RE: Laurel County Water District #2
Case No. 2021-00385 Response to Commission Order

Dear Ms. Bridwell

This filing is in response to the Commission's Order of November 1, 2022 in Case No. 2021-00385. Attached is a completed rate sufficiency review/rate study performed by a consultant contracted through Kentucky Rural Water Association. The study indicates that a 3.71 percent increase to current water rates is justified. However, the District feels that its current rates are sufficient and the absence of any further increase will not impair its ability to furnish water service. Therefore, the District requests it be relieved of any requirement to file a rate case within three years of the issuance of the final Order in this case. The District will continue to perform an annual review of its rate sufficiency per the Commission Order.

Sincerely,

Wanda Smith
Office Manager
