funds.

The next item of business discussed, that being the proposed 2021-22 jail budget, wound up being tabled when questions arose about the cost of operating the facility.

Judge/Executive Craig White said keeping track of inmates could help the county reduce liability issues that may arise and it is a better way of keeping up with money that goes through the facility.

Clinton County Jailier Tracy Thurman seemed to approve of the e-jail system and has apparently received information about the program from the company.

Judge Craig asked White what the county could do if, within six months, they decided the program was not working for the local jail. White replied the county could opt out at any time and still keep all records the system had stored.

Magistrate Marcum also asked if the system could put inmate information on social media, with White answering yes.

The court took the presentation under advisement and took no official action last week, but may revisit the proposal at a later time.

After acknowledging a line item transfer, the court approved first reading of a \$277,029.63 2020-21 budget amendment that includes unanticipated revenue from different sources, including CARES Act

The Judicial Center project began a few months ago when the AOC (Administrative Office of the Courts) presented a proposal to the Clinton County Fiscal Court. The project will entail many steps, including land property selection, land purchase, and eventual construction, and could take a few years to reach completion.

It was noted earlier by court officials that all offices related to the Judicial Center would be moved from the existing court-house into the new facility, likely to be a two-story building, and that building will be located within the city limits of Albany.

More details on the Justice Center project will be published at meetings held and details become available.

On a motion by magistrate Ferguson, the court voted unanimously to advertise for bids on surplus equipment and set the sale date for Saturday, April 17.

Jailier Thurman then gave the monthly jail report, turning over booking and housing fees to the county.

The half-hour meeting was then adjourned.

The next regular meeting of Clinton Fiscal Court is scheduled for Thursday, April 15, at 5 p.m.

# Gov. Requests Major Disaster Declaration

Gov. Andy Beshear, on March 19, submitted a request to President Biden asking that a Major Disaster Declaration be issued for the severe winter storm system that impacted Kentucky from February 8 through February 19, 2021.

Beshear issued a State of Emergency Order on February 11, 2021. Fifty-nine counties and 98 cities likewise issued local states of emergency orders.

"The impacts of February's ice and rain events were significant," Beshear said. "We are thankful for the many state and local agencies and organizations who rose to the occasion to help their neighbors.

Unfortunately, the damage a great number of our counties endured requires an additional response from the federal government before they can begin the recovery they desperately need."

The system produced heavy rain, hail, sleet, freezing rain, ice, and bitter arctic air which caused impassable roadways, massive power outages, water system failures, landslides, mudslides and disruption of critical government services.

The ice storm produced from the weather system left 154,500 Kentucky homes without power at the height of the event. There were four (4) confirmed casualties attributed to the

event.

The Kentucky National Guard was activated, with 90 personnel assisting with the clearing of roadways, evacuating at-risk citizens and conducting wellness checks.

The Governor's request seeks public assistance for the counties of Bath, Boyd, Boyle, Breathitt, Carter, Casey, Clark, Clay, Clinton, Elliott, Estill, Fleming, Floyd, Garrard, Greenup, Harlan, Jackson, Johnson, Laurel, Lawrence, Lee, Leslie, Lewis, Lincoln, Madison, Magoffin, Marion, Martin, McCreary, Menifee, Mercer, Morgan, Montgomery, Nicholas, Nelson, Owsley, Perry, Powell, Pulaski, Rockcastle, Rowan, Wayne, Whitley and Wolfe. Damages assessed by state, local and federal representatives are projected to exceed \$30 million. A request for additional counties may follow as damage assessments are ongoing.

The Federal Emergency Management Agency Public Assistance Program

provides funding to eligible applicants for allowable costs associated with debris removal, emergency protective actions and restoration of impacted infrastructure.

"The recent ice-storm damage to the state's electrical infrastructure was significant, and in some regions reminiscent of the debilitating event of 2009," said Michael Dossett, director of the Kentucky Division of Emergency Management (KYEM). "Our eastern counties were hit hardest and in some cases, homeowners were without power for many days"

"With the Governor's submission today, we are hopeful for federal assistance to repair and restore our infrastructure and the damage to county utilities in furtherance of the protection and safety of our communities and citizens," Dossett added.

The request for a FEMA presidential disaster declaration is a complex process which includes time to conduct damage assessments following severe weather events. Both involve local, state and

federal officials review of the damages and the estimated repair costs. Following the submission of the request for a federal declaration, the decision process typically takes thirty days before FEMA issues a finding.

In the separate incidence of record flooding across the commonwealth, FEMA and KYEM assessment teams are presently reviewing Individual Assistance reports from homeowners who were displaced and suffered damages as a result of that flooding event. Next week, assessment teams will be working in 27 impact counties to gather Public Assistance reports for flooding damage to local infrastructure such as government buildings, public utilities, roadways and highways.

Residents with questions or additional reports of flood damage should contact their local county emergency management agency. For clean-up assistance, Kentuckians can contact the Kentucky Floods Cleanup Hotline at 800-451-1954 through March 26, 2021.

