**DIRECT TESTIMONY OF
STEPHAN T. HAYNES ON BEHALF OF
KENTUCKY POWER COMPANY
BEFORE THE PUBLIC SERVICE COMMISSION OF KENTUCKY**

CASE NO. 2021-00481

I. INTRODUCTION

1 **Q. PLEASE STATE YOUR NAME, POSITION, AND BUSINESS ADDRESS.**

2 A. My name is Stephan T. Haynes, and I am senior vice president, Strategy and
3 Transformation, for American Electric Power Service Corporation (“AEPSC”).
4 AEPSC is a wholly-owned subsidiary of American Electric Power Company, Inc.
5 (“AEP”) and provides engineering, regulatory, financing, accounting, and planning and
6 advisory services to subsidiaries of AEP, including Kentucky Power Company (the
7 “Company” or “Kentucky Power”). My business address is 1 Riverside Plaza,
8 Columbus, Ohio 43215.

9 **Q. ARE YOU THE SAME STEPHAN T. HAYNES WHO OFFERED DIRECT**
10 **TESTIMONY IN THIS PROCEEDING?**

11 A. Yes.

II. PURPOSE OF TESTIMONY

12 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?**

13 A. The purpose of my testimony is to respond to the allegations of Lane Kollen of J.
14 Kennedy and Associates, Inc. who submitted direct testimony on behalf of the Office
15 of Attorney General of the Commonwealth of Kentucky and Kentucky Industrial
16 Utility Customers, Inc. I will demonstrate that Witness Kollen presents a false narrative

1 to justify his theory that AEP should pay a more than half billion-dollar penalty to
 2 consummate the transaction. His result-oriented analysis of alleged past harms – which
 3 self-servingly yields a result nearly identical to the gain he incorrectly contends that
 4 AEP will realize on the transaction – is patently unreasonable. Equally importantly, it
 5 would send a singular negative message to current and future investors in regulated
 6 infrastructure in the Commonwealth if such draconian and unrealistic conditions are
 7 imposed as requested. My testimony further demonstrates that Mr. Kollen’s testimony
 8 regarding the value to Kentucky Power of current affiliate sharing agreements is
 9 overstated. Finally, I discuss how the prompt approval of the Mitchell Agreements is
 10 appropriate and will facilitate both the orderly transition of Kentucky Power to Liberty
 11 ownership and the prudent future management of the Mitchell Plant regardless of who
 12 owns Kentucky Power.

13 **Q. ARE YOU SPONSORING ANY EXHIBITS?**

14 A. I am sponsoring the following rebuttal exhibits:

| <u>EXHIBIT</u> | <u>DESCRIPTION</u> |
|----------------|--------------------------------------------------------|
| EXHIBIT STH-R1 | Kentucky Power Distribution and Transmission Transfers |

III. REBUTTAL OF PROPOSED TRANSACTION ALLEGATIONS OF WITNESS

KOLLEN

15 **Q. WHAT CRITICISMS OF THE PROPOSED TRANSACTION MADE BY**
 16 **WITNESS KOLLEN DO YOU ADDRESS IN YOUR TESTIMONY?**

17 A. The primary thrust of Witness Kollen’s testimony is that AEP should pay Kentucky
 18 Power \$578 million of an alleged \$585 million acquisition premium to be recorded as
 19 a regulatory liability for the benefit of customers as compensation for the alleged risk

1 and harms from the sale of Kentucky Power to Liberty. Setting aside the impropriety
2 of any alleged “penalty,” there is a fatal flaw in his testimony because he fails to
3 calculate the actual gain experienced by AEP. Witness Llande address the fundamental
4 error in Kollen’s calculation by showing that the actual amount of AEP’s after-tax gain
5 on the sale of Kentucky Power, based on bedrock accounting principles, is far smaller
6 than the gain Kollen imagines. I also show how it would be misguided as a matter of
7 policy in attracting business to the state to ask for the seller of a utility, AEP, to pay the
8 acquisition premium to Kentucky or its customers. In his testimony, Witness Kollen
9 also restates his arguments that the Commission should not approve the proposed
10 Mitchell Agreements. I address those allegations as well and show that the Agreements
11 should be approved expeditiously regardless of the sale of Kentucky Power. Finally, I
12 address Mr. Kollen’s flawed increased inventory cost calculation.

