

Lyon County Water District

Justification for Transportation Costs

- I. 10 random work orders were pulled from Non recurring charge work orders, and an average round trip mileage of 19.78 miles was established
- II. The current fuel price of our supplier is \$3.19 per gallon, and an average fuel economy in our fleet of vehicles of 14.45 miles per gallon.
- III. The immediate cost of the trip was then calculated to be \$4.37 with additional expenses of vehicle maintenance and, "wear and tear to be determined at \$1.63 per trip.
