Re: Intervention in Case No. 2021-00346

Dear Ms. Bridewell:

Thank you for ruling on my behalf, that I have a special interest which, is not otherwise adequately represented in this proceeding. Your order was entered on December 7, 2021.

As I have previously stated, I am a disabled person, living on a small farm in direct line of proposed transmission lines by Kentucky Electric Power. You have received numerous documents from me validating the irreparable damage to my family's health and the devastation which would occur. Pictures of (2) ponds are in the direct path of proposed transmission lines and excavation into a 95 acre water shed feeding them.

Kentucky Electric Power has “mislead” your commission in stating I don’t have a special interest, even though I have documented correspondence from them stating that I do. I am in the process of filing an official Kentucky Bar complaint, of an attorney lying in a civil proceeding to the commission. Kentucky Electric Power has asked your commission to give them “Confidential Treatment” for their route of transmission lines. K.P.S.C. ordered, KEP, this right. Why would they ask your commission to grant this, even though they have made public, the direction of transmission lines and property affected? What are they trying to hide if the landowners names, dates, amount paid prior to the K.P.S.C. entering an order? “RUBBER STAMP” by the K.P.S.C.!

Kentucky Electric Power submitted pictures and data, from a firm contracted by them to do a “BAT STUDY”, of the endangered species, namely the “Indiana Bat”. Their documents show this study was miles away from my farm. In any legal proceeding, a commission does not take one expert witness; an independent company is always appointed to give an unbiased opinion. I request your intervention in this matter!

In conclusion: You have received documentation from me which clearly illustrates, Kentucky Electric Power has their interests at heart and not the environment or my family’s health. The pictures you received, showing my ponds, and endangered species and historical artifact speak clearly for themselves, not me misleading the Kentucky Public Service Commission!

Sincerely
