RE: Purchased Water Adjustment-Application Deficiency

Dear Ms. BRIDWELL:

Ledbetter Water District hereby submits documents in response to a filing deficiency in PWA rate Case No. 2021-00158

Crittenden-Livingston Water District enacted a rate increase from \$ 2.83 cents per thousand to \$3.08 per thousand, increasing its wholesale rates, on March 23 2020. During this time I e-mailed and corresponded with PSC representatives for the purpose of doing a Purchased Water Adjustment (PWA), and due to my inexperience and this being my first PWA adjustment I did not file properly. I filled out a tariff form and had the chairman of the water district commission sign it. I sent documents to PSC staff for the purpose of obtaining a PWA. However I have been informed that I did not use the proper filing method. I thought that the filing had been completed. We started charging the rates at this time even though the tariff had not been properly updated from May 23 2019. As referred to in exhibit A. the rates on proposed tariff sheet I am sending are the rates currently being charged. At the times on this non filed tariff sheet these are the rates being filed.

When I was starting the filing for the 2021 PWA adjustment that is when I realized that I had not properly filed the 2020 PWA. The 2021 PWA from Crittenden Livingston will raise our rates from 3.08 to 3.34 per thousand which we will start being charged MAY 23 of this month, but we will not charge these rates until I have properly filed for and have changed tariff showing that I have your permission to do so.

So in response to the questions in Appendix C:

1. Crittenden Livingston put the rates in effect March 23, 2020.
2. Although the documents for a PWA were sent to PSC staff in May 2020, a PWA was not properly filed with the Public Service Commission.
3. A. Ledbetter Water District is not currently charging the rates filed in the tariff dated May 23, 2019. The District is charging the rates shown on the attached Tariff sheet; Customer Charge \$7.74 Monthly Rate, then \$6.99 per 1,000 gallons for first 25,000 gallons, \$4.83 per 1,000 gallons all over 25,000 gallons. B. These rates were charged starting May 2020.
4. Ledbetter Water District will be filing a PWA in 2021 when we have permission to do so.

THIS IS SOLELY A MISTAKE DUE TO MY INEXPERIENCE AND I APPRECIATE THE PATIENCE AND HELP GIVEN TO ME.

ALAN FOX

DISTRICT MANAGER

Dear Ms Bridwell

For the rate case 2021-00158.

The PWA was put in affect March 23 2020 increasing rates from\$ 2.83 per thousand to \$ 3.08 per thousand .During this time I was getting assistance from psc staff for the pwa. I failed to upload to PSC the tariff sheet that my chairman sighned to your web site. I e_ _mailed it only.This was my first rate change for it was my first year taking the management position over and has been a learning experience. I did not realize that this mistake was made until I was is process of filing for our second phase and final one from Crittenden Livingston. During the application is when I was informed of the mistake. I believe I have corrected my mistake now and hope to move forward. If there is some kind of a instructional class that would be offered I would be glad to do so.

Thanks for assistance Alan Fox