a. **Rebuttal of Witness Kollen’s Allegations Regarding the Concept of Reimbursing
Customers from the Gain**

13 **Q. DO YOU AGREE WITH MR. KOLLEN’S ALLEGATIONS AEP HAS A \$585**
14 **MILLION GAIN FROM THE TRANSACTION AND THAT IT SHOULD PAY**
15 **KENTUCKY POWER’S CUSTOMERS \$578 MILLION OF THAT AMOUNT**
16 **AS A PENALTY?**

17 **A.** Absolutely not. Witness Kollen’s argument that Kentucky Power has caused past
18 damages or future risks is flawed and is based on an attempt to capture a perceived
19 AEP gain that is erroneous. Mr. Kollen’s calculation of the acquisition premium
20 ignores well-accepted and fundamental accounting and tax principles applicable to
21 AEP. Instead of an objective study, Witness Kollen instead has engaged in a result-

1 oriented analysis in which he found alleged past harms and alleged future risks in an
2 amount that is almost the entire incorrectly assumed gain he puts forward. Indeed,
3 many of his alleged past harms relate to prior cases and Commission orders that he now
4 seeks to collaterally attack, as well as conditions included in the prior orders that were
5 spawned by his client's own positions in those proceedings. His analysis is a result-
6 oriented effort to find an amount as close to his calculated gain as possible,
7 notwithstanding the actual facts, and should be rejected out of hand.

8 **Q. HOW IS AEP'S AND KENTUCKY POWER'S RESPONSE TO KOLLEN'S**
9 **ALLEGATIONS ORGANIZED?**

10 A. I will address the effect that Witness Kollen's proposed penalty would have on
11 investment in Kentucky and investor sentiment on the business climate in Kentucky,
12 and also summarize the testimony of other witnesses that address the false
13 presumptions that give rise to the list of liabilities created to salvage that incorrectly
14 assumed gain. Specifically, Company Witness James Llende addresses Mr. Kollen's
15 erroneous calculation of AEP's gain from the sale of the Company. In addition, Mr.
16 Llende also addresses Witness Kollen's erroneous statements regarding the Company's
17 and AEP's taxes.

18 **Q. IS MR. KOLLEN'S CALCULATION OF THE 'ACQUISITION PREMIUM'**
19 **RECEIVED BY AEP THE GAIN THAT AEP WOULD RECEIVE BY**
20 **CLOSING THE SALE OF KENTUCKY POWER?**

21 A. No. What Mr. Kollen is trying to calculate as AEP's acquisition premium from a sale
22 of Kentucky Power would be called by accountants the 'after-tax accounting gain on
23 sale'. As Company Witness Llende shows, AEP's gain on the Kentucky Power sale

1 transaction is much smaller than the more than half billion-dollar amount calculated by
2 Witness Kollen.

3 **Q. WHAT IS FLAWED ABOUT MR. KOLLEN'S ASSUMPTION OF THE GAIN**
4 **RETAINED BY AEP TO FUND HIS ASSERTED HARM WITH AEP'S**
5 **DEPARTURE?**

6 A. Mr. Kollen ignores the full economic impact of this transaction on the books of
7 American Electric Power and provides the Commission with an incomplete analysis
8 of the financial result. Witness Llende explains that AEP's actual expected gain on
9 the sale of Kentucky Power is approximately \$40 million - around seven percent (7%)
10 of the \$585 million acquisition premium benefit that Mr. Kollen incorrectly contends
11 AEP will receive.