NOTICE

In accordance with the requirements of the Public Service Commission ("Commission") as set forth in KRS 5.001, Section 17 and KRS 5.002, Section 3, of the Rules and Regulations of the Commission, notice is hereby given to the member consumers of South Kentucky Rural Electric Cooperative Corporation ("South Kentucky") of a proposed rate adjustment. South Kentucky intends to propose an adjustment of its electricity rates to reflect the wholesale rate adjustment of its wholesale supplier, East Kentucky Power Cooperative, Inc., pursuant to KRS 278.45(2), by filing an application with the Commission on April 1, 2021. In Case No. 2021-00118, the application will request that the proposed rates become effective May 1, 2021. # FRANKFORT

family members.

That means that any story about either Gov. Beshear (both former prosecutors), Attorney General Cameron, the LMPD Officers involved in the Breonna Taylor case, and even the bill's sponsor (Rep. Blanton, a former KSP officer himself), would have been a crime if those officials claimed to have a "reasonable" fear of harm to themselves or their property.

Moreover, upon a request from a protected individual or their family member, newspapers would have been required to scrub their archives of all such stories - and individuals forced to scrub their social media feeds - or face the threat of prosecution or a lawsuit for punitive damages.

If these examples seem absurd and far-fetched to you: we agree.

But despite what legislators said about their bills, that is exactly what the proposed language would do.

And they likely would be on their way to being the law in Kentucky if not for the brave actions of a handful of legislators in both parties that stood up for the constitutional rights that all members claim to protect.

For example, Rep. Jason Nemes from Louisville made the key motion in the House Judiciary Committee to strip SB 48 of the unconstitutional proposal from Rep. Blanton that the committee had approved just minutes before.

Even after that succeeded, the bill rose again like a zombie on the House floor at the behest of Republican leadership, and likely would have passed had time not run out on the final day before the veto period - thanks, in large part, to the courageous (if somewhat tedious) actions of many members of the Democratic caucus, who slowed down the action on the House floor and prevented the passage of SB 48, SB 211, and other unconstitutional acts the Governor would have been powerless to stop with his veto pen.

Among the unconstitutional bills that did not make it far a vote was the "doxing" bill, SB 267.

That was one of many ways in which Frankfort tried to regulate what the citizens of the world can say about Kentucky residents.

Even as our state and federal courts repeatedly hold that Kentucky has no

power to police all online speech about Kentuckians, our General Assembly has tried to push through and pass bills that try to do just that.

Unfortunately, these bills are likely only a taste of what is to come.

Kentuckians can expect the General Assembly to keep pushing laws that will keep them in the dark about their elected leaders and public servants and punish them for any criticism of those same officials.

We can only hope that the courageous few - of both parties - will continue to stand up for the constitutional rights and transparency laws that are vital to a functioning democracy.

Those who take those aspects of our democracy for granted nearly lost them this year and could do so soon if we are not all vigilant together.

That means that we, as citizens, must do better by focusing on the right things, at the right time, with the urgency appropriate to the situation.

Too often we allow ourselves to be riled up

about the wrong things and allow more space for those who want to slip these unconstitutional bills through to do just that.

The past few weeks provide an object lesson.

Much of the ink spilled this session by certain transparency advocates concerned HB 312, a bill that modified the state's open records laws in certain respects.

The KPA was as surprised as anyone to see that bill, which was a mashup of proposals from prior sessions, come back when and how it did.

However, KPA had been in active dialogue for the past two years with the bill's sponsors and the Kentucky League of Cities over similar proposals.

Therefore, we reacted quickly and, within a matter of hours, secured changes to a proposal that really would have eviscerated the state's transparency laws (scuttling adoption of an expansive definition of "preliminary" records); preserving the rights of all media organizations (wherever located) to request records; and preventing new

exceptions that would have overturned hard-won court victories in favor of the public's right to know.

Yes, there are aspects of the bill that KPA opposes—such as the constitutionally dubious attempt to exempt the legislature from judicial review of its own open records decisions; that is why the KPA did not endorse the bill.

But by having a seat at the table we were able to blunt the bill's worst aspects and preserve the heart of the ORA from direct attack.

But you would not know that by reading the dramatic critiques of the bill, which portrayed minor, largely procedural changes - such as the use of a new standardized form - as a dramatic rollback of 40 years of transparency.

KPA would never stand by and watch that happen; nor would the authors, having spent decades actually litigating Open Records cases.

Rather, we continued to work doggedly behind-the-scenes to negotiate language that will protect the public's right to know, securing even more changes up until the very end of the process.

*Continued from page four*

By crying "self" about bills like HB 312—and a similar measure related to gruesome photos that is not likely to materially alter current law - certain transparency advocates threaten to do real harm.

In a time when the legislature seems set on undermining the First Amendment and the public's right to know, we must focus the public's attention on the real wolves at the door: bills that would substantively erode the Open Records law and trample on First Amendment rights.

We need to do the hard work to look past what is trending on social media and tell our elected representatives that their job is to protect our constitutional First Amendment rights - not their own feelings or those of favored constituents.

Jon L. Fleischaker and Michael P. Abate serve as outside General Counsel to the Kentucky Press Association. They practice media, and constitutional, and appellate law, among other things, at Kaplan Johnson Abate Kamp; Bird LLP in Louisville.
