Re: Case No. 2021-00206

Dear Ms. Bridwell

Pursuant to the Commission's Order of July 8, 2021 in the above-referenced matter, enclosed for filing is Morgan County Water District's letter and invoice. This letter and the enclosed invoice are true and accurate copies in paper medium of the electronic version of the documents uploaded to the Public Service Commission's Electronic Filing System this day.

Summary of work: We are testing out new meters that are cellular instead of radio read. This will allow us to start replacing our old radio read meters and move to a cellular and cloud-based software system. We are currently testing 24 meters. This also includes software that shows delayed customer water usage and will help us locate customer leaks faster and more efficiently. The customer will also be able to log into our system and see their water use and they can set up text alerts when they have leaks on their side.

In accordance with 807 KAR 5:001, Section 8, I certify that Morgan County Water District's September 1, 2022 electronic filing of this Report is a true and accurate copy of the same document being filed in paper medium; that the electronic filing was transmitted to the Commission on September 1, 2022 by electronic means in this proceeding.

Sincerely,

A blue ink signature of Shannon W. Elam, written in a cursive style.

Shannon W. Elam

Re: Case No. 2021-00206

Dear Ms. Bridwell

Pursuant to the Commission's Order of July 8, 2021 in the above-referenced matter, enclosed for filing is Morgan County Water District's letter and invoice. This letter and the enclosed invoice are true and accurate copies in paper medium of the electronic version of the documents uploaded to the Public Service Commission's Electronic Filing System this day.

Summary of work: We have a main 6-inch water line located off Hwy 1010. The State Highway Department contacted MCWD to locate our line along a 300-foot section of road. There is a hump that has formed in the road that has been caused by water pushing the blacktop up. The State Highway Department informed us that they were digging 6 to 8 feet down to help get the water off the road. Therefore, we had to drill our water line 10+ feet in order to stay away from their construction. This will eliminate any future issues with the section of water line.

In accordance with 807 KAR 5:001, Section 8, I certify that Morgan County Water District's September 1, 2022 electronic filing of this Report is a true and accurate copy of the same document being filed in paper medium; that the electronic filing was transmitted to the Commission on September 1, 2022 by electronic means in this proceeding.

Sincerely,

A handwritten signature in blue ink that reads 'Shannon W. Elam'. The signature is fluid and cursive, with a long horizontal stroke at the end.

Shannon W. Elam
