

## **Request for disbursement of water loss surcharge funds**

Garrison-Quincy-KY-O-Heights (Garrison Water) would like to request the use of Water Loss Surcharge funds in the amount of \$10,810.00 for the purchase of a Dynasonics Portable Transit Time / Doppler Ultrasonic Flow Meter (PN: DXNP-ABS-NN) as well as 6 vaults and lids to be used as access points to our lines. These prices are current and accurate. Currently, Garrison Water has \$21,559.26 in the water loss surcharge account.

These vaults will be left in the system to be used periodically when leaks are suspected on a particular sections of line. This flow meter is portable and useful throughout the system. It can detect the usage going through a certain portion of pipe. It will help determine high usage on sections of pipe in a minimal amount of time.