12 **Q. WHAT ELSE IS FLAWED ABOUT MR. KOLLEN'S REQUEST THAT AEP**
13 **PAY ITS SALE PREMIUM TO KENTUCKY CUSTOMERS?**

14 A. A share of stock in Kentucky Power is not analogous to an asset held by Kentucky
15 Power, a regulated utility. Regulatory principles in Kentucky require that Kentucky's
16 customers receive adequate, efficient and reasonable service at fair, just and
17 reasonable rates established by this Commission. The fact that Kentucky Power has
18 been unable to earn its authorized return over the past nine years shows not only how
19 AEP is exposed to those risks (which customers are not) but also how rates have been
20 kept artificially low (preventing Kentucky Power from earning its authorized return)
21 over a long period, which is a benefit to customers. For Witness Kollen to ask the
22 Commission to impose further financial harm on AEP through a result-oriented
23 position on the gain is inappropriate.

1 **Q. HOW MIGHT KOLLEN'S POSITION AFFECT INVESTOR THINKING**
2 **ABOUT INVESTING IN KENTUCKY?**

3 A. We know investors are watching this case closely for what it will reveal about the
4 state's business climate. Regulatory Research Associates, or RRA, a group within S&P
5 Global Commodity Insights, recently issued a report, RRA State Regulatory
6 Evaluations – Energy, indicating that investors are closely watching this proceeding for
7 what information it can provide about utility regulation in the state. As stated in the
8 report, “The [Kentucky] commission's composition has changed meaningfully during
9 the past year, and it is unclear whether the actions taken by the PSC in these cases are
10 indicative of a sustained move toward a more restrictive regulatory climate. The
11 proposed sale of American Electric Power Co. Inc.'s Kentucky Power Co. subsidiary
12 bears watching over the coming months.” That this transaction is of significant interest
13 to investors is confirmed by the investor calls of both AEP and Liberty since the
14 transaction's announcement in October 2021, in which numerous questions have been
15 raised by investors about the transaction and its likelihood of success.

16 Adopting the position for which Witness Kollen advocates and requiring the
17 seller of a utility to pay hundreds of millions of dollars in order to transfer its ownership
18 of a Kentucky utility to another multi-utility company is likely to have a significantly
19 chilling effect on investment in the Commonwealth.

20 **Q. ARE YOU AWARE OF ANY UTILITY ACQUISITIONS OR MERGERS THAT**
21 **HAVE REQUIRED THE SELLING COMPANY TO PAY PROCEEDS, GAINS**
22 **OR PREMIUMS TO THE UTILITY OR THE CUSTOMERS OF THE UTILITY**
23 **BEING SOLD?**

1 A. No. Although there are cases where, as part of a settlement, a customer benefits fund
2 has been agreed to by the acquiring company and intervenors, I am not aware of any
3 instance where the alleged gain on a transaction has been taken by a state regulatory
4 commission as part of discharging its responsibility to determine that a transaction is
5 in the public interest in accordance with applicable state laws. I further am not aware
6 of any transaction that either involved payment by a selling company, nor were any
7 proposed gains calculated using an approach like the unreasonable, over-inflated and
8 result-oriented analysis engaged in by Witness Kollen, which yields an unworkable
9 standard that would have a negative impact on investments in the Commonwealth.

10 **Q. WHAT IS YOUR CONCLUSION ABOUT AEP PAYING A PENALTY**
11 **EQUIVALENT TO A PORTION OF ITS GAIN ON THE SALE OF**
12 **KENTUCKY POWER TO CUSTOMERS?**

13 A. Customer benefits resulting from a sale or acquisition is a matter for the acquiring
14 company to consider as part of its customer benefits package, not an attempt to penalize
15 the selling company on the way out. Nothing should be required to be paid to customers
16 to consummate a transaction out of a gain from a transaction. It is just bad business
17 practice for the Commonwealth of Kentucky to be seen as requiring this type of sale
18 requirement and could make other companies think long and hard before seeking to
19 invest in a company in Kentucky. Furthermore, beyond the factually unsupported basis
20 for Mr. Kollen's conclusion that Kentucky Power's customers have been or will be
21 damaged by the past actions of the Company and the proposed transfer, it is my
22 understanding that the Commission lacks a legal basis to impose a penalty on the selling
23 owner of a regulated utility, or to award damages to customers

