M KY economic impact for Development & Permitting costs, including legal counsel (~300k), public relations (~25k), permitting fees (200k for sitting board application, \$50k for other estimated permitting requirements), and anticipated environmental mitigation efforts (remainder of costs) - these are costs that will be spent or have already been spent in Kentucky.

Long Term Impacts

Once the project reaches the operational phase it will provide substantial primary and secondary long-term impacts. The proposed region does not currently have relevant comparable positions and provides no entries for "Electric Power Generation" because the proposed region does not currently have solar electricity jobs. The operational phase will provide for 3 permanent jobs with a projected average wage of \$80,000 per year. This projection aligns with similar projects in Maryland, North Carolina, and other similar sized projects in the broader region.

The positions are significant first because they will pay well above the regional income averages. The average household income in Henderson County is \$48,926. The permanent positions provided by the operational phase will be 42% above average household income respectively. Even more encouraging, the positions will be nearly double the average wage for a job in each county. The current average wage for jobs in Henderson County is \$48,926.^{xi}

This will yield a long term benefit of \$240,000 per year in direct payroll, accounting for \$7,300,000 of payroll over 35 years.

Economic Impact of Sebree Solar Operational Phase		
Average Wage for Henderson County Base Jobs	\$48,926	
Average Wage for Permanent Sebree Solar Positions	\$80,000	
Project Payroll Impact (35 Year)	\$7,300,000	

\$7,300,00

Tax Revenues

Four entities in Kentucky are permitted to levy property taxes; the state, school districts, local governments, and special taxing districts.^{xii} State property taxes are levied on real and tangible property and support the state's general fund. School districts are required by state law to levy property taxes at a minimum of 30 cents per \$100 of assessed value. Local governments set property taxes through county fiscal courts or city councils. Special taxing districts are the creation of local governments and might include fire districts, ambulance services, library services, soil conservation services, and others, as determined on the local level.

Henderson County levies property taxes on real estate and tangible property (tables below). School taxes in the county are considerably higher than the combined county taxes at 64 cents per \$100 valuation. Total county wide taxes, by contrast, amount to 32.1690 cents per \$100 valuation for real estate and 43.0358 cents per \$100 valuation for tangible property. This includes the jurisdiction of the Fiscal Court, Health services, Library, and Extension Services. In total, the combined property tax for all services plus schools amount to around 1 percent of the overall value.

Property tax estimates provided by the Sebree Solar Energy Project estimate an average of \$324,000 per year paid in property taxes. In total, the project will yield \$13.8 million in property taxes over the next 35 years, with approximately half of that amount supporting schools.

Similar projects have yielded dramatic increases in property tax values in the counties where solar installations occurred. A 2020 study by the North Carolina Sustainable Energy Association found increases in value ranging from 63% to over 5000%. Two North Carolina counties in the study were home to facilities of 200mw or larger with property tax revenues in the two increasing by an average of 1,486%. All 70 counties studied experienced a positive increase.^{xiii}

TT 1	0
Hender	son County
	Son Soundy

	County	State	Total Effective
Real Estate	1.0837%	0.12%	1.2037%
Personal Property	1.1356%	0.45%	1.5856%

	State Tax Rate
Solar Energy Generating Facilities	0.15%

* Solar energy generating facilities are considered manufacturing machinery, and are subject only to state tax rate of 0.15%

The local and state tax analysis included in this report does not reflect tax abatement at any level. The Project does not have any abatement agreements in place currently, but will be seeing a Payment-in-Lieu of Taxes (PILOT0 agreement with Henderson County, and also seeking tax abatement at the state level. Sebree Solar will update the Kentucky Sitting Board if an agreement is reached with local and/or state authorities regarding tax abatement, including any updated tax payment projections.

As well, please note that this doesn't take into account that merchant generation facilities are taxed as public service corporations.

Conclusion: Measured Impact

Impact	Economic Value
Total Projected Investment	\$263,000,000
Direct Construction Phase Payroll In- vestment	\$24,000,000
Secondary Construction Phase Payroll Impact (Indirect & Induced)	\$5,949,096
Total Construction Phase Payroll Impact	\$29,949,096
Direct Construction Phase Employment (Jobs)	300
Secondary Construction Phase Em- ployment Impact (Jobs)	86
Direct Operational Phase Payroll In- vestment (35 Year)	\$7,300,000
Lifetime Property Tax Revenue (35 Year)	\$13,800,000
Total Measured Investment	\$50,249,096
