Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

Thursday, April 1st at 7 PM

Zoom Audio Participant Number:

(929) 205-6099

meeting id: 82183496483 passcode: 550250

Zoom Web Participant Link:

www.bit.ly/RhudesSolar Passcode: Solar

Zoom Webinar ID: 821 8349 6483 Passcode: 550250

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

Thursday, April 1st at 7 PM

Zoom Audio Participant Number:

(929) 205-6099

meeting id: 82183496483 passcode: 550250

Zoom Web Participant Link:

www.bit.ly/RhudesSolar Passcode: Solar

Zoom Webinar ID: 821 8349 6483 Passcode: 550250

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

**Thursday, April 1st at 7 PM
Zoom Audio Participant Number:**

**(929) 205-6099
meeting id: 82183496483 passcode: 550250**

**Zoom Web Participant Link:
www.bit.ly/RhudesSolar Passcode: Solar
Zoom Webinar ID: 821 8349 6483 Passcode: 550250**

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry

Re: Rhudes Creek Solar Farm near Cecilia

Dear Neighbor:

Many of you may have heard from us previously when we hosted an open house in the fall. We are once again hosting a meeting, this time both in-person and virtually, to allow the community the opportunity to see the latest information about Rhudes Creek Solar. ibV Energy Partners continues to work to bring this economic opportunity to Hardin County.

As a company founded by veterans, ibV Energy Partners has specialized in providing comprehensive solar solutions for our U.S. clients. Currently, ibV Energy Partners is developing several projects in the southeast and we would like to introduce you to our proposed 100 MW Rhudes Creek Solar being planned outside Cecilia. With each project, we have tried to reach the highest standards and create a positive and long-lasting relationship with the local community.

In an effort to provide information to the public ibV Energy Partners will be hosting an in-person community meeting at the **Cecilia Ruritan Pavilion on Thursday, April 1, 2021 from 5:30 p.m.- 6:30 p.m.** For those who are unable to attend in-person, between 5:30 and 6:30, we will be hosting a virtual and in-person community meeting via Zoom immediately following the open house from **7:00 p.m. – 8:00 p.m.** (Information on how to register is included in this letter) We would like to invite you and your family to come and learn more about the Rhudes Creek Solar Farm project and get answers to your questions.

**Find out more about Rhudes Creek Solar.
Join a Virtual Video and Telephone Community Meeting.**

Thursday, April 1st at 7 PM

Zoom Audio Participant Number:

(929) 205-6099

meeting id: 82183496483 passcode: 550250

Zoom Web Participant Link:

www.bit.ly/RhudesSolar Passcode: Solar

Zoom Webinar ID: 821 8349 6483 Passcode: 550250

The events will be an opportunity for us to answer your questions about different aspects of solar development. To accommodate the guidelines recommended by the state of Kentucky, we are using an outdoor venue and you are free to come and go as you please between the hours of 5:30 p.m.- 6:30 p.m. During this time people will be allowed to enter the event, gather an information packet and check-in. After registration, you will have an opportunity to do a self-guided tour of display boards and speak with our staff regarding the Rhudes Creek Solar Farm.

Please feel free to bring your family members to this event, as we are looking to answer any questions or concerns you may have regarding the project. To RSVP for the event, please call **(270) 370-3531**.

Rhudes Creek Solar plans to construct and operate the 100 MW solar photovoltaic facility near your property. The solar technology used is photovoltaic, and the solar panels sit on racks that are up to 15 feet tall that rotate once per day on a North-South axis to track the sun throughout the day. The facility will contain solar panels, inverters, a battery energy storage system, a project substation transformer, an associated balance of wiring system, and an approximately 1.5 mile transmission line from the solar project to the KU transmission line. The Rhudes Creek Solar Project will be sited on approximately 869 acres of land.

Rhudes Creek Solar is required to file an application for construction and operation of the proposed facility. This application is subject to the approval of the Kentucky State Siting Board on Electric Generation and Transmission Siting, which can be reached at P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615, or via phone at (502) 564-3940.

Due to the COVID-19 pandemic, we will be following the State of Kentucky guidelines for gatherings under 250 people, as well as ibV's best practices for hosting a public event. We selected the Cecilia Ruritan Club Pavilion because it was outdoor venue that would allow enough room for adequate social distancing during the event.

- *Appropriate social distancing will be required of all attendees who are not in the same family unit.*
- *The event will be limited to no more than 50 people at a time.*
- *Masks will be required for all attendees and ibV staff -- no exceptions.*
- *We will provide masks for those who do not have their own.*
- *Provide Adequate Hand Sanitizer and Encourage Hand Washing*
- *Ensure Proper Sanitation and Conduct Daily Temperature/Health checks*
- *Participants will be allowed the opportunity to ask questions at each station.*

We look forward to hosting a safe and informational meeting. In the meantime, please do not hesitate to contact me with any questions, ideas, or concerns.

Respectfully,
Michael T. Barry