1 Any gain or loss received from the sales of Kentucky Power and Kentucky Transco
2 will be received by the shareholders of Kentucky Power and Kentucky Transco which
3 are American Electric Power, Inc. and AEP Transmission, LLC. Liberty is offering
4 customers many benefits including a rate holiday from the Big Sandy rider, a fund to
5 offset the costs of volatile fuel, and a commitment to seek securitization on generating
6 assets that could decrease customer bills. Those commitments from the acquiring
7 company that further place the transaction in the public interest should be the focus of
8 the proceeding. Without the consummation of the transaction, customers will not
9 receive those benefits, which are unparalleled.

b. **Rebuttal of Witness Kollen's Allegations Regarding the Loss of Affiliate Agreements**

Related to Inventory Sharing

10 **Q. HOW DOES WITNESS KOLLEN CALCULATE HIS ESTIMATE OF**
11 **INCREASED COST DUE TO LOSS OF SHARED INVENTORY AND SPARE**
12 **PARTS WITH AEP UTILITY AFFILIATES?**

13 A. Mr. Kollen provides a \$25 million estimate of the increase in materials and supplies
14 and inventories, which is materially overstated and ignores a major portion of the
15 shared inventory as it relates to generating plants. He provides no source for this
16 number, applies an actual financing cost, and then does a ten year net present value of
17 that increased financing cost. As shown below, this is an inaccurate simplification that
18 yields only a speculative result.

19 **Q. WILL THE CHANGE IN THE CURRENT AFFILIATE AGREEMENTS HAVE**
20 **AS LARGE AN IMPACT ON THE COMPANY INVENTORY AS WITNESS**
21 **KOLLEN PROJECTS?**

1 A. No. Witness Kollen's assumptions are grounded in the potential impacts of inventory
2 changes on Kentucky Power's generation facilities. Those facilities' relationship to
3 shared inventory will not materially change after the transfer. First and foremost, he
4 ignores the Mitchell Ownership Agreement and Mitchell O&M Agreement, under
5 which Wheeling Power Company will operate the Mitchell Plant. By being the
6 Mitchell operator, Wheeling will continue to have access to the shared spare parts
7 arrangement currently used by Kentucky Power as operator of Mitchell. Additionally,
8 the Big Sandy plant does not have any shared spare parts with other AEP generating
9 units and therefore does not currently benefit from affiliate sharing. Thus, because
10 Kentucky Power's access to generation spares will be unchanged, those spares should
11 be excluded. The exclusion of generation spares significantly reduces the inventory
12 and spare parts impacts, which are limited to Kentucky Power's transmission and
13 distribution operations.

14 **Q. HAVE YOU BEEN ABLE TO CALCULATE AN ESTIMATE OF THE IMPACT**
15 **OF THE CHANGE TO TRANSMISSION AND DISTRIBUTION INVENTORY**
16 **AND SPARE PARTS FROM KENTUCKY NOT BEING IN THE CURRENT**
17 **AFFILIATE AGREEMENTS?**

18 A. Yes. Based on actual Kentucky Power transmission and distribution inventory data for
19 the last two years and its actual cost of capital, Kentucky Power realizes an actual
20 financing benefit of \$58,000 using Mr. Kollen's approach. That amount equates to
21 \$0.42 million on a 10-year NPV basis, and as Mr. Balashov's testimony further
22 demonstrates, this alleged harm is negated through Liberty's inventory management.

1 **Q. PLEASE DESCRIBE HOW YOU CALCULATED KENTUCKY POWER'S**
2 **AFFILIATE SHARING BENEFIT.**

3 A. I obtained Kentucky Power inventory data from 2020 and 2021, analyzed the inventory
4 requests to move transmission and distribution parts and equipment between Kentucky
5 Power and affiliate companies, and calculated the total dollar amount of those inventory
6 transfers. The details of my analysis are shown in Exhibit STH-R1. The calculation
7 shows that over the last two years Kentucky Power net transferred out inventory to
8 AEP affiliates an average of a \$932,000 per year. I used the Company's last approved
9 weighted average cost of capital (WACC) of 6.19% for the financing cost/benefit and
10 the NPV calculation, rather than Kollen's use of 7.60% to calculate the annual
11 financing cost and 6.19% to calculate the 10-year NPV financing cost identified above.

