## TREATED SEWAGE ADJUSTMENT FOR SEWER UTILITIES (807 KAR 5:075)

Name of Utility	Jessamine-South Elkhorn Water District, Sewer Division		
Date	July 16, 2021		
Address	P.O. Box 731, 802 South Main Street		
City, State, Zip	Nicholasville, Kentucky	40340	
Telephone Number	(859) 881-0589		
Email address	Jessamine.South@JSEWD	Jessamine.South@JSEWD.com	

1.a. Name of all providers and the base (current) rate and changed rate of each. In the event the utility is billed by the provider on a rate that is not a flat rate schedule, the entire rate schedule must be shown. Attach additional sheets if necessary.

Provider(s)	Base Rate	Changed Rate
LFUCG	\$6.75/100 cubic feet	\$7.03/100 cubic feet

1.b. A copy of the provider's notice of the changed rate showing the effective date of the increase is attached as **Exhibit** A

2. Twelve-month period upon which the treated sewage adjustment is based. (This twelve-month period must end within 90 days of this filing).

From	June, 2020	through	May, 2021
	(month and year)		(month and year)

3. Statement of sewage treated. Where sewage treatment is from more than one provider, sewage treatment from each provider must be shown separately. When water purchases are the basis for sewage treatment charges and the water is

purchased through a declining block rate schedule, purchases for each month must be shown. Attach additional sheets if necessary.		
Provider(s)	Gallons of Sewage Treated during 12-month period	
LFUCG	74,340,253.00	
TOTAL	74,340,253.00	
4. Total gallons of water sold for the 12-month period	74,340,253.00	
5. Increased cost	\$ 27,825.97	
The increased cost is the difference between the gallons of treated sewage at the base (current rate) and at the new rate. The calculation and all supporting documents used to determine the change in treated sewage costs sufficient to determine the accuracy of the calculation is attached as <b>Exhibit B</b>		
When water usage is the basis for the utility's sewage treatment charge, the treated sewage adjustment shall be calculated as a per-1,000-gallon factor.		
6. Treated sewage adjustment factor per 1,000 gallons*	\$0.38	
*The treated sewage adjustment factor is obtained by dividing the increased cost of the sewage treatment by the total gallons of water sold. (Number $5 \div$ (Number $4 \div 1,000$ )		
Note: The treated sewage adjustment factor is added to each thousand gallons sold. If the minimum usage is 2,000 gallons, then the treated sewage adjustment factor would be added to the minimum bill twice.		
Minimum bill: 2,000 gallons	\$26.08 + \$0.76 = \$26.84	
When the utility has a flat monthly rate the treated set be calculated as a flat monthly amount to be added to	• •	
7. Number of customers or Residential Equivalents	(JSEWD does not have a residential equivalent rate)	

8. Treated sewage adjustment (amount to be added to current monthly bill) **	(JSEWD does not have a residential equivalent rate)		
9. A schedule listing the current and proposed rates is attached as <b>Exhibit C</b>			
10. A copy of the resolution or other document of the utility's governing body authorizing the proposed rates is attached as <b>Exhibit D</b>			
11. Proposed effective date	July 1, 2021