12 **Q. BASED ON YOUR ANALYSIS, WHAT DO YOU CONCLUDE ABOUT**
13 **WITNESS KOLLEN'S AFFILIATE AGREEMENT ARGUMENT?**

14 A. Application of the actual transmission and distribution inventory data clearly shows the
15 impact to the Company is immaterial and based on the last two years would be a benefit
16 to the Company. I conclude that Witness Kollen's estimate is grossly in error versus
17 reality.

c. **Rebuttal of Witness Kollen's Allegations Regarding the Regulatory Approvals of**
The Proposed Mitchell Plant Operation and Maintenance Agreement And Mitchell

Ownership Agreement

18 **Q. IN HIS TESTIMONY, WITNESS KOLLEN REITERATES HIS OPPOSITION**
19 **TO THE MITCHELL AGREEMENTS, AND STATES THE COMMISSION**

1 **DOES NOT NEED TO RULE ON THEM IN CONJUNCTION WITH THE**
2 **TRANSACTION. WHAT DO YOU THINK OF HIS POSITION?**

3 A. The Commission should disregard Mr. Kollen’s comments and promptly issue an order
4 on the Mitchell Agreements as requested by the Company in Case 2021-00421. Mr.
5 Kollen is simply pressing his arguments in that case in a new forum. Mr. Kollen also
6 wades into his lay understanding of under what conditions the transaction could be
7 terminated by Liberty if the Mitchell Agreements are not approved. While Mr. Kollen
8 is incorrect in a number of his assertions about that issue, that is beside the point and a
9 distraction to the Commission’s review in this case. Mr. Kollen seeks to draw the
10 Commission and the parties into an issue that is irrelevant as to whether the
11 Commission should approve the transaction based on the public interest standard in
12 Kentucky Law.

13 **Q. SHOULD THE COMMISSION DELAY THE APPROVAL OF THE**
14 **MITCHELL AGREEMENTS TO AFTER THE APPROVAL OF LIBERTY’S**
15 **ACQUISITION OF KENTUCKY POWER?**

16 A. No. The Commission should approve the Mitchell Agreements in order to enable the
17 prudent operation of the Mitchell Plant into the future and enable those changes to
18 happen promptly with protections in place for Kentucky customers.
19 Delay in approving the proposed Mitchell Agreements would delay a number of critical
20 activities. It would delay the Effluent Limitation Guidelines (“ELG”) compliance
21 construction by Wheeling Power which has a date certain deadline to keep the plant
22 compliant. It would delay naming Wheeling Power as operator and put Wheeling in the
23 position of operating the plant and assuming the additional responsibilities around ELG

1 compliance. It would also delay the needed clarification of the changed process for
2 Mitchell Plant capital investment decisions and the allocation of those capital
3 investments between the two owners depending on whether the investment is a pre-
4 2028 investment or an investment made for post-2028. Finally, it would delay Liberty's
5 acquisition of Kentucky Power, which in turn delays the application of the benefits
6 proposed. The transaction cannot close until all approvals are received for the revised
7 Mitchell Agreements because those approvals are conditions precedent to closing the
8 transaction, as well as of significant overall importance to the future of Kentucky
9 Power, and hence of significant importance to Liberty as well. Thus, there is no reason
10 for the Commission to wait to approve the Mitchell Agreements, which are pending in
11 Case No. 2021-00421 and need to be addressed irrespective of the transaction in order
12 for Mitchell's owners to comply with this Commission's orders on ELG.

IV. CONCLUSION

13 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

14 A. Yes, it does.

Calculation of Kentucky Transaction Inventory Impact

| Kollen's Analysis | | | | | | | | | | | | |
|---------------------------------|----|-------|----------|----------|----------|----------|----------|----------|----------|----------|----------|---------------|
